

75Ω / 120Ω ADAPTER

GENERAL

The adapter converts a 120 Ω balanced (BNC-BNC) circuit to a 75 Ω balanced/unbalanced (RJ45) circuit.

CONFIGURATION

Set the switches located on either side of the adapter to the desired network settings. Use the same setting for both switches.

- To convert to a 75 Ω Balanced Circuit, set both switches to the Open position.
- To convert to a 75 Ω Unbalanced Circuit, set both switches to the Termed position.

WARRANTY

ADTRAN will replace or repair this product within the warranty period if it does not meet its published specifications or fails while in service. Warranty information can be found at www.adtran.com/warranty. USA and Canadian customer Feedback: (877) 457-9097, Document 414.
