Note: Line pool access codes and extension numbers are supplied by your System Administrator.

Making calls using Handsfree

1. Press instead of lifting the handset.

Holding Calls

1. Press . The ► flashes beside the line on hold.
2. Press the line key with the flashing ► to return to the call.

Automatic hold

Calls are put on hold automatically when you switch from one line to another.

Exclusive hold

Use Exclusive Hold () to keep a call on hold so that it can be retrieved only at your telephone.

System Administrator can program Handsfree for your telephone.

Switching between Handsfree and handset

1. Press and replace the handset to switch to Handsfree.
2. Pick up the handset to switch back.

Using Mute

1. Press to turn the microphone OFF.
2. Press again to turn the microphone ON.

Programming memory keys

About memory keys

Memory keys are the keys with indicators other than line or Handsfree keys. Memory keys store telephone numbers or feature codes to give you one-touch dialling or feature activation. You can change what a memory key does by just programming it with a new number or feature. You cannot program a line or Handsfree key.

Remember: Press * to check a memory or line key.

Programming memory keys

Erasing memory keys

1. If you are on a call or a line with dial tone, press or .
2. Press * .
3. Press the memory key you want to erase.
4. Press to erase the key.

Setting up the telephone

Connecting the cords

ATTENTION Before attempting to carry out any work on the telephone, ensure that the line cord is unplugged from the wall socket.

To remove any of the cords, squeeze the release latch on the plug and gently pull the plug from the socket.

Connect the handset cord to the jack labelled with the telephone icon and route the cord as shown.

If you are using a headset, route the cord along the channel in the base and connect the cord to the telephone jack that is marked with the headset icon.

Route the line cord through the stand and connect the cord to the telephone jack that is marked with the jack icon.

Attach the stand using either pair of slots; to raise the back of the telephone to its highest position, use these slots.

Once the above work is complete, plug the line cord back into its wall socket.

Notice

These telephones now conform to the latest standards in relation to the positioning of Q and Z on the number keys. The Q appears on key number 7 and the Z appears on key number 9.
