

Section 2 - Dial Plan Part 4

ine.com

Task 2.9

- Configure ILS to allow HQ and SB clusters to call each other using URI. SME must be configured as the HUB and HQ and SB clusters must be configured as spoke.
- All calls must display URI as the calling number.
- Verify by dialing `steve-rogers@ine.com` from the user “Tony Stark”.
- Verify by dialing `tony-stark@ine.com` from the user “Steve Rogers”.
- Also Ensure that Tony Stark advertises an alternate number 72022003. This pattern must be learned by SB.
- Site B user Steve Rogers must be able to dial this alternate number. Ensure display always show URI.
