

Section 3 - Unity Connection

ine.com

Task 3.3

- Integrate the SB UCM cluster and HQ Unity Connection using SCCP. Set the Voicemail pilot number to 3220. After the integration is completed you should be able to call into the voicemail pilot number from the user “Steve Rogers”.
- Make sure the local PSTN phone can leave a message by placing a call from line 2 to 19723033220. Use only one port on Unity Connection for the SB PhoneSystem.
- Call should be forwarded to the voicemail if the SB users are busy on a call.
- If the SB users do not answer the call, the call should be forwarded after 20 seconds.
- Do not modify Advanced settings in Jabber.
- PIN number should be set to 12345 and password as C1sc0123!
- The maximum number of calls on a line should be restricted to “1” call.
- Ensure MWI can be turned on using the number 3228.
- Ensure MWI can be turned off using the number 3229.
