

Section 5 - Cisco Expressway

ine.com

Task 5.2

- Configure MRA to allow users to log in to jabber remotely. Use the following information for MRA configuration:
 - Domain Name = ine.com
 - HQ CUCM and Expressway Core must use TLS to verify each other.
 - HQ IM_P and Expressway Core must use TLS to verify each other.
 - HQ Unity Connection and Expressway Core do not need to use TLS.
 - Public DNS server = External DNS machine(192.168.3.9).
 - Do not make any configuration changes on the firewall device.
 - Your task is complete when the HQ local user "Tony Stark" can log in to jabber from the Candidate PC located on the Internet.
 - Ensure PSTN can dial 14082022003 from line 1 and "Tony Stark" can answer the call from the Candidate PC.
 - Ensure the Presence status works.
