

## Section 6 - CMS

[ine.com](https://ine.com)

# Task 6.3

- Configure a SIP trunk between HQ CUCM and CMS to allow users and endpoints that are dialed into a CMS space to dial users and endpoints that are registered to the CUCM and vice versa.
- Configure an Interactive Voice Response on the CMS that will prompt callers to enter a Space ID to join a CMS space. Set the IVR to respond to extension 8888.
- Ensure Tony Stark can dial this IVR from the Jabber 1 PC.
- You are allowed to create a Route Pattern on HQ UCM to achieve this.
