#### NOTE:

Applying this patch to the 3PAR OS might restart the affected OS components. With these
restarts, events and alerts might be generated and this is an expected behavior. The system
continues to serve data, but existing CLI or SSMC sessions might be interrupted.

- Hewlett Packard Enterprise recommends installing patches in the same sequence as they are released, unless instructed otherwise.
- When displaying the showversion command output from the SP, the CLI Client version is fixed in the SP code and may differ from the output from any other system.

### **Modifications**

Patch 95 provides firmware updates for the following 3PAR StoreServ Storage drive models:

**NOTE:** The size of the AREA15T4S5xnNTRI and AREA15T4S5xnFTRI drive models were reported incorrect in the previous release; it has been corrected in this patch.

## Affected components

Component	Version
Firmware Database	3.2.2.710 (P95)
Drive Firmware	3.2.2.710 (P95)

## **Installing Drive Firmware**

After a firmware patch is installed successfully, the firmware (drive or cage) must be updated manually. To update the firmware, run the CLI command starttask admithw -ni. This command runs the update process as a task. Record the task ID for monitoring purposes. Monitor the task for successful completion using the CLI command showtask -d <task\_ID>. See the appropriate upgrade documentation for details on patch installation. If the task fails, resolve the issue due to which the task

failed. After the issue is resolved, issue the CLI command starttask admithw -ni. Note the new task ID number and monitor the admithw task completion.

## **Verification**

The installation of P95 can be verified from an interactive CLI session. Issue the CLI command showversion -a -b to verify that P95 is listed.

#### IMPORTANT:

Access to some updates might require product entitlement when accessed through the Hewlett Packard Enterprise Support Center. You must have an HPE Passport set up with relevant entitlements.

## **Customer self repair**

Hewlett Packard Enterprise customer self repair (CSR) programs allow you to repair your product. If a CSR part needs to be replaced, it will be shipped directly to you so that you can install it at your convenience.

Some parts do not qualify for CSR. Your Hewlett Packard Enterprise authorized service provider will determine whether a repair can be accomplished by CSR.

For more information about CSR, contact your local service provider or go to the CSR website:

http://www.hpe.com/support/selfrepair

## Remote support

Remote support is available with supported devices as part of your warranty or contractual support agreement. It provides intelligent event diagnosis, and automatic, secure submission of hardware event notifications to Hewlett Packard Enterprise, which will initiate a fast and accurate resolution based on your product's service level. Hewlett Packard Enterprise strongly recommends that you register your device for remote support.

If your product includes additional remote support details, use search to locate that information.
