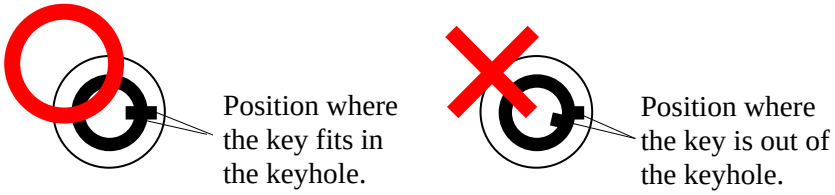
3. Hardware Installation

3.1 Common Item of Installation and De-Installation

3.1.1 Bezel Opening-Closing Procedure

Notice:
- Insert the key all the way in the keyhole and turn the key while pressing it to lock or unlock the Bezel. Turning the key without inserting it all the way in the keyhole can cause a key damage.
- When taking out the key after the Bezel is locked, take out the key exactly the position where the keyhole fits all the way in with the key.
  Taking out the key before it fits all the way in the keyhole causes key damage.



- Taking out the key is not possible when the Bezel is open. Forcibly turning to take out the key causes a key damage. (Refer to the page INST03-01-50 when taking out the key with Bezel opened.)

1. DKC Bezel

   DKC Bezel Opening Procedure

   a. Insert the key into the Bezel keyhole, and turn the key 90 degrees clockwise direction to unlock. (The stopper of the left side of the Bezel is also unlocked, and the Bezel can be opened.)

   b. Open the bezel by pulling the pocket door pull.

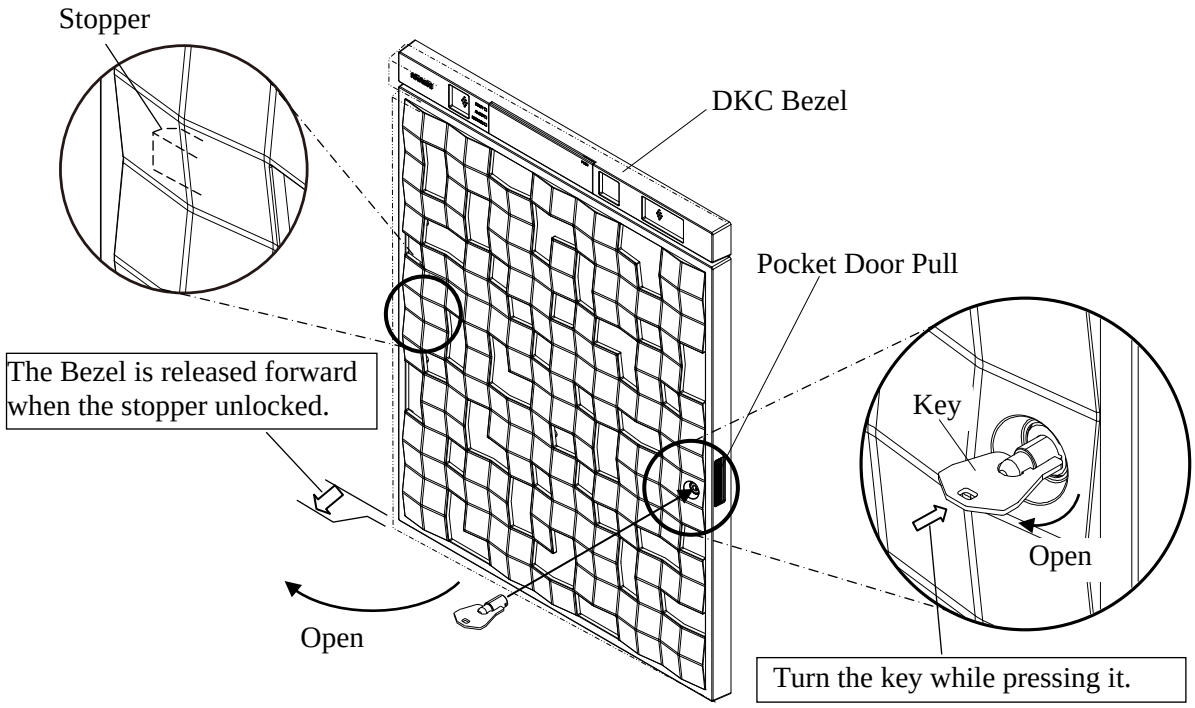


Fig. 3.1.1-1 DKC Bezel Opening Procedure

Copyright © 2010, Hitachi, Ltd.

DKC Bezel Closing Procedure

a. Closing the bezel by pushing the pocket door pull.
b. Turn the key 90 degrees counterclockwise direction to lock the Bezel, and take out the key from the keyhole.
c. Push the left middle side of the Bezel until it clicks.

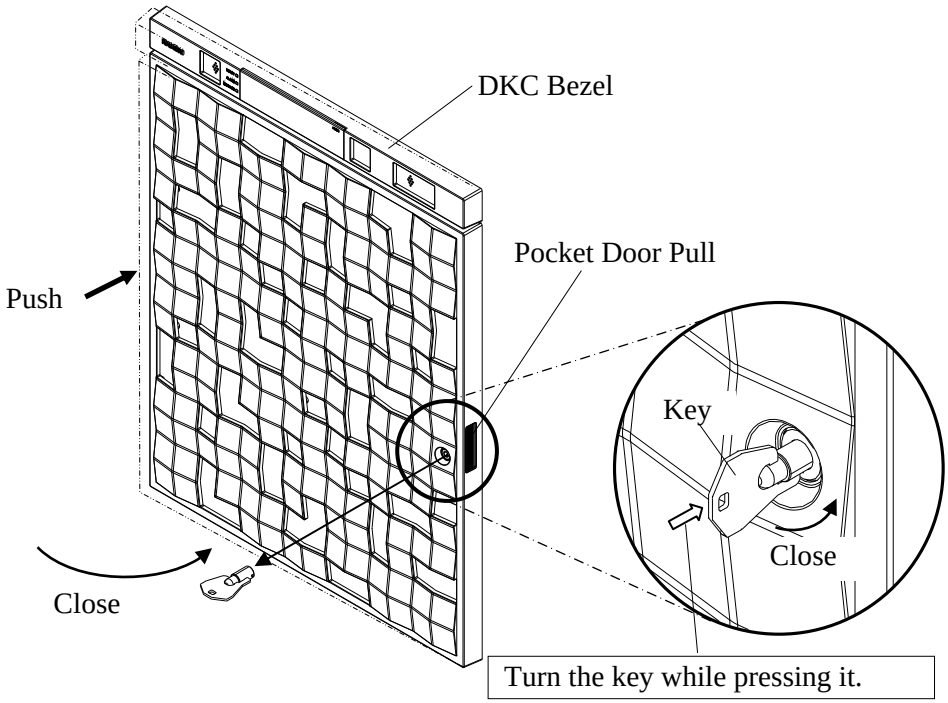

Fig. 3.1.1-2 DKC Bezel Closing Procedure

Copyright © 2010, Hitachi, Ltd.

2. Operator Panel

Operator Panel Opening Procedure

a. Push the “PUSH” as it is shown in the upper part of the operator panel, and open the operator panel.

Operator Panel Closing Procedure

a. Close the operator panel and push the “PUSH” part until it clicks.

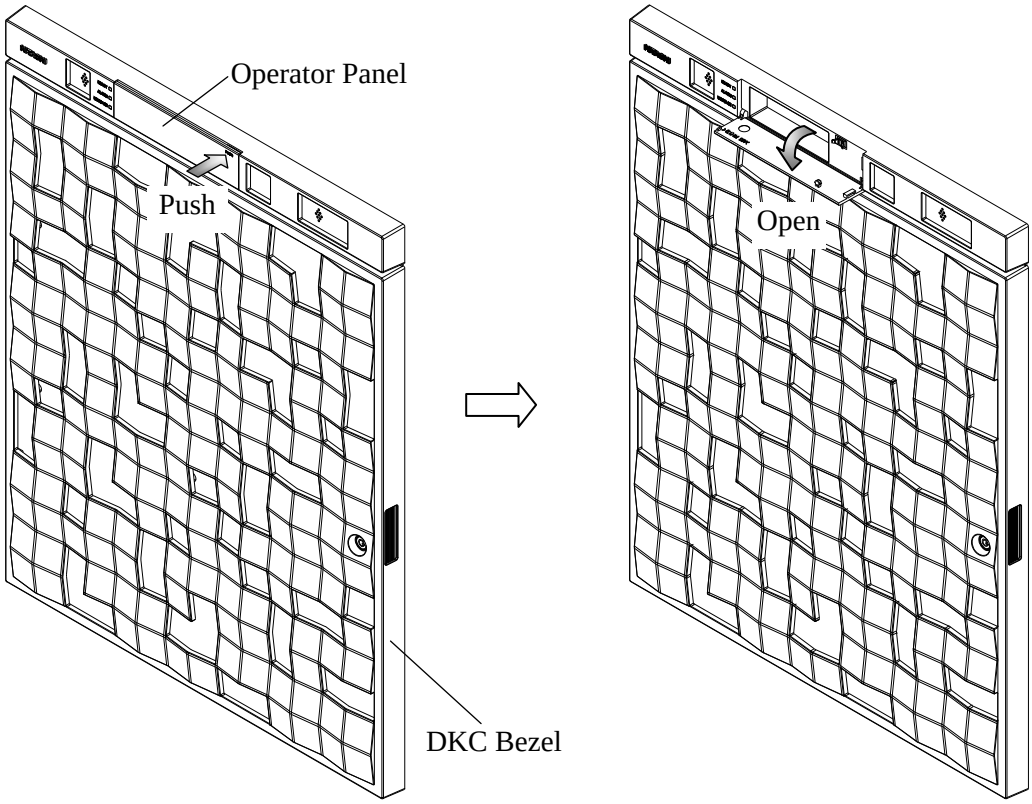

Fig. 3.1.1-3 Operator Panel Opening-Closing Procedure

Copyright © 2010, Hitachi, Ltd.

3. DKU Bezel

DKU Bezel Opening Procedure

a. Insert the key into the Bezel keyhole, and turn the key 90 degrees clockwise direction to unlock. (The stopper of the left side of the Bezel is also unlocked, and the Bezel can be opened.)
b. Open the bezel by pulling the pocket door pull.

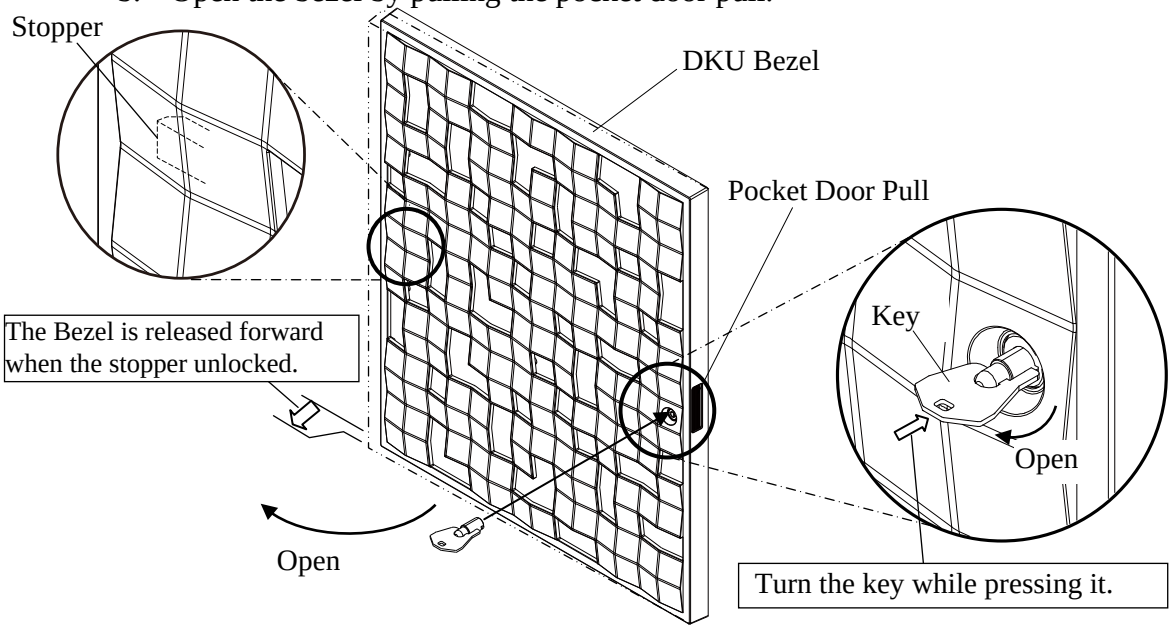

Fig. 3.1.1-4 DKU Bezel Opening Procedure

DKU Bezel Closing Procedure

a. Closing the bezel by pushing the pocket door pull.
b. Turn the key 90 degrees counterclockwise direction to lock the Bezel, and take out the key from the keyhole.
c. Push the left middle side of the Bezel until it clicks.

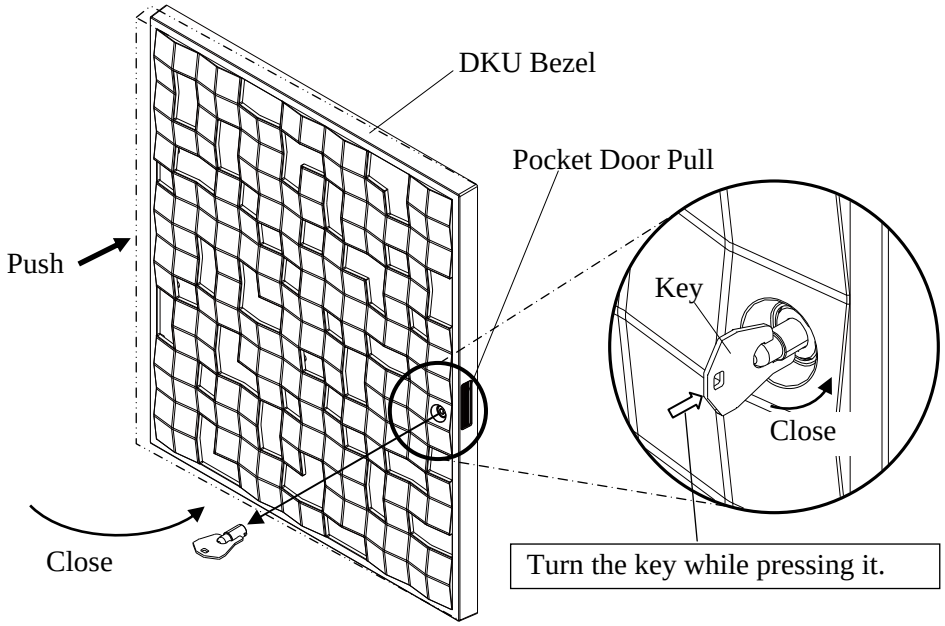

Fig. 3.1.1-5 DKU Bezel Closing Procedure

Copyright © 2010, Hitachi, Ltd.

4. When taking out the key with Bezel opened.
   a. Turn the key 90 degrees counterclockwise direction while pressing the stopper of the rear side of the Bezel.
   b. Take out the key from the keyhole.

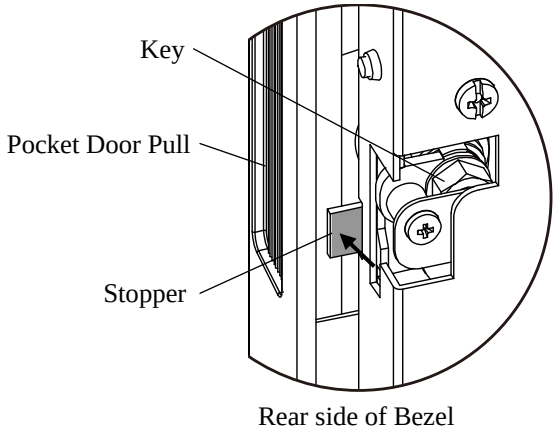

Fig. 3.1.1-6 Specific Procedure of Key Extraction

Copyright © 2012, Hitachi, Ltd.

5. FBX DKU Bezel

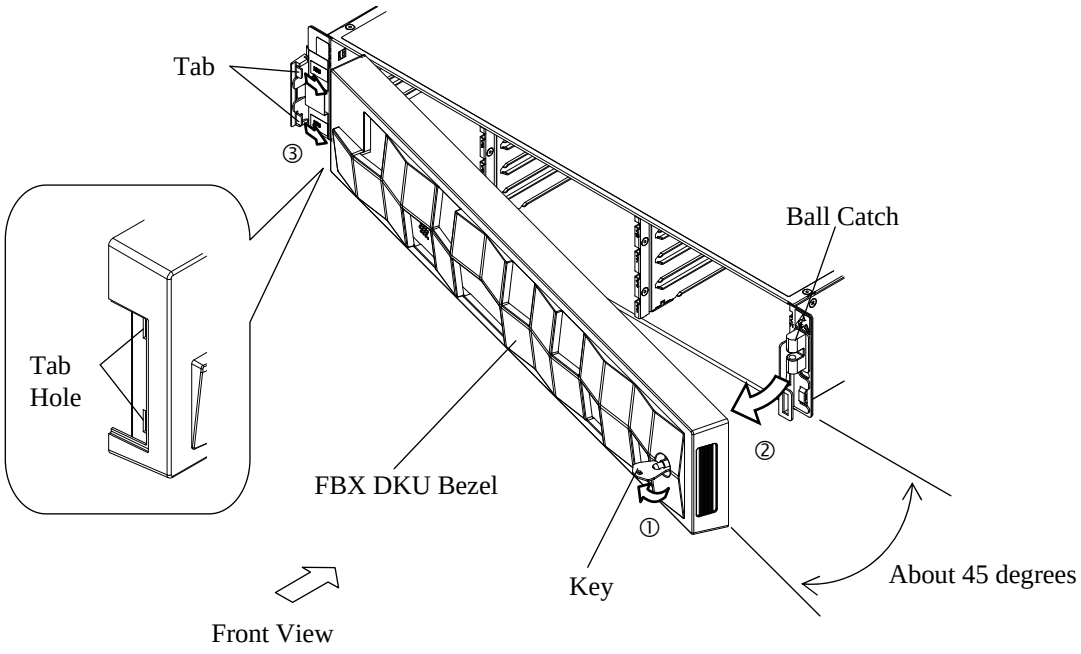
FBX DKU Bezel Removing Procedure

a. Insert the key into the keyhole on the bezel and release the lock of the bezel (①).

b. Pull the key toward you while holding the lower right portion of the bezel, and then disengage the right side of the bezel from the ball catch (②).

Note: When disengaging the bezel, work with the opening angle between the bezel and the chassis of up to 45 degrees.
Do not force the bezel open too wide. Otherwise, a damage of bezel may be caused.

c. Disengage the bezel from the left tabs and then remove it (③).



The state in which the slit of the keyhole is aligned with the mark.
(The key can be inserted or pulled out in this state.)

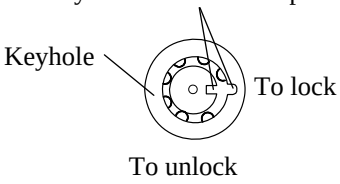


Fig. 3.1.1-7 Removal of Bezel

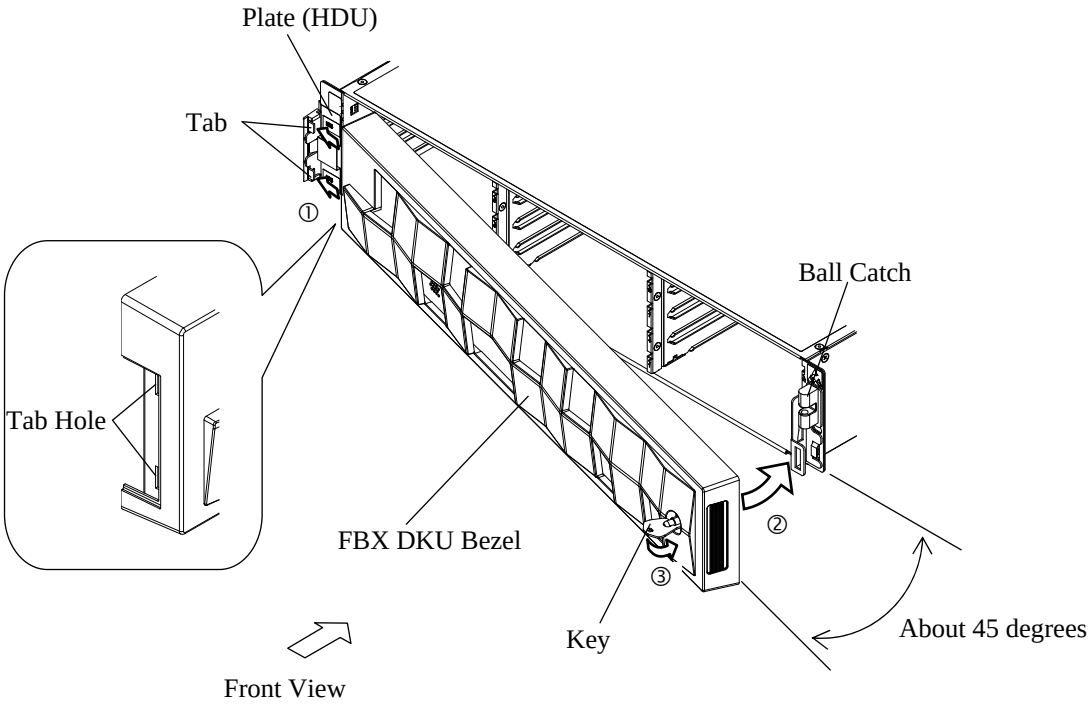
Copyright © 2012, Hitachi, Ltd.

FBX DKU Bezel Attaching Procedure

a. Unlock the bezel with the key.
b. Insert the tabs on the left front side of the chassis into the tab holes on the bezel (①) at an angle of about 45 degrees between the bezel and the chassis.

   Note: Be careful not to catch the Plate (HDU) between the chassis and the bezel when inserting the tabs on the chassis into the tab holes on the bezel.
   The Plate (HDU) may be damaged if catched.

c. Fix the bezel by pressing the right side of the bezel to engage it with the ball catch on the front side of the chassis (②).
d. Lock the bezel with the key (③).



The state in which the slit of the keyhole is aligned with the mark.
(The key can be inserted or pulled out in this state.)

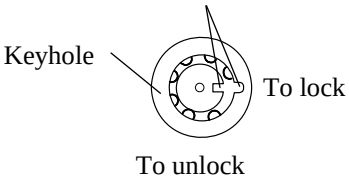


Fig. 3.1.1-8 Attachment of Bezel

Copyright © 2010, Hitachi, Ltd.

3.1.2 Attaching the Wrist Strap

- In order to protect parts from the electrostatic discharge, every worker must put a wrist strap on his/her wrist before starting installation or maintenance work and start the work after connecting the grounding clip to a metallic portion of the frame. (The wrist strap must be put on when connecting the LAN, RS232C or channel interface cable.)
- When handling a part, hold it in the way that fingertips of the hand putting the wrist strap on touch a metallic portion of the part.
  (The above is necessary in order to discharge the charged static electricity and prevent a charge caused by handling.)
- Be sure to keep the wrist strap close to the subsystem.
- Be sure to touch the subsystem with the wrist strap put on. If you touch the subsystem without putting on the wrist strap, the static electricity charged on your body flows to the subsystem in an instant because no resistance exists between your body and the subsystem causing a subsystem trouble.
- Wear a wrist strap until the work is finished when working with the door of device or the platter cover open (for change of channel interface cable connection etc.).

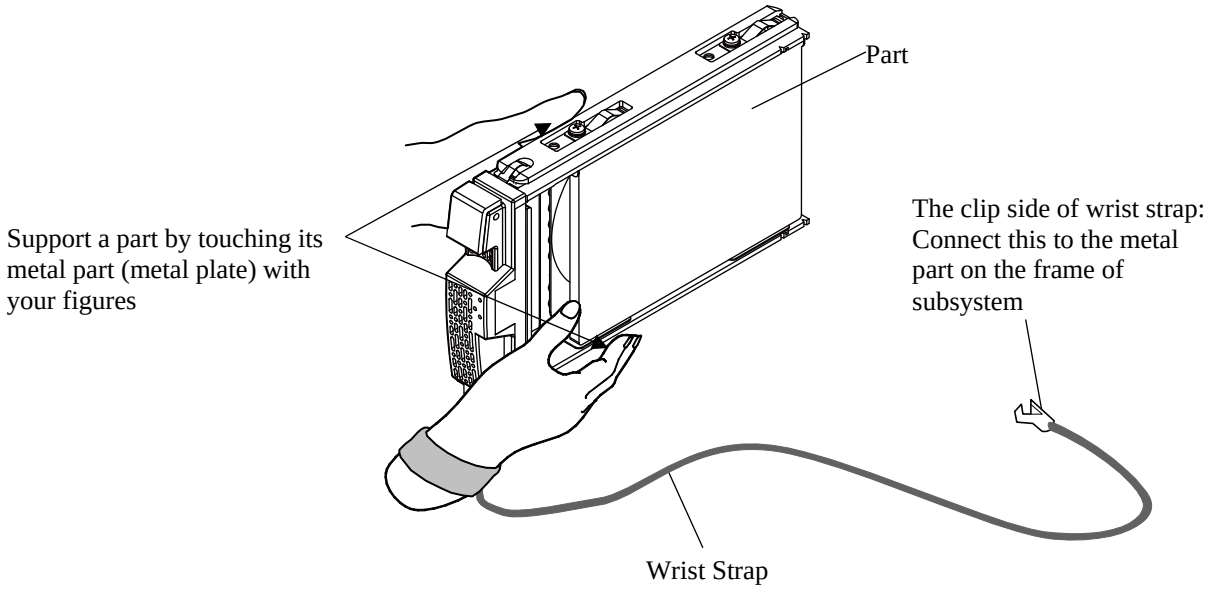

Fig. 3.1.2-1 Attachment of Wrist Strap

Copyright © 2010, Hitachi, Ltd.

3.1.3 Notes when installing or removing the part

3.1.3.1 Notes when handling the PCB

1. Check that the main edge connector of the PCB has linearity.

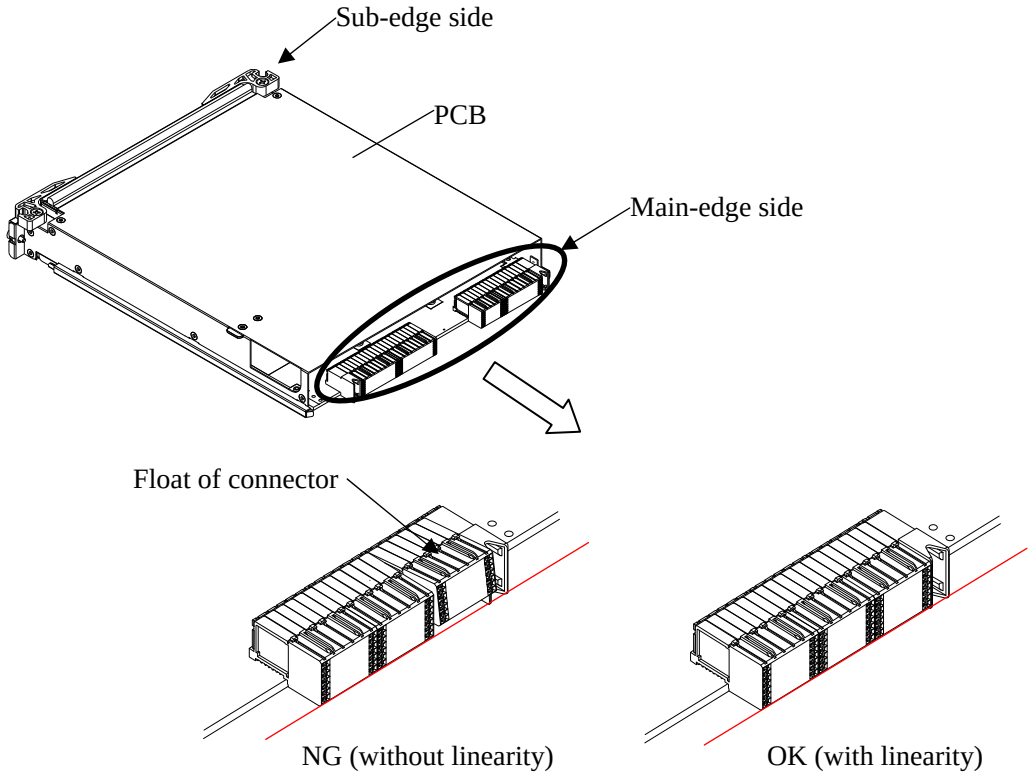

Fig. 3.1.3.1-1 Checking connectors

2. When there is a float or a position gap in a connector, mark it with a label, etc.

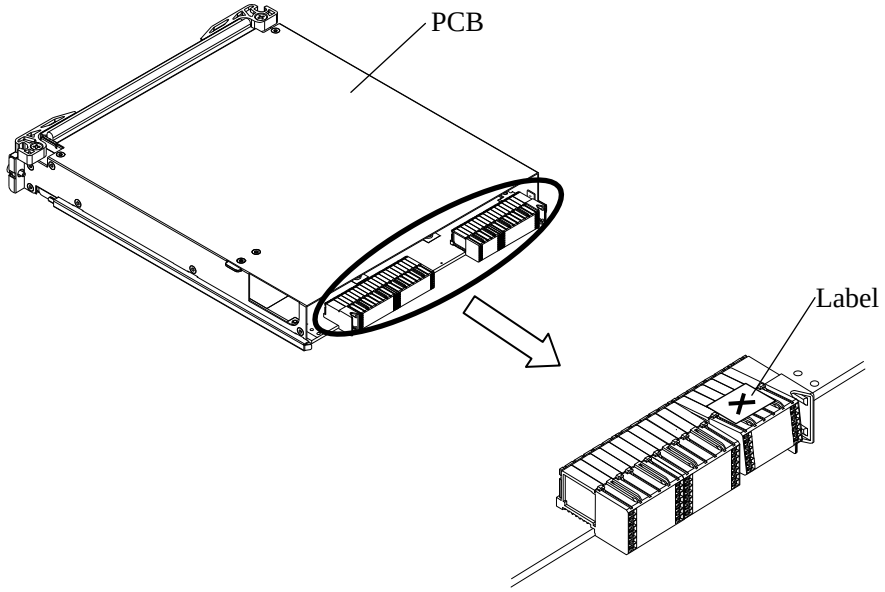

Fig. 3.1.3.1-2 Marking of defective connectors

Copyright © 2010, Hitachi, Ltd.

3. Handle it as follows not to damage the main edge connector of the PCB.
   (1) When holding the PCB, hold the middle part of the PCB with both hands.
   Holding the main-edge side or sub-edge side of the PCB may cause a breakdown of the PCB by dropping it under its weight or hitting it against something. Moreover, holding the sub-edge-side of the PCB may cause a loosening or disconnecting of the connector.

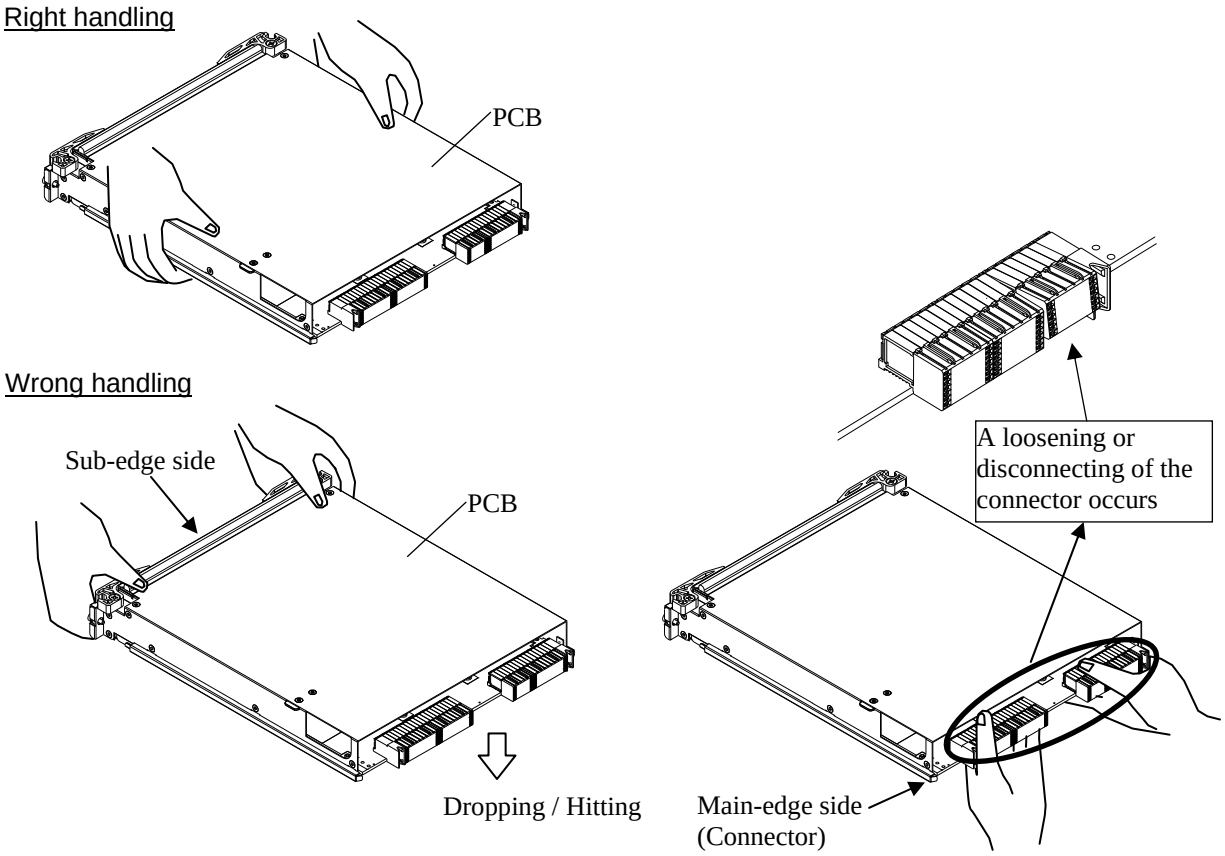

Fig. 3.1.3.1-3 Handling of the PCB (at maintenance)

(2) When moving the PCB, be careful enough not to make it hit a carrier, a table or a unit.

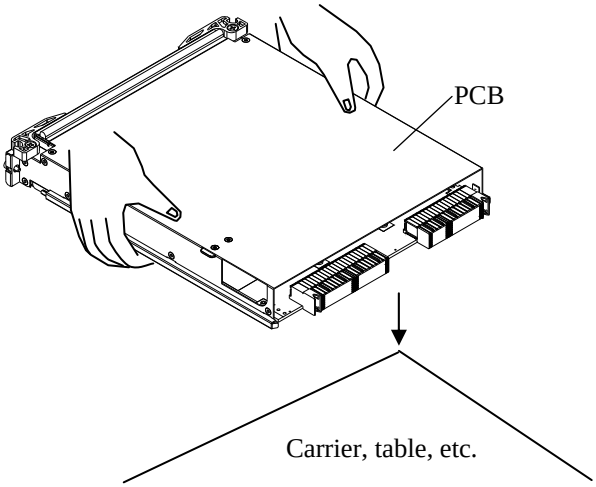

Fig. 3.1.3.1-4 Handling of the PCB (at moving)

Copyright © 2010, Hitachi, Ltd.

3.1.4 About the storage media used for installation/maintenance process

The media showed in following table are attached in subsystem, in order to advance installation, maintenance, and failure analysis smoothly. Please implement installation or collect information according to the work procedure indicated in each section.

No.	Media	Description	Installation device	Remarks
1	CD-ROM	CD-R for micro program storage. Used for installation or micro program download in time of micro FC.	CD-R Drive of CE Laptop PC	Attached to the device
2	USB Memory	The USB memory for configuration information backup. Used for configuration information storage in time of device configuration change.	USB Connector of SVP	Attached to the device
3	USB Memory	USB memory for collecting device dump information. Used for collecting dump information in time of failure analysis or operation investigation.	USB Connector of SVP	Attached to the device

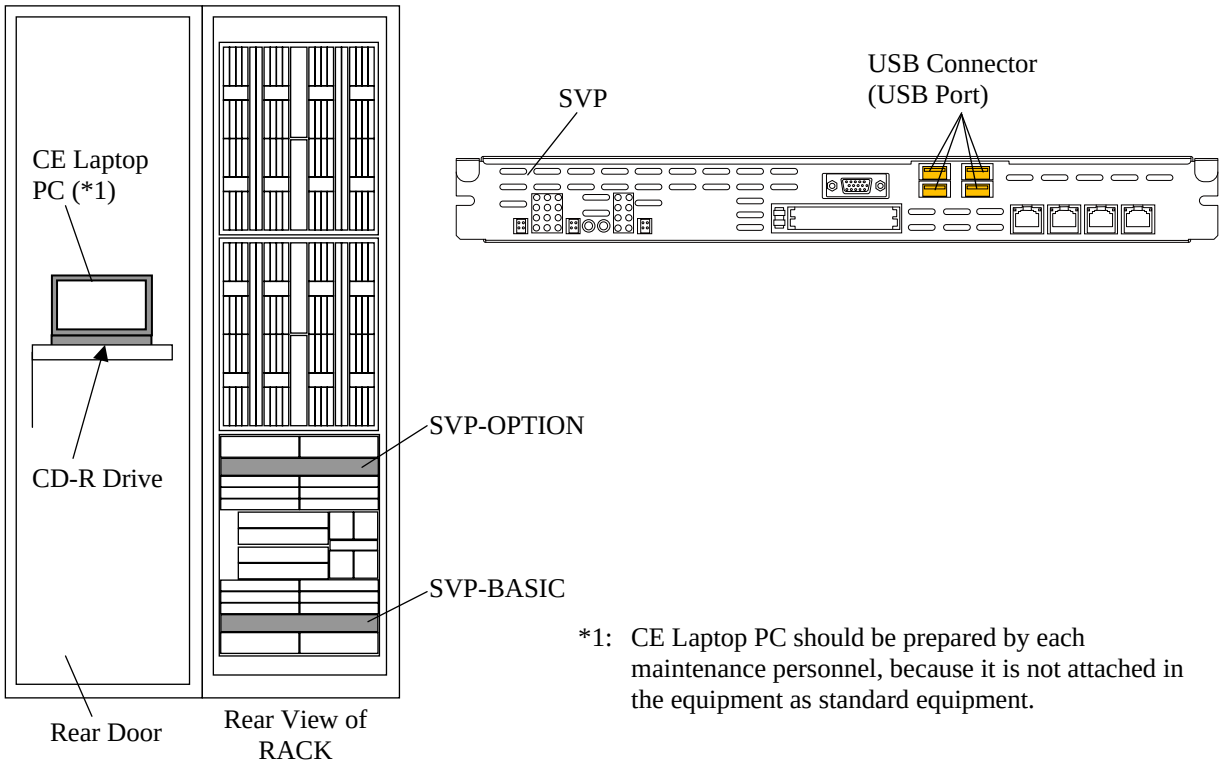

Fig. 3.1.4-1 Information Collection Device for each Media

3.1.5 CE Laptop PC

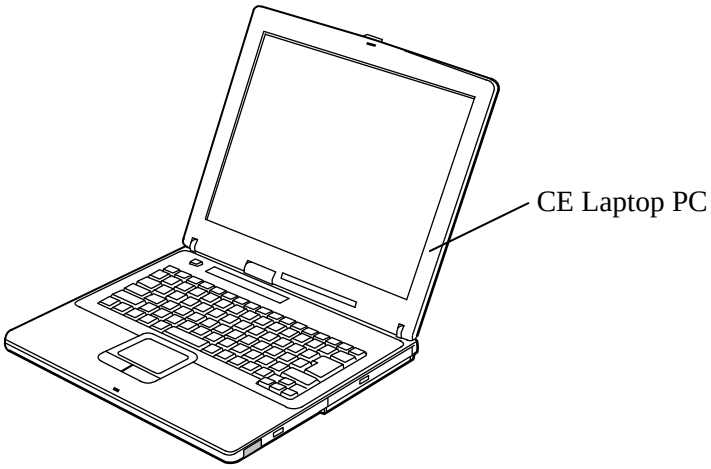
3.1.5.1 Specifications for the CE Laptop PC

A laptop PC that can be used as the CE Laptop PC must meet specifications shown in Table 3.1.5.1-1.

Table 3.1.5.1-1 CE Laptop PC Specifications

	Specification
OS	WindowsNT4.0/2000 (*1) Windows XP
CPU	Pentium/Celeron 300MHz or upper
Memory	128MB or upper
HDD	Available hard disk space: 100MB or upper
Display	800 × 600 (SVGA) or higher-resolution 1024 × 768 (XGA) Recommendation
CD-ROM	Need
LAN	Ethernet 10Base-T/100Base-TX
USB	Need
AC input power specifications	• Voltage: 200-240V AC, 50/60 Hz • Current: 2A or less • Connector form: The connector must have an inlet with either of the following forms. An inlet that conforms to the EN60320 Class I (2.5A; 250V) standard  An inlet that conforms to the EN60320 Class II (2.5A; 250V) standard

*1: Remote Desktop Connection Software is required.



Copyright © 2010, Hitachi, Ltd.

3.1.5.2 Storage and Installation Location of CE Laptop PC Tray

When using of the CONSOLE PC in this equipment, mount the PC tray to install CE Laptop PC in the rear door is required.
However, the CE Laptop PC is needed to be prepared by each maintenance personnel, because it is not attached in the equipment.

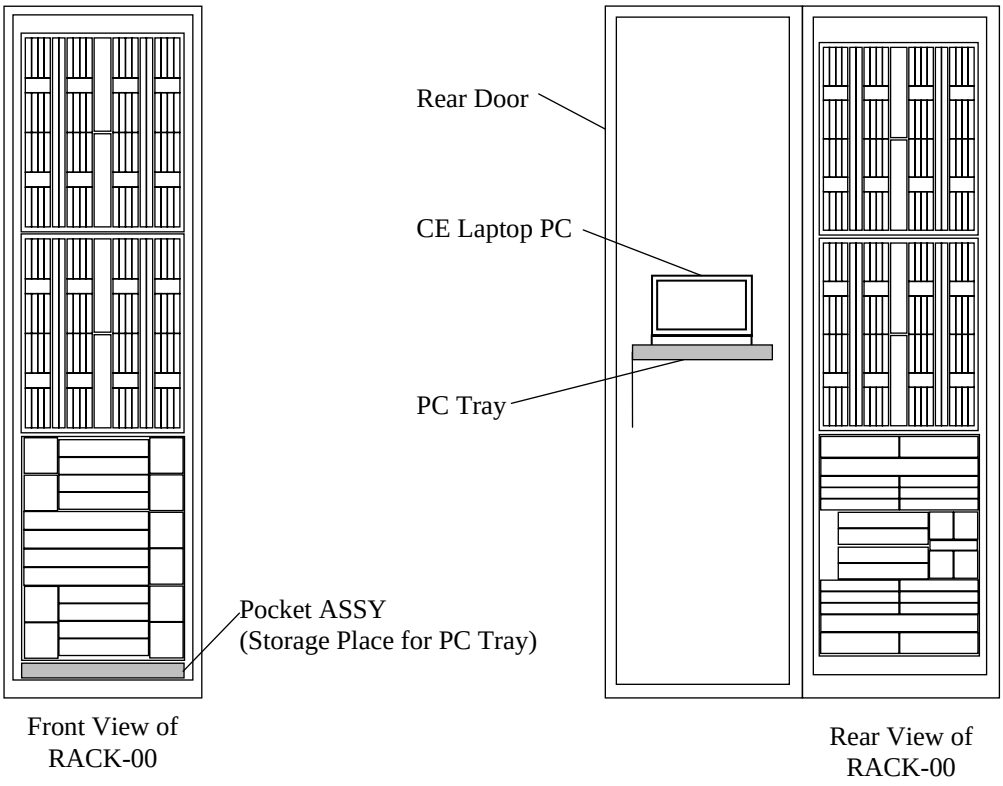


Fig. 3.1.5.2-1 Storage and Installation Location of PC Tray

Copyright © 2010, Hitachi, Ltd.

3.1.5.3 Attachment/Removal Procedure of CE Laptop PC

1. Attachment Procedure of CE Laptop PC
   a. Remove the pocket ASSY from the front of the frame.
   b. Remove the PC Tray from the pocket ASSY.
   c. Install the pocket ASSY in the front of the frame.

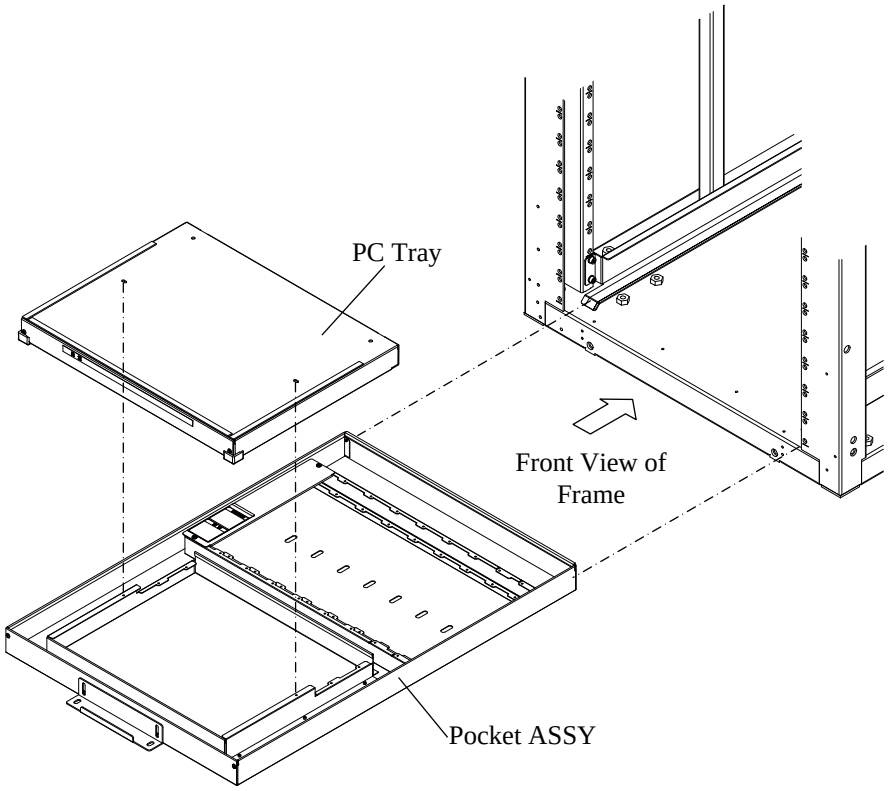

Fig. 3.1.5.3-1 Removal of PC Tray

Copyright © 2010, Hitachi, Ltd.

d. Remove the stopper pin from the support (tray) of the rear side of the rear door.
e. Install the PC tray in the support (tray), and secure it with stopper pin.

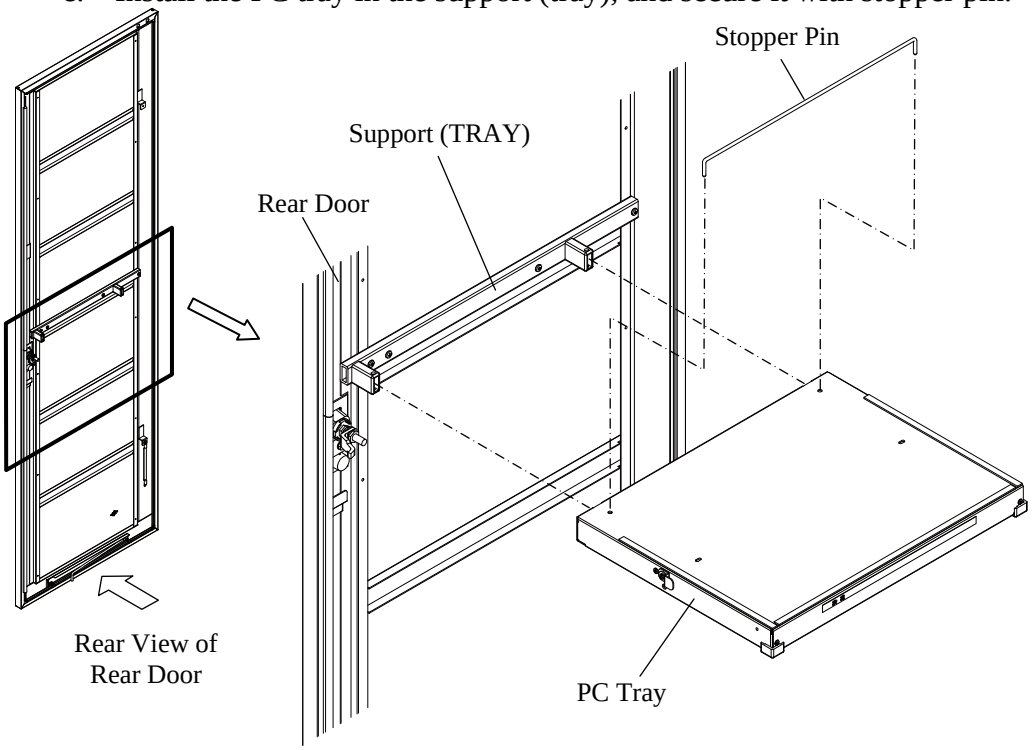

Fig. 3.1.5.3-2 Attachment of PC Tray

f. Loosen the screw of the left side of the PC tray, and rotate the lock plate.
g. Open the locking clamp of the rear side of the rear door.
h. Lift the door bar, and install it in the PC tray.
i. Put the lock plate back into the place, and secure it with the screw.

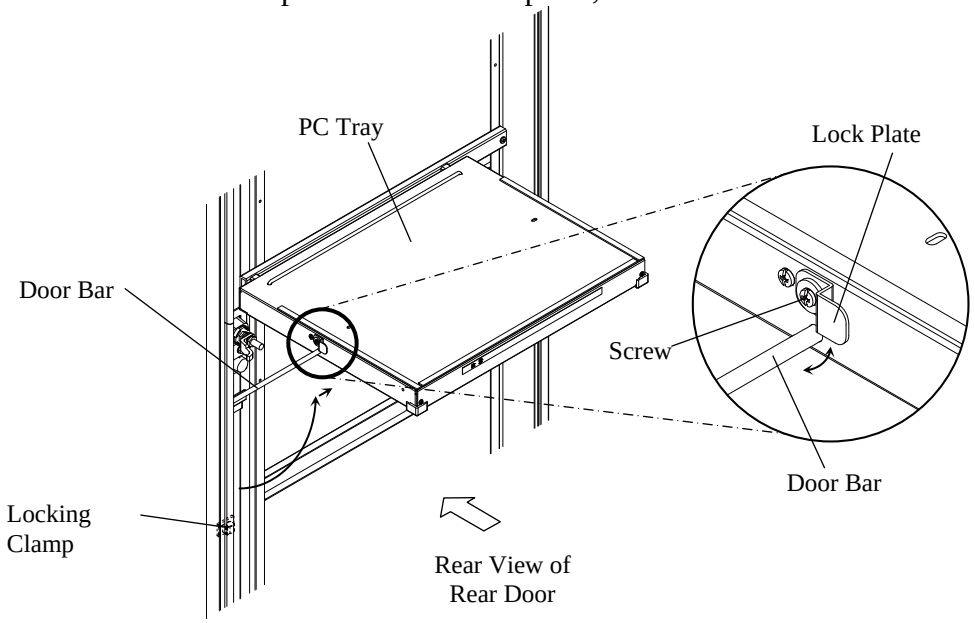

Fig. 3.1.5.3-3 Securing of PC Tray

Copyright © 2010, 2012, Hitachi, Ltd.

j. Connect the power cable and LAN cable to the CE Laptop PC.
k. Connect the LAN cable to CONSOLE port of the SVP-BASIC.
   Connect the LAN cable to CONSOLE port of the SVP-OPTION when a trouble occurs on SVP-BASIC. (Refer to Fig. 3.1.5.2-5.)
l. Connect the power cable to vacant connector of the PDU.
m. Power on the CE Laptop PC.
n. When Windows is started, connect the PC to the SVP using the remote desktop function.

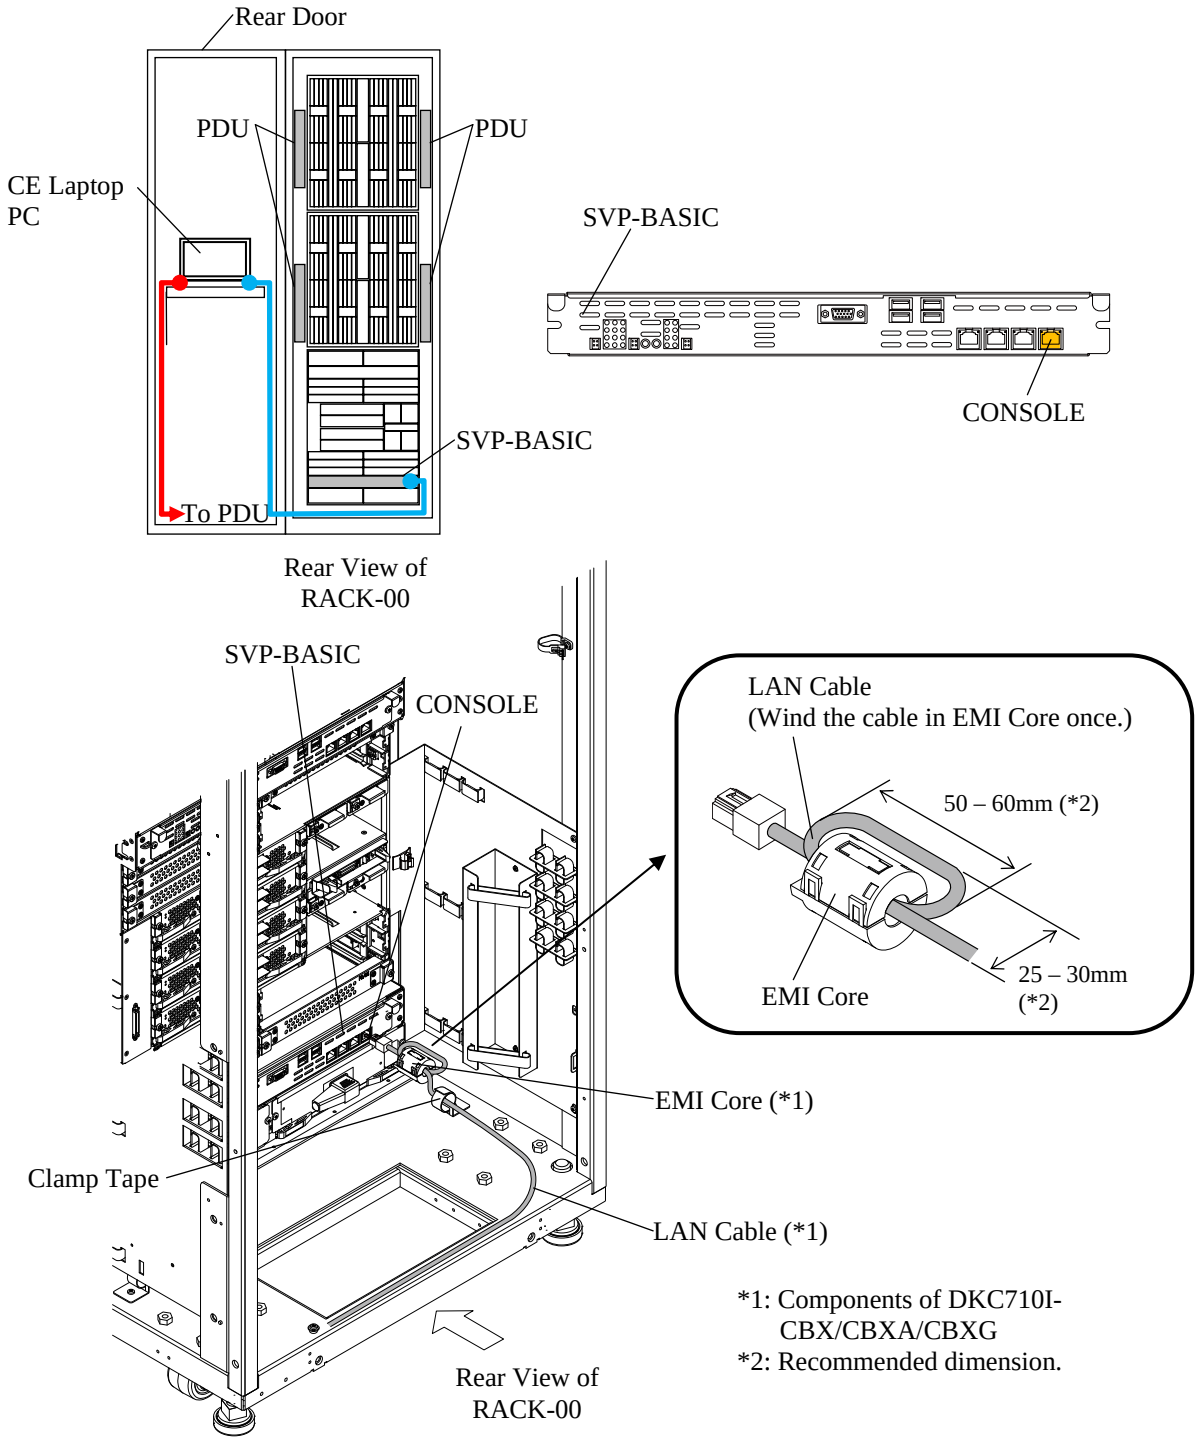

Fig. 3.1.5.3-4 Connection of Cables (SVP-BASIC)

Copyright © 2010, 2012, Hitachi, Ltd.

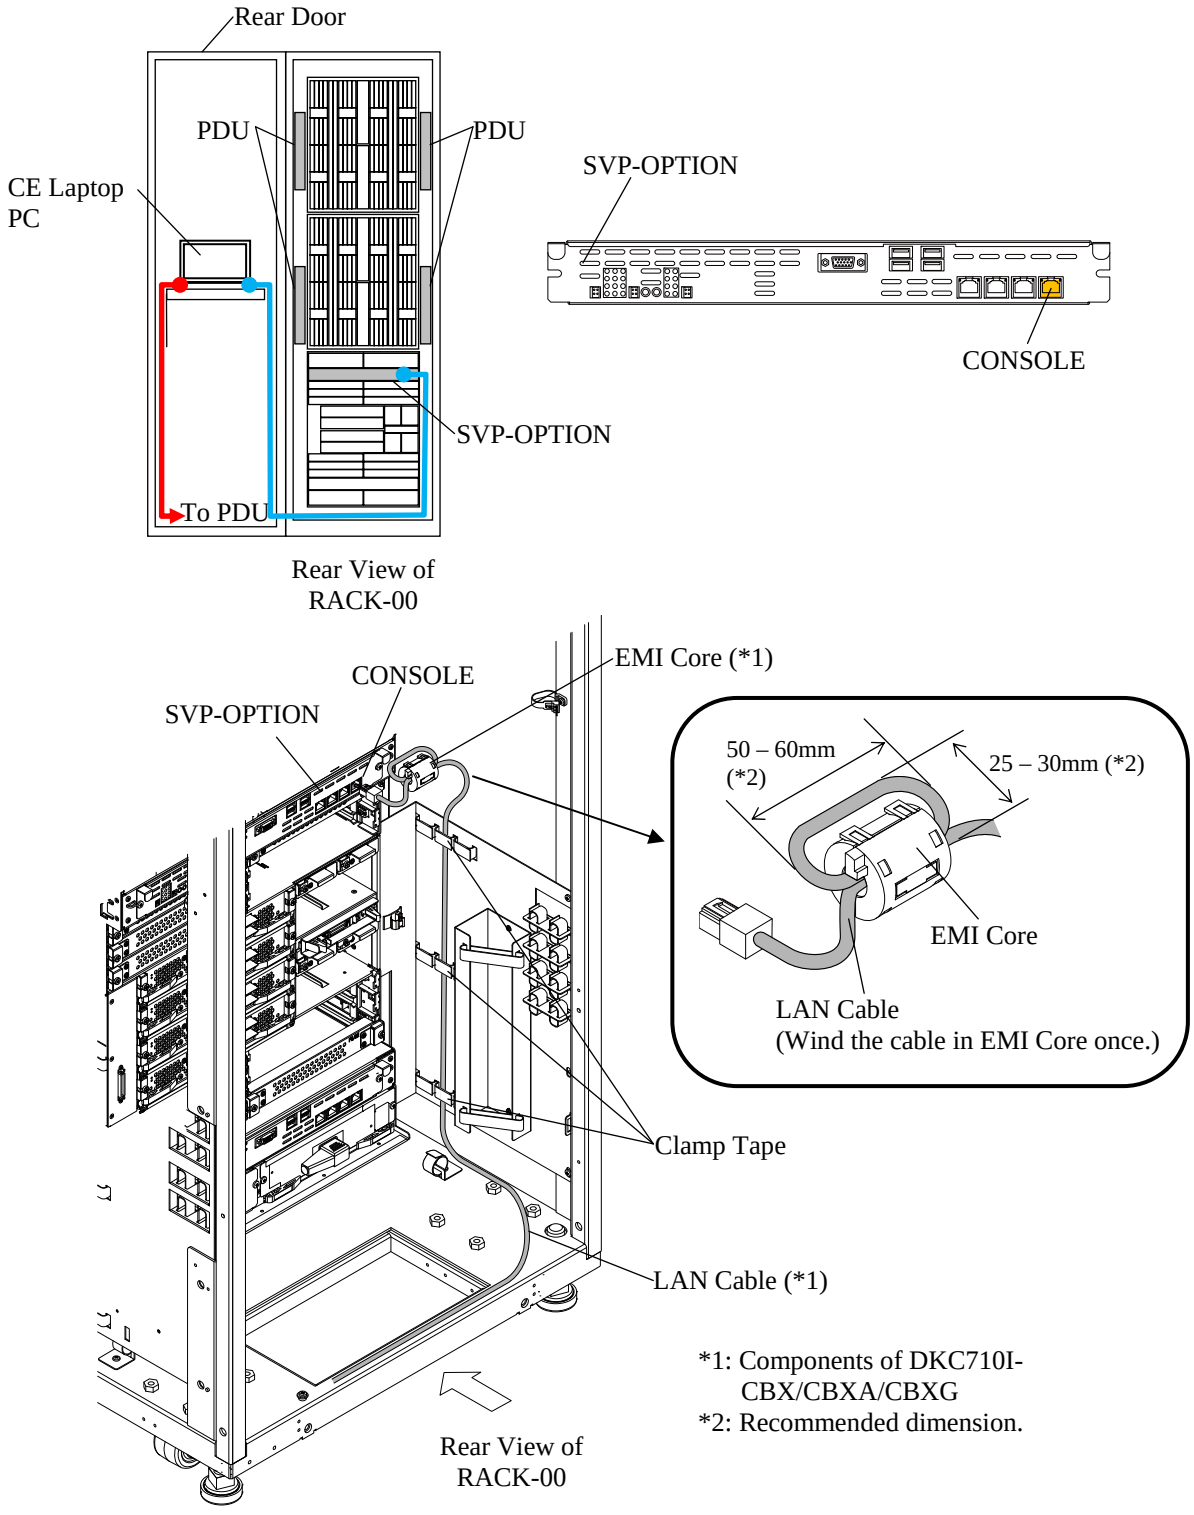

Fig. 3.1.5.3-5 Connection of Cables (SVP-OPTION)

Copyright © 2010, Hitachi, Ltd.

2. Removal Procedure of CE Laptop PC
   a. Quit the remote desktop function, and then power off the CE Laptop PC.
   b. Disconnect the power cable from the connector of the PDU. (Refer to Fig. 3.1.5.3-4 or Fig. 3.1.5.3-5.)
   c. Disconnect the LAN cable from the CONSOLE port of the SVP-BASIC or SVP-OPTION.
   d. Disconnect the power cable and LAN cable from the CE laptop PC.
   e. Loosen the screw of the left side of the PC tray, and rotate the lock plate. (Refer to Fig. 3.1.5.3-3.)
   f. Remove the door bar from the PC tray, and secure it with the locking clamp of the rear side of the rear door.
   g. Put the lock plate back to the place, and secure it with the screw.
   h. Remove the stopper pin from the PC tray, and remove the PC tray. (Refer to Fig. 3.1.5.3-2.)
   i. Install the stopper pin in the support (tray).
   j. Remove the pocket ASSY from the front of the frame. (Refer to Fig. 3.1.5.2-1.)
   k. Install the PC tray in the pocket ASSY.
   l. Install the pocket ASSY in the front of the frame.

Copyright © 2010, Hitachi, Ltd.

3.1.6 Setting of Stopper for FAN Door

1. The stopper is installed in DKU to restrict the door opening/closing. Moving the stopper back or forth will set the following three conditions.

   ① State of neutral (All of the FAN doors on the front and rear side of the DKU are unopenable and unclosable.)
   ② State of the front side FAN doors openable and closable. (Only the FAN doors on the front side of the DKU are openable and closable.)
   ③ State of the rear side FAN doors openable and closable. (Only the FAN doors on the rear side of the DKU are openable and closable.)

   Refer to the Table 3.1.6-1 for the details of ① to ③.

   Note: Set the stopper with the screws of the FAN doors tightened. Moving the stopper with the screws of the FAN doors loosened makes the movement heavily.

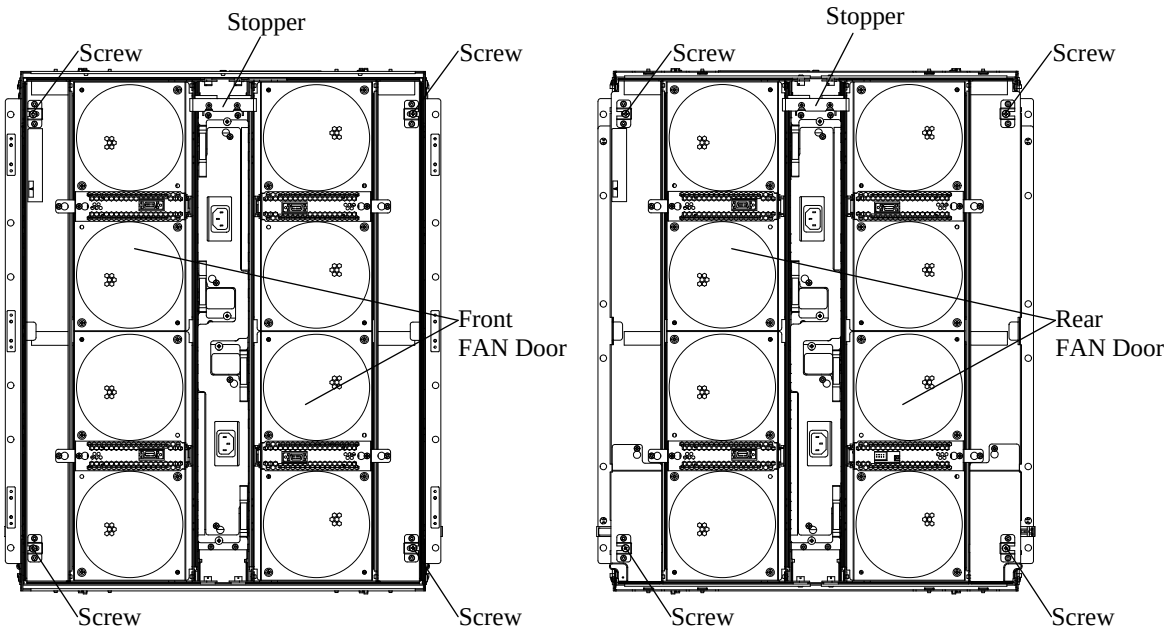

Fig. 3.1.6-1 Position of Stopper for FAN Door

Copyright © 2010, Hitachi, Ltd.

Table 3.1.6-1 Stopper Setting for FAN Door

Setting	Magnified View of Stopper Position	State of FAN Door
①		**State of neutral** (Basic state) All of the FAN doors on the front and rear side of the DKU are unopenable and unclosable. → Pulling the stopper on the front side will enable the front side of the FAN door to open, and pulling the stopper on the rear side will enable the rear side of the FAN door to open.
②		**State of the front side FAN doors openable and closable** (State of the rear side of the FAN doors unopenable and unclosable) The rear side of the FAN door is unopenable and unclosable, because the foot portion of the stopper is stuck in the front side. To return the stopper in the neutral, lift the foot portion of the stopper on the front side to push it to the back a little.
③		**State of the front side FAN doors unopenable and unclosable** (State of the rear side of the FAN doors openable and closable) The front side of the FAN door is unopenable and unclosable, because the foot portion of the stopper is stuck in the rear side. To return the stopper in the neutral, lift the foot portion of the stopper on the rear side to push it to the back a little.

Copyright © 2010, Hitachi, Ltd.

3.1.7 Notes when connecting the DEV interface cable

1. Check that the gasket is in the latch after removing the cap from the DEV interface cable.

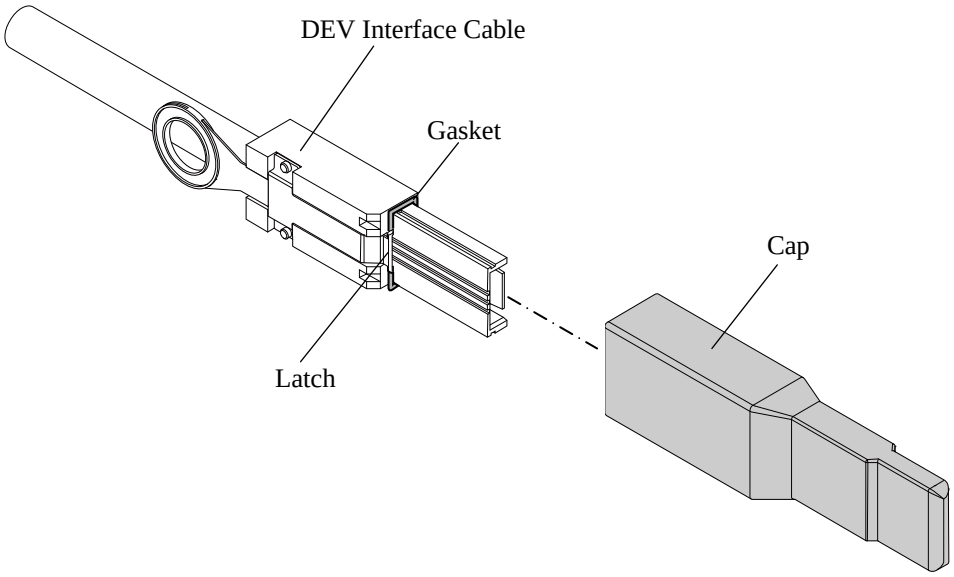

Fig. 3.1.7-1 Checking Gasket

2. When connecting the DEV interface cable, pick up the connector with your fingers and insert it into the PCB until you hear the connector click.
3. Check that the connector does not come off by pulling it lightly after inserting the connector into the PCB.

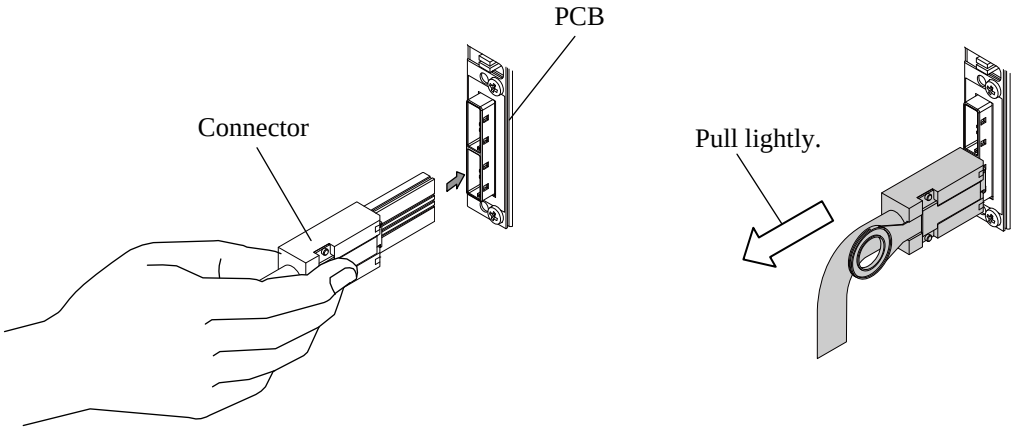

Fig. 3.1.7-2 Checking Connector

Copyright © 2012, 2014, Hitachi, Ltd.

3.1.8 FAN Door Opening/Closing Procedure

Before starting the opening/closing procedure, make the front/rear side FAN doors openable and closable referring to "3.1.6 Setting of Stopper for FAN Door" (INST03-01-160).

1. FAN Door Opening Procedure
   a. Loosen two screws with a screwdriver while holding the FAN door with one hand.
   b. Open the FAN door.

   Note: Set the stopper with the screws of the FAN doors tightened. Moving the stopper with the screws of the FAN doors loosened makes the movement heavily.

2. FAN Door Closing Procedure
   a. Close the FAN door.
   b. Tighten two screws with a screwdriver while holding the FAN door with one hand so that it cannot open.

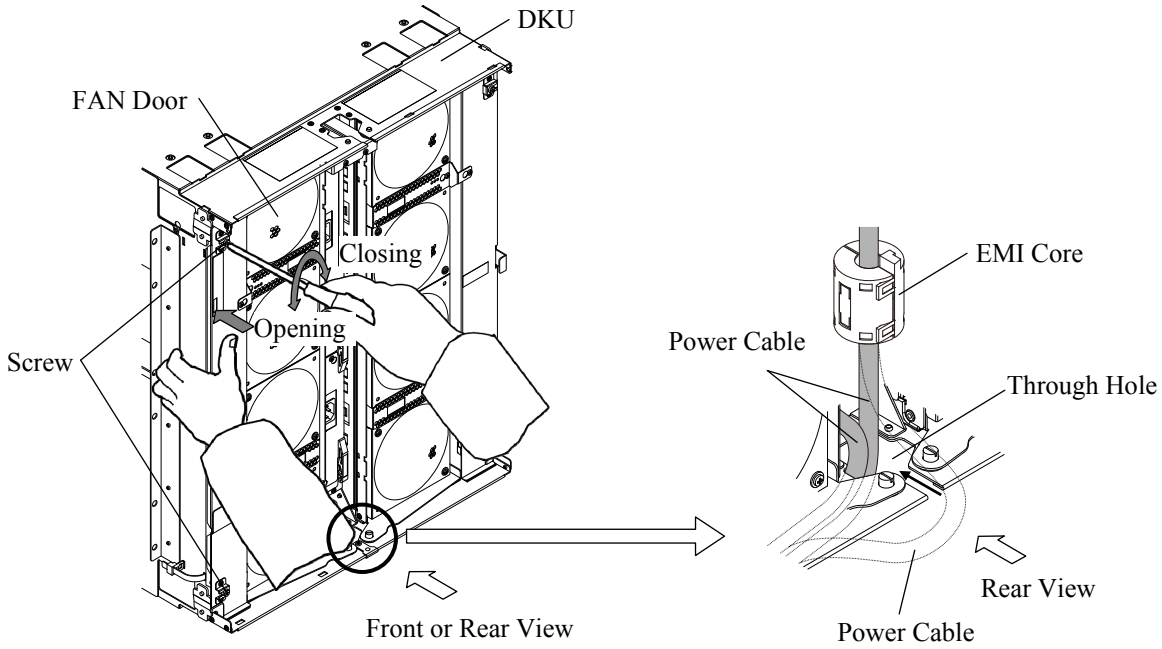

Fig. 3.1.8-1 FAN Door Opening/Closing

3. Wrong Manner of Closing FAN Door
   a. To put a screwdriver in the screw head of the opened FAN door, close the FAN door and tighten the screw.
      → Do not do this, as this might damage the screw insertion hole on the DKU.
   b. To tighten the screw with a screwdriver without holding the FAN door with a hand.
      → Do not do this, as this might cause the screw on the FAN door not to fit in the screw insertion hole on the DKU properly and damage the screw insertion hole.

Copyright © 2010, Hitachi, Ltd.

3.2 UNPACKING AND INSPECTION

Receiving and Inspection

Before unpacking the unit, check the physical condition of the packed unit.

1. Prior to unpacking, check the container for visible damage or any indication of excessive shock, tilt or anything else abnormal during transportation and handling.

2. Obtain and check shipping manifest for missing units.

3. If anything abnormal is found, appropriate action should be taken before starting an installation.

Unpacking Procedure

Notice:
- Be very careful when handling the equipment.
- Do not drop the equipment from a height more than 5 mm (0.2in.) high.
- Floor unevenness must be less than 10 mm (0.4in.). Move slowly and lift the four screw jacks at the bottom of each frame to the highest position to prevent contact with the ramp.

Copyright © 2010, Hitachi, Ltd.

3.2.1 Unpacking

Copyright © 2010, 2013, Hitachi, Ltd.

3.3 Installation of Rack and Side Cover (DKC-F710I-RK42/SCOV)

⚠ CAUTION

Make sure that the equipment is moved by two or more persons.
Be sure to move the equipment by pushing it from the front face in the direction of movement.
It is acceptable for two persons to move the equipment carefully from the front face and rear face only when installing it. Do not push the equipment from the side face in principle.
The front caster of the rack frame is not a rotary type but a fixed type not to incline the equipment at over the tipping angle. Therefore, the equipment should not be rotated quickly.

Moving the equipment normally

Move the rack frame only from the front face in principle.
Push the rack frame slowly with thumbs and the bases of them on both ends of the front face.
When changing moving direction, do so little by little in cooperation with an assistant instead of changing moving direction quickly.
An assistant should not pull only the rear door strongly because doing so may cause the deformation of the rear door.

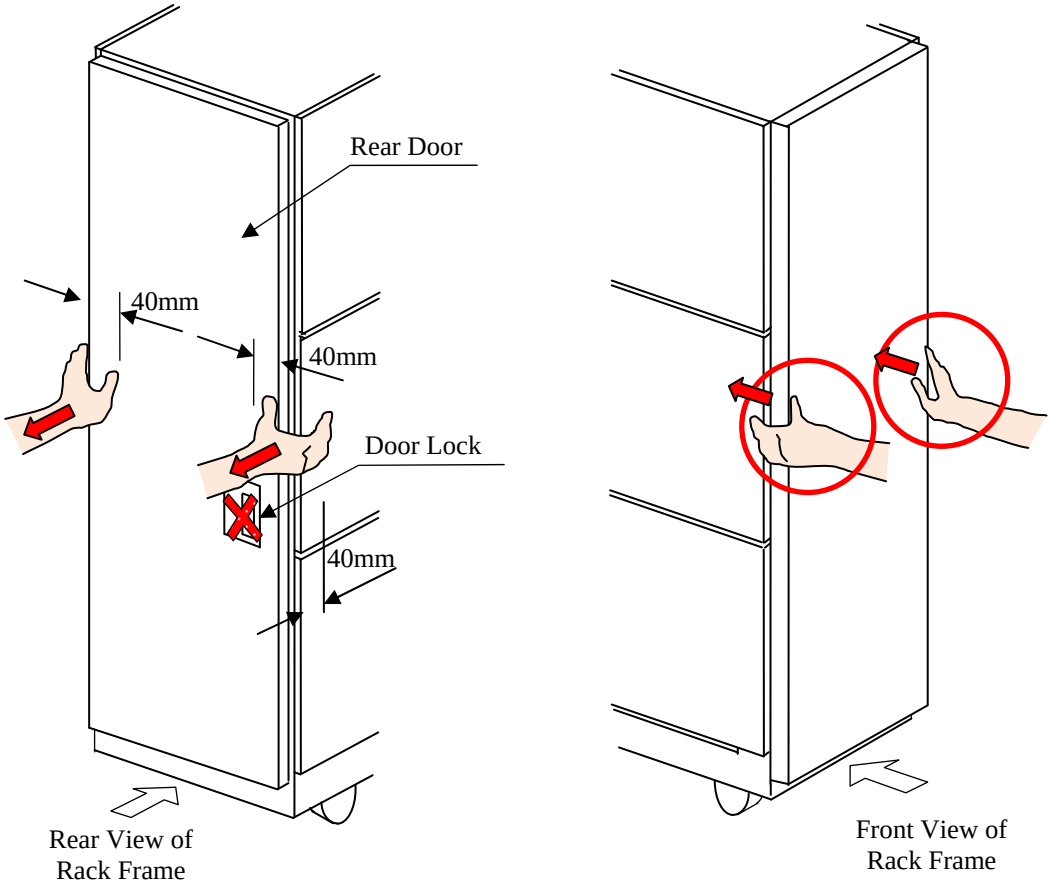

Fig. 3.3-1 Normal Movement Operation

Copyright © 2011, 2013, Hitachi, Ltd.

Moving the equipment forward with limited space

When moving the equipment in the direction of the front of the rack frame, two persons must cooperate. One pulls the front face of the rack frame in the direction of the installation location and the other pushes the rear face of the rack frame with hands on the both ends of the rear door at the position that is more than 50mm far from the door lock holding side covers. Do not push the door lock directly.

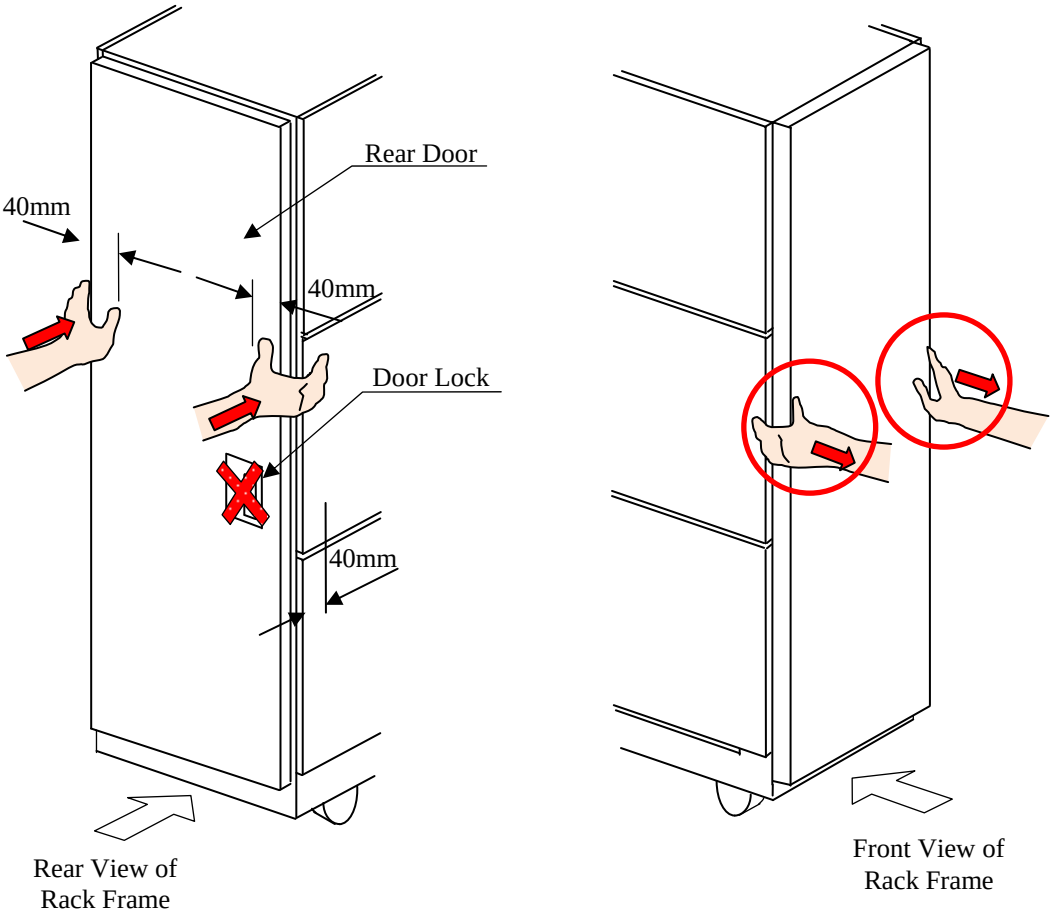

Fig. 3.3-2 Forward Movement Operation

Copyright © 2011, Hitachi, Ltd.

Moving the equipment in a lateral direction

When locating the equipment next to the equipment that was already installed, two persons must cooperate. One pulls the front face of the rack frame and the other holds the side face of the rack frame to move it.

Push the side face of the rack frame slowly with thumbs and bases of them on both edges of the side cover of the middle rack. Do not push the side face when the equipment is in a sloping place. Some of the equipment that has an upper center of gravity may fall down. Pushing the central part of the side cover excluding the part within 40mm from the edge, or boundary part of the side cover strongly may make the side cover caved in.

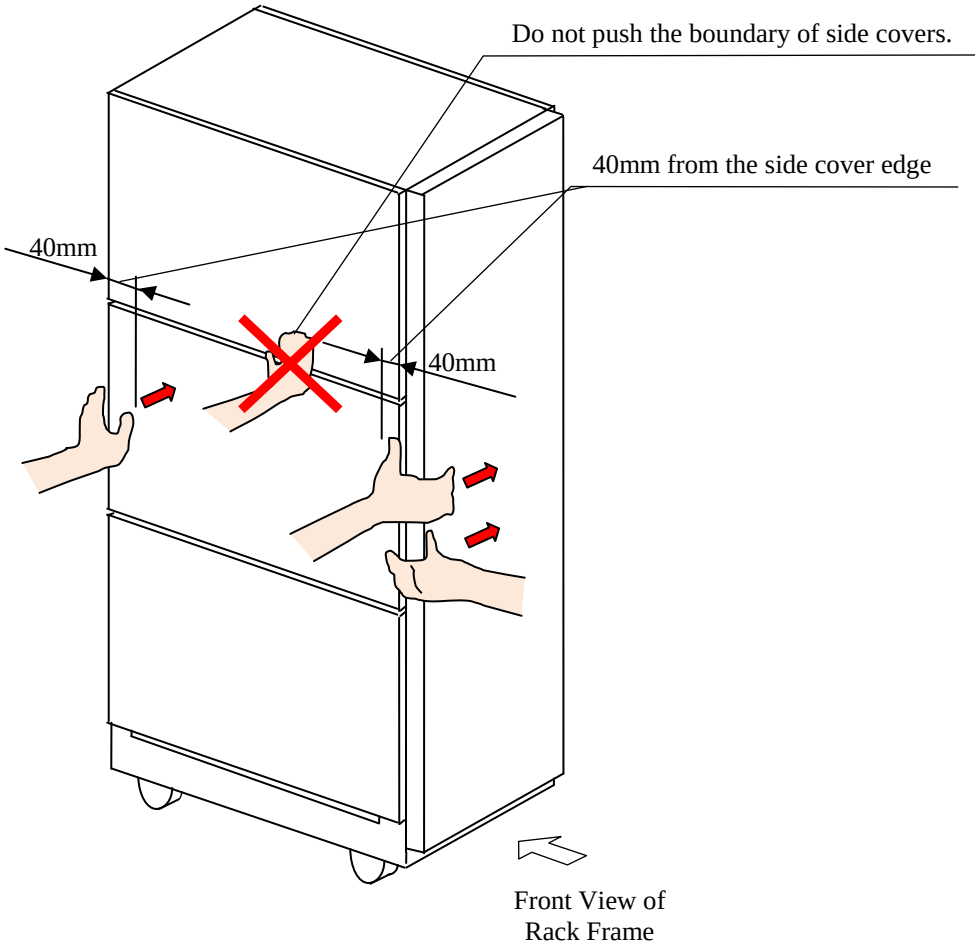

Fig. 3.3-3 Lateral Movement Operation

Copyright © 2011, 2014, Hitachi, Ltd.

Table 3.3-1 Parts List

No.	Model Number	Part Name	Part No.	Quantity	Remarks
1	DKC-F710I-RK42	42U Rack Frame	1509722-C	1

3.3.1 Installation Procedure of Rack and Side Cover

1. Confirmation of Rack Frames Installation Location
   a. Confirm the Rack Frames installation location and the Side Covers installation position.
   b. When the Side Covers are needed to remove, remove the Side Covers referring to Fig. 3.3.1-4.

Table 3.3.1-1 Removal and Re-installation of Side Cover

Configuration	RACK-12	RACK-11	RACK-10	RACK-00	RACK-01	RACK-02
2 Frames	———	———	———			———
3 Frames	———	———	———			
4 Frames		———				
5 Frames	———					
6 Frames						

Copyright © 2010, Hitachi, Ltd.

2. Installation of Rack Frames
   a. Move the Rack Frames to the installation location.
   b. Line up the position between the rack frames to connect.
   c. Adjust the height and the inclination of the Rack Frames by the four screw jacks in the lower part of the Rack Frames. Ensure the clearance between the caster and the floor by approximately 2.5 mm when the height adjustment is performed. (One revolution of screw jack = 2.5mm)

⚠ CAUTION

Caution of Over-Turning:
Work carefully for the height adjustment. A lack of balance that only one part rises too much causes the over-turning. The height of the screw jacks shall be adjusted in 1/4 rotations evenly into the four places in order.

Caution of Breakage:
To prevent a breakage of the screw part of the screw jack, apply oil to the screw part in advance of the operation.

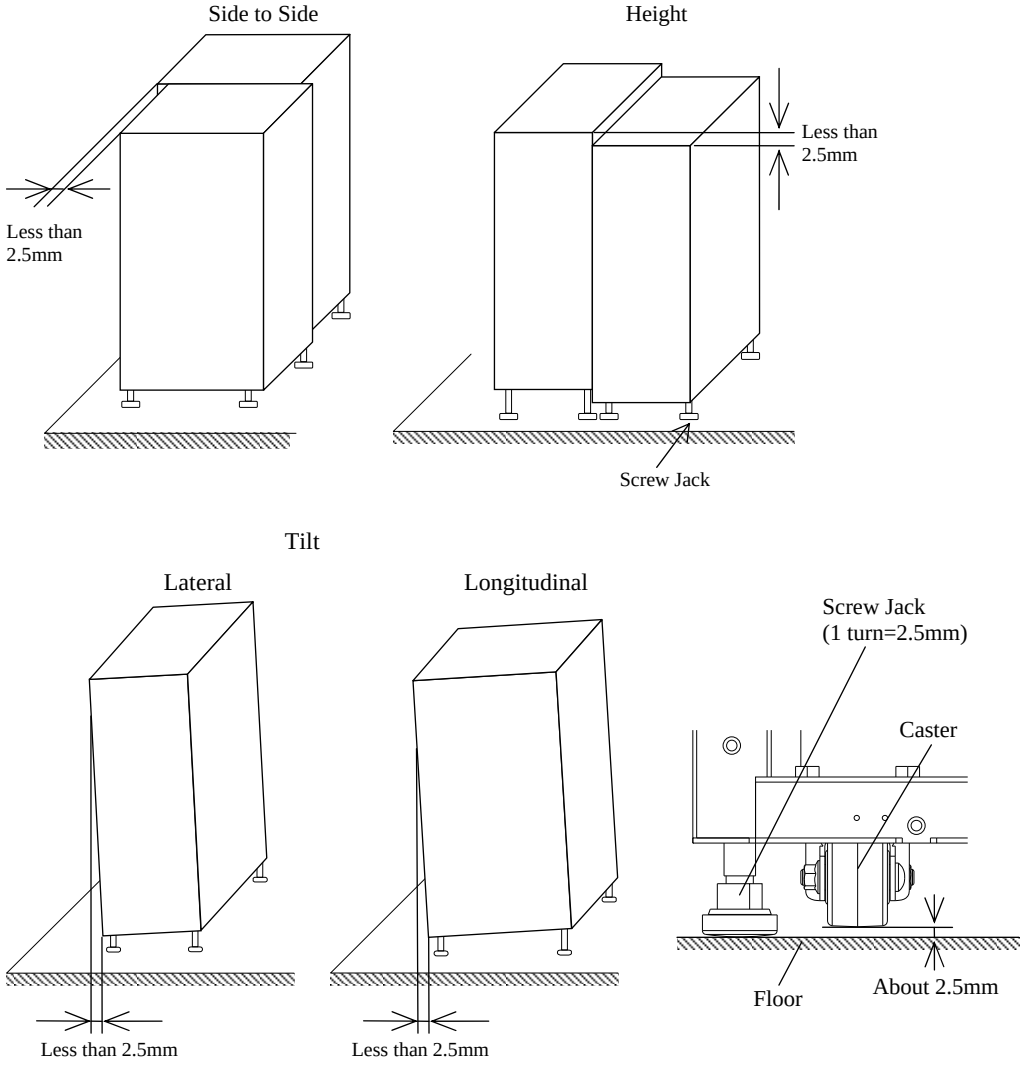

Fig. 3.3.1-1 Adjusting Screw Jacks

Copyright © 2010, 2011, Hitachi, Ltd.

3. Connection of Rack Frames
   a. Remove the eight screws from the connected front side of the rack frame, and remove the panel R and the panel L.

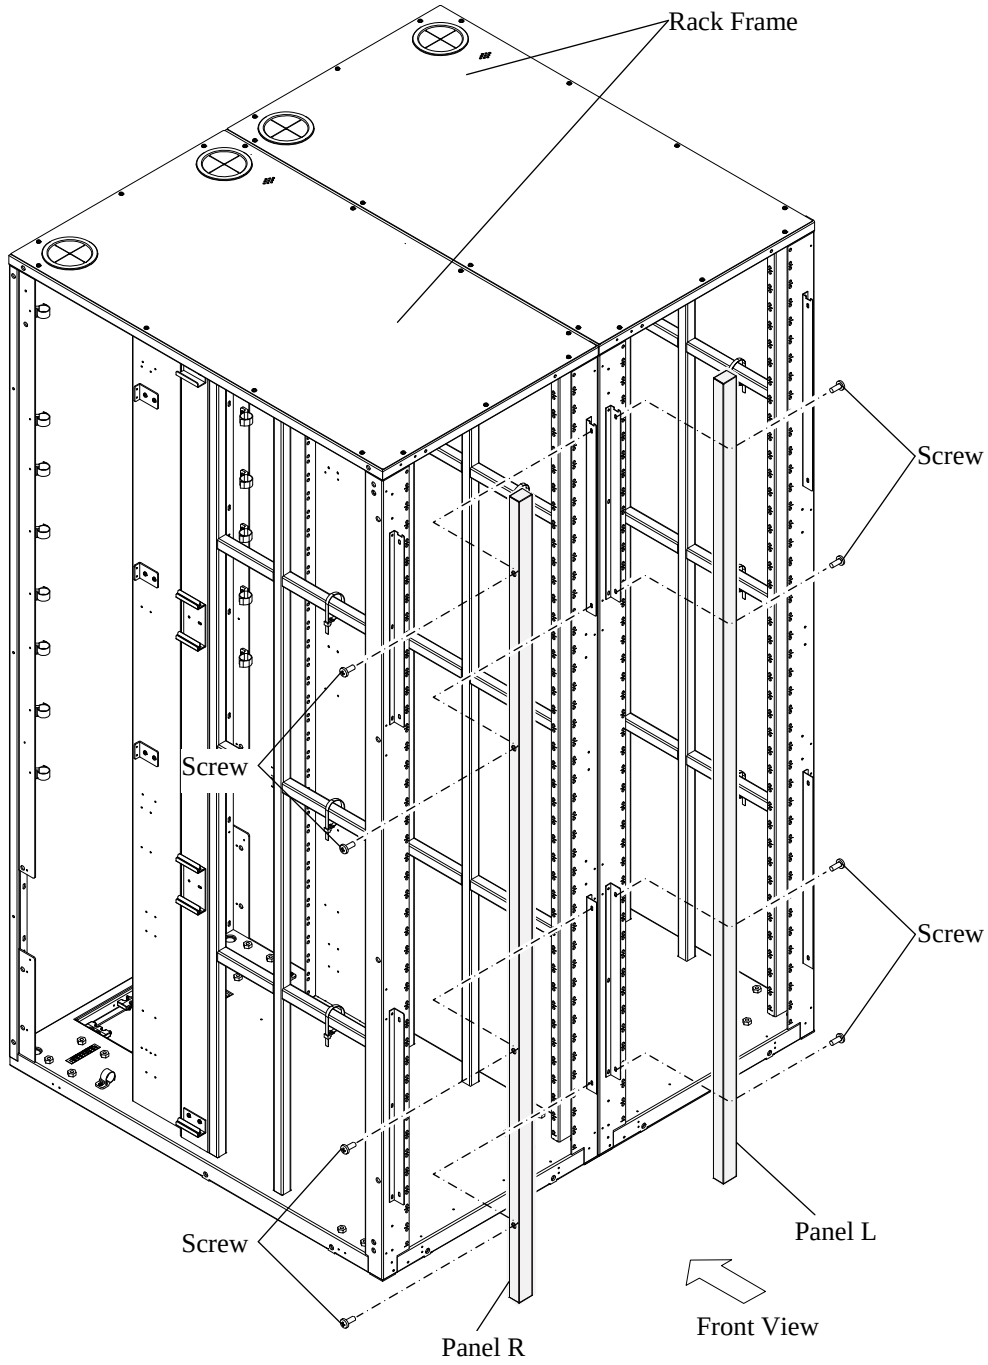

Fig. 3.3.1-2 Removal of Panels

Copyright © 2010, 2011, Hitachi, Ltd.

b. Connect the front of Rack Frames with the two fix plates and the twelve or eight screws. (Refer to Fig. 3.3.1-2A or Fig. 3.3.1-2B.)

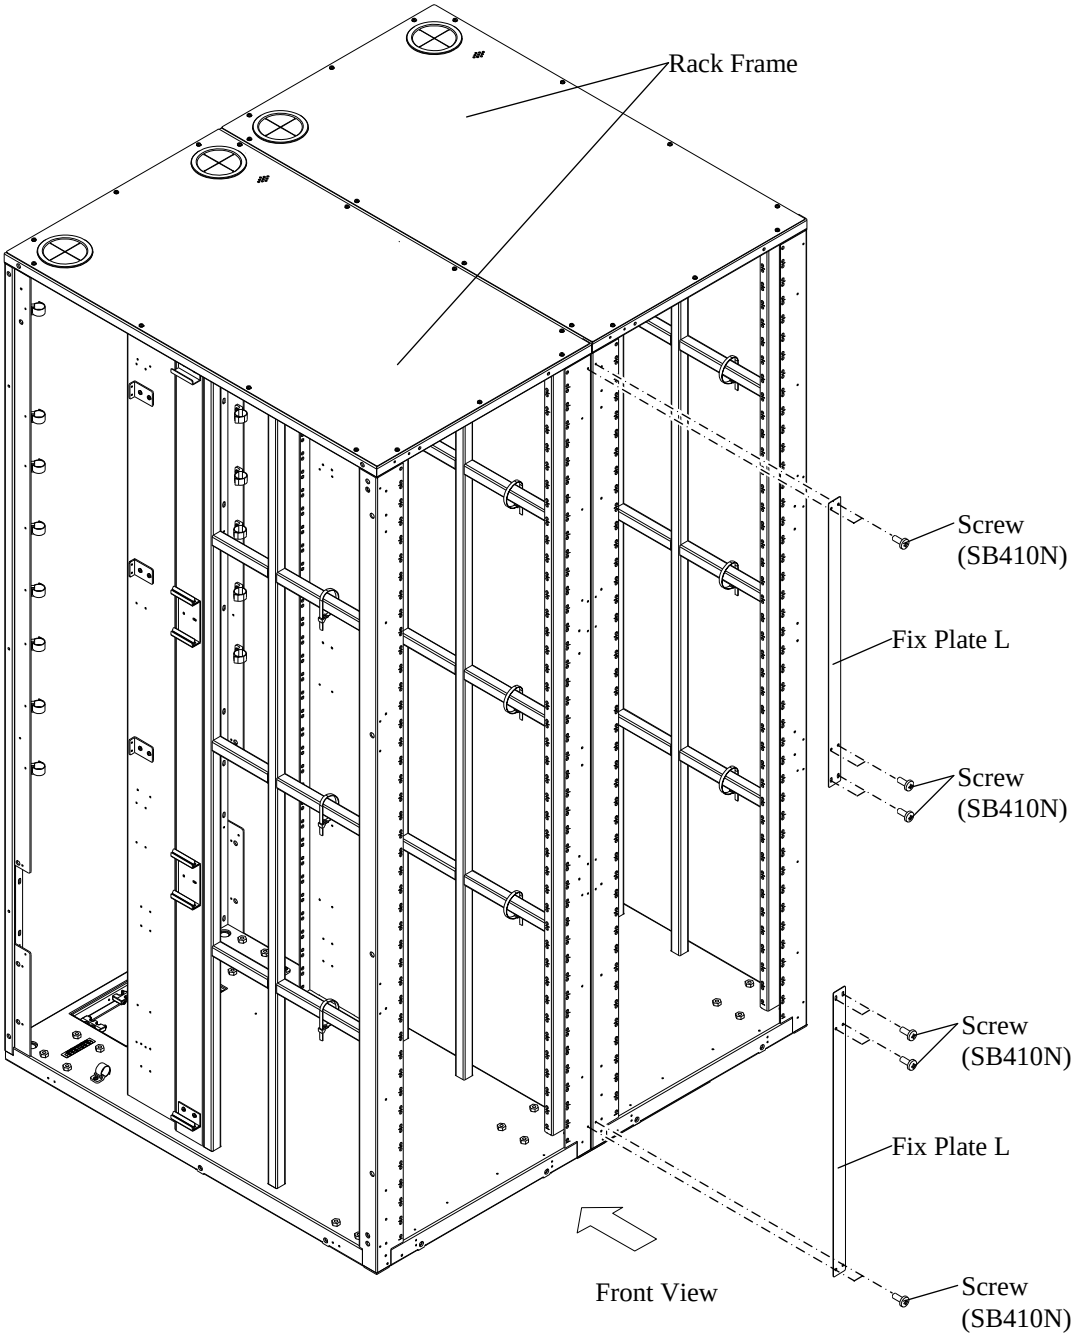

Fig. 3.3.1-2A Connection of Rack Frames (Front)

Copyright © 2011, Hitachi, Ltd.

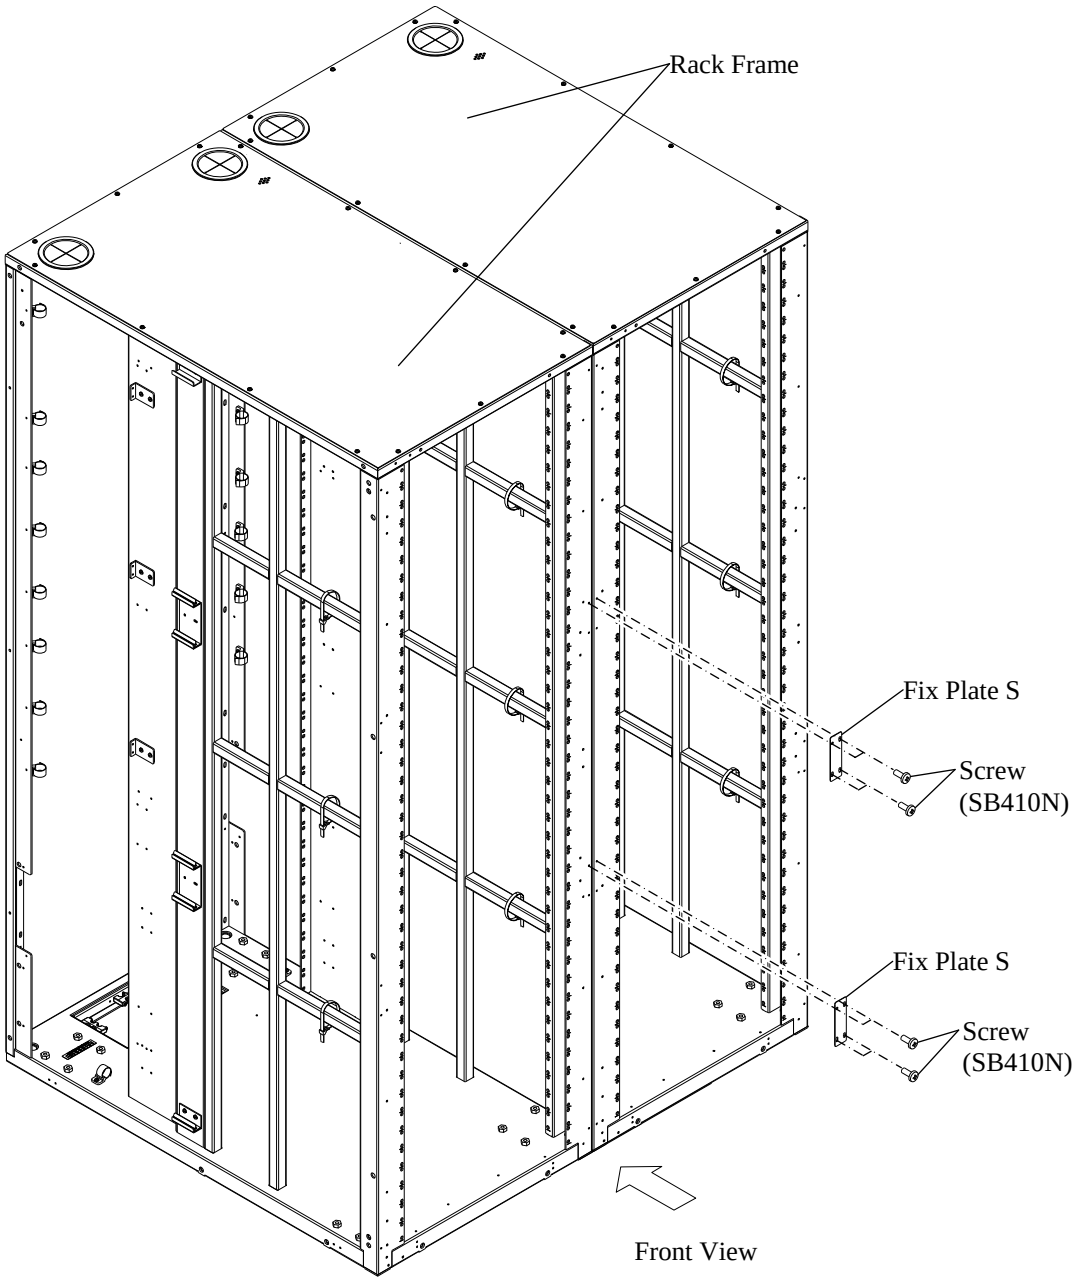

Fig. 3.3.1-2B Connection of Rack Frames (Front)

Copyright © 2010, 2011, Hitachi, Ltd.

c. Connect the Rack Frames with the two HEX socket bolts, the four washers and the two nuts.
d. Reinstall the panel L and the panel R that is removed on the procedure a, and secure them with the eight screws. (Refer to Fig. 3.3.1-2.)

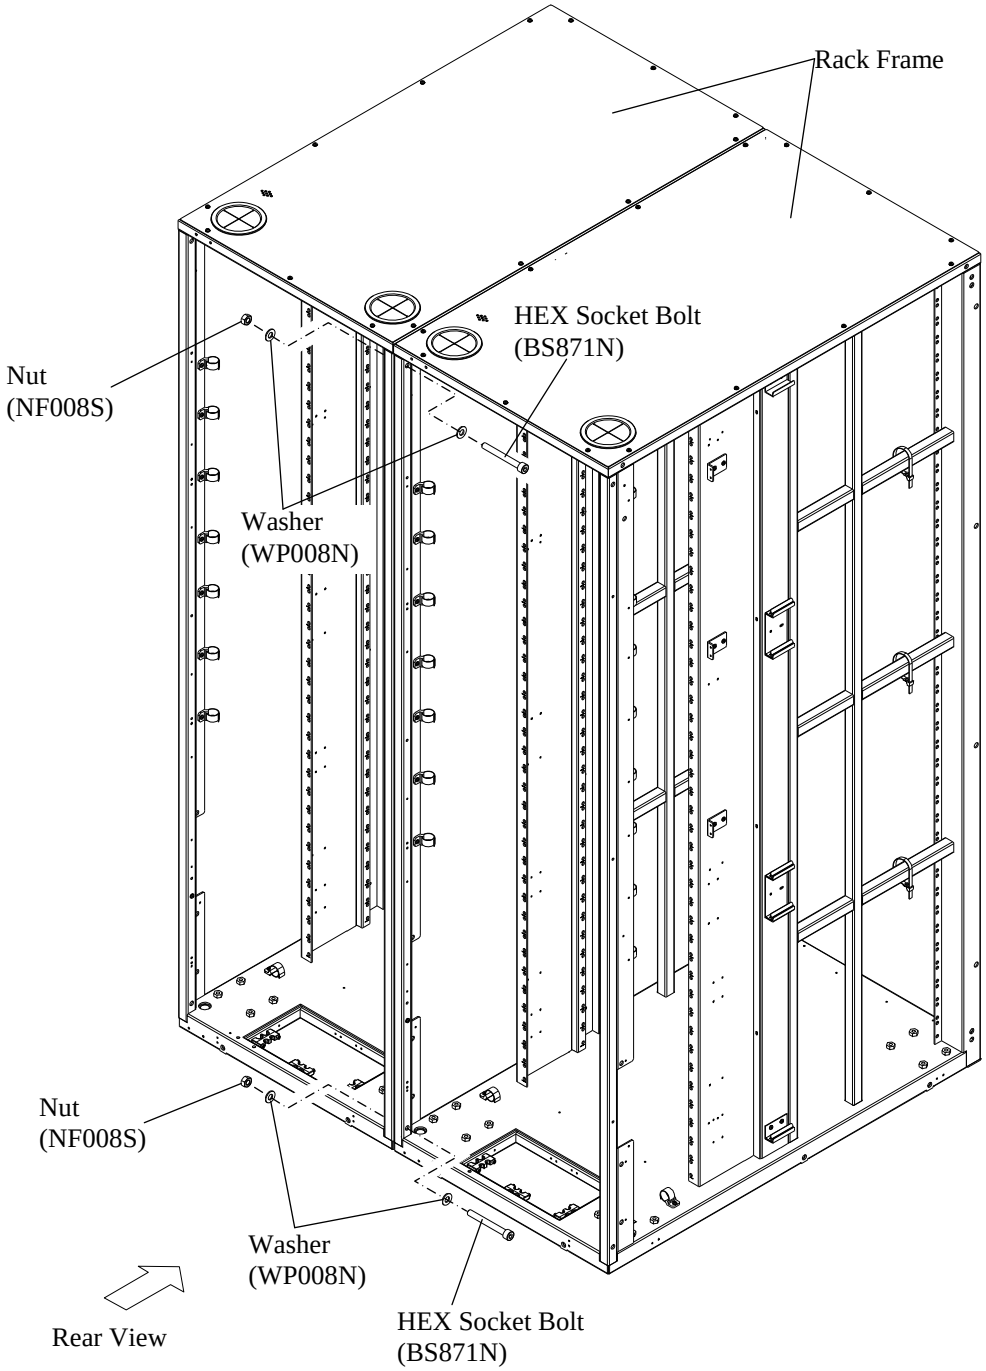

Fig. 3.3.1-3 Connection of Rack Frames (Rear)

Copyright © 2010, 2011, Hitachi, Ltd.

4. Installation of Side Covers

⚠ CAUTION

Paying attention to falls:
Dropping a side cover may cause injury.
When installing or removing the side cover, hold the cover firmly with both hands and be careful not to drop it on your feet. Make sure the side cover is hung on the hook of the rack frame side when it is installed.

a. When DKC-F710I-PDU30P (30A 1-Phase PDU Kit) is installed in the rear side of the rack frame, lean the PDU stoppers inward in the rack frame.
   WhenDKC-F710I-PDU30P is not installed, go to the procedure b.
b. Install the three side covers by hanging them on the hooks of the rack frame side on the left end of the subsystem. Install the side covers from the lower sequentially.
   Remove the side covers from the top sequentially when removing them.
c. Secure them with the six screws ①, the three screws ② and the three washers.
d. Install the side covers on the right end of the Subsystem as well as the left end.

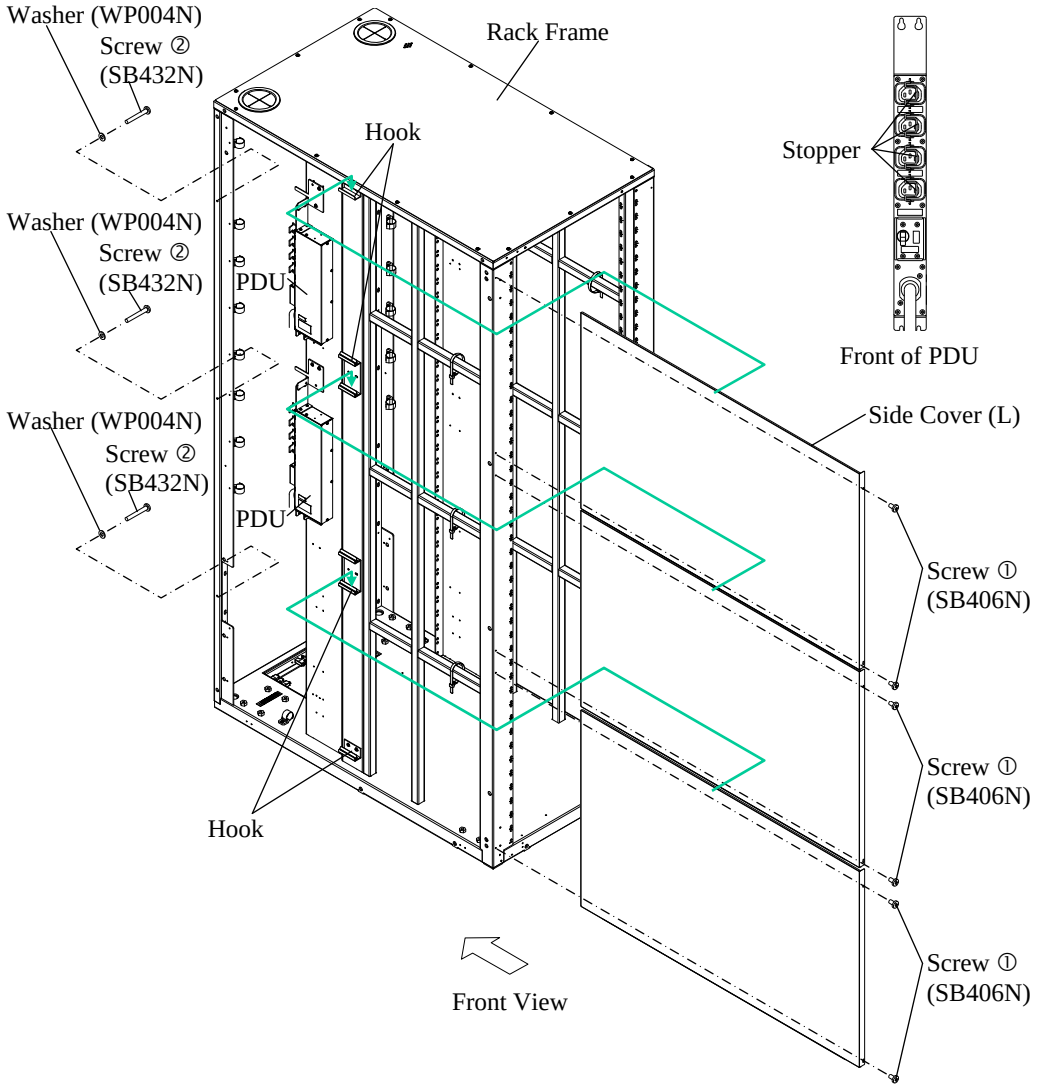

Fig. 3.3.1-4 Attachment of Side Covers

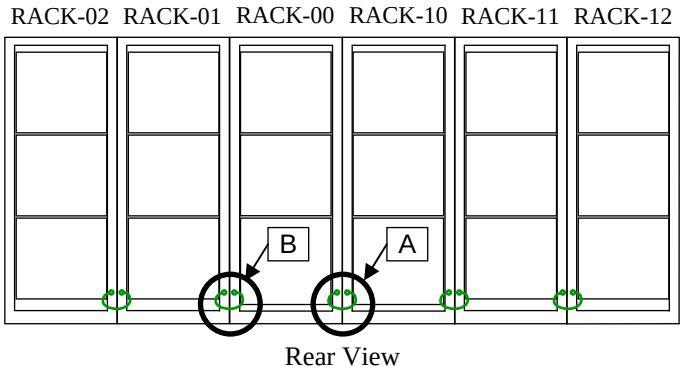
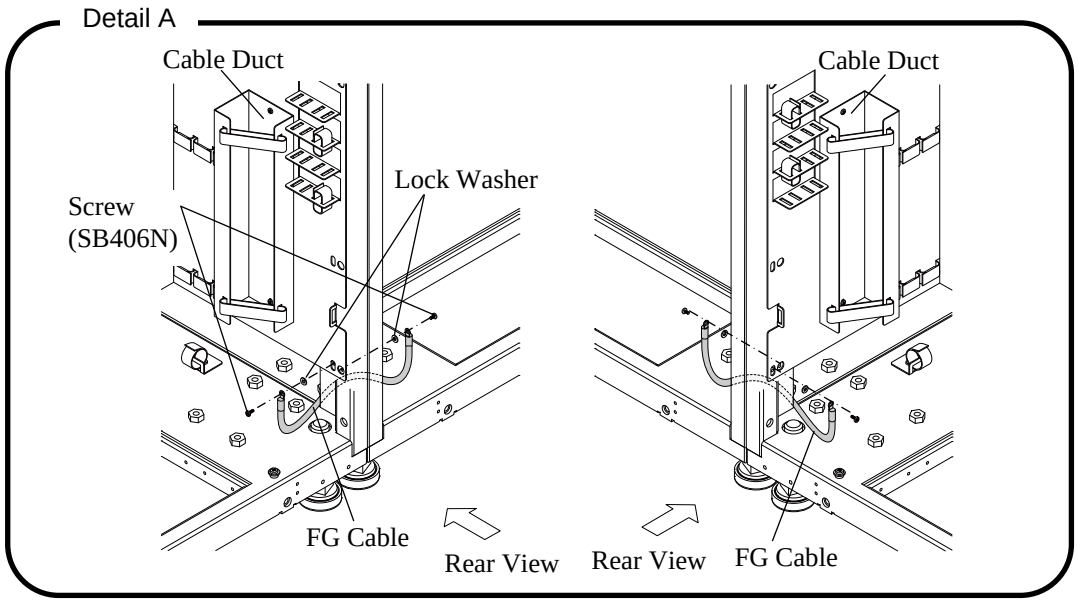
Copyright © 2010, 2011, Hitachi, Ltd.

5. Attachment of FG cable
   a. Attach the FG cable to the rear side of the racks, and secure it with the two screws and the two lock washers. (Refer to Fig. 3.3.1-5 or Fig. 3.3.1-6.)





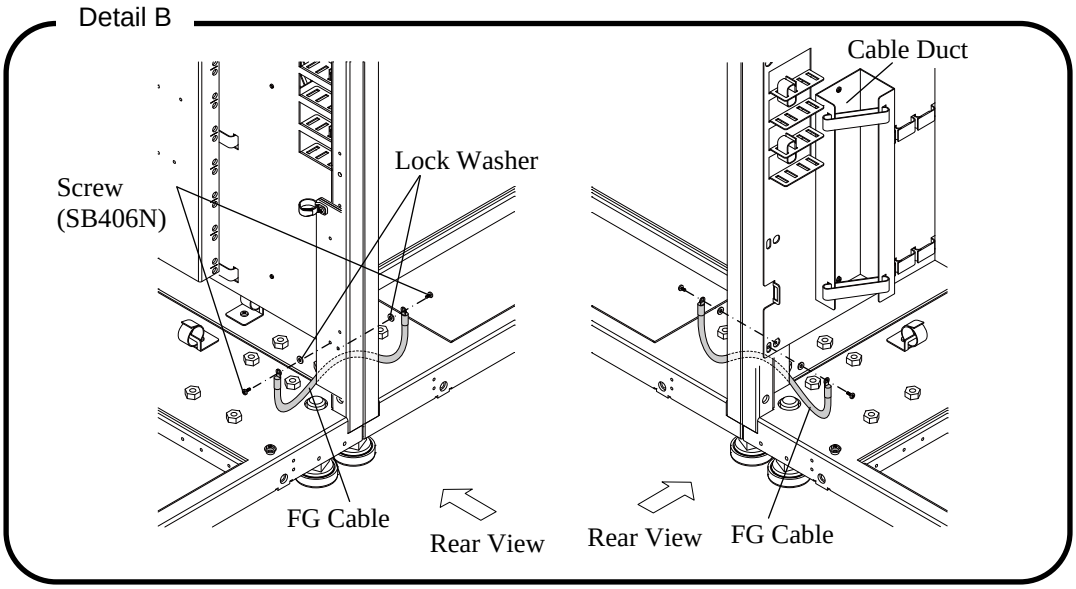


Fig. 3.3.1-5 Attachment of FG Cable

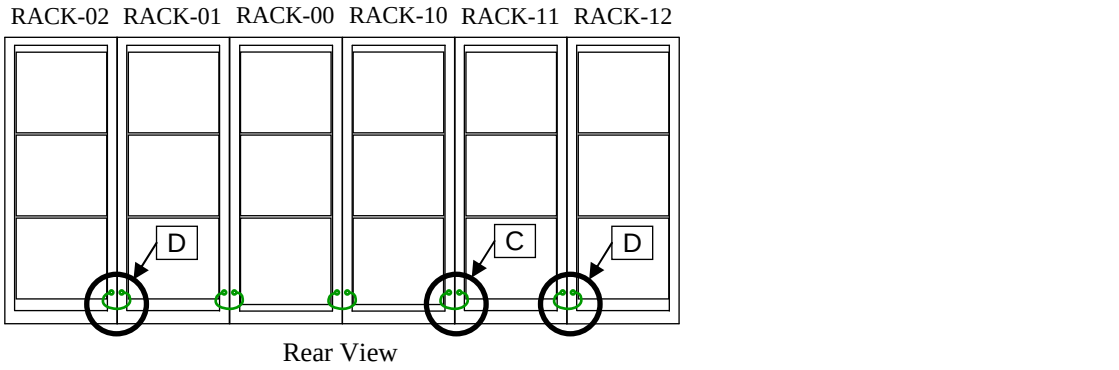
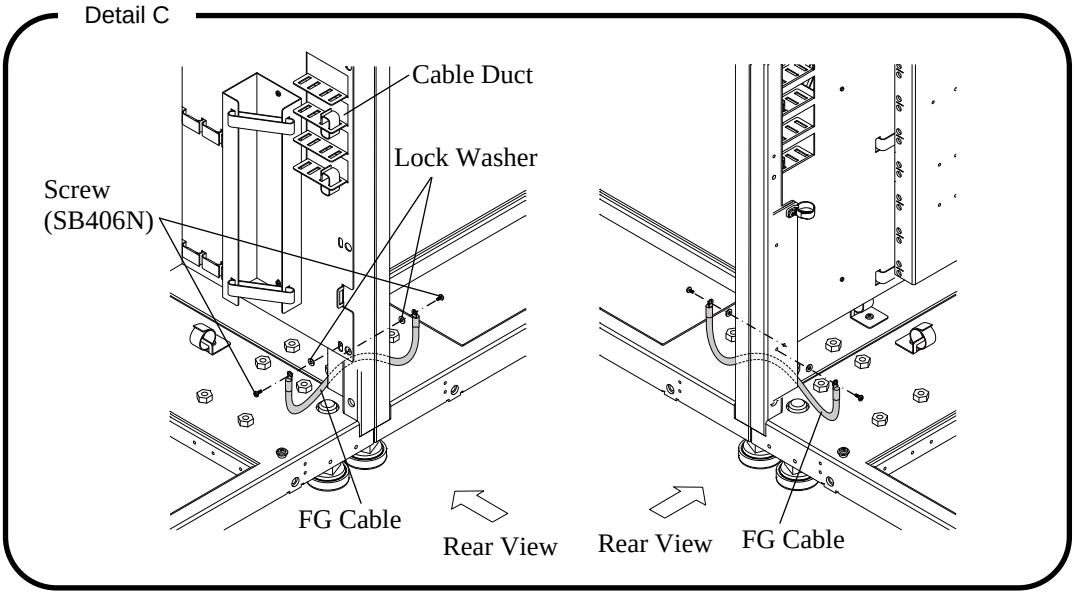
Copyright © 2010, 2011, Hitachi, Ltd.





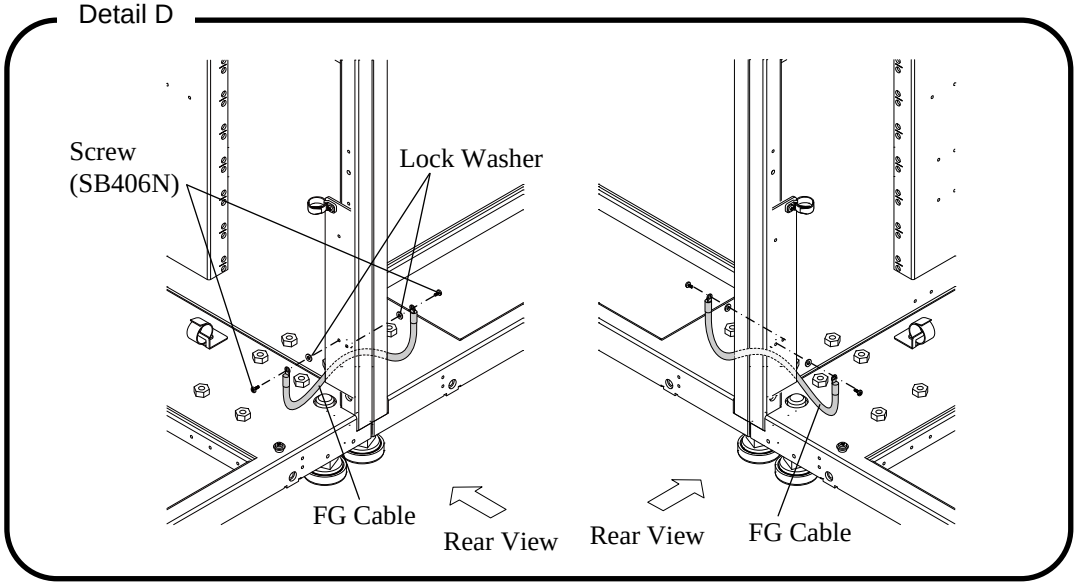


Fig. 3.3.1-6 Attachment of FG Cable

Copyright © 2010, 2012, Hitachi, Ltd.

6. Attachment of Nameplate (Only HDS)
   a. Attach the DKC-F710I-RK42 nameplate to the RACK bottom base of the rear side.

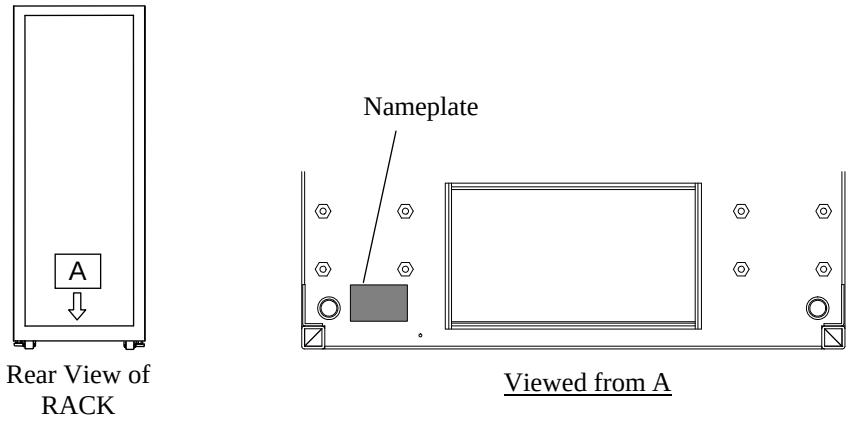

Fig. 3.3.1-7 Attachment of Nameplate

   b. When you need to install Side Cover (DKC-F710I-SCOV), remove the screw and nameplate tags from the rack frame.
      When you do not need to install Side Cover (DKC-F710I-SCOV), go to step e.
   c. Attach the DKC-F710I-SCOV nameplate to the nameplate tag.
   d. Attach all the nameplate tags with the screw.

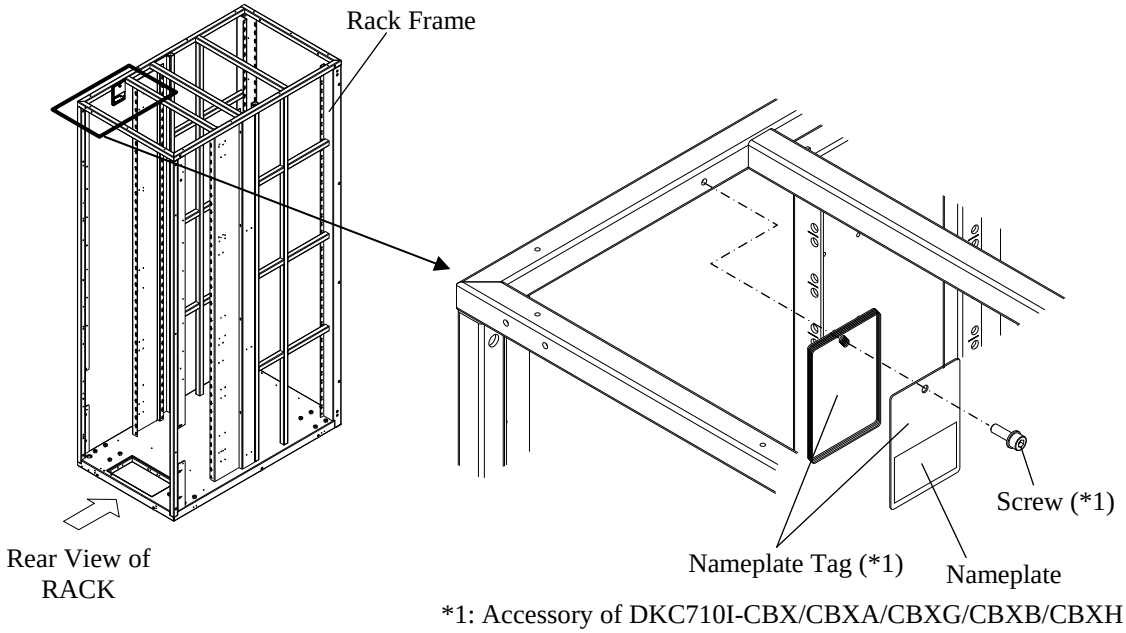

Fig. 3.3.1-8 Attachment of Nameplate

7. Return to the working table and do the rest of the work.
   New Installation: INST02-10
   Non-Disruptive Installation: INST02-40

Copyright © 2010, 2012, Hitachi, Ltd.

3.4 Installation of Controller Chassis (DKC710I-CBX/CBXA/CBXG/CBXB/CBXH)

Notes when installing the DKC710I-CBXB/CBXH:

CPCs (CACHE board) are contained in a CBXB/CBXH, however MPBs and ESWs are installed in the unit first in the installation procedure of the additional CBXB/CBXH. Therefore, red LEDs (LOC03-30) of CPCs light when the additional CBXB/CBXH is installed with CPCs (CACHE board). Lighting of red LEDs is acceptable until the CPCs are installed in the next step.
Please note that an installation for the additional CPC, CHA, DKA, HDD and so on at the same time as CBXB/CBXH must be executed in steps as follows.

[Installation Sample]

Step1: Installation of Controller Chassis (DKC710I-CBXB/CBXH) INST03-04-10
Step2: Installation of Processor Blade, HUB Kit, PCI Express Switch Adapter, Inter-Controller Connecting Kit and Additional Controller PS (DKC-F710I-MP/MPR/HUB/MDEXC/ESW/APC).....INST03-07-10
Step3: Installation of Additional Cache Memory (DKC-F710I-C16G/C16GR/C32G/C32GR/CPC/BM64/BM128).....INST03-10-10
Step4: Installation of Channel Adapter (DKC-F710I-16MFS/16MFL/8UFC/8UFCR/16UFC/16UFCR/16MUS/16MUSR/16MUL/8FOE).....INST03-08A-10
Step5: Installation of Drive Chassis (DKC-F710I-UBX/SBX).....INST03-05-10
Step6: Installation of Disk Adapter, PCI Express Switch Adapter, DEV Interface Cable and Drive INST03-12-10

Operate the step 1 to 3 when installing only the additional CBXB/CBXH.
For the installation of the additional CHA/DKA/HDD at the same time as the CBXB/CBXH, operate sequentially the step 4 to 6 after finishing the step 1 to 3.
Installing the additional parts for the step 4 to 6 at the same time as the step 1 to 3 is not possible.
Red LEDs for each part light when the parts mentioned above are installed at the same time.
In this case, remove the part at its related operation step and follow the correct procedures to reinstall it.

Copyright © 2010, 2011, Hitachi, Ltd.

3.4.1 Installation Procedure of Controller Chassis

1. Installing the rails (If the rails are already installed, this installation procedure is not required.)

   EIA units and intervals of mounting holes of 19-inch rack frame conforming to EIA standard
   - A unit (U) space conforming to EIA standard is 19 inches wide and 44.45 mm high as shown in the figure below.
   - The boundary of the unit falls on the middle of the interval of 12.7 mm.
   - Universal intervals: Repeat of 44.45 mm (15.875 mm + 15.875 mm + 2.7 mm)
     Wide intervals: Repeat of 44.45 mm (31.75 mm + 12.7 mm)
     Maximum number of mountable unit spaces: -

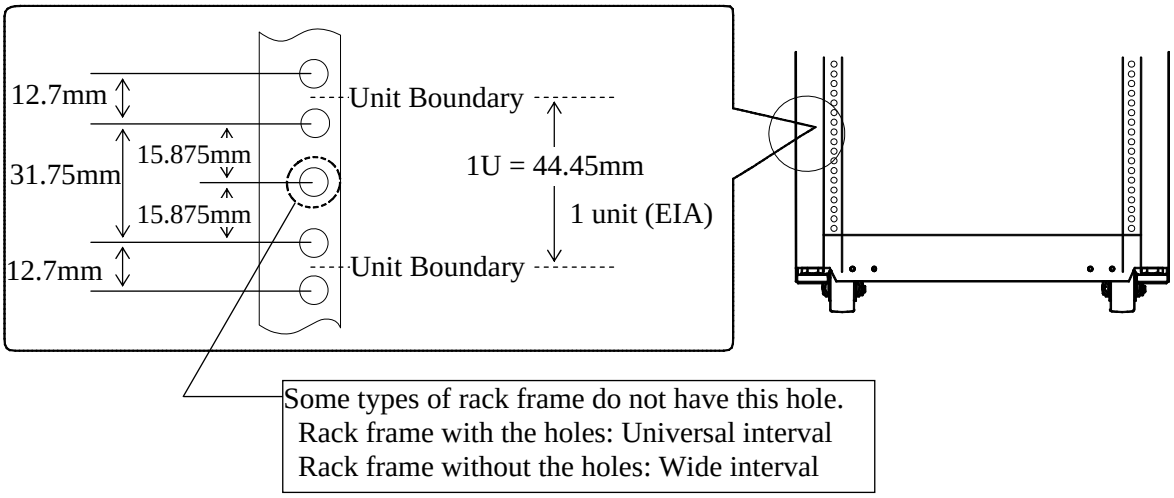

Fig. 3.4.1-1 Attachment Hole Size of Rack

Copyright © 2010, Hitachi, Ltd.

The addresses are given as 1, 2, 3, and so on counted from the bottom of the rack frame. The following figure shows a layout example of installing Controller Chassis in 42 units rack frame. However, installing positions of Controller Chassis may differ according to the construction within the rack frame.

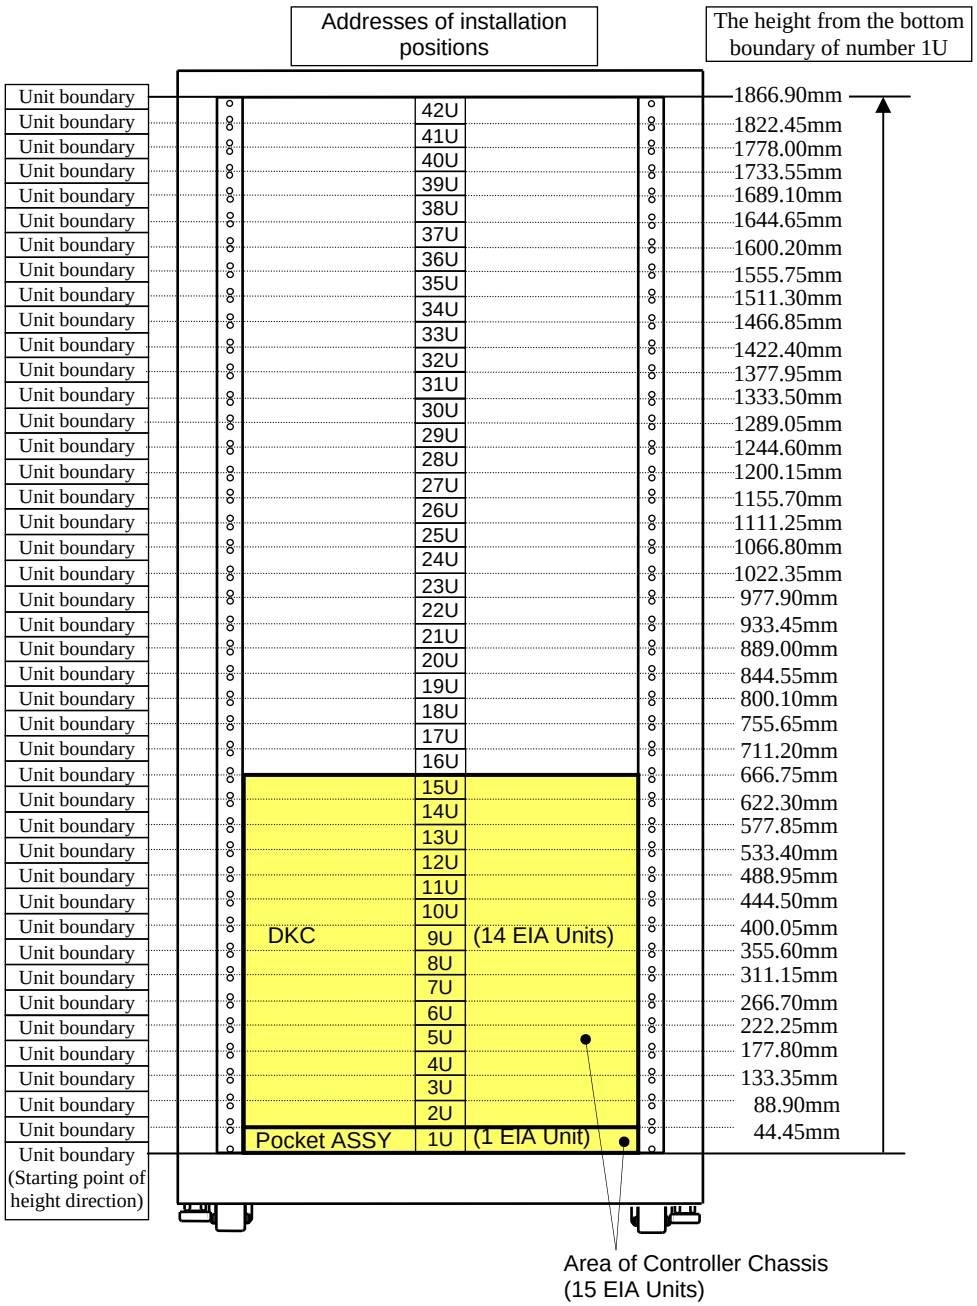

Fig. 3.4.1-2 Whole Layout of Installation Position Addresses

Copyright © 2010, Hitachi, Ltd.

a. On the right side of the installation location in the rack frame, align the round holes of the rail with those of the rack frame and insert the rack nuts (at four places in total in front and rear).
b. Fasten the rail to the rack frame using the WA socket bolts (at two places each on the front and rear sides).
c. Install the rail to the left side of the rack frame in the same way.

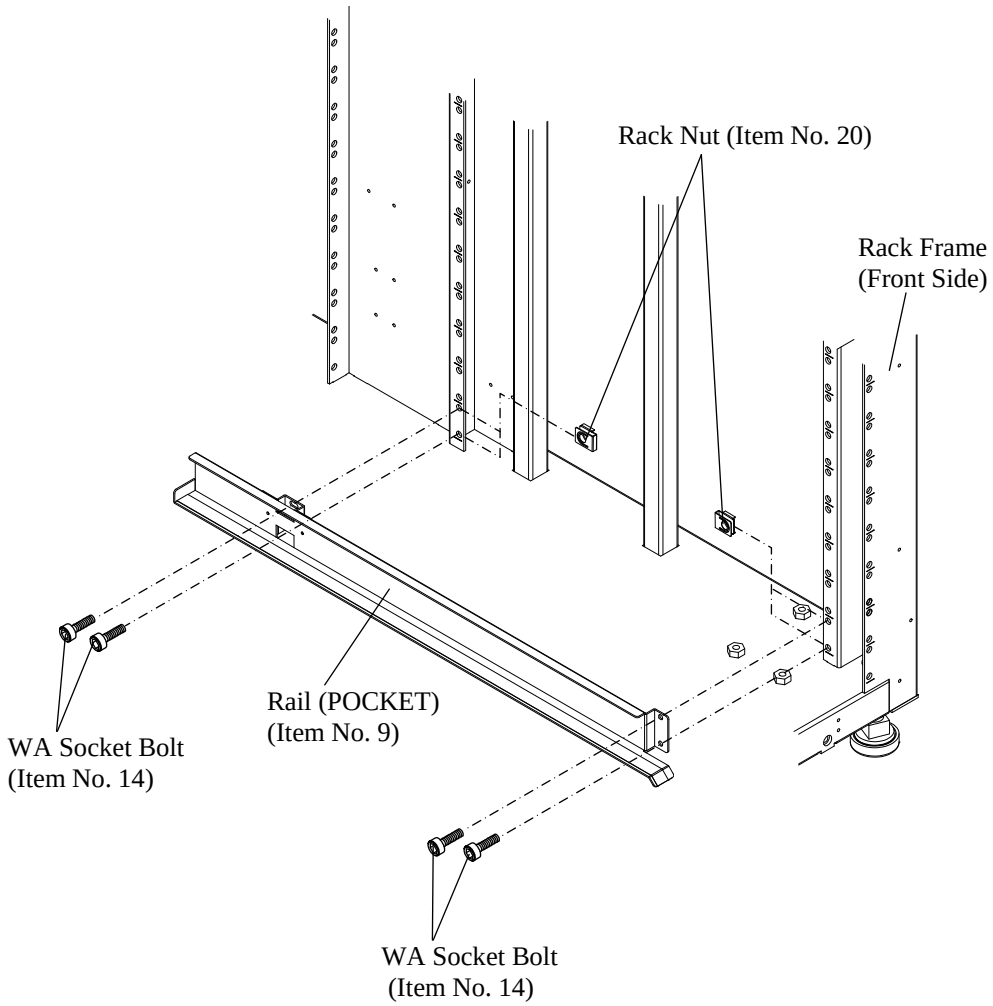

Fig. 3.4.1-3 Attachment of Rails

Copyright © 2010, Hitachi, Ltd.

d. On the right side of the installation location in the rack frame, align the round holes of the rail with those of the rack frame and insert the rack nuts (at four places in total in front and rear).
e. Fasten the rail to the rack frame using the WA socket bolts (at two places each on the front and rear sides).
f. Install the rail to the left side of the rack frame in the same way.

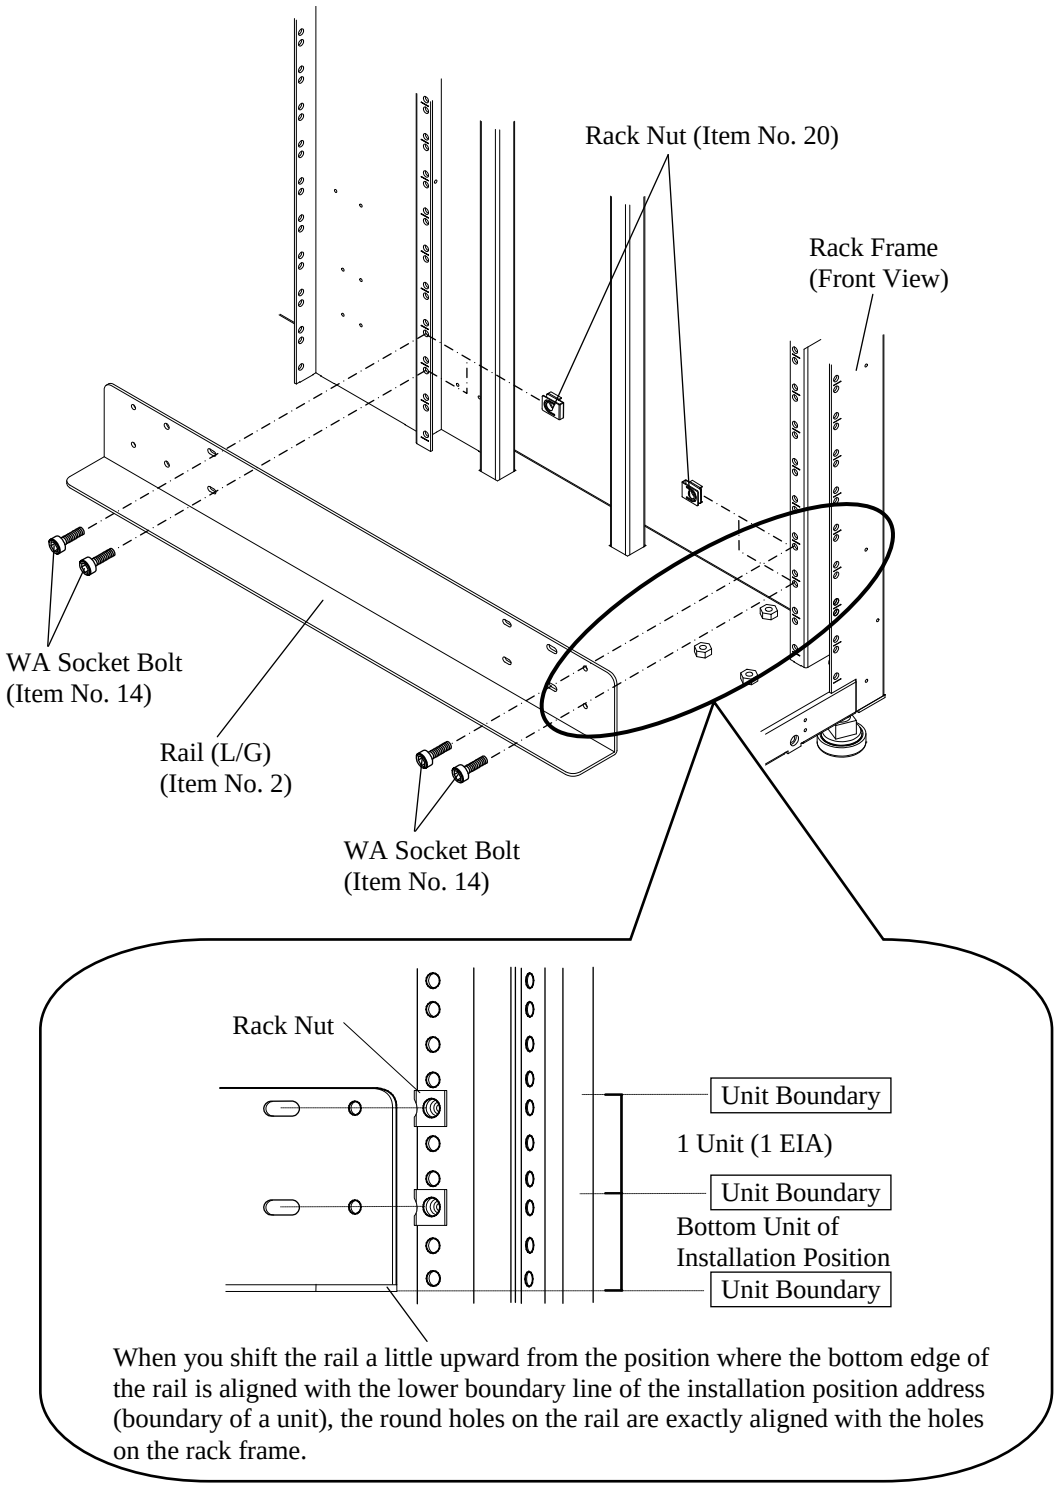

Fig. 3.4.1-4 Attachment of Rails

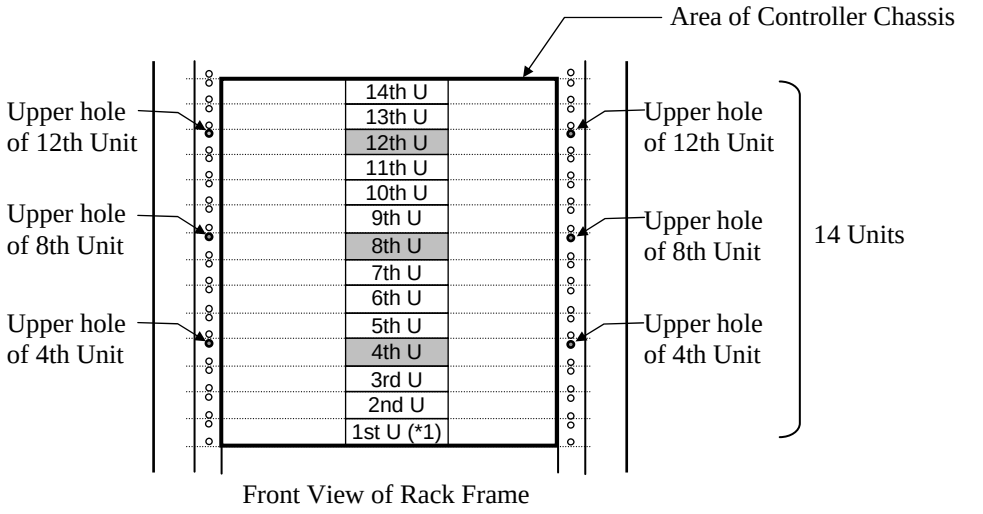
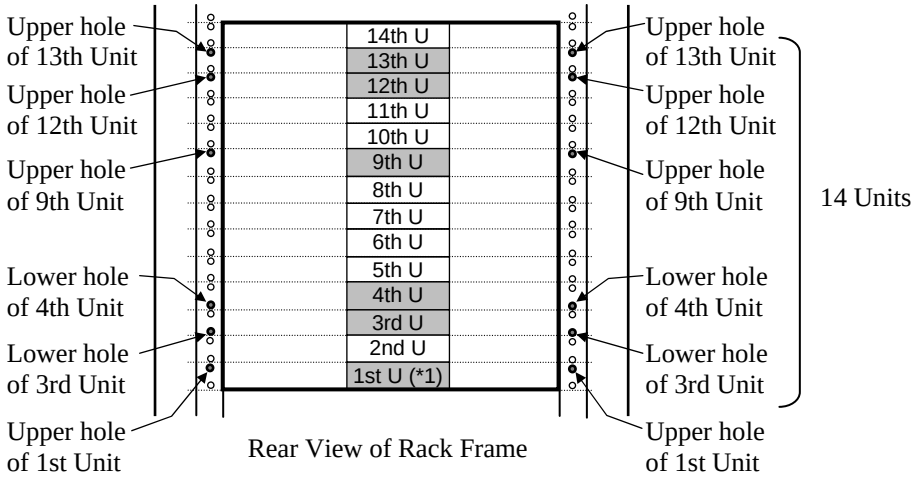
Copyright © 2010, Hitachi, Ltd.

2. Installing rack nuts
   a. Fit the three rack nuts to each of the right and left beams on the front side of the rack frame.
   b. Fit the six rack nuts to each of the right and left beams on the rear side of the rack frame.



Front View of Rack Frame



Rear View of Rack Frame

*1: Bottom Unit of Installation Position

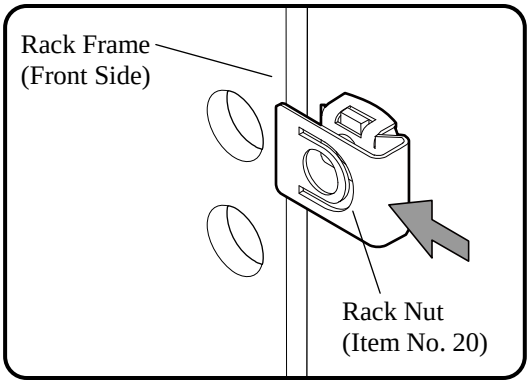


Fig. 3.4.1-5 Attachment of Rack Nuts

3. Installing the DKC and Pocket ASSY

CAUTION

Paying attention to falls:
Work carefully because the mass of the single DKC is about 180 kg.

a. Install the DKC on the Rack frame referring to mounting procedure using the special lifter. (See INST03-15-10 through 40.)
b. Fix the DKC with the six screws.

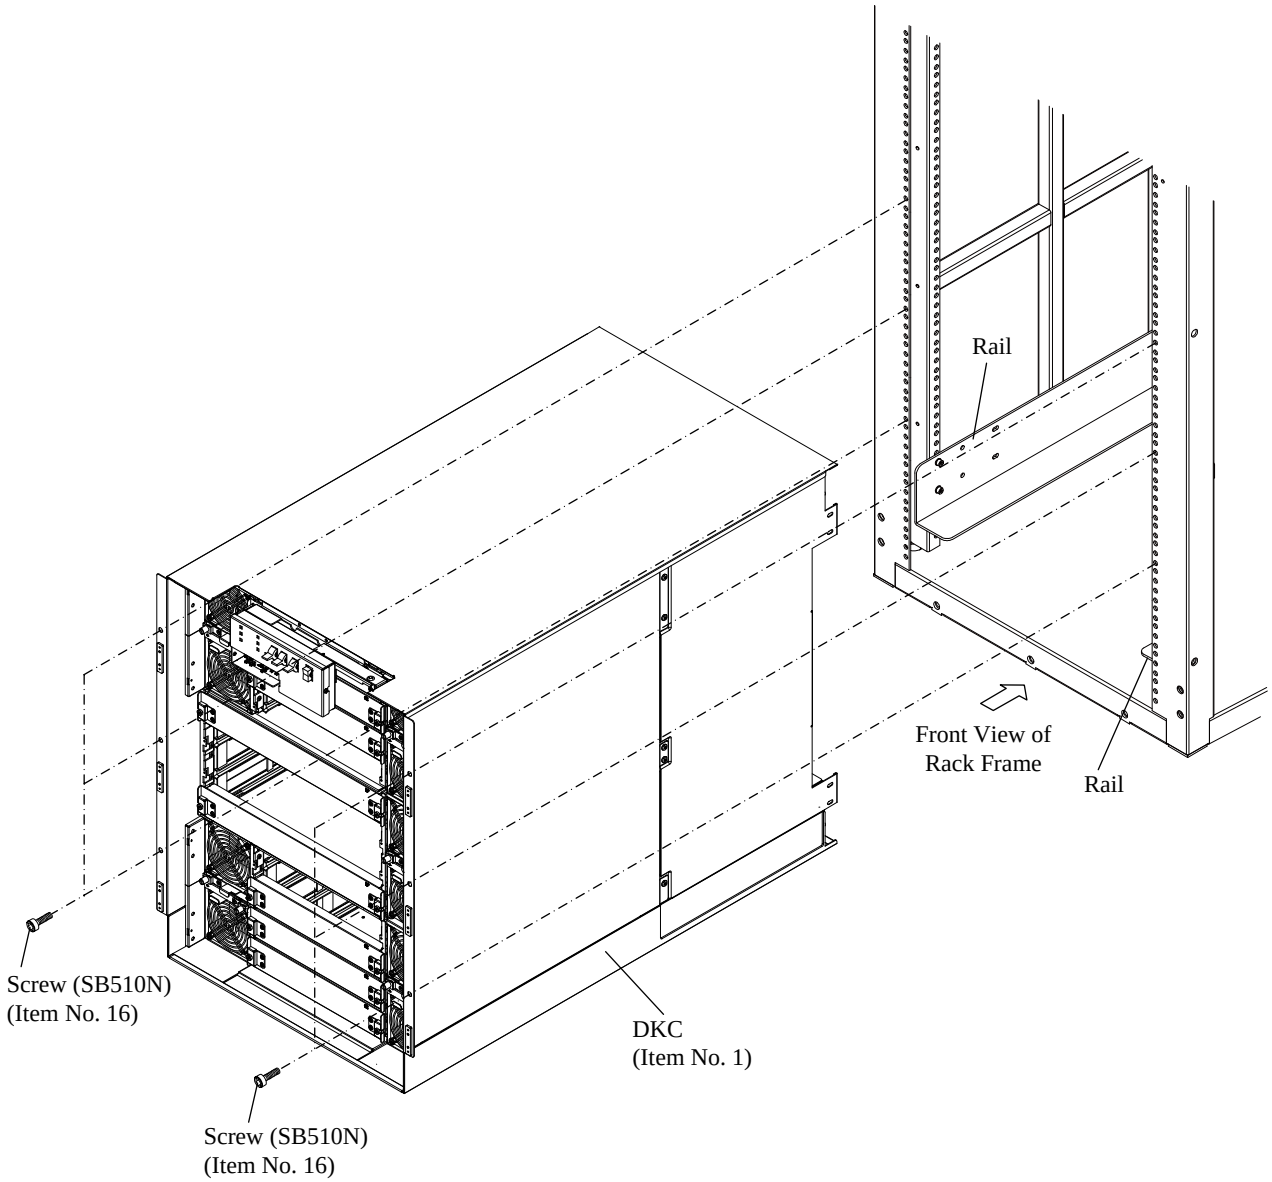

Fig. 3.4.1-6 Installing DKC

Copyright © 2010, Hitachi, Ltd.

c. Attach the four rear stoppers on the rear side of DKC and tighten the WA socket bolts.
d. Attach the tray on the rear side of DKC and tighten the WA socket bolts.

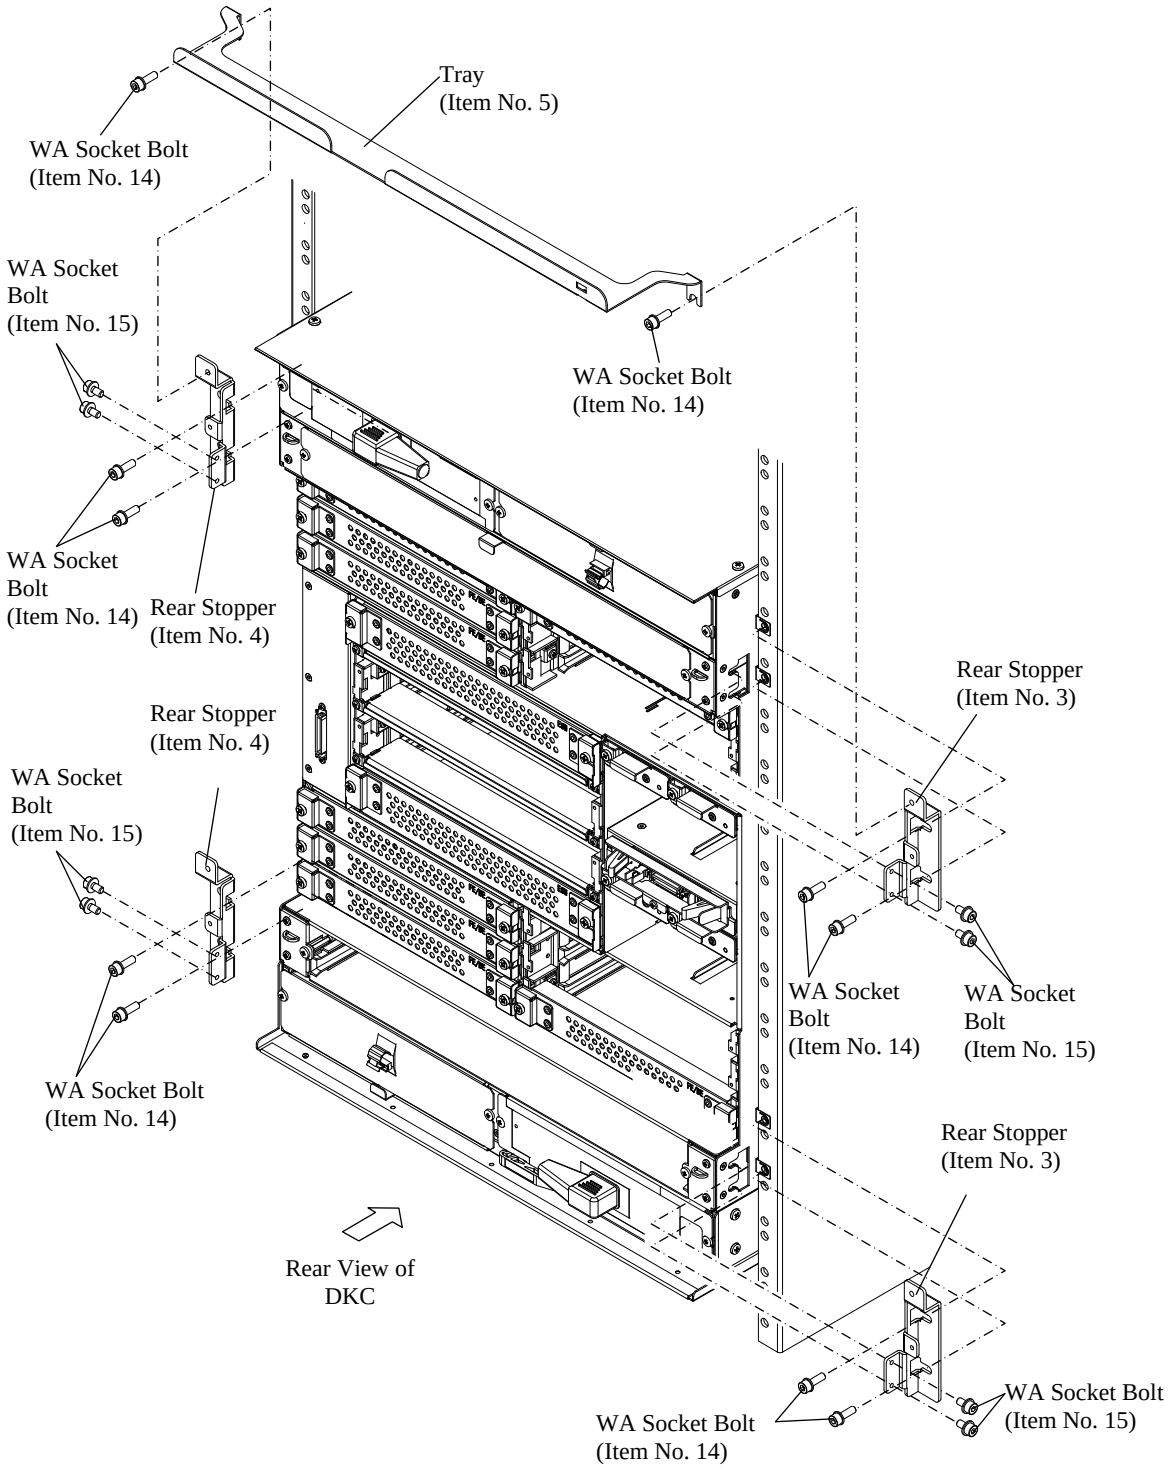

Fig. 3.4.1-7 Attachment of Stoppers and Tray

Copyright © 2010, Hitachi, Ltd.

4. Install the Pocket ASSY
   a. When the handle of the Pocket ASSY is fixed with the WA socket bolts (for transportation), remove the WA socket bolts.
      When the handle of the Pocket ASSY is secured without the WA socket bolts, proceed to the step d.
   b. Remove the two WA socket bolts, and loosen the two screws. (Keep the two removed WA socket bolts in the Pocket ASSY.)
   c. Slide the handle of the Pocket ASSY upward, and secure it with the two screws.

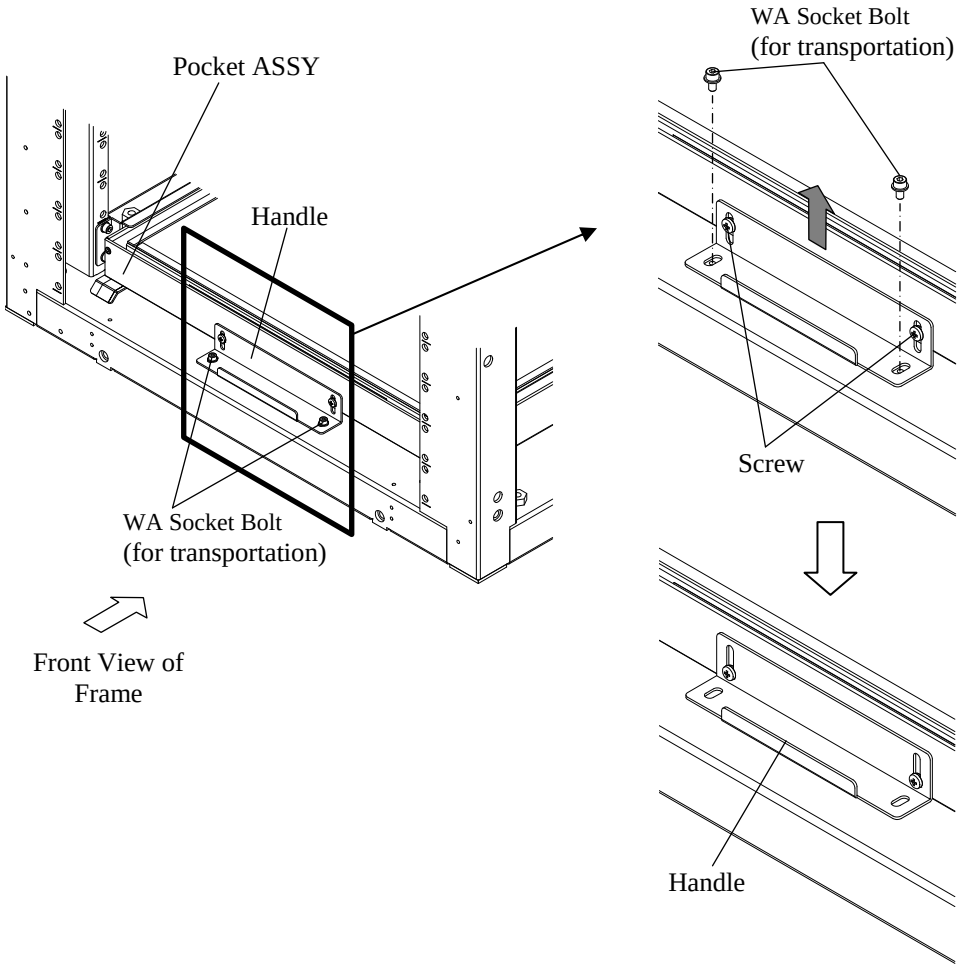

Fig. 3.4.1-8 Removing Transport Bolts

Copyright © 2010, 2012, Hitachi, Ltd.

d. Loosen the two screws and remove the PC tray from the Pocket ASSY. (Keep the two removed screws in the Pocket ASSY.)
e. Insert the modular plug cord, two EMI cores, and Parts Location to the Pocket ASSY.
f. Attach the PC tray to the Pocket ASSY.

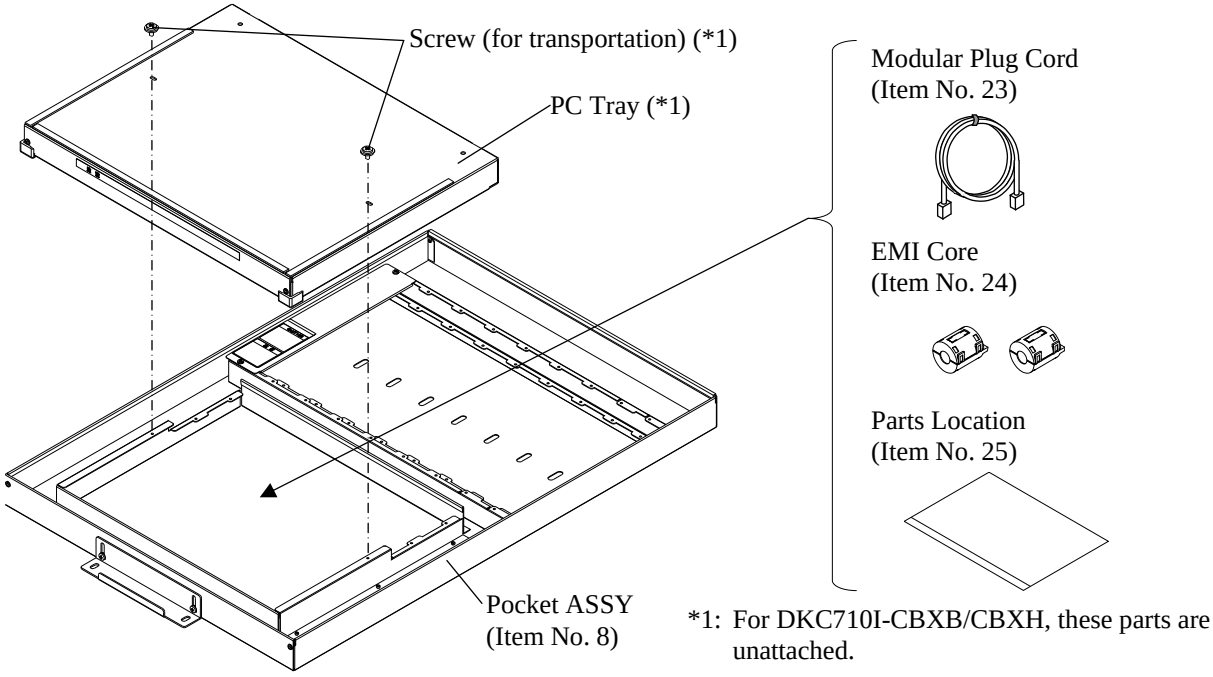

Fig. 3.4.1-8A Installation of Pocket ASSY

g. Install the Pocket ASSY to the front side of frame.

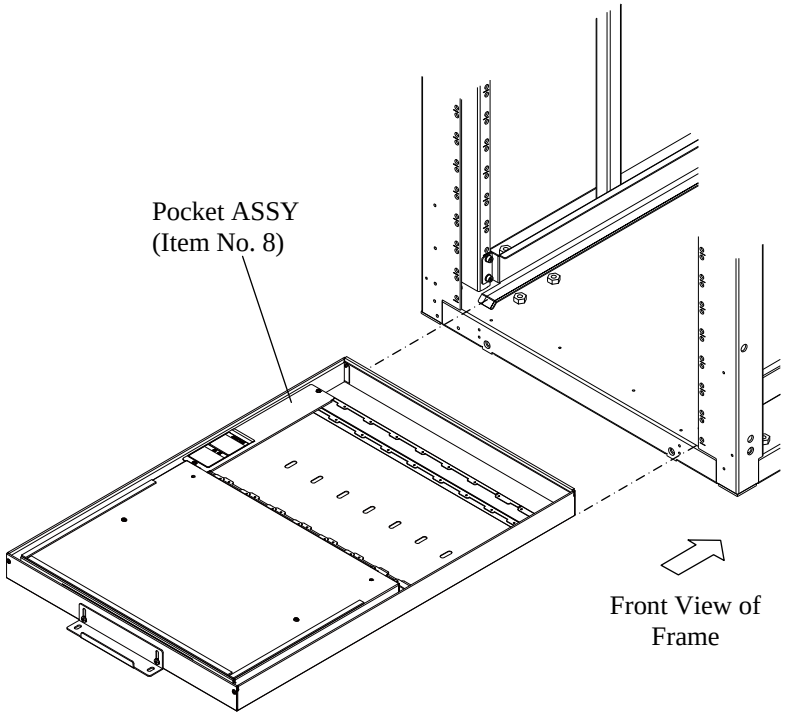

Fig. 3.4.1-9 Installation of Pocket ASSY

Copyright © 2010, 2012, Hitachi, Ltd.

5. Attach the cable ducts
   a. Attach the two cable ducts on the rear side of frame and tighten the ten screws.
   b. When attach the HDS 3 phase PDU and HP 1 phase PDU, remove the holder (inlet) and two screws from each cable duct.

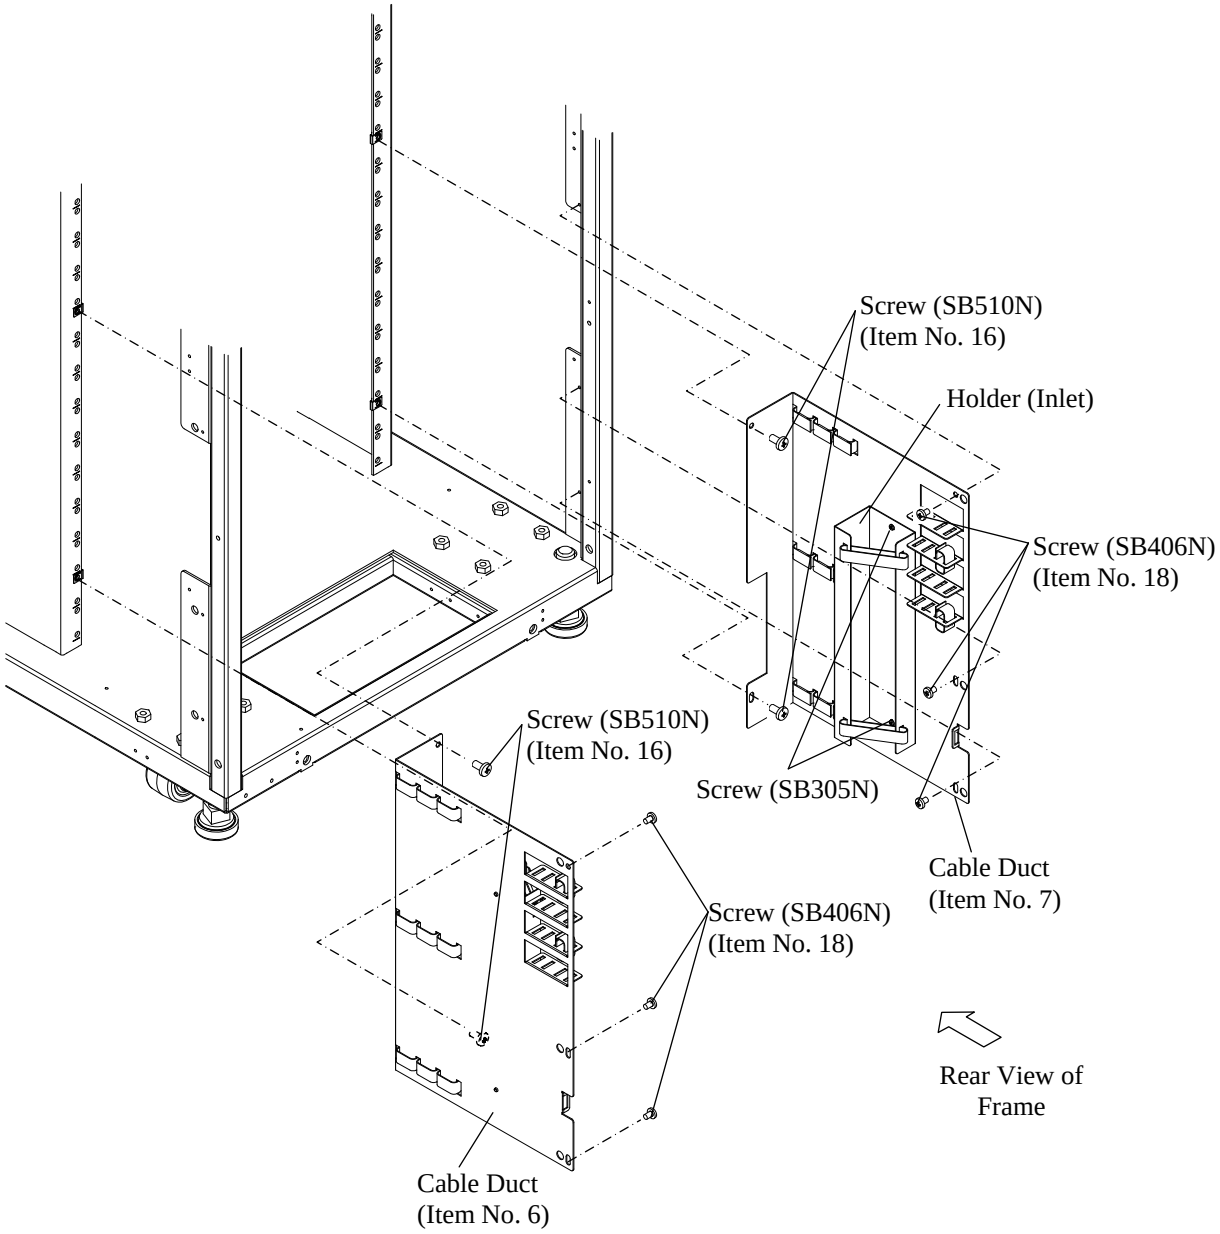

Fig. 3.4.1-10 Attachment of Cable Ducts

Copyright © 2010, 2012, Hitachi, Ltd.

6. Attach the support parts (For DKC710I-CBXB/CBXH, this operation is not needed.)
   a. Attach the support to the rear side of rear door and tighten the two screws.
   b. Attach the stopper pin to the support.
   c. Attach the door bar to the rear door and fix it with the locking clamp.

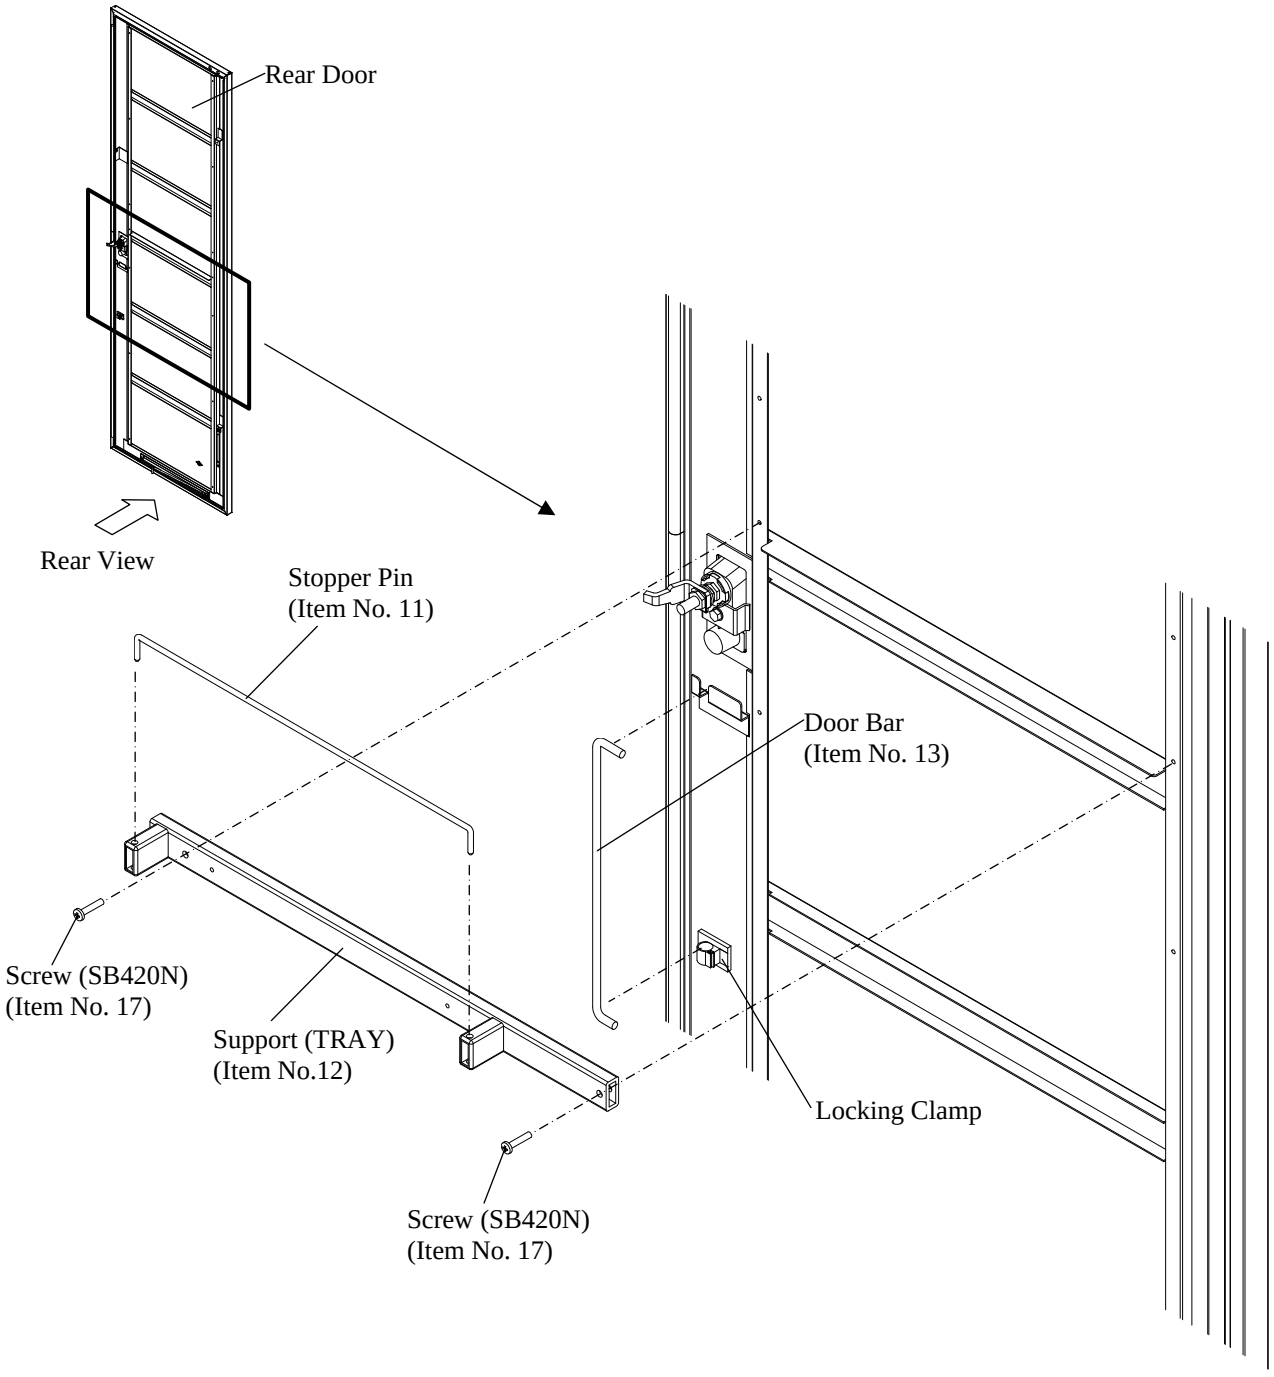

Fig. 3.4.1-11 Attachment of Support Parts

Copyright © 2010, 2012, Hitachi, Ltd.

7. Jumper Setting

Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

a. Set the jumpers (JP1 and JP2) in the SSVPMN.

⚠ CAUTION

A serious failure occurs if a wrong setting is made.
Operate very carefully referring to the setting table not to make a mistake in the setting.

Table 3.4.1-1 Installation of Jumper in SSVPMN

Function Name	Jumper No.	Settings	Remarks
SSVPMN	JP1 (MODULE ID)	Set the MODULE ID of the DKC equipped with SSVPMN. • MODULE0 ... SSVPMN-0 (DKC-0) Plug the jumper cap on #1, 4, 7, 10.	For SSVPMN-0 JP1 		• MODULE1 ... SSVPMN-1 (DKC-1) Plug the jumper cap on #3, 6, 9, 12.	For SSVPMN-1 JP1 	JP2 (AUTOPSON)	Power on the subsystem by switching PS ON/PS OFF after turn on the AC power. (Initial setting) Set only the SSVPMN-0 in the Jumper. (#3-4) No setting of SSVPMN-1 is needed.	Disable Setting JP2 		The subsystem is powered on automatically after turn on the AC power. Set only the SSVPMN-0 in the Jumper. (#1-2) No setting of SSVPMN-1 is needed.	Enable Setting JP2 

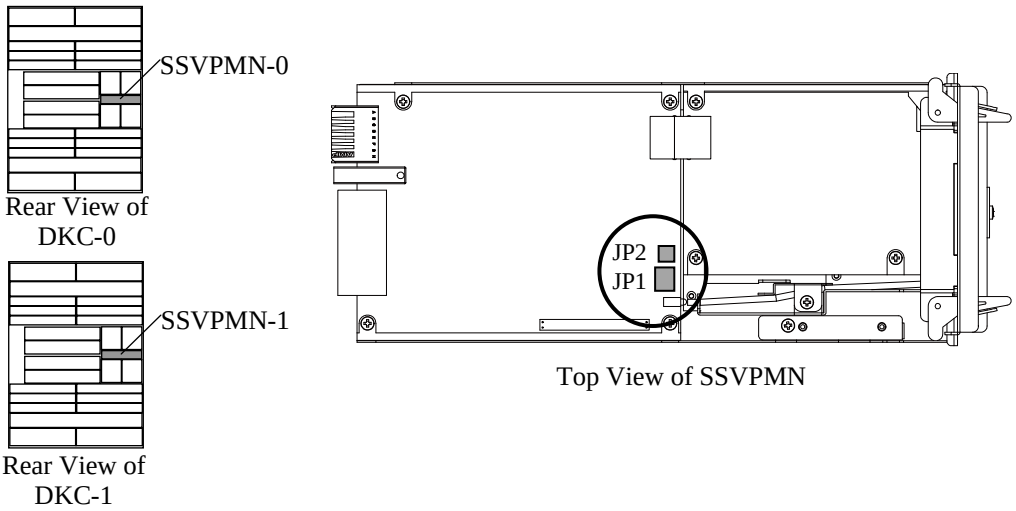

Fig. 3.4.1-12 Installation of Jumper in SSVPMN

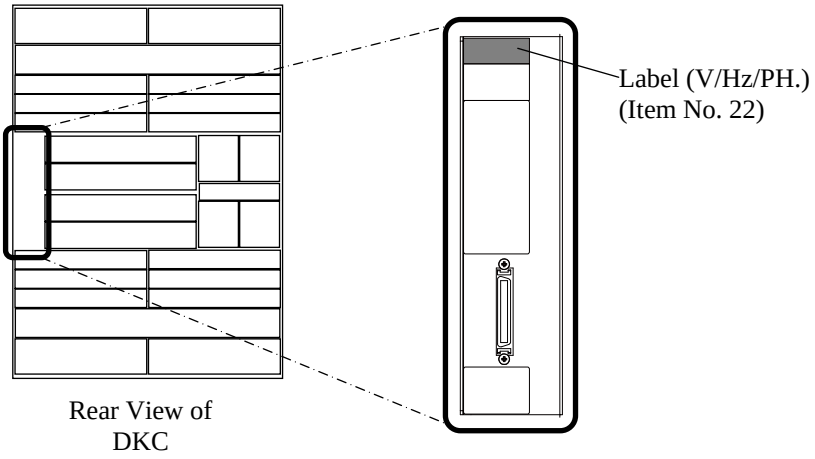
Copyright © 2010, Hitachi, Ltd.

8. Labeling
   a. Attach the label (V/Hz/PH.) on the DKC. The label (V/Hz/PH.) should be selected among the sheet of label (V/Hz/PH.) corresponding to the operating voltage, frequency and phase. When the corresponding operating voltage, frequency and phase are not exist, write the values in the label that is not listed the value of the operating voltage, frequency and phase.



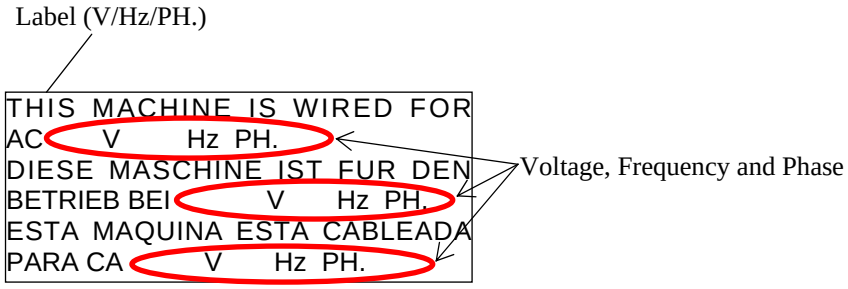


Fig. 3.4.1-13 Attachment of Label

Copyright © 2010, 2012, Hitachi, Ltd.

b. Attach the labels and nameplates on the front side of DKC.

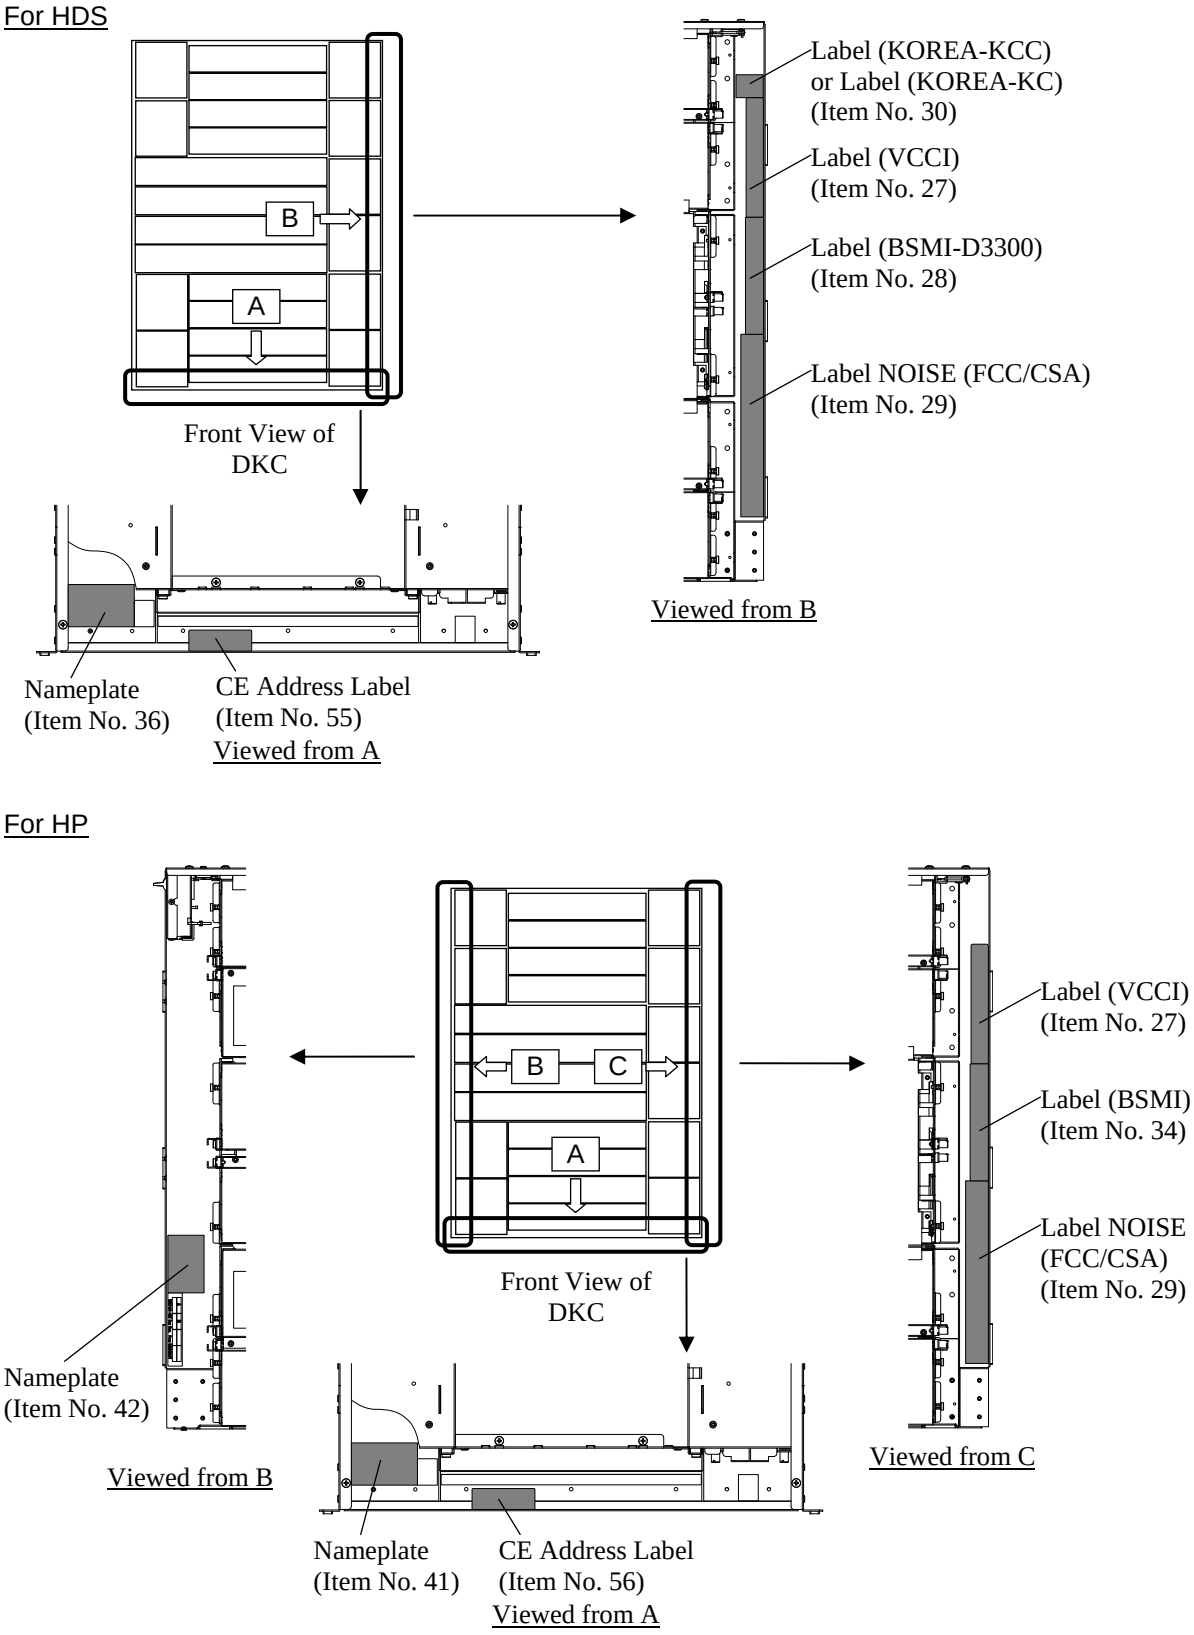

Fig. 3.4.1-14 Attachment of Labels and Nameplate

Copyright © 2011, 2012, Hitachi, Ltd.

c. Attach the Location Label (R) on the rear side of the bottom of the RACK. If the label is already attached, this procedure is not necessary.

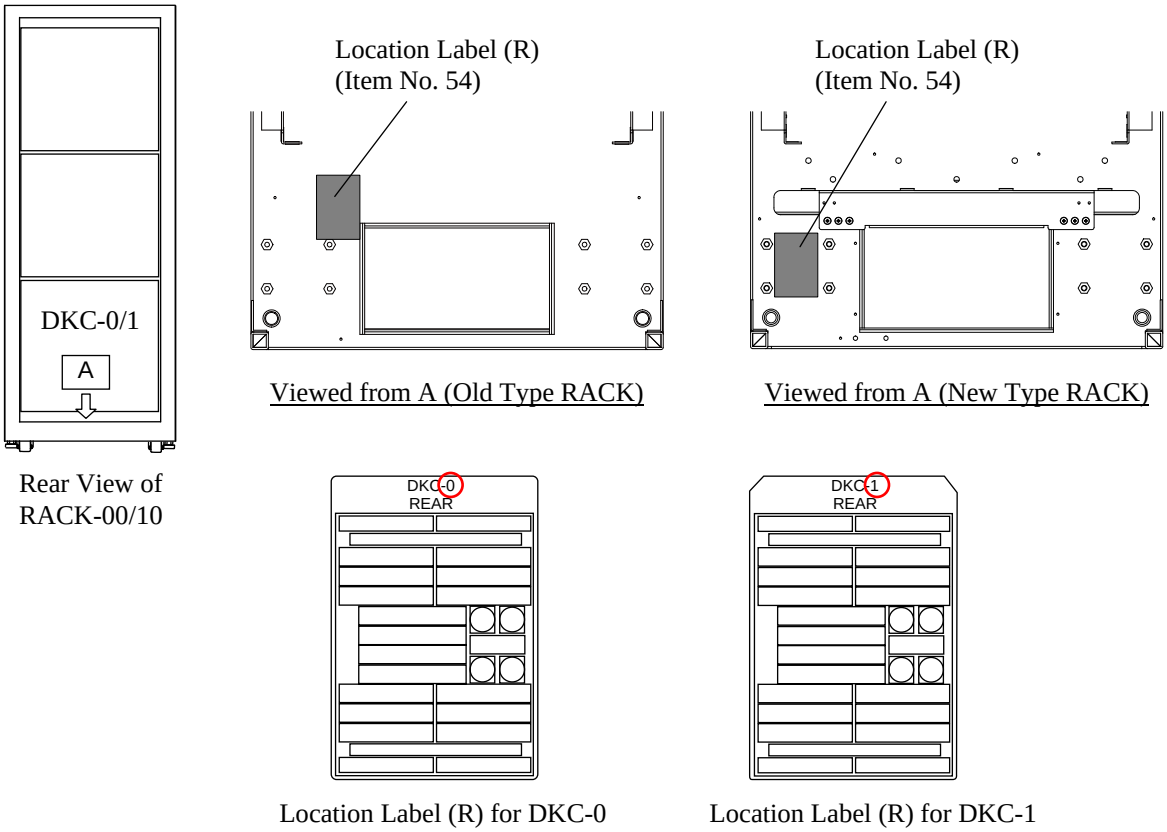

Fig. 3.4.1-14A Attachment of Location Label

For HDS

d. Attach the Sheet (BLIND) to the DKC bezel for the DKC-1.
If the Sheet (BLIND) is already attached to the DKC bezel for the DKC-1, this procedure is not necessary.

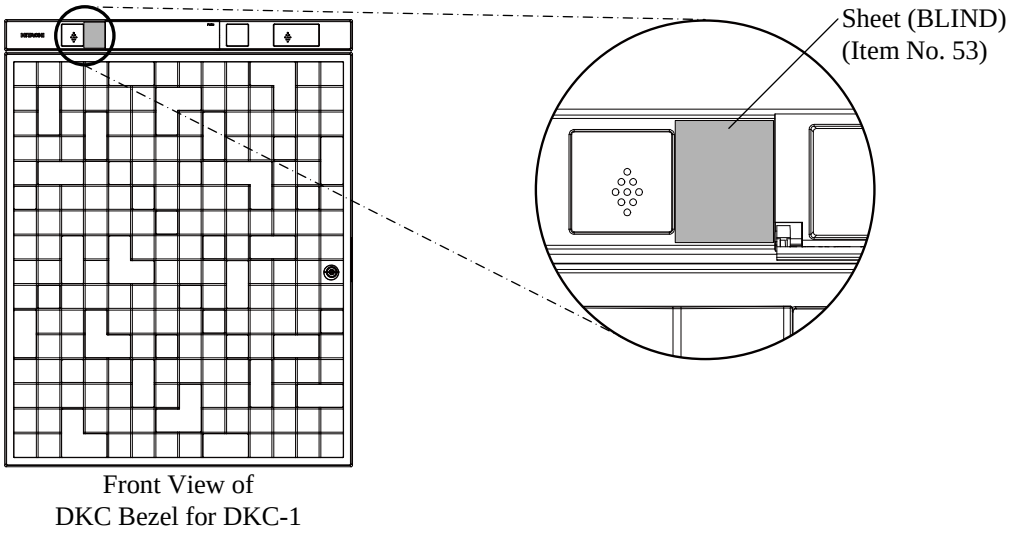

Fig. 3.4.1-14B Attachment of Sheet

Copyright © 2010, Hitachi, Ltd.

9. Attach the nameplate
   a. Attach the nameplates to the nameplate tags.
   b. Attach the nameplate tags with the screw.

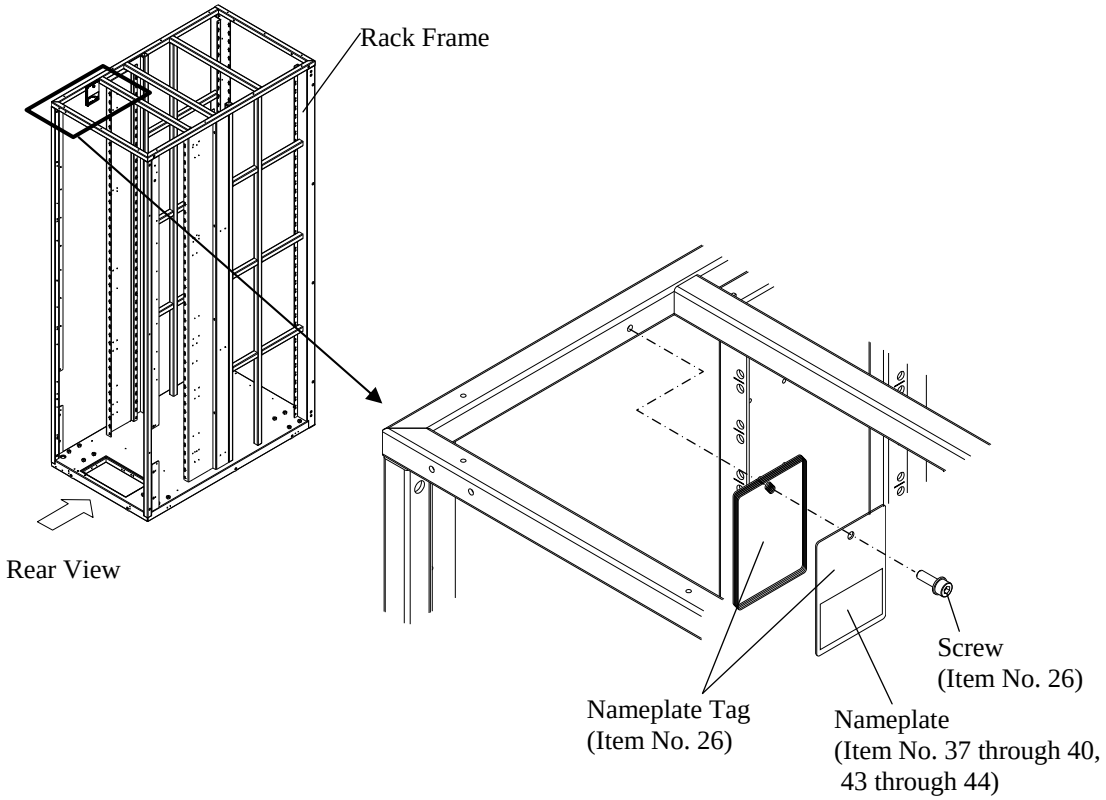

Fig. 3.4.1-15 Attachment of Nameplate

Copyright © 2010, 2014, Hitachi, Ltd.

10. When the additional controller chassis is DKC710I-CBXB/CBXH, install the parts of the working item No.7 in Table2.2-1 on the page INST02-40.
    In case the additional controller chassis is not DKC710I-CBXB/CBXH, go to "3.4.2 Installation Procedure of Bezel".

    a. Items from No.47 to No.52 in Table 3.4-3 or Table 3.4-5 are the equivalent of 1st Inter-Controller Connecting Kit.

    For the installation of these parts, install the parts according to the procedure on the page INST03-07-10 with the working item No.7 in Table2.2-1 on the page INST02-40, such as Processor Blade, HUB Kit, PCI Express Switch Adapter, Inter-Controller Connecting Kit and Additional Controller PS Installation(DKC-F710I-MP/MPR/HUB/ESW/MDEXC/APC), after this procedure (Installation of Controller Chassis) because it is necessary to turn on the DKC-1 by order of the SVP.

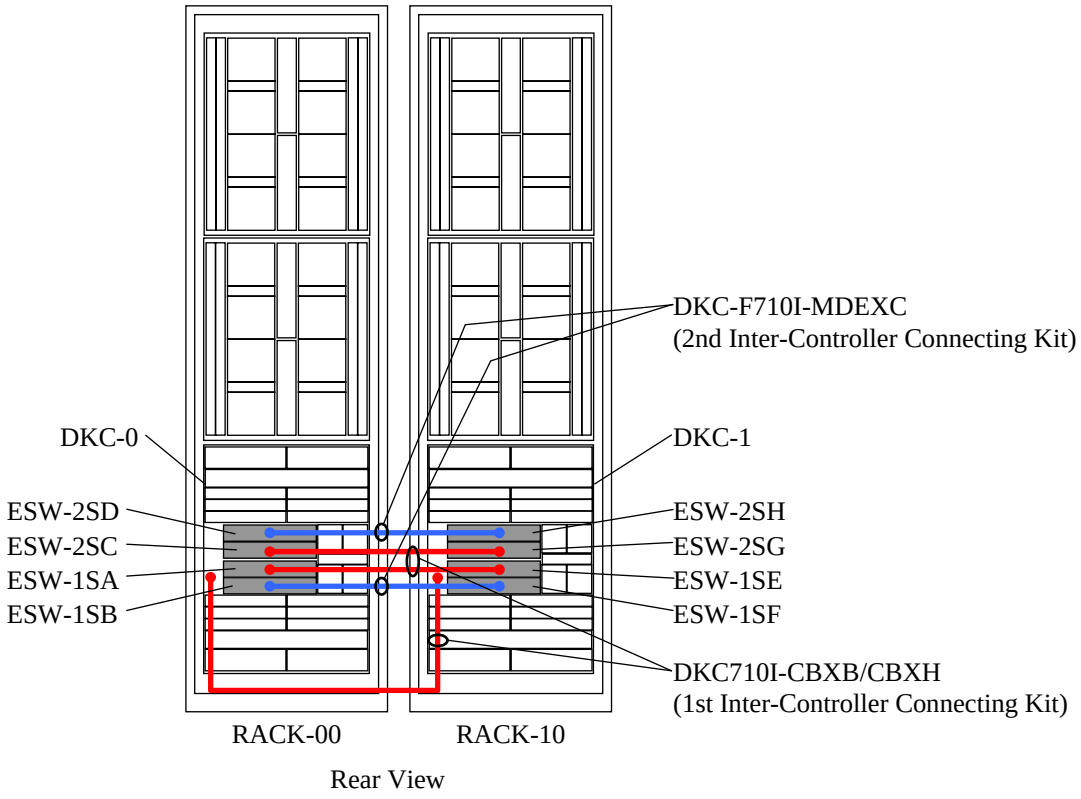

Fig. 3.4.1-16 Mounting Position of Inter-Controller Connecting Kit

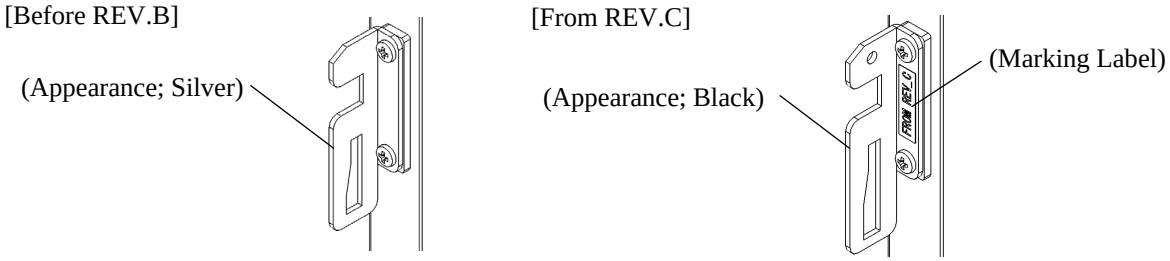
Copyright © 2010, 2014, Hitachi, Ltd.

3.4.2 Installation Procedure of Bezel

1. Attachment of Parts
   a. Attach the two hinges on the front side and fasten the four screws.
   b. Attach the bracket on the front side and fasten the two screws.
   c. Attach the two plates on the front side and fasten the four screws.
   d. Attach the angle on the front side and fasten the two screws.

Notice: Pay attention to the angle (Item No.104) because it is different by the bezel revision. Cannot lock by the combination of the bezel of REV_C and the angle of the bezel attachment before REV_B.



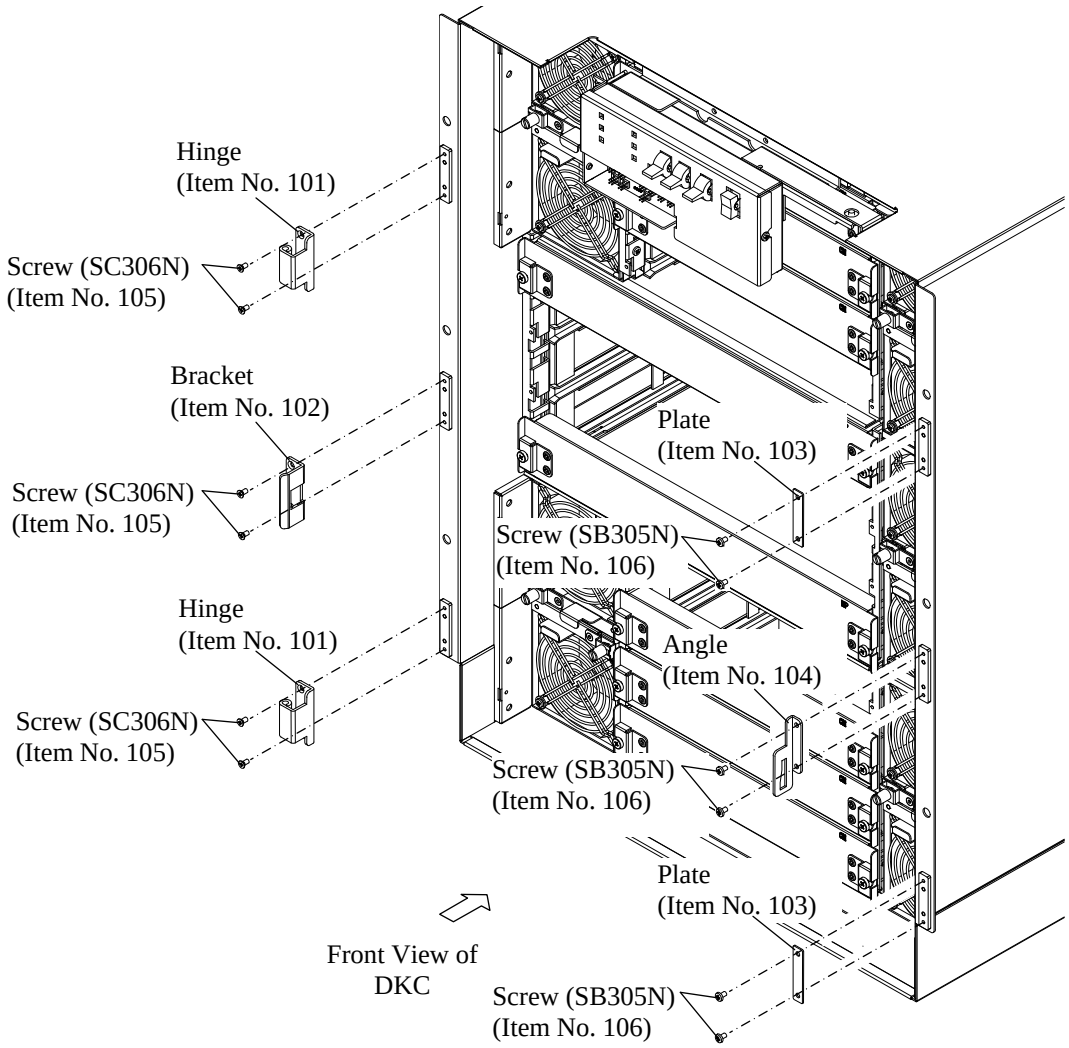


Fig. 3.4.2-1 Attachment of Parts

Copyright © 2010, 2014, Hitachi, Ltd.

2. Attachment of Bezel (14U)
   a. Attach the Bezel and fix the hinges with the two pins.
   b. Closing the bezel by pushing the pocket door pull.
   c. Turn the key 90 degrees counterclockwise direction to lock the Bezel, and take out the key from the keyhole.
   d. Push the left middle side of the Bezel until it clicks.

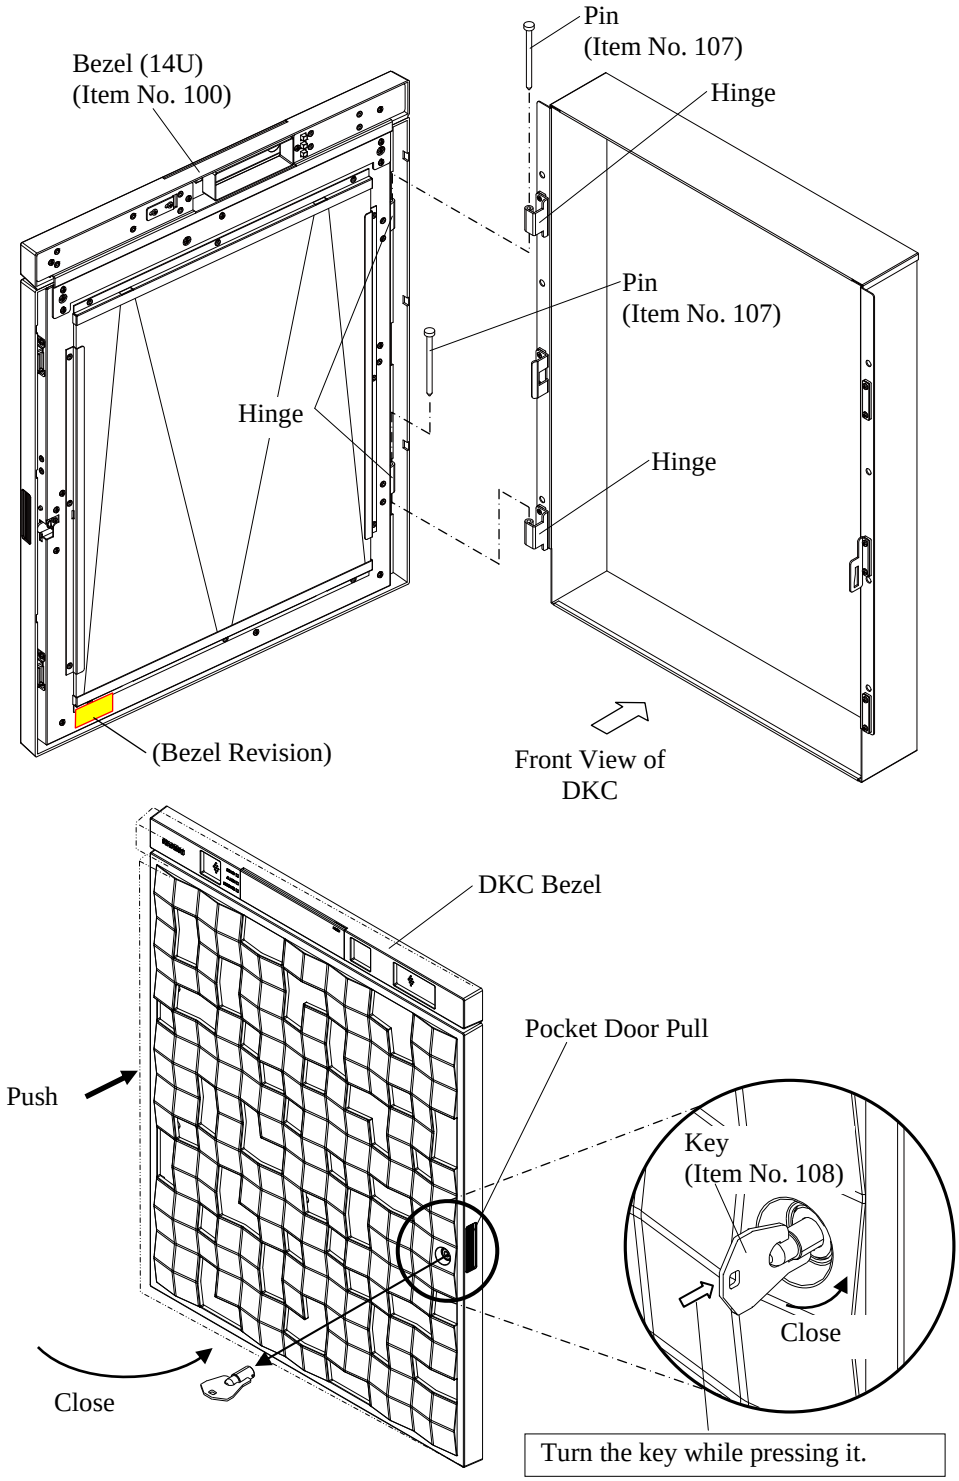

Fig. 3.4.2-2 Attachment of Bezel

Copyright © 2010, Hitachi, Ltd.

3. Attachment of Nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

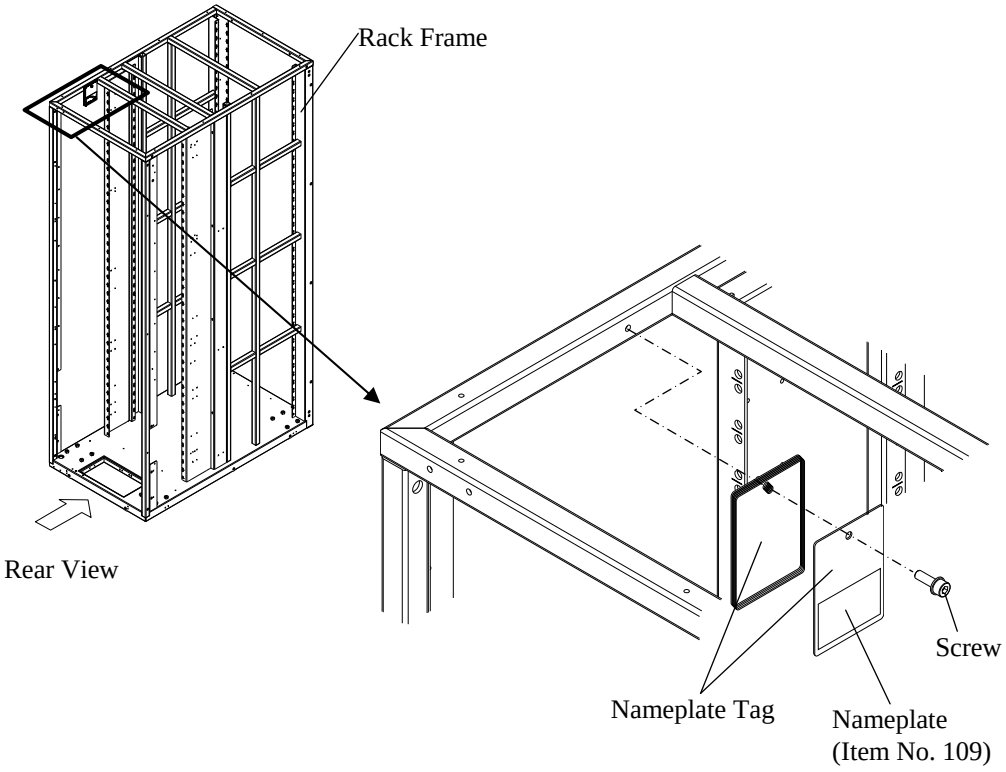

Fig. 3.4.2-3 Attachment of Nameplate

   d. Return to the working table and do the rest of the work.
   New Installation: INST02-10

3.5 Installation of Drive Chassis (DKC-F710I-UBX/SBX/SBXP/SSWP/HPWP/FBX)

Do this work after confirming the below-mentioned notes.

Note 1: Confirm Control Chassis (DKC710I-CBX/CBXA/CBXB/CBXG/CBXH) is installed.

Note 2: Confirm drive is not installed. De-install drive if drive is installed.

3.5.1 Rough time of installation

Rough time of RAID Group installation becomes addition of the following A, B, C, D, and E.

Table 3.5.1-1 Rough time of installation

	process	time	note
A	Chassis setting time	90min / 1chassis	
B	HDD setting time	5min / 1ECC	
C	Micro code overhead for Path initialization	90sec × (The number of of existing chassis + number of increase chassis)	*1
D	Micro code over head for HDD spin up	20sec × (number of increase HDD)	*1
E	LDEV Formatting time	Refer to Theory3.9	

*1: Twice time at the high performance model are possessed.

3.5.3 Installation Procedure of LFF Drive Chassis (DKC-F710I-UBX)

1. Installing the rails (If the rails are already installed, this installation procedure is not required.)
   EIA units and intervals of mounting holes of 19-inch rack frame conforming to EIA standard
   - A unit (U) space conforming to EIA standard is 19 inches wide and 44.5 mm high as shown in the figure below.
   - The boundary of the unit falls on the middle of the interval of 12.7 mm.
   - Universal intervals: Repeat of 44.45 mm (15.875 mm + 15.875 mm + 2.7 mm)
     Wide intervals: Repeat of 44.45 mm (31.75 mm + 12.7 mm)
     Maximum number of mountable unit spaces: 42

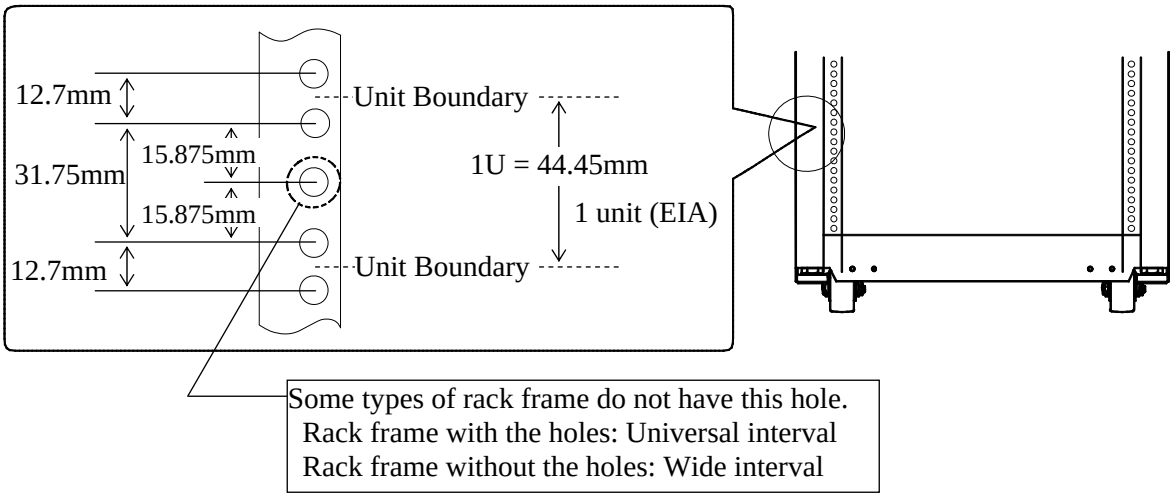

Fig. 3.5.3-1 Attachment Hole Size of Rack

Copyright © 2010, Hitachi, Ltd.

The addresses are given as 1, 2, 3, and so on counted from the bottom of the rack frame.
The following figures show a layout example of installing Drive chassis in 42 units rack frame.
However, installing positions of Drive chassis may differ according to the construction within the rack frame.

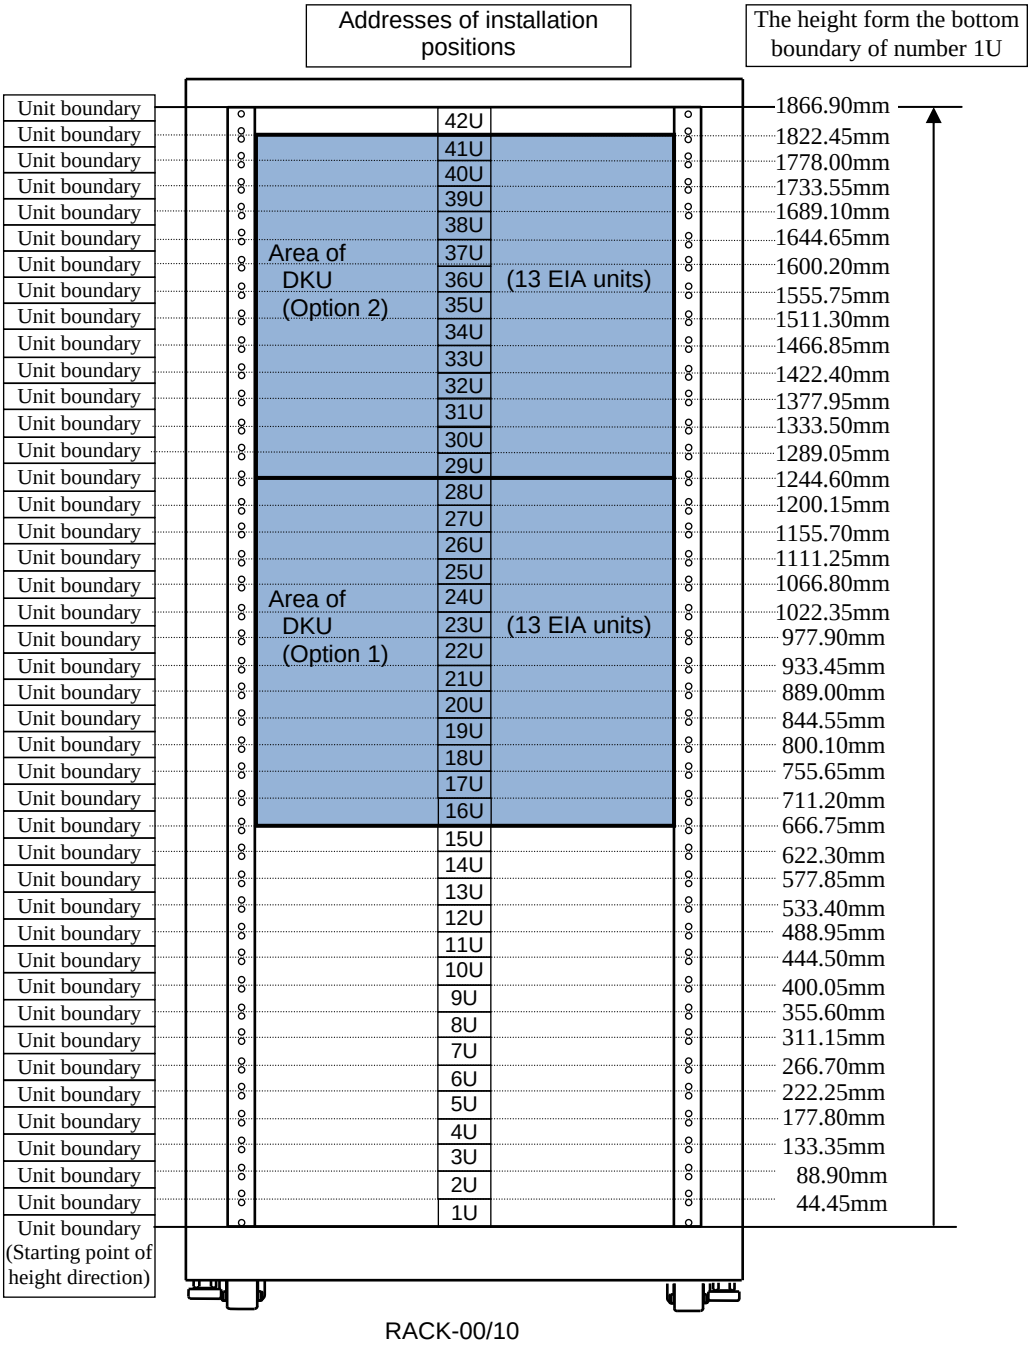

Fig. 3.5.3-2 Whole Layout of Installation Position Addresses (RACK-00/10)

a. On the right side of the installation location in the rack frame, align the round holes of the Rail (R) with those of the rack frame and insert the rack nuts (at four places in total in front and rear).
b. Fasten the Rail (R) to the rack frame using the WA socket bolts (at two places each on the front and rear sides). The WA socket should be firmly tightened so as not loosen.
c. Install the Rail (L) to the rack frame in the same way.

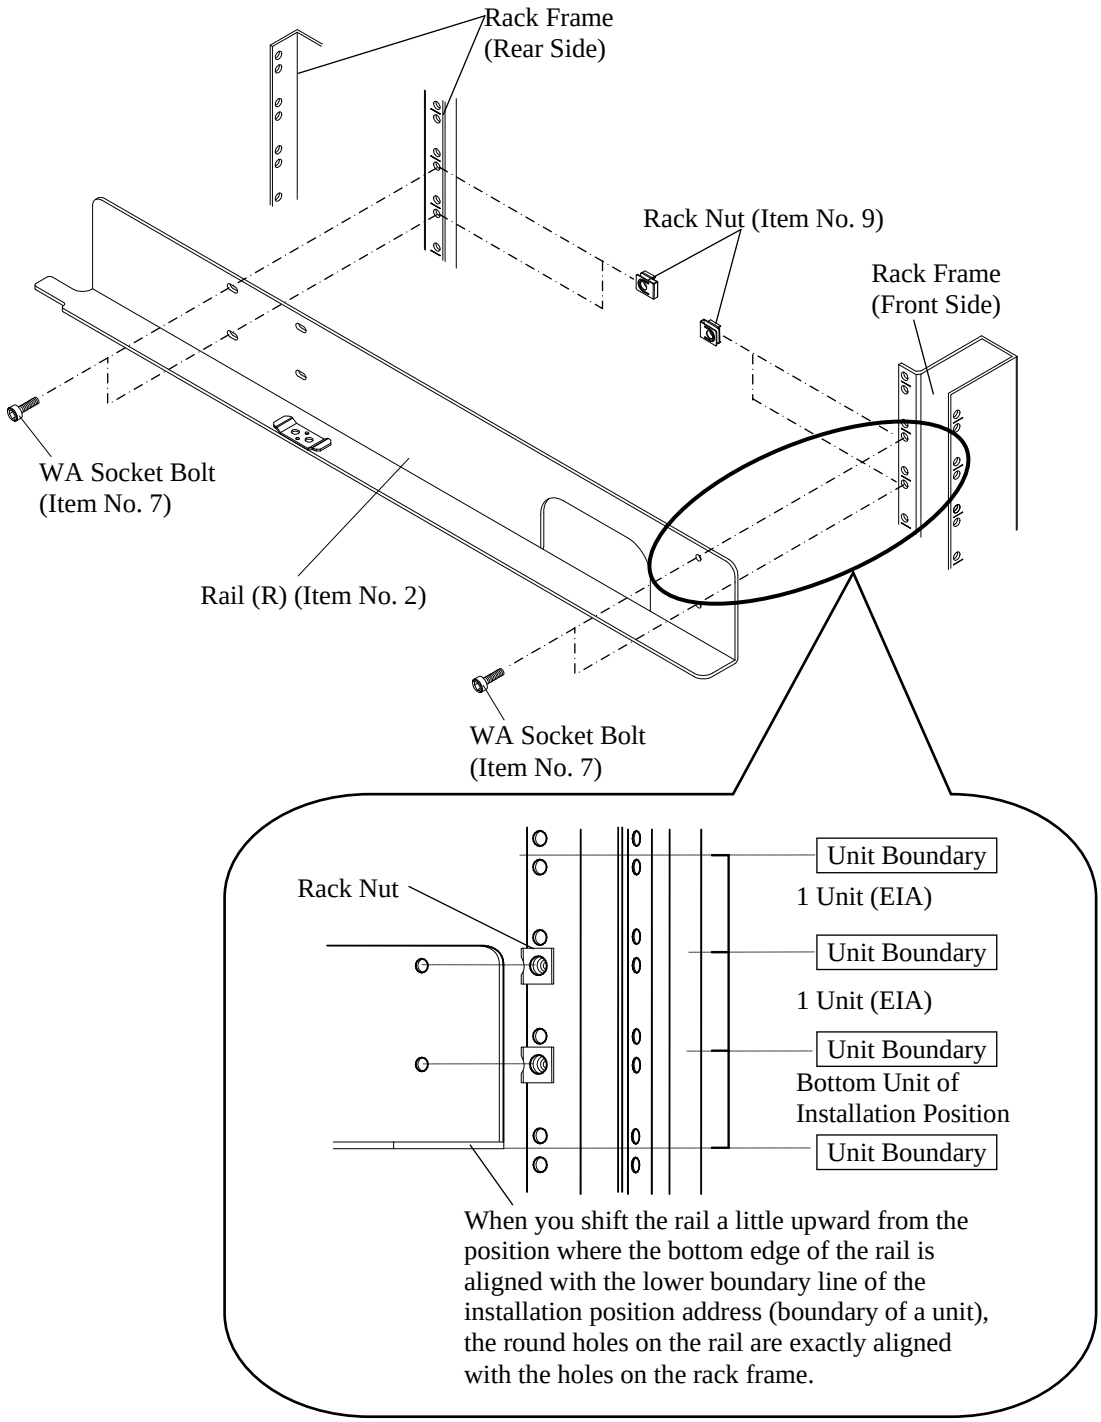

Fig. 3.5.3-5 Attachment of Rails

Copyright © 2010, Hitachi, Ltd.

2. Installing rack nuts
   a. Fit the three rack nuts to each of the right and left beams on the front side of the rack frame.
   b. Fit the three rack nuts to each of the right and left beams on the rear side of the rack frame.

3. Installing the DKU

⚠ CAUTION

Paying attention to falls:
Work carefully because the mass of the single DKU is about 40 kg.

Beware over turning and dropping:
To prevent DKU from over turning and dropping, the installation work must be done by two or more personnel.

a. Install the Front DKU on the front side of the Rack frame referring to mounting procedure using the special lifter. (See INST03-15-10 through 40.)
At this time, be sure the plate under the rear side of the Front DKU is in the stopper of the rail.

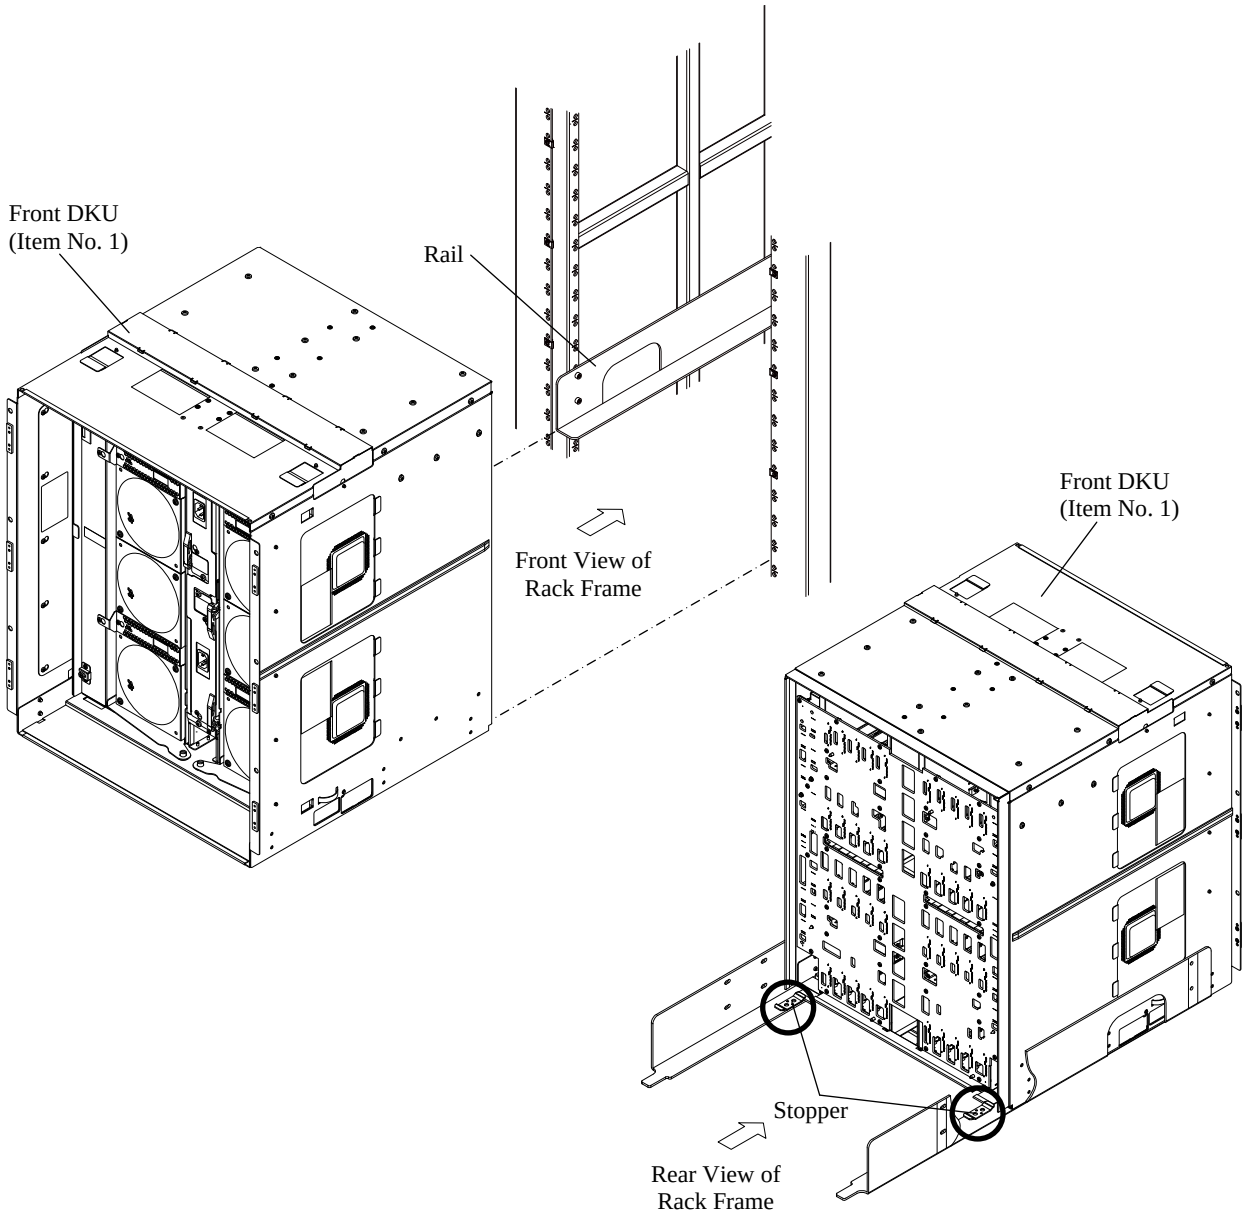

Fig. 3.5.3-7 Installing Front DKU

Copyright © 2011, Hitachi, Ltd.

b. Front DKU is temporarily tightened with the six screws.

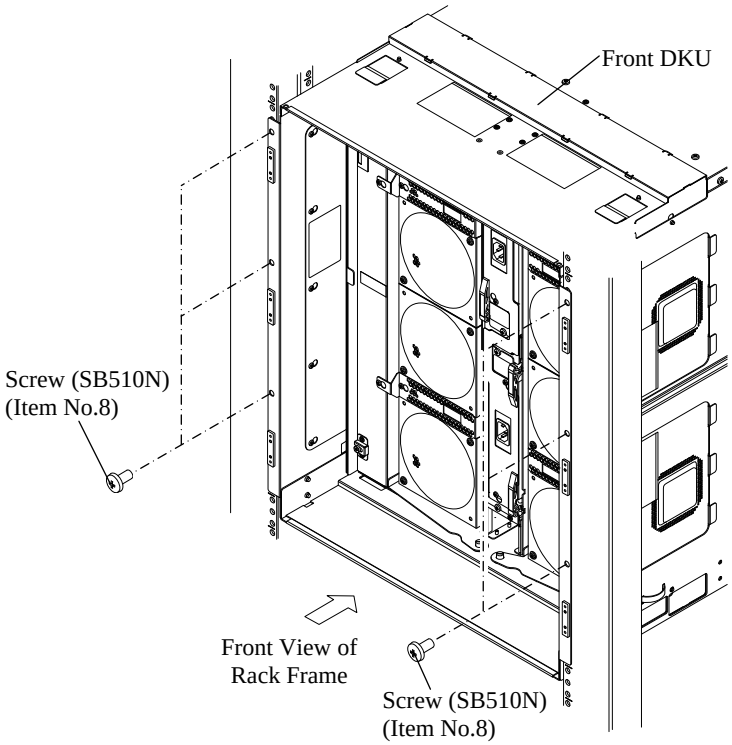

Fig. 3.5.3-7A Temporary Tightening of Front DKU

c. When a DKU is added in the upper space of the existing DKU, open the repeat binders on the rear side of the existing DKU, and move the power cables below.
When a DKU is not added in the upper space of the existing DKU, go to the procedure "d".

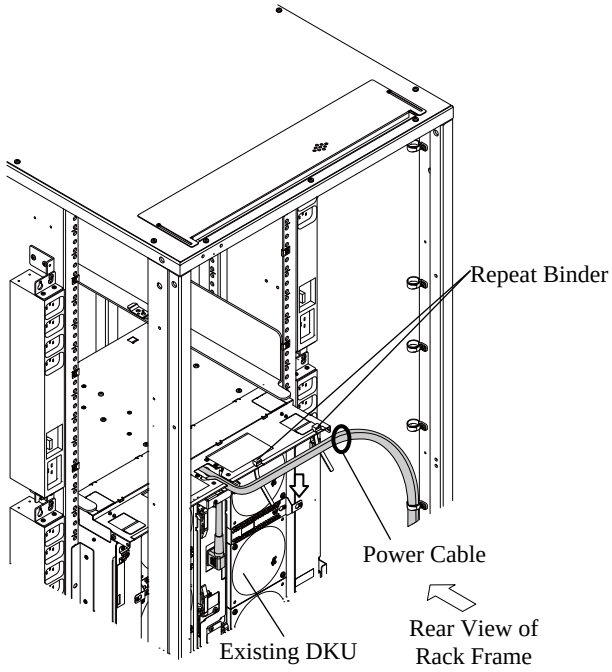

Fig. 3.5.3-7B Power Cable Detaching

Copyright © 2011, Hitachi, Ltd.

d. When a DKU is added in the upper space of the DKC, loosen the two screws and move the tray below.
When a DKU is not added in the upper space of the DKC, go to the procedure “e”.

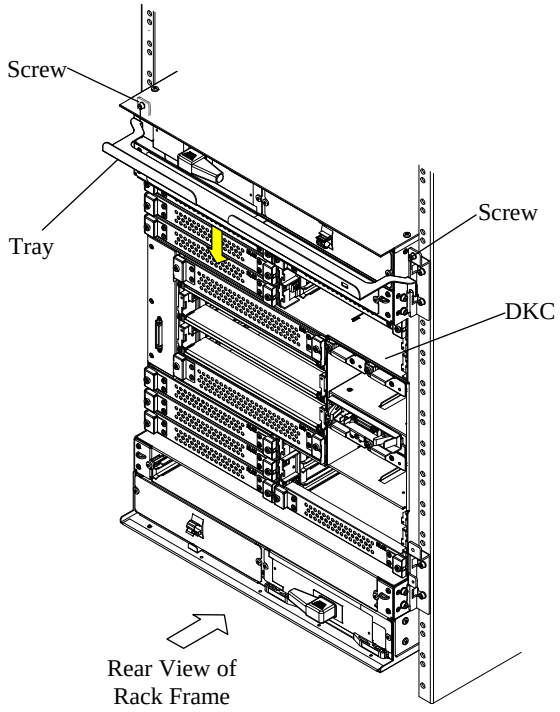

Fig. 3.5.3-7C Tray Detaching

e. Install the DKU Installation Plate on the rear side of the rack frame and fix it with four screws.

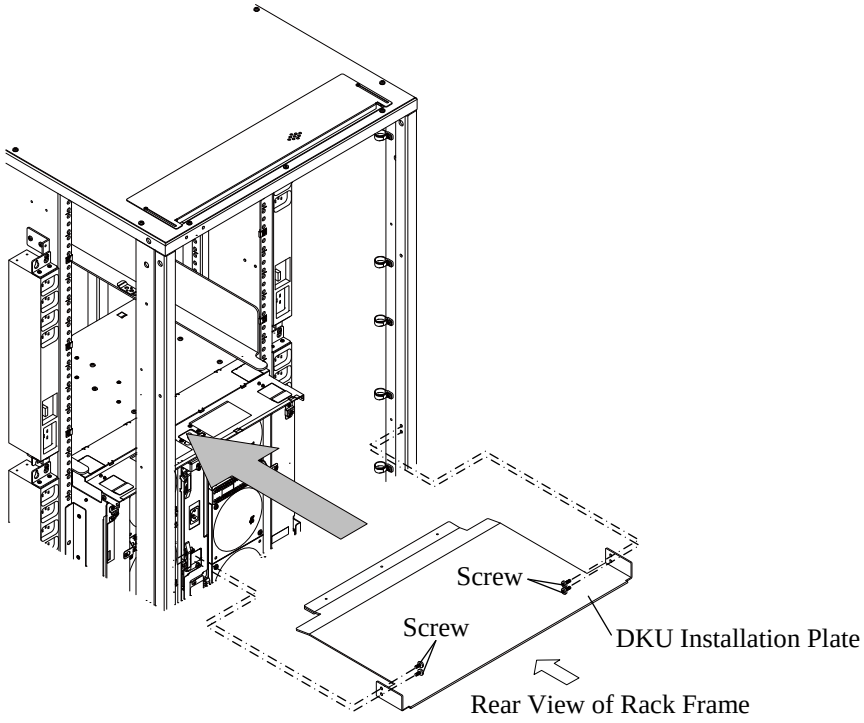

Fig. 3.5.3-7D DKU Installation Plate Installing

Copyright © 2010, 2011, Hitachi, Ltd.

f. Refer to the mounting procedure using the special lifter (See INST03-15-10 through 40), and insert the Rear DKU straight from the rear side of the rack frame, and set it in the Front DKU.
At this time, when the checking hole on the upper side and the side of the Rear DKU can be seen, check whether the Rear DKU and the Front DKU are firmly in place.

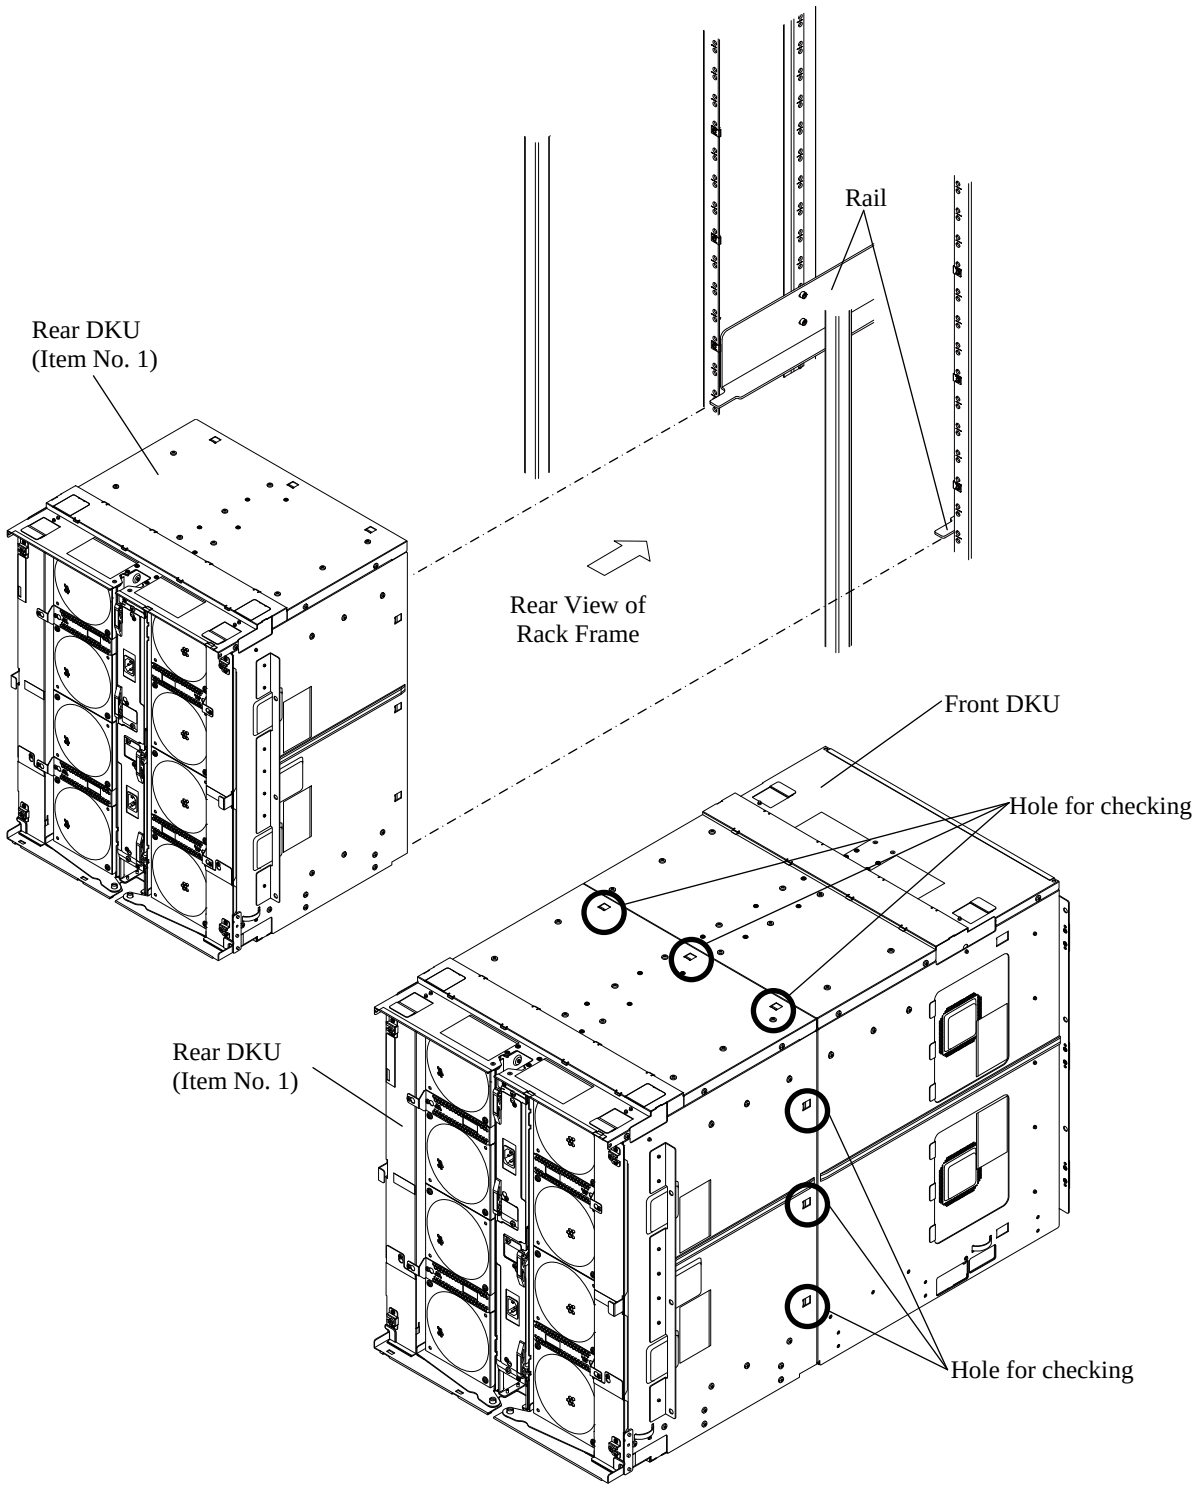

Fig. 3.5.3-8 Installing Rear DKU

Copyright © 2010, 2011, Hitachi, Ltd.

g. Fix the Rear DKU with the six screws. At this time, make sure there is no clearance between the mounting portion of the Rear DKU and the mounting side of the rack frame.

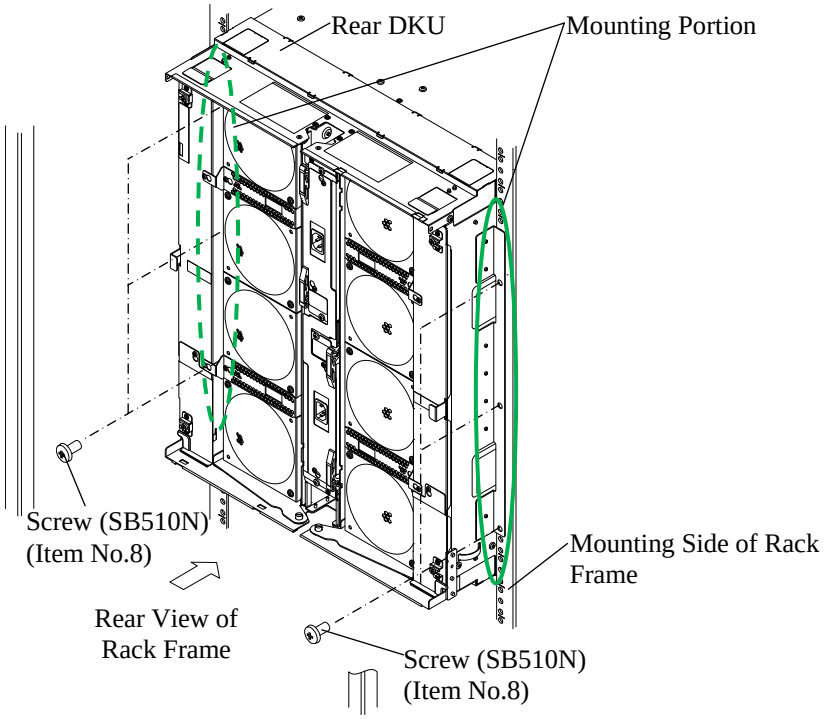

Fig. 3.5.3-9 Fixation of Rear DKU

h. Tighten the temporarily tightened six screws firmly while lightly pushing the mounting portion of the Front DKU internally. At this time, make sure there is no clearance between the mounting portion of the Front DKU and the mounting side of the rack frame.

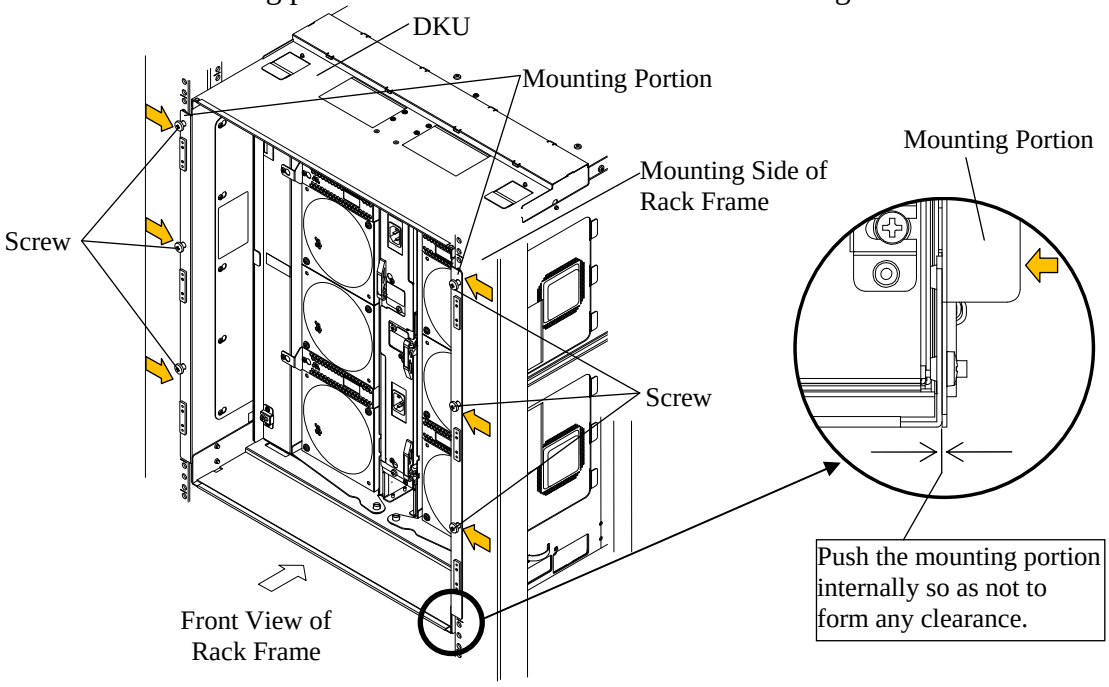

Fig. 3.5.3-9A Fixation of Front DKU

Copyright © 2010, 2011, Hitachi, Ltd.

i. Remove the four screws on the rear side of the rack frame and detach the DKU Installation plate.
j. When the power cables were moved on the procedure “c”, put the power cables back, and secure them with the repeat binder.
k. When the tray was moved on the procedure “d”, put the tray back, and secure it with the two screws.
m. Attach the four insulations on the front side of the DKU.

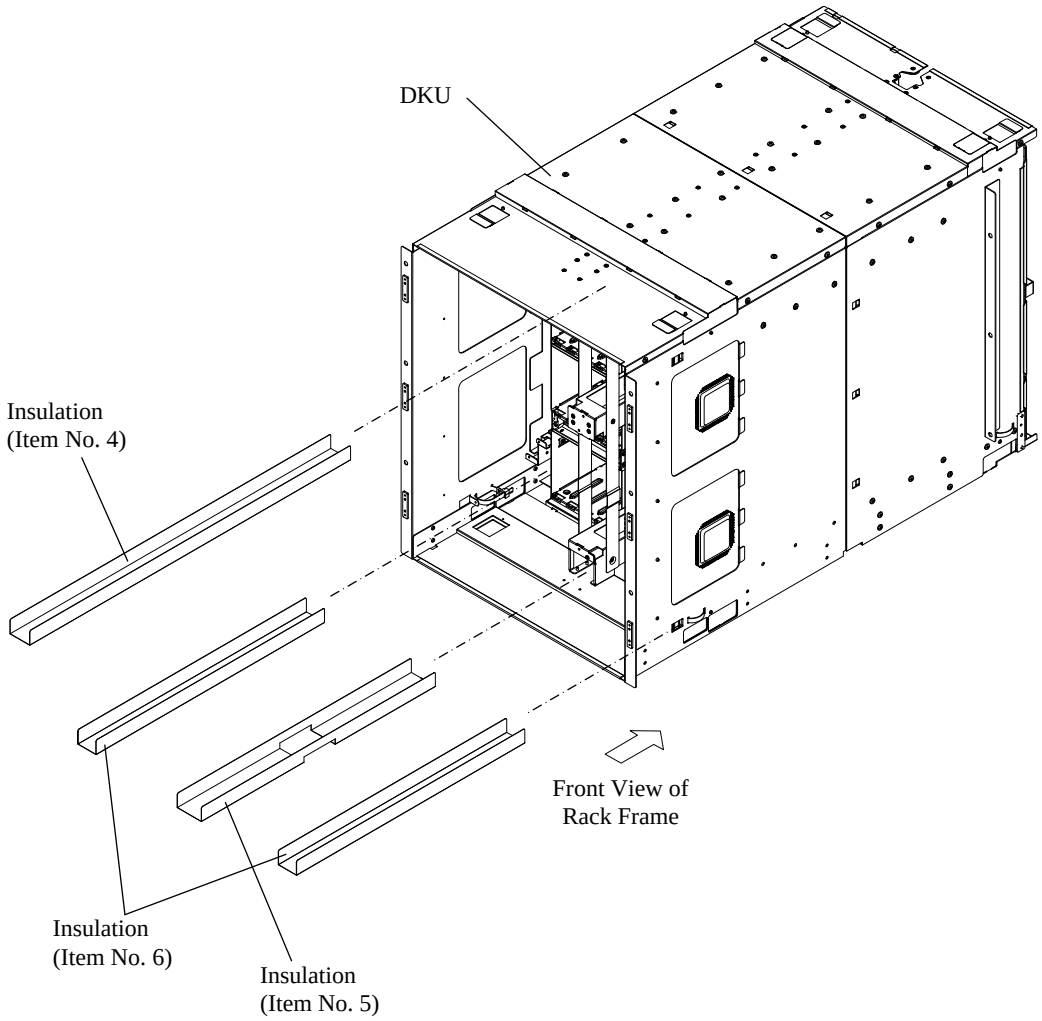

Fig. 3.5.3-10 Attachment of Insulations

Copyright © 2010, Hitachi, Ltd.

4. Jumper Setting

⚠ CAUTION

A serious failure occurs if a wrong setting is made.
Operate very carefully referring to the setting table not to make a mistake in the setting.

a. Set the jumpers in the SSW PCB as indicated in the Fig. 3.5.3-11 through Fig. 3.5.3-19. Jumper settings must be made at 64 places in total per option.

Note: • Use the insulated radio pliers of the maintenance tools when setting the SSW jumpers.
• When the jumper setting of SSW is wrong, execute the replace process of SSW and change the jumper setting. The jumper setting will not be effective unless the SSW PCB is dismounted and mounted.

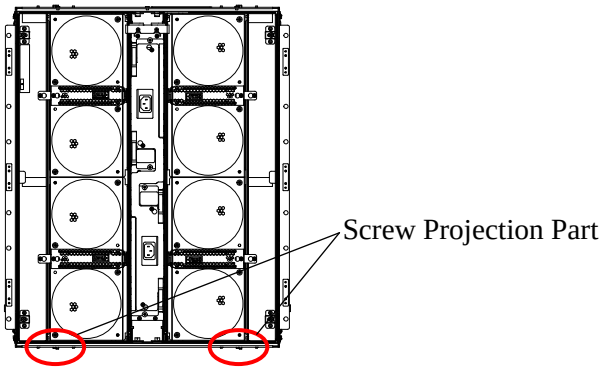
3.5.4 Installation Procedure of SFF Drive Chassis (DKC-F710I-SBX/SBXP)

CAUTION: Be careful not to damage the screw projecting from the bottom of the SFF DKU after unpacking the SFF DKU.



SFF DKU Front/Rear

1. Installing the rails (If the rails are already installed, this installation procedure is not required.)
   EIA units and intervals of mounting holes of 19-inch rack frame conforming to EIA standard
   - A unit (U) space conforming to EIA standard is 19 inches wide and 44.5 mm high as shown in the figure below.
   - The boundary of the unit falls on the middle of the interval of 12.7 mm.
   - Universal intervals: Repeat of 44.45 mm (15.875 mm + 15.875 mm + 2.7 mm)
     Wide intervals: Repeat of 44.45 mm (31.75 mm + 12.7 mm)
     Maximum number of mountable unit spaces: 42

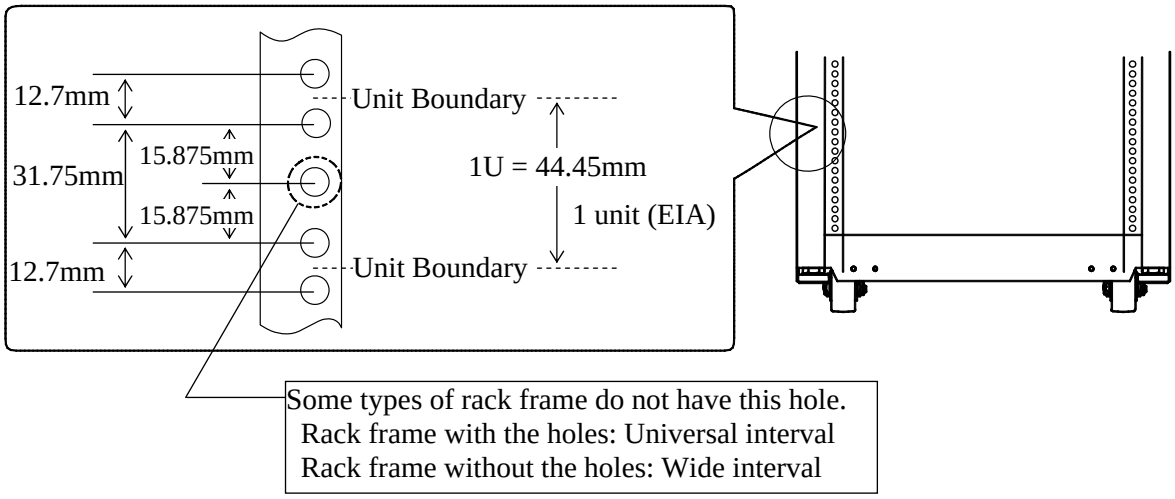


Fig. 3.5.4-1 Attachment Hole Size of Rack

3.5.5 Installation Procedure of SFF Drive Chassis SSW Kit (DKC-F710I-SSWP)

1. Installing the SSWs of the front side of the DKU
   a. Put the stopper of the front FAN door into the openable and closable state. (Refer to INST03-01-160.)
   b. Loosen the two screws of the front right side of the DKU, and open the FAN door.
   c. Install the two SSW PCBs to the DKU, and tighten the four screws.
   d. Loosen the two repeat binders, and straighten the rolled cables (L-P502 and R-P502).
   e. Secure the tip of the repeat binder to avoid contact with the FAN door.

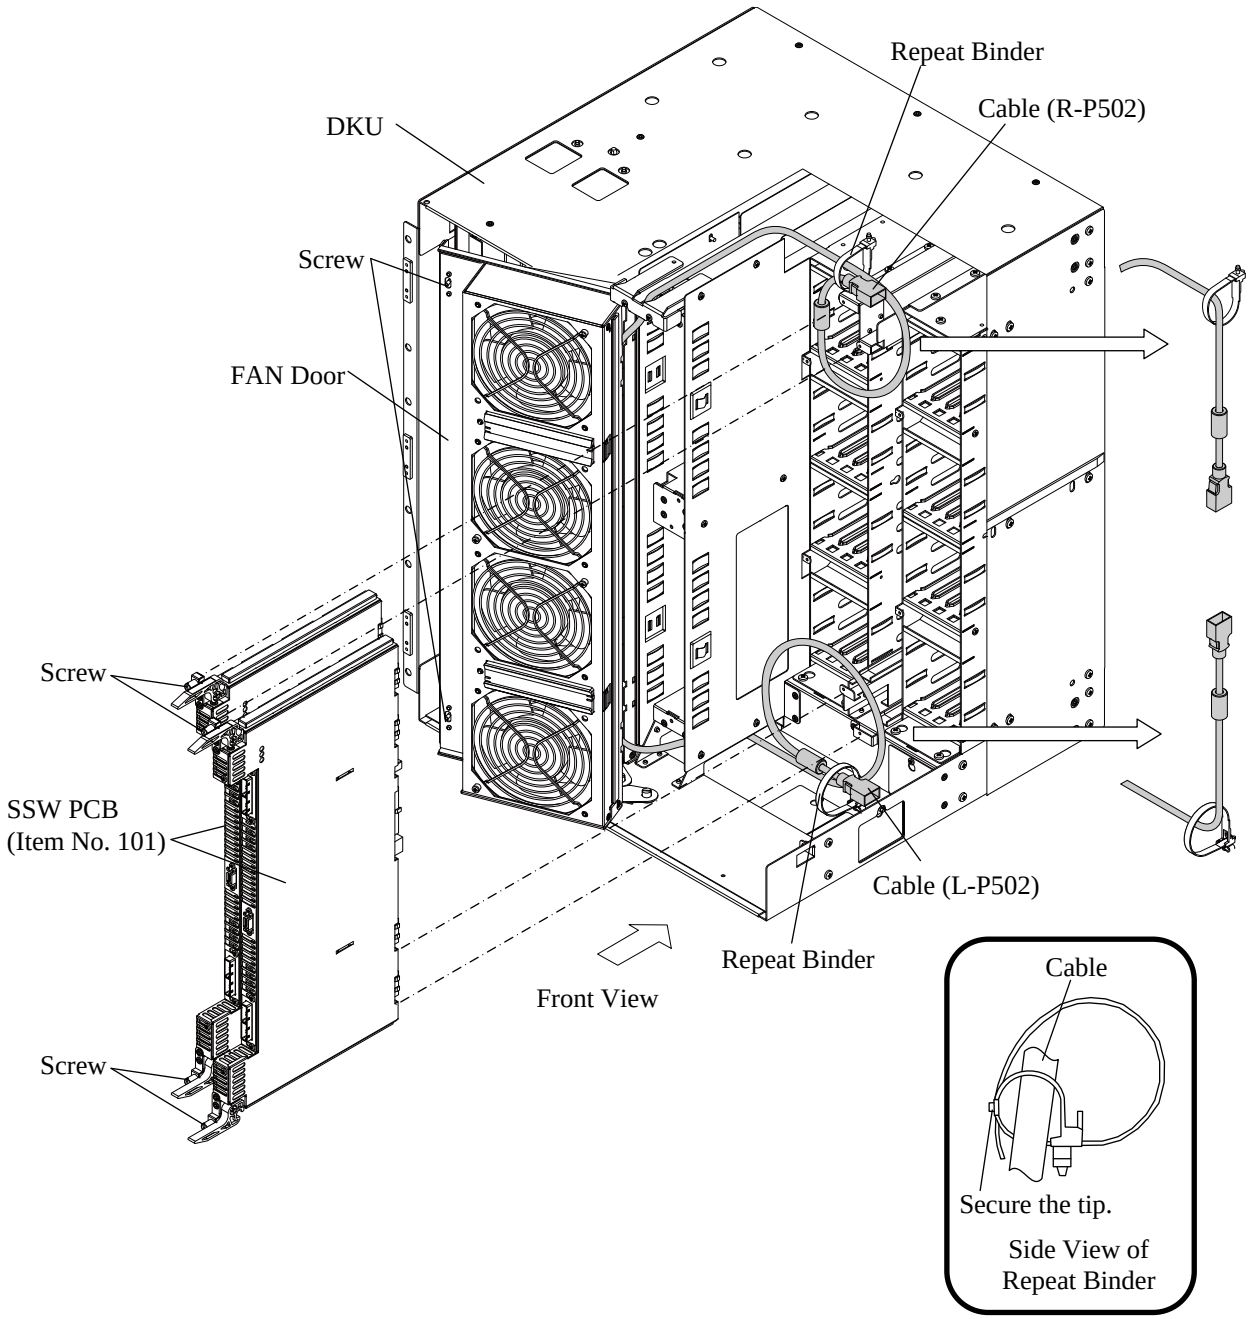

Fig. 3.5.5-1 Installation of SSWs

Copyright © 2010, Hitachi, Ltd.

f. Connect the cables (L-P502 and R-P502) to the SSW PCBs.
g. Close the FAN door of the front right side of the DKU, and tighten the two screws.

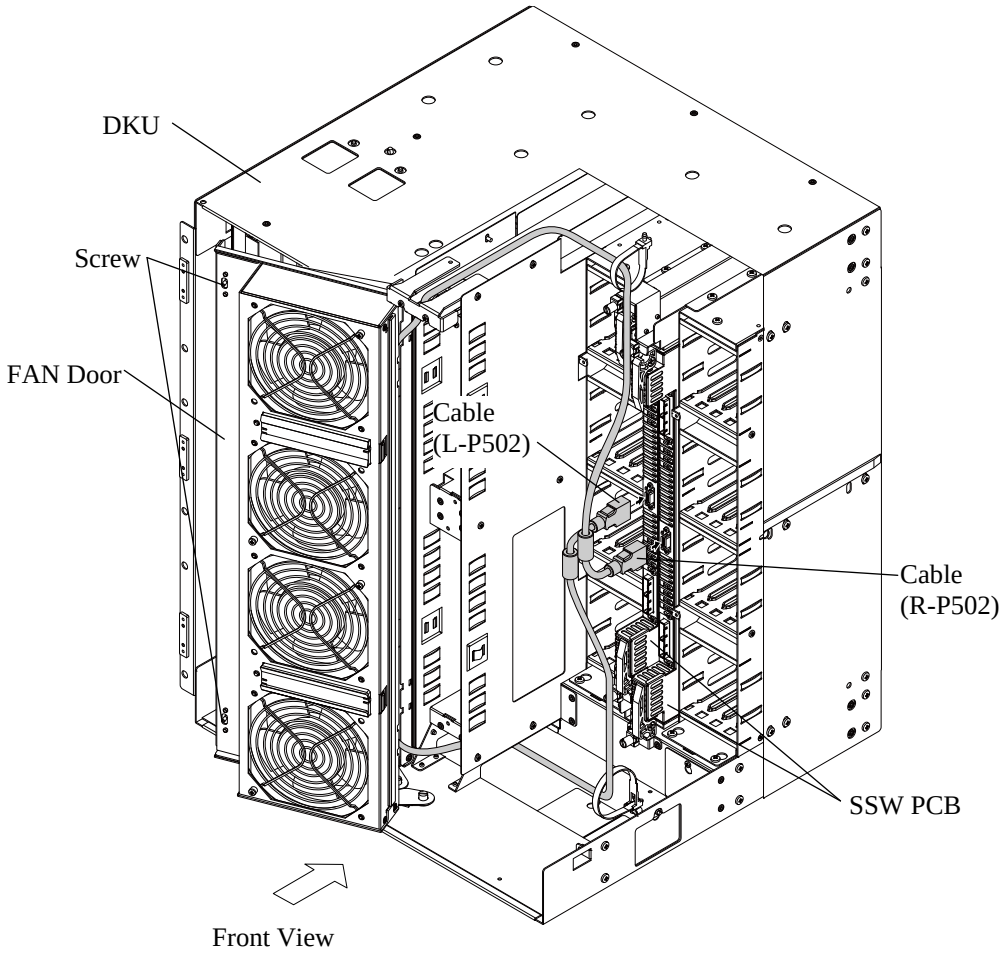

Fig. 3.5.5-2 Connection of Cables

Copyright © 2010, Hitachi, Ltd.

h. Loosen the two screws of the front left side of the DKU, and open the FAN door.
i. Install the two SSW PCBs to the DKU, and tighten the four screws.
j. Loosen the two repeat binders, and straighten the rolled cables (L-P502 and R-P502).
k. Secure the tip of the repeat binder to avoid contact with the FAN door.

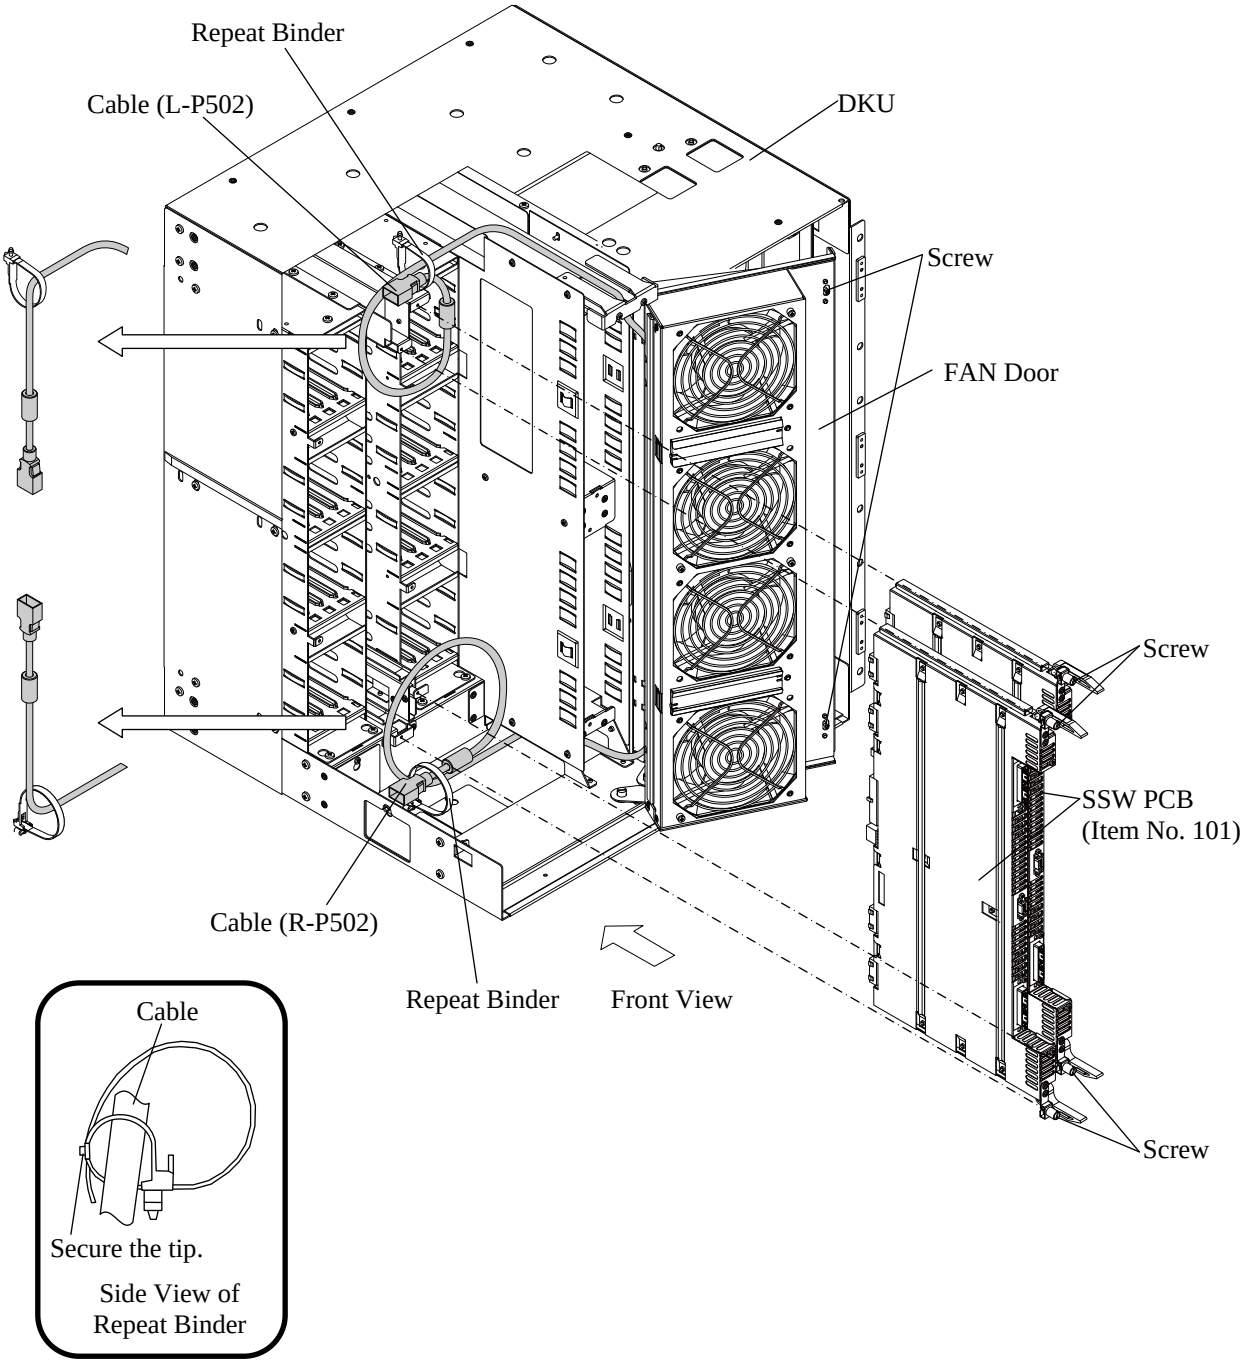

Fig. 3.5.5-3 Installation of SSWs

Copyright © 2010, Hitachi, Ltd.

l. Connect the cables (L-P502 and R-P502) to the SSW PCBs.
m. Close the FAN door of the front left side of the DKU, and tighten the two screws.
n. Put the FAN door stopper into the neutral state.

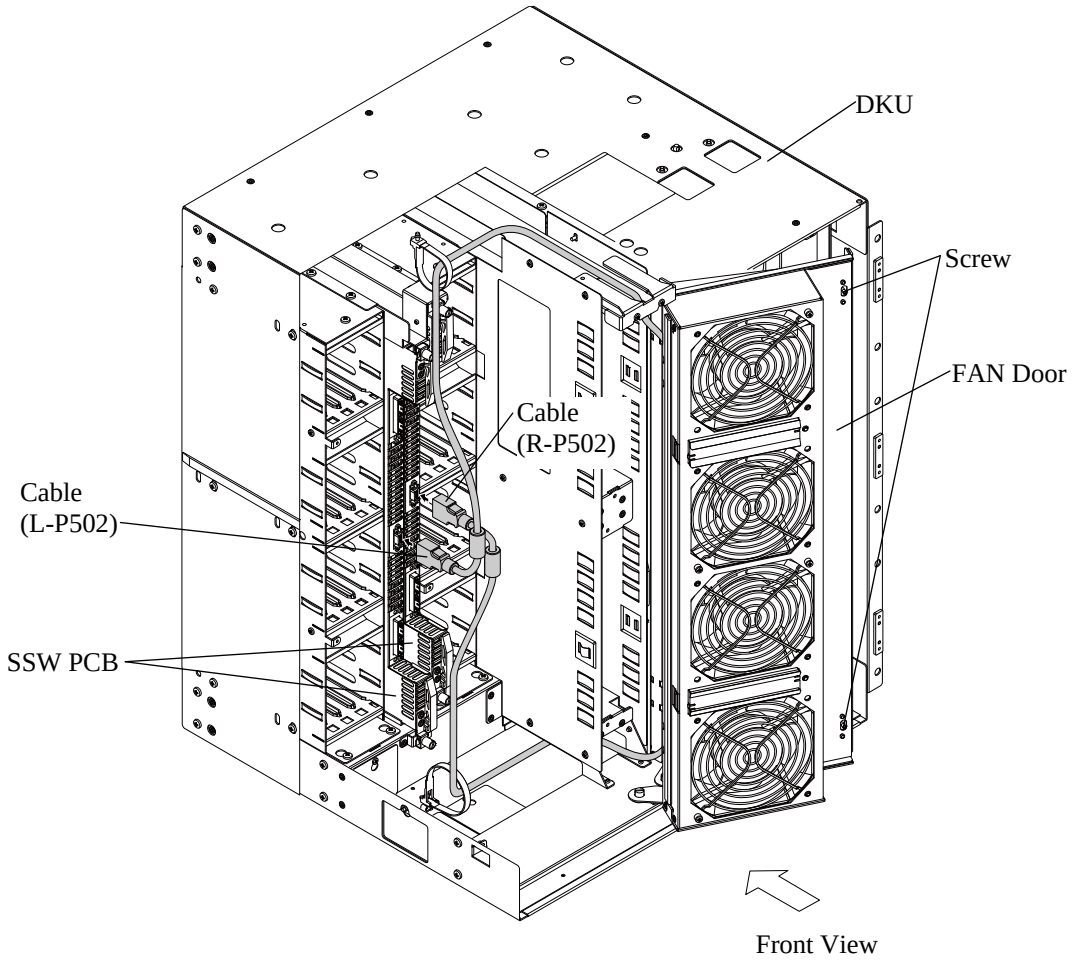

Fig. 3.5.5-4 Connection of Cables

Copyright © 2010, Hitachi, Ltd.

2. Installing the SSWs of the rear side of the DKU
   a. Put the stopper of the rear FAN door into the openable and closable state. (Refer to INST03-01-160.)
   b. Loosen the two screws of the rear right side of the DKU, and open the FAN door.
   c. Install the two SSW PCBs to the DKU, and tighten the four screws.
   d. Loosen the two repeat binders, and straighten the rolled cables (L-P502 and R-P502).
   e. Secure the tip of the repeat binder to avoid contact with the FAN door.

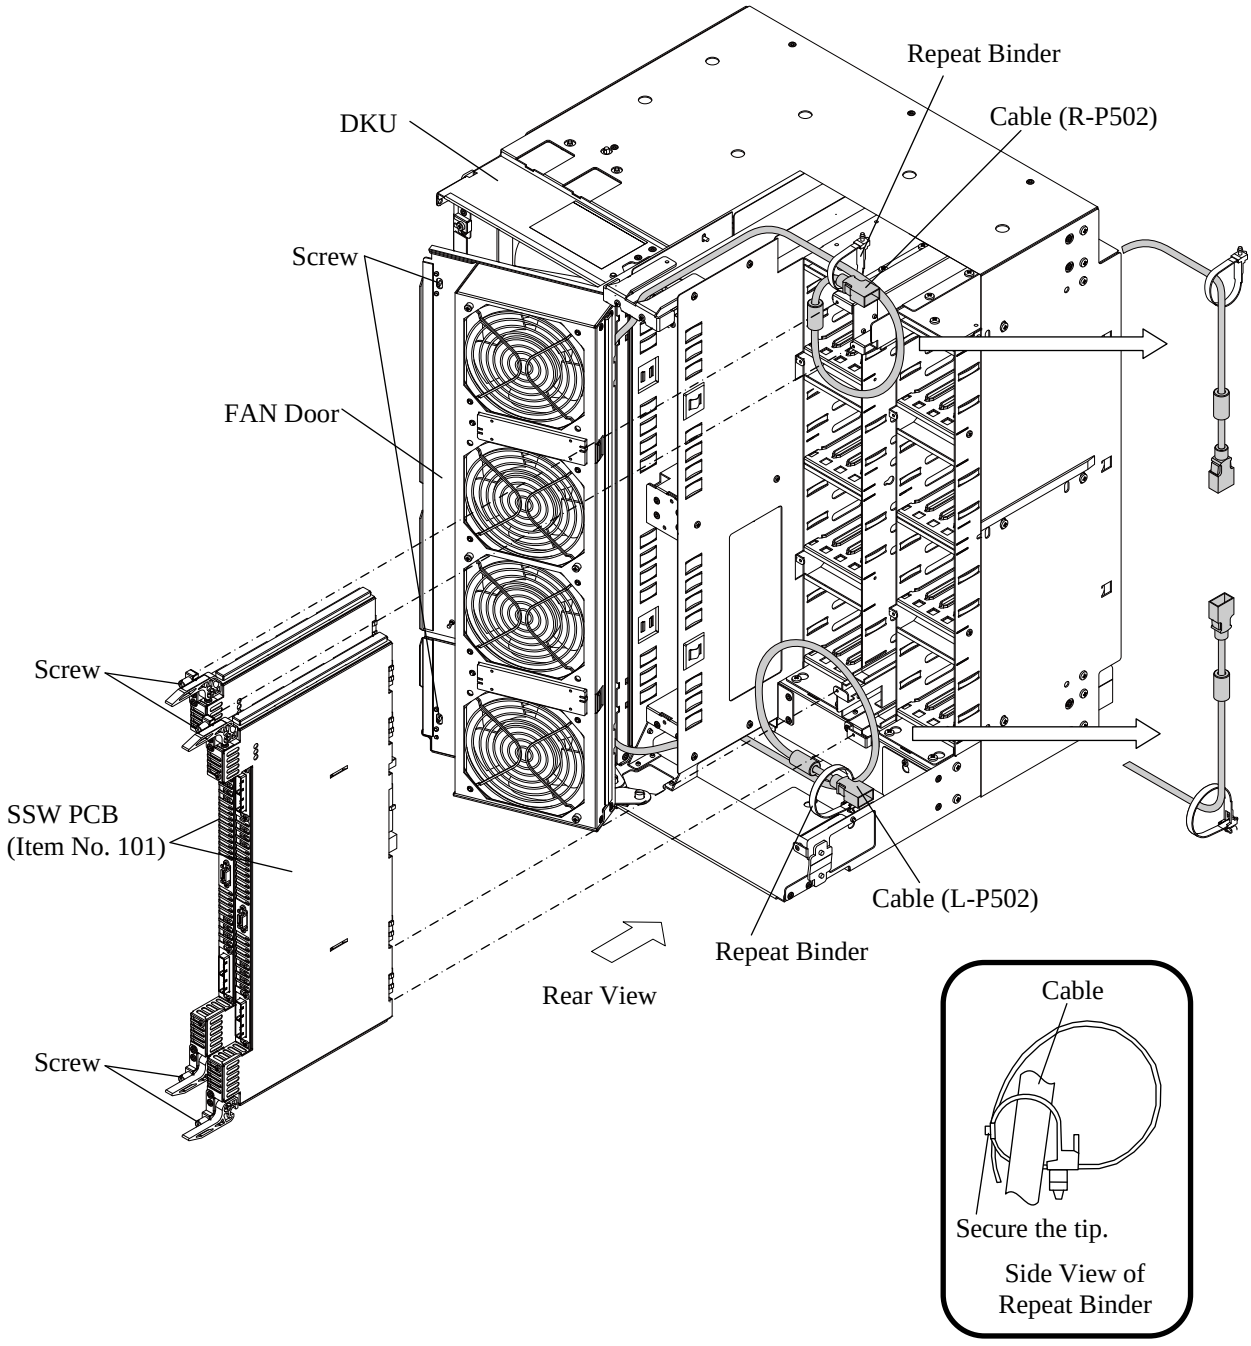

Fig. 3.5.5-5 Installation of SSWs

Copyright © 2010, Hitachi, Ltd.

f. Connect the cables (L-P502 and R-P502) to the SSW PCBs.
g. Close the FAN door of the rear right side of the DKU, and tighten the two screws.

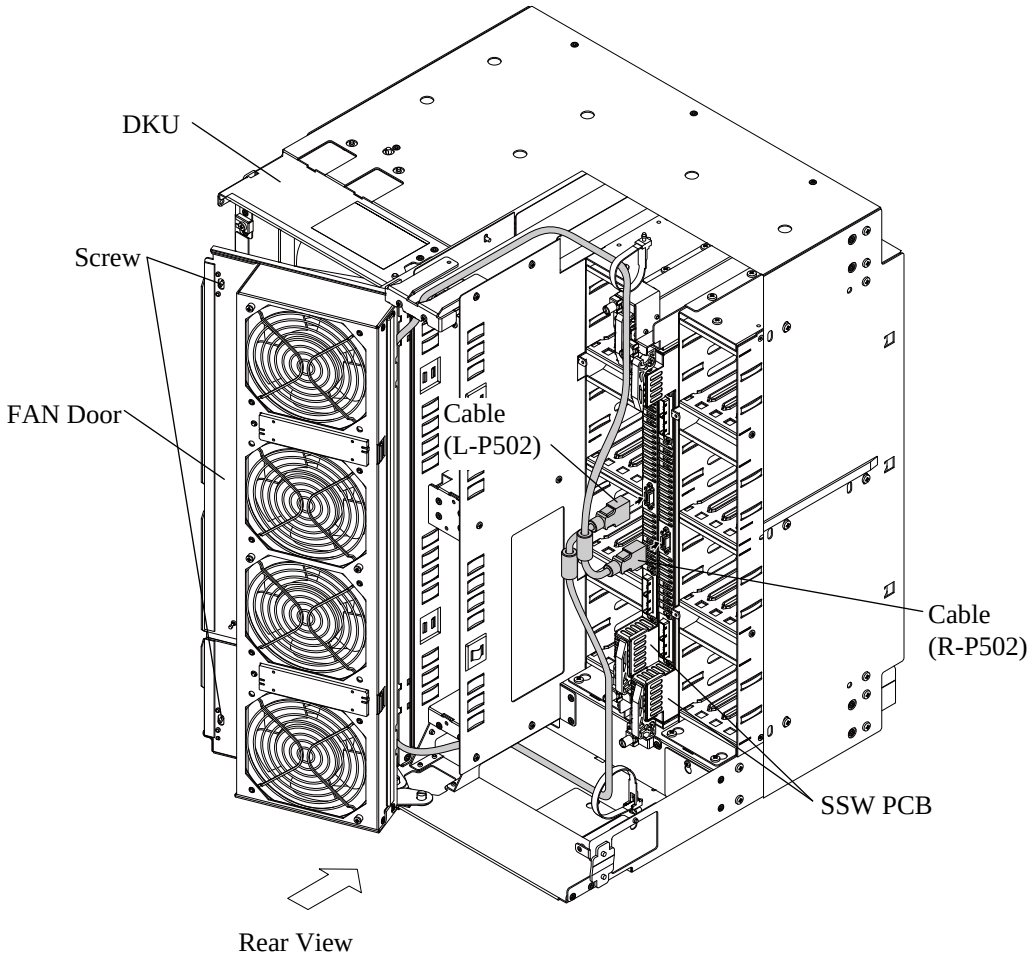

Fig. 3.5.5-6 Connection of Cables

Copyright © 2010, Hitachi, Ltd.

h. Loosen the two screws of the rear left side of the DKU, and open the FAN door.
i. Install the two SSW PCBs to the DKU, and tighten the four screws.
j. Loosen the two repeat binders, and straighten the rolled cables (L-P502 and R-P502).
k. Secure the tip of the repeat binder to avoid contact with the FAN door.

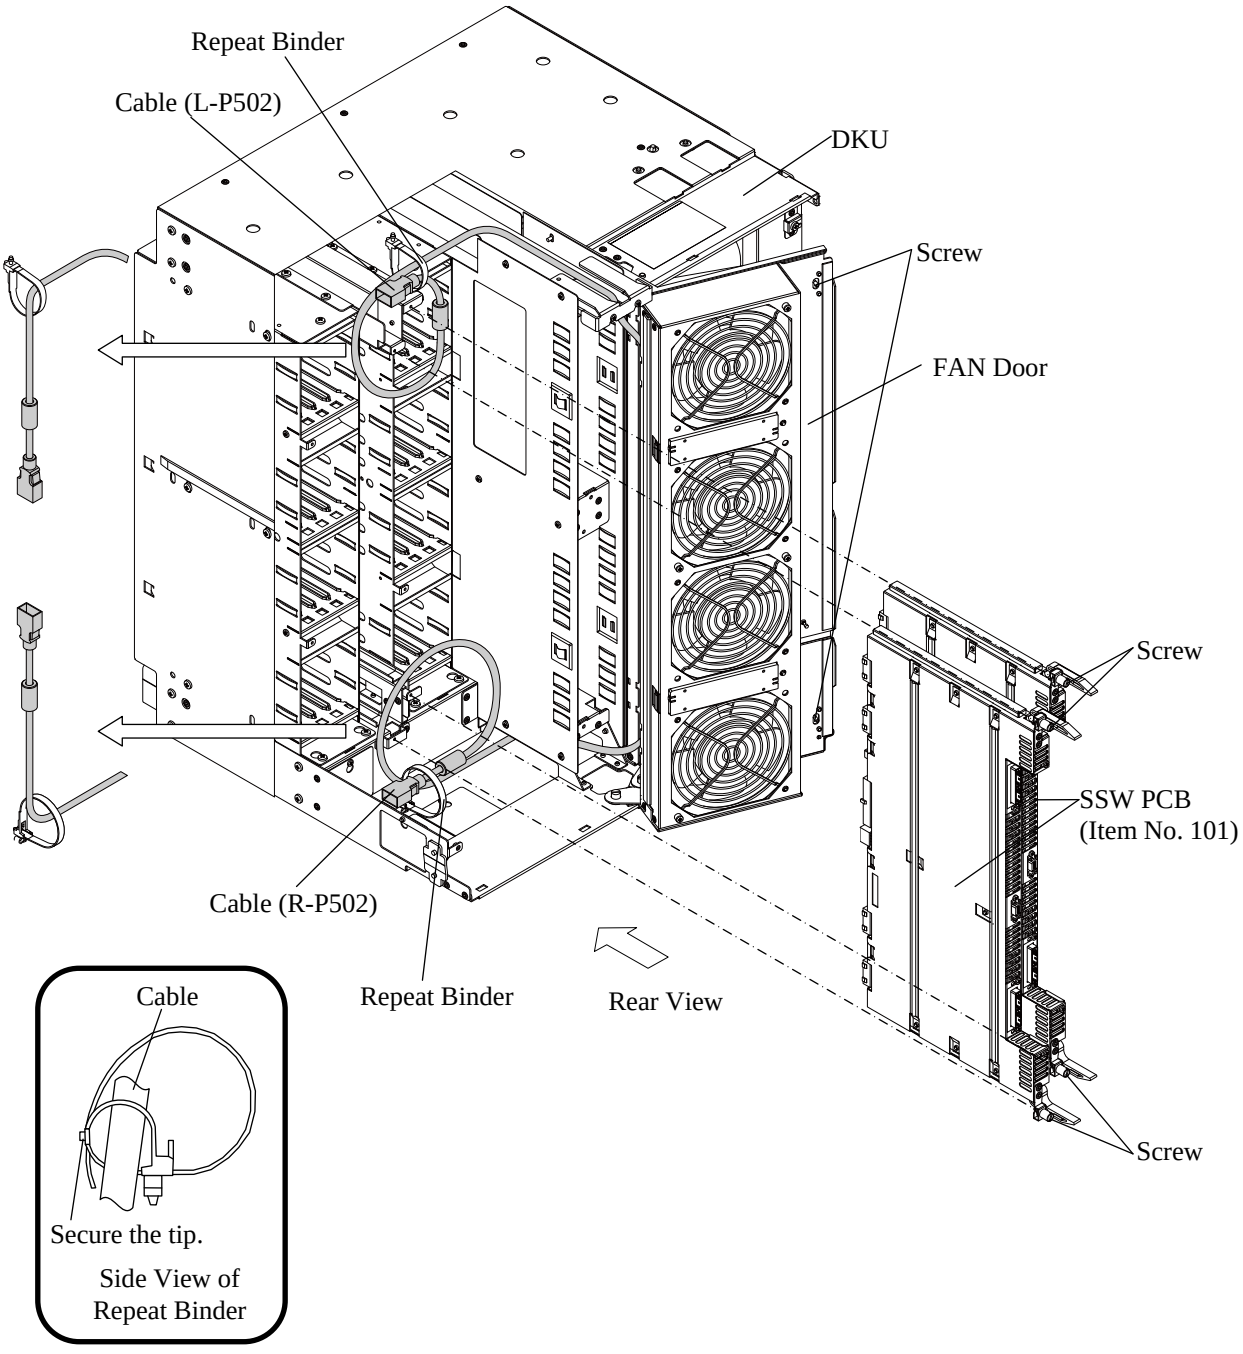

Fig. 3.5.5-7 Installation of SSWs

Copyright © 2010, Hitachi, Ltd.

l. Connect the cables (L-P502 and R-P502) to the SSW PCBs.
m. Close the FAN door of the rear left side of the DKU, and tighten the two screws.
n. Put the FAN door stopper into the neutral state.

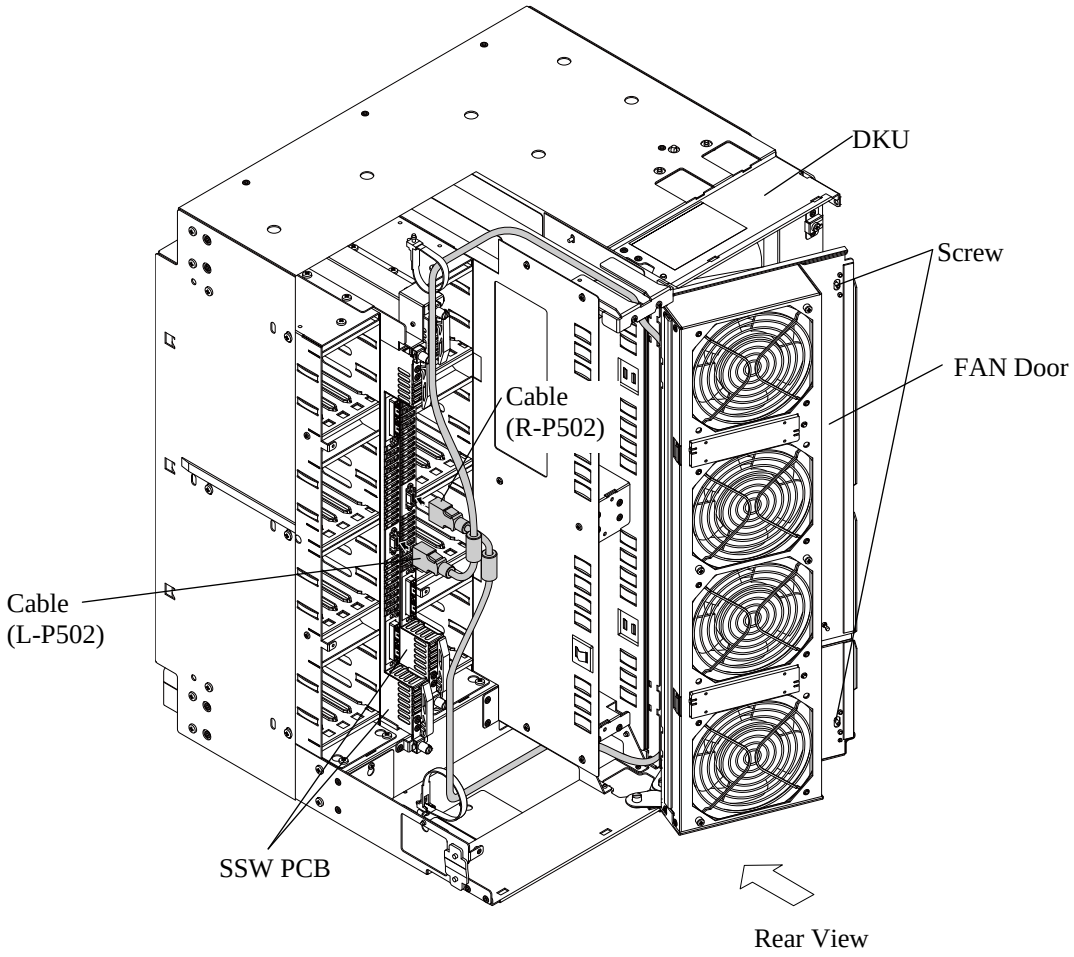

Fig. 3.5.5-8 Connection of Cables

Copyright © 2010, Hitachi, Ltd.

3. Attach the nameplate
   a. Remove the screw from the rack frame and remove all the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

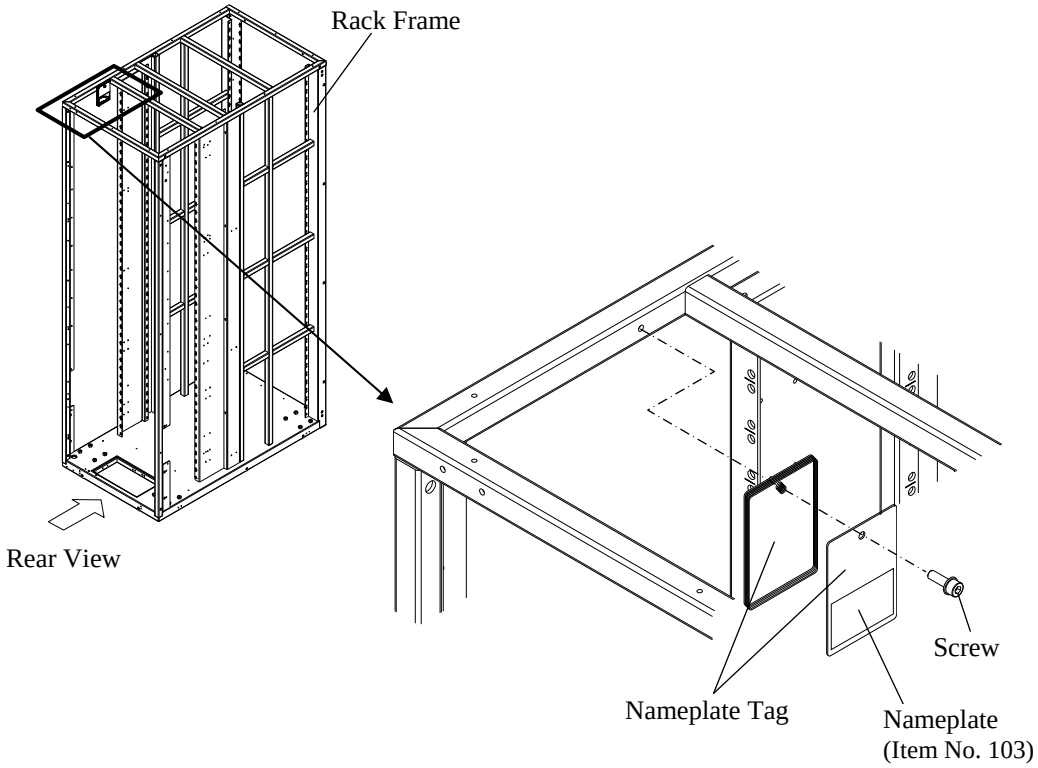

Fig. 3.5.5-9 Attachment of Nameplate

Copyright © 2010, Hitachi, Ltd.

3.5.6 Installation Procedure of SFF Drive Chassis HDDPW Kit (DKC-F710I-HPWP)

1. Installing the HDDPWRs of the front side of the DKU
   a. Put the stopper of the front FAN door into the openable and closable state. (Refer to INST03-01-160.)
   b. Loosen the two screws of the front right side of the DKU, and open the FAN door.
   c. Install the four HDDPWRs to the DKU.
   d. Tighten the screw while holding down the right side of the HDDPWR with fingers.
   e. Close the FAN door of the front right side of the DKU, and tighten the two screws.

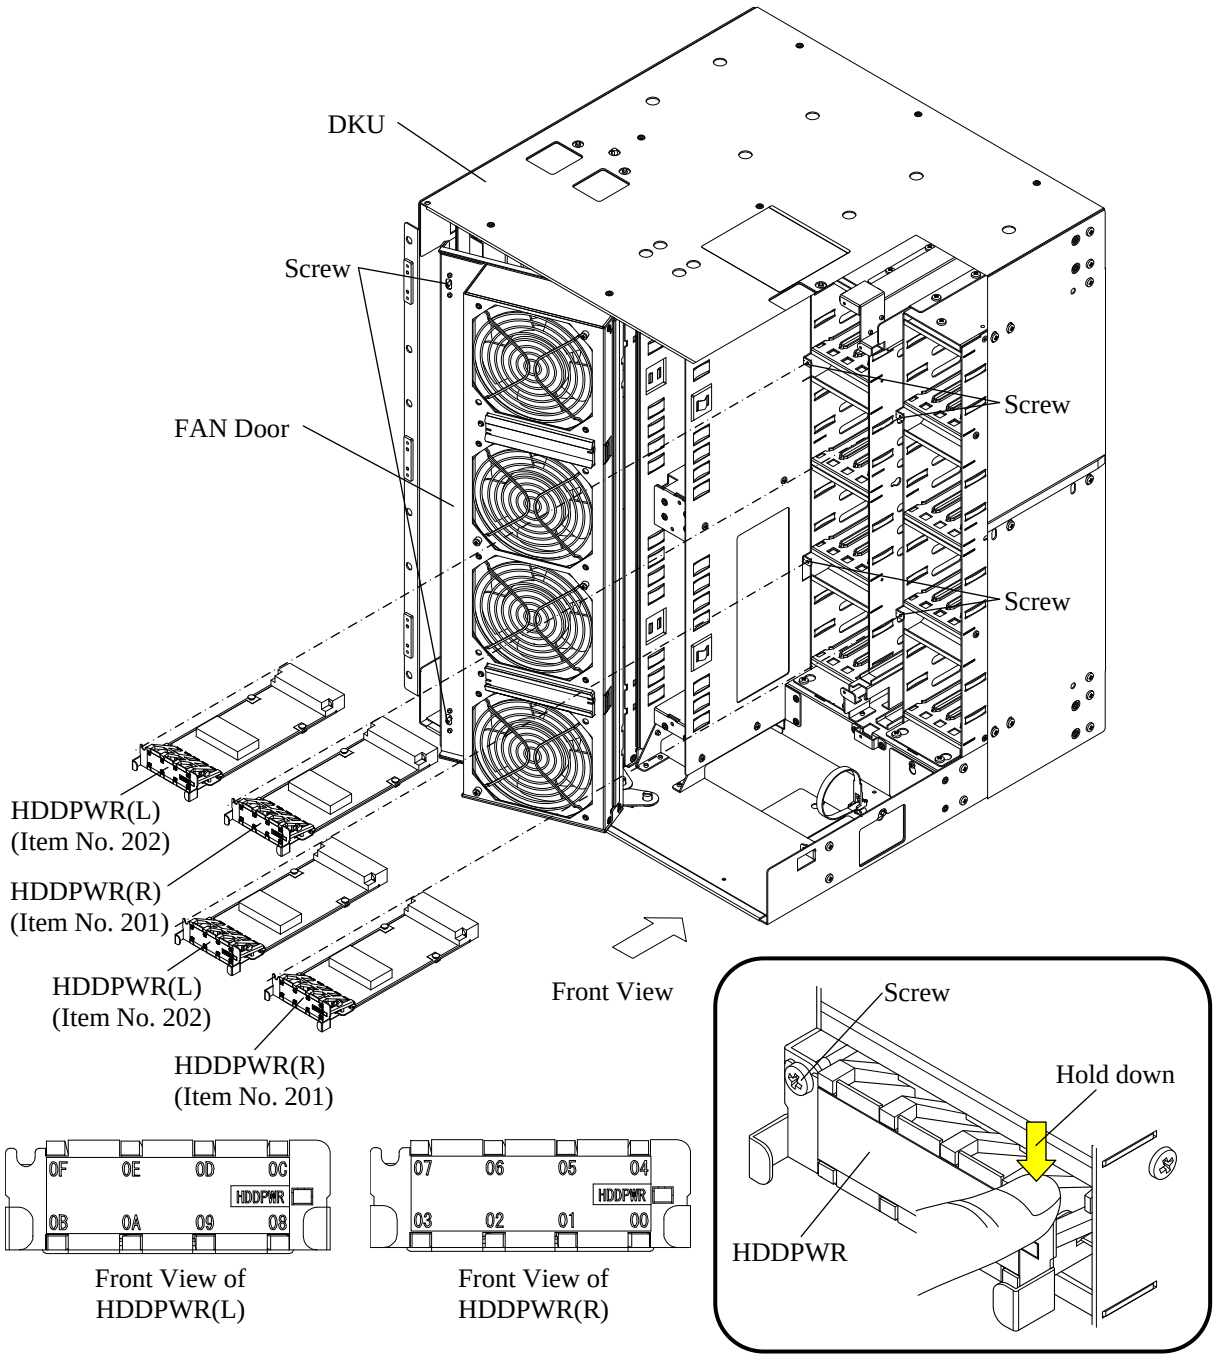

Fig. 3.5.6-1 Installation of HDDPWRs

Copyright © 2010, Hitachi, Ltd.

f. Loosen the two screws of the front left side of the DKU, and open the FAN door.
g. Install the four HDDPWRs to the DKU.
h. Tighten the screw while holding down the right side of the HDDPWR with fingers.
i. Close the FAN door of the front left side of the DKU, and tighten the two screws.
j. Put the FAN door stopper into the neutral state.

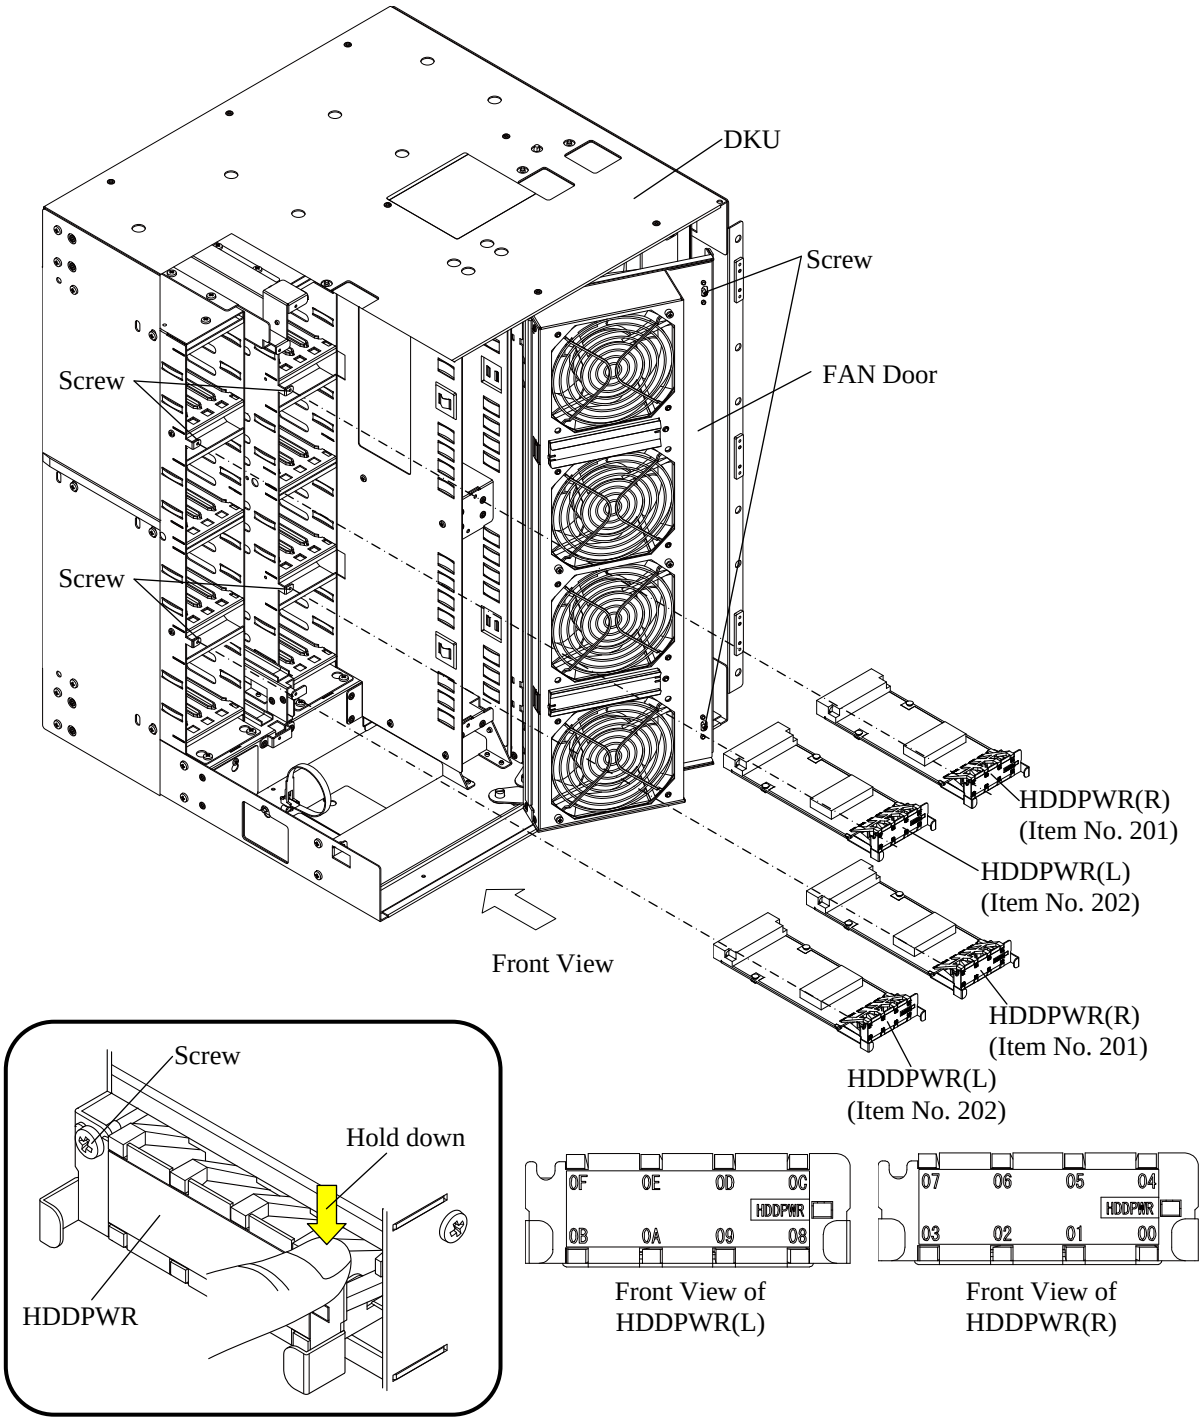

Fig. 3.5.6-2 Installation of HDDPWRs

Copyright © 2010, Hitachi, Ltd.

2. Installing the HDDPWRs of the rear side of the DKU
   a. Put the stopper of the rear FAN door into the openable and closable state. (Refer to INST03-01-160.)
   b. Loosen the two screws of the rear right side of the DKU, and open the FAN door.
   c. Install the four HDDPWRs to the DKU.
   d. Tighten the screw while holding down the right side of the HDDPWR with fingers.
   e. Close the FAN door of the rear right side of the DKU, and tighten the two screws.

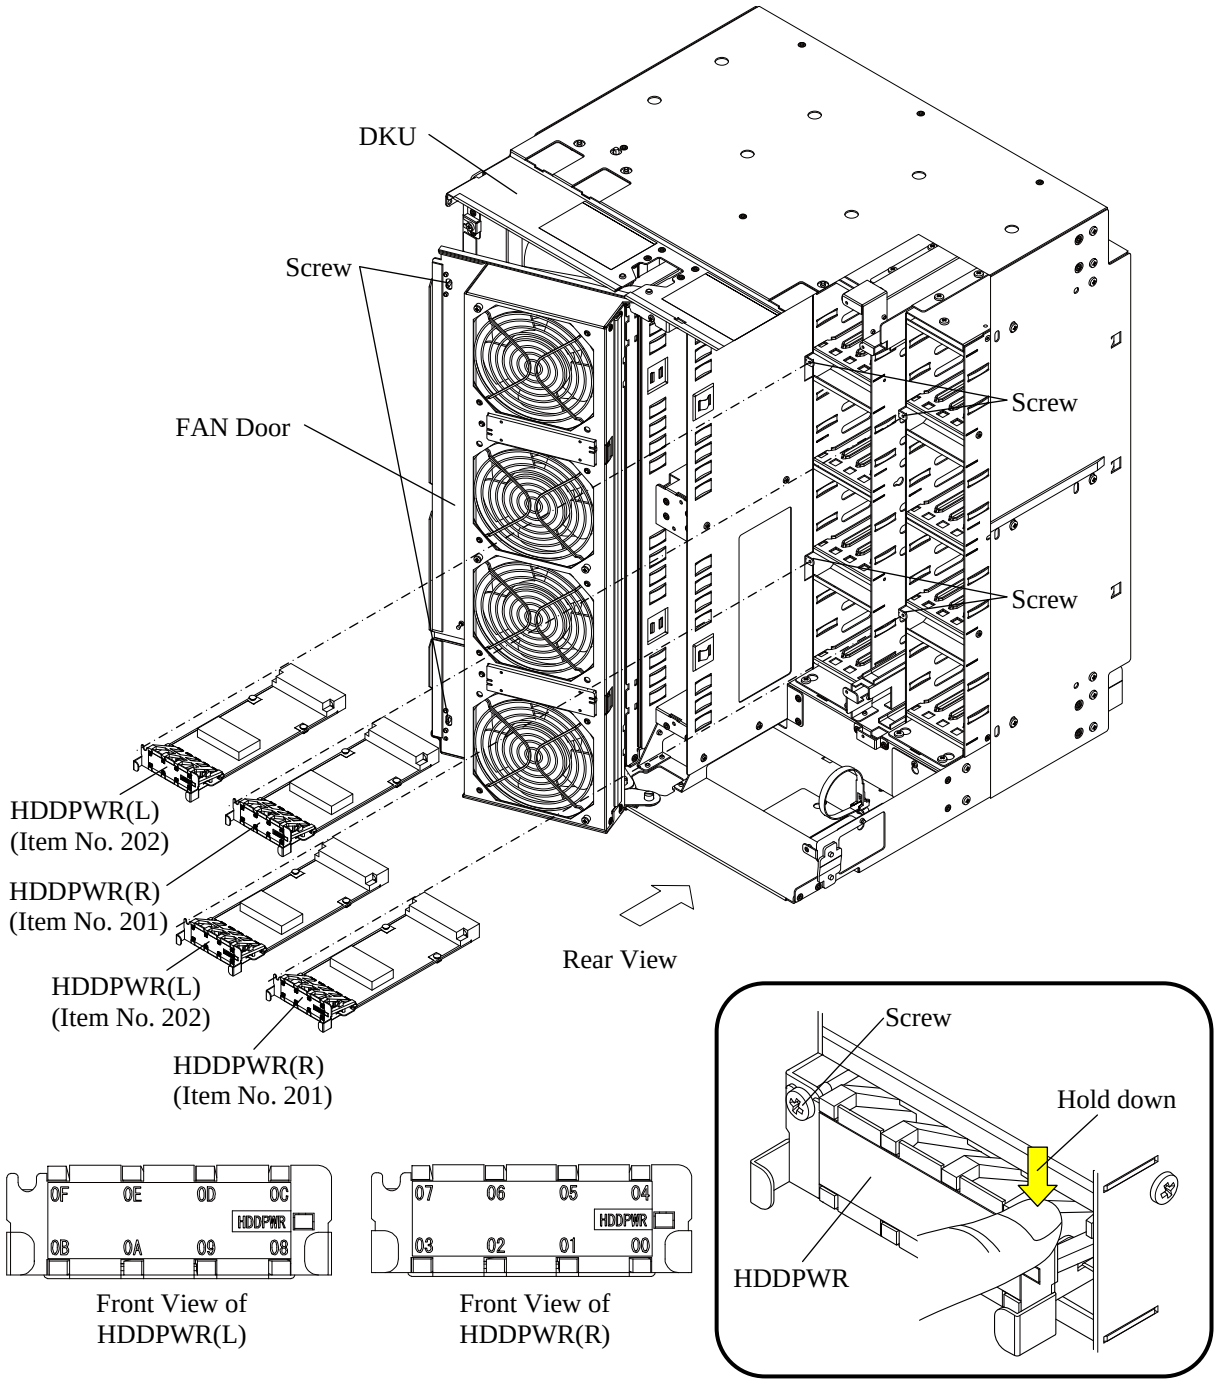

Fig. 3.5.6-3 Installation of HDDPWRs

Copyright © 2010, Hitachi, Ltd.

f. Loosen the two screws of the rear left side of the DKU, and open the FAN door.
g. Install the four HDDPWRs to the DKU.
h. Tighten the screw while holding down the right side of the HDDPWR with fingers.
i. Close the FAN door of the rear left side of the DKU, and tighten the two screws.
j. Put the FAN door stopper into the neutral state.

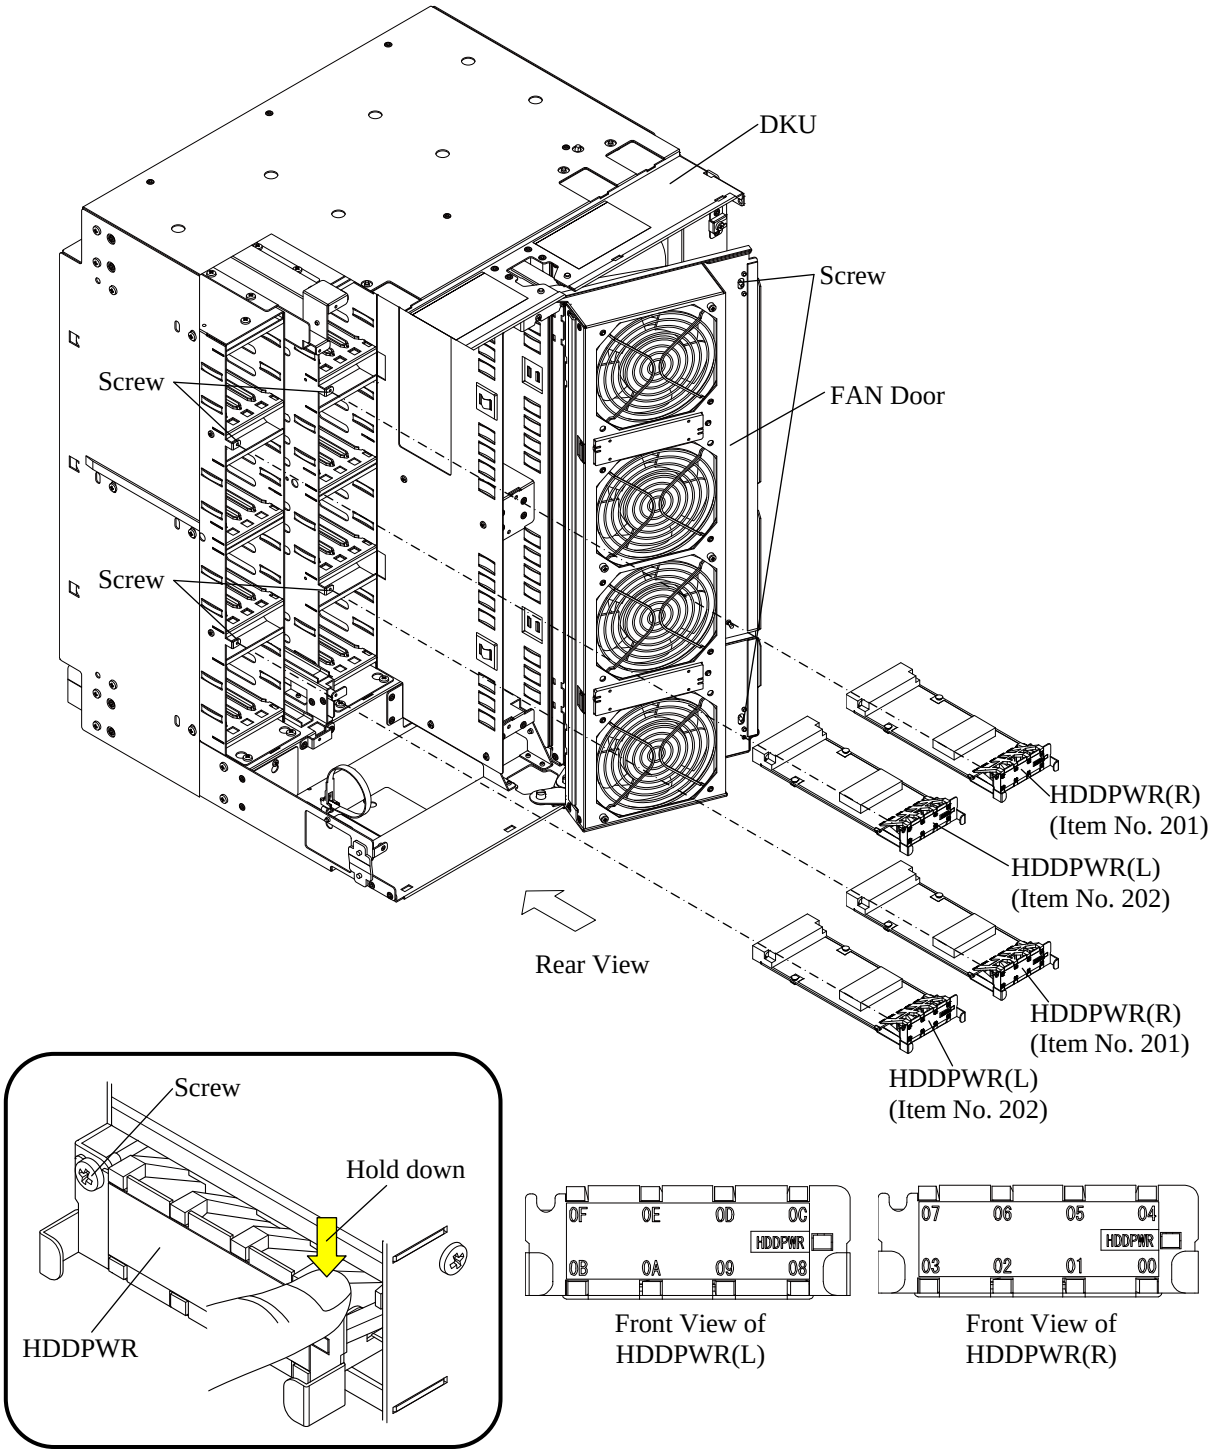

Fig. 3.5.6-4 Installation of HDDPWRs

Copyright © 2010, Hitachi, Ltd.

3. Attach the nameplate
   a. Remove the screw from the rack frame and remove all the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

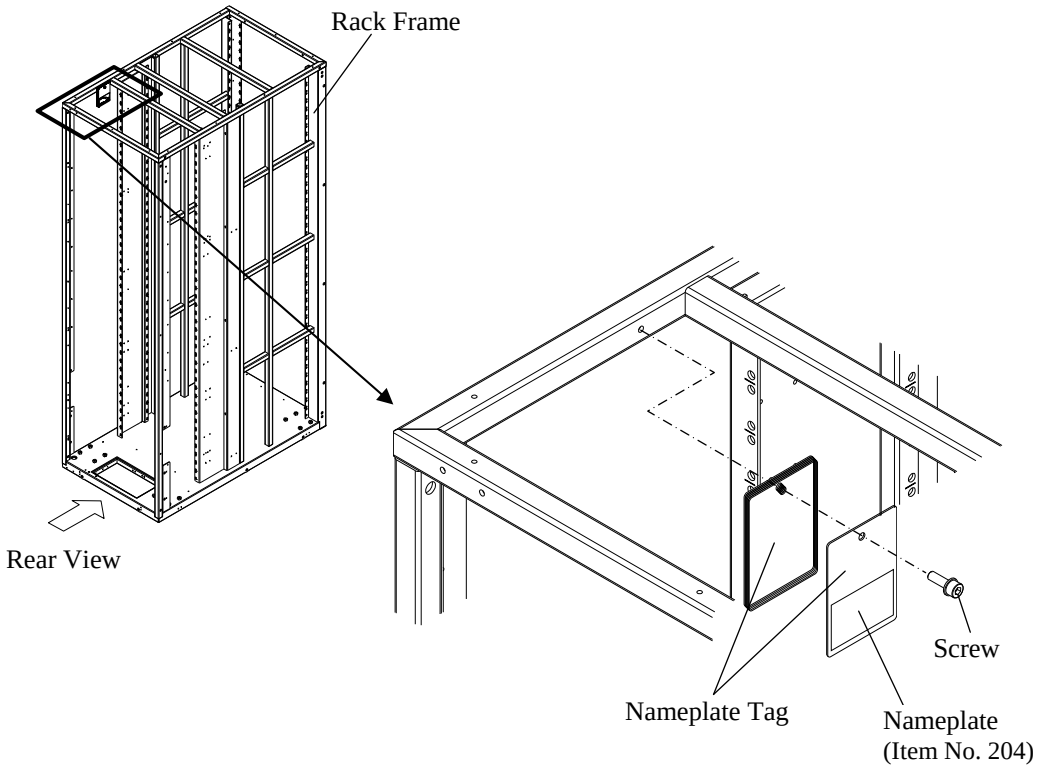

Fig. 3.5.6-5 Attachment of Nameplate

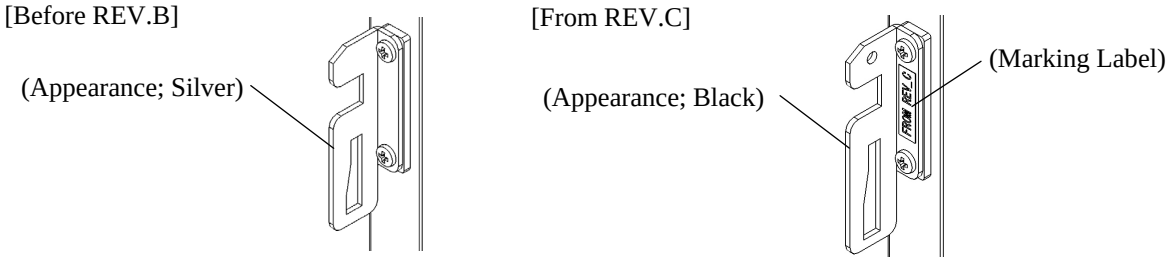
Copyright © 2010, 2014, Hitachi, Ltd.

3.5.7 Installation Procedure of Bezel

1. Attachment of Brackets
   a. Attach the two hinges on the front side and fasten the four screws.
   b. Attach the bracket on the front side and fasten the two screws.
   c. Attach the two plates on the front side and fasten the four screws.
   d. Attach the angle on the front side and fasten the two screws.

Notice: Pay attention to the angle (Item No.304) because it is different by the bezel revision. Cannot lock by the combination of the bezel of REV_C and the angle of the bezel attachment before REV_B.



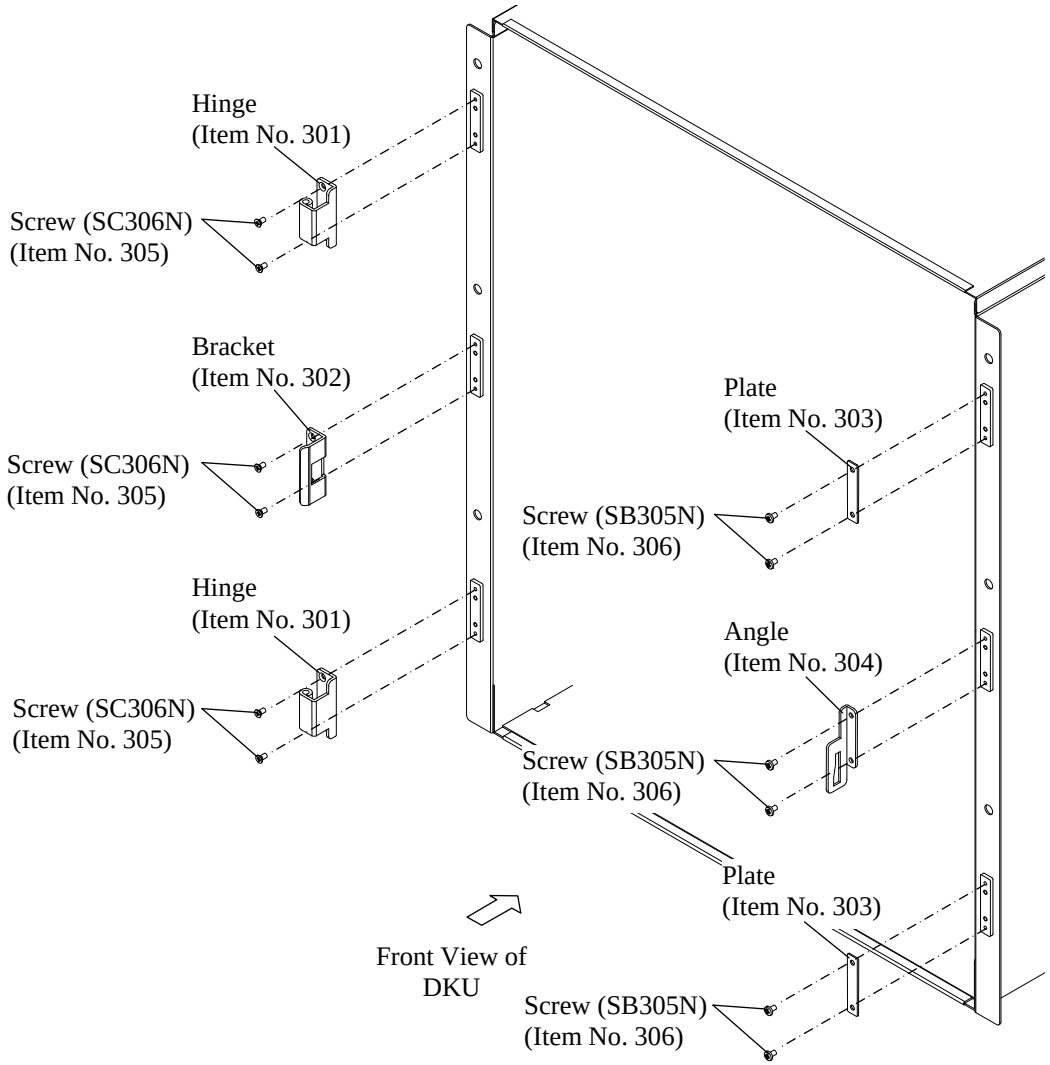


Fig. 3.5.7-1 Attachment of Parts

Copyright © 2010, 2014, Hitachi, Ltd.

2. Attachment of Bezel (13U)
   a. Attach the Bezel and fix the brackets with the two pins.
   b. Closing the bezel by pushing the pocket door pull.
   c. Turn the key 90 degrees counterclockwise direction to lock the Bezel, and take out the key from the keyhole.
   d. Push the left middle side of the Bezel until it clicks.

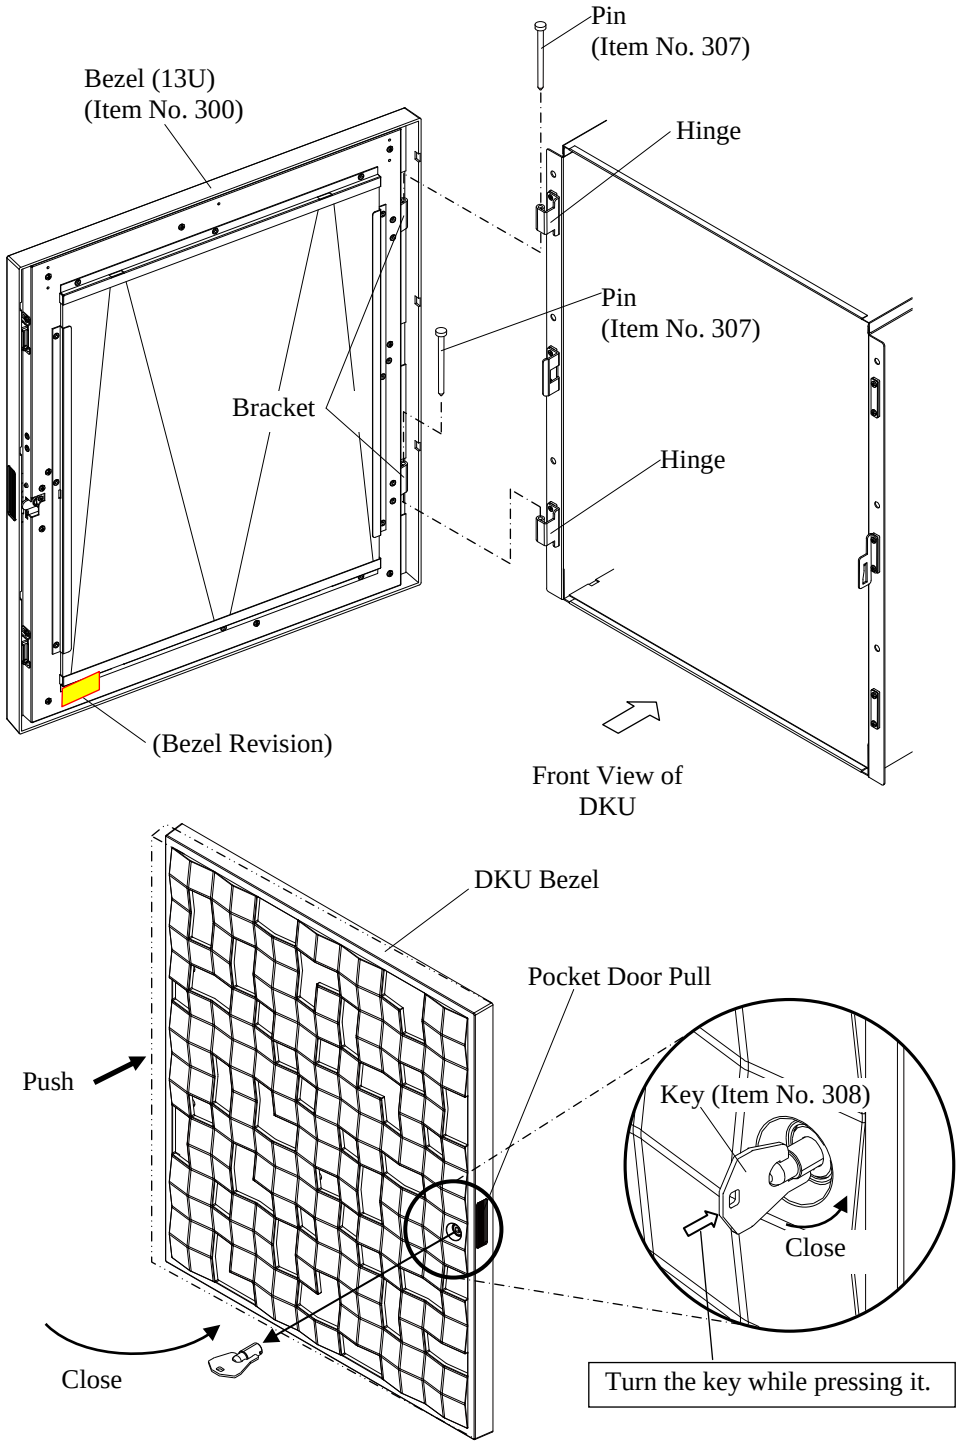

Fig. 3.5.7-2 Attachment of Bezel

Copyright © 2010, Hitachi, Ltd.

3. Attach the nameplate
   a. Remove the screw from the rack frame and remove all the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

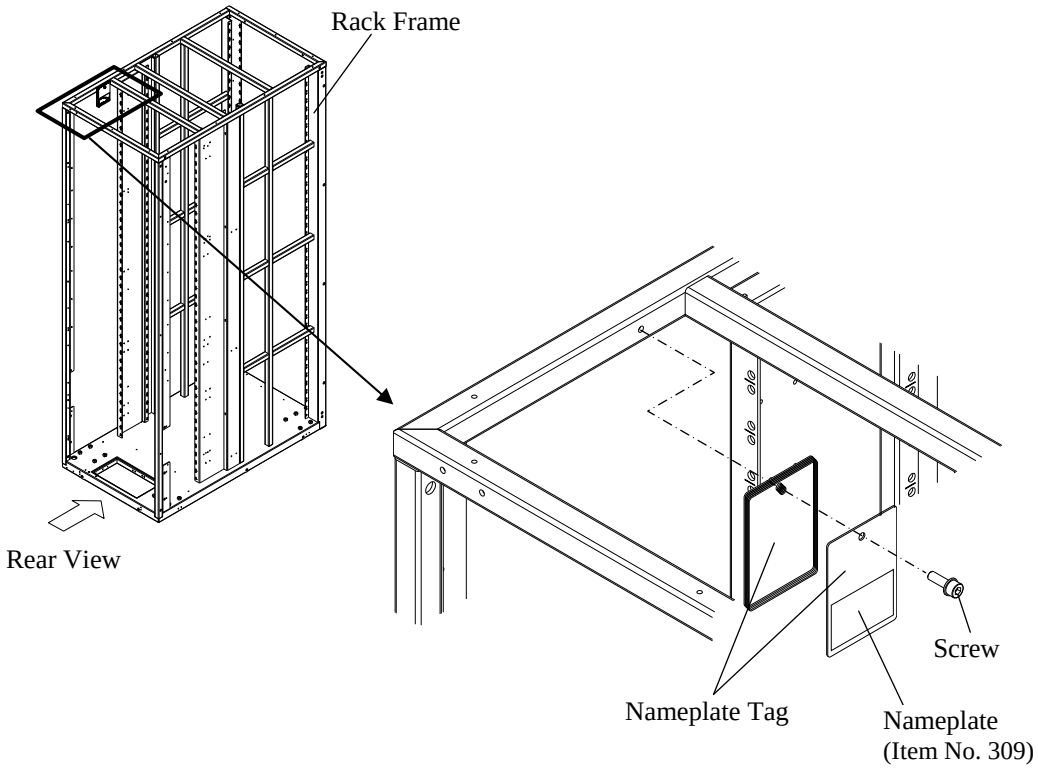

Fig. 3.5.7-3 Attachment of Nameplate

   d. Return to the working table and do the rest of the work.
      New Installation: INST02-10
      Non-Disruptive Installation: INST02-50

3.5.8 Installation Procedure of Flash Module Drive Chassis (DKC-F710I-FBX)

1. Installing the rails (If the rails are already installed, this installation procedure is not required.)
   EIA units and intervals of mounting holes of 19-inch rack frame conforming to EIA standard
   - A unit (U) space conforming to EIA standard is 19 inches wide and 44.5 mm high as shown in the figure below.
   - The boundary of the unit falls on the middle of the interval of 12.7 mm.
   - Universal intervals: Repeat of 44.45 mm (15.875 mm + 15.875 mm + 12.7 mm)
     Wide intervals: Repeat of 44.45 mm (31.75 mm + 12.7 mm)
     Maximum number of mountable unit spaces: 42

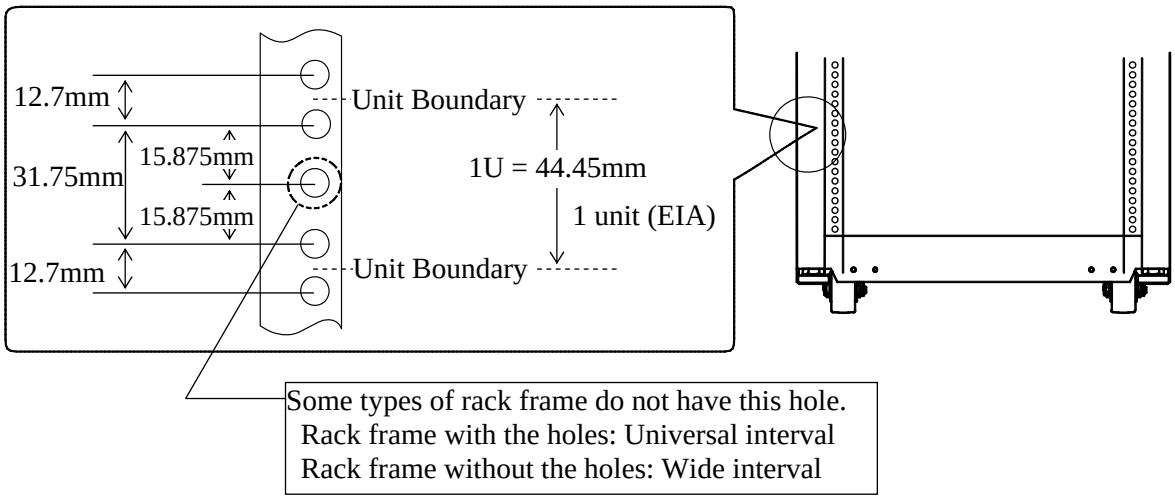

Fig. 3.5.8-1 Attachment Hole Size of Rack

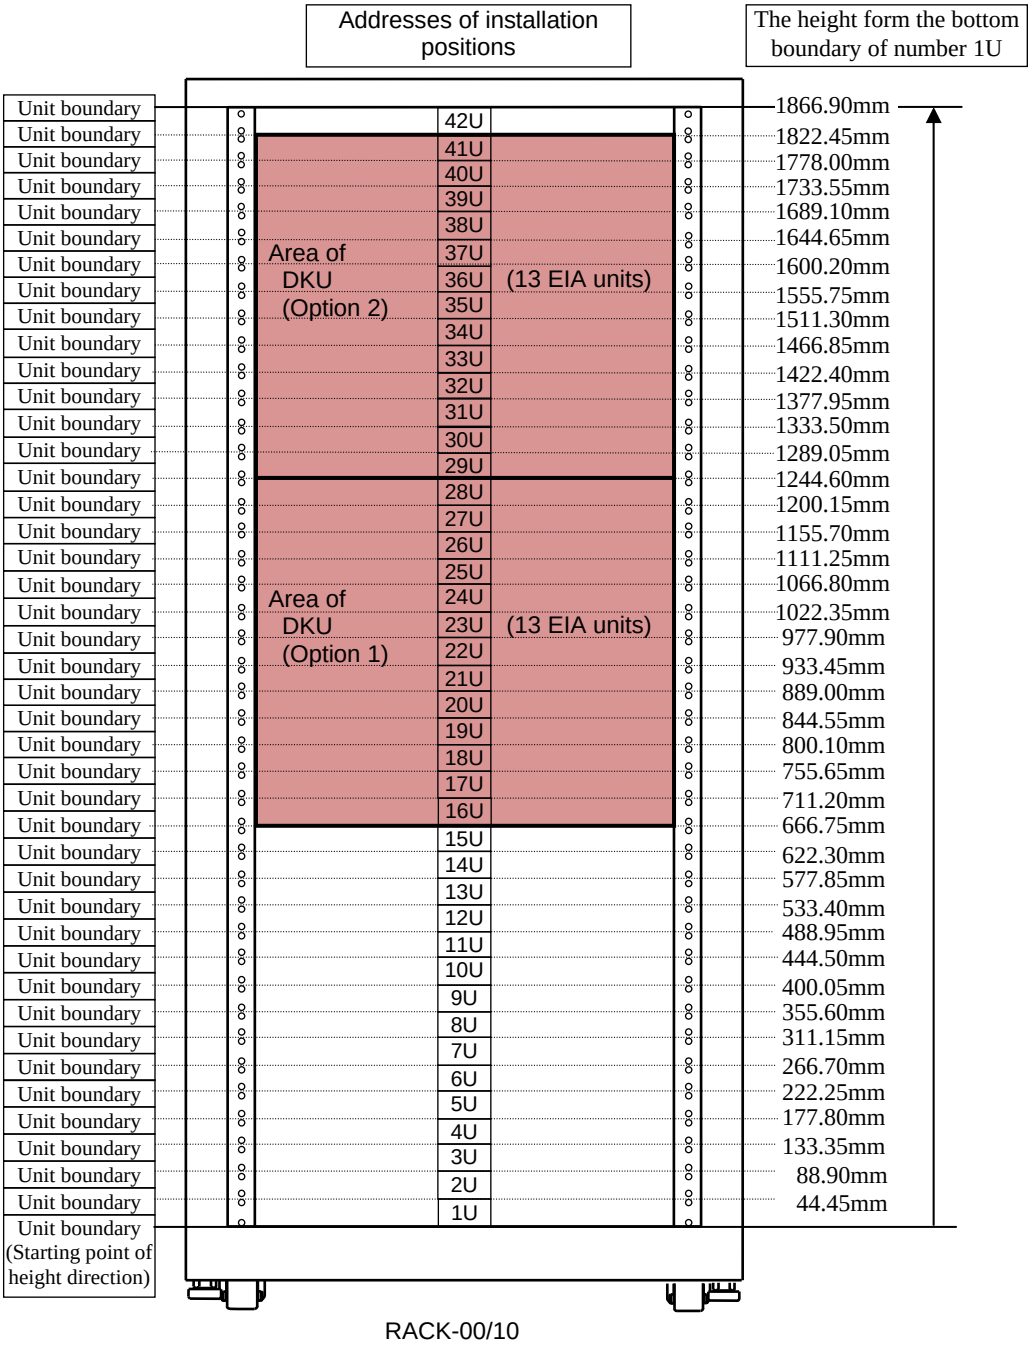
Copyright © 2012, Hitachi, Ltd.

The addresses are given as 1, 2, 3, and so on counted from the bottom of the rack frame.
The following figures show a layout example of installing Drive chassis in 42 units rack frame.
However, installing positions of Drive chassis may differ according to the construction within the rack frame.



RACK-00/10

Fig. 3.5.8-2 Whole Layout of Installation Position Addresses (RACK-00/10)

2. Details of installing positions of Drive Chassis and parts
   a. The Fig. 3.5.8-5 shows the details of installing positions of Flash Module Drive Chassis (DKC-F710I-FBX) and parts.

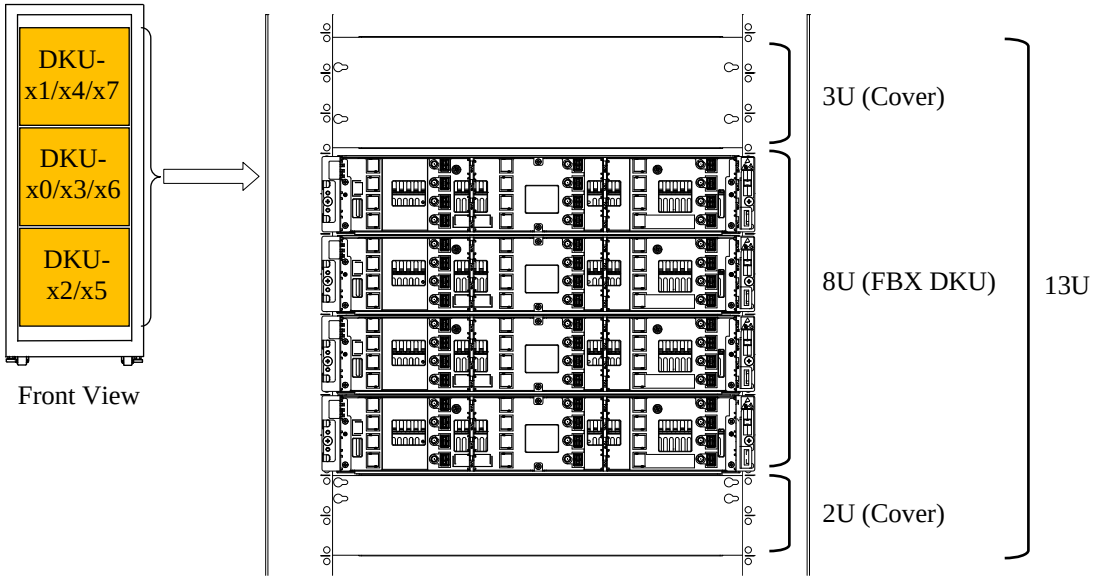

Fig. 3.5.8-5 Details of Installing Positions of Drive Chassis and Parts

Copyright © 2012, Hitachi, Ltd.

3. Installing the rails.
   a. On the right side of the installation location in the rack frame, align the round holes of the Rail (R) with those of the rack frame and insert the rack nuts (at four places in total in front and rear).
   b. Fasten the Rail (R) to the rack frame using the WA socket bolts (at two places each on the front and rear sides). The WA socket should be firmly tightened so as not loosen.
   c. Install the other Rails (R) and the Rails (L) in the rack frame in a same manner.

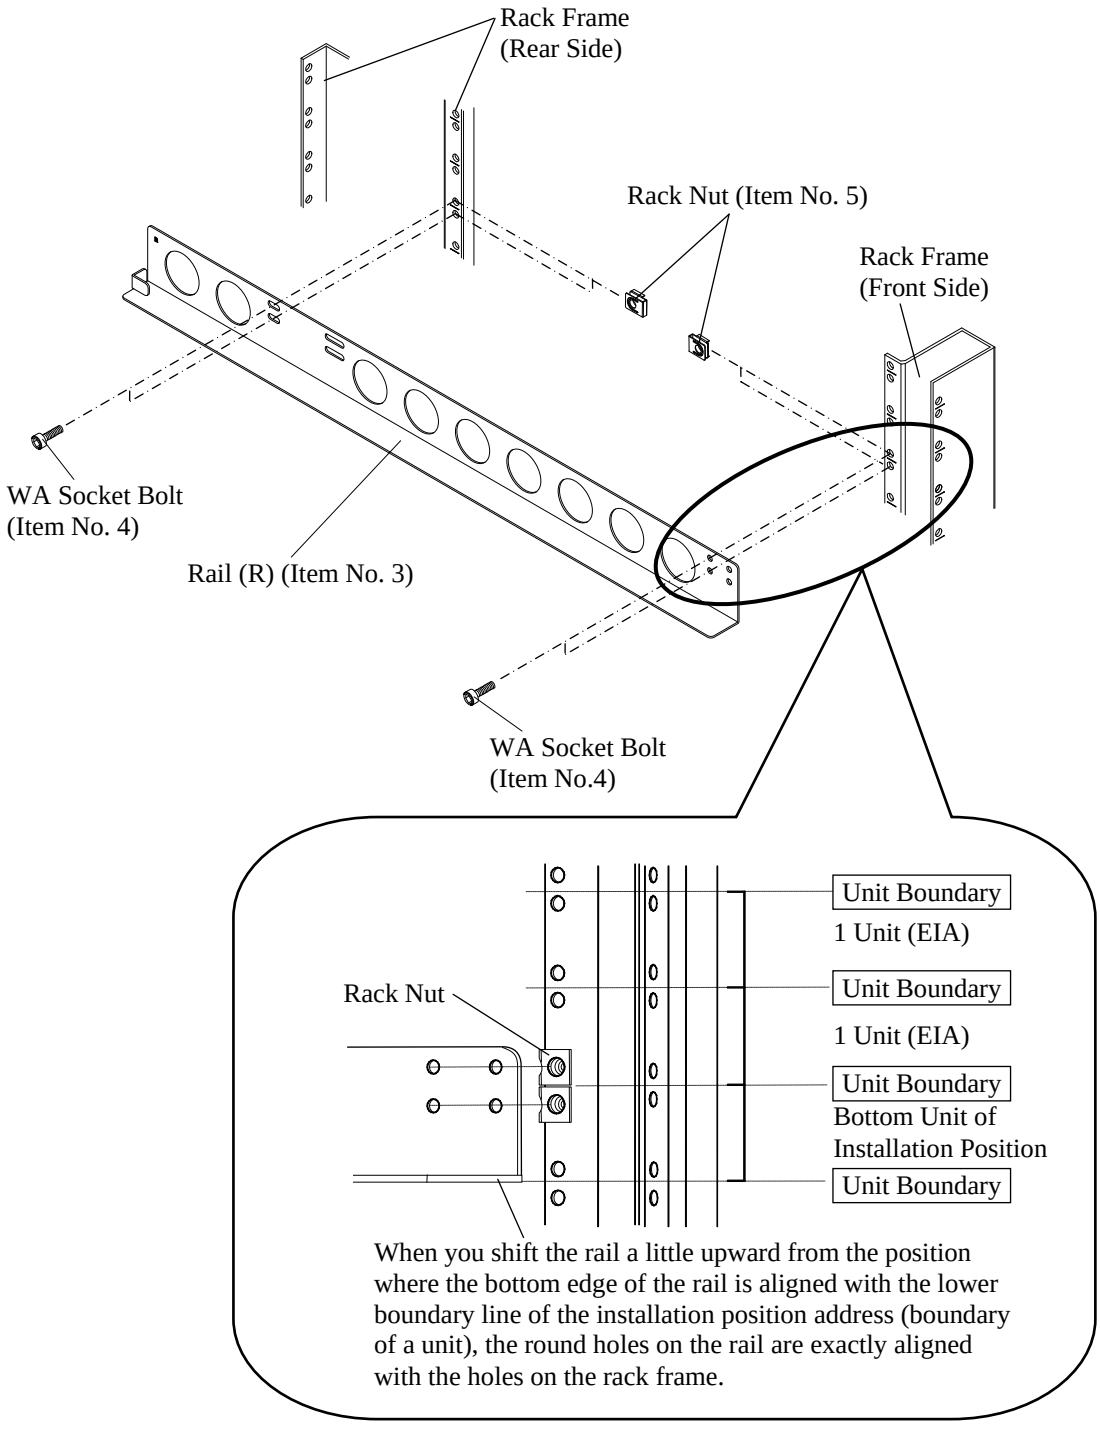

Fig. 3.5.8-6 Attachment of Rails

Copyright © 2012, Hitachi, Ltd.

d. Attach Rack Nuts to the sides of the rack frame (at six places in total on the right and left sides).
e. Fasten two Bracket 2 to the sides of the rack frame using four screws.
f. Fasten the Bracket 1R and the Bracket 1L to the sides of the rack frame using two screws, with the top of the brackets pressed against the bottom of the rails.

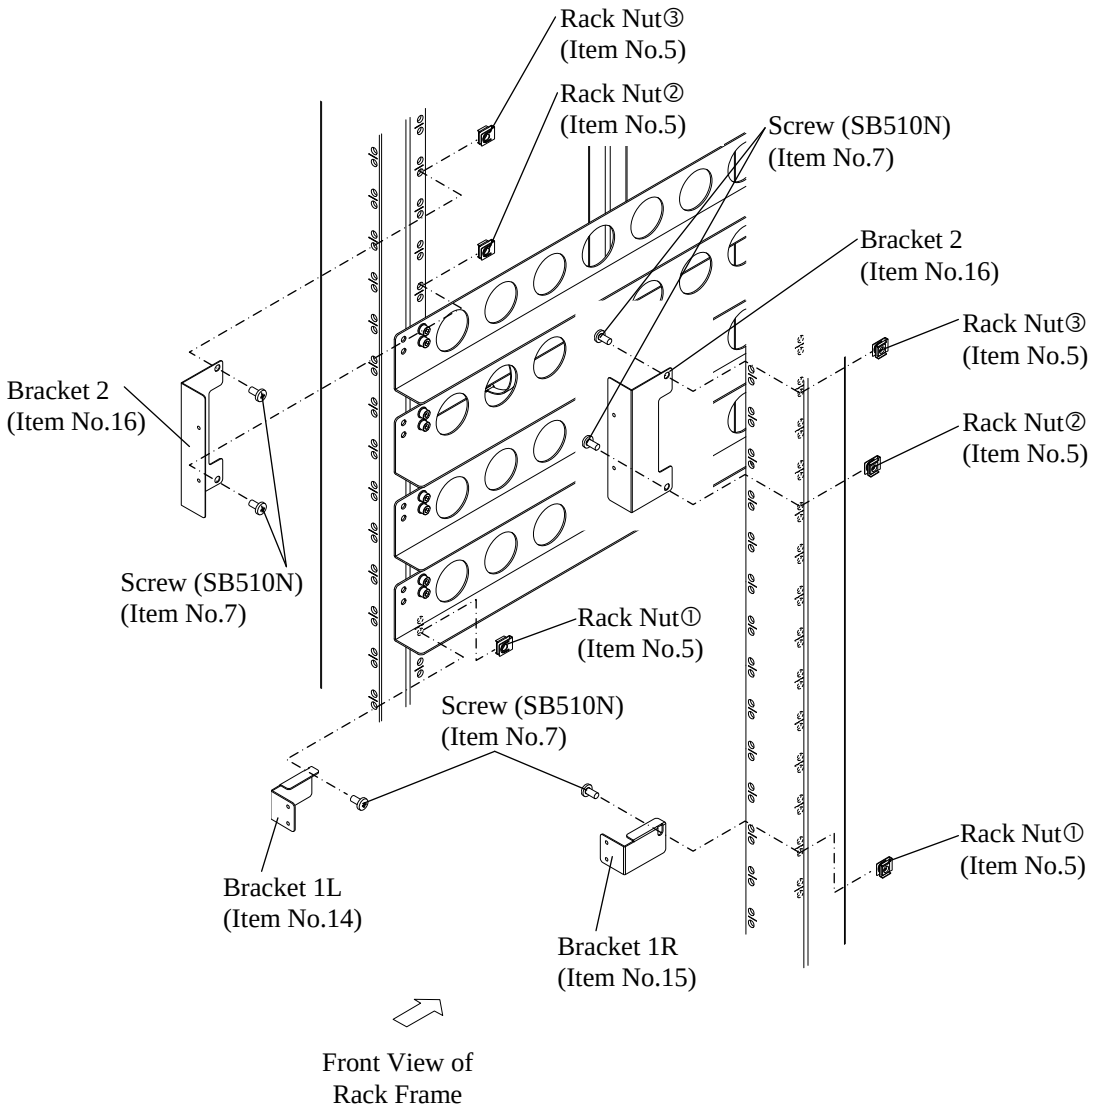

Fig. 3.5.8-7 Attachment of Brackets

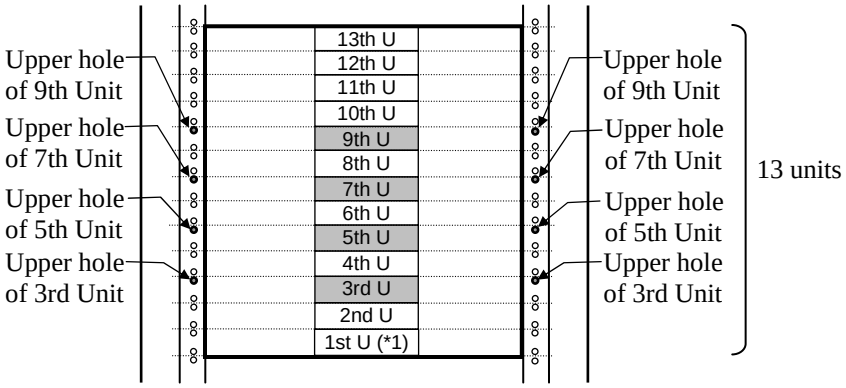
Table 3.5.8-1 Installation Position of Rack Nut

No.	Rack Nut No.	Installation Position (Frame Side)	Remarks
1	Rack Nut①	Upper hole 2nd Unit	*1
2	Rack Nut②	Lower hole 11th Unit	*1
3	Rack Nut③	Upper hole 13th Unit	*1

*1: The 1st unit is the lowest unit in the installation position of the DKU.

Copyright © 2012, Hitachi, Ltd.

4. Installing rack nuts
   a. Fit the four rack nuts to each of the right and left beams on the front side of the rack frame.



Front View of Rack Frame

*1: Bottom unit of installation position

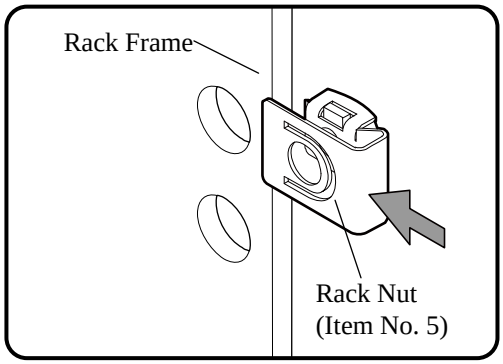


Fig. 3.5.8-8 Installing Rack Nuts

5. Installing the DKU

CAUTION

Paying attention to falls:
Work carefully because the mass of the single DKU is about 20 kg.

Beware over turning and dropping:
To prevent DKU from over turning and dropping, the installation work must be done by two or more personnel.

a. Install the FBX DKU on the front side of the Rack frame referring to mounting procedure using the special lifter. (See INST03-15-10 through 40.)
   At this time, be sure the plate of the rear side of the FBX DKU is in the stopper of the rail.
b. Fix the FBX DKU with the two screws.
c. Install the other FBX DKUs in a same manner.

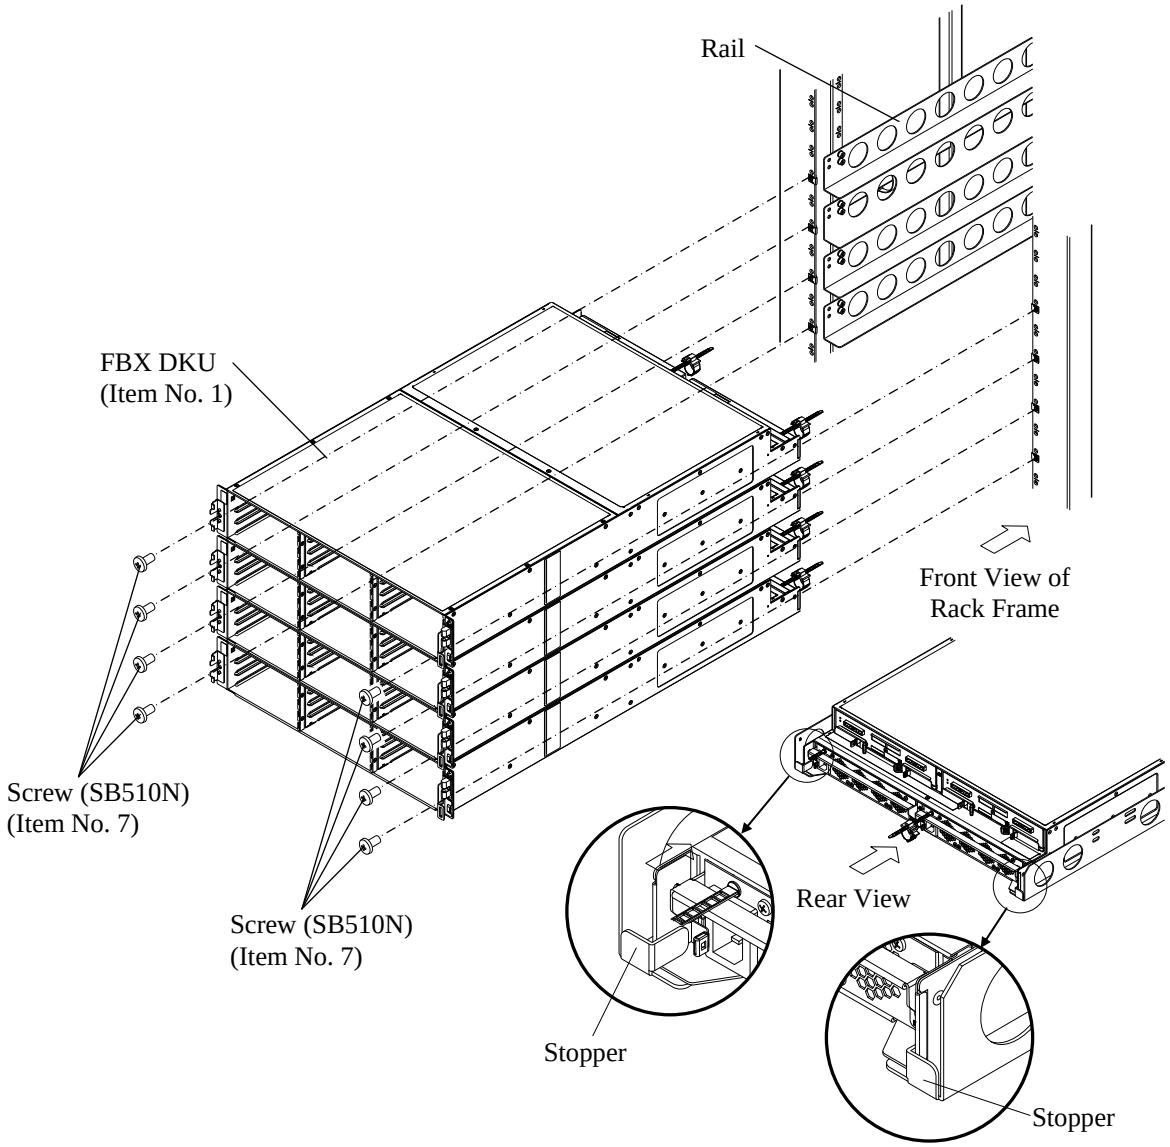

Fig. 3.5.8-9 Installing FBX DKU

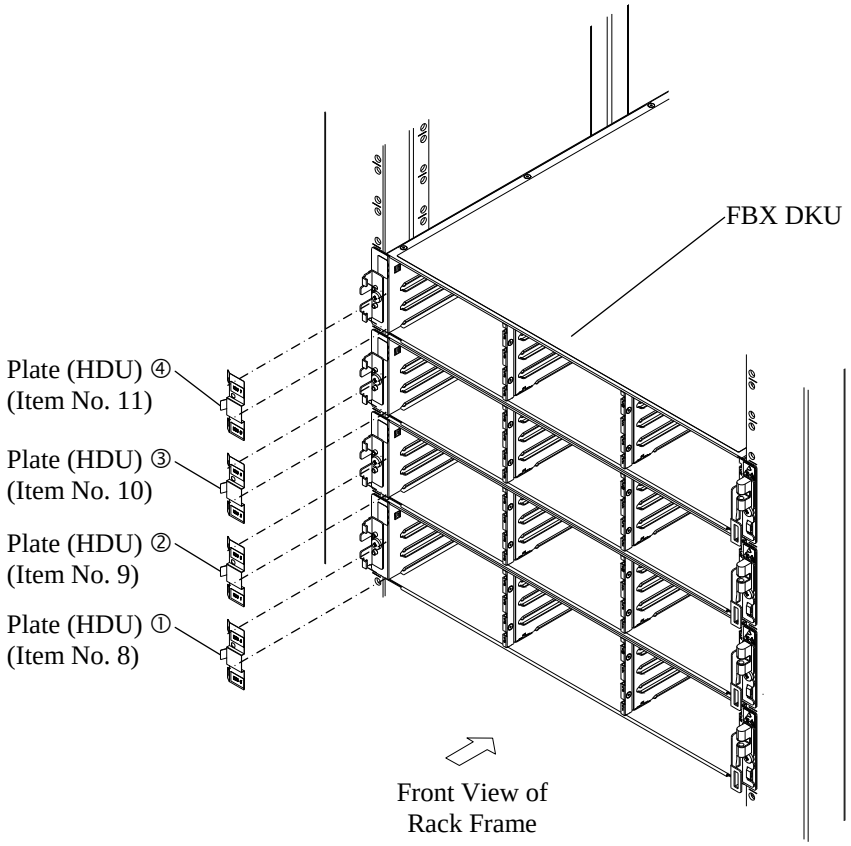
Copyright © 2012, Hitachi, Ltd.

d. Attach the Plate (HDU) to the left side of the front of the FBX DKU.
e. Install the other Plates (HDU) in a same manner.



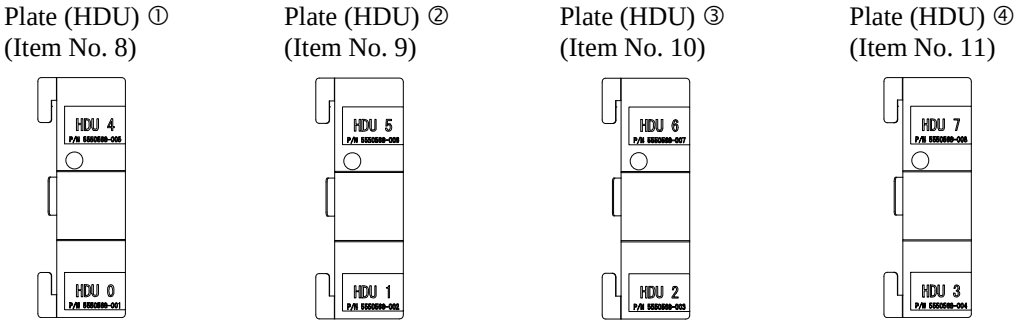


Fig. 3.5.8-10 Attachment of Plate (HDU)

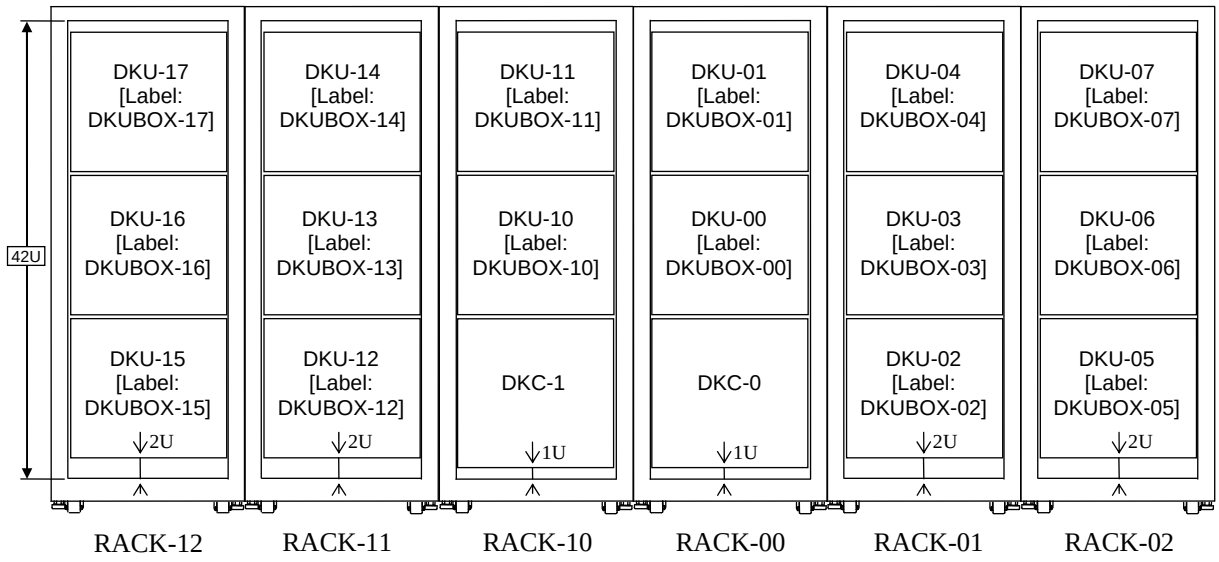
Copyright © 2012, Hitachi, Ltd.

f. Attach a label that corresponds to the DKU location to a Plate on the left side of the front of the FBX DKU.
g. Attach a label to the other plates in a same manner.

Standard Configuration



Front View

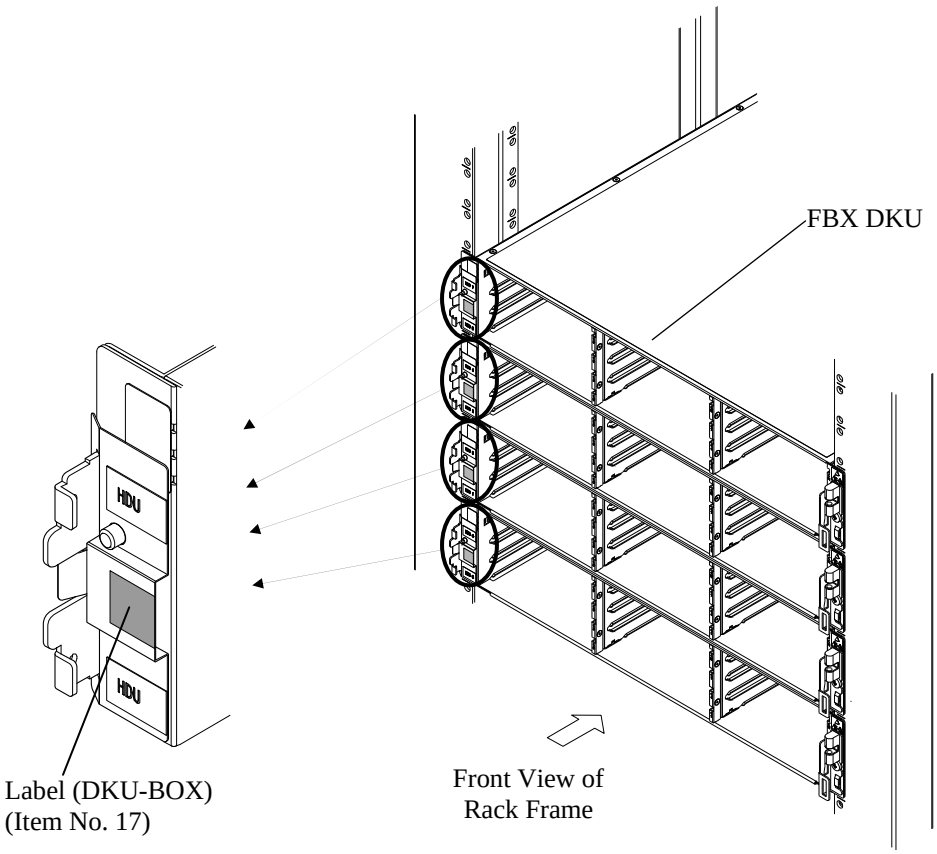


Fig. 3.5.8-11 Attachment of Labels

Copyright © 2012, Hitachi, Ltd.

h. Attach the Side Cover to the left side of the front of the FBX DKU.
i. Install the other Side Covers in a sane manner.

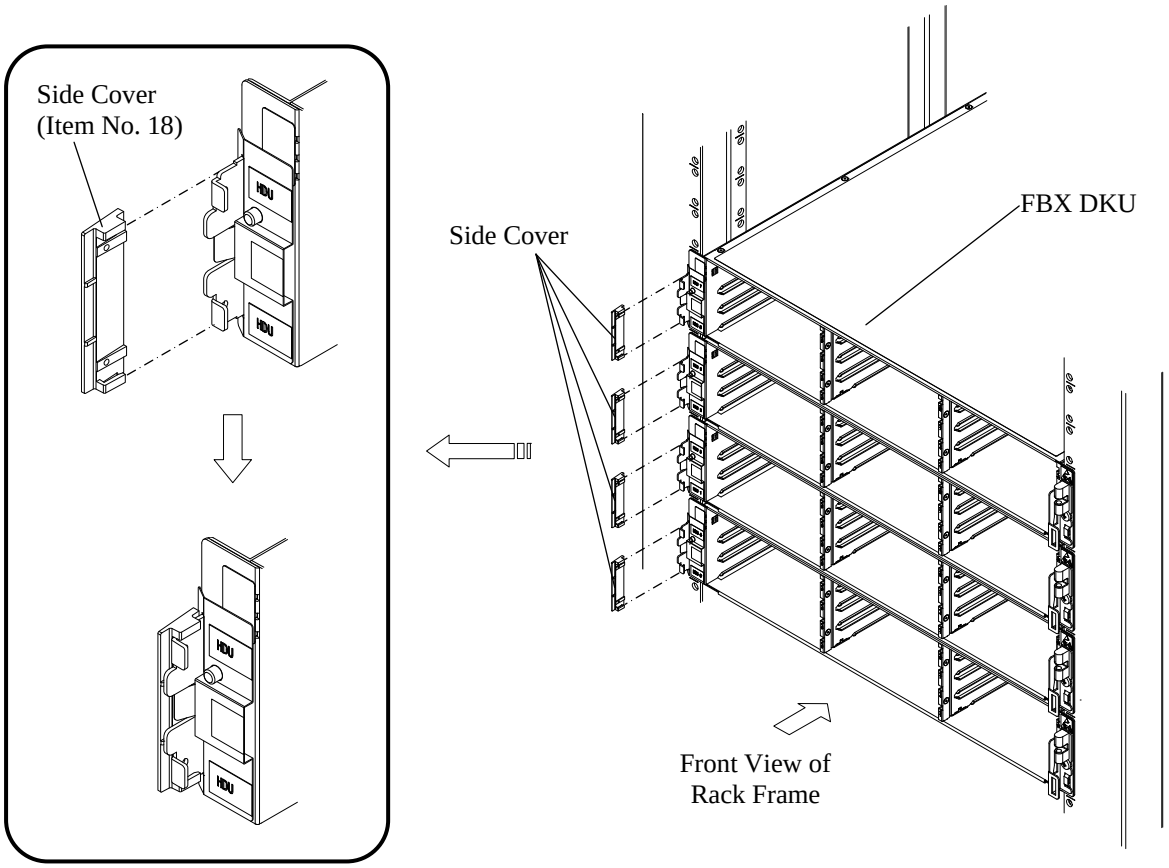

Fig. 3.5.8-12 Installation of Side Covers

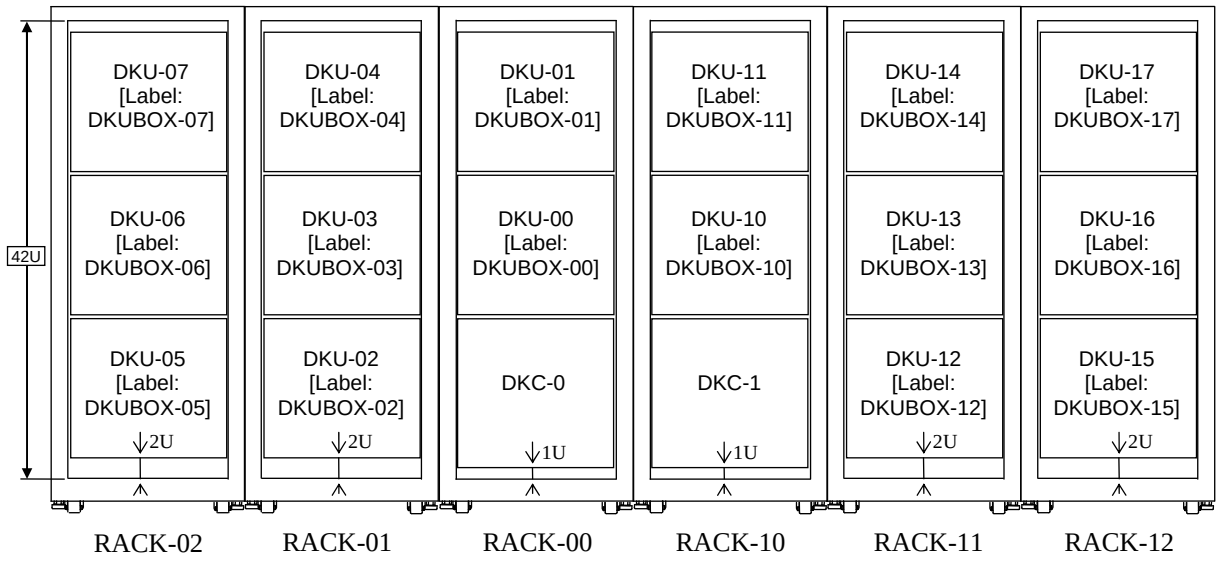
Copyright © 2012, Hitachi, Ltd.

j. Attach a label that corresponds to the DKU location to a rail on the right side of the rear of the FBX DKU.
k. Attach a label to the other labels in a same manner.

Standard Configuration



Rear View

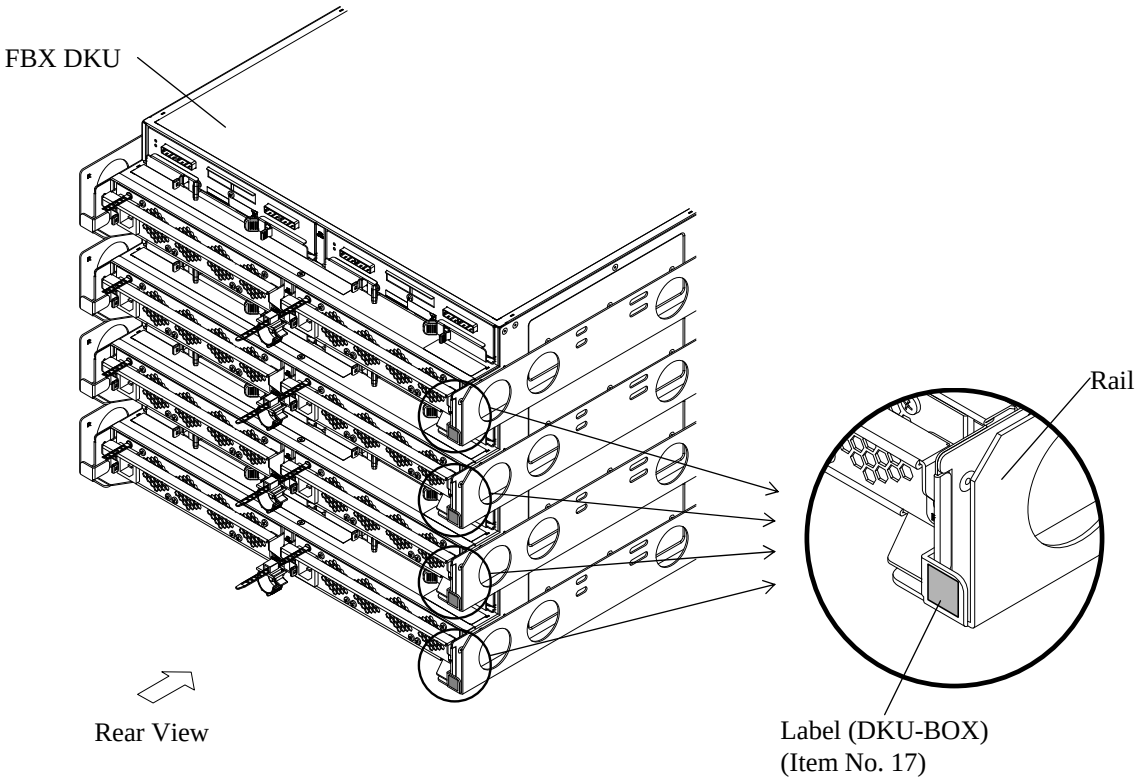


Fig. 3.5.8-13 Attachment of Labels

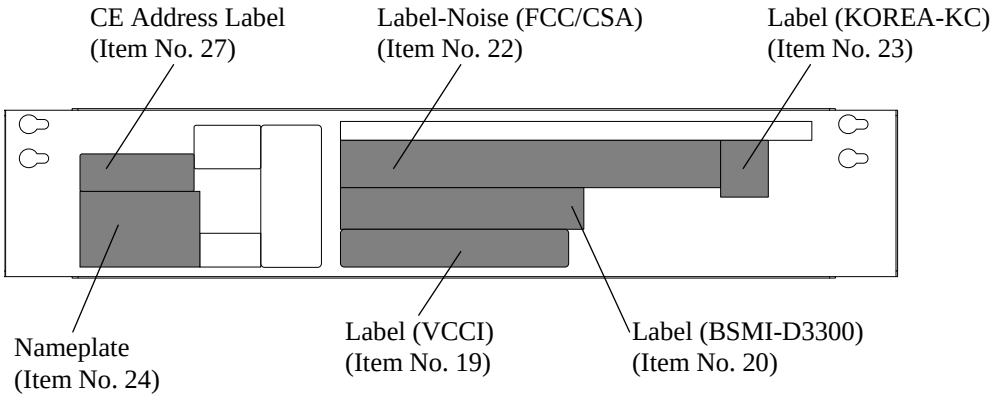
Copyright © 2012, Hitachi, Ltd.

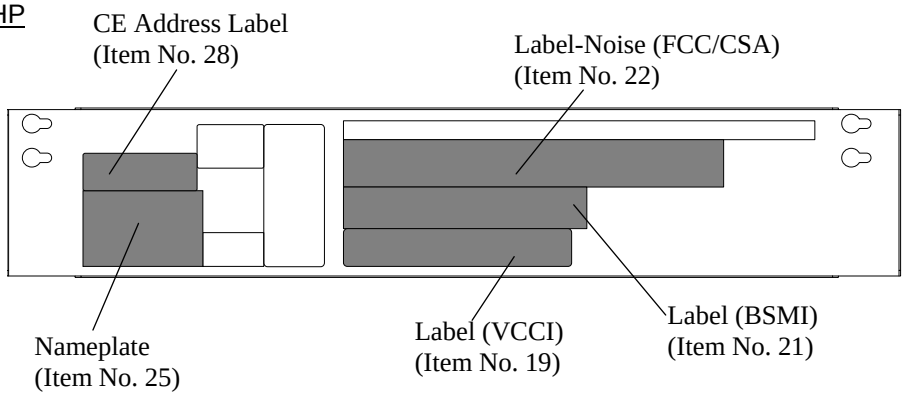
6. Attach the nameplate and labels
   a. Attach the nameplate and labels to the cover.

For HDS



Front View of Cover (2U)

For HP



Front View of Cover (2U)

Fig. 3.5.8-14 Attachment of Nameplate and Labels

Copyright © 2012, Hitachi, Ltd.

7. Attachment of Covers
   a. Insert the right edge of the Cover (2U) in front of the bracket inside the rack frame. Slide the Cover (2U) to the left and fasten it with four screws at the fixation position.
   b. Insert the right edge of the Cover (3U) in front of the bracket inside the rack frame. Slide the Cover (3U) to the left and fasten it with four screws at the fixation position.

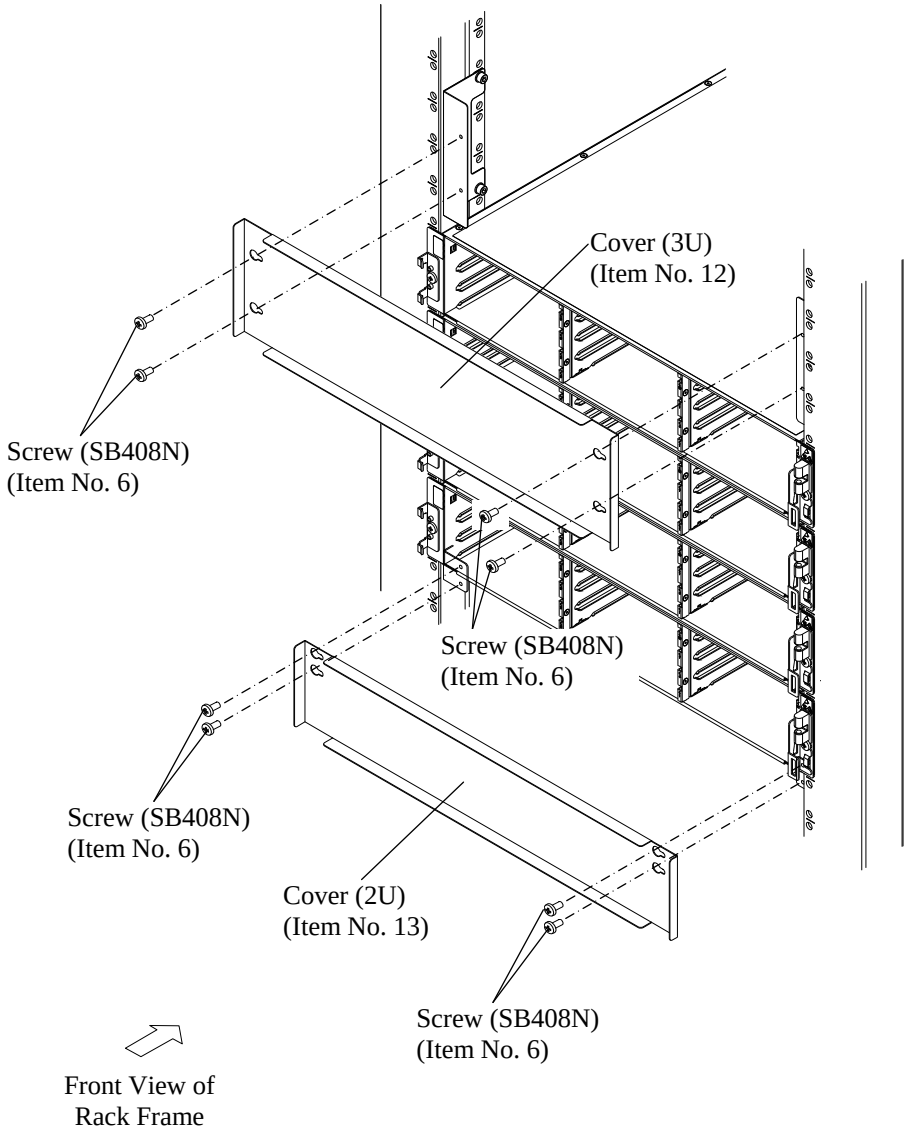


Fig. 3.5.8-15 Attachment of Covers

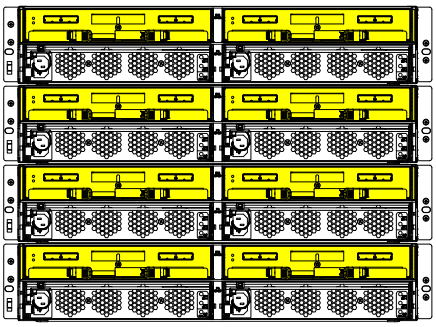
Copyright © 2012, Hitachi, Ltd.

8. Jumper Setting
   a. Loosen the screw of the SSW and open the cover.
   b. Open the cover of all the SSWs in the same manner.



Rear View of FBX DKU

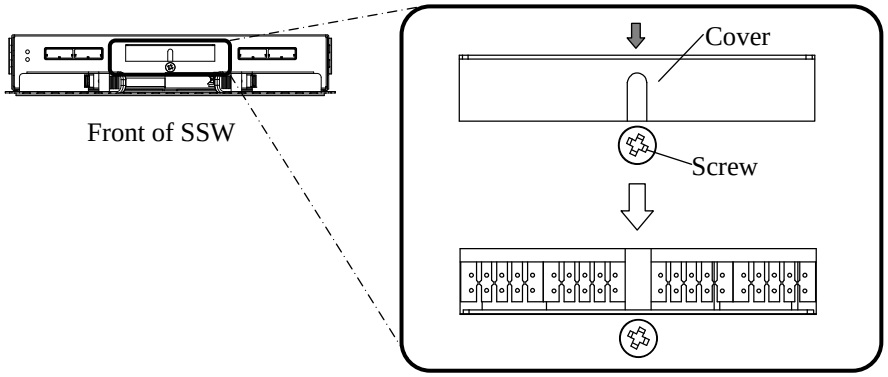


Fig. 3.5.8-16 Opening Cover

Copyright © 2012, Hitachi, Ltd.

CAUTION

A serious failure occurs if a wrong setting is made.
Operate very carefully referring to the setting table not to make a mistake in the setting.

c. Set the jumpers in the SSW PCB as indicated in the Fig. 3.5.8-17 through Fig. 3.5.8-25. Jumper settings must be made at 80 places in total per option.
   Note: • Use the insulated radio pliers of the maintenance tools when setting the SSW jumpers.
   • When the jumper setting of SSW is wrong, execute the replace process of SSW and change the jumper setting. The jumper setting will not be effective unless the SSW PCB is dismounted and mounted.

d. Close the cover of the SSW and tighten the screw. (Refer to Fig. 3.5.8-15.)

e. Close and fasten the cover of all the SSWs in the same manner.

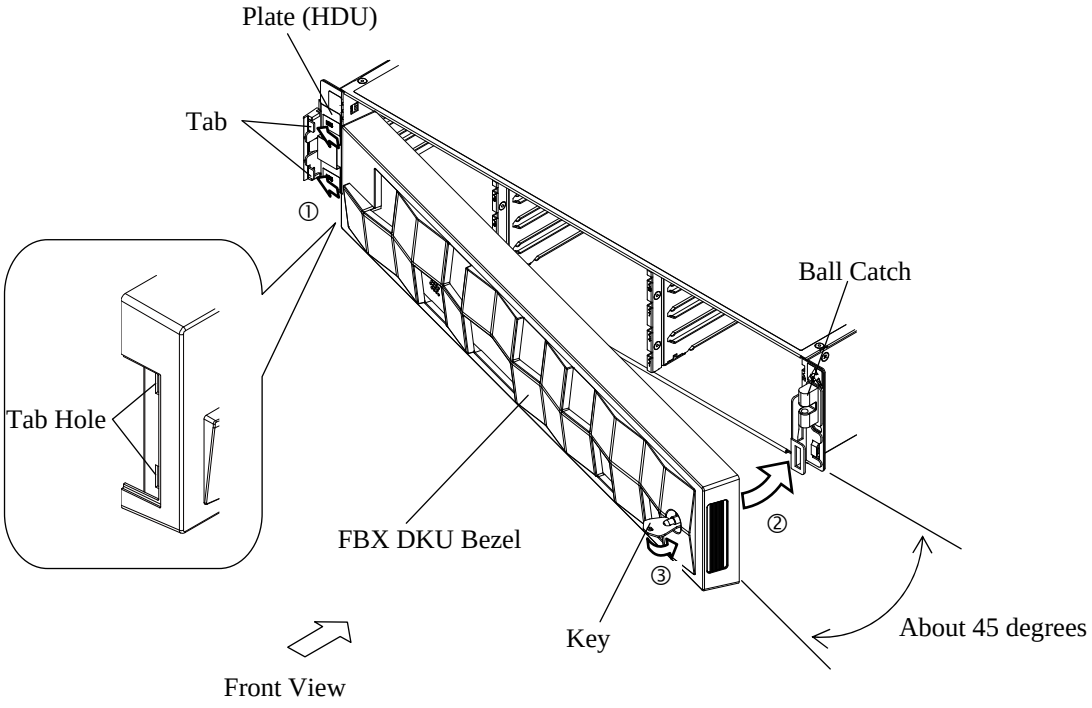
3.5.9 Installation Procedure of Bezel (DKC-F710I-BFH)

1. Attachment of Bezel (2U)
   a. Unlock the bezel with the key.
   b. Insert the tabs on the left front side of the chassis into the tab holes on the bezel (①) at an angle of about 45 degrees between the bezel and the chassis.

      Note: Be careful not to catch the Plate (HDU) between the chassis and the bezel when inserting the tabs on the chassis into the tab holes on the bezel.
      The Plate (HDU) may be damaged if catched.

   c. Fix the bezel by pressing the right side of the bezel to engage it with the ball catch on the front side of the chassis (②).
   d. Lock the bezel with the key (③).
   e. Attach the other bezels in a same manner.



The state in which the slit of the keyhole is aligned with the mark.
(The key can be inserted or pulled out in this state.)

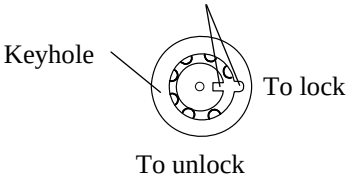


Fig. 3.5.9-1 Attachment of Bezel

Copyright © 2012, Hitachi, Ltd.

2. Attach the nameplate
   a. Remove the screw from the rack frame and remove all the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

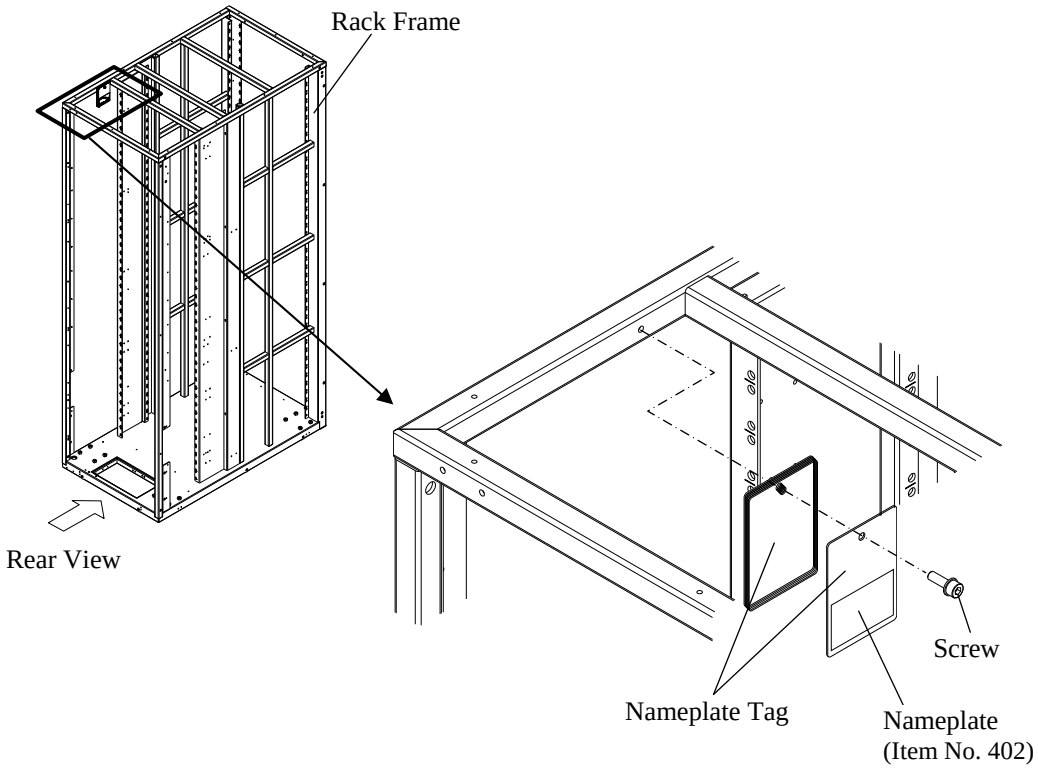

Fig. 3.5.9-3 Attachment of Nameplate

   d. Return to the working table and do the rest of the work.
      New Installation: INST02-10
      Non-Disruptive Installation: INST02-50

1. Confirmation of Installation Position
   a. Refer to following figure to confirm the connection location of DKC Power cord on DKC. However, installing positions of DKC Power cord may differ according to the construction within the rack frame.

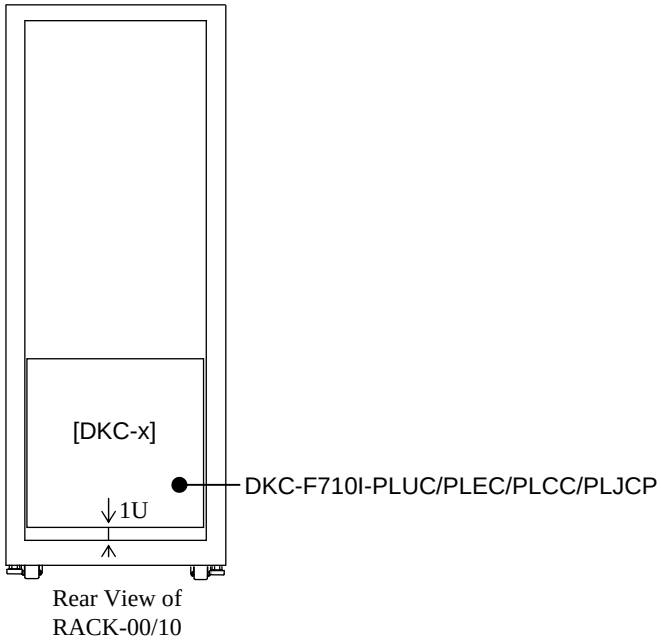

Fig. 3.6.1-1 Mounting Position of DKC Power cord

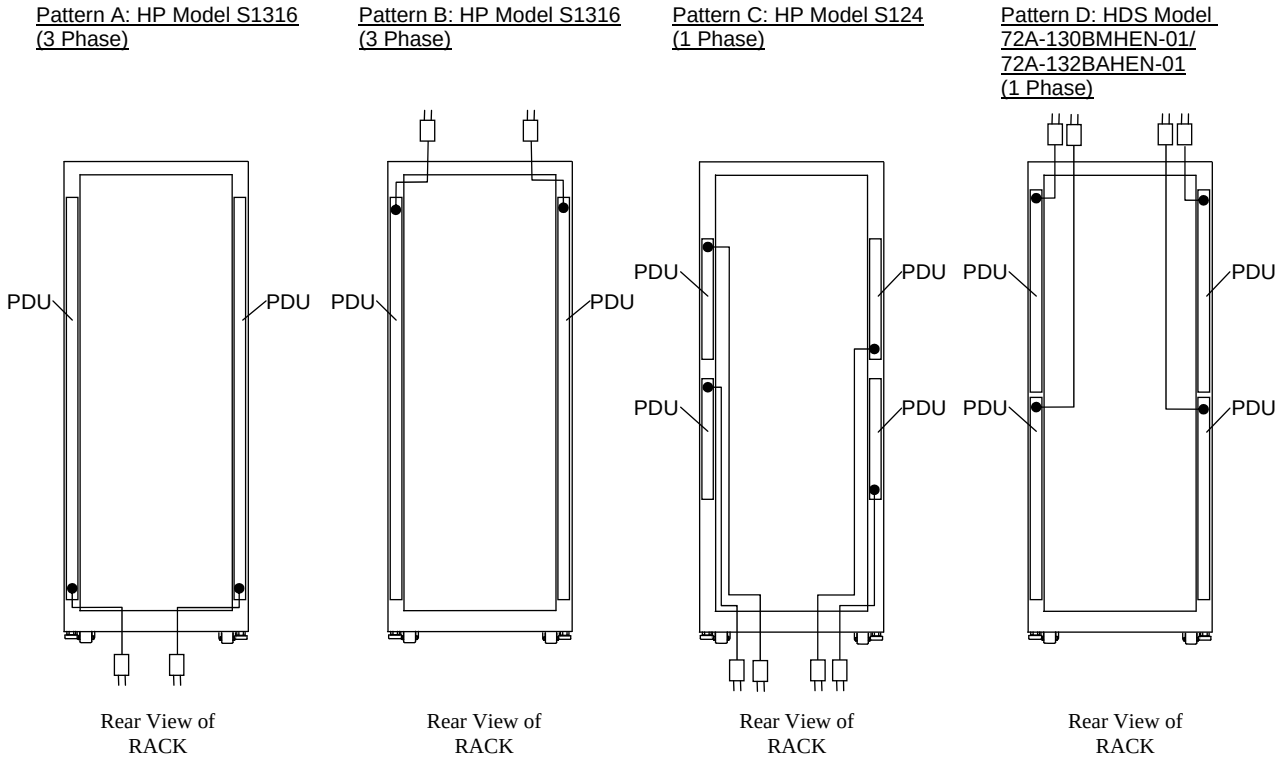
Copyright © 2011, 2014, Hitachi, Ltd.

b. Confirm the PDU patterns that are installed in the RACK.



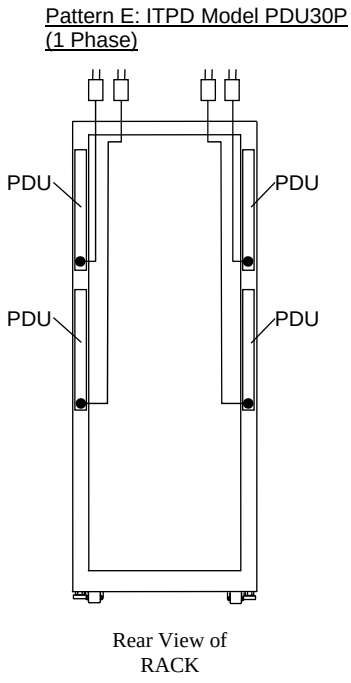


Fig. 3.6.1-2 PDU Pattern

Copyright © 2010, 2011, Hitachi, Ltd.

2. Painting out of Labels (For DKC-F710I-PLJCP, this operation is not needed.)
   a. Paint out unnecessary numbers on cable ASSYs by black oil felt pen. Refer to Fig. 3.6.1-3, Table 3.6.1-2, Table 3.6.1-3 and Table 3.6.1-4.

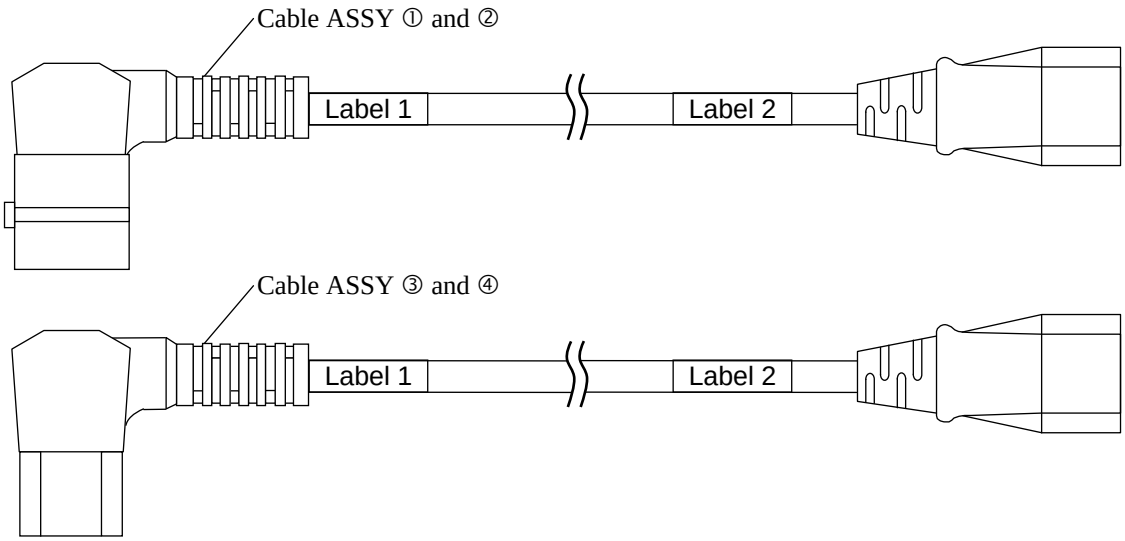

Fig. 3.6.1-3 Label Position on Cable ASSY

3. Connection of Cables (DKC Side)

For DKC-0

a. Connect the cable ASSYs (DKCPS-00 and DKCPS-01) to the DKCPSs and fix them with the stoppers.
b. Fix the cable ASSYs (DKCPS-02 and DKCPS-03) with the locking clamps.

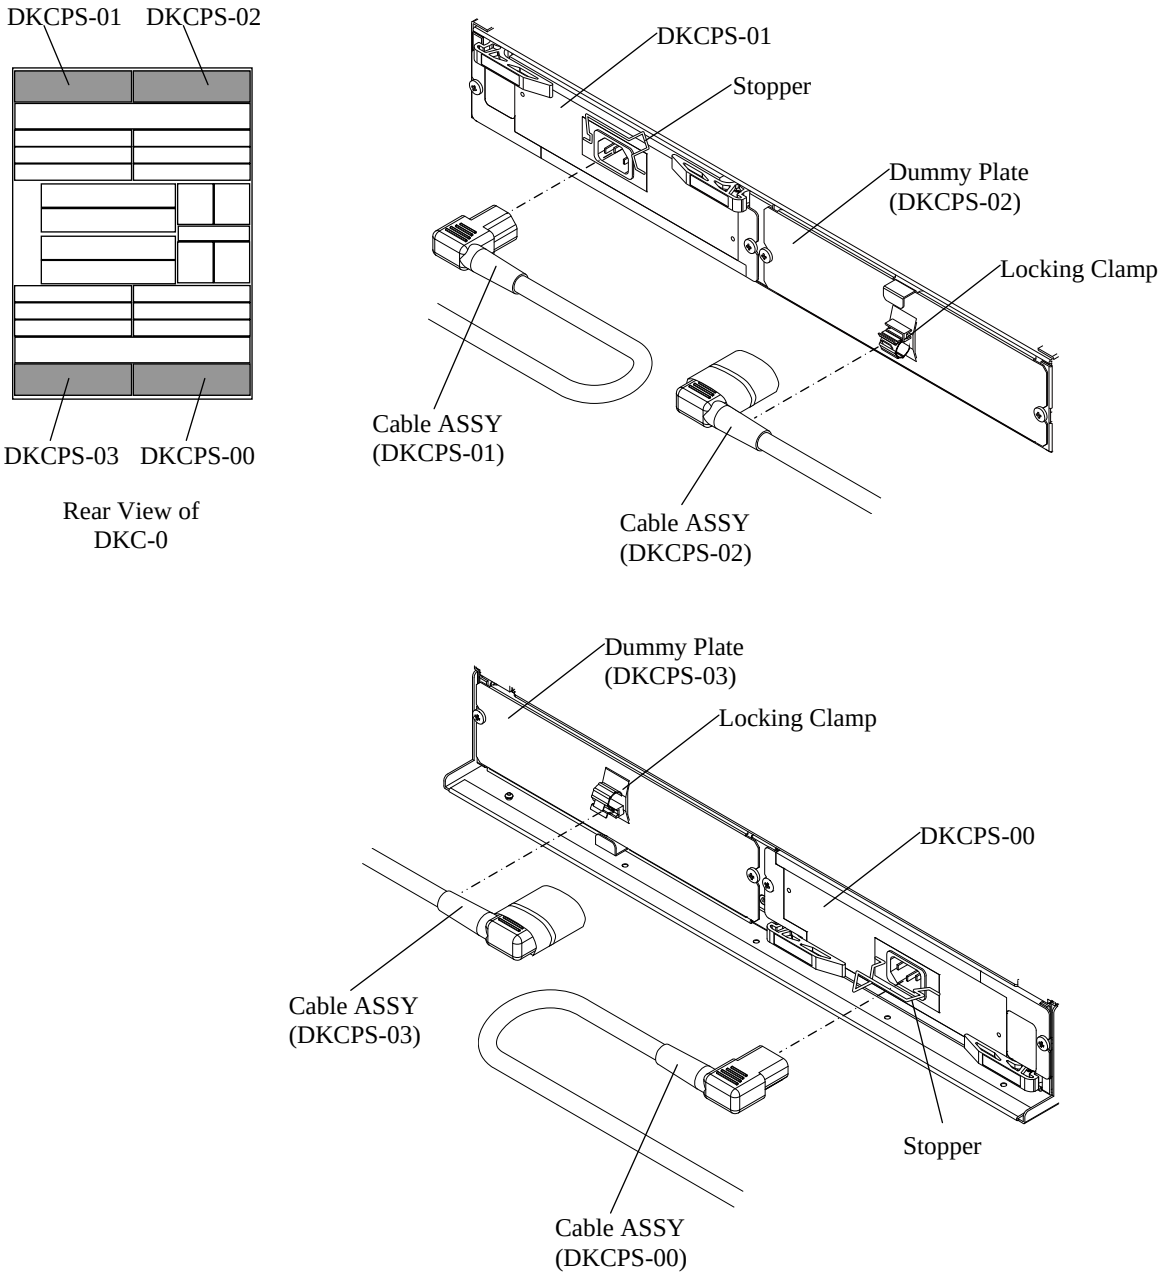

Fig. 3.6.1-4 Connection of Cables

Copyright © 2010, Hitachi, Ltd.

For DKC-1

a. Wire the cable ASSYs (DKCPS-10 and DKCPS-11) for the DKCPSs. **However, do not connect the cable ASSYs with the DKCPSs at this stage.**
b. Fix the cable ASSYs (DKCPS-12 and DKCPS-13) with the locking clamps.

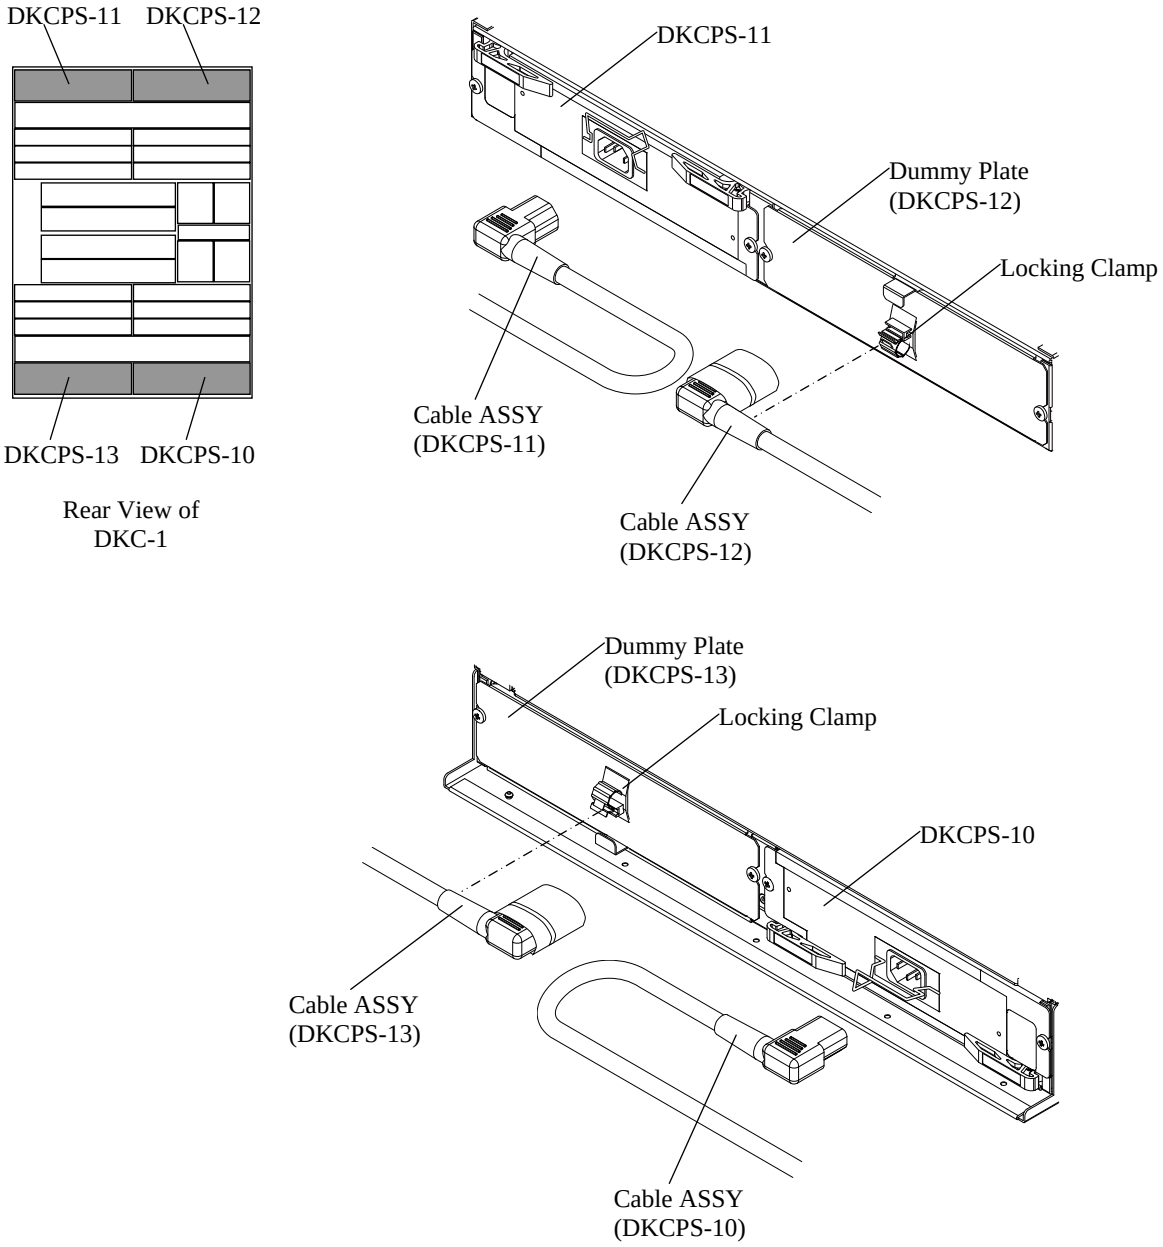

Fig. 3.6.1-4A Attachment of Cables

Copyright © 2010, 2011, Hitachi, Ltd.

c. Secure the cable ASSY ② on the tray with the repeat binder.
d. Bundle the DKU cable ASSYs and the cable ASSY ③ with the repeat binder.

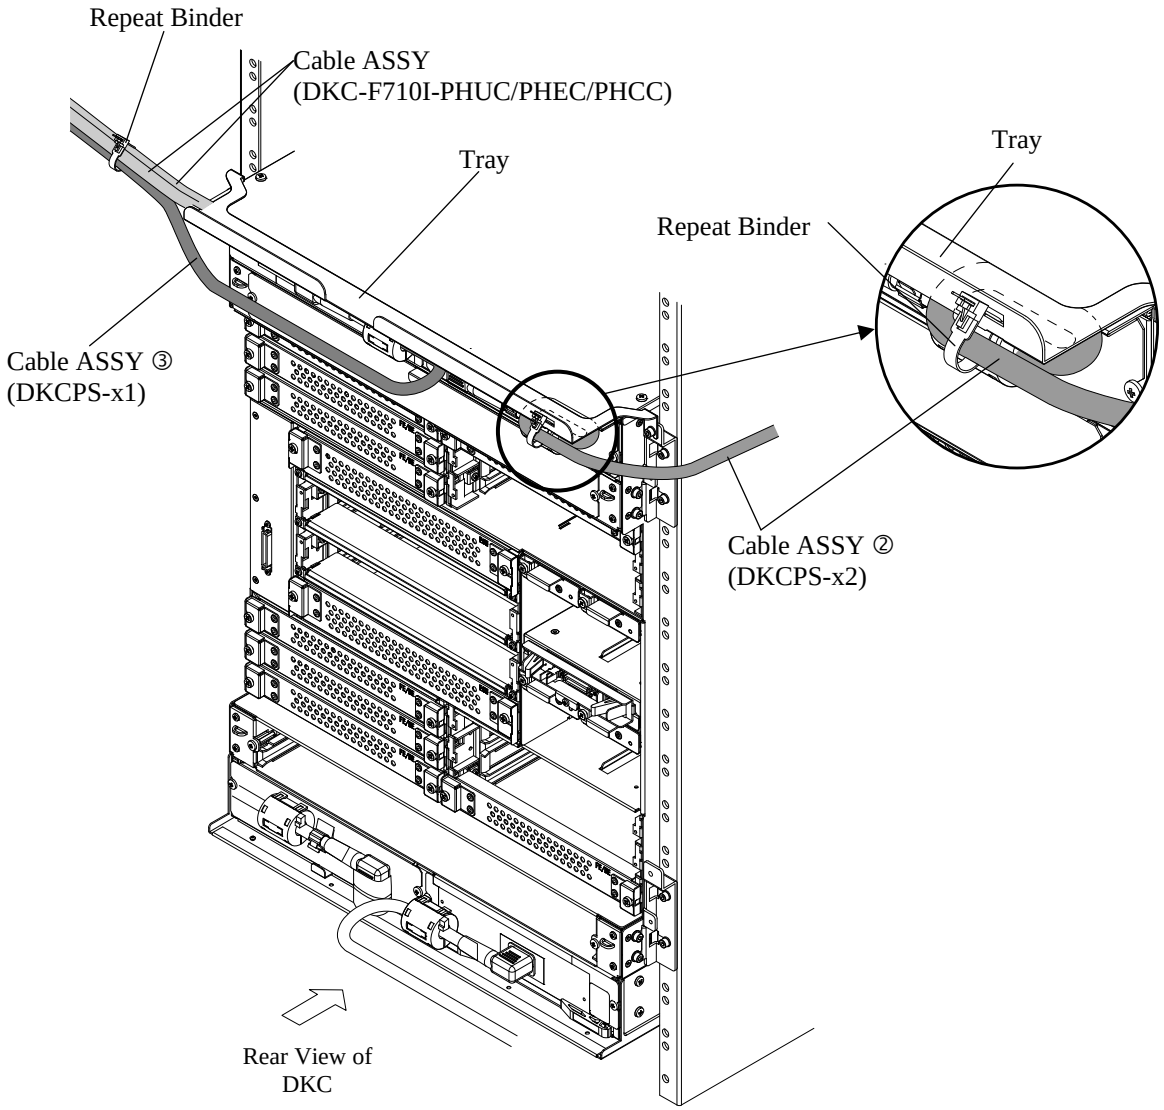

Fig. 3.6.1-5 Fixation of Cables

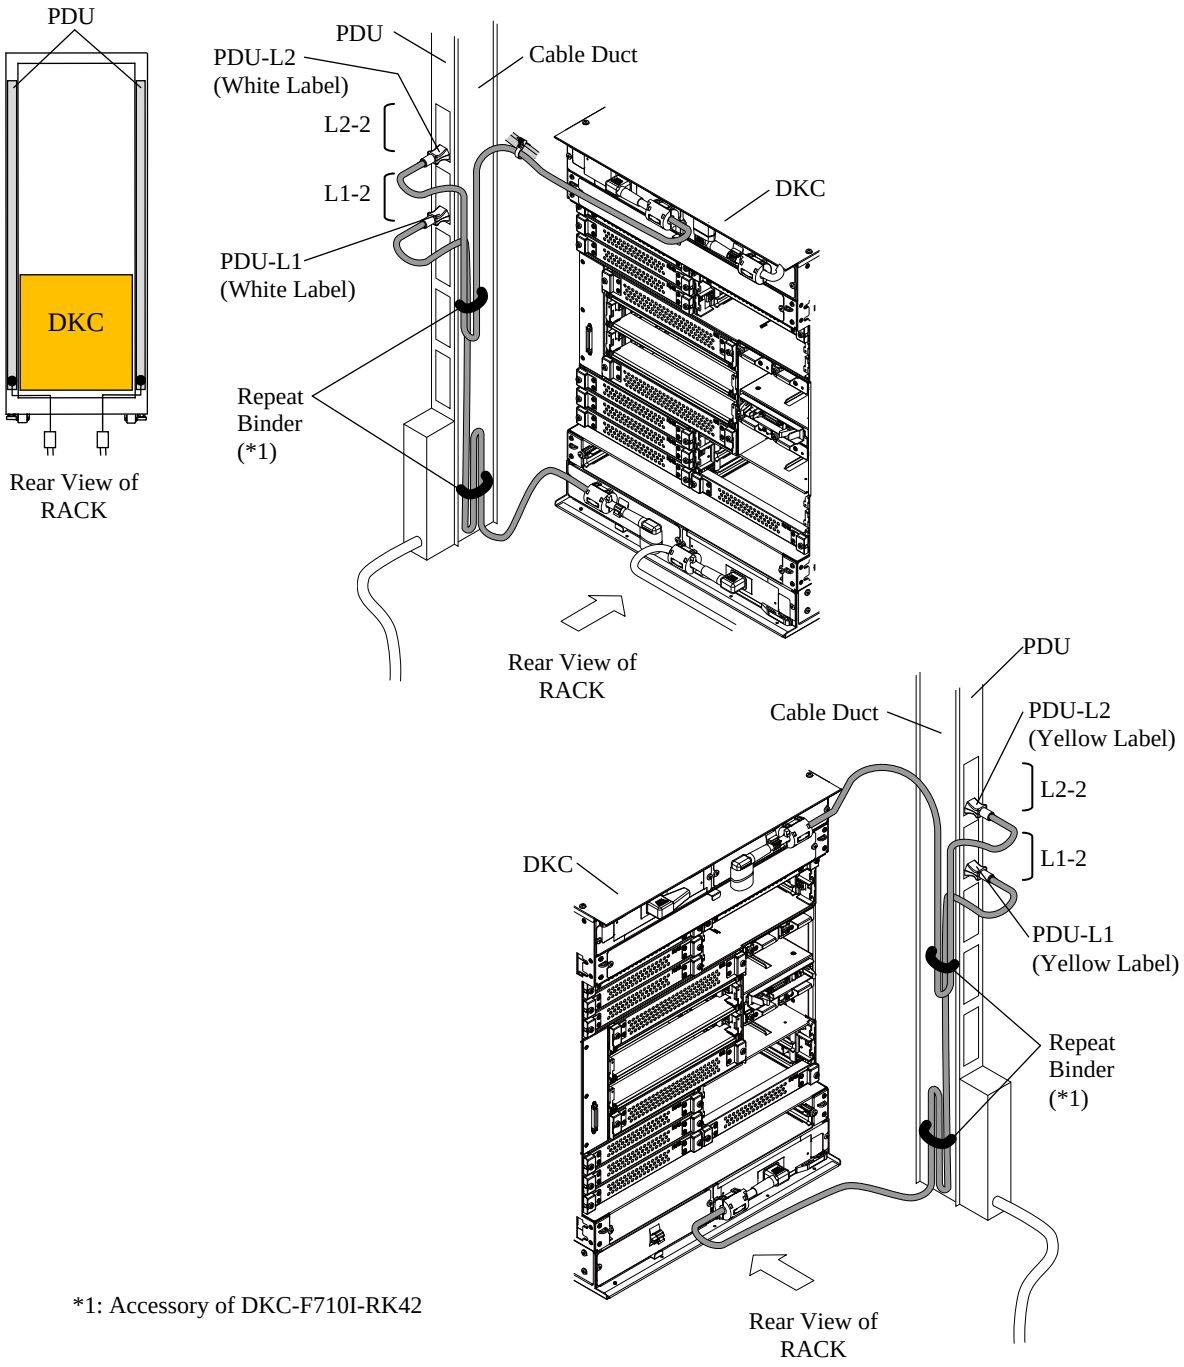
Copyright © 2010, 2011, Hitachi, Ltd.

4. Connection of Cables (PDU Side)

Pattern A: HP Model S1316

a. Connect the four cable ASSYs on the PDUs, and bundle them with the retention bands that are the accessory of the PDUs.
b. Secure the four cable ASSYs on the cable ducts with the repeat binders.



*1: Accessory of DKC-F710I-RK42

Copyright © 2011, Hitachi, Ltd.

b. Secure the four cable ASSYs with the clamp tapes.

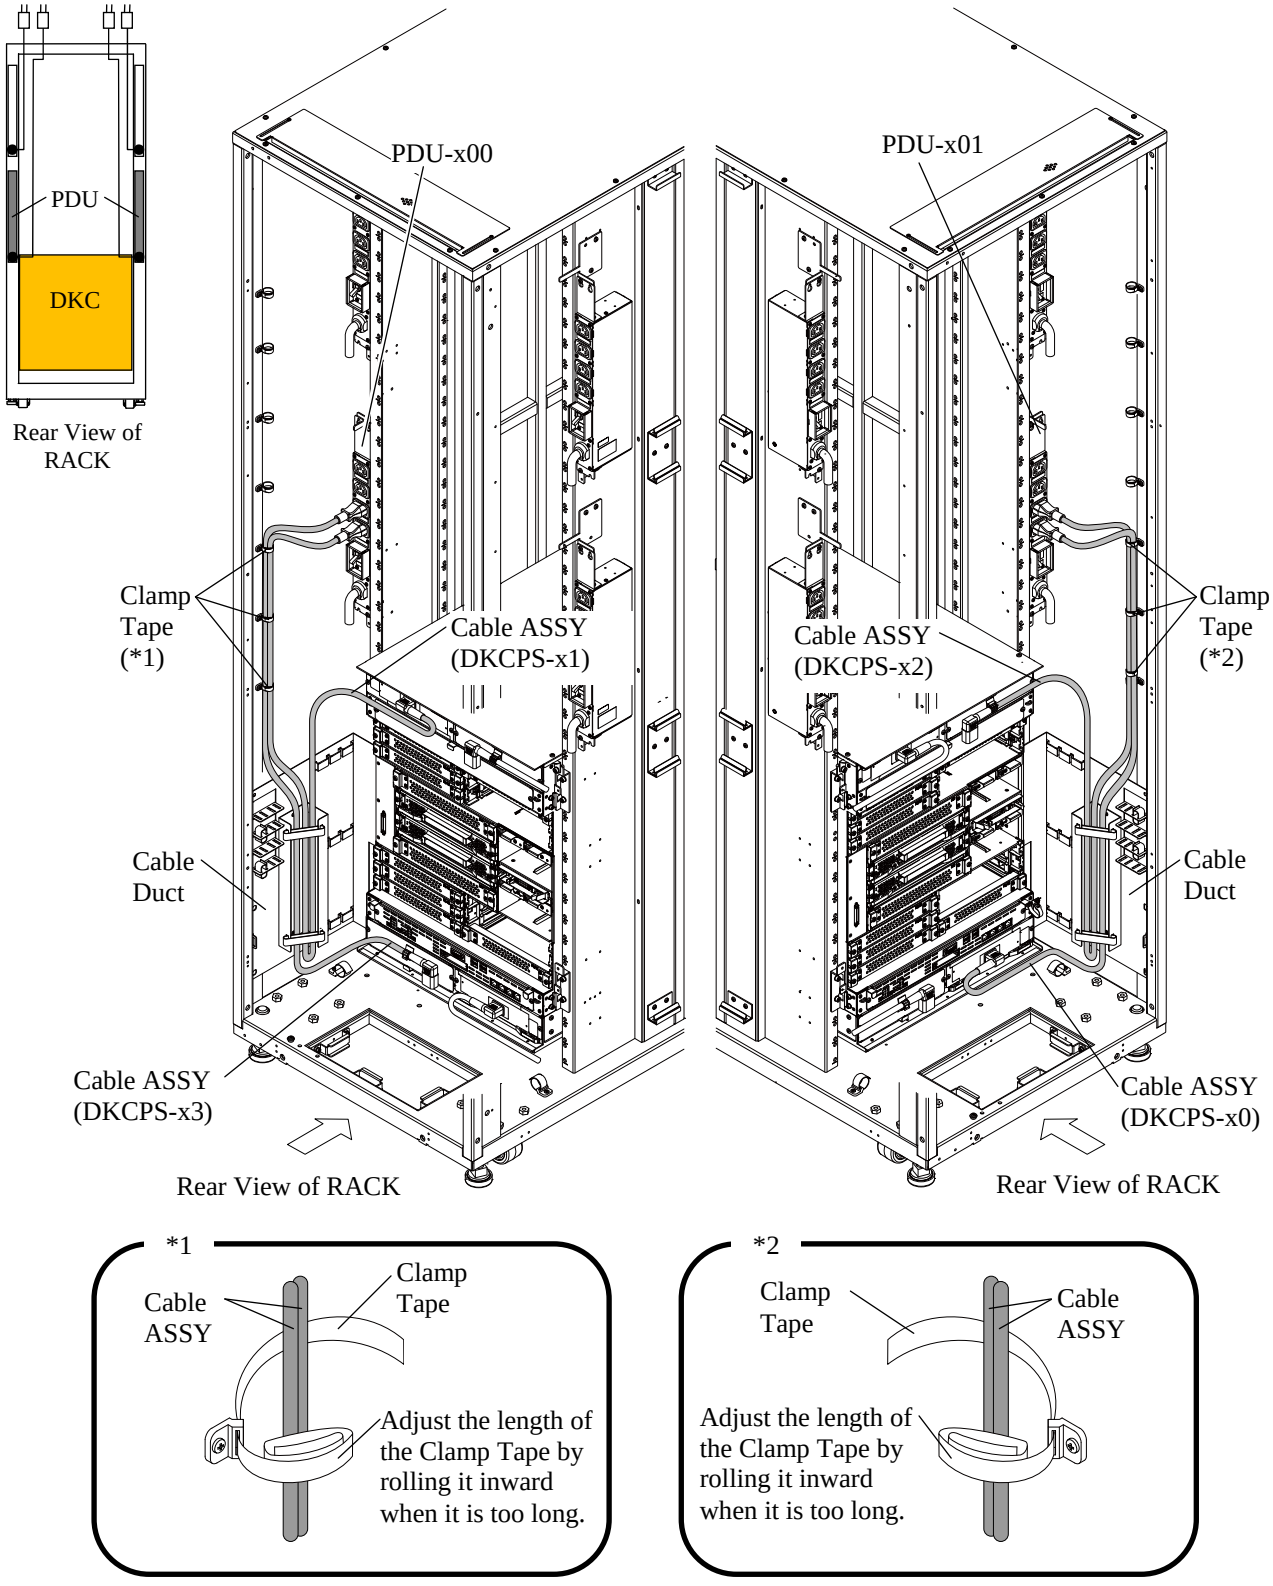

Fig. 3.6.1-9B Fixation of Cables

Copyright © 2010, Hitachi, Ltd.

5. Attachment of EMI Cores
   a. Attach the four EMI cores to the four cable ASSYs.

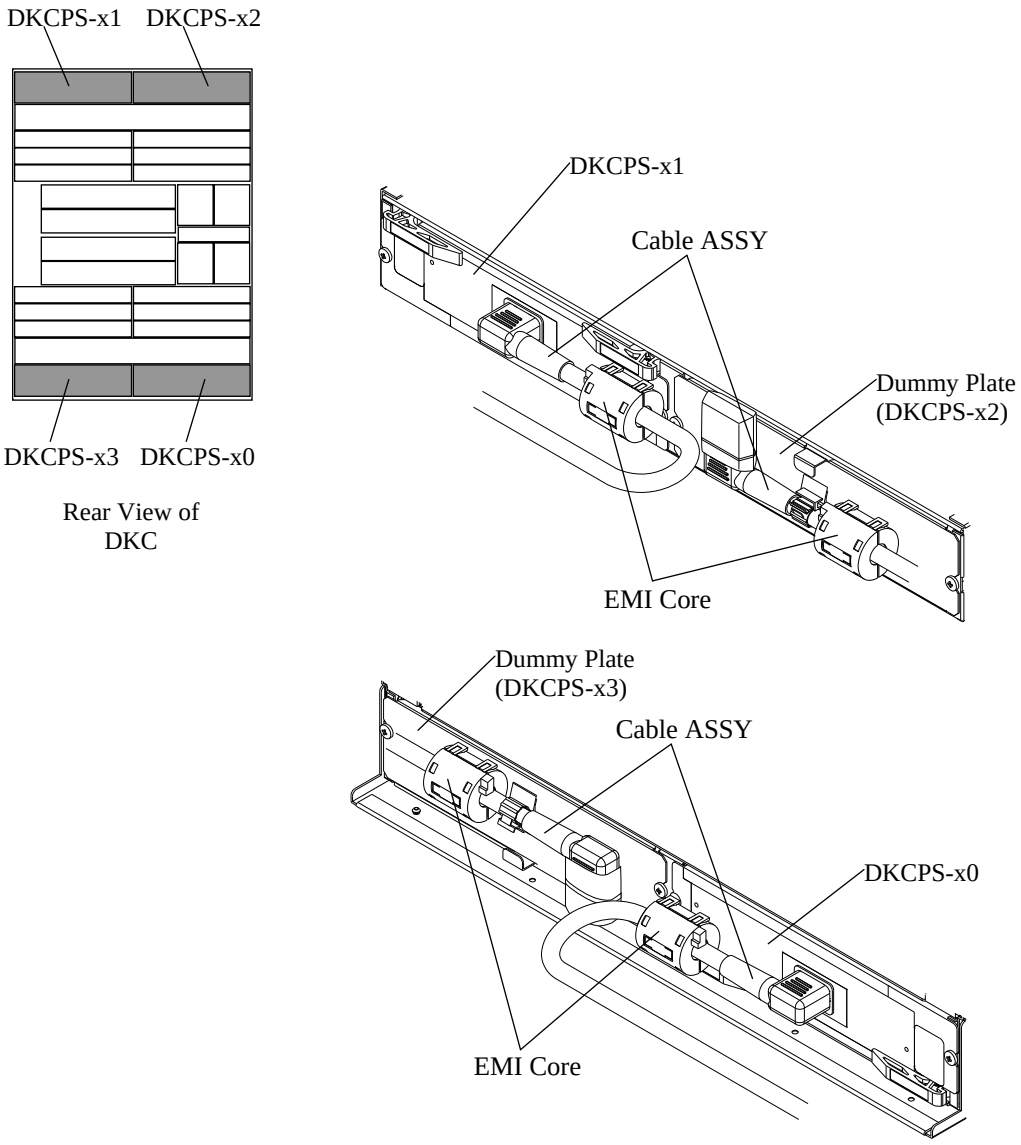

Fig. 3.6.1-10 Attachment of EMI Cores

Copyright © 2010, Hitachi, Ltd.

6. Attachment of Nameplate
   a. Remove the screw from the rack frame and remove the nameplates.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplates with the screw.

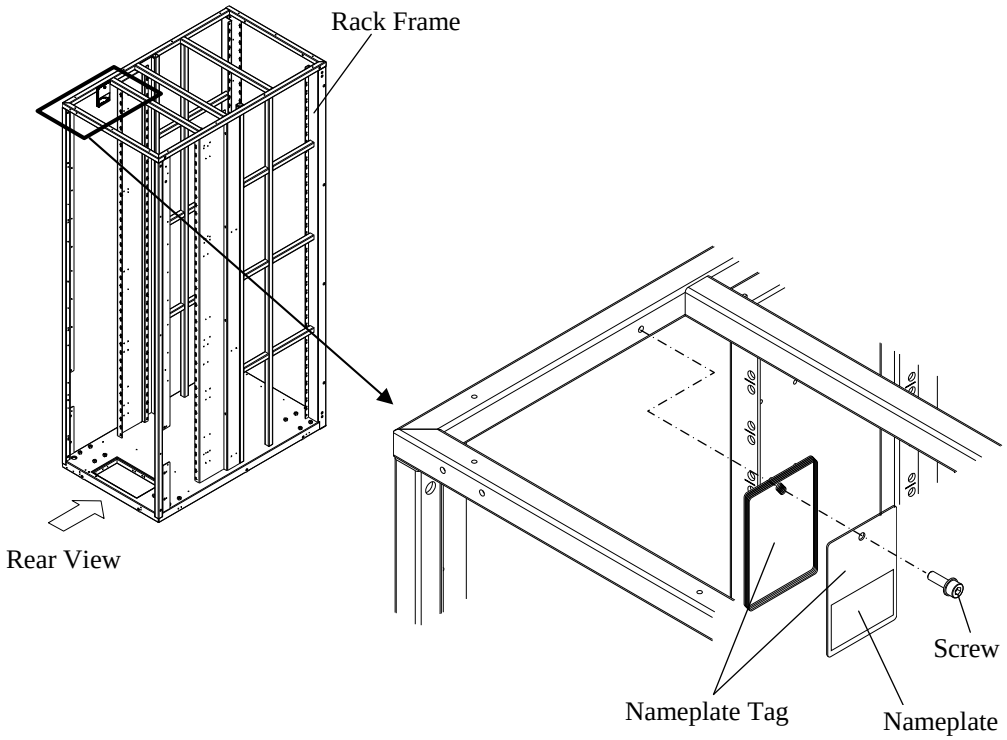

Fig. 3.6.1-11 Attachment of Nameplate

   d. Return to the working table and do the rest of the work.
   New Installation: INST02-10
   Non-Disruptive Installation: INST02-40

3. Connection of Cables (DKU Side)
   a. Loosen the four screws of the front and rear side of the DKU, and remove the two stoppers.

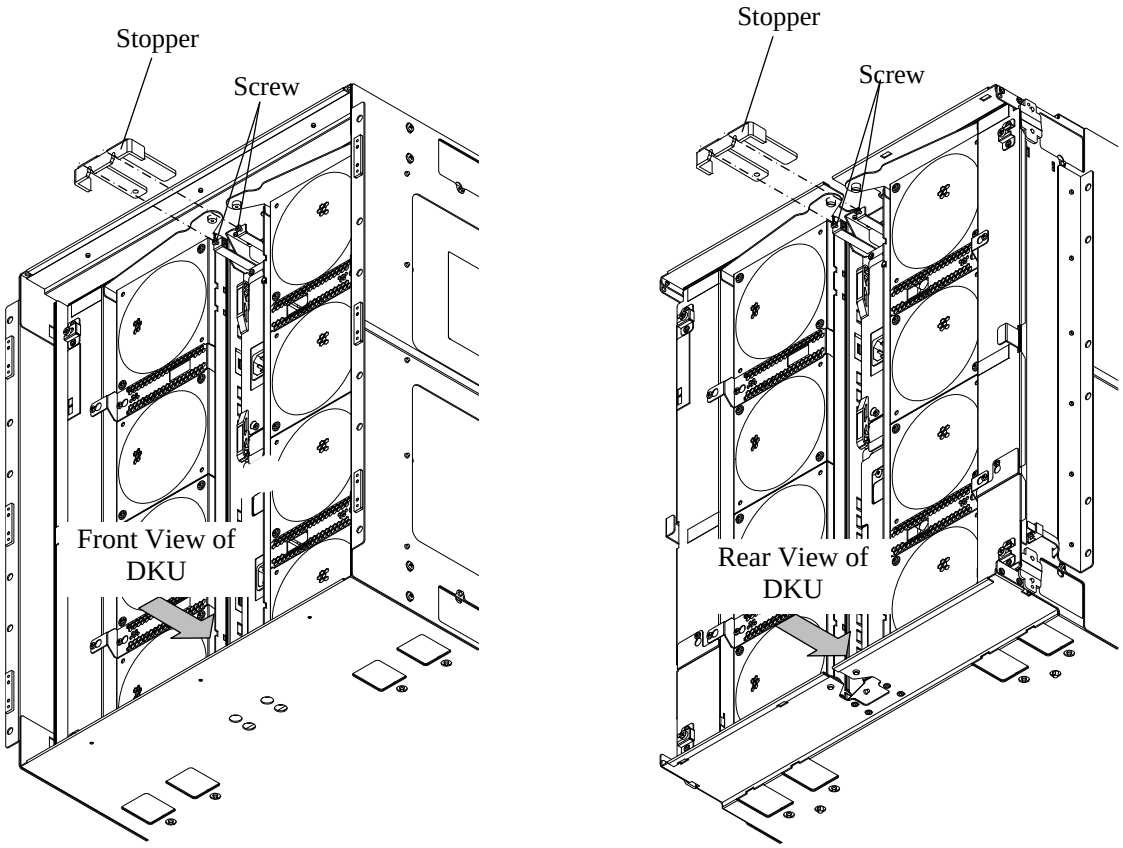

Fig. 3.6.2-4 Removal of Stoppers

Copyright © 2010, Hitachi, Ltd.

b. Loosen the four screws of the front side of the DKU, and open the two FAN doors.

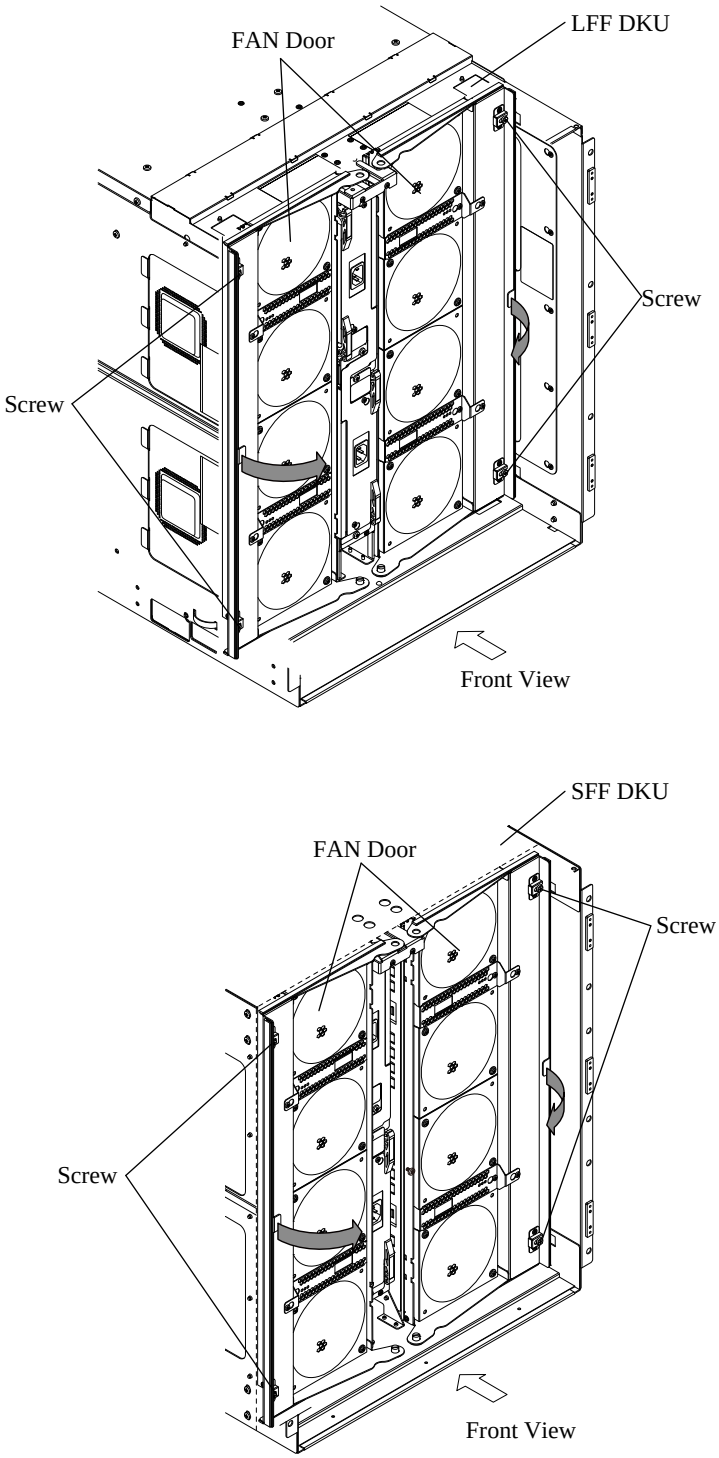

Fig. 3.6.2-5 FAN Door Opening

Copyright © 2010, Hitachi, Ltd.

c. Loosen the four screws of the rear side of the DKU, and open the two FAN doors.

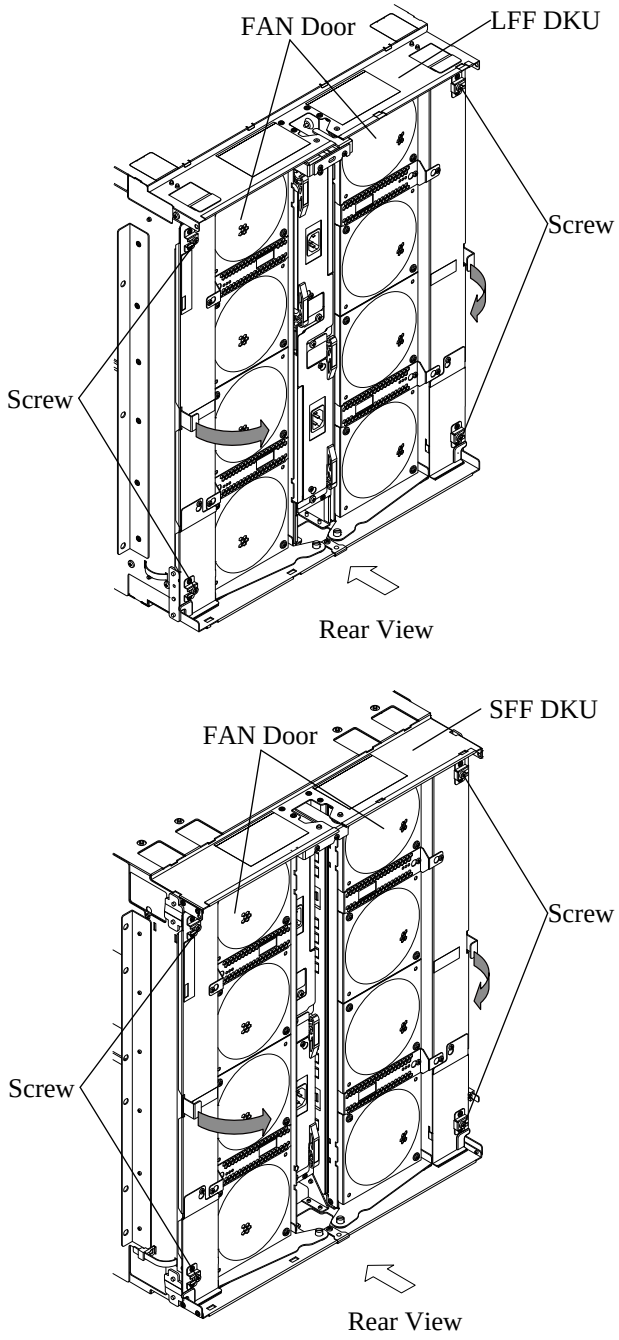

Fig. 3.6.2-6 FAN Door Opening

Copyright © 2010, Hitachi, Ltd.

d. Insert the cable ASSYs to the front side of the DKU and pull out the cable ASSYs from the rear side of the DKU.
When the cables are caught on the way, either retry of the insertion several times or insert your fingers into the clearance of the cable ducts from the rear side of DKU and pull the cables out.

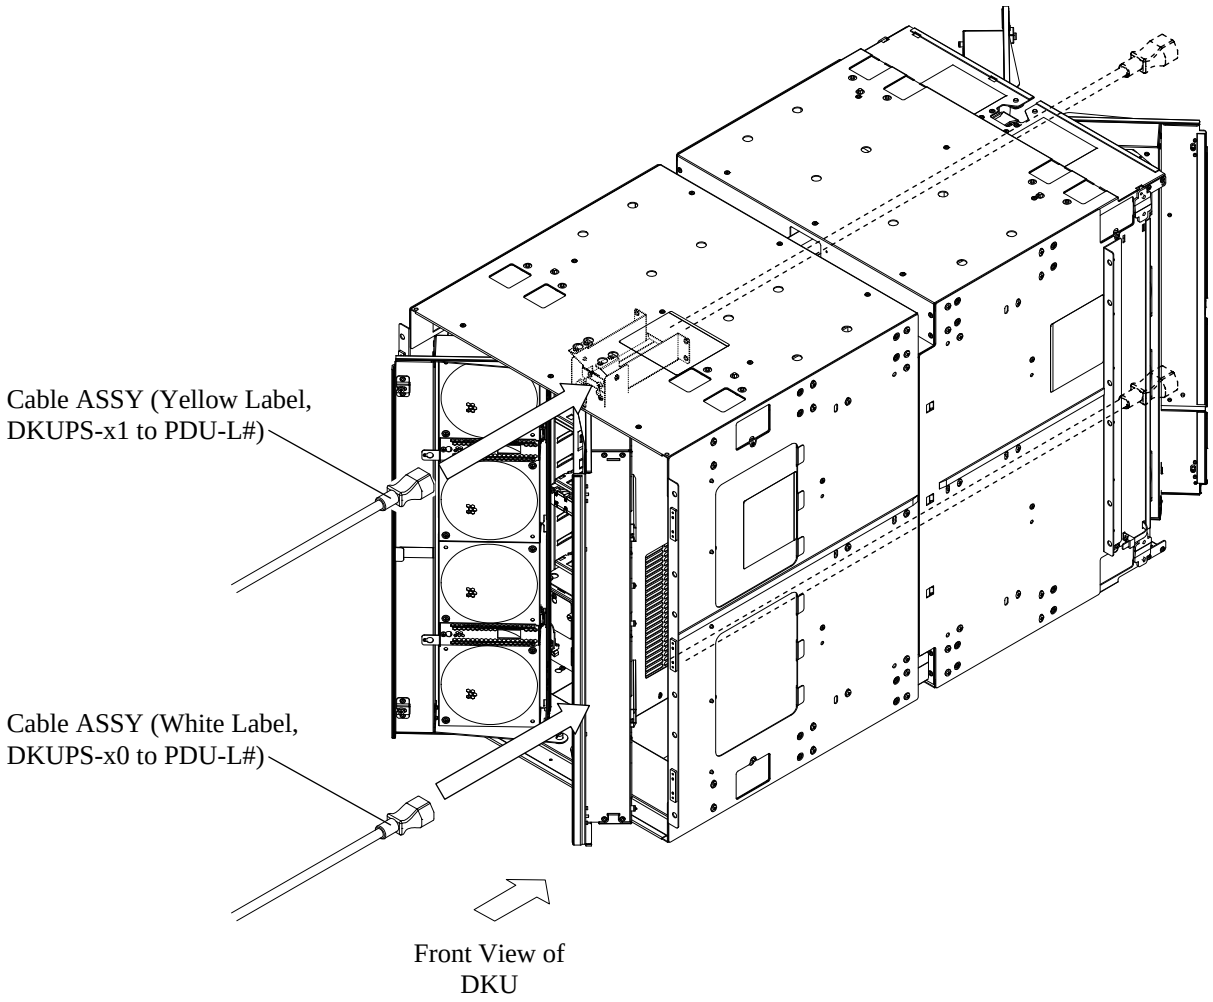

Fig. 3.6.2-7 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

e. Connect the cable ASSYs to the DKUPS and fix them with the stoppers.

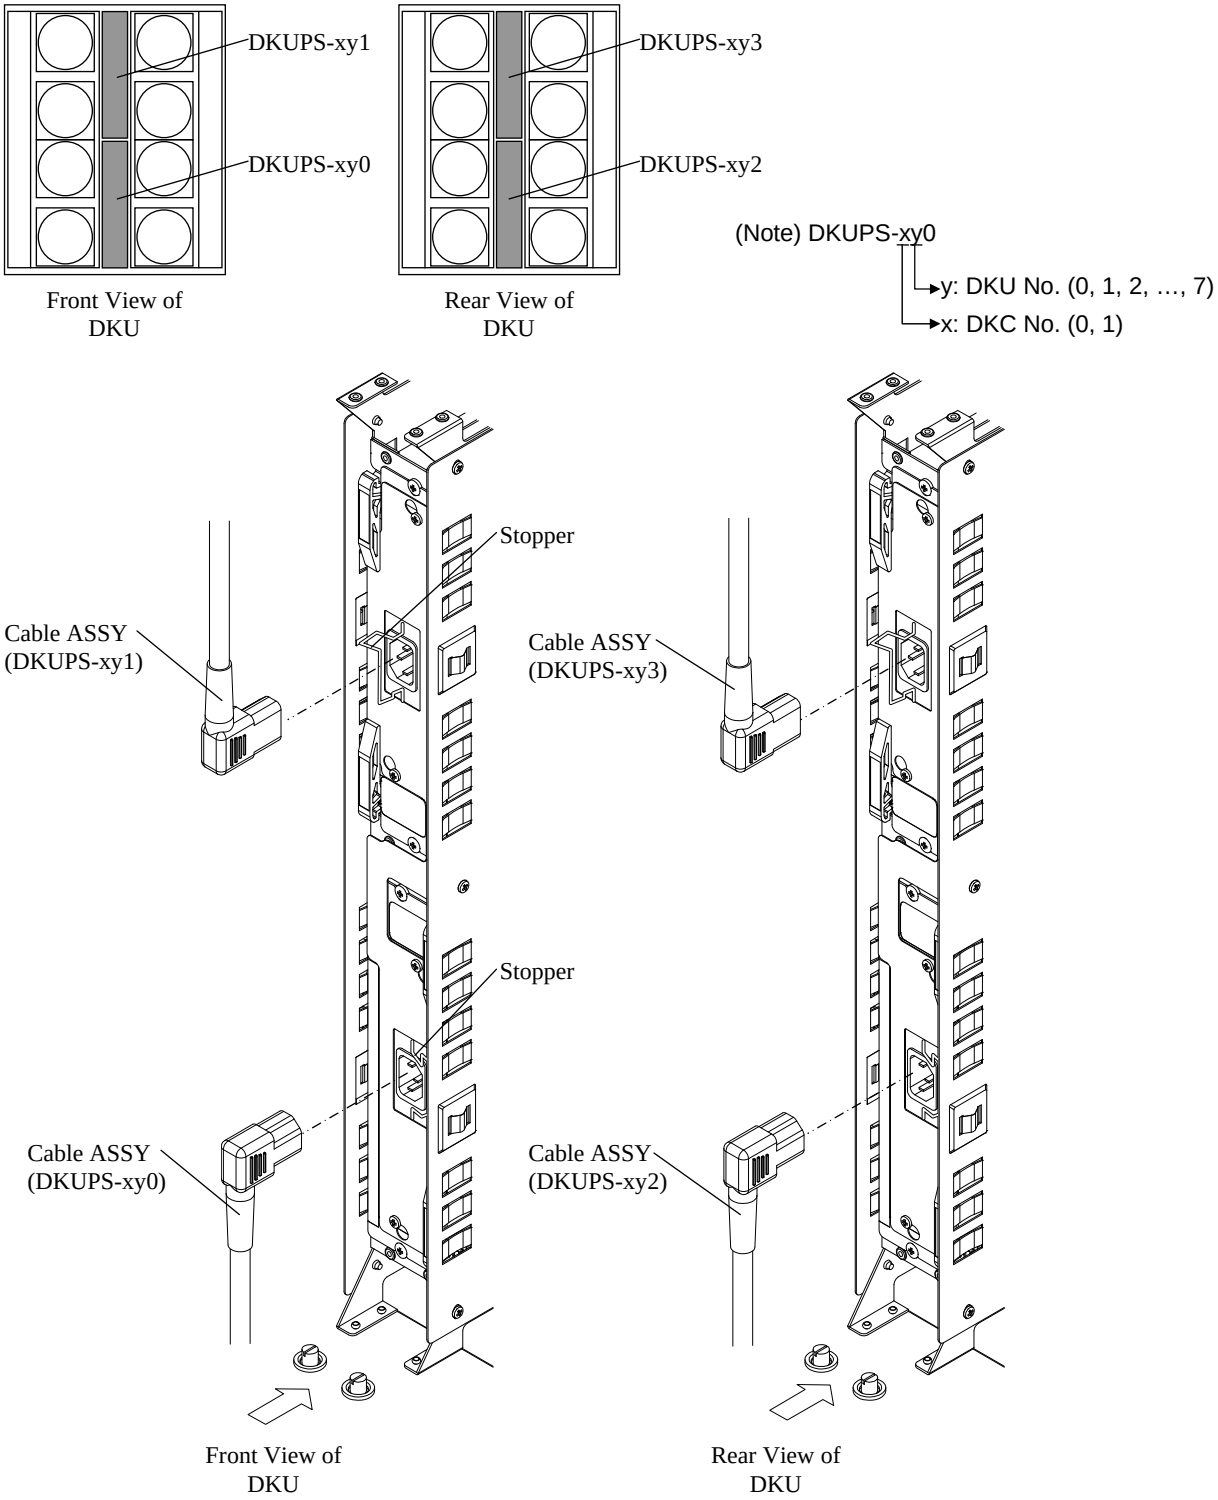

Fig. 3.6.2-8 Connection of Cables

Copyright © 2010, Hitachi, Ltd.

f. When wiring the cables to the DKU-00 or DKU-10, loosen the two screws and displace the tray to downward.
Proceed to the step “g” when wiring the cables to other DKU.

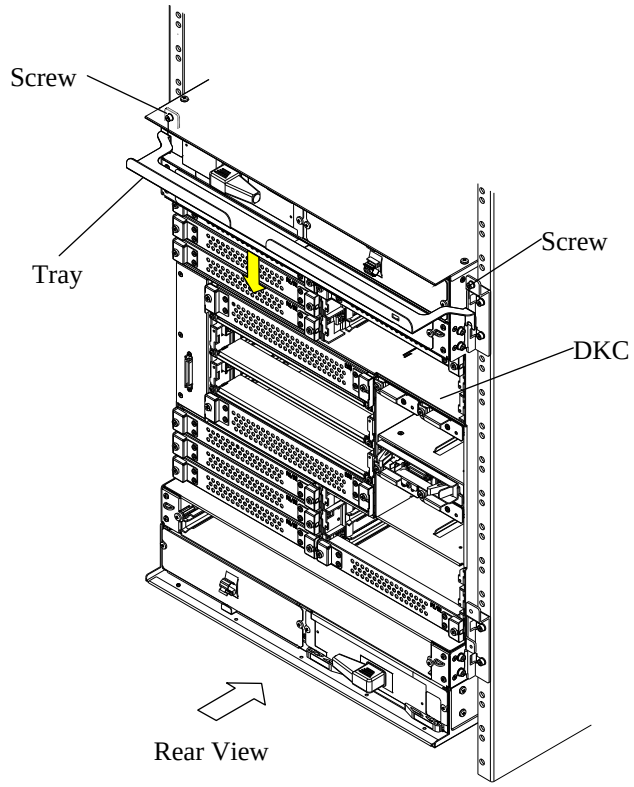

Fig. 3.6.2-9 Removal of Tray

Copyright © 2010, Hitachi, Ltd.

g. Attach the four cable ASSYs to the rear side of the DKU and fix them with the four repeat binders.
   Push the tip of repeat binders into the clearance of the upper or lower part of the DKU to avoid obstructing the door opening/closing.
h. If the tray is displaced according to the step “f”, put the tray back into place, and secure it with the two screws.

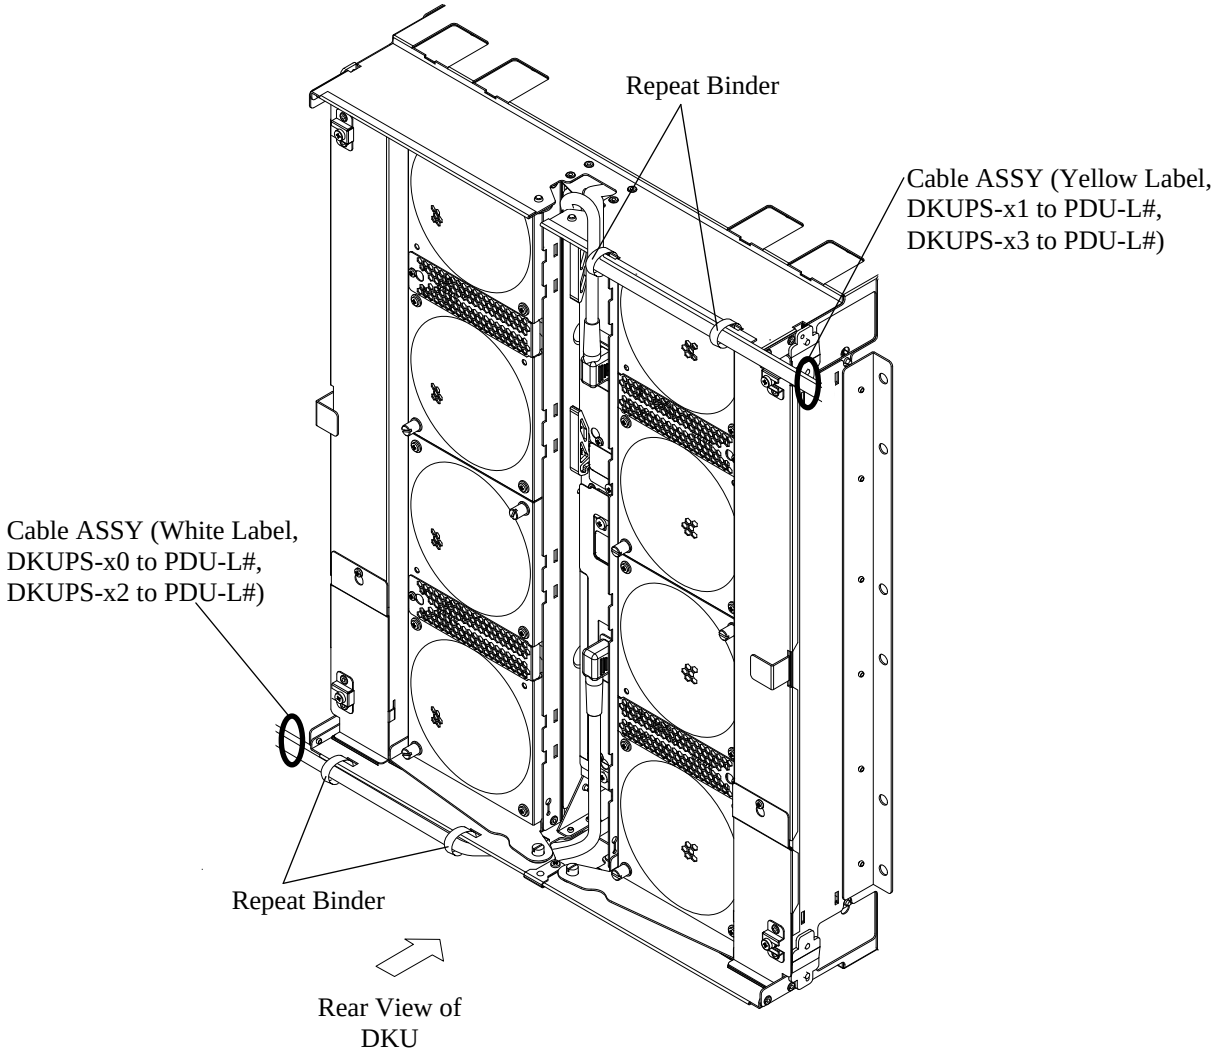

Fig. 3.6.2-10 Fixation of Cables

Copyright © 2010, Hitachi, Ltd.

i. Install the four EMI Cores on the cable ASSYs of DKUPSs.
j. Close the four FAN doors of the front and rear side of DKU, and tighten the eight screws.
k. Install the two stoppers on the front and rear side of DKU, and tighten the four screws.

Pattern E: ITPD Model PDU30P/PDU30F

The system installed with the PDU30A has different ways of connecting power cables depending on the system configuration. There are the following six ways of connecting power cables.

- One way if the DKC-F710I-FBX is installed in the lower part of the system
- Two ways if the DKC-F710I-FBX is installed in the middle part of the system
- Three ways if the DKC-F710I-FBX is installed in the upper part of the system

Confirm the system configuration, and then implement the work, referring to the procedures corresponding to the following table.

Table 3.6.3-2 The List of the Ways of Connecting Power Cables

	RACK-00/10	RACK-01/11	RACK-02/12	Procedure
Lower Part	—			f. (INST03-06-670 to 680)
Middle Part ①				a. (INST03-06-560 to 570)
Middle Part ②	—			b. (INST03-06-580 to 590)

(To be continued)

3.7 Installation of Processor Blade, HUB Kit, PCI Express Switch Adapter, Inter-Controller Connecting Kit and Additional Controller PS (DKC-F710I-MP/MPR/HUB/ESW/MDEXC/APC)

Notes when installing the DKC710I-CBXB/CBXH:

CPCs (CACHE board) are contained in a CBXB/CBXH, however MPBs and ESWs are installed in the unit first in the installation procedure of the additional CBXB/CBXH. Therefore, red LEDs (LOC03-30) of CPCs light when the additional CBXB/CBXH is installed with CPCs (CACHE board). Lighting of red LEDs is acceptable until the CPCs are installed in the next step.
Please note that an installation for the additional CPC, CHA, DKA, HDD and so on at the same time as CBXB/CBXH must be executed in steps as follows.

Notes when installing Processor Blade:

Installing a Processor Blade may affect I/O when there is much write pending data in cache. We recommend to install a Processor Blade when all the cache write pending rate per CLPR in a Processor Blade is less than 40%.

[Installation Sample]

Step1: Installation of Controller Chassis (DKC710I-CBXB/CBXH) INST03-04-10
Step2: Installation of Processor Blade, HUB Kit, PCI Express Switch Adapter, Inter-Controller Connecting Kit and Additional Controller PS (DKC-F710I-MP/MPR/HUB/MDEXC/ESW/APC)..... INST03-07-10
Step3: Installation of Additional Cache Memory (DKC-F710I-C16G/C16GR/C32G/C32GR/CPC/BM64/BM128)..... INST03-10-10
Step4: Installation of Channel Adapter (DKC-F710I-16MFS/16MFL/8UFC/8UFCR/16UFC/16UFCR/16MUS/16MUSR/16MUL/8FOE)..... INST03-08A-10
Step5: Installation of Drive Chassis (DKC-F710I-UBX/SBX)..... INST03-05-10
Step6: Installation of Disk Adapter, PCI Express Switch Adapter, DEV Interface Cable and Drive INST03-12-10

Operate the step 1 to 3 when installing only the additional CBXB/CBXH.
For the installation of the additional CHA/DKA/HDD at the same time as the CBXB/CBXH, operate sequentially the step 4 to 6 after finishing the step 1 to 3.
Installing the additional parts for the step 4 to 6 at the same time as the step 1 to 3 is not possible.
Red LEDs for each part light when the parts mentioned above are installed at the same time.
In this case, remove the part at its related operation step and follow the correct procedures to reinstall it.

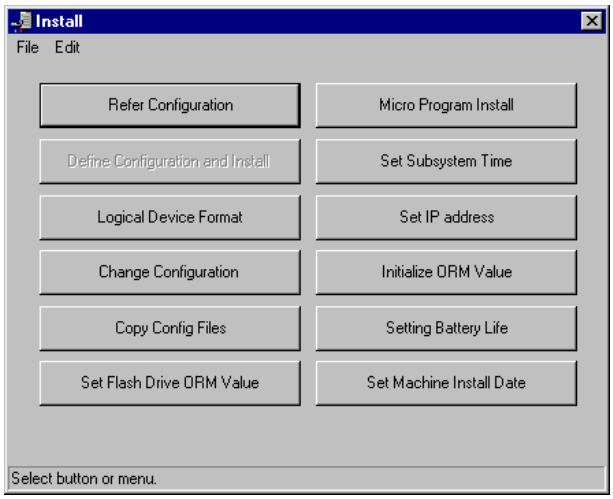
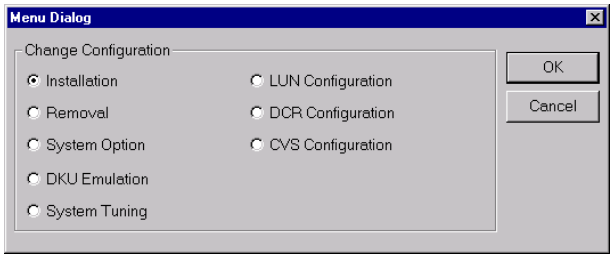
1. Setting up the New Device Structure Information

(1) <Mode Change>
Change the mode to Modify Mode.
Select (CL) [Install].

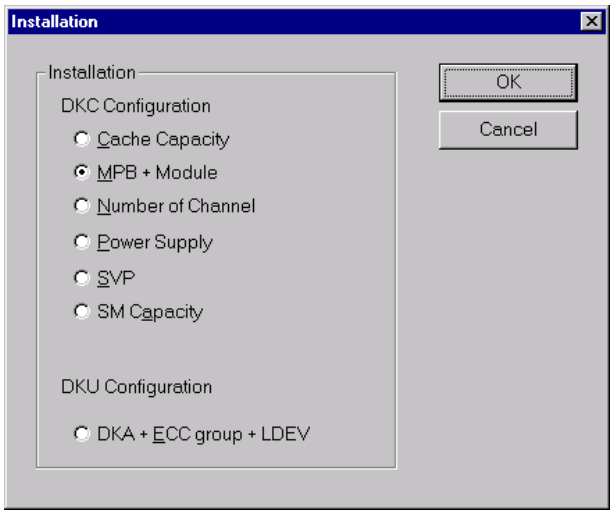
(2) <Start the 'Menu Dialog' screen>
Select (CL) [Change Configuration].



(3) <Start Device Structure Setup screen>
Select (CL) [Installation] in the 'Menu Dialog' dialog box and select (CL) [OK].



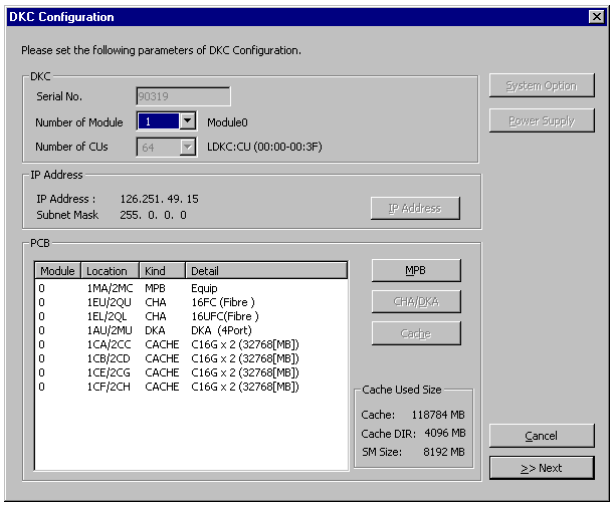
(4) <Select a part to be changed>
Select (CL) [MPB + Module], and select (CL) [OK].



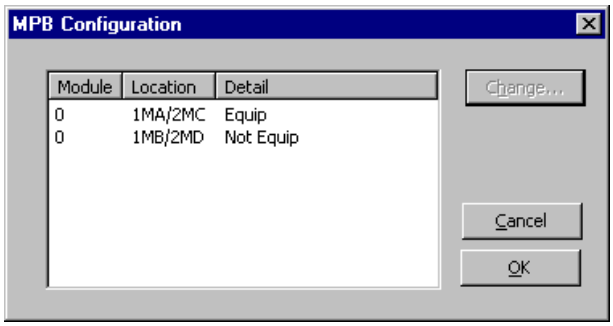
Copyright © 2010, Hitachi, Ltd.

(5) <DKC Configuration screen>
In the 'DKC Configuration' screen, when installation of the Module is required, with [Number of Module], select the number of modules from a pull down menu.
When installation of the MPB is required too, select (CL) [MP PCB].
Go to Step (6).

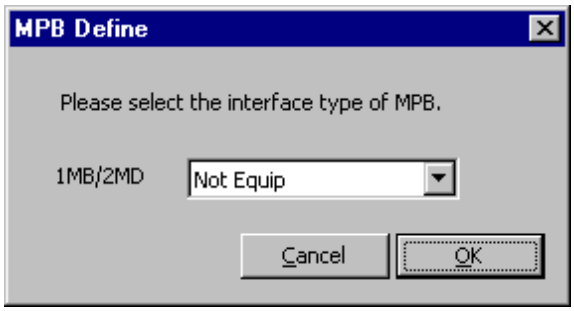
After the setting is completed, select (CL) [>>Next].
(Go to Step (8))
In the case of selecting (CL) [Cancel], this operation procedure terminates.



(6) <MPB Configuration screen>
In the 'MPB Configuration' screen, select the location(s) to which the addition is to be made, and select (CL) [Change...].
Go to Step (7).
Make sure that the entry that has been made is correct and select (CL) [OK].
Go back to Step (5).



(7) <MPB Define screen>
In the 'MPB Define' screen, select (CL) [Equip].
After the setting is completed, select (CL) [OK].
Go back to Step (6).

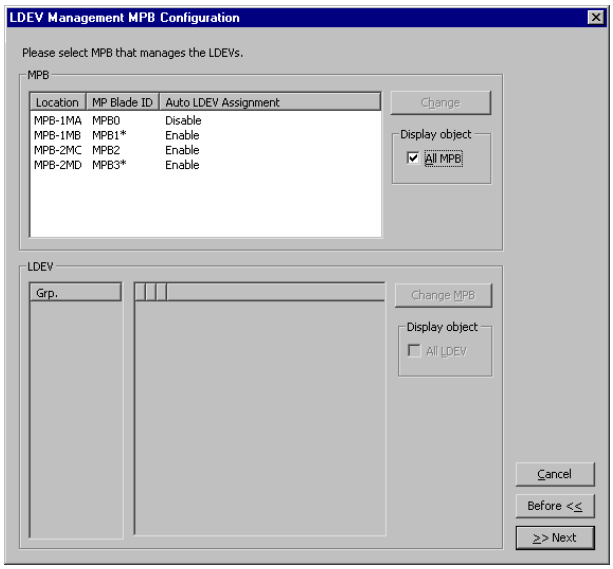


Copyright © 2010, Hitachi, Ltd.

(8) <LDEV Management MPB Configuration screen>

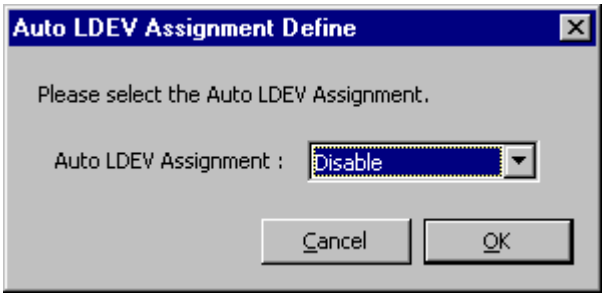
In the 'LDEV Management MPB Configuration' screen, select installed MPB and select (CL) [Change].
Go to Step (9).

After the setting is completed, select (CL) [>>Next].
(Go to Step 2)
In the case of selecting (CL) [Cancel], this operation procedure terminates.



(9) <Auto LDEV Assignment Define screen>

In the 'Auto LDEV Assignment Define' screen, select (CL) [Auto LDEV Assignment].
After the setting is completed, select (CL) [OK].
Go back to Step (8).

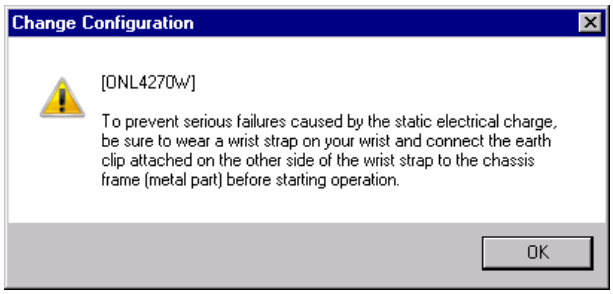


Copyright © 2010, Hitachi, Ltd.

2. SVP pre procedure (HUBBOX Installation)

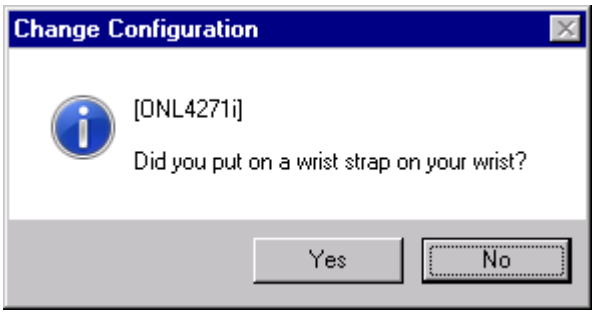
(1) <Wear a wrist strap>

Select (CL) [OK] in response to "To prevent serious failures caused by the static electrical charge, be sure to wear a wrist strap on your wrist and connect the earth clip attached on the other side of the wrist strap to the chassis frame (metal part) before starting operation.".



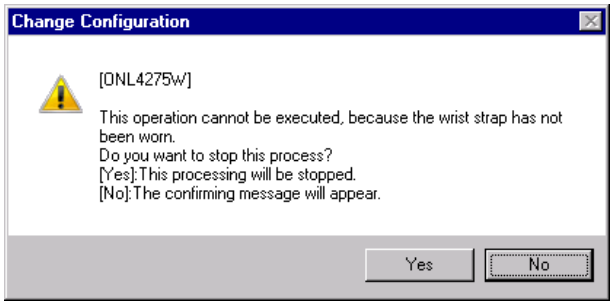
(1)-1 <Confirm wearing wrist strap>

In response to a message, "Did you put on a wrist strap on your wrist?".
Select [Yes] when wrist strap is on your wrist.
Select [No] when there is no wrist strap on your wrist.
When [No] is selected (CL), go to Step (1)-2.



(1)-2

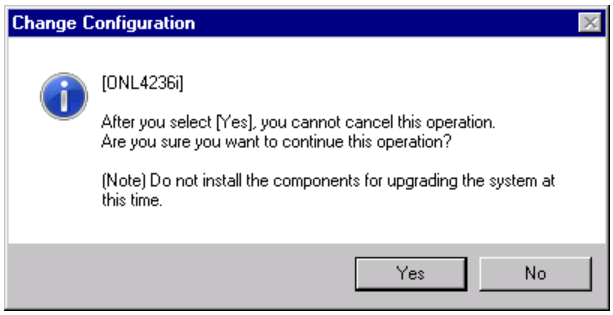
In response to a message, "This operation cannot be excuted, because the wrist strap has not been worn. Do you want to stop this process?
[Yes]: This processing will be stopped.
[No]: This confirming message will appear."
When [Yes] is selected (CL), the routine is returned to Step (2) on page INST03-07-30.
When [No] is selected (CL), returned to Step (1).



Copyright © 2010, 2012, Hitachi, Ltd.

(2) <Starting the addition>

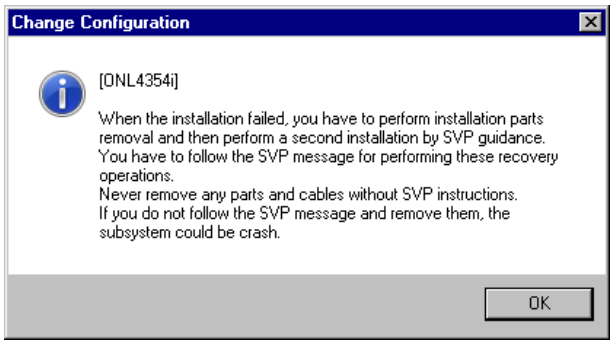
In response to a message, “After you select [Yes], you cannot cancel this operation. Are you sure you want to continue this operation?
(Note) Do not install the components for upgrading the system at this time.”, select (CL) [Yes].
When [No] is selected (CL), the routine is returned to Step (2) on page INST03-07-30.



---

(3) <Confirm>

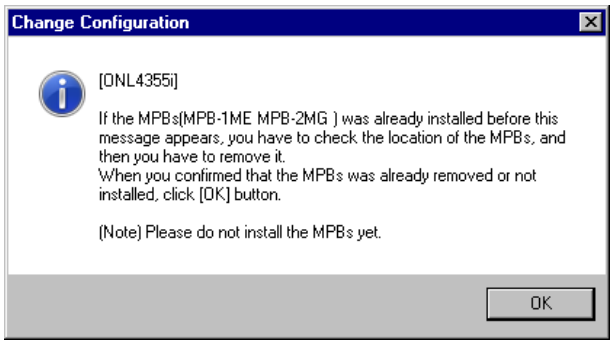
When installation of the Module is required, select (CL) [OK] in response to “When the installation failed, you have to perform installation parts removal and then perform a second installation by SVP guidance. You have to follow the SVP message for performing these recovery operations. Never remove any parts and cables without SVP instructions. If you do not follow the SVP message and remove them, the subsystem could be crash.”



---

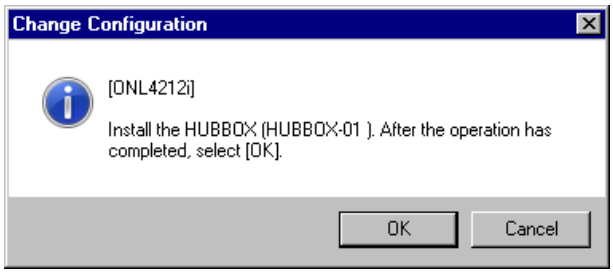
(4) <Confirm removing MPB>

When installation of the Module is required, select (CL) [OK] in response to “If the MPBs(MPB-nnn MPB-nnn) was already installed before this message appears, you have to check the location of the MPBs, and then you have to remove it. When you confirmed that the MPBs was already removed or not installed, click [OK] button.
(Note) Please do not install the MPBs yet.”

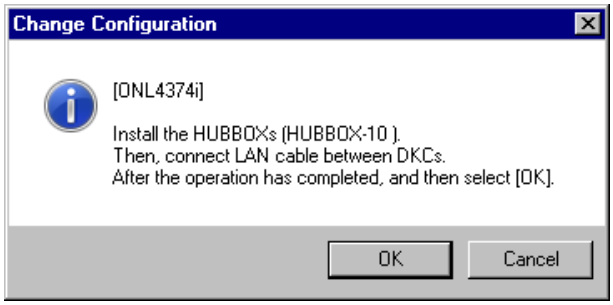


Copyright © 2012, 2014, Hitachi, Ltd.

(5) <HUBBOX Installation Operation>
When installation of the HUBBOX is required, a message, “Install the HUBBOX (HUBBOX-nn). After the operation has completed, select [OK].” is displayed.



When installation of the Module is required, a message, “Install the HUBBOXs (HUBBOX-nn). Then, connect LAN cable between DKCs. After the operation has completed, and then select [OK].” is displayed.



- When the message is displayed, install the hardware component following the procedure for installing the HUB Kit.
- When the message is not displayed, go to Step (2) in “5. SVP pre procedure (ESW Addition)”.

Note: Do not select (CL) [OK] by mistake before installing the part(s) to be added in the subsystem.

Copyright © 2010, 2014, Hitachi, Ltd.

3. Installation Procedure of HUB Kit

Installation Condition

The HUB Kit (DKC-F710I-HUB) is an indispensable option that is to be installed when the subsystem configuration is one of the following.

In case of DKC-0

① Addition of the first set (HUBBOX-01)
- This option should be installed when the second DKC-F710I-MP/MPR is installed. However, it is not necessary to install when two sets of the DKC-F710I-SVP are installed.

In case of DKC-1

① Addition of the first set (HUBBOX-10)
- Indispensable option for DKC710I-CBX
- Standard equipment for DKC710I-CBXB/CBXH (Included in DKC710I-CBXB/CBXH)

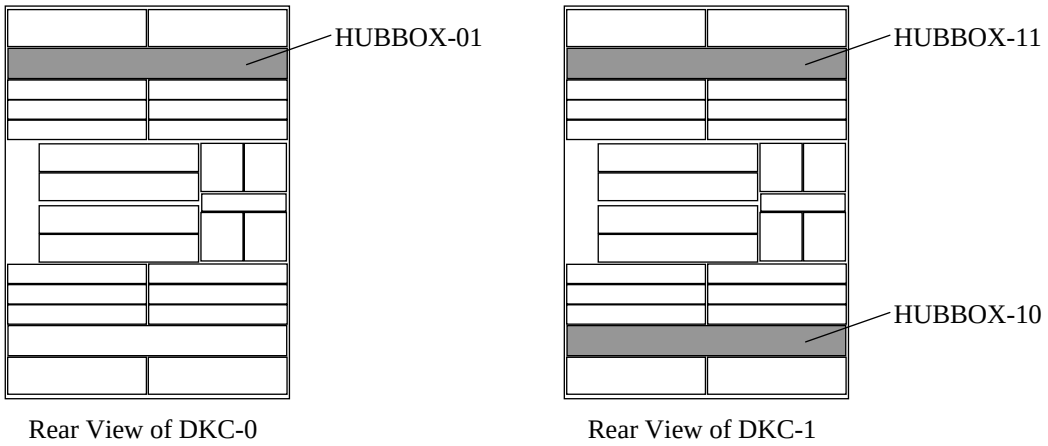
② Addition of the second set (HUBBOX-11)
- This option should be installed when the second DKC-F710I-MP/MPR is installed.

Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

Copyright © 2010, 2014, Hitachi, Ltd.

3-1 Installation of HUBBOX

a. Loosen the two screws of the HUBBOX slot and remove the dummy plate.



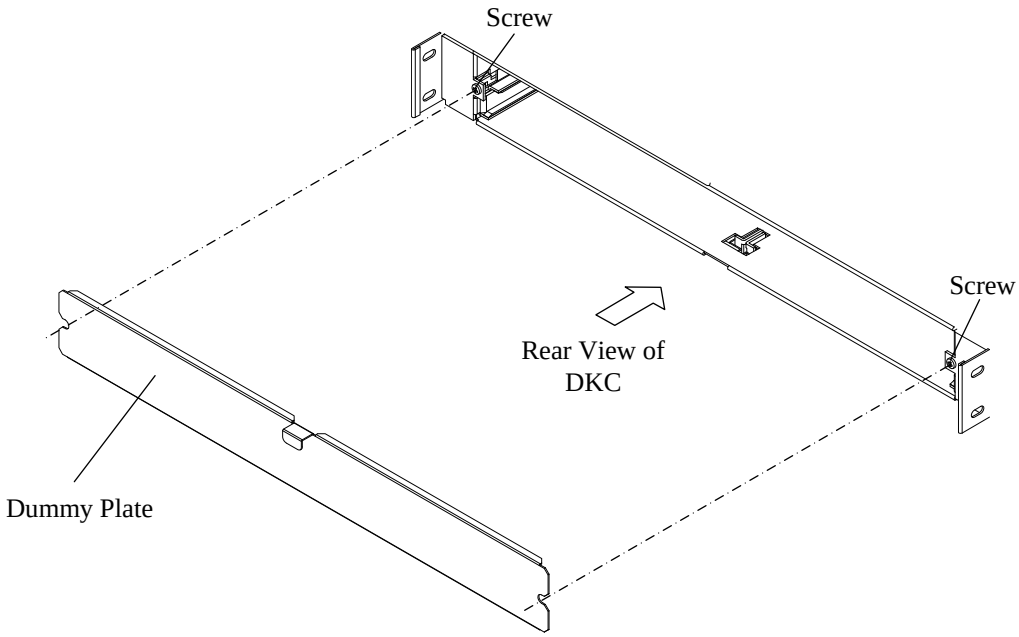


Fig. 3.7-1 Removal of Dummy Plate

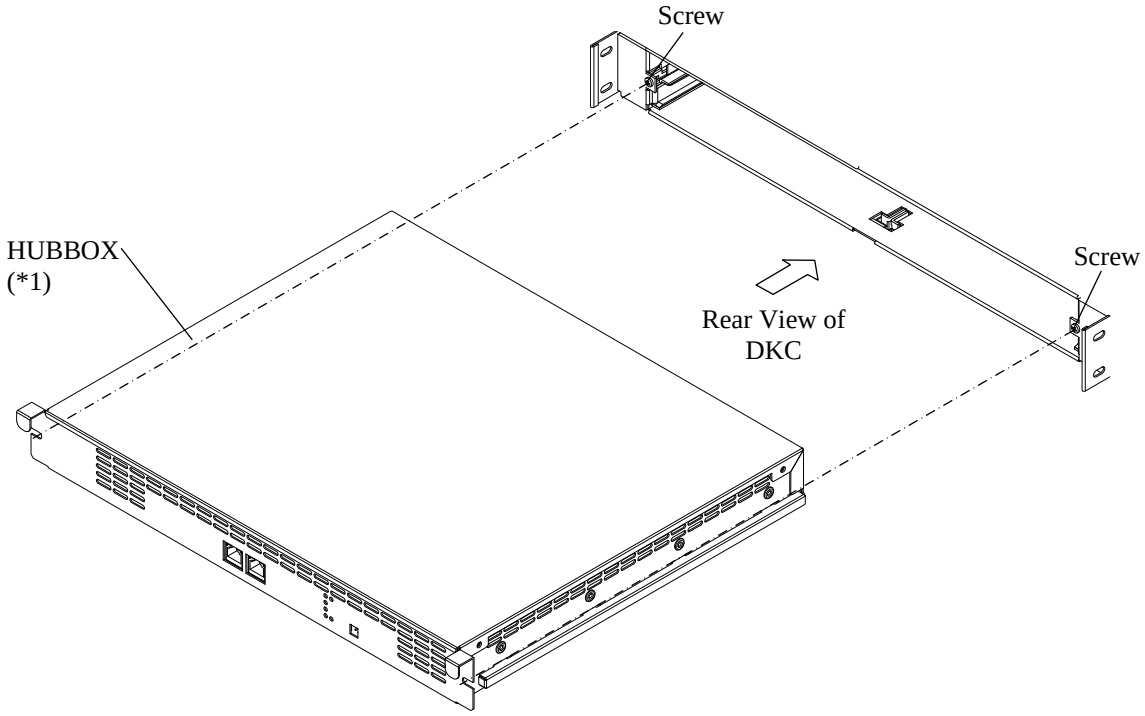
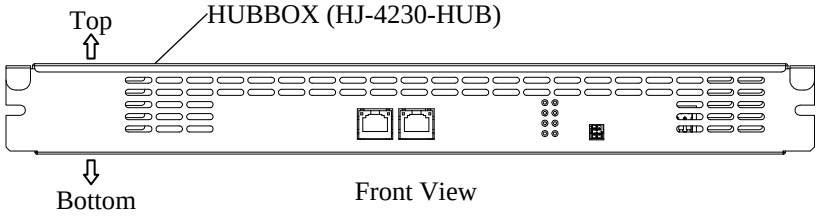
Copyright © 2010, 2011, Hitachi, Ltd.

b. Install the HUBBOX and fasten the two screws.
Note: Confirm the vertical direction of the HUBBOX. If the direction is wrong, the HUBBOX will not be ON.



*1: There are two types of HUBBOXes with different appearance. Either of them can be used because they are compatible with each other.



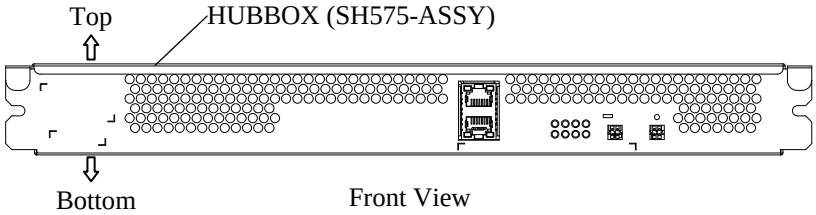


Fig. 3.7-2 Installation of HUBBOX

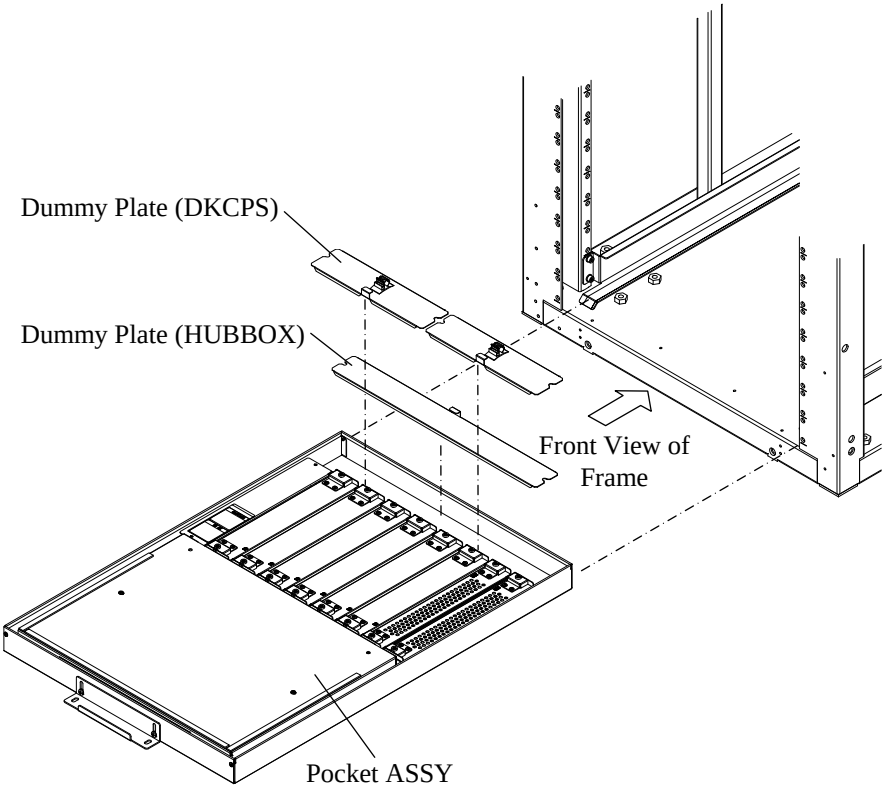
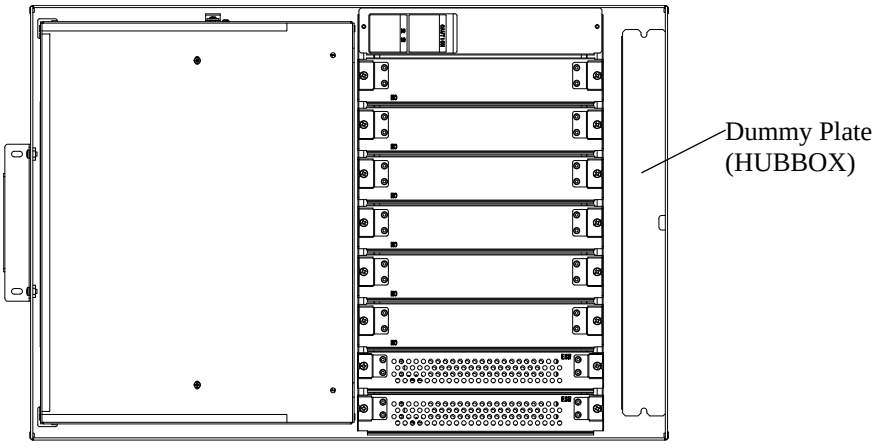
Copyright © 2010, Hitachi, Ltd.

3-2 Storage of Dummy Plate

a. Remove the pocket ASSY from the front of the frame.
b. Attach the removed dummy plates to the pocket ASSY.
c. Install the Pocket ASSY in the front of the frame.





Top View of Pocket ASSY

Fig. 3.7-3 Storage of Dummy Plate

Copyright © 2010, Hitachi, Ltd.

3-3 Attachment of the nameplate

a. Remove the screw from the rack frame and remove the nameplate tags.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

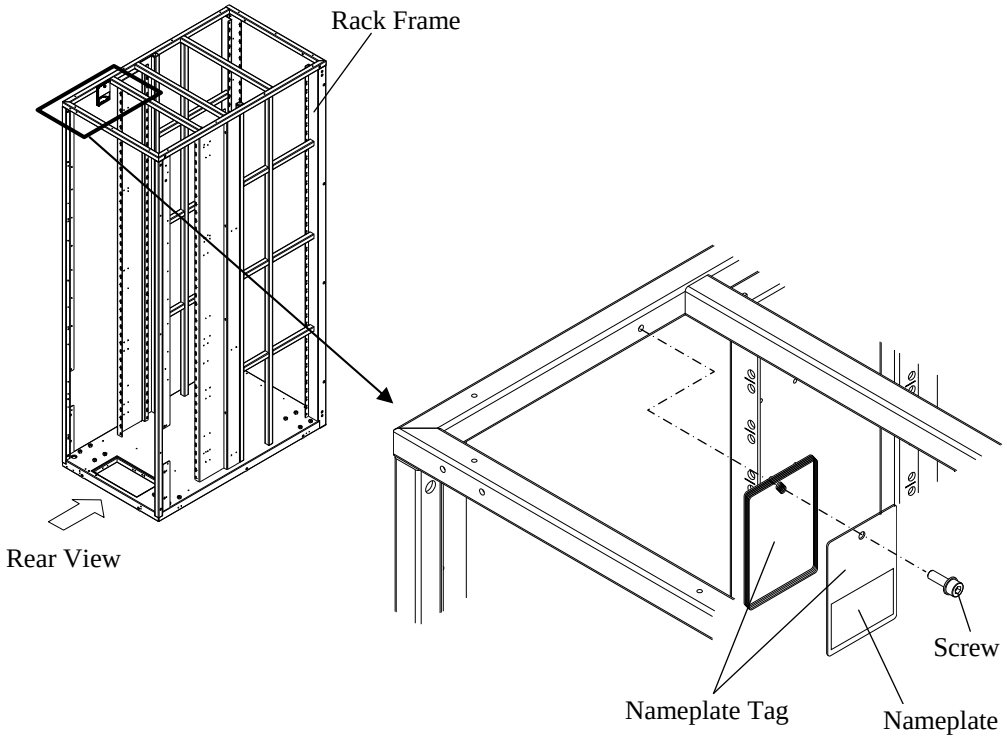


Fig. 3.7-4 Attachment of Nameplate

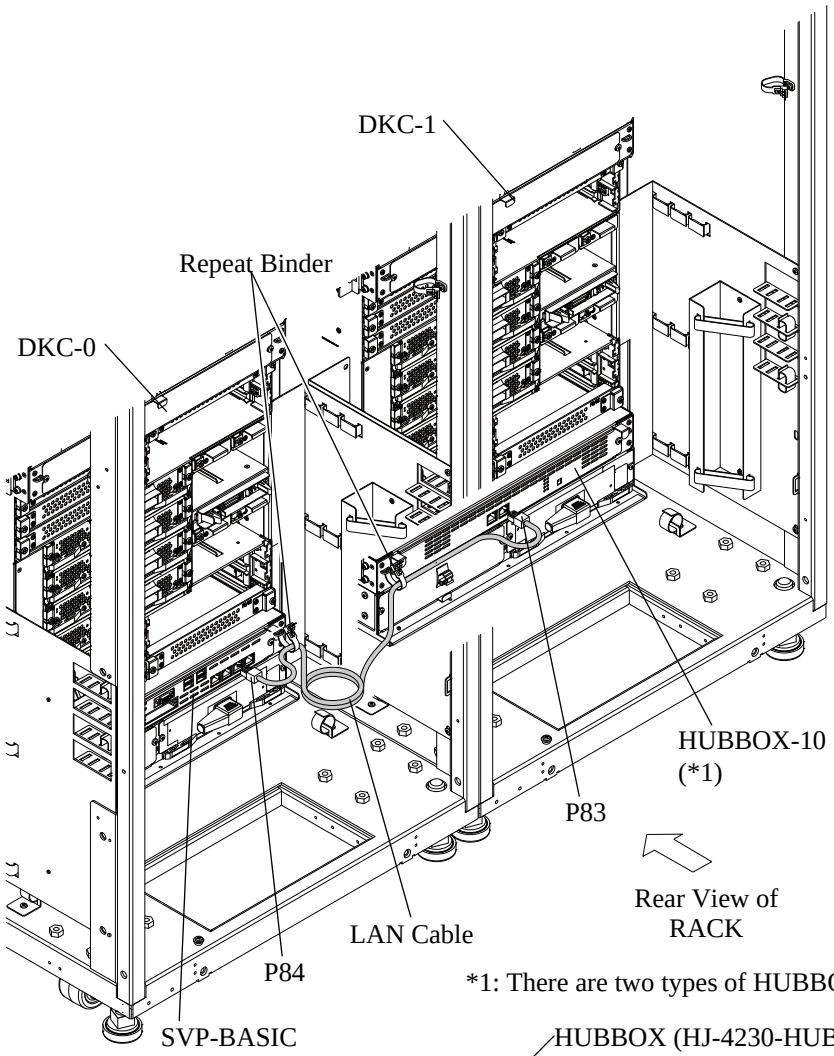
Copyright © 2010, 2011, Hitachi, Ltd.

4. Installation Procedure of Inter-Controller Connecting Kit

4-1 Installation of LAN Cable

a. Wire the LAN cable to the rear side of the RACK. After adjusting the position of the cable, put the extra length of the cable under the cable duct in between the RACKs by rolling it.
b. Connect the LAN cable (P83) to the connector (J83) for the HUBBOX-10 of the rear side of the DKC-1.
c. Pass the repeat binder through the clamp of the HUBBOX-10 side, and fix the LAN cable.
d. Connect the LAN cable (P84) to the connector (J84) of the SVP-BASIC of the rear side of the DKC-0.
e. Pass the repeat binder through the clamp of the SVP-BASIC side, and fix the LAN Cable.



*1: There are two types of HUBBOXes with different appearance.

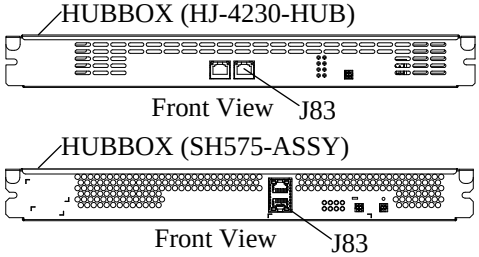


Fig. 3.7-5 Installation of LAN Cable (DKC-0 ↔ DKC-1)

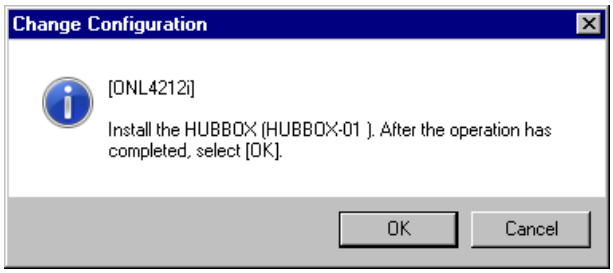
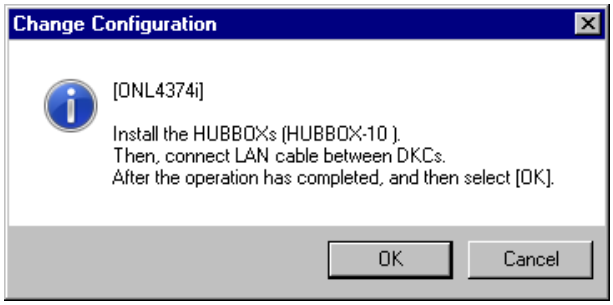
5. SVP pre procedure (ESW Addition)

(1) <Making sure of completion of the hardware addition>

When installation of the Module is required, after the HUBBOX addition is completed, select (CL) [OK] in response to a message, “Install the HUBBOX (HUBBOX-nn). After the operation has completed, select [OK].”

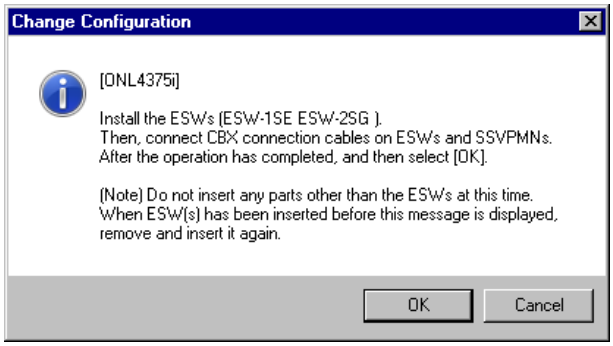


When installation of the Module is required, after the ESW addition is completed, select (CL) [OK] in response to a message, “Install the HUBBOXs (HUBBOX-nn). Then, connect LAN cable between DKCs. After the operation has completed, and then select [OK].” is displayed.



(2) <ESW Installation Operation>

When installation of the Module is required, a message, “Install the ESWs (ESW-nnn ESW-nnn) Then, connect CBX connection cables on ESWs and SSVPMNs. After the operation has completed, and then select [OK].



(Note) Do not insert any parts other than the ESWs at this time. When ESW(s) has been inserted before this message is displayed, remove and insert it again.” is displayed.

- When the message is displayed, install the hardware component following the procedure for installing the ESW.
- When the message is not displayed, go to Step (2) in “8. SVP pre procedure (power supply Addition)”.

Note: Do not select (CL) [OK] by mistake before installing the part(s) to be added in the subsystem.

Copyright © 2010, Hitachi, Ltd.

6. Installation Procedure of PCI Express Switch Adapter

Installation Condition

The PCI Express Switch Adapter (DKC-F710I-ESW) is an indispensable option that is to be installed when the subsystem configuration is one of the following.

In case of DKC-0

① Addition of the first set (1SA/2SC)
- Indispensable option

② Addition of the second set (1SB/2SD)
- When the high performance model is selected
- When the CHA is installed in the Option 2 (1FU/2RU) or the Option 3 (1FL/2RL) of the CHA slots
- When the DKA or the CHA is installed in the Option 1 (1AL/2ML) of the DKA slots

In case of DKC-1

① Addition of the first set (1SE/2SG)
- Indispensable option

② Addition of the second set (1SF/2SH)
- When the high performance model is selected
- When the CHA is installed in the Option 2 (1HU/2UU) or the Option 3 (1HL/2UL) of the CHA slots
- When the DKA or the CHA is installed in the Option 1 (1LL/2XL) of the DKA slots

Twin DKC Model

For the twin DKC model, the ESWs that are installed in the DKC-0 and the DKC-1 should be the same in number.
- When ESWs are installed in the ESW slot option 1 (1SB/2SD) of the DKC-0, ESWs should be installed in the ESW slot option 1 (1SF/2SH) of the DKC-1 even if it fails to meet the installation requirements.
- When ESWs are installed in the ESW slot option 1 (1SF/2SH) of the DKC-1, ESWs should be installed in the ESW slot option 1 (1SB/2SD) of the DKC-0 even if it fails to meet the installation requirements.

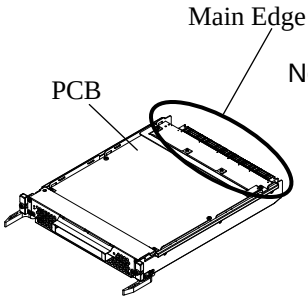
Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

Copyright © 2010, Hitachi, Ltd.

6-1 Insertion of ESW PCB

a. Loosen the screws and remove the dummy plates. (This procedure is not required if the PCB should be installed in the Basic slots.)

b. Insert the ESW PCBs to the DKC and tighten the screws.



Note: 1. Check that the main edge connector of the PCB has no deformation, damage or sticking of dust before installing the PCB. (See INST03-01-70.)

2. When installing the PCB, hold the right and left of the PCB with both hands, and insert it straight not to contact the neighboring PCB.

Table 3.7-4 Location of the ESW PCB

DKC	Addition No.	Slot No.		Location No.		Remarks
		Cluster 1	Cluster 2	Cluster 1	Cluster 2	
DKC-0	Basic	1SA	2SC	ESW-1SA	ESW-2SC	
	Option 1	1SB	2SD	ESW-1SB	ESW-2SD	
DKC-1	Basic	1SE	2SG	ESW-1SE	ESW-2SG	
	Option 1	1SF	2SH	ESW-1SF	ESW-2SH	

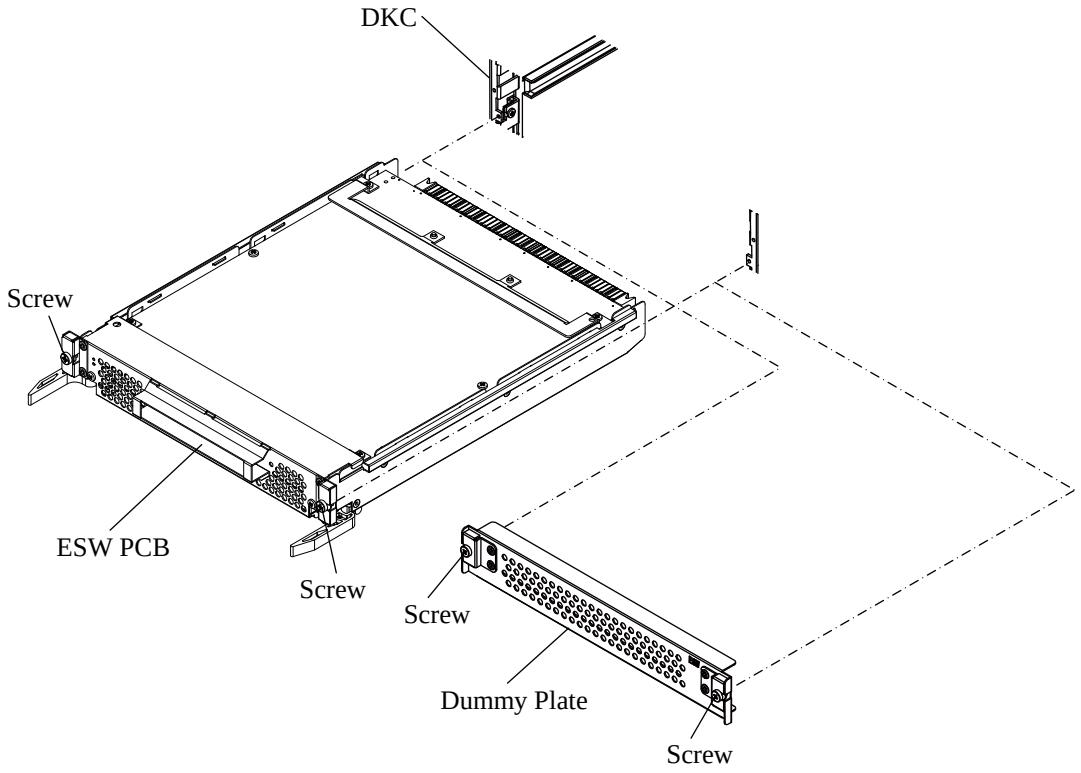


Fig. 3.7-6 Insertion of ESW PCB

Copyright © 2010, Hitachi, Ltd.

6-2 Storage of Dummy Plates (This procedure is not required if the PCB should be installed in the Basic slots.)

a. Remove the pocket ASSY from the front of the frame.
b. Install the two removed dummy plates in the pocket ASSY, and tighten them with the four screws.
c. Install the pocket ASSY in the front of the frame.

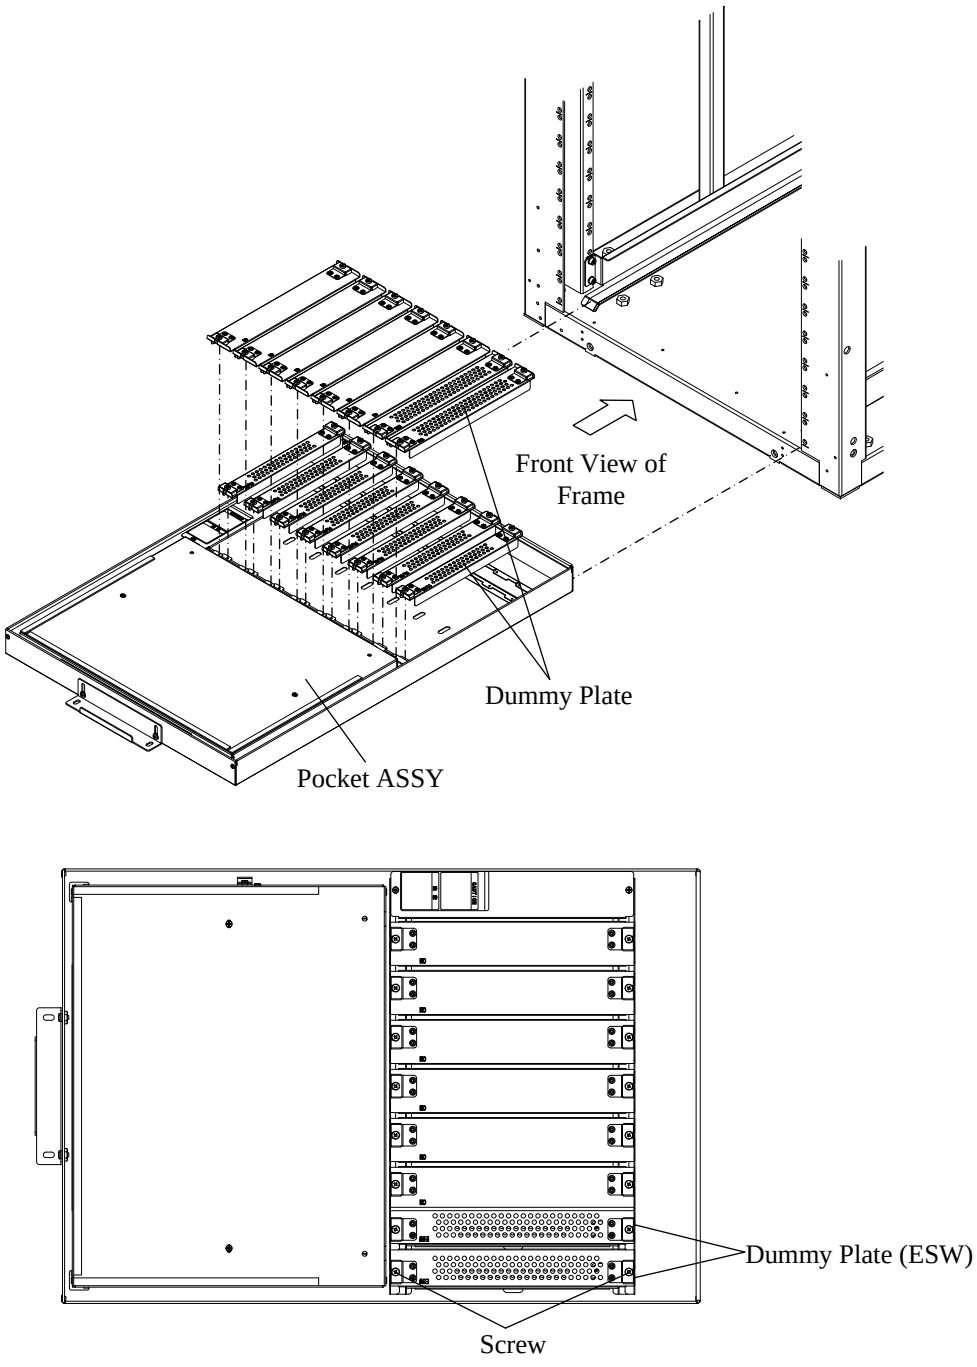

Fig. 3.7-7 Storage of Dummy Plates

Copyright © 2010, Hitachi, Ltd.

6-3 Attachment of the Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

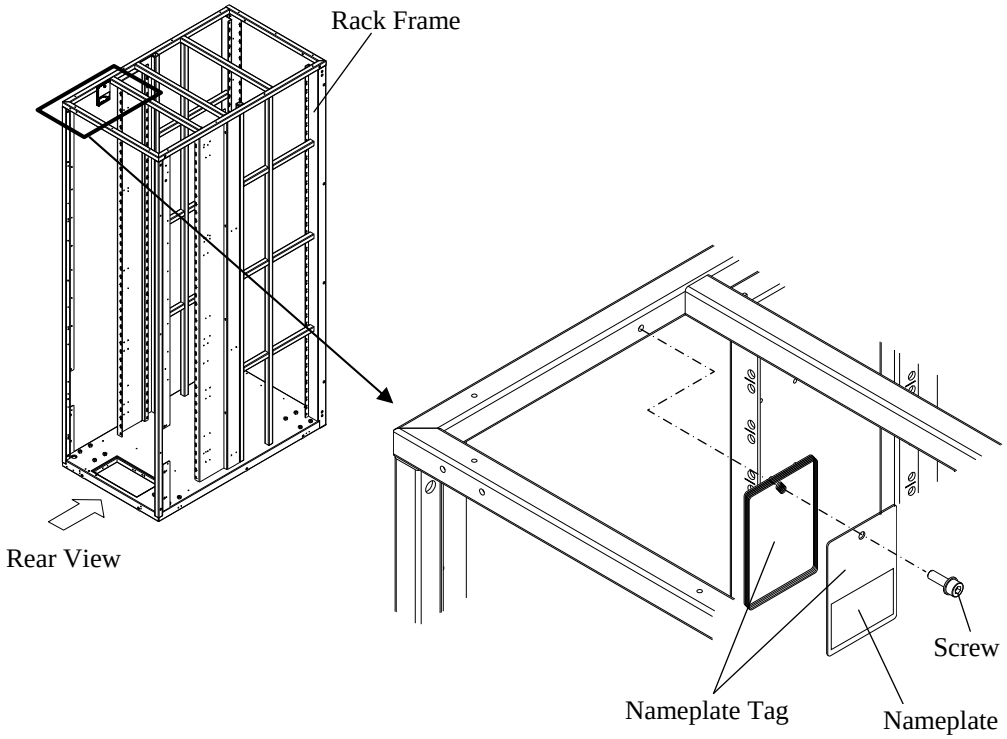

Fig. 3.7-8 Attachment of Nameplate

Copyright © 2010, 2012, Hitachi, Ltd.

7. Installation Procedure of Inter-Controller Connecting Kit

Installation Condition

Inter-Controller Connecting Kit (DKC710I-CBXB/CBXH or DKC-F710I-MDEXC) needs to be added under the following conditions.

① Addition of the 1st Inter-Controller Connecting Kit (DKC710I-CBXB/CBXH)
- When the DKC-1 is installed

② Addition of the 2nd Inter-Controller Connecting Kit (DKC-F710I-MDEXC)
- When the ESW is installed in the Option 1 (1SF/2SH) of the ESW slots

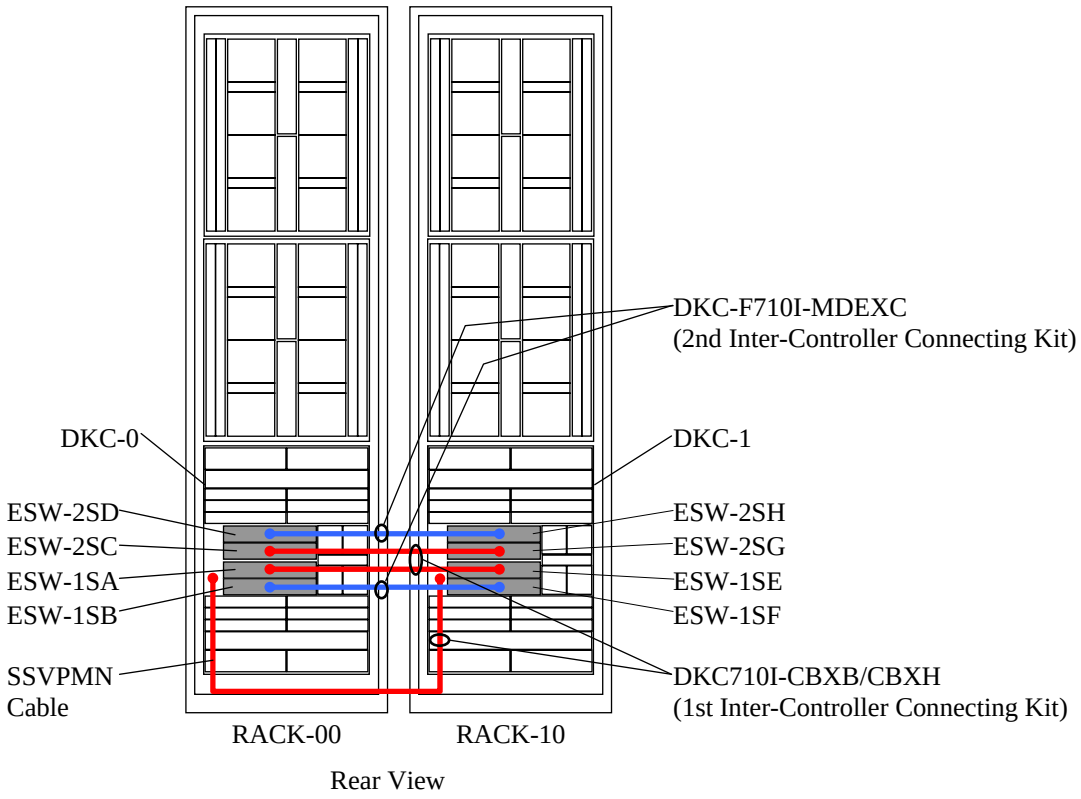

Fig. 3.7-9 Mounting Position of Cable

Copyright © 2010, 2012, Hitachi, Ltd.

For 1st Inter-Controller Connecting Kit (DKC710I-CBXB/CBXH)

7-1 Installation of SSVPMN Cable

a. Remove the black cap from the connector of the rear left side of the DKC-0 and the DKC-1.
b. Wire the SSVPMN Cable to the rear side of the RACK.
c. Connect the cable to the connector of the rear left side of the DKC-0 and the DKC-1.

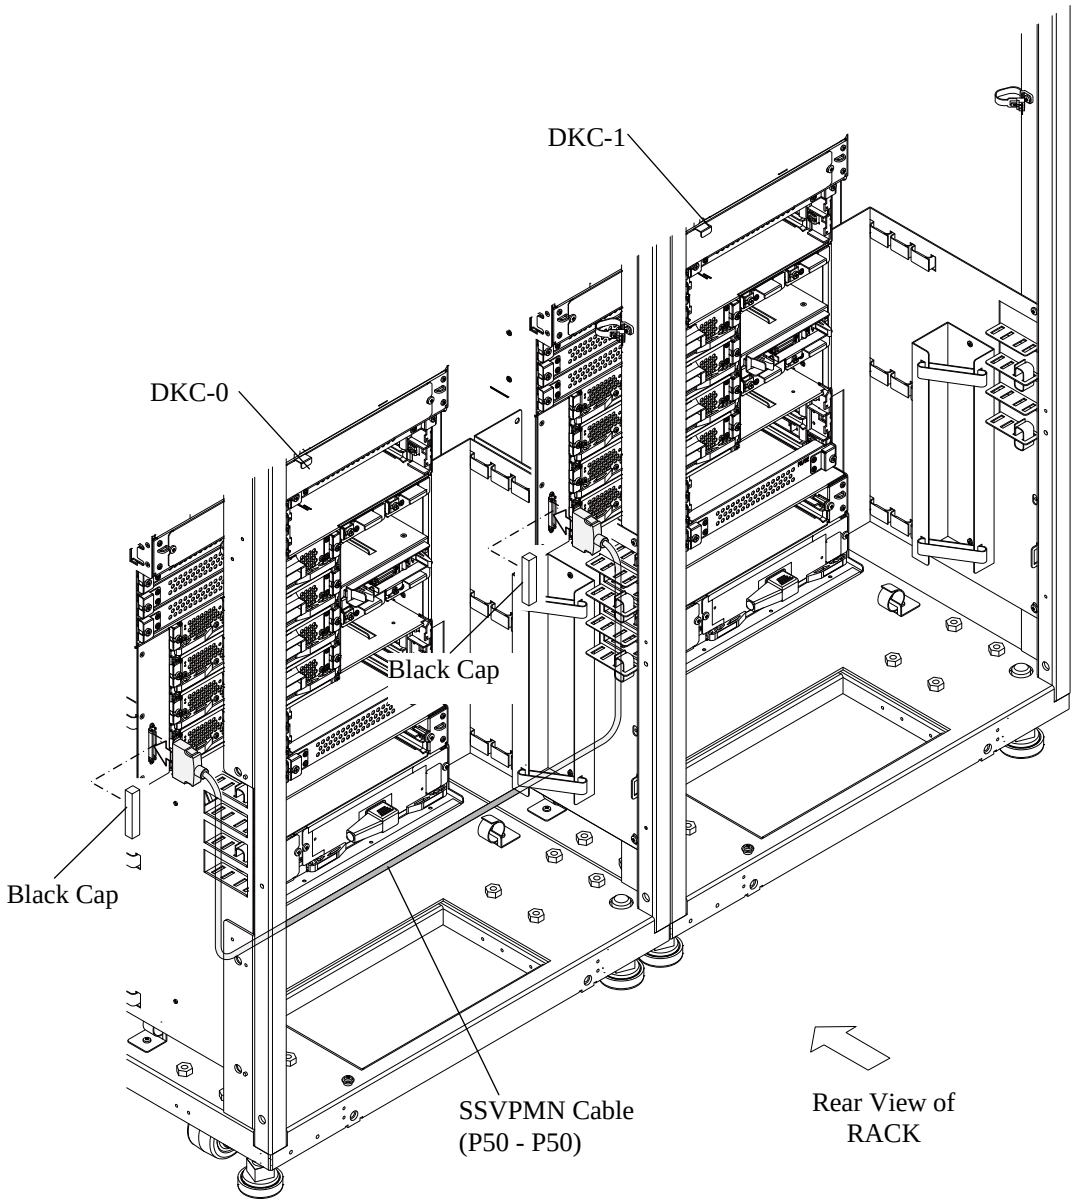

Fig. 3.7-10 Installation of Cable

Copyright © 2010, 2011, Hitachi, Ltd.

7-2 Installation of Cable ASSY

a. Wire the four Cable ASSYs to the rear side of the RACK, and fix them with the two or four clamp tapes. (Refer to Fig. 3.7-11 or Fig. 3.7-12.)

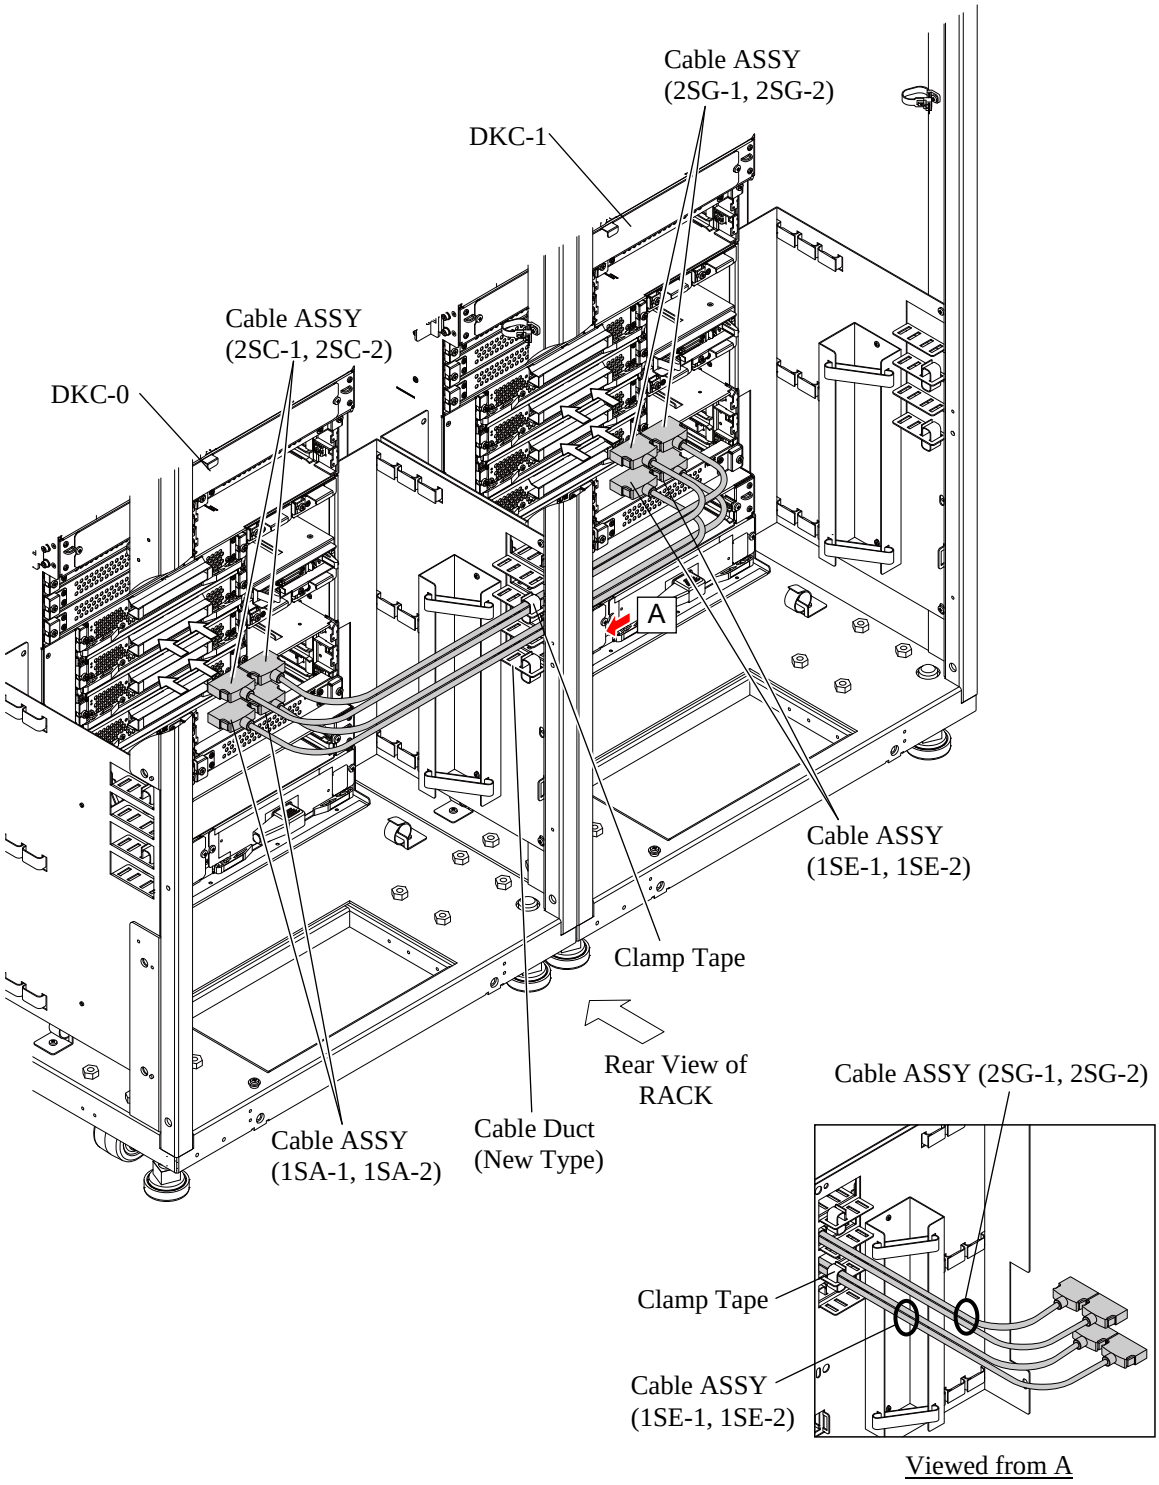

Fig. 3.7-11 Installation of Cable ASSY (DKC-0 ↔ DKC-1, New Type)

Copyright © 2011, Hitachi, Ltd.

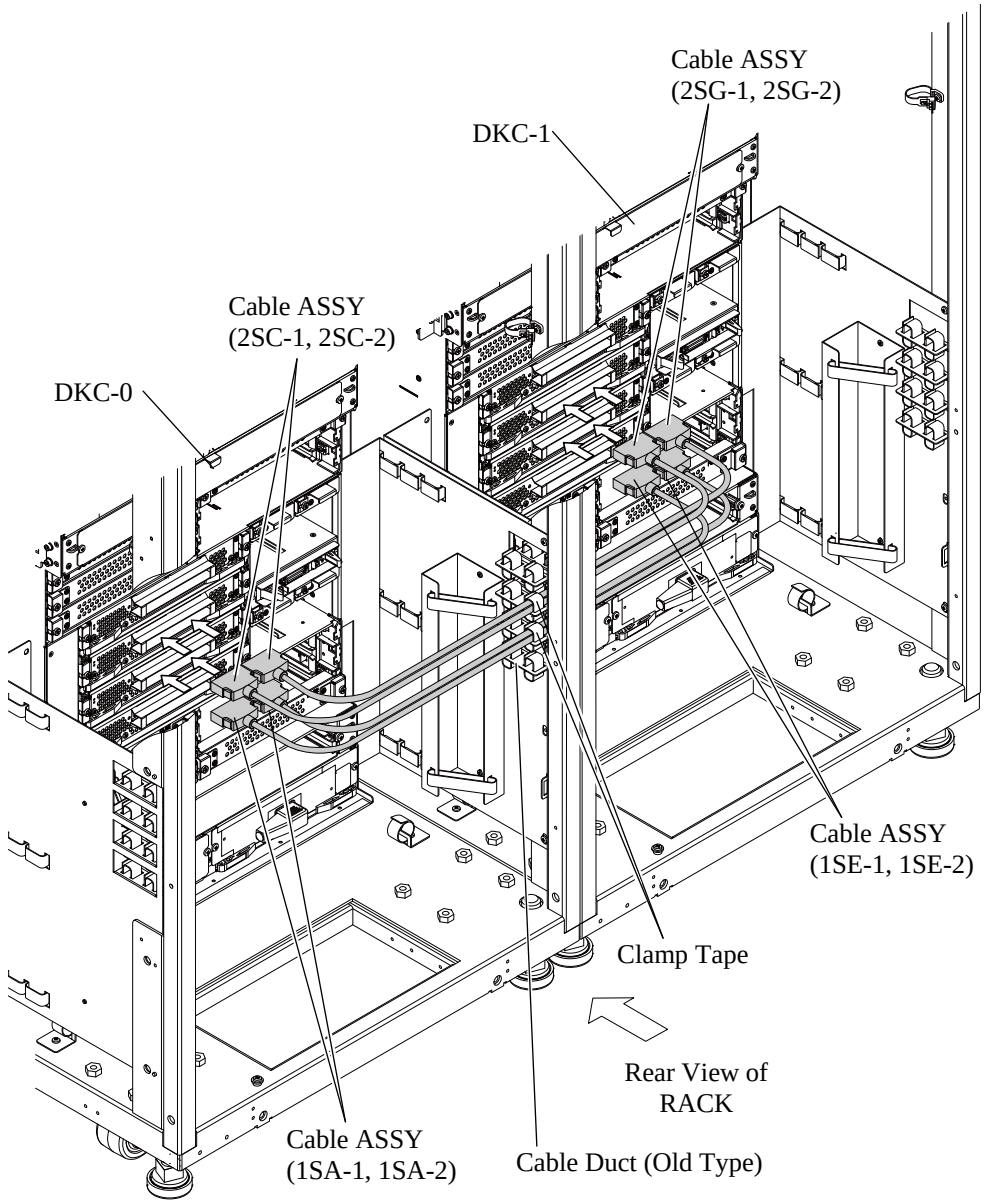

Fig. 3.7-12 Installation of Cable ASSY (DKC-0 ↔ DKC-1, Old Type)

Copyright © 2010, 2011, Hitachi, Ltd.

b. Remove the four black caps from the ESW (1SA and 2SC) of the DKC-0, and connect the cables (1SA-1, 1SA-2, 2SC-1 and 2SC-2).
c. Remove the four black caps from the ESW (1SE and 2SG) of the DKC-1, and connect the cables (1SE-1, 1SE-2, 2SG-1 and 2SG-2).
d. Fix the cables with the clamp tape of the cable duct.

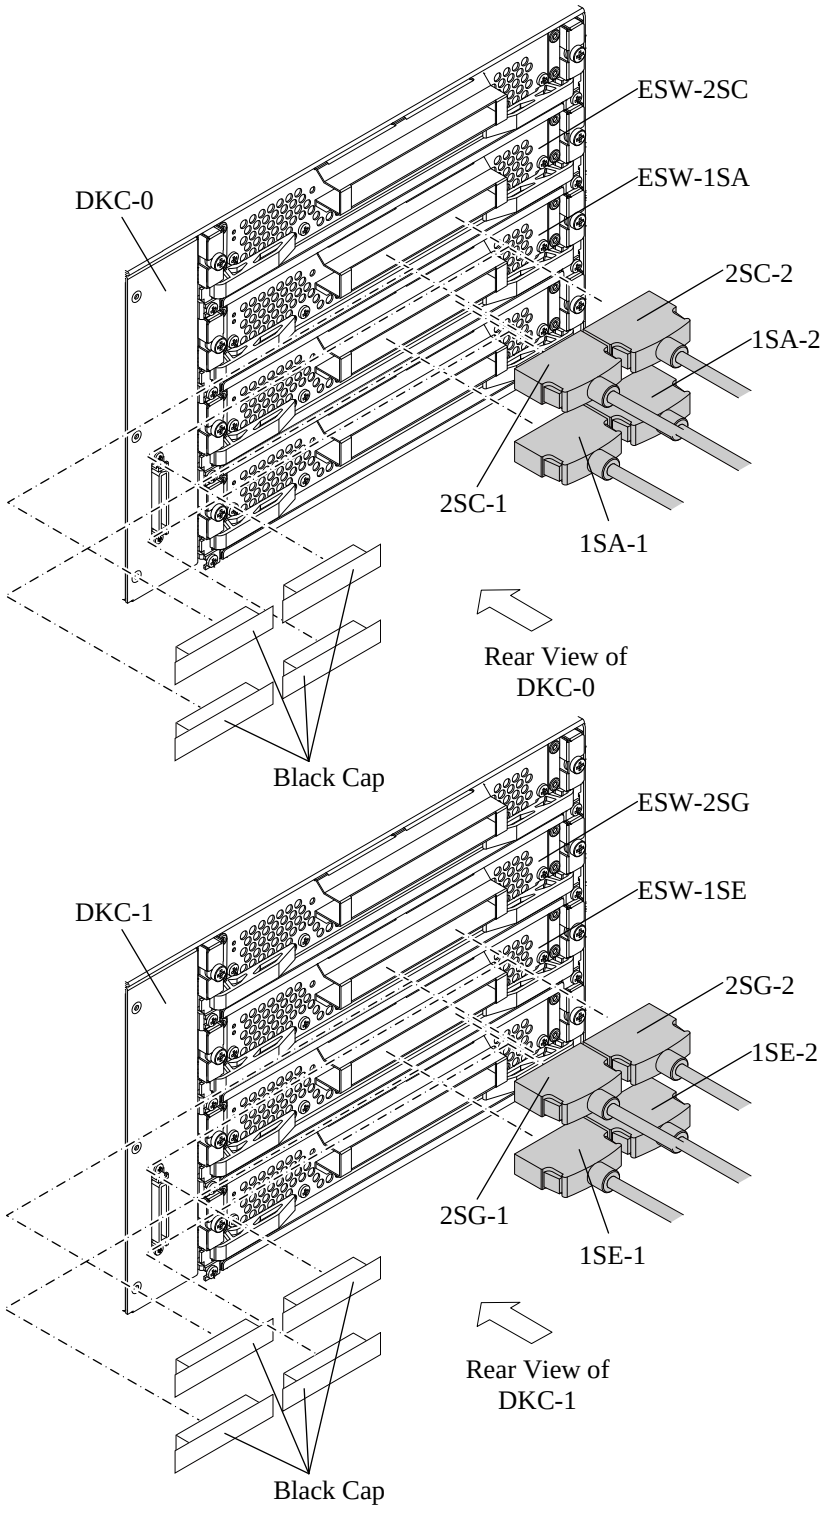

Fig. 3.7-13 Connection of Cables

Copyright © 2010, 2011, Hitachi, Ltd.

Blank Sheet

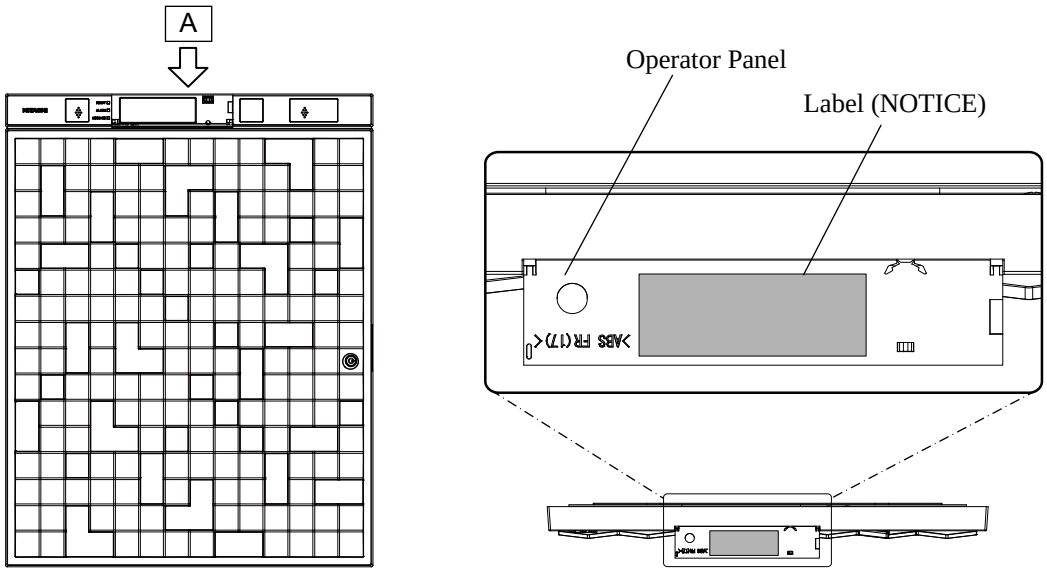
7-3 Attachment of Label

For HDS

a. Open the operator panel of the DKC Bezel for the DKC-0. (Refer to INST03-01-30.)
b. Attach the Label (NOTICE) to the back side of the operator panel.
c. Close the operator panel of the DKC bezel for the DKC-0.



Front View of
DKC Bezel for DKC-0

For HP

a. Attach the Label (NOTICE) to the DKCPANEL of the front of the DKC-0.

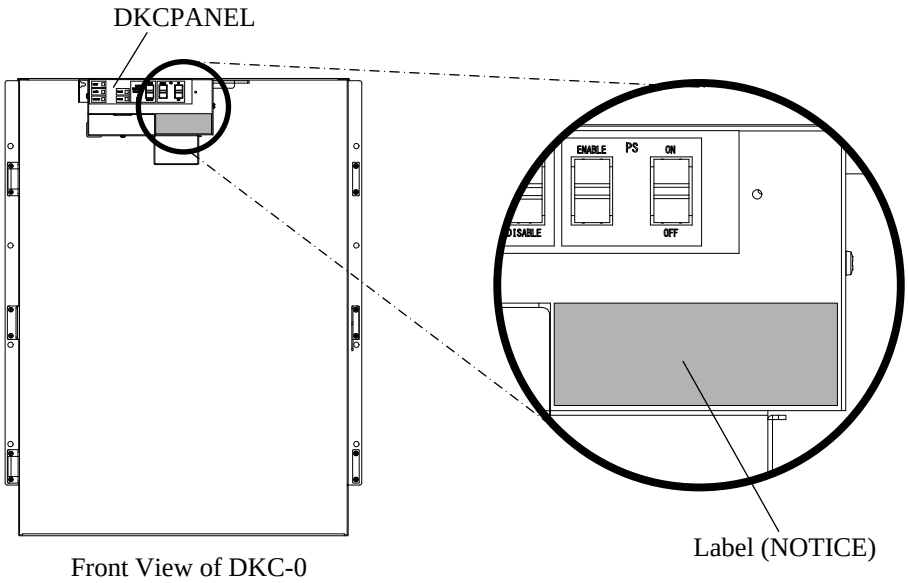

Fig. 3.7-15 Attachment of Label

Copyright © 2010, 2011, Hitachi, Ltd.

7-4 Attachment of Dummy Plates

a. Install the four dummy plates in the slot No. 1GU, 1LU, 2XU and 2TU on the rear side of the DKC-1, and secure them with the eight screws.

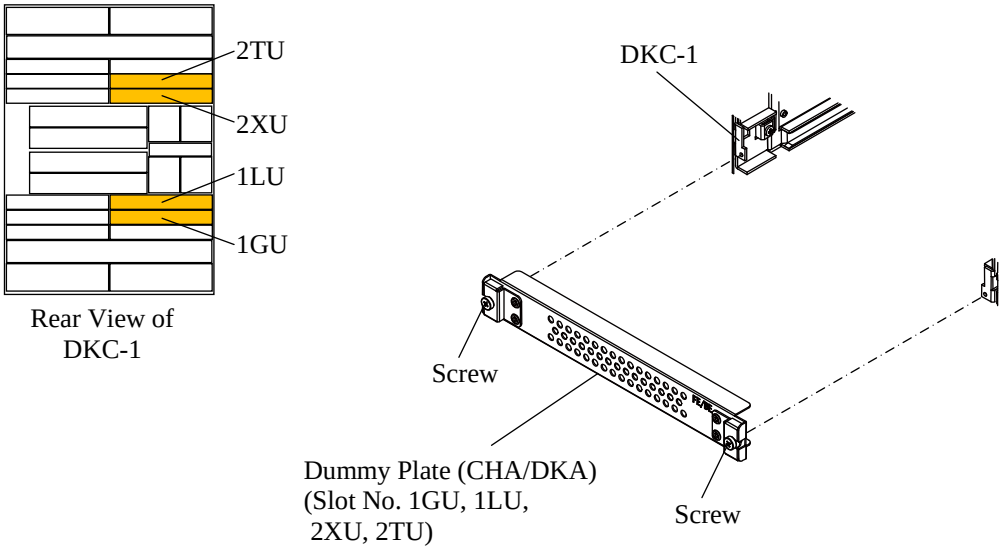

Fig. 3.7-16 Attachment of Dummy Plates

Copyright © 2010, 2011, Hitachi, Ltd.

7-5 Attachment of Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

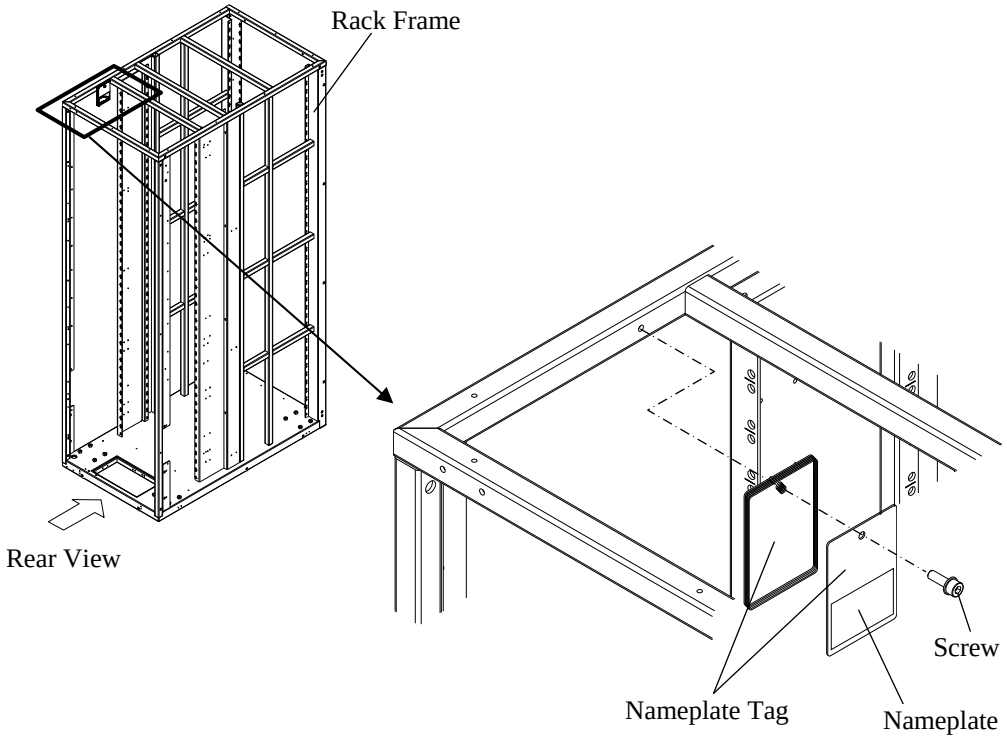

Fig. 3.7-17 Attachment of Nameplate

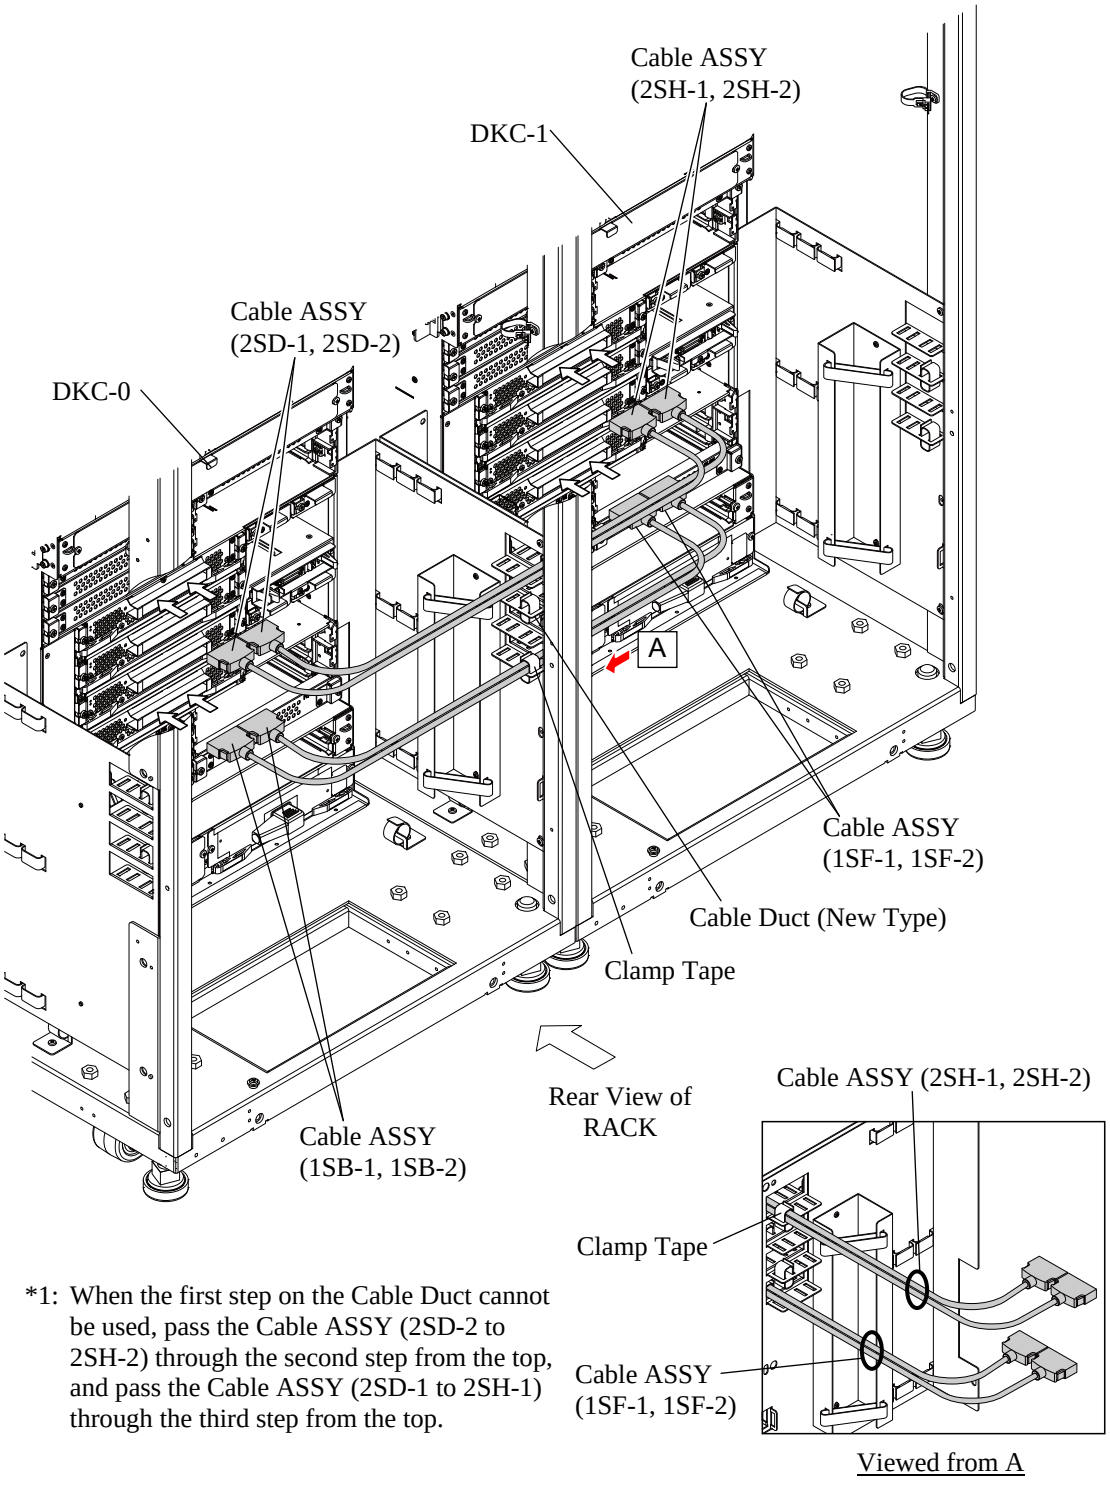
Copyright © 2010, 2011, Hitachi, Ltd.

For 2nd Inter-Controller Connecting Kit (DKC-F710I-MDEXC)

7-1 Installation of Cable ASSY

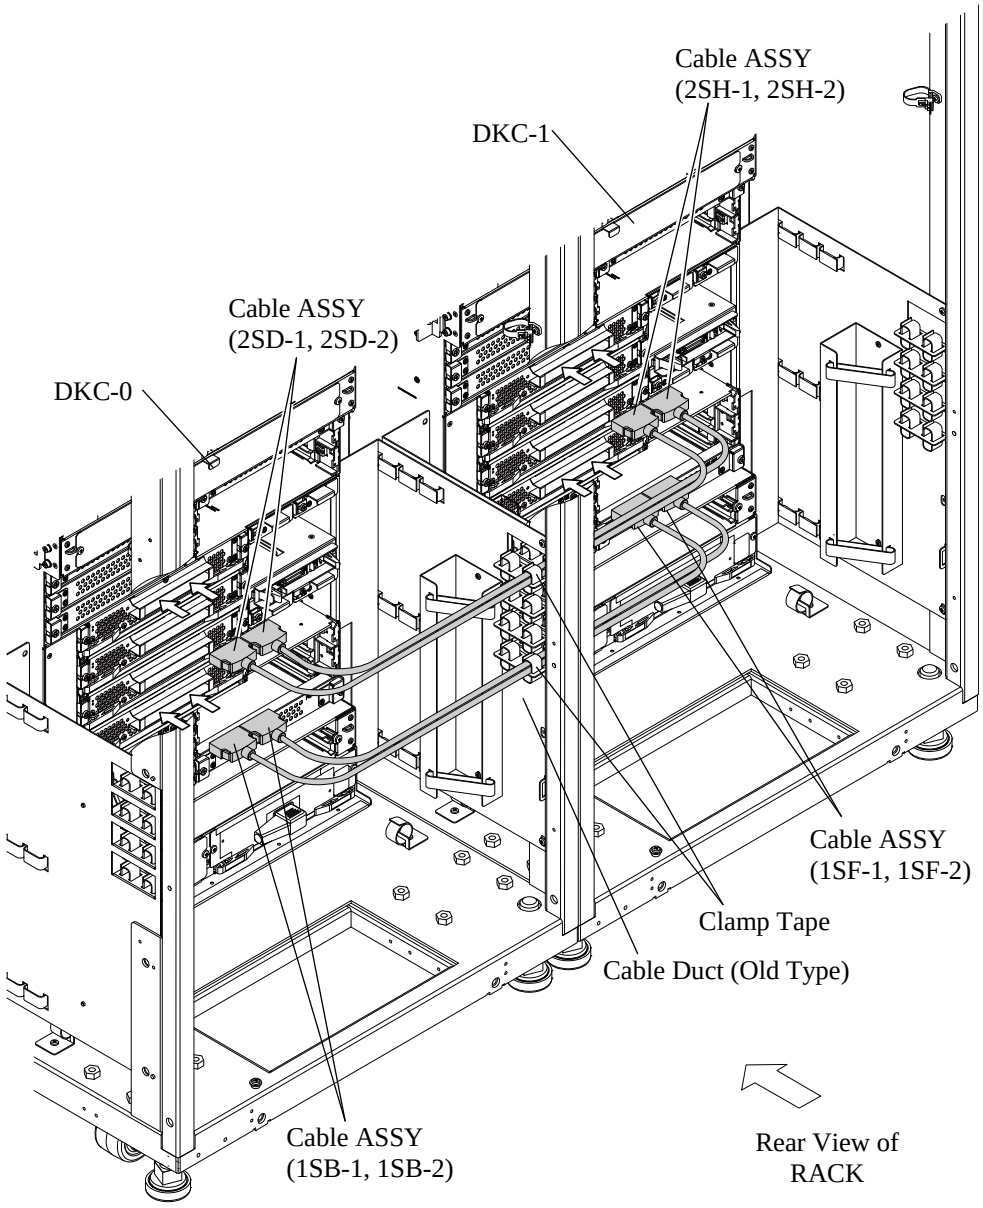
a. Wire the four Cable ASSYs to the rear side of the RACK, and fix them with the two or four clamp tapes. (Refer to Fig. 3.7-18 or Fig. 3.7-19.)



*1: When the first step on the Cable Duct cannot be used, pass the Cable ASSY (2SD-2 to 2SH-2) through the second step from the top, and pass the Cable ASSY (2SD-1 to 2SH-1) through the third step from the top.

Fig. 3.7-18 Installation of Cables (DKC-0 ↔ DKC-1, New Type)

Copyright © 2011, Hitachi, Ltd.



*1: When the first step on the Cable Duct cannot be used, pass the Cable ASSY (2SD-2 to 2SH-2) through the second step from the top, and pass the Cable ASSY (2SD-1 to 2SH-1) through the third step from the top.

Fig. 3.7-19 Installation of Cables (DKC-0 ↔ DKC-1, Old Type)

Copyright © 2010, 2011, Hitachi, Ltd.

b. Remove the four black caps from the ESW (1SB and 2SD) of the DKC-0, and connect the cables (1SB-1, 1SB-2, 2SD-1 and 2SD-2).
c. Remove the four black caps from the ESW (1SF and 2SH) of the DKC-1, and connect the cables (1SF-1, 1SF-2, 2SH-1 and 2SH-2).
d. Fix the cables with the clamp tape of the cable duct.

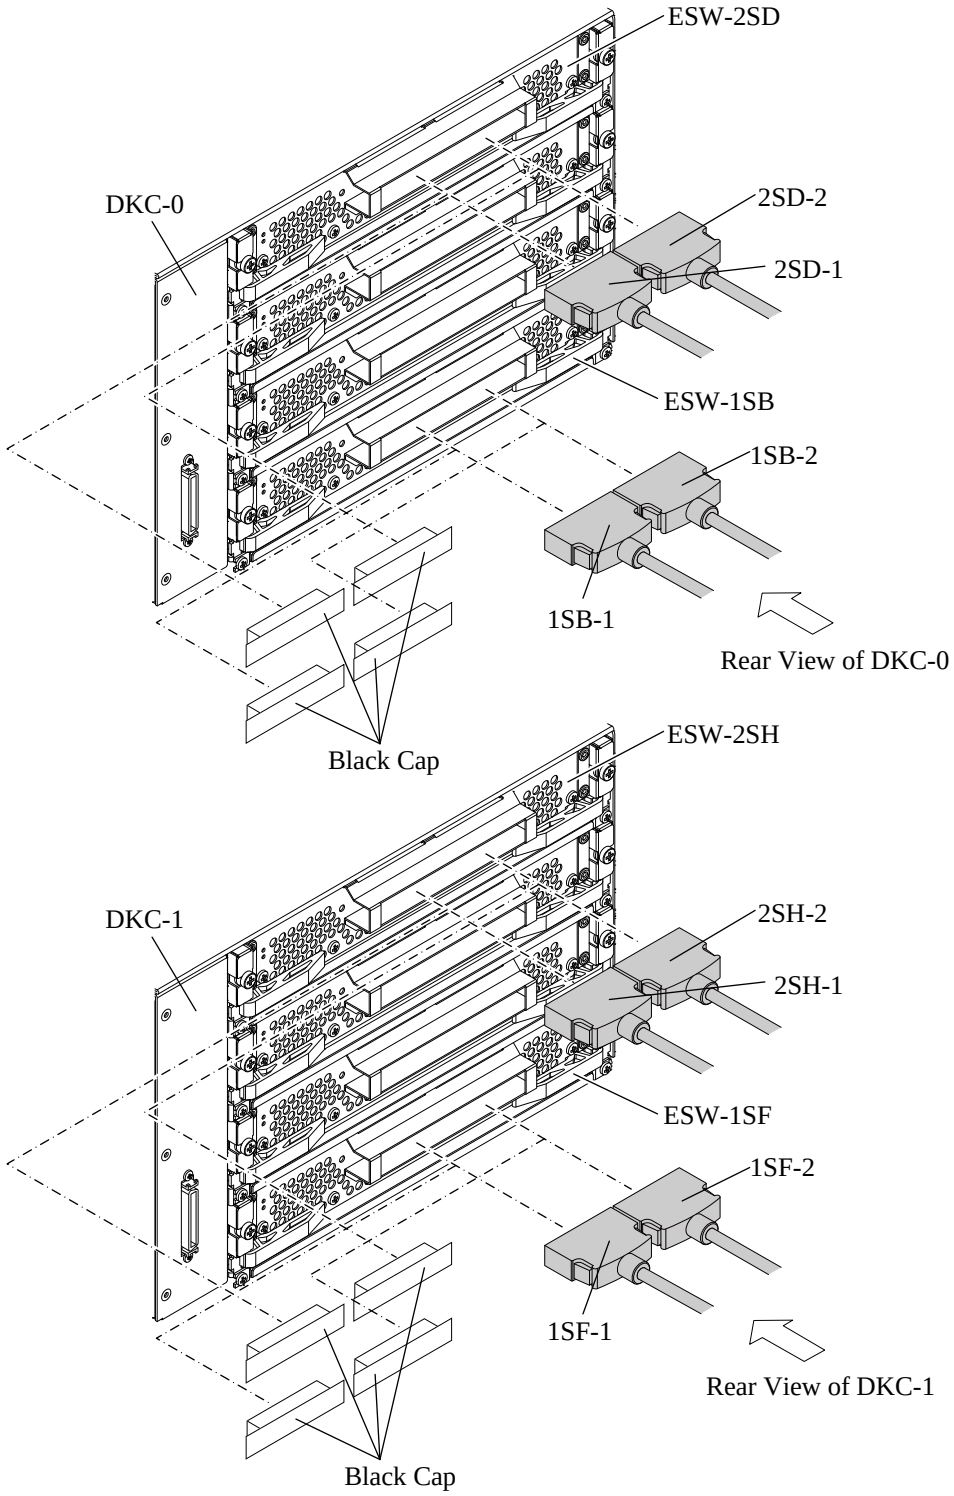


Fig. 3.7-20 Connection of Cables

Copyright © 2010, Hitachi, Ltd.

7-2 Attachment of Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

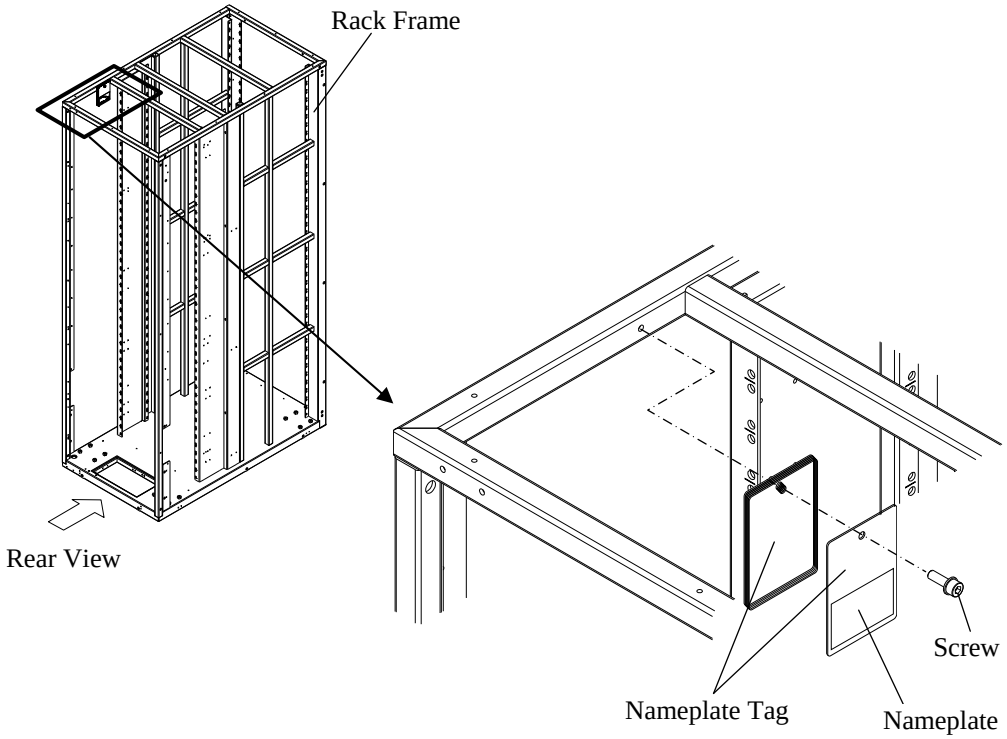

Fig. 3.7-21 Attachment of Nameplate

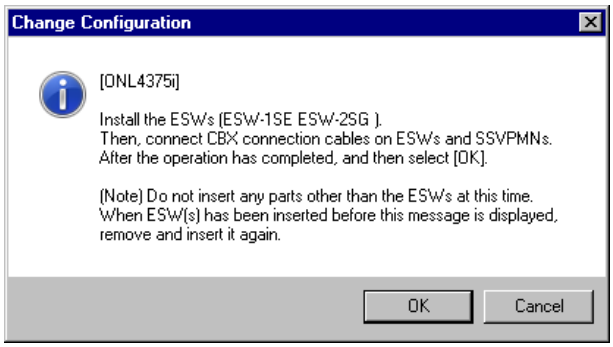
Copyright © 2010, 2014, Hitachi, Ltd.

8. SVP pre procedure (power supply Addition)

(1) <Making sure of completion of the hardware addition>
When installation of the Module is required, after the ESW addition is completed, select (CL) [OK] in response to a message, “Install the ESWs (ESW-nnn ESW-nnn) Then, connect CBX connection cables on ESWs and SSVPMNs. After the operation has completed, and then select [OK].



(Note) Do not insert any parts other than the ESWs at this time. When ESW(s) has been inserted before this message is displayed, remove and insert it again.”

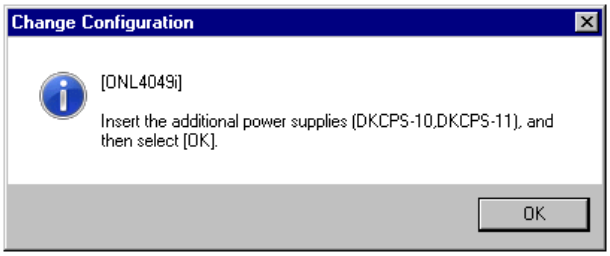
---

(2) <Downloading the microprogram>
The microprogram is downloaded to the SM.
The progress of the downloading is displayed.

Note: When installation of the Module is not required, Go to Step 11 (3).

---

(3) <power supply Installation Operation>
When installation of the Module is required, “Insert the additional power supplies (DKCPS-nn,DKCPS-nn), and then select [OK].” is displayed.



Note: Do not select (CL) [OK] by mistake before installing the part(s) to be added in the subsystem.

Copyright © 2010, 2012, Hitachi, Ltd.

9. When you need to install 1st DKC-F710I-MDEXC, connect the cables to the DKCPSs. When you do not need to install 1st DKC-F710I-MDEXC, go to step 10.
   a. Connect the cables (DKCPS-10 and DKCPS-11) to the DKCPSs and fix them with the stoppers.

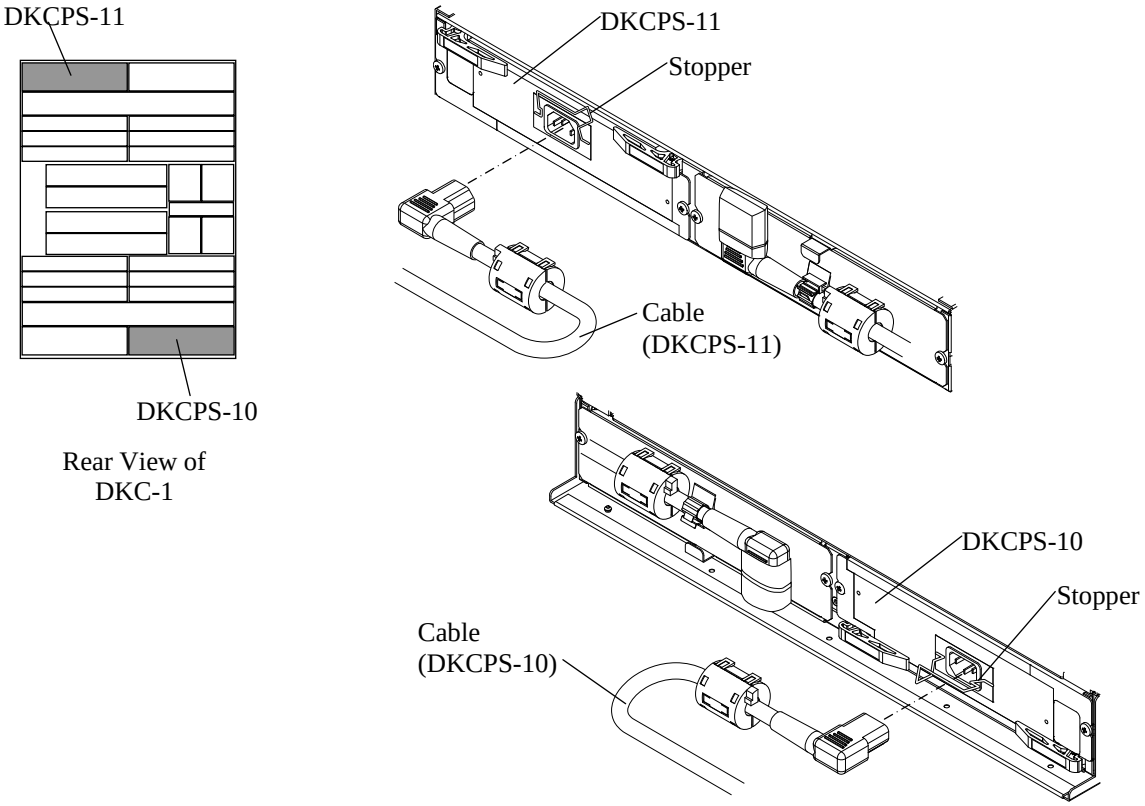


Fig. 3.7-22 Connection of Cables

   b. Turn on the PDU breaker in the RACK-10 that is installed in the DKC-1.

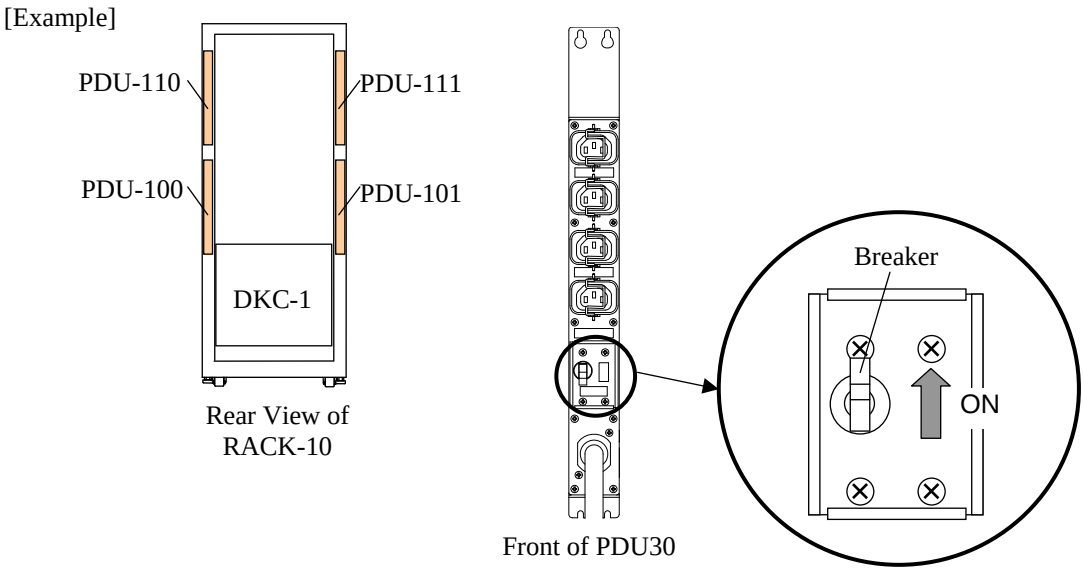

Fig. 3.7-23 Turn on the Breaker

Copyright © 2010, 2012, Hitachi, Ltd.

10. Installation Procedure of the Additional Controller PS

Installation Condition

The Additional Controller PS (DKC-F710I-APC) becomes indispensable when the configuration of DKC is corresponding to any of the following cases.

The cases of DKC-0 and DKC-1

- When two sets of the DKC-F710I-MP/MPR are installed
- When three sets or more of the DKC-F710I-CPC are installed
- When two sets of the DKC-F710I-SVP are installed
- When two sets of the DKC-F710I-ESW are installed
- When two sets of the DKC-F710I-SCA are installed
- When four sets or more of the Fibre 8/16-port Host Adapter (DKC-F710I-8UFC/8UFCR/16UFC/16UFCR) and FCOE 8-port Host Adapter (DKC-F710I-8FOE) are installed
- When three sets or more of the Mainframe Fibre 16-port Host Adapter (DKC-F710I-16MFS/16MFL/16MUS/16MUSR/16MUL) are installed

The additional PCI Express Switch Adapter (DKC-F710I-ESW) becomes indispensable according to the slot that is installed in the DKA and the CHA, and the additional power supply is needed in that case under the following conditions.

The cases of DKC-0

When the CHA is installed in the Option 2 (1FU/2RU) or the Option 3 (1FL/2RL) of the CHA slots
When the DKA or the CHA is installed in the Option 1 (1AL/2ML) of the DKA slots

The cases of DKC-1

When the CHA is installed in the Option 2 (1HU/2UU) or the Option 3 (1HL/2UL) of the CHA slots
When the DKA or the CHA is installed in the Option 1 (1LL/2XL) of the DKA slots

Twin DKC Model

In the twin DKC model, the number of installing of the DKC-F710I-ESW installed in the DKC-0 and the DKC-1 should be made the same. Therefore the additional DKC-F710I-APC might be needed according the number of installing of the DKC-F710I-ESW.

Copyright © 2010, 2012, Hitachi, Ltd.

10-1 Removal of the Dummy plates

a. Open the locking clamps and remove the cables from the dummy plates.
b. Loosen the screws and remove the dummy plates.

Table 3.7-5 Insertion Location of DKCPS

DKC	Addition No.	Location No.		Remarks
DKC-0	Option 1	DKCPS-02	DKCPS-03	
DKC-1	Option 1	DKCPS-12	DKCPS-13	

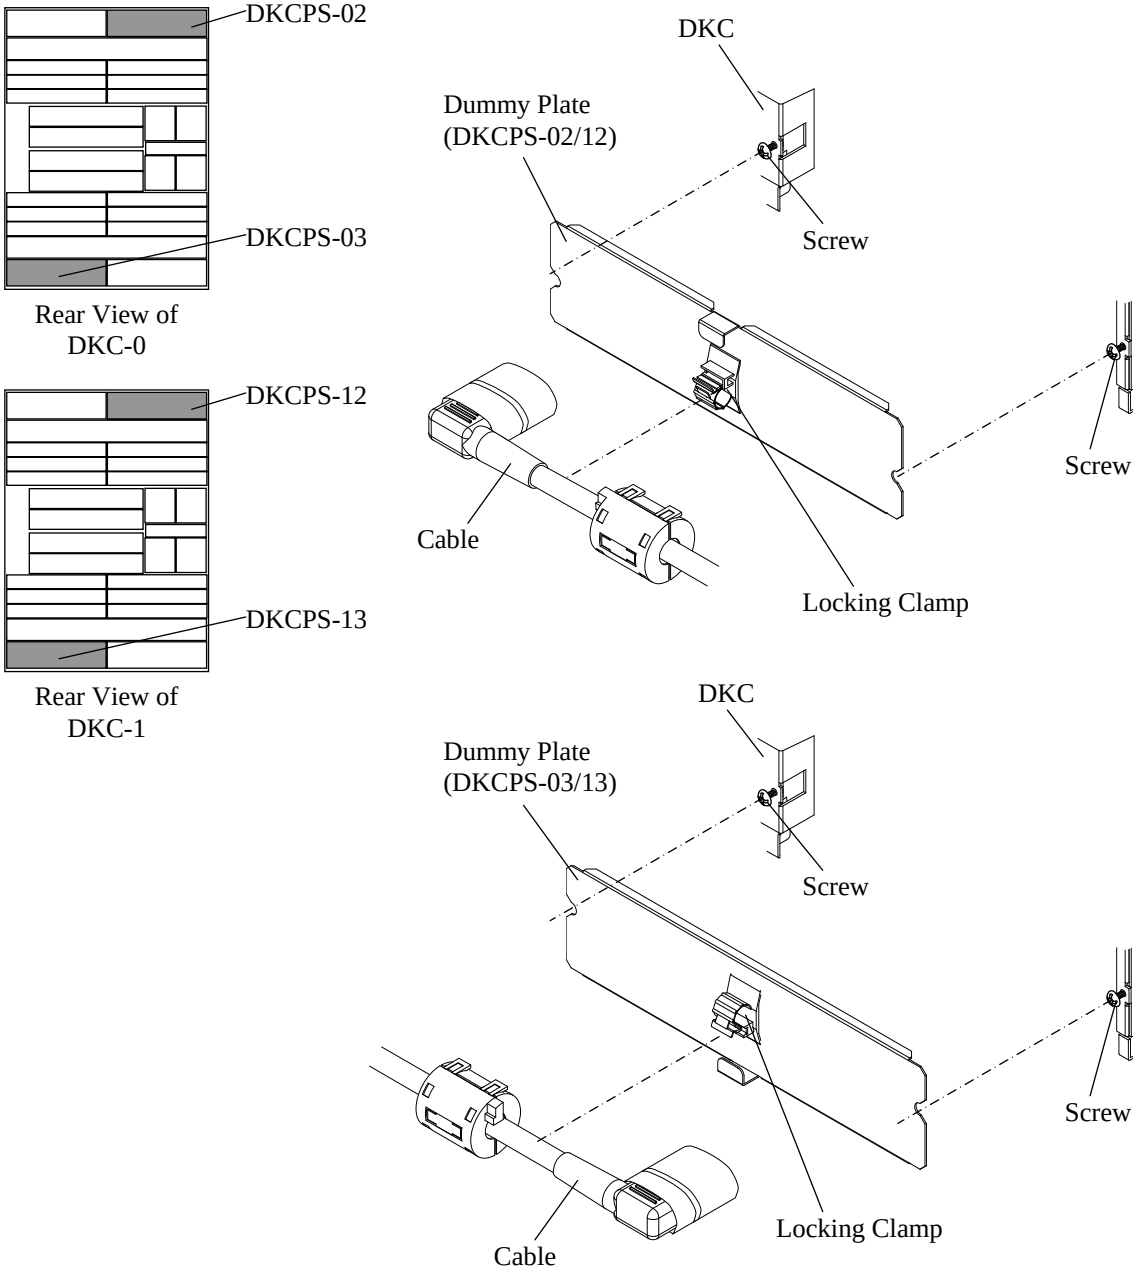

Fig. 3.7-24 Removal of Dummy Plates

Copyright © 2010, 2012, Hitachi, Ltd.

10-2 Installation of the DKCPS

a. Remove the covers from the cables.
b. Install the DKCPSs in the correct locations and tighten the screws.
c. Connect the cables to the DKCPSs and fix them with the stoppers.

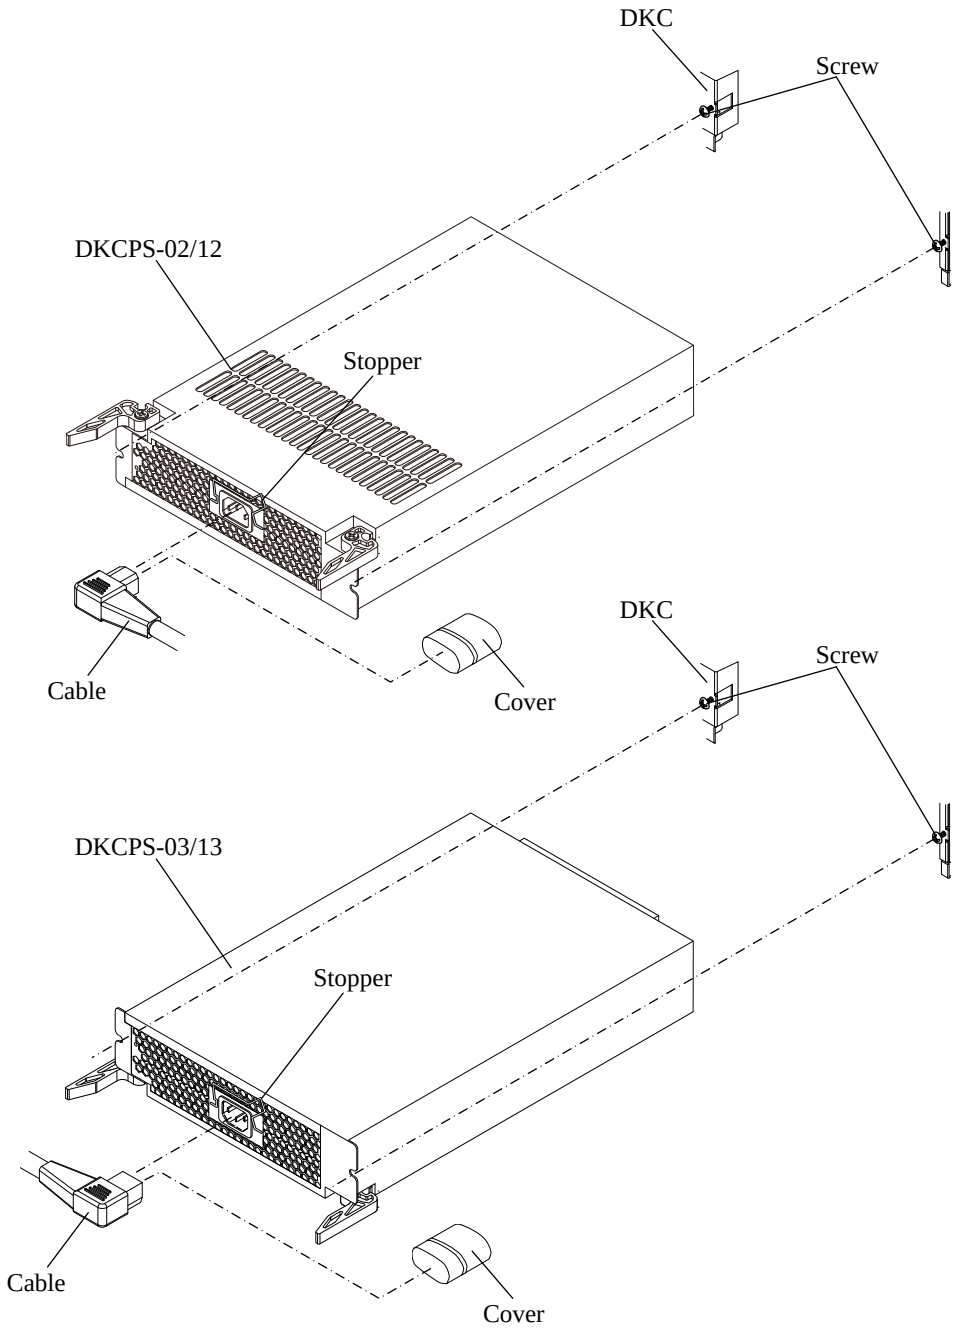

Fig. 3.7-25 Attachment of DKCPS

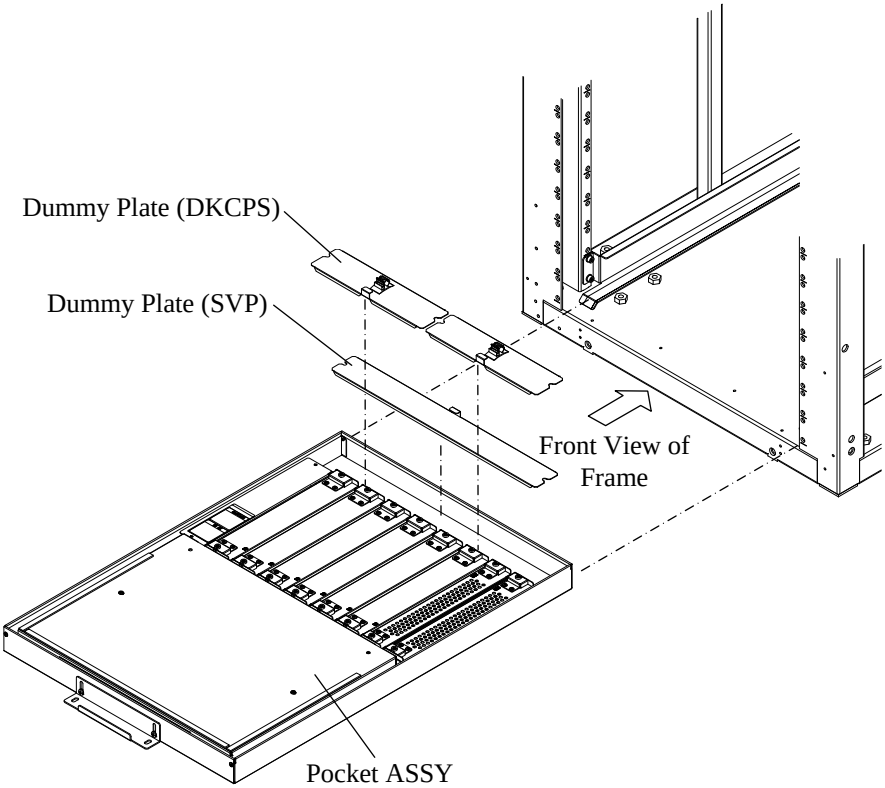
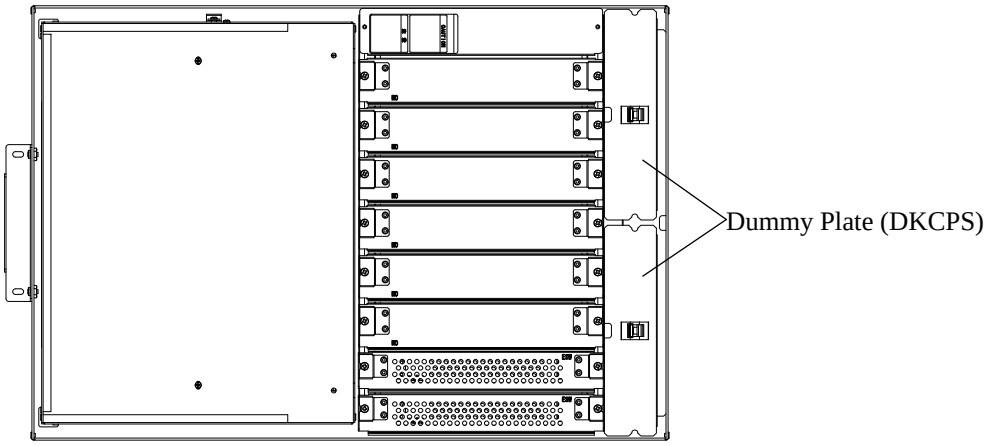
Copyright © 2010, 2012, Hitachi, Ltd.

10-3 Storage of the Dummy Plates

a. Remove the pocket ASSY from the front of the frame.
b. Install the two removed dummy plates in the pocket ASSY.
c. Install the pocket ASSY in the front of the frame.





Top View of Pocket ASSY

Fig. 3.7-26 Storage of Dummy Plates

Copyright © 2010, 2012, Hitachi, Ltd.

10-4 Attachment of the Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

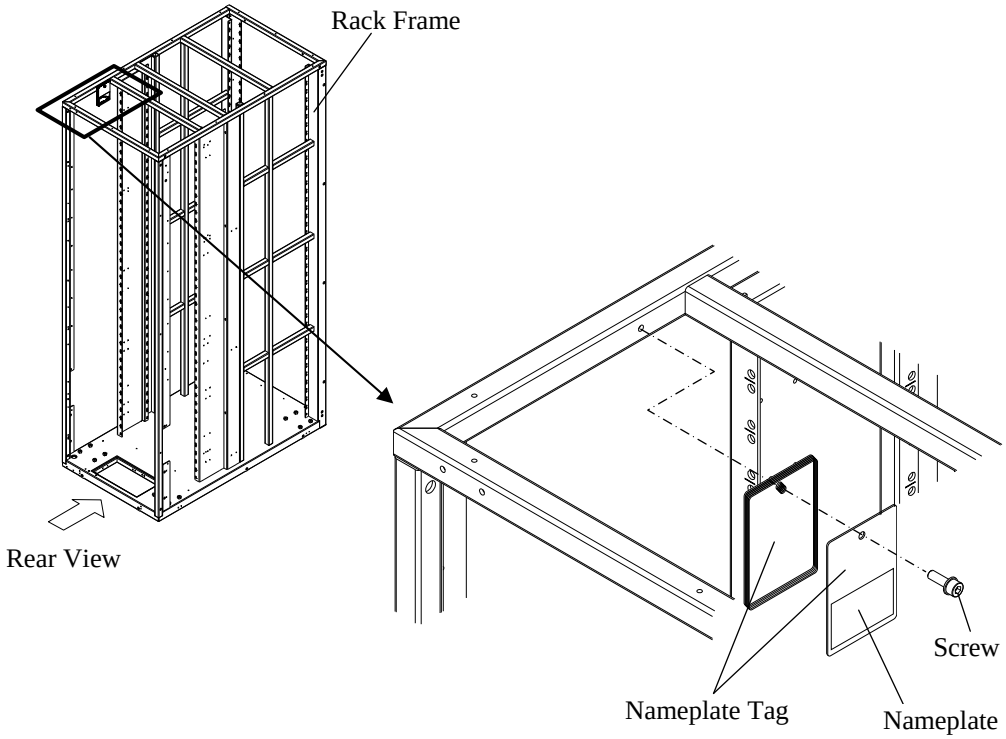


Fig. 3.7-27 Attachment of Nameplate

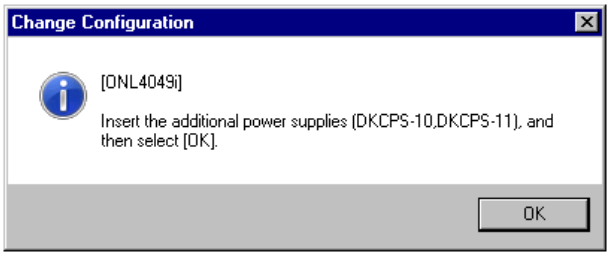
Copyright © 2010, 2012, Hitachi, Ltd.

11. SVP pre procedure (MPB Addition)

(1) <Check that hardware components are installed>
Select (CL) [OK] after making sure that all hardware components are installed correctly in response to “Insert the additional power supplies (DKCPS-10, DKCPS-11), and then select [OK].”



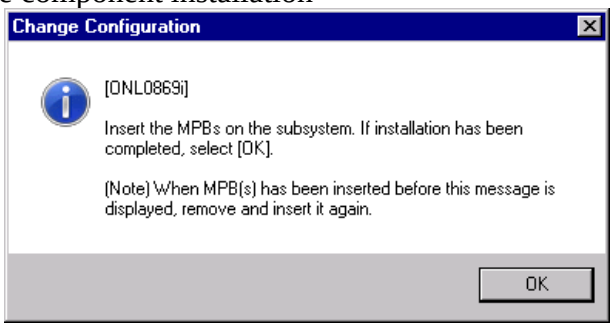
Note: Confirm that all the PS ENABLE LEDs on the DKC-1 light.
When the breaker of PDU is OFF, please turn it on.

---

(2)
“Upgrading of the MPB...” is displayed.

---

(3) <Making sure of completion of the hardware component installation>
A message, “Insert the MPBs on the subsystem. If installation has been completed, select [OK].
(Note) When MPB(s) has been inserted before this message is displayed, remove and insert it again.” is displayed.



Note: Do not select (CL) [OK] by mistake before installing the part(s) to be added in the subsystem.

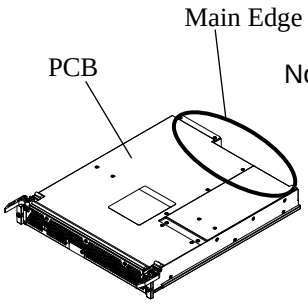
Copyright © 2010, 2012, Hitachi, Ltd.

12. Installation Procedure of Processor Blade

12-1 Insertion of MPB

a. Loosen the screws and remove the dummy plates. (This procedure is not required if the MPB should be installed in the Basic slots.)

b. Insert the MPBs to the DKC and tighten the screws.



Note: 1. Check that the main edge connector of the PCB has no deformation, damage or sticking of dust before installing the PCB. (See INST03-01-70.)

2. When installing the PCB, hold the right and left of the PCB with both hands, and insert it straight not to contact the neighboring PCB.

Table 3.7-6 Location of the MPB

DKC	Addition No.	Slot No.		Location No.		Remarks
		Cluster 1	Cluster 2	Cluster 1	Cluster 2	
DKC-0	Basic	1MA	2MC	MPB-1MA	MPB-2MC	
	Option 1	1MB	2MD	MPB-1MB	MPB-2MD	
DKC-1	Basic	1ME	2MG	MPB-1ME	MPB-2MG	
	Option 1	1MF	2MH	MPB-1MF	MPB-2MH	

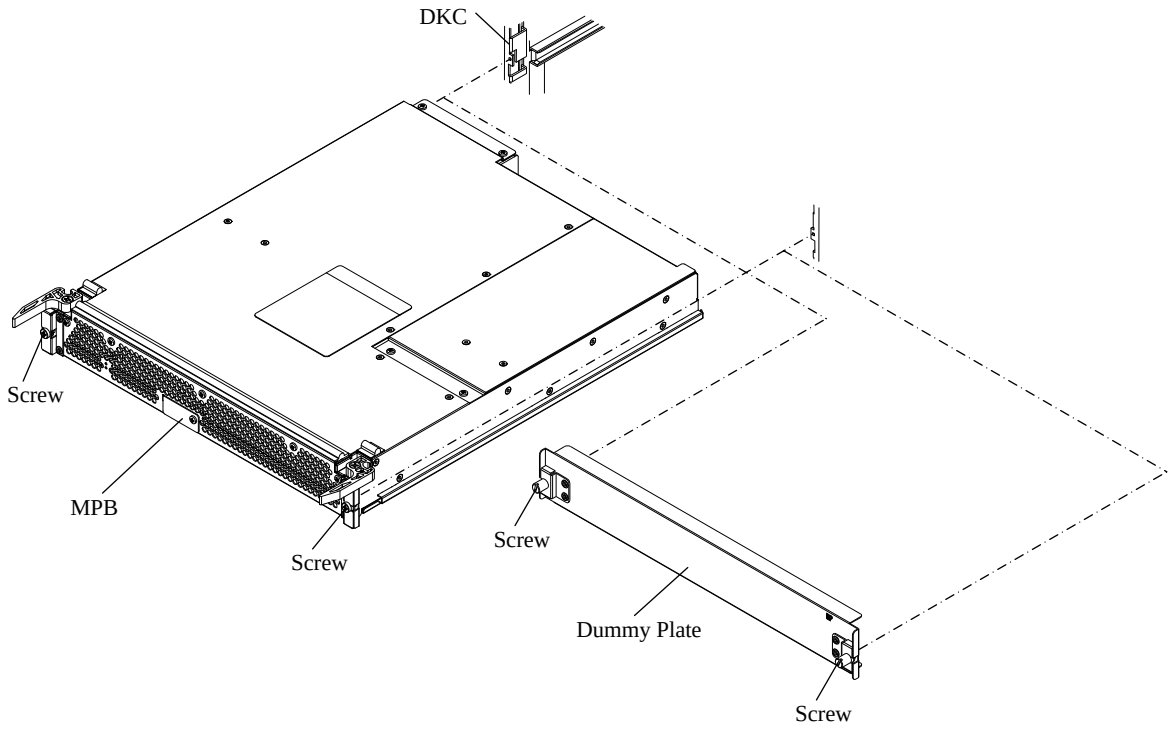


Fig. 3.7-28 Insertion of MPB

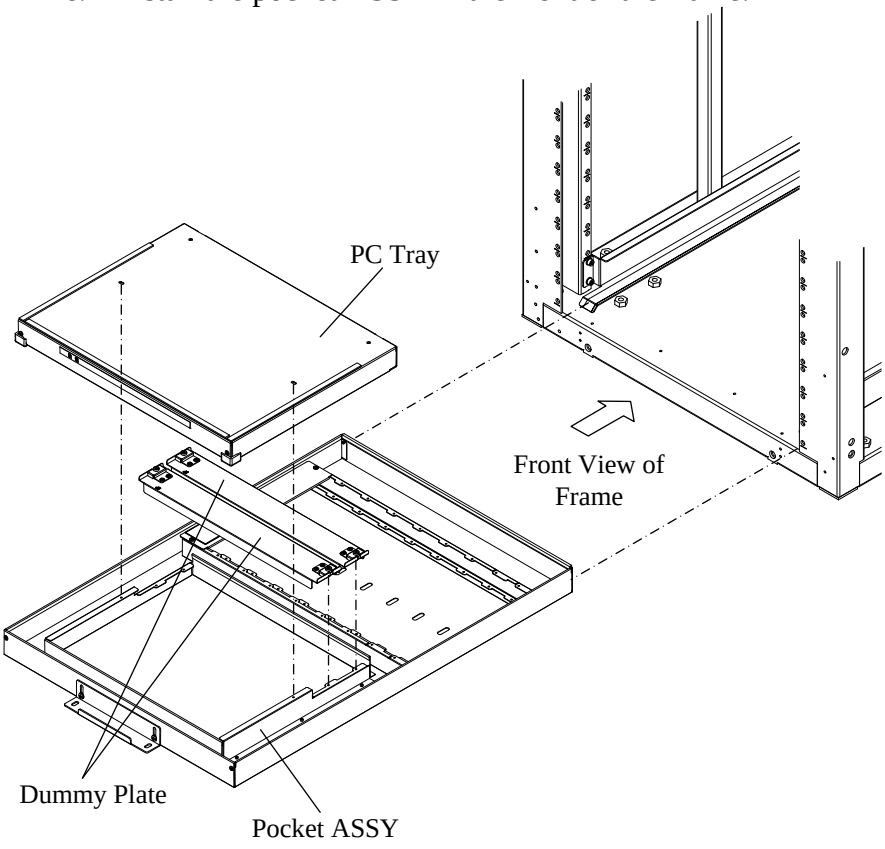
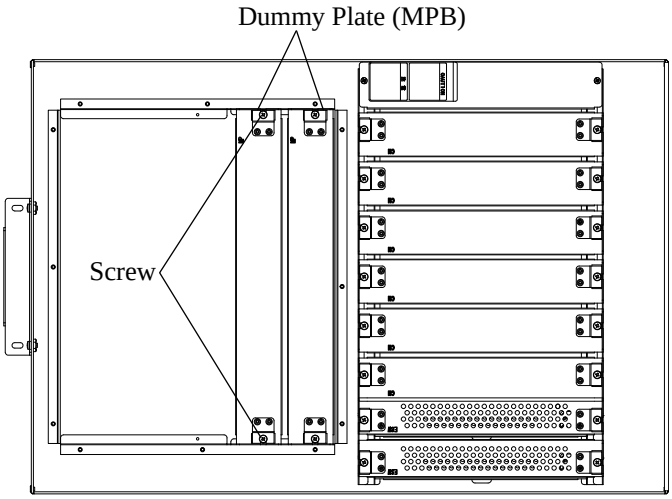
Copyright © 2010, 2012, Hitachi, Ltd.

12-2 Storage of Dummy Plates (This procedure is not required if the PCB should be installed in the Basic slots.)

a. Remove the pocket ASSY from the front of the frame.
b. Remove the PC tray from the pocket ASSY.
c. Install the two removed dummy plates in the pocket ASSY and tighten them with the four screws.
d. Install the PC tray in the pocket ASSY.
e. Install the pocket ASSY in the front of the frame.





Top View of Pocket ASSY

Fig. 3.7-29 Storage of Dummy Plates

Copyright © 2010, 2012, Hitachi, Ltd.

12-3 Attachment of the nameplate

a. Remove the screw from the rack frame and remove the nameplate tags.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

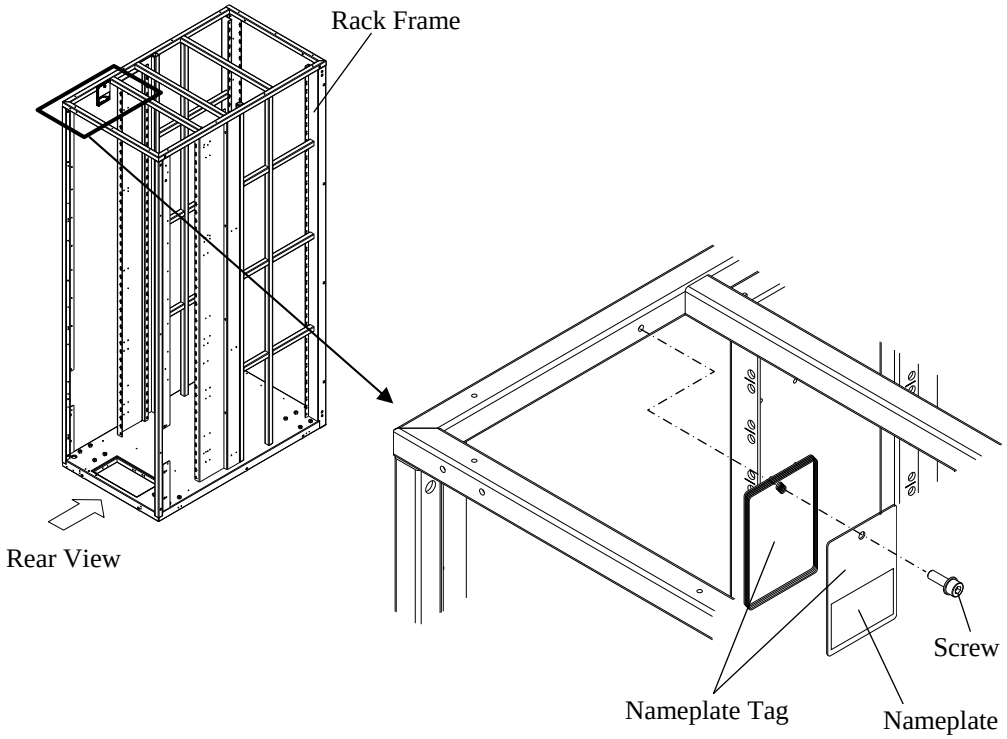


Fig. 3.7-30 Attachment of Nameplate

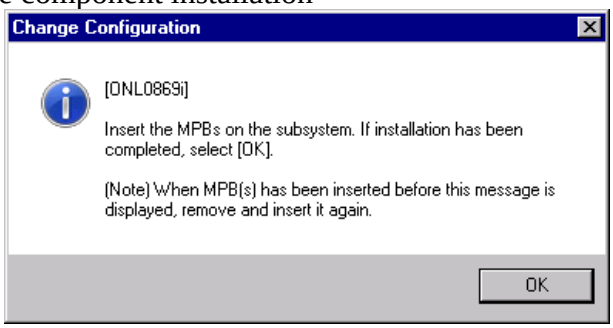
Copyright © 2010, 2012, Hitachi, Ltd.

13. SVP post procedure

(1) <Making sure of completion of the hardware component installation>
After the MPB addition is completed, select (CL) [OK] in response to a message, “Insert the MPBs on the subsystem. If installation has been completed, select [OK].
(Note) When MPB(s) has been inserted before this message is displayed, remove and insert it again.”



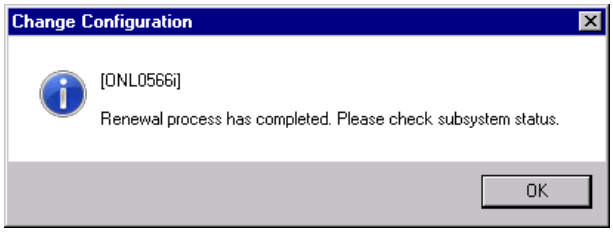
---

(2)
“Waiting for Power Event... Usually, several minutes (maximum 15 minutes)” is displayed.

If [ONL3437E] or [ONL3438E] is displayed, please refer “2.10.1 Replacement procedure when PCB could not be restoring”. (INST02-350)

---

(3) <End of system update processing>
“Renewal process has completed. Please check the subsystem status.” is displayed when recovery processing on all installed components is completed. Select (CL) [OK] in response to this message.

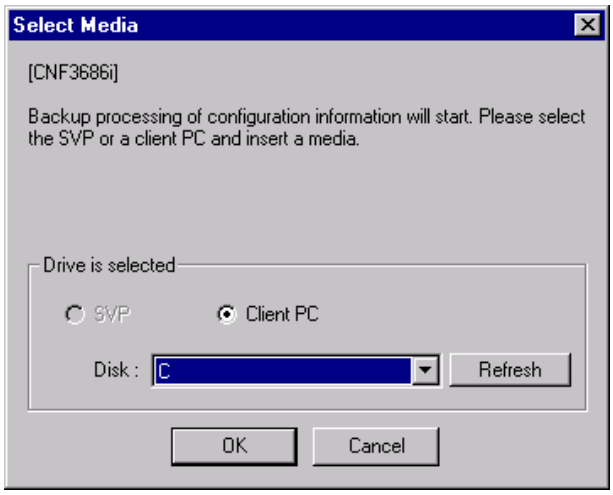


Copyright © 2010, 2012, Hitachi, Ltd.

(4)

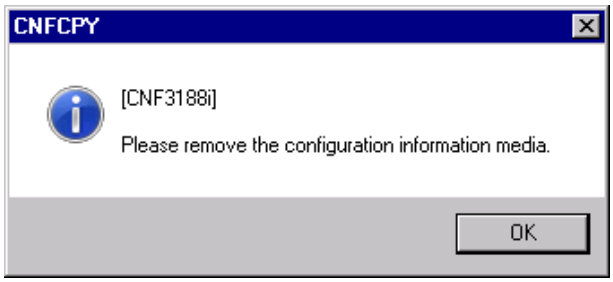
Execute an operation for backing up the configuration information.
Prepare the removable media for backup and insert the media.
Please select (CL) the [Refresh] button, and update drive information.
Select (CL) the drive and the PC in which the media was inserted. Select (CL) the [OK] button.

Note: For the procedure of backing up the configuration information to a CD-R, see page MICRO07-140.



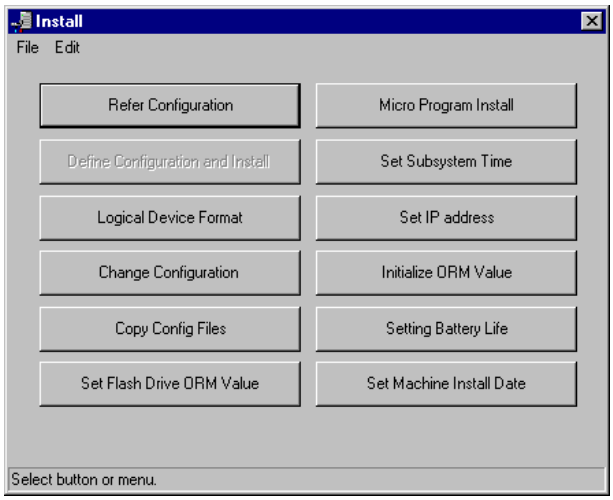
(5)

When this procedure is completed, the message “Please remove the configuration information media.” is displayed.
Remove the configuration information media, select (CL) [OK].



(6)

After the procedure is completed, return to “Install”.
Select (CL) [File]-[Exit].



(7) <Mode Change>
Change the mode to View Mode.

Return to the working table and do the rest of the work.
New Installation: INST02-10,
Non-Disruptive Installation: INST02-40

3.8 Installation of Channel Adapter, ESW and Inter-Controller Connecting Kit

3.8.1 Installation of Fibre 8/16-port Host Adapter, PCI Express Switch Adapter and Inter-Controller Connecting Kit (DKC-F710I-8UFC/8UFCR/16UFC/16UFCR/ESW/MDEXC)

Note: Be sure to check the following conditions before performing the addition.
When the installed ESWs (DKC-F710I-ESW) per DKC are two sets or more, or the installed CHAs (DKC-F710I-8UFC/8UFCR/16UFC/16UFCR/8FOE) per DKC are four sets or more, the Additional Controller PS (DKC-F710I-APC) is required.

Table 3.8.1-1 Parts List

No.	Model Number	Part Name	Part No.	Quantity	Remarks
1	DKC-F710I-8UFC	WP712-B	5541859-A	2	CHA PCB

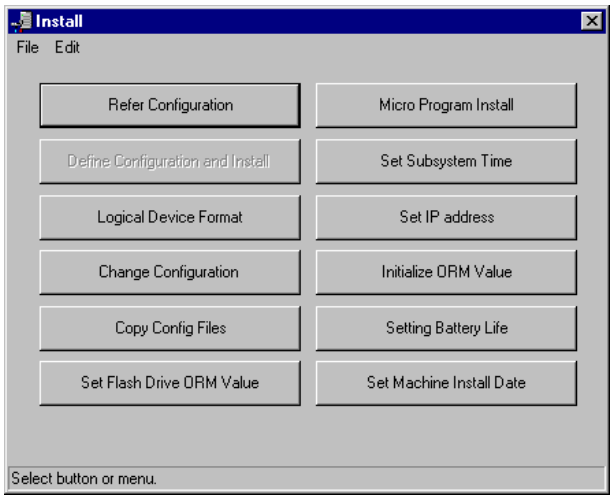
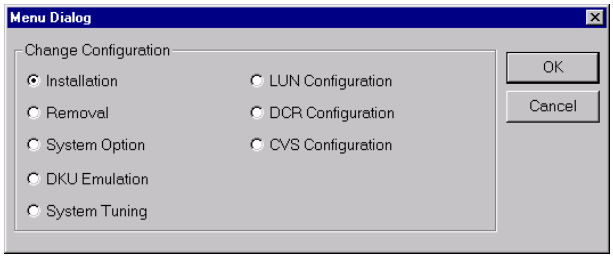
1. Setting up the New Device Structure Information

(1) <Mode Change>
Change the mode to Modify Mode.
Select (CL) [Install].

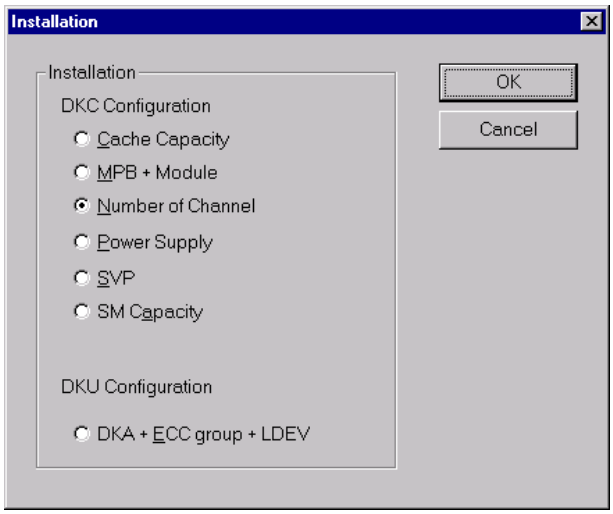
(2) <Start the 'Menu Dialog' screen>
Select (CL) [Change Configuration].



(3) <Start Device Structure Setup screen>
Select (CL) [Installation] in the 'Menu Dialog' dialog box and select (CL) [OK].



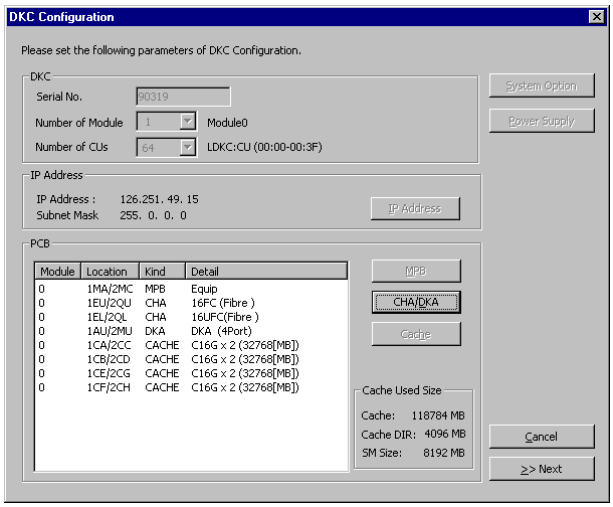
(4) <Select a part to be changed>
Select (CL) [Number of Channel], and select (CL) [OK].



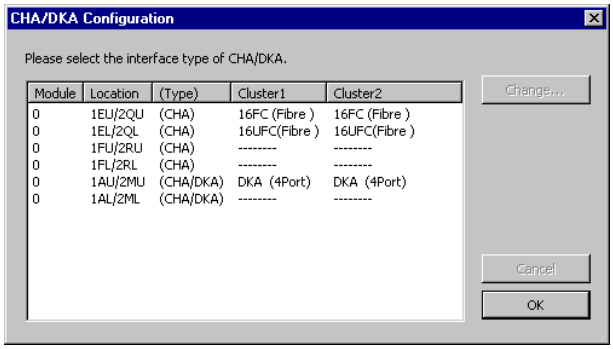
Copyright © 2010, Hitachi, Ltd.

(5) <DKC Configuration screen>
In the 'DKC Configuration' screen, select (CL) [CHA/DKA].
Go to Step (6).

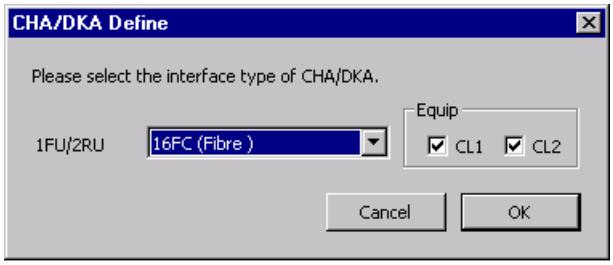
After the setting is completed, select (CL) [>>Next].
(Go to Step (8).)
In the case of selecting (CL) [Cancel], this operation procedure terminates.



(6) <Setting the CHA type>
In the 'CHA/DKA Configuration' screen, select the location(s) to which the addition is to be made, and select (CL) [Change...]. Go to Step (7).
Make sure that the entry that has been made is correct and select (CL) [OK].
Go back to Step (5).

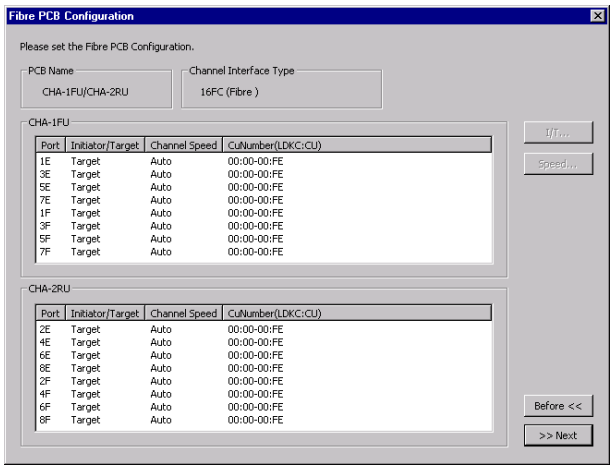


(7) <Select the CHA type>
In the 'CHA/DKA Define' screen, select Fibre PCB.
Check the 'Equip (CL1/CL2)' setting.
After the setting is completed, select (CL) [OK]. The routine is returned to Step (5).



Copyright © 2010, Hitachi, Ltd.

(8) <Setting details of the CHA>
Enter the necessary items in the 'Fibre PCB Configuration' screen. Repeat this operation as many times as the CHAs installed.

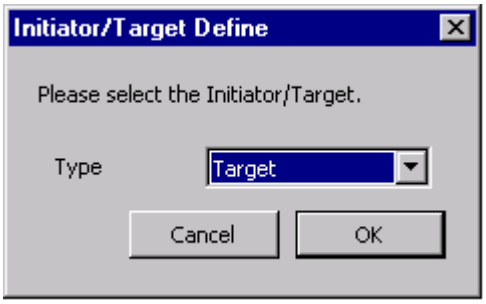


[I/T…]: Change the Initiator / External / Target / RCU Target for the port selected.
Go to Step (9).

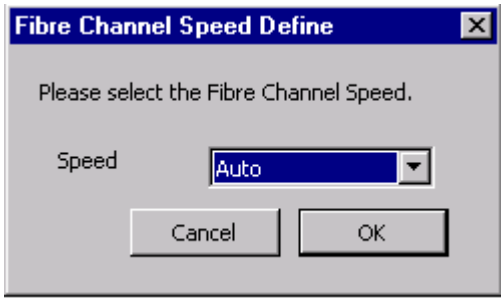
[Speed…]: Change the channel speed for the selected port .
Go to Step (10).

Make sure that the items that have been entered are correct and select (CL) [>>Next].

(9) <Setting the Initiator/Target>
Set the Initiator / External / Target / RCU Target.
After the setting is completed, select (CL) [OK].
Go back to Step (8).



(10) <Setting the channel speed>
Set the channel speed for the channel connected to the specified port.
After the setting is completed, select (CL) [OK].
Go back to Step (8).

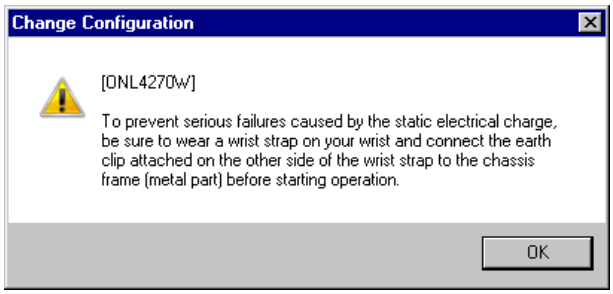


Copyright © 2010, Hitachi, Ltd.

2. SVP pre procedure (ESW Addition)

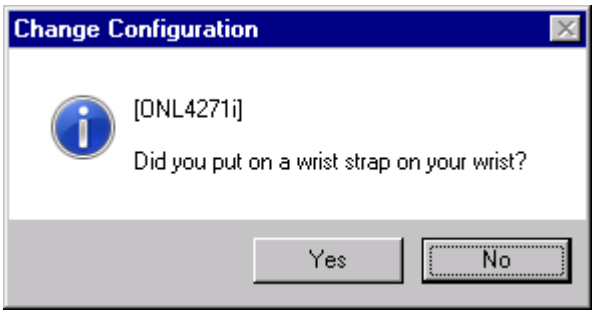
(1) <Wear a wrist strap>

Select (CL) [OK] in response to "To prevent serious failures caused by the static electrical charge, be sure to wear a wrist strap on your wrist and connect the earth clip attached on the other side of the wrist strap to the chassis frame (metal part) before starting operation.".



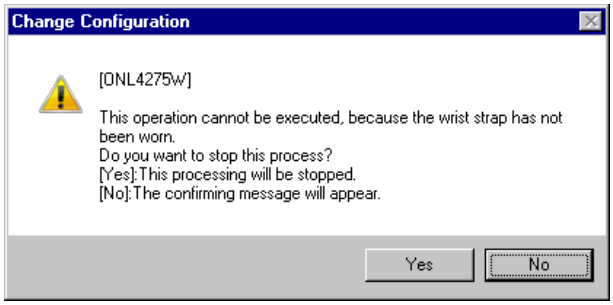
(1)-1<Confirm wearing wrist strap>

In response to a message, "Did you put on a wrist strap on your wrist?".
Select [Yes] when wrist strap is on your wrist.
Select [No] when there is no wrist strap on your wrist.
When [No] is selected (CL), go to Step (1)-2.



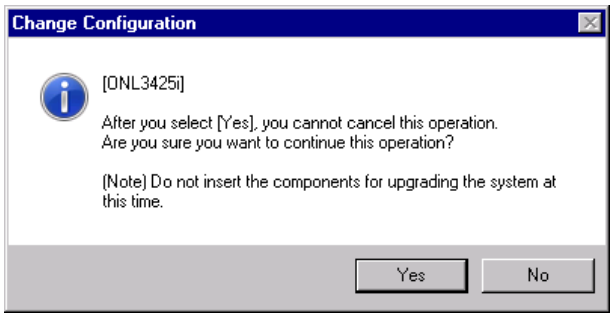
(1)-2

In response to a message, "This operation cannot be excuted, because the wrist strap has not been worn. Do you want to stop this process?
[Yes]: This processing will be stopped.
[No]: This confirming message will appear."
When [Yes] is selected (CL), the routine is returned to Step (2) on page INST03-08A-20.
When [No] is selected (CL), returned to Step (1).

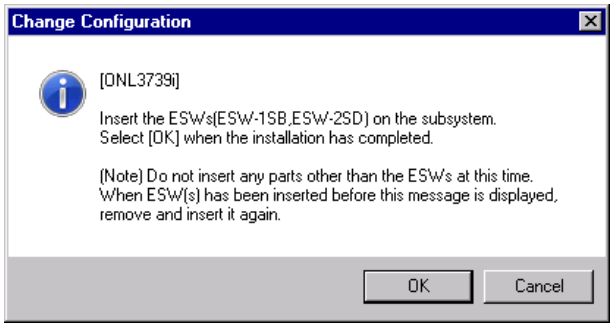


Copyright © 2010, 2014, Hitachi, Ltd.

(2) <Starting the addition>
In response to a message, “After you select [Yes], you cannot cancel this operation. Are you sure you want to continue this operation? (Note) Do not insert the components for upgrading the system at this time.”, select (CL) [Yes]. When [No] is selected (CL), the routine is returned to Step (2) on page INST03-08A-20.



(3) <Addition of the ESW>
When addition of the ESW is required, a message, “Insert the ESWs(ESW-nnn,ESW-nnn) on the subsystem. Select [OK] when the installation has completed. (Note) Do not insert any parts other than the ESWs at this time. When ESW(s) has been inserted before this message is displayed, remove and insert it again.” is displayed.



- When the message is displayed, install the hardware component following the procedure for adding the ESW. When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) needs to be installed, install it together with the ESW.
- When the message is not displayed, go to Step (2) in “5. SVP pre procedure (Channel Adapter Addition)”.

Note: Do not press the [OK] button by mistake before installing the part(s) to be added in the subsystem.

Copyright © 2010, Hitachi, Ltd.

3. Installation Procedure of PCI Express Switch Adapter

Installation Condition

The PCI Express Switch Adapter (DKC-F710I-ESW) is an indispensable option that is to be installed when the subsystem configuration is one of the following.

In case of DKC-0

① Addition of the first set (1SA/2SC)
- Indispensable option

② Addition of the second set (1SB/2SD)
- When the high performance model is selected
- When the CHA is installed in the Option 2 (1FU/2RU) or the Option 3 (1FL/2RL) of the CHA slots
- When the DKA or the CHA is installed in the Option 1 (1AL/2ML) of the DKA slots

In case of DKC-1

① Addition of the first set (1SE/2SG)
- Indispensable option

② Addition of the second set (1SF/2SH)
- When the high performance model is selected
- When the CHA is installed in the Option 2 (1HU/2UU) or the Option 3 (1HL/2UL) of the CHA slots
- When the DKA or the CHA is installed in the Option 1 (1LL/2XL) of the DKA slots

Twin DKC Model

For the twin DKC model, the ESWs that are installed in the DKC-0 and the DKC-1 should be the same in number.
- When ESWs are installed in the ESW slot option 1 (1SB/2SD) of the DKC-0, ESWs should be installed in the ESW slot option 1 (1SF/2SH) of the DKC-1 even if it fails to meet the installation requirements.
- When ESWs are installed in the ESW slot option 1 (1SF/2SH) of the DKC-1, ESWs should be installed in the ESW slot option 1 (1SB/2SD) of the DKC-0 even if it fails to meet the installation requirements.

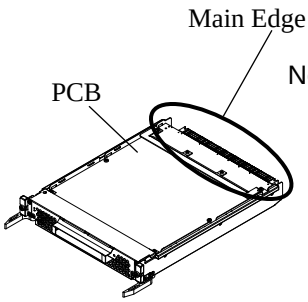
Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

Copyright © 2010, Hitachi, Ltd.

3-1 Insertion of ESW PCB

a. Loosen the screws and remove the dummy plates. (This procedure is not required if the PCB should be installed in the Basic slots.)

b. Insert the ESW PCBs to the DKC and fasten the screws.



Note: 1. Check that the main edge connector of the PCB has no deformation, damage or sticking of dust before installing the PCB. (See INST03-01-70.)

2. When installing the PCB, hold the right and left of the PCB with both hands, and insert it straight not to contact the neighboring PCB.

Table 3.8.1-3 Location of the ESW PCB

DKC	Addition No.	Slot No.		Location No.		Remarks
		Cluster 1	Cluster 2	Cluster 1	Cluster 2	
DKC-0	Basic	1SA	2SC	ESW-1SA	ESW-2SC	
	Option 1	1SB	2SD	ESW-1SB	ESW-2SD	
DKC-1	Basic	1SE	2SG	ESW-1SE	ESW-2SG	
	Option 1	1SF	2SH	ESW-1SF	ESW-2SH	

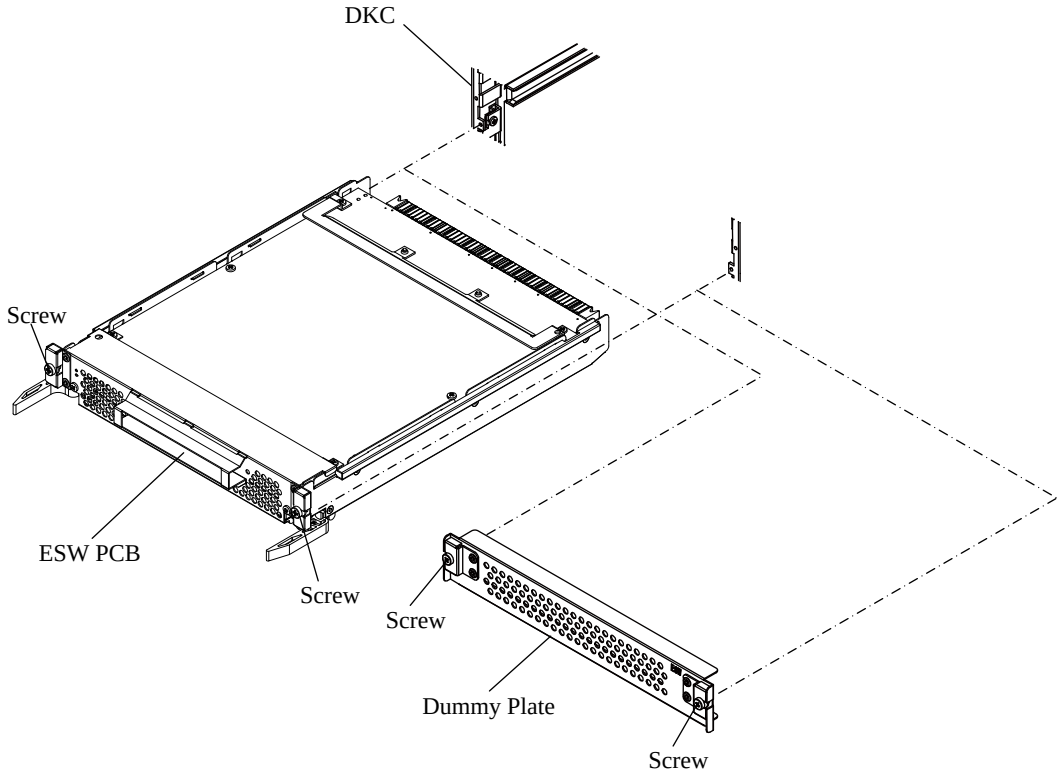


Fig. 3.8.1-1 Insertion of ESW PCB

Copyright © 2010, Hitachi, Ltd.

3-2 Storage of Dummy Plates (This procedure is not required if the PCB should be installed in the Basic slots.)

a. Remove the pocket ASSY from the front of the frame.
b. Install the two removed dummy plates in the pocket ASSY, and tighten them with the four screws.
c. Install the pocket ASSY in the front of the frame.

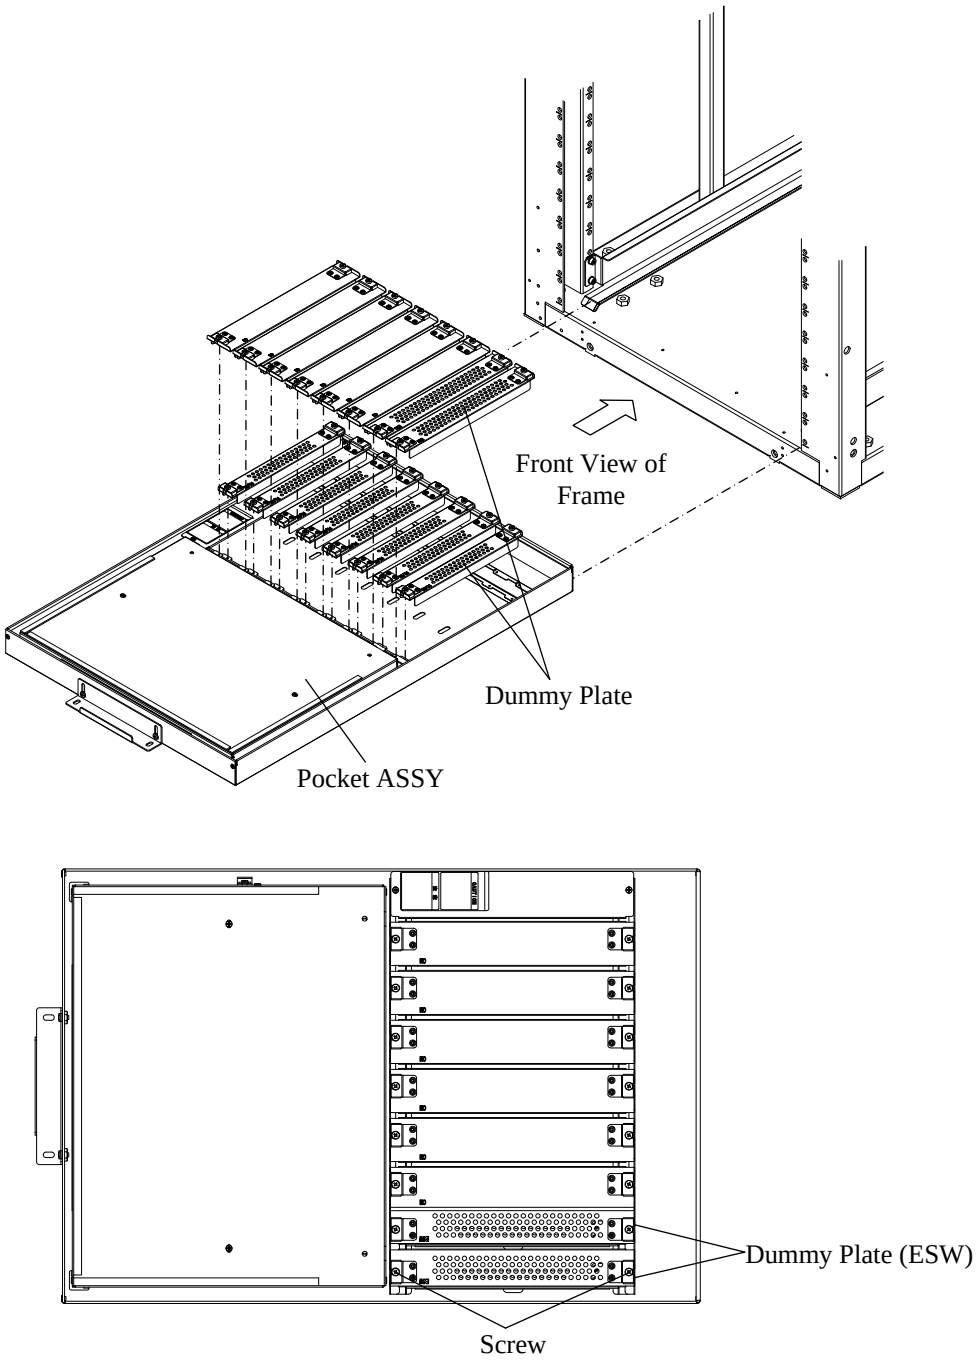

Fig. 3.8.1-2 Storage of Dummy Plates

Copyright © 2010, Hitachi, Ltd.

3-3 Attachment of the Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags to be installed.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

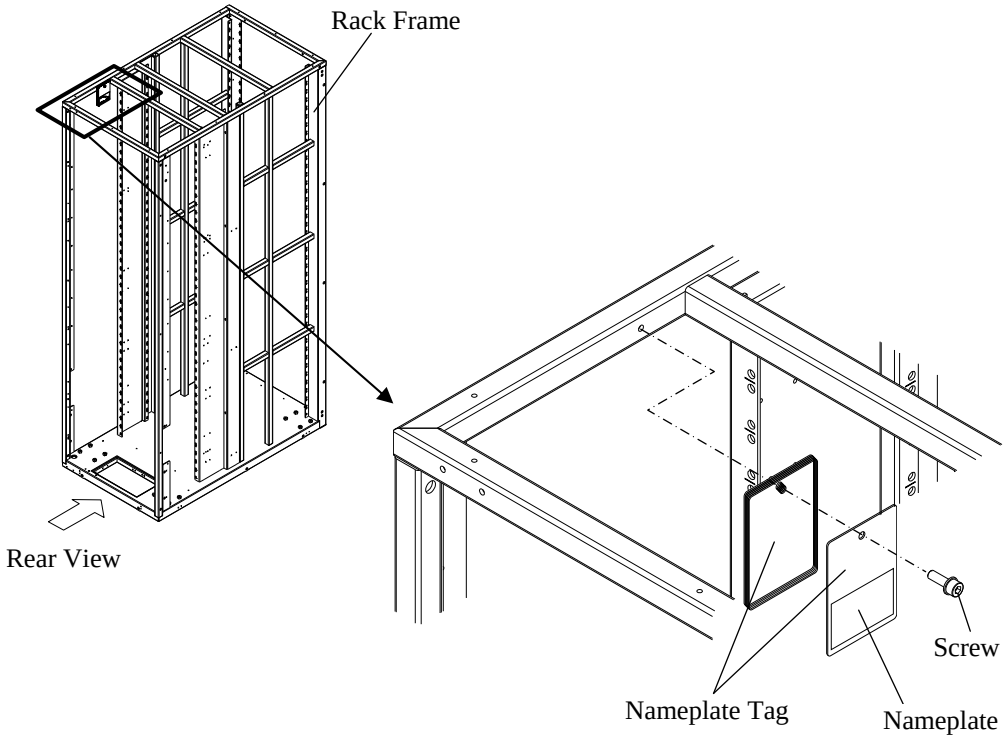

Fig. 3.8.1-3 Attachment of Nameplate

Copyright © 2014, Hitachi, Ltd.

4. Installation Procedure of Inter-Controller Connecting Kit

Installation Condition

Inter-Controller Connecting Kit (DKC-F710I-MDEXC) needs to be added under the following conditions.

- When the ESW is installed in the ESW slot option 1 (1SB/2SD) of the DKC-0 and the ESW slot option 1 (1SF/2SH) of the DKC-1.

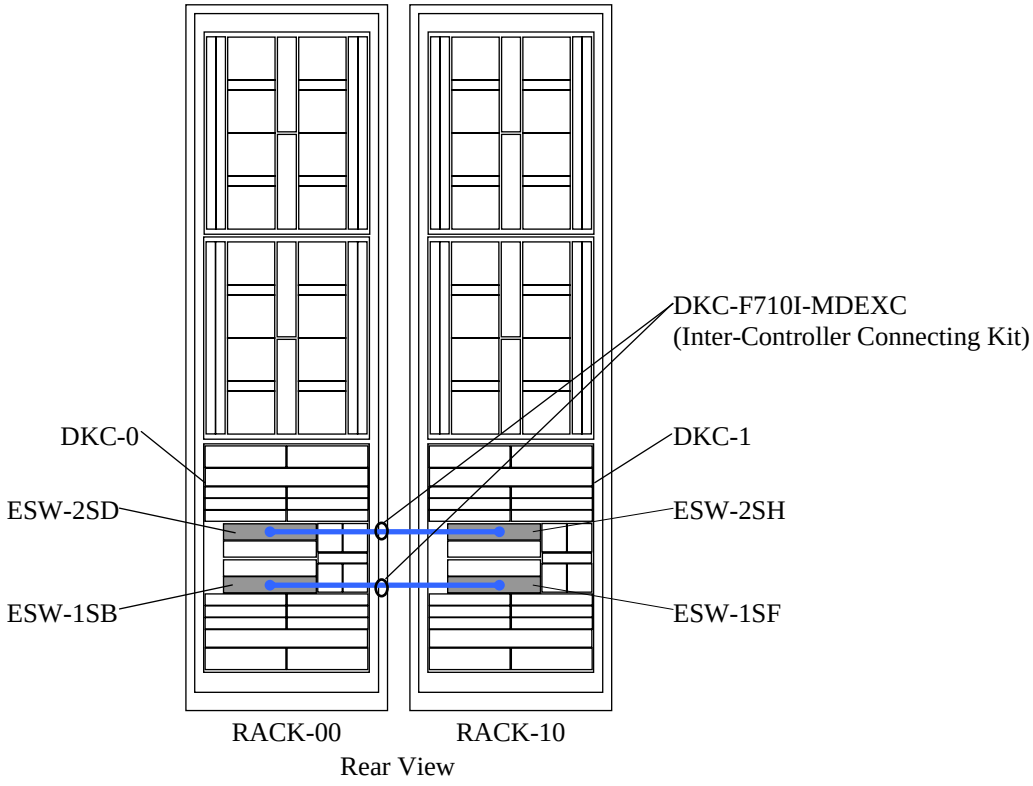

Fig. 3.8.1-3A Mounting Position of Cable

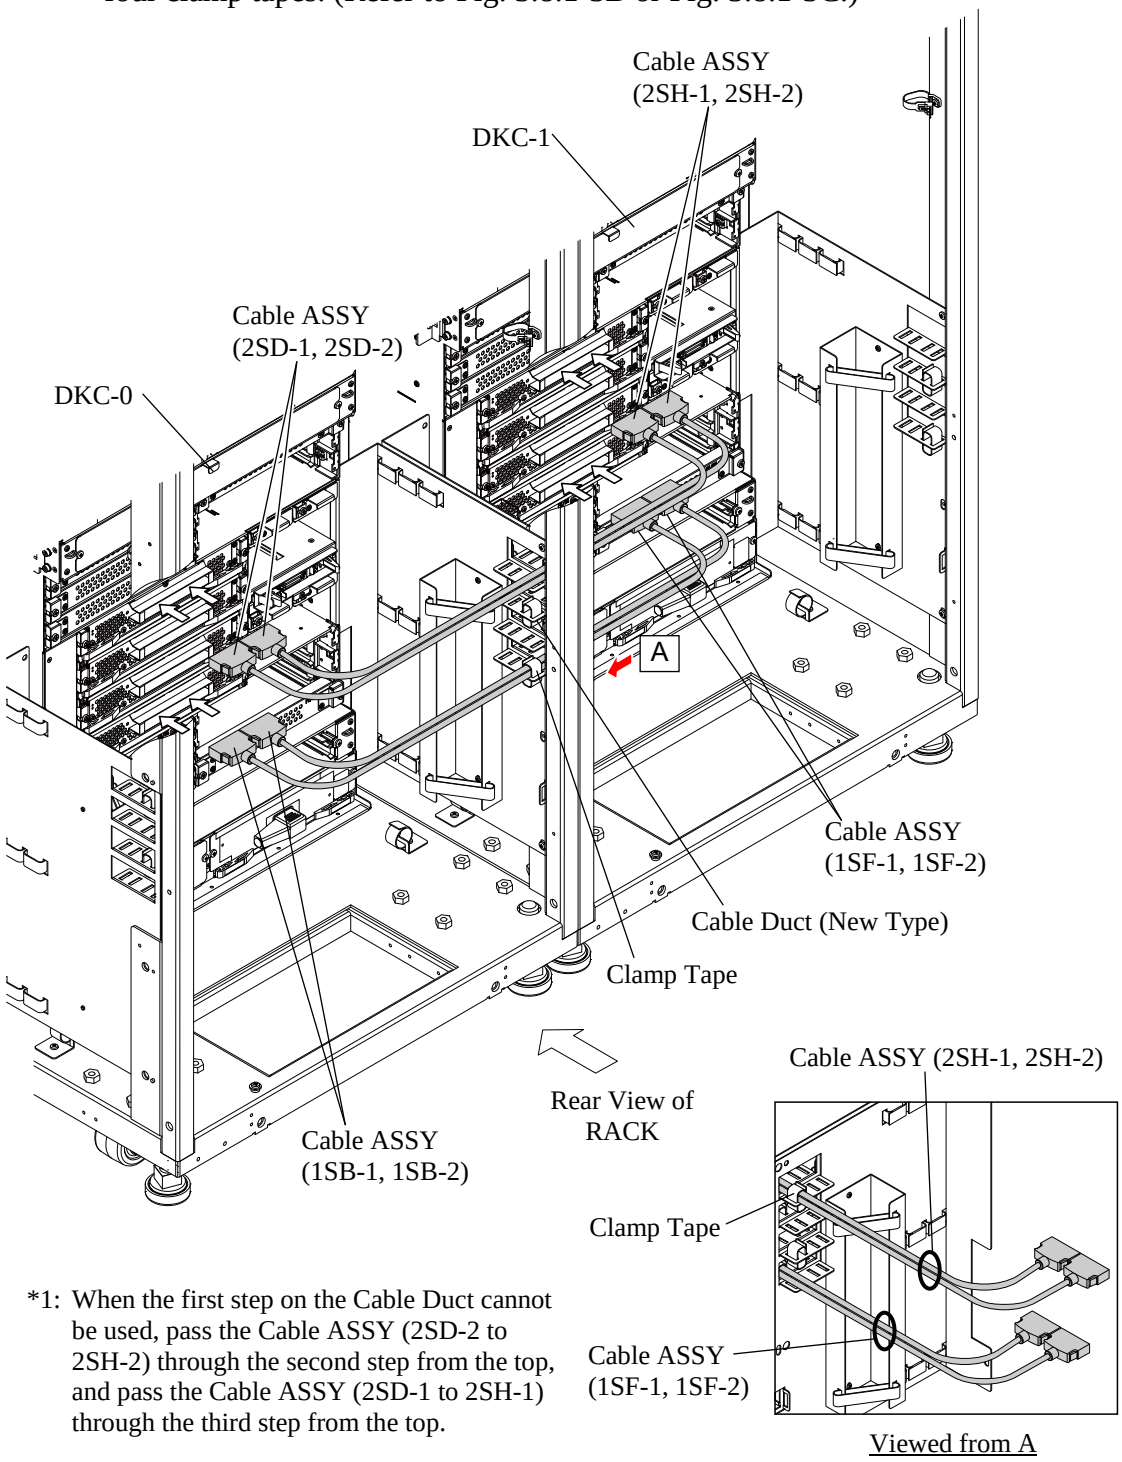
Copyright © 2014, Hitachi, Ltd.

4-1 When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) is required to install, install the cable ASSY.
When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) is not required to install, go to the procedure 5. SVP pre procedure (Channel Adapter Addition).

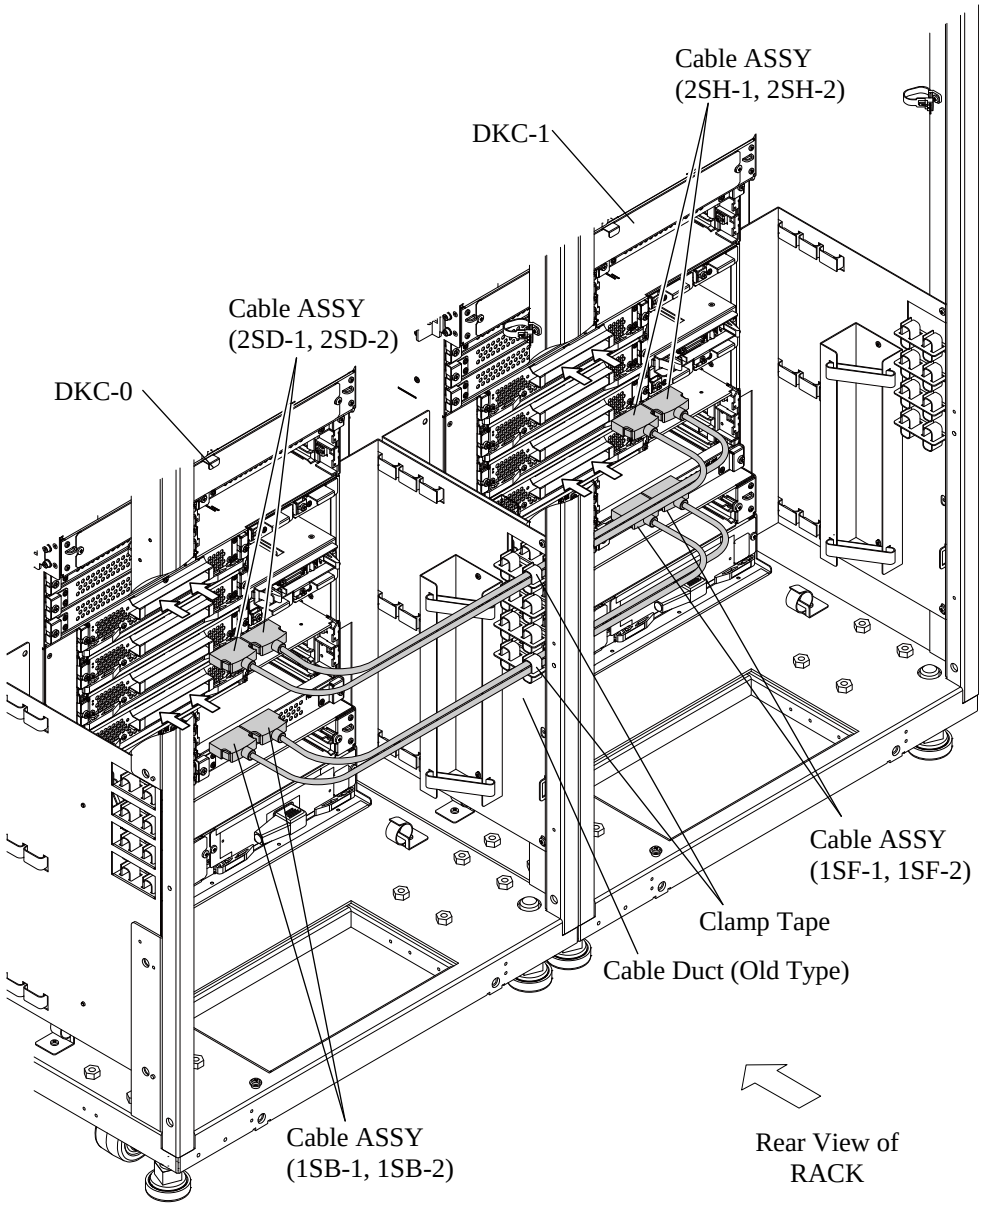
a. Wire the four Cable ASSYs to the rear side of the RACK, and fix them with the two or four clamp tapes. (Refer to Fig. 3.8.1-3B or Fig. 3.8.1-3C.)



*1: When the first step on the Cable Duct cannot be used, pass the Cable ASSY (2SD-2 to 2SH-2) through the second step from the top, and pass the Cable ASSY (2SD-1 to 2SH-1) through the third step from the top.

Fig. 3.8.1-3B Installation of Cables (DKC-0 ↔ DKC-1, New Type)

Copyright © 2014, Hitachi, Ltd.



*1: When the first step on the Cable Duct cannot be used, pass the Cable ASSY (2SD-2 to 2SH-2) through the second step from the top, and pass the Cable ASSY (2SD-1 to 2SH-1) through the third step from the top.

Fig. 3.8.1-3C Installation of Cables (DKC-0 ↔ DKC-1, Old Type)

Copyright © 2014, Hitachi, Ltd.

b. Remove the four black caps from the ESW (1SB and 2SD) of the DKC-0, and connect the cables (1SB-1, 1SB-2, 2SD-1 and 2SD-2).
c. Remove the four black caps from the ESW (1SF and 2SH) of the DKC-1, and connect the cables (1SF-1, 1SF-2, 2SH-1 and 2SH-2).

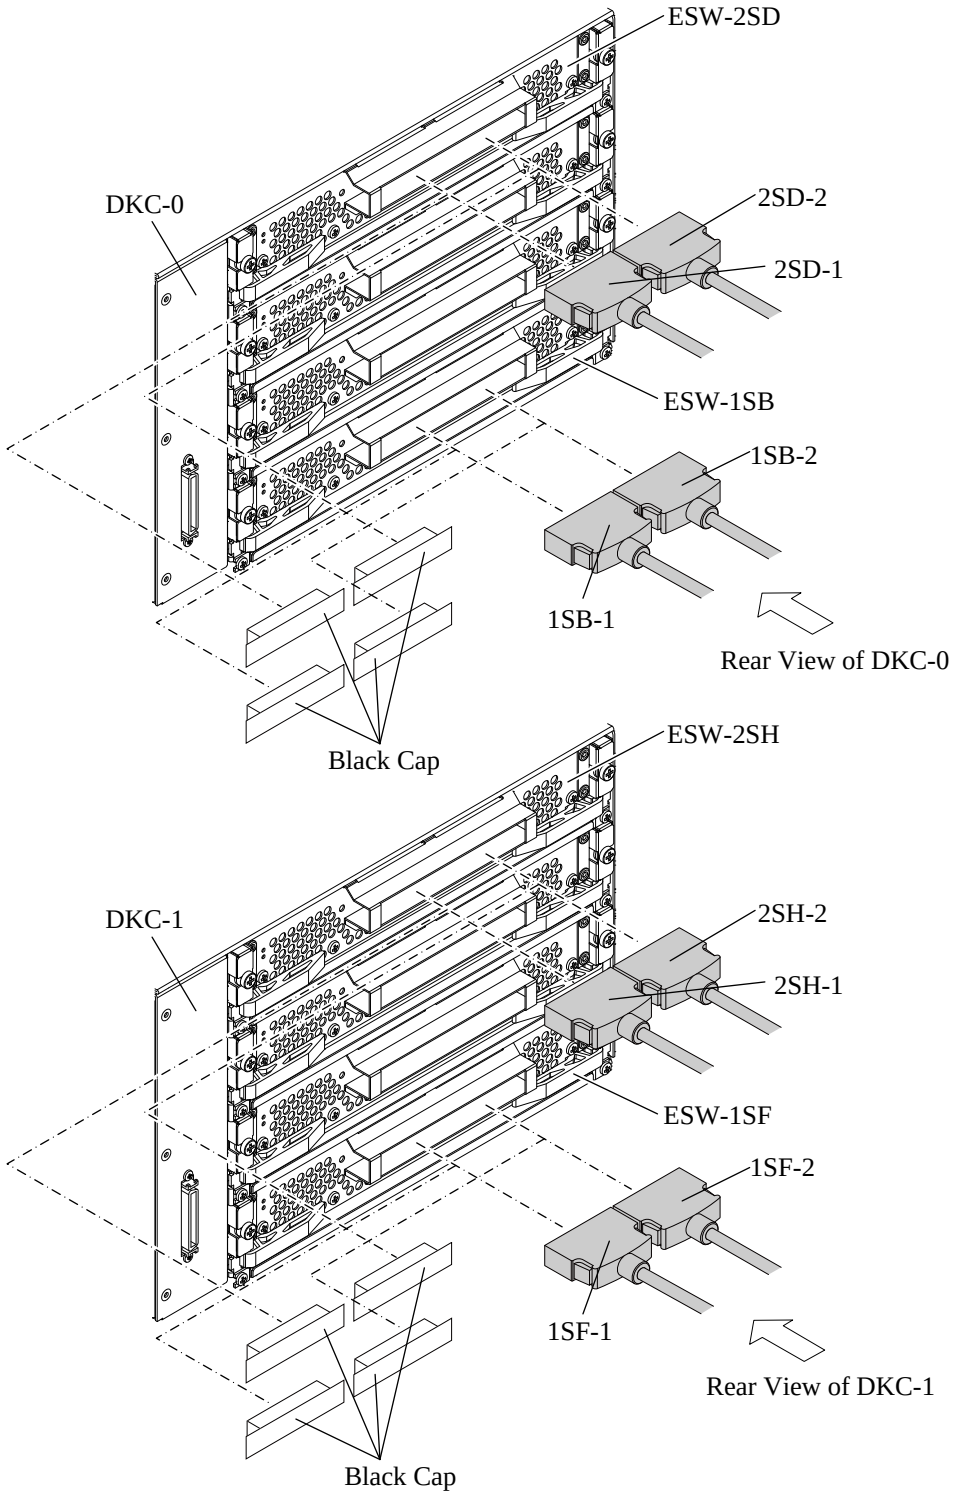


Fig. 3.8.1-3D Connection of Cables

Copyright © 2014, Hitachi, Ltd.

4-2 Attachment of Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

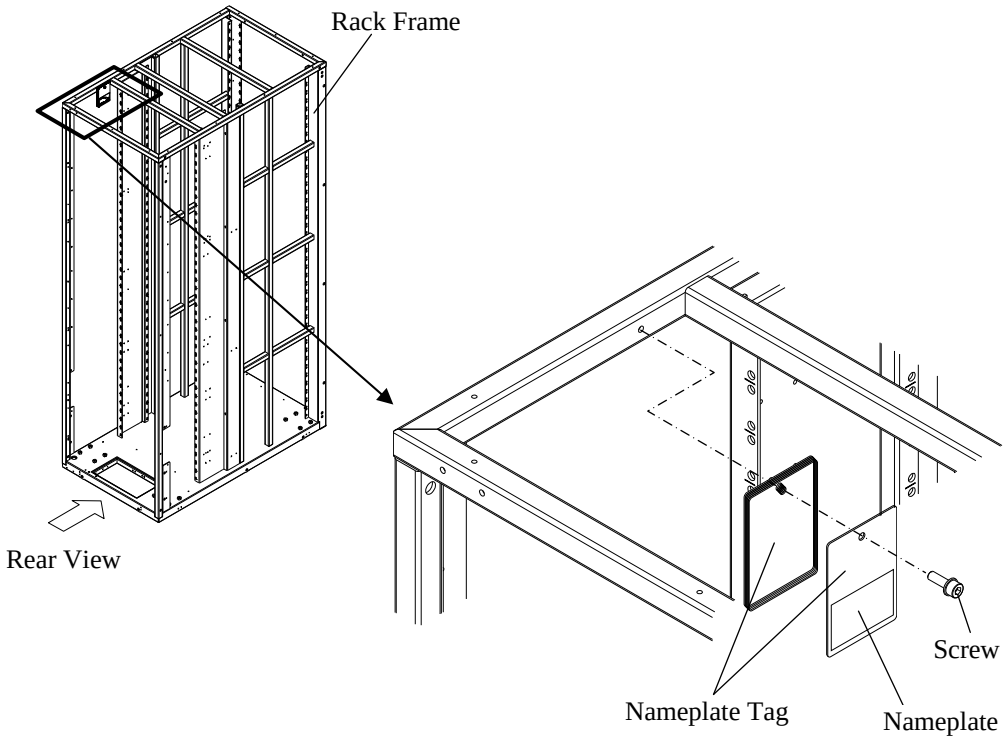

Fig. 3.8.1-3E Attachment of Nameplate

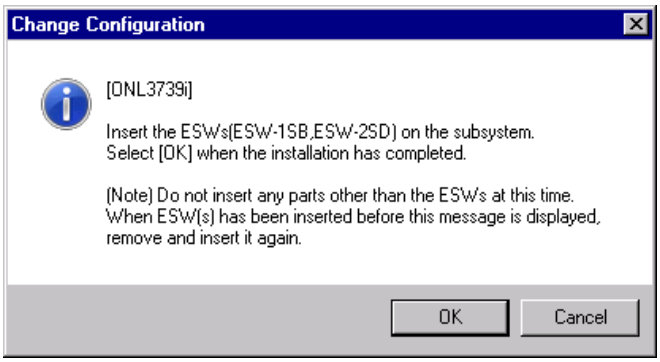
Copyright © 2010, 2014, Hitachi, Ltd.

5. SVP pre procedure (Channel Adapter Addition)

(1) <Making sure of completion of the hardware addition>
After the ESW addition is completed, select (CL) [OK] in response to a message, “Insert the ESWs(ESW-nnn,ESW-nnn) on the subsystem. Select [OK] when the installation has completed. (Note) Do not insert any parts other than the ESWs at this time. When ESW(s) has been inserted before this message is displayed, remove and insert it again.”.



(Eg. ESW-1SB, ESW-2SD)

---

(2) <Downloading the microprogram>
The microprogram is downloaded to the SM.
The progress of the downloading is displayed.

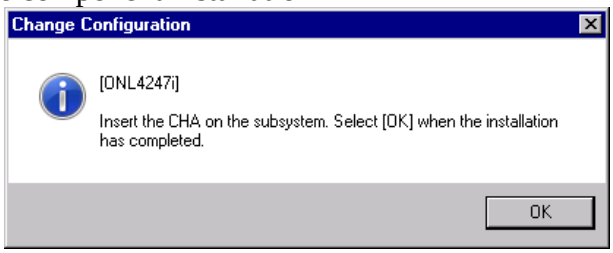
---

(3)
“Changing the subsystem configuration data …” is displayed.

---

(4) <Making sure of completion of the hardware component installation>
A message, “Insert the CHA on the subsystem. Select [OK] when the installation has completed.” is displayed.

Note: Do not press the [OK] button by mistake before installing the part(s) to be added in the subsystem.



Copyright © 2010, 2014, Hitachi, Ltd.

6. Installation Procedure of Fibre 8/16-port Host Adapter

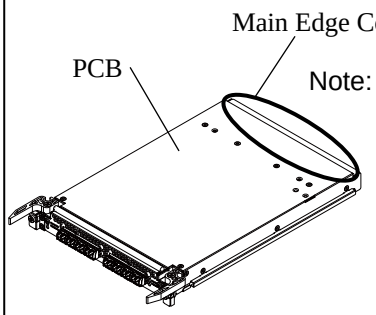
Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

6-1 Insertion of the PCBs

a. Loosen the screws and remove the dummy plates. (This procedure is not required if the PCB should be installed in the Basic slots.)

Note: Remove the dummy plate just before installing the PCB.
If the dummy plate is kept removed for a long time, the wind doesn't flow among installed PCBs, causing the PCBs' temperature rise which may result in temperature warning or temperature alarm.

b. Insert the PCBs to the correct locations in the DKC and tighten the screws.



Note:
- Check that the main edge connector of the PCB has no deformation, damage or sticking of dust before installing the PCB. (See INST03-01-70.)
- When installing the PCB, hold the right and left of the PCB with both hands, and insert it straight not to contact the neighboring PCB.

Table 3.8.1-4 Inserting Location

DKC	Addition No.	Slot No.		Location No.		Remarks
		Cluster 1	Cluster 2	Cluster 1	Cluster 2	
DKC-0	Basic	1EU	2QU	CHA-1EU	CHA-2QU	
	Option 1	1EL	2QL	CHA-1EL	CHA-2QL	
	Option 2	1FU	2RU	CHA-1FU	CHA-2RU	
	Option 3	1FL	2RL	CHA-1FL	CHA-2RL	
	Option 4	1AL	2ML	CHA-1AL	CHA-2ML	
	Option 5	1AU	2MU	CHA-1AU	CHA-2MU	
DKC-1	Basic	1GU	2TU	CHA-1GU	CHA-2TU	
	Option 1	1GL	2TL	CHA-1GL	CHA-2TL	
	Option 2	1HU	2UU	CHA-1HU	CHA-2UU	
	Option 3	1HL	2UL	CHA-1HL	CHA-2UL	
	Option 4	1LL	2XL	CHA-1LL	CHA-2XL	
	Option 5	1LU	2XU	CHA-1LU	CHA-2XU

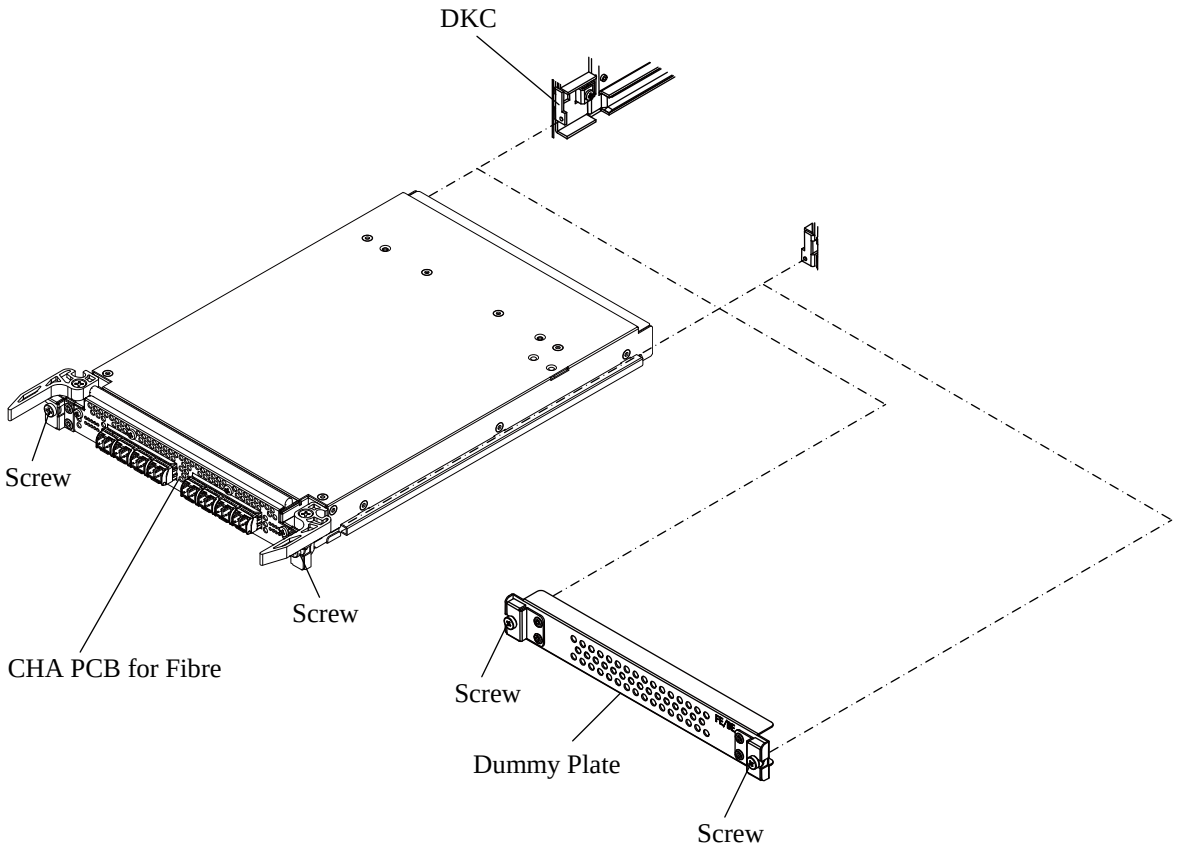

Fig. 3.8.1-4 Insertion of PCB

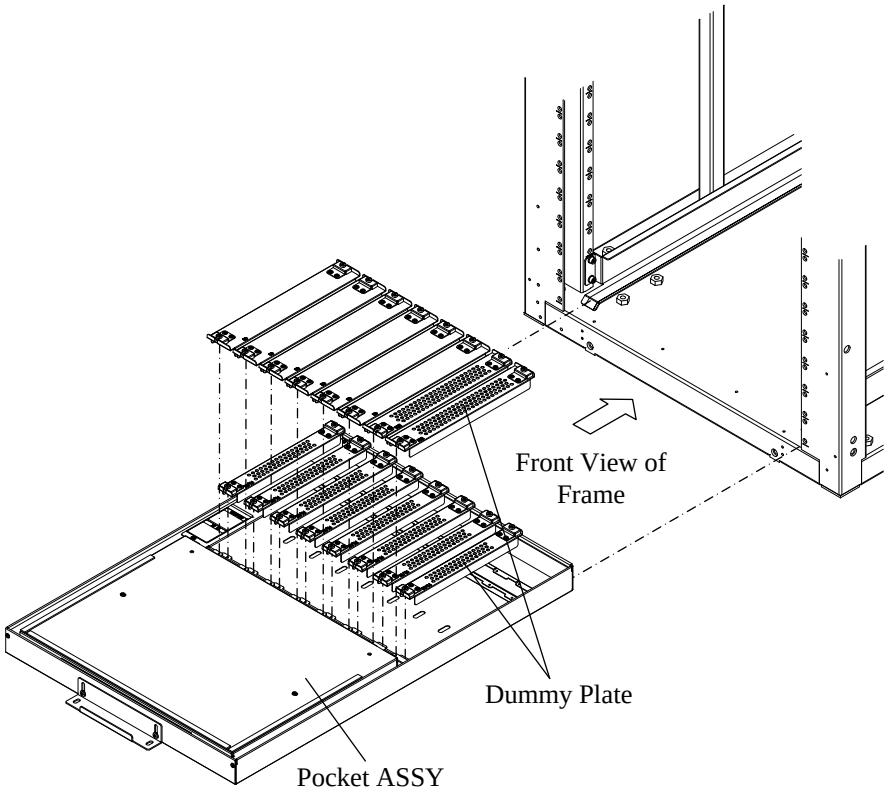
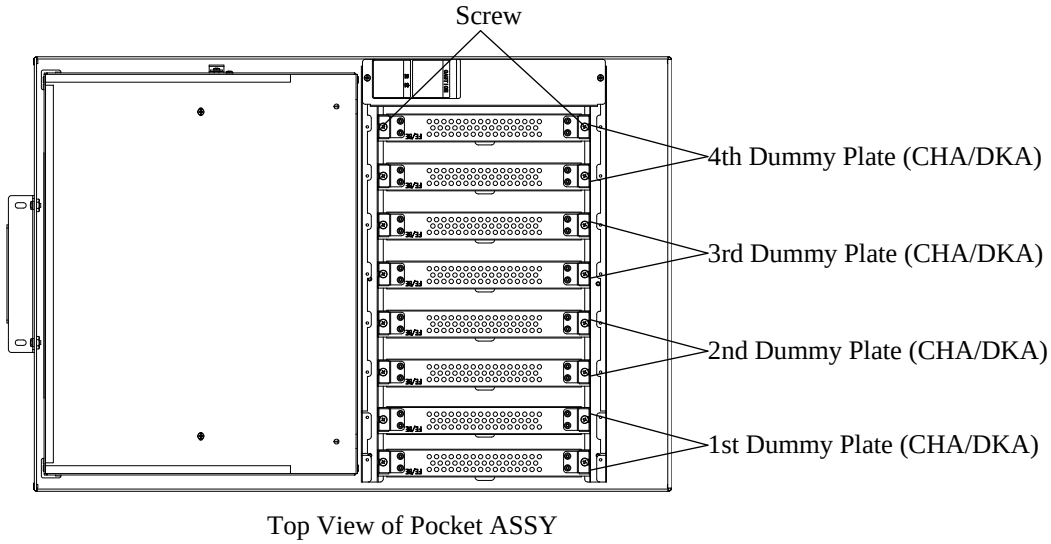
Copyright © 2010, 2014, Hitachi, Ltd.

6-2 Storage of Dummy Plates (This procedure is not required if the PCB should be installed in the Basic slots.)

a. Remove the pocket ASSY from the front of the frame.
b. Install the two removed dummy plates in the pocket ASSY, and tighten them with the four screws.
   When dummy plates are installed in the upper part, remove the upper dummy plates once, install the lower dummy plates, and then install the upper dummy plates again.
c. Install the pocket ASSY in the front of the frame.





Top View of Pocket ASSY

Fig. 3.8.1-5 Storage of Dummy Plates

6-3 Cleaning the fibre cable connectors

For the tools needed for the cleaning, refer to the tool list on page PARTS06-10.

a. Blow compressed gas against the connector using an air sprayer (for about five seconds).
b. Wipe the connector lightly with a piece of cut gauze wet with ethyl alcohol.
c. Blow compressed air again and check the result of the cleaning (None of dust, sticking of foreign matter, and dirt must be observed).

6-4 Connection of the optical fibre cables

When wiring for optical fibre cables from the floor

a. Draw the optical fibre cable from the rear lower opening of the frame.

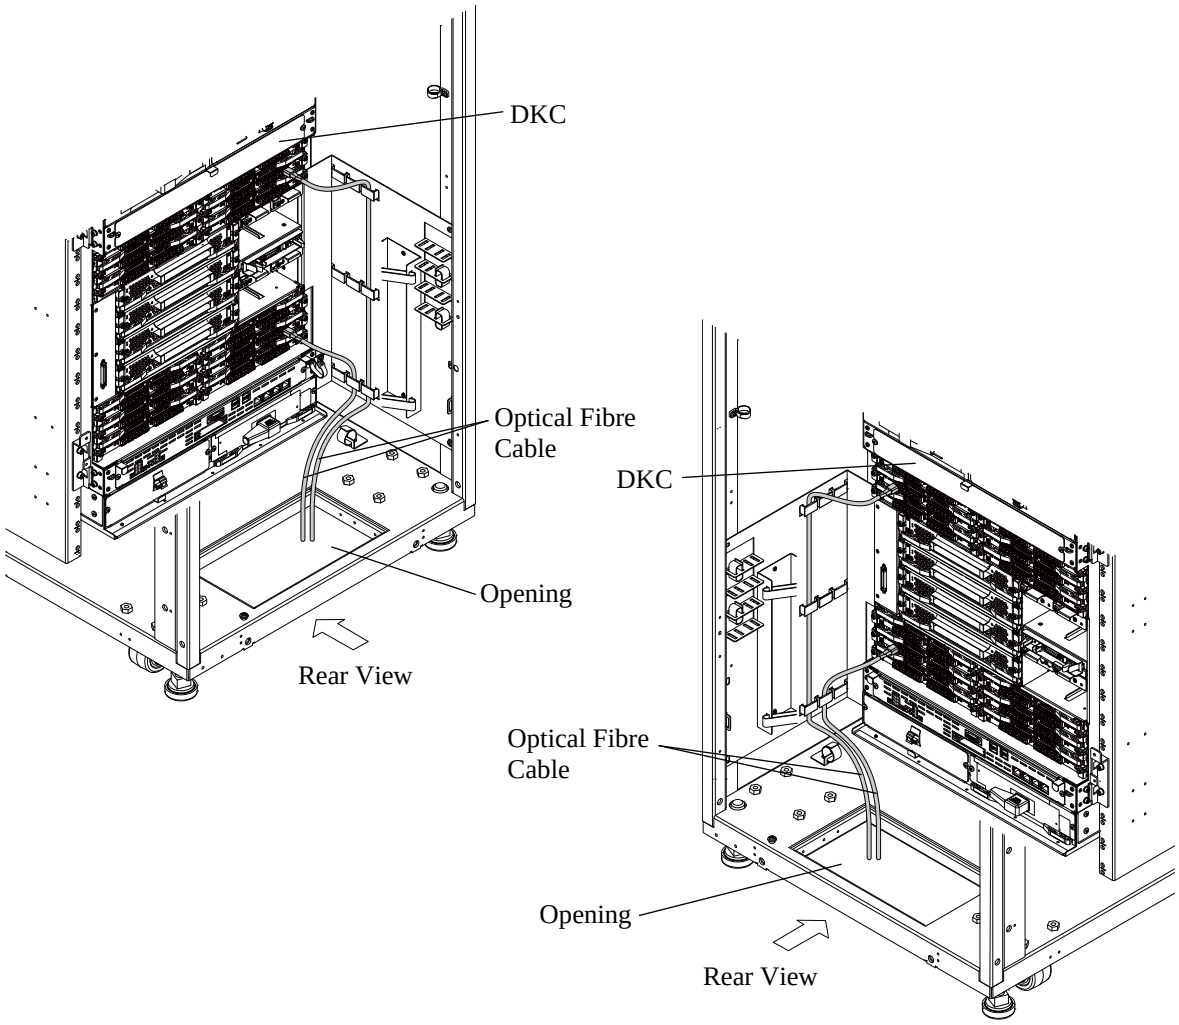

Fig. 3.8.1-6 Attachment of Optical Fibre Cables

Copyright © 2010, Hitachi, Ltd.

b. Connect the optical fibre cables to the PCB.

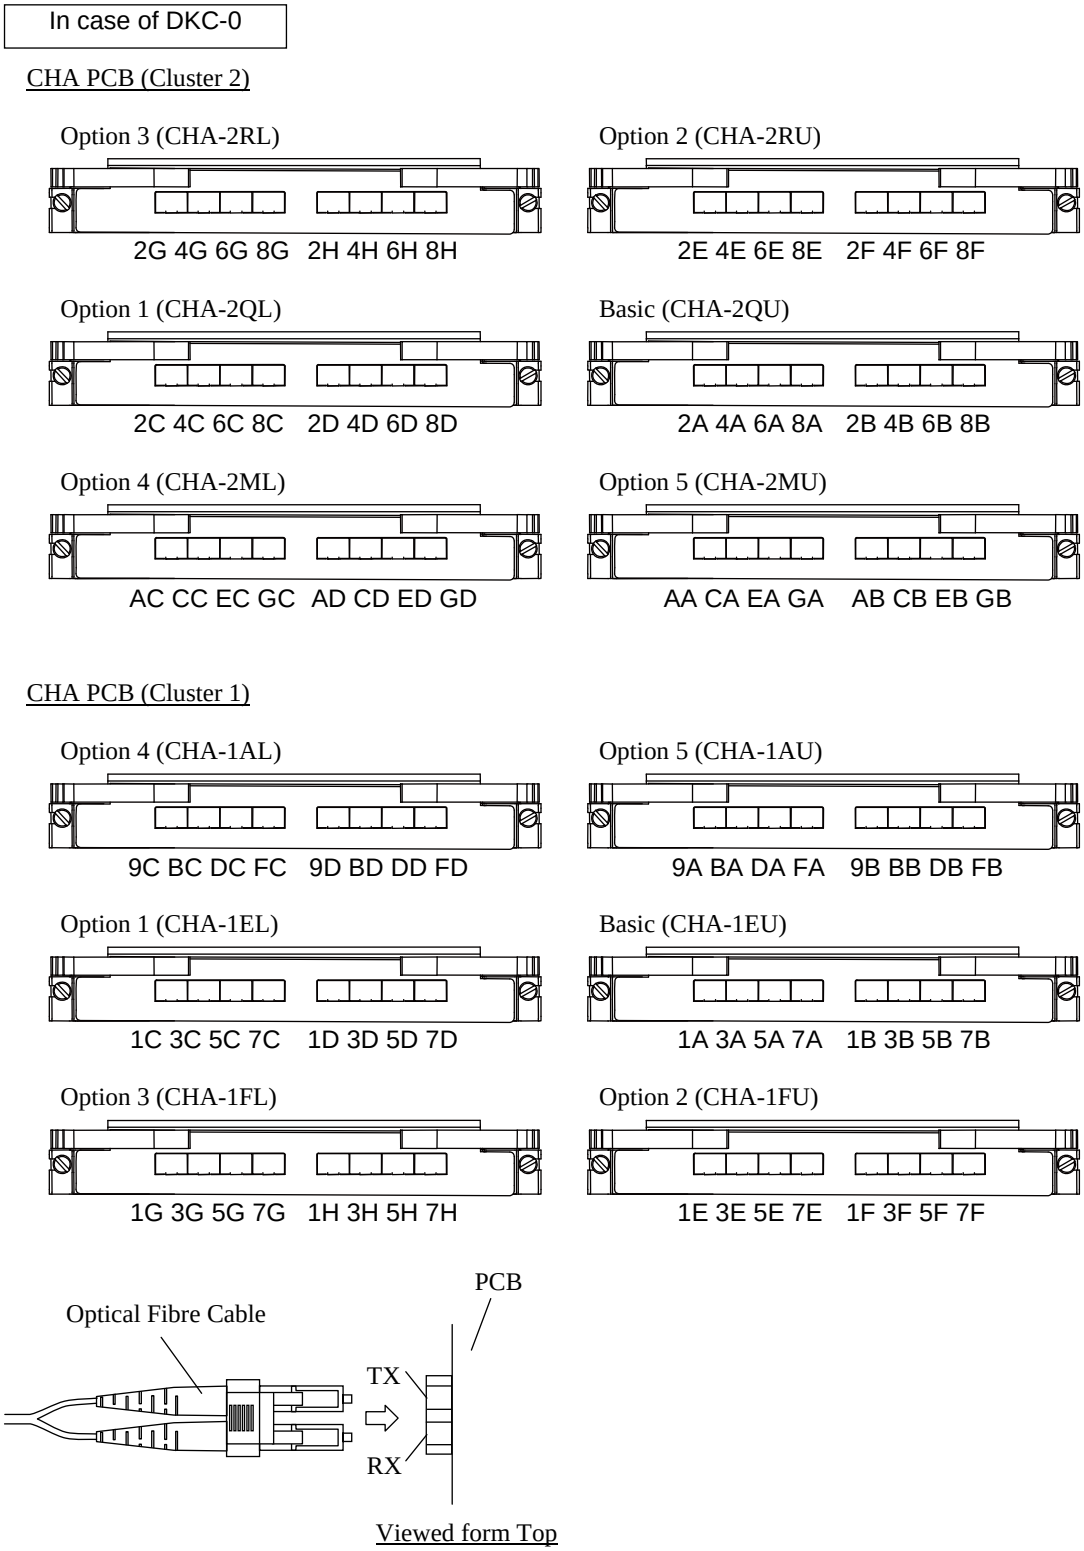

Fig. 3.8.1-7 Connection of Optical Fibre Cables

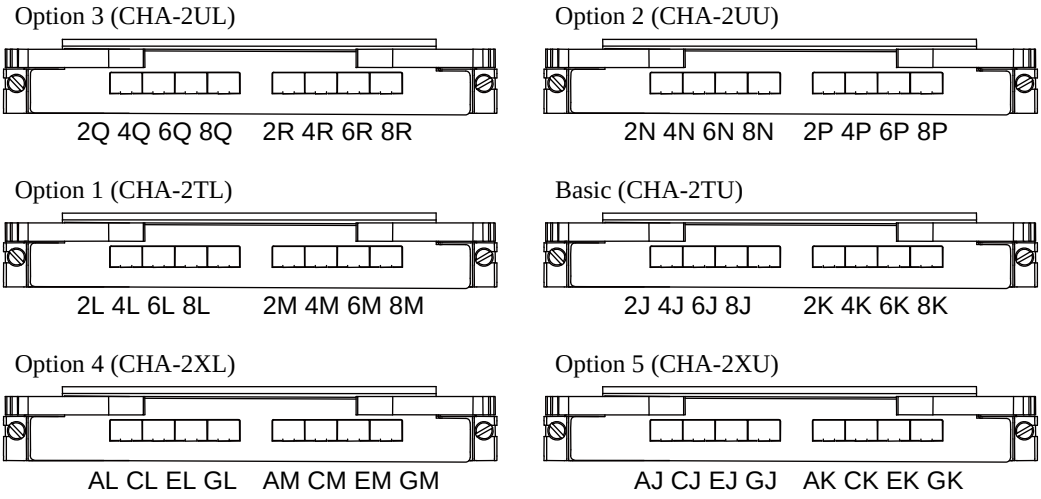
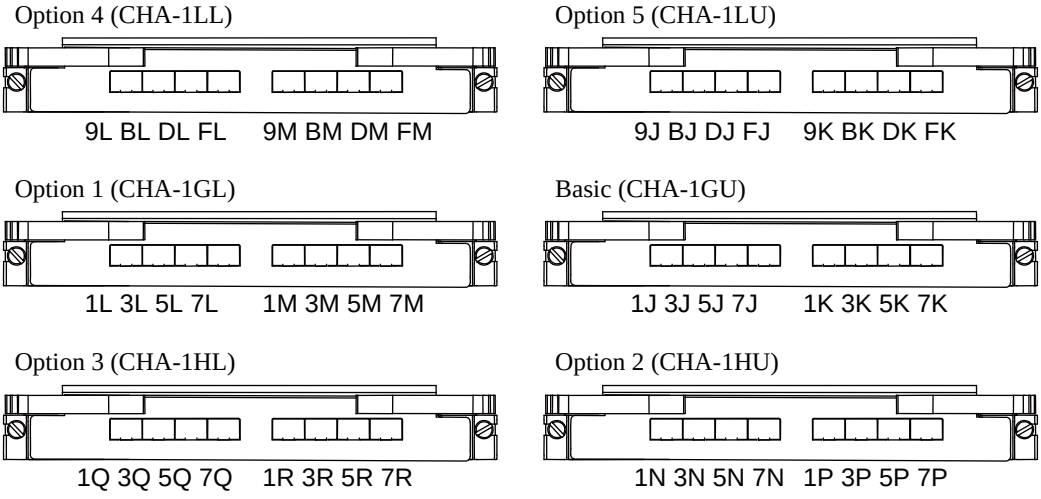
Copyright © 2010, Hitachi, Ltd.

In case of DKC-1

CHA PCB (Cluster 2)



CHA PCB (Cluster 1)



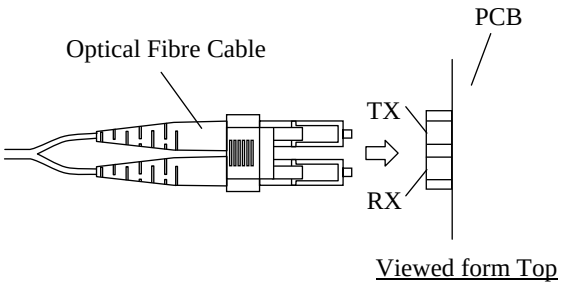


Fig. 3.8.1-8 Fixation of Optical Fibre Cables

When wiring for the optical fibre cables from the round opening of the top cover

a. Draw the optical fibre cable from the opening of the top cover, and wire the cable in the frame. (Refer to Fig. 3.8.1-10 or Fig. 3.8.1-11.)
b. Connect the optical fibre cables to the PCB in the DKC. (Refer to Fig. 3.8.1-7 or Fig. 3.8.1-8.)
c. Secure the optical fibre cable with the binder on the frame side.

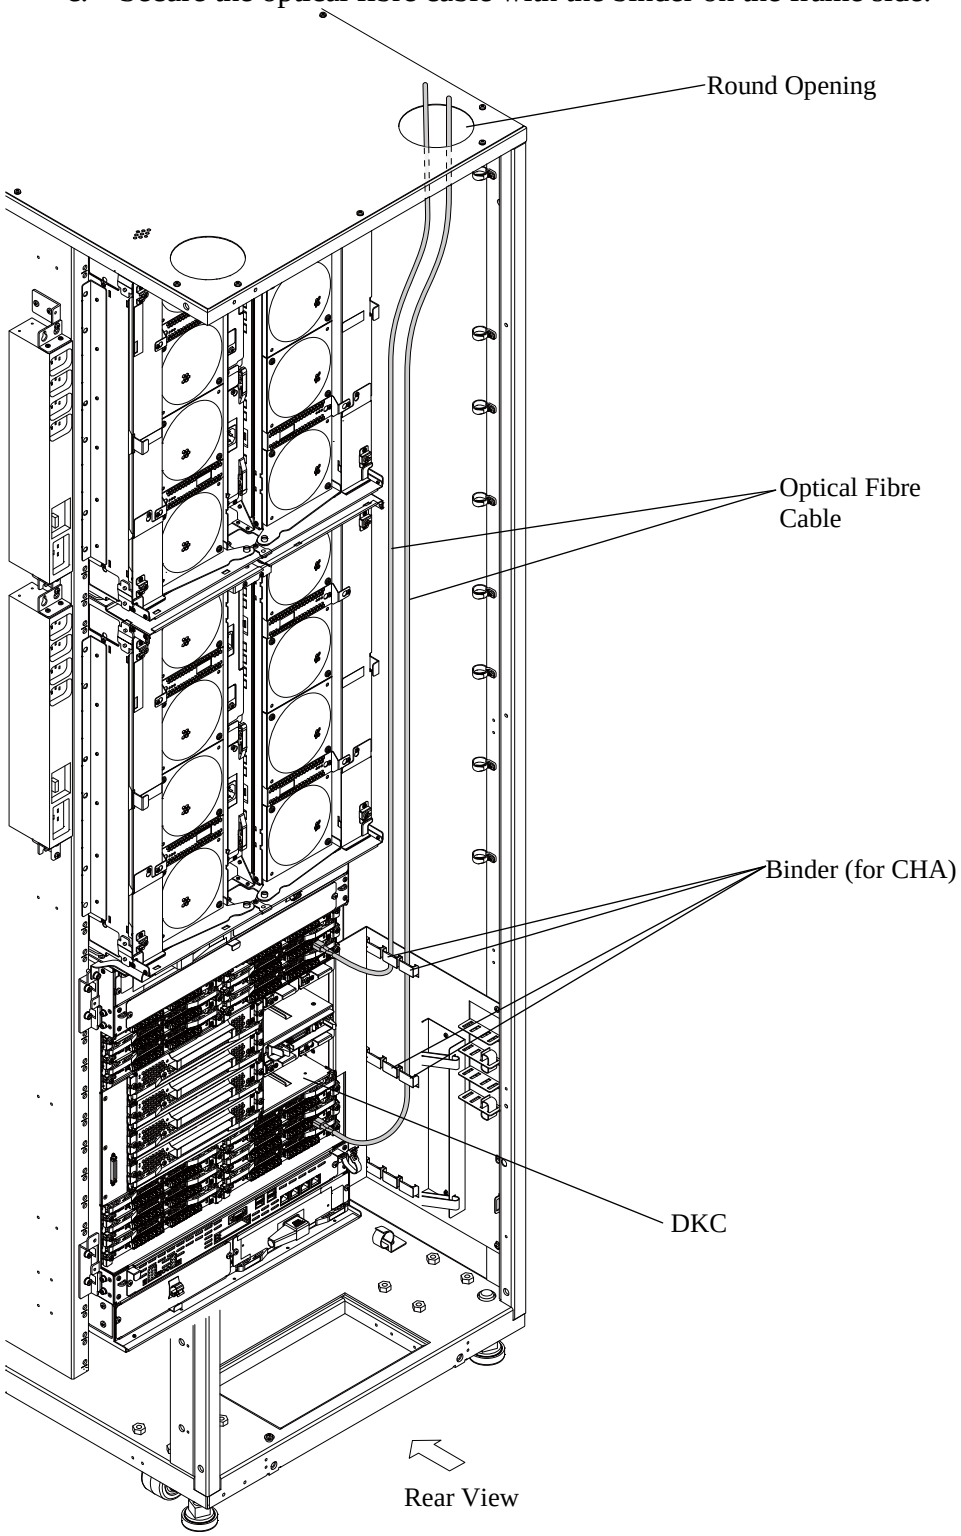

Fig. 3.8.1-10 Attachment of Optical Fibre Cables

When wiring for the optical fibre cables from the window opening of the top cover

a. Loosen the two screws of the top cover, and slide the window opening toward the front side. (Refer to Fig. 3.8.1-12 or Fig. 3.8.1-13.)
b. Draw the optical fibre cable from the opening of the top cover, and wire the cable in the frame.
c. Connect the optical fibre cables to the PCB in the DKC. (Refer to Fig. 3.8.1-7 or Fig. 3.8.1-8.)
d. Secure the optical fibre cable with the binder on the frame side.
e. Slide the window to close the opening, and retighten it with the two screws.

6-5 Attachment of the Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags to be installed.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

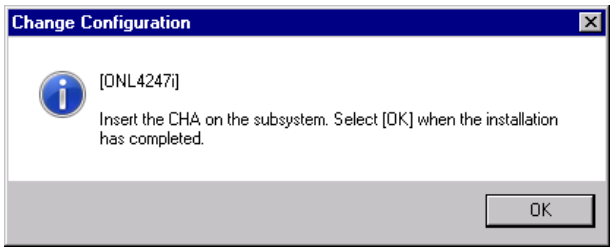
Copyright © 2010, 2014, Hitachi, Ltd.

7. SVP post procedure

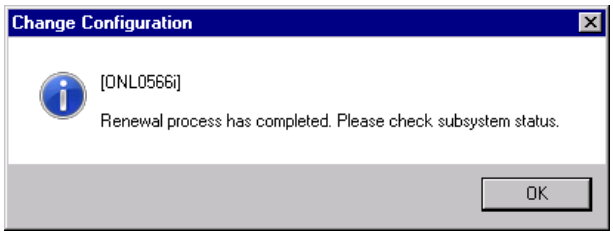
(1) <Check that hardware components are installed>
Select (CL) [OK] after making sure that all hardware components are installed correctly in response to “Insert the CHA on the subsystem. Select [OK] when the installation has completed.”.

When [Cancel] is selected (CL), returns to INST03-08A-20 step (3).



(2) <Restore CHA>
“Restoring the CHA...” is displayed.

(3) <End of system update processing>
“Renewal process has completed. Please check the subsystem status.” is displayed when recovery processing on all installed components is completed. Select (CL) [OK] in response to this message.

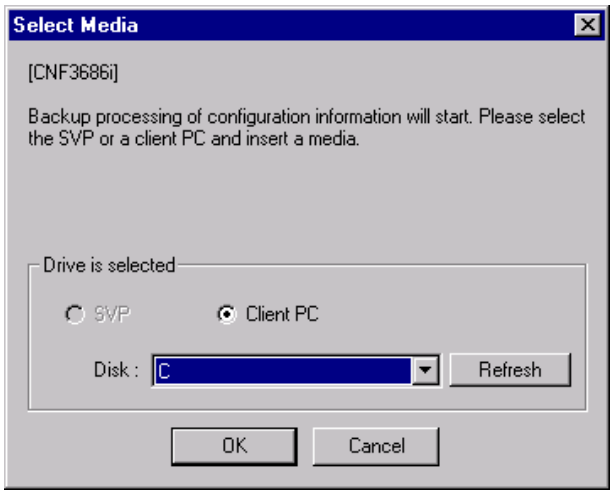


Copyright © 2010, 2012, Hitachi, Ltd.

(4)

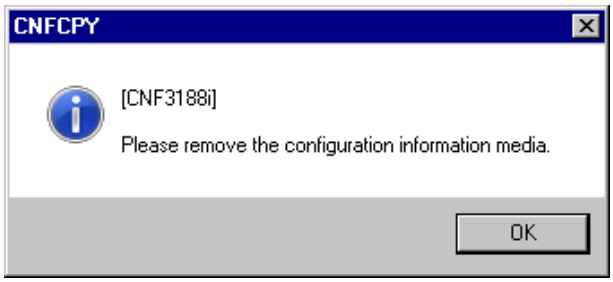
Execute an operation for backing up the configuration information.
Prepare the removable media for backup and insert the media.
Please select (CL) the [Refresh] button, and update drive information.
Select (CL) the drive and the PC in which the media was inserted. Select (CL) the [OK] button.

Note: For the procedure of backing up the configuration information to a CD-R, see page MICRO07-140.



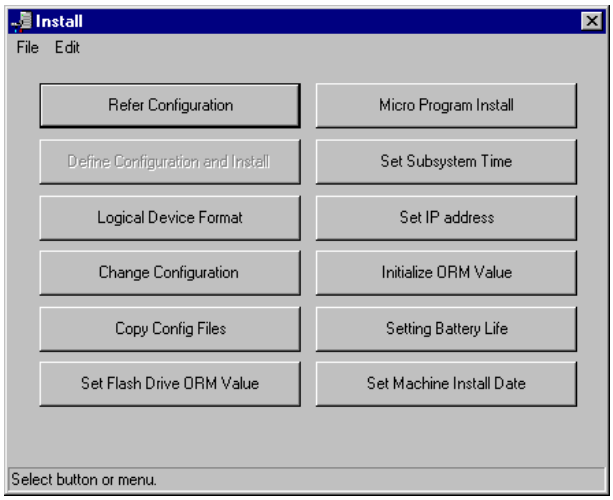
(5)

When this procedure is completed, the message “Please remove the configuration information media.” is displayed.
Remove the configuration information media, Select (CL) [OK].



(6)

After the procedure is completed, return to “Install”.
Select (CL) [File]-[Exit].



(7) <Mode Change>
Change the mode to View Mode.

Return to the working table and do the rest of the work.
New Installation: INST02-20,
Non-Disruptive Installation: INST02-40

Copyright © 2010, 2014, Hitachi, Ltd.

3.8.2 Installation of Mainframe Fibre 16-port Host Adapter, PCI Express Switch Adapter and Inter-Controller Connecting Kit (DKC-F710I-16MFS/16MFL/16MUS/16MUSR/16MUL/ESW/MDEXC)

Note: Be sure to check the following conditions before performing the addition.
When the installed ESWs (DKC-F710I-ESW) per DKC are two sets or more, or the installed CHAs (DKC-F710I-16MFS/16MFL/16MUS/16MUSR/16MUL) per DKC are three sets or more, the Additional Controller PS (DKC-F710I-APC) is required.

Table 3.8.2-1 Parts List

No.	Model Number	Part Name	Part No.	Quantity	Remarks
1	DKC-F710I-16MFS	WP711-A	5541861-A	2	CHA PCB

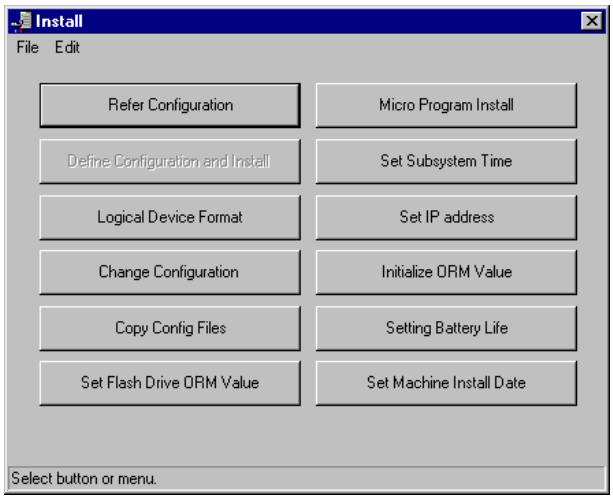
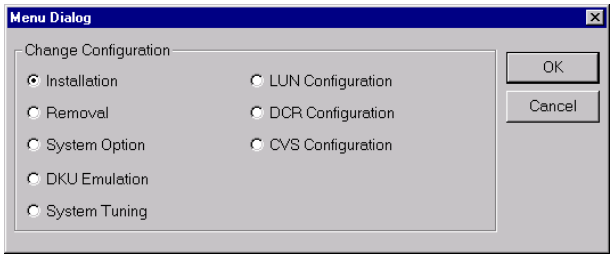
1. Setting up the New Device Structure Information

(1) <Mode Change>
Change the mode to Modify Mode.
Select (CL) [Install].

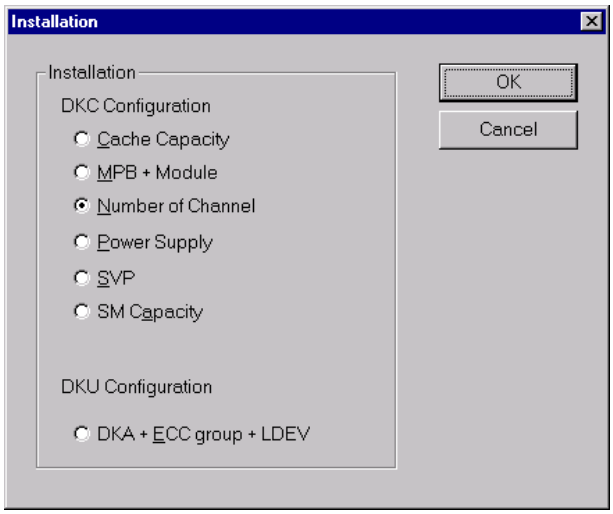
(2) <Start the 'Menu Dialog' screen>
Select (CL) [Change Configuration].



(3) <Start Device Structure Setup screen>
Select (CL) [Installation] in the 'Menu Dialog' dialog box and select (CL) [OK].



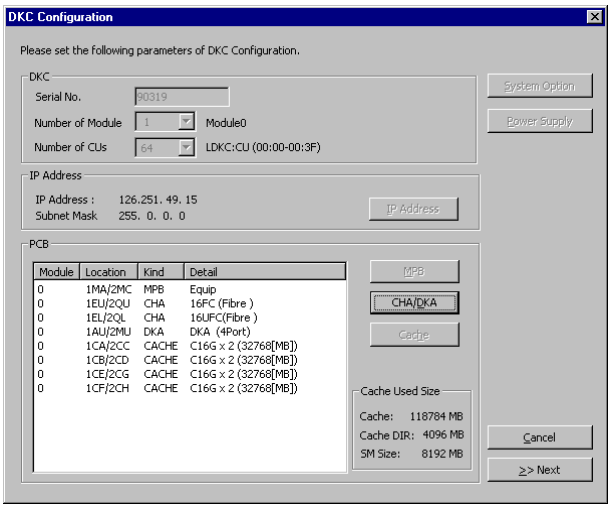
(4) <Select a part to be changed>
Select (CL) [Number of Channel], and select (CL) [OK].



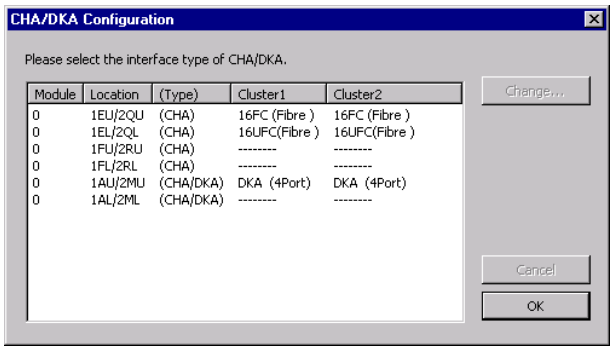
Copyright © 2010, Hitachi, Ltd.

(5) <DKC Configuration screen>
In the 'DKC Configuration' screen, select (CL) [CHA/DKA].
Go to Step (6).

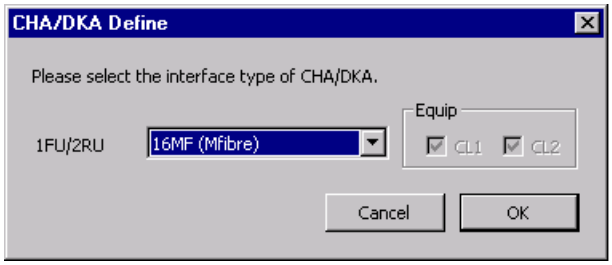
After the setting is completed, select (CL) [>>Next].
(Go to Step (8).)
In the case of selecting (CL) [Cancel], this operation procedure terminates.



(6) <Setting the CHA type>
In the 'CHA/DKA Configuration' screen, select the location(s) to which the addition is to be made, and select (CL) [Change...].
Go to Step (7).
Make sure that the entry that has been made is correct and select (CL) [OK].
Go back to Step (5).

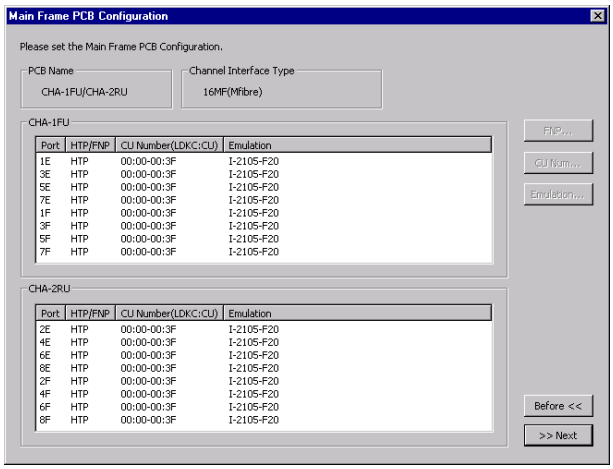


(7) <Select the CHA type>
In the 'CHA/DKA Define' screen, select Mfibre PCB.
After the setting is completed, select (CL) the [OK].
Go back to Step (6).



Copyright © 2010, 2011, Hitachi, Ltd.

(8) <Mainframe PCB Configuration screen>
Enter the necessary items in the 'Mainframe PCB Configuration' screen.
Repeat this operation as many times as the CHAs installed.



[FNP...]: Set the HTP/FNP for the selected port.
Go to Step (9).

[CU Num...]: Set the number of the CU connected to the selected port.
Go to Step (10).

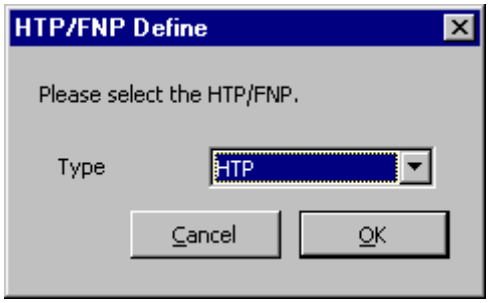
[Emulation...]: Set the DKC Emulation for the selected port.
Go to Step (11).

Make sure that the items that have been entered are correct and select (CL) [>>Next].
Go to Step (12).

Note: The setting of "CU Number" cannot be done for the definition that crosses 16KLDEV boundary (00:00-00:3F/00:40-00:7F/00:80-00:BF/00:C0-00:FE) for per two ports. When the definition that crosses 16KLDEV boundary is done, it is defined for per two ports.

---

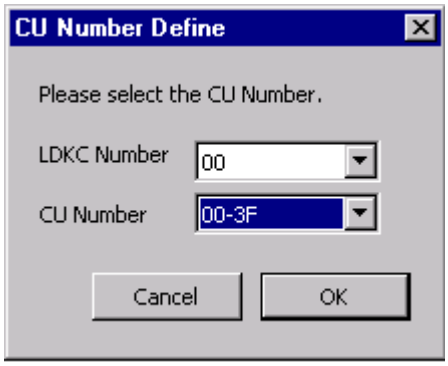
(9) <Setting the HTP/FNP>
Set the HTP/FNP.
After the setting is completed, select (CL) the [OK].
Go back to Step (8).



Copyright © 2010, 2011, Hitachi, Ltd.

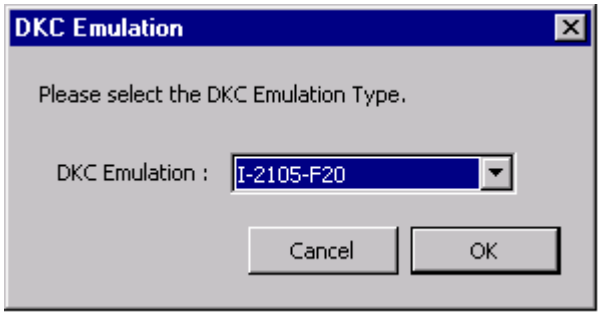
(10) <Setting the CU number>

Set the number of the LDKC/CU connected to the specified port.
After the setting is completed, select (CL) the [OK].
Go back to Step (8).



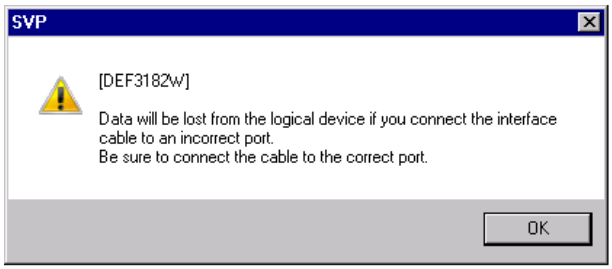
(11) <Setting the DKC Emulation>

Set the DKC Emulation.
After the setting is completed, select (CL) the [OK].
Go back to Step (8).



(12) <Display of the SVP message>

In response to the message, “Data will be lost from the logical device if you connect the interface cable to an incorrect port. Be sure to connect the cable to the correct port.”, select (CL) [OK].

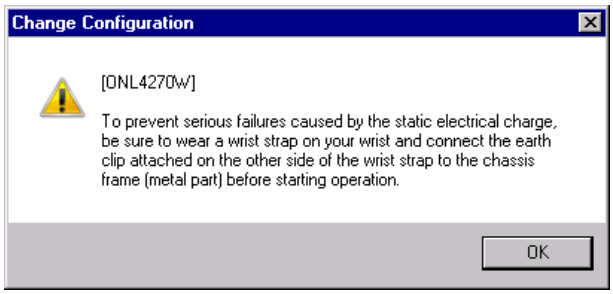


Copyright © 2010, Hitachi, Ltd.

2. SVP pre procedure (ESW Addition)

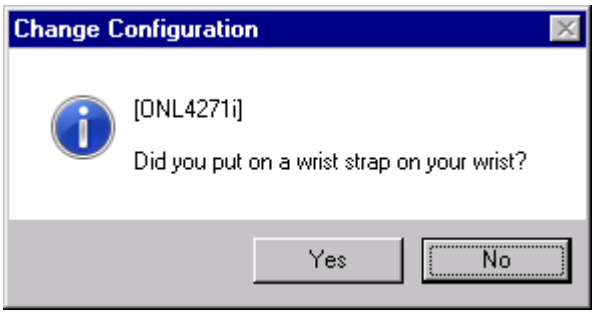
(1) <Wear a wrist strap>

Select (CL) [OK] in response to "To prevent serious failures caused by the static electrical charge, be sure to wear a wrist strap on your wrist and connect the earth clip attached on the other side of the wrist strap to the chassis frame (metal part) before starting operation.".



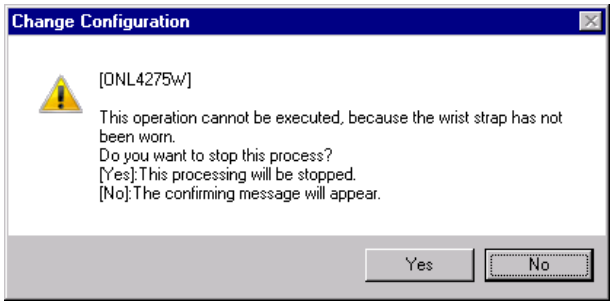
(1)-1 <Confirm wearing wrist strap>

In response to a message, "Did you put on a wrist strap on your wrist?".
Select [Yes] when wrist strap is on your wrist.
Select [No] when there is no wrist strap on your wrist.
When [No] is selected (CL), go to Step (1)-2.



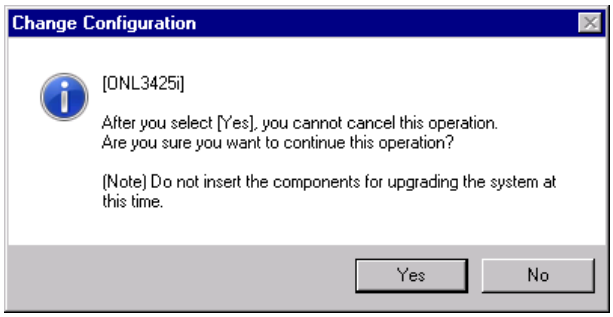
(1)-2

In response to a message, "This operation cannot be excuted, because the wrist strap has not been worn. Do you want to stop this process?
[Yes]: This processing will be stopped.
[No]: This confirming message will appear."
When [Yes] is selected (CL), the routine is returned to Step (2) on page INST03-08B-20.
When [No] is selected (CL), returned to Step (1).

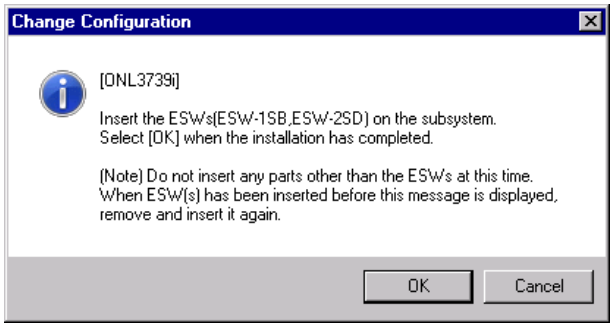


Copyright © 2010, 2014, Hitachi, Ltd.

(2) <Starting the addition>
In response to a message, “After you select [Yes], you cannot cancel this operation. Are you sure you want to continue this operation? (Note) Do not insert the components for upgrading the system at this time.”, select (CL) [Yes]. When [No] is selected (CL), the routine is returned to Step (2) on page INST03-08B-20.



(3) <Addition of the ESW>
When addition of the ESW is required, a message, “Insert the ESWs(ESW-nnn,ESW-nnn) on the subsystem. Select [OK] when the installation has completed. (Note) Do not insert any parts other than the ESWs at this time. When ESW(s) has been inserted before this message is displayed, remove and insert it again.” is displayed.



- When the message is displayed, install the hardware component following the procedure for adding the ESW. When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) needs to be installed, install it together with the ESW.
- When the message is not displayed, go to Step (2) in “5. SVP pre procedure (Channel Adapter Addition)”.

Note: Do not press the [OK] button by mistake before installing the part(s) to be added in the subsystem.

Copyright © 2010, Hitachi, Ltd.

3. Installation Procedure of PCI Express Switch Adapter

Installation Condition

The PCI Express Switch Adapter (DKC-F710I-ESW) is an indispensable option that is to be installed when the subsystem configuration is one of the following.

In case of DKC-0

① Addition of the first set (1SA/2SC)
- Indispensable option

② Addition of the second set (1SB/2SD)
- When the high performance model is selected
- When the CHA is installed in the Option 2 (1FU/2RU) or the Option 3 (1FL/2RL) of the CHA slots
- When the DKA or the CHA is installed in the Option 1 (1AL/2ML) of the DKA slots

In case of DKC-1

① Addition of the first set (1SE/2SG)
- Indispensable option

② Addition of the second set (1SF/2SH)
- When the high performance model is selected
- When the CHA is installed in the Option 2 (1HU/2UU) or the Option 3 (1HL/2UL) of the CHA slots
- When the DKA or the CHA is installed in the Option 1 (1LL/2XL) of the DKA slots

Twin DKC Model

For the twin DKC model, the ESWs that are installed in the DKC-0 and the DKC-1 should be the same in number.
- When ESWs are installed in the ESW slot option 1 (1SB/2SD) of the DKC-0, ESWs should be installed in the ESW slot option 1 (1SF/2SH) of the DKC-1 even if it fails to meet the installation requirements.
- When ESWs are installed in the ESW slot option 1 (1SF/2SH) of the DKC-1, ESWs should be installed in the ESW slot option 1 (1SB/2SD) of the DKC-0 even if it fails to meet the installation requirements.

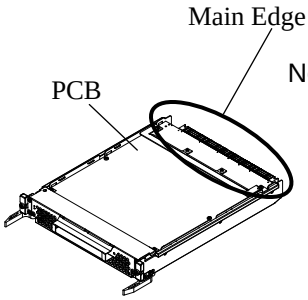
Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

Copyright © 2010, Hitachi, Ltd.

3-1 Insertion of ESW PCB

a. Loosen the screws and remove the dummy plates. (This procedure is not required if the PCB should be installed in the Basic slots.)

b. Insert the ESW PCBs to the DKC and fasten the screws.



Note: 1. Check that the main edge connector of the PCB has no deformation, damage or sticking of dust before installing the PCB. (See INST03-01-70.)

2. When installing the PCB, hold the right and left of the PCB with both hands, and insert it straight not to contact the neighboring PCB.

Table 3.8.2-3 Location of the ESW PCB

DKC	Addition No.	Slot No.		Location No.		Remarks
		Cluster 1	Cluster 2	Cluster 1	Cluster 2	
DKC-0	Basic	1SA	2SC	ESW-1SA	ESW-2SC	
	Option 1	1SB	2SD	ESW-1SB	ESW-2SD	
DKC-1	Basic	1SE	2SG	ESW-1SE	ESW-2SG	
	Option 1	1SF	2SH	ESW-1SF	ESW-2SH	

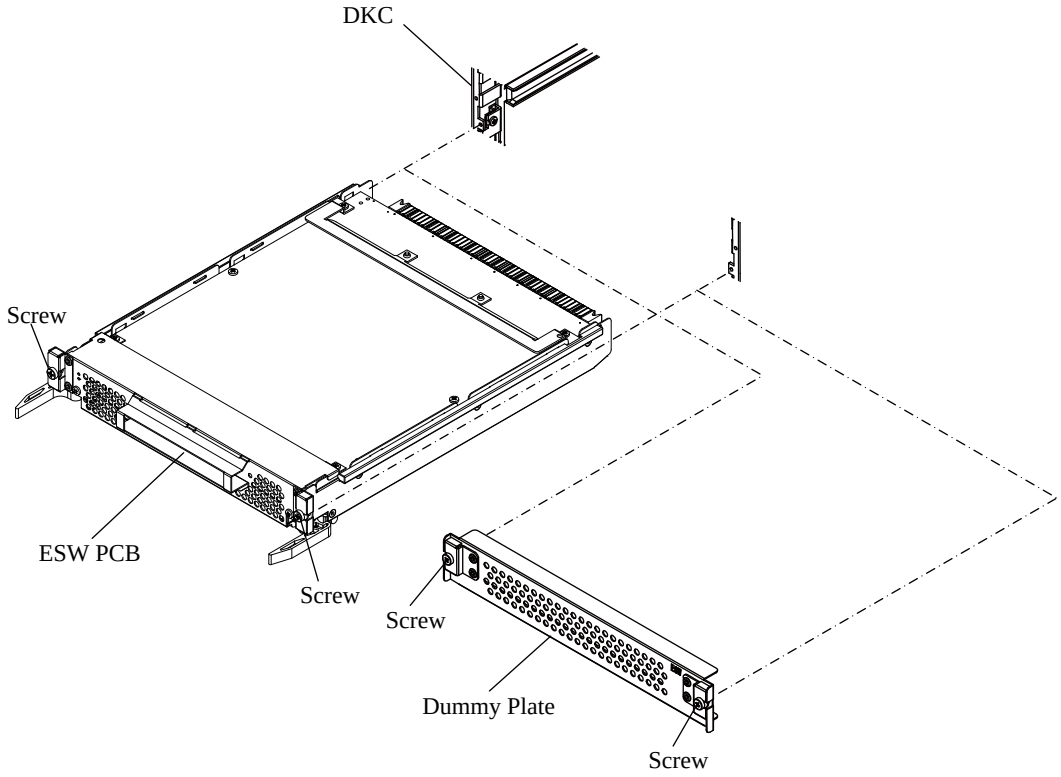


Fig. 3.8.2-1 Insertion of ESW PCB

Copyright © 2010, Hitachi, Ltd.

3-2 Storage of Dummy Plates (This procedure is not required if the PCB should be installed in the Basic slots.)

a. Remove the pocket ASSY from the front of the frame.
b. Install the two removed dummy plates in the pocket ASSY, and tighten them with the four screws.
c. Install the pocket ASSY in the front of the frame.

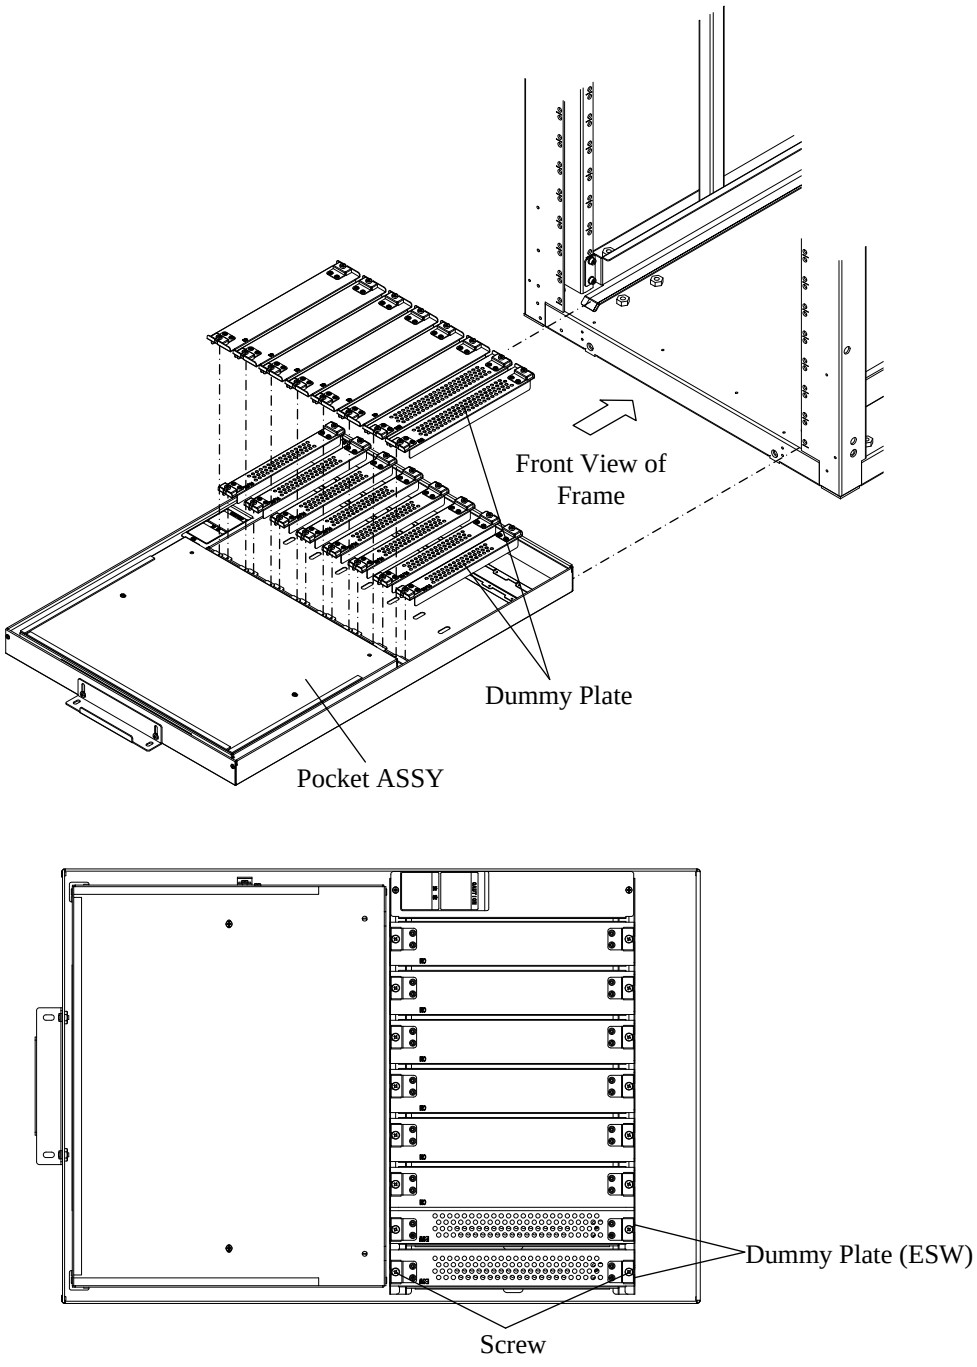

Fig. 3.8.2-2 Storage of Dummy Plates

Copyright © 2010, Hitachi, Ltd.

3-3 Attachment of the Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags to be installed.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

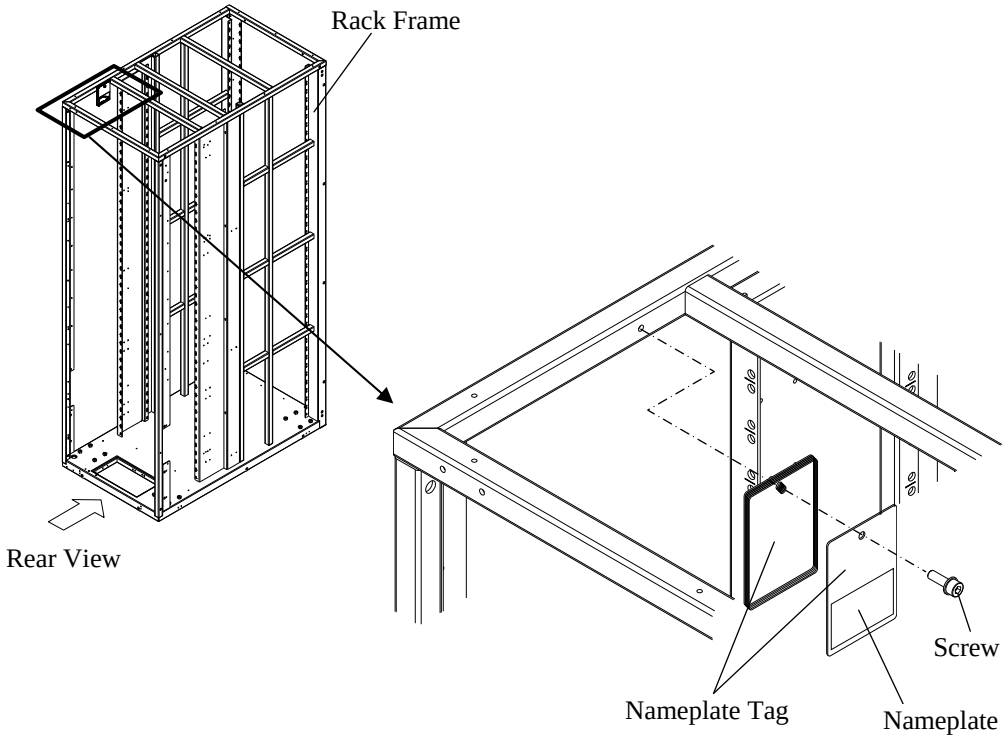

Fig. 3.8.2-3 Attachment of Nameplate

Copyright © 2014, Hitachi, Ltd.

4. Installation Procedure of Inter-Controller Connecting Kit

Installation Condition

Inter-Controller Connecting Kit (DKC-F710I-MDEXC) needs to be added under the following conditions.

- When the ESW is installed in the ESW slot option 1 (1SB/2SD) of the DKC-0 and the ESW slot option 1 (1SF/2SH) of the DKC-1.

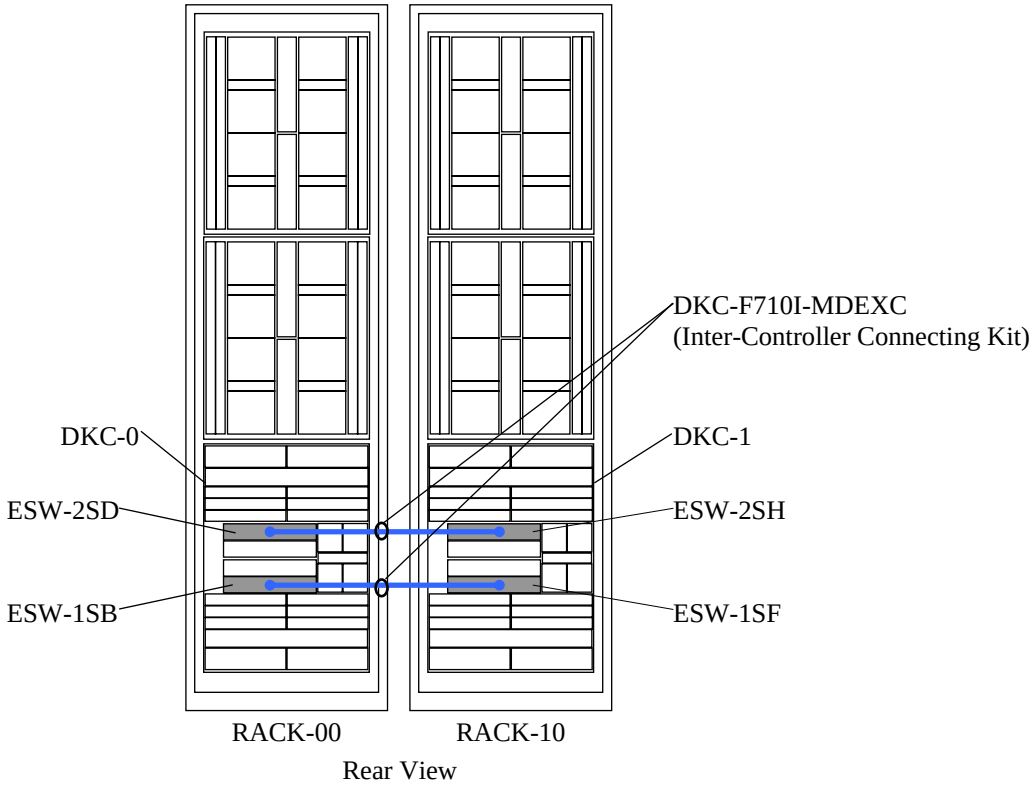

Fig. 3.8.2-3A Mounting Position of Cable

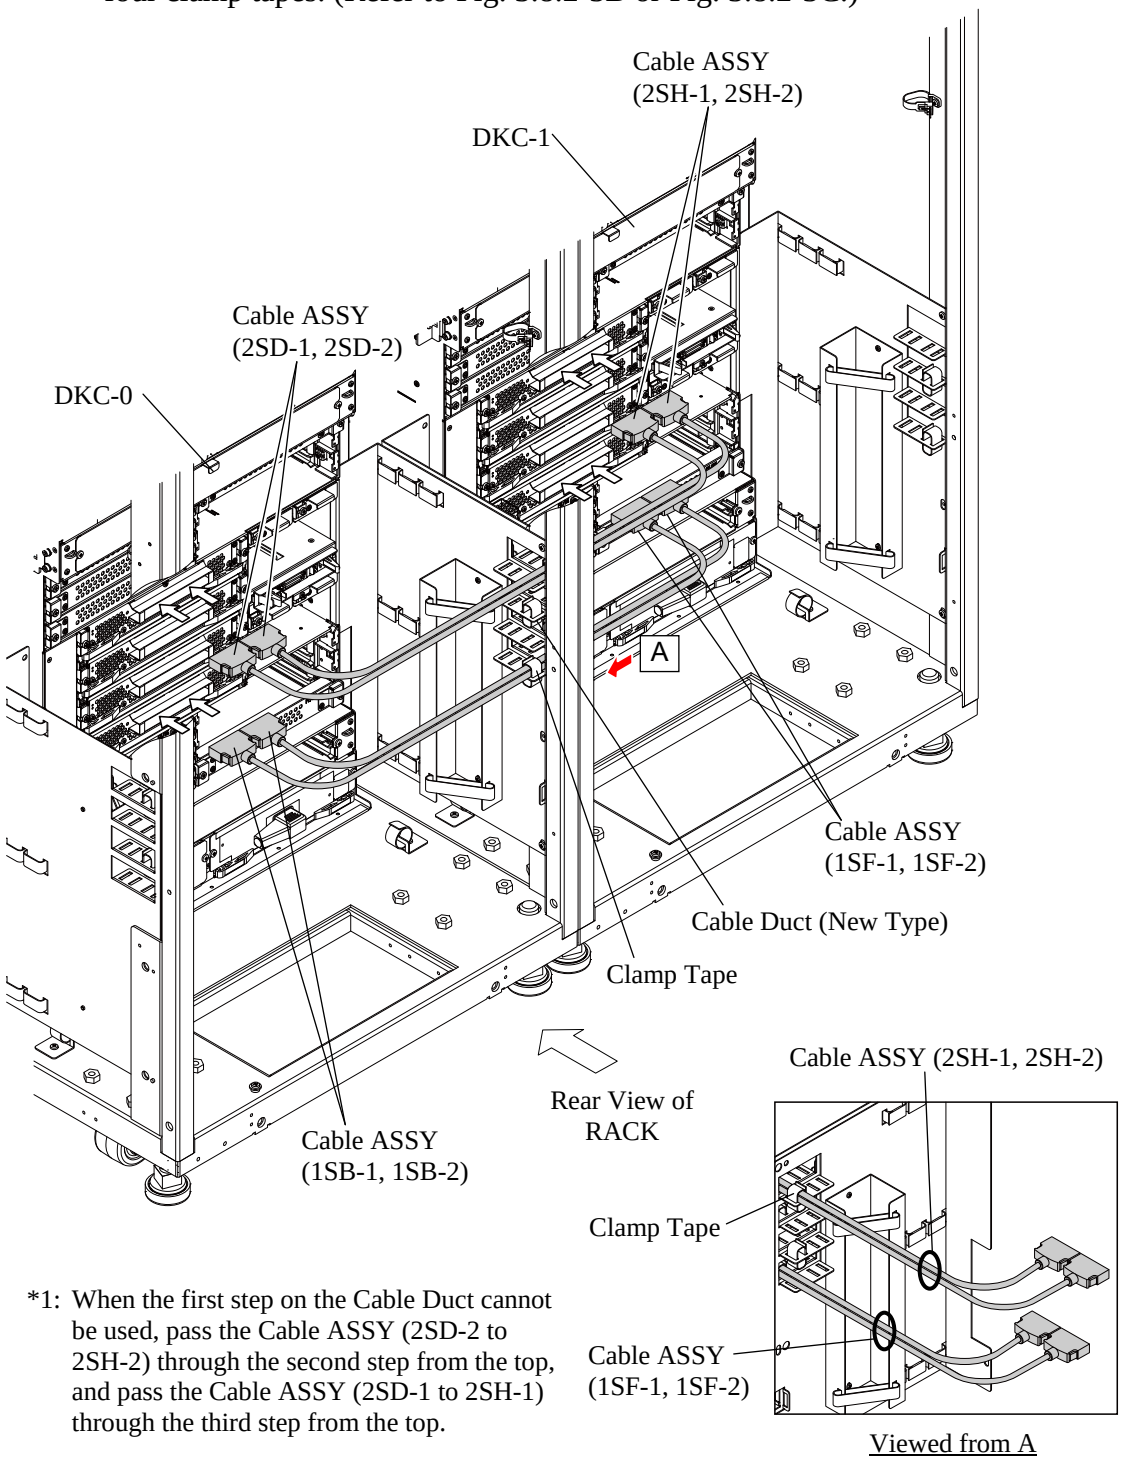
Copyright © 2014, Hitachi, Ltd.

4-1 When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) is required to install, install the cable ASSY.
When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) is not required to install, go to the procedure 5. SVP pre procedure (Channel Adapter Addition).

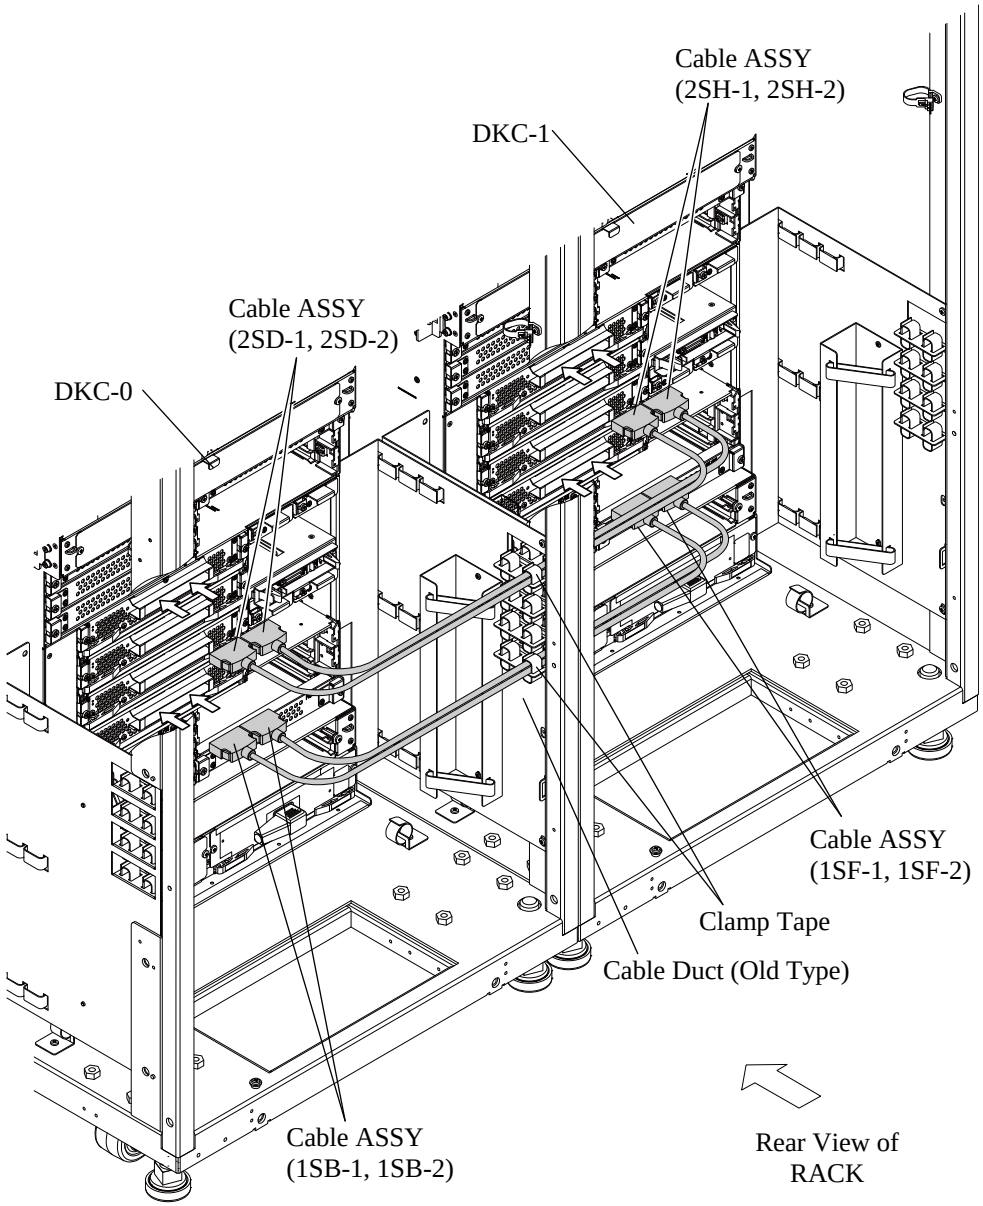
a. Wire the four Cable ASSYs to the rear side of the RACK, and fix them with the two or four clamp tapes. (Refer to Fig. 3.8.2-3B or Fig. 3.8.2-3C.)



*1: When the first step on the Cable Duct cannot be used, pass the Cable ASSY (2SD-2 to 2SH-2) through the second step from the top, and pass the Cable ASSY (2SD-1 to 2SH-1) through the third step from the top.

Fig. 3.8.2-3B Installation of Cables (DKC-0 ↔ DKC-1, New Type)

Copyright © 2014, Hitachi, Ltd.



*1: When the first step on the Cable Duct cannot be used, pass the Cable ASSY (2SD-2 to 2SH-2) through the second step from the top, and pass the Cable ASSY (2SD-1 to 2SH-1) through the third step from the top.

Fig. 3.8.2-3C Installation of Cables (DKC-0 ↔ DKC-1, Old Type)

Copyright © 2014, Hitachi, Ltd.

b. Remove the four black caps from the ESW (1SB and 2SD) of the DKC-0, and connect the cables (1SB-1, 1SB-2, 2SD-1 and 2SD-2).
c. Remove the four black caps from the ESW (1SF and 2SH) of the DKC-1, and connect the cables (1SF-1, 1SF-2, 2SH-1 and 2SH-2).

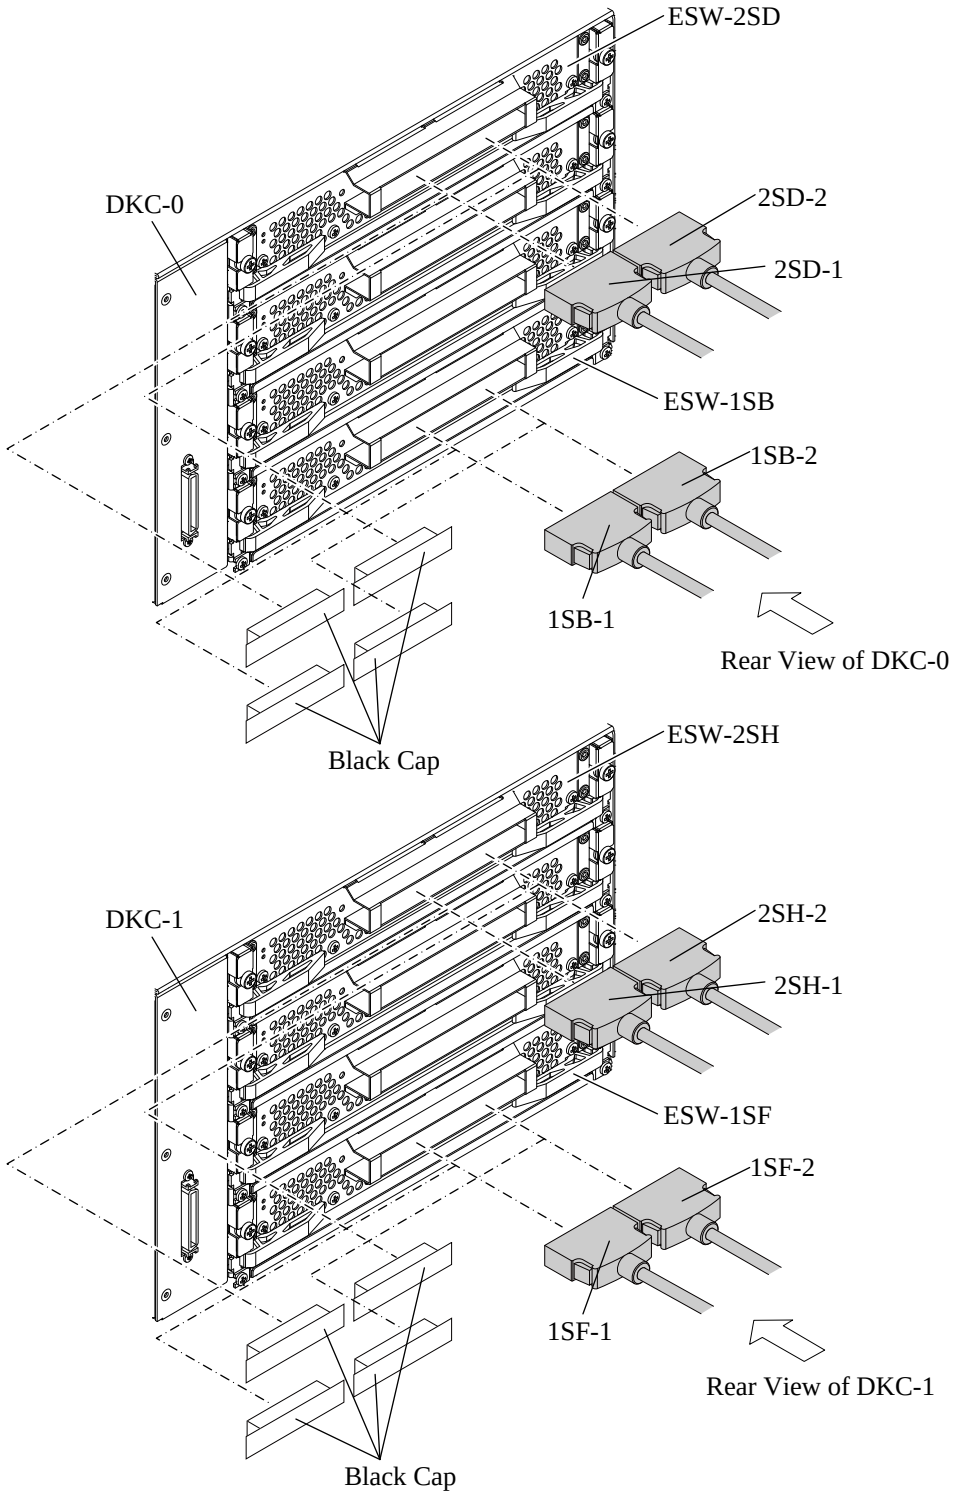


Fig. 3.8.2-3D Connection of Cables

Copyright © 2014, Hitachi, Ltd.

4-2 Attachment of Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

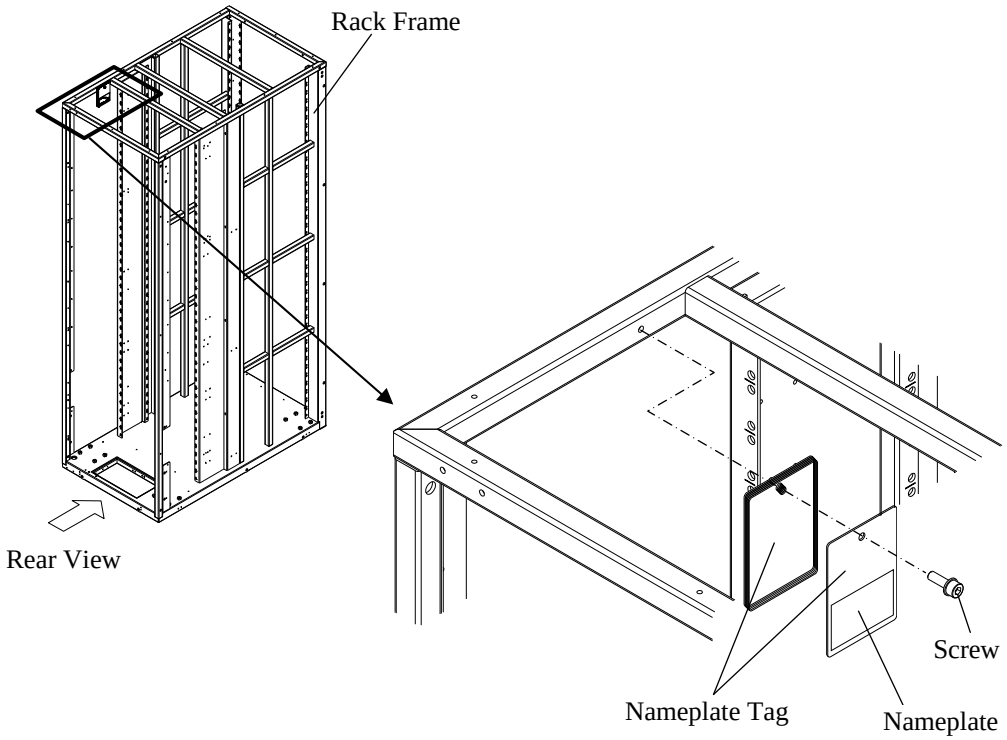

Fig. 3.8.2-3E Attachment of Nameplate

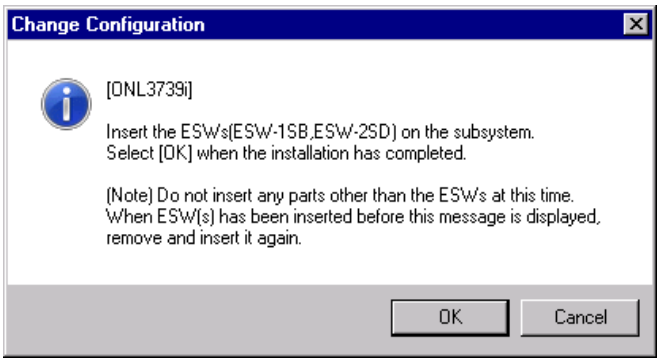
Copyright © 2010, 2014, Hitachi, Ltd.

5. SVP pre procedure (Channel Adapter Addition)

(1) <Making sure of completion of the hardware addition>
After the ESW addition is completed, select (CL) [OK] in response to a message, “Insert the ESWs(ESW-nnn,ESW-nnn) on the subsystem. Select [OK] when the installation has completed. (Note) Do not insert any parts other than the ESWs at this time. When ESW(s) has been inserted before this message is displayed, remove and insert it again.”.



(Eg. ESW-1SB, ESW-2SD)

---

(2) <Downloading the microprogram>
The microprogram is downloaded to the SM.
The progress of the downloading is displayed.

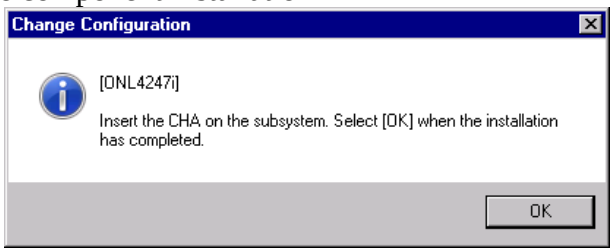
---

(3)
“Changing the subsystem configuration data …” is displayed.

---

(4) <Making sure of completion of the hardware component installation>
A message, “Insert the CHA on the subsystem. Select [OK] when the installation has completed.” is displayed.

Note: Do not press the [OK] button by mistake before installing the part(s) to be added in the subsystem.



Copyright © 2010, 2014, Hitachi, Ltd.

6. Installation Procedure of Mainframe Fibre 16-port Host Adapter

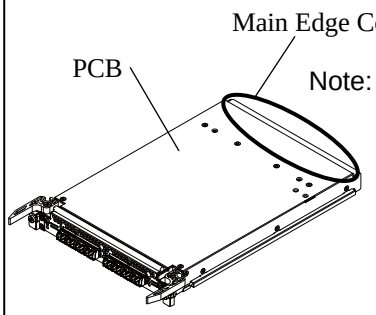
Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

6-1 Insertion of the PCBs

a. Loosen the screws and remove the dummy plates. (This procedure is not required if the PCB should be installed in the Basic slots.)

Note: Remove the dummy plate just before installing the PCB.
If the dummy plate is kept removed for a long time, the wind doesn't flow among installed PCBs, causing the PCBs' temperature rise which may result in temperature warning or temperature alarm.

b. Insert the PCBs to the correct locations in the DKC and tighten the screws.



Note:
- Check that the main edge connector of the PCB has no deformation, damage or sticking of dust before installing the PCB. (See INST03-01-70.)
- When installing the PCB, hold the right and left of the PCB with both hands, and insert it straight not to contact the neighboring PCB.

Table 3.8.2-4 Inserting Location

DKC	Addition No.	Slot No.		Location No.		Remarks
		Cluster 1	Cluster 2	Cluster 1	Cluster 2	
DKC-0	Basic	1EU	2QU	CHA-1EU	CHA-2QU	
	Option 1	1EL	2QL	CHA-1EL	CHA-2QL	
	Option 2	1FU	2RU	CHA-1FU	CHA-2RU	
	Option 3	1FL	2RL	CHA-1FL	CHA-2RL	
	Option 4	1AL	2ML	CHA-1AL	CHA-2ML	
	Option 5	1AU	2MU	CHA-1AU	CHA-2MU	
DKC-1	Basic	1GU	2TU	CHA-1GU	CHA-2TU	
	Option 1	1GL	2TL	CHA-1GL	CHA-2TL	
	Option 2	1HU	2UU	CHA-1HU	CHA-2UU	
	Option 3	1HL	2UL	CHA-1HL	CHA-2UL	
	Option 4	1LL	2XL	CHA-1LL	CHA-2XL	
	Option 5	1LU	2XU	CHA-1LU	CHA-2XU	

Copyright © 2010, 2011, Hitachi, Ltd.

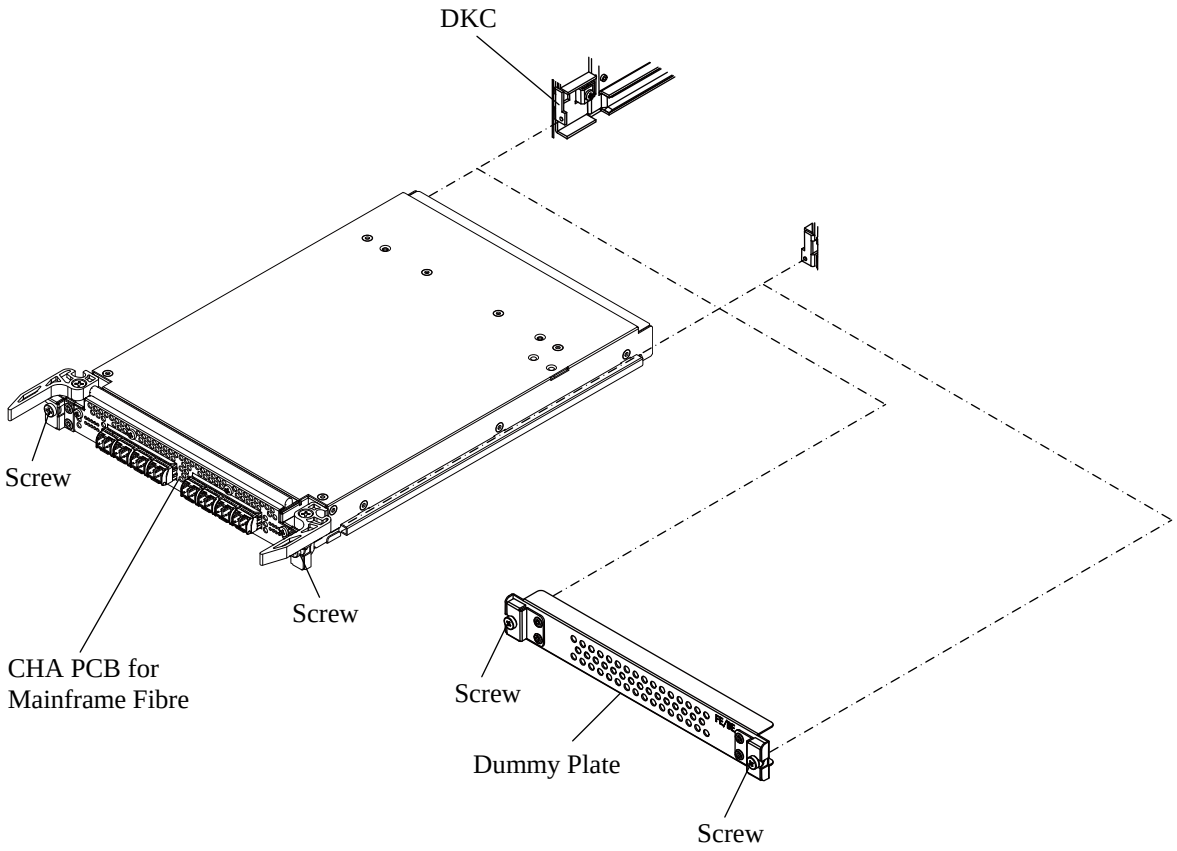


Fig. 3.8.2-4 Insertion of PCB

Copyright © 2010, 2014, Hitachi, Ltd.

6-2 Storage of Dummy Plates (This procedure is not required if the PCB should be installed in the Basic slots.)

a. Remove the pocket ASSY from the front of the frame.
b. Install the two removed dummy plates in the pocket ASSY, and tighten them with the four screws.
   When dummy plates are installed in the upper part, remove the upper dummy plates once, install the lower dummy plates, and then install the upper dummy plates again.
c. Install the pocket ASSY in the front of the frame.

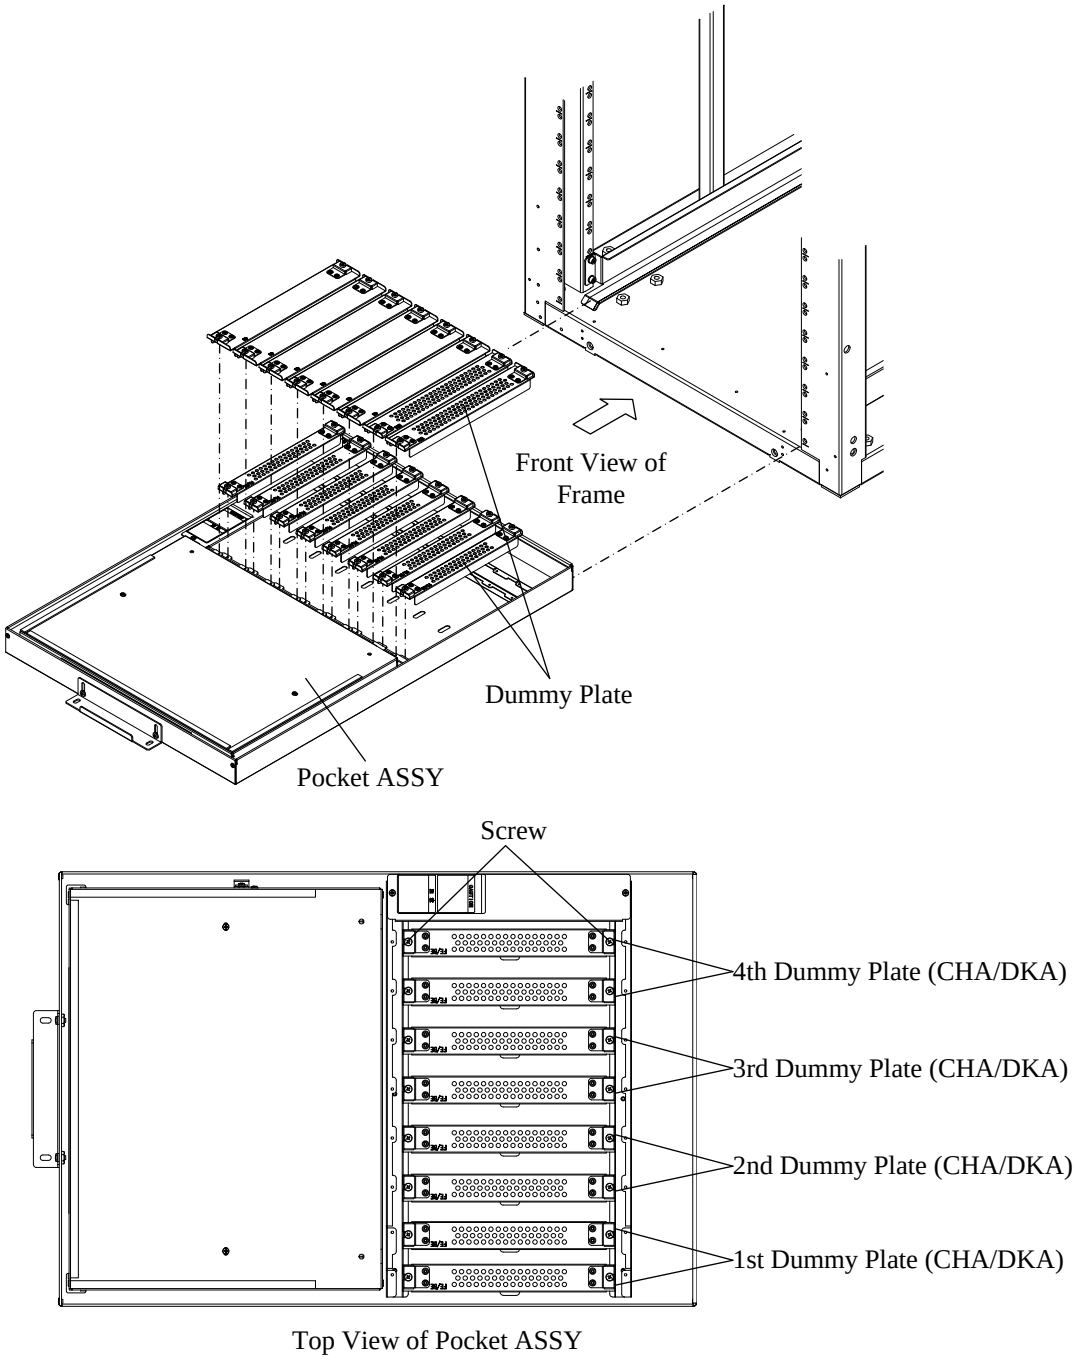

Fig. 3.8.2-5 Storage of Dummy Plates

Copyright © 2010, 2014, Hitachi, Ltd.

6-3 Cleaning the fibre cable connectors

For the tools needed for the cleaning, refer to the tool list on page PARTS06-10.

a. Blow compressed gas against the connector using an air sprayer (for about five seconds).
b. Wipe the connector lightly with a piece of cut gauze wet with ethyl alcohol.
c. Blow compressed air again and check the result of the cleaning (None of dust, sticking of foreign matter, and dirt must be observed).

6-4 Connection of the optical fibre cables

When wiring for optical fibre cables from the floor

a. Draw the optical fibre cable from the rear lower opening of the frame.

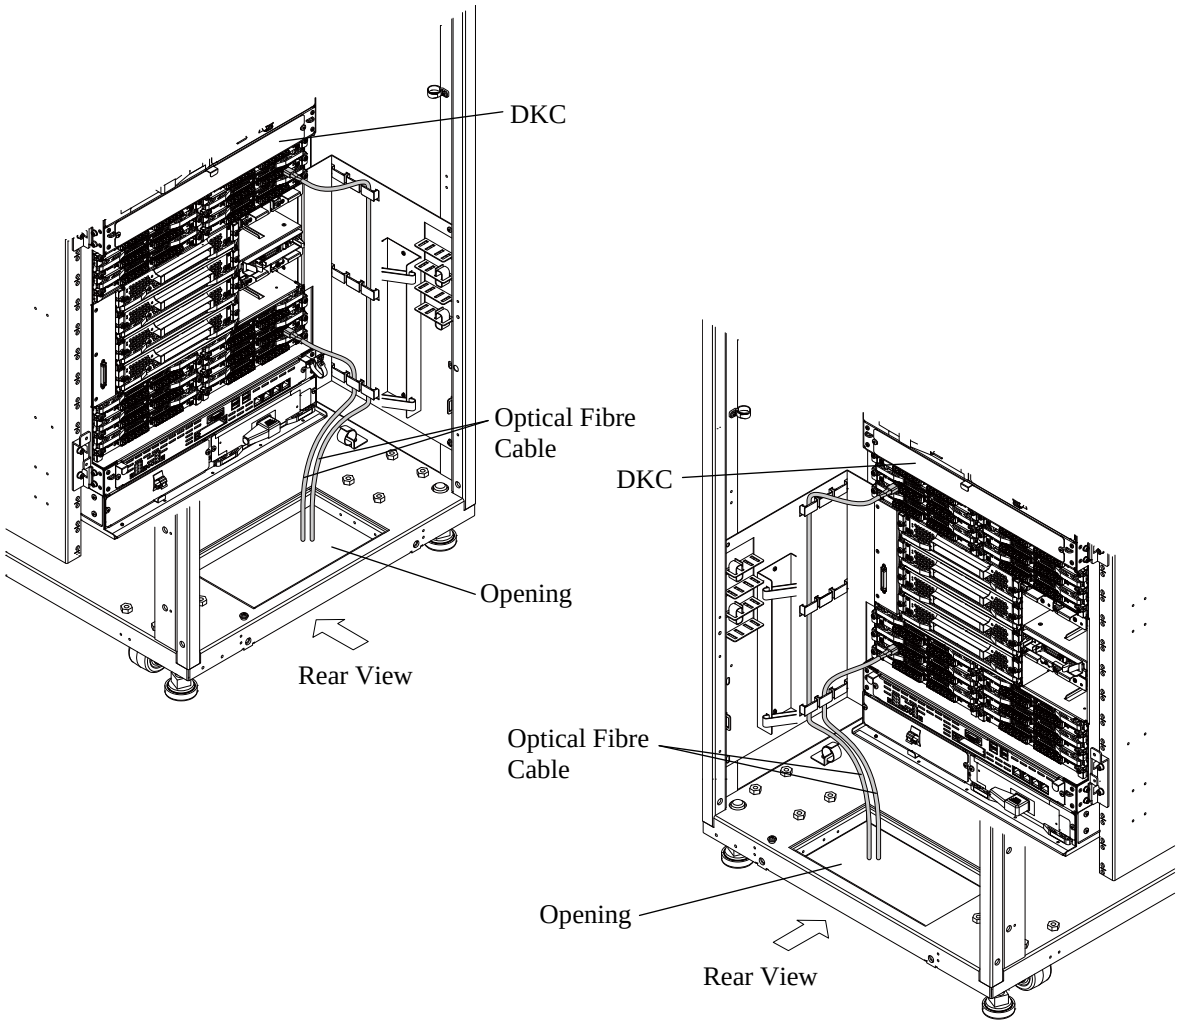

Fig. 3.8.2-6 Attachment of Optical Fibre Cables

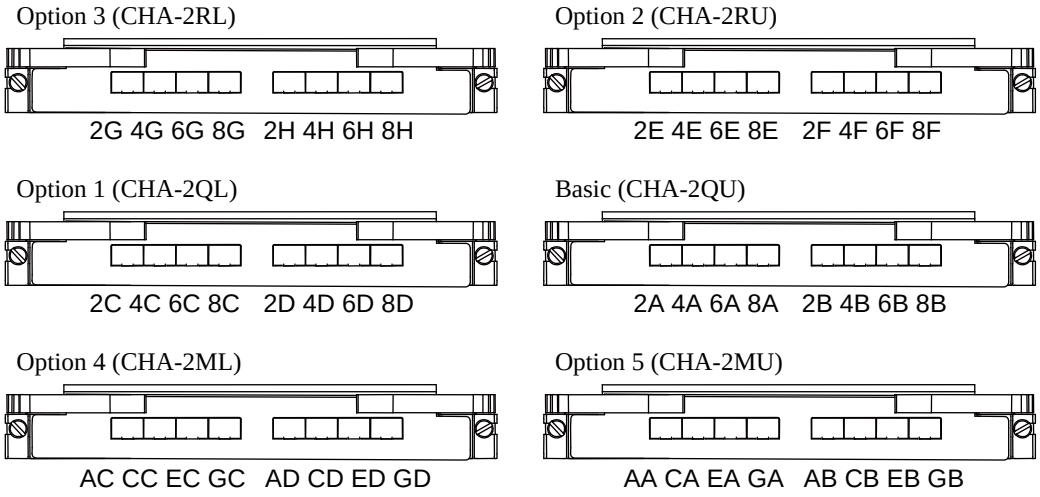
Copyright © 2010, Hitachi, Ltd.

b. Connect the optical fibre cables to the PCB.

In case of DKC-0

CHA PCB (Cluster 2)



CHA PCB (Cluster 1)

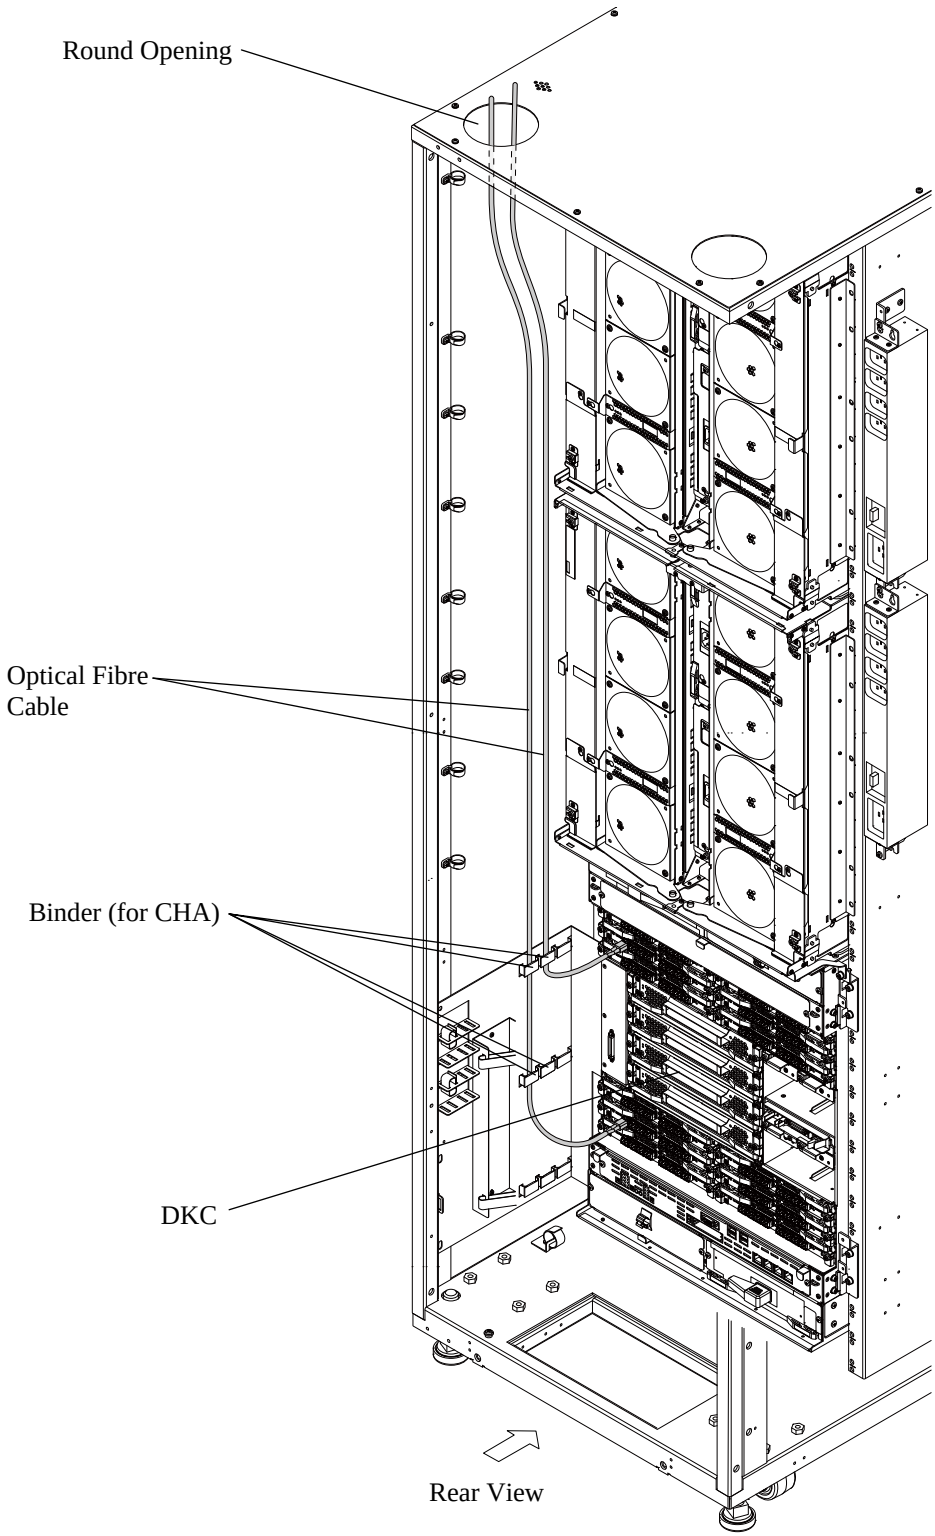

Fig. 3.8.2-11 Attachment of Optical Fibre Cables

Copyright © 2010, 2011, Hitachi, Ltd.

When wiring for the optical fibre cables from the window opening of the top cover

a. Loosen the two screws of the top cover, and slide the window opening toward the front side. (Refer to Fig. 3.8.2-12 or Fig. 3.8.2-13.)
b. Draw the optical fibre cable from the opening of the top cover, and wire the cable in the frame.
c. Connect the optical fibre cables to the PCB in the DKC. (Refer to Fig. 3.8.2-7 or Fig. 3.8.2-8.)
d. Secure the optical fibre cable with the binder on the frame side.
e. Slide the window to close the opening, and retighten it with the two screws.

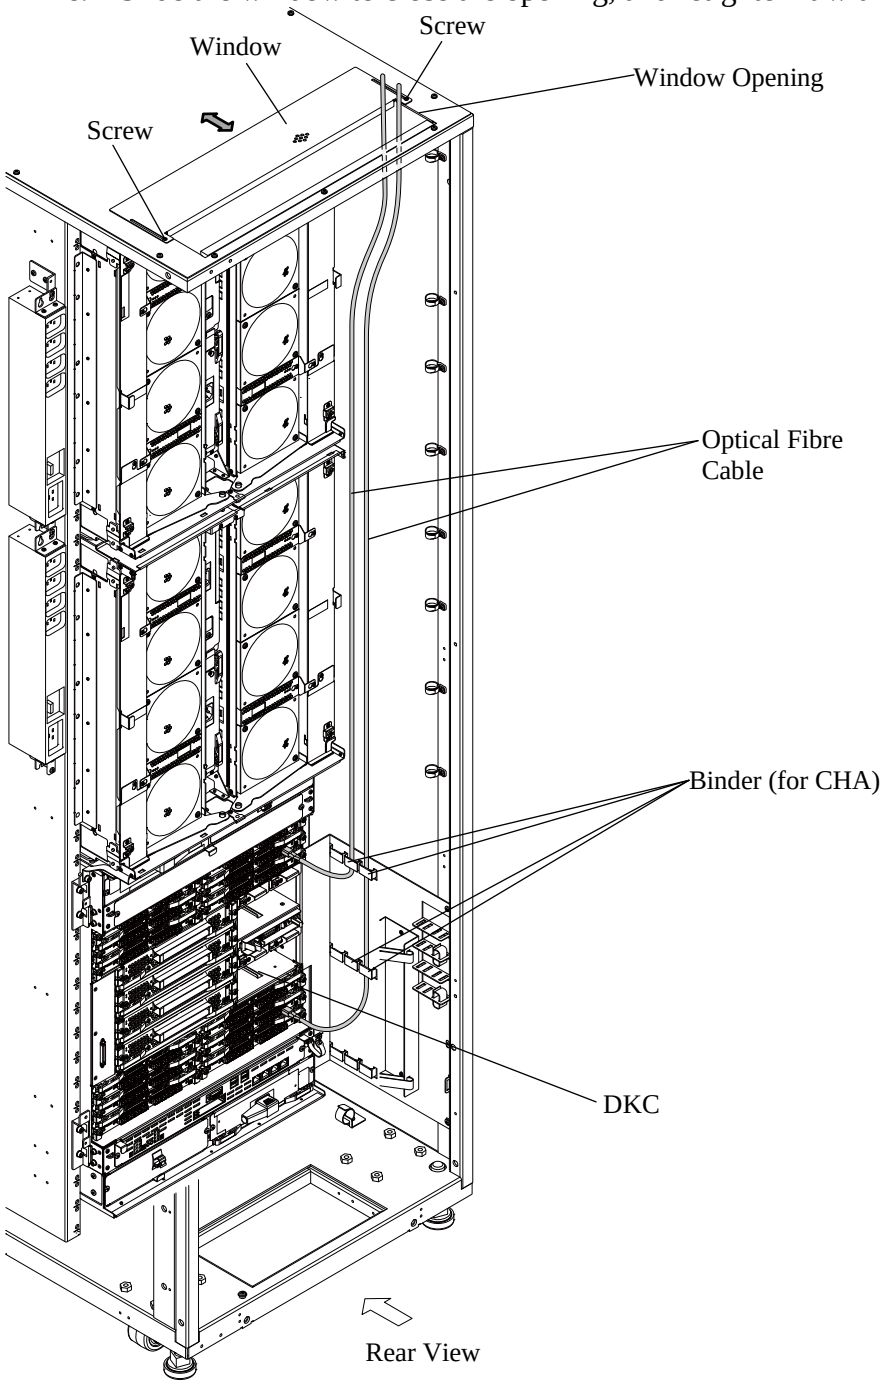

Fig. 3.8.2-12 Attachment of Optical Fibre Cables

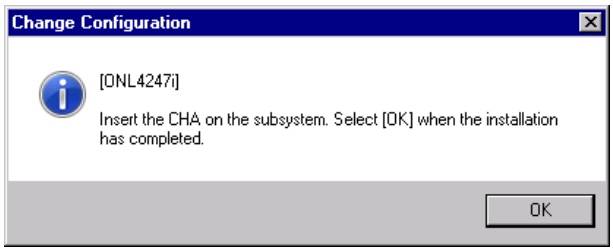
7. SVP post procedure

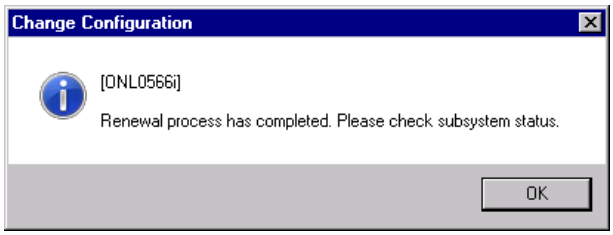
(1) <Check that hardware components are installed>
Select (CL) [OK] after making sure that all hardware components are installed correctly in response to “Insert the CHA on the subsystem. Select [OK] when the installation has completed.”.

When [Cancel] is selected (CL), returns to INST03-08B-20 step (3).



(2) <Restore CHA>
“Restoring the CHA...” is displayed.

(3) <End of system update processing>
“Renewal process has completed. Please check the subsystem status.” is displayed when recovery processing on all installed components is completed. Select (CL) [OK] in response to this message.

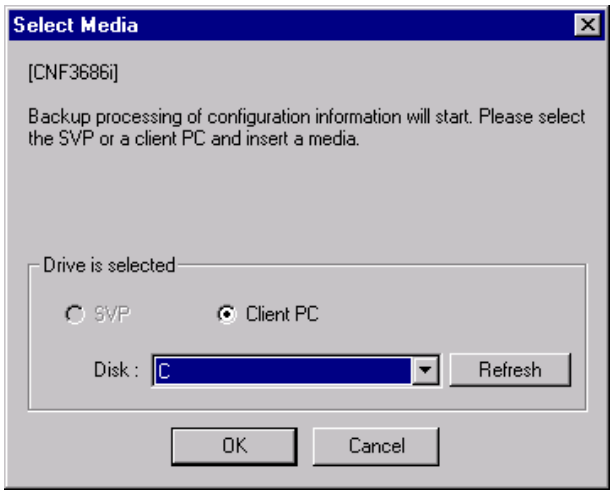


Copyright © 2010, 2012, Hitachi, Ltd.

(4)

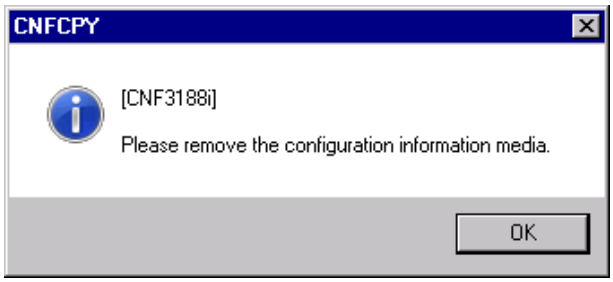
Execute an operation for backing up the configuration information.
Prepare the removable media for backup and insert the media.
Please select (CL) the [Refresh] button, and update drive information.
Select (CL) the drive and the PC in which the media was inserted. Select (CL) the [OK] button.

Note: For the procedure of backing up the configuration information to a CD-R, see page MICRO07-140.



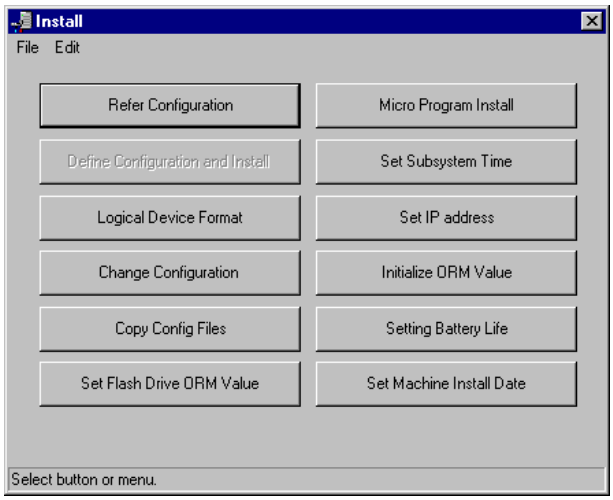
(5)

When this procedure is completed, the message “Please remove the configuration information media.” is displayed.
Remove the configuration information media, Select (CL) [OK].



(6)

After the procedure is completed, return to “Install”.
Select (CL) [File]-[Exit].



(7) <Mode Change>
Change the mode to View Mode.

Return to the working table and do the rest of the work.
New Installation: INST02-20,
Non-Disruptive Installation: INST02-40

3.8.3 Installation of FCOE 8-port Host Adapter, PCI Express Switch Adapter and Inter-Controller Connecting Kit (DKC-F710I-8FOE/ESW/MDEXC)

Note: Be sure to check the following conditions before performing the addition.
When the installed ESWs (DKC-F710I-ESW) per DKC are two sets or more, or the installed CHAs (DKC-F710I-8UFC/8UFCR/16UFC/16UFCR/8FOE) per DKC are four sets or more, the Additional Controller PS (DKC-F710I-APC) is required.

Table 3.8.3-1 Parts List

No.	Model Number	Part Name	Part No.	Quantity	Remarks
1	DKC-F710I-8FOE	WP713-A	5541865-A	2	CHA PCB
		Nameplate (HDS)	2852548-65	1	ITPD
			2853327-65/565		HICAM/HICEF
		Nameplate (HP)	2852570-65	1	ITPD
			2853328-65/565		HICAM/HICEF
2	DKC-F710I-ESW	WP730-A	5541851-A	2	ESW PCB
		Nameplate (HDS)	2852548-46	1	ITPD
			2853327-46/546		HICAM/HICEF
		Nameplate (HP)	2852570-46	1	ITPD
			2853328-46/546		HICAM/HICEF

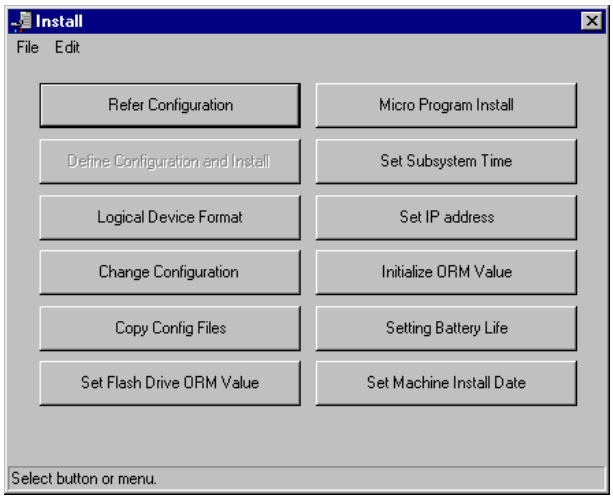
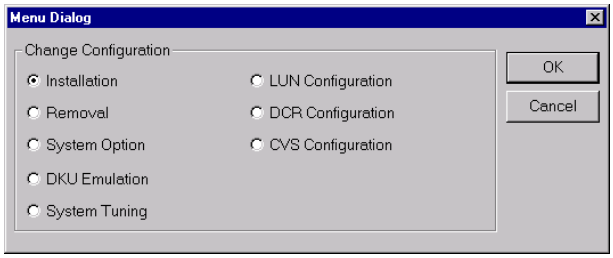
1. Setting up the New Device Structure Information

(1) <Mode Change>
Change the mode to Modify Mode.
Select (CL) [Install].

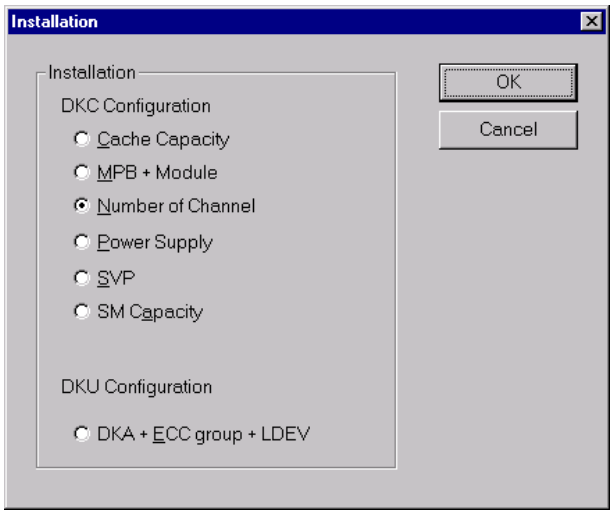
(2) <Start the 'Menu Dialog' screen>
Select (CL) [Change Configuration].



(3) <Start Device Structure Setup screen>
Select (CL) [Installation] in the 'Menu Dialog' dialog box and select (CL) [OK].



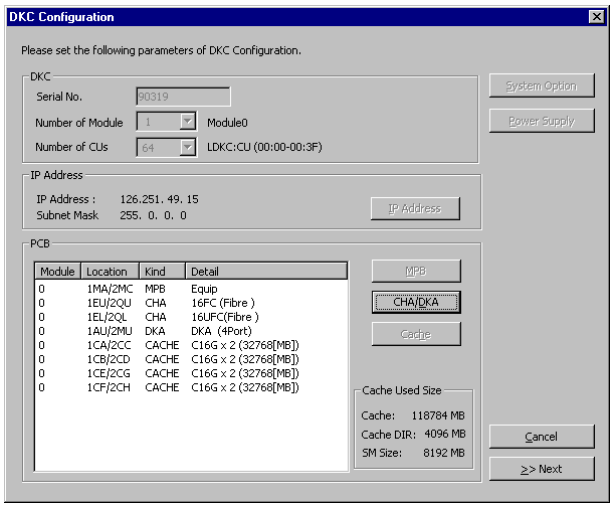
(4) <Select a part to be changed>
Select (CL) [Number of Channel], and select (CL) [OK].



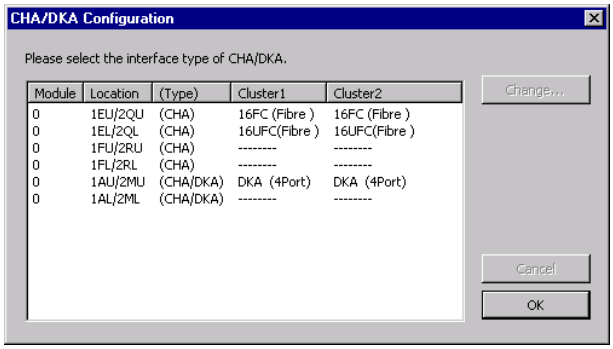
Copyright © 2011, Hitachi, Ltd.

(5) <DKC Configuration screen>
In the 'DKC Configuration' screen, select (CL) [CHA/DKA].
Go to Step (6).

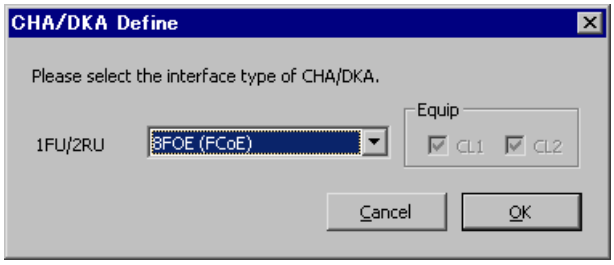
After the setting is completed, select (CL) [>>Next].
(Go to Step (8).)
In the case of selecting (CL) [Cancel], this operation procedure terminates.



(6) <Setting the CHA type>
In the 'CHA/DKA Configuration' screen, select the location(s) to which the addition is to be made, and select (CL) [Change...]. Go to Step (7).
Make sure that the entry that has been made is correct and select (CL) [OK].
Go back to Step (5).

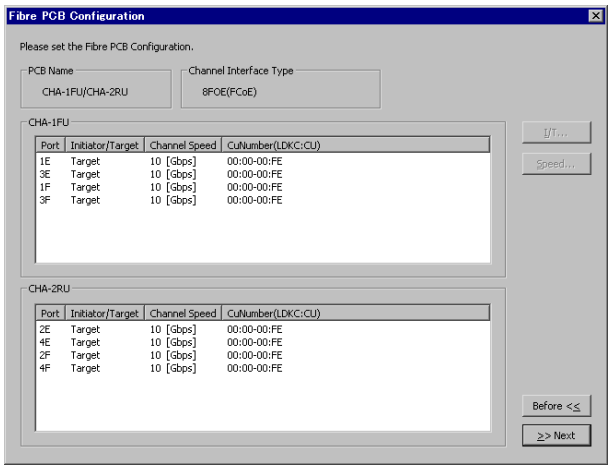


(7) <Select the CHA type>
In the 'CHA/DKA Define' screen, select FCoE PCB.
Check the 'Equip (CL1/CL2)' setting.
After the setting is completed, select (CL) [OK]. The routine is returned to Step (6).



Copyright © 2011, Hitachi, Ltd.

(8) < Display details of the CHA>
In the 'Fibre PCB Configuration' screen, make sure that the items that have been displayed are correct and select (CL) [>>Next].

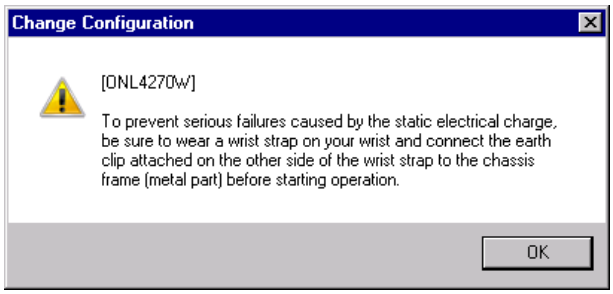


Copyright © 2011, Hitachi, Ltd.

2. SVP pre procedure (ESW Addition)

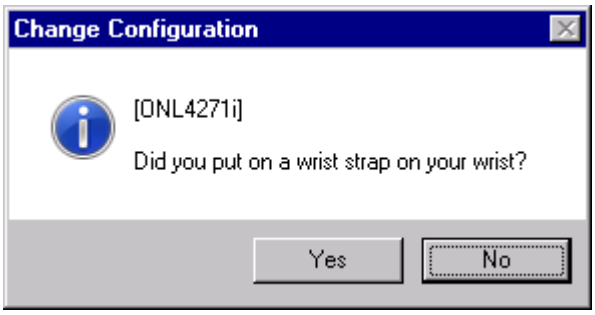
(1) <Wear a wrist strap>

Select (CL) [OK] in response to “To prevent serious failures caused by the static electrical charge, be sure to wear a wrist strap on your wrist and connect the earth clip attached on the other side of the wrist strap to the chassis frame (metal part) before starting operation.”.



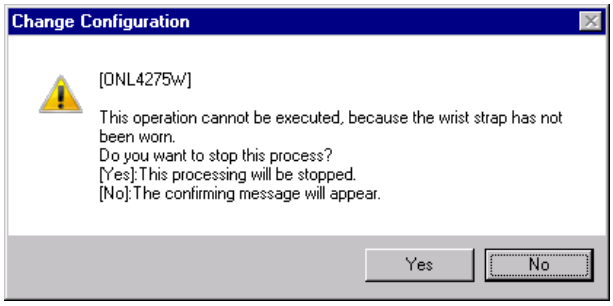
(1)-1<Confirm wearing wrist strap>

In response to a message, “Did you put on a wrist strap on your wrist?”.
Select [Yes] when wrist strap is on your wrist.
Select [No] when there is no wrist strap on your wrist.
When [No] is selected (CL), go to Step (1)-2.



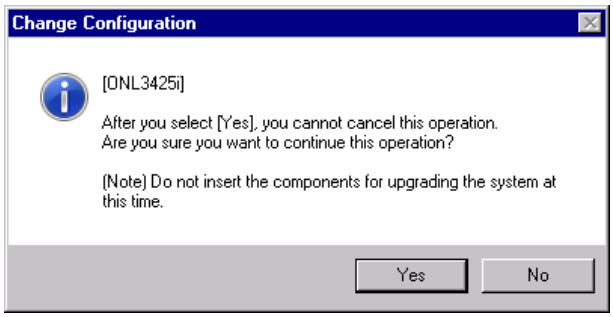
(1)-2

In response to a message, “This operation cannot be excuted, because the wrist strap has not been worn. Do you want to stop this process?
[Yes]: This processing will be stopped.
[No]: This confirming message will appear.”
When [Yes] is selected (CL), the routine is returned to Step (2) on page INST03-08C-20.
When [No] is selected (CL), returned to Step (1).

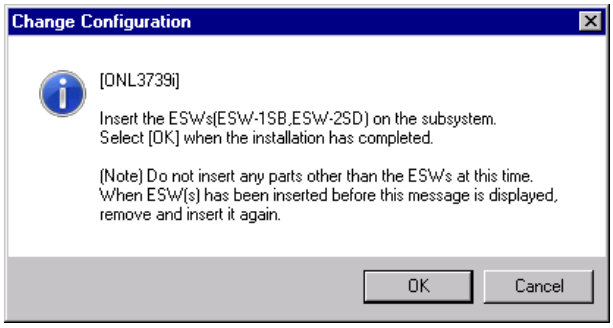


Copyright © 2011, 2014, Hitachi, Ltd.

(2) <Starting the addition>
In response to a message, “After you select [Yes], you cannot cancel this operation. Are you sure you want to continue this operation? (Note) Do not insert the components for upgrading the system at this time.”, select (CL) [Yes]. When [No] is selected (CL), the routine is returned to Step (2) on page INST03-08C-20.



(3) <Addition of the ESW>
When addition of the ESW is required, a message, “Insert the ESWs(ESW-nnn,ESW-nnn) on the subsystem. Select [OK] when the installation has completed. (Note) Do not insert any parts other than the ESWs at this time. When ESW(s) has been inserted before this message is displayed, remove and insert it again.” is displayed.



- When the message is displayed, install the hardware component following the procedure for adding the ESW. When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) needs to be installed, install it together with the ESW.
- When the message is not displayed, go to Step (2) in “5. SVP pre procedure (Channel Adapter Addition)”.

Note: Do not press the [OK] button by mistake before installing the part(s) to be added in the subsystem.

Copyright © 2011, Hitachi, Ltd.

3. Installation Procedure of PCI Express Switch Adapter

Installation Condition

The PCI Express Switch Adapter (DKC-F710I-ESW) is an indispensable option that is to be installed when the subsystem configuration is one of the following.

In case of DKC-0

① Addition of the first set (1SA/2SC)
- Indispensable option

② Addition of the second set (1SB/2SD)
- When the high performance model is selected
- When the CHA is installed in the Option 2 (1FU/2RU) or the Option 3 (1FL/2RL) of the CHA slots
- When the DKA or the CHA is installed in the Option 1 (1AL/2ML) of the DKA slots

In case of DKC-1

① Addition of the first set (1SE/2SG)
- Indispensable option

② Addition of the second set (1SF/2SH)
- When the high performance model is selected
- When the CHA is installed in the Option 2 (1HU/2UU) or the Option 3 (1HL/2UL) of the CHA slots
- When the DKA or the CHA is installed in the Option 1 (1LL/2XL) of the DKA slots

Twin DKC Model

For the twin DKC model, the ESWs that are installed in the DKC-0 and the DKC-1 should be the same in number.
- When ESWs are installed in the ESW slot option 1 (1SB/2SD) of the DKC-0, ESWs should be installed in the ESW slot option 1 (1SF/2SH) of the DKC-1 even if it fails to meet the installation requirements.
- When ESWs are installed in the ESW slot option 1 (1SF/2SH) of the DKC-1, ESWs should be installed in the ESW slot option 1 (1SB/2SD) of the DKC-0 even if it fails to meet the installation requirements.

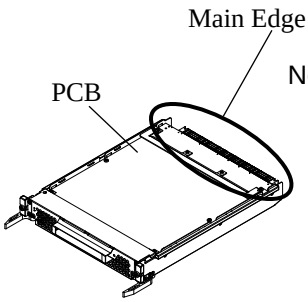
Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

Copyright © 2011, Hitachi, Ltd.

3-1 Insertion of ESW PCB

a. Loosen the screws and remove the dummy plates. (This procedure is not required if the PCB should be installed in the Basic slots.)

b. Insert the ESW PCBs to the DKC and fasten the screws.



Note: 1. Check that the main edge connector of the PCB has no deformation, damage or sticking of dust before installing the PCB. (See INST03-01-70.)

2. When installing the PCB, hold the right and left of the PCB with both hands, and insert it straight not to contact the neighboring PCB.

Table 3.8.3-3 Location of the ESW PCB

DKC	Addition No.	Slot No.		Location No.		Remarks
		Cluster 1	Cluster 2	Cluster 1	Cluster 2	
DKC-0	Basic	1SA	2SC	ESW-1SA	ESW-2SC	
	Option 1	1SB	2SD	ESW-1SB	ESW-2SD	
DKC-1	Basic	1SE	2SG	ESW-1SE	ESW-2SG	
	Option 1	1SF	2SH	ESW-1SF	ESW-2SH	

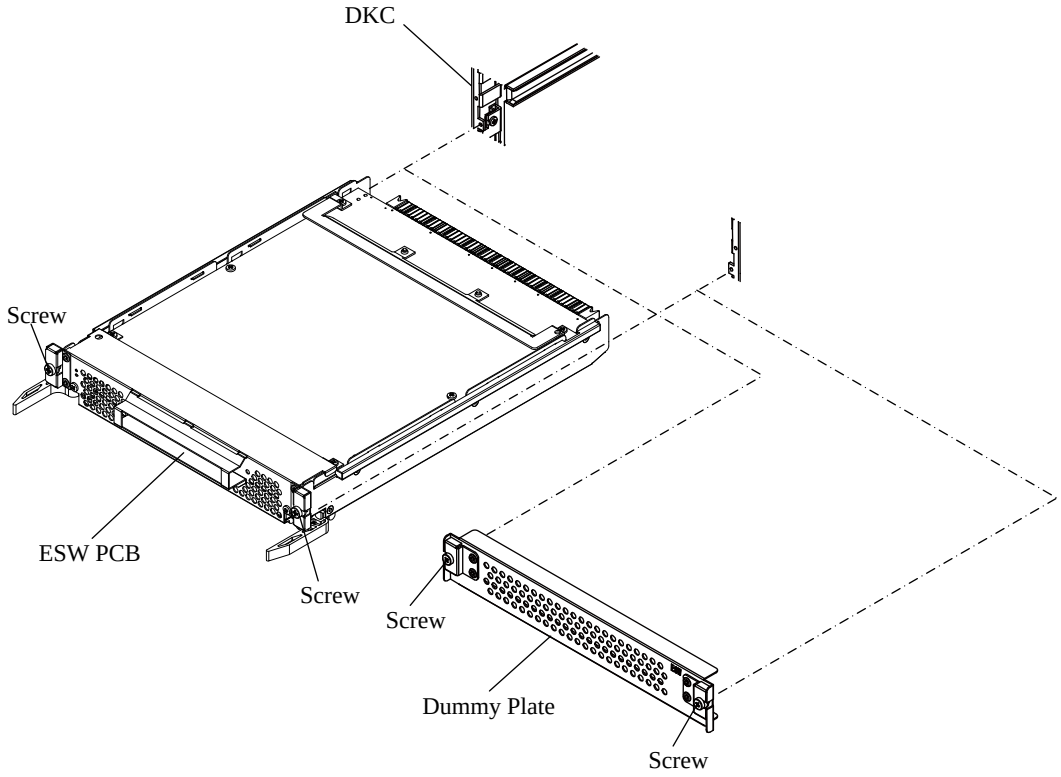


Fig. 3.8.3-1 Insertion of ESW PCB

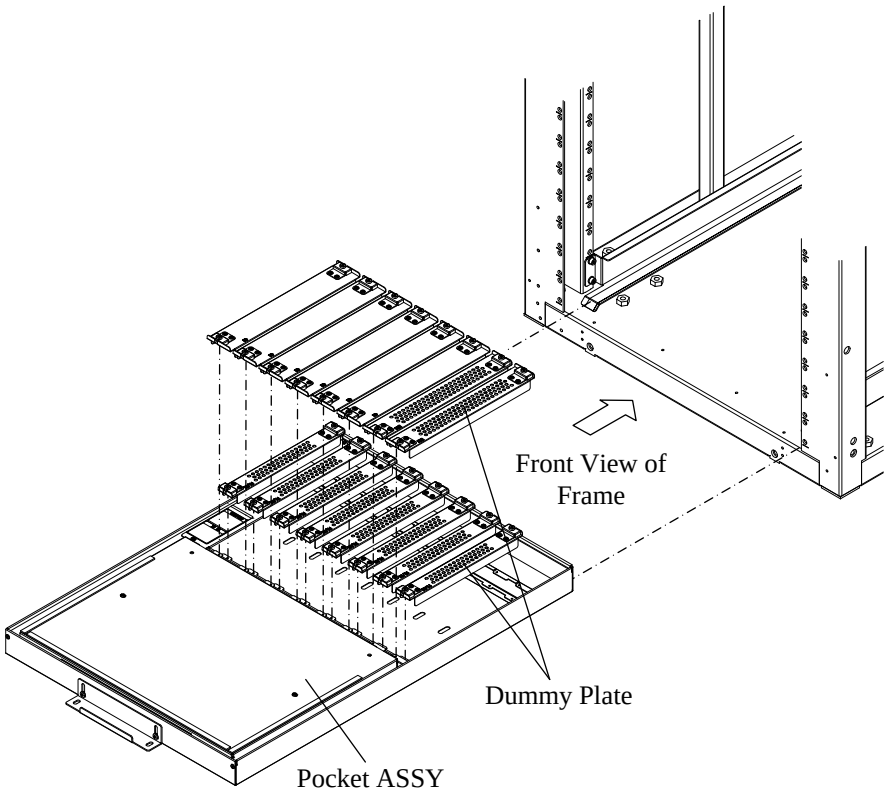
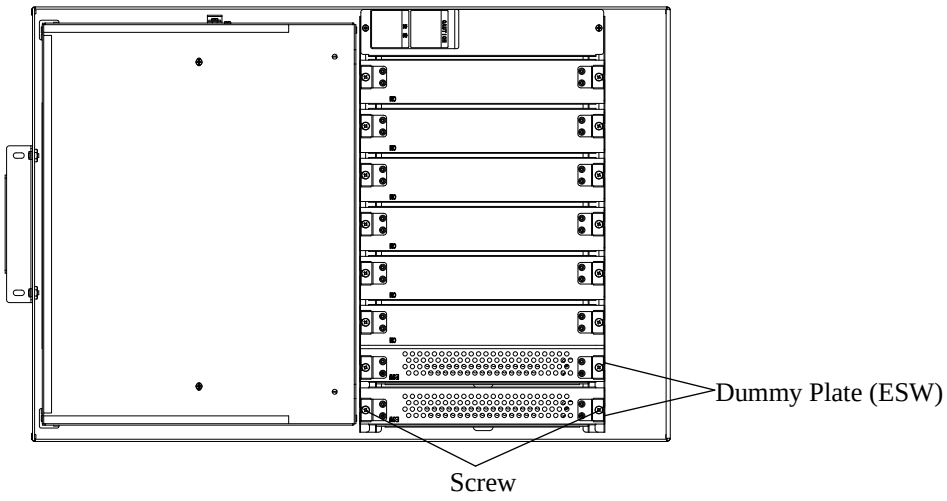
Copyright © 2011, Hitachi, Ltd.

3-2 Storage of Dummy Plates (This procedure is not required if the PCB should be installed in the Basic slots.)

a. Remove the pocket ASSY from the front of the frame.
b. Install the two removed dummy plates in the pocket ASSY, and tighten them with the four screws.
c. Install the pocket ASSY in the front of the frame.





Top View of Pocket ASSY

Fig. 3.8.3-2 Storage of Dummy Plates

Copyright © 2011, Hitachi, Ltd.

3-3 Attachment of the Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags to be installed.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

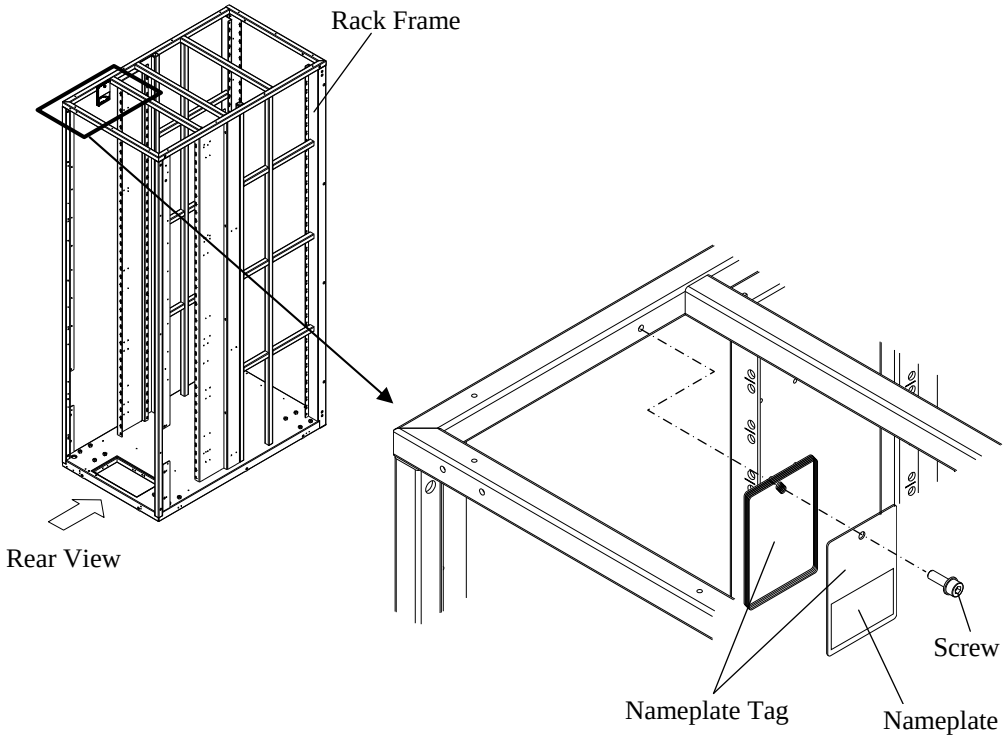


Fig. 3.8.3-3 Attachment of Nameplate

Copyright © 2014, Hitachi, Ltd.

4. Installation Procedure of Inter-Controller Connecting Kit

Installation Condition

Inter-Controller Connecting Kit (DKC-F710I-MDEXC) needs to be added under the following conditions.

- When the ESW is installed in the ESW slot option 1 (1SB/2SD) of the DKC-0 and the ESW slot option 1 (1SF/2SH) of the DKC-1.

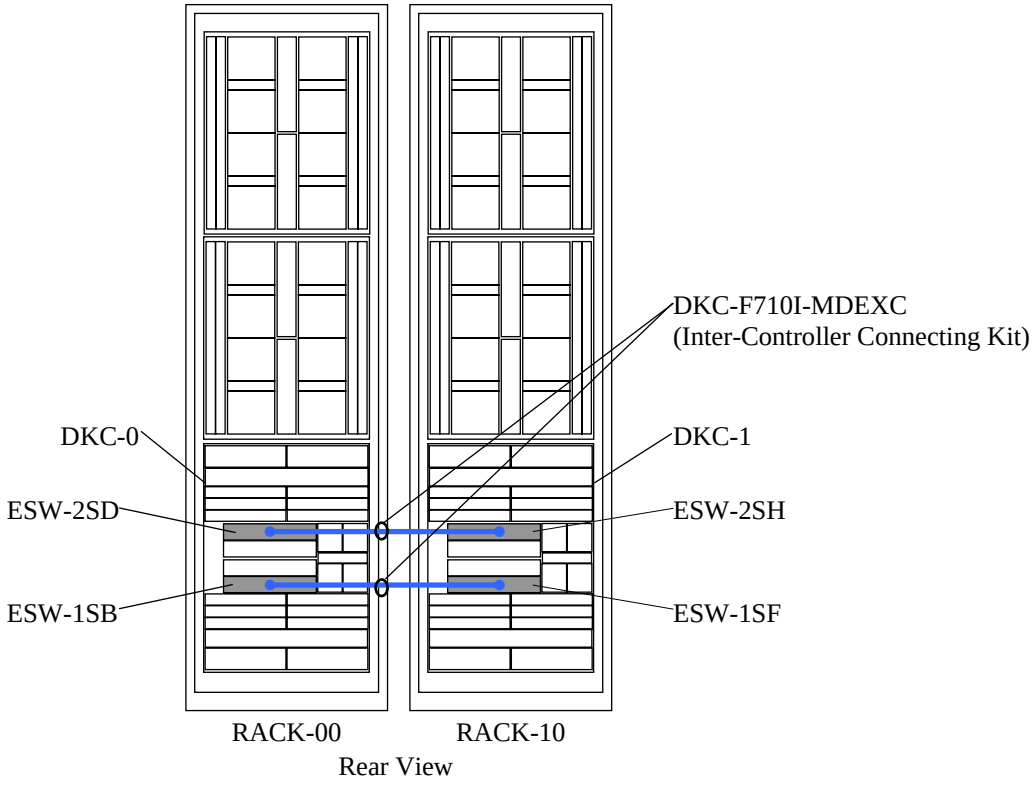

Fig. 3.8.3-3A Mounting Position of Cable

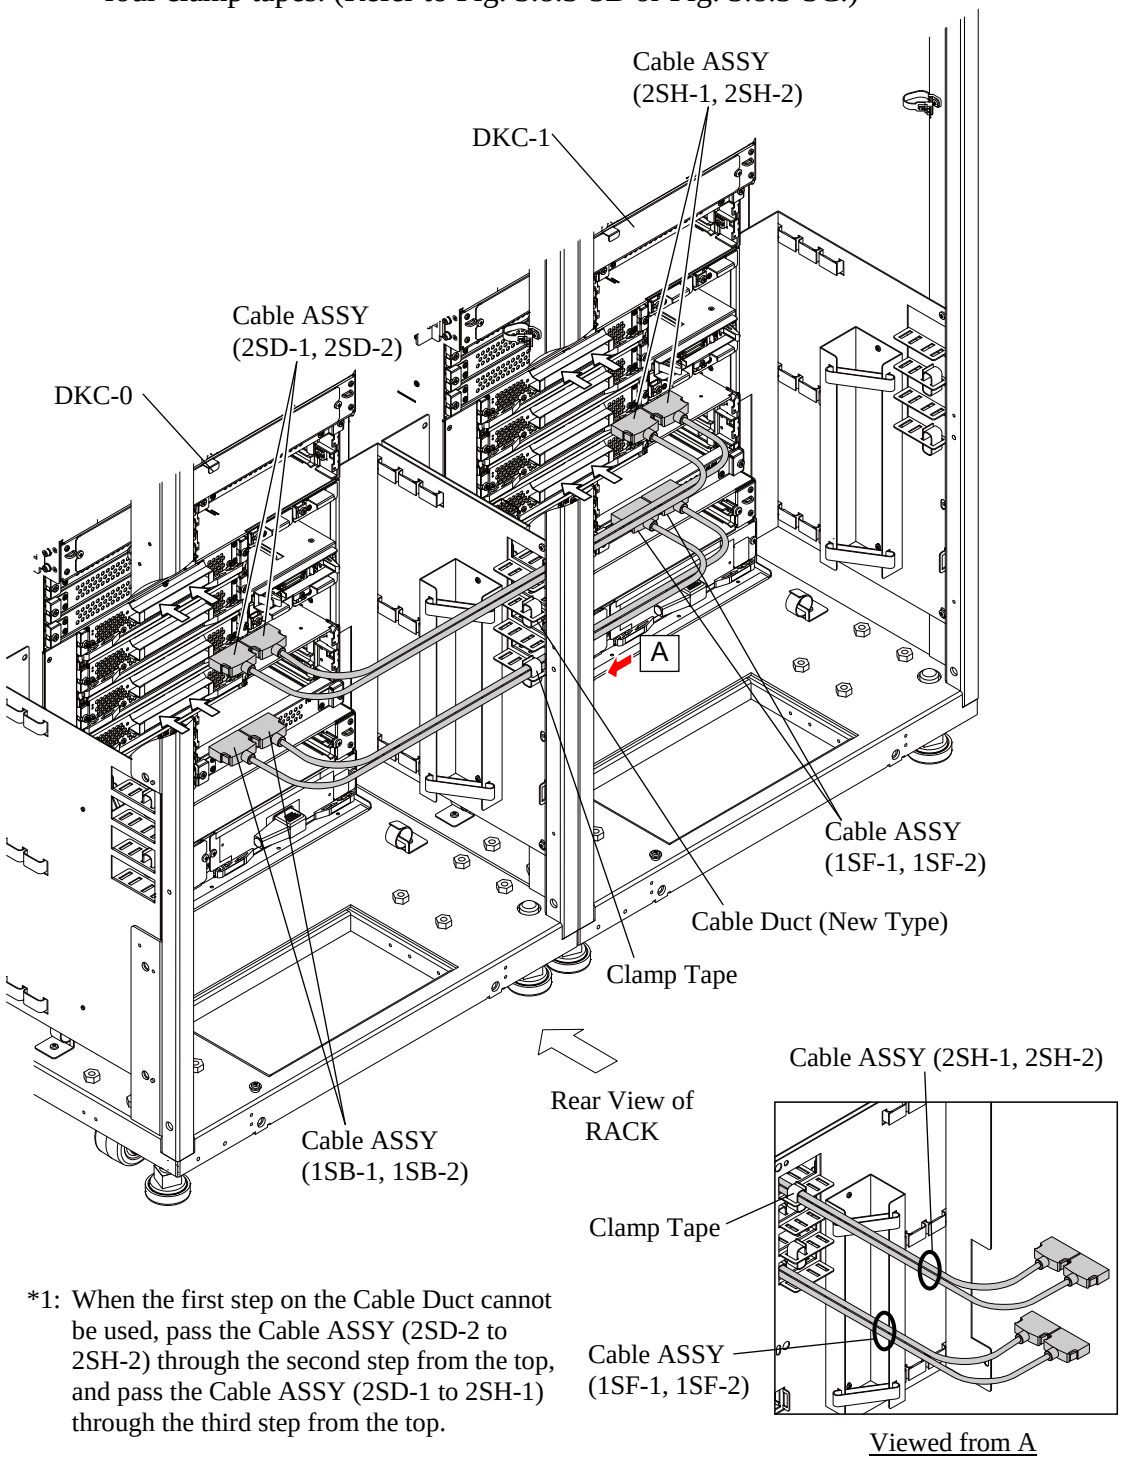
Copyright © 2014, Hitachi, Ltd.

4-1 When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) is required to install, install the cable ASSY.
When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) is not required to install, go to the procedure 5. SVP pre procedure (Channel Adapter Addition).

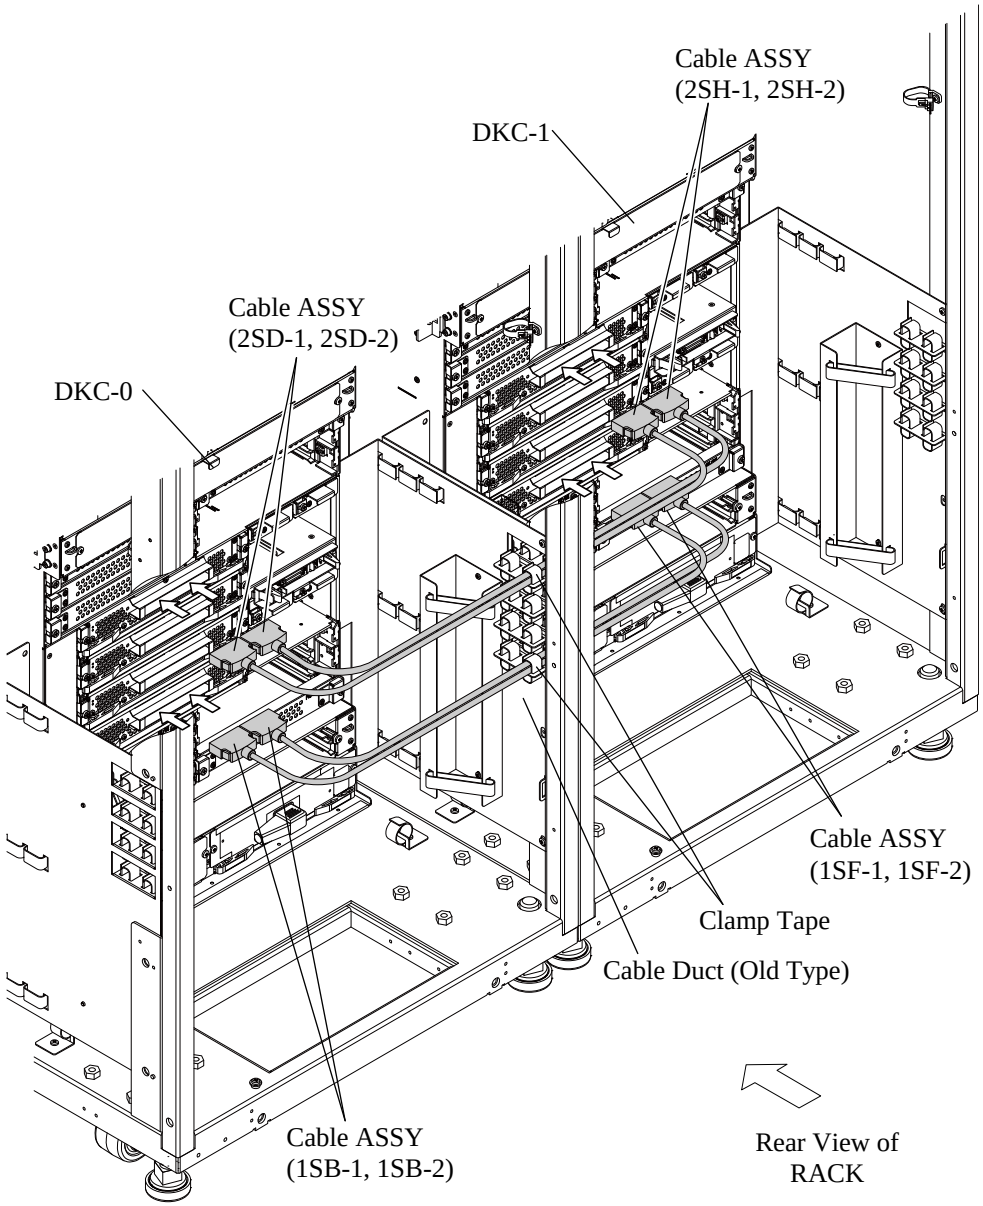
a. Wire the four Cable ASSYs to the rear side of the RACK, and fix them with the two or four clamp tapes. (Refer to Fig. 3.8.3-3B or Fig. 3.8.3-3C.)



*1: When the first step on the Cable Duct cannot be used, pass the Cable ASSY (2SD-2 to 2SH-2) through the second step from the top, and pass the Cable ASSY (2SD-1 to 2SH-1) through the third step from the top.

Fig. 3.8.3-3B Installation of Cables (DKC-0 ↔ DKC-1, New Type)

Copyright © 2014, Hitachi, Ltd.



*1: When the first step on the Cable Duct cannot be used, pass the Cable ASSY (2SD-2 to 2SH-2) through the second step from the top, and pass the Cable ASSY (2SD-1 to 2SH-1) through the third step from the top.

Fig. 3.8.3-3C Installation of Cables (DKC-0 ↔ DKC-1, Old Type)

Copyright © 2014, Hitachi, Ltd.

b. Remove the four black caps from the ESW (1SB and 2SD) of the DKC-0, and connect the cables (1SB-1, 1SB-2, 2SD-1 and 2SD-2).
c. Remove the four black caps from the ESW (1SF and 2SH) of the DKC-1, and connect the cables (1SF-1, 1SF-2, 2SH-1 and 2SH-2).

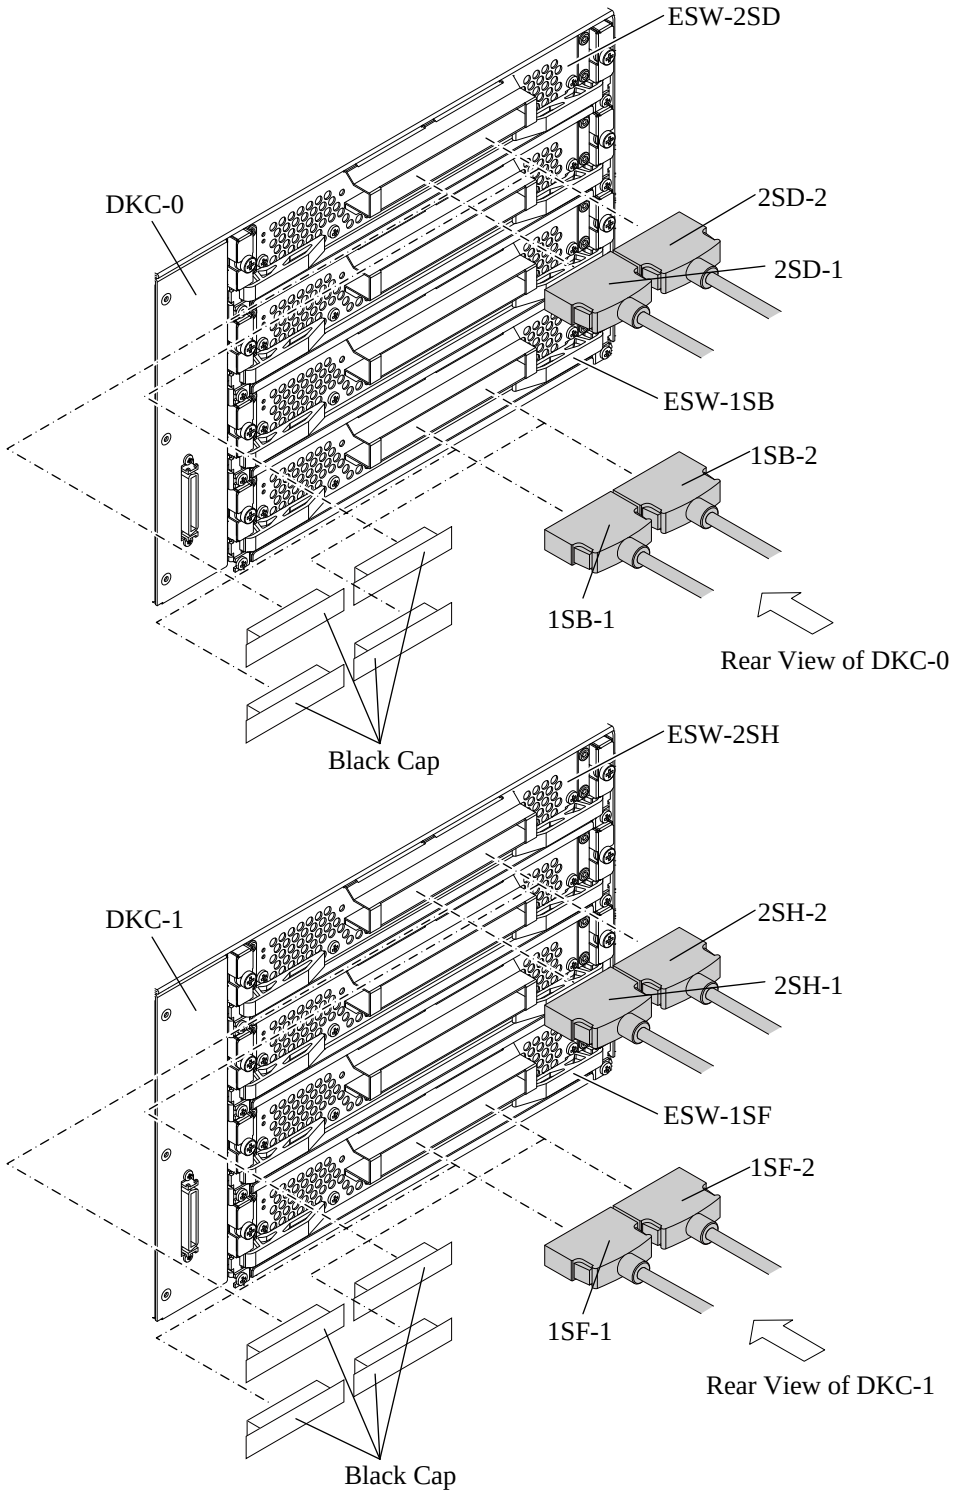


Fig. 3.8.3-3D Connection of Cables

Copyright © 2014, Hitachi, Ltd.

4-2 Attachment of Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

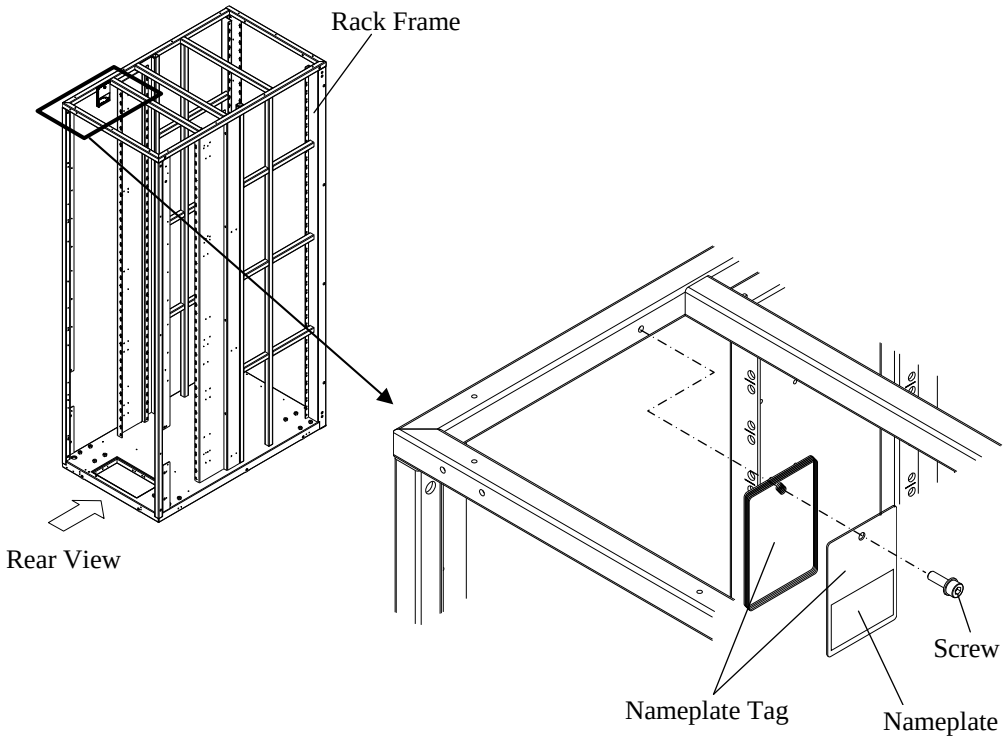

Fig. 3.8.3-3E Attachment of Nameplate

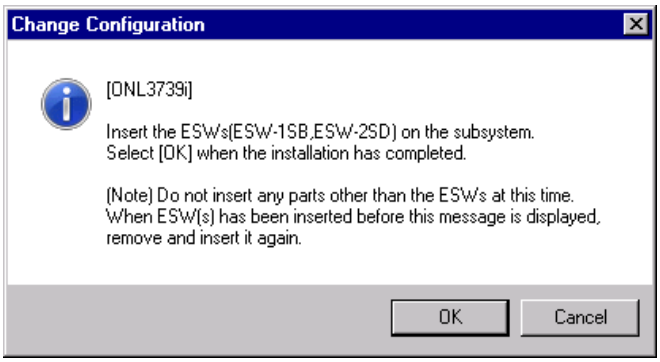
Copyright © 2011, 2014, Hitachi, Ltd.

5. SVP pre procedure (Channel Adapter Addition)

(1) <Making sure of completion of the hardware addition>
After the ESW addition is completed, select (CL) [OK] in response to a message, “Insert the ESWs(ESW-nnn,ESW-nnn) on the subsystem. Select [OK] when the installation has completed. (Note) Do not insert any parts other than the ESWs at this time. When ESW(s) has been inserted before this message is displayed, remove and insert it again.”.



(Eg. ESW-1SB, ESW-2SD)

---

(2) <Downloading the microprogram>
The microprogram is downloaded to the SM.
The progress of the downloading is displayed.

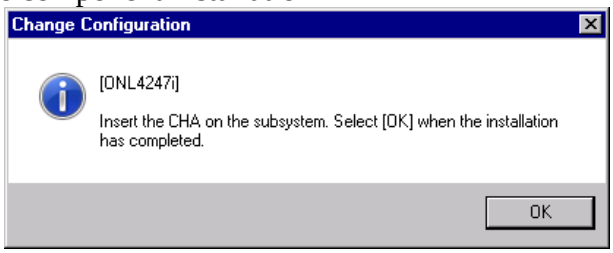
---

(3)
“Changing the subsystem configuration data …” is displayed.

---

(4) <Making sure of completion of the hardware component installation>
A message, “Insert the CHA on the subsystem. Select [OK] when the installation has completed.” is displayed.

Note: Do not press the [OK] button by mistake before installing the part(s) to be added in the subsystem.



Copyright © 2011, 2014, Hitachi, Ltd.

6. Installation Procedure of FCOE 8-port Host Adapter

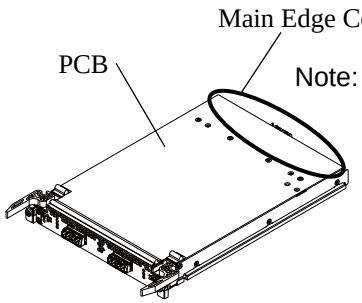
Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

6-1 Insertion of the PCBs

a. Loosen the screws and remove the dummy plates. (This procedure is not required if the PCB should be installed in the Basic slots.)

Note: Remove the dummy plate just before installing the PCB.
If the dummy plate is kept removed for a long time, the wind doesn't flow among installed PCBs, causing the PCBs' temperature rise which may result in temperature warning or temperature alarm.

b. Insert the PCBs to the correct locations in the DKC and tighten the screws.



Note:
- Check that the main edge connector of the PCB has no deformation, damage or sticking of dust before installing the PCB. (See INST03-01-70.)
- When installing the PCB, hold the right and left of the PCB with both hands, and insert it straight not to contact the neighboring PCB.

Table 3.8.3-4 Inserting Location

DKC	Addition No.	Slot No.		Location No.		Remarks
		Cluster 1	Cluster 2	Cluster 1	Cluster 2	
DKC-0	Basic	1EU	2QU	CHA-1EU	CHA-2QU	
	Option 1	1EL	2QL	CHA-1EL	CHA-2QL	
	Option 2	1FU	2RU	CHA-1FU	CHA-2RU	
	Option 3	1FL	2RL	CHA-1FL	CHA-2RL	
	Option 4	1AL	2ML	CHA-1AL	CHA-2ML	
	Option 5	1AU	2MU	CHA-1AU	CHA-2MU	
DKC-1	Basic	1GU	2TU	CHA-1GU	CHA-2TU	
	Option 1	1GL	2TL	CHA-1GL	CHA-2TL	
	Option 2	1HU	2UU	CHA-1HU	CHA-2UU	
	Option 3	1HL	2UL	CHA-1HL	CHA-2UL	
	Option 4	1LL	2XL	CHA-1LL	CHA-2XL	
	Option 5	1LU	2XU	CHA-1LU	CHA-2XU	

Copyright © 2011, Hitachi, Ltd.

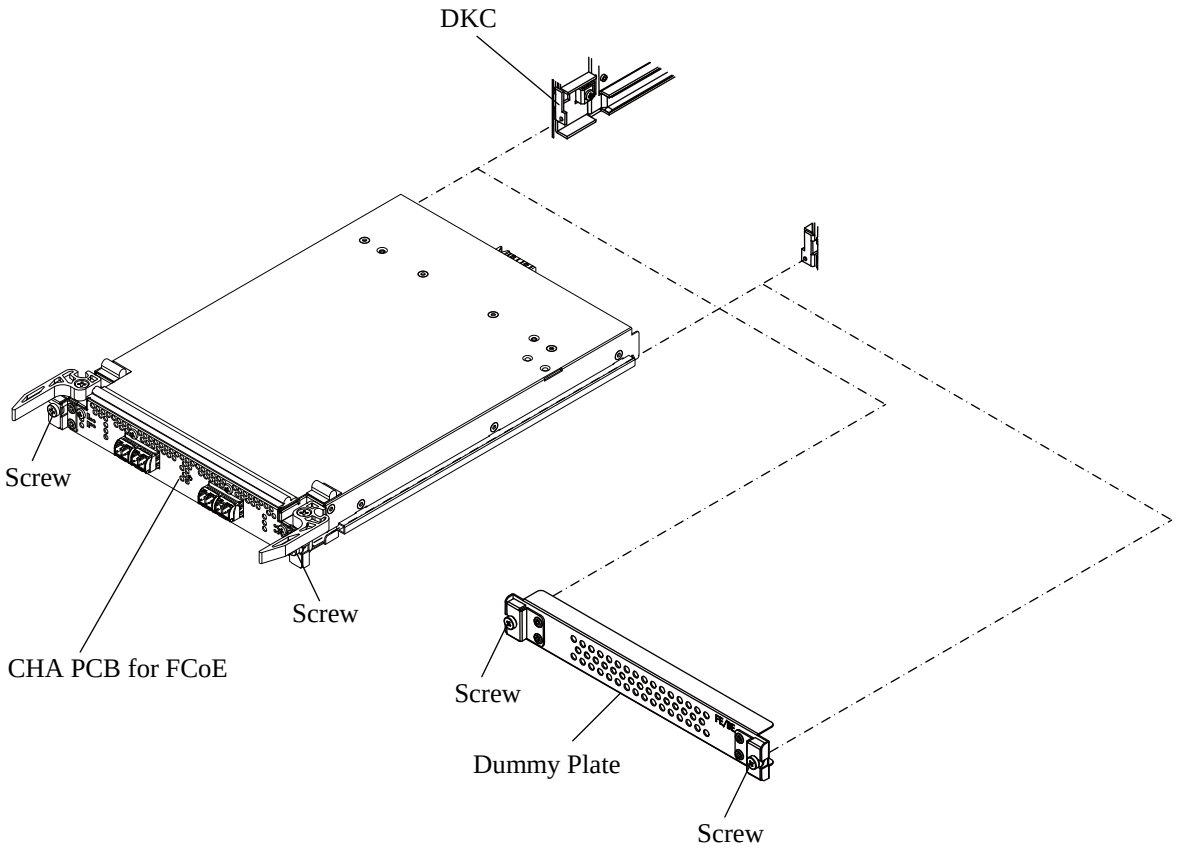


Fig. 3.8.3-4 Insertion of PCB

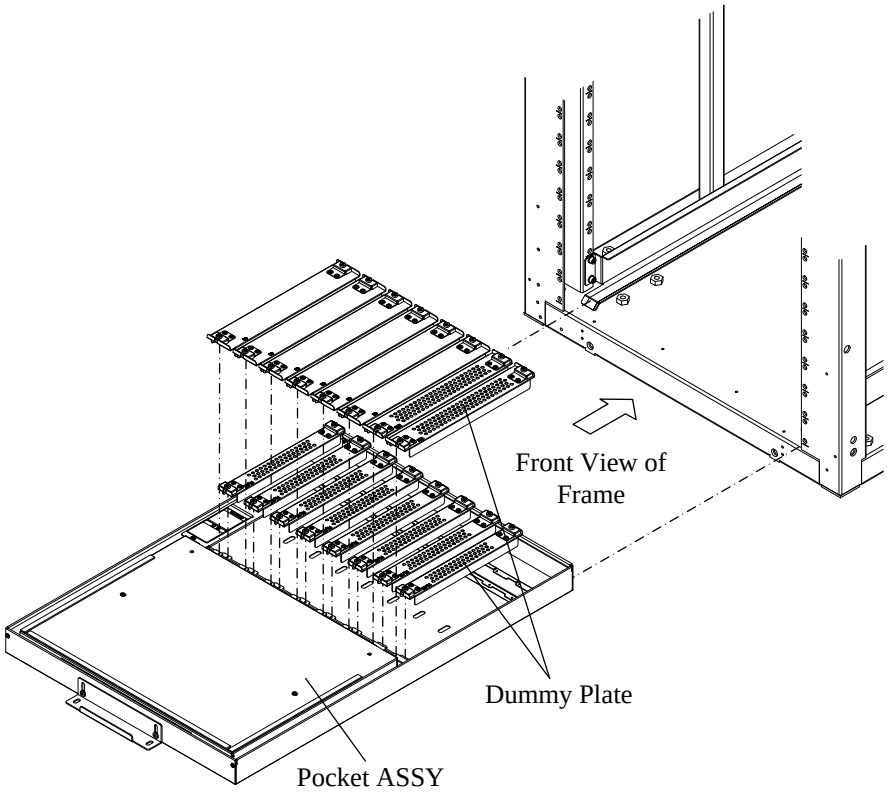
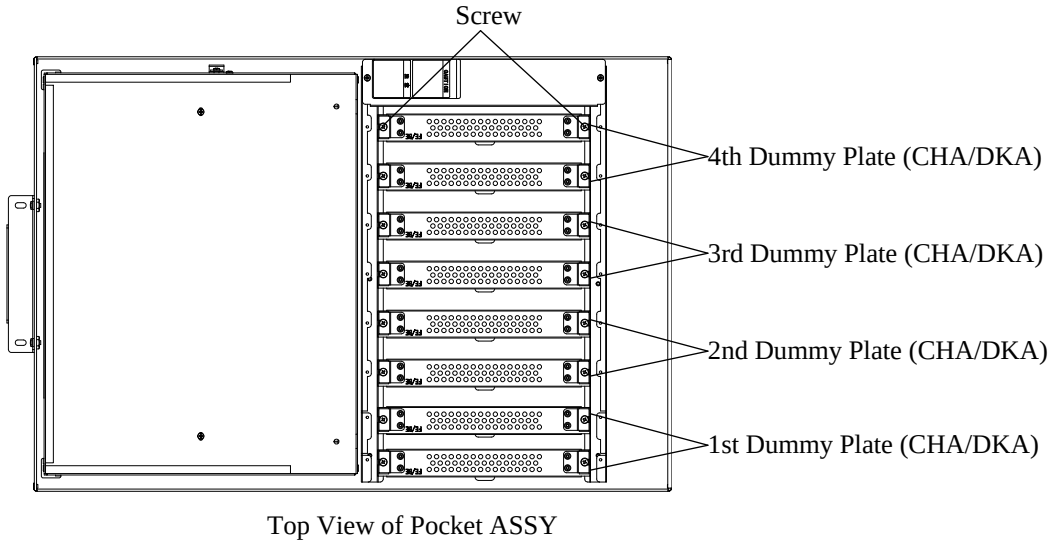
Copyright © 2011, 2014, Hitachi, Ltd.

6-2 Storage of Dummy Plates (This procedure is not required if the PCB should be installed in the Basic slots.)

a. Remove the pocket ASSY from the front of the frame.
b. Install the two removed dummy plates in the pocket ASSY, and tighten them with the four screws.
   When dummy plates are installed in the upper part, remove the upper dummy plates once, install the lower dummy plates, and then install the upper dummy plates again.
c. Install the pocket ASSY in the front of the frame.





Top View of Pocket ASSY

Fig. 3.8.3-5 Storage of Dummy Plates

Copyright © 2011, 2014, Hitachi, Ltd.

6-3 Cleaning the fibre cable connectors

For the tools needed for the cleaning, refer to the tool list on page PARTS06-10.

a. Blow compressed gas against the connector using an air sprayer (for about five seconds).
b. Wipe the connector lightly with a piece of cut gauze wet with ethyl alcohol.
c. Blow compressed air again and check the result of the cleaning (None of dust, sticking of foreign matter, and dirt must be observed).

6-4 Connection of the optical fibre cables

When wiring for optical fibre cables from the floor

a. Draw the optical fibre cable from the rear lower opening of the frame.

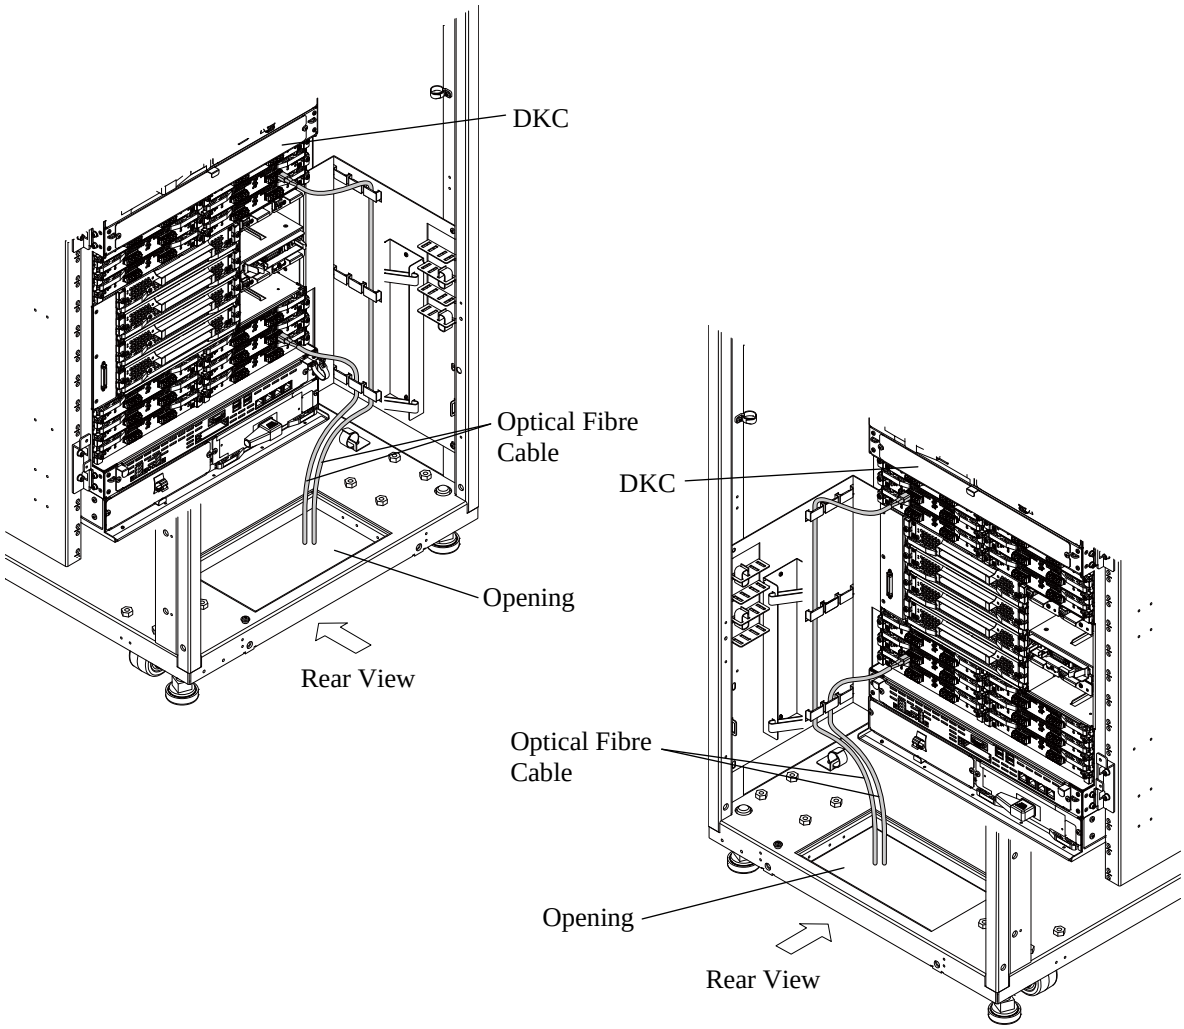


Fig. 3.8.3-6 Attachment of Optical Fibre Cables

Copyright © 2011, Hitachi, Ltd.

b. Connect the optical fibre cables to the PCB.

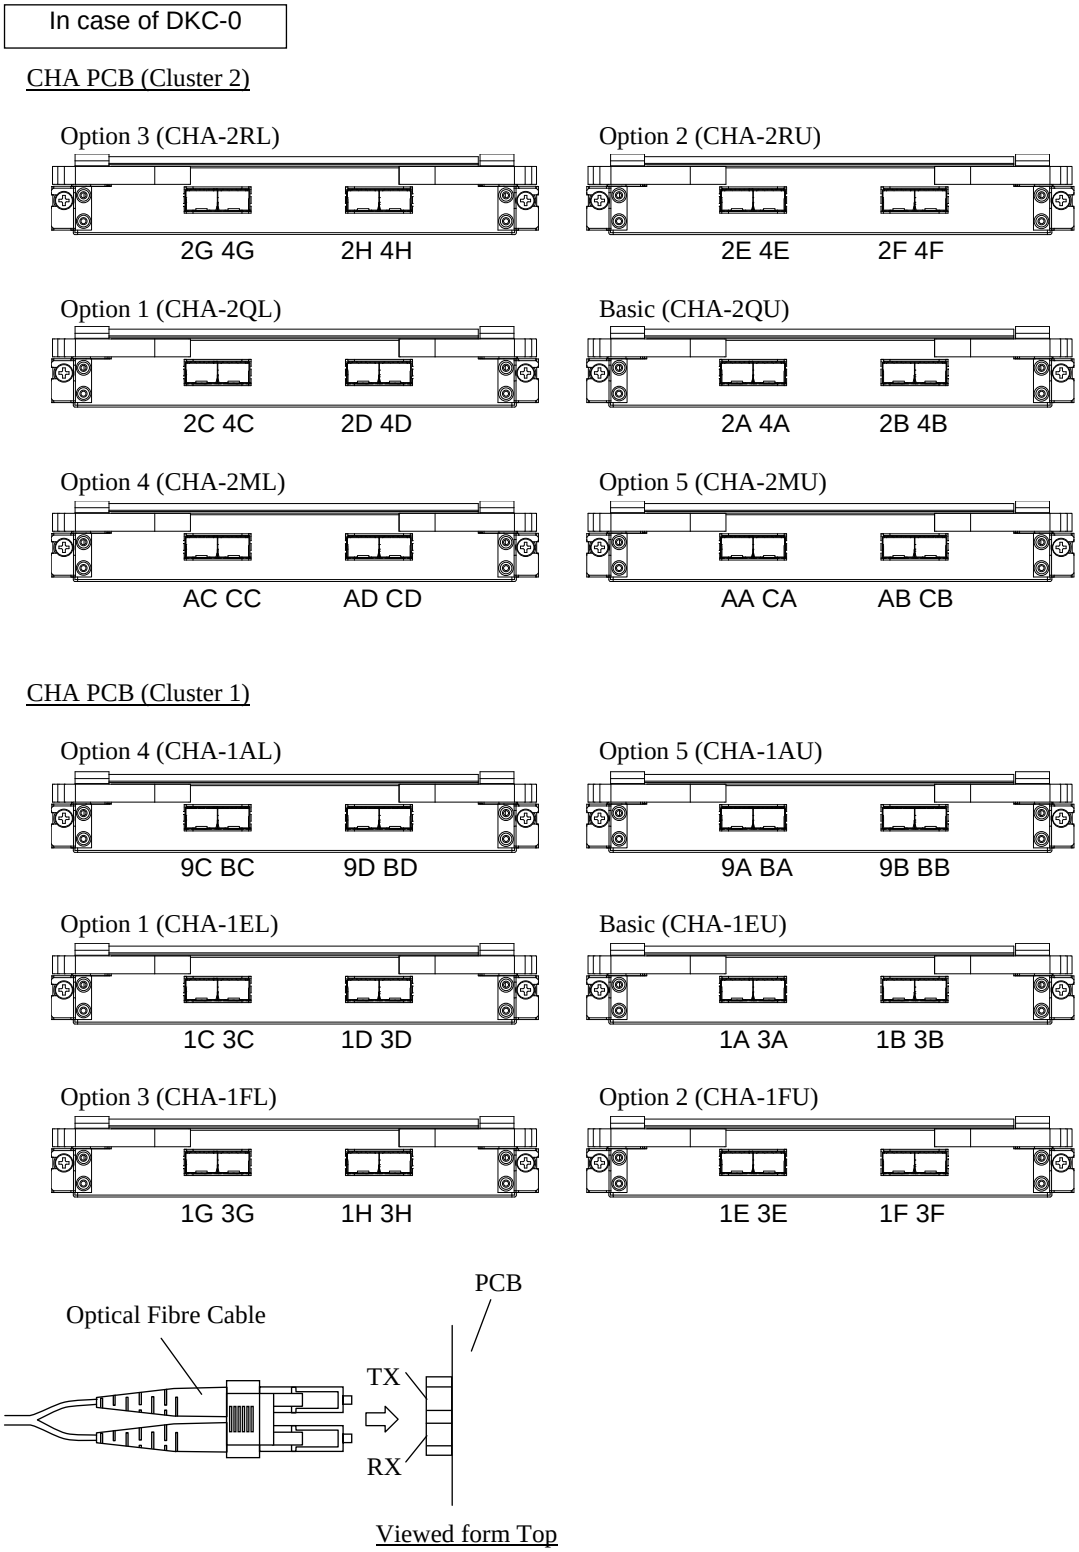

Fig. 3.8.3-7 Connection of Optical Fibre Cables

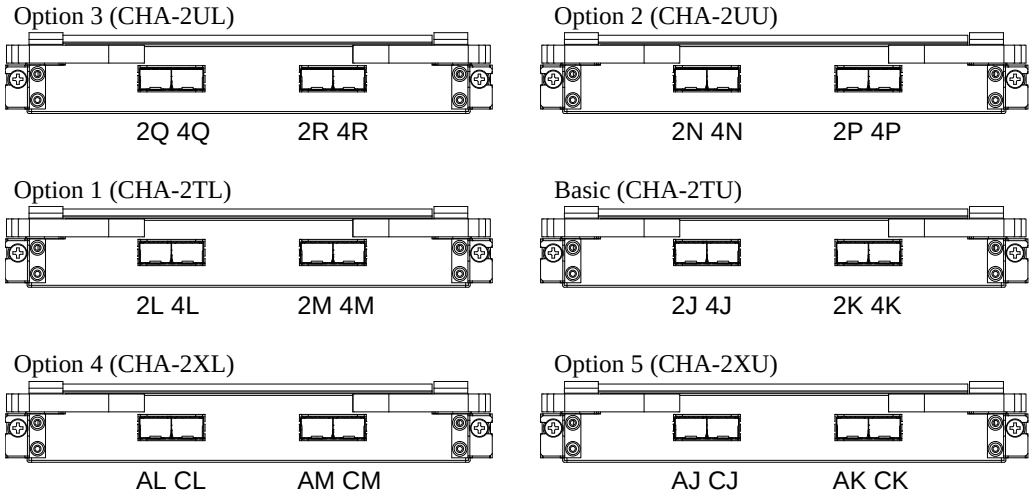
Copyright © 2011, Hitachi, Ltd.

In case of DKC-1

CHA PCB (Cluster 2)



CHA PCB (Cluster 1)

c. Secure the optical fibre cable with the binder on the frame side.

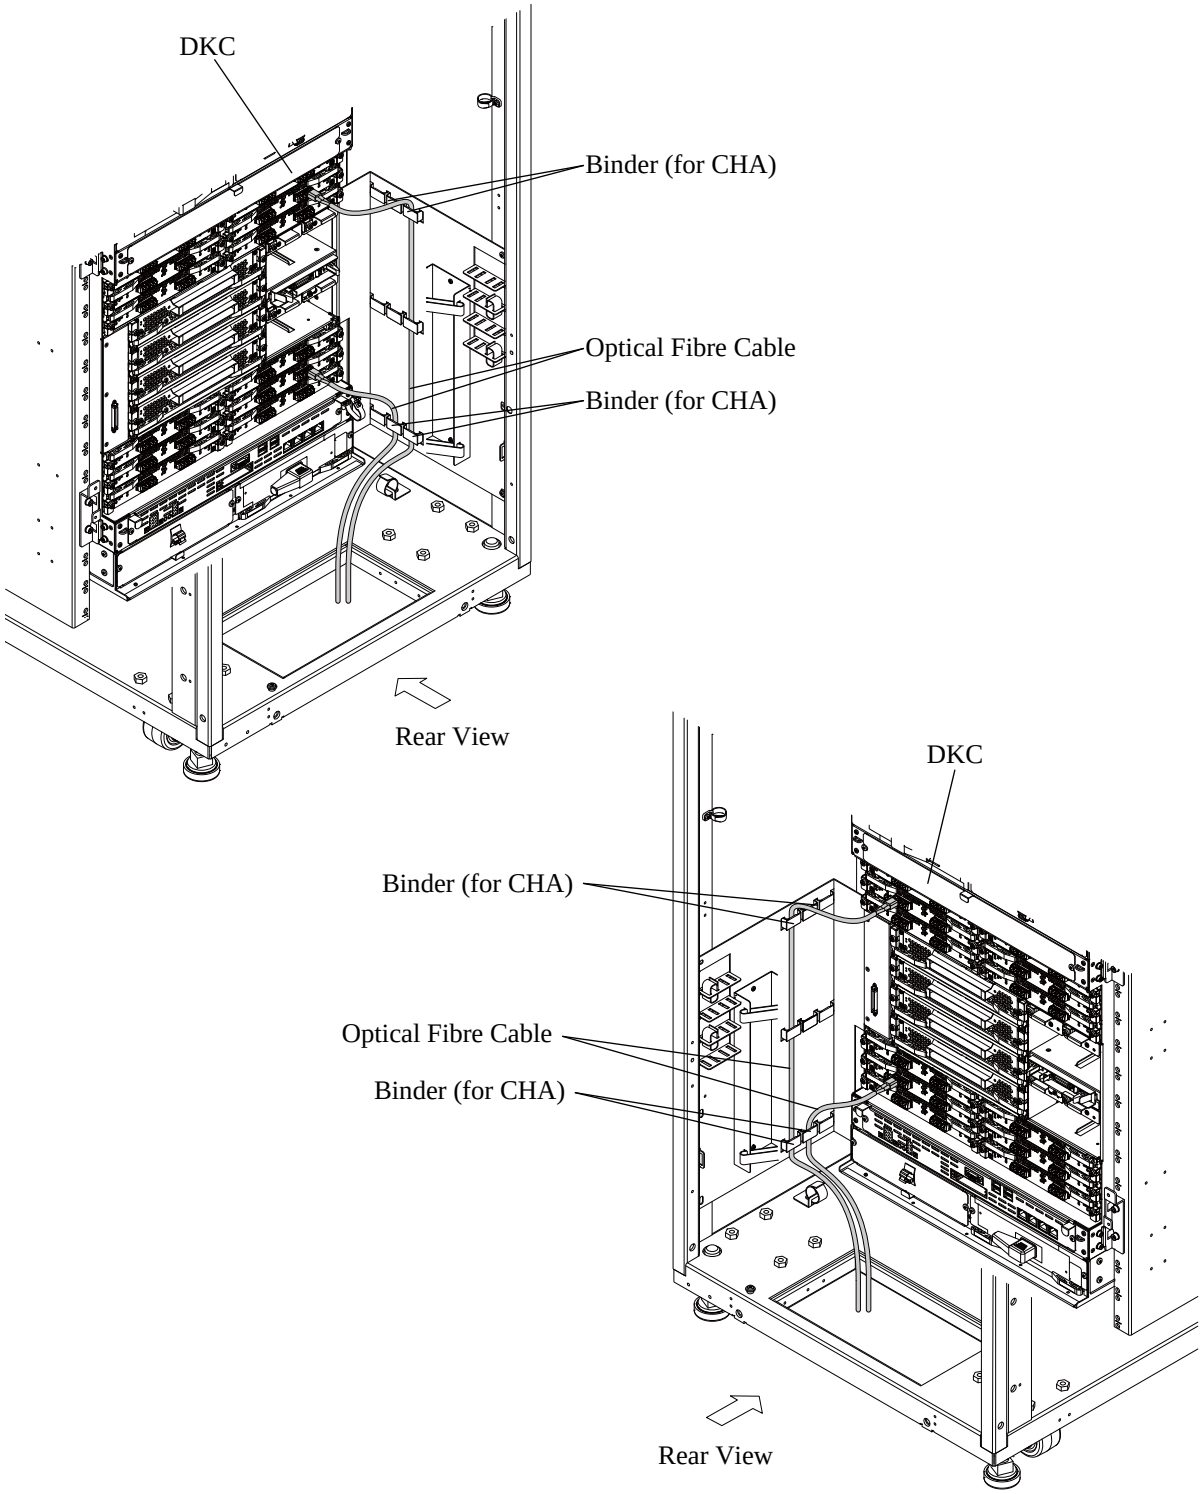

Fig. 3.8.3-9 Fixation of Optical Fibre Cables

Copyright © 2011, Hitachi, Ltd.

When wiring for the optical fibre cables from the round opening of the top cover

a. Draw the optical fibre cable from the opening of the top cover, and wire the cable in the frame. (Refer to Fig. 3.8.3-10 or Fig. 3.8.3-11.)
b. Connect the optical fibre cables to the PCB in the DKC. (Refer to Fig. 3.8.3-7 or Fig. 3.8.3-8.)
c. Secure the optical fibre cable with the binder on the frame side.

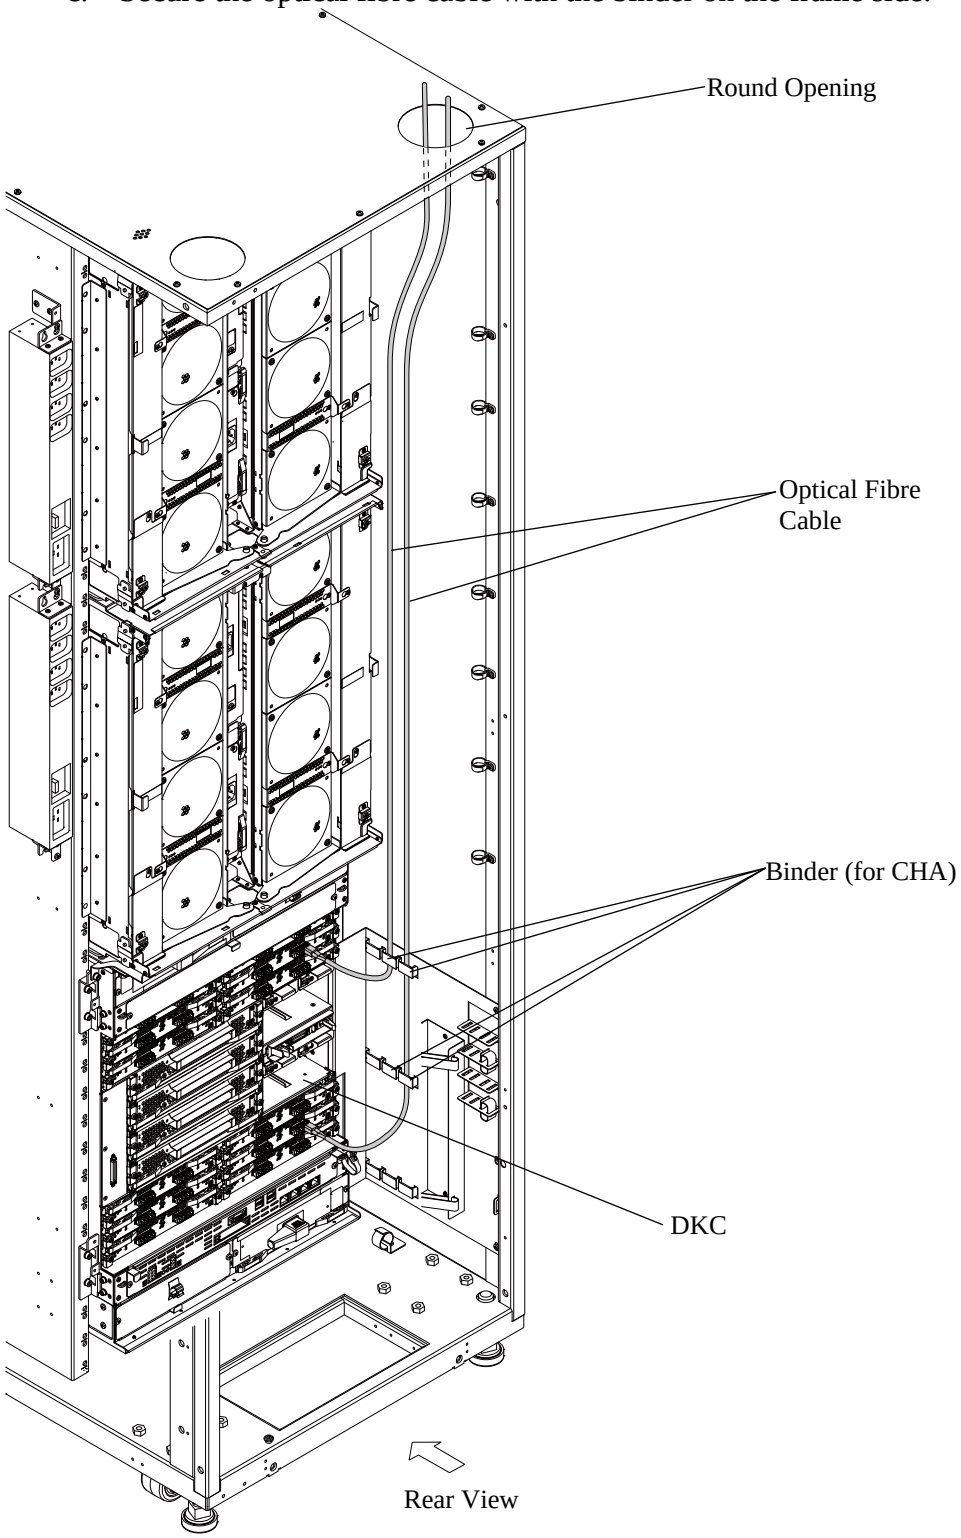

Fig. 3.8.3-10 Attachment of Optical Fibre Cables

Copyright © 2011, Hitachi, Ltd.

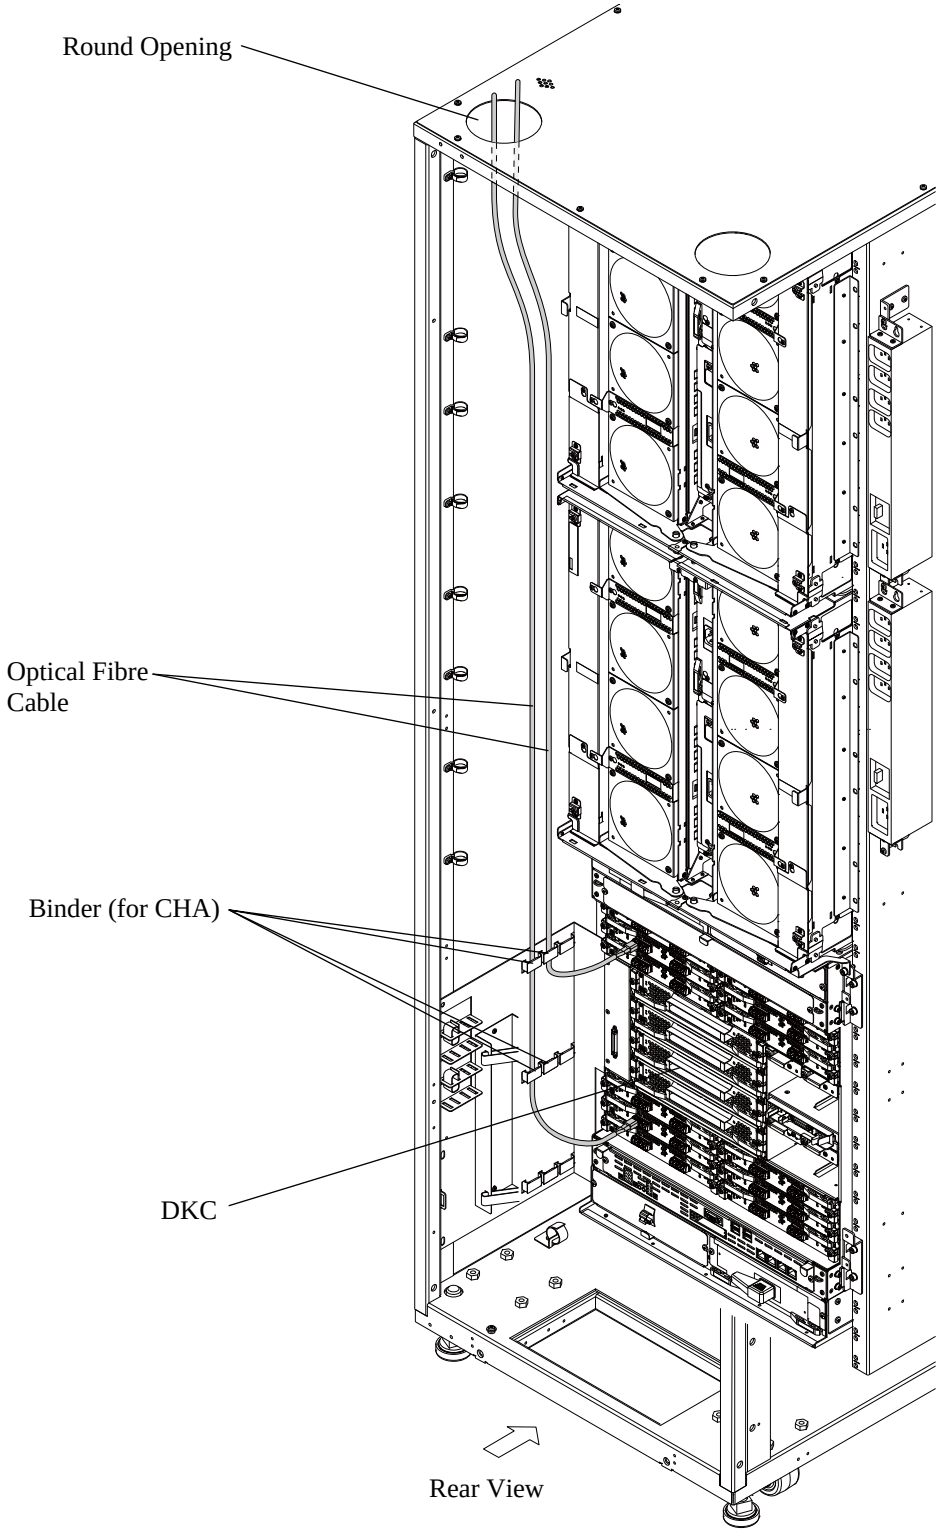

Fig. 3.8.3-11 Attachment of Optical Fibre Cables

Copyright © 2011, Hitachi, Ltd.

When wiring for the optical fibre cables from the window opening of the top cover

a. Loosen the two screws of the top cover, and slide the window opening toward the front side. (Refer to Fig. 3.8.3-12 or Fig. 3.8.3-13.)
b. Draw the optical fibre cable from the opening of the top cover, and wire the cable in the frame.
c. Connect the optical fibre cables to the PCB in the DKC. (Refer to Fig. 3.8.3-7 or Fig. 3.8.3-8.)
d. Secure the optical fibre cable with the binder on the frame side.
e. Slide the window to close the opening, and retighten it with the two screws.

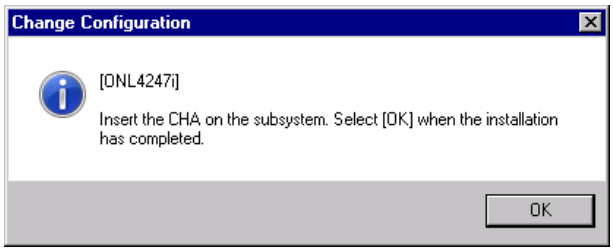
7. SVP post procedure

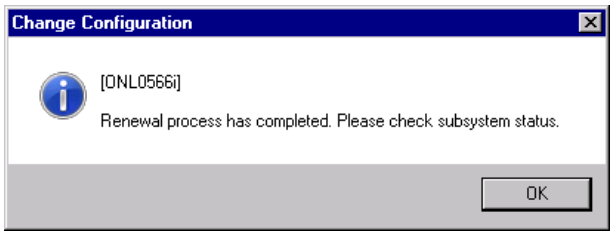
(1) <Check that hardware components are installed>
Select (CL) [OK] after making sure that all hardware components are installed correctly in response to “Insert the CHA on the subsystem. Select [OK] when the installation has completed.”.

When [Cancel] is selected (CL), returns to INST03-08C-20 step (3).



(2) <Restore CHA>
“Restoring the CHA...” is displayed.

(3) <End of system update processing>
“Renewal process has completed. Please check the subsystem status.” is displayed when recovery processing on all installed components is completed. Select (CL) [OK] in response to this message.

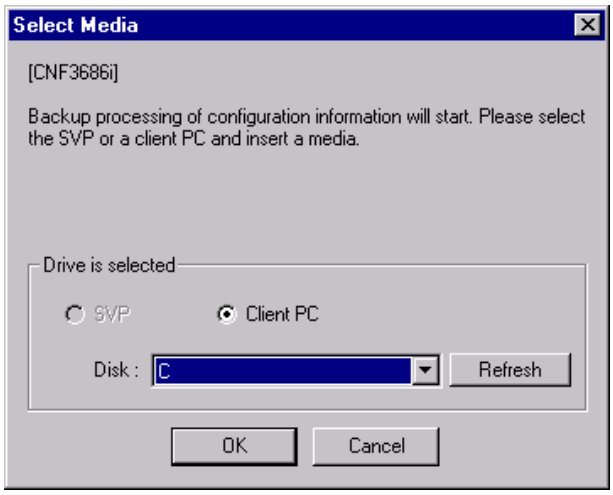


Copyright © 2011, 2012, Hitachi, Ltd.

(4)

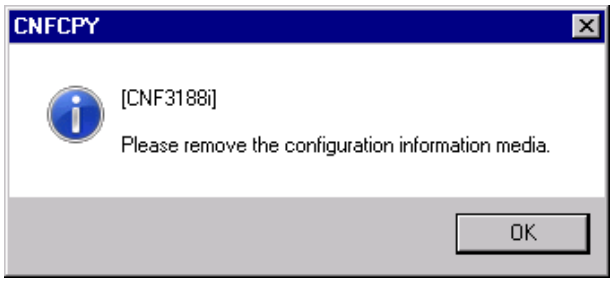
Execute an operation for backing up the configuration information.
Prepare the removable media for backup and insert the media.
Please select (CL) the [Refresh] button, and update drive information.
Select (CL) the drive and the PC in which the media was inserted. Select (CL) the [OK] button.

Note: For the procedure of backing up the configuration information to a CD-R, see page MICRO07-140.



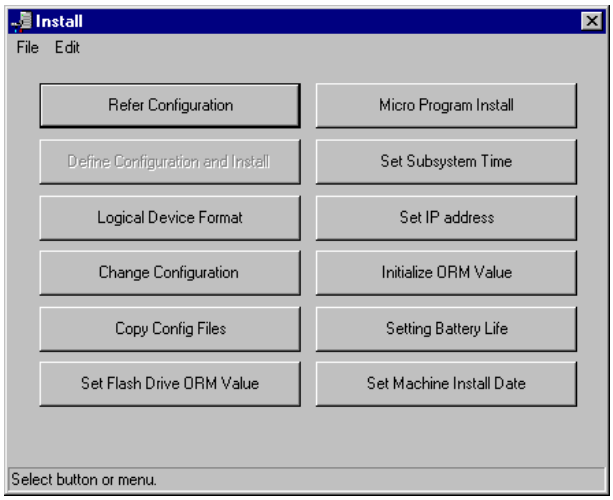
(5)

When this procedure is completed, the message “Please remove the configuration information media.” is displayed.
Remove the configuration information media, Select (CL) [OK].



(6)

After the procedure is completed, return to “Install”.
Select (CL) [File]-[Exit].



(7) <Mode Change>
Change the mode to View Mode.

Return to the working table and do the rest of the work.
New Installation: INST02-20,
Non-Disruptive Installation: INST02-40

Copyright © 2010, 2012, Hitachi, Ltd.

3.9 Changing of SFP (DKC-F710I-1UL/1US/1USR)

CAUTION

1. The SFP (DKC-F710I-1UL/1US/1USR) is an option to change the transceiver installed in the CHA package of the Fibre 8/16-port Host Adapter (DKC-F710I-8UFC/8UFCR/16UFC/16UFCR) to a port corresponding to Long-wave or Short-wave.
   It cannot be installed in the other CHA (DKC-F710I-16MFL/16MFS/16MUL/16MUS/16MUSR/8FOE).
2. Note that you cannot just change between long wave and shortwave SFP transceivers in an existing configuration without considering the cables.
   Long wave requires 9 micrometer diameter, single mode cable, and short wave requires 50/62.5 micrometer diameter, multimode cable. The Customer will encounter many CRC and Loss of Sync errors should they replace only transceivers and try to reuse the pre-existing cables that do not match the transceivers.

Table 3.9-1 Parts List

No.	Model Number	Part Name	Part No.	Quantity	Remarks
1	DKC-F710I-1UL	SFP (LONG)	5541872-A	1	
2	DKC-F710I-1US	SFP (SHORT)	5541873-A	1	
3	DKC-F710I-1USR	SFP (SHORT)	5541873-B	1	

Copyright © 2010, Hitachi, Ltd.

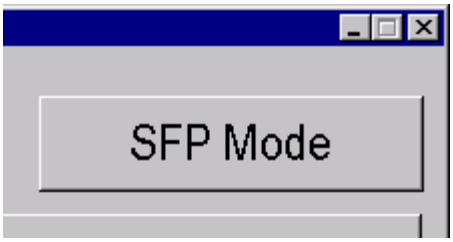
Notice: Before the replacement, make sure that a host device has been disconnected.

1. SFP type change

(1) <Preparation>
Close the all SVP menu.

(2) <Input password>
Select “Shift” + “Ctrl” + “F” on the SVP window.
Enter the password “RAID-SFP” and select (CL) [OK].

(3) <Check the mode>
The ‘SFP Mode’ is Displayed.



Copyright © 2010, Hitachi, Ltd.

2. Changing Procedure of SFP

Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

2-1 Replacement of SFP

a. Make sure of the CHA and Port Locations of the SFP to be replaced. (Refer to pages LOC04-10 through LOC04-60.)

⚠ CAUTION

If the SFP of a wrong port is removed, a system down may be caused. Make sure that the location of the SFP to be replaced is correct.

b. Disconnect the optical fibre cable or protector from the SFP to be replaced.

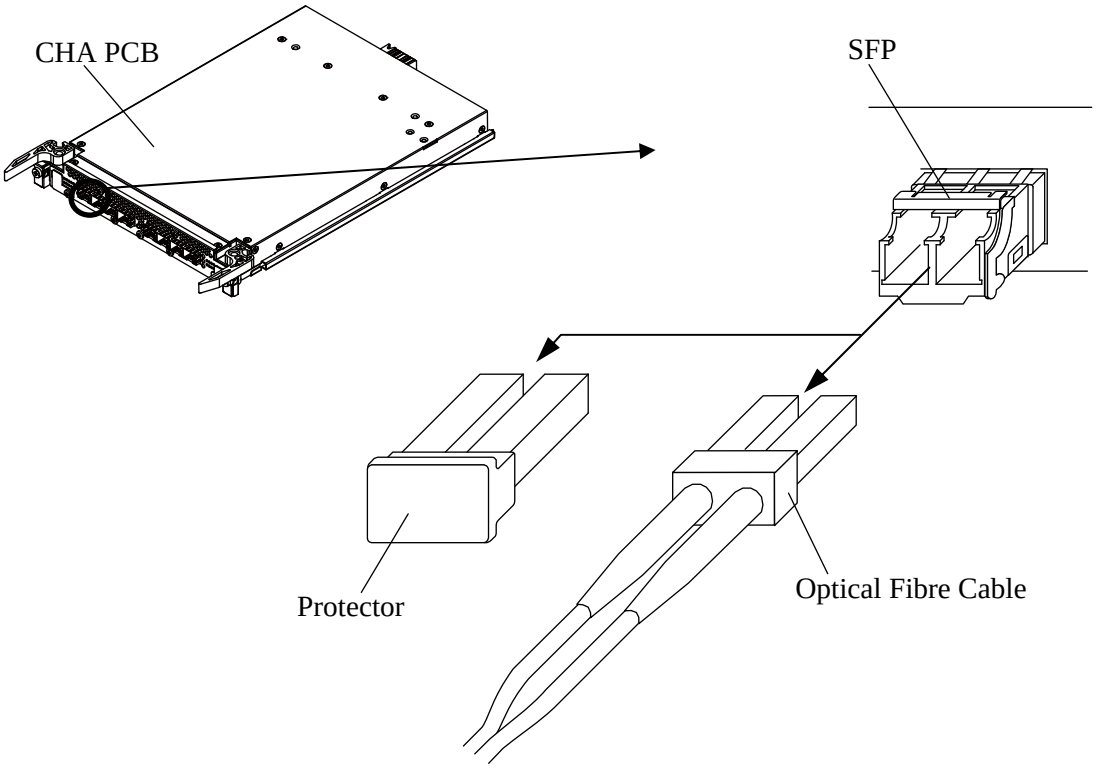


Fig. 3.9-1 Disconnection of Cable or Protector

Copyright © 2010, Hitachi, Ltd.

c. Raise the lever forward and remove the SFP.

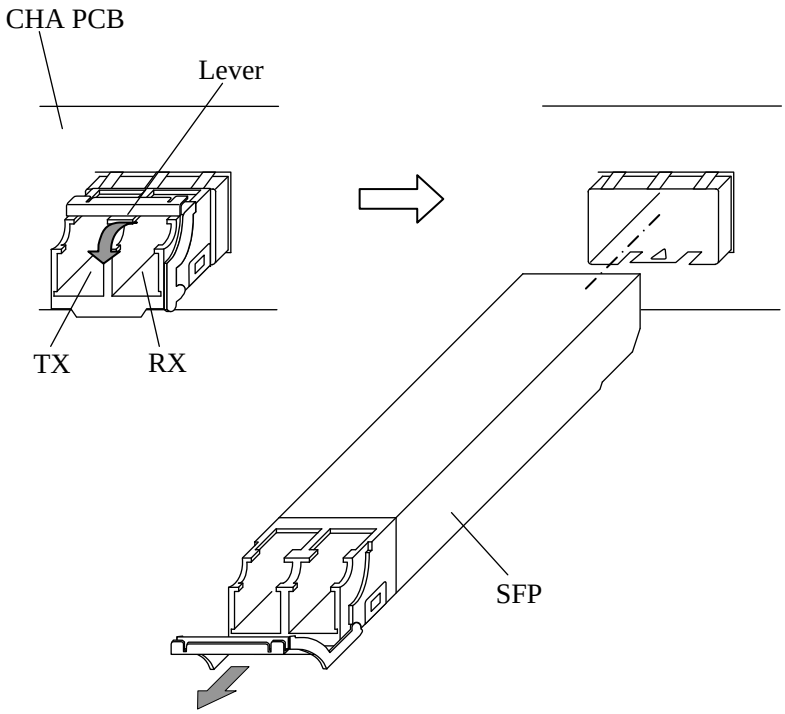

Fig. 3.9-2 Removal of SFP

Copyright © 2010, Hitachi, Ltd.

d. Insert the optional SFP to the CHA PCB.

Notice: Because the SFP that has been removed is a user's property, return it to and ask the user to keep it in custody.

How to distinguish between SFP (SHORT) and SFP (LONG)

The whole or a part of the lever is a black for the SFP (SHORT).
The whole or a part of the lever is a blue for the SFP (LONG).

[Example]

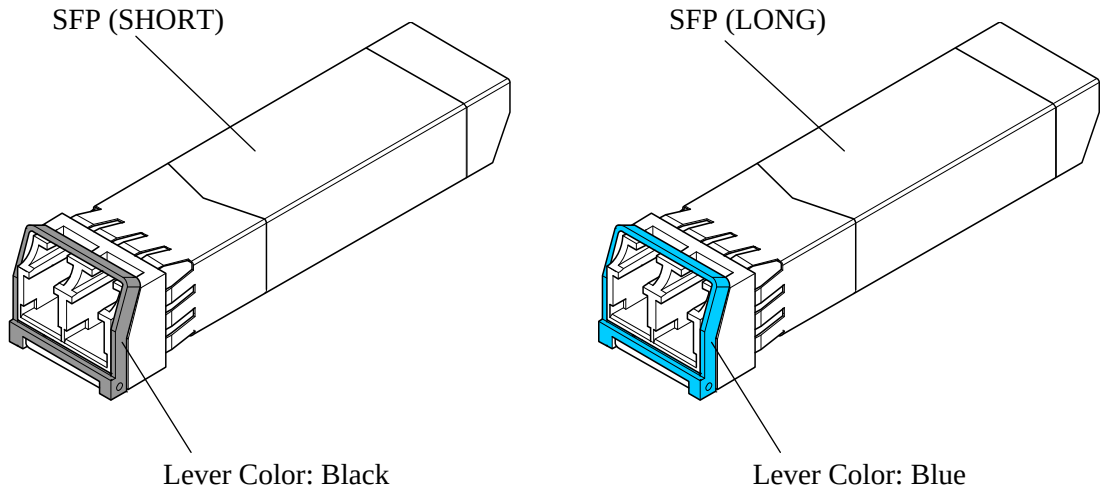

Fig. 3.9-3 How to distinguish SFP

Copyright © 2010, 2012, Hitachi, Ltd.

2-2 Change of Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags to be installed.
b. When you need to install SFP (DKC-F710I-1UL/1US/1USR), affix a necessary portion of the Label (QTY)(Accessory of DKC; DWG No.3268905-1) in layers on the nameplate and paint out numbers by black oil felt pen. However, when the nameplate is unused, do not affix the Label (QTY) in layers, and just paint it out.
c. When you need to remove SFP (DKC-F710I-1UL/1US/1USR), affix a necessary portion of the Label (QTY)(Accessory of DKC; DWG No.3268905-1) in layers on the nameplate and paint out numbers by black oil felt pen.
d. Attach all the nameplate tags with the screw.

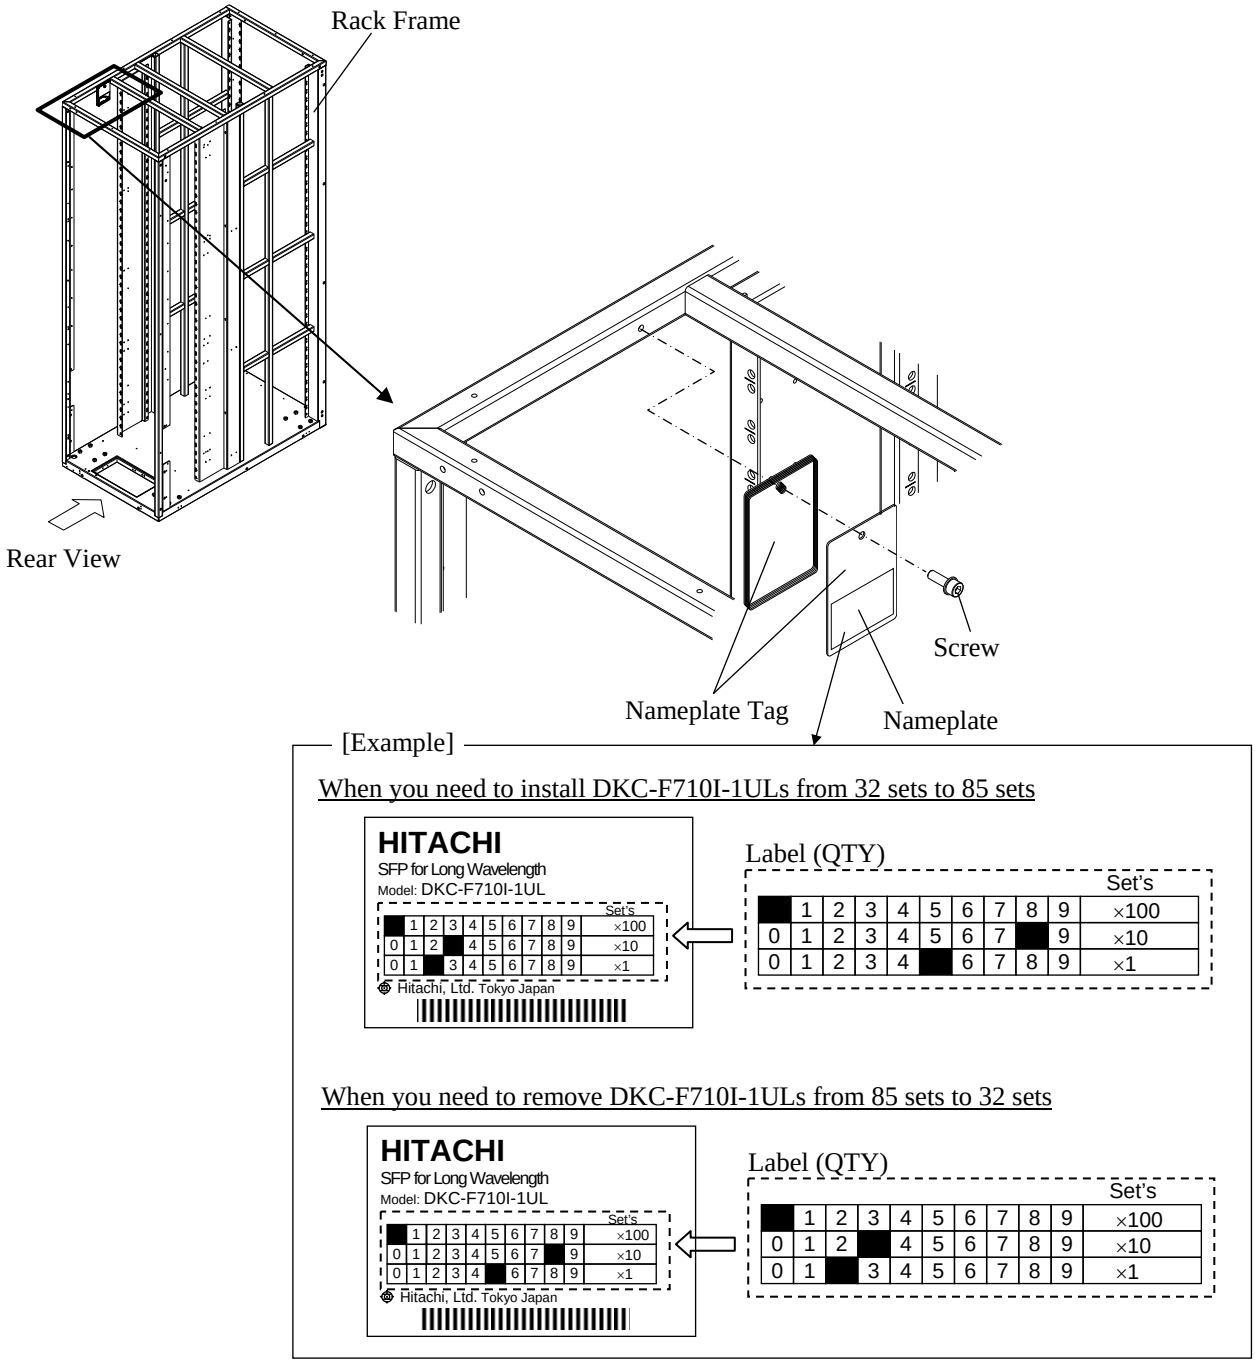

Fig. 3.9-4 Change of Nameplate

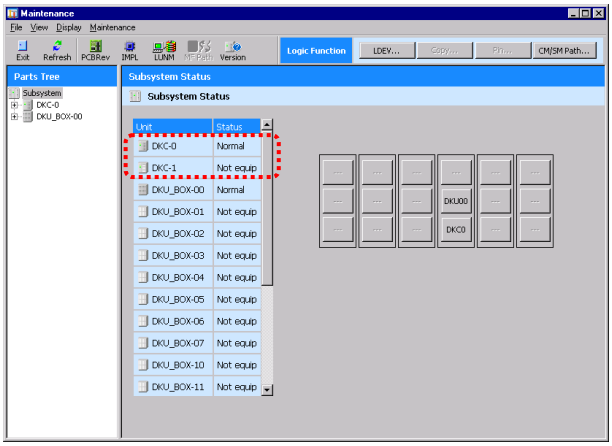
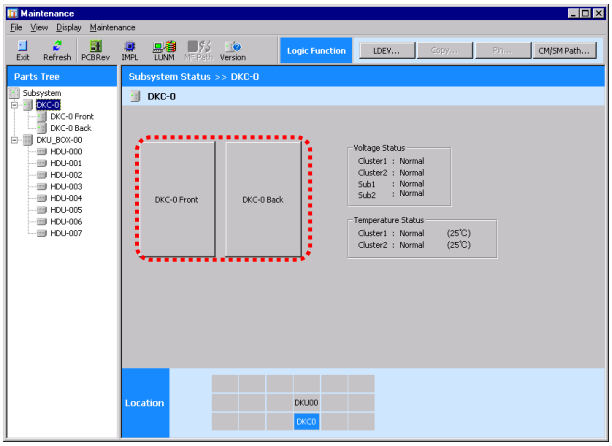
Copyright © 2010, Hitachi, Ltd.

3. Check SFP Kind information

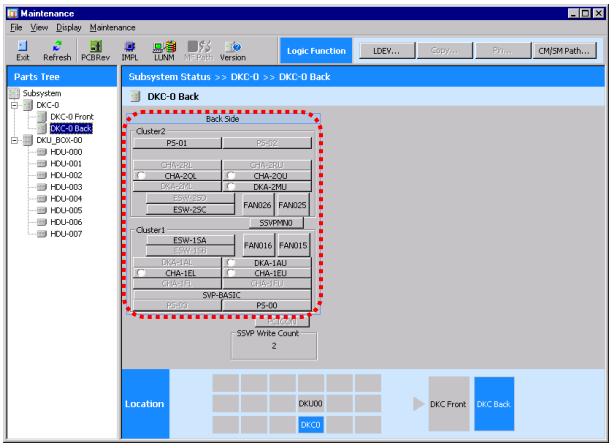
(1) <Instruction of DKC Information>
Select (CL) [DKC-n].



(2) <Display of DKC-n Back Information>
Select (CL) [DKC-n Back].

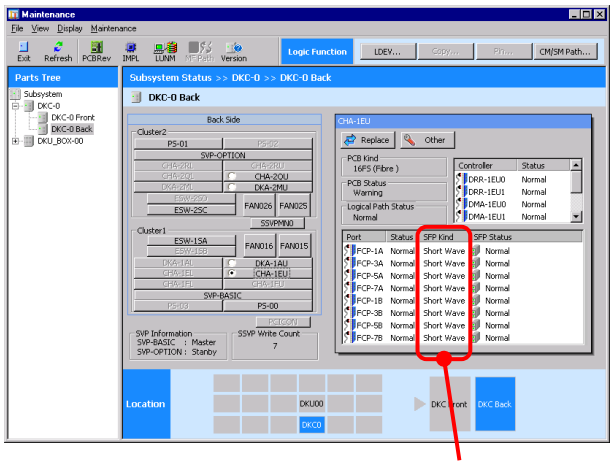


(3) <Display of CHA Information>
Select (CL) [CHA-nXX] which installs SFP of the maintenance target.



Copyright © 2010, Hitachi, Ltd.

(4) <Check SFP Kind information>
Make sure that information on the SFP Kind is displayed at the CHA location where the setting was changed and that the SFP Kind information on the port where the replacement was made is consistent with the specified setting.
When the SFP Kind information is not displayed, check if the SFP is installed correctly. If the SFP is installed correctly, replace it with a part for maintenance.



SFP Kind information

4. Return to the working table and do the rest of the work.
New Installation: INST02-20

*1: CM PCB is a name of the cache board (WP741-A) that is included in the DKC-F710I-CPC. The name is used in the following procedures.

Copyright © 2010, 2011, Hitachi, Ltd.

Rough time of Cache memory and/or cache flash memory installation becomes addition of the following A, B, C and D.

Table 3.10-2 Rough time of installation

	process	Time	Remarks
A	Target CM PCB blocking time	5 ~ 60min × 2 (*1) (*2)	
B	Cache memory, cache flash memory equipment process	5min × target CM PCB num.	
C	Target CM PCB diagnosis time	10min × target CM PCB num.	
D	Target CM PCB recovering time	5 ~ 20min × target CM PCB num. (*1)	

*1: Standard processing time is indicated. The processing time depends on the use situation, especially, the influence of the amount of write pending is received. When the amount of write pending is large, time more than the indication value might be required.

*2: When the number of cache memory or/and cache flash memory equipped with CM PCB of existing is changed, this time is needed.

(Reference)Outline of recommended procedure for installation

(1) When adding PCBs from two (C16G×3) to four (C16G×4) (DIMM and PCB installation)

(a) Installation with priority on minimizing impact on host (without cache side blockade)

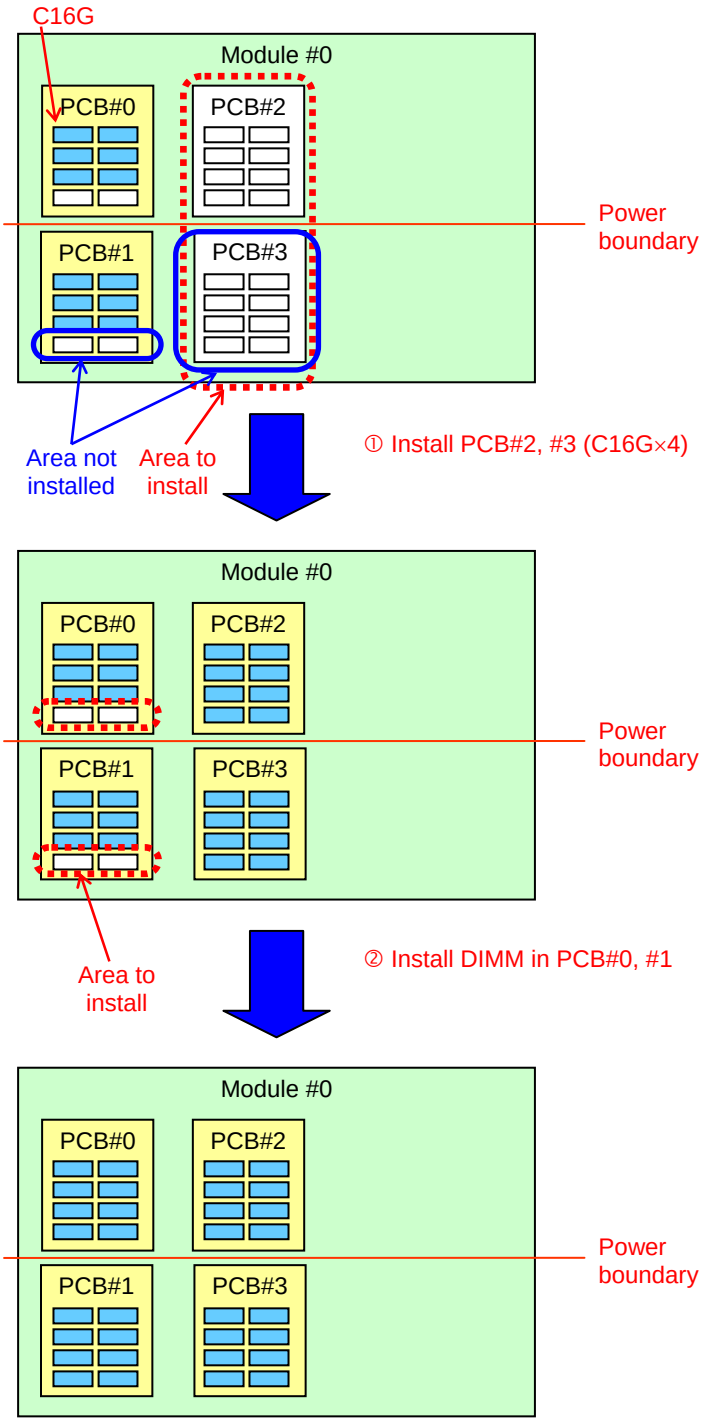

Fig. 3.10-A Installation with priority on minimizing impact on host 1

Copyright © 2011, Hitachi, Ltd.

(b) Installation with priority on reducing maintenance time (with cache side blockade)

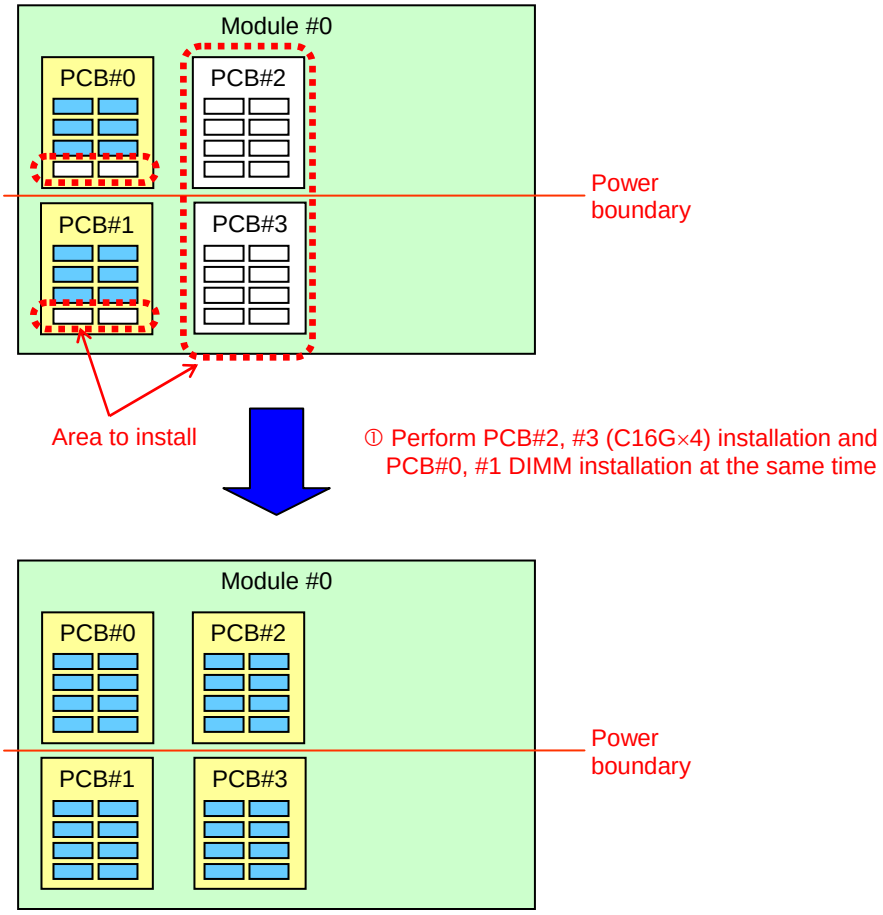

Fig. 3.10-B Installation with priority on reducing maintenance time 1

Copyright © 2011, Hitachi, Ltd.

(2) When adding PCBs from two (C16G×4 [SM area is 8G, DIR+CM area is 24G) to four (two sets of C16G×4 [SM area is 16G, DIR+CM area is 16G] and two sets of C16G×4 [DIR+CM area is 32G]) (PCB and SM area Installation)

(a) Installation with priority on minimizing impact on host (without cache side blockade)

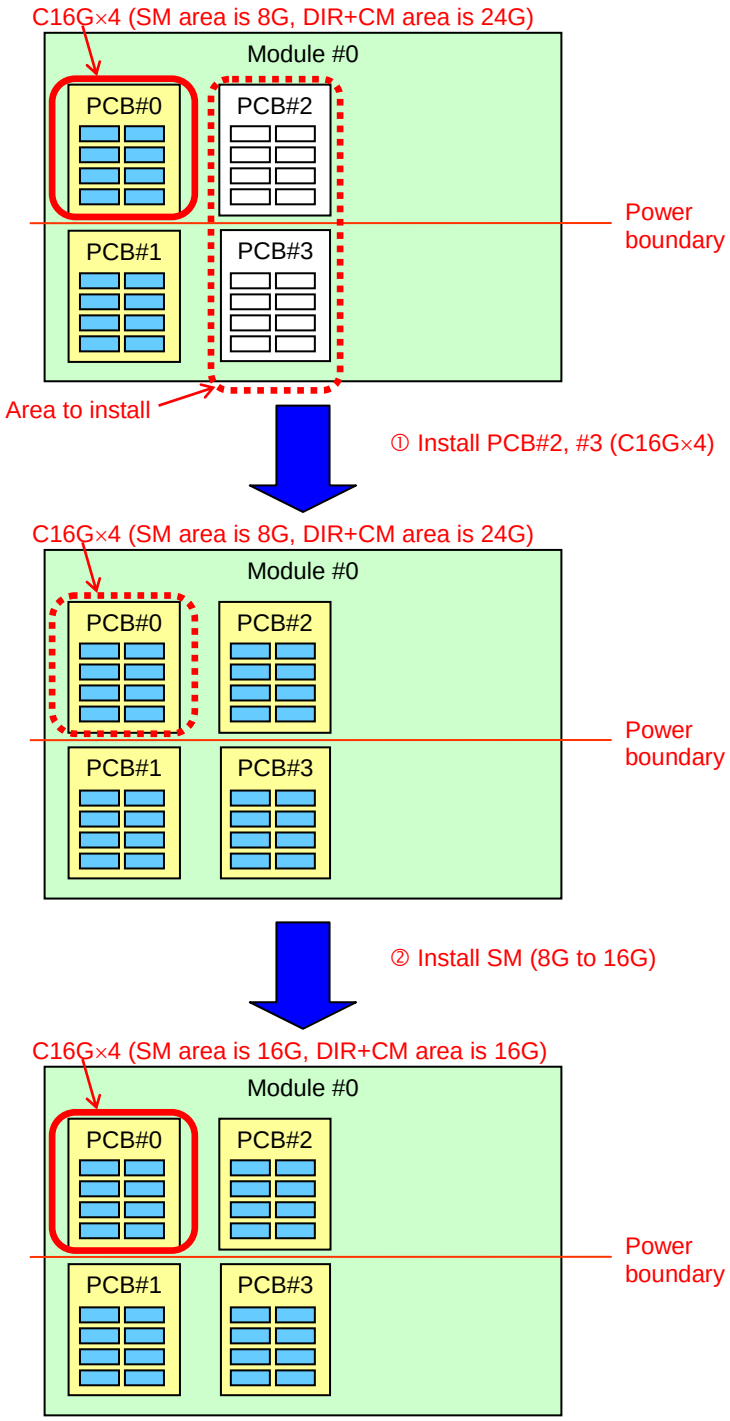

Fig. 3.10-C Installation with priority on minimizing impact on host 2

Copyright © 2011, Hitachi, Ltd.

(b) Installation with priority on reducing maintenance time (with cache side blockade)

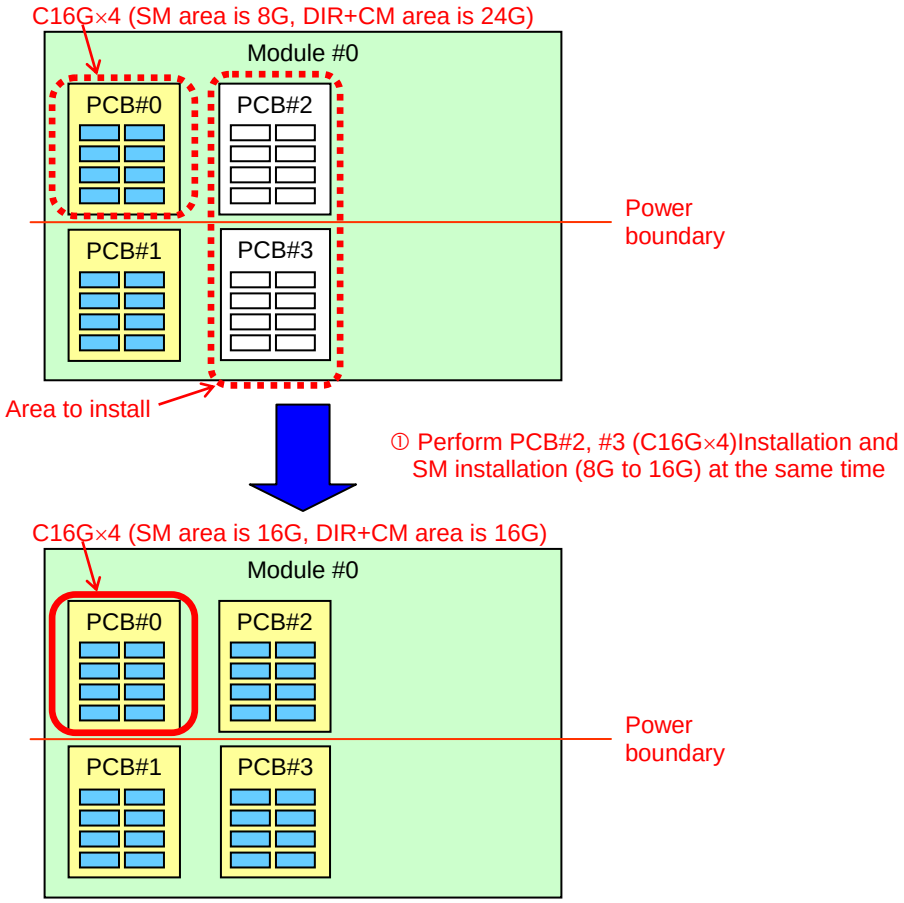

Fig. 3.10-D Installation with priority on reducing maintenance time 2

Copyright © 2011, Hitachi, Ltd.

(3) When adding PCBs from 16 (C16G×3) to 16 (C16G×4) (DIMM installation)

(a) Installation with priority on minimizing impact on host (without cache side blockade)

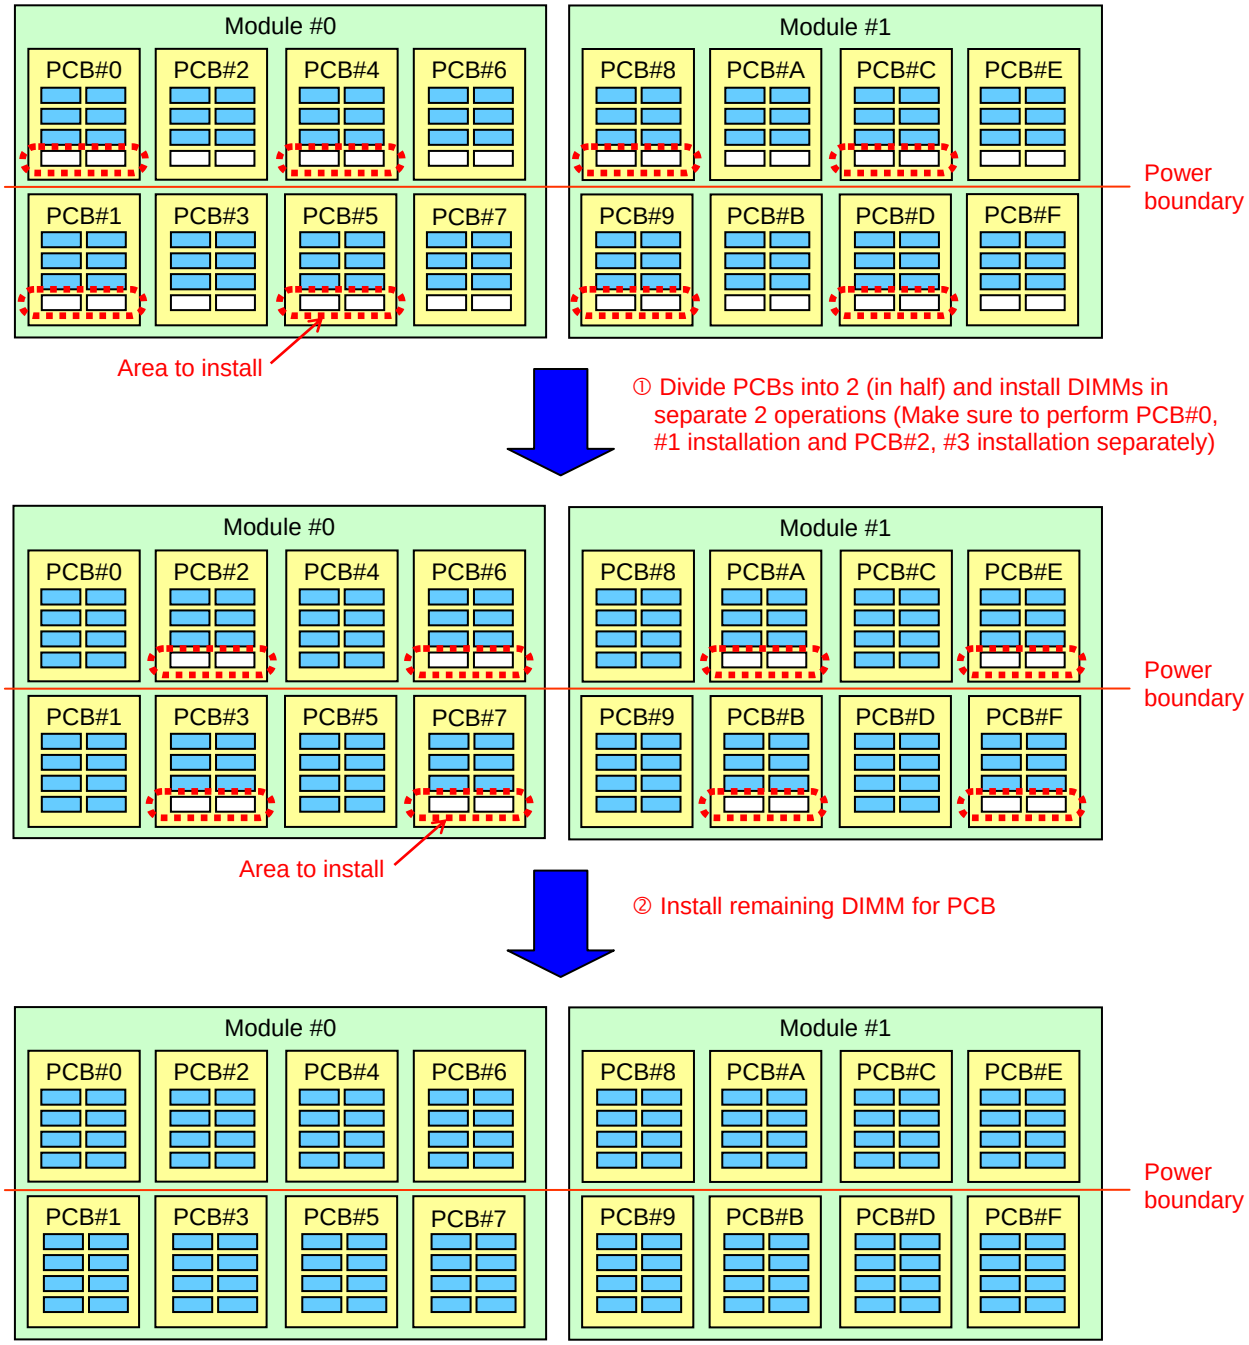

Fig. 3.10-E Installation with priority on minimizing impact on host 3

Copyright © 2011, Hitachi, Ltd.

(b) Installation with priority on reducing maintenance time (without cache side blockade)

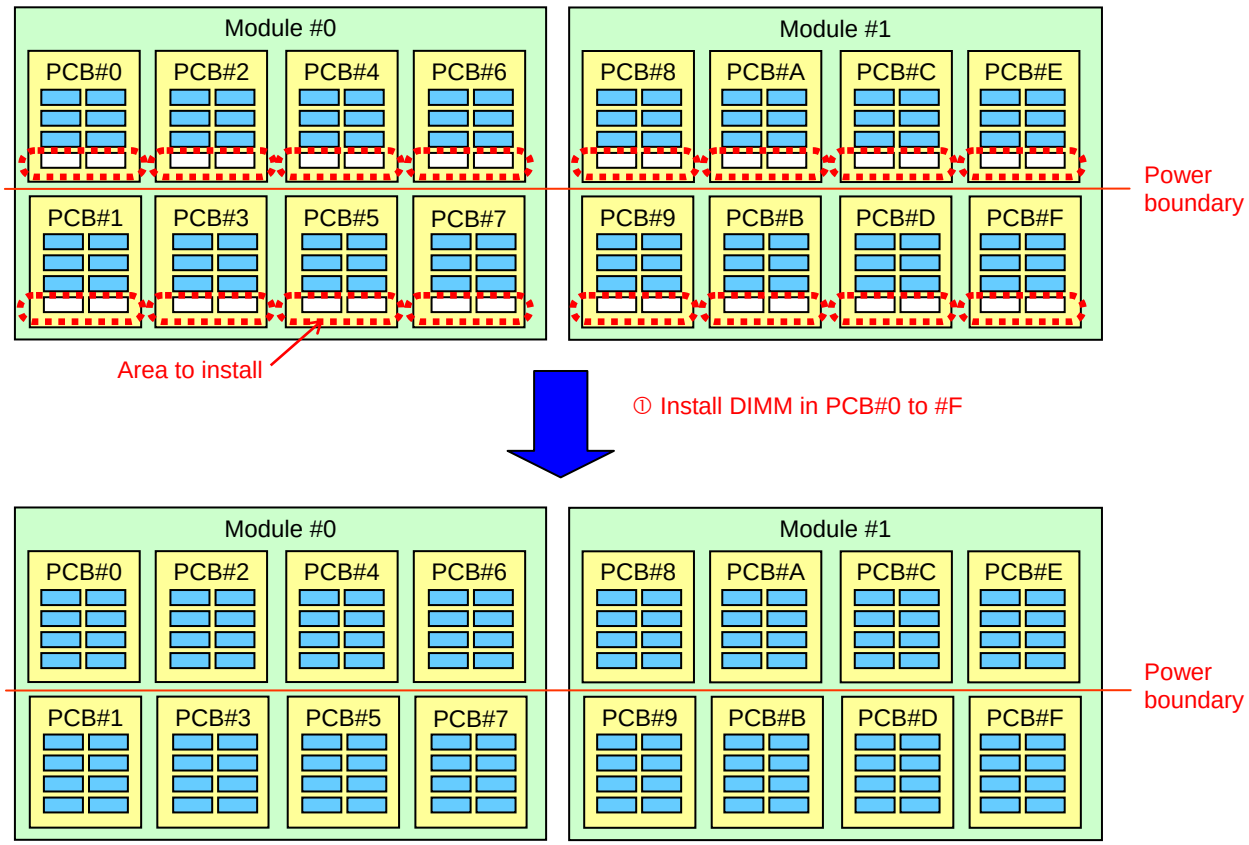

Fig. 3.10-F Installation with priority on reducing maintenance time 3

Copyright © 2011, Hitachi, Ltd.

(4) When adding PCBs from 16 (C16G×4) to 16 (C16G×4) (DIMM type change and DIMM installation)

(a) Change the DIMM type from C16G×4 to C32G×2 of 16 PCBs as shown in Fig. 3.10-G below.
(See the SVP SECTION, "2.30 Change CM Module group size" (SVP02-2050))

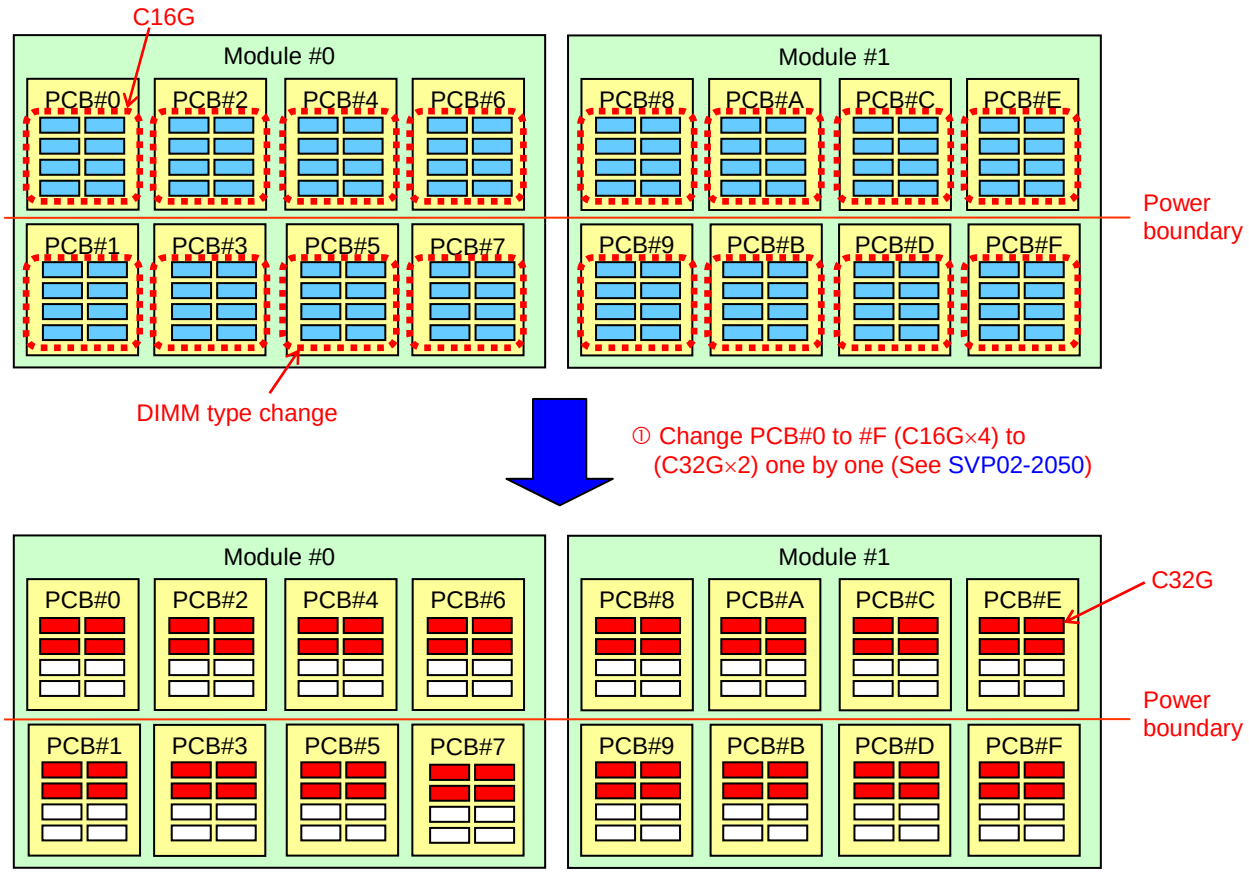

Fig. 3.10-G Changing of DIMM type

(b) Perform one of the following installations depending on which to prioritize, minimizing impact on host or maintenance time reduction.

① Installation with priority on minimizing impact on host (without cache side blockade)
After changing the DIMM type, perform installation in accordance with the procedure in INST03-10-25 (3) (a).

② Installation with priority on reducing maintenance time (with cache side blockade)
After changing the DIMM type, perform installation in accordance with the procedure in INST03-10-26 (3) (b).

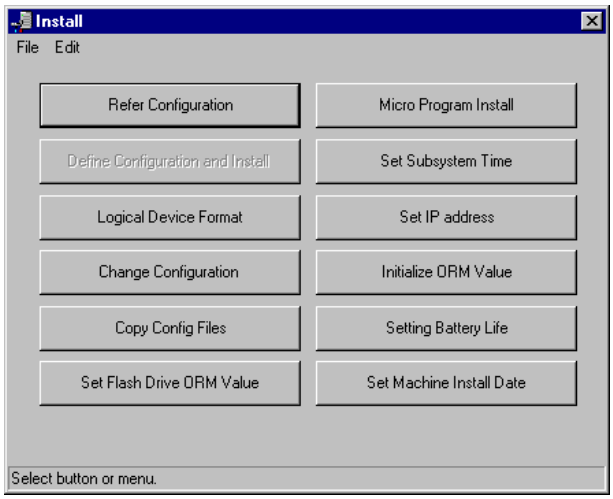
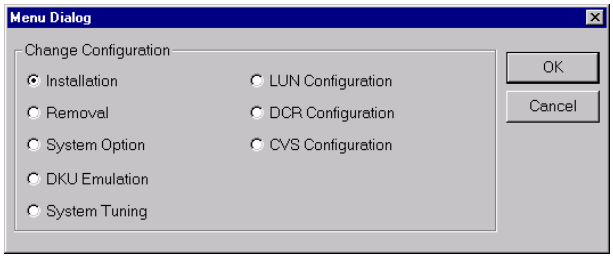
1. Setting up the New Device Structure Information

(1) <Mode Change>
Change the mode to Modify Mode.
Select (CL) [Install].

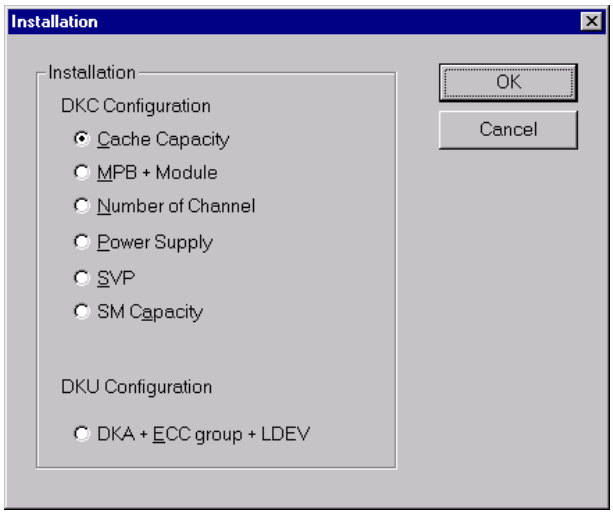
(2) <Start the 'Menu Dialog' screen>
Select (CL) [Change Configuration].



(3) <Start Device Structure Setup screen>
Select (CL) [Installation] in the 'Menu Dialog' dialog box and select (CL) [OK].



(4) <Select a part to be changed>
Select (CL) [Cache Capacity], and select (CL) [OK].



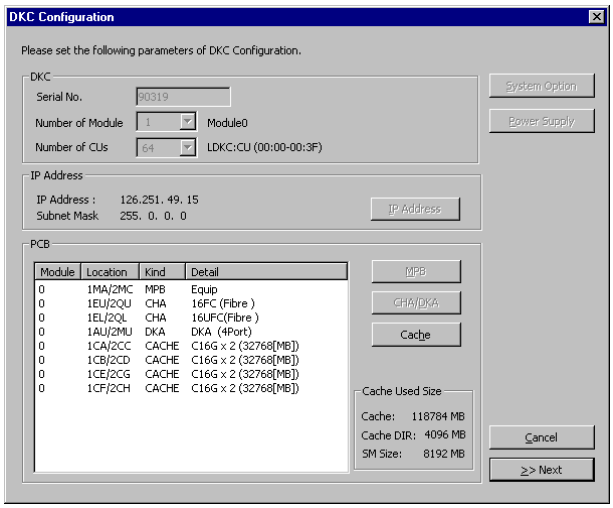
Copyright © 2010, 2011, Hitachi, Ltd.

(5) <DKC Configuration screen>
In the 'DKC Configuration' screen, select (CL) [Cache].
(Go to step (6).)

Note: It is impossible to install multiple types of parts at the same time.

Make sure that the all input items are correct and select (CL) [>>Next].
Go to step (7).

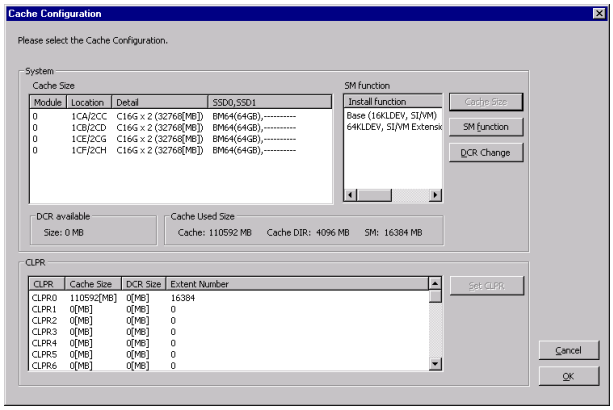
If the display of Battery Life Warning SIM is disabled or the PCB install is not done, go to step (8).



(6) <Cache Configuration screen>
In the 'Cache Configuration' screen, define each item.

When the change of Cache setting or installation of the PCB is required, select (CL) the target Cache PCB and then select (CL) [Cache Size].
Go to Step (6)-1.

When the change of SM setting is required, select (CL) [SM function].
Go to Step (6)-2.



When the change of DCR setting is required, select (CL) [DCR Change] in DCR available.
Go to Step (6)-3.

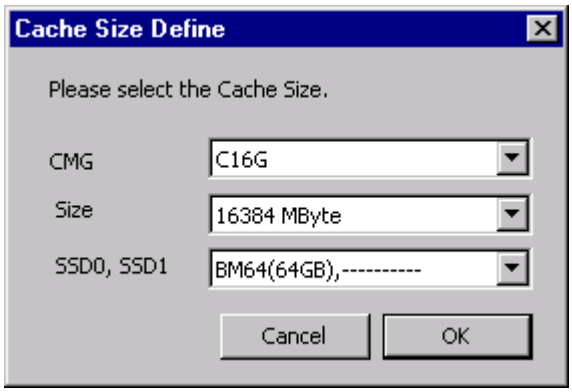
When the change of CLPR setting is required, select (CL) the target CLPR. and then select (CL) [Set CLPR].
Go to Step (6)-4.

After setting all items, select (CL) [OK].
Go back to Step (5).

Copyright © 2010, 2012, Hitachi, Ltd.

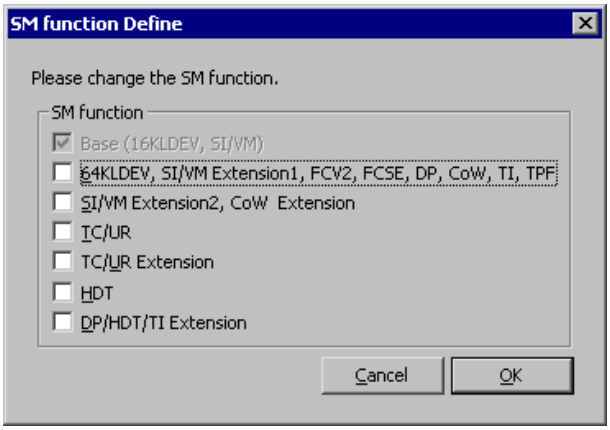
(6)-1 <Cache Size Define screen>

Set the CMG/Cache Size/SSD in the 'Cache Size Define' screen, and then select (CL) [OK].
Go back to Step (6).



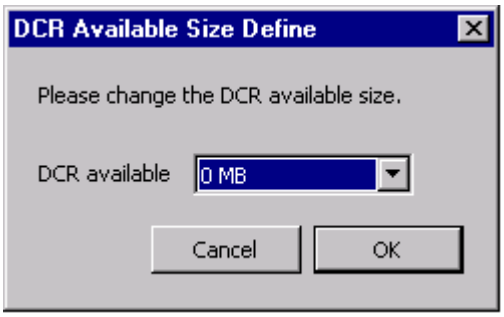
(6)-2 <SM function Define screen>

Set the SM function in the 'SM function Define' screen, select (CL) [OK].
Go back to Step (6).



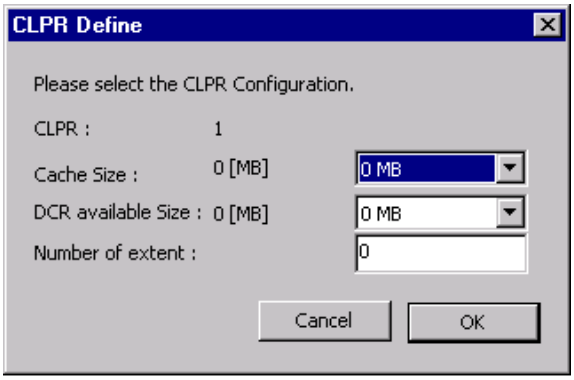
(6)-3 <DCR Available Size Define screen>

Set the DCR available size in the 'DCR Available Size Define' screen, select (CL) [OK].
Go back to Step (6).



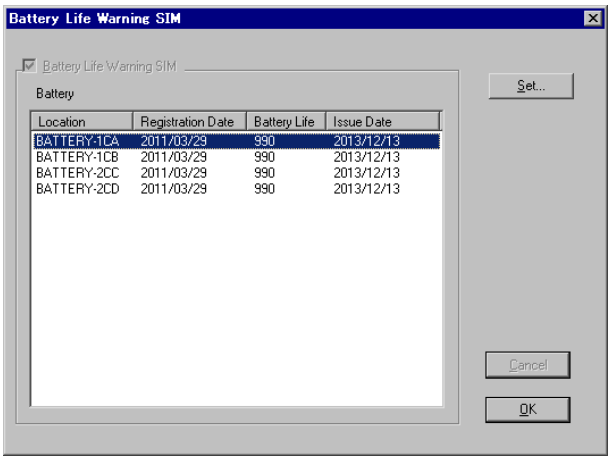
(6)-4 <CLPR Define screen>

Set the Cache Size/DCR available Size/Number of extent in the 'CLPR Define' screen, select (CL) [OK].
Go back to Step (6).



Copyright © 2010, 2011, Hitachi, Ltd.

(7) <Battery Life Warning SIM screen>
Select (CL) the target CM Battery in the 'Battery Life Warning SIM' screen, and then select (CL) [Set...].
Go to step (7)-1.



Make sure that the all input items are correct and select (CL) [OK].
Go to step (8).

Note: If the date is displayed as "****/**/**", follow step (7)-1 to set the date.

(7)-1 <Battery Life Warning SIM screen>
Select (CL) [OK] after inputting the remainder days until Warning SIM is reported.
Return to step (7).

Note: After executing the periodical exchange of a battery, set 33 month (990 days).

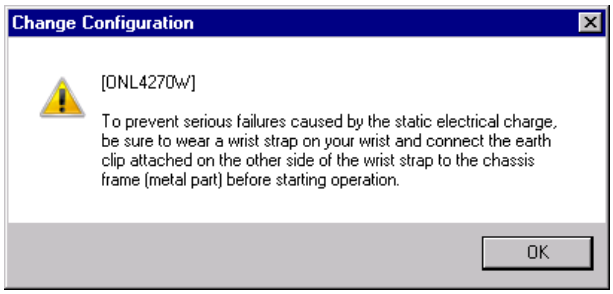
Note: Default value is 33 month (990 days), which is 3 month earlier than the lifetime of a battery (3 years).
Determine the number of days remained based on your maintenance plan.

Note: The input ranges of "Remained Battery life" are from 1 to 3650.

Copyright © 2011, Hitachi, Ltd.

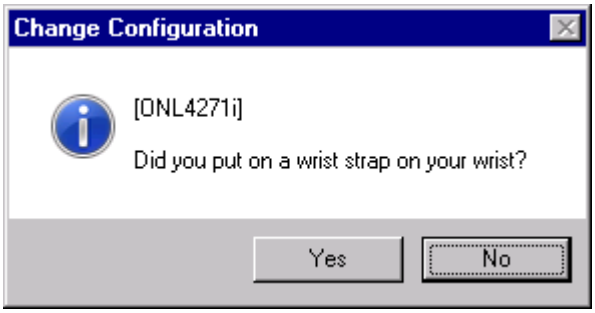
(8) <Wear a wrist strap>

Select (CL) [OK] in response to "To prevent serious failures caused by the static electrical charge, be sure to wear a wrist strap on your wrist and connect the earth clip attached on the other side of the wrist strap to the chassis frame (metal part) before starting operation.".



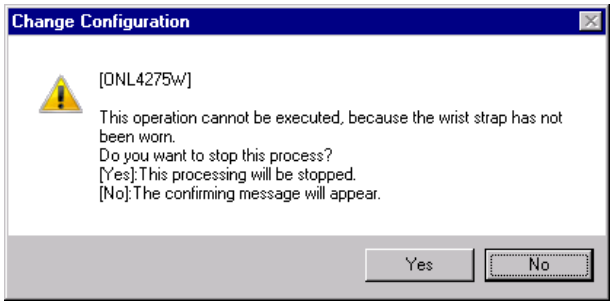
(8)-1 <Confirm wearing wrist strap>

In response to a message, "Did you put on a wrist strap on your wrist?".
Select [Yes] when wrist strap is on your wrist.
Select [No] when there is no wrist strap on your wrist.
When [No] is selected (CL), go to Step (8)-2.



(8)-2

In response to a message, "This operation cannot be excuted, because the wrist strap has not been worn. Do you want to stop this process?
[Yes]: This processing will be stopped.
[No]: This confirming message will appear."
When [Yes] is selected (CL), the routine is returned to Step (2) on page INST03-10-30.
When [No] is selected (CL), returned to Step (8).



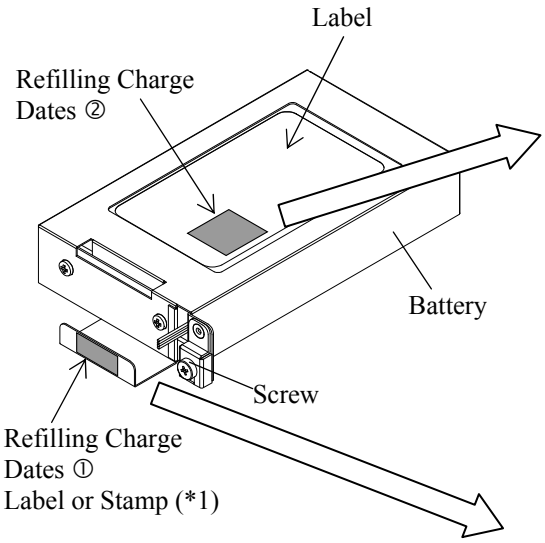
Copyright © 2010, 2012, Hitachi, Ltd.

2. SVP pre procedure (Confirmation on the final charge day)

(1) <Confirmation on the final charge day>

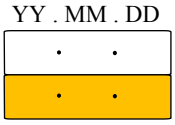
- When you do increase Cache PCB:
  Select (CL) [Yes] in response to "Check the last charged dates described in the batteries. Are the last charged dates for all of the batteries that are target to be added indicated within six months?"

  When [No] is selected (CL), go to step (2).
- When you do not increase Cache PCB:
  go to step 3



Enlarged View of Refilling Charge Dates ②

Enlarged View of Refilling Charge Dates ①



[Check of refilling charge dates]
When refilling charge dates ① are written, check them.
When refilling charge dates ① are not written, check refilling charge dates ②.

[How to remove the Battery]
a. Loosen the screw and remove the Battery.

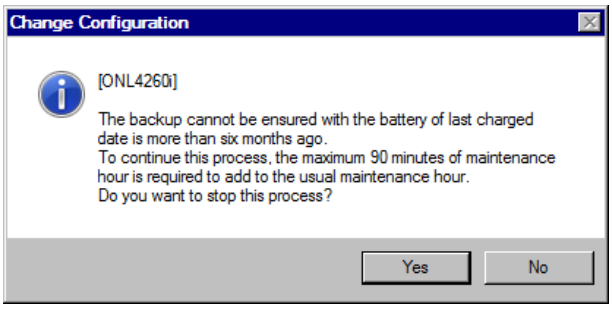
[How to insert the Battery]
a. Insert the Battery and tighten the screw.

*1: Some batteries don't have the label for refilling charge dates ①.

Copyright © 2012, Hitachi, Ltd.

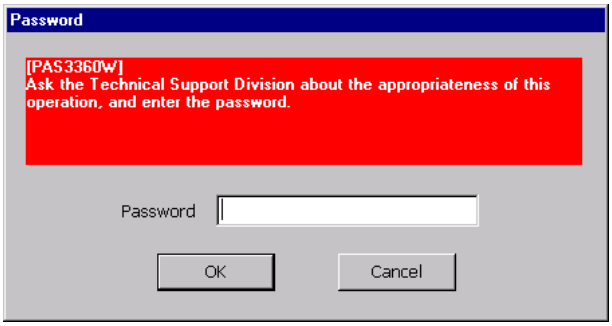
(2)

"The backup cannot be ensured with the battery of last charged date is more than six months ago. To continue this process, the maximum 90 minutes of maintenance hour is required to add to the usual maintenance hour. Do you want to stop this process?"



When [Yes] is selected (CL), returns to INST03-10-30 step (2).
When [No] is selected (CL), go to step (3).

(3) <Input password>
Enter the password and select (CL) [OK].



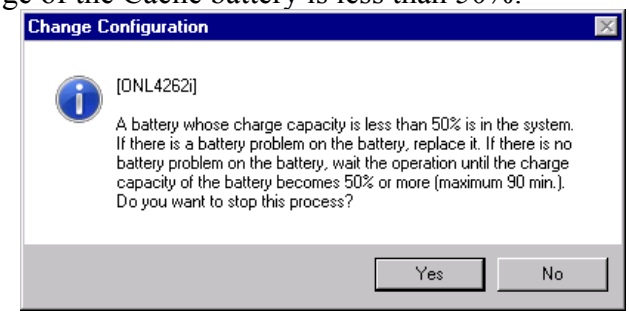
Notice: This is a special (exceptional) operation that can cause a serious failure such as a system down or a data loss if a wrong part to be removed is selected, and requires an input of a password. Ask the technical support division about the appropriateness of the operation, and input the password after getting an approval of executing the operation.

Copyright © 2010, Hitachi, Ltd.

3. SVP pre procedure (Confirmation of amount of cache battery charge)

(1) < Confirmation of amount of cache battery charge >

- When there is PCB whose amount of charge of the Cache battery is less than 50%:



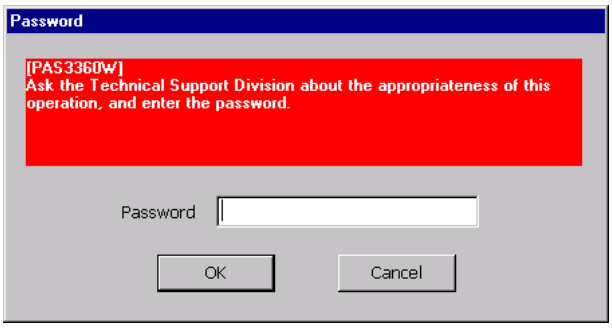
"A battery whose charge capacity is less than 50% is in the system. If there is a battery problem on the battery, replace it. If there is no battery problem on the battery, wait the operation until the charge capacity of the battery becomes 50% or more (maximum 90 min.). Do you want to stop this process?"

When [Yes] is selected (CL), returned to INST03-10-30 step (2).
When [Yes] is selected (CL),go to step (2)

- When there is no PCB whose amount of charge of the Cache battery is less than 50%: go to step 4.

---

(2) <Input password>
Enter the password and select (CL) [OK].



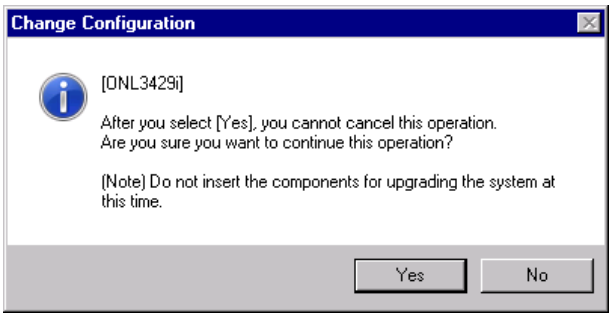
Notice: This is a special (exceptional) operation that can cause a serious failure such as a system down or a data loss if a wrong part to be removed is selected, and requires an input of a password. Ask the technical support division about the appropriateness of the operation, and input the password after getting an approval of executing the operation.

Copyright © 2010, Hitachi, Ltd.

4. SVP pre procedure on the Cluster 1.

(1) <Start installation>
Select (CL) [Yes] in response to "After you select [Yes], you cannot cancel this operation. Are you sure you want to continue this operation? (Note) Do not insert the components for upgrading the system at this time.".

When [No] is selected (CL), returns to INST03-10-30 step (3).

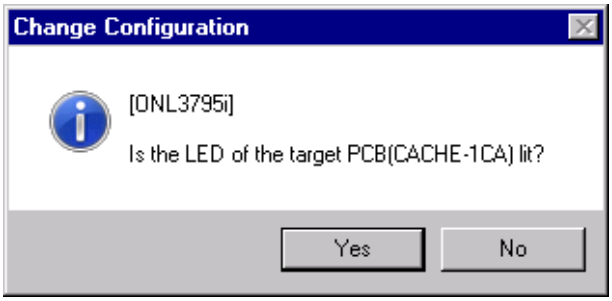


---

(2)
"The Cache Memory PCB is being blocked..."
"Lighting LED of the PCB..." is displayed.

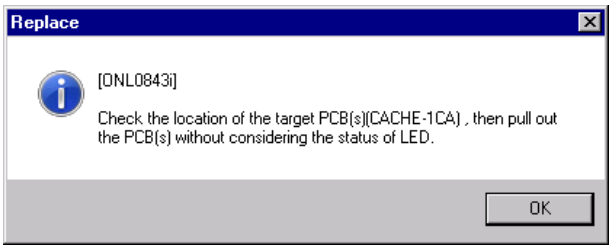
---

(3) <Check shut down LED>
Select (CL)
* [Yes] if LED is on
* [No] if LED is off
in response to "Is the LED of the target PCB(CACHE-nnn) lit?".



(Eg. CACHE-1CA)

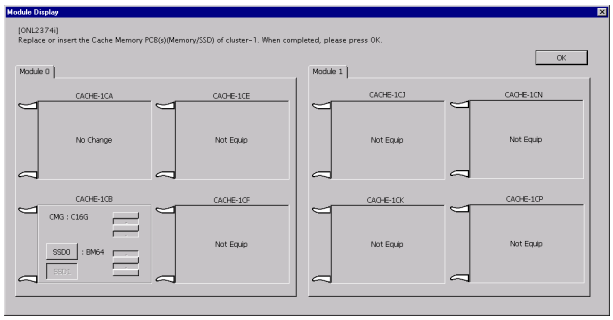
If [No] is selected:
Select (CL) [OK] after response to "Check the location of the target PCB(s)(CACHE-nnn), then pull out the PCB(s) without considering the status of LED.".
(Refer INST03-10-90)
Go to step (4).



(Eg. CACHE-1CA)

Copyright © 2010, 2011, Hitachi, Ltd.

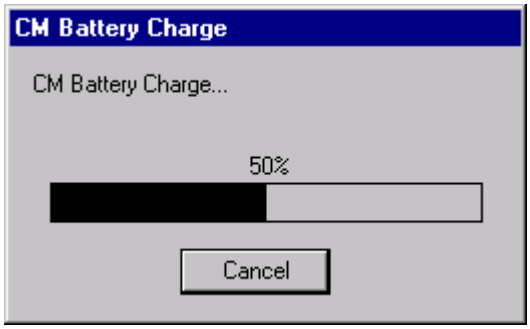
(4) <Perform cache hardware installation>
At this point refrain from pressing the [OK] button.
When "Replace or insert the Cache Memory PCB(s)(Memory/SSD) of cluster-1. When completed, please press OK." is displayed, install hardware components according to the cache hardware installation procedure.



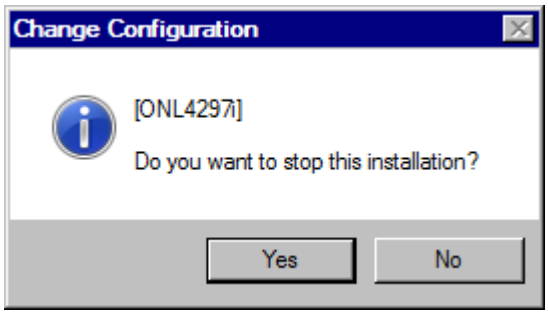
Make sure of the installation location and size of the module to be added and insert the correct module in the correct location.
(The Shared Memory capacity may be changed at the same time, depending on the set Cache Memory capacity.)

---

(5) <CM Battery charging>
When you select [No] in "2. SVP pre procedure (Confirmation on the final charge day)" (INST03-10-60) Step (1), the progress of the charge is displayed.
When the amount of charge becomes 50% or more, go to Step 5.
When you select [Cancel] (CL), go to Step (5)-1.



(5)-1
"Do you want to stop this installation?"
When [Yes] is selected (CL), return to INST03-10-30 Step (1)
When [No] is selected (CL), return to Step (5).



Copyright © 2010, Hitachi, Ltd.

5. Install the Cache Memory on the cluster 1.
   Be sure to wear your wrist strap and attach to ground prior to performing the following work.
   This will ensure that the IC and LSI on the PCB are protected from static electricity.

5-1 Remove the PCB.

a. While referring to Fig. 3.10-1, Table 3.10-3 and Table 3.10-4, check the Shut Down LED on the CM PCB.

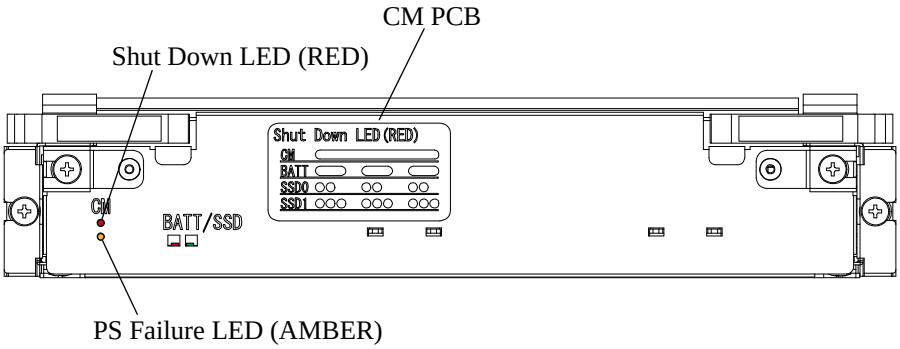


Fig. 3.10-1 Location of the Shut Down LED

Copyright © 2010, 2012, Hitachi, Ltd.

Table 3.10-3 Location of the CM PCB (Serial Installation)

Cluster	Box	Slot No.	Location No.	Remarks
1	DKC-0	1CA	CACHE-1CA	(*1)
		1CB	CACHE-1CB	(*2)
		1CE	CACHE-1CE	(*3)
		1CF	CACHE-1CF	(*4)

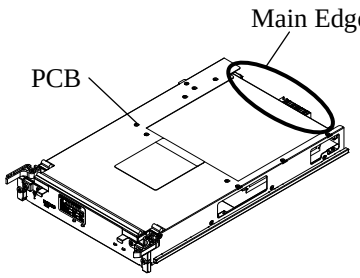
b. Remove the two screws and remove the CM PCB.



Note: When removing the PCB, hold the right and left of the PCB with both hands, and pull it out straight not to contact the neighboring PCB.

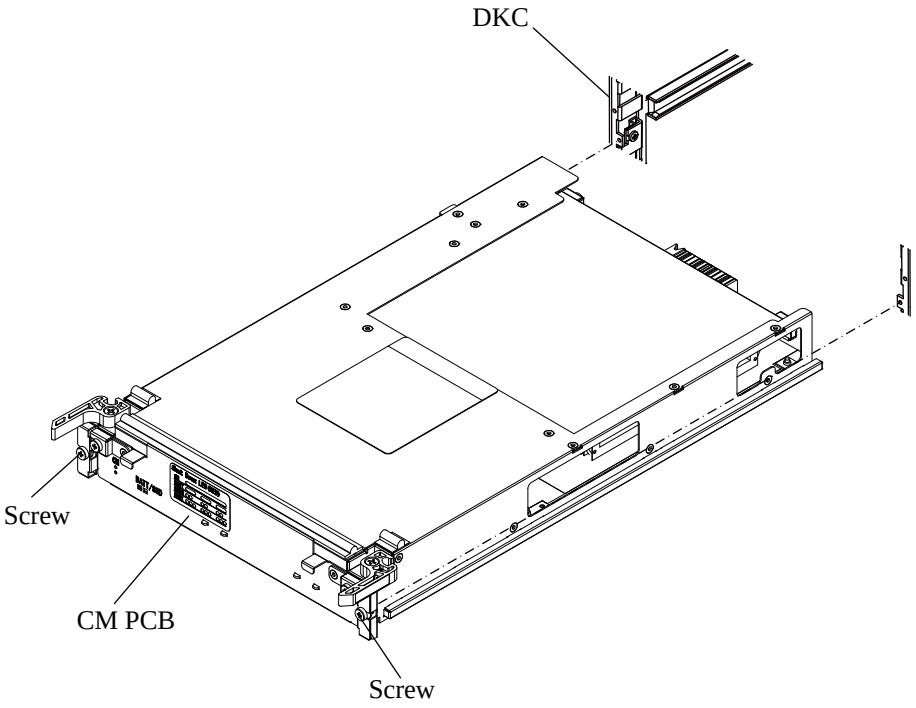


Fig. 3.10-2 Removal of PCB

Copyright © 2010, Hitachi, Ltd.

5-2 Insert the CM Modules.

a. Loosen the two screws and remove the cover.

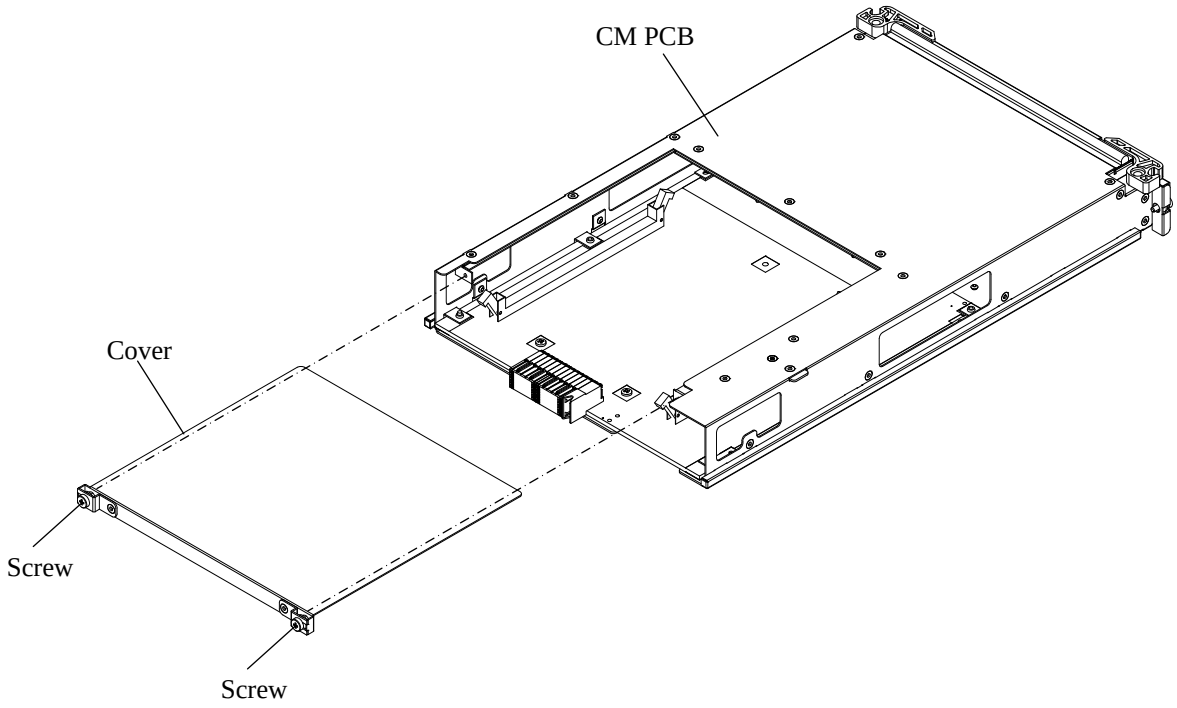

Fig. 3.10-3 Removal of Cover

Copyright © 2010, 2011, Hitachi, Ltd.

b. Remove the dust covers that match the required Cache Memory capacity referring to Fig. 3.10-4, Fig. 3.10-5, Fig. 3.10-6, Table 3.10-5 through Table 3.10-6C.
c. Insert the CM Modules that match the required Cache Memory capacity.
d. Attach the cover and fasten the screws. (Refer to Fig. 3.10-3.)

Installation

① Position the cut of the memory module with the projection inside the slot, and place the memory module on the socket.
② Hold both ends of the memory module by the fingers, and fit it into the socket.
③ Make sure that the lever is firmly fitted in the memory module.

Caution:	Do not put intense pressure to which the PCB greatly bends on the memory module after the memory module is secured with the lever at the time equipped with the memory module. The PCB may be damaged, when the intense pressure is applied.

Memory Module Appearance

There are two types of memory modules. One has a heat spreader and the other has no heat spreaders. Both memory modules can be used because they are compatible with each other.

1024GB	*1,*2, *3,*4	*5,*6, *7,*8	*9,*10, *11,*12	*13,*14, *15,*16	*17,*18, *19,*20	*21,*22, *23,*24	*25,*26, *27,*28	*29,*30, *31,*32	32	6	0	8

Note 1: The above numbers (*1 through *32) represent the CM Module locations shown in Fig. 3.10-4, Fig. 3.10-5, Fig. 3.10-16 or Fig. 3.10-17.

Note 2: The required SM capacity shown in Table 6.2-1 (INST06-70) must be installed in CPC-0.

Note 3: DKC-F710I-BM128 can be used instead of DKC-F710I-BM64.

Copyright © 2010, 2011, Hitachi, Ltd.

5-3 When you need to install SSD Memory (DKC-F710I-BM64/BM128), attach the SSD Memory. When you do not need to install SSD Memory (DKC-F710I-BM64/BM128), go to step 5-4.

Installation Condition

The SSD Memory (DKC-F710I-BM64) is an indispensable option that is to be installed when the subsystem configuration is as follows.

- When the cache memory capacity per a set of DKC-F710I-CPC is 64GB or 96GB, add a set of the SSD Memory (DKC-F710I-BM64).

The SSD Memory (DKC-F710I-BM128) is an indispensable option that is to be installed when the subsystem configuration is as follows.

- When the cache memory capacity per a set of DKC-F710I-CPC is 128GB, add a set of the SSD Memory (DKC-F710I-BM128). (When a set of DKC-F710I-BM64 has already been installed, the SSD Memory is required to exchange DKC-F710I-BM64 for DKC-F710I-BM128.)

a. Loosen the two screws in the front side of the CM PCB, and remove the cover.

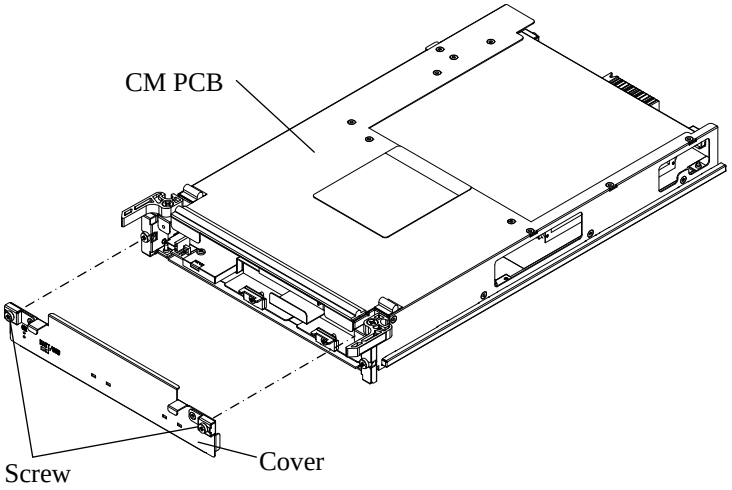

Fig. 3.10-7 Removal of Cover

Copyright © 2010, 2011, Hitachi, Ltd.

b. When you need to replace Option SSD, remove the Option SSD from the CM PCB after loosen the screws and put the stopper up.
   When you do not need to replace Option SSD, go to step c.
c. Install the Option SSD memory in the CM PCB, and put the stopper down, and then secure it with the screw.
d. Install the cover that is removed in procedure a. to the front side of the CM PCB, and secure it with the two screws.

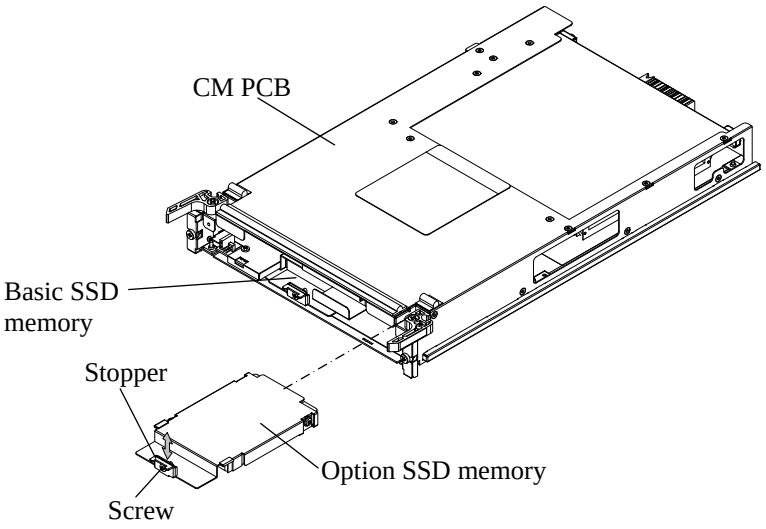

Fig. 3.10-8 Removal/Attachment of SSD Memory

Copyright © 2010, 2011, Hitachi, Ltd.

5-4 When you need to install Cache Memory Adapter (DKC-F710I-CPC), connect the battery cable of the CM PCB.
When you do not need to install Cache Memory Adapter (DKC-F710I-CPC), go to the step 5-5.

a. Loosen all screws (two screws per PCB) of the CM PCBs that are installed in the front side of the DKC, and remove the cover.
b. Connect all battery cables with the connectors.
c. Install the covers to all PCBs, and secure them with the screws.

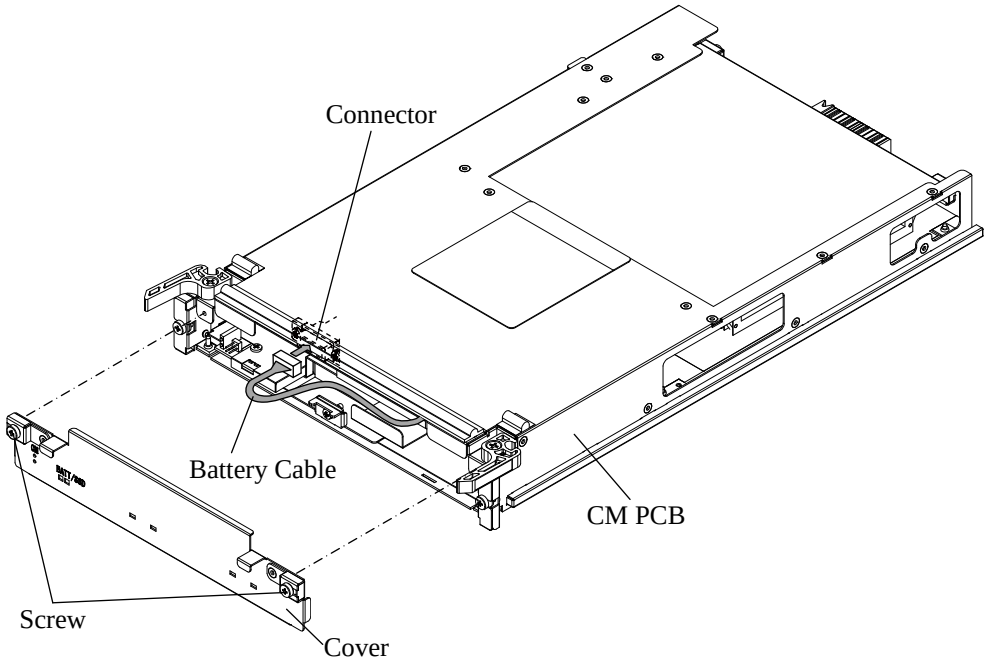

Fig. 3.10-9 Connection of Battery Cables

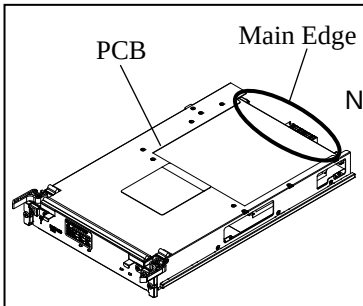
Copyright © 2010, 2011, Hitachi, Ltd.

5-5 Insert the PCB.

a. If the Cache Memory Adapter (DKC-F710I-CPC) is installed, remove the two screws and remove the dummy plate.
If not, go to step b.

Note: Remove the dummy plate just before installing the PCB.
If the dummy plate is kept removed for a long time, the wind doesn't flow among installed PCBs, causing the PCBs' temperature rise which may result in temperature warning or temperature alarm.

b. Install the CM PCB referring to Table 3.10-7.
c. Fasten the two screws.



Note: • Check that the main edge connector of the PCB has no deformation, damage or sticking of dust before installing the PCB. (See INST03-01-70.)
• When installing the PCB, hold the right and left of the PCB with both hands, and insert it straight not to contact the neighboring PCB.

Table 3.10-7 Location of the CM PCB

Cluster	Box	Slot No.	Location No.	Remarks
1	DKC-0	1CA	CACHE-1CA	
		1CB	CACHE-1CB	(*1)
		1CE	CACHE-1CE	(*1)
		1CF	CACHE-1CF	(*1)
	DKC-1	1CJ	CACHE-1CJ	
		1CK	CACHE-1CK	(*1)
		1CN	CACHE-1CN	(*1)
		1CP	CACHE-1CP	(*1)

*1: Insert the PCB when DKC-F710I-CPC is installed in the additional slot.

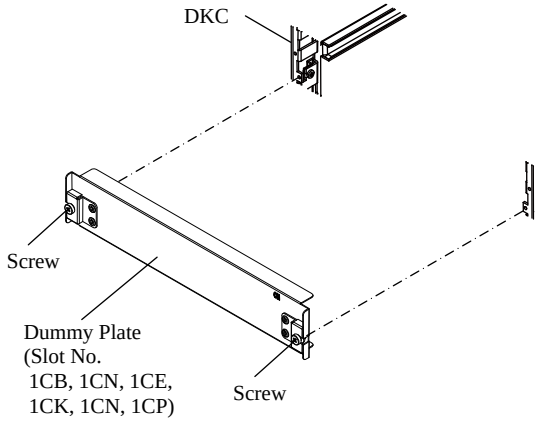


Fig. 3.10-10 Removal of the Dummy Plate

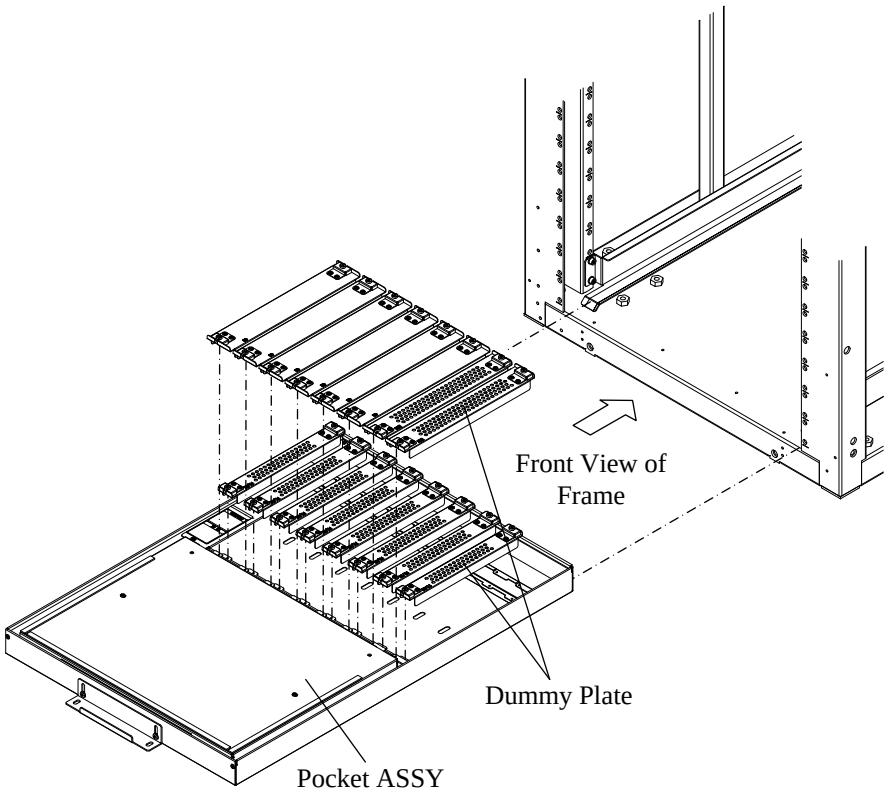
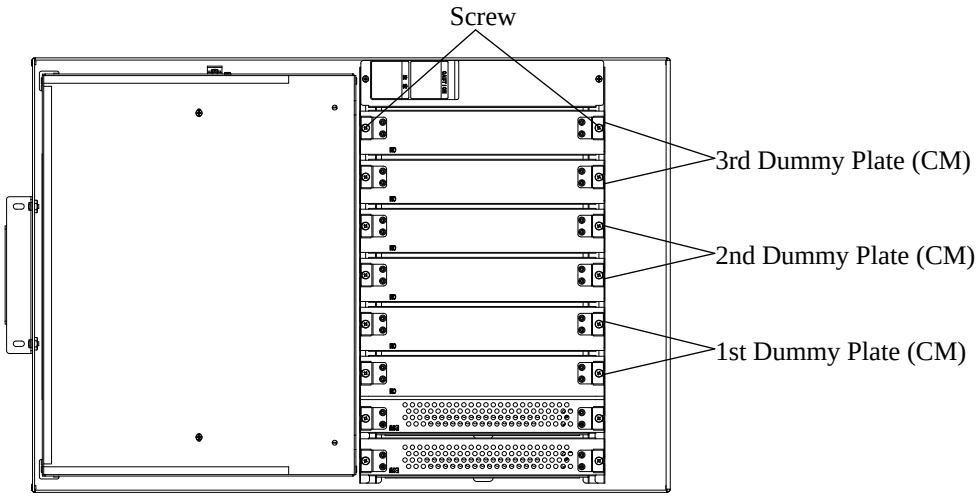
5-6 Install the Dummy Plate.

a. When you need to install Cache Memory Adapter (DKC-F710I-CPC), remove the pocket ASSY from the front of the frame.
   When you do not need to install Cache Memory Adapter (DKC-F710I-CPC), go to step 4.
b. Install the removed dummy plate to the pocket ASSY and tighten it with the two screws.
c. Install the pocket ASSY in the front of the frame.





Top View of Pocket ASSY

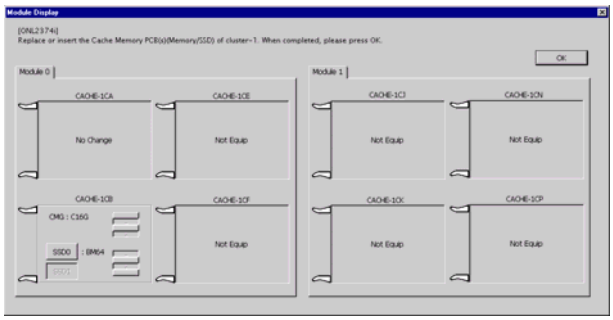
6. SVP post procedure on the Cluster 1.

(1)

After installation of cache memory on one side is completed, select (CL) [OK] in response to “Replace or insert the Cache Memory PCB(s)(Memory/SSD)of cluster-1. When completed, please press OK.”.



(2) <Cache CUDG executes>
“INLINE CUDG is now running...” is displayed.

(3)

“Changing the configuration date, for equipment of shared/cache memory...”
“Restoring the Cache Memory PCB...” is displayed.

CAUTION

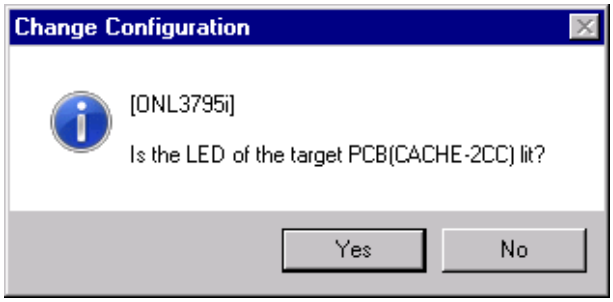
Recover according to the procedure shown in “TROUBLE SHOOTING SECTION” (Refer to TRBL05-640) when the mistake of the memory module setting occurs .

Copyright © 2010, Hitachi, Ltd.

7. SVP pre procedure on the Cluster 2

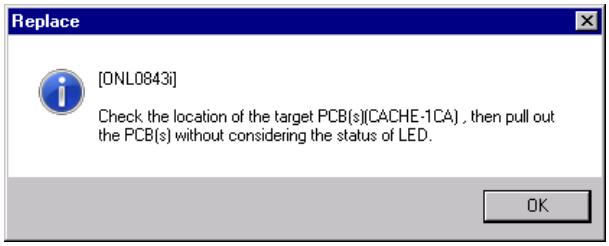
(1) <Recover one side of cache>
When recovery processing is completed,
"The Cache Memory PCB is being blocked..."
"Lighting LED of the PCB..." message appears.
Processing proceeds to blocking of the other side of Cache Memory.

(2) <Check shut down LED>
Select (CL)
* [Yes] if LED is on
* [No] if LED is off
in response to "Is the LED of the target PCB(CACHE-nnn) lit?".



(Eg. CACHE-2CC)

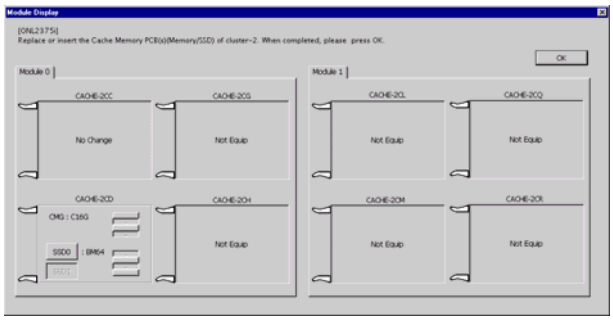
If [No] is selected:
Select (CL) [OK] after response to "Check the location of the target PCB(s)(CACHE-nnn), then pull out the PCB(s) without considering the status of LED.".
(Refer INST03-10-250)
Go to step (3).



(Eg. CACHE-1CA)

Copyright © 2010, Hitachi, Ltd.

(3) <Perform cache hardware installation>
At this point refrain from pressing the [OK] button.
When “Replace or insert the Cache Memory PCB(s)(Memory/SSD) of cluster-2. When completed, please press OK.” is displayed, install hardware components according to the cache hardware installation procedure.



Make sure of the installation location and size of the module to be added and insert the correct module in the correct location.
(The Shared Memory capacity may be changed at the same time, depending on the set Cache Memory capacity.)

Copyright © 2010, Hitachi, Ltd.

8. Install the Cache Memory on the cluster 2.
   Be sure to wear your wrist strap and attach to ground prior to performing the following work.
   This will ensure that the IC and LSI on the PCB are protected from static electricity.

8-1 Remove the PCB.

a. Open the DKCPANEL to connect the battery cables of the CM PCB location (CACHE-2CD, 2CG, 2CH, 2CM, 2CQ, 2CR).
   For the CM PCB location other than the above, go to the step c.

b. Loosen the screw, slide the DKCPANEL to the far right, and open the DKCPANEL.

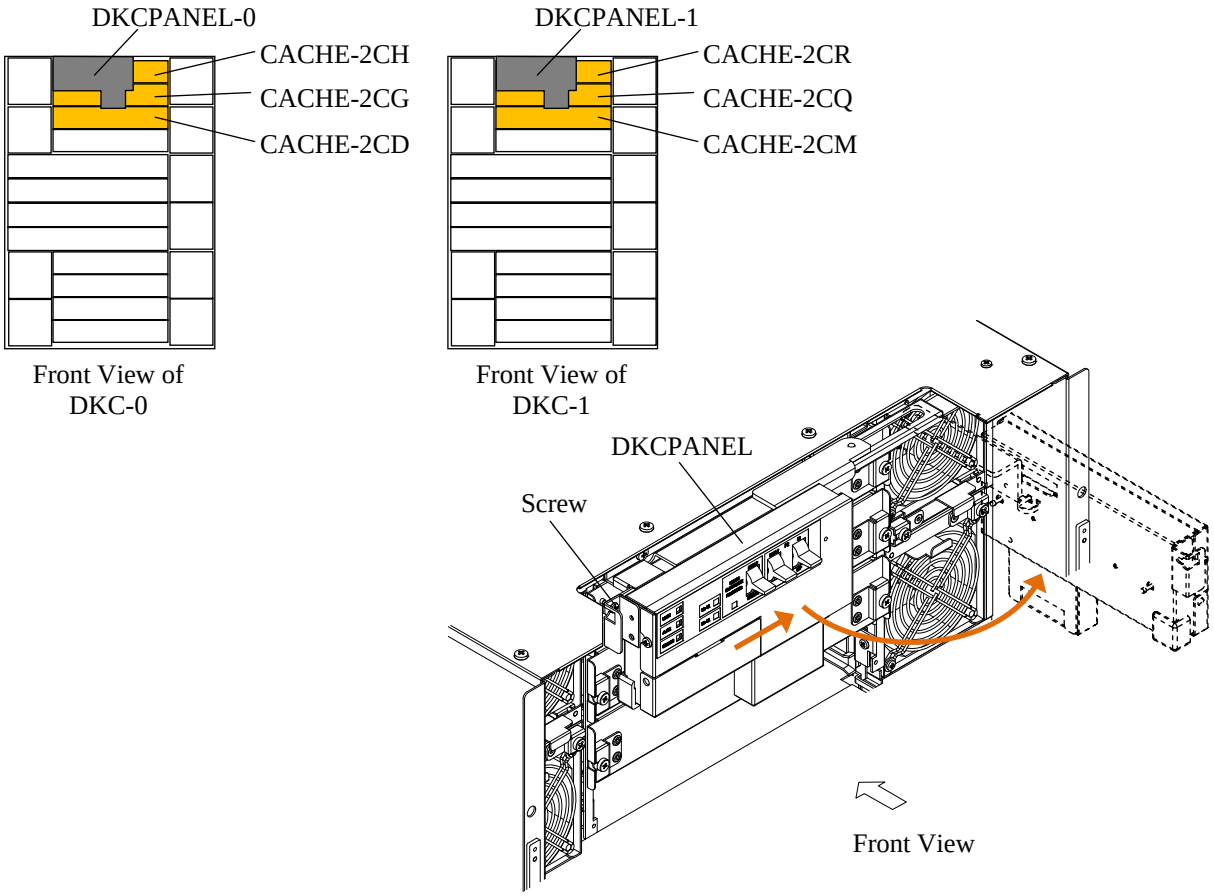


Fig. 3.10-12 Shifting of DKCPANEL

Copyright © 2010, 2012, Hitachi, Ltd.

c. While referring to Fig. 3.10-13, Table 3.10-8 and Table 3.10-9, check the Shut Down LED on the CM PCB.

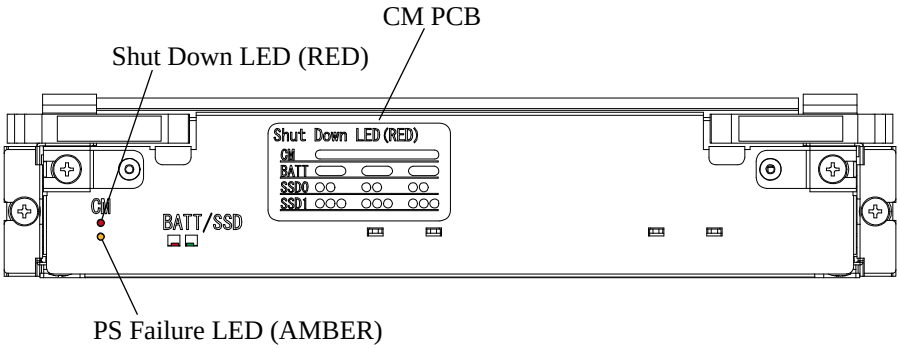

Fig. 3.10-13 Location of the Shut Down LED

Table 3.10-8 Location of the CM PCB (Serial Installation)

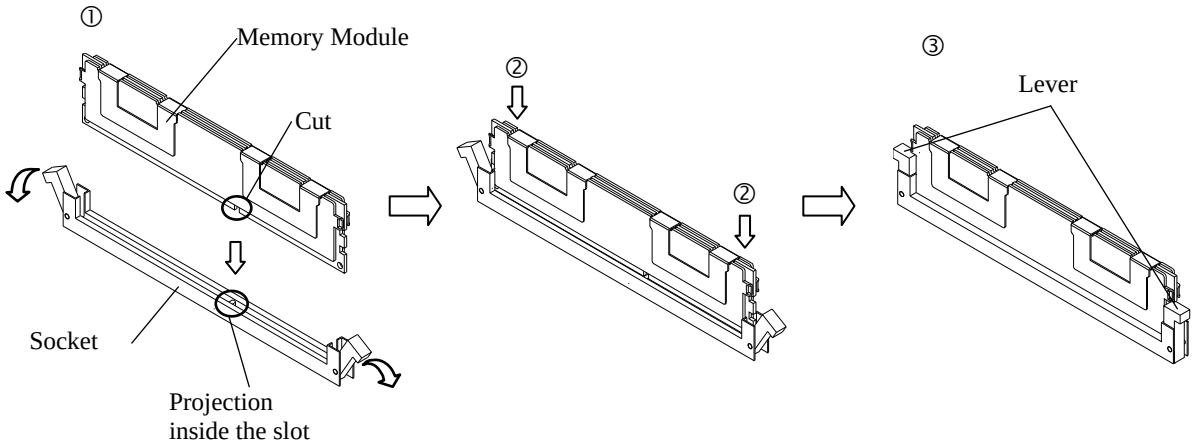
(Note 1) The cache memory module location *17 through *32 correspond to the CM Location listed in Table 3.10-5 through Table 3.10-6C.

Fig. 3.10-17 Inserting Location of the CM Module

Copyright © 2010, 2011, Hitachi, Ltd.



Installation

① Position the cut of the memory module with the projection inside the slot, and place the memory module on the socket.
② Hold both ends of the memory module by the fingers, and fit it into the socket.
③ Make sure that the lever is firmly fitted in the memory module.

Caution:	Do not put intense pressure to which the PCB greatly bends on the memory module after the memory module is secured with the lever at the time equipped with the memory module. The PCB may be damaged, when the intense pressure is applied.

Memory Module Appearance

There are two types of memory modules. One has a heat spreader and the other has no heat spreaders. Both memory modules can be used because they are compatible with each other.

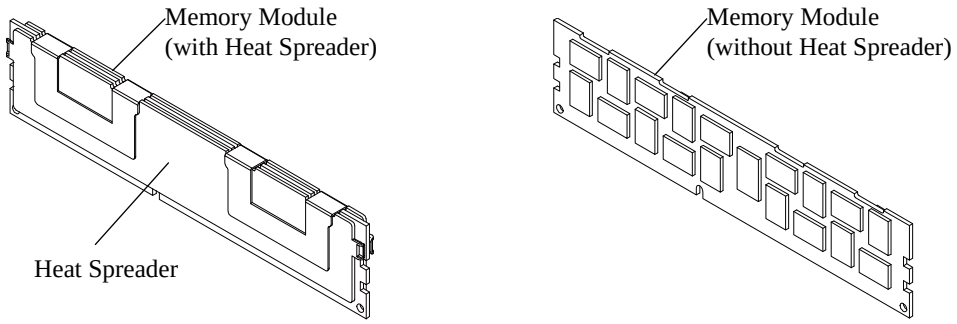


Fig.3.10-18 Insertion of Memory Module

Copyright © 2010, 2011, Hitachi, Ltd.

8-3 When you need to install SSD Memory (DKC-F710I-BM64/BM128), attach the SSD Memory. When you do not need to install SSD Memory (DKC-F710I-BM64/BM128), go to step 8-4.

Installation Condition

The SSD Memory (DKC-F710I-BM64) is an indispensable option that is to be installed when the subsystem configuration is as of the follows.

- When the cache memory capacity per a set of DKC-F710I-CPC is 64GB or 96GB, add a set of the SSD Memory (DKC-F710I-BM64).

The SSD Memory (DKC-F710I-BM128) is an indispensable option that is to be installed when the subsystem configuration is as follows.

- When the cache memory capacity per a set of DKC-F710I-CPC is 128GB, add a set of the SSD Memory (DKC-F710I-BM128). (When a set of DKC-F710I-BM64 has already been installed, the SSD Memory is required to exchange DKC-F710I-BM64 for DKC-F710I-BM128.)

a. Loosen the two screws in the front side of the CM PCB, and remove the cover.

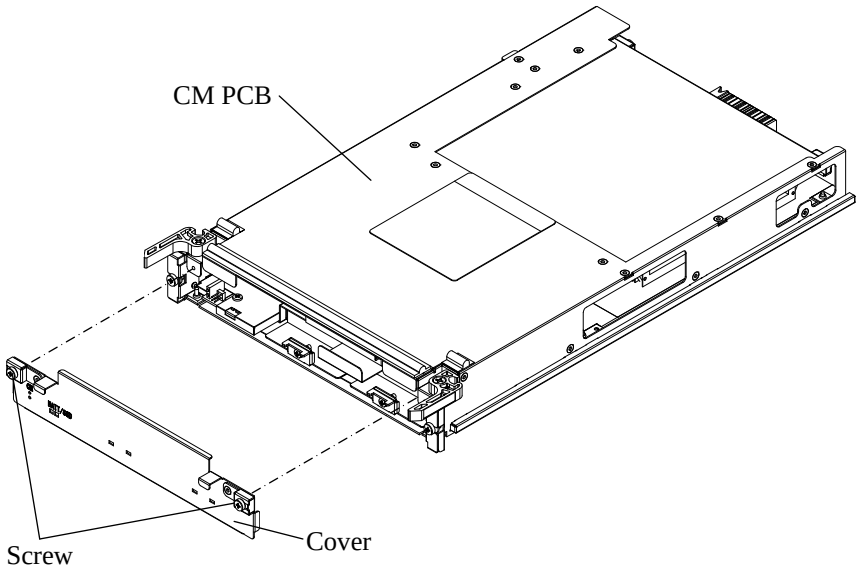

Fig. 3.10-19 Removal of Cover

Copyright © 2010, 2011, Hitachi, Ltd.

b. When you need to replace Option SSD, remove the Option SSD from the CM PCB after loosen the screws and put the stopper up.
   When you do not need to replace Option SSD, go to step c.
c. Install the Option SSD memory in the CM PCB, and put the stopper down, and then secure it with the screw.
d. Install the cover that is removed in procedure a. to the front side of the CM PCB, and secure it with the two screws.

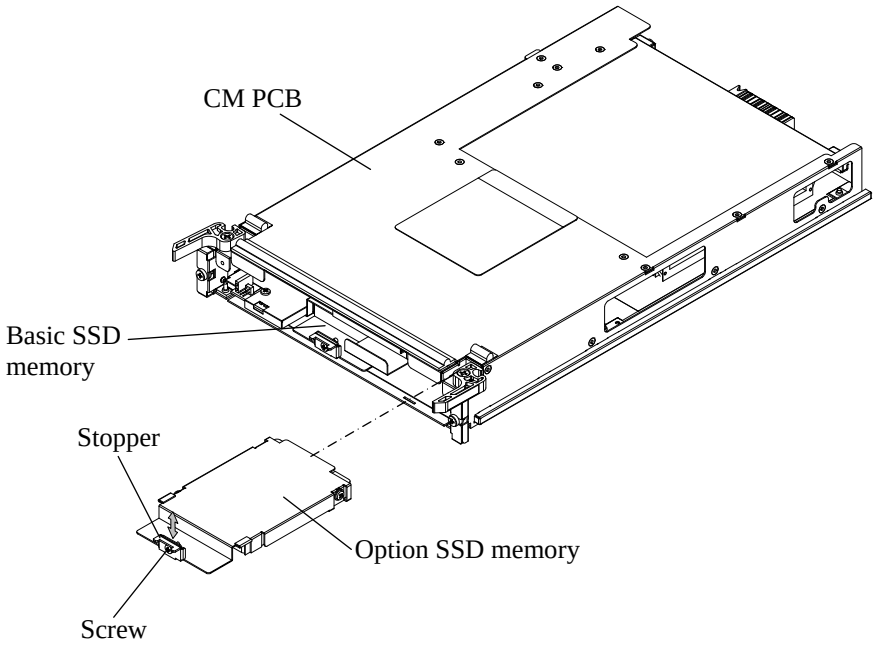

Fig. 3.10-20 Removal/Attachment of SSD Memory

Copyright © 2010, Hitachi, Ltd.

8-4 When you need to install Cache Memory Adapter (DKC-F710I-CPC), connect the battery cable of the CM PCB.
When you do not need to install Cache Memory Adapter (DKC-F710I-CPC), go to the step 8-5.

a. Loosen all screws (two screws per PCB) of the CM PCBs that are installed in the front side of the DKC, and remove the cover.
b. Connect all battery cables with the connectors.
c. Install the covers to all PCBs, and secure them with the screws.

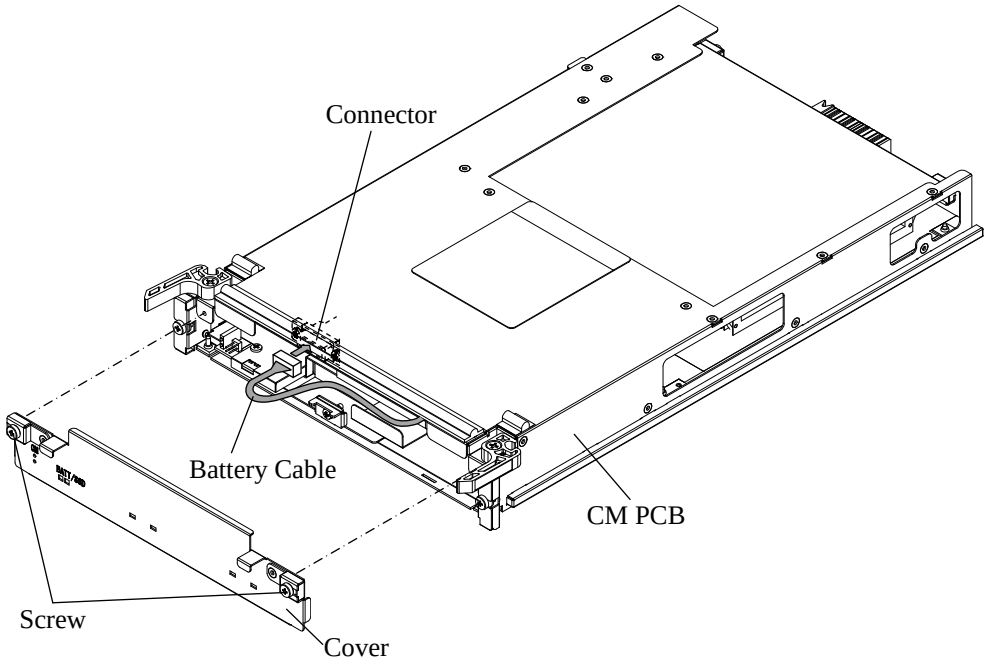

Fig. 3.10-21 Connection of Battery Cables

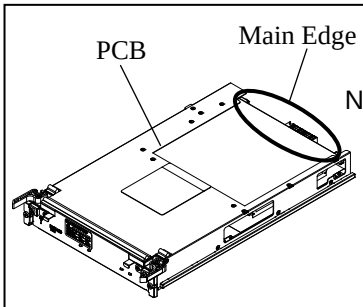
Copyright © 2010, 2011, Hitachi, Ltd.

8-5 Insert the PCB.

a. If the Cache Memory Adapter (DKC-F710I-CPC) is installed, remove the two screws and remove the dummy plate.
If not, go to step b.

Note: Remove the dummy plate just before installing the PCB.
If the dummy plate is kept removed for a long time, the wind doesn't flow among installed PCBs, causing the PCBs' temperature rise which may result in temperature warning or temperature alarm.

b. Install the CM PCB referring to Table 3.10-10.
c. Fasten the two screws.
d. Replace the DKCPANEL and secure it with the screws if the DKCPANEL is opened. (Refer to Fig. 3.10-12.)



Note: • Check that the main edge connector of the PCB has no deformation, damage or sticking of dust before installing the PCB. (See INST03-01-70.)
• When installing the PCB, hold the right and left of the PCB with both hands, and insert it straight not to contact the neighboring PCB.

Table 3.10-10 Location of the CM PCB

Cluster	Box	Slot No.	Location No.	Remarks
2	DKC-0	2CC	CACHE-2CC	
		2CD	CACHE-2CD	(*1)
		2CG	CACHE-2CG	(*1)
		2CH	CACHE-2CH	(*1)

		2CQ	CACHE-2CQ	(*1)
		2CR	CACHE-2CR	(*1)

*1: Insert the PCB when DKC-F710I-CPC is installed in the additional slot.

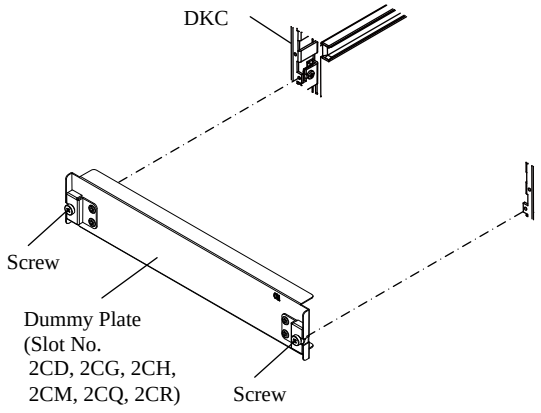

Fig. 3.10-22 Removal of the Dummy Plate

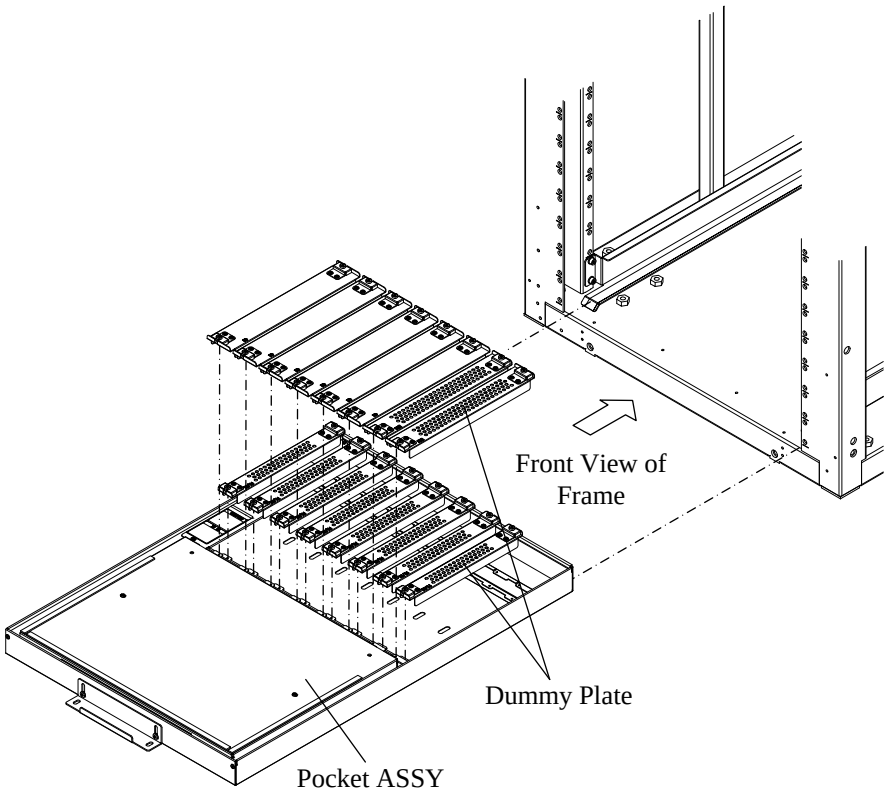
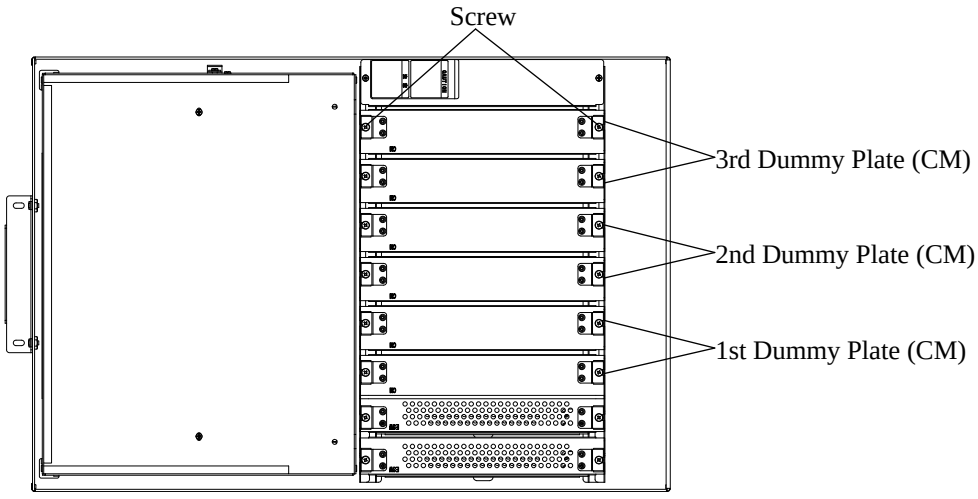
Copyright © 2010, Hitachi, Ltd.

8-6 Install the Dummy Plate.

a. When you need to install Cache Memory Adapter (DKC-F710I-CPC), remove the pocket ASSY from the front of the frame.
   When you do not need to install Cache Memory Adapter (DKC-F710I-CPC), go to step 8-7.
b. Install the removed dummy plate to the pocket ASSY and tighten it with the two screws.
c. Install the pocket ASSY in the front of the frame.





Top View of Pocket ASSY

Fig. 3.10-23 Storage of Dummy Plate

Copyright © 2010, 2012, Hitachi, Ltd.

8-7 Attachment of the Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags to be installed.
b. When you need to install Cache Memory (DKC-F710I-C32G/C32GR) and the nameplate is not attached, attach the nameplate to the nameplate tags.
c. Paint out mounting numbers of the DKC-F710I-C16G/C16GR/C32G/C32GR nameplate.
d. When you need to install Cache Memory Adapter (DKC-F710I-CPC), attach the DKC-F710I-CPC nameplate to the nameplate tag.
   When you do not need to install Cache Memory Adapter (DKC-F710I-CPC), go to step e.
e. When you need to install SSD Memory (DKC-F710I-BM64/BM128), attach the DKC-F710I-BM64/BM128 nameplate to the nameplate tag.
   When you do not need to install SSD Memory (DKC-F710I-BM64/BM128), go to step f.
f. Attach all the nameplate tags with the screw.

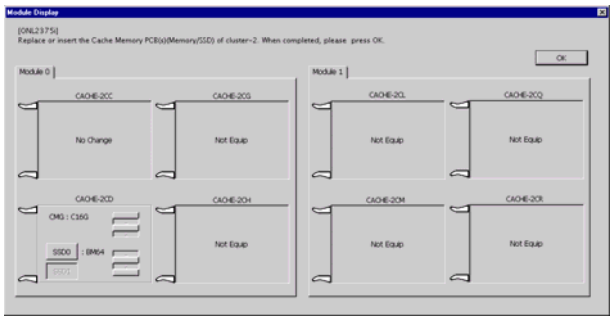
9. SVP post procedure on the Cluster 2.

(1)

After installation of cache memory on one side is completed, select (CL) [OK] in response to “Replace or insert the Cache Memory PCB(s)(Memory/SSD) of cluster-2. When completed, please press OK.”.

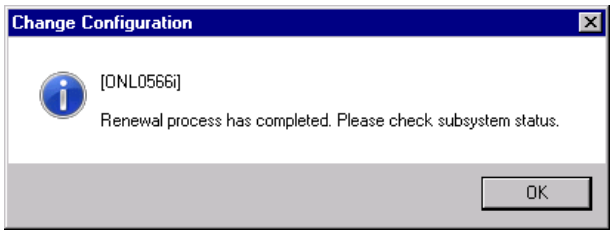


(2) <Cache CUDG executes>
“INLINE CUDG is now running...” is displayed.

(3)

“Changing the configuration date, for equipment of shared/cache memory...”
“Restoring the Cache Memory PCB...”
“Restoring the Shared Memory PCB...” is displayed.

(4) <End of system update processing>
“Renewal process has completed. Please check subsystem status.” is displayed when recovery processing on all installed components is completed. Select (CL) [OK] in response to this message.

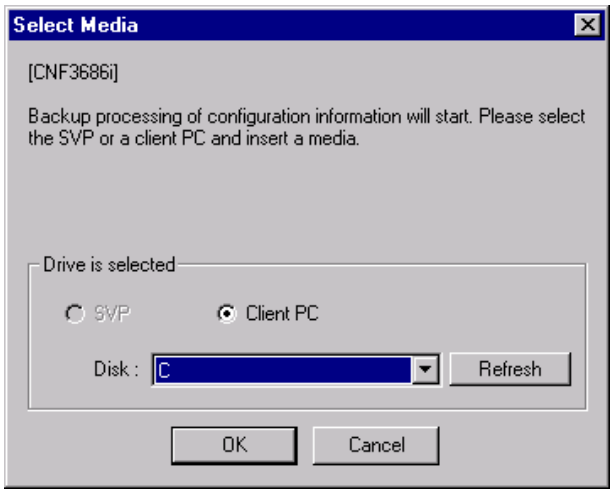


Copyright © 2010, 2012, Hitachi, Ltd.

(5)

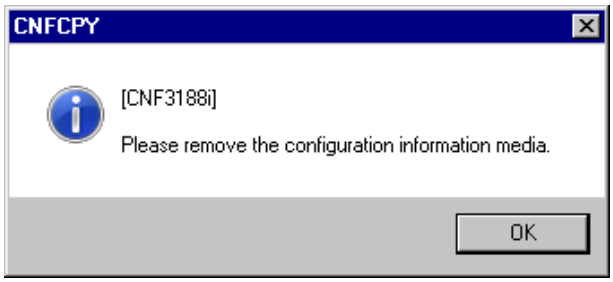
Execute an operation for backing up the configuration information.
Prepare the removable media for backup and insert the media.
Please select (CL) the [Refresh] button, and update drive information.
Select (CL) the drive and the PC in which the media was inserted. Select (CL) the [OK] button.

Note: For the procedure of backing up the configuration information to a CD-R, see page MICRO07-140.



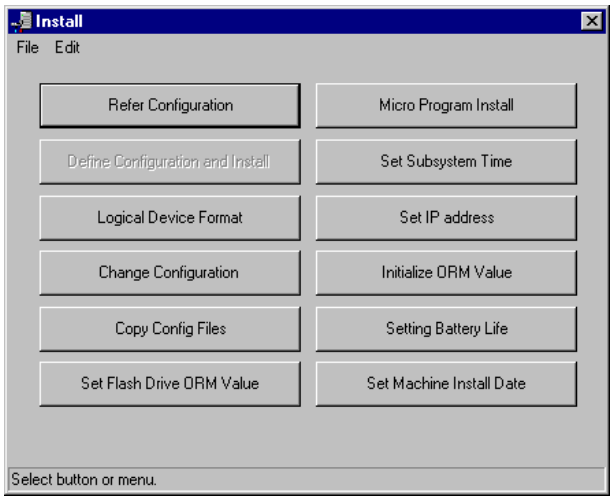
(6)

When this procedure is completed, the message “Please remove the configuration information media.” is displayed.
Remove the configuration information media, select (CL) [OK].



(7)

After the procedure is completed, return to “Install”.
Select (CL) [File]-[Exit].



(8) <Mode Change>
Change the mode to View Mode.

3.11 Installation of the Additional Controller PS (DKC-F710I-APC)

Table 3.11-1 Parts List

No.	Model Number	Part Name	Part No.	Quantity	Remarks
1	DKC-F710I-APC	DKCPS	5541806-A	2	
		Nameplate (HDS)	2852548-8	1	ITPD
			2853327-8/508		HICAM/HICEF
		Nameplate (HP)	2852570-8	1	ITPD
			2853328-8/508		HICAM/HICEF

Copyright © 2010, 2012, Hitachi, Ltd.

3.11.1 When you need to install DKC-F710I-APC in the DKC

Installation Condition

The Additional Controller PS (DKC-F710I-APC) becomes indispensable when the configuration of DKC is corresponding to any of the following cases.

The cases of DKC-0 and DKC-1

- When two sets of the DKC-F710I-MP/MPR are installed
- When three sets or more of the DKC-F710I-CPC are installed
- When two sets of the DKC-F710I-SVP are installed
- When two sets of the DKC-F710I-ESW are installed
- When two sets of the DKC-F710I-SCA are installed
- When four sets or more of the Fibre 8/16-port Host Adapter (DKC-F710I-8UFC/8UFCR/16UFC/16UFCR) and FCOE 8-port Host Adapter (DKC-F710I-8FOE) are installed
- When three sets or more of the Mainframe Fibre 16-port Host Adapter (DKC-F710I-16MFS/16MFL/16MUS/16MUSR/16MUL) are installed

The additional PCI Express Switch Adapter (DKC-F710I-ESW) becomes indispensable according to the slot that is installed in the DKA and the CHA, and the additional power supply is needed in that case under the following conditions.

The cases of DKC-0

When the CHA is installed in the Option 2 (1FU/2RU) or the Option 3 (1FL/2RL) of the CHA slots
When the DKA or the CHA is installed in the Option 1 (1AL/2ML) of the DKA slots

The cases of DKC-1

When the CHA is installed in the Option 2 (1HU/2UU) or the Option 3 (1HL/2UL) of the CHA slots
When the DKA or the CHA is installed in the Option 1 (1LL/2XL) of the DKA slots

Twin DKC Model

In the twin DKC model, the number of installing of the DKC-F710I-ESW installed in the DKC-0 and the DKC-1 should be made the same. Therefore the additional DKC-F710I-APC might be needed according the number of installing of the DKC-F710I-ESW.

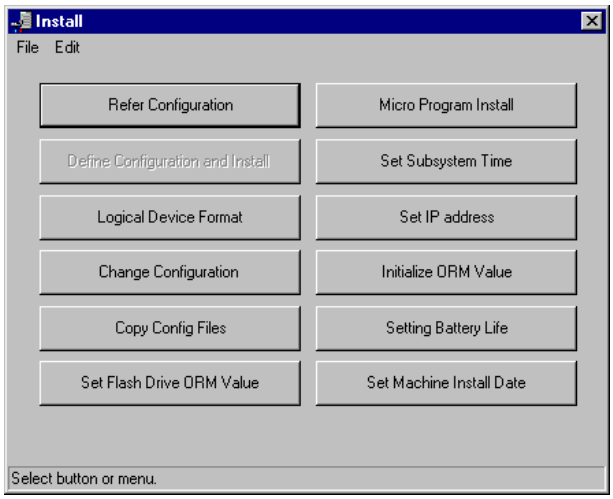
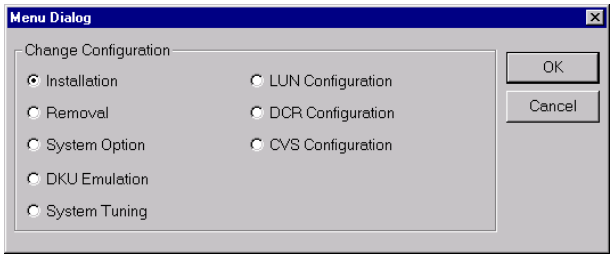
1. Setting up the New Device Structure Information

(1) <Mode Change>
Change the mode to Modify Mode.
Select (CL) [Install].

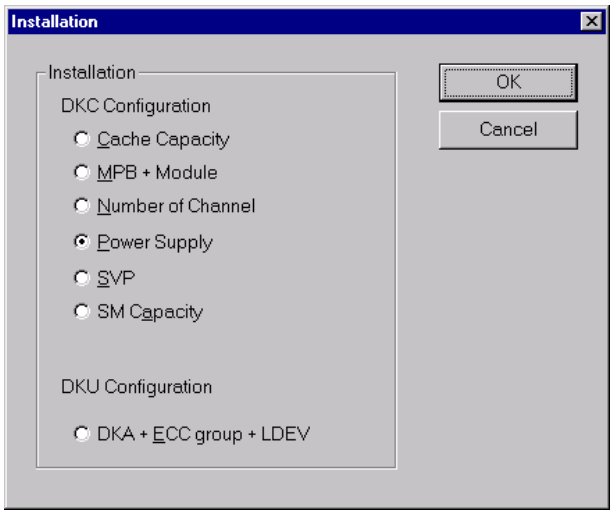
(2) <Start the 'Menu Dialog' screen>
Select (CL) [Change Configuration].



(3) <Start Device Structure Setup screen>
Select (CL) [Installation] in the 'Menu Dialog' dialog box and select (CL) [OK].



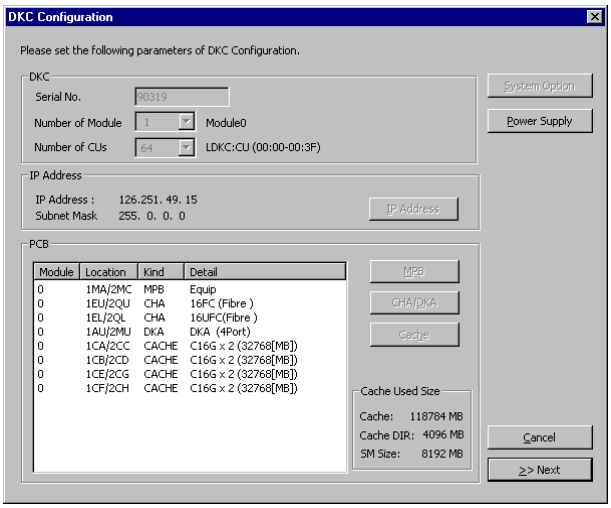
(4) <Select a part to be changed>
Select (CL) [Power Supply], and select (CL) [OK].



Copyright © 2010, Hitachi, Ltd.

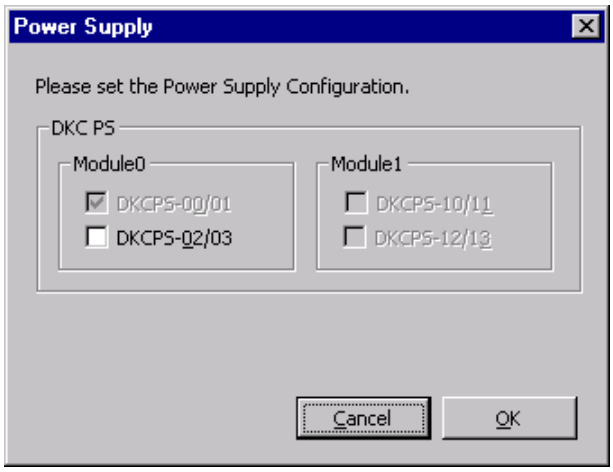
(5) <Update Configuration Information>
Select (CL) [Power Supply] in the 'DKC Configuration' screen.
Go to Step (5)-1.

Select (CL) [>>Next]. Go to Step 2.



(5)-1 <Define Redundant Power Supply>
Select (CL) redundant power supply added in the 'Power Supply' screen.

Make sure that the input item is correct and select (CL) [OK].
Go back to Step (5).

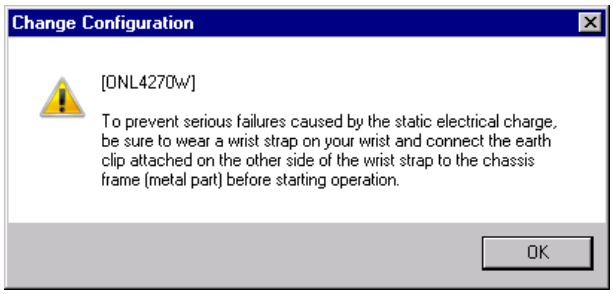


Copyright © 2010, Hitachi, Ltd.

2. SVP pre procedure

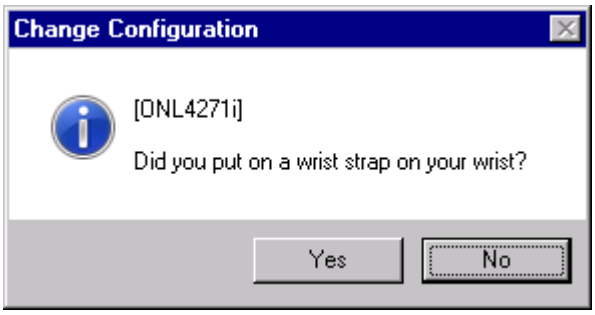
(1) <Wear a wrist strap>

Select (CL) [OK] in response to “To prevent serious failures caused by the static electrical charge, be sure to wear a wrist strap on your wrist and connect the earth clip attached on the other side of the wrist strap to the chassis frame (metal part) before starting operation.”.



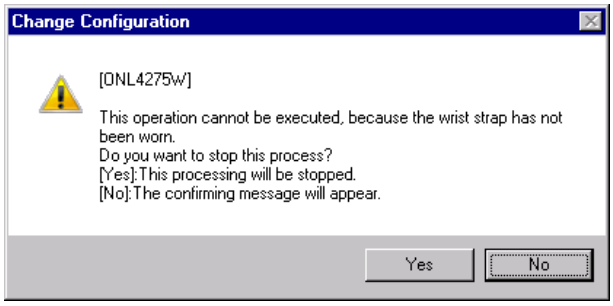
(1)-1 <Confirm wearing wrist strap>

In response to a message, “Did you put on a wrist strap on your wrist?”.
Select [Yes] when wrist strap is on your wrist.
Select [No] when there is no wrist strap on your wrist.
When [No] is selected (CL), go to Step (1)-2.



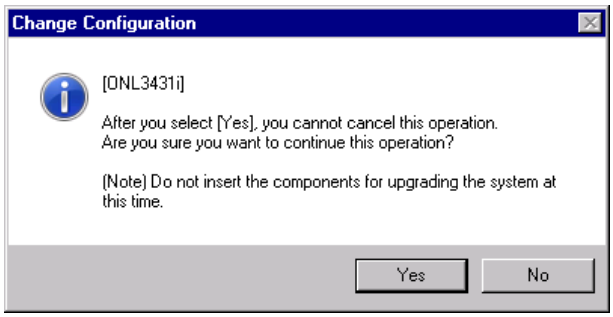
(1)-2

In response to a message, “This operation cannot be excuted, because the wrist strap has not been worn. Do you want to stop this process?
[Yes]: This processing will be stopped.
[No]: This confirming message will appear.”
When [Yes] is selected (CL), the routine is returned to Step (2) on page INST03-11-20.
When [No] is selected (CL), returned to Step (1).



Copyright © 2010, 2012, Hitachi, Ltd.

(2) <Start installation>
Select (CL) [Yes] in response to "After you select [Yes], you cannot cancel this operation. Are you sure you want to continue this operation? (Note) Do not remove the components when downgrading the system at this time.". When [No] is selected (CL), the routine is returned to Step (2) on page INST03-11-20.



(3) The message shown in the right figure is displayed.
At this point refrain from selecting (CL) [OK].
"Insert the additional power supplies (DKCPS-nn,DKCPS-nn), and then select [OK]." is displayed.

3. Installation Procedure of the Additional Controller PS

3-1 Removal of the Dummy plates

a. Open the locking clamps and remove the cables from the dummy plates.

b. Loosen the screws and remove the dummy plates.

Note: Dummy plates should be stored for future use in De-installation.

Table 3.11.1-1 Insertion Location of DKCPS

DKC	Addition No.	Location No.		Remarks
DKC-0	Option 1	DKCPS-02	DKCPS-03	
DKC-1	Option 1	DKCPS-12	DKCPS-13	

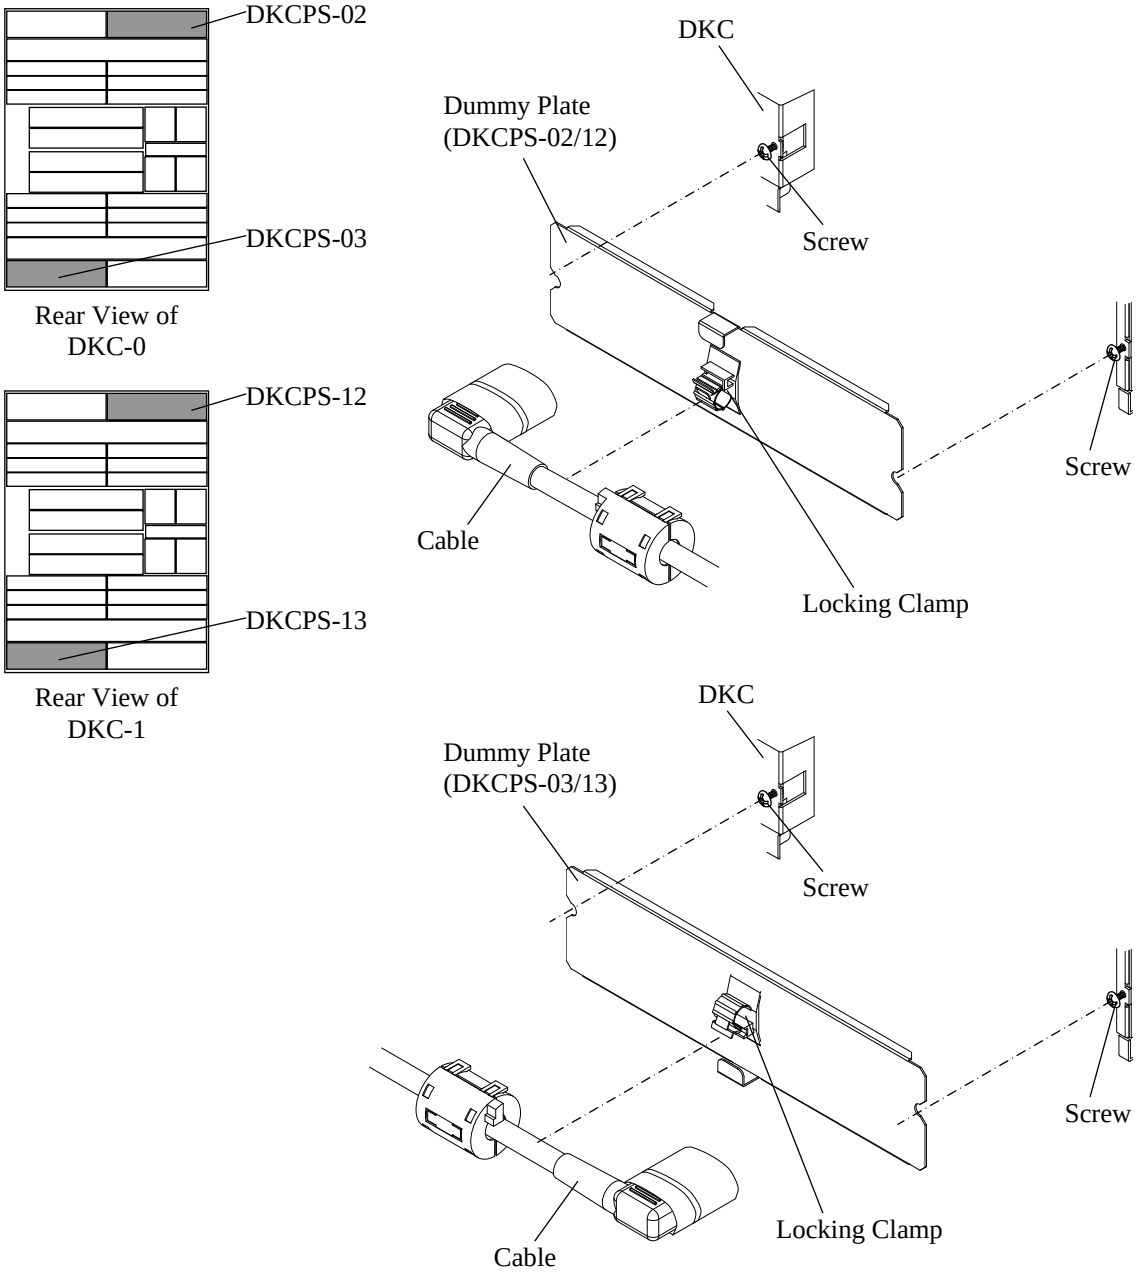

Fig. 3.11.1-1 Removal of Dummy Plates

Copyright © 2010, Hitachi, Ltd.

3-2 Installation of the DKCPS

a. Remove the covers from the cables.
b. Install the DKCPSs in the correct locations and fasten the screws.
c. Connect the cables to the DKCPSs and fix them with the stoppers.

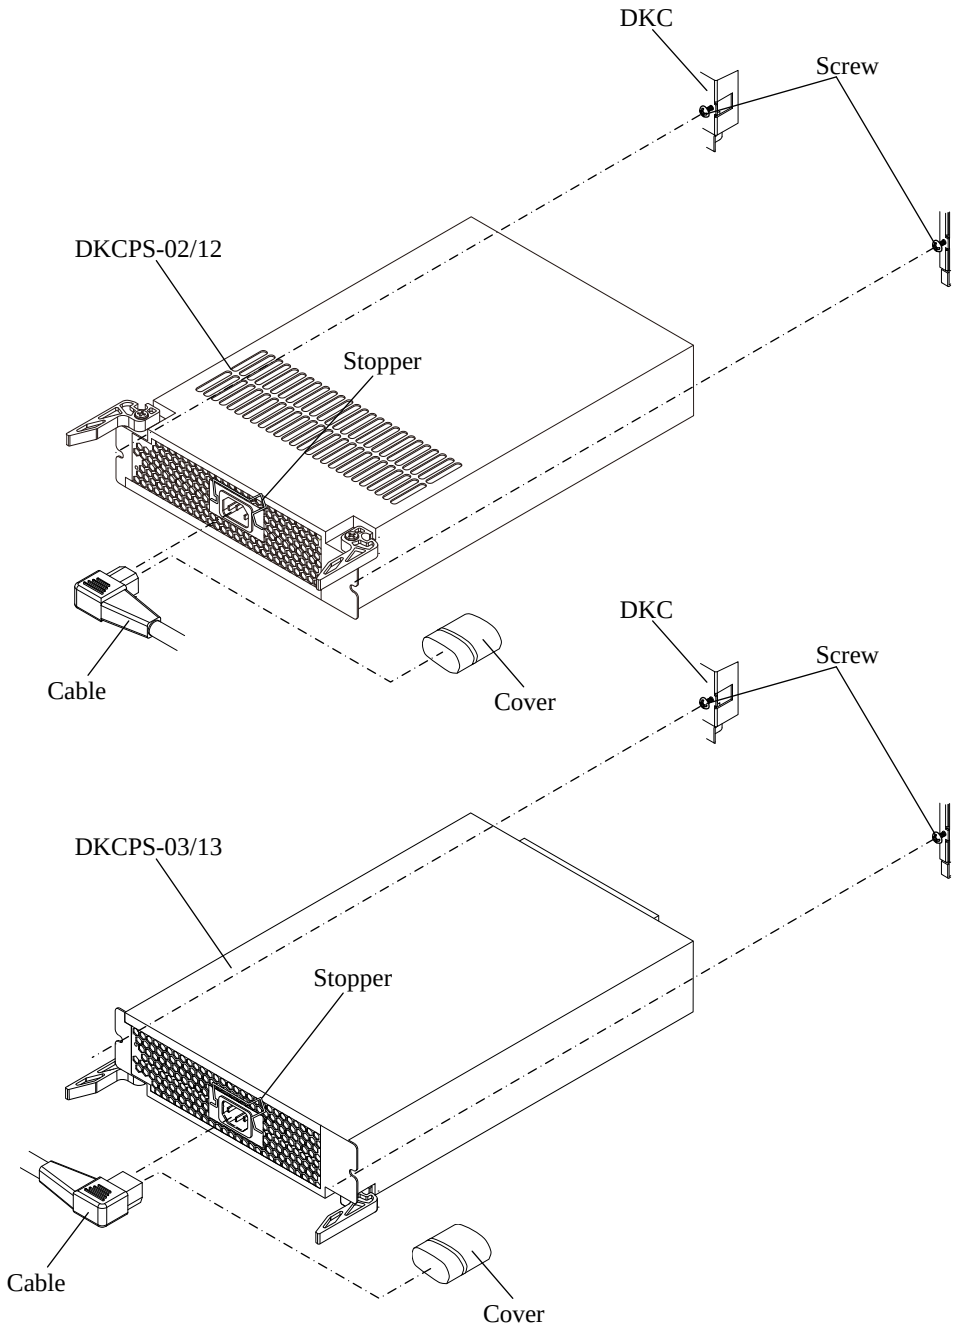

Fig. 3.11.1-2 Attachment of DKCPS

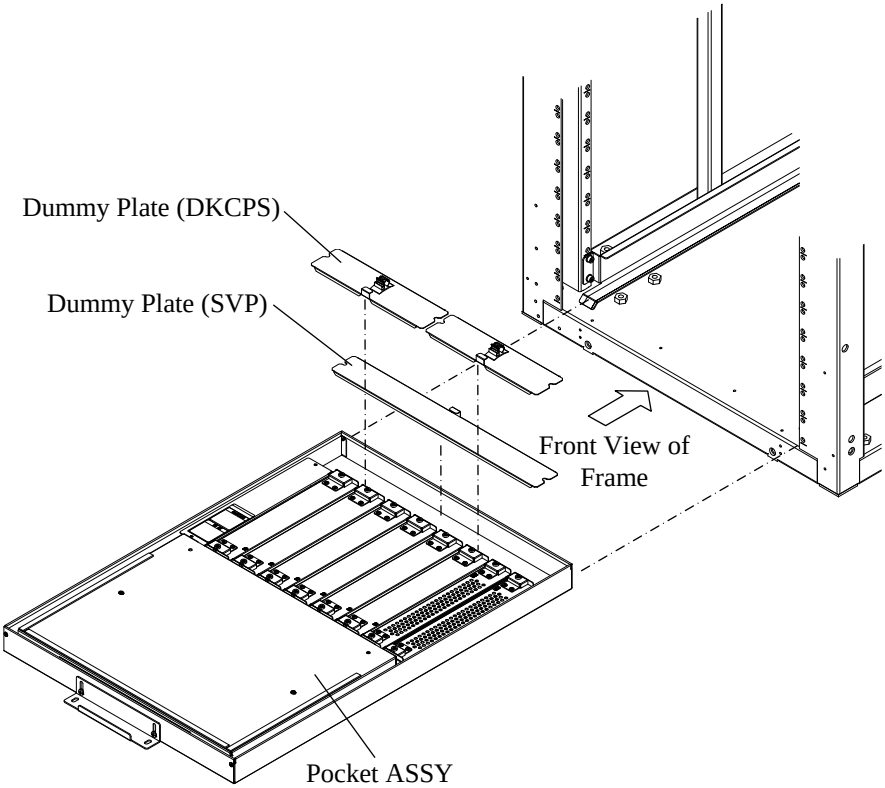
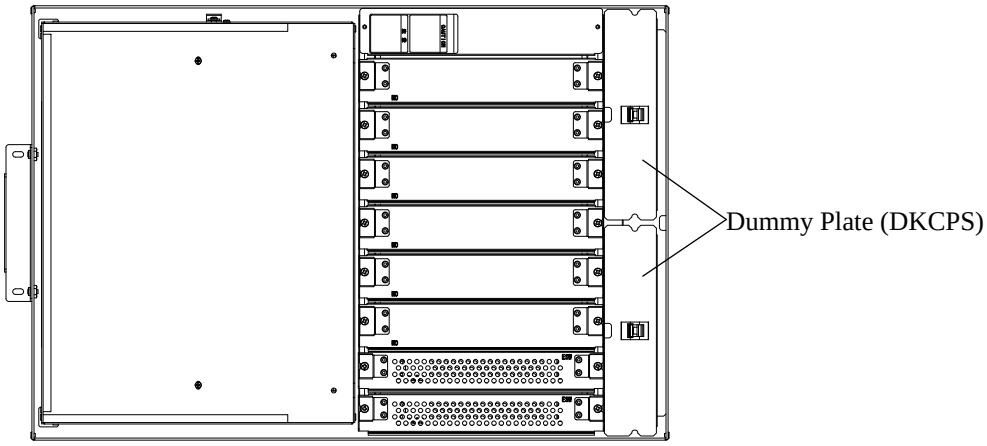
Copyright © 2010, Hitachi, Ltd.

3-3 Storage of the Dummy Plates

a. Remove the pocket ASSY from the front of the frame.
b. Install the two removed dummy plates in the pocket ASSY.
c. Install the pocket ASSY in the front of the frame.





Top View of Pocket ASSY

Copyright © 2010, Hitachi, Ltd.

3-4 Attachment of the Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags to be installed.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

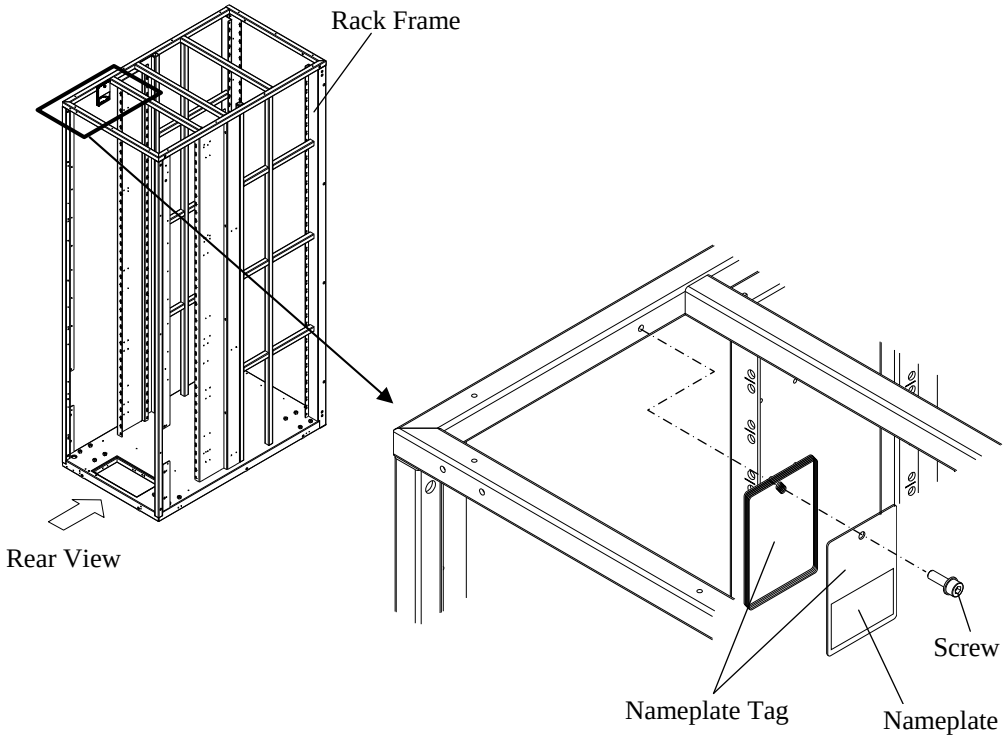

Fig. 3.11.1-4 Attachment of Nameplate

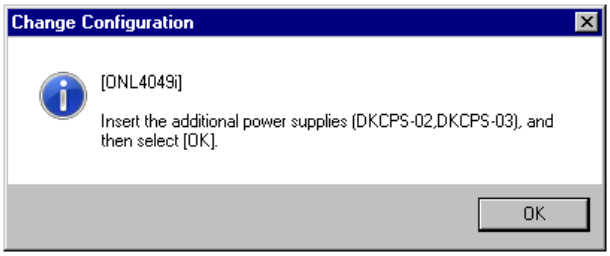
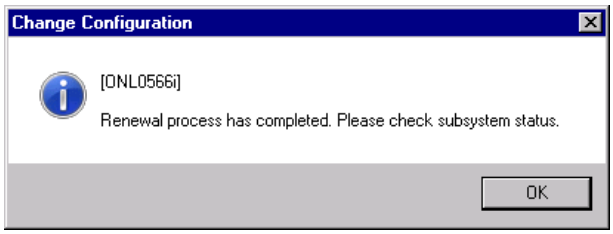
4. SVP post procedure

(1) <Check that hardware components are installed>
Select (CL) [OK] after making sure that all hardware components are installed correctly in response to “Insert the additional power supplies (DKCPS-nn,DKCPS-nn), and then select [OK].”.

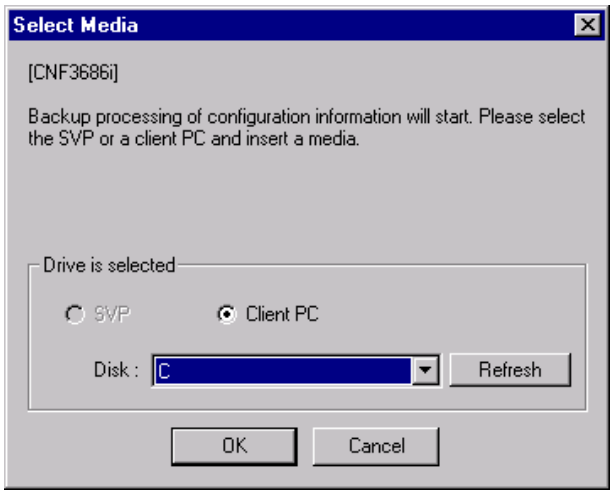


(2) <End of system update processing>
“Renewal process has completed. Please check subsystem status.” is displayed when recovery processing on all installed components is completed. Select (CL) [OK] in response to this message.

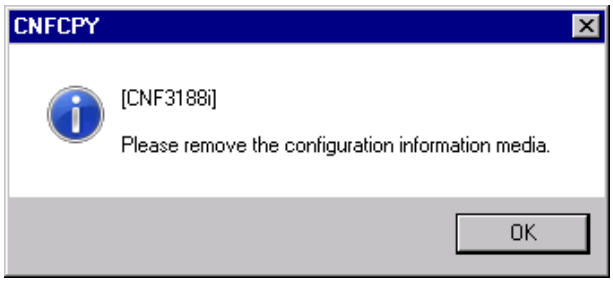


(3)
Execute an operation for backing up the configuration information.
Prepare the removable media for backup and insert the media.
Please select (CL) the [Refresh] button, and update drive information.
Select (CL) the drive and the PC in which the media was inserted. Select (CL) the [OK] button.

Note: For the procedure of backing up the configuration information to a CD-R, see page MICRO07-140.



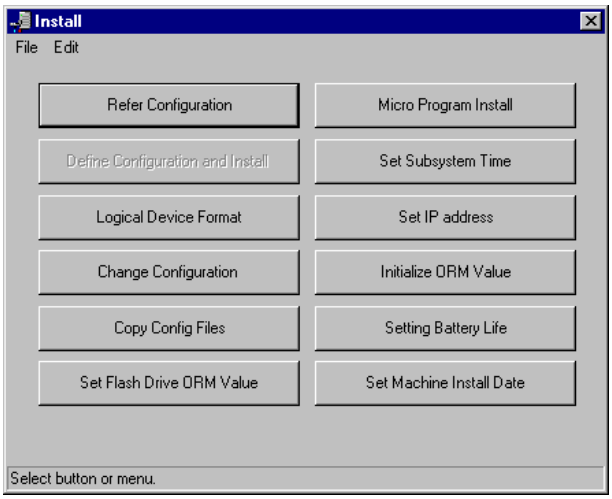
(4)
When this procedure is completed, the message “Please remove the configuration information media.” is displayed.
Remove the configuration information media, Select (CL) [OK].



Copyright © 2010, 2012, Hitachi, Ltd.

(5)

After the procedure is completed, return to ‘Install’.
Select (CL) [File]-[Exit].



(6) <Mode Change>
Change the mode to View Mode.

Return to the working table and do the rest of the work.
New Installation: INST02-10
Non-Disruptive Installation: INST02-40

3.11.2 When you need to install two DKC-F710I-APC sets in the DKU

1. Installation of DKCPSs
   a. Loosen the two screws① of the front side of the DKU, and remove the stopper.
   b. Install the two DKCPSs, and tighten the four screws②.
   c. Attach the insulation, and tighten the four screws③.
   d. Install the stopper on the front side of the DKU, and tighten the two screws①.

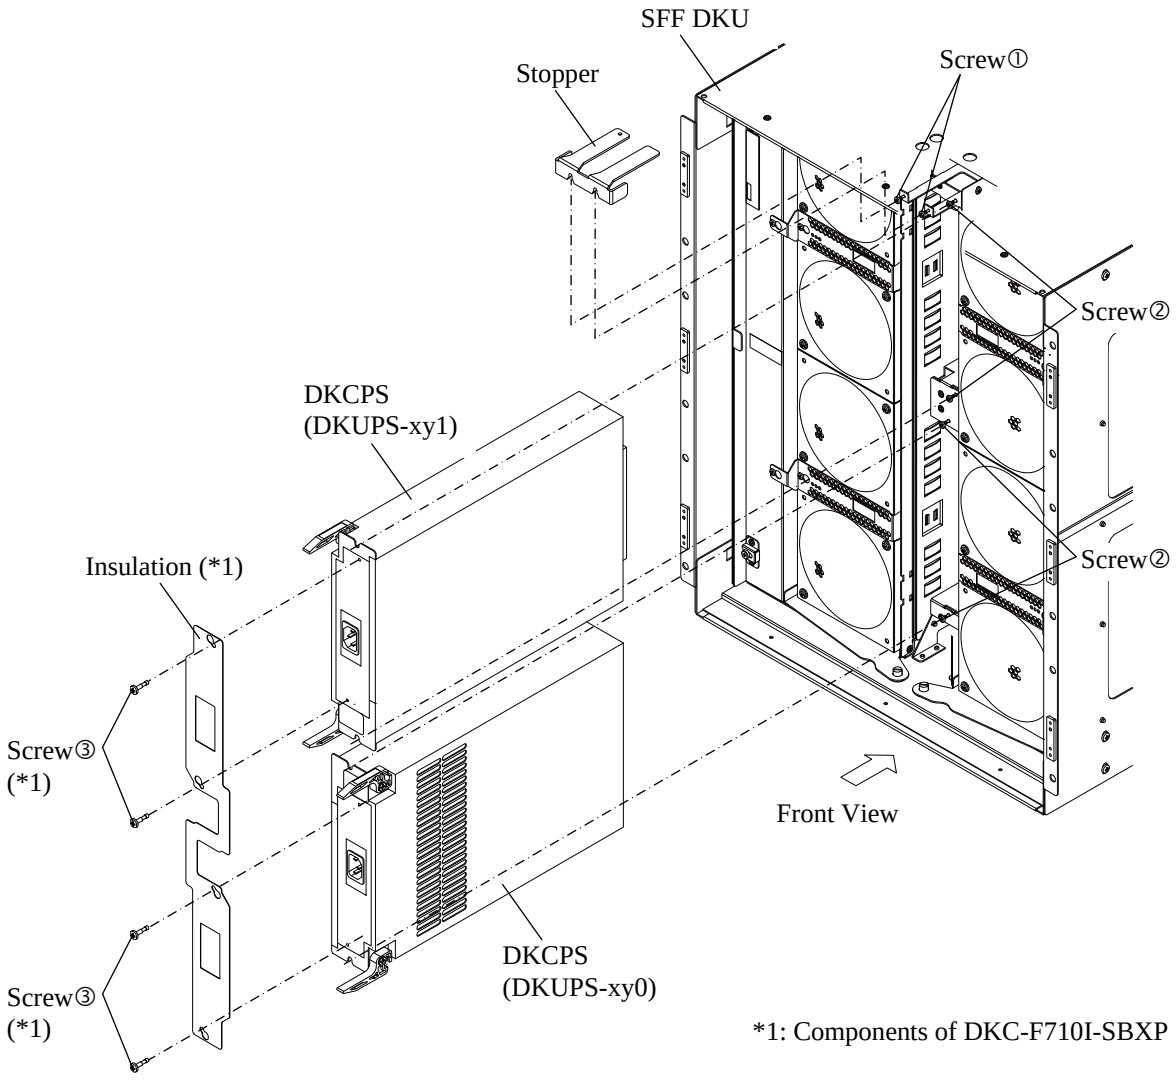

Fig. 3.11.2-1 Installation of DKCPSs (Front)

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws① of the rear side of the DKU, and remove the stopper.
f. Install the two DKCPSs, and tighten the four screws②.
g. Attach the insulation, and tighten the four screws③.
h. Install the stopper on the rear side of the DKU, and tighten the two screws①.

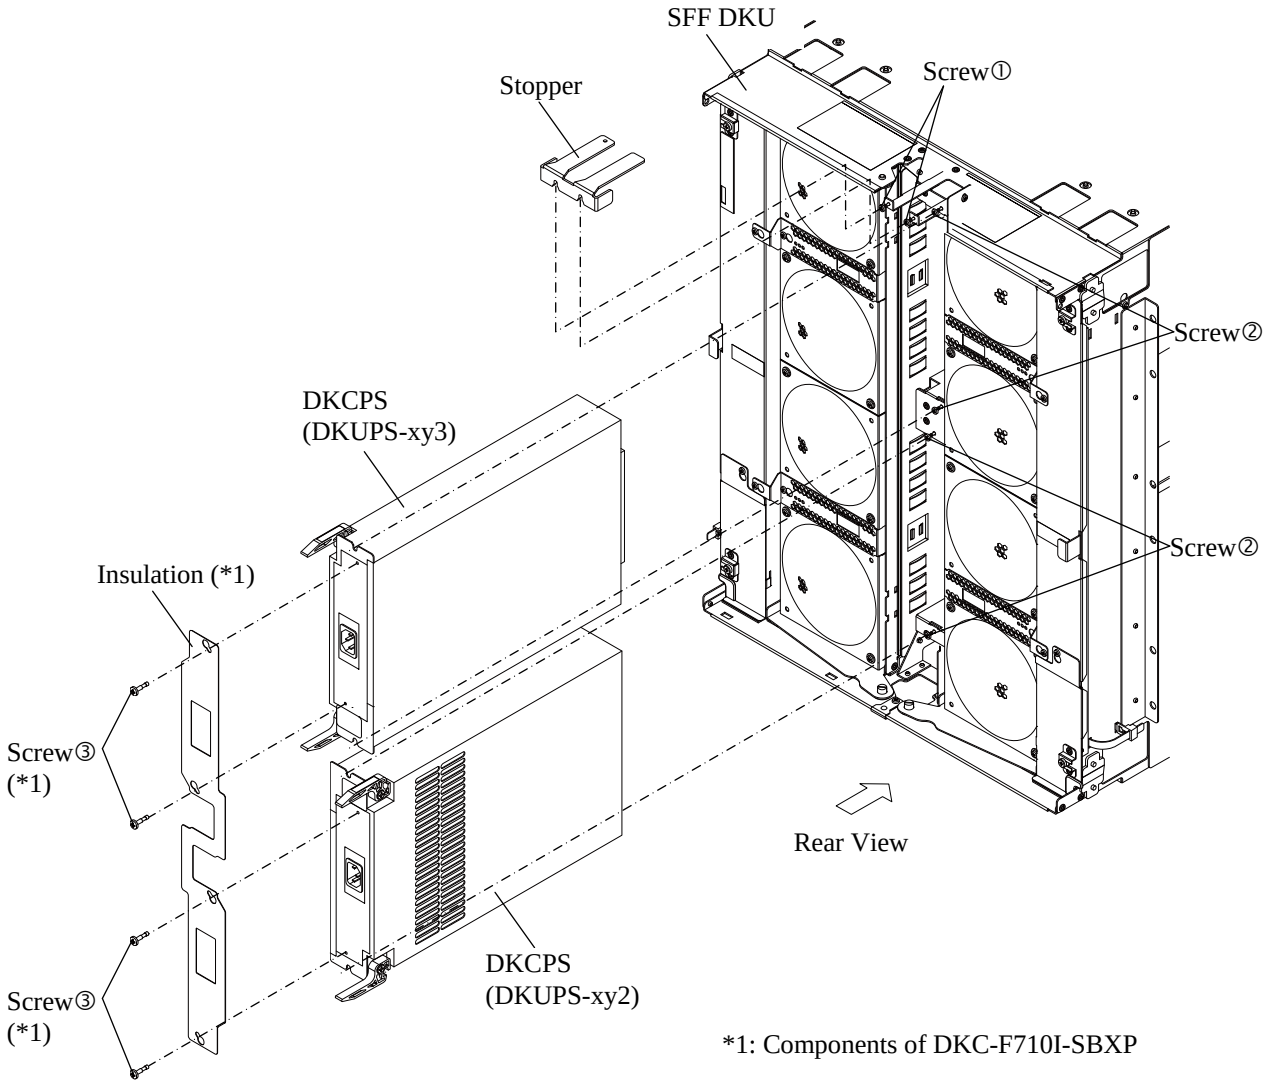

Fig. 3.11.2-2 Installation of DKCPSs (Rear)

Copyright © 2010, Hitachi, Ltd.

2. Attachment of the Nameplates
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Attach the two nameplates to the nameplate tags.
   c. Attach all the nameplate tags with the screw.

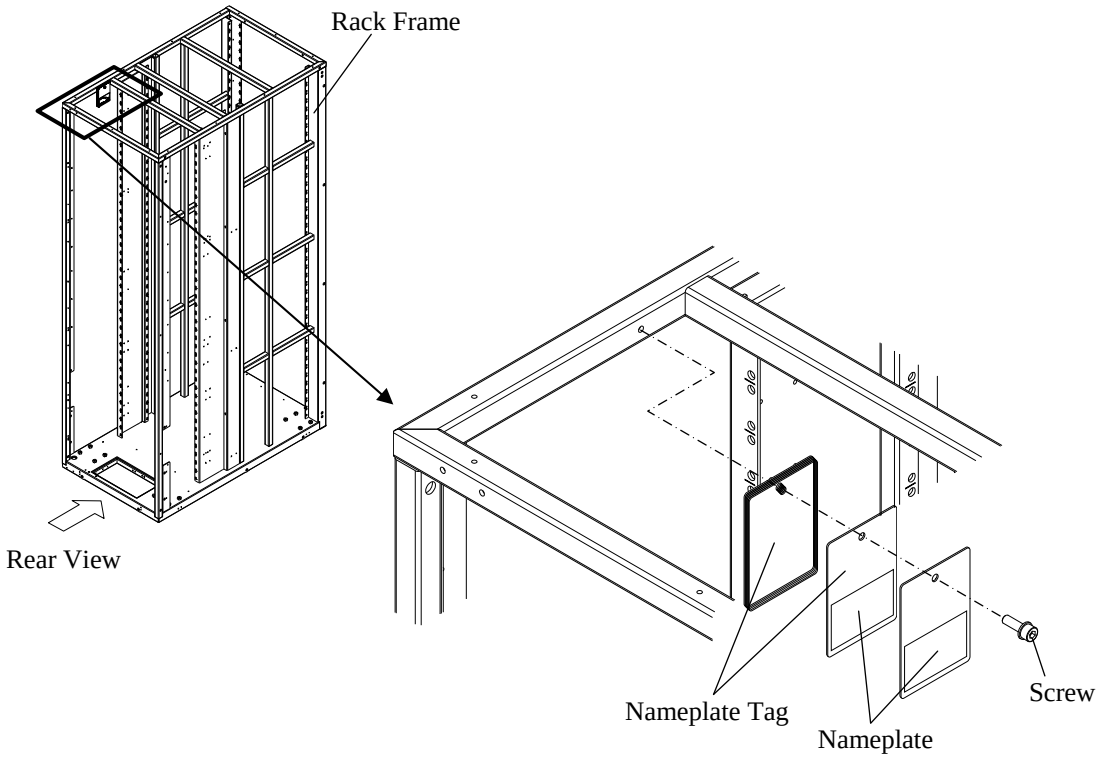

Fig. 3.11.2-3 Attachment of Nameplates

   d. Return to the working table and do the rest of the work.
      New Installation: INST02-10
      Non-Disruptive Installation: INST02-50

3.12.2 When performing addition of the data/spare Drive (DKC-F710I-146KCM/300JCM/300JCS/300KCM/500HCM/600JCM/600JCS/900JCM/1R0HCM/1R2JCM/2R0H2M/2R0H3M//3R0H3M/4R0H3M/200MCM/200SAM/200SCM/400MCM/400SCM/800MCM/400S1M/1R6FM/3R2FM)

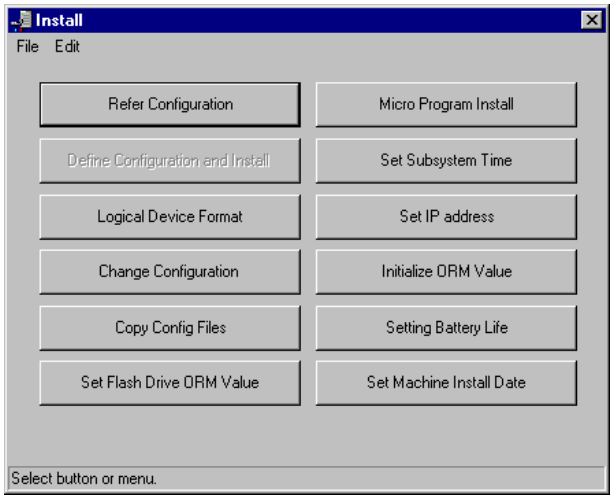
⚠ CAUTION

If No Charging of FMD (SIM = 50EXYY) occurs in installation of a FMD, the FMD ACTIVE LED will change to low-speed blinking. In this case, it takes 90 minutes at most for the FMD ACTIVE LED to go out and for the battery in the FMD to be fully charged.

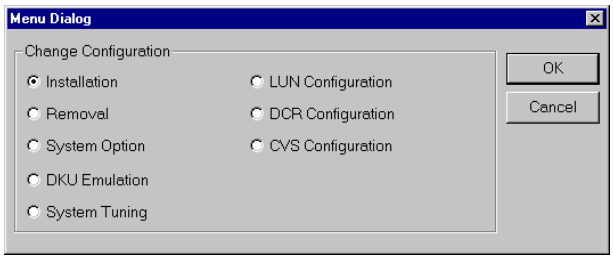
1. Setting up the New Device Structure Information

(1) <Mode Change>
Change the mode to Modify Mode.
Select (CL) [Install].

(2) <Start the 'Menu Dialog' screen>
Select (CL) [Change Configuration].

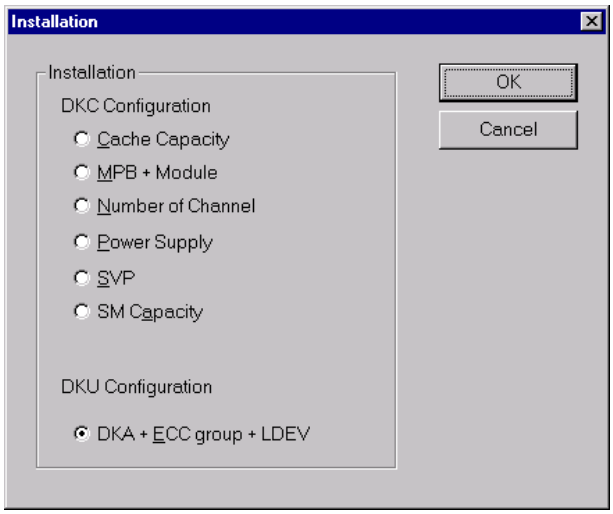


(3) <Start Device Structure Setup screen>
Select (CL) [Installation] in the 'Menu Dialog' dialog box and select (CL) [OK].



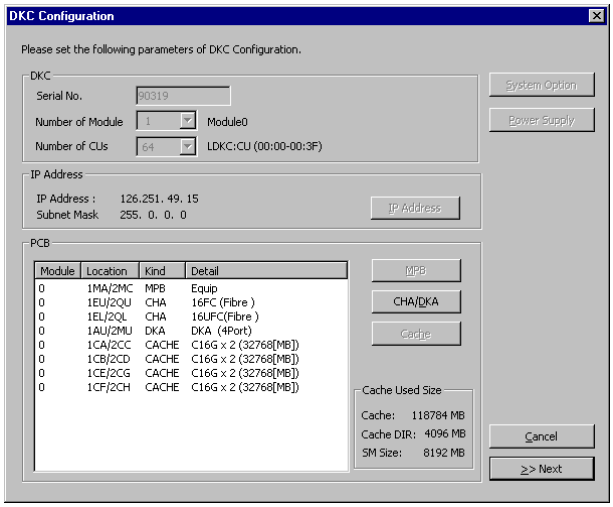
Copyright © 2010, 2011, Hitachi, Ltd.

(4) <Select a changed part>
Select (CL) [DKA + ECC group + LDEV], and select (CL) [OK].

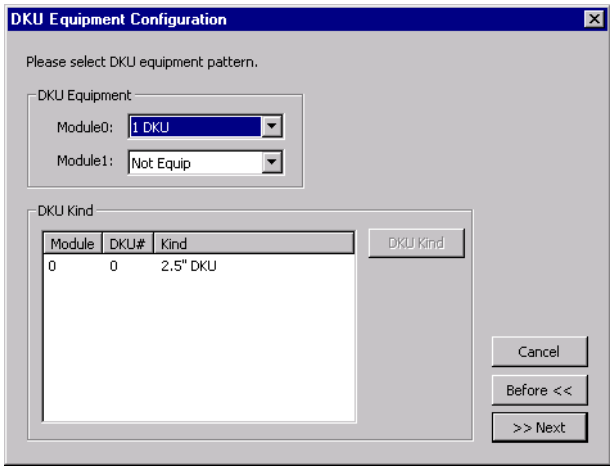


(5) <DKC Configuration screen>
In the 'DKC Configuration' screen, select (CL) [>>Next].
Go to Step (6).

Note: There may be a case where an addition of the SM is required to add the CU.



(6) <DKU Equipment Configuration screen>
Select (CL) [>>Next] in the 'DKU Equipment Configuration' screen.
Go to Step (7).

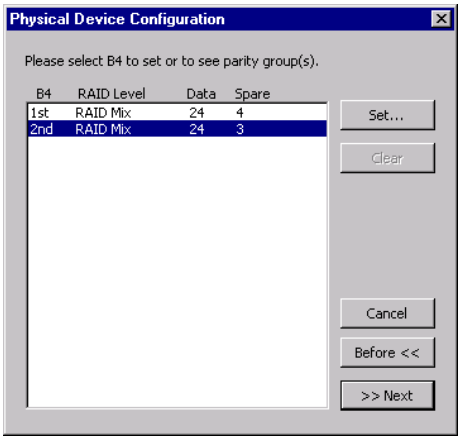


Copyright © 2010, Hitachi, Ltd.

(7) <Physical Device Configuration screen>

Define the drive configuration according to the 'Physical Device Configuration' screen.
Detailed procedure is shown below.
[Set...]: Defines the parity group or spare disk.
Go to Step (8).
[Clear...]: Cancels the setting of the B4.
After setting up all items, select (CL) [>>Next].
Go to Step (9).

Selecting (CL) [Before<<] returns to Step (6).



• Relation between B4 and HDU Location (Refer to LOC02-40 ~ 50 for Location.)

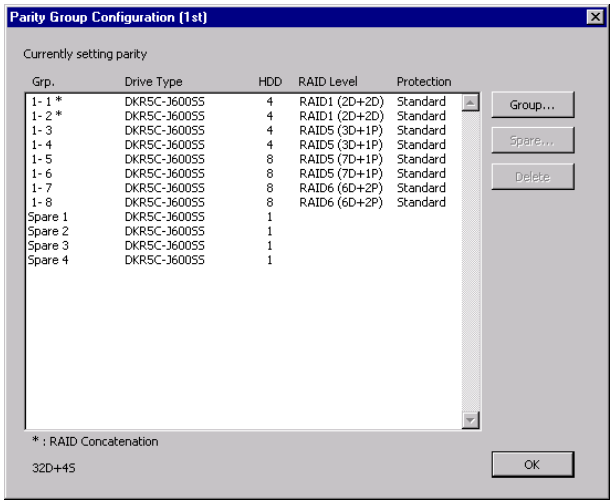
(8) <Define Parity Group>

Note: If SAS HDD and SATA HDD are concurrently installed, and LDEV Format is performed, the SAS HDD is unavailable until Format of the SATA HDD is completed. In this case, install the HDDs separately, first the SAS HDD, and then the SATA HDD. To identify SAS HDD/SATA HDD, please refer to INST01-40.



'Parity Group Configuration' dialog box is displayed.

[Group...]: Defines the parity group. See Step (8)-1.

[Spare...]: Defines the spare drive. See Step (8)-2.

[Delete]: Deletes the added parity group or spare drive.

Grp*: A parity group where RAID Concatenation is installed.

Protection: Protection Level.

- Standard: SAS drives/SSD drives.
- SATA-E: Enhanced method of SATA drives.
- SATA-W/V: Write & Verify method of SATA drives.

(Please refer to THEORY OF OPERATION SECTION)

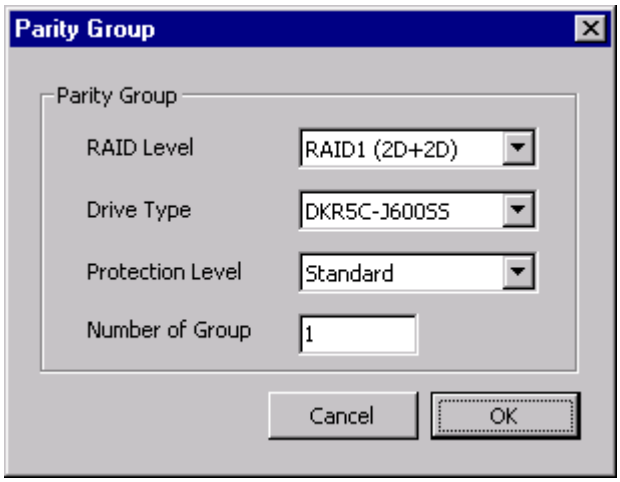
Note: If you want to set any Spare Drives in B4, please define the Spare Drive first.

After setting up all items, select (CL) [OK]. Go back to Step (7).

Copyright © 2010, 2014, Hitachi, Ltd.

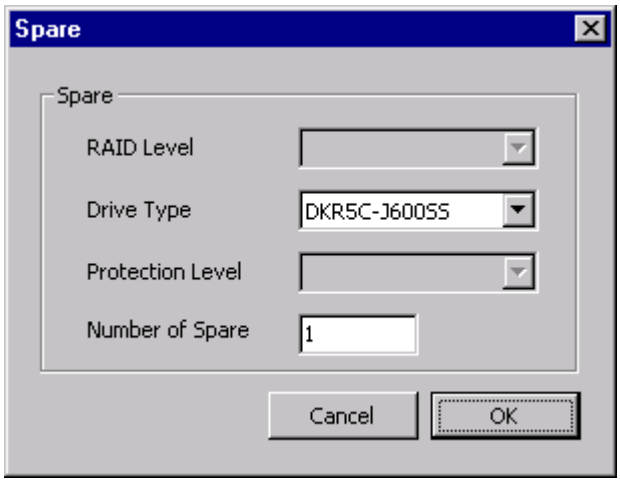
(8)-1

Define the RAID Level, the Drive Type (*1) (*2), the Protection Level, and the Number of Group in the 'Parity Group' dialog box.
Then select (CL) [OK]. Go back to Step (8).



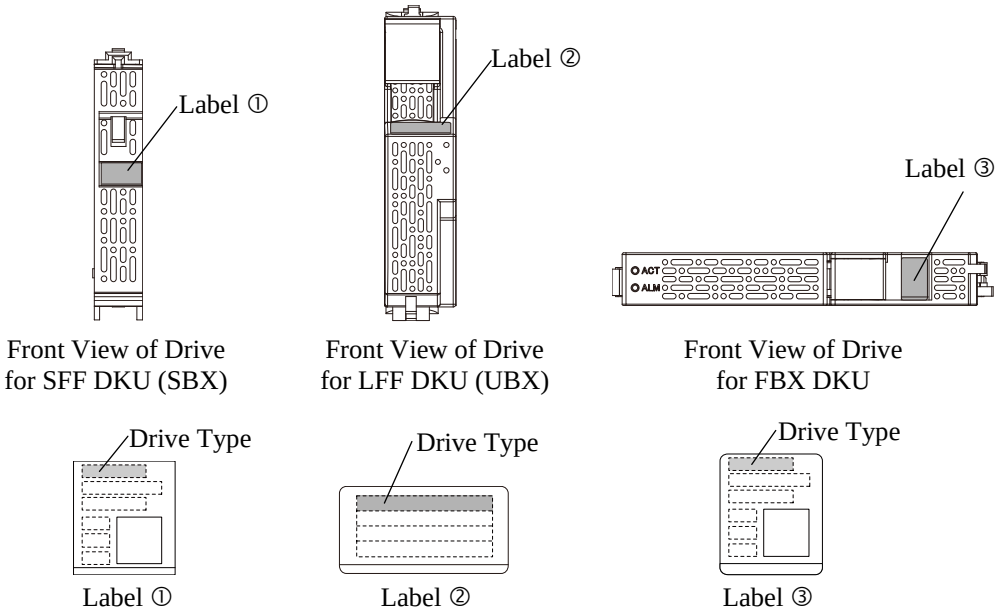
(8)-2

Define the Drive Type (*1) (*2) and the Number of Spare Drives in the 'Spare' dialog box.
Then select (CL) [OK].
Go back to Step (8).



Copyright © 2014, Hitachi, Ltd.

*1: For the Drive Type, see the label on the drive.



*2: Even if a HDD whose Drive Type is different from the selected one is installed, the HDD can be used when the capacity, rotation speed and interface of the Drive Type are the same. For the recommended setting type name in SVP operation, refer to THEORY03-07-30.

Copyright © 2010, 2011, Hitachi, Ltd.

(9) <Define Device Emulation>

After setting up all items corresponding (9)-1 to (9)-3 for definition of Device Emulation, select (CL) [>>Next].

Selecting (CL) [Before<<] returns you to the previous screen.

In the case of only spare drive installation, select (CL) [>>Next]. Go to Step (10).

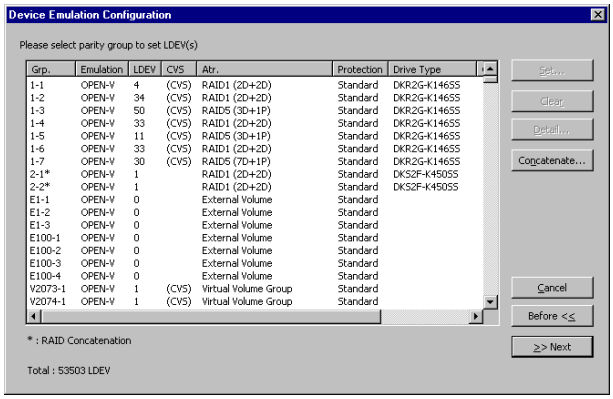
- If defining Device Emulation, go to Step (9)-1.
- If setting RAID concatenation, go to Step (9)-2.
- If defining of Customized Volume Size (CVS) and System Disk, go to Step (9)-3.

(9)-1 <Define Device Emulation>

Select (CL) parity group and select (CL) [Set...]. Go to Step (9)-1-1.

(CVS): A parity group where CVS is installed.

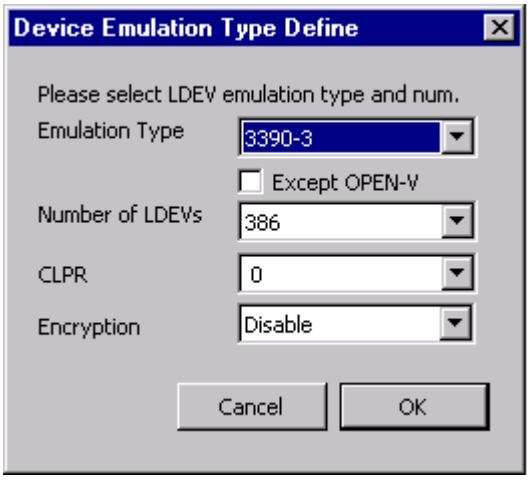
Grp*: A parity group where RAID Concatenation is installed.



(9)-1-1

After setting up all items in the 'Device Emulation Type Define' dialog box, select (CL) [OK]. Go back to Step (9).

Selecting (CL) [Cancel] returns you to Step (9)-1 without reflecting the setting items.



Note: OPEN-V is a recommended OPEN volume. To set other than OPEN-V, please select "Except OPEN-V".

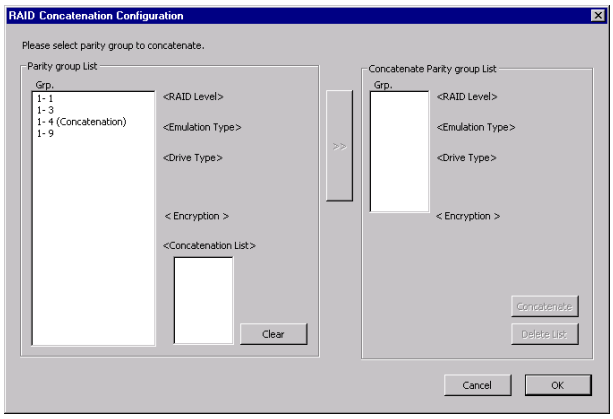
Note: "0" can be set to the value of Number of LDEVs for all the emulation types.
If you don't know the LDEV size you will use, set "0". You can save time by setting "0" because LDEV format will not run.
When you set "0", please make LDEVs later using the CVS function.

Note: If 3390-A is selected, a 3390-A volume whose capacity is as large as that of standard capacity of the specified emulation type can be created by specifying (3390-3 size), (3390-9 size), (3390-L size), or (3390-M size) in the "Number of LDEVs". If a parity group consists of drives with 1TB or larger is specified, only (3390-M size) can be selected in the "Number of LDEVs".

Copyright © 2010, Hitachi, Ltd.

(9)-2 <Setting RAID concatenation>

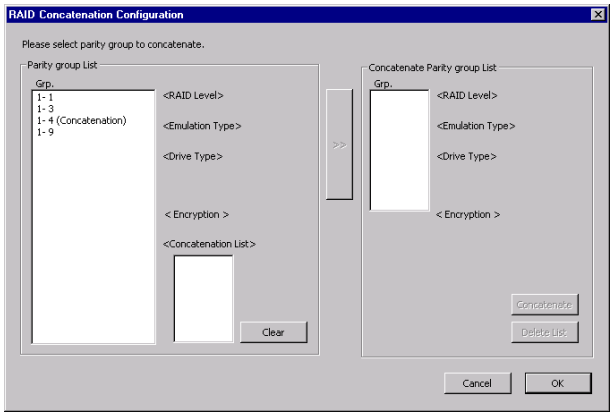
Parity groups to which the RAID concatenation can be applied are displayed in the Parity group List.
Select (CL) parity groups to which you want to apply the RAID concatenation and press (CL) the [>>] button. Go to Step (9)-2-1.



Note: Only the parity groups, which have been added and to which the RAID concatenation can be applied are displayed in the Parity group List.

(9)-2-1

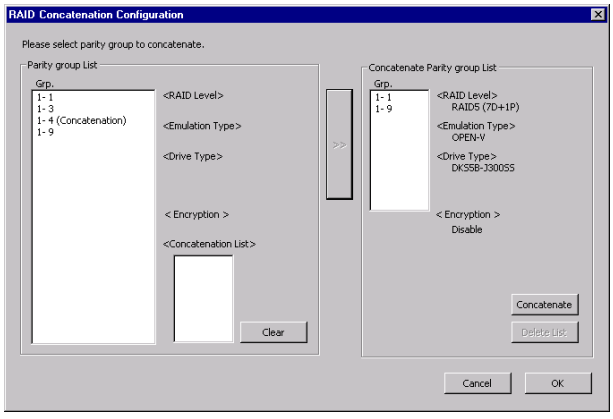
The selected parity groups are registered in the Concatenate Parity group List. Then press (CL) the [Concatenate] button. Go to Step (9)-2-2.



Note: The [Concatenate] button cannot be pressed if the concatenation does not meet a condition of the RAID concatenation. Adjust the number of the parity groups in the Concatenate Parity group List.

(9)-2-2

After Concatenate Parity group List is registered, select (CL) [Concatenate].
Go to Step (9)-2-3.

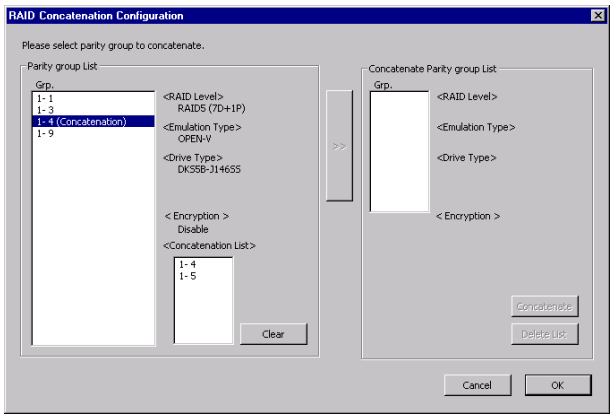


Note: If it does not meet RAID concatenation conditions, it is impossible to select [Concatenate].
Adjust the number in the Concatenate Parity group List.

Copyright © 2010, Hitachi, Ltd.

(9)-2-3

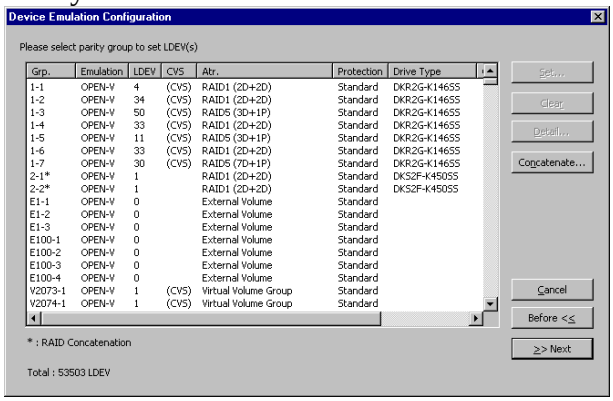
When the RAID concatenation is completed, “(Concatenation)” is displayed in the Parity group List.Selecting the “(Concatenation)” displays the concatenated parity groups in the Concatenation List.
Selecting (CL) [Clear] cancels the RAID concatenation.



When all the settings of the RAID concatenation are completed, select (CL) [OK].
Go back to Step (9).
Selecting (CL) [Cancel] returns the routine to Step (9).

(9)-3 <Defining of Customized Volume Size (CVS) and System Disk>

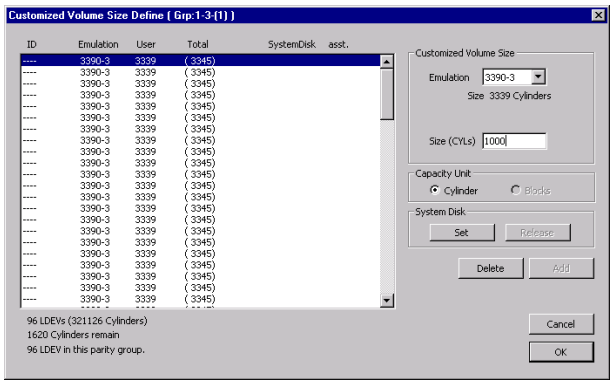
Select (CL) a parity group for which the LDEV emulation type and the number of LDEVs have been set on the ‘Device Emulation Configuration’ screen and select (CL) [Detail…].
When you do not perform the CVS, go back to Step (9).



Copyright © 2010, Hitachi, Ltd.

(9)-3-1 <Definition other than OPEN-V>

A volume other than OPEN-V can be defined in the 'Customized Volume Size Define' screen.



- Set of a CVS volume
  Perform ① Delete of the Volume and ② Add of the Volume.
- Set of the System Disk in a normal volume
  Perform ③ Set of the System Disk.
- Set of the System Disk in a CVS volume
  Perform ① Delete of the Volume, ② Add of the Volume, and then ③ Set of the System Disk.

① Delete of the Volume

A volume can be deleted by selecting (CL) the volume from the LDEV list box and selecting (CL) [Delete].

② Add of the Volume

A volume can be added by entering the LDEV emulation type and the user size (Mbyte/Blocks or Cylinder) of the customized volume (CV) and selecting [Add].
(It can be added in the optional space "empty" by selecting (CL) "empty" from the LDEV list box.)
The two or more CVs can be registered when the operation above is performed repeatedly.

③ Set of the System Disk

The System Disk can be set by selecting (CL) the volume from the LDEV list box and selecting (CL) [Set].
The System Disk registered by mistake can be released by selecting (CL) the System Disk from the LDEV list box and selecting (CL) [Release].

Adding or deleting or setting System Disk operation can be done for any number of times. The last setting is reflected by selecting (CL) [OK].

Note: The two or more volumes can be selected and deleted or set System Disk.

The routine returns to the preceding window by selecting (CL) [Cancel].
The routine returns to the preceding window and the change is reflected by selecting (CL) [OK].

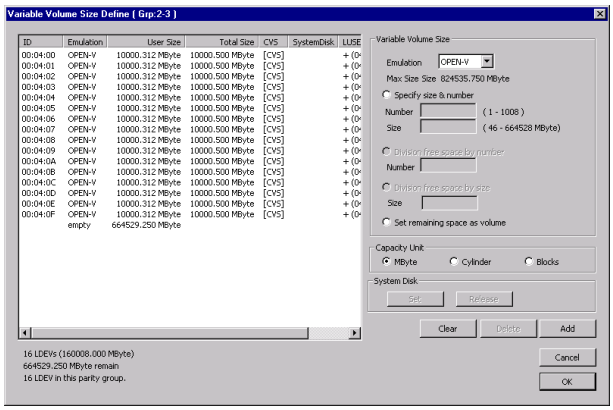
(9)-3-2 <Definition of OPEN-V>

Open-V can be defined in the 'Variable Volume Size Define' screen.



- Set of a CVS volume
  Perform ① Delete of the Volume and ② Add of the Volume.
- Set of the System Disk in a normal volume
  Perform ③ Set of the System Disk.
- Set of the System Disk in a CVS volume
  Perform ① Delete of the Volume, ② Add of the Volume, and then ③ Set of the System Disk.

① <u>Delete of the Volume</u>

The volume can be deleted by selecting (CL) [Delete] in the state (CL) of selecting (CL) the volume in the LDEV list box.
All the volumes in the LDEV list box can be deleted by selecting (CL) [Clear].

② <u>Add of the Volume</u>

It can be added by selecting (CL) Variable Volume Size from the status "select (CL) 'empty'" or "no selection" in the LDEV list box and selecting (CL) [Add].

③ <u>Set of the System Disk</u>

The System Disk can be set by selecting (CL) the volume from the LDEV list box and selecting (CL) [Set].
The System Disk registered by mistake can be released by selecting (CL) the System Disk from the LDEV list box and selecting (CL) [Release].

Adding or deleting or setting System Disk operation can be done for any number of times. The last setting is reflected by selecting (CL) [OK].

Note: The two or more volumes can be selected and deleted or set System Disk.

- Variable Volume Size

"Specify size & number"	: Defines the specified number of the specified user size.
"Division free space by number"	: Defines the volume divided by the specified number. However, this can be selected only when all the volumes have been deleted.
"Division free space by size"	: Defines the volumes whose user sizes are all specified. However, this can be selected only when all the volumes have been deleted.
"Set remaining space as volume"	: Defines the volume in the remaining space (empty).

Copyright © 2010, Hitachi, Ltd.

- Capacity Unit
  "MByte" : Makes data displayed or entered by [Mbyte].
  "Cylinder" : Makes data displayed or entered by the [Cylinder].
  "Blocks" : Makes data displayed or entered by the [Blocks].
- LUSE : When the LUSE is connected, "+" is displayed.
- asst. : When Path/LUSE/Pool-VOL is defined, "+" is displayed.

  Note: Even if the journal volume is defined, "+" is not displayed.

[Clear] : Deletes all the volumes.
[Delete] : Deletes all the selected volumes.
[Add] : Adds volumes.
[Set] : Sets System Disk.
[Release] : Release System Disk.
[Cancel] : Invalidates the setting, and returns to the preceding window.
[OK] : Confirms the setting, and returns to the preceding window.

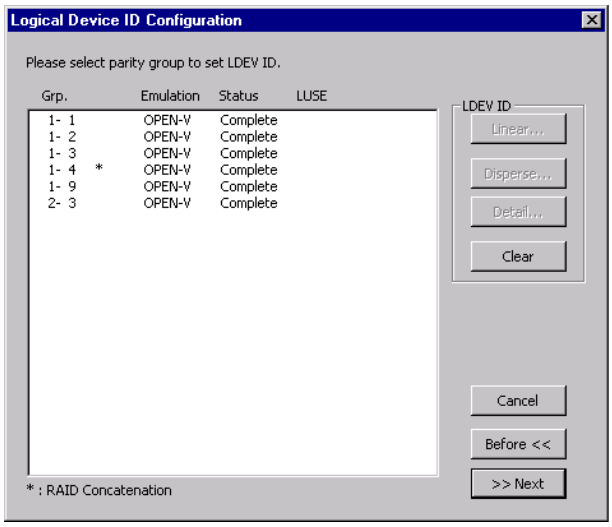
(10) <Define LDEV ID>

(10)-1 <Definition Screen for LDEV ID>



Select (CL) the parity group to be defined and select (CL) a function from the [LDEV ID] list box.

[Linear...]: LDEV ID is assigned to LDEV in the order of parity groups. See Step (10)-3.

[Disperse...]: LDEV is assigned discretely in the order of parity groups. See Step (10)-3.

[Detail...]: A screen to define LDEV in detail is displayed. See Step (10)-2. (When plural groups are selected (CL), it is invalid.)

[Clear]: Select (CL) [Clear] to delete.

Grp*: The top parity group where RAID Concatenation is installed.

Status: Status of LDEV ID.

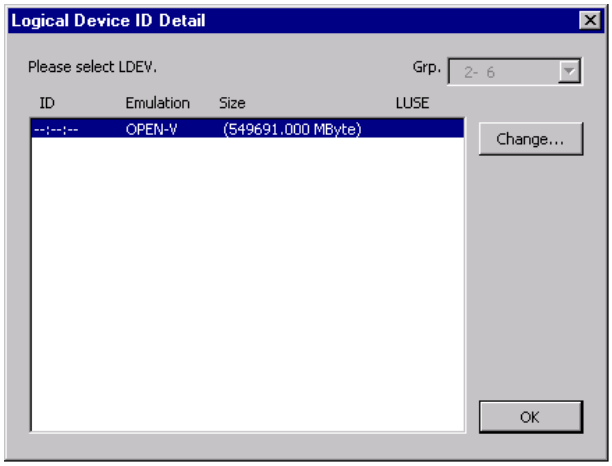
① "Complete" : LDEV ID is assigned.

② "-------" : LDEV ID is not assigned.

③ "Error" : Invalid LDEV ID is assigned.

After setting up all items, select [Detail...] to confirm the items that have been set up, and select (CL) [>>Next]. Go to Step (11).

(10)-2 <Detailed Definition Screen for LDEV ID>



LDEV ID is defined in detail for each LDEV in the parity group.

Select (CL) LDEV from the list box and select (CL) [Change...].

The screen for LDEV ID input is displayed.

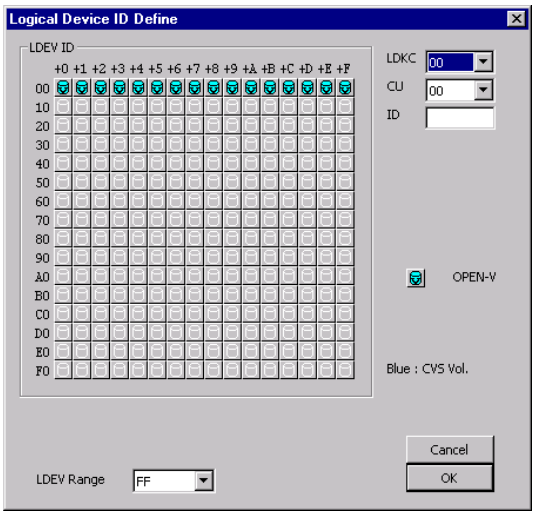
After setting, select (CL) [OK]. Return to Step (10)-1.

• '-----' is displayed in the CU area and the ID area for the LDEV to which LDEV ID is not assigned.

Note: In the case of a RAID Concatenation Group, LDEV of the parity group selected by the "Grp List" is displayed.

Copyright © 2010, Hitachi, Ltd.

(10)-3 <Input LDEV ID>

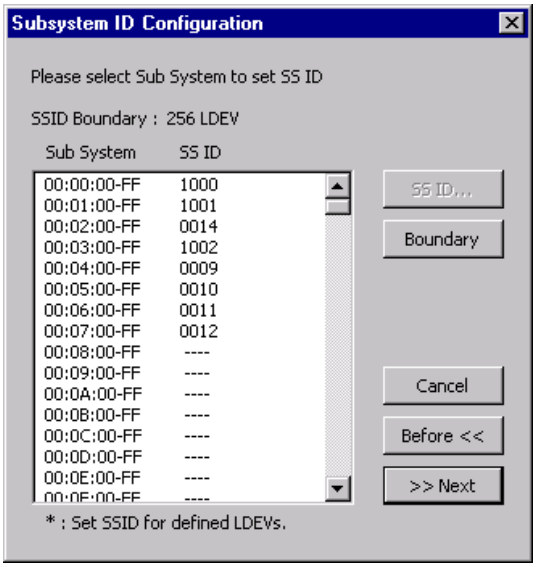


Select LDKC in the LDKC combo box.
Select CU in the CU combo box.
The status of usage of ID in the CU is displayed in the LDEV ID panel.
White disk of panel: not used
Patterned disk of panel: using
Input LDEV ID you want to set or the head LDEV ID in the ID Edit box.
After setting, select (CL) [OK].
Go back to Step (10)-1.

Note: The definition range (terminal) is decided with LDEV Range.
For example, if LEDV Range is defined as 7F, LDEV ID is assigned only within the range of 00 to 7F.

---

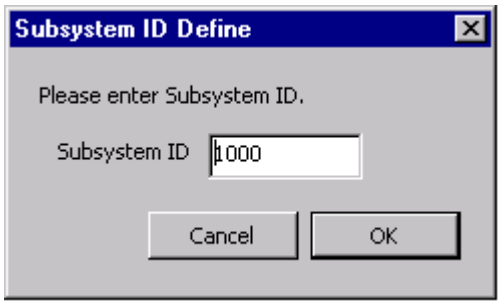
(11) <Define Subsystem ID>



To define Subsystem ID, select (CL) the item from the list box and select (CL) [SS ID...].
See Step (11)-1.

After setting, select (CL) [>>Next].
Go to Step (12).

(11)-1 Define Subsystem ID and select (CL) [OK].
Go back to Step (11).

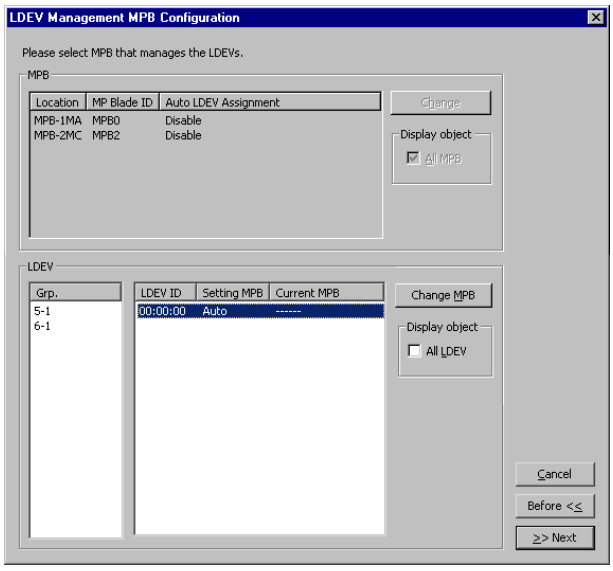


Copyright © 2010, Hitachi, Ltd.

(12) <Define LDEV Management MPB>

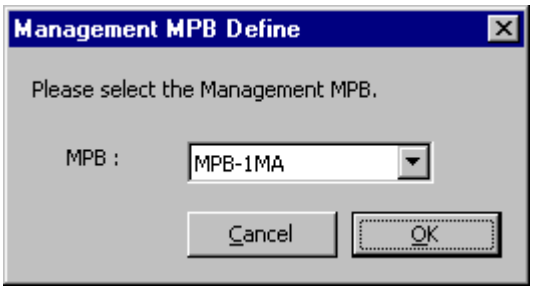
In the 'LDEV Management MPB Configuration' screen, select (CL) [Change MPB].
Go to Step (12)-1.

After the setting is completed, select (CL) [>>Next].
(Go to Step 13)



(12)-1 <Define Management MPB>

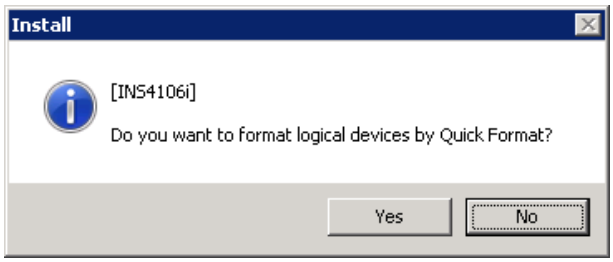
Define Management MPB and select (CL) [OK].
Go back to Step (12).



Copyright © 2010, 2014, Hitachi, Ltd.

(13) <Selection of format>

Select (CL) [Yes] in response to “Do you want to format logical devices by Quick Format?” when you execute Quick Format.
When [No] is selected (CL), usual LDEV Format is executed.



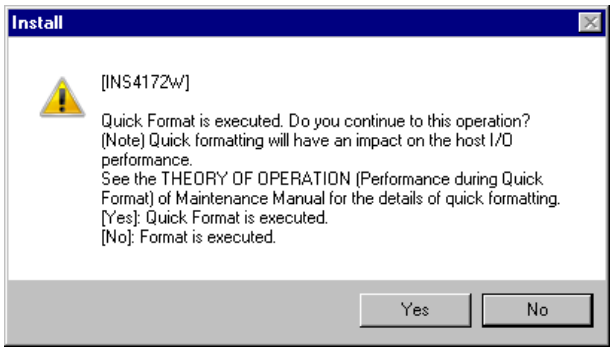
Note: Next, Quick Format cannot be executed in the shown volume.

- external volume
- Volumes whose access attribute is not Read/Write
- Pool volumes (pool-VOLs)
- Journal volumes

When [Yes] is selected Go to Step (13)-1.
When [No] is selected Go to Step (14).

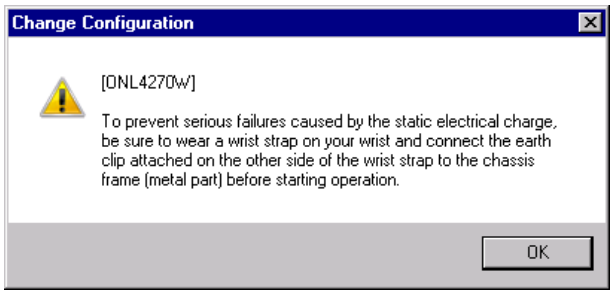
(13)-1 <Execution of Quick Format>

For the message “Quick Format is executed. Do you continue to this operation?
(Note) Quick formatting will have an impact on the host I/O performance.
See the THEORY OF OPERATION (Performance during Quick Format) of Maintenance Manual for the details of quick formatting.
[Yes]: Quick Format is executed.
[No]: Format is executed.”, select (CL) [Yes] when Quick Format is to be executed. Select (CL) [No] when normal LDEV format is to be executed.



(14) <Wear a wrist strap>

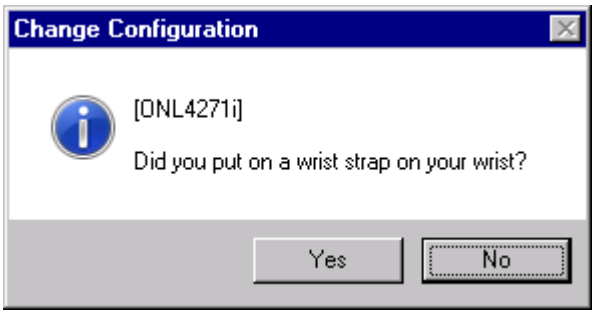
Select (CL) [OK] in response to “To prevent serious failures caused by the static electrical charge, be sure to wear a wrist strap on your wrist and connect the earth clip attached on the other side of the wrist strap to the chassis frame (metal part) before starting operation.”.



Copyright © 2010, 2014, Hitachi, Ltd.

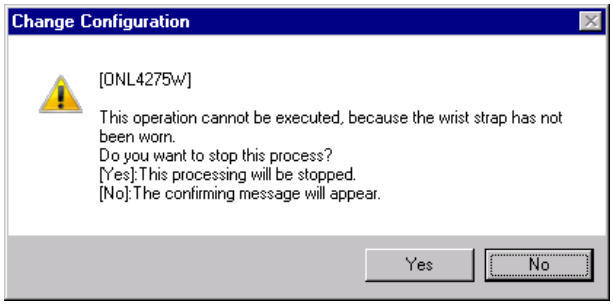
(14)-1 <Confirm wearing wrist strap>

In response to a message, “Did you put on a wrist strap on your wrist?”.
Select [Yes] when wrist strap is on your wrist.
Select [No] when there is no wrist strap on your wrist.
When [No] is selected (CL), go to Step (14)-2.



(14)-2

In response to a message, “This operation cannot be excuted, because the wrist strap has not been worn. Do you want to stop this process?
[Yes]: This processing will be stopped.
[No]: This confirming message will appear.”
When [Yes] is selected (CL), the routine is returned to Step (2) on page INST03-12A-10.
When [No] is selected (CL), returned to Step (14).

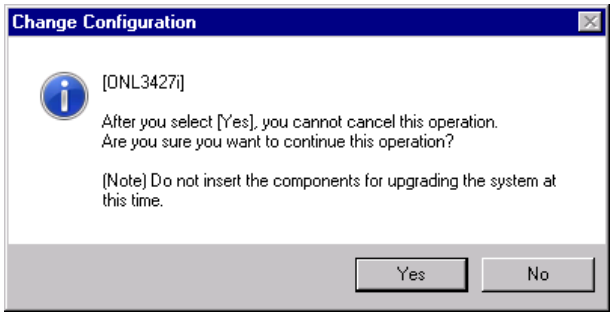


---

(15) <Start installation>

Select (CL) [Yes] in response to “After you select [Yes], you cannot cancel this operation. Are you sure you want to continue this operation? (Note) Do not insert the components for upgrading the system at this time.”.

When [No] is selected (CL), returns to INST03-12A-10 step (3).



---

(16) <Download microprogram>

Microprograms are automatically downloaded for each processor.

---

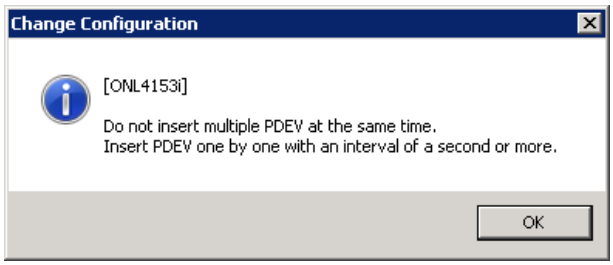
(17) <Install DKA>

“Upgrading of the DKA...”

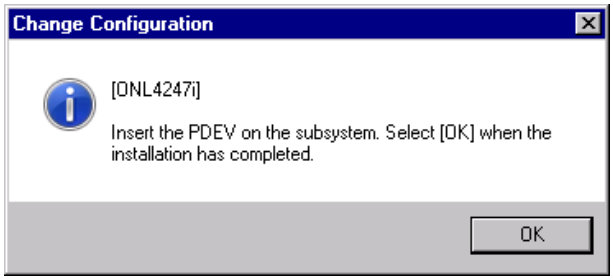
Copyright © 2010, Hitachi, Ltd.

2. SVP pre procedure

(1) <Notes when insert of PDEV>
"Do not insert multiple PDEV at the same time. Insert PDEV one by one with an interval of a second or more." is displayed.
Select (CL) [OK].



(2) <Check that hardware components are installed>
At this point refrain from pressing the [OK] button.
"Insert the PDEV on the subsystem. Select [OK] when the installation has completed." is displayed.



Copyright © 2010, Hitachi, Ltd.

3. Installation Procedure of drive

3-1 Confirmation of position to install drive

(i) RAID5 (3D+1P) / RAID1 (2D+2D), DKU for 3.5 inch Drive

Relations between the installation locations of the RAID groups and the RAID group numbers set through the SVP are shown in Table 3.12.2-1.

3-2 Installation of the Drive

3-2-1 In case of 3.5 inch /2.5 inch drive

> Notice: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

To increase drives in DKU, opening the FAN door of DKU is necessary.
Though there are four FAN doors per DKU, only one door can be opened at once.
Therefore, the FAN door can be opened from ① to ④ order by repeating the procedure from a to e.

a. Loosen the two screws and open the FAN door.

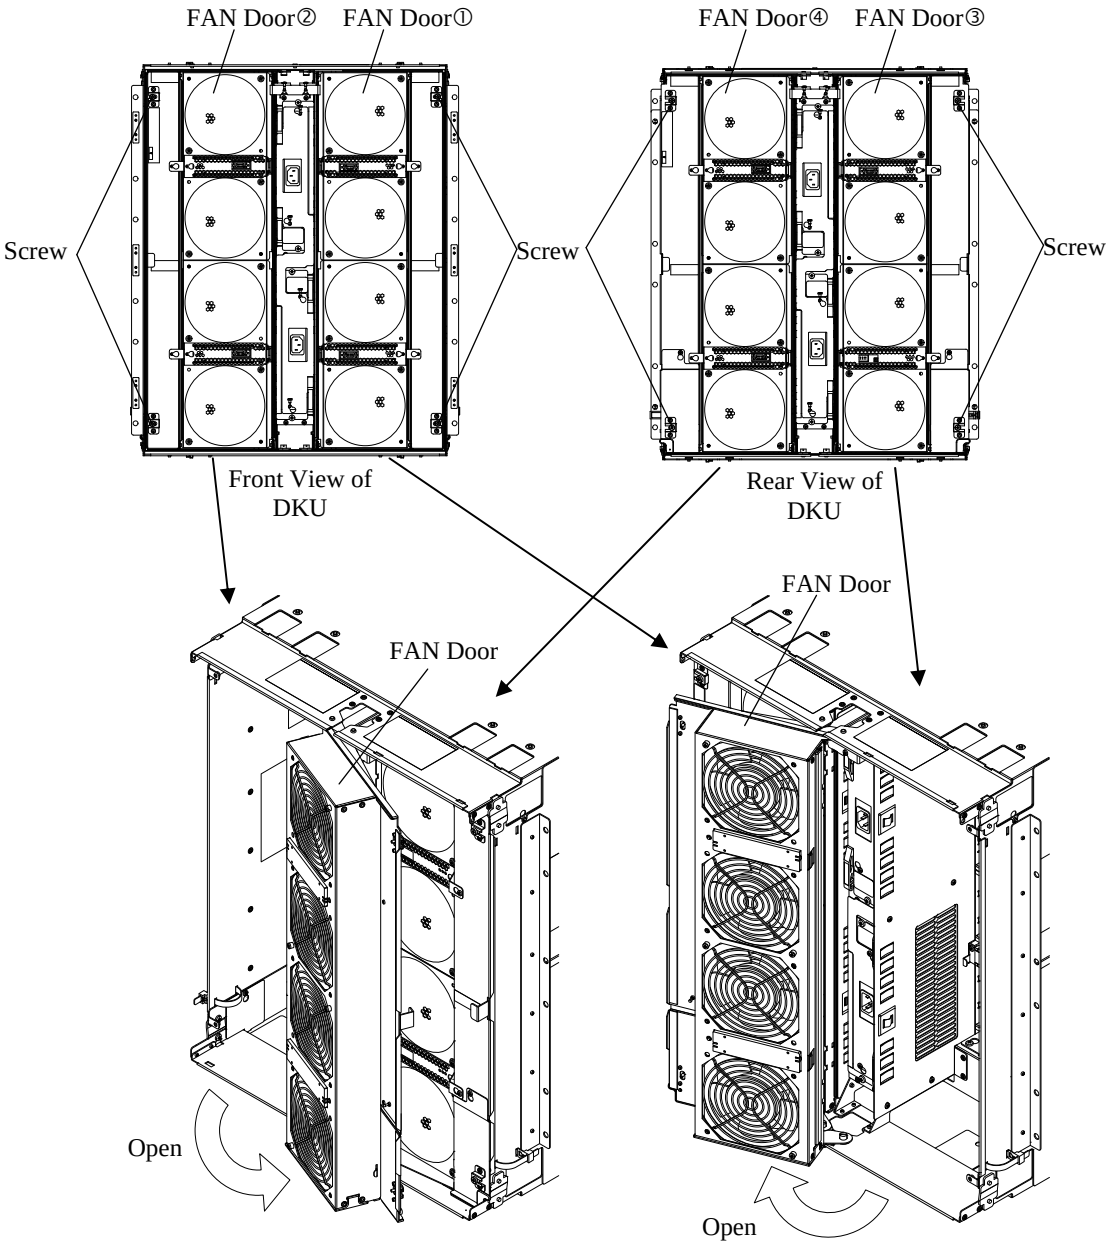

Fig. 3.12.2-7 Opening of FAN Door

Copyright © 2010, Hitachi, Ltd.

b. Remove the dummy canister from the HDU.

Notice: Since the HDD is a precision component, handle it very carefully not to apply a vibration or shock to it.

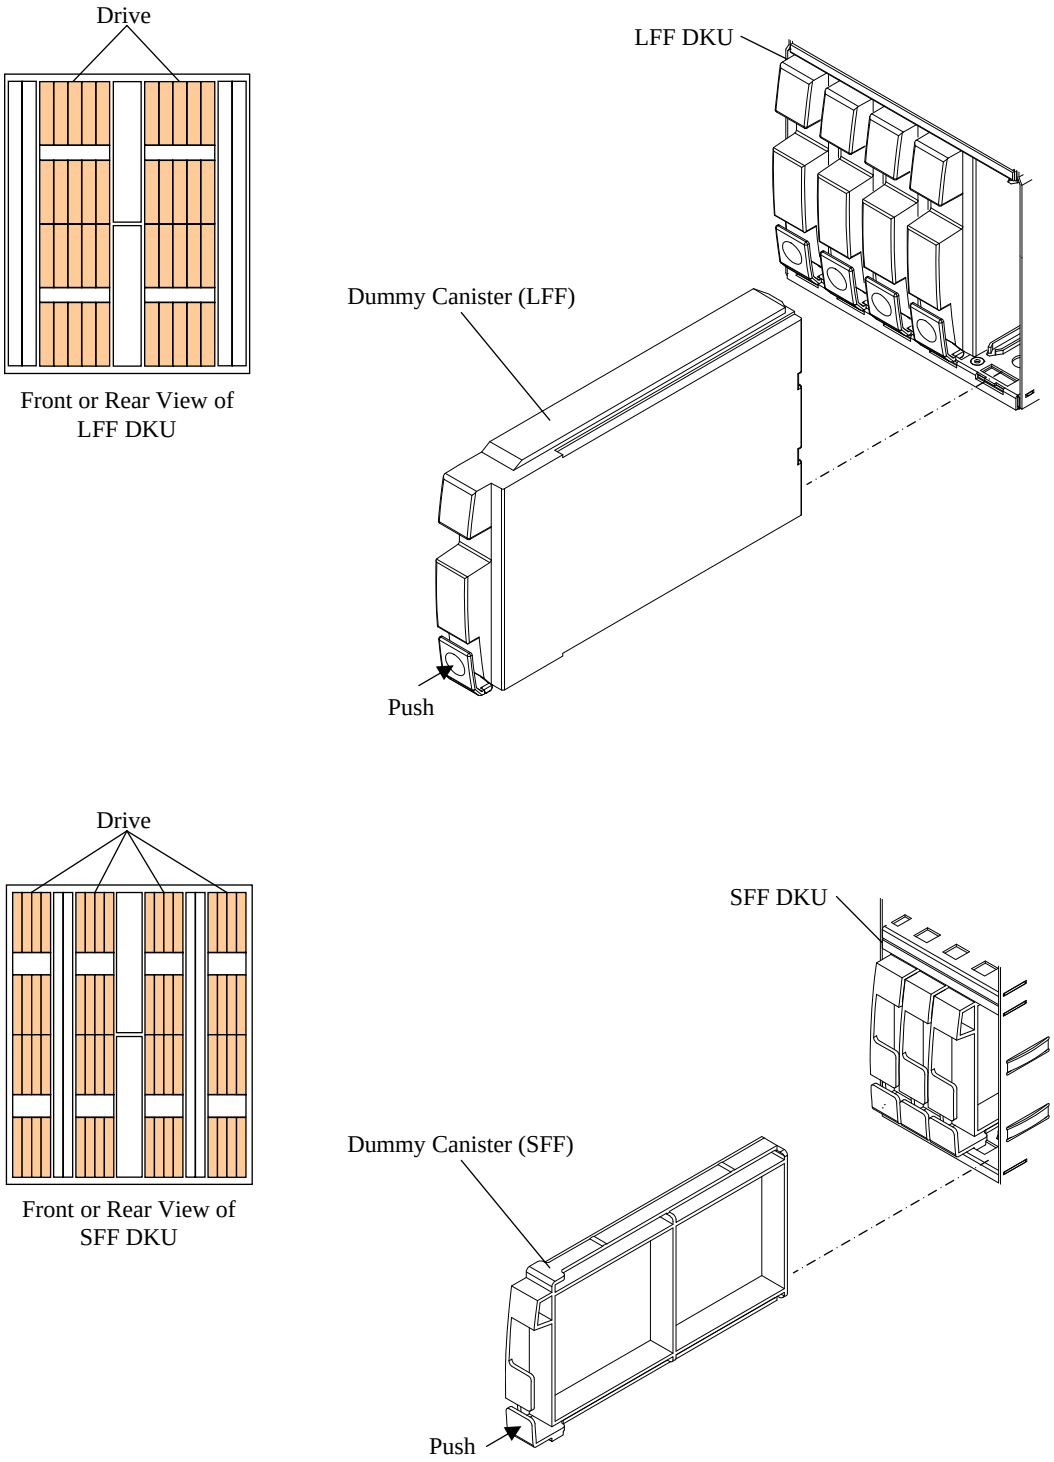

Fig. 3.12.2-8 Removal of Dummy Canister

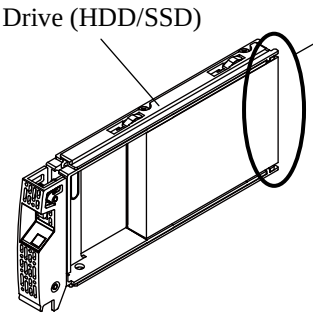
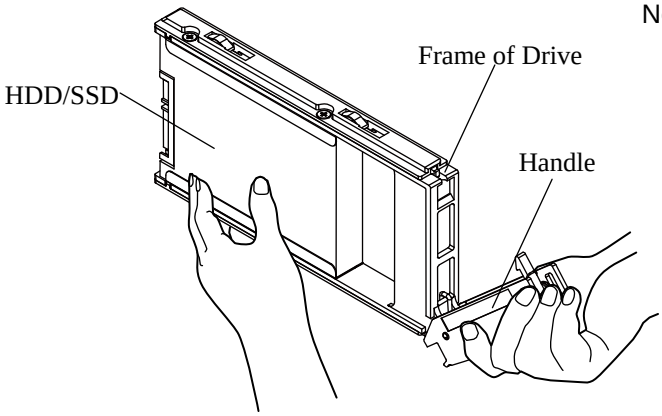
Copyright © 2010, Hitachi, Ltd.

c. Check the condition of the drive before installing it.



Note: Check that the main edge connector of the drive (HDD/SSD) has no deformation, damage or sticking of dust before installing the drive.

Handling of Drive

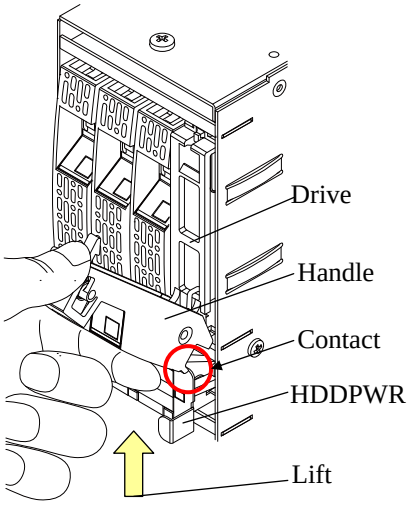


Note on the installation: Do not insert the drive by pushing its frame.

Copyright © 2010, Hitachi, Ltd.

d. Drive install procedure

Caution:
When two or more HDDs are inserted at the same time (*1), the already operating HDD might have blockade.
Insert HDD one by one at a second (*2) interval.
Don't insert HDD that doesn't define in the configuration.
*1: Able to insert HDDs to both front and rear at the same time.
*2: Interval of time necessary for stabilizing the voltage of back board after an HDD's insertion.



Instruction for the insertion and removal of the 2.5-inch drive:
The upper part of HDDPWR might come in contact with the lower part of the drive, and it becomes an obstruction of the insertion and removal at the time of the 2.5-inch drive insertion and removal. In this case, avoid the HDDPWR by lifting the drive lightly.

Copyright © 2010, Hitachi, Ltd.

d-1 Insert the drive into the HDU holding its handle. (Insert the drive until the claws that are located at the bottom of the handle come in contact with the front side of the HDU.)
d-2 Turn the handle at a stroke by pushing its top with your thumb. (Turn the handle until it latches with the stopper. Do not stop the handle on its way of turning.)

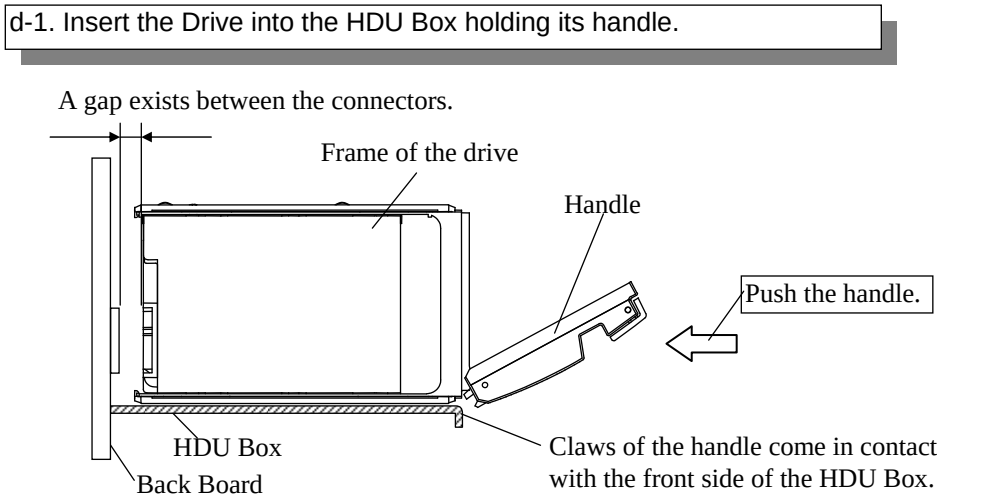


Fig. 3.12.2-9 Method of Installing Drive

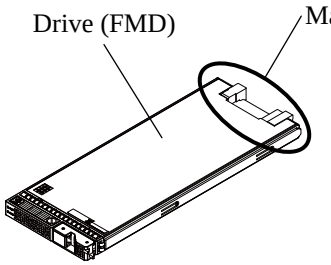
e. Close the FAN door, and tighten the two screws. (Refer to Fig. 3.12.2-7.)

Copyright © 2012, Hitachi, Ltd.

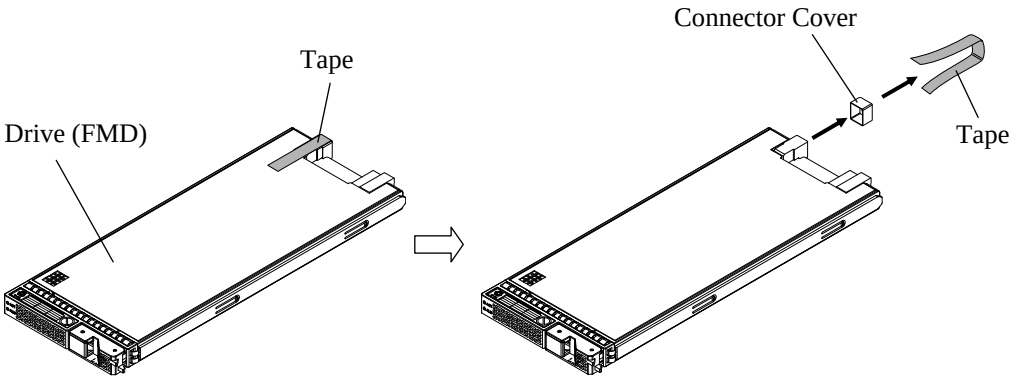
3-2-2 In case of FMD

a. Check the condition of the drive before installing it.



Note: Check that the main edge connector of the drive (FMD) has no deformation, damage or sticking of dust before installing the drive.

Note: Be sure to detach the tape and remove the connector cover when installing the FMD. Installing the FMD with the connector cover attached may cause equipment damage or failure.



Copyright © 2012, Hitachi, Ltd.

b. Remove the Dummy FMD from the installing position of a drive.
Release the hook while pressing the lock to the left to pull the Dummy FMD toward you.

c. Open the handle fully and fit the drive in the guide rail and slide it in the direction shown by the arrow not to give a shock.

Note: When handling the drive, hold the rail side because the shield spring is subject to breakage.

d. Push the drive in until it reaches the position where a hook of the handle can be entered into the square hole on a frame.

e. Pull the stopper lightly and close the handle, and then press the stopper to have the lock on.
If the handle is closed in the state where the hook of the handle cannot enter into the square hole, the drive cannot be installed correctly because it runs into the frame of the FBX DKU.

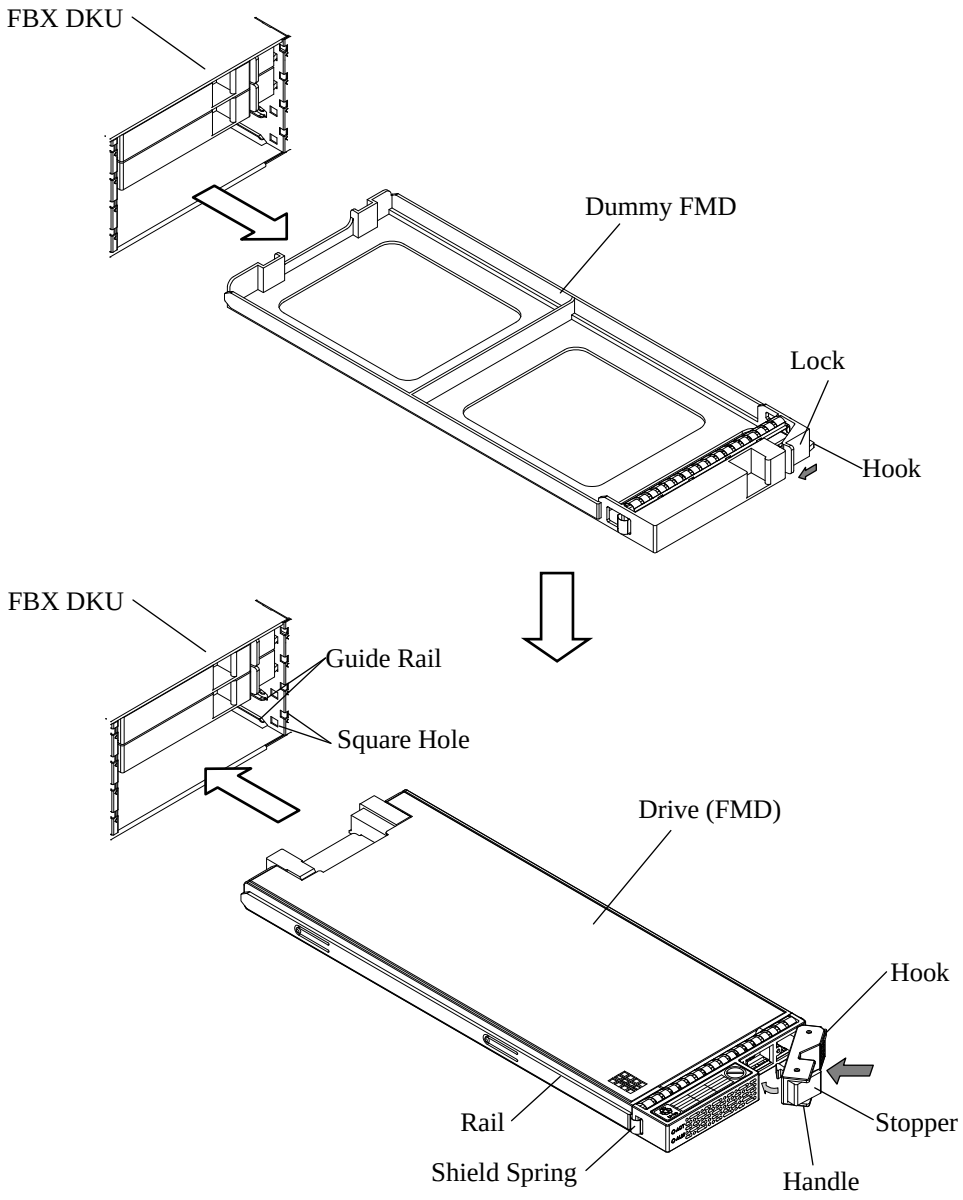


Fig. 3.12.2-10 Installation of Drive (In case of FMD)

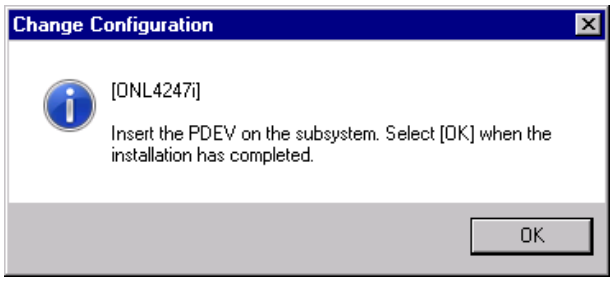
4. SVP post procedure

(1) <Check that hardware components are installed>
Select (CL) [OK] after making sure that all hardware components are installed correctly in response to “Insert the PDEV on the subsystem. Select [OK] when the installation has completed.”.



Note: On page INST03-12A-130 (13), it advances to (3)-1 when a Quick Format is selected (CL).

---

(2) <DKU PATH INLINE>
When DKA is installed, “DKU PATH INLINE is now running...” is displayed.

---

(3) <LDEV FORMAT>
“Formatting logical devices...” is displayed when Parity Group is defined.
It goes to (4) when HDDFAN doors of the object are not closed.
It goes to (5) when HDDFAN doors of the object are closed.

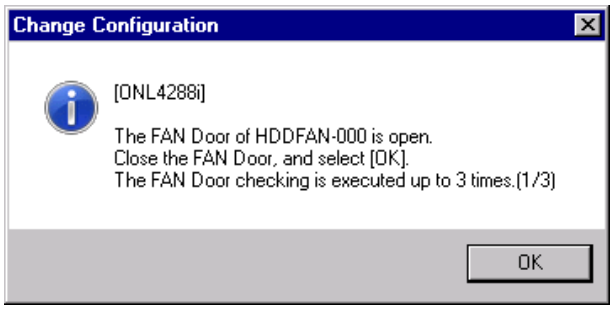
Note: If the SATA drive is included in the format target, SIM = 0x4100XX is output at the end.

---

(3)-1 <QUICK FORMAT>
“Preparing Quick Format logical devices...” is displayed when Parity Group is defined.
It goes to (4) when HDDFAN doors of the object are not closed.
It goes to (5) when HDDFAN doors of the object are closed.

Copyright © 2010, 2014, Hitachi, Ltd.

(4) <Warning of HDDFAN door open>



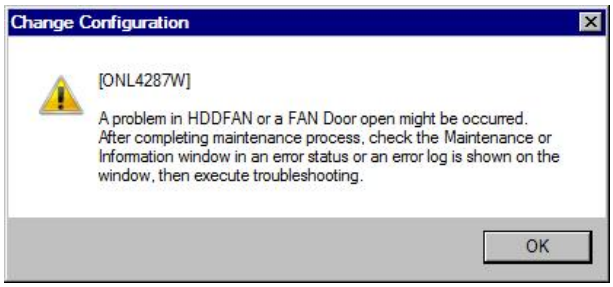
"The FAN Door of HDDFAN-xxx is open. Close the FAN Door, and select [OK]. The FAN Door checking is executed up to 3 times. (n/3)" is displayed.
After the FAN door is closed, select (CL) [OK] in response to this message.

It returns to (4) when HDDFAN doors of the object are not closed.
It goes to (5) when HDDFAN doors of the object are closed.

Note: It goes to (4)-1 when it cannot be confirmed that the FAN doors are closed in the three times FAN door check.

---

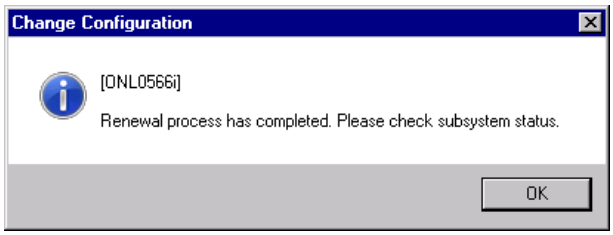
(4)-1



"A problem in HDDFAN or a FAN Door open might be occurred. After completing the maintenance process, check the Maintenance or Information window in an error status or an error log is shown on the window, then execute troubleshooting." is displayed.
Select (CL) [OK] in response to this message.

---

(5) <End of system update processing>



"Renewal process has completed. Please check subsystem status." is displayed when recovery processing on all installed components is completed. Select (CL) [OK] in response to this message.

---

(5)-1 <QUICK FORMAT>

Refer to the logical device window in the "Maintenance" window to check that the Quick Format is in progress. (SVP03-280 through 370)

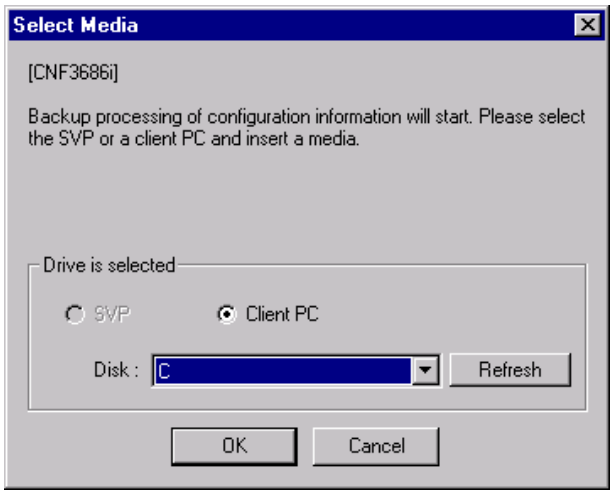
Note: It is necessary to check only if you select the Quick Format in INST03-12A-130 Step (13)-1.

Copyright © 2011, 2012, Hitachi, Ltd.

(6)

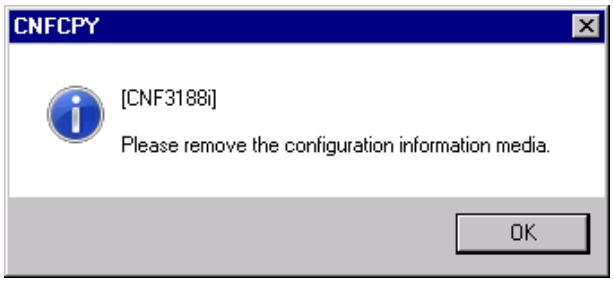
Execute an operation for backing up the configuration information.
Prepare the removable media for backup and insert the media.
Please select (CL) the [Refresh] button, and update drive information.
Select (CL) the drive and the PC in which the media was inserted. Select (CL) the [OK] button.

Note: For the procedure of backing up the configuration information to a CD-R, see page MICRO07-140.



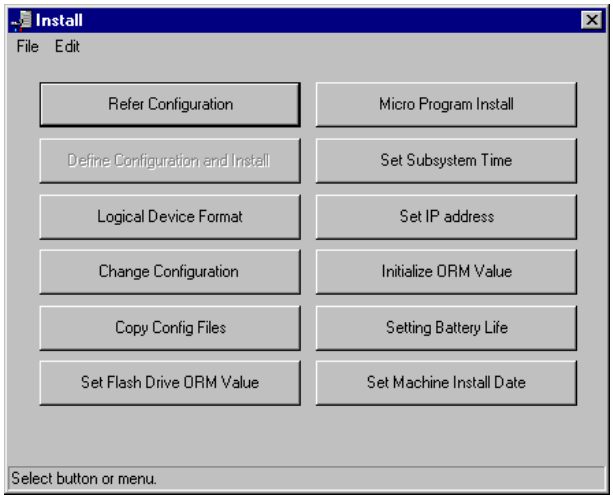
(7)

When this procedure is completed, the message “Please remove the configuration information media.” is displayed.
Remove the configuration information media, Select (CL) [OK].



(8)

After the procedure is completed, return to ‘Install’.
Select (CL) [File]-[Exit].



(9) <Mode Change>
Change the mode to View Mode.

Return to the work table (INST02-50) and perform rest of the works.

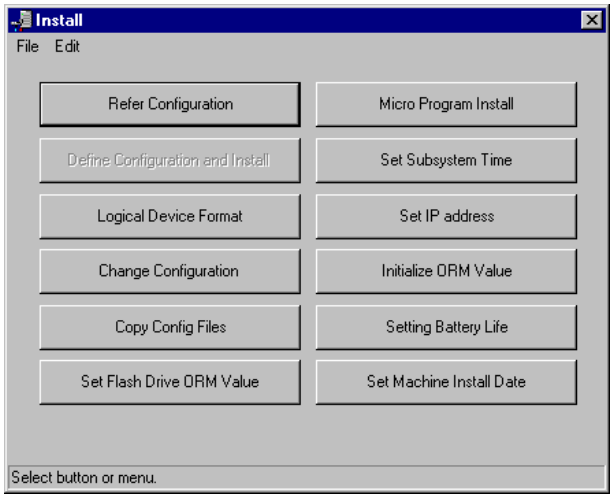
Copyright © 2010, 2014, Hitachi, Ltd.

3.12.3 When performing addition of the DKA, ESW and Inter-Controller Connecting Kit (DKC-F710I-DKA/ESW/MDEXC)

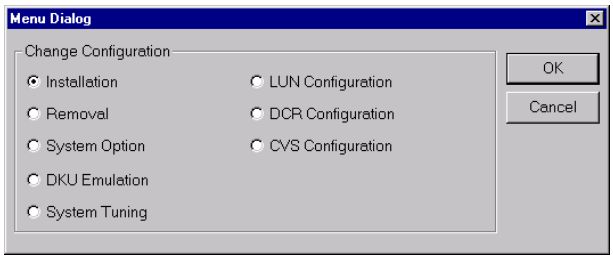
1. Setting up the New Device Structure Information

(1) <Mode Change>
Change the mode to Modify Mode.
Select (CL) [Install].

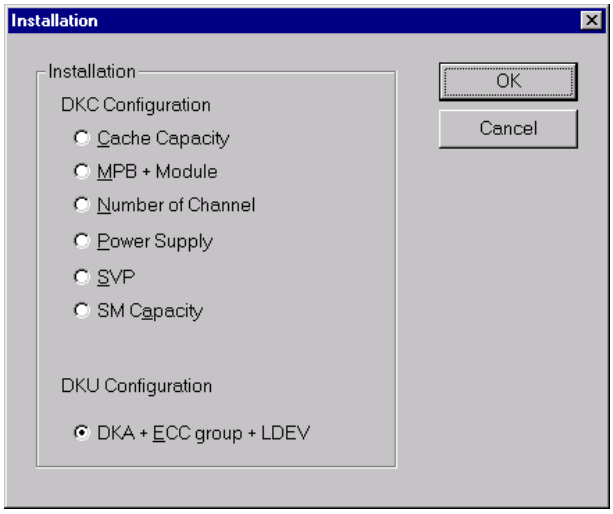
(2) <Start the 'Menu Dialog' screen>
Select (CL) [Change Configuration].



(3) <Start Device Structure Setup screen>
Select (CL) [Installation] in the "Menu Dialog" dialog box and select (CL) [OK].



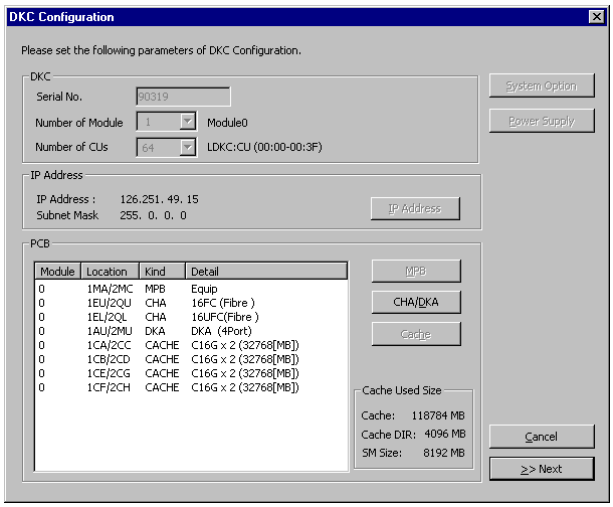
(4) <Select a changed part>
Select (CL) [DKA + ECC group + LDEV], and select (CL) [OK].



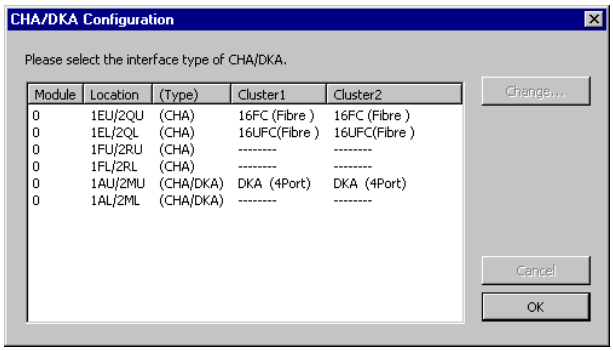
Copyright © 2010, Hitachi, Ltd.

(5) <Update Configuration Information>
Select (CL) [CHA/DKA] in the 'DKC Configuration' screen.
Go to Step (6).

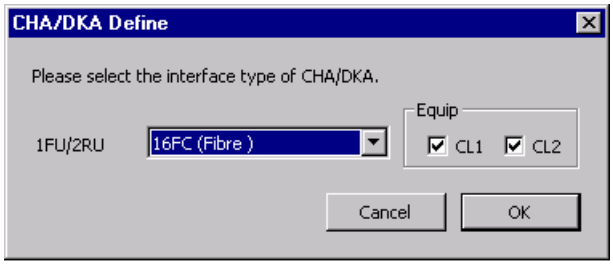
After confirming input items, select (CL) the [>>Next] button.
Go to Step (7).
In the case of selecting (CL) [Cancel], this operation procedure terminates



(6) <Setting DKA>
Define the DKA in the 'CHA/DKA Configuration' screen. Select (CL) the location to be added, and then select (CL) the [Change...].
Go to Step (6)-1.
After confirming input items, select (CL) the [OK] button.
Go back to Step (5).

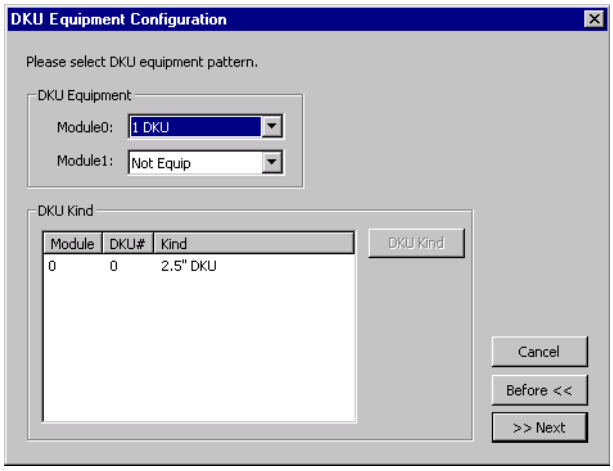


(6)-1 <Select DKA>
Define the DKA in the 'CHA/DKA Define' screen. After setting, select (CL) [OK].
Go back to Step (6).



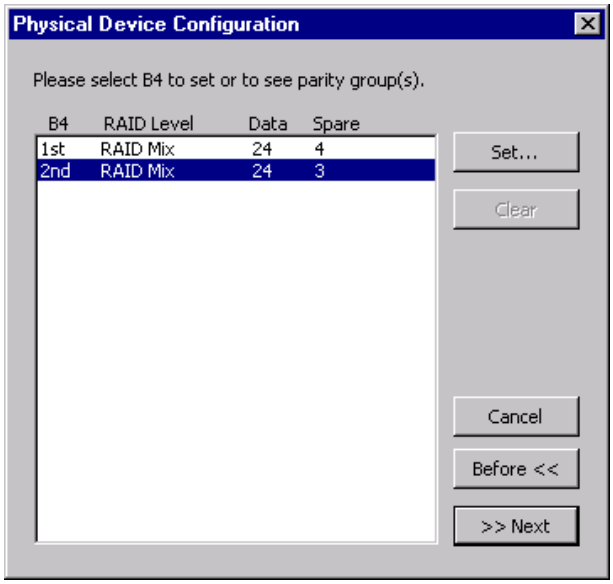
Copyright © 2010, Hitachi, Ltd.

(7) <DKU Equipment Configuration screen>
Select (CL) [>>Next] in the 'DKU Equipment configuration' screen.
Go to Step (8).



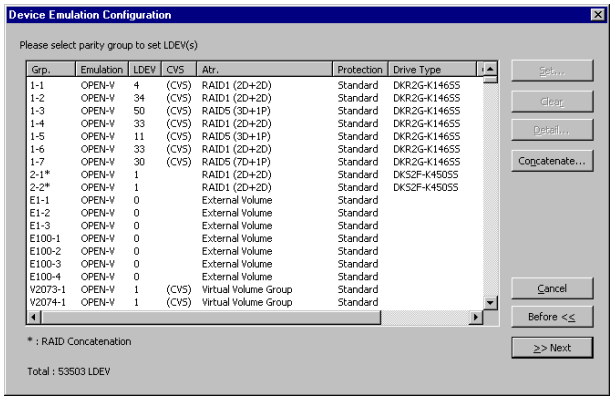
(8) <Change Drive Configuration Information>
Select (CL) [>>Next] in the 'Physical Device Configuration' screen. Go to Step (9).

Selecting (CL) [Before<<] returns to Step (7).



(9) <Define Device Emulation>
Select (CL) [>>Next] in the 'Device Emulation Configuration' screen. Go to Step (10).

Selecting (CL) [Before<<] returns you to the previous screen.

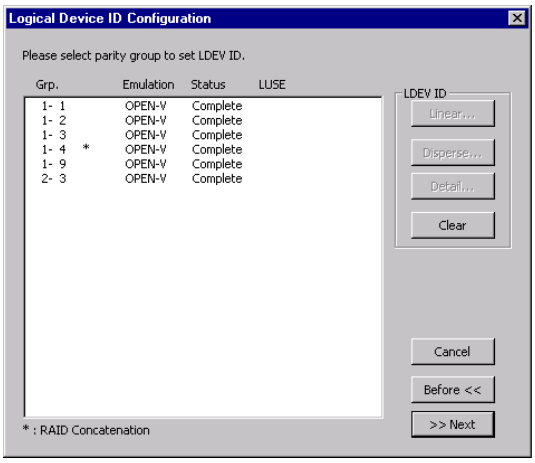


Copyright © 2010, Hitachi, Ltd.

(10) <Define LDEV ID>

Select (CL) [>>Next] in the 'Logical Device ID Configuration' screen.

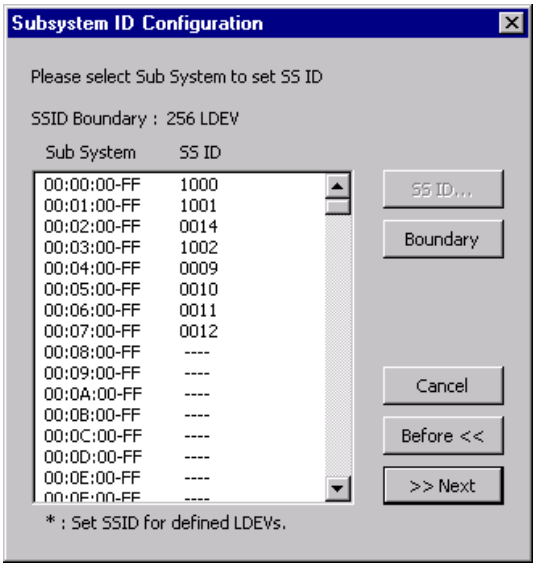
Go to Step (11).



(11) <Define Subsystem ID>

Select (CL) [>>Next] in the 'Subsystem ID Configuration' screen.

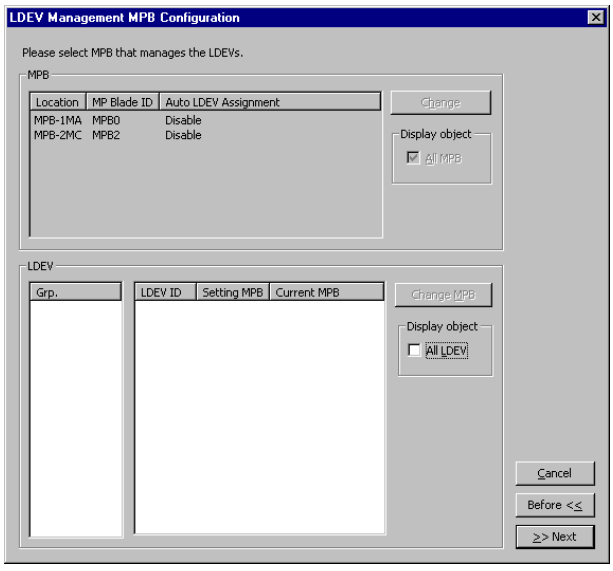
Go to Step (12).



(12) <Define Management MPB>

Select (CL) [>>Next] in the 'LDEV Management MPB Configuration' screen.

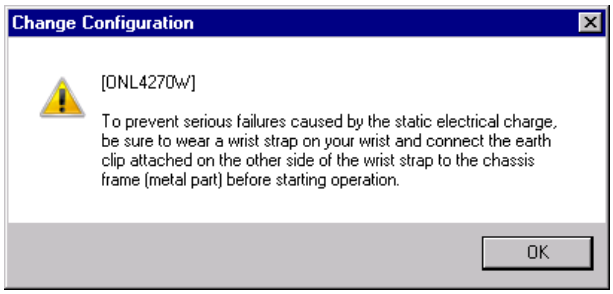
Go to Step (13).



Copyright © 2010, Hitachi, Ltd.

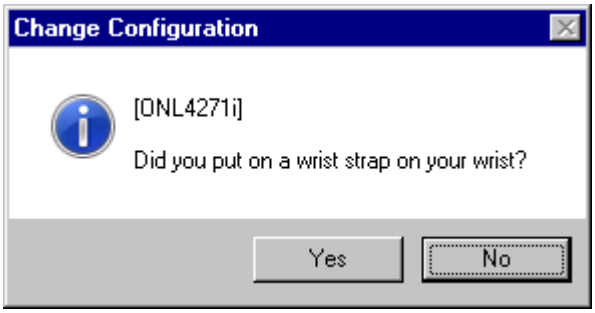
(13) <Wear a wrist strap>

Select (CL) [OK] in response to “To prevent serious failures caused by the static electrical charge, be sure to wear a wrist strap on your wrist and connect the earth clip attached on the other side of the wrist strap to the chassis frame (metal part) before starting operation.”.



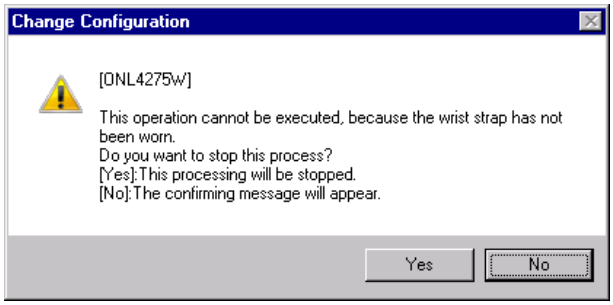
(13)-1 <Confirm wearing wrist strap>

In response to a message, “Did you put on a wrist strap on your wrist?”.
Select [Yes] when wrist strap is on your wrist.
Select [No] when there is no wrist strap on your wrist.
When [No] is selected (CL), go to Step (13)-2.



(13)-2

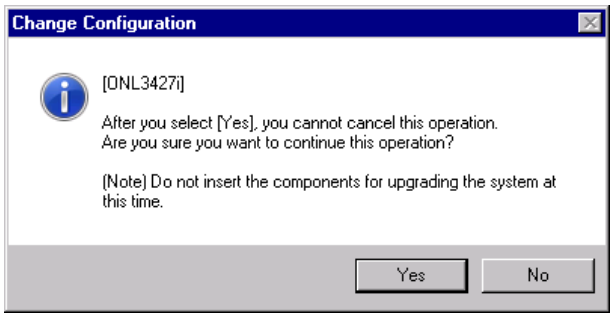
In response to a message, “This operation cannot be excuted, because the wrist strap has not been worn. Do you want to stop this process?
[Yes]: This processing will be stopped.
[No]: This confirming message will appear.”
When [Yes] is selected (CL), the routine is returned to Step (2) on page INST03-12B-10.
When [No] is selected (CL), returned to Step (13).



Copyright © 2010, 2014, Hitachi, Ltd.

(14) <Start installation>

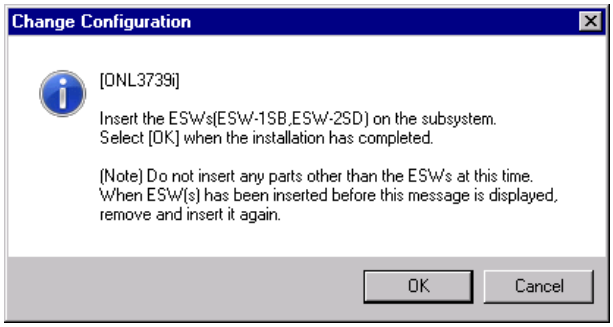
Select (CL) [Yes] in response to “After you select [Yes], you cannot cancel this operation. Are you sure you want to continue this operation? (Note) Do not insert the components for upgrading the system at this time.”.



When [No] is selected (CL), returns to INST03-12B-10 step (2).

(15) <Perform ESW hardware installation>

“Insert the ESWs(ESW-nnn,ESW-nnn) on the subsystem. Select [OK] when the installation has completed. (Note) Do not insert any parts other than the ESWs at this time. When ESW(s) has been inserted before this message is displayed, remove and insert it again.” is displayed, when ESW install is required.



- When a message is displayed, perform the install hardware components according to the ESW hardware installation procedure. When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) needs to be installed, install it together with the ESW.
- When a message is not displayed, go to step “4. SVP pre procedure (Disk Adapter Addition)”.

Note: Do not press the [OK] button by mistake before installing the part(s) to be added in the subsystem.

Copyright © 2010, Hitachi, Ltd.

2. Installation Procedure of PCI Express Switch Adapter

Installation Condition

The PCI Express Switch Adapter (DKC-F710I-ESW) is an indispensable option that is to be installed when the subsystem configuration is one of the following.

In case of DKC-0

① Addition of the first set (1SA/2SC)
- Indispensable option

② Addition of the second set (1SB/2SD)
- When the high performance model is selected
- When the CHA is installed in the Option 2 (1FU/2RU) or the Option 3 (1FL/2RL) of the CHA slots
- When the DKA or the CHA is installed in the Option 1 (1AL/2ML) of the DKA slots

In case of DKC-1

① Addition of the first set (1SE/2SG)
- Indispensable option

② Addition of the second set (1SF/2SH)
- When the high performance model is selected
- When the CHA is installed in the Option 2 (1HU/2UU) or the Option 3 (1HL/2UL) of the CHA slots
- When the DKA or the CHA is installed in the Option 1 (1LL/2XL) of the DKA slots

Twin DKC Model

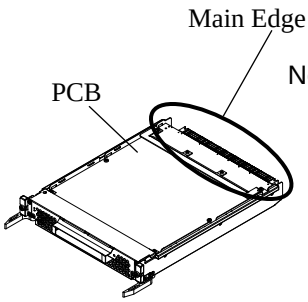
For the twin DKC model, the ESWs that are installed in the DKC-0 and the DKC-1 should be the same in number.
- When ESWs are installed in the ESW slot option 1 (1SB/2SD) of the DKC-0, ESWs should be installed in the ESW slot option 1 (1SF/2SH) of the DKC-1 even if it fails to meet the installation requirements.
- When ESWs are installed in the ESW slot option 1 (1SF/2SH) of the DKC-1, ESWs should be installed in the ESW slot option 1 (1SB/2SD) of the DKC-0 even if it fails to meet the installation requirements.

Copyright © 2010, Hitachi, Ltd.

2-1 Insertion of ESW PCB

a. Loosen the screws and remove the dummy plates. (This procedure is not required if the PCB should be installed in the Basic slots.)

b. Insert the ESW PCBs to the DKC and fasten the screws.



Note: 1. Check that the main edge connector of the PCB has no deformation, damage or sticking of dust before installing the PCB. (See INST03-01-70.)

2. When installing the PCB, hold the right and left of the PCB with both hands, and insert it straight not to contact the neighboring PCB.

Table 3.12.3-1 Location of the ESW PCB

DKC	Addition No.	Slot No.		Location No.		Remarks
		Cluster 1	Cluster 2	Cluster 1	Cluster 2	
DKC-0	Basic	1SA	2SC	ESW-1SA	ESW-2SC	
	Option 1	1SB	2SD	ESW-1SB	ESW-2SD	
DKC-1	Basic	1SE	2SG	ESW-1SE	ESW-2SG	
	Option 1	1SF	2SH	ESW-1SF	ESW-2SH	

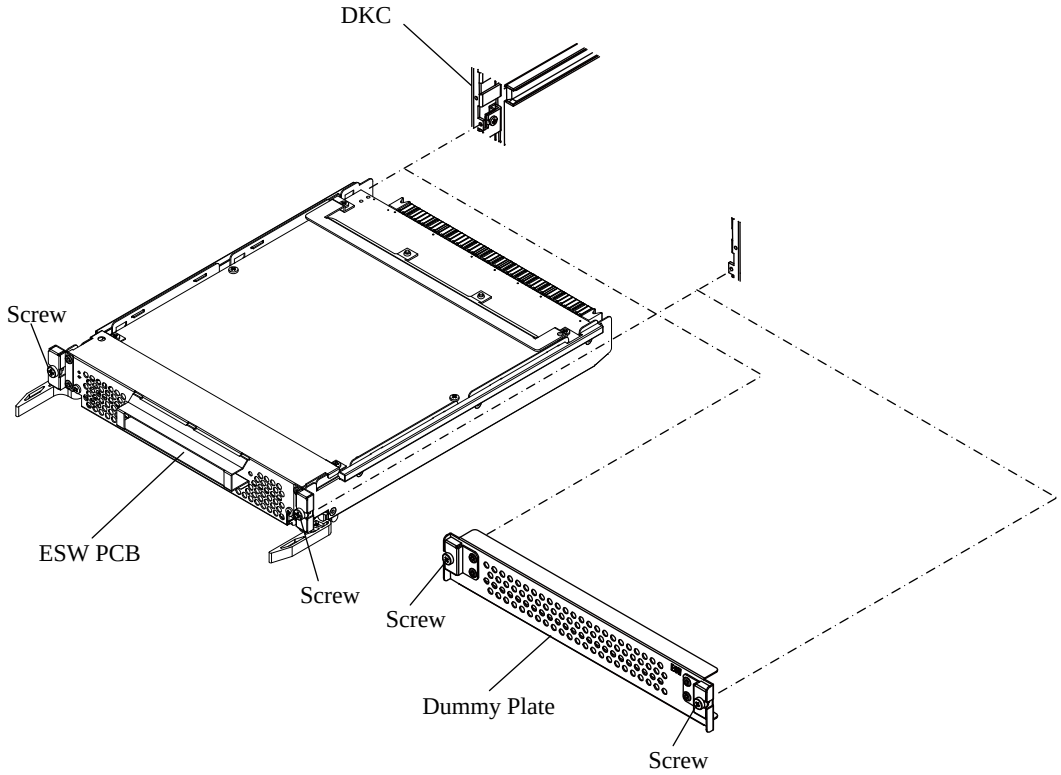


Fig. 3.12.3-1 Insertion of ESW PCB

Copyright © 2010, Hitachi, Ltd.

2-2 Storage of Dummy Plates (This procedure is not required if the PCB should be installed in the Basic slots.)

a. Remove the pocket ASSY from the front of the frame.
b. Install the two removed dummy plates in the pocket ASSY, and tighten them with the four screws.
c. Install the pocket ASSY in the front of the frame.

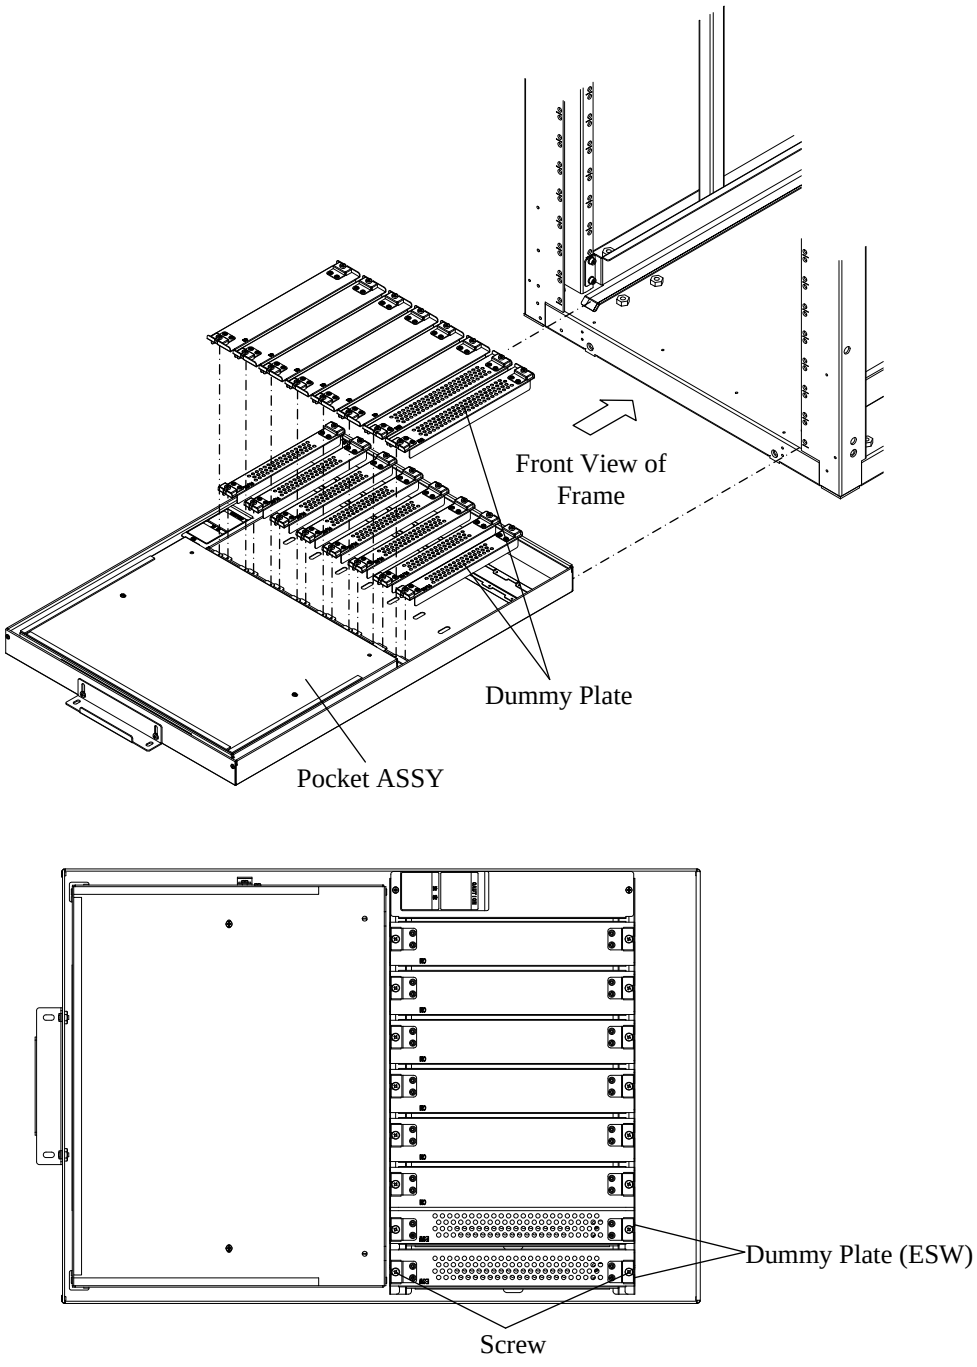

Fig. 3.12.3-2 Storage of Dummy Plates

Copyright © 2010, Hitachi, Ltd.

2-3 Attachment of the nameplate

a. Remove the screw from the rack frame and remove the nameplate tags to be installed.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

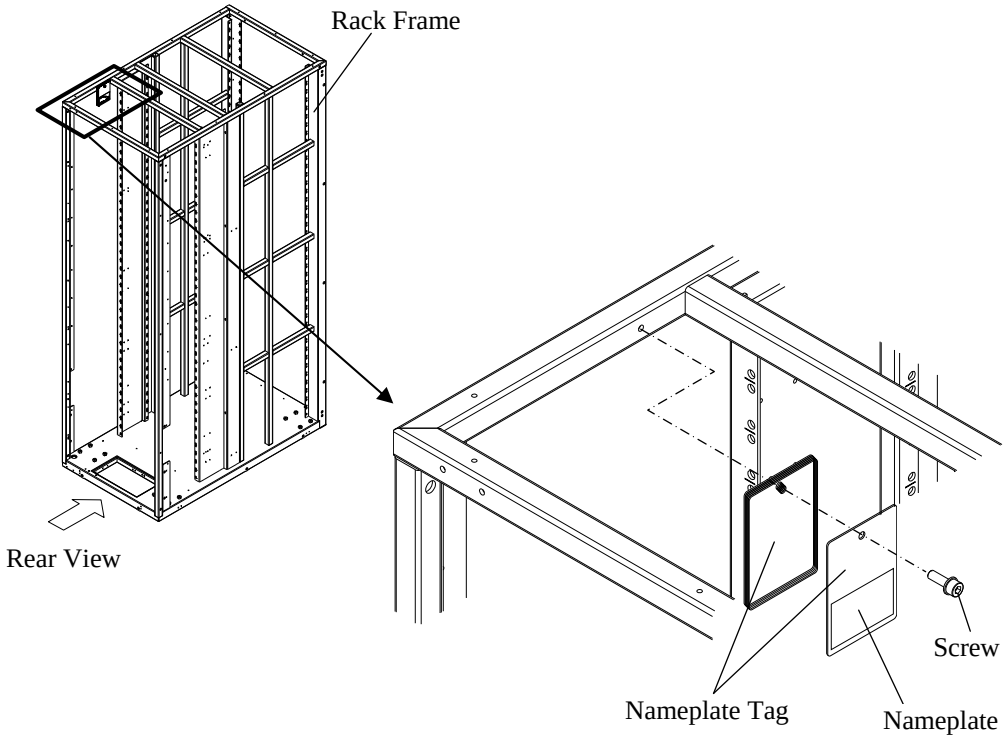

Fig. 3.12.3-3 Attachment of Nameplate

Copyright © 2014, Hitachi, Ltd.

3. Installation Procedure of Inter-Controller Connecting Kit

Installation Condition

Inter-Controller Connecting Kit (DKC-F710I-MDEXC) needs to be added under the following conditions.

- When the ESW is installed in the ESW slot option 1 (1SB/2SD) of the DKC-0 and the ESW slot option 1 (1SF/2SH) of the DKC-1.

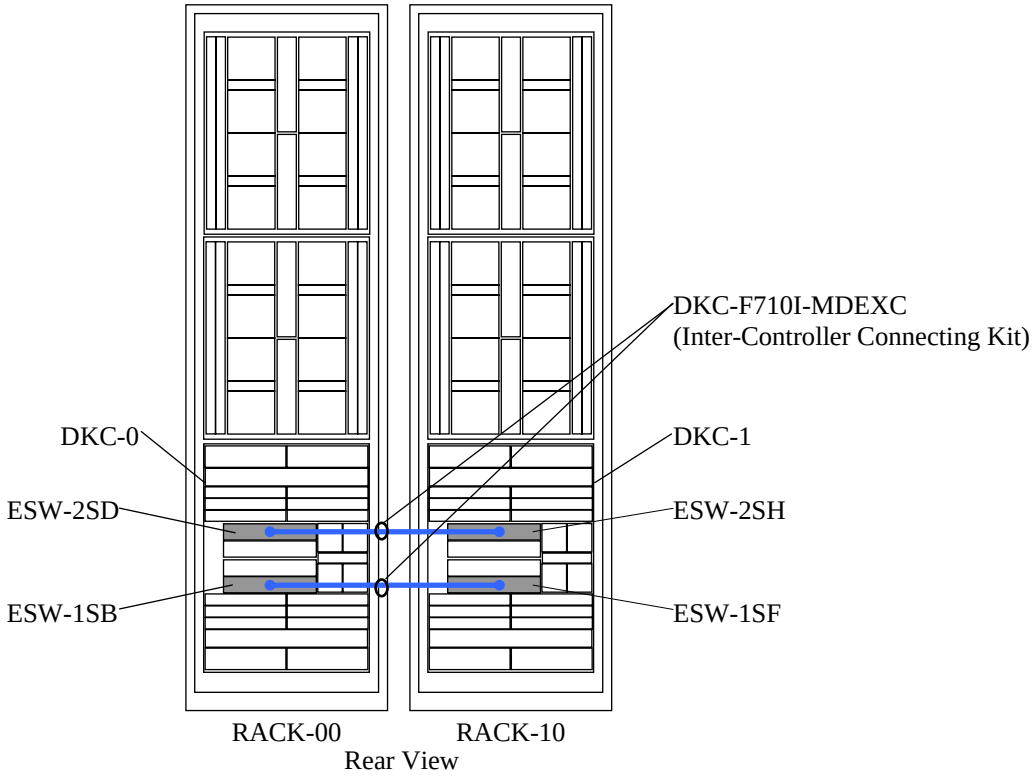

Fig. 3.12.3-3A Mounting Position of Cable

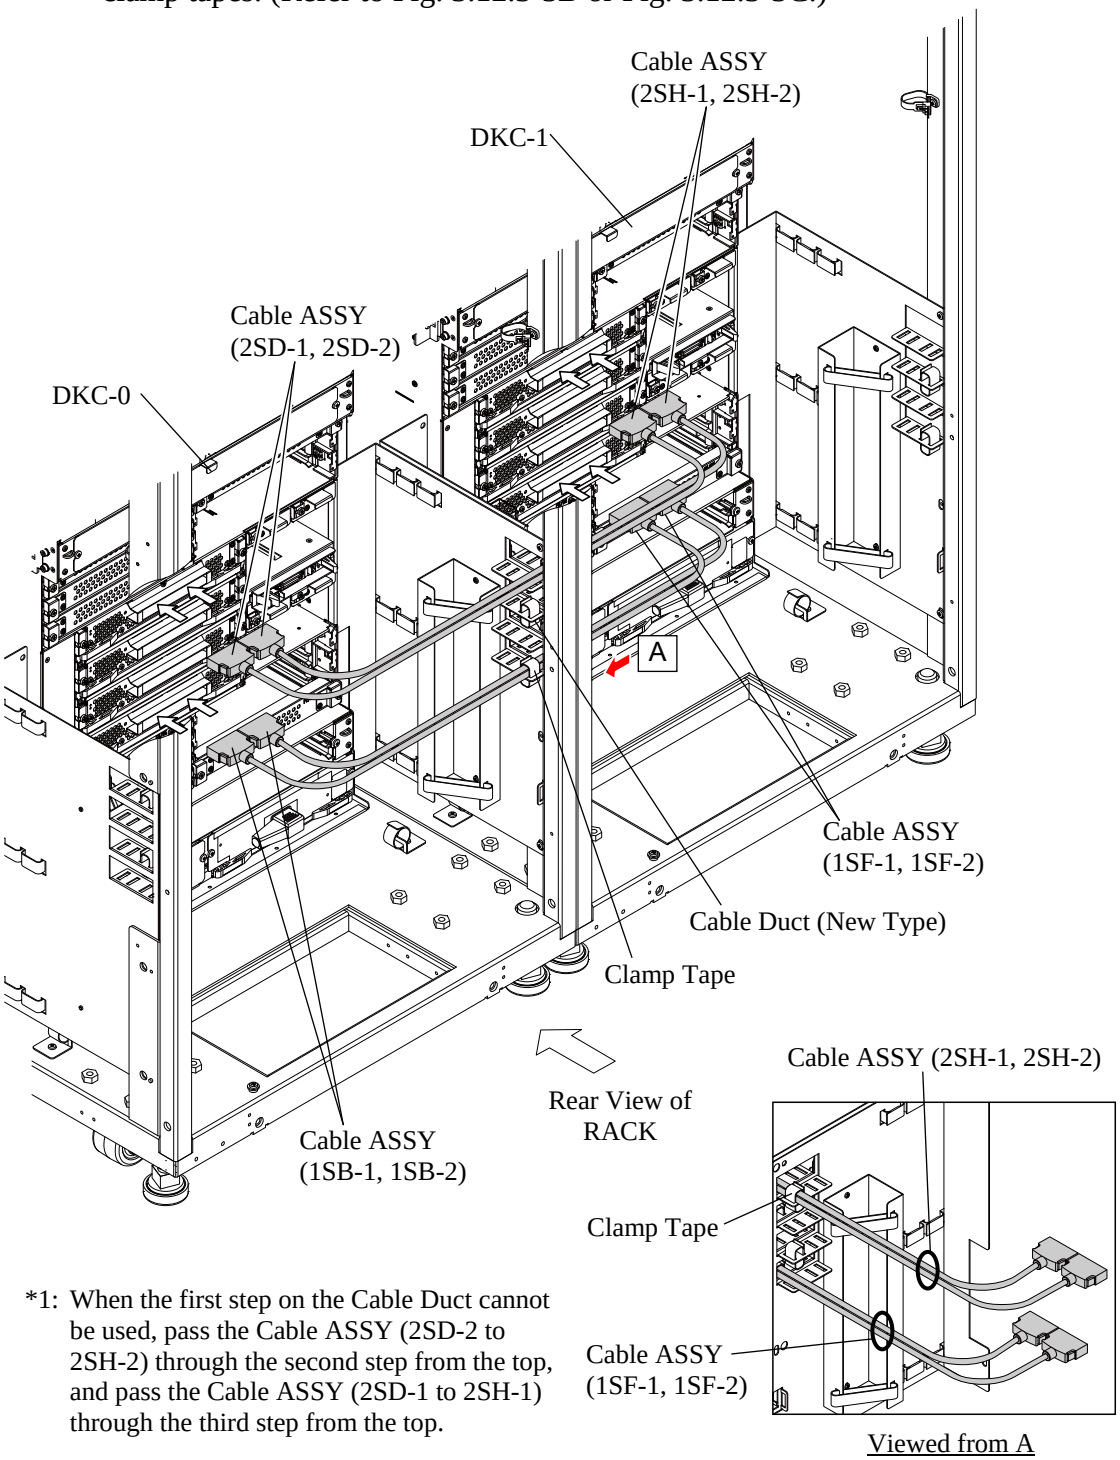
Copyright © 2014, Hitachi, Ltd.

3-1 When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) is required to install, install the cable ASSY.
When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) is not required to install, go to the procedure 4. SVP pre procedure (Disk Adapter Addition).

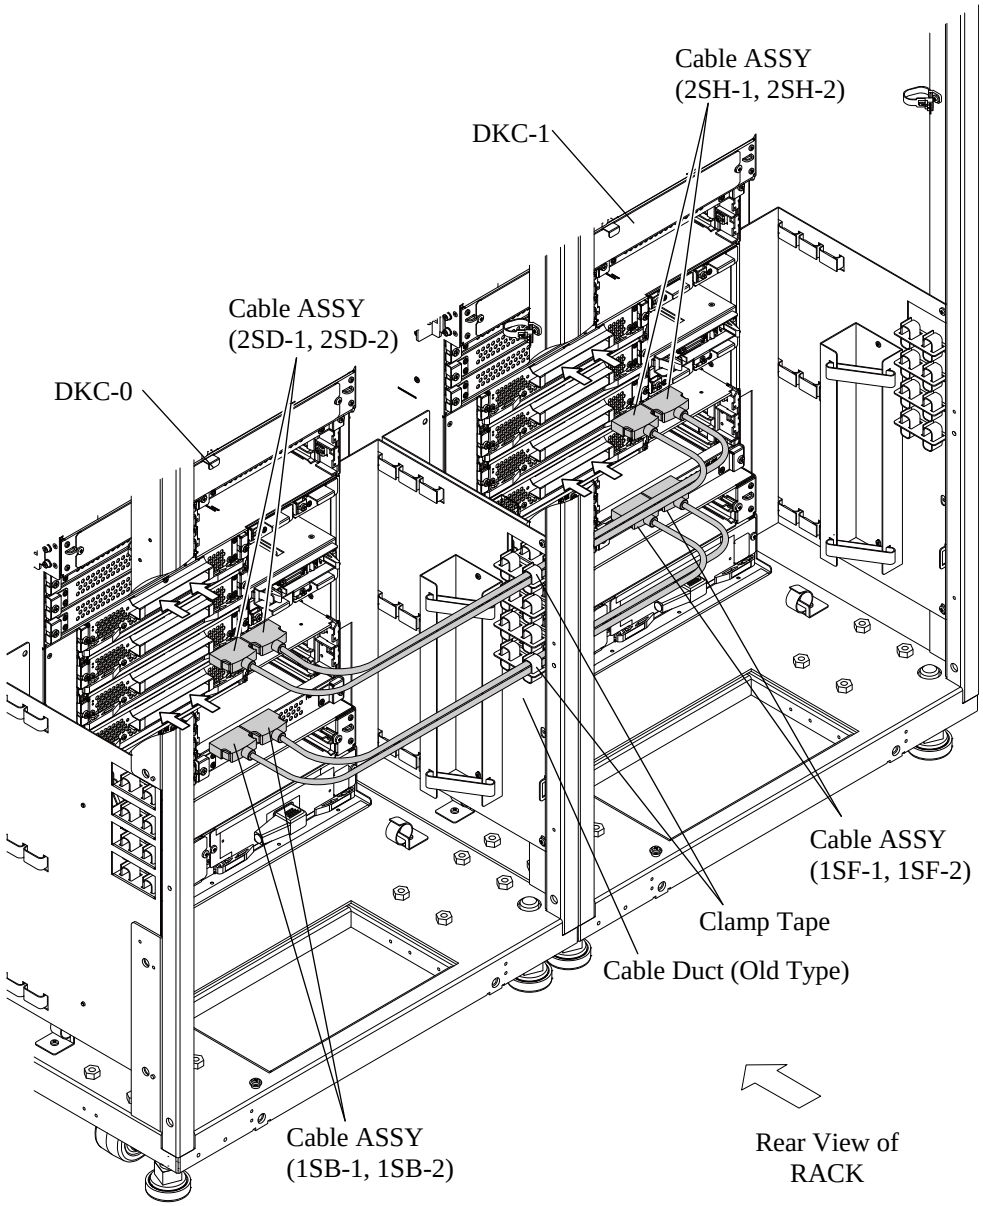
a. Wire the four Cable ASSYs to the rear side of the RACK, and fix them with the two or four clamp tapes. (Refer to Fig. 3.12.3-3B or Fig. 3.12.3-3C.)



*1: When the first step on the Cable Duct cannot be used, pass the Cable ASSY (2SD-2 to 2SH-2) through the second step from the top, and pass the Cable ASSY (2SD-1 to 2SH-1) through the third step from the top.

Fig. 3.12.3-3B Installation of Cables (DKC-0 ↔ DKC-1, New Type)

Copyright © 2014, Hitachi, Ltd.



*1: When the first step on the Cable Duct cannot be used, pass the Cable ASSY (2SD-2 to 2SH-2) through the second step from the top, and pass the Cable ASSY (2SD-1 to 2SH-1) through the third step from the top.

Fig. 3.12.3-3C Installation of Cables (DKC-0 ↔ DKC-1, Old Type)

Copyright © 2014, Hitachi, Ltd.

b. Remove the four black caps from the ESW (1SB and 2SD) of the DKC-0, and connect the cables (1SB-1, 1SB-2, 2SD-1 and 2SD-2).
c. Remove the four black caps from the ESW (1SF and 2SH) of the DKC-1, and connect the cables (1SF-1, 1SF-2, 2SH-1 and 2SH-2).

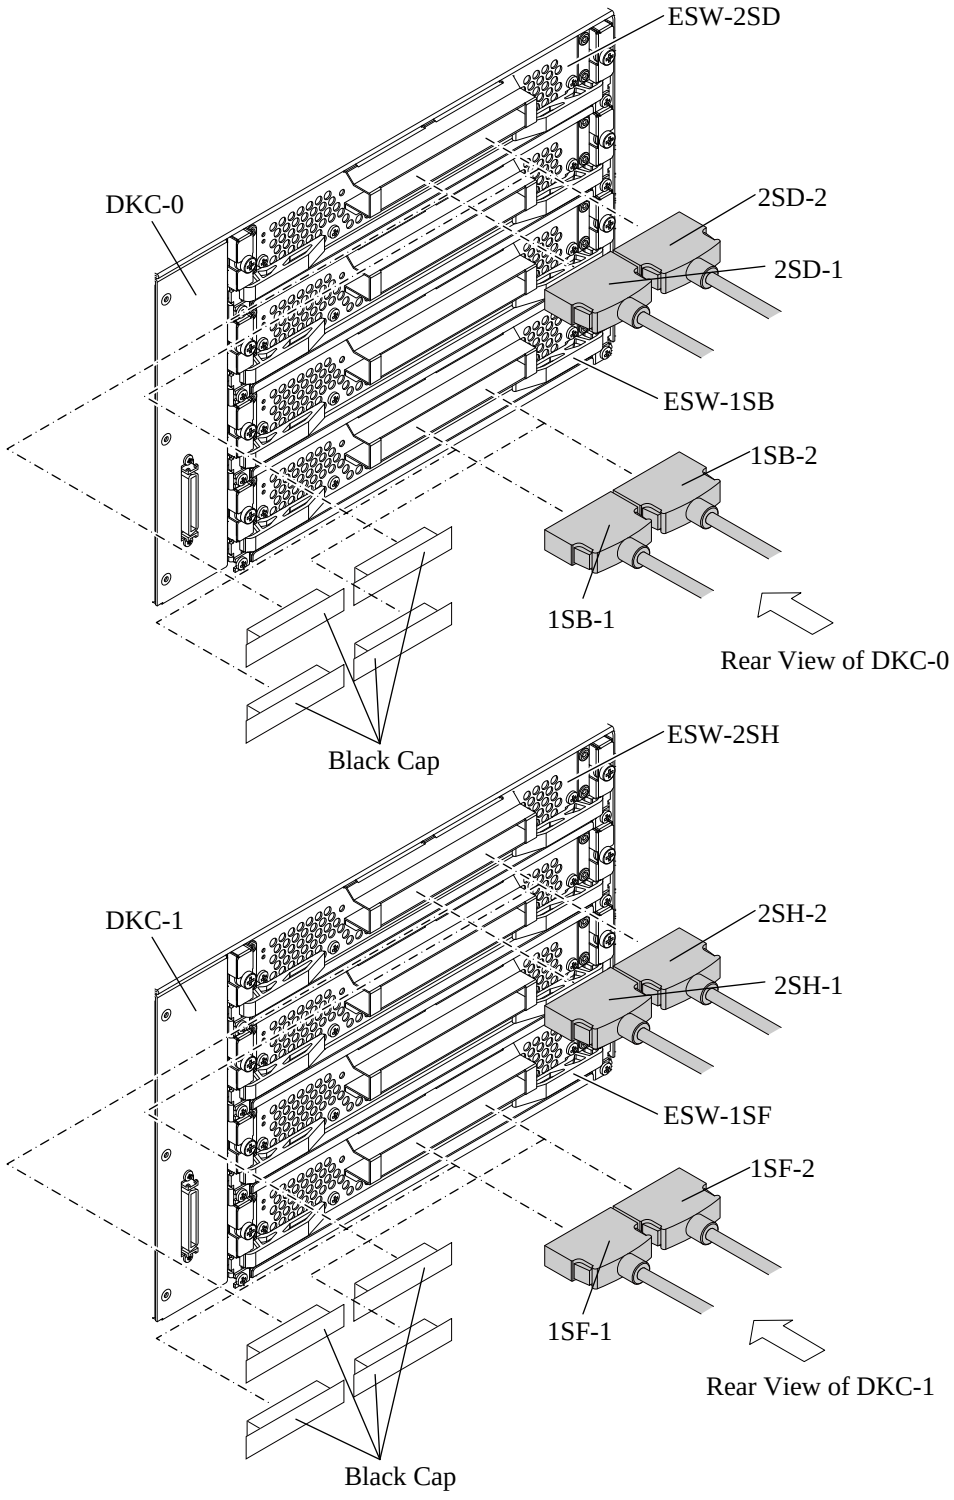


Fig. 3.12.3-3D Connection of Cables

Copyright © 2014, Hitachi, Ltd.

3-2 Attachment of Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

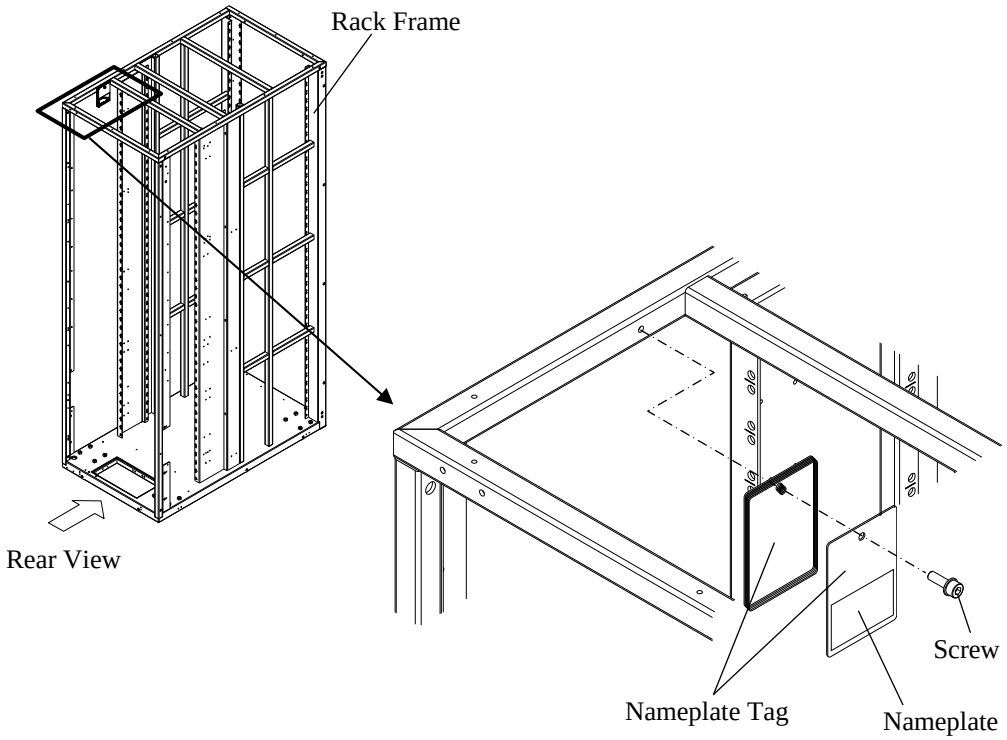

Fig. 3.12.3-3E Attachment of Nameplate

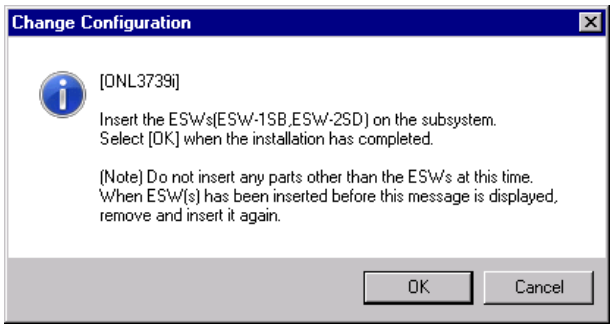
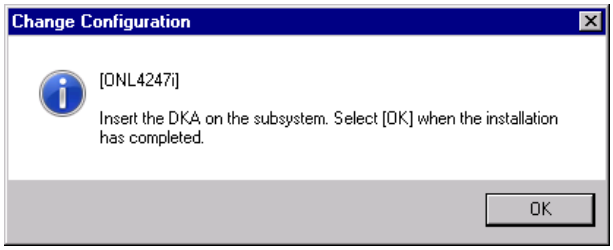
Copyright © 2010, 2014, Hitachi, Ltd.

4. SVP pre procedure (Disk Adapter Addition)

(1) <Check that hardware components are installed>
After installation of ESW is completed, selected (CL) [OK] in response to “Insert the ESWs(ESW-nnn,ESW-nnn) on the subsystem. Select [OK] when the installation has completed. (Note) Do not insert any parts other than the ESWs at this time. When ESW(s) has been inserted before this message is displayed, remove and insert it again.”.



(2) <Check that hardware components are installed>
At this point refrain from pressing the [OK] button.
“Insert the DKA on the subsystem. Select [OK] when the installation has completed.” is displayed.



Copyright © 2010, 2014, Hitachi, Ltd.

5. Installation Procedure of Disk Adapter

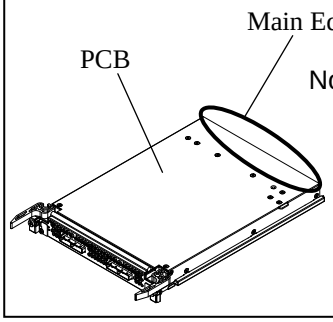
Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

5-1 Insertion of the PCBs

a. If the dummy plates are installed in the installation location, loosen the screws and remove the dummy plates. Refer to the Table 3.12.3-2 and Fig. 3.12.3-4.
If not, go to step b.

Note: Remove the dummy plate just before installing the PCB.
If the dummy plate is kept removed for a long time, the wind doesn't flow among installed PCBs, causing the PCBs' temperature rise which may result in temperature warning or temperature alarm.

b. Insert the PCBs to the correct locations in the DKC and fasten the screw.



Note:
- Check that the main edge connector of the PCB has no deformation, damage or sticking of dust before installing the PCB. (See INST03-01-70.)
- When installing the PCB, hold the right and left of the PCB with both hands, and insert it straight not to contact the neighboring PCB.

Table 3.12.3-2 Inserting Location

DKC	Addition No.	Location No.		Number of DKAs set through the SVP		Remarks
		Cluster 1	Cluster 2			
DKC-0	Basic	DKA-1AU	DKA-2MU	2	4	
	Option 1	DKA-1AL	DKA-2ML	—		
DKC-1	Basic	DKA-1LU	DKA-2XU	2	4	
	Option 1	DKA-1LL	DKA-2XL	—

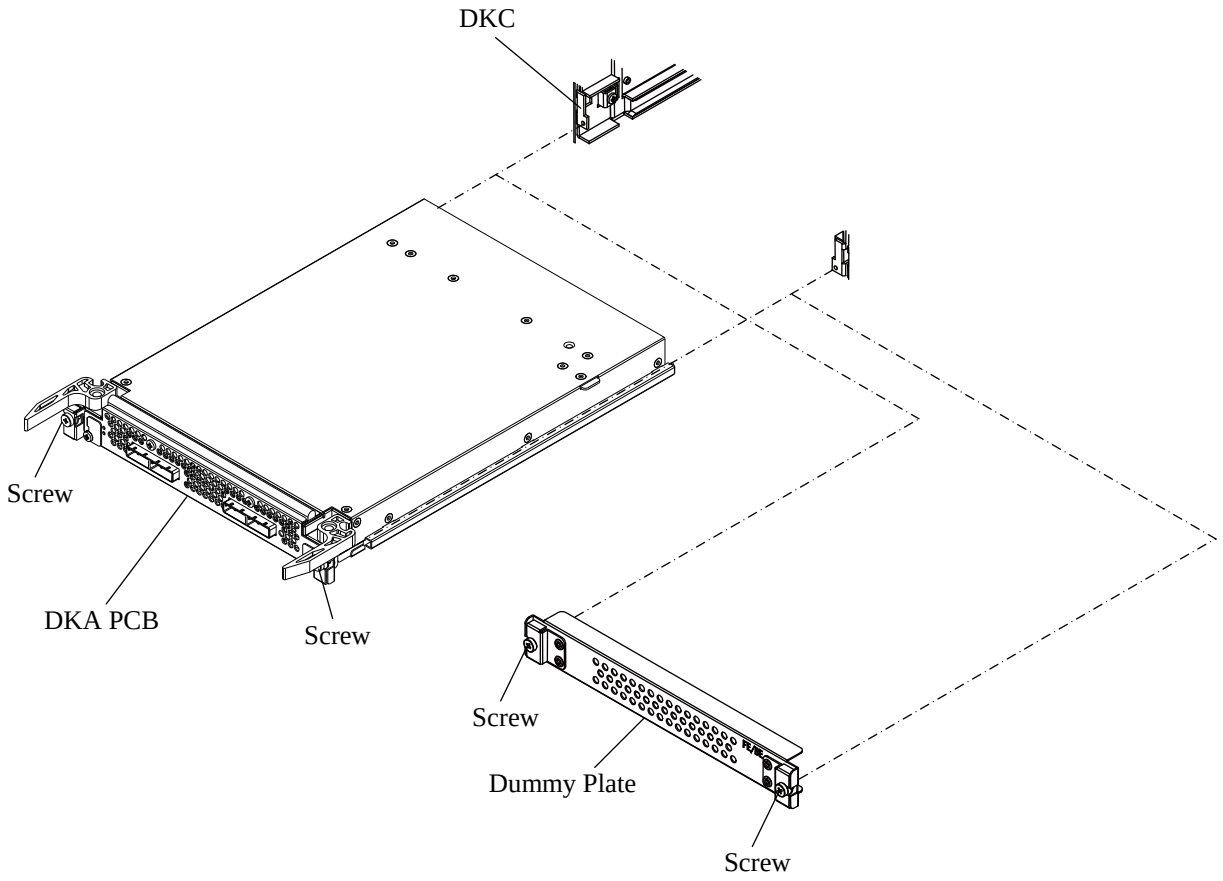

Fig. 3.12.3-4 Insertion of PCB

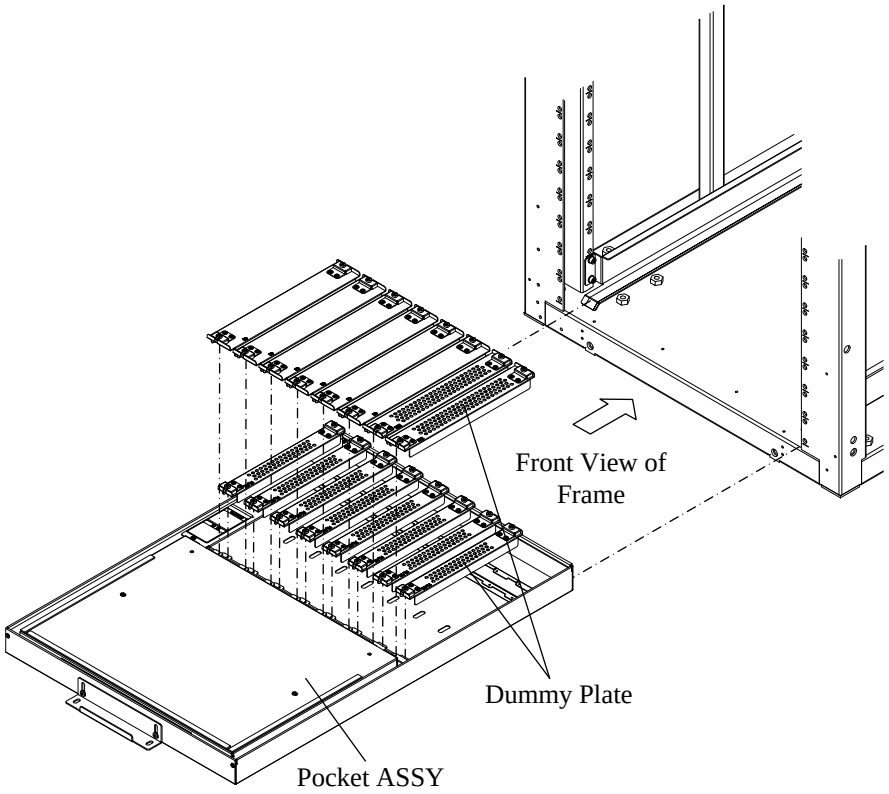
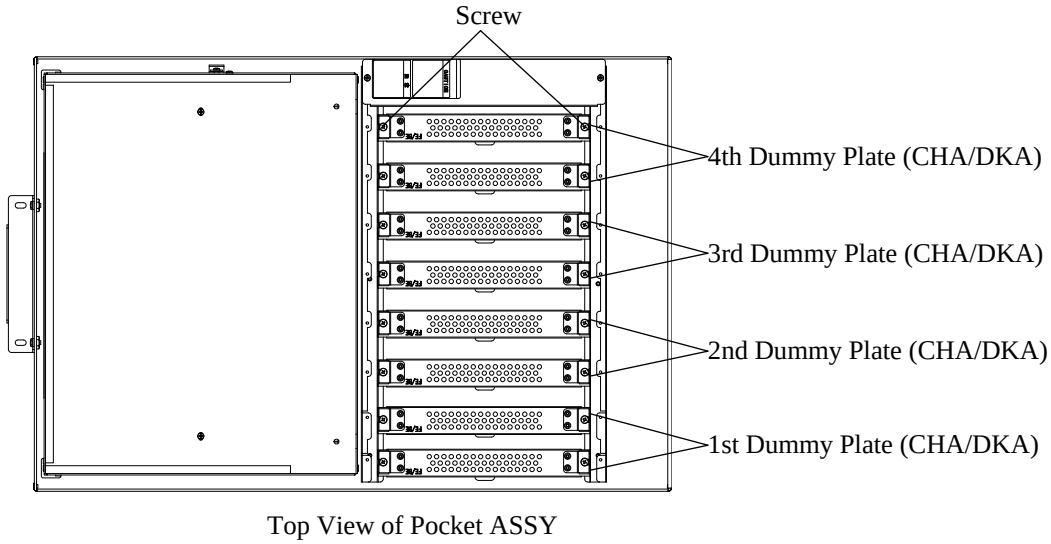
Copyright © 2010, 2014, Hitachi, Ltd.

5-2 Storage of Dummy Plates (This procedure is not required if the PCB should be installed in the Basic slots.)

a. Remove the pocket ASSY from the front of the frame.
b. Install the two removed dummy plates in the pocket ASSY, and tighten them with the four screws.
   When dummy plates are installed in the upper part, remove the upper dummy plates once, install the lower dummy plates, and then install the upper dummy plates again.
c. Install the pocket ASSY in the front of the frame.





Top View of Pocket ASSY

5-3 Connection of cables

In the case of Basic in DKC-0

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

a. Remove the caps from the DEV interface cables.
b. Connect the cables to the DKA PCBs in the DKC-0 after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

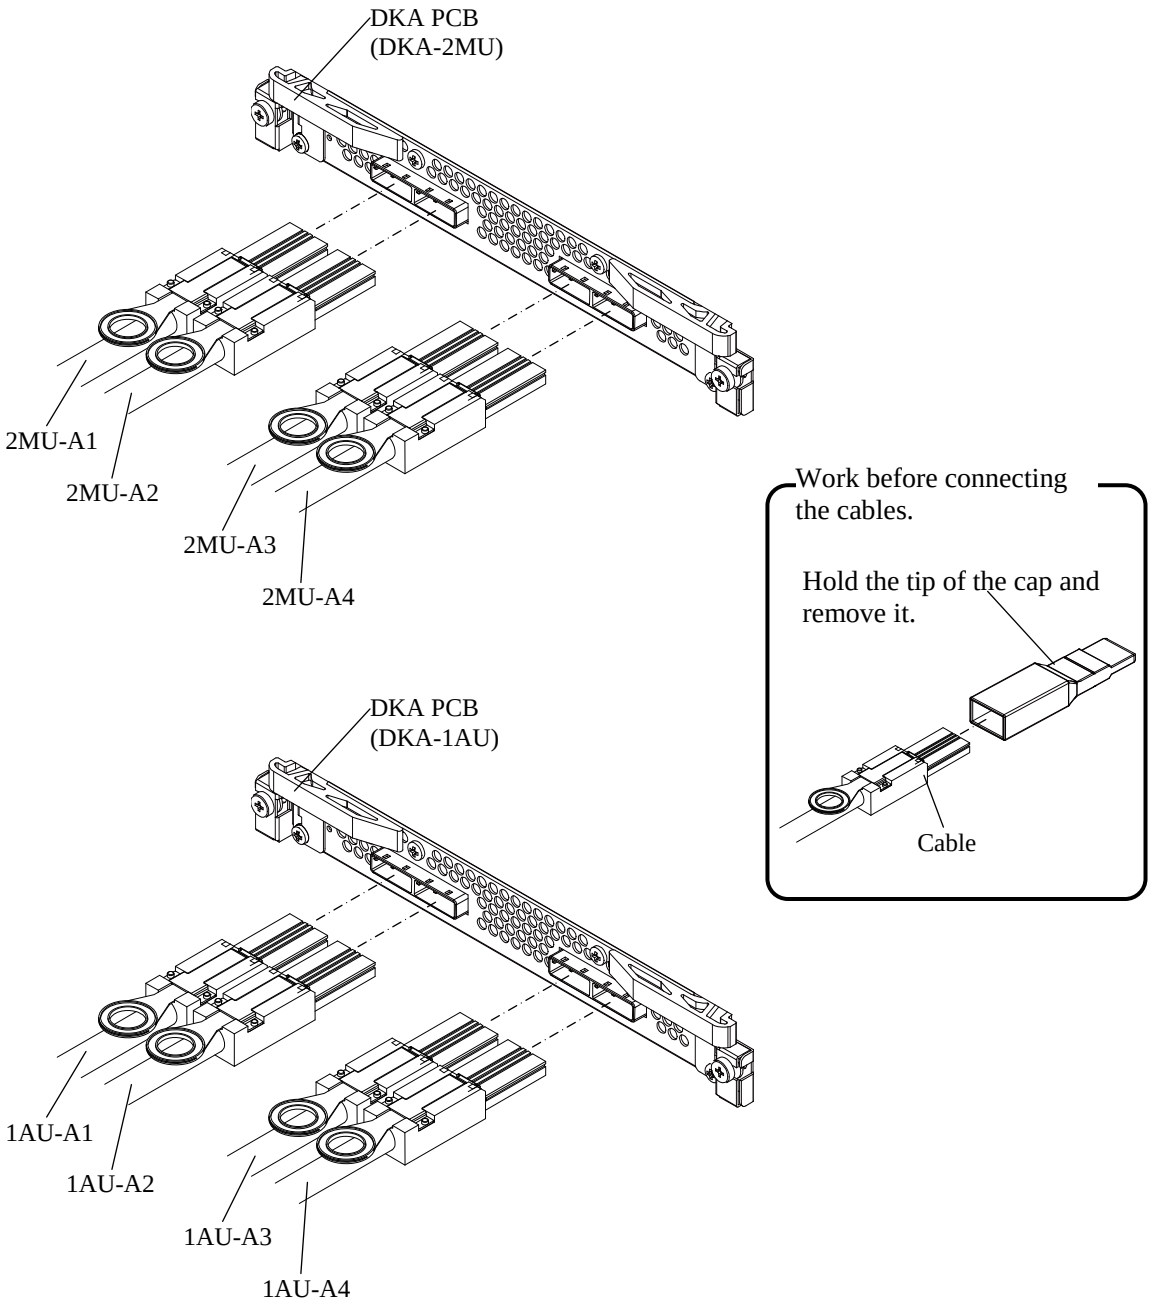

Fig.3.12.3-6 Connection of cable (Basic in DKC-0)

Copyright © 2010, Hitachi, Ltd.

In the case of Option 1 in DKC-0

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

a. Remove the caps from the DEV interface cables.
b. Connect the cables to the DKA PCBs in the DKC-0 after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

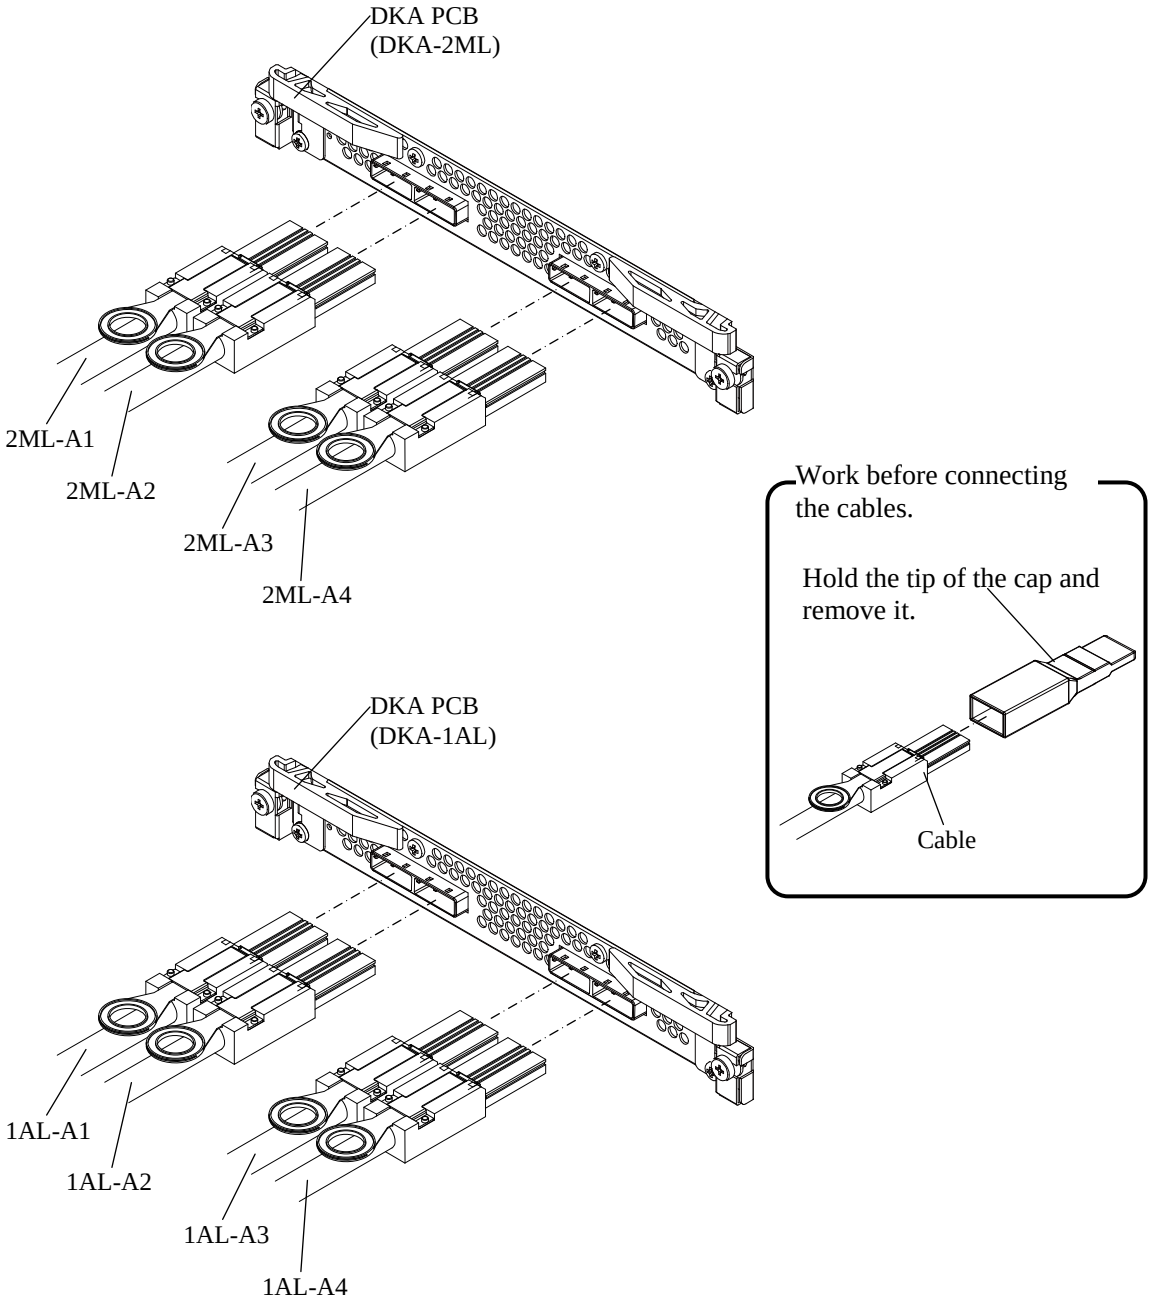

Fig.3.12.3-7 Connection of cable (Option 1 in DKC-0)

Copyright © 2010, 2014, Hitachi, Ltd.

5-4 Attachment of the Nameplate

a. Remove the screw from the rack frame and remove the nameplate tags to be installed.
b. Attach the nameplate to the nameplate tag.
c. Attach all the nameplate tags with the screw.

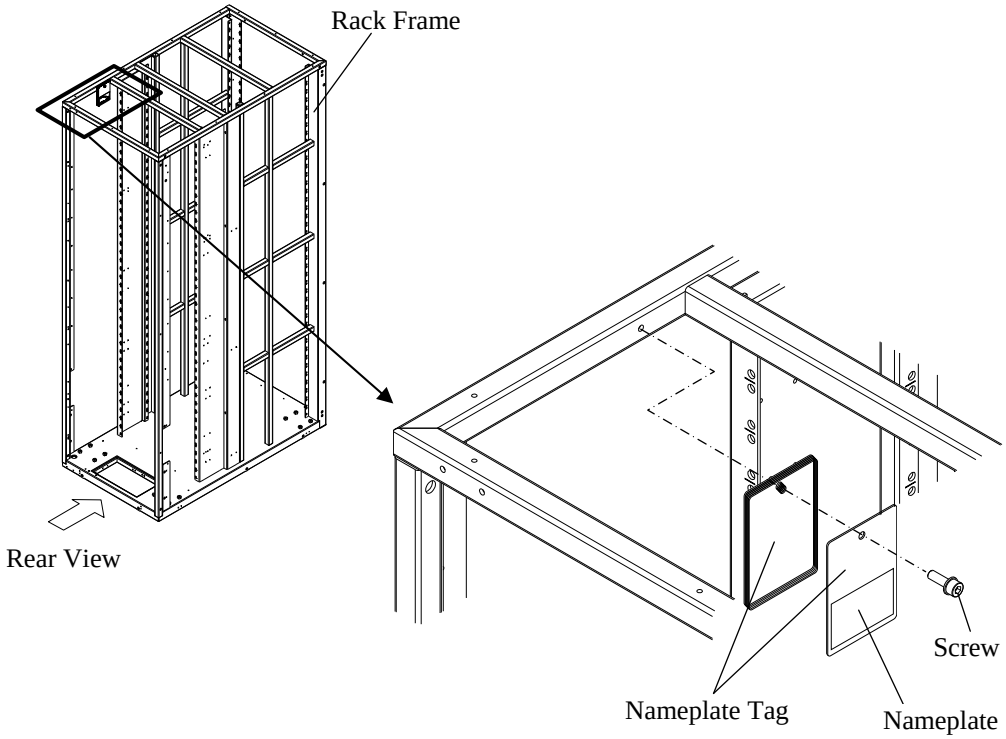

Fig. 3.12.3-10 Attachment of Nameplate

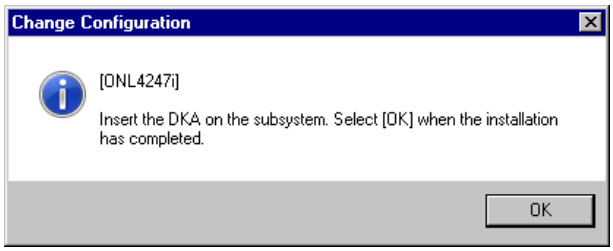
6. SVP post procedure

(1) <Check that hardware components are installed>
Select (CL) [OK] after making sure that all hardware components are installed correctly in response to “Insert the DKA on the subsystem. Select [OK] when the installation has completed.”.



---

(2)
“Waiting for Power Event... Usually, several minutes (maximum 15 minutes)” is displayed.

If [ONL3437E] or [ONL3438E] is displayed, please refer 2.10.1. (INST02-350)

---

(3) <DKU PATH INLINE>
When DKA is installed, “DKU PATH INLINE is now running...” is displayed.

---

(4) <LDEV FORMAT>
“Formatting logical devices...” is displayed when Parity Group is defined.

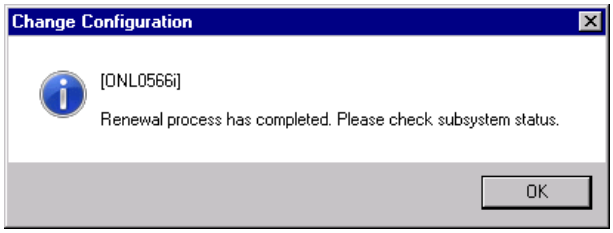
Note: However, on page INST03-12B-50 (13)-2, it advances to (4)-1 when a Quick Format is selected (CL).

---

(4)-1 <QUICK FORMAT>
“Preparing Quick Format logical devices...” is displayed when Parity Group is defined.

---

(5) <End of system update processing>
“Renewal process has completed. Please check subsystem status.” is displayed when recovery processing on all installed components is completed. Select (CL) [OK] in response to this message.

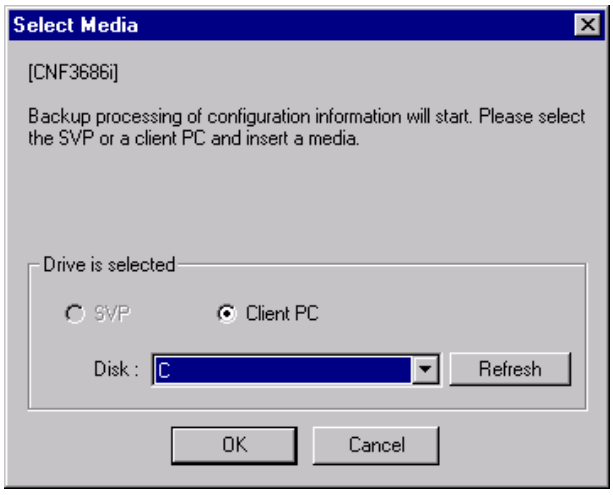


Copyright © 2010, 2012, Hitachi, Ltd.

(6)

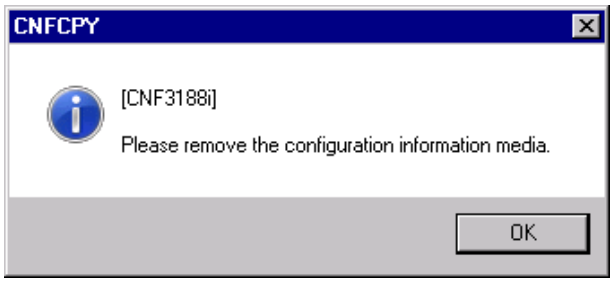
Execute an operation for backing up the configuration information.
Prepare the removable media for backup and insert the media.
Please select (CL) the [Refresh] button, and update drive information.
Select (CL) the drive and the PC in which the media was inserted. Select (CL) the [OK] button.

Note: For the procedure of backing up the configuration information to a CD-R, see page MICRO07-140.



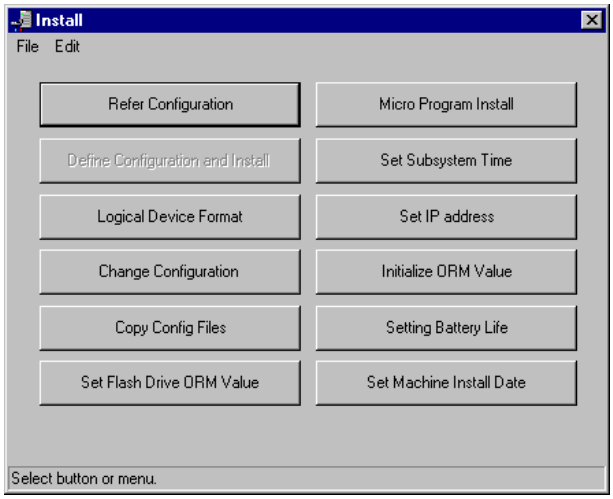
(7)

When this procedure is completed, the message “Please remove the configuration information media.” is displayed.
Remove the configuration information media, Select (CL) [OK].



(8)

After the procedure is completed, return to ‘Install’.
Select (CL) [File]-[Exit].



(9) <Mode Change>
Change the mode to View Mode.

Return to the work table (INST02-50) and perform rest of the works.

Copyright © 2010, 2014, Hitachi, Ltd.

3.12.4 When performing addition of the data/spare Drive, DKA, ESW, Device Interface Cable and Inter-Controller Connecting Kit that accompanies the addition of the DKU (DKC-F710I-ESW/SCA/MDEXC/BUC/HBUC/UUC/HUUC/USC/HUSC/RLEXC/HRLEXC/BFC/HBFC/UFC/HUFC/FFC/HFFC/UFEXC/HUFEXC/FFEXC/HFFEXC/146KCM/300JCM/300JCS/300KCM/500HCM/600JCM/600JCS/900JCM/1R0HCM/1R2JCM/2R0H2M/2R0H3M/3R0H3M/4R0H3M/200MCM/200SAM/200SCM/400MCM/400SCM/800MCM/400S1M/1R6FM/3R2FM)

Note:
- When the second DKC-F710I-SCA is installed, the Device Interface Cables between DKA and DKU, and between DKU and DKU are required to be connected.
- For the Non-Disruptive Installation, execute the operation after turning on the power supply of the RACK as shown in the step No.7 of 2.2 Non-Disruptive Installation Procedure Table (INST02-40).

3.12.4.1 Removal of Bezels

1. Remove the Bezels from DKUs which install the cables.
   a. Insert the key into the Bezel keyhole, and turn the key 90 degrees clockwise direction to unlock. (The stopper of the left side of the Bezel is also unlocked, and the Bezel can be opened.)
   b. Open the bezel by pulling the pocket door pull.
   c. Remove the two pins and remove the Bezel.

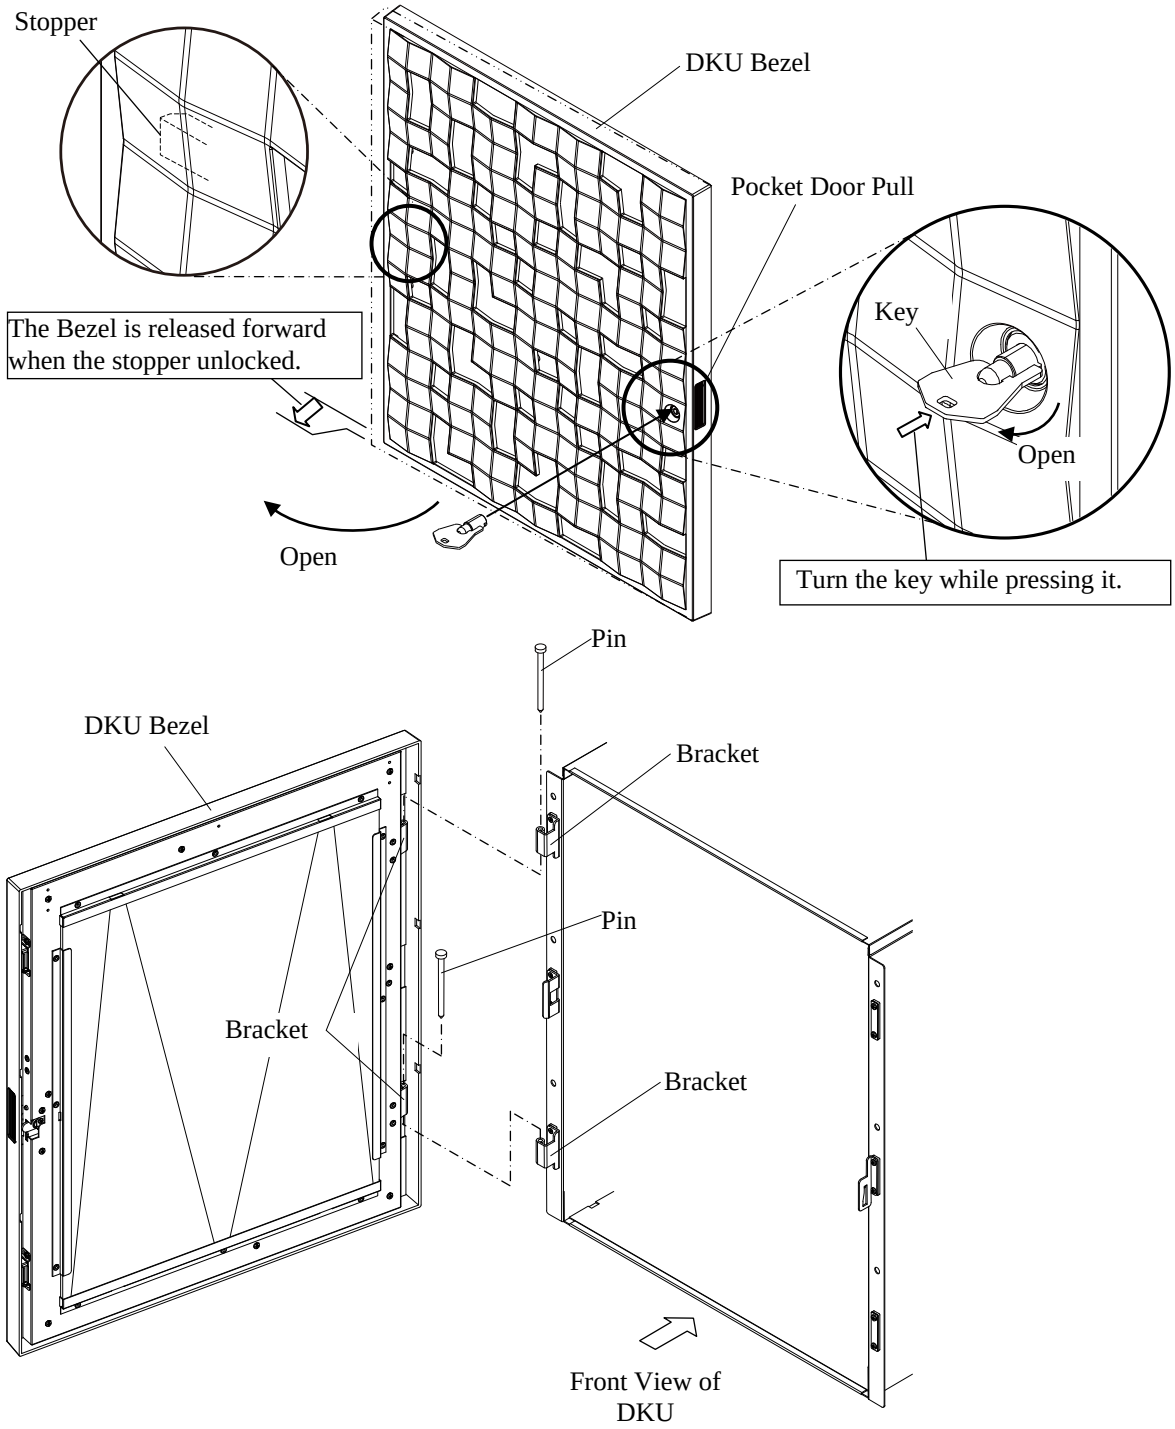

Fig. 3.12.4.1-1 Removal of DKU Bezel

Copyright © 2010, Hitachi, Ltd.

2. Stopper operation when opening and closing the FAN Door of the DKU
   a. When opening and closing the FAN Door of DKU for adding the device interface cables, operate the stopper of the FAN door according to “3.1.6 Setting of Stopper for FAN Door” (INST03-01-160).
      - When opening the FAN door, put the stopper of the FAN door into the openable and closable state.
      - When closing the FAN door, put the FAN door stopper into the neutral state.

3.12.4.2 Installation Procedure of Device Interface Cable BU (DKC-F710I-BUC)

Installation Condition

DKC-F710I-BUC is a cable option to connect between 1st DKA of DKC-x and DKU-x0. When the additional DKU-x0 is necessary to install, this option is required to connect. Refer to below Table 3.12.4.2-1 for the condition of DKC-F710I-BUC installation, and go to the appropriate page.

Table 3.12.4.2-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable BU (DKC-F710I-BUC) is required to install.	INST03-12C-80
2	When Device Interface Cable BU (DKC-F710I-BUC) is not required to install.	INST03-12C-430

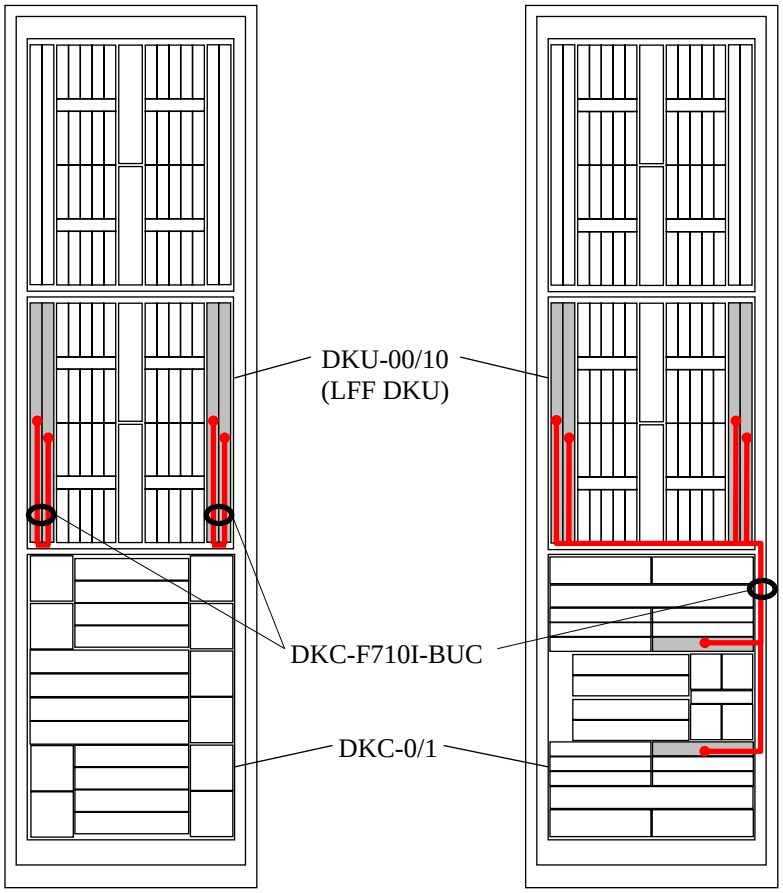

Fig. 3.12.4.2-1 Mounting Position of Device Interface Cable

When connecting LFF DKU with DKC.

1. Cable installation of the front right side of the DKU.
   a. Loosen the two screws of the rear left side of the DKU, and remove the cover.

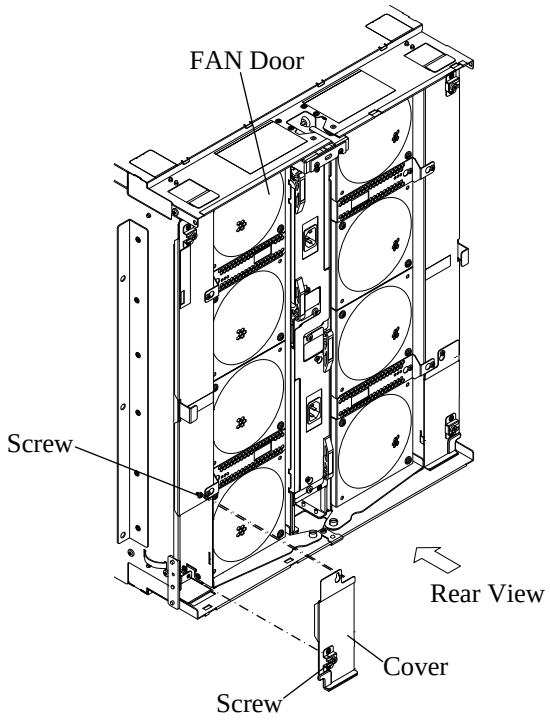

Fig. 3.12.4.2-3 Removal of Cover

   b. Loosen the two screws of the front right side of the DKU, and open the FAN door.

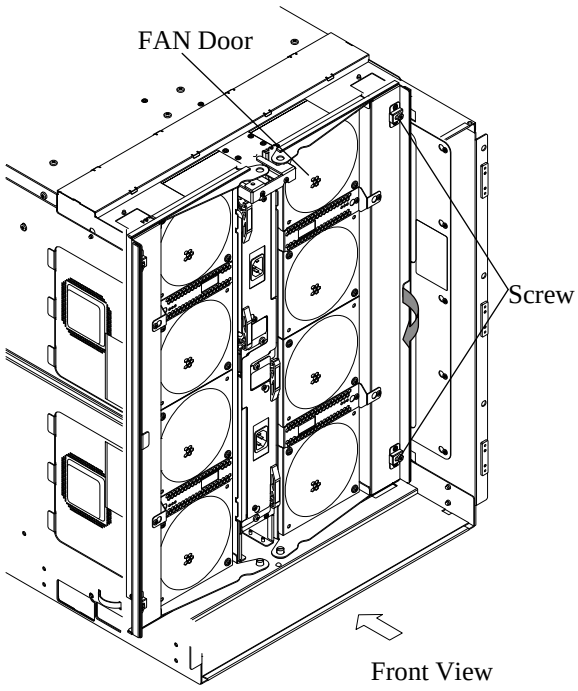

Fig. 3.12.4.2-4 FAN Door Opening

Copyright © 2010, Hitachi, Ltd.

c. Insert the cables from the front of the DKU, and pull it out to the rear side. The cables must be inserted one at a time.

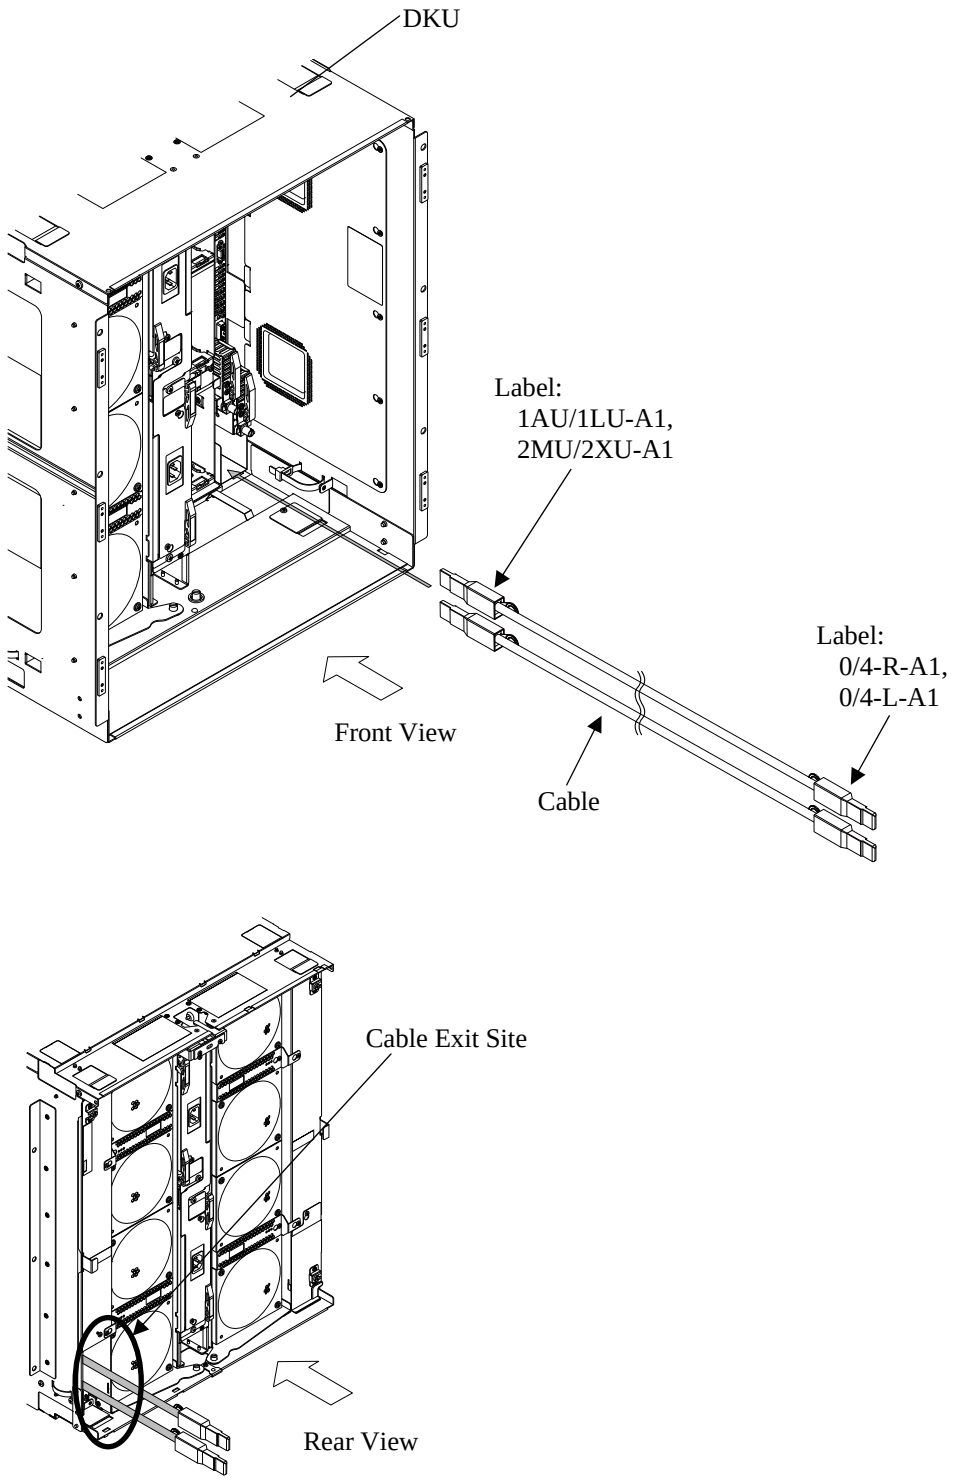

Fig. 3.12.4.2-5 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

d. Release the repeat binder at the front right side of DKU, and wire the cables.
e. Remove the caps from the cables. Connect the cables with the SSW PCBs after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

> Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

f. Bundle and secure the cables with the repeat binder.
g. Close the FAN door of the front right side of the DKU, and tighten the two screws.

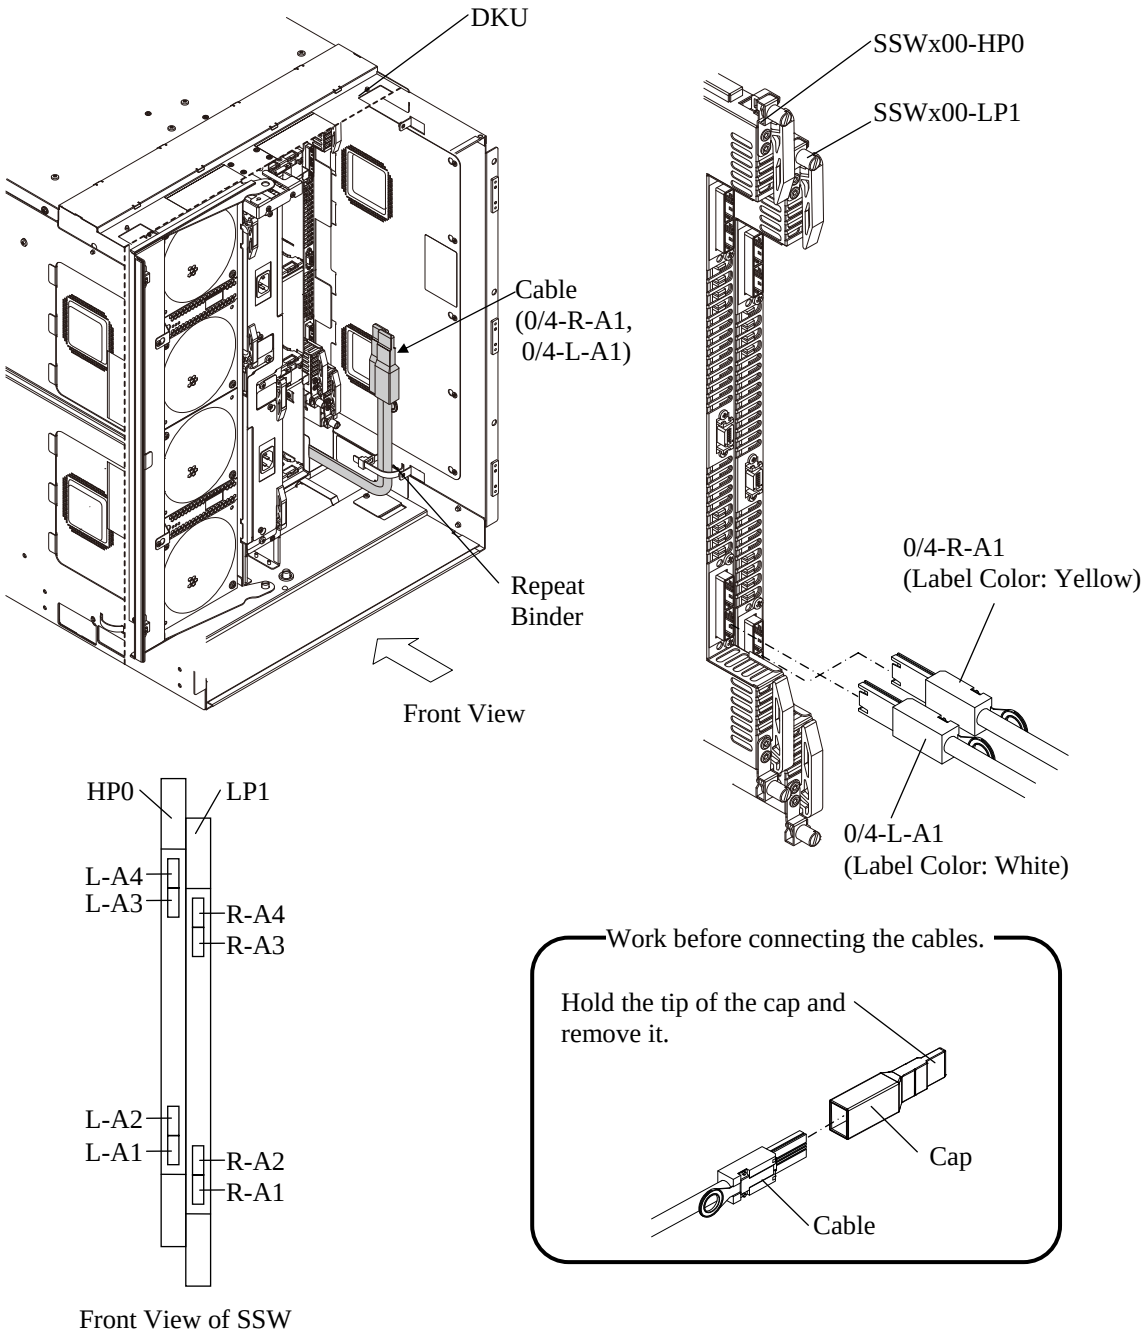

Fig. 3.12.4.2-6 Connection of Cables

Copyright © 2010, Hitachi, Ltd.

2. Cable installation of the front left side of the DKU.
   a. Loosen the two screws① of the rear right side of the DKU, and remove the cover.
   b. Loosen the screw② of the rear right side of the DKU, and open the FAN door.

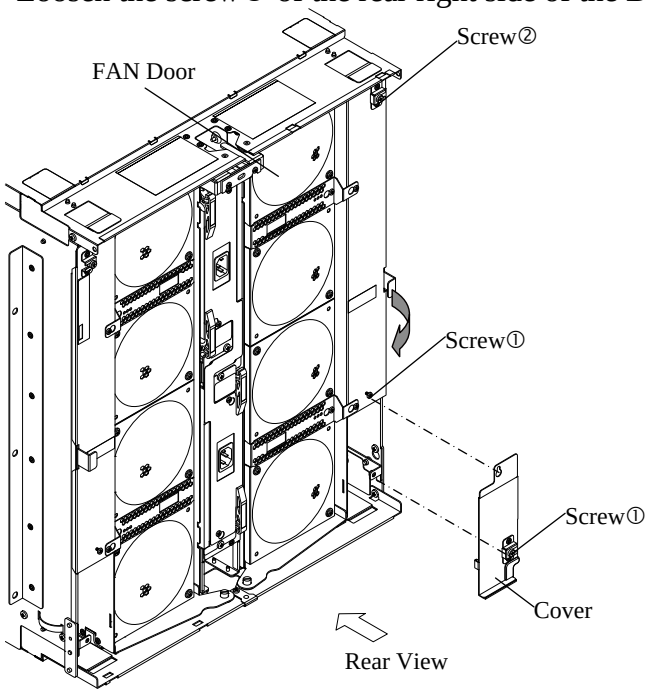

Fig. 3.12.4.2-7 Removal of Cover

   c. Loosen the three screws① of the rear right side of the DKU, and remove the bracket①.
   d. Loosen the screw②, and remove the bracket②.
   e. Close the FAN door of the rear right side of the DKU, and tighten the screw.

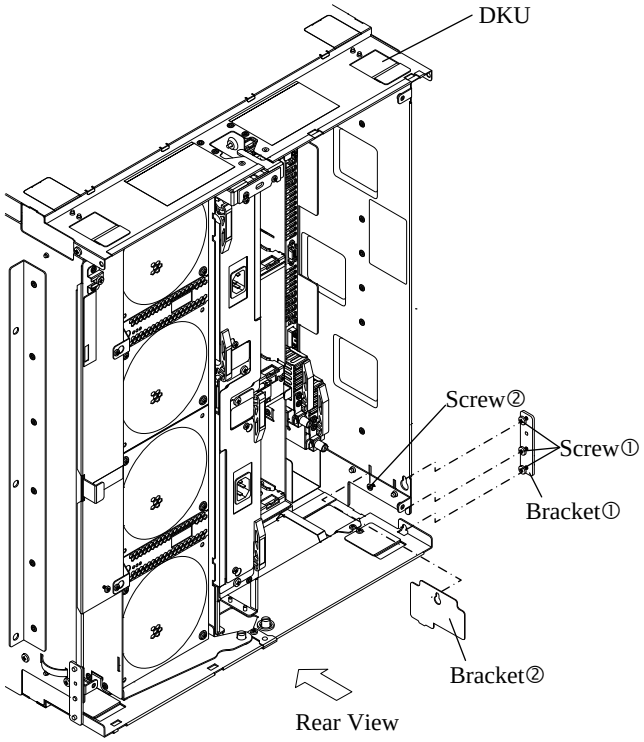

Fig. 3.12.4.2-8 Removal of Brackets

3.12.4.3 Installation Procedure of Device Interface Cable HBU (DKC-F710I-HBUC)

Installation Condition

DKC-F710I-HBUC is a cable option to connect between 2nd DKA of DKC-x and DKU-x0 with the high performance model. When the high performance model is chosen, this option is required to connect.
Refer to below Table 3.12.4.3-1 for the condition of DKC-F710I-HBUC installation, and go to the appropriate page.

Table 3.12.4.3-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable HBU (DKC-F710I-HBUC) is required to install.	INST03-12C-450
2	When Device Interface Cable HBU (DKC-F710I-HBUC) is not required to install.	INST03-12C-800

h. Release the repeat binder at the front left side of DKU, and wire the cables. However, do not connect the cables with the SSW PCBs at this stage.
i. Bundle and secure the cables with the repeat binder.
j. Close the FAN door of the front left side of the DKU, and tighten the two screws.

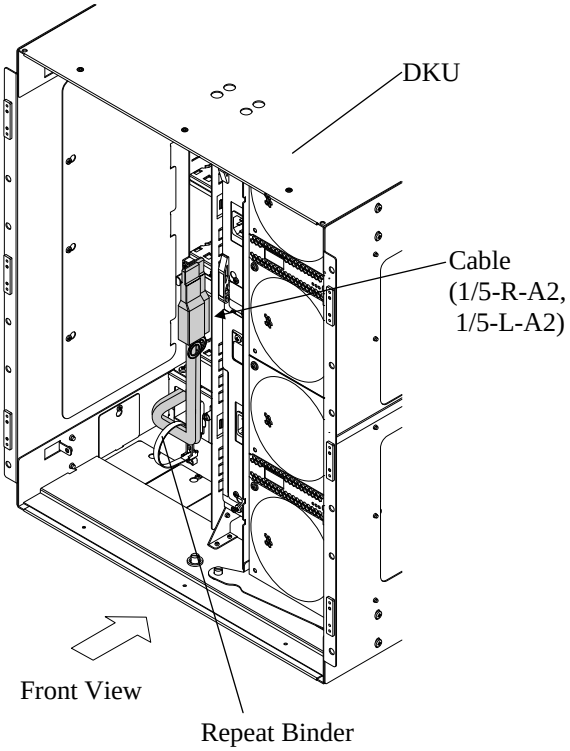

Fig. 3.12.4.3-39 Attachment of Cable

Copyright © 2010, Hitachi, Ltd.

3. Cable installation of the rear right side of the DKU.
   a. Loosen the screw of the rear left side of the DKU, and open the FAN door.
   b. Put the cables into the clearance of the rear lower left of the DKU.
   c. Close the FAN door of the rear left side of the DKU, and tighten the screw.

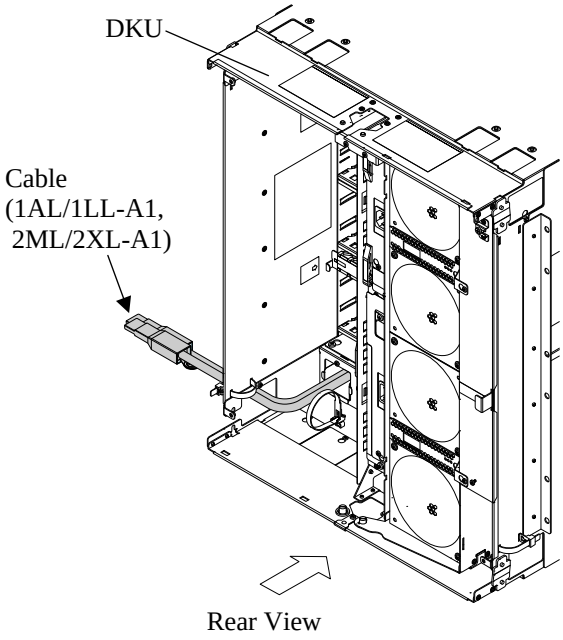

Fig. 3.12.4.3-40 Attachment of Cables

   d. Loosen the screw of the rear right side of the DKU, and open the FAN door.
   e. Put the cables into the clearance under the DKUPS, and secure them with the repeat binder.

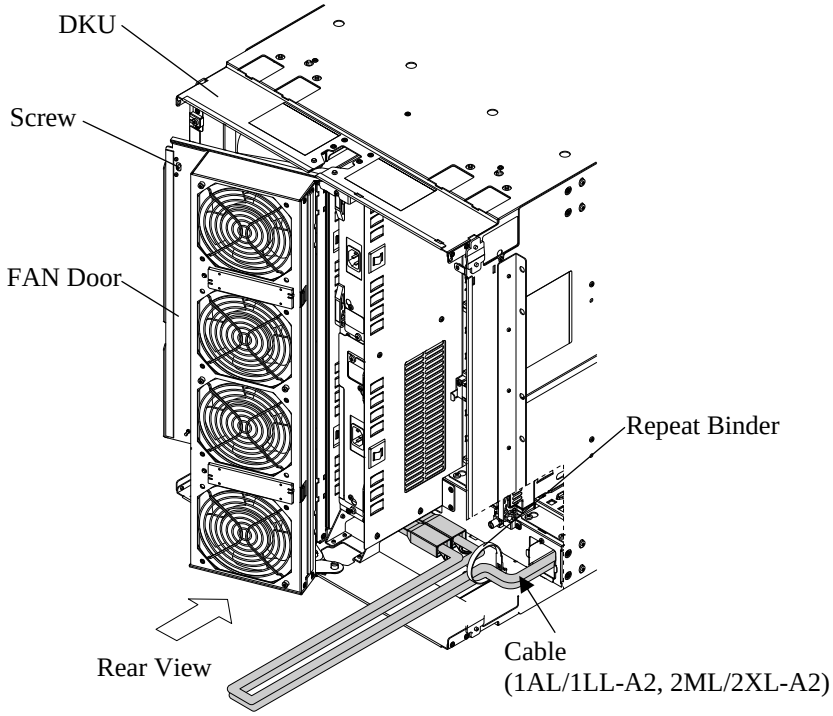

Fig. 3.12.4.3-41 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

f. Put the extra length of the cables in the DKU.
g. Close the FAN door of the rear right side of the DKU, and tighten the screw.

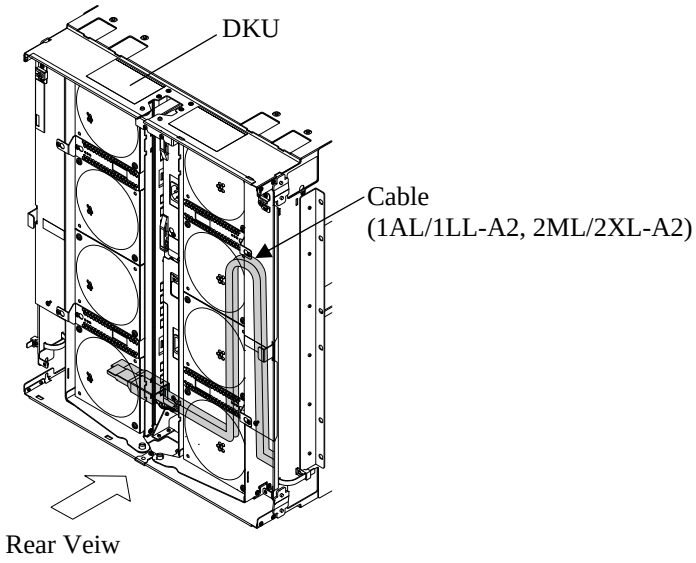

Fig. 3.12.4.3-42 Attachment of Cables

h. Loosen the screw of the rear left side of the DKU, and open the FAN door.
i. After pulling the cables out, put the cables into the clearance of the lower left of the DKU.

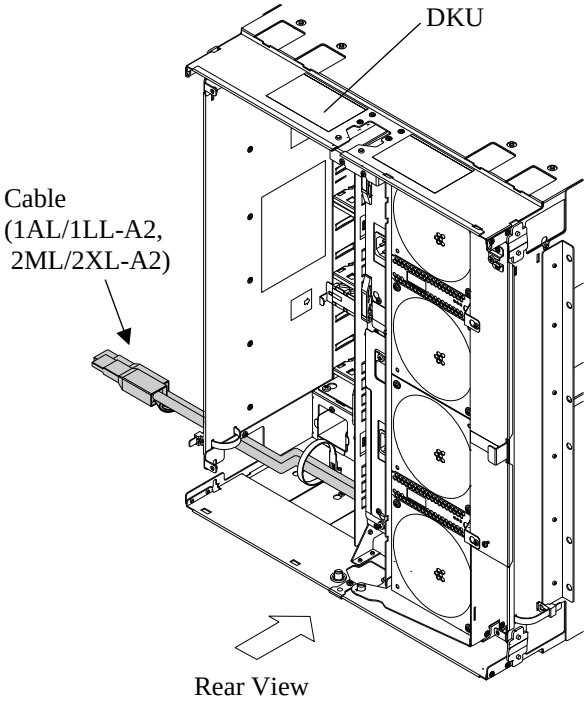

Fig. 3.12.4.3-43 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

j. After put the cables into the clearance on the lower left of the DKU, put the cables through under the DKUPS.
k. Close the FAN door of the rear left of the DKU, and tighten the screw.

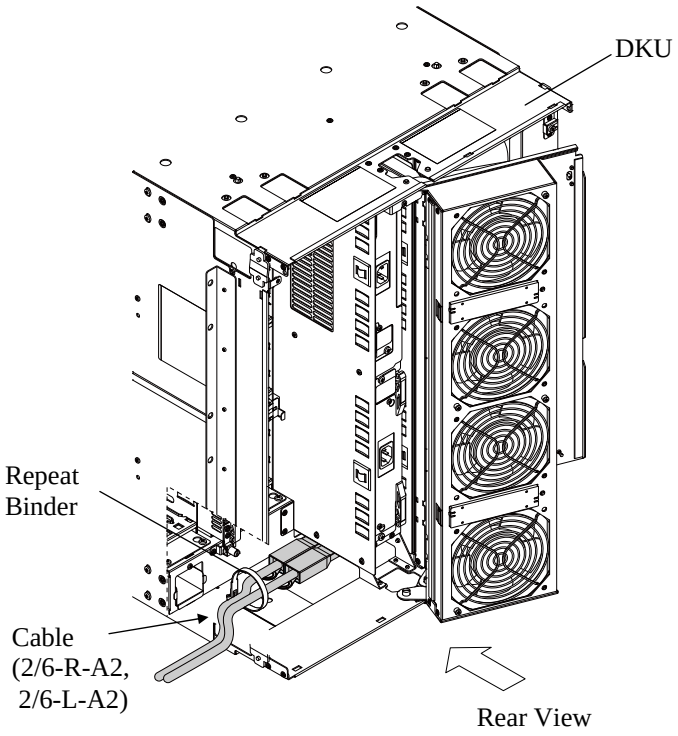

Fig. 3.12.4.3-44 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

l. Loosen the screw of the rear right of the DKU, and open the FAN door.
m. Secure the cables with the cramp tape.
   However, do not connect the cables with the SSW PCBs at this stage.
n. Close the FAN door of the rear right side of the DKU, and tighten the screw.

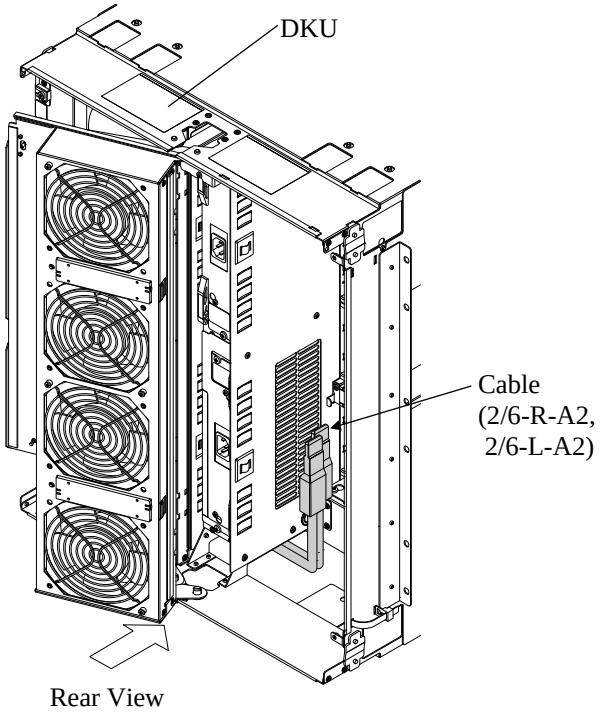

Fig. 3.12.4.3-45 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

4. Cable installation of the rear left side of the DKU.
   a. Loosen the screw of the rear left side of the DKU, and open the FAN door.
   b. Put the cables into the clearance of the lower left of the DKU.

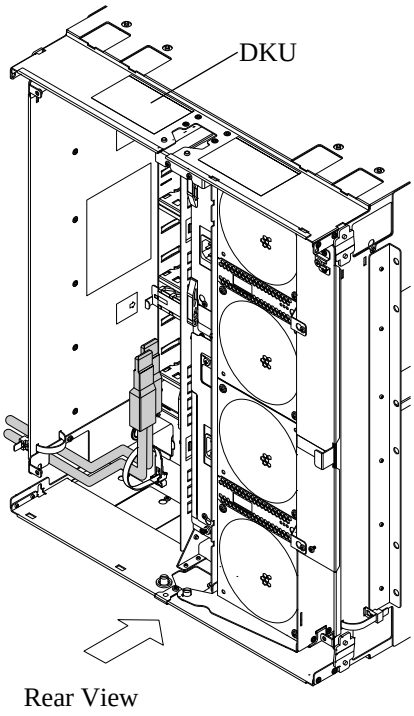

Fig. 3.12.4.3-46 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

c. Secure the cables with the repeat binder and the cramp tape.
However, do not connect the cables with the SSW PCBs at this stage.

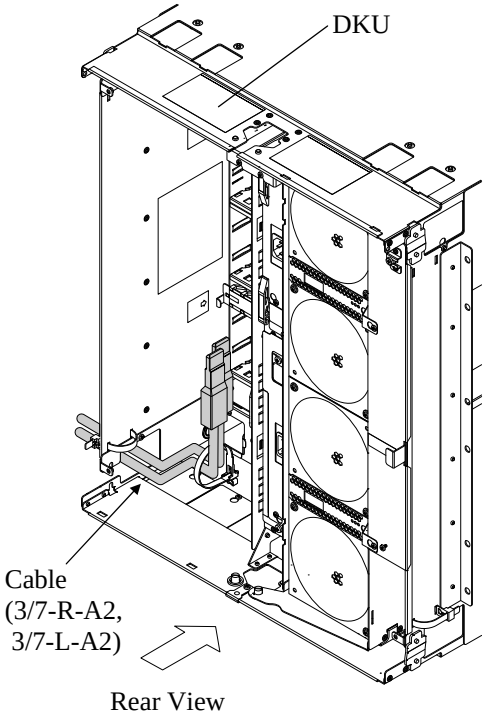

Fig. 3.12.4.3-47 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

d. Install the bracket, and secure it with the two screws.
e. Close the FAN door of the rear left side of the DKU, and tighten the screw.

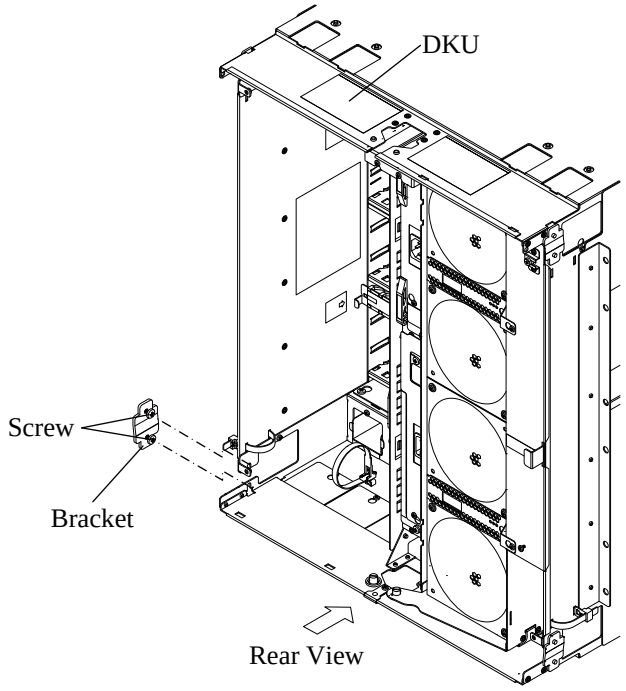

Fig. 3.12.4.3-48 Attachment of Bracket

f. Install the two covers in the rear side of the DKU, and secure them with the four screws.

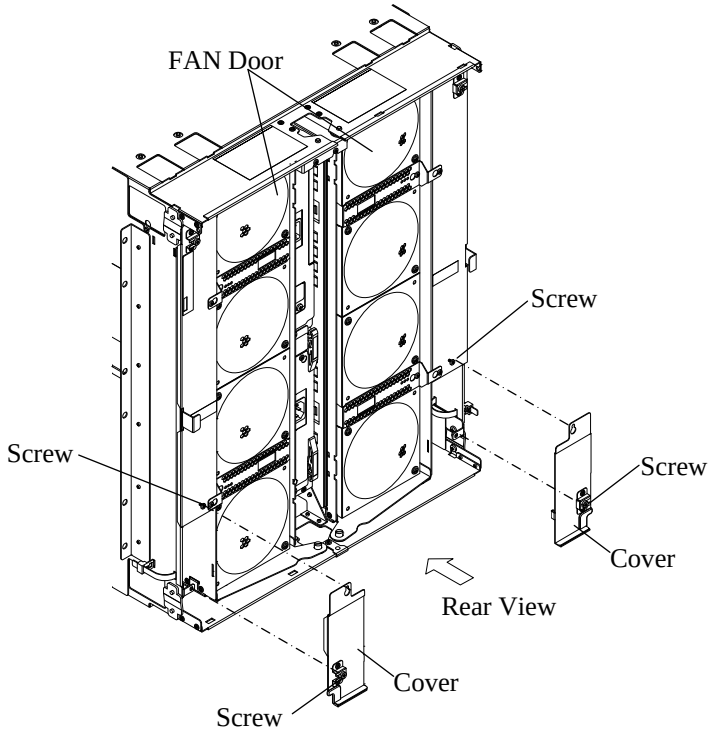

Fig. 3.12.4.3-49 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

g. Secure the cables with the cramp tape of the rear side of the device.
However, do not connect the cables with the DKA PCBs at this stage.

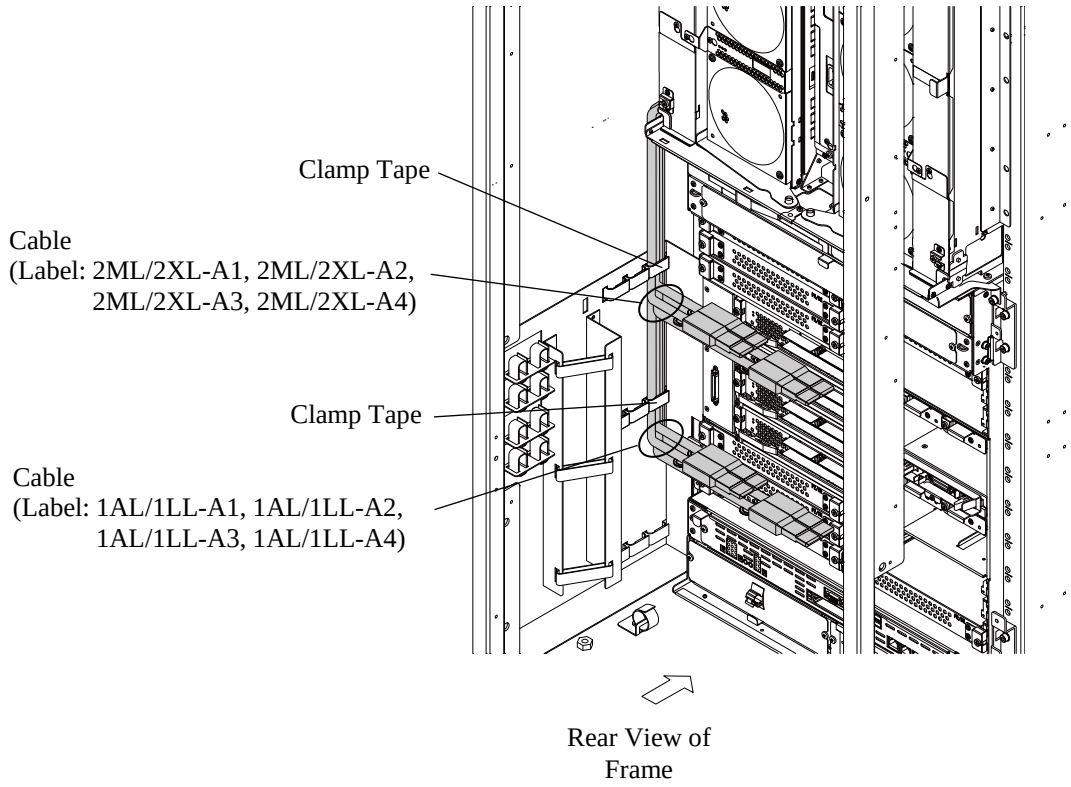

Fig. 3.12.4.3-50 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

5. Attachment of Nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

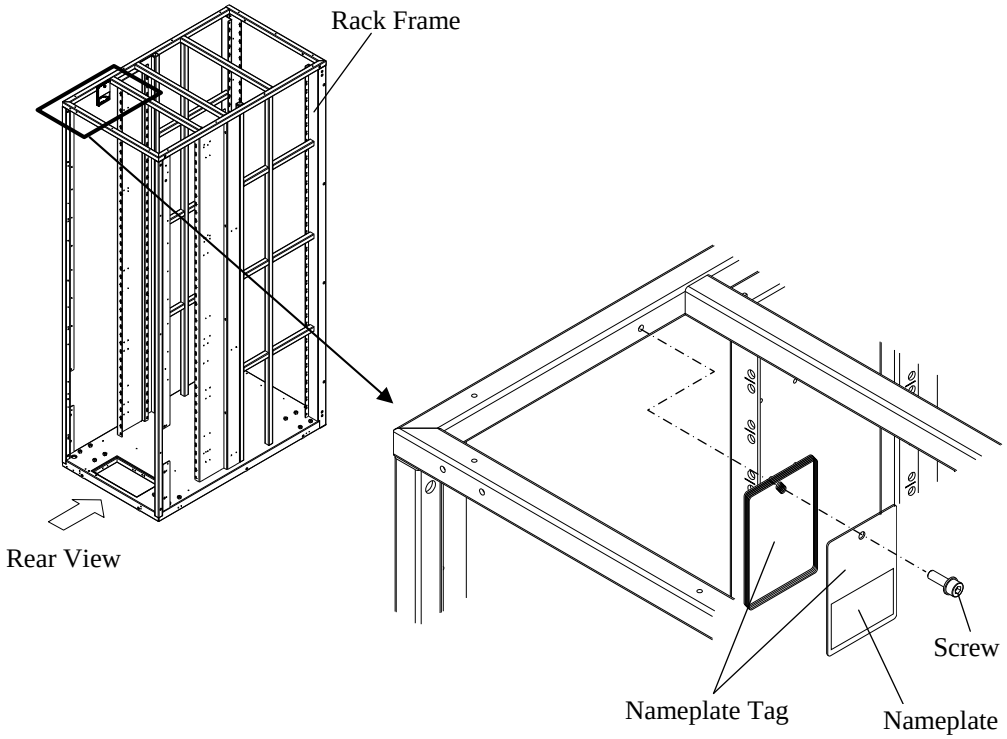

Fig. 3.12.4.3-51 Attachment of Nameplate

3.12.4.4 Installation Procedure of Device Interface Cable UU (DKC-F710I-UUC)

Installation Condition

DKC-F710I-UUC is a cable option to connect between DKUs in the same frame.
When the LFF DKU (DKU for 3.5 inch Drive) is added in the upper level of the LFF DKU, or when the SFF DKU (DKU for 2.5 inch Drive) is added in the upper level of the SFF DKU, this option is required to connect.
Refer to below Table 3.12.4.4-1 for the condition of DKC-F710I-UUC installation, and go to the appropriate page.

Table 3.12.4.4-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable UU (DKC-F710I-UUC) is required to install.	INST03-12C-820
2	When Device Interface Cable UU (DKC-F710I-UUC) is not required to install.	INST03-12C-1160

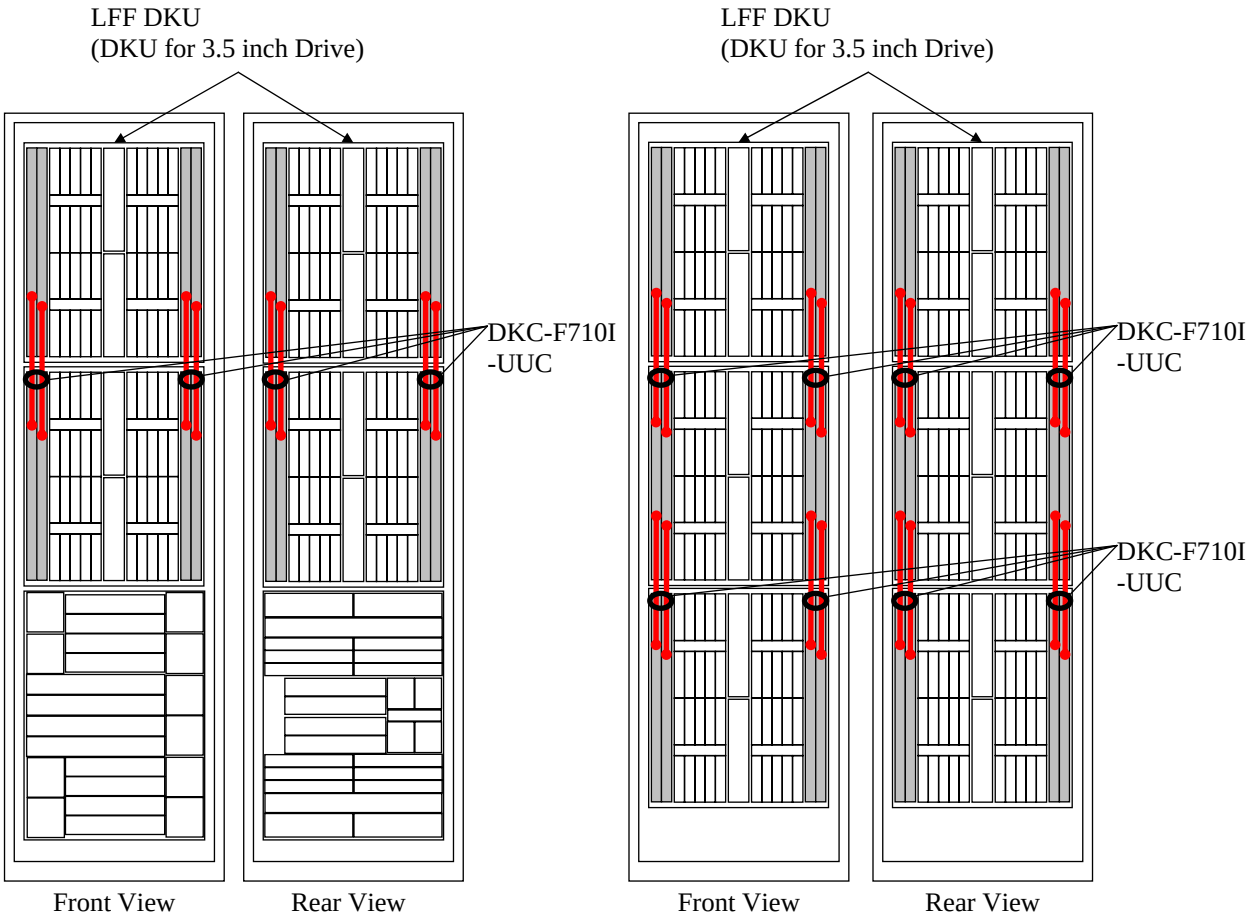

Fig. 3.12.4.4-1 Mounting Position of Device Interface Cable

When connecting upper LFF DKU with lower LFF DKU

1. Cable installation of the front right side of the DKU.
   a. Loosen the four screws of the front right side of the DKUs, and open the two FAN doors.

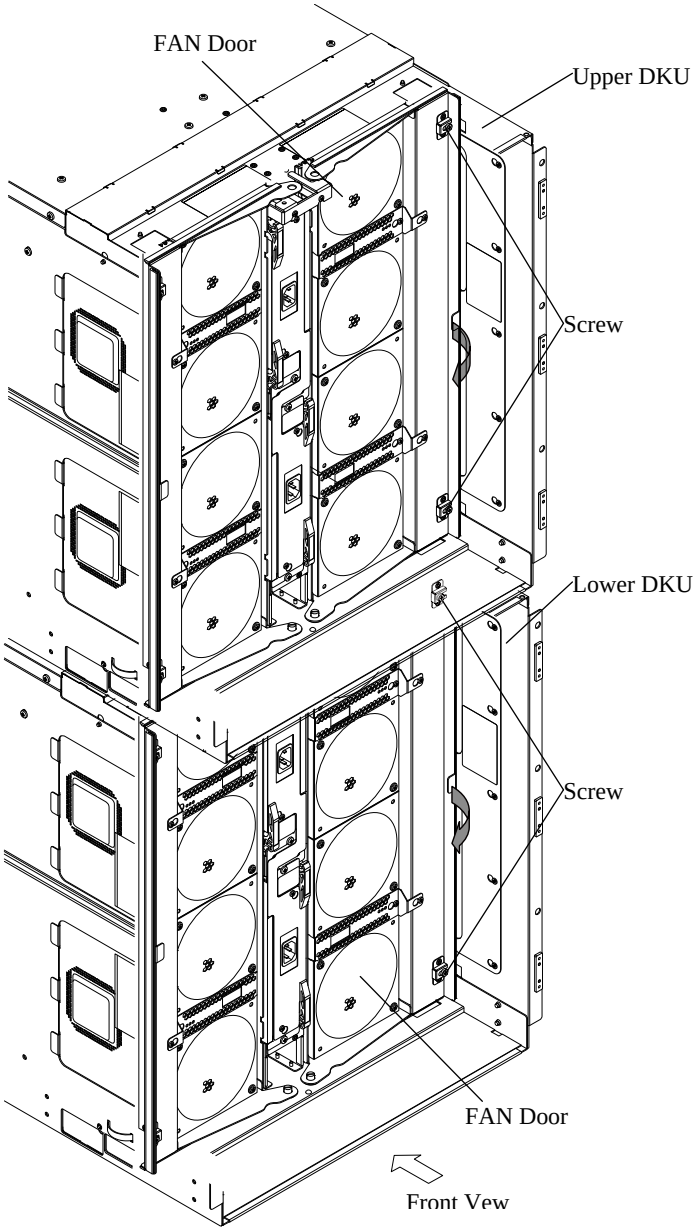

Fig. 3.12.4.4-3 FAN Door Opening

Copyright © 2010, Hitachi, Ltd.

b. Loosen the screw of the front right side of the upper DKU, and remove the cover.

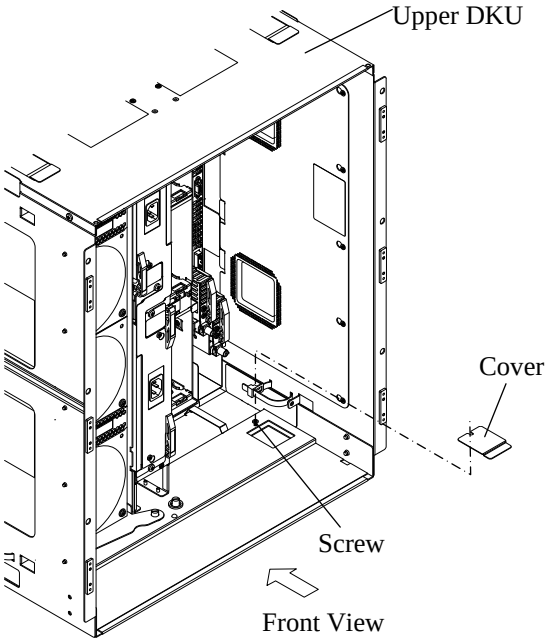

Fig. 3.12.4.4-4 Removal of Cover

c. Loosen the screw of the front right side of the lower DKU, and remove the cover.

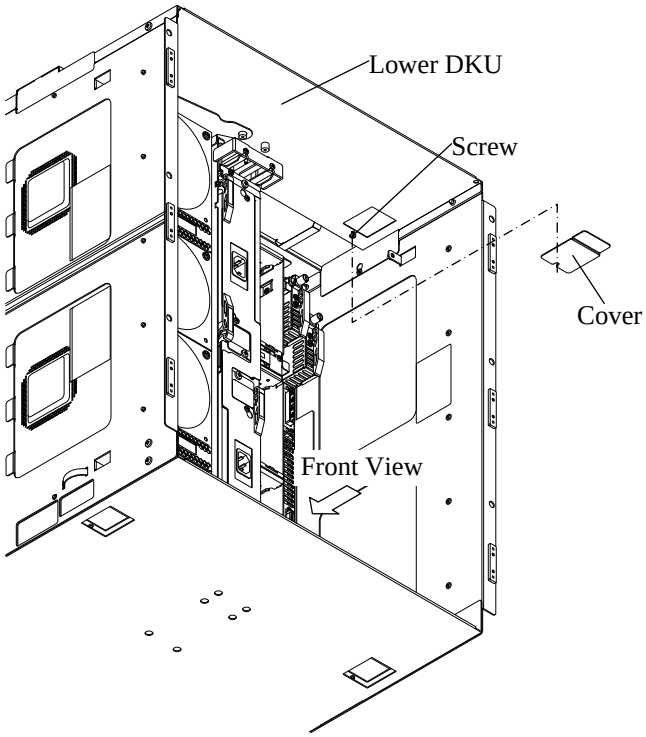

Fig. 3.12.4.4-5 Removal of Cover

Copyright © 2010, Hitachi, Ltd.

d. Pass the cables from the upper DKUs to the lower DKU.

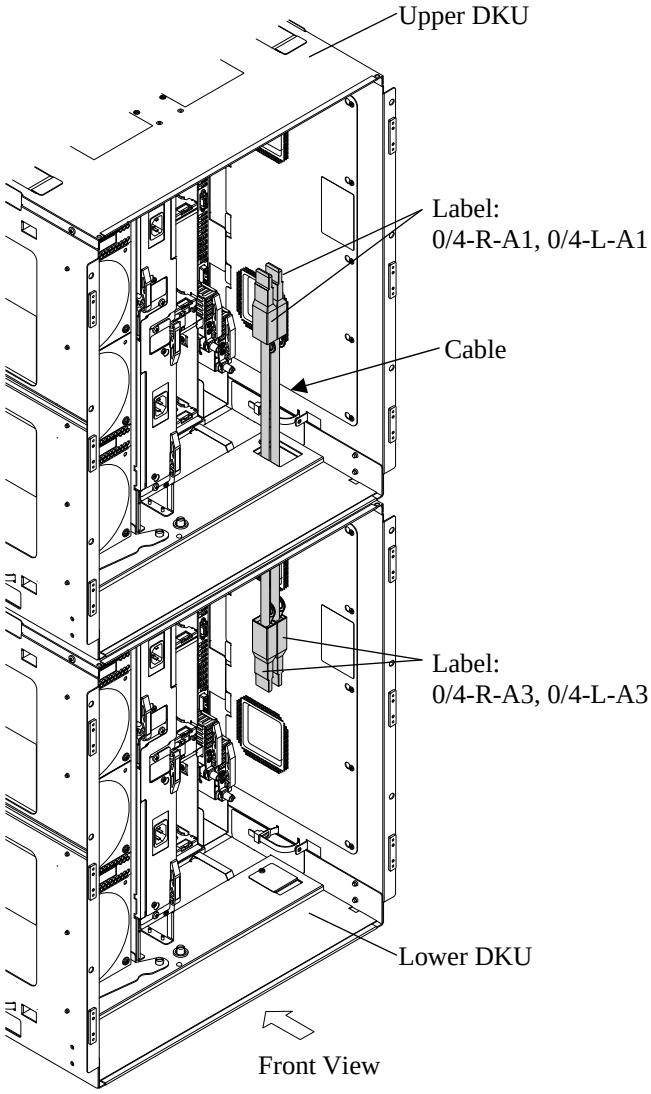

Fig. 3.12.4.4-6 Attachment of Cables

Copyright © 2010, 2011, Hitachi, Ltd.

e. Release the repeat binder at the front right side of upper DKU, and wire the cables.
f. Remove the caps from the cables. Connect the cables with the SSW PCBs in the upper DKU after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).
In this procedure, do not connect the cables with the SSW PCBs in the lower DKU.

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

g. Bundle and secure the cables with the repeat binder.
h. Close the two FAN doors of the front right side of the DKUs, and tighten the four screws.

3.12.4.5 Installation Procedure of Device Interface Cable HUU (DKC-F710I-HUUC)

Installation Condition

DKC-F710I-HUUC is a cable option to connect between DKUs in the same frame with the high performance model.
When the LFF DKU (DKU for 3.5 inch Drive) is added in the upper level of the LFF DKU, or when the SFF DKU (DKU for 2.5 inch Drive) is added in the upper level of the SFF DKU, with the high performance model, this option is required to connect.
Refer to below Table 3.12.4.5-1 for the condition of DKC-F710I-HUUC installation, and go to the appropriate page.

Table 3.12.4.5-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable HUU (DKC-F710I-HUUC) is required to install.	INST03-12C-1180
2	When Device Interface Cable HUU (DKC-F710I-HUUC) is not required to install.	INST03-12C-1440

3.12.4.6 Installation Procedure of Device Interface Cable US (DKC-F710I-USC)

Installation Condition

DKC-F710I-USC is a cable option to connect between LFF DKU (DKU for 3.5 inch Drive) and SFF DKU (DKU for 2.5 inch Drive) in the same frame.
When the SFF DKU is added in the upper level of the LFF DKU, or when the LFF DKU is added in the upper level of the SFF DKU, this option is required to connect.
Refer to below Table 3.12.4.6-1 for the condition of DKC-F710I-USC installation, and go to the appropriate page.

Table 3.12.4.6-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable US (DKC-F710I-USC) is required to install.	INST03-12C-1450
2	When Device Interface Cable US (DKC-F710I-USC) is not required to install.	INST03-12C-1790

d. Pass the cables from the upper DKU to the lower DKU.

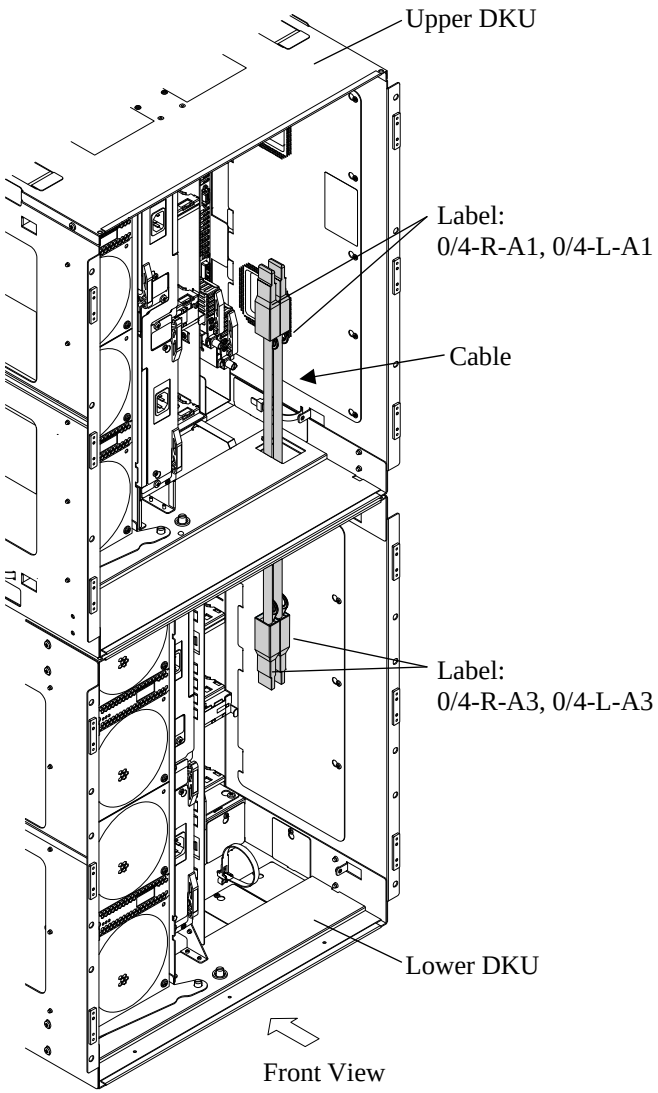

Fig. 3.12.4.6-5 Attachment of Cables

Copyright © 2010, 2011, Hitachi, Ltd.

e. Release the repeat binder at the front right side of upper DKU, and wire the cables.
f. Remove the caps from the cables. Connect the cables with the SSW PCBs in the upper DKU after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).
In this procedure, do not connect the cables with the SSW PCBs in the lower DKU.

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

g. Bundle and secure the cables with the repeat binder.
h. Close the two FAN doors of the front right side of the DKUs, and tighten the four screws.

3.12.4.7 Installation Procedure of Device Interface Cable HUS (DKC-F710I-HUSC)

Installation Condition

DKC-F710I-HUSC is a cable option to connect between LFF DKU (DKU for 3.5 inch Drive) and SFF DKU (DKU for 2.5 inch Drive) in the same frame with the high performance model. When the SFF DKU is added in the upper level of the LFF DKU, or when the LFF DKU is added in the upper level of the SFF DKU, with the high performance model, this option is required to connect.
Refer to below Table 3.12.4.7-1 for the condition of DKC-F710I-HUSC installation, and go to the appropriate page.

Table 3.12.4.7-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable HUS (DKC-F710I-HUSC) is required to install.	INST03-12C-1800
2	When Device Interface Cable HUS (DKC-F710I-HUSC) is not required to install.	INST03-12C-2060

3.12.4.8 Installation Procedure of Device Interface Cable RLEX (DKC-F710I-RLEXC)

Installation Condition

DKC-F710I-RLEXC is a cable option to connect between DKUs in the different chassis. When connecting the DKUs in the different chassis, this option is required to connect. Refer to below Table 3.12.4.8-1 for the condition of DKC-F710I-RLEXC installation, and go to the appropriate page.

Table 3.12.4.8-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable RLEX (DKC-F710I-RLEXC) is required to install.	INST03-12C-2080
2	When Device Interface Cable RLEX (DKC-F710I-RLEXC) is not required to install.	INST03-12C-2870

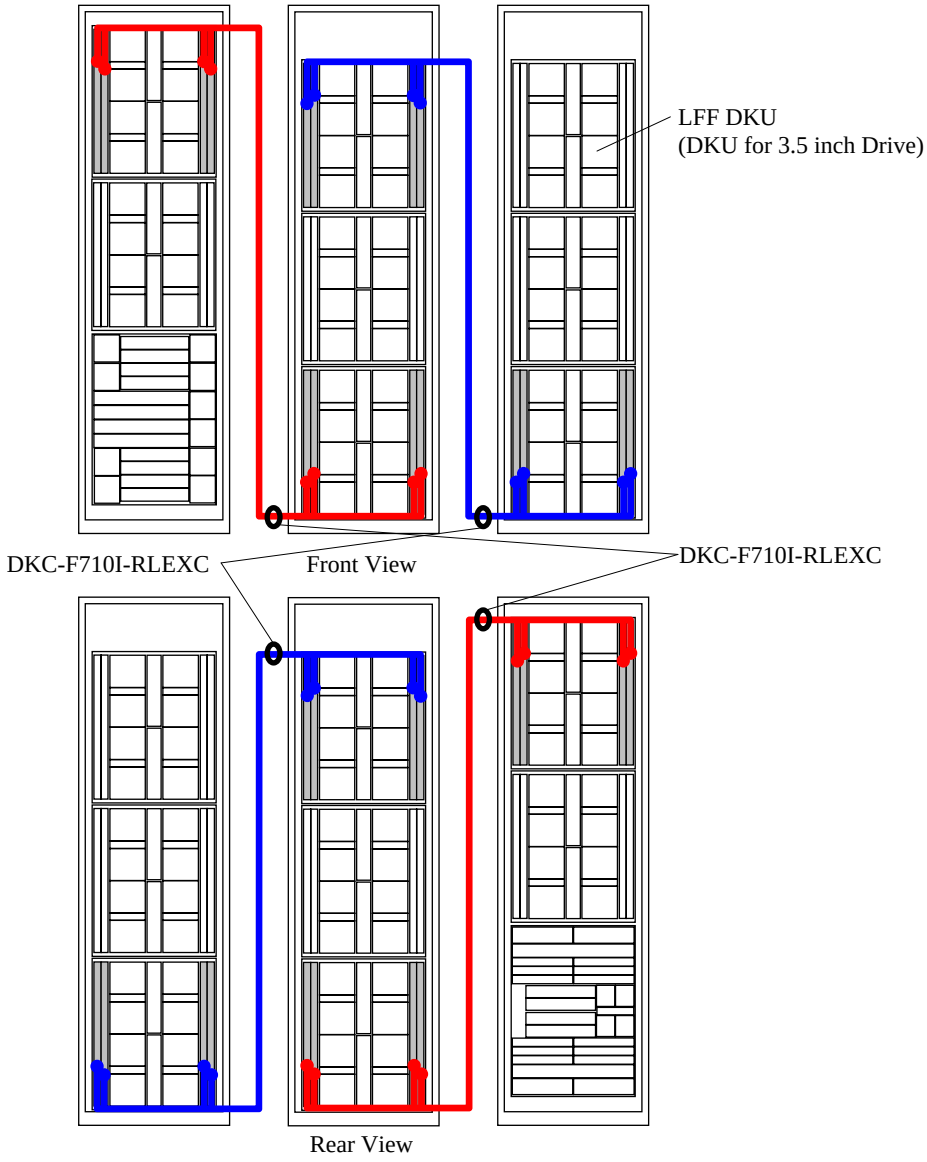

Fig. 3.12.4.8-1 Mounting Position of DEV Interface Cable

Copyright © 2010, 2011, Hitachi, Ltd.

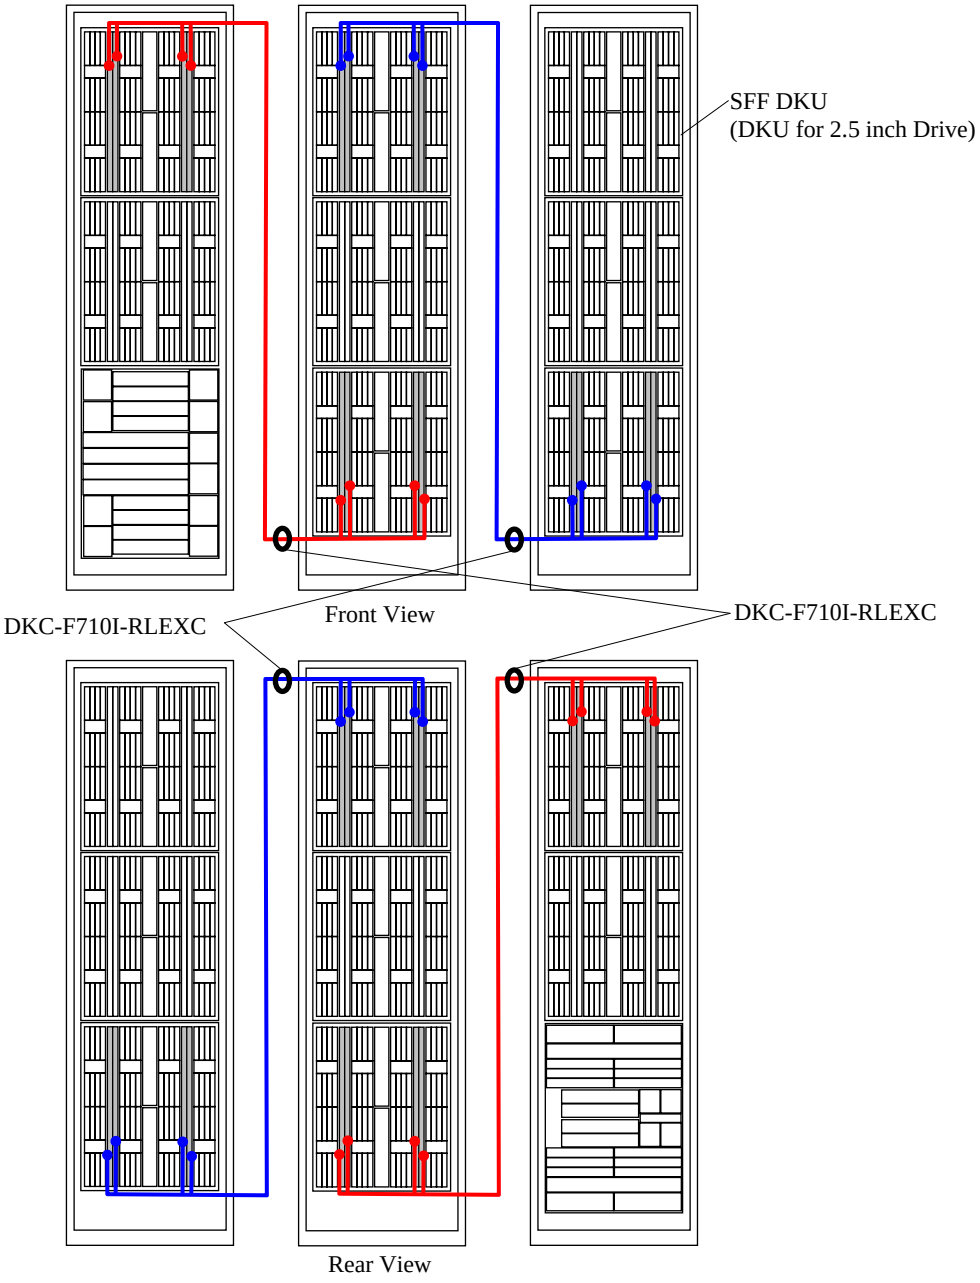

Fig. 3.12.4.8-2 Mounting Position of DEV Interface Cable

When the Additional RACK is Installed in the Right Side of the Storage System

1. Pattern of Cable Connection
   There are four kinds of pattern in all that increases the Device Interface Cable RLEX (DKC-F710I-RLEXC) at the right side of the RACK by the combination of the DKU.
   When increasing DKC-F710I-RLEX at the left side of the rack, refer to the page INST03-12C-2480.
   In this procedure, the existing RACK is called a connection source RACK, and newly increased RACK is called a connection destination RACK.
   Before starting operation according to this procedure, understand each process name and the position.

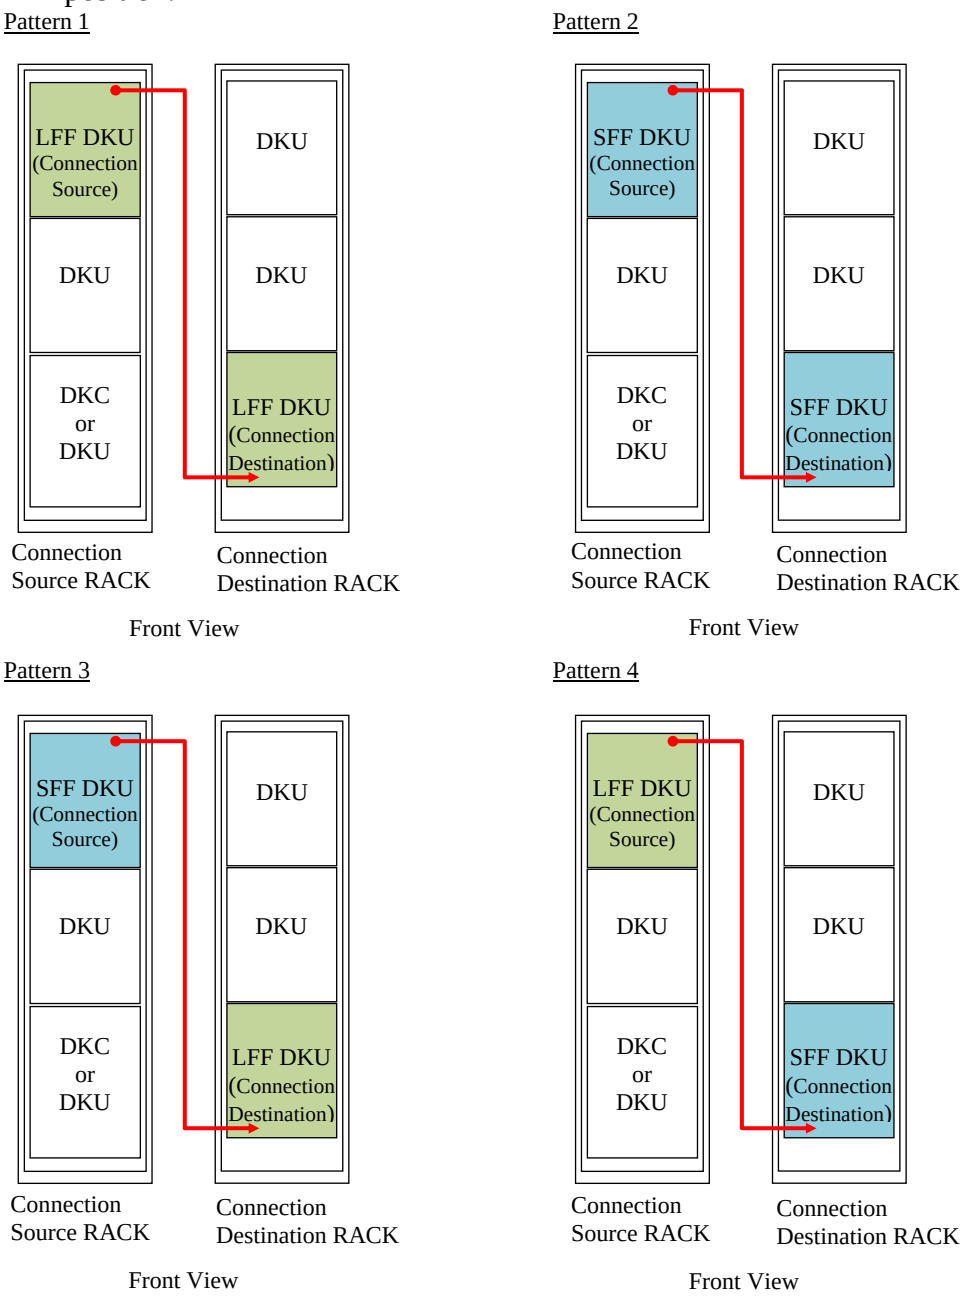

Fig. 3.12.4.8-3 Pattern of Cable Connection (Right Side Increasing)

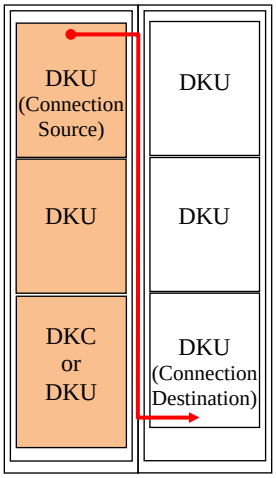
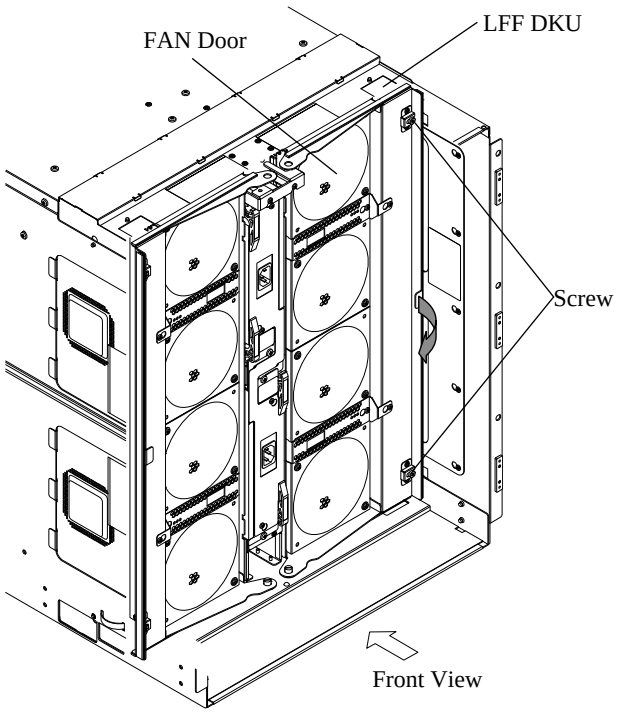
Copyright © 2010, Hitachi, Ltd.

2. Cable Wiring between RACKs
   a. Loosen all screws of the front right side of the DKU (two screws in each DKU) that is installed in the connection source RACK, and open the FAN door.





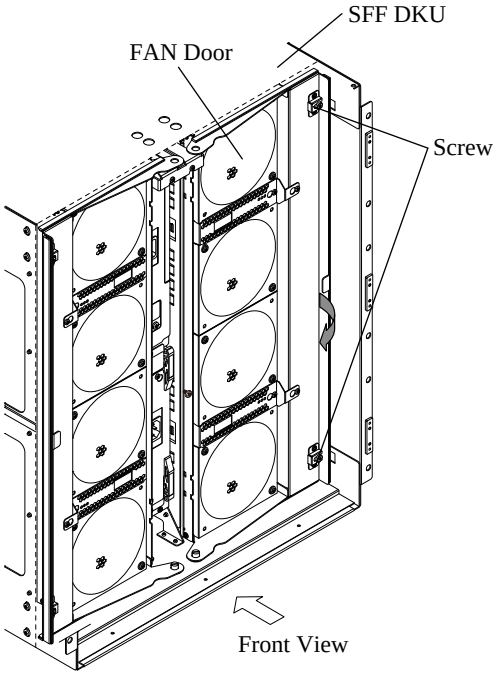


Fig. 3.12.4.8-4 FAN Door Opening

Copyright © 2010, 2011, Hitachi, Ltd.

b. Loosen all screws of the front right side of the DKU (five screws in each DKU) that is installed in the connection source RACK, and remove the plate.

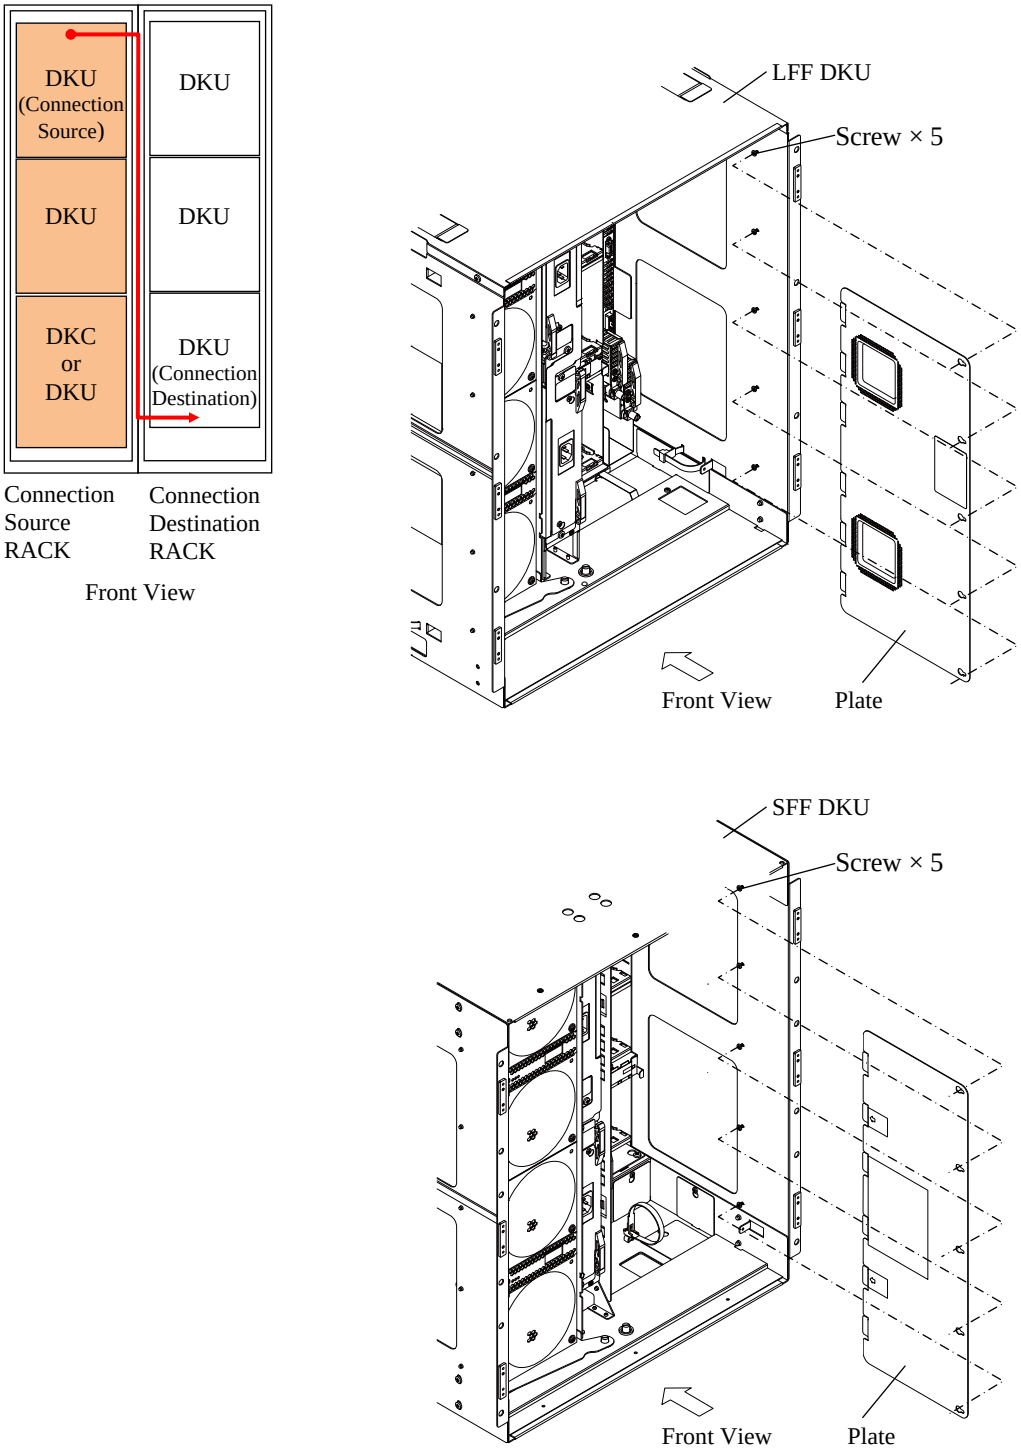

Fig. 3.12.4.8-5 Removal of Plates

Copyright © 2010, Hitachi, Ltd.

c. Loosen the screw of the front right side of the connection source DKU, and remove the cover.

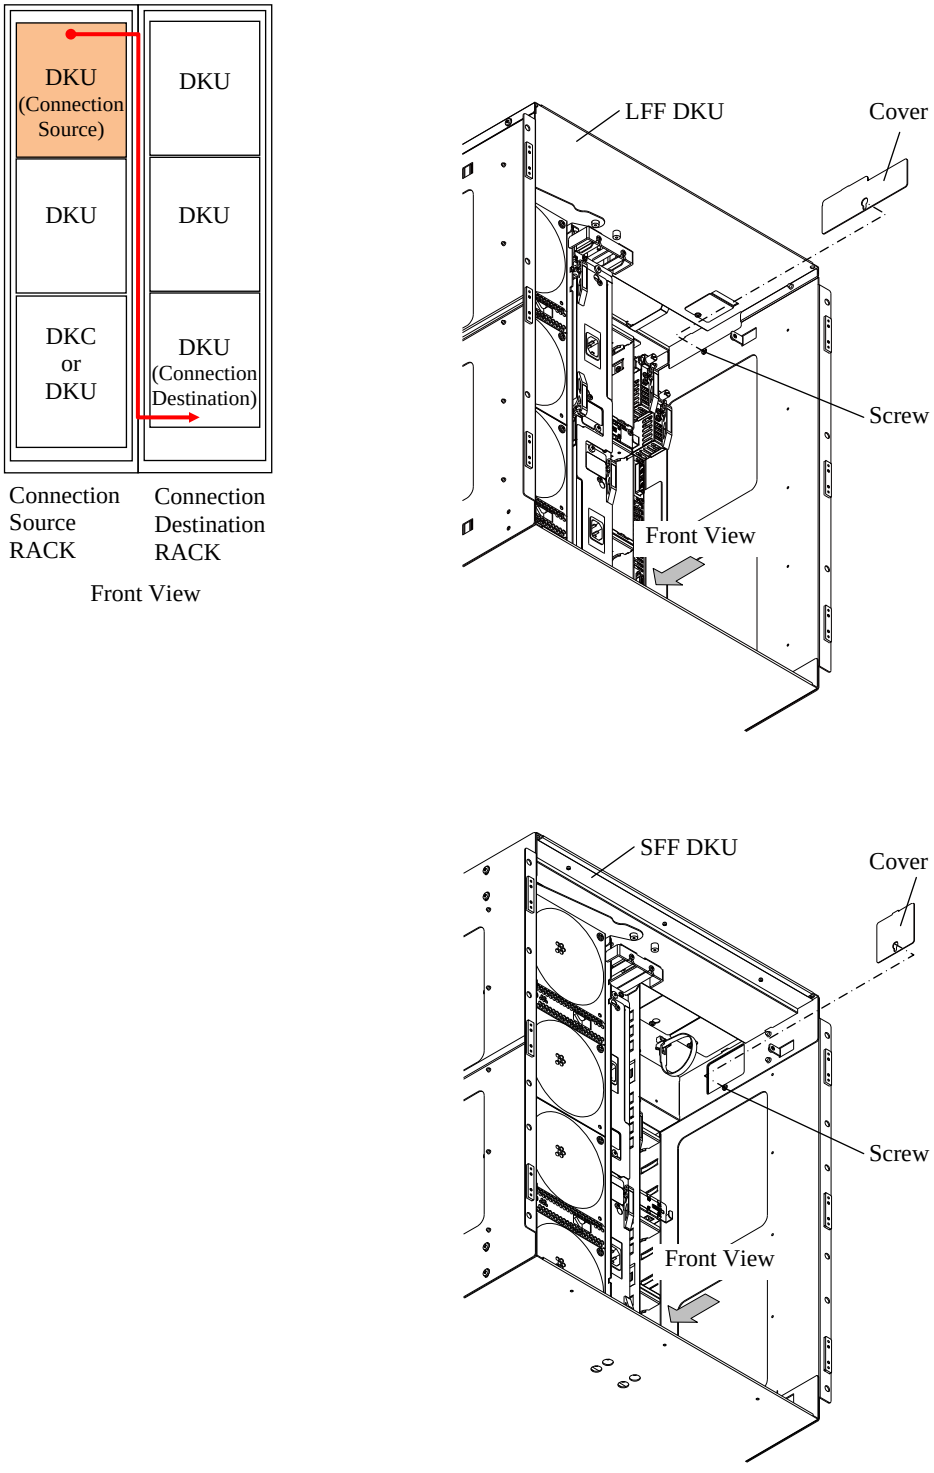

Fig. 3.12.4.8-6 Removal of Cover

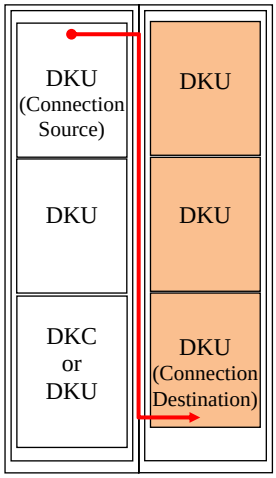
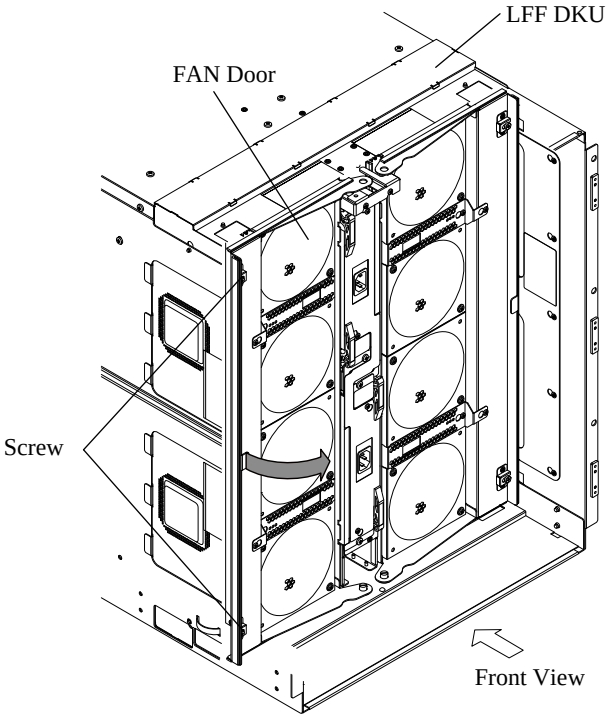
Copyright © 2010, Hitachi, Ltd.

d. Loosen all screws of the front left side of the DKU (two screws in each DKU) that is installed in the connection destination RACK, and open the FAN door.





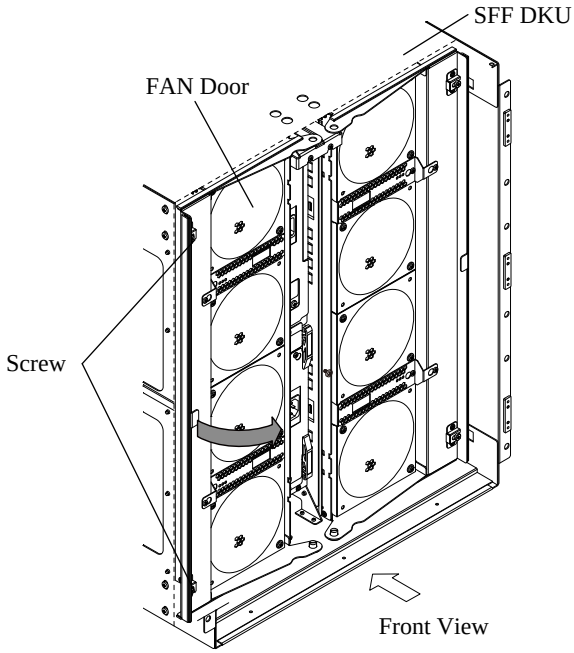


Fig. 3.12.4.8-7 FAN Door Opening

Copyright © 2010, 2011, Hitachi, Ltd.

e. Loosen all screws of the front left side of the DKU (five screws in each DKU) that is installed in the connection destination RACK, and remove the plate.

Copyright © 2010, 2011, Hitachi, Ltd.

f. Loosen the screw of the front left side of the connection destination DKU, and remove the cover.

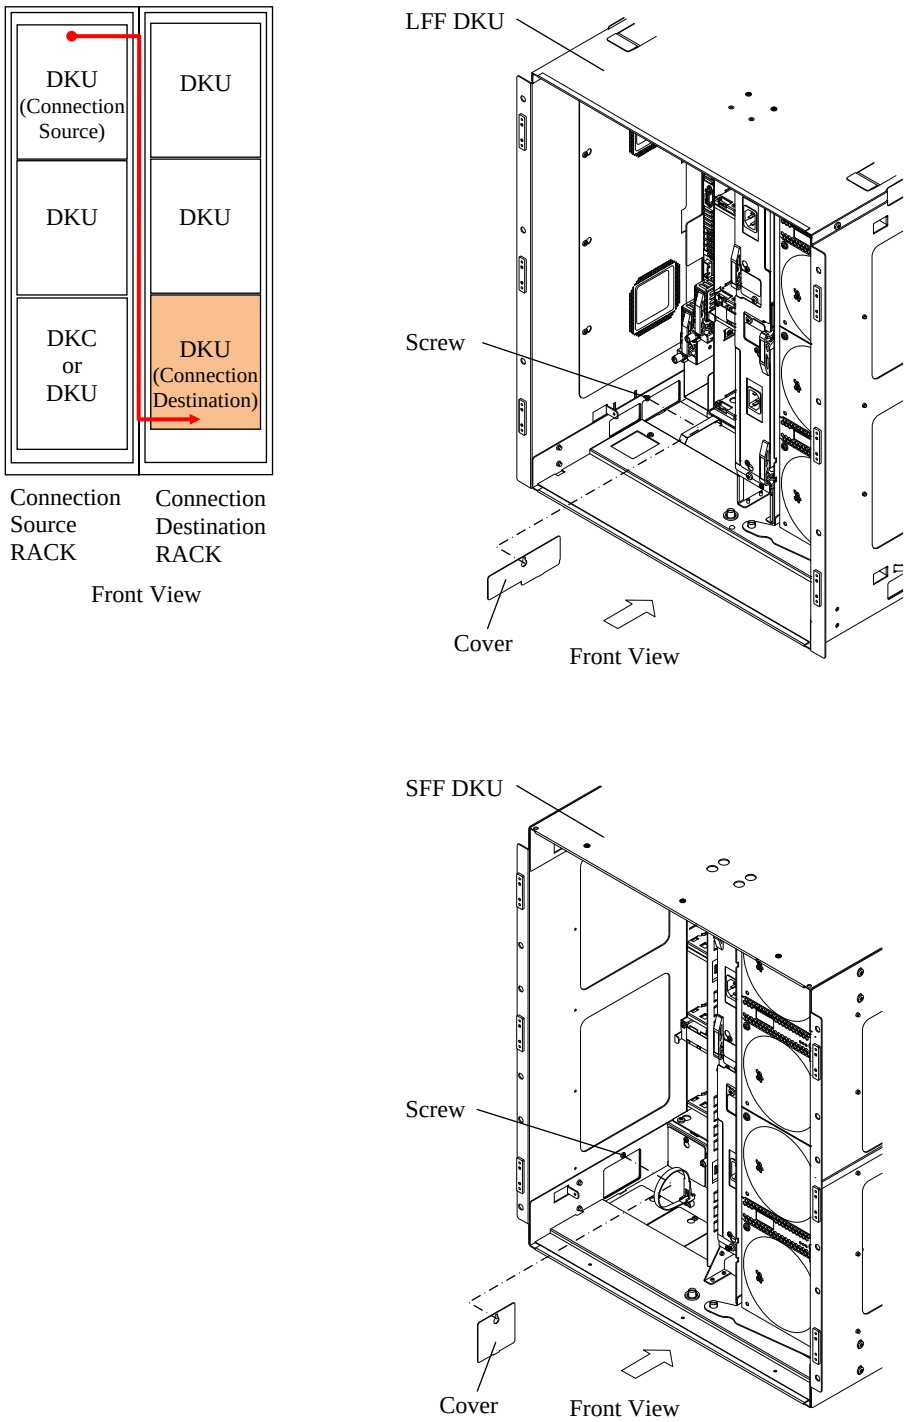

Fig. 3.12.4.8-9 Removal of Cover

Copyright © 2010, 2011, Hitachi, Ltd.

g. Wire the cables from upper part to lower part of the front side of the RACK.
h. Pull the wired cables into the front right side of the connection source DKU.

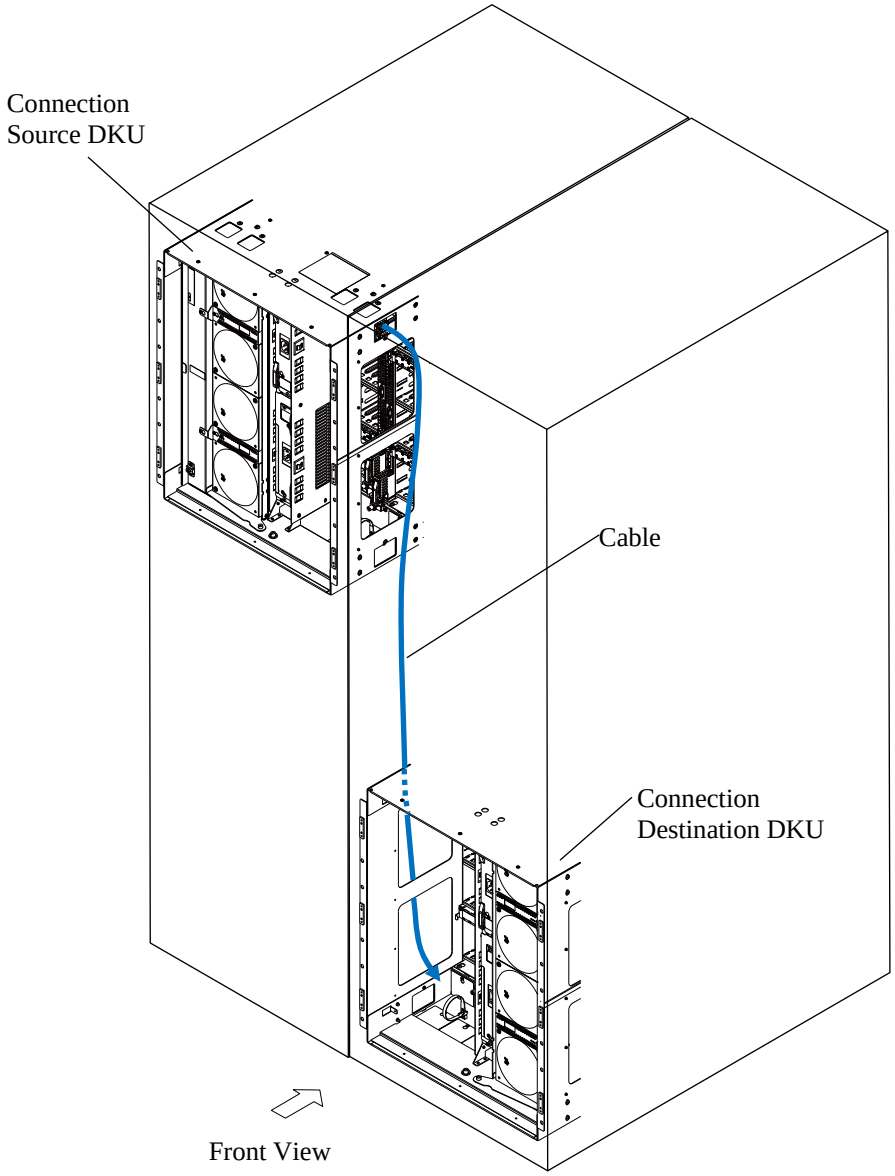

Fig. 3.12.4.8-10 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

3. Cable Installation of the front side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU.

a. Remove the two hangers from the front right side of the Connection Source DKU.
b. Insert the cables (1/5-R-A3 and 1/5-L-A3) into the clearance in the upper part of the DKUPS.
c. Wire the cables (0/4-R-A3 and 0/4-L-A3). However, do not connect the cables with the SSW PCB at this stage.
d. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws. (Refer to the Fig. 3.12.4.8-4.)

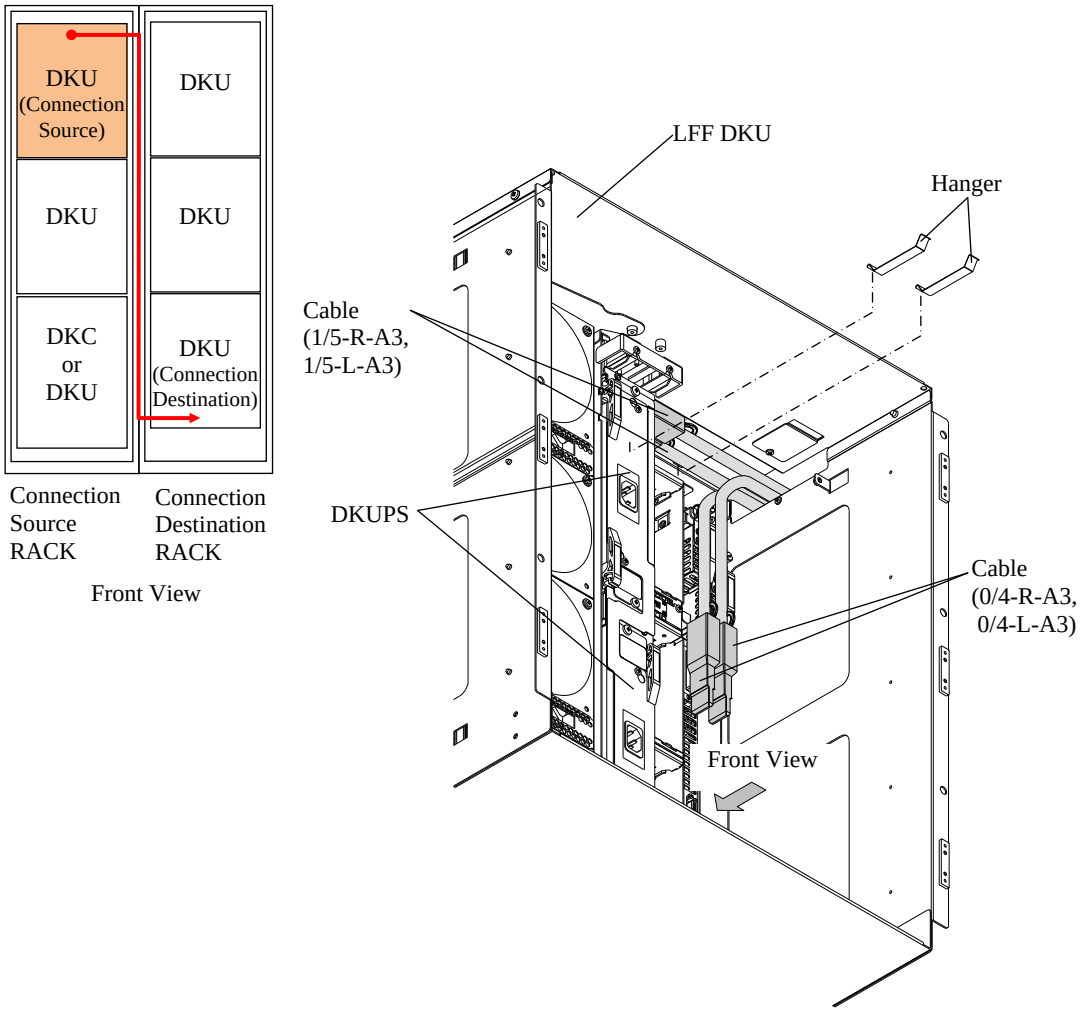

Fig. 3.12.4.8-11 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-7.)
f. Remove the two hangers.
g. Reach into the entry points of the right side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCB at this stage.
h. Install the two hangers.
i. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws.

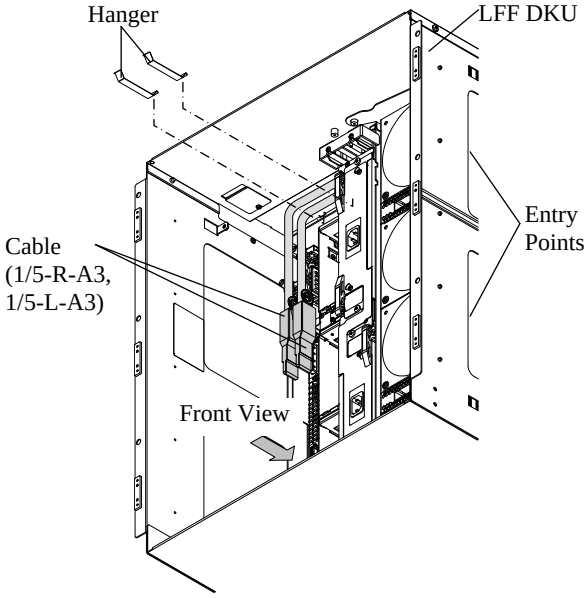

Fig. 3.12.4.8-12 Attachment of Cables

j. Loosen the two screws of front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-4.)
k. Install the two hangers, and fix the cables.

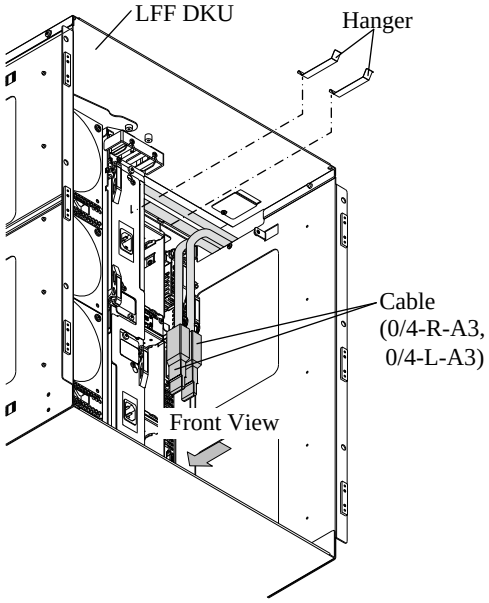

Fig. 3.12.4.8-13 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

When the Connection Source DKU is the SFF DKU

a. Insert the cables (1/5-R-A3 and 1/5-L-A3) into the clearance of the upper part of the DKUPS of the front right side of the connection source DKU.
b. Wire the cables (0/4-R-A3 and 0/4-L-A3). However, do not connect the cables with the SSW PCB at this stage.
c. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.8-4.)

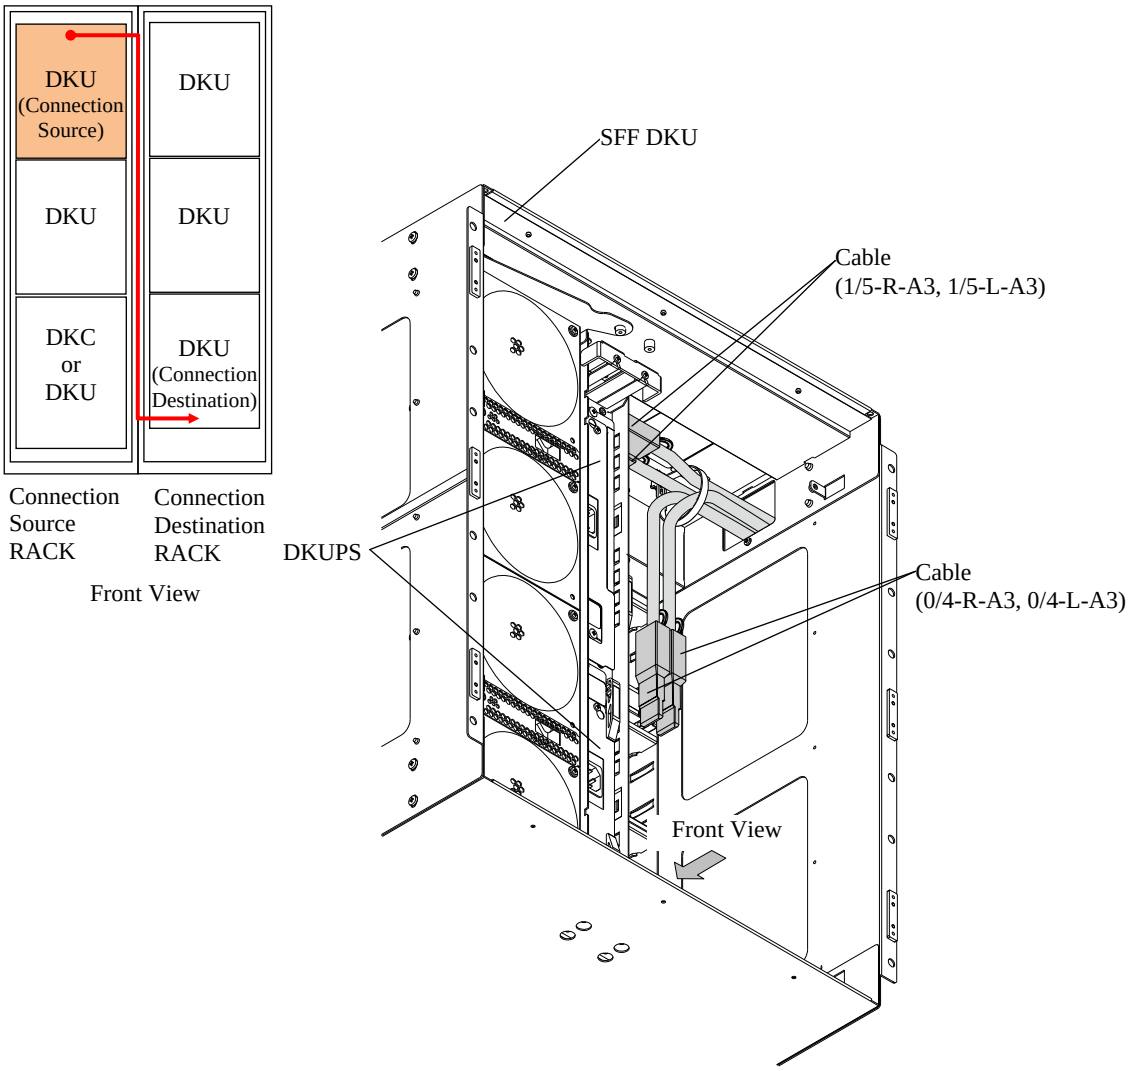

Fig. 3.12.4.8-14 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

d. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-7.)
e. Reach into the entry points of the right side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCB at this stage.
f. Bundle the cables with the clamp tape.
g. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws.

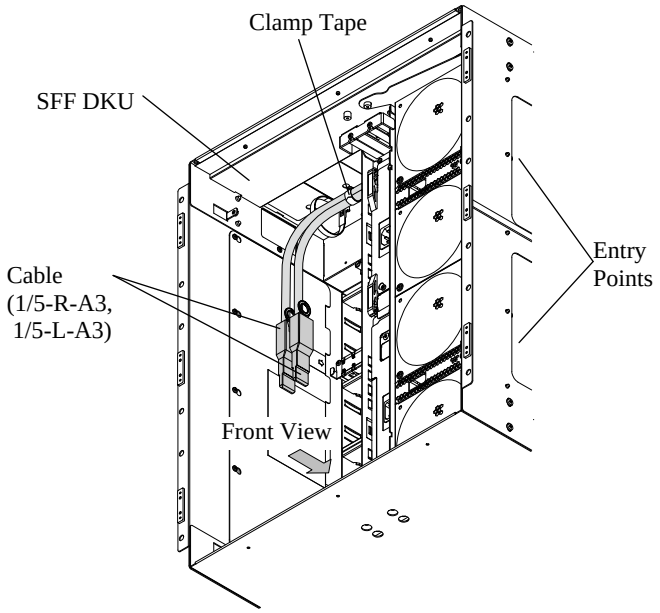

Fig. 3.12.4.8-15 Attachment of Cables

h. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-4.)
i. Fix the four cables with the repeat binder.

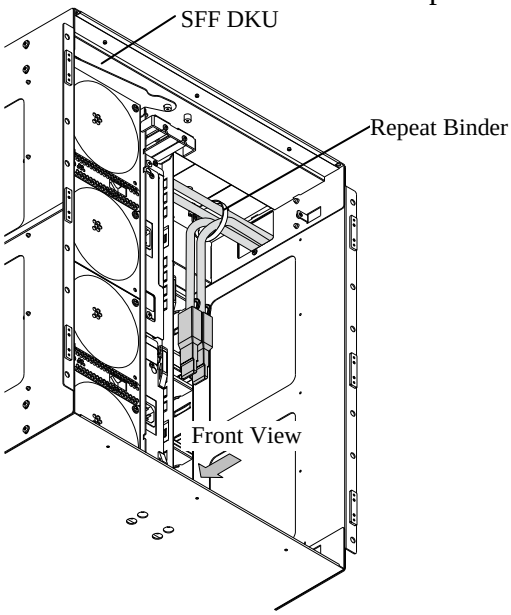

Fig. 3.12.4.8-16 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

4. Fixation of Cables
   a. Fix the four cables with the two repeat binders of the connection source RACK side.

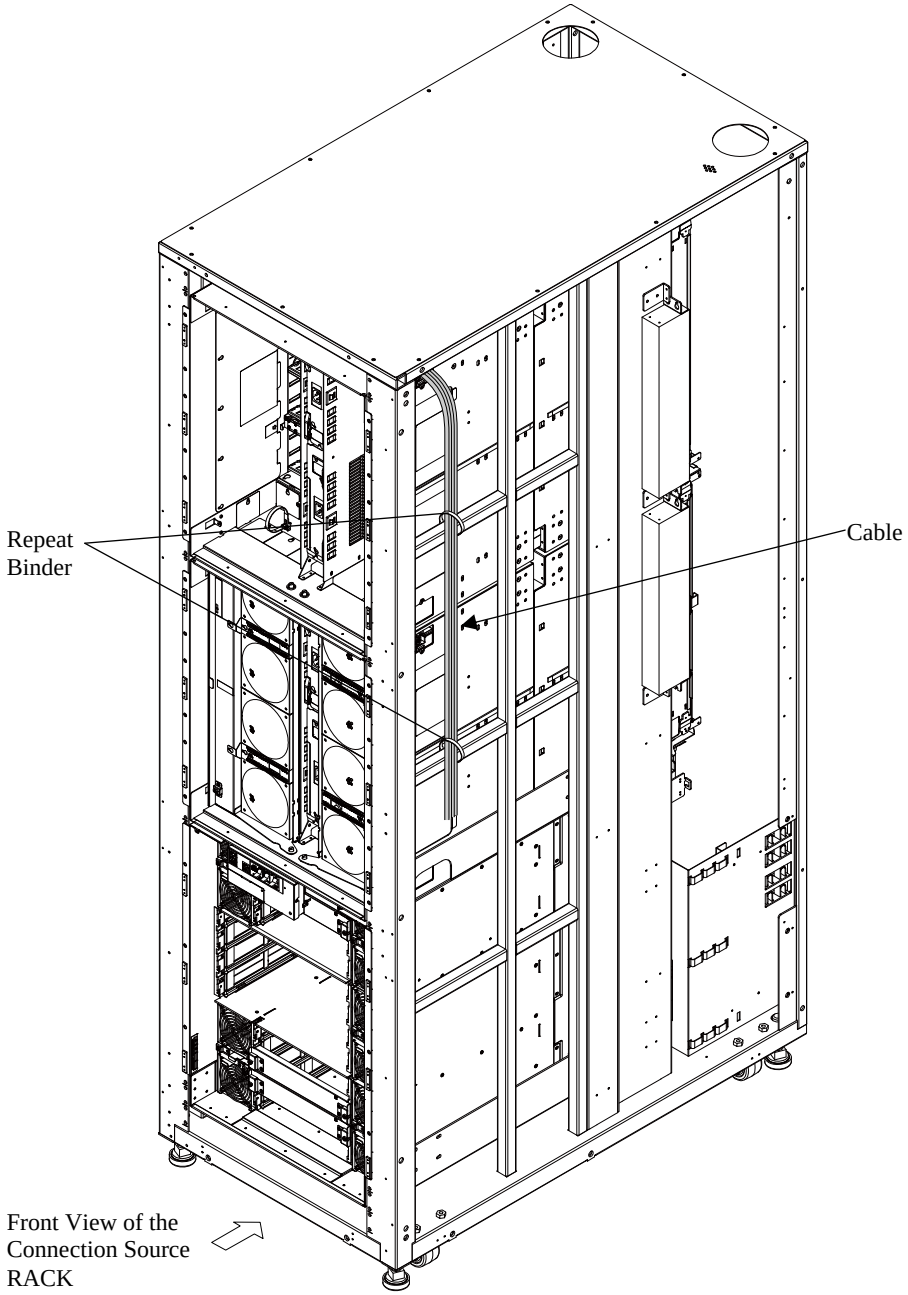

Fig. 3.12.4.8-17 Securing the Cables

Copyright © 2010, Hitachi, Ltd.

5. Cable Installation of the front side of the Connection Destination DKU

When the Connection Destination DKU is the LFF DKU

a. Pull the cables in from the front left side of the connection destination DKU.
b. Remove the two hangers.
c. Insert the cables (0/4-R-A1 and 0/4-L-A1) into the clearance of the lower part of the DKUPS.
d. Wire the cables (1/5-R-A1 and 1/5-L-A1).
e. Close the FAN door of the front left side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 3.12.4.8-7.)

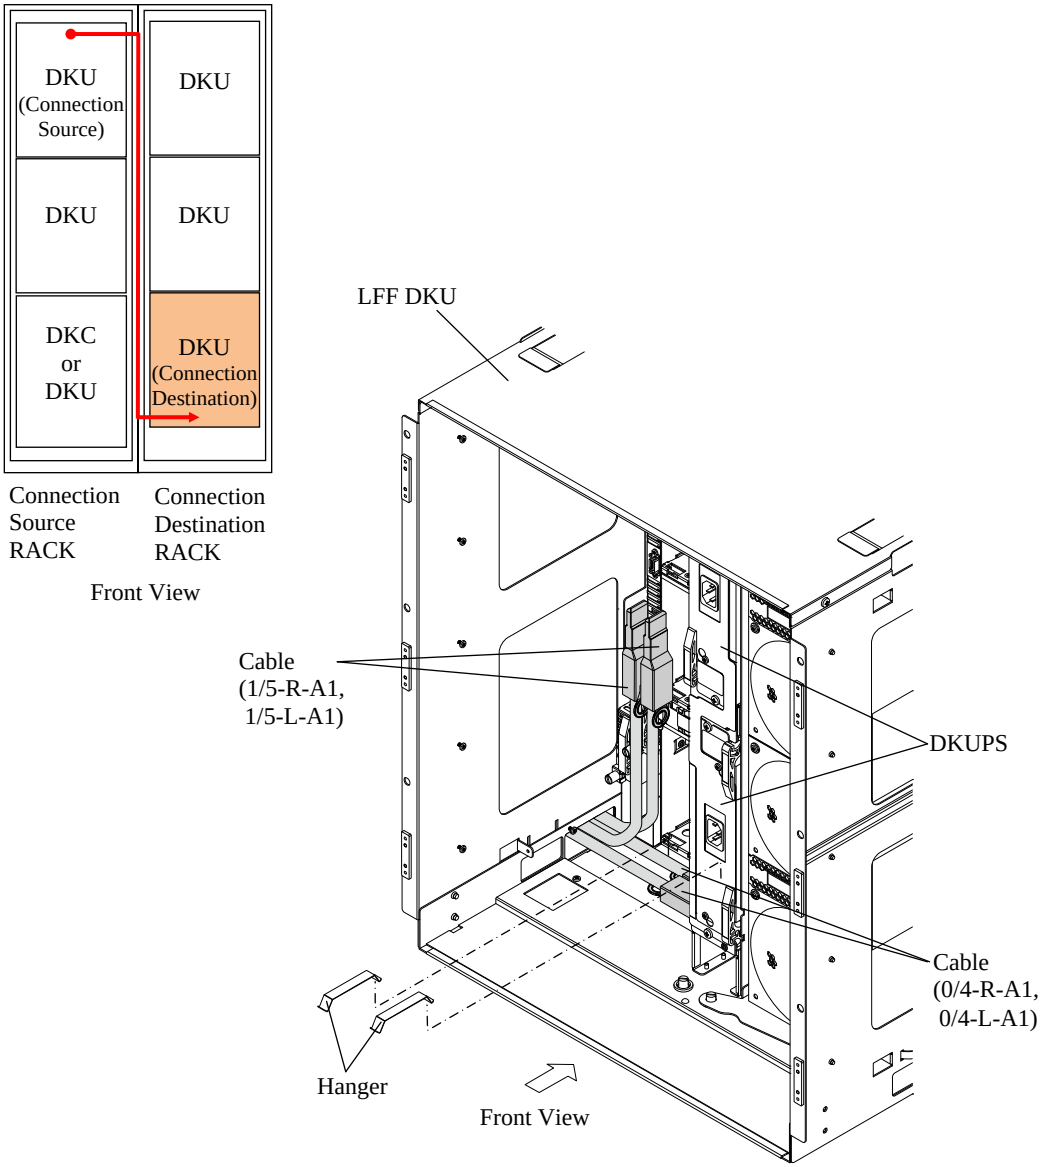

Fig. 3.12.4.8-18 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

f. Loosen the two screws of the front right side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-4.)
g. Remove the two hangers.
h. Reach into the entry points of the left side of the DKU, and pull the cables out from the lower part of the DKUPS by using both hands.
i. Remove the caps from the cables. Connect the cables with the SSW PCBs after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

j. Install the two hangers, and fix the cables.
k. Close the FAN door of the front right side of the connection destination DKU, and tighten the two screws.

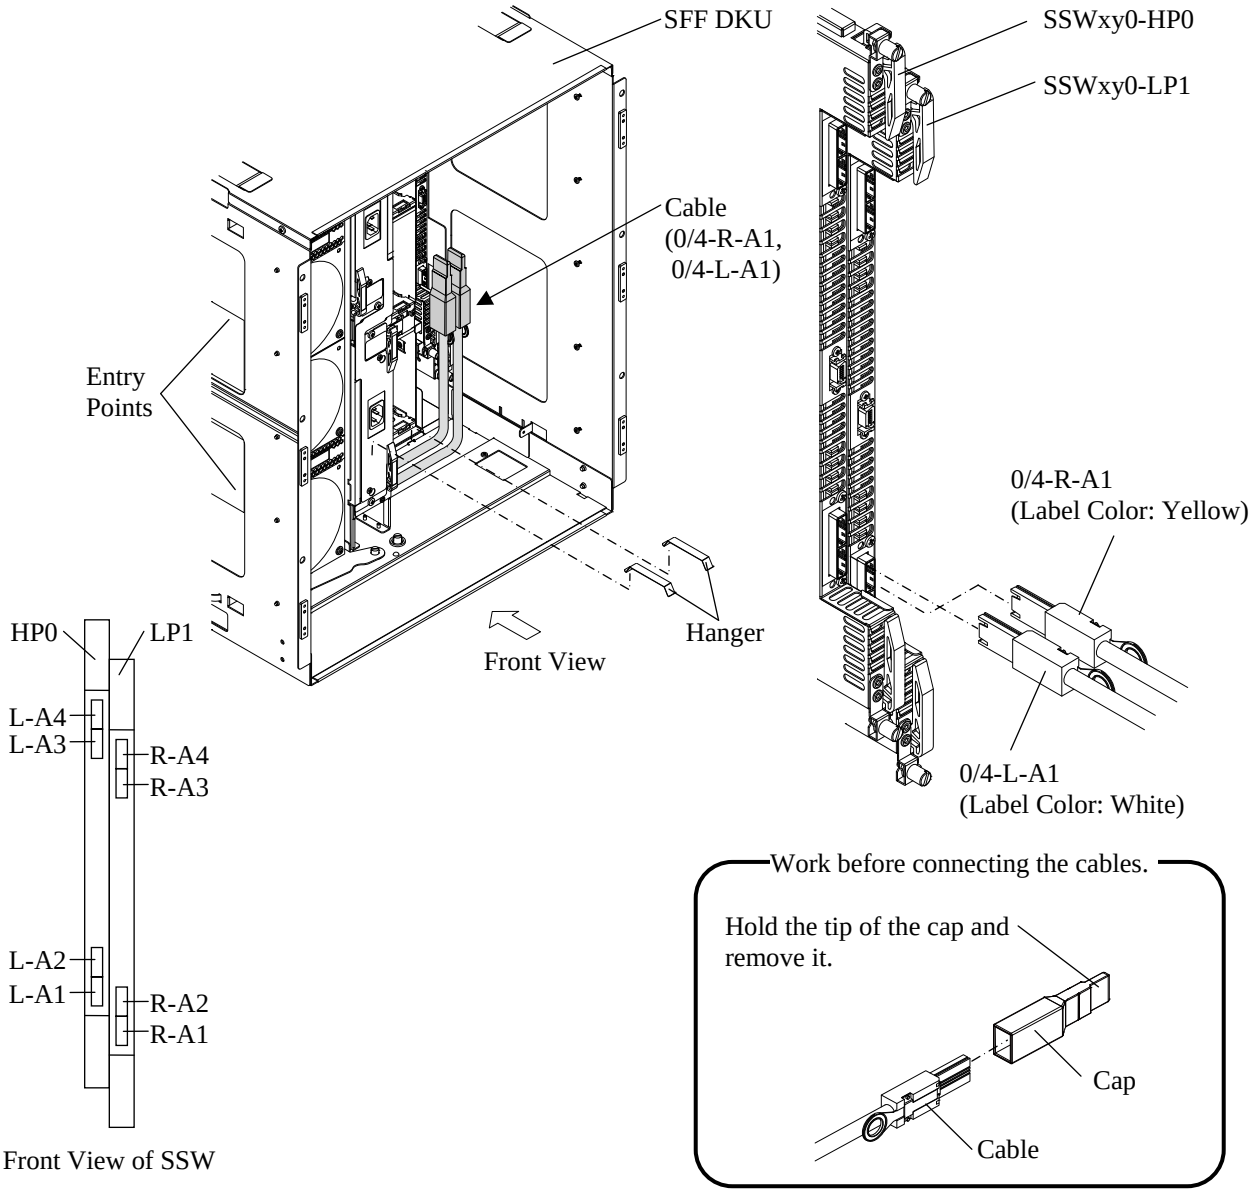

Fig. 3.12.4.8-19 Connection of Cables

6. Handling of Cable Extra Length
   a. Put the extra length of the cables into the clearance of the RACK.
   b. Install all removed plates in the front right side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 3.12.4.8-5.)
   c. Close all the FAN doors of the front right side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 3.12.4.8-4.)
   d. Install all removed plates in the front left side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 3.12.4.8-8.)
   e. Close all the FAN doors of the front left side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 3.12.4.8-7.)

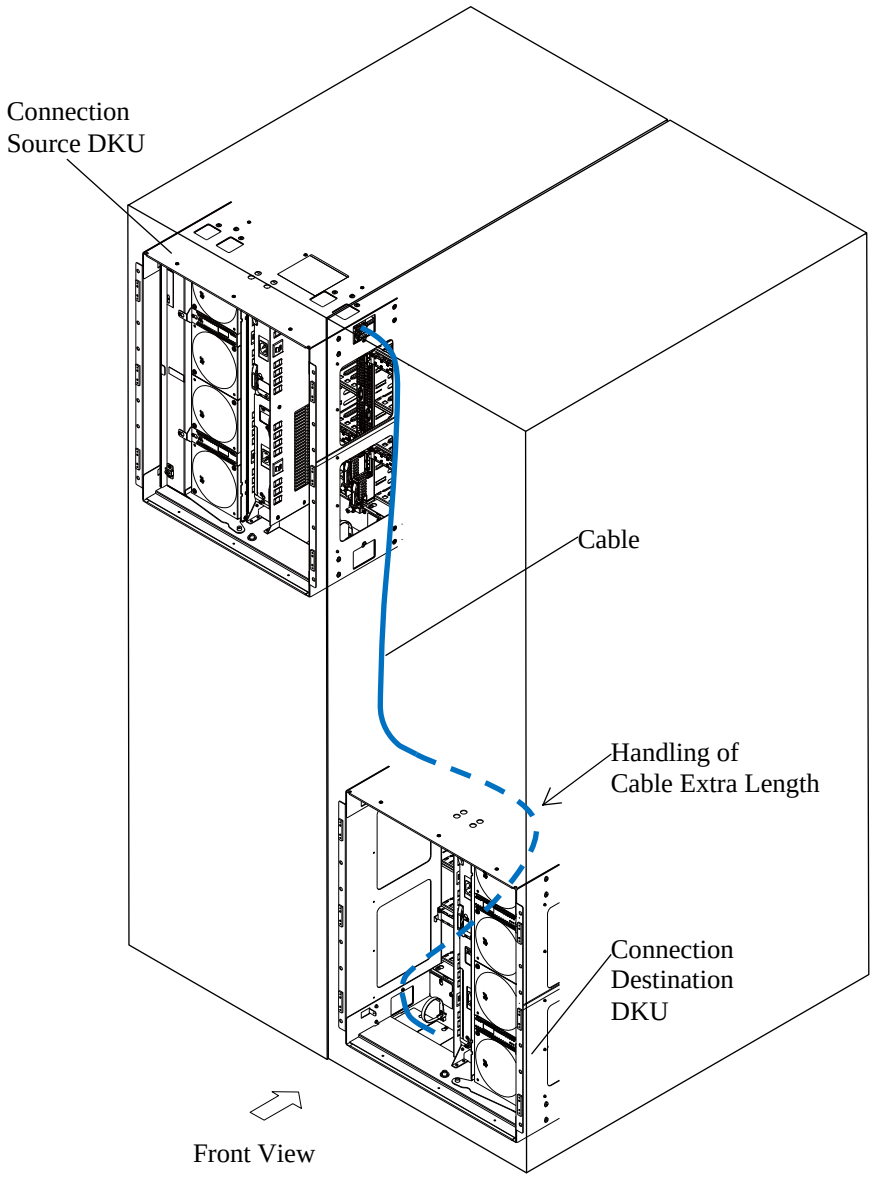

Fig. 3.12.4.8-24 Handling of Cable Extra Length

8. Cable Installation of the Rear Side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU

a. Remove the two hangers from the rear left side of the connection source DKU.
b. Insert the cables (2/6-R-A3 and 2/6-L-A3) in the clearance of the upper part of the DKUPS.
c. Wire the cables (3/7-R-A3 and 3/7-L-A3). However, do not connect the cables with SSW PCB at this stage.
d. Close the FAN door of the rear left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.8-25.)

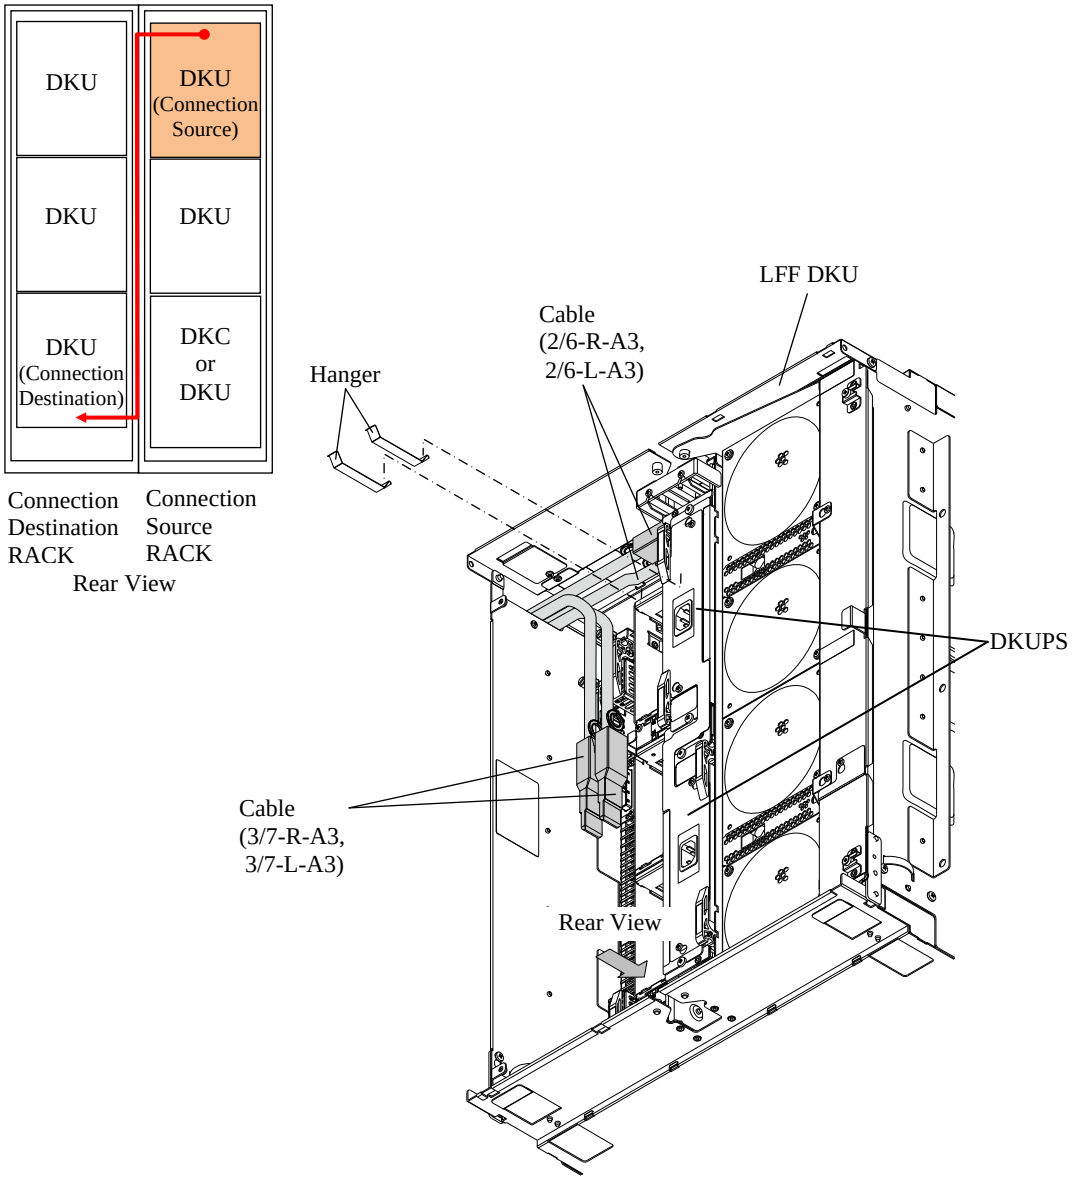

Fig. 3.12.4.8-30 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the rear right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-27.)
f. Remove the two hangers.
g. Pull the cables out from the upper part of the DKUPS, and wire the cables. However, do not connect the cables with the SSW PCB at this stage.
h. Install the two hangers, and fix the cables.
i. Close the FAN door of the rear right side of the connection source DKU, and tighten the two screws.

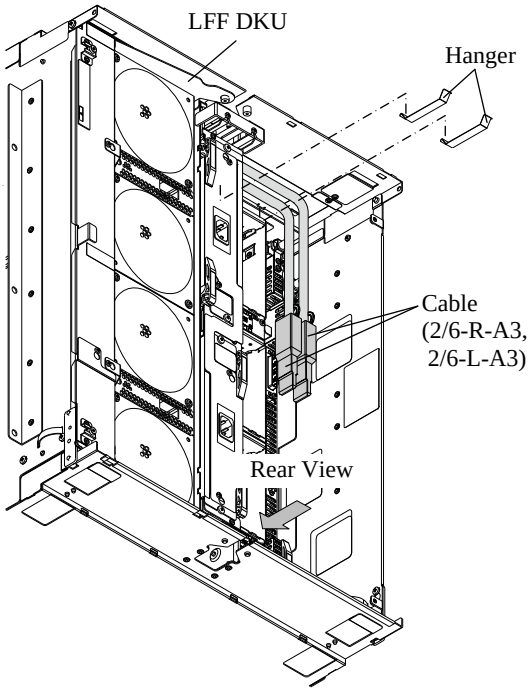

Fig. 3.12.4.8-31 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

j. Loosen the two screws of the rear left side of the DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-25.)
k. Install the two hangers, and fix the cables.

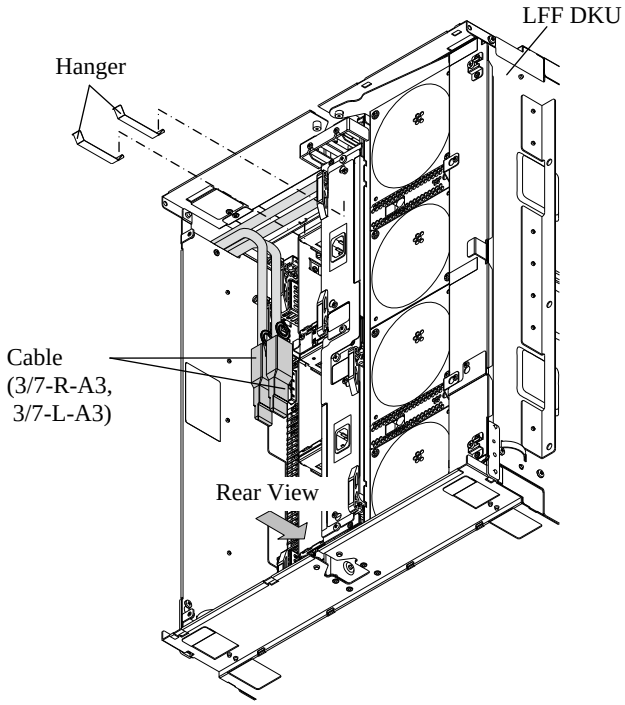

Fig. 3.12.4.8-32 Attachment of Cables

9. Fixation of Cables
   a. Fix the four cables with the two repeat binders of the DKU side.

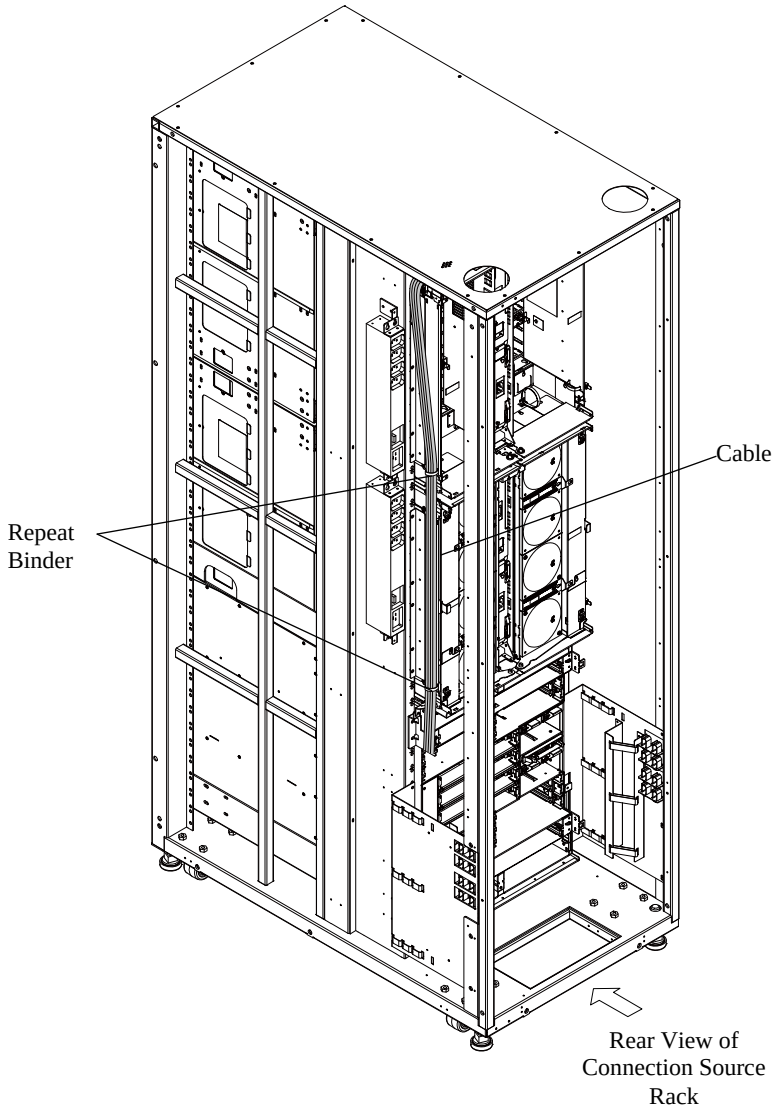

Fig. 3.12.4.8-36 Fixation of Cables

Copyright © 2010, Hitachi, Ltd.

10. Cable Installation of the Rear Side of the Connection Destination DKU

When the Connection Destination DKU is the LFF DKU

a. Pull the cables in from the rear right side of the connection destination DKU.
b. Remove the two hangers.
c. Insert the cables (3/7-R-A1 and 3/7-L-A1) in the clearance of the lower part of the DKUPS.
d. Wire the cables (2/6-R-A1 and 2/6-L-A1).
e. Close the FAN door of the rear right side of the connection destination DKU, and tighten the two screws.

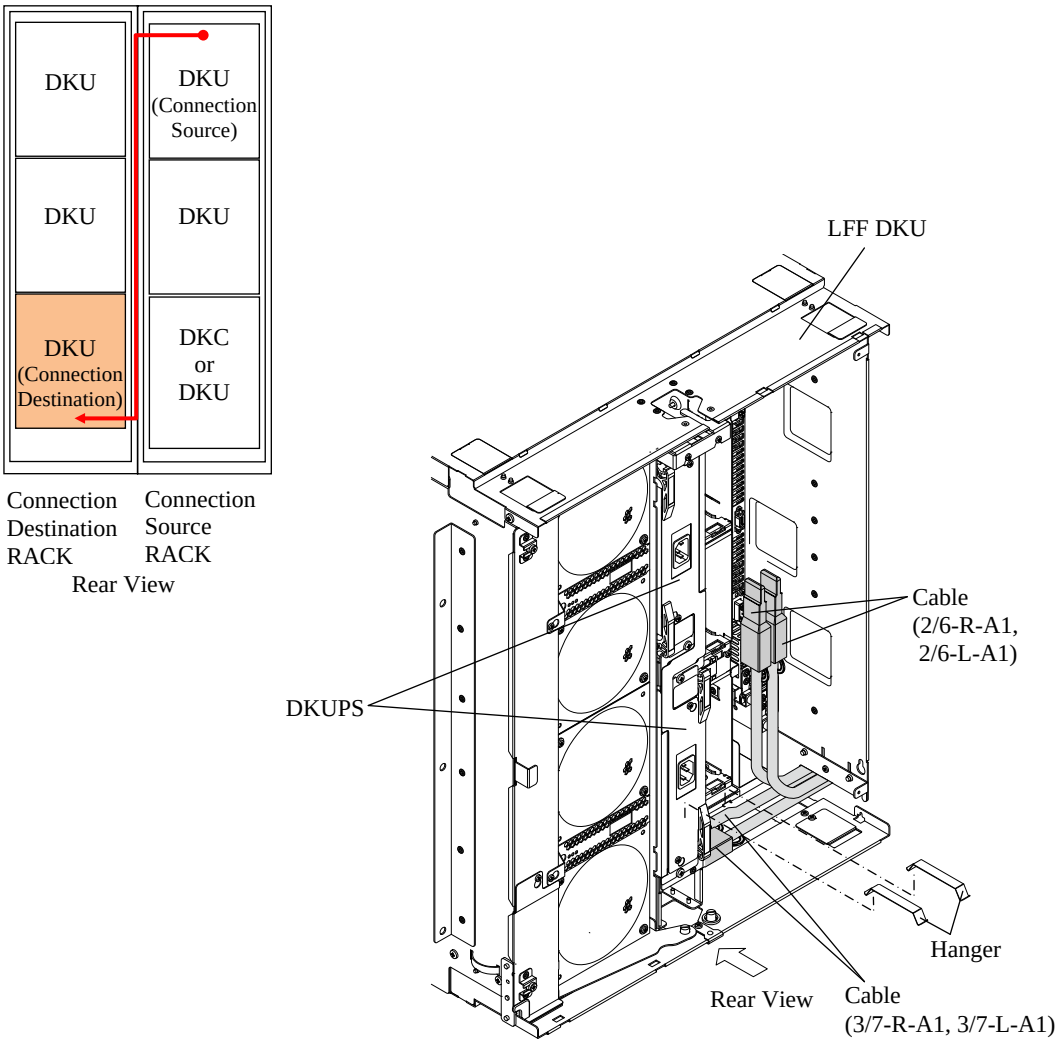

Fig. 3.12.4.8-37 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

f. Loosen the two screws of the rear left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-25.)
g. Remove the two hangers.
h. Pull the cables out from the lower part of the DKUPS, and wire the cables.
i. Remove the caps from the cables. Connect the cables with the SSW PCBs after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

j. Install the two hangers, and fix the cables.
k. Close the FAN door of the rear left side of the connection destination DKU, and tighten the two screws.

When the Additional RACK is Installed in the Left Side of the Storage System

1. Cable Installation
   There are four kinds of pattern in all that increases the Device Interface Cable RLEX (DKC-F710I-RLEXC) at the left side of the RACK by the combination of the DKU.
   In this procedure, the existing RACK is called a connection source RACK, and newly increased RACK is called a connection destination RACK. Equally, the existing DKU is called a connection source DKU, and newly increased DKU is called a connection destination DKU.
   Before starting operation according to this procedure, understand each process name and the position.

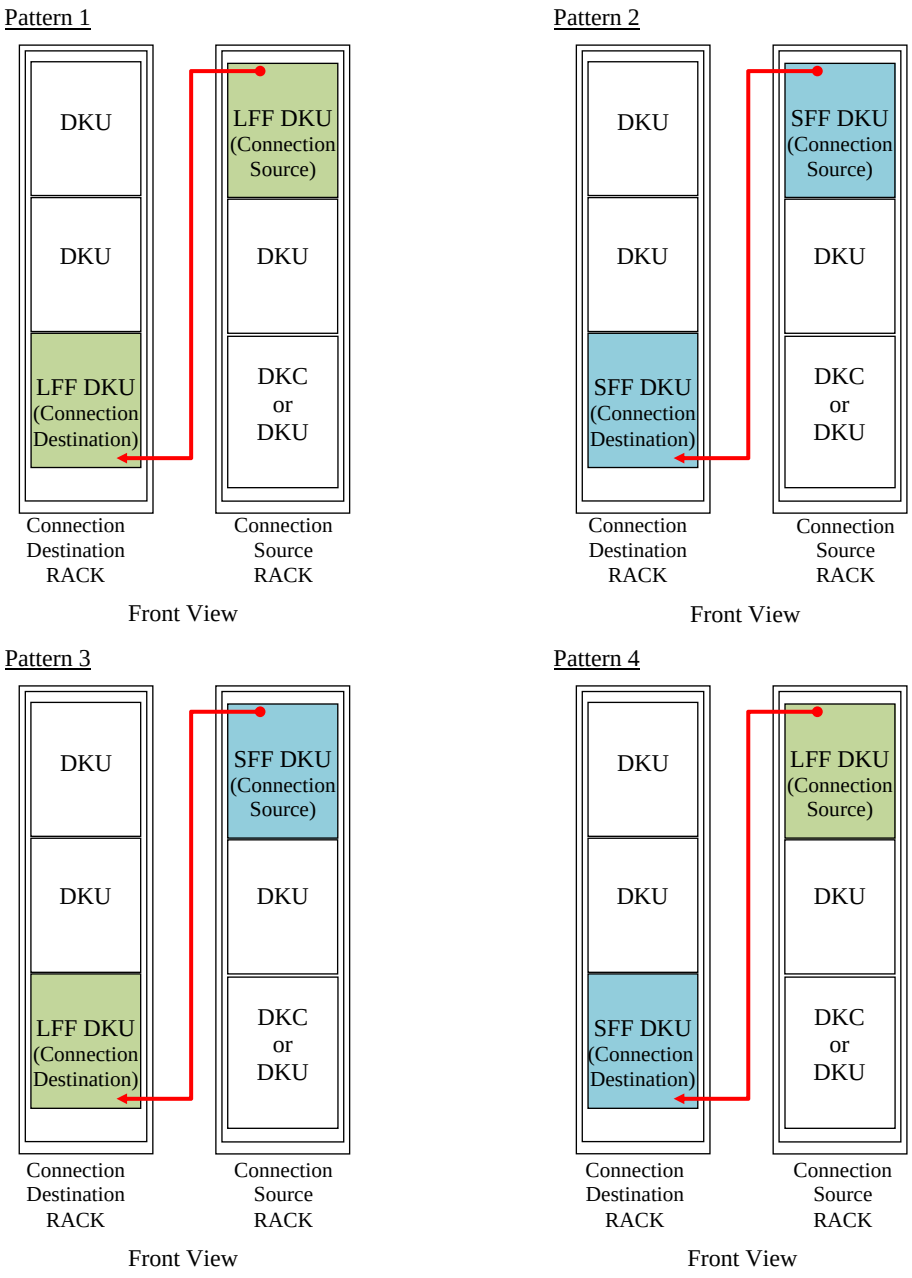

Fig. 3.12.4.8-45 Pattern of Cable Connection (Left Side Increasing)

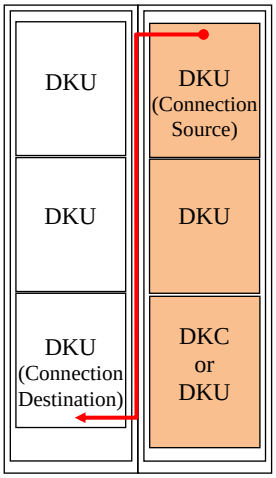
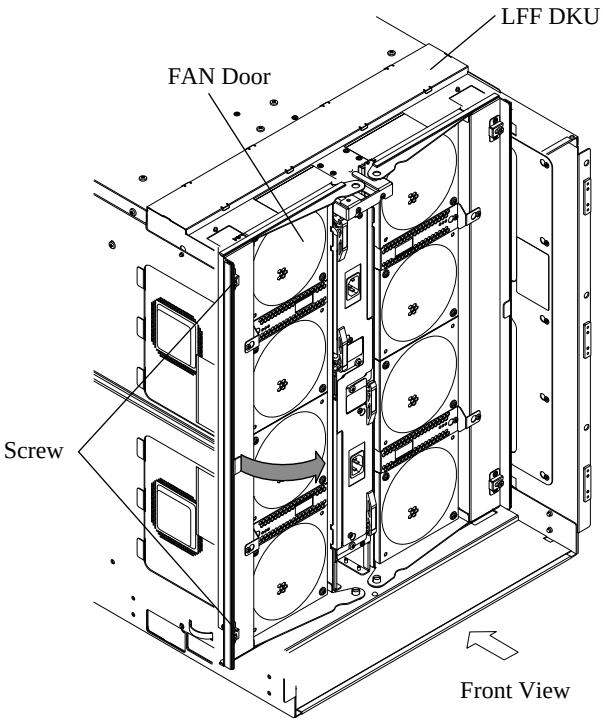
Copyright © 2010, Hitachi, Ltd.

2. Cable Wiring of the Front Side of the RACK
   a. Loosen all screws of the front left side of the DKU (two screws in each DKU) that is installed in the connection source RACK, and open the FAN door.





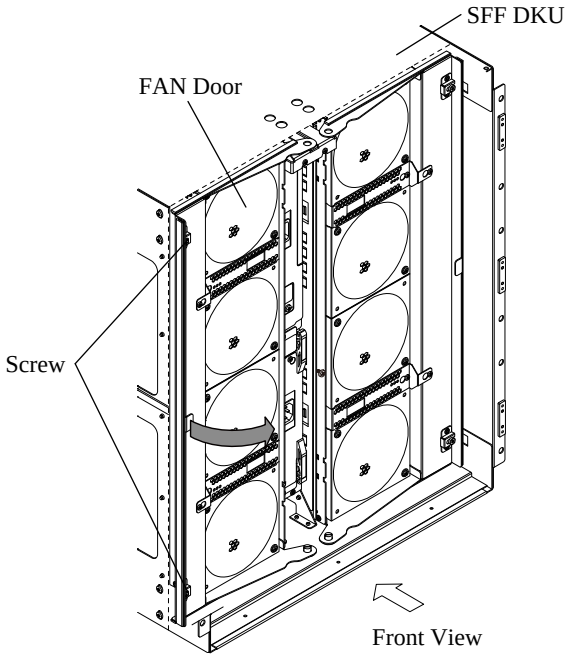


Fig. 3.12.4.8-46 FAN Door Opening

Copyright © 2010, 2011, Hitachi, Ltd.

b. Loosen all screws of the front left side of the DKU (five screws in each DKU) that is installed in the connection source RACK, and remove the plate.

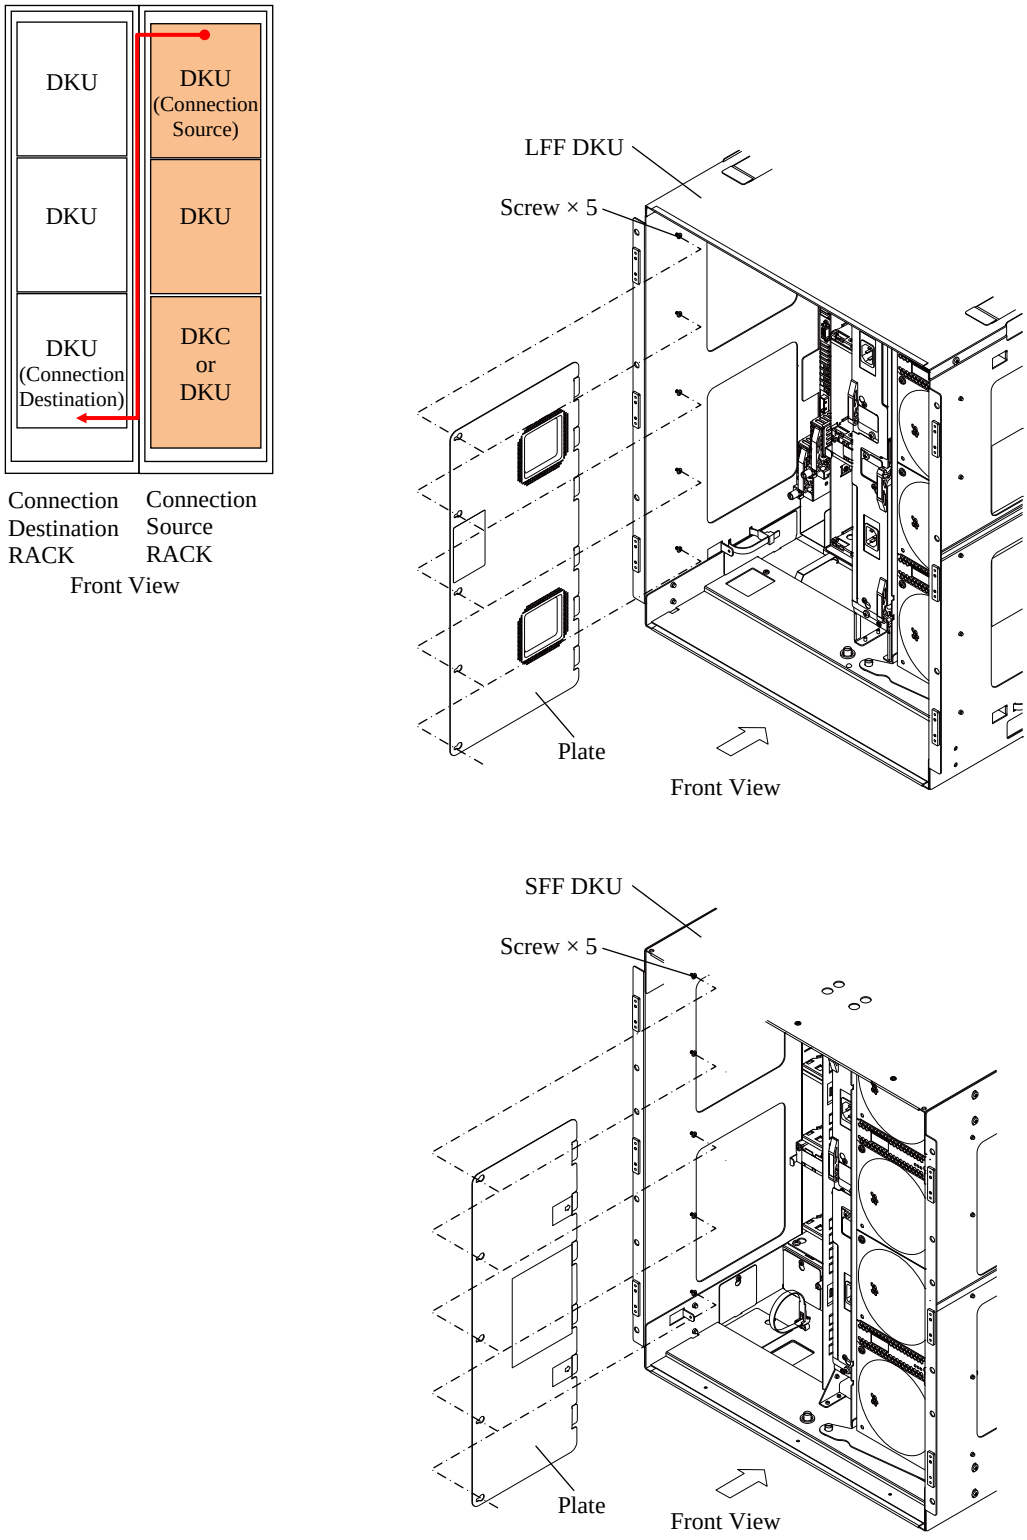

Fig. 3.12.4.8-47 Removal of Plate

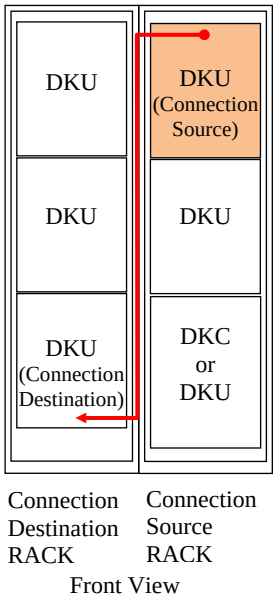
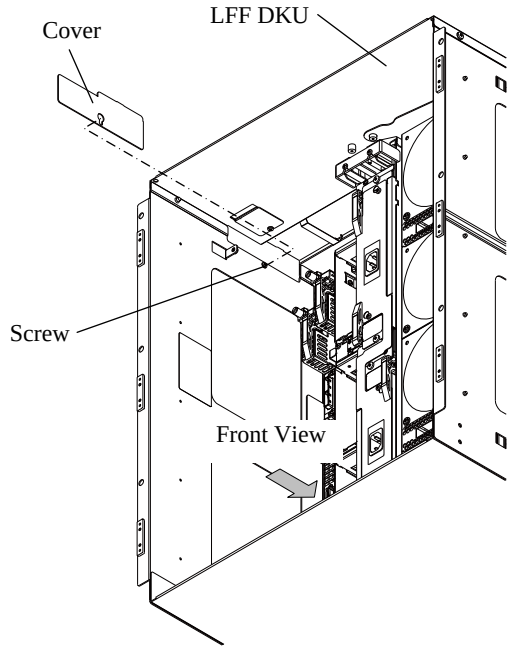
Copyright © 2010, Hitachi, Ltd.

c. Loosen the screw of the front left side of the connection source DKU, and remove the cover.





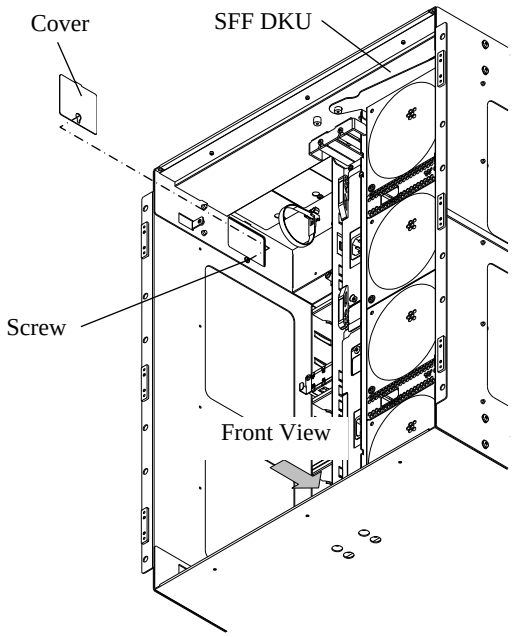


Fig. 3.12.4.8-48 Removal of Cover

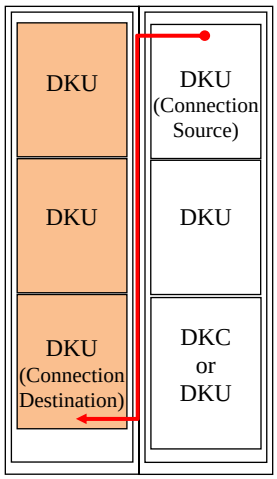
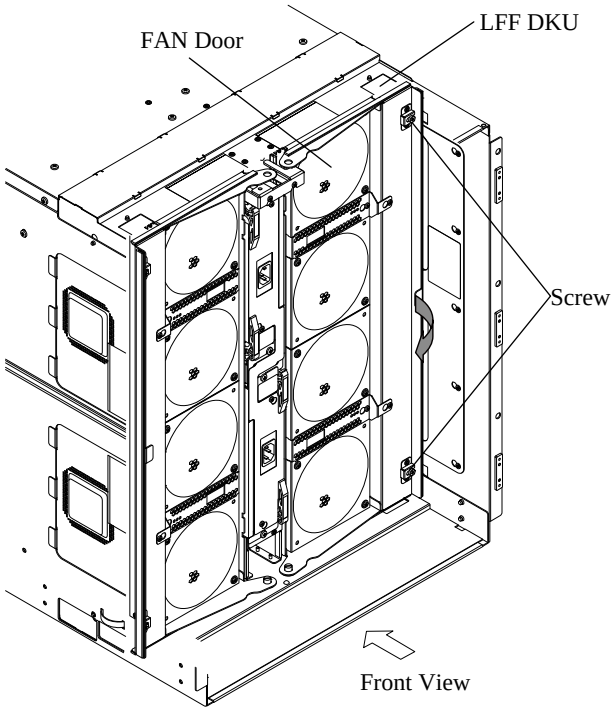
Copyright © 2010, Hitachi, Ltd.

d. Loosen the two screws of the front right side of all DKU that is installed in the connection destination RACK, and open the FAN door.





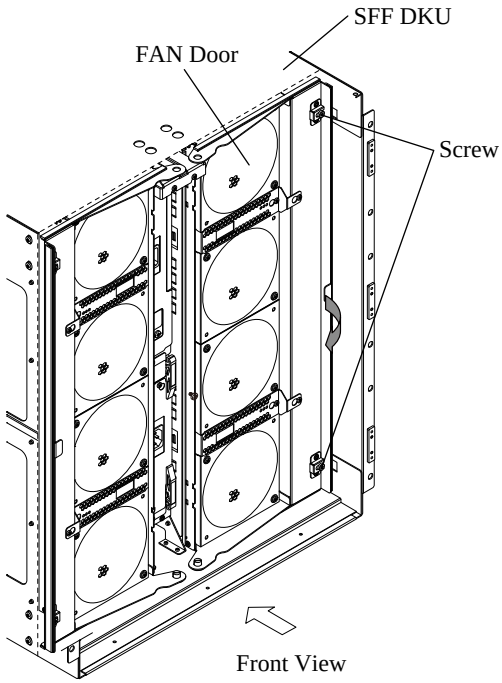


Fig. 3.12.4.8-49 FAN Door Opening

Copyright © 2010, 2011, Hitachi, Ltd.

e. Loosen all screws of the front right side of the DKU (five screws in each DKU) that is installed in the connection destination RACK, and remove the plate.

3. Cable Installation of the Front Side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU

a. Remove the two hangers from the front left side of the connection source DKU.
b. Insert the cables (0/4-R-A3 and 0/4-L-A3) in the clearance of the upper part of the DKUPS.
c. Wire the cables (1/5-R-A3 and 1/5-L-A3). However, do not connect the cables with the SSW PCB at this stage.
d. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.8-46.)

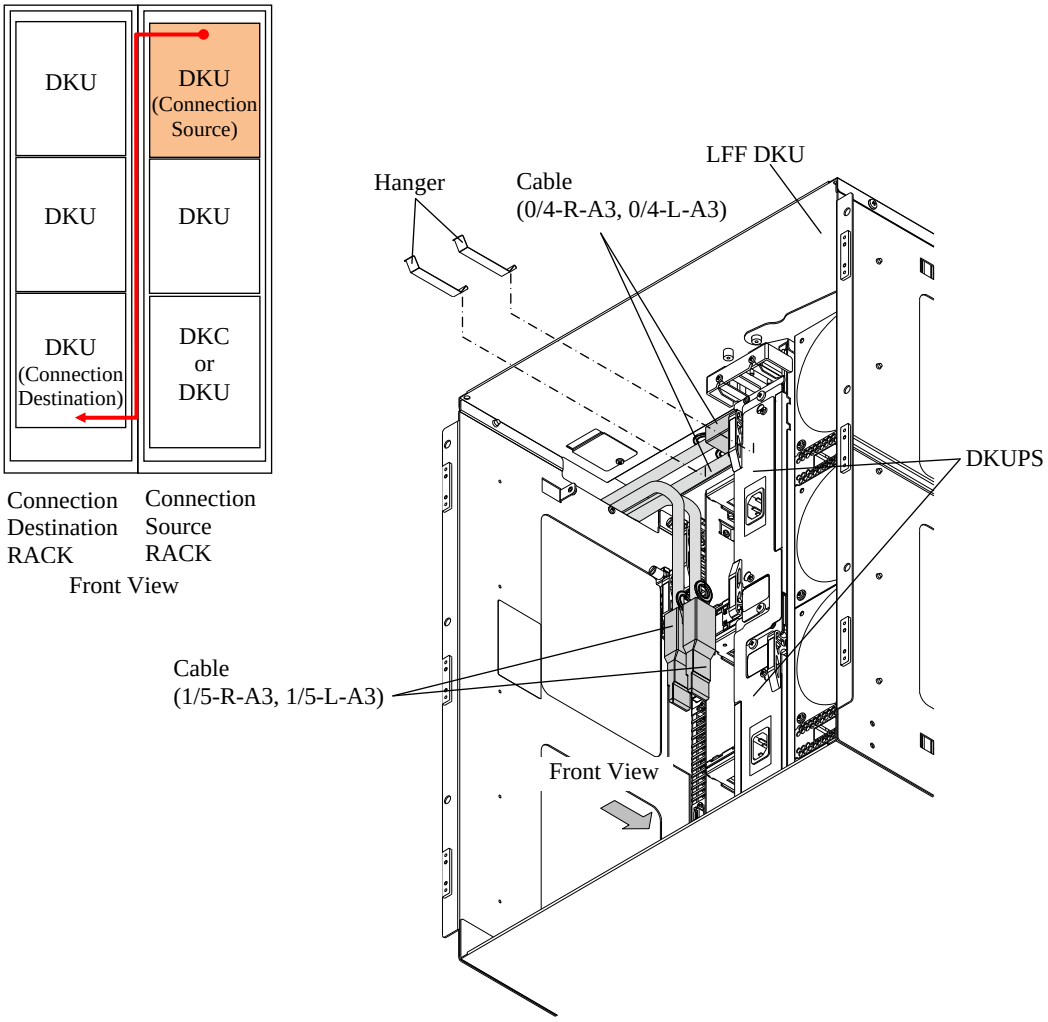

Fig. 3.12.4.8-53 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-49.)
f. Remove the two hangers.
g. Reach into the entry points of the left side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCB at this stage.
h. Install the two hangers, and fix the cables.
i. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws.

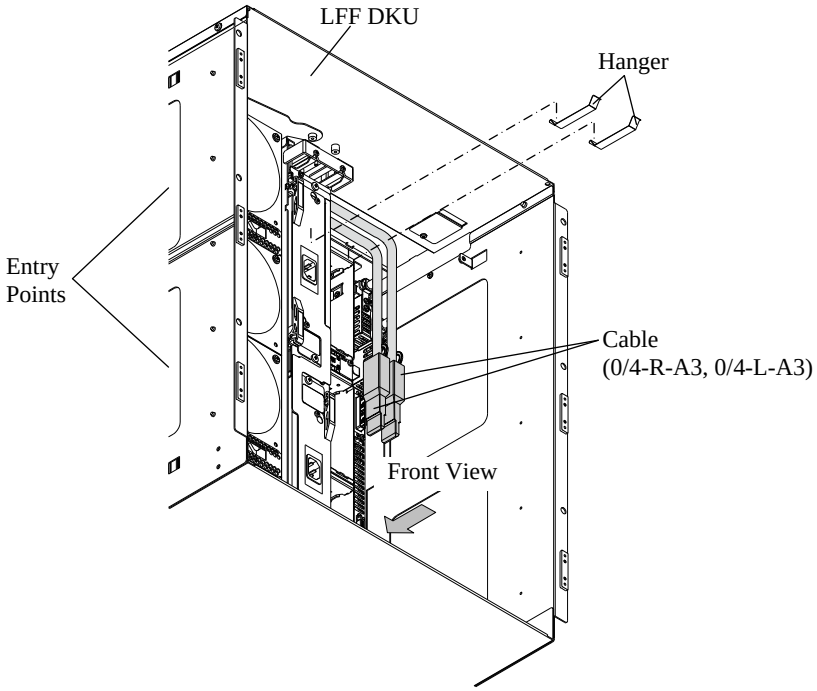

Fig. 3.12.4.8-54 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

j. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-46.)
k. Install the two hangers, and fix the cables.

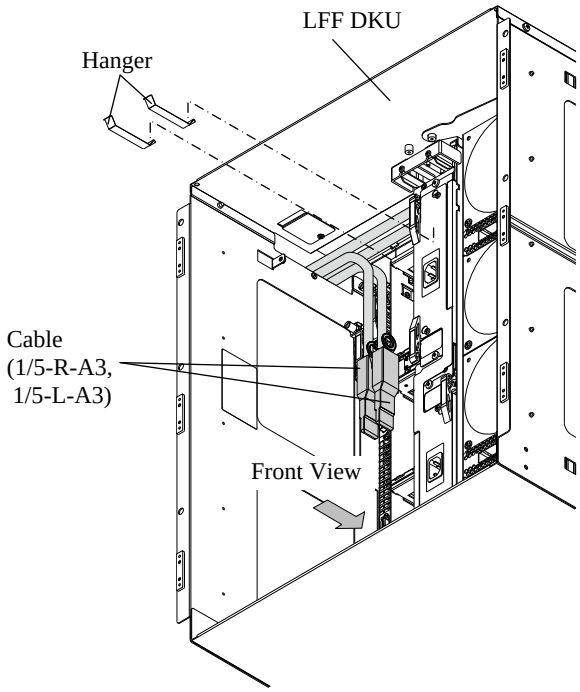

Fig. 3.12.4.8-55 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

When the Connection Source DKU is the SFF DKU

a. Insert the cables (0/4-R-A3 and 0/4-L-A3) into the clearance of the upper part of the DKUPS of the connection source DKU.
b. Wire the cables (1/5-R-A3 and 1/5-L-A3). However, do not connect the cables with the SSW PCB at this stage.
c. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.8-46.)

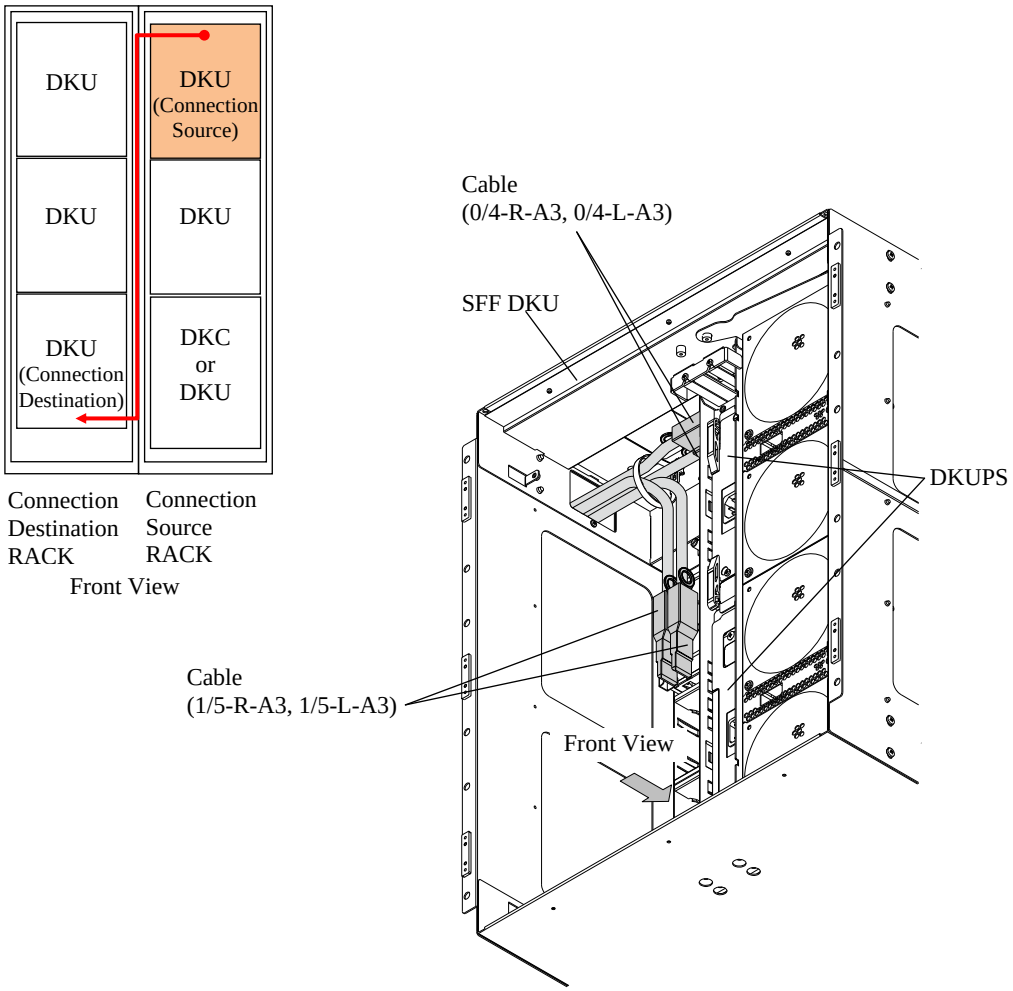

Fig. 3.12.4.8-56 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

d. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-49.)
e. Reach into the entry points of the left side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCB at this stage.
f. Bundle the cables with the clamp tape.
g. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws.

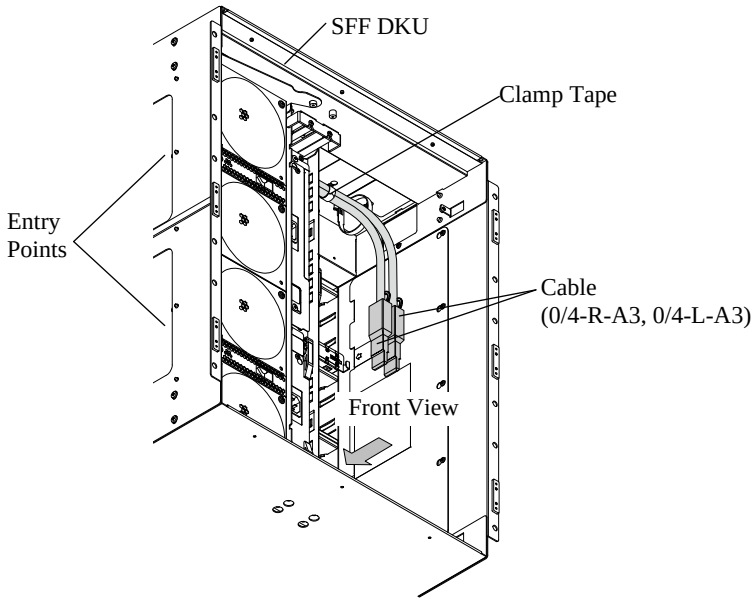

Fig. 3.12.4.8-57 Attachment of Cables

h. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-46.)
i. Fix the cables with the repeat binder.

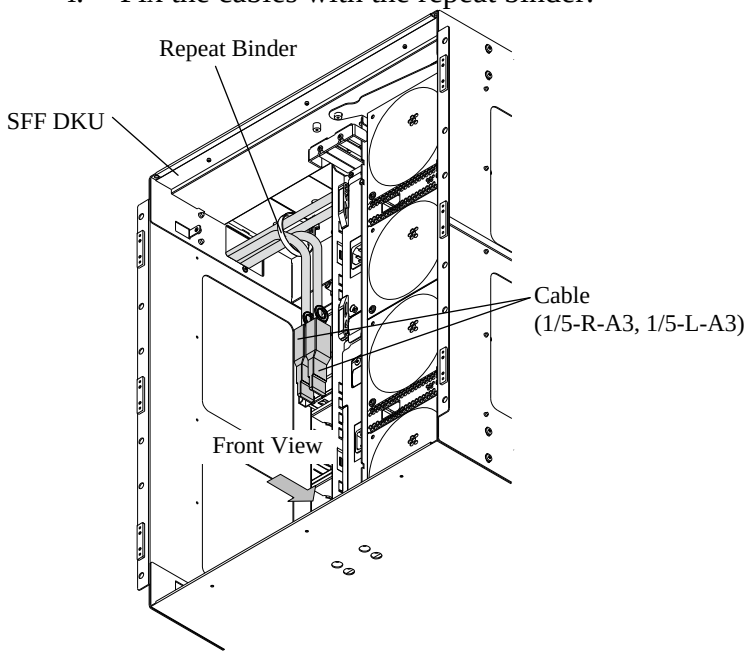

Fig. 3.12.4.8-58 Attachment of Cables

4. Fixation of Cables
   a. Fix the four cables with the two repeat binders of the connection source RACK side.

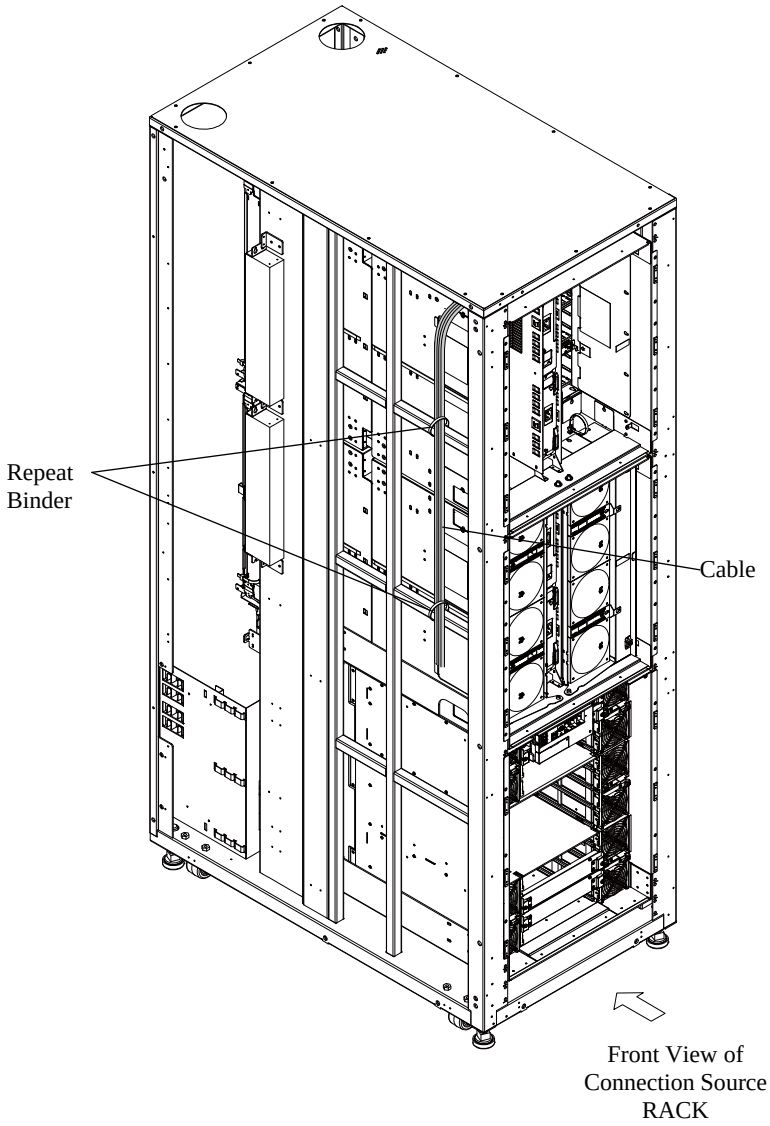

Fig. 3.12.4.8-59 Fixation of Cables

Copyright © 2010, Hitachi, Ltd.

5. Cable Installation of the Front Side of the Connection Destination DKU

When the Connection Destination DKU is the LFF DKU

a. Pull the cables in from the front right side of the connection destination DKU.
b. Remove the two hangers.
c. Insert the cables (1/5-R-A1 and 1/5-L-A1) into the clearance in the lower part of the DKUPS.
d. Wire the cables (0/4-R-A1 and 0/4-L-A1).
e. Close the FAN door of the front right side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 3.12.4.8-49.)

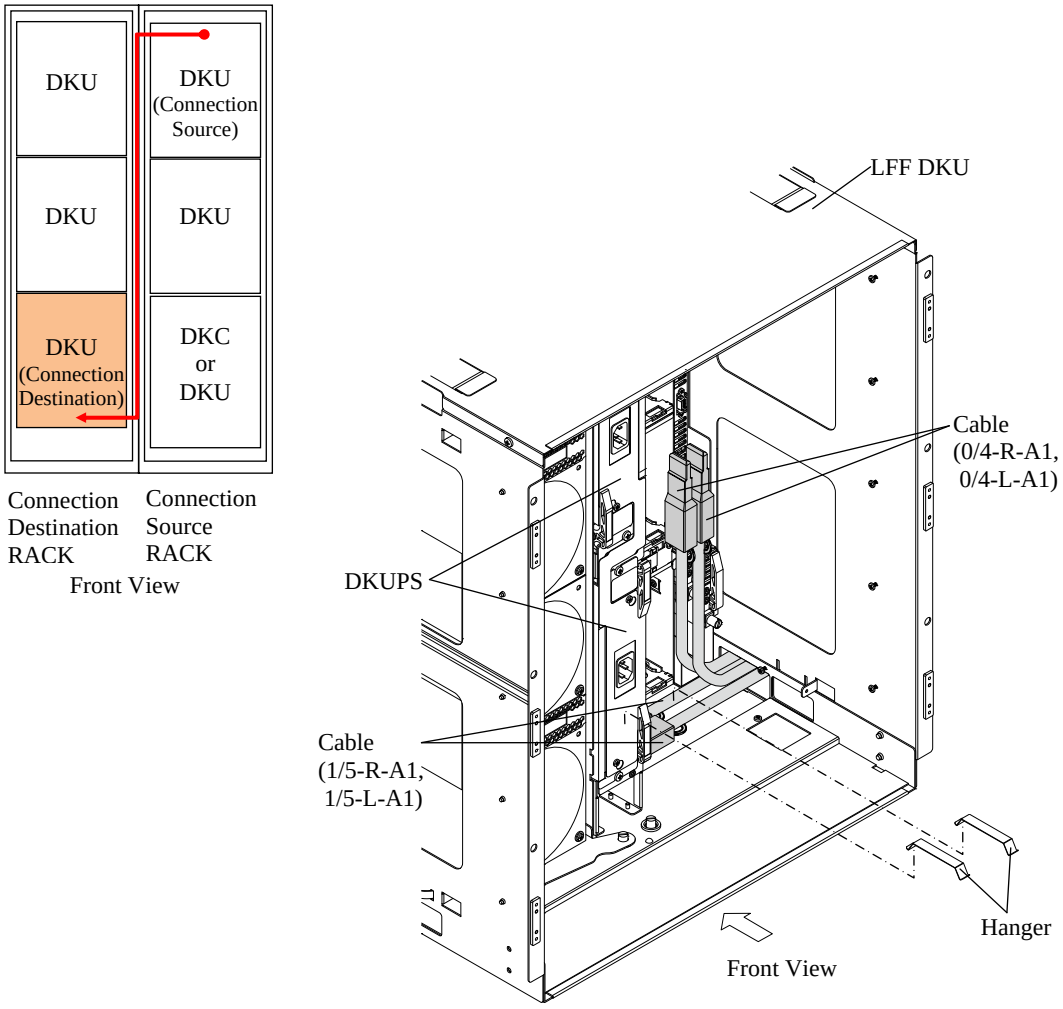

Fig. 3.12.4.8-60 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

f. Loosen the two screws of the front left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-46.)
g. Remove the two hangers.
h. Reach into the entry points of the right side of the DKU, and pull the cables out from the lower part of the DKUPS by using both hands.
i. Remove the caps from the cables. Connect the cables with the SSW PCBs after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

j. Install the two hangers, and fix the cables.
k. Close the FAN door of the front left side of the connection destination DKU, and tighten the two screws.

8. Cable Installation of the Rear Side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU

a. Remove the two hangers from the rear right side of the connection source DKU.
b. Insert the cables (3/7-R-A3 and 3/7-L-A3) into the clearance in the upper part of the DKUPS.
c. Wire the cables (2/6-R-A3, 2/6-L-A3). However, do not connect the cables with the SSW PCB at this stage.
d. Close the FAN door of the rear right side of the connection source DKU, and tighten the two screws. (Refer to Fig.3.12.4.8-67.)

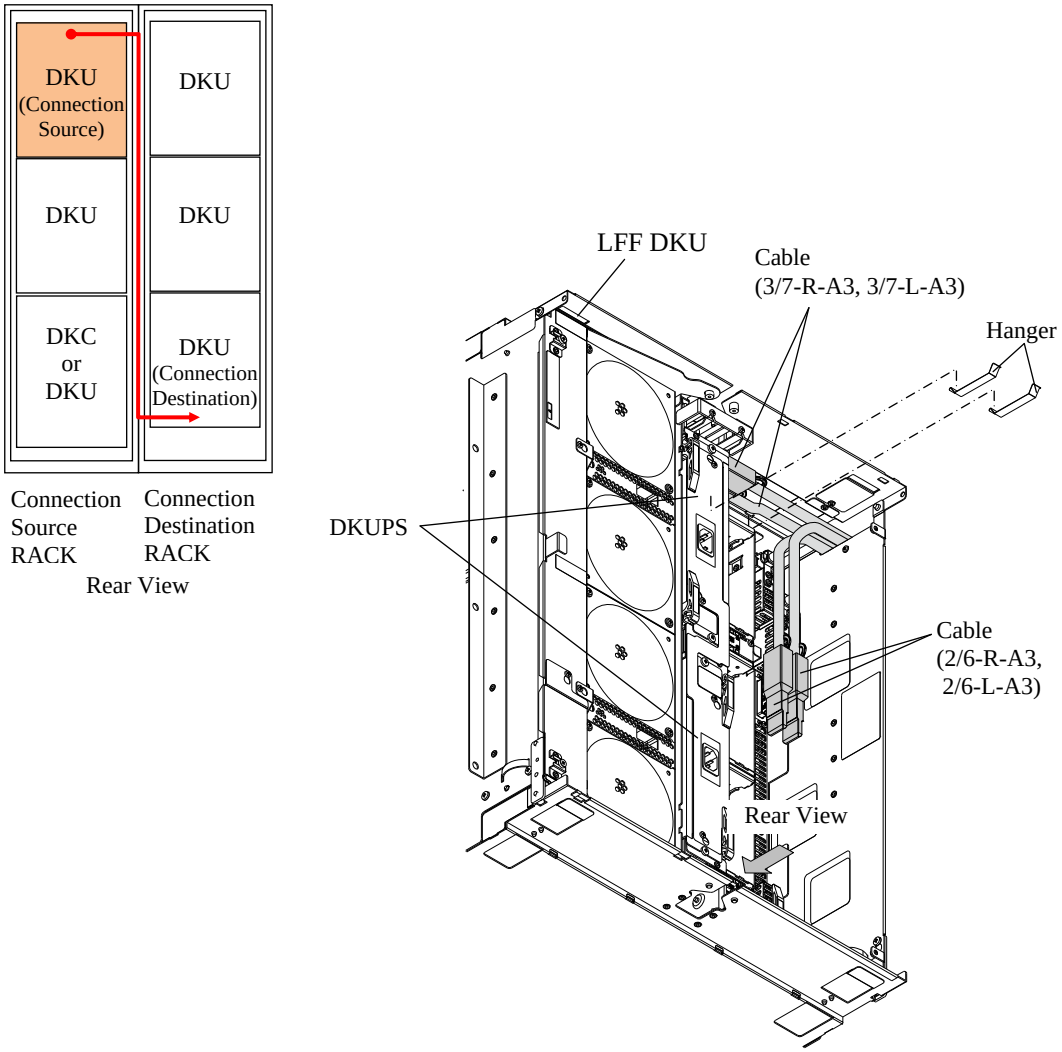

Fig. 3.12.4.8-72 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the rear left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-69.)
f. Remove the two hangers.
g. Pull the cables out from the upper part of the DKUPS, and wire the cables. However, do not connect the cables with the SSW PCB at this stage.
h. Install the two hangers, and fix the cables.
i. Close the FAN door of the rear left side of the connection source DKU, and tighten the two screws.

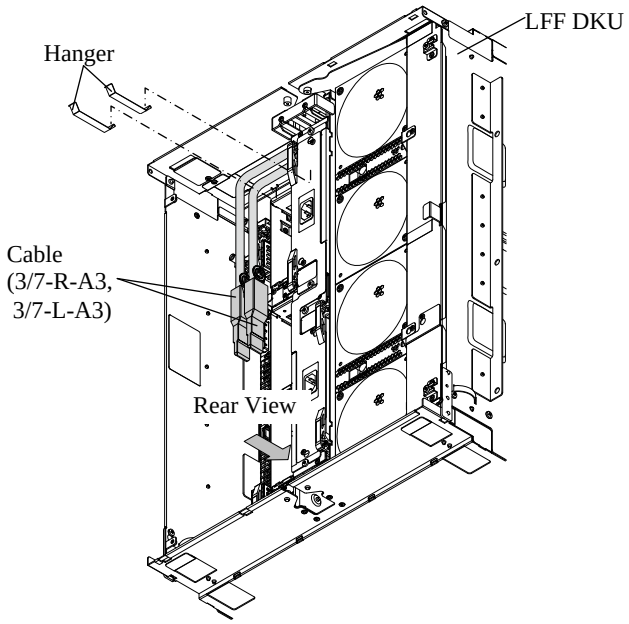

Fig. 3.12.4.8-73 Attachment of Cables

j. Loosen the two screws of the rear right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-67.)
k. Install the two hangers, and fix the cables.

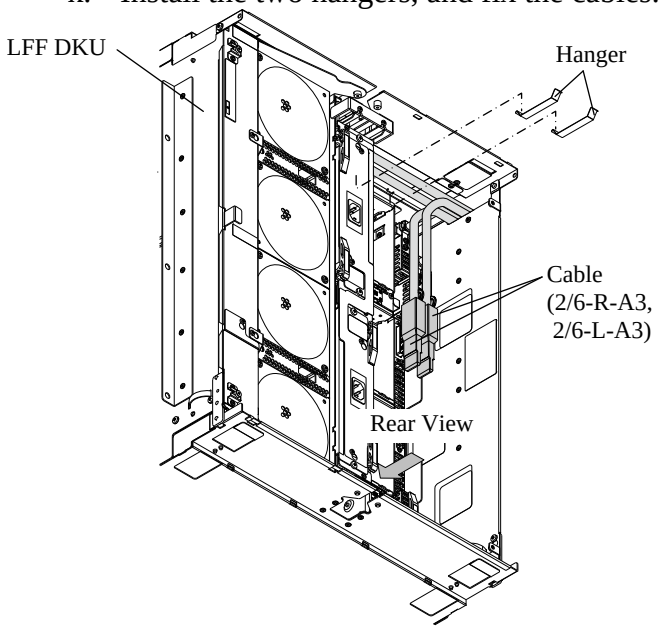

Fig. 3.12.4.8-74 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

When the Connection Source DKU is the SFF DKU

a. Insert the cables (3/7-R-A3 and 3/7-L-A3) into the clearance of the upper part of the DKUPS of the rear right side of the connection source DKU.
b. Wire the cables (2/6-R-A3 and 2/6-L-A3). However, do not connect the cables with SSW PCB at this stage.
c. Close the FAN door of the rear right side of the connection source DKU, and tighten the two screws. (Refer to Fig.3.12.4.8-67.)

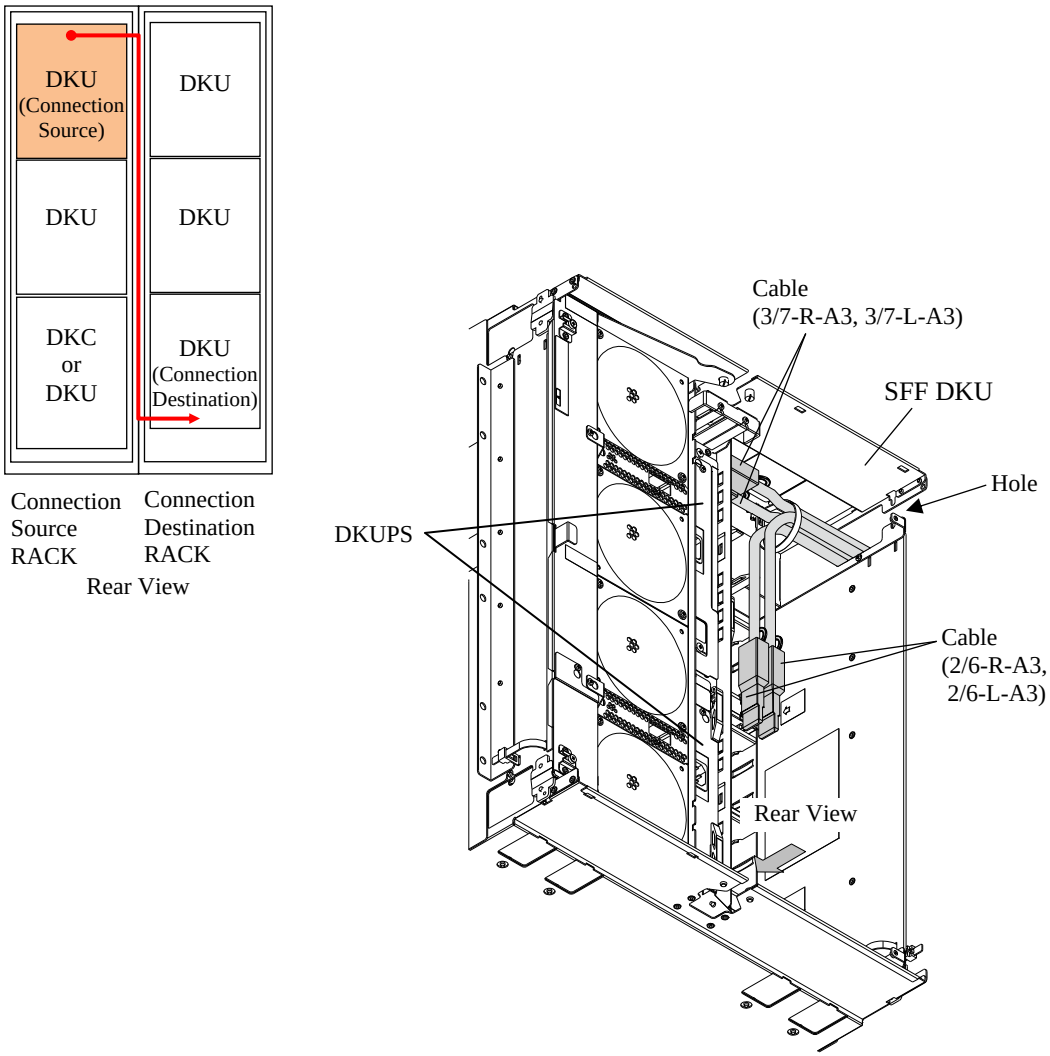

Fig. 3.12.4.8-75 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

d. Loosen the two screws of the rear left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-69.)
e. Pull the cables out from the upper part of the DKUPS, and wire the cables. However, do not connect the cables with the SSW PCB at this stage.
f. Bundle the cables with the clamp tape.
g. Close the FAN door of the rear left side of the connection source DKU, and tighten the two screws.

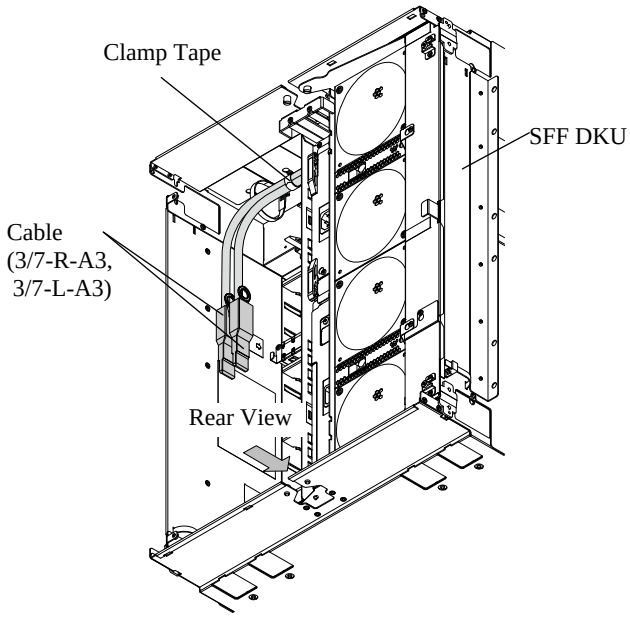

Fig. 3.12.4.8-76 Attachment of Cables

h. Loosen the two screws of the rear right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-67.)
i. Fix the cables with the repeat binder.
j. Install the cover, and tighten the two screws.

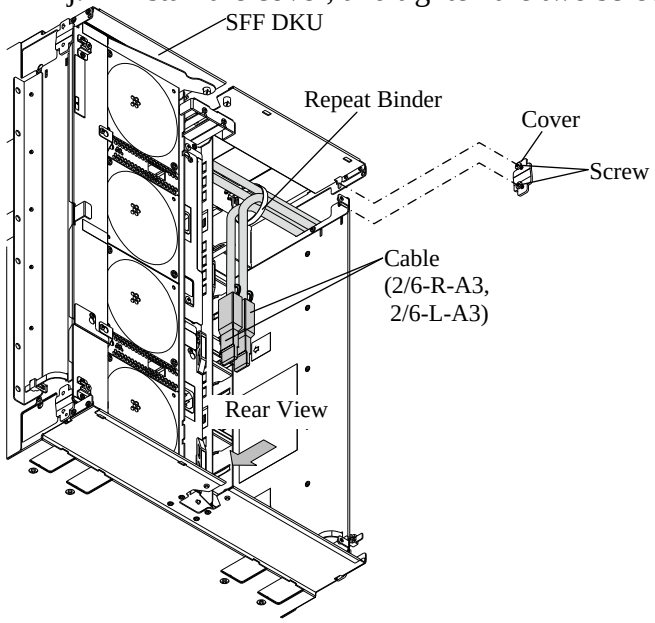

Fig. 3.12.4.8-77 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

9. Fixation of Cables
   a. Fix the four cables with the two repeat binders of the DKU side.

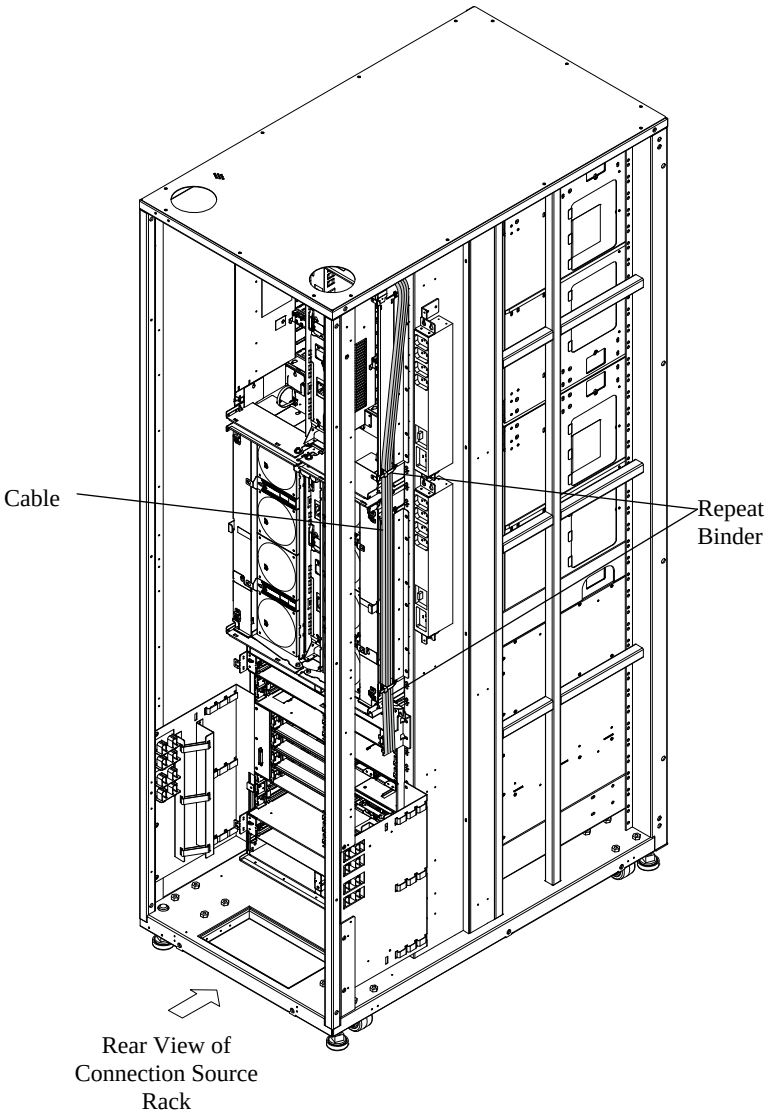

Fig. 3.12.4.8-78 Fixation of Cables

Copyright © 2010, Hitachi, Ltd.

10. Cable Installation of Rear Side of the Connection Destination DKU

When the Connection Destination DKU is the LFF DKU

a. Pull the cables in from the rear left side of the connection destination DKU.
b. Remove the two hangers.
c. Insert the cables (2/6-R-A1 and 2/6-L-A1) into the clearance of the lower part of the DKUPS.
d. Wire the Cables (3/7-R-A1 and 3/7-L-A1).
e. Close the FAN door of the rear left side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 3.12.4.8-69.)

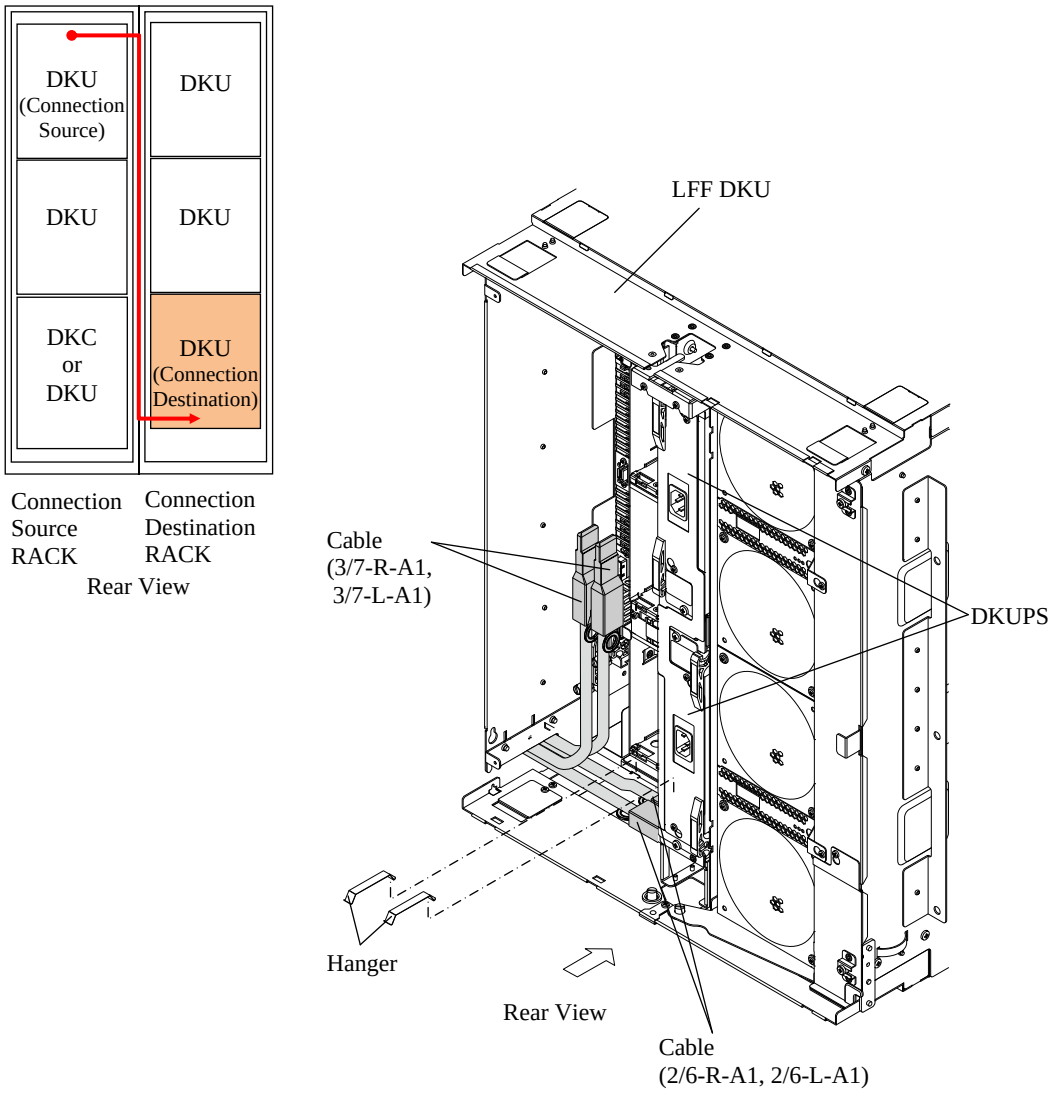

Fig. 3.12.4.8-79 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

f. Loosen the two screws of the rear right side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-67.)
g. Remove the two hangers.
h. Pull the cables out from the lower part of the DKUPS, and wire the cables.
i. Remove the caps from the cables. Connect the cables with the SSW PCBs after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

j. Install the two hangers, and fix the cables.
k. Close the FAN door of the rear right side of the connection destination DKU, and tighten the two screws.

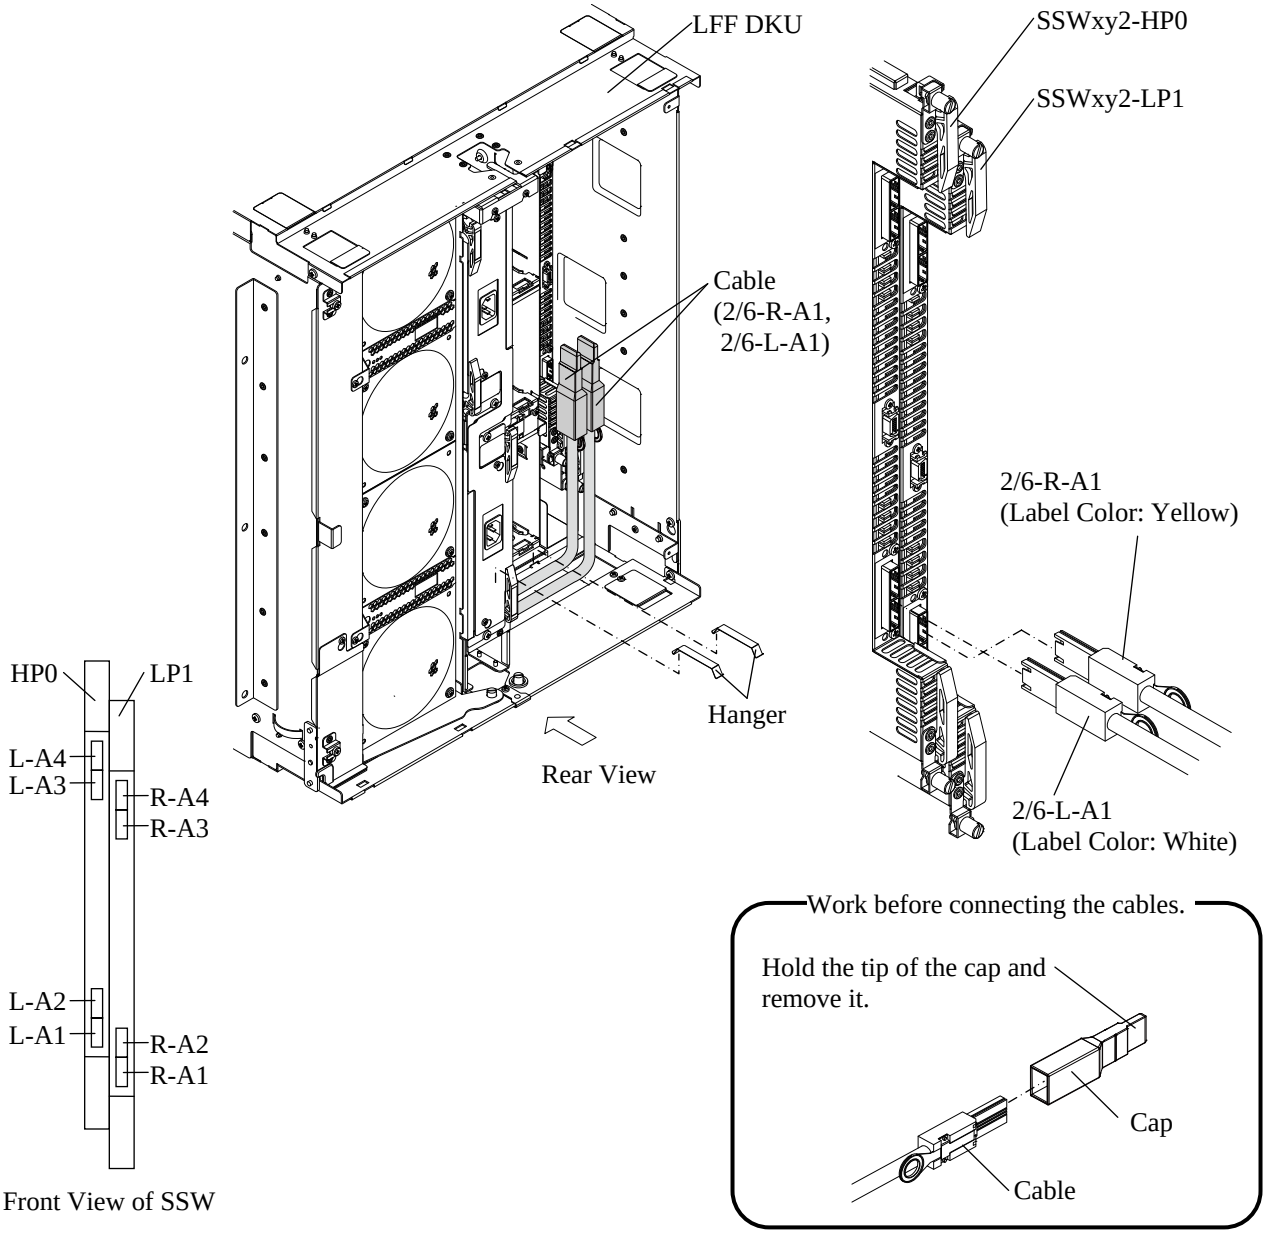

Fig. 3.12.4.8-80 Connection of Cables

Copyright © 2010, Hitachi, Ltd.

l. Loosen the two screws of the rear left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-69.)
m. Remove the caps from the cables. Connect the cables with the SSW PCBs after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

> Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

n. Install the two hangers, and fix the cables.
o. Install the cover, and tighten the three screws.

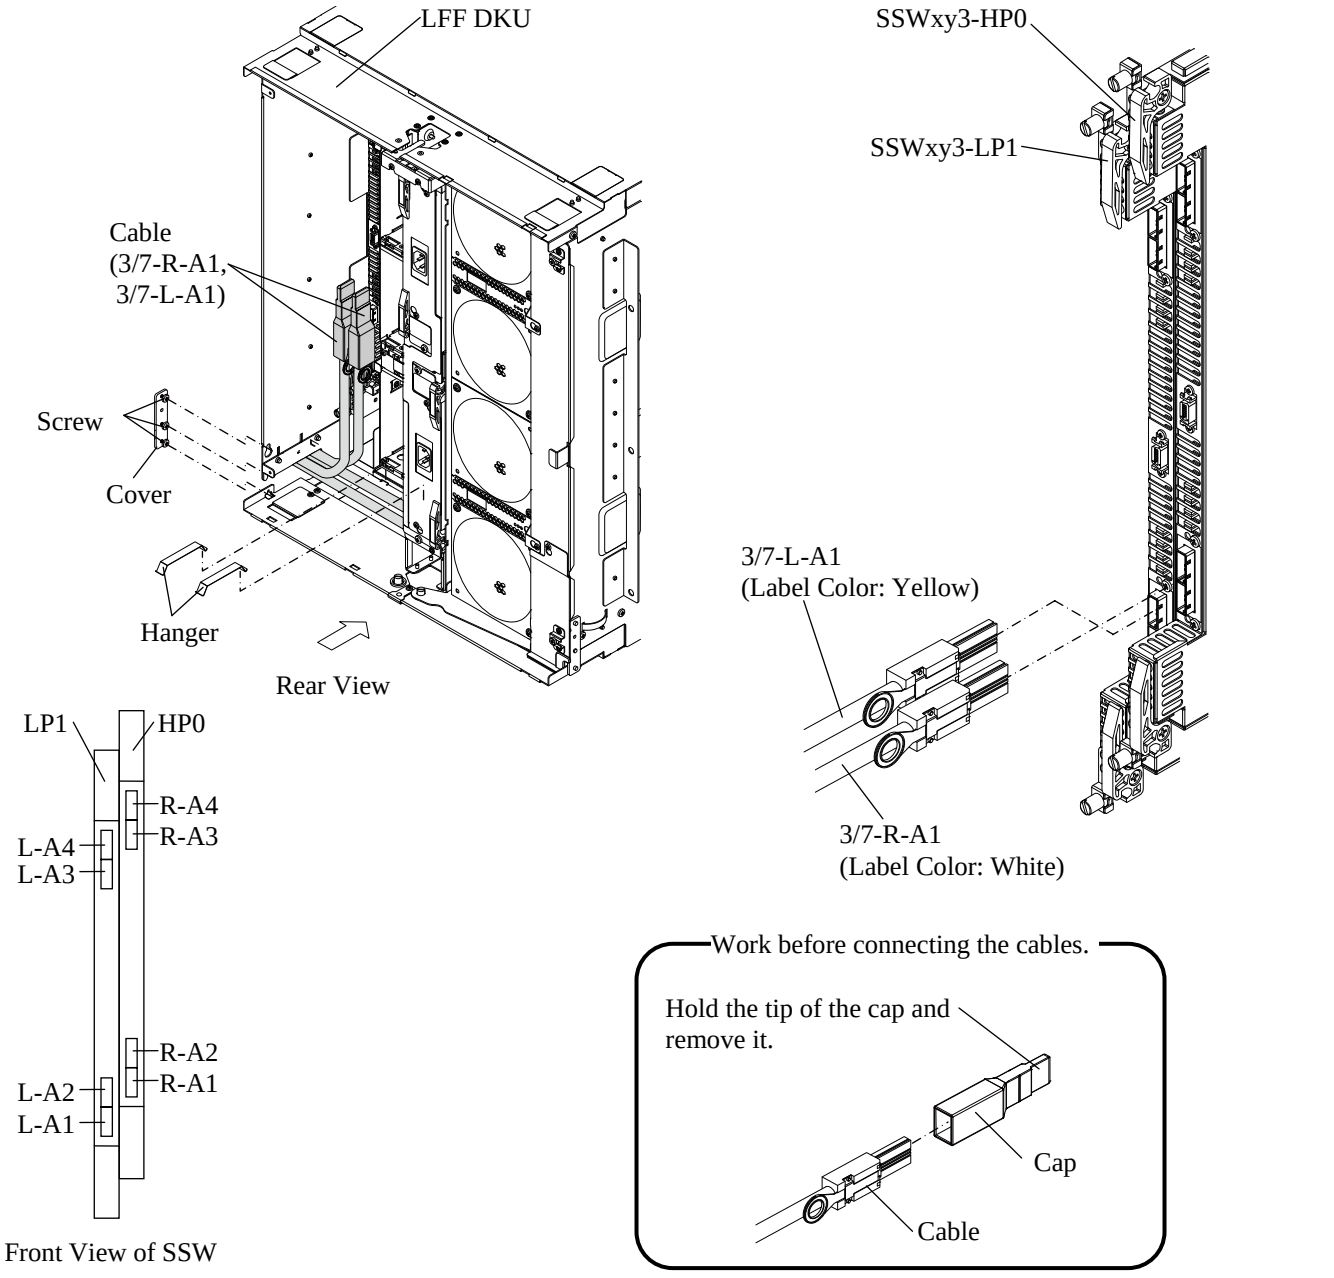

Fig. 3.12.4.8-81 Connection of Cables

When the Connection Destination DKU is the SFF DKU

a. Pull the cables in from the rear left side of the connection destination DKU.
b. Insert the cables (2/6-R-A1 and 2/6-L-A1) into the clearance of the lower part of the DKUPS.
c. Wire the cables (3/7-R-A1 and 3/7-L-A1).
d. Close the FAN door of the rear left side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 3.12.4.8-69.)

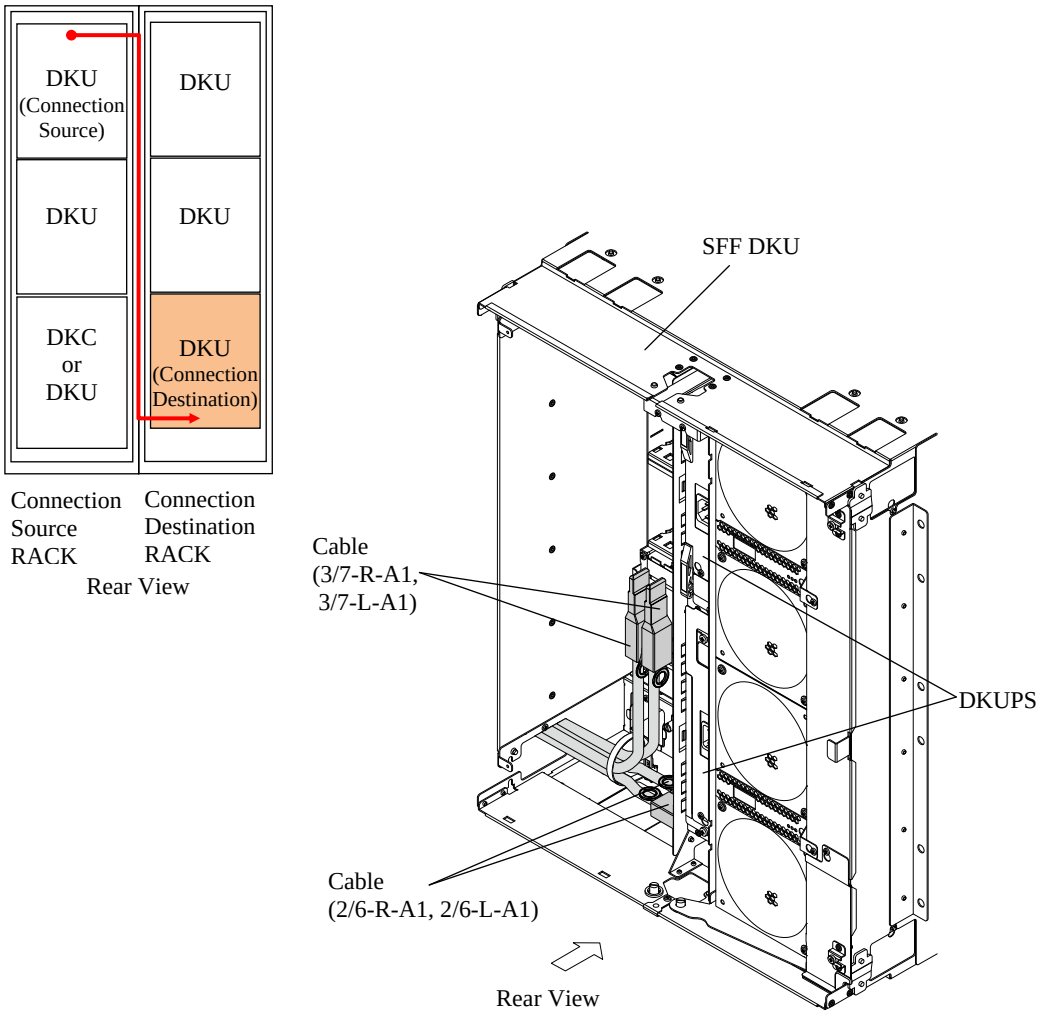

Fig. 3.12.4.8-82 Attachment of Cables

e. Loosen the two screws of the rear right side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.8-67.)
f. Pull the cables out from the lower part of the DKUPS, and wire the cables.
g. Remove the caps from the cables. Connect the cables with the SSW PCBs after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

h. Bundle the cables with the clamp tape.
i. Close the FAN door of the rear right side of the connection destination DKU, and tighten the two screws.

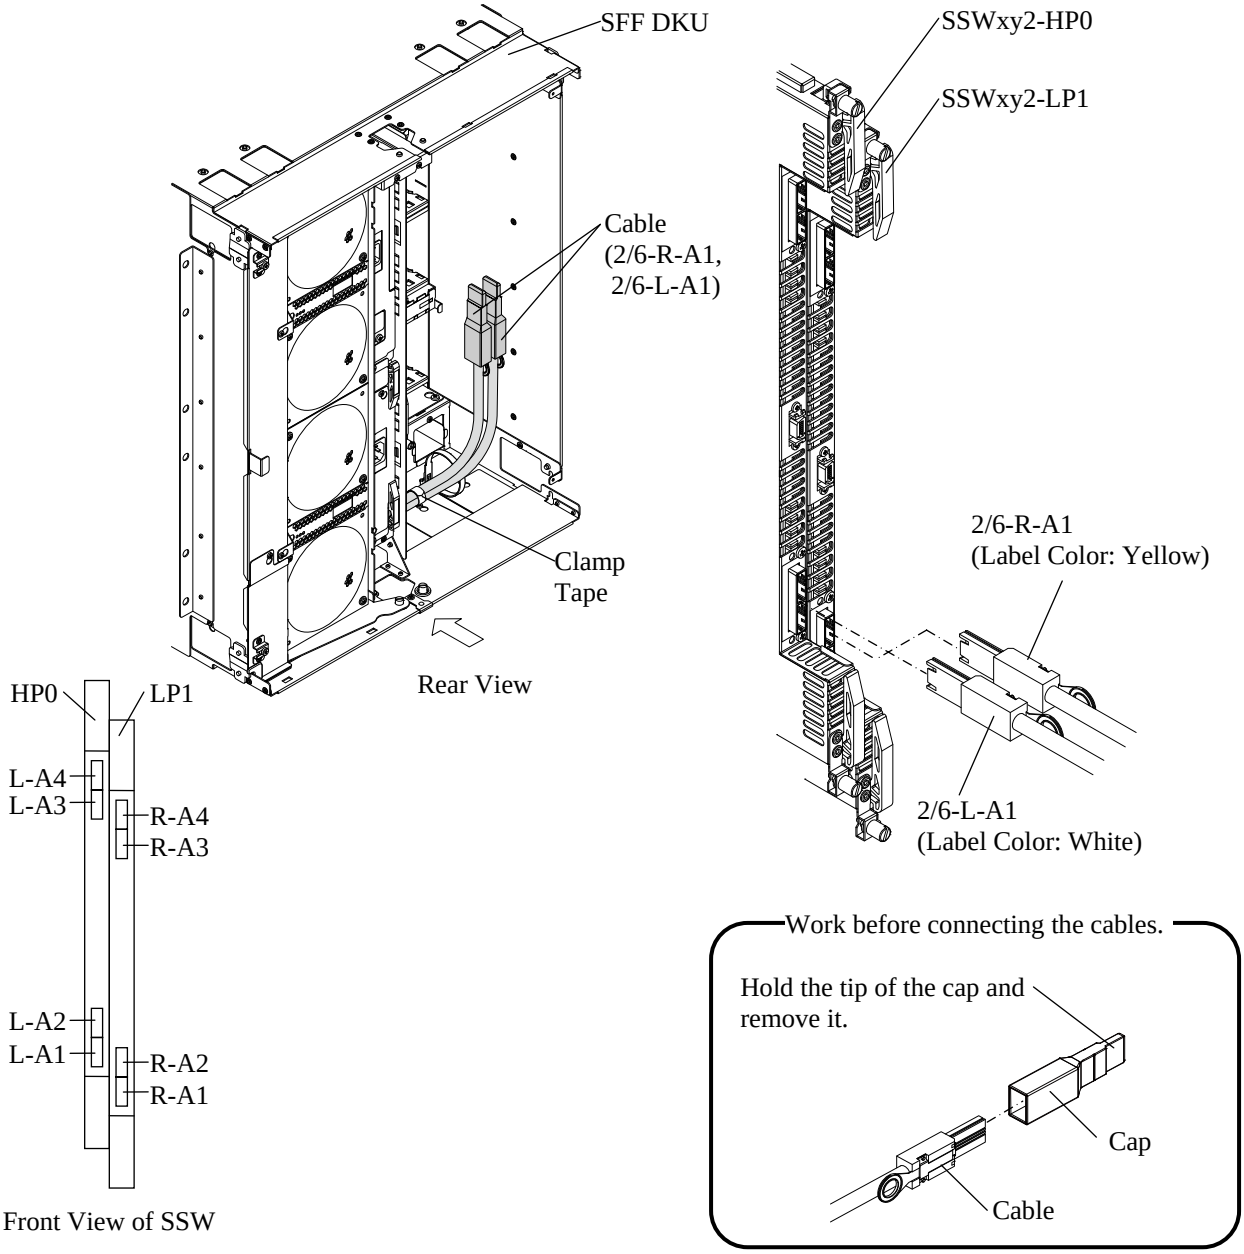

Fig.3.12.4.8-83 Connection of Cables

11. Handling of Cable Extra Length
    a. Put the extra length of the cables into the clearance of the RACK.
    b. Close the FAN door of the rear right side of the connection source of the DKU, and tighten the screws. (Refer to Fig. 3.12.4.8-67.)
    c. Close the FAN door of the rear left side of the connection destination DKU, and tighten the screws. (Refer to Fig. 3.12.4.8-69.)

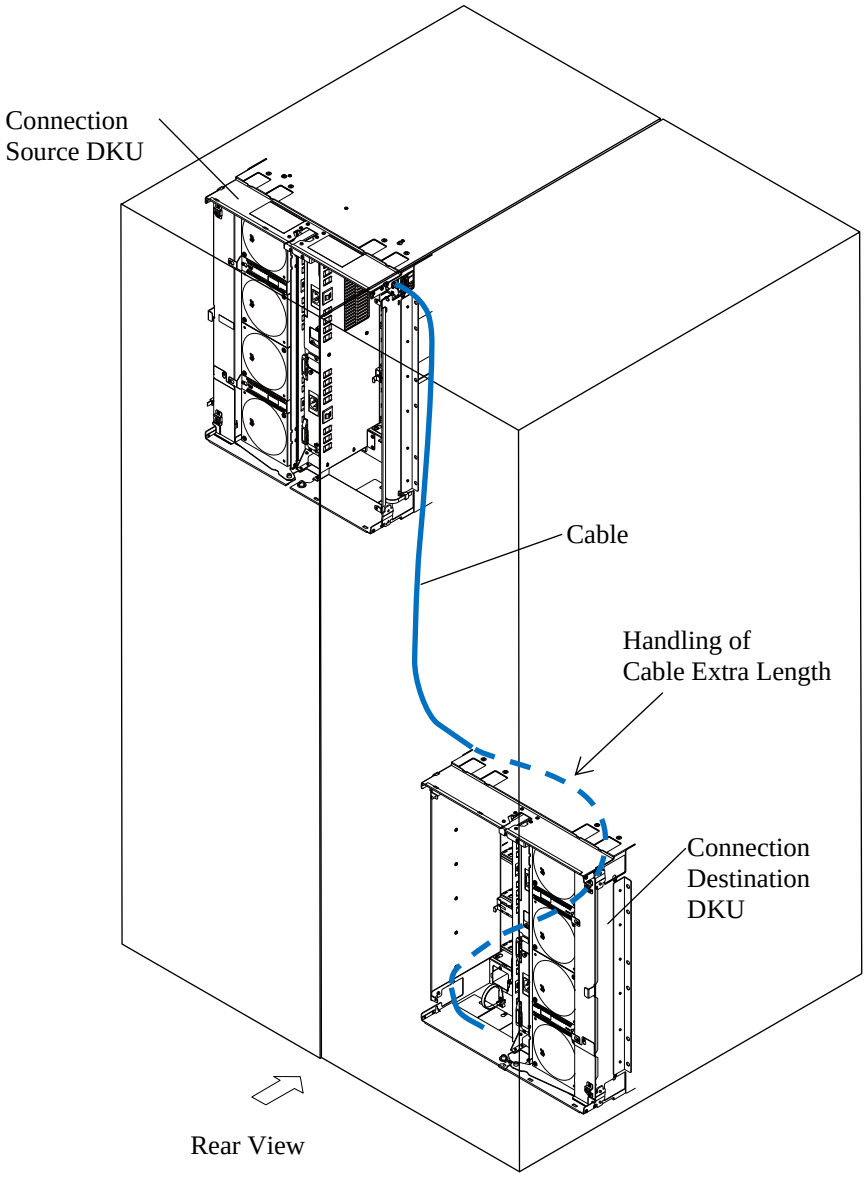

Fig.3.12.4.8-85 Handling of Cable Extra Length

Copyright © 2010, Hitachi, Ltd.

12. Attachment of Nameplate (Only HDS)
    a. Remove the screw from the rack frame and remove the nameplate tags.
    b. Attach the nameplate to the nameplate tag.
    c. Attach all the nameplate tags with the screw.

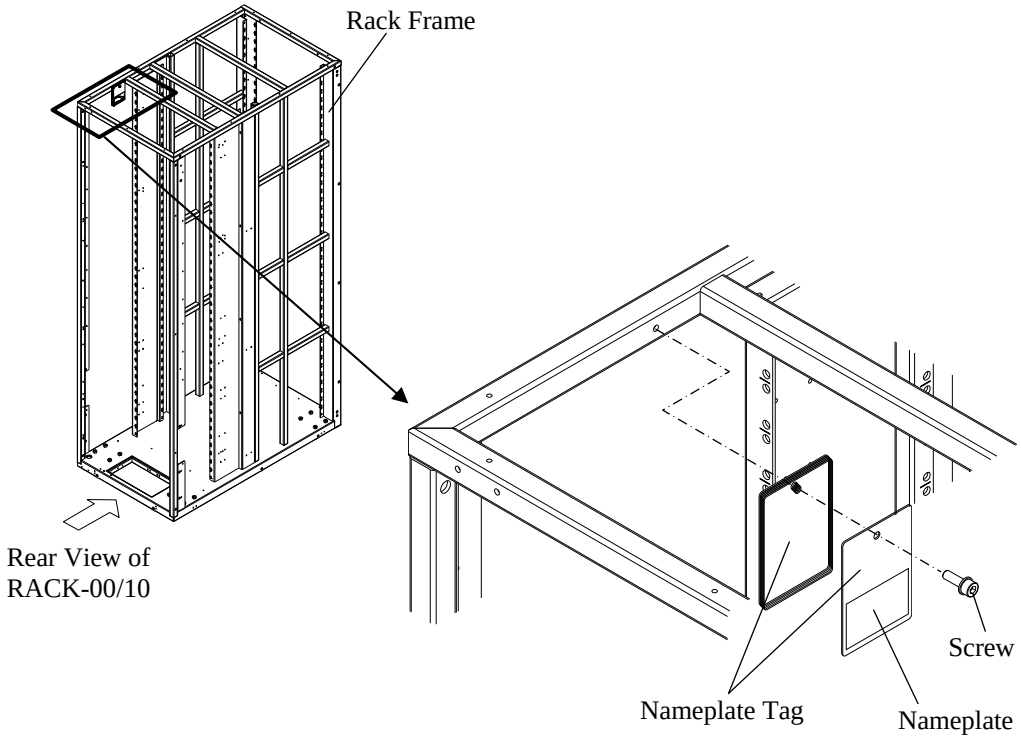

Fig. 3.12.4.8-86 Attachment of Nameplate

3.12.4.9 Installation Procedure of Device Interface Cable HRLEX (DKC-F710I-HRLEXC)

Installation Condition

DKC-F710I-HRLEXC is a cable option to connect between DKUs in the different chassis with the high performance model.
When connecting the DKUs in the different chassis with the high performance model, this option is required to connect.
Refer to below Table 3.12.4.9-1 for the condition of DKC-F710I-HRLEXC installation, and go to the appropriate page.

Table 3.12.4.9-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable HRLEX (DKC-F710I-HRLEXC) is required to install.	INST03-12C-2890
2	When Device Interface Cable HRLEX (DKC-F710I-HRLEXC) is not required to install.	INST03-12C-3610

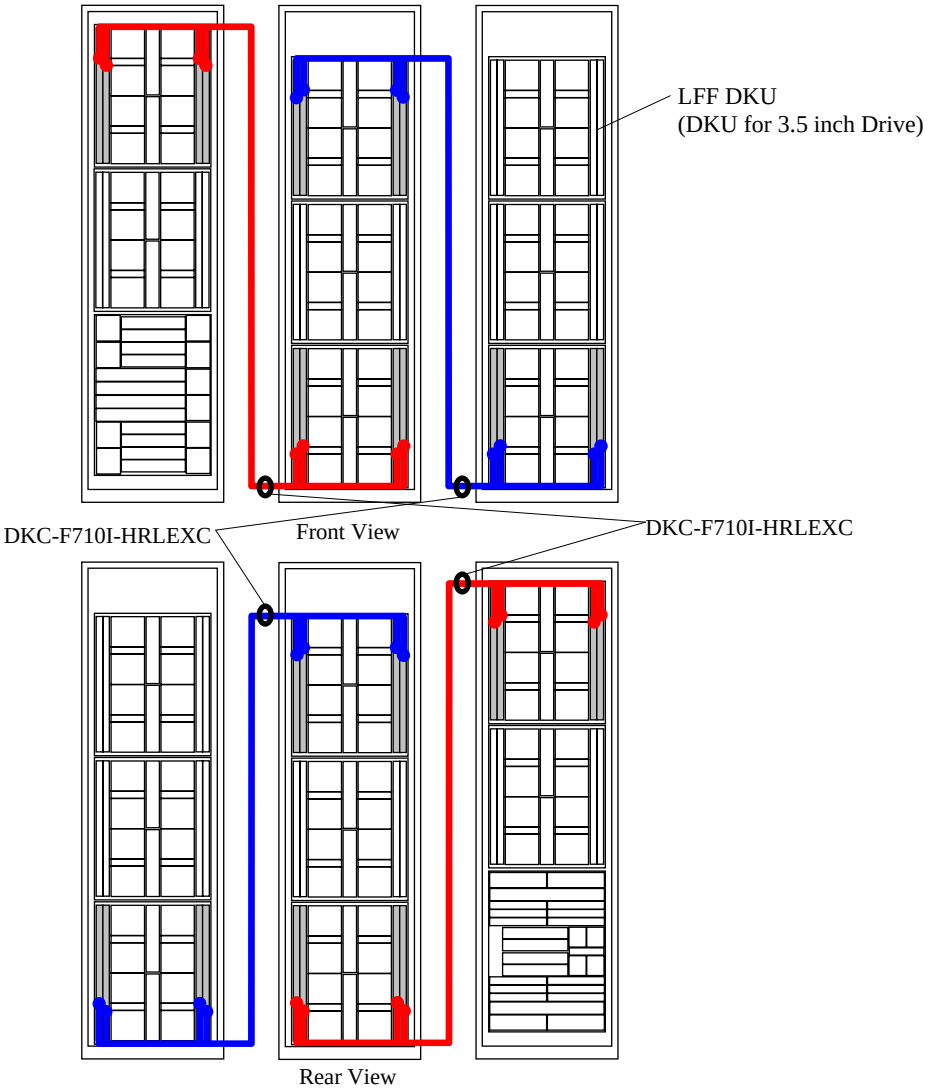

Fig. 3.12.4.9-1 Mounting Position of DEV Interface Cable

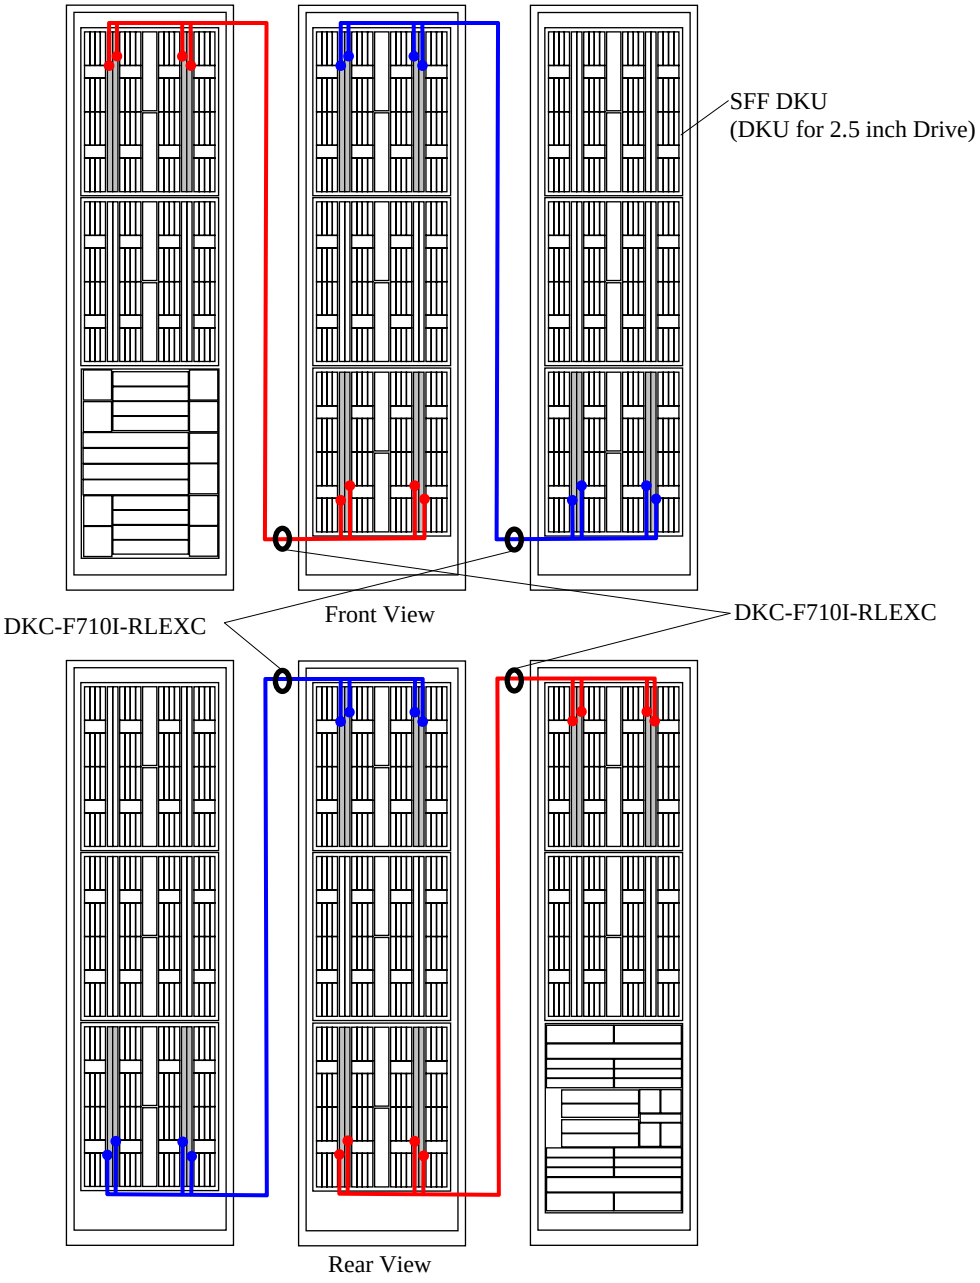

Fig. 3.12.4.9-2 Mounting Position of DEV Interface Cable

Copyright © 2010, Hitachi, Ltd.

When the Additional RACK is Installed in the Right Side of the Storage System

1. Pattern of Cable Connection
   There are four kinds of pattern in all that increases the Device Interface Cable HRLEX (DKC-F710I-HRLEXC) at the right side of the RACK by the combination of the DKU.
   When increasing DKC-F710I-HRLEX at the left side of the rack, refer to the page INST03-12C-3240.
   In this procedure, the existing RACK is called a connection source RACK, and newly increased RACK is called a connection destination RACK.
   Before starting operation according to this procedure, understand each process name and the position.

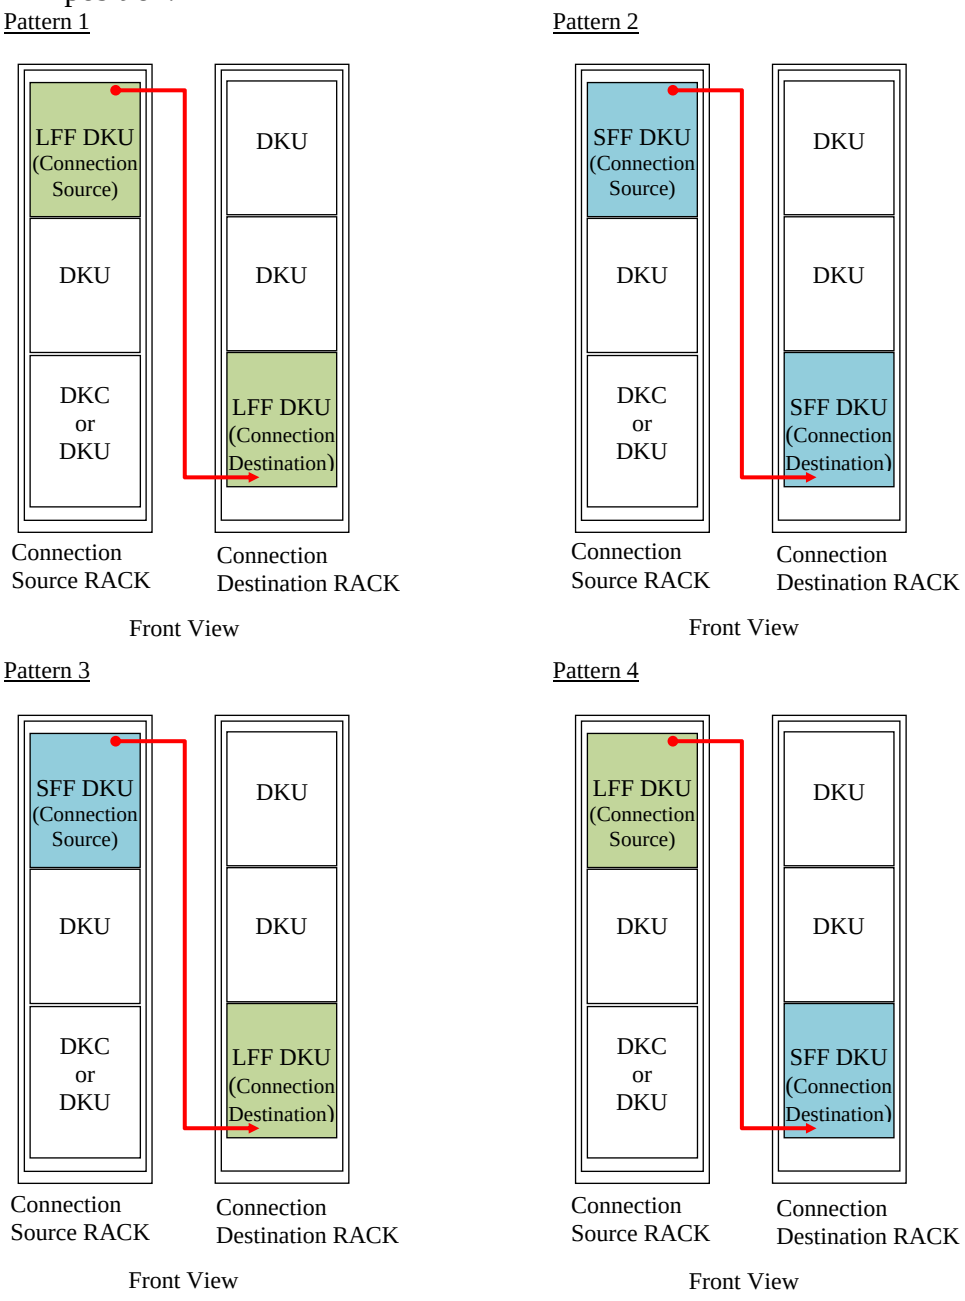

Fig. 3.12.4.9-3 Pattern of Cable Connection (Right Side Increasing)

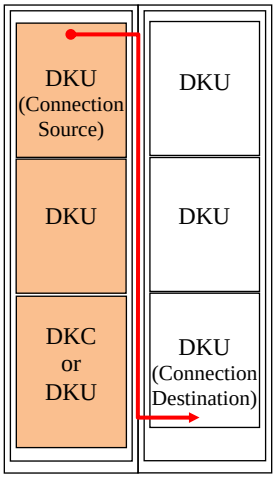
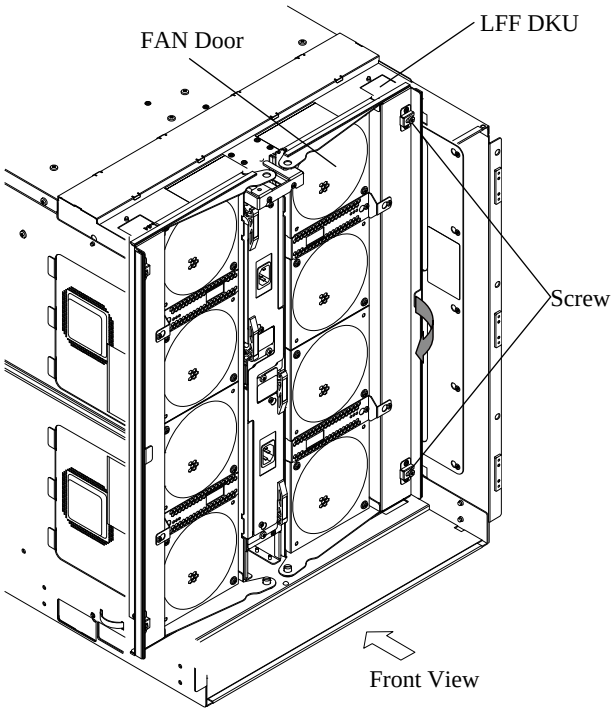
Copyright © 2010, Hitachi, Ltd.

2. Cable Wiring between RACKs
   a. Loosen all screws of the front right side of the DKU (two screws in each DKU) that is installed in the connection source RACK, and open the FAN door.





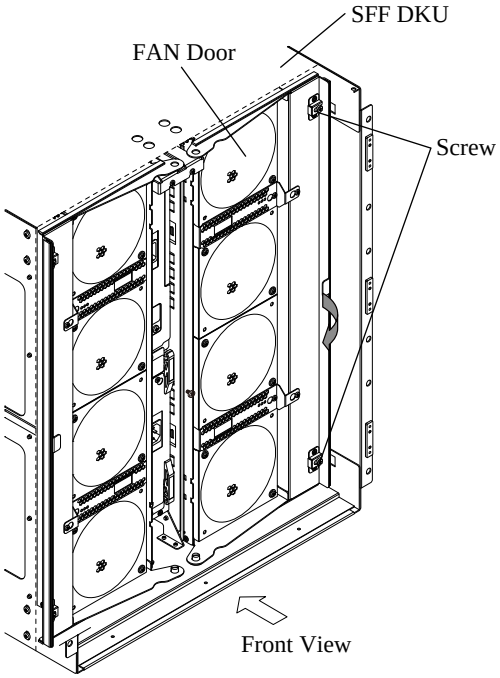


Fig. 3.12.4.9-4 FAN Door Opening

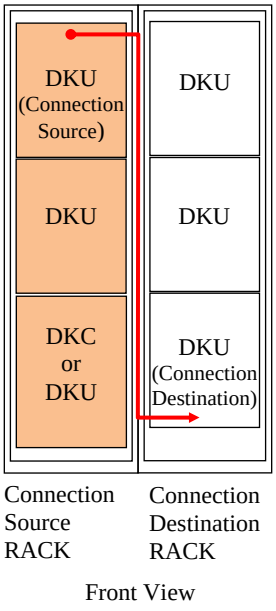
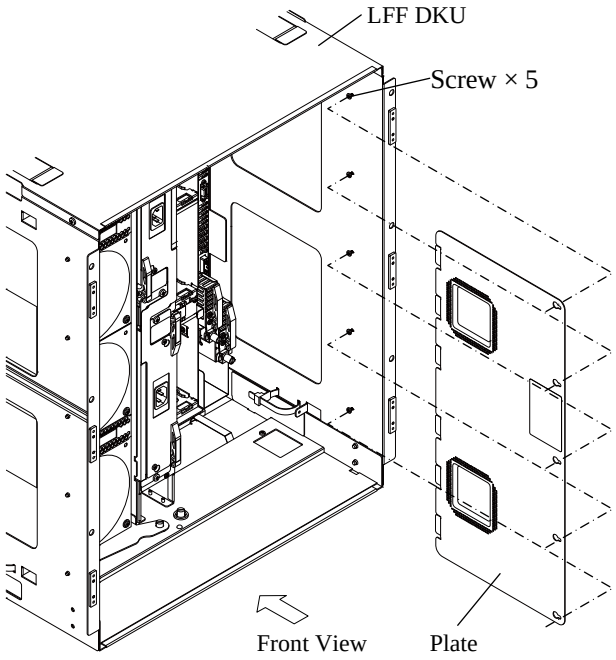
Copyright © 2010, 2011, Hitachi, Ltd.

b. Loosen all screws of the front right side of the DKU (five screws in each DKU) that is installed in the connection source RACK, and remove the plate.





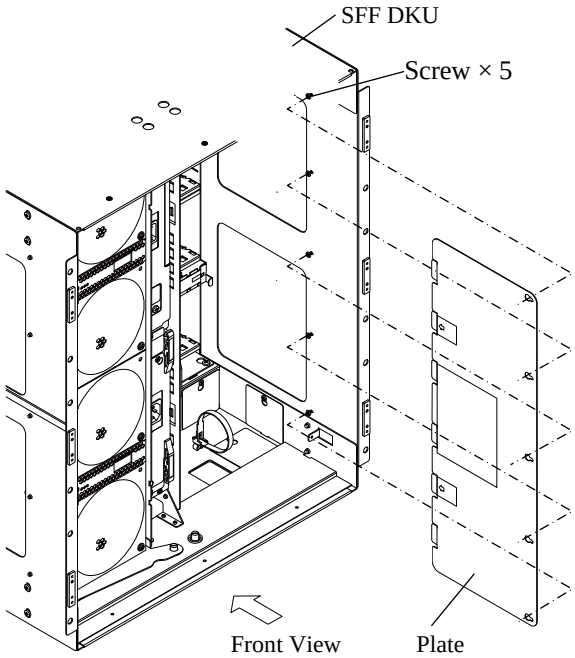


Fig. 3.12.4.9-5 Removal of Plates

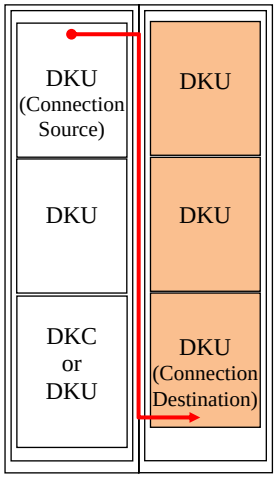
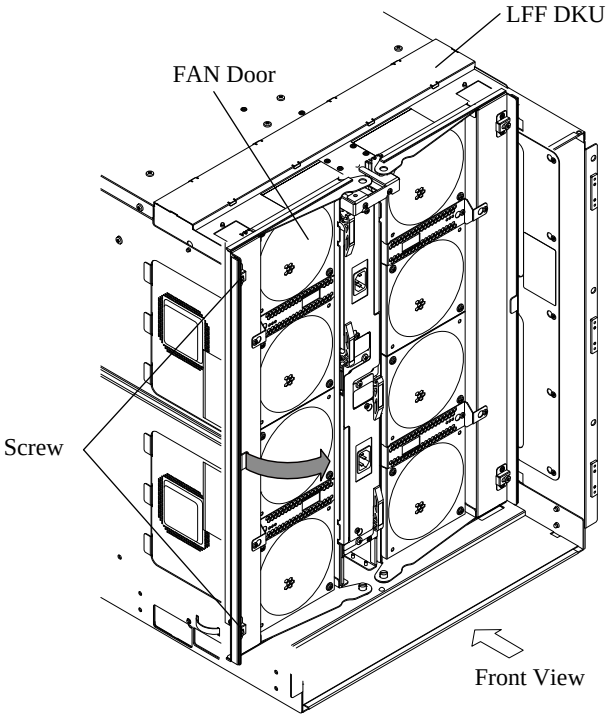
Copyright © 2010, Hitachi, Ltd.

c. Loosen all screws of the front left side of the DKU (two screws in each DKU) that is installed in the connection destination RACK, and open the FAN door.





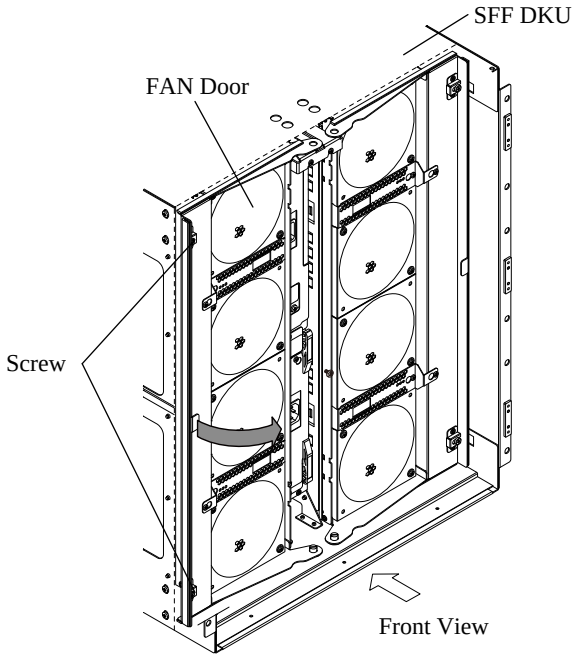


Fig. 3.12.4.9-6 FAN Door Opening

Copyright © 2010, 2011, Hitachi, Ltd.

d. Loosen all screws of the front left side of the DKU (five screws in each DKU) that is installed in the connection destination RACK, and remove the plate.

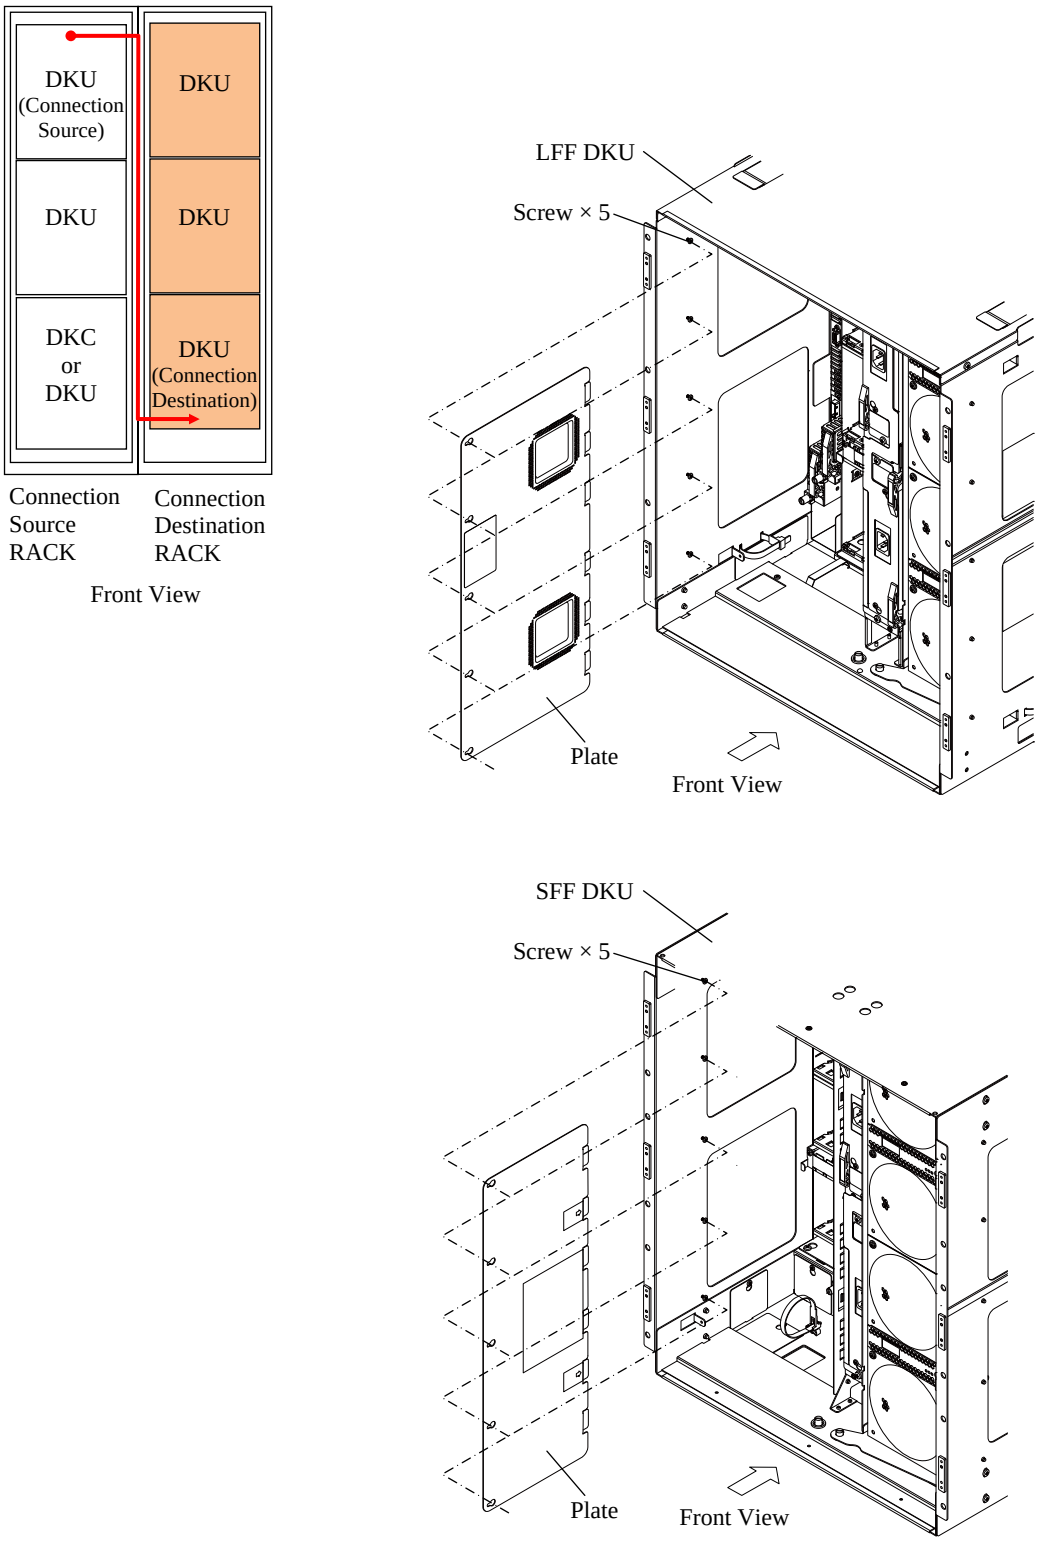

Fig. 3.12.4.9-7 Removal of Plate

Copyright © 2010, 2011, Hitachi, Ltd.

e. Wire the cables from upper part to lower part of the front side of the RACK.
f. Pull the wired cables into the front right side of the connection source DKU.

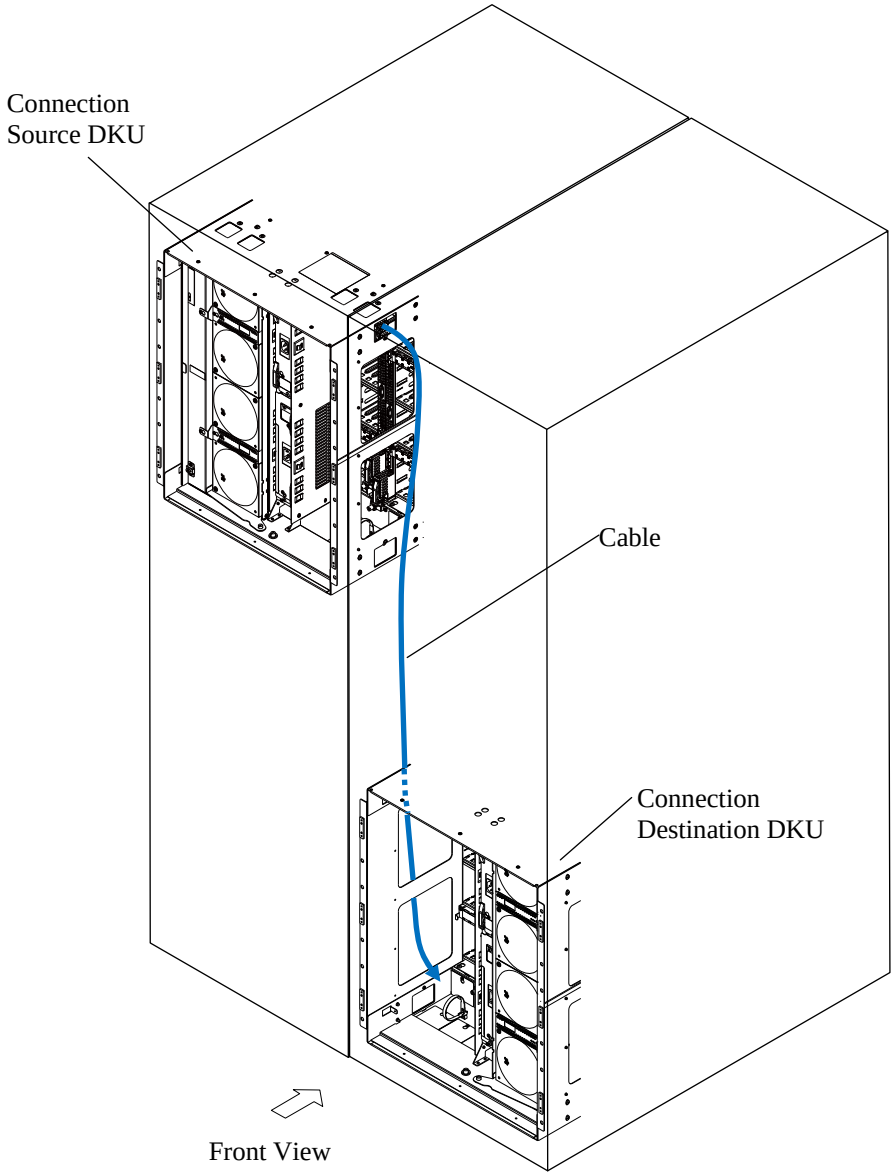

Fig. 3.12.4.9-8 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

3. Cable Installation of the front side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU

a. Remove the two hangers from the front right side of the connection source DKU.
b. Insert the cables (1/5-R-A4 and 1/5-L-A4) into the clearance in the upper part of the DKUPS.
c. Wire the cables (0/4-R-A4 and 0/4-L-A4). However, do not connect the cables with the SSW PCB at this stage.
d. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws. (Refer to the Fig. 3.12.4.9-4.)

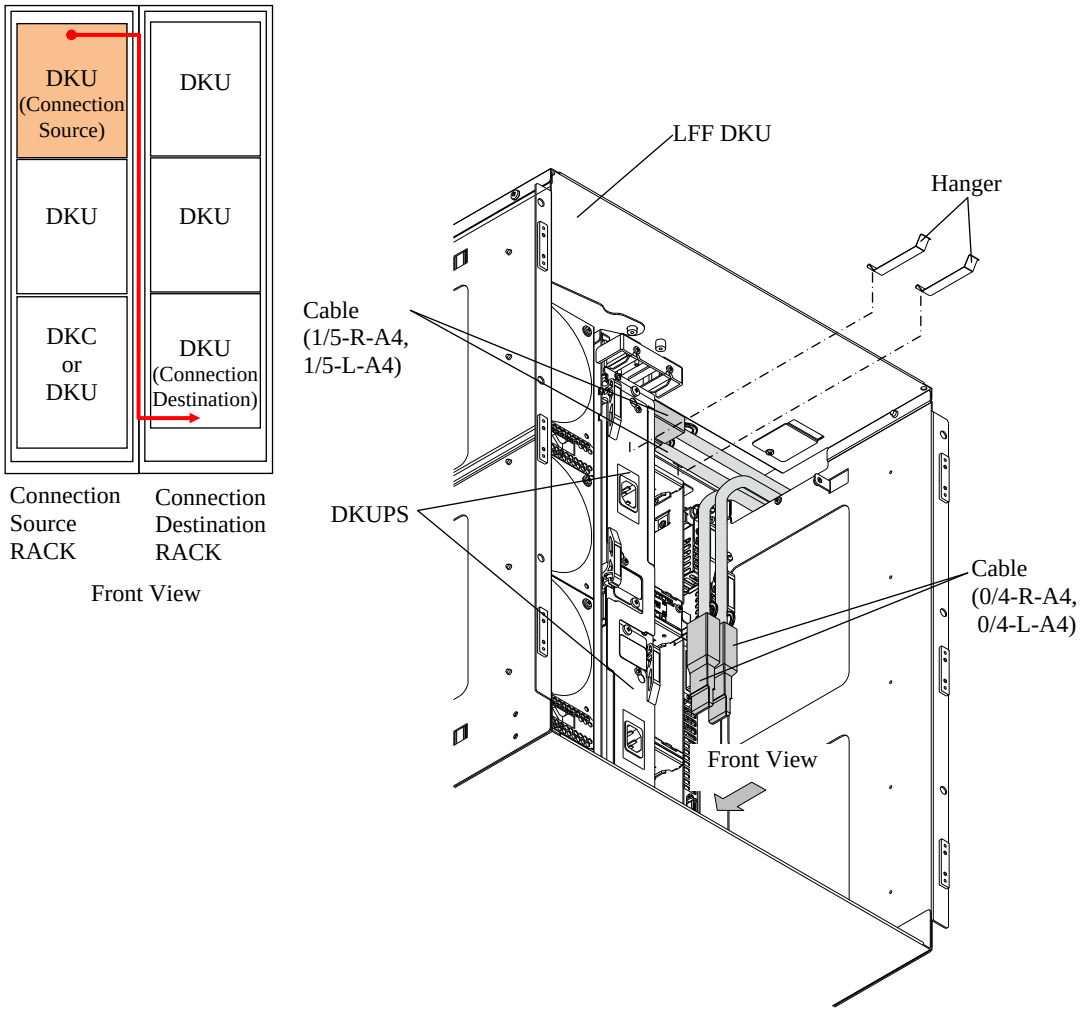

Fig. 3.12.4.9-9 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-6.)
f. Remove the two hangers.
g. Reach into the entry points of the right side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCB at this stage.
h. Install the two hangers and fix the cables.
i. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws.

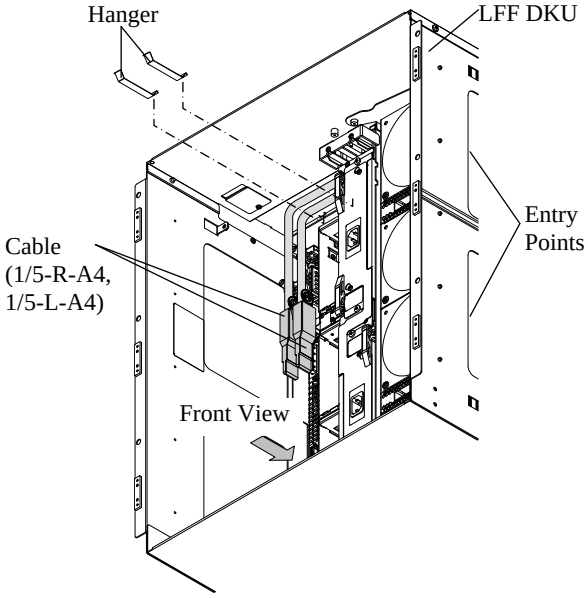

Fig. 3.12.4.9-10 Attachment of Cables

j. Loosen the two screws of front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-4.)
k. Install the two hangers, and fix the cables.

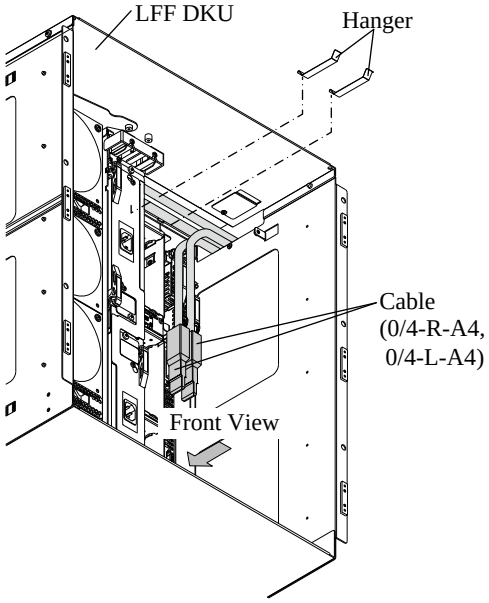

Fig. 3.12.4.9-11 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

When the Connection Source DKU is the SFF DKU

a. Insert the cables (1/5-R-A4 and 1/5-L-A4) into the clearance of the upper part of the DKUPS of the front right side of the connection source DKU.
b. Wire the cables (0/4-R-A4 and 0/4-L-A4). However, do not connect the cables with the SSW PCB at this stage.
c. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.9-4.)

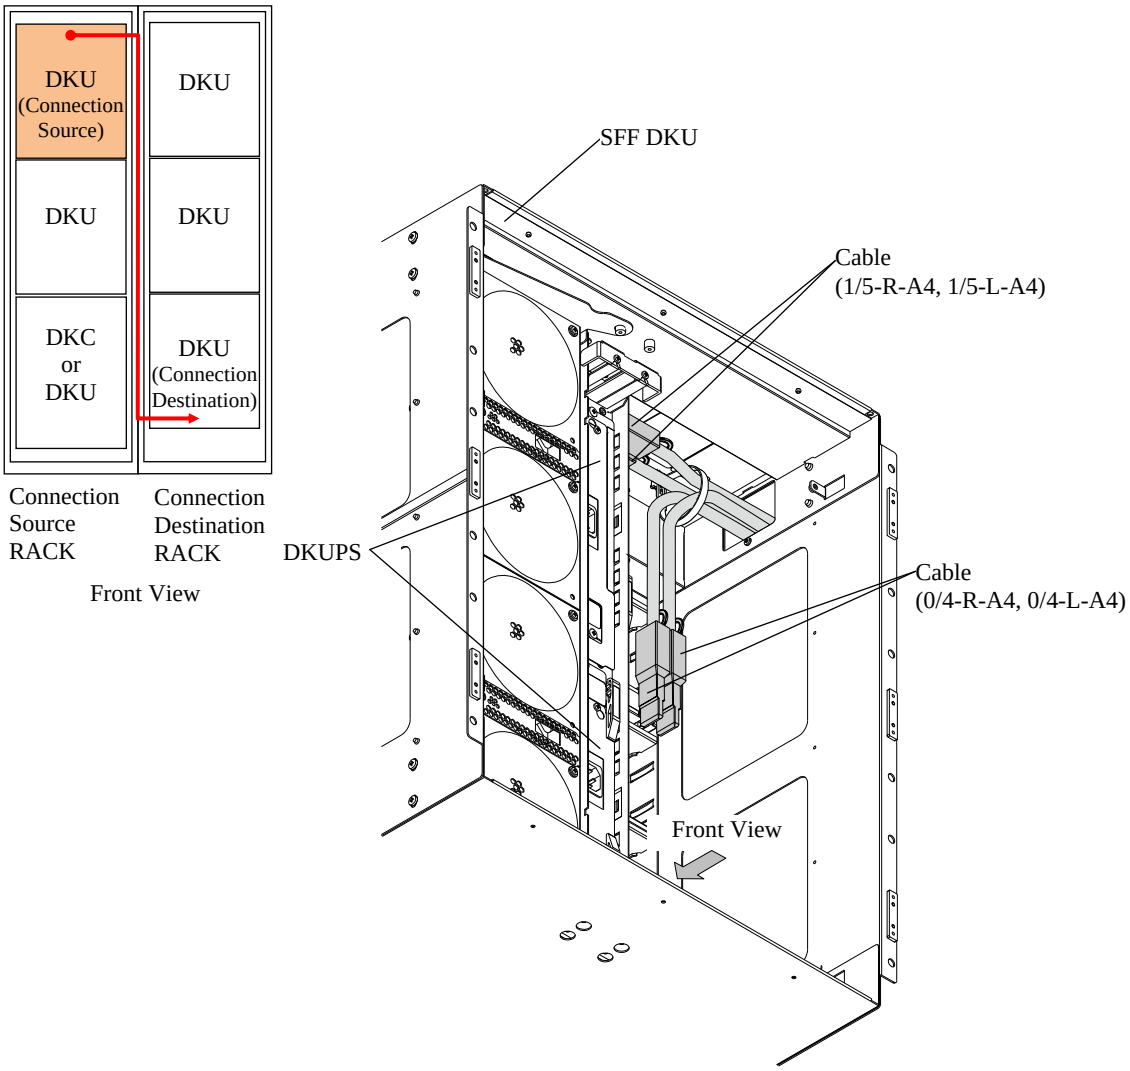

Fig. 3.12.4.9-12 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

d. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-6.)
e. Reach into the entry points of the right side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCB at this stage.
f. Bundle the cables with the clamp tape.
g. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws.

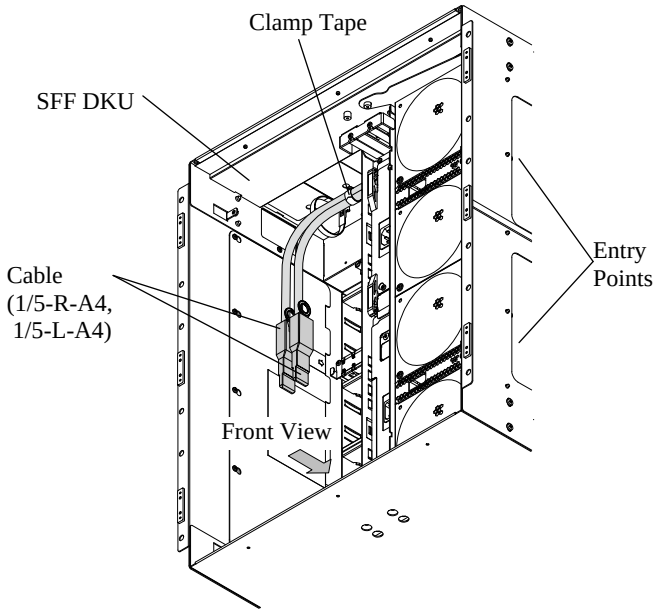

Fig. 3.12.4.9-13 Attachment of Cables

h. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-4.)
i. Fix the four cables with the repeat binder.

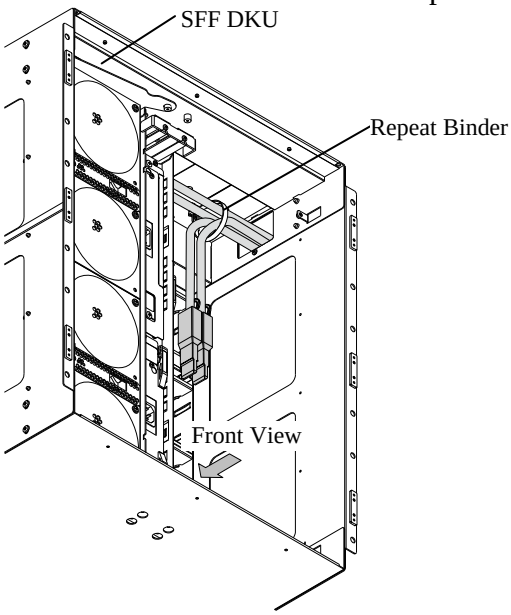

Fig. 3.12.4.9-14 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

4. Fixation of Cables
   a. Fix the four cables with the two repeat binders of the connection source RACK side.

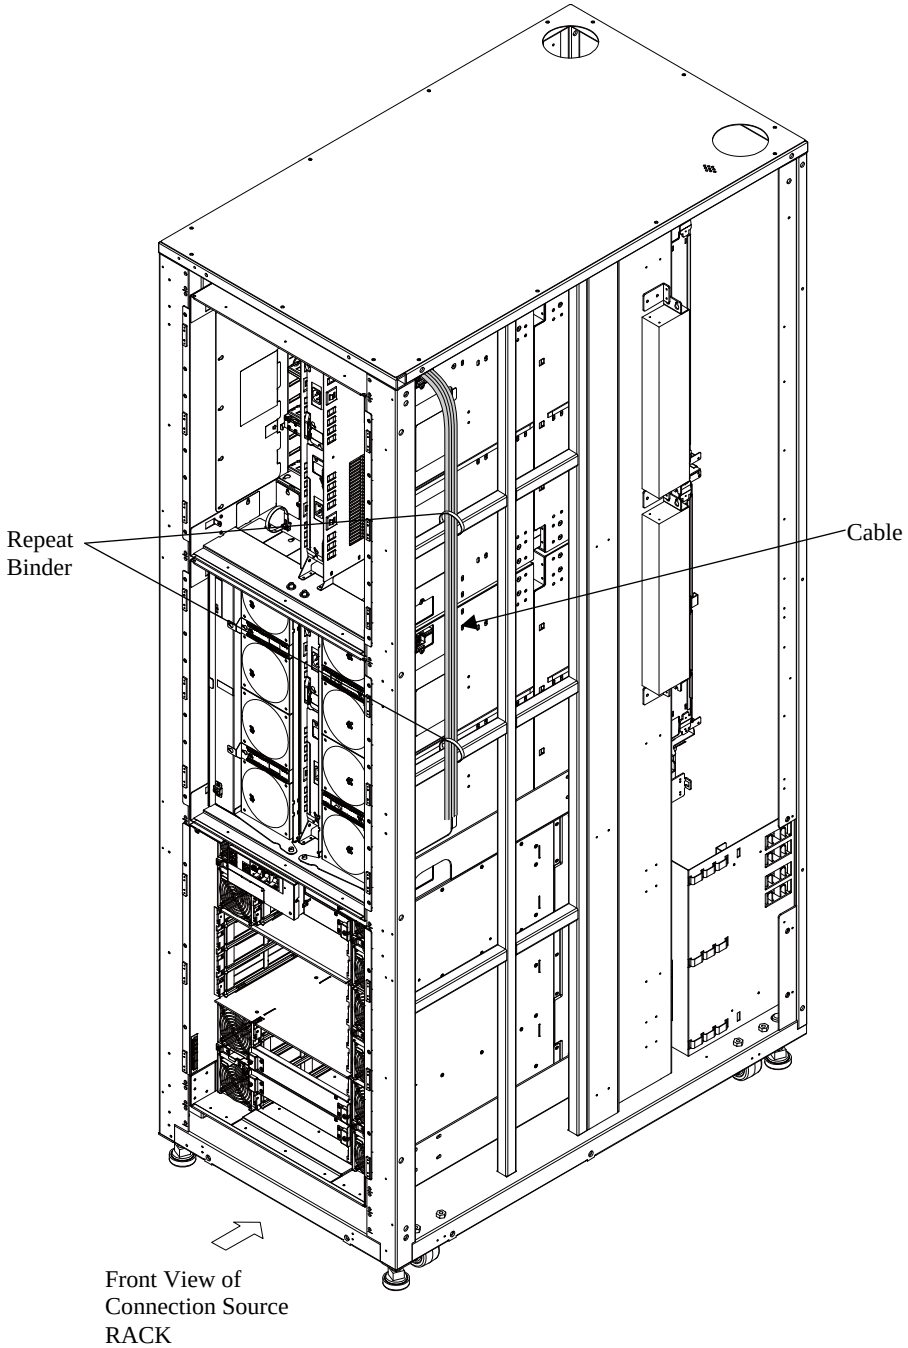

Fig. 3.12.4.9-15 Securing the Cables

Copyright © 2010, Hitachi, Ltd.

5. Cable Installation of the front side of the Connection Destination DKU

When the Connection Destination DKU is the LFF DKU

a. Pull the cables in from the front left side of the connection destination DKU.
b. Remove the two hangers.
c. Insert the cables (0/4-R-A2 and 0/4-L-A2) into the clearance of the lower part of the DKUPS.
d. Wire the cables (1/5-R-A2 and 1/5-L-A2). However, do not connect the cables with the SSW PCB at this stage.
e. Close the FAN door of the front left side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 3.12.4.9-6.)

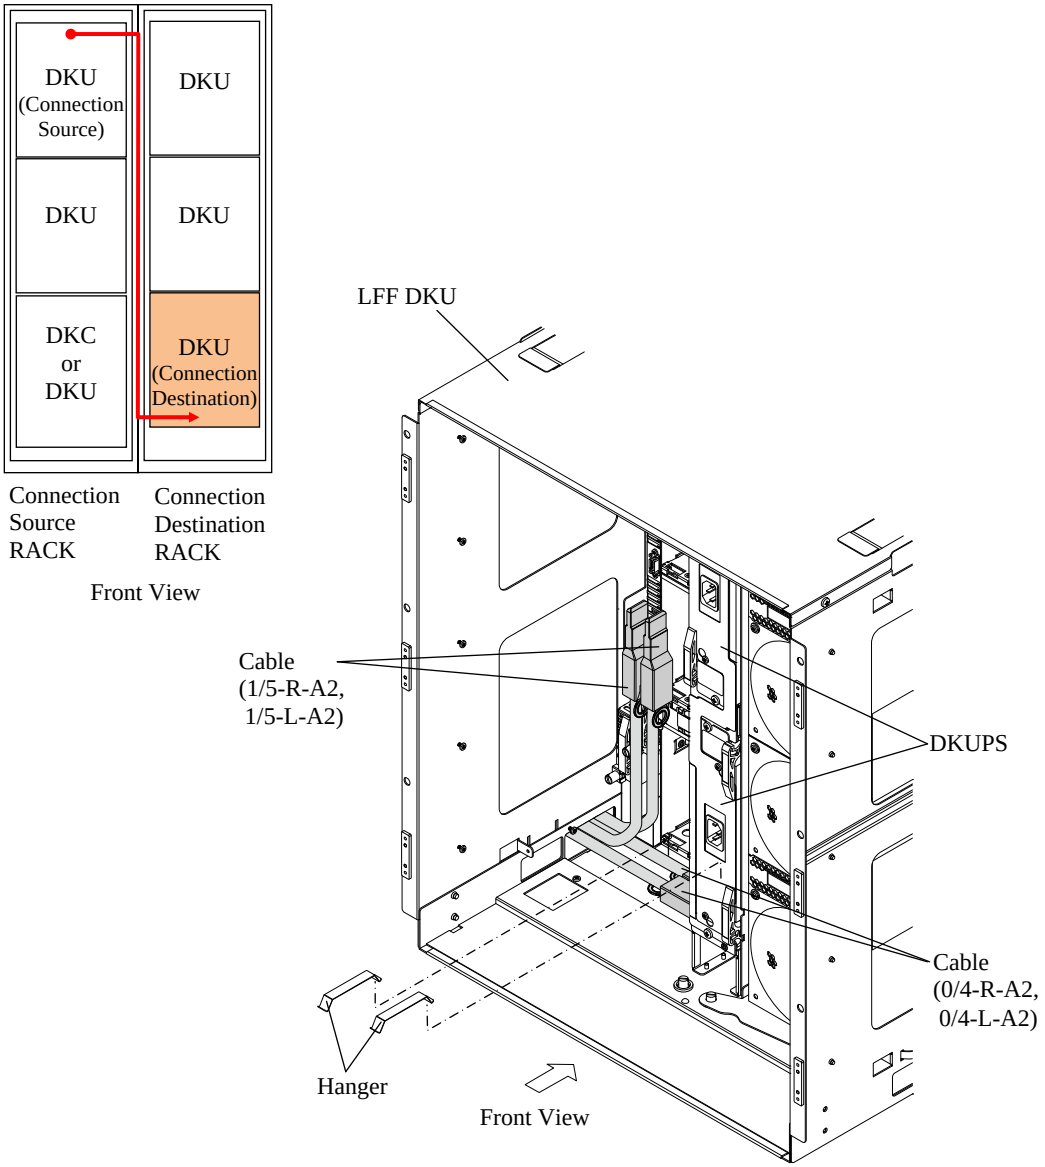

Fig. 3.12.4.9-16 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

f. Loosen the two screws of the front right side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-4.)
g. Remove the two hangers.
h. Reach into the entry points of the left side of the DKU, and pull the cables out from the lower part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCB at this stage.
i. Install the two hangers, and fix the cables.
j. Close the FAN door of the front right side of the connection destination DKU, and tighten the two screws.

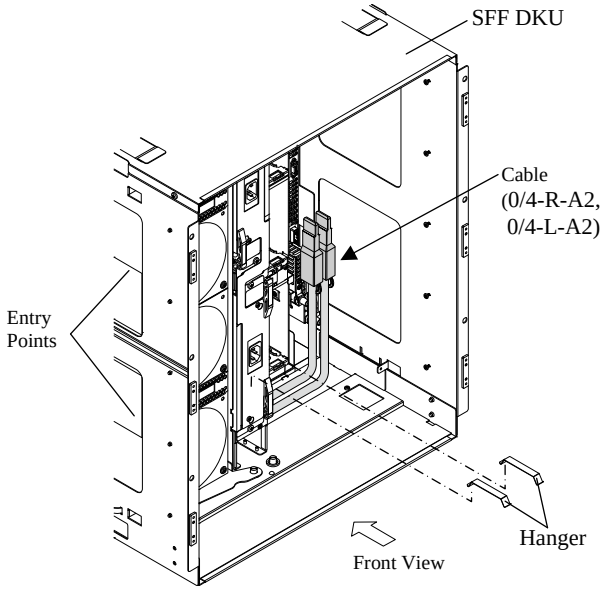

Fig. 3.12.4.9-17 Attachment of Cables

k. Loosen the two screws of the front left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-6.)
l. Install the two hangers, and fix the cables.

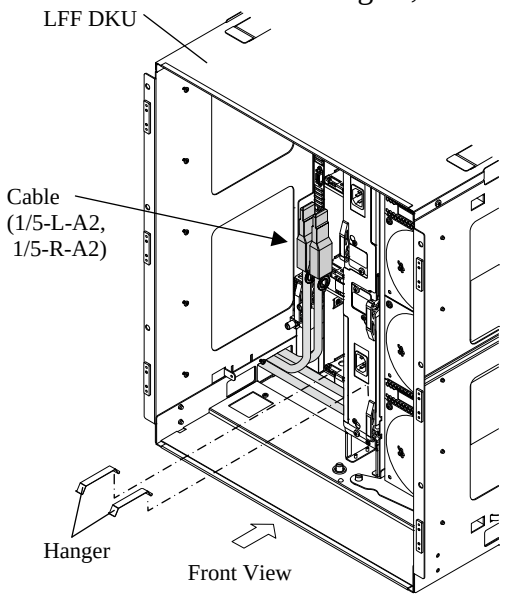

Fig. 3.12.4.9-18 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

When the Connection Destination DKU is the SFF DKU

a. Pull the cables in from the hole in the front left side of the connection destination DKU.
b. Insert the cables (0/4-R-A2 and 0/4-L-A2) into the clearance of the lower part of the DKUPS.
c. Wire the cables (1/5-R-A2 and 1/5-L-A2). However, do not connect the cables with the SSW PCB at this stage.
d. Close the FAN door of the front left side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 3.12.4.9-6.)

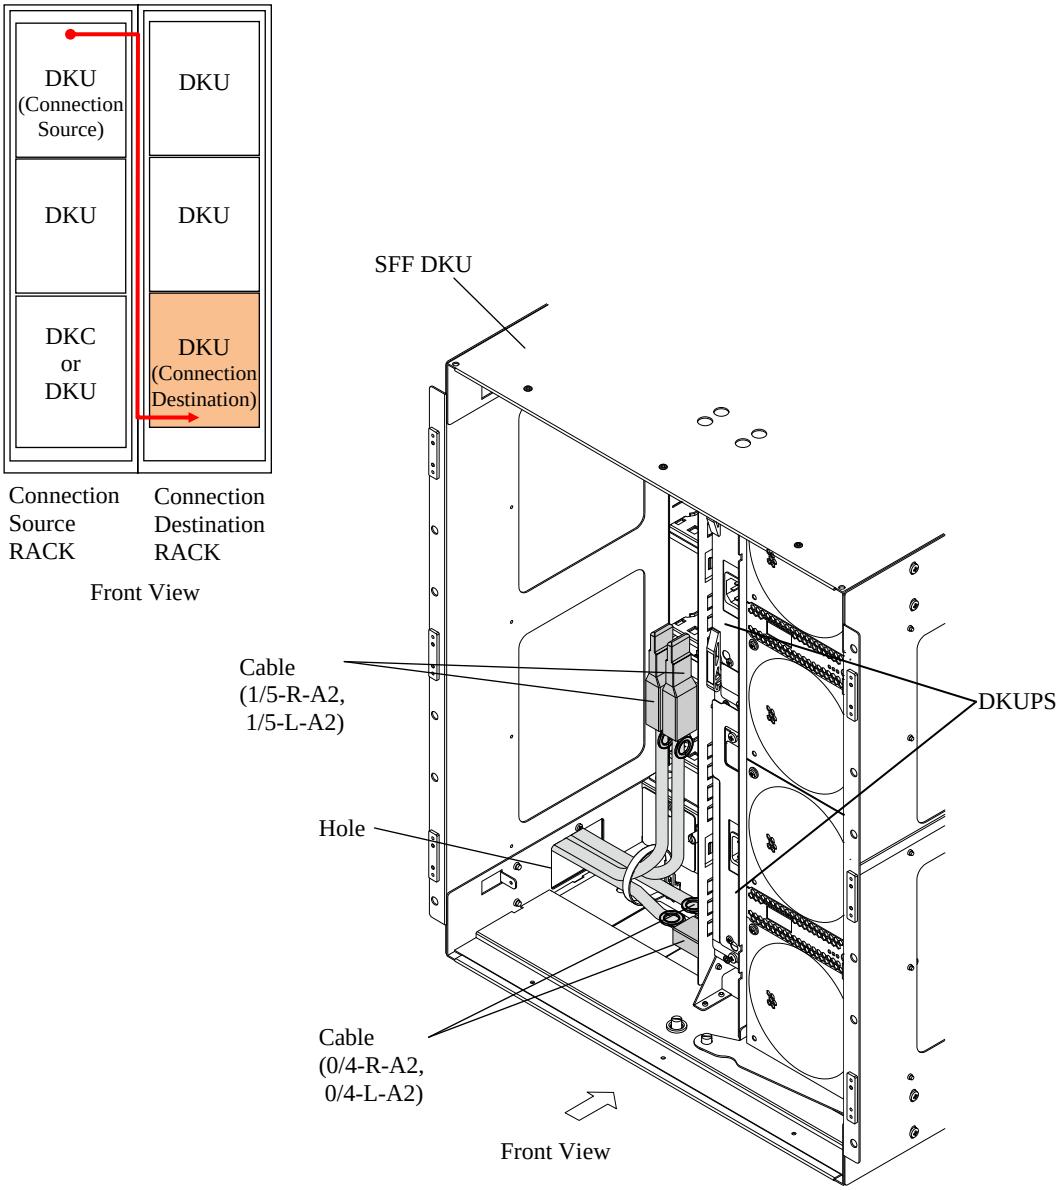

Fig. 3.12.4.9-19 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the front right side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-4.)
f. Reach into the entry points of the left side of the DKU, and pull the cables out from the lower part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCB at this stage.
g. Bundle the two cables with the clamp tape.
h. Close the FAN door of the front right side of the connection destination DKU, and tighten the two screws.

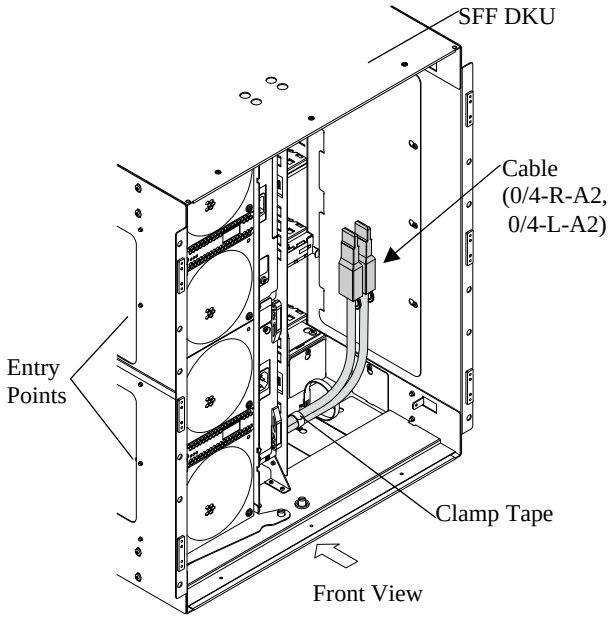

Fig. 3.12.4.9-20 Attachment of Cables

i. Loosen the two screws of the front left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-6.)
j. Fix the cables with the repeat binder.

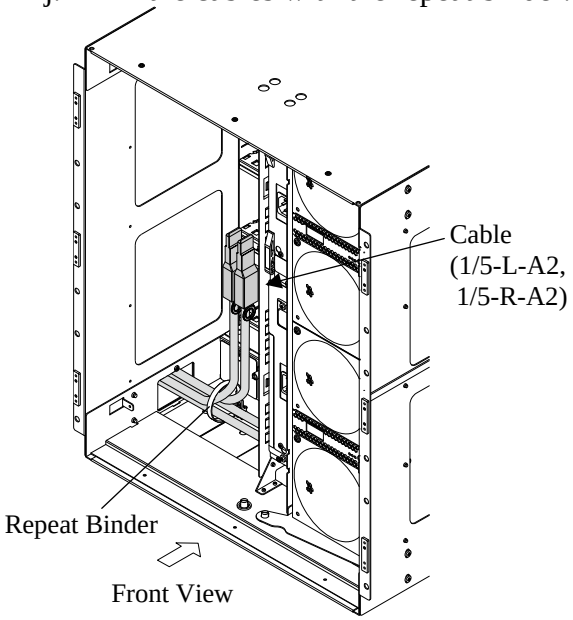

Fig. 3.12.4.9-21 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

6. Handling of Cable Extra Length
   a. Put the extra length of the cables into the clearance of the RACK.
   b. Install all removed plates in the front right side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 3.12.4.9-5.)
   c. Close all the FAN doors of the front right side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 3.12.4.9-4.)
   d. Install all removed plates in the front left side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 3.12.4.9-7.)
   e. Close all the FAN doors of the front left side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 3.12.4.9-6.)

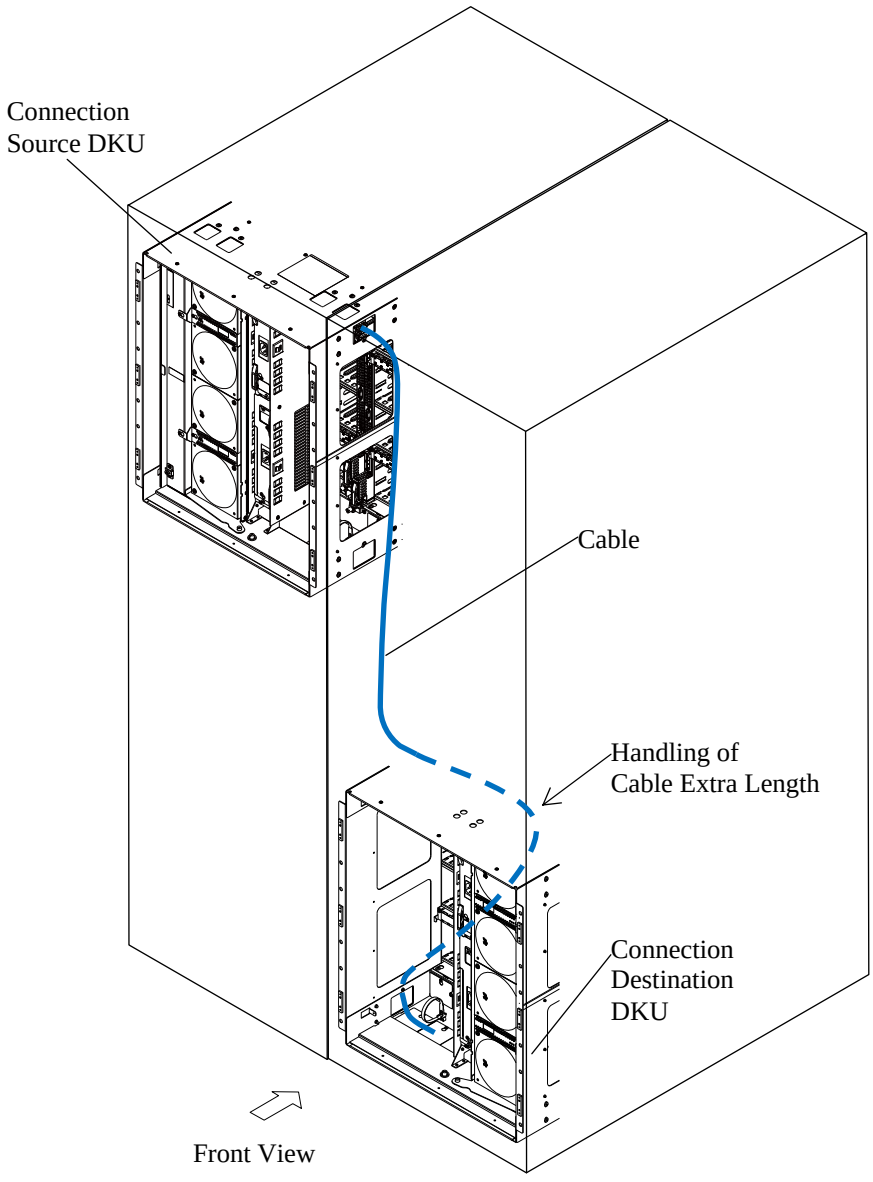

Fig. 3.12.4.9-22 Handling of Cable Extra Length

Copyright © 2010, Hitachi, Ltd.

8. Cable Installation of the Rear Side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU

a. Remove the two hangers from the rear left side of the connection source DKU.
b. Insert the cables (2/6-R-A4 and 2/6-L-A4) in the clearance of the upper part of the DKUPS.
c. Wire the cables (3/7-R-A4 and 3/7-L-A4). However, do not connect the cables with SSW PCB at this stage.
d. Close the FAN door of the rear left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.9-23.)

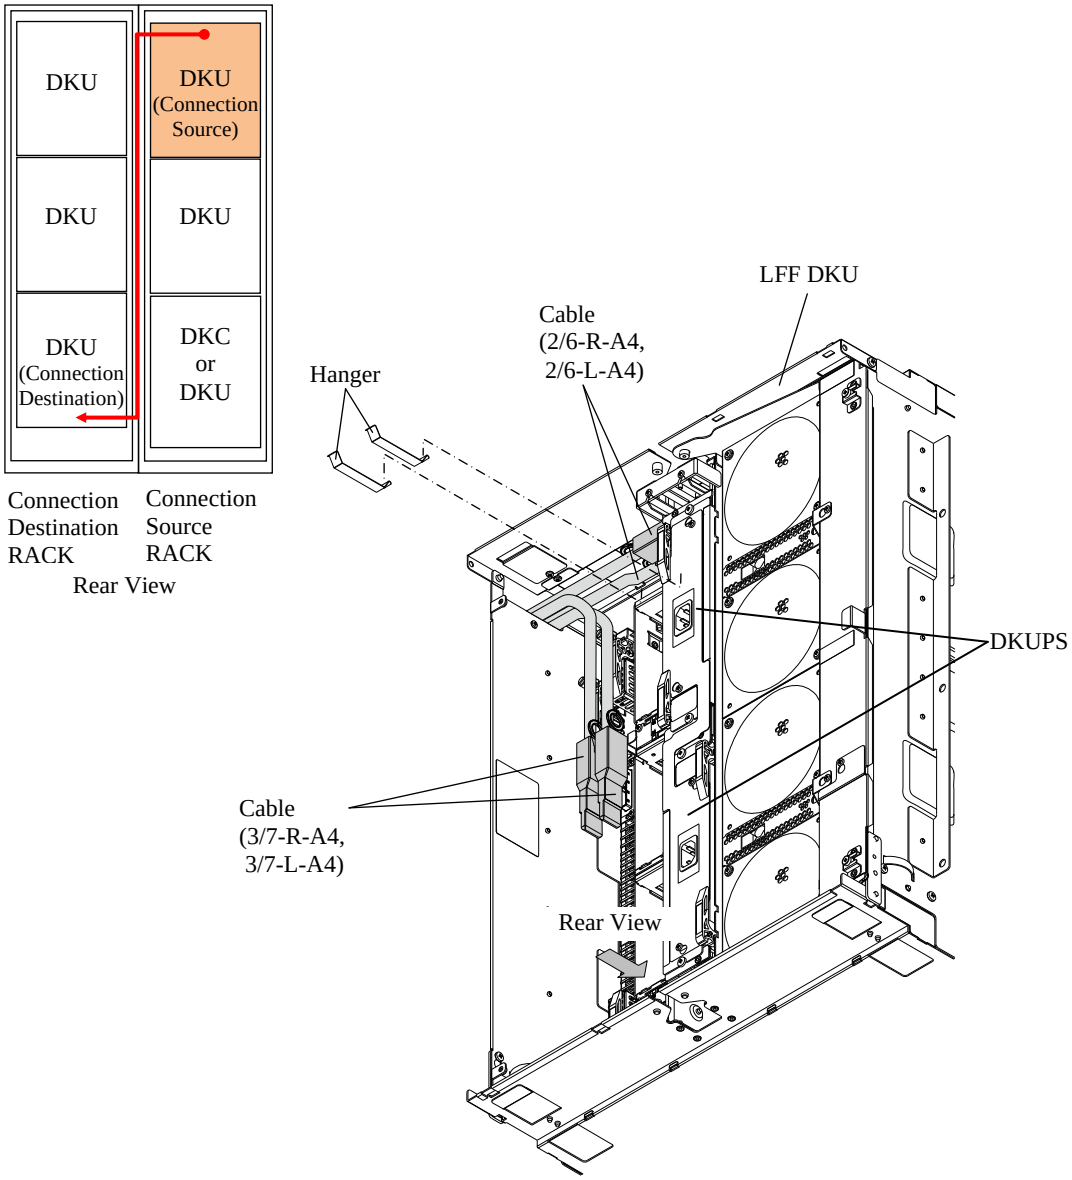

Fig. 3.12.4.9-28 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the rear right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-25.)
f. Remove the two hangers.
g. Pull the cables out from the upper part of the DKUPS, and wire the cables. However, do not connect the cables with the SSW PCB at this stage.
h. Install the two hangers, and fix the cables.
i. Close the FAN door of the rear right side of the connection source DKU, and tighten the two screws.

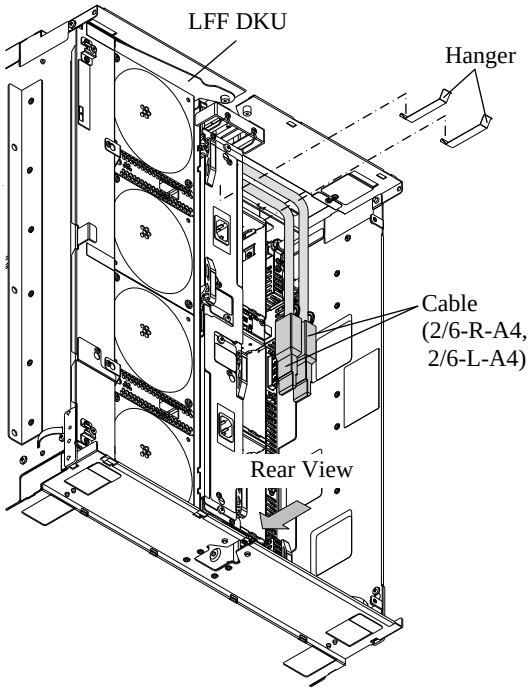

Fig. 3.12.4.9-29 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

j. Loosen the two screws of the rear left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-23.)
k. Install the two hangers, and fix the cables.

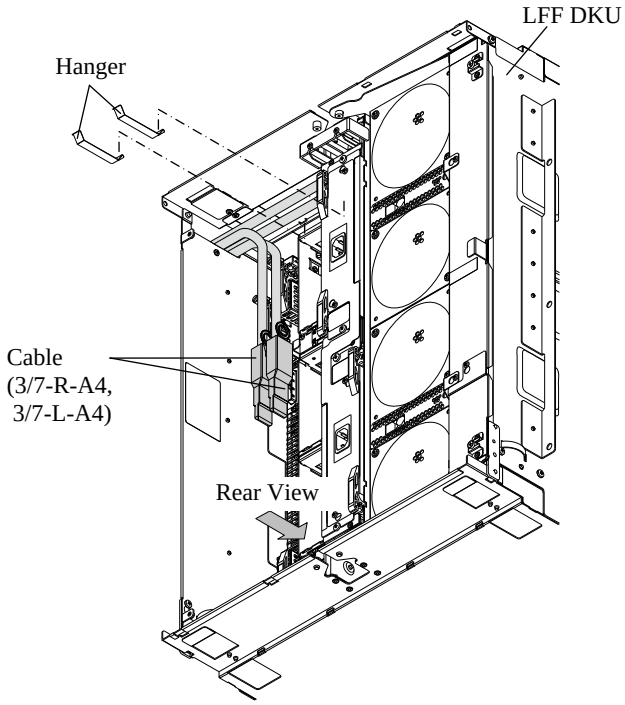

Fig. 3.12.4.9-30 Attachment of Cables

When the Connection Source DKU is the SFF DKU

a. Insert the cables (2/6-R-A4 and 2/6-L-A4) in the clearance of the upper part of the DKUPS of the rear left side of the connection source DKU.
b. Wire the cables (3/7-R-A4 and 3/7-L-A4). However, do not connect the cables with SSW PCB at this stage.
c. Close the FAN door of the rear left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.9-23.)

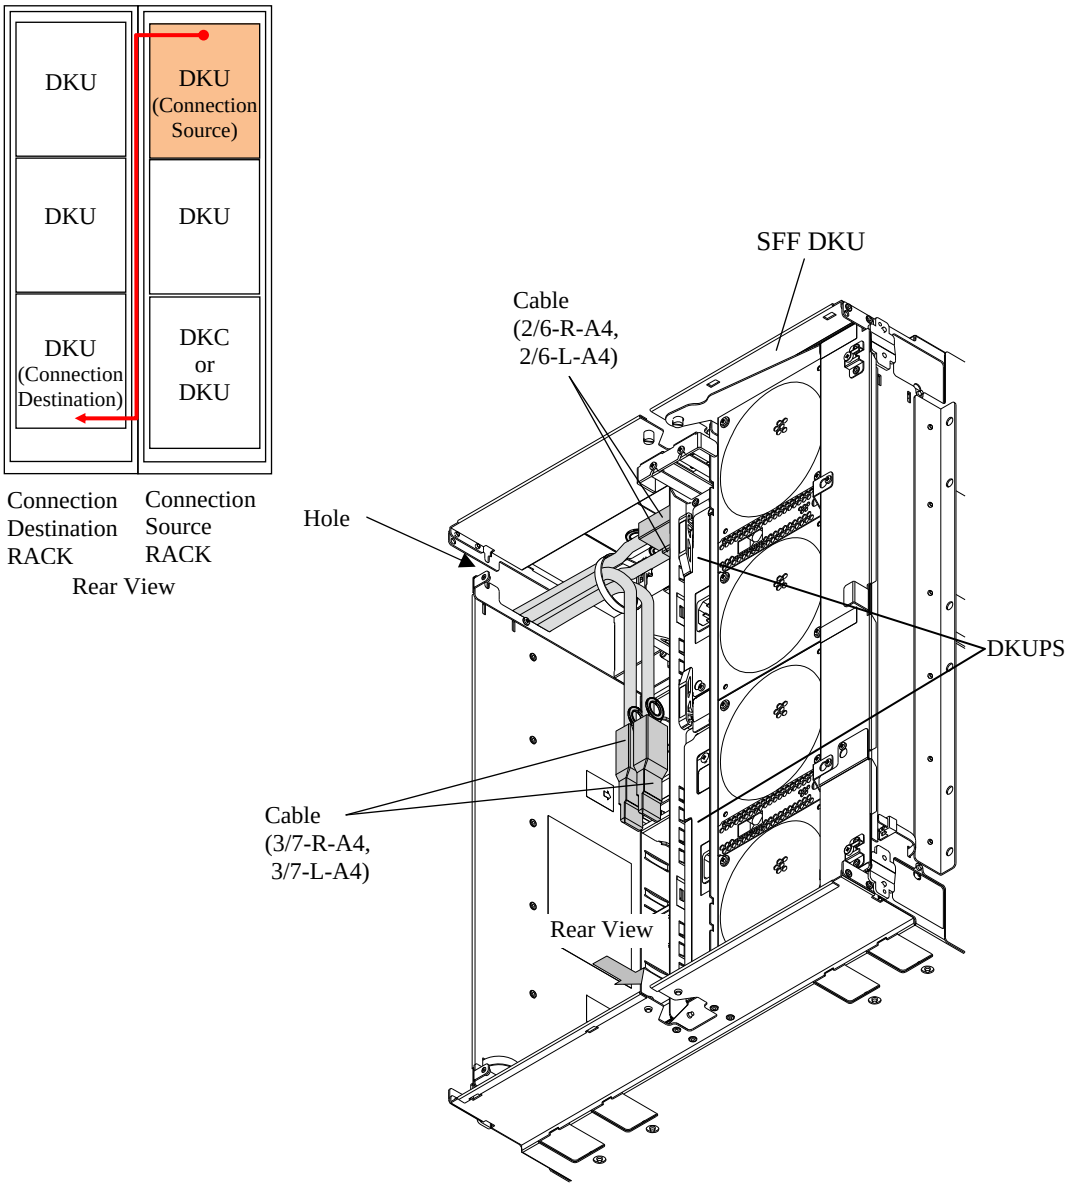

Fig. 3.12.4.9-31 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

d. Loosen the two screws of the rear right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-25.)
e. Pull the cables out from the upper part of the DKUPS, and wire the cables. However, do not connect the cables with the SSW PCB at this stage.
f. Bundle the cables with the clamp tape.
g. Close the FAN door of the rear right side of the connection source DKU, and tighten the two screws.

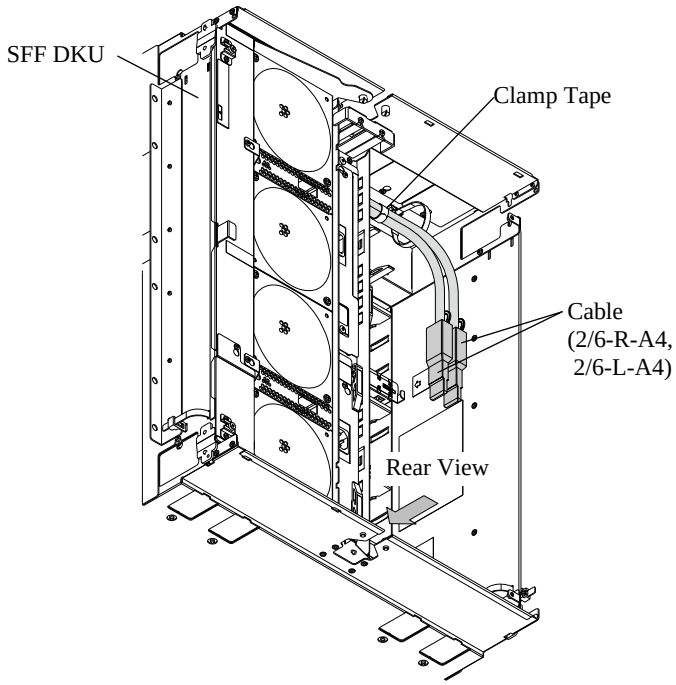

Fig. 3.12.4.9-32 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

h. Loosen the two screws of the rear left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-23.)
i. Fix the cables with the repeat binder.
j. Install the cover, and tighten the two screws.

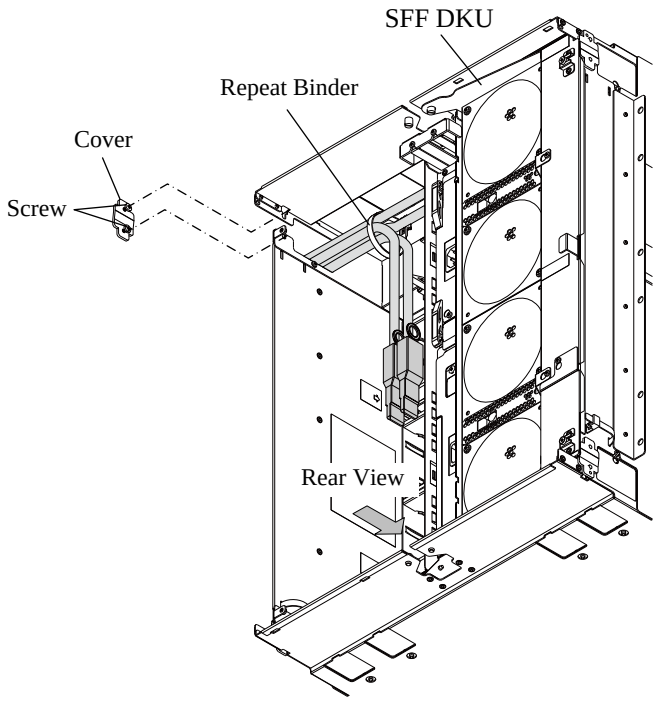

Fig. 3.12.4.9-33 Fixation of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the rear left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-23.)
f. Pull the cables out from the lower part of the DKUPS, and wire the cables. However, do not connect the cables with the SSW PCB at this stage.
g. Bundle the cables with the clamp tape.
h. Close the FAN door of the rear left side of the connection destination DKU, and tighten the two screws.

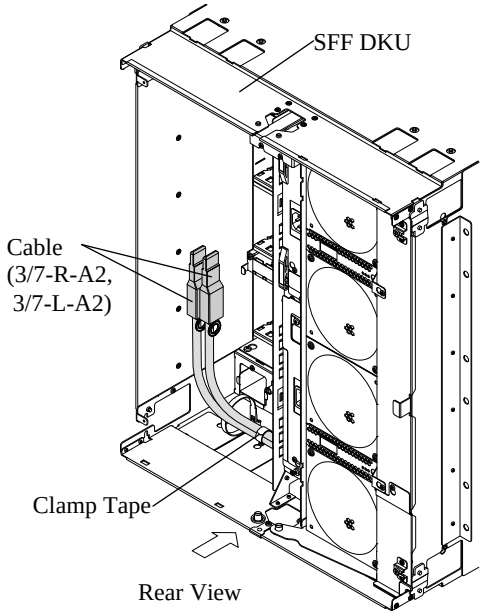

Fig. 3.12.4.9-39 Attachment of Cables

i. Loosen the two screws of the rear right side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-25.)
j. Fix the cables with the repeat binder.
k. Install the cover, and tighten the two screws.

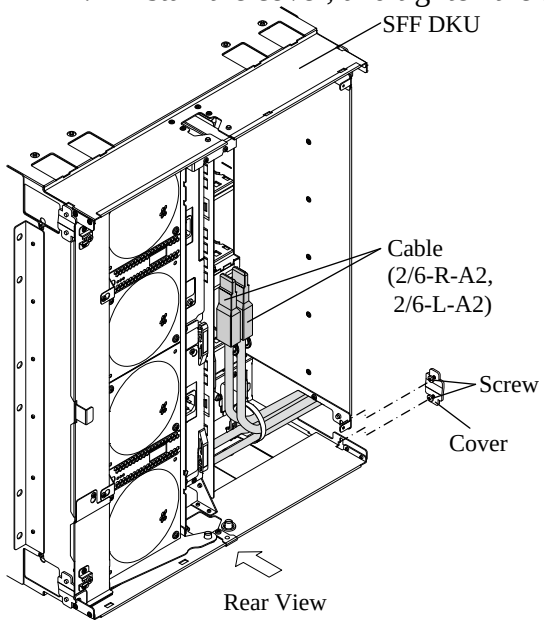

Fig. 3.12.4.9-40 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

11. Handling of Cable Extra Length
    a. Put the extra length of the cables into the clearance of the RACK.
    b. Close the FAN door of the rear left side of the connection source of the DKU, and tighten the screws. (Refer to Fig. 3.12.4.9-23.)
    c. Close the FAN door of the rear right side of the connection destination DKU, and tighten the screws. (Refer to Fig. 3.12.4.9-25.)

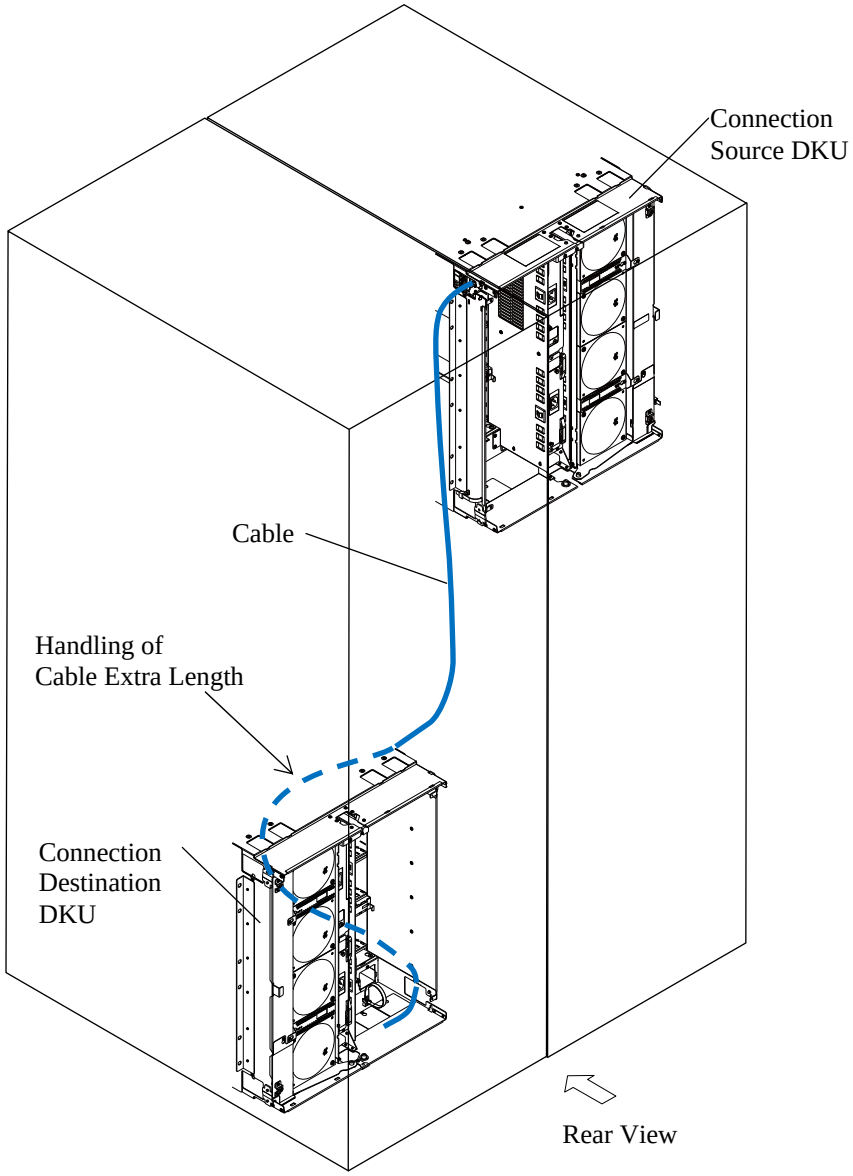

Fig. 3.12.4.9-41 Handling of Cable Extra Length

When the Additional RACK is Installed in the Left Side of the Storage System

1. Cable Installation
   There are four kinds of pattern in all that increases the Device Interface Cable HRLEX (DKC-F710I-HRLEXC) at the left side of the RACK by the combination of the DKU.
   In this procedure, the existing RACK is called a connection source RACK, and newly increased RACK is called a connection destination RACK. Equally, the existing DKU is called a connection source DKU, and newly increased DKU is called a connection destination DKU.
   Before starting operation according to this procedure, understand each process name and the position.

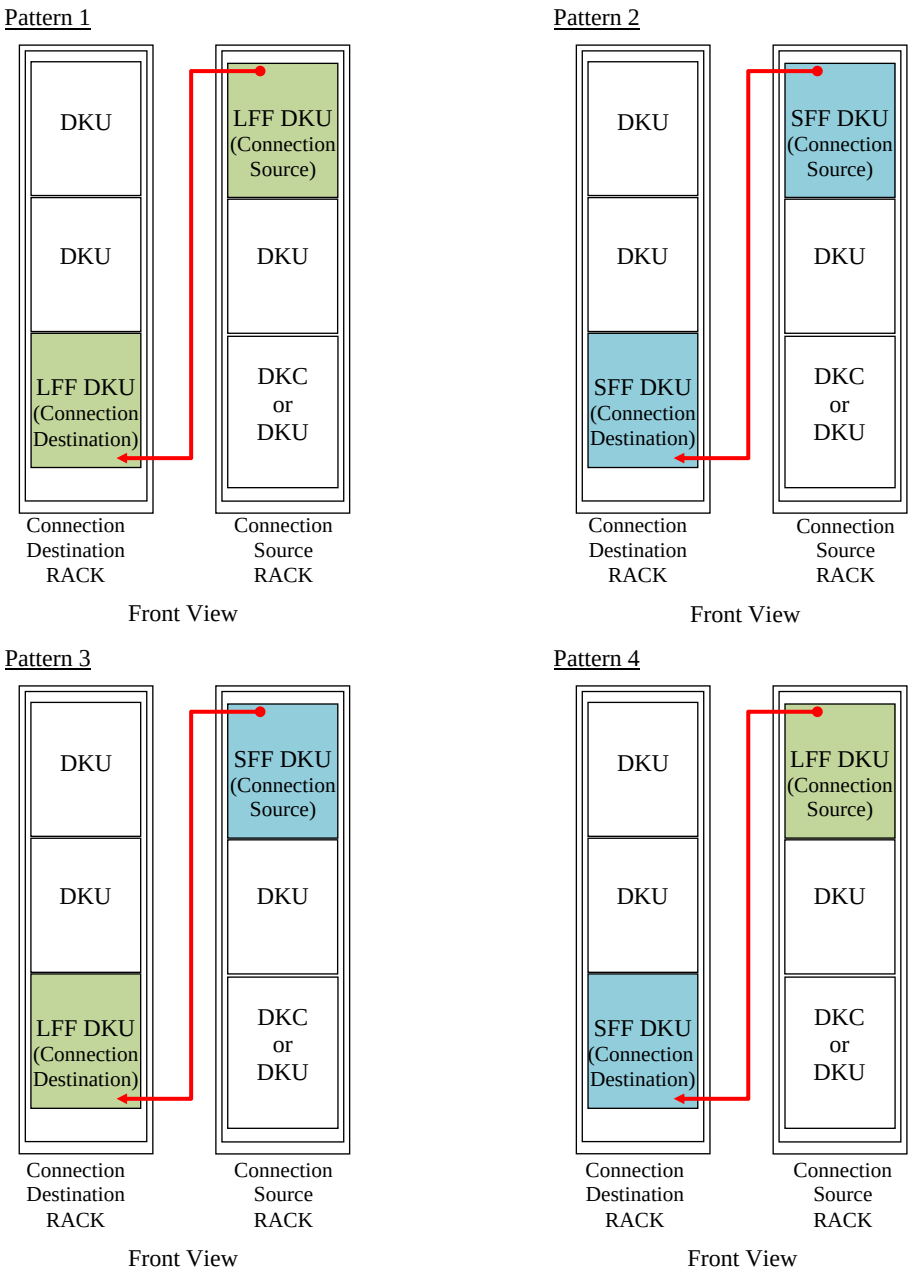

Fig. 3.12.4.9-43 Pattern of Cable Connection (Left Side Increasing)

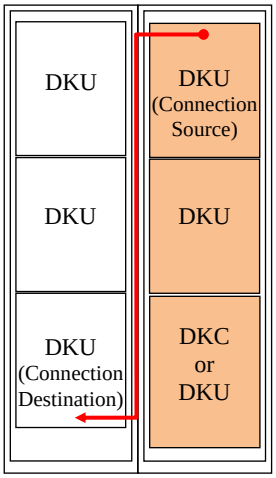
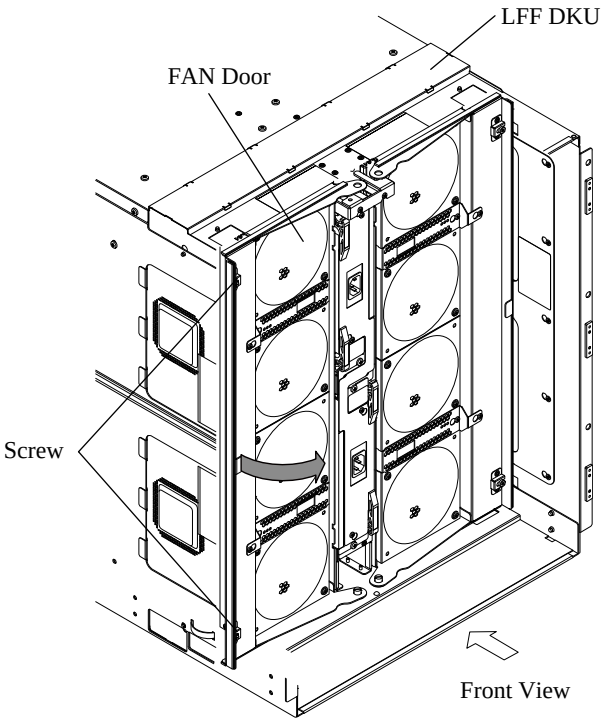
Copyright © 2010, Hitachi, Ltd.

2. Cable Wiring of the Front Side of the RACK
   a. Loosen all screws of the front left side of the DKU (two screws in each DKU) that is installed in the connection source RACK, and open the FAN door.





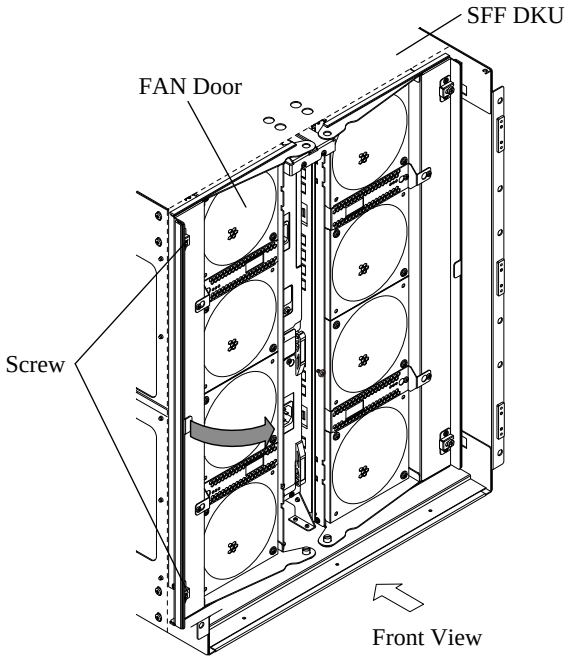


Fig. 3.12.4.9-44 FAN Door Opening

Copyright © 2010, 2011, Hitachi, Ltd.

b. Loosen all screws of the front left side of the DKU (five screws in each DKU) that is installed in the connection source RACK, and remove the plate.

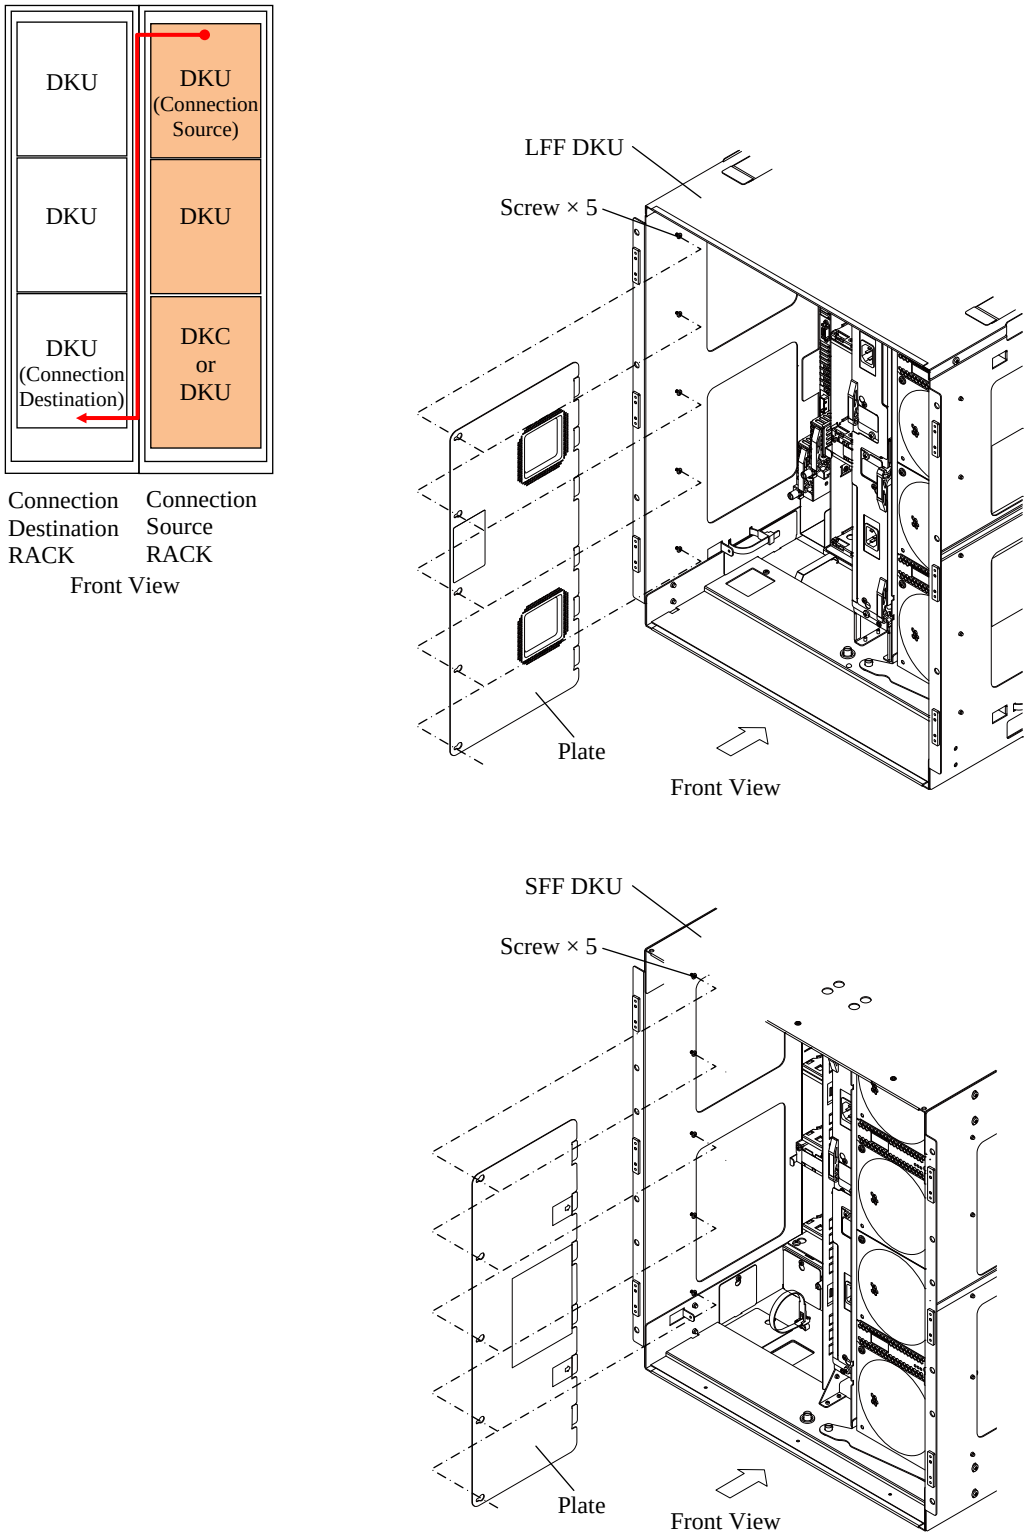

Fig. 3.12.4.9-45 Removal of Plate

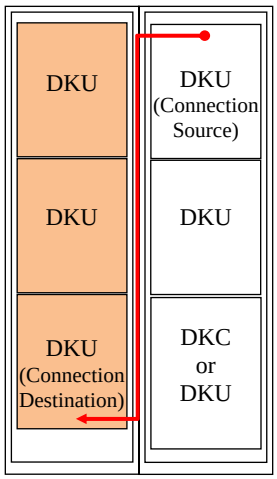
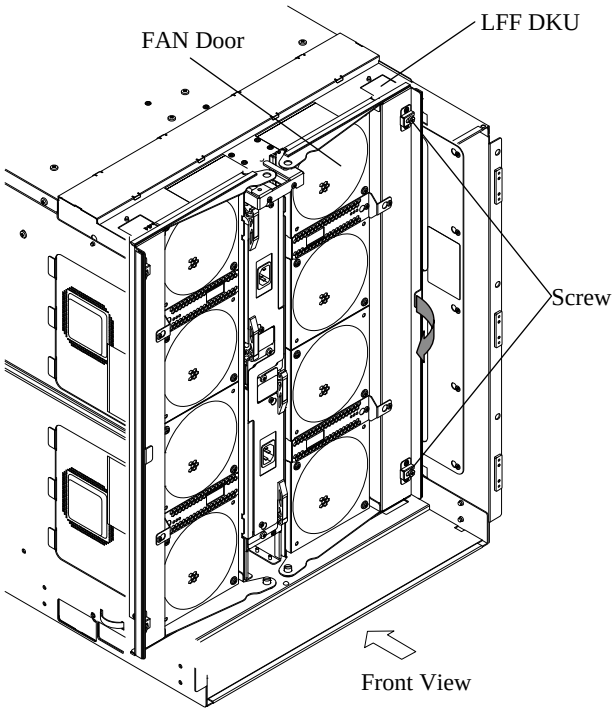
Copyright © 2010, Hitachi, Ltd.

c. Loosen the two screws of the front right side of all DKU that is installed in the connection destination RACK, and open the FAN door.





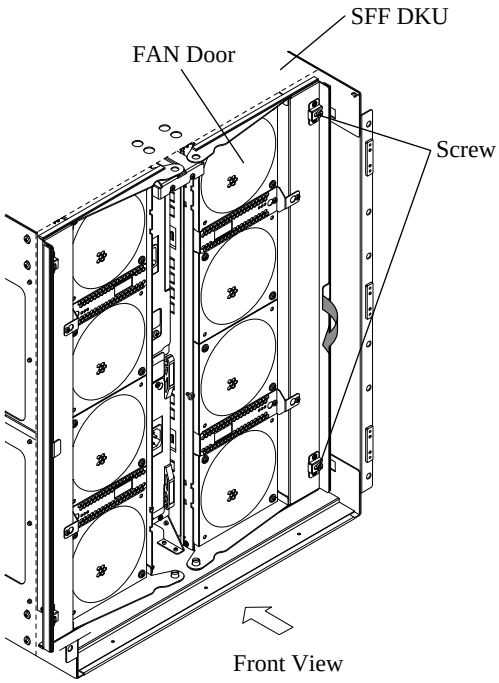


Fig. 3.12.4.9-46 FAN Door Opening

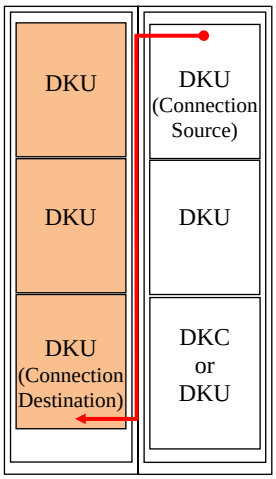
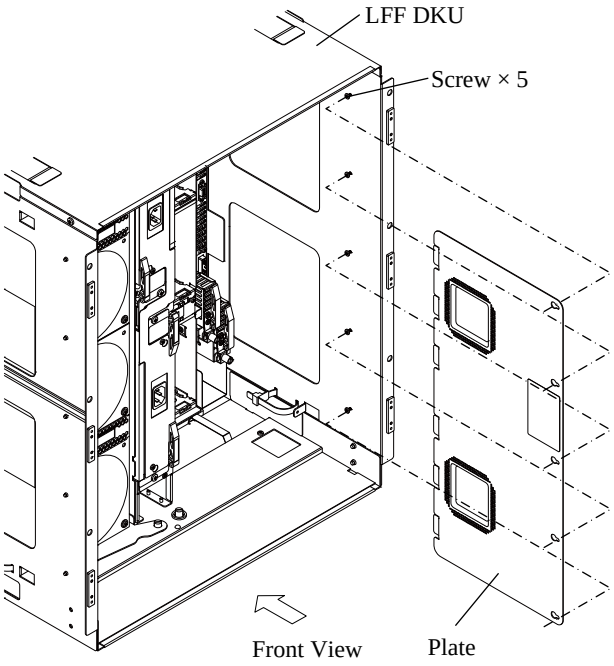
Copyright © 2010, 2011, Hitachi, Ltd.

d. Loosen all screws of the front right side of the DKU (five screws in each DKU) that is installed in the connection destination RACK, and remove the plate.





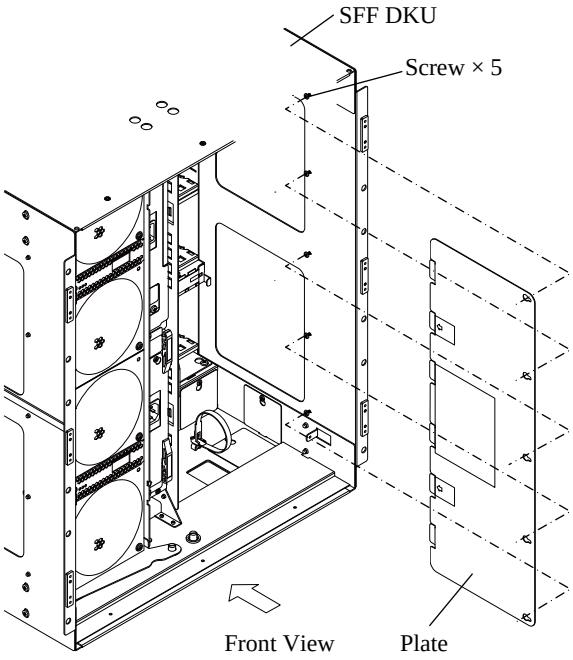


Fig. 3.12.4.9-47 Removal of Plate

Copyright © 2010, 2011, Hitachi, Ltd.

e. Wire the cables from the upper part to the lower part of the front side of the RACK.
f. Pull the wired cables in from the front left side of the connection source DKU.

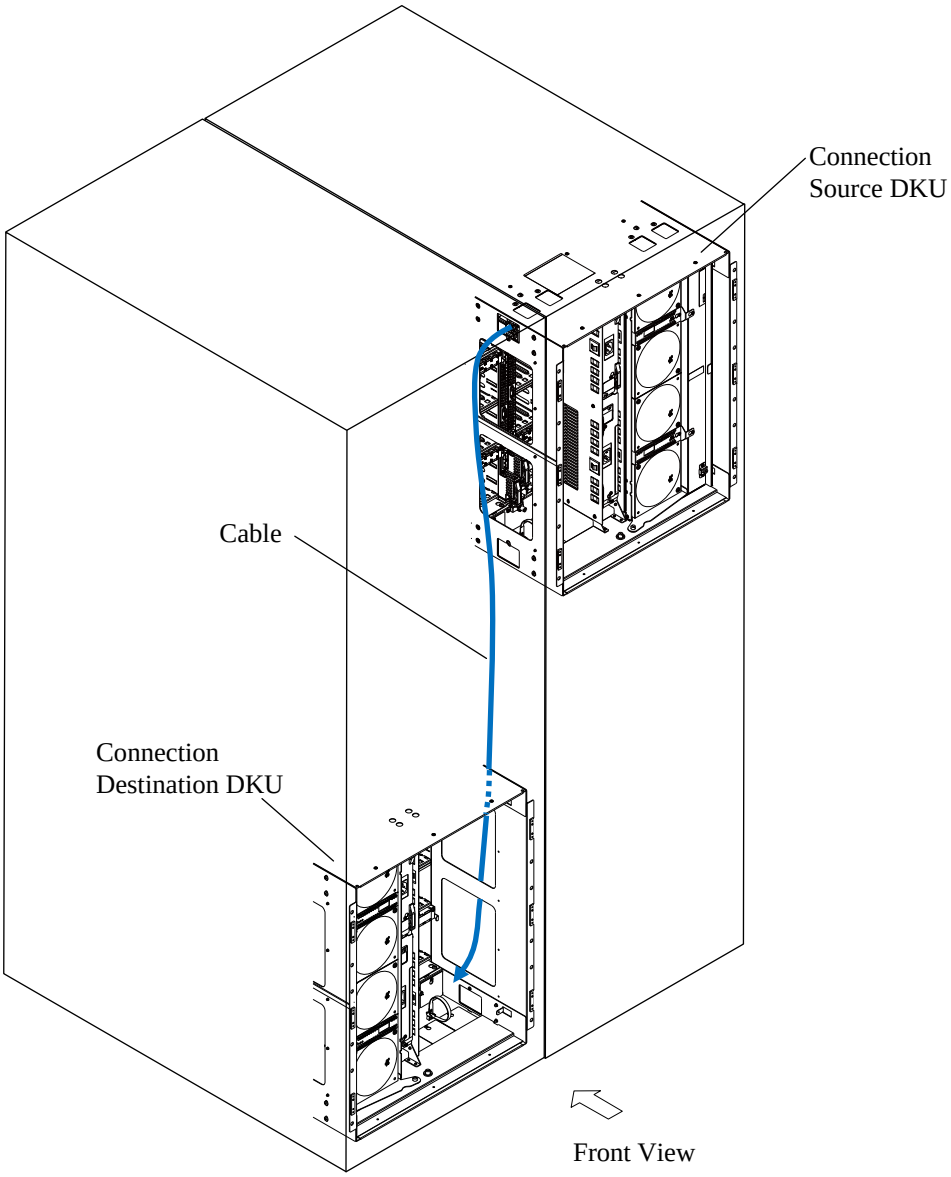

Fig. 3.12.4.9-48 Attachment of Cables

3. Cable Installation of the Front Side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU

a. Remove the two hangers from the front left side of the connection source DKU.
b. Insert the cables (0/4-R-A4 and 0/4-L-A4) in the clearance of the upper part of the DKUPS.
c. Wire the cables (1/5-R-A4 and 1/5-L-A4). However, do not connect the cables with the SSW PCB at this stage.
d. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.9-44.)

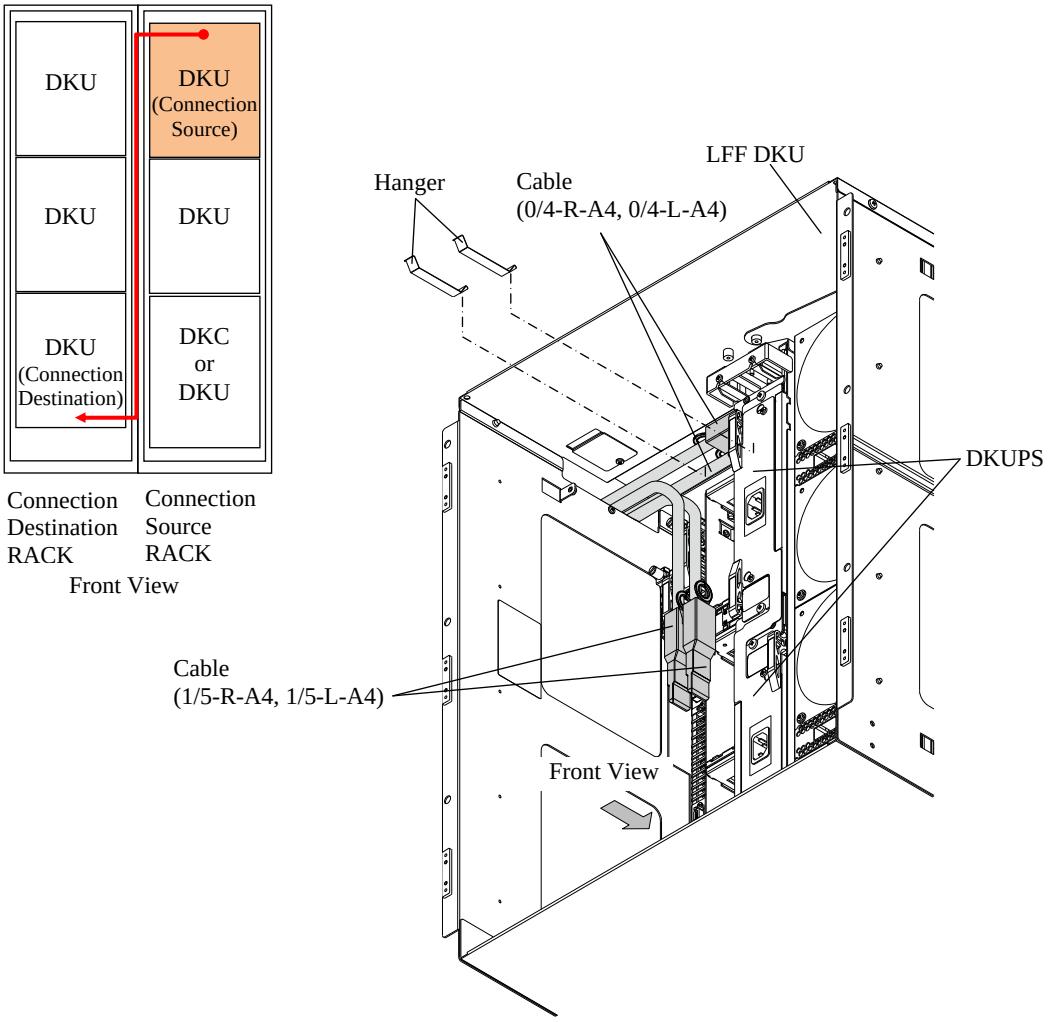

Fig. 3.12.4.9-49 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-46.)
f. Remove the two hangers.
g. Reach into the entry points of the left side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCB at this stage.
h. Install the two hangers, and fix the cables.
i. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws.

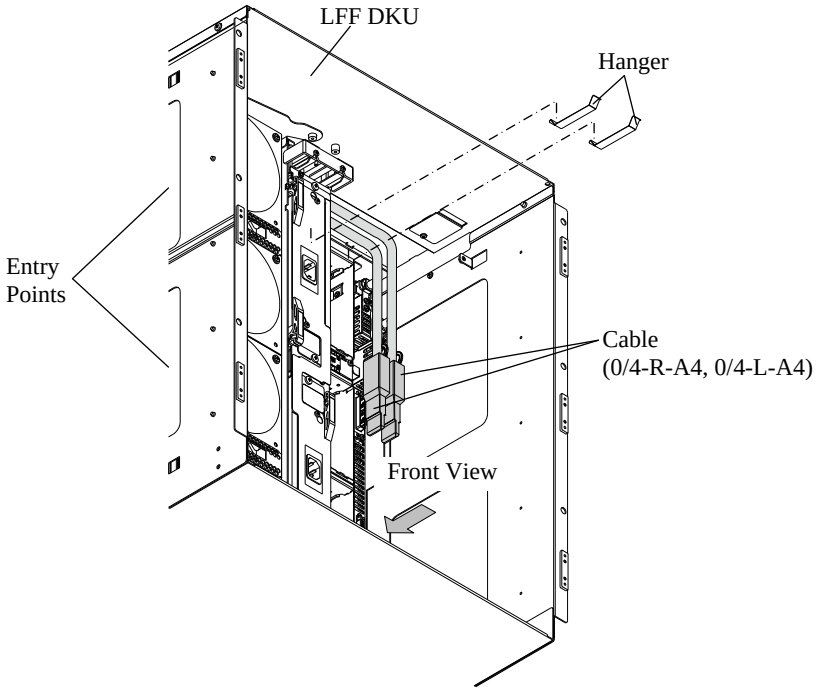

Fig. 3.12.4.9-50 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

j. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-44.)
k. Install the two hangers, and fix the cables.

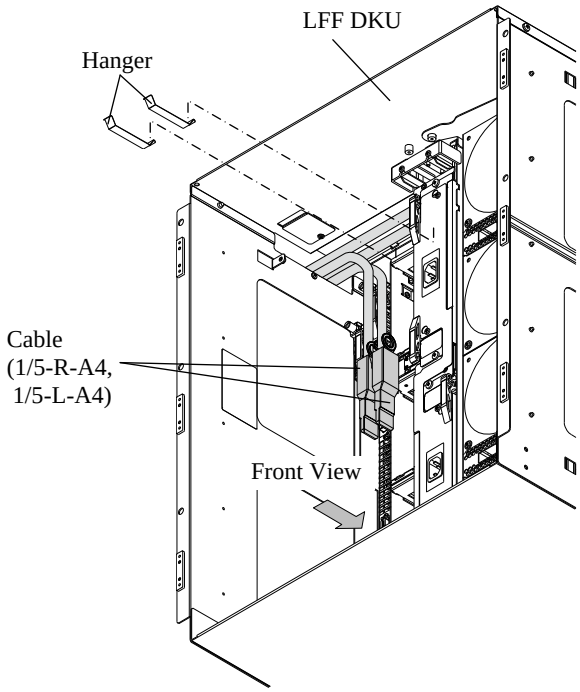

Fig. 3.12.4.9-51 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

When the Connection Source DKU is the SFF DKU

a. Insert the cables (0/4-R-A4 and 0/4-L-A4) into the clearance of the upper part of the DKUPS of the connection source DKU.
b. Wire the cables (1/5-R-A4 and 1/5-L-A4). However, do not connect the cables with the SSW PCB at this stage.
c. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.9-44.)

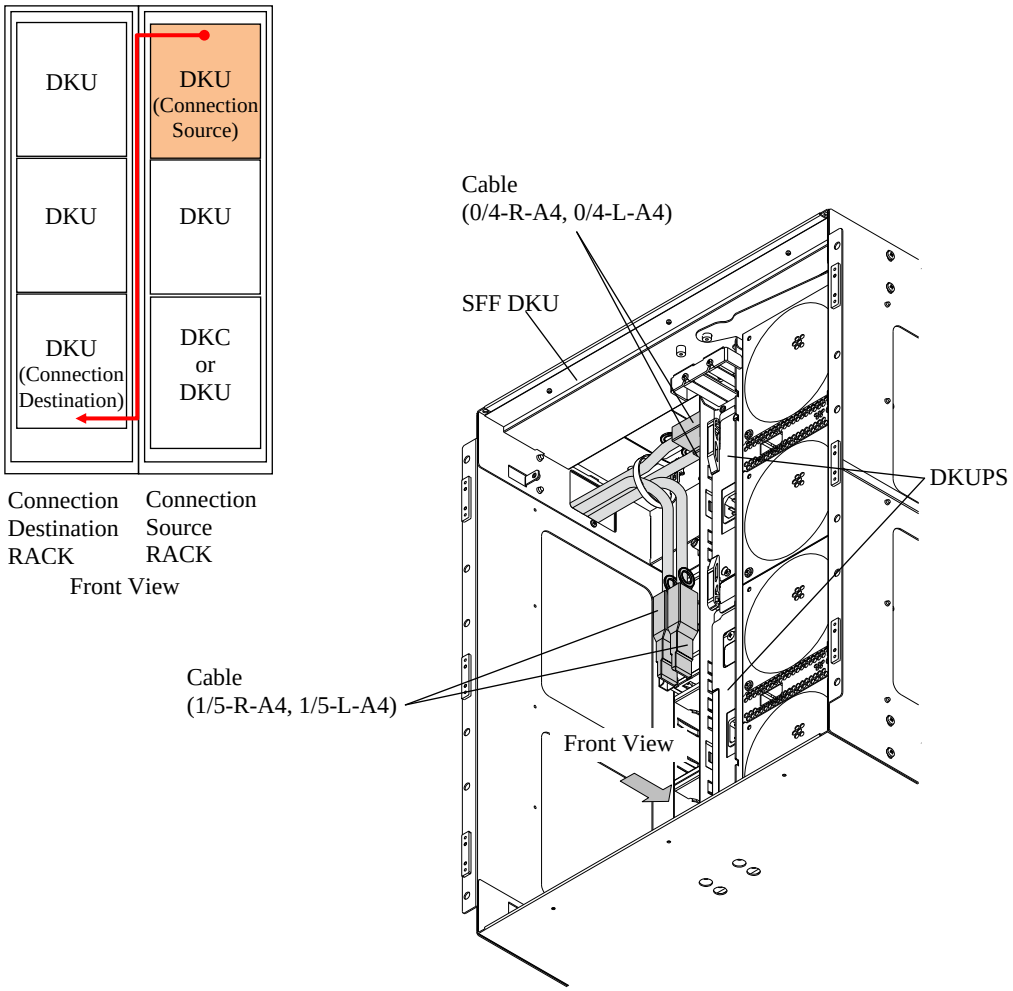

Fig. 3.12.4.9-52 Attachment of Cables

Copyright © 2010, 2011, Hitachi, Ltd.

d. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-46.)
e. Reach into the entry points of the left side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCB at this stage.
f. Bundle the cables with the clamp tape.
g. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws.

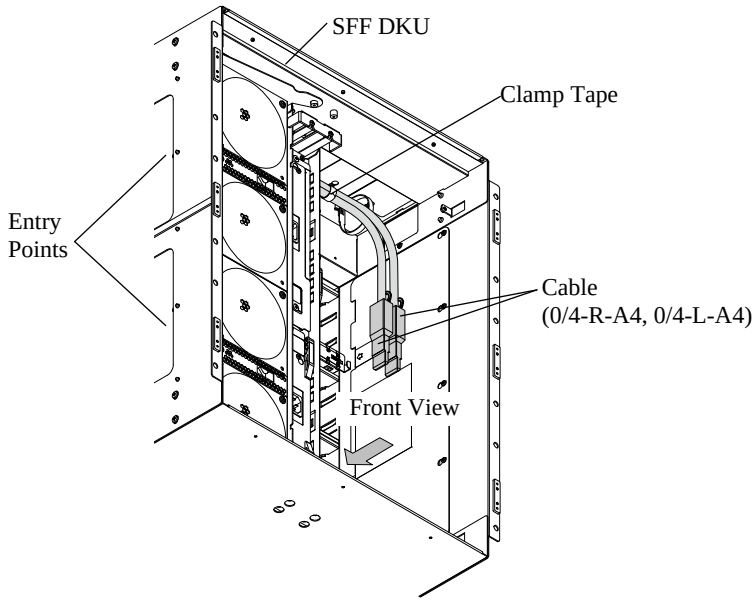

Fig. 3.12.4.9-53 Attachment of Cables

h. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-44.)
i. Fix the cables with the repeat binder.

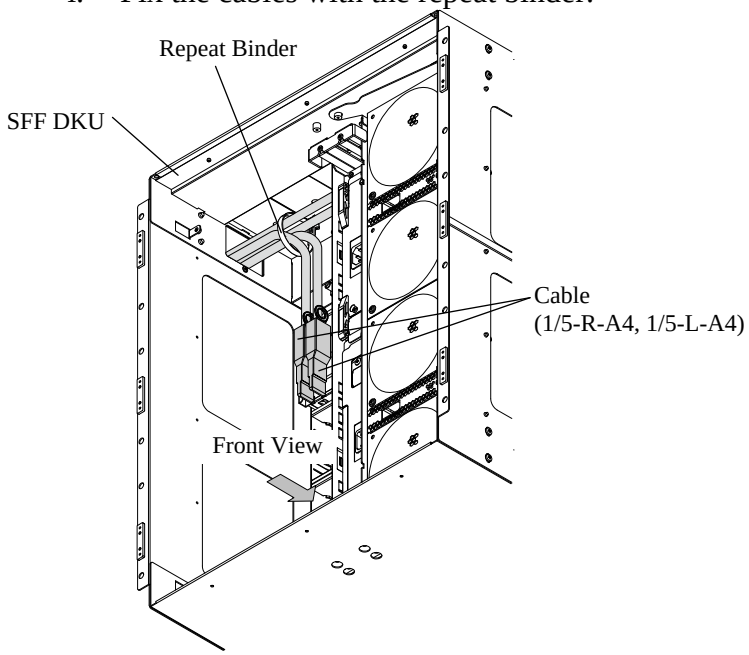

Fig. 3.12.4.9-54 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

4. Fixation of Cables
   a. Fix the four cables with the two repeat binders of the connection source RACK side.

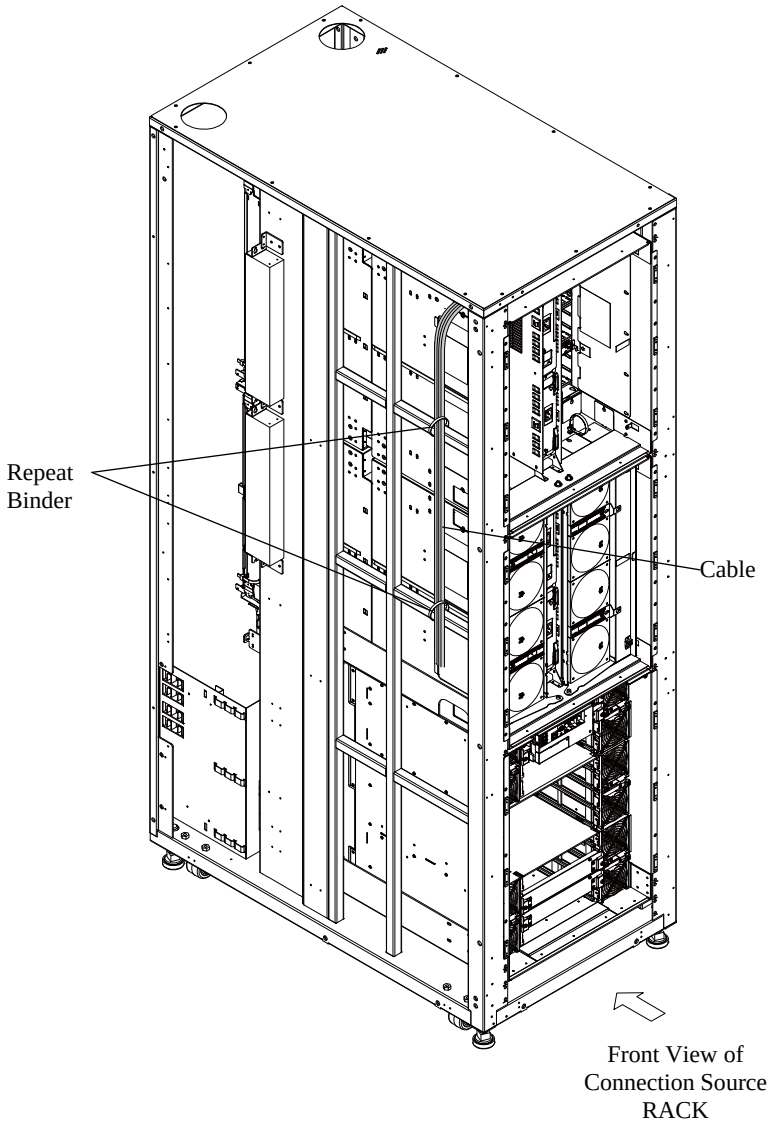

Fig. 3.12.4.9-55 Fixation of Cables

Copyright © 2010, Hitachi, Ltd.

5. Cable Installation of the Front Side of the Connection Destination DKU

When the Connection Destination DKU is the LFF DKU

a. Pull the cables in from the front right side of the connection destination DKU.
b. Remove the two hangers.
c. Insert the cables (1/5-R-A2 and 1/5-L-A2) into the clearance in the lower part of the DKUPS.
d. Wire the cables (0/4-R-A2 and 0/4-L-A2). However, do not connect the cables with the SSW PCB at this stage.
e. Close the FAN door of the front right side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 3.12.4.9-46.)

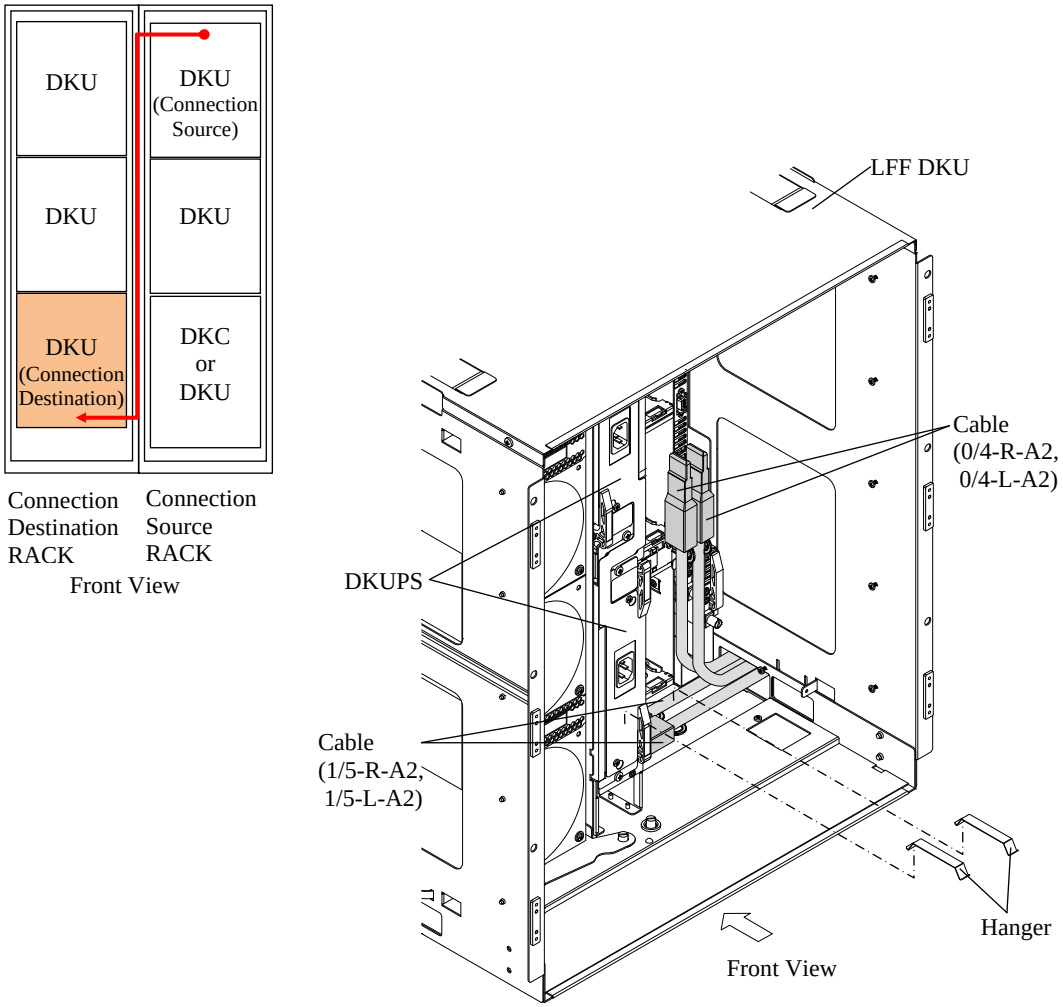

Fig. 3.12.4.9-56 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

f. Loosen the two screws of the front left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-44.)
g. Remove the two hangers.
h. Reach into the entry points of the right side of the DKU, and pull the cables out from the lower part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCB at this stage.
i. Install the two hangers, and fix the cables.
j. Close the FAN door of the front left side of the connection destination DKU, and tighten the two screws.

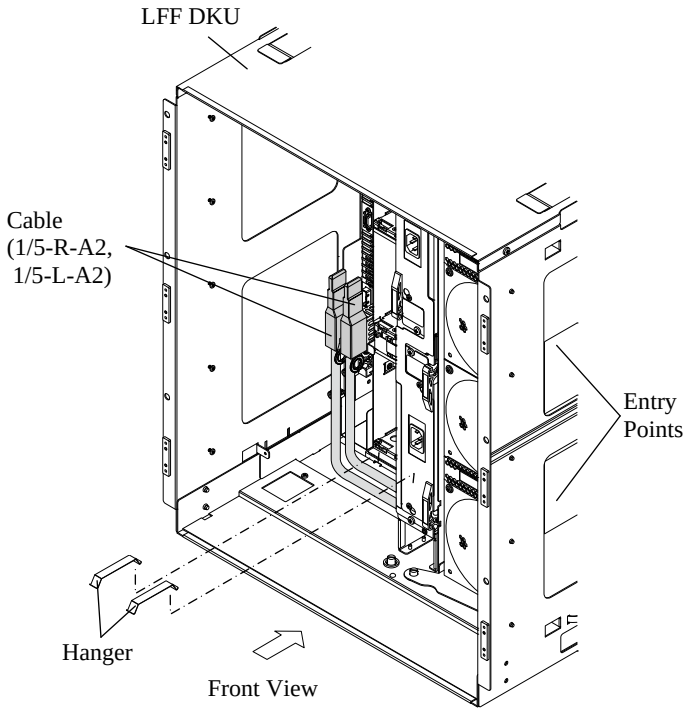

Fig. 3.12.4.9-57 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

k. Loosen the two screws of the front right side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-46.)
l. Install the two hangers, and fix the cables.

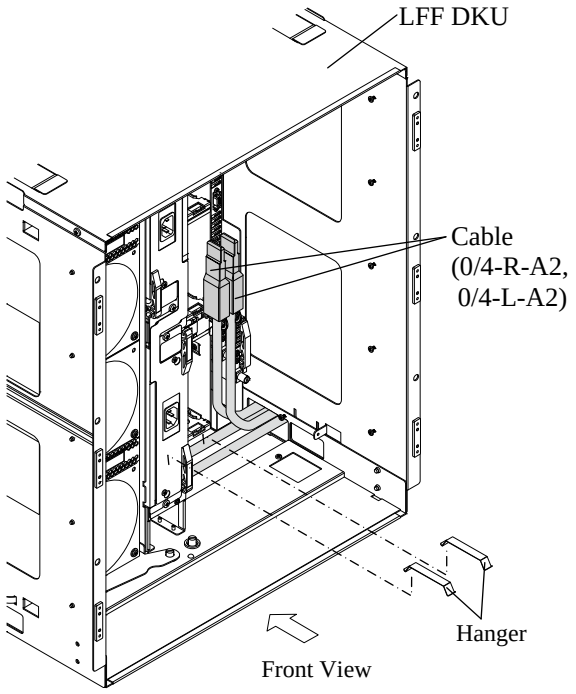

Fig. 3.12.4.9-58 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

When the Connection Destination DKU is the SFF DKU

a. Pull the cables in from the front right side of the connection destination DKU.
b. Insert the cables (1/5-R-A2 and 1/5-L-A2) into the clearance in the lower part of the DKUPS.
c. Wire the cables (0/4-R-A2 and 0/4-L-A2).
d. Close the FAN door of the front right side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 3.12.4.9-46.)

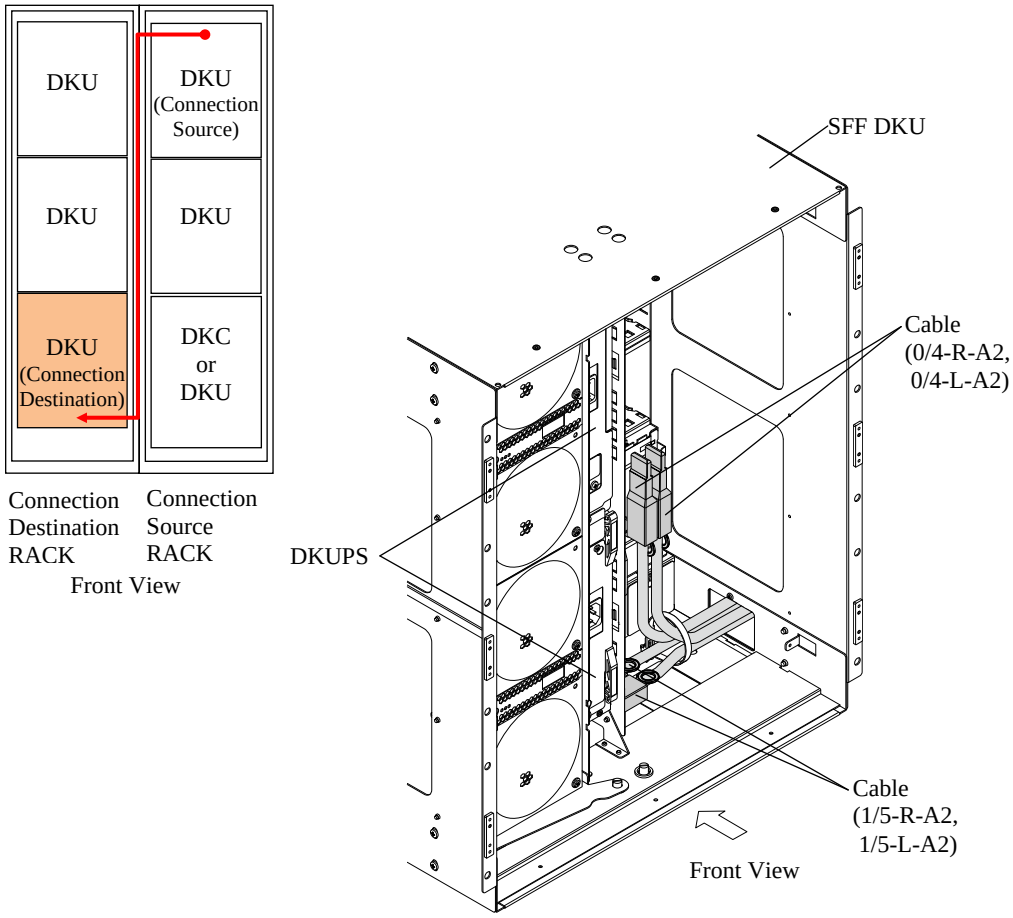

Fig. 3.12.4.9-59 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the front left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-44.)
f. Reach into the entry points of the right side of the DKU, and pull the cables out from the lower part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCB at this stage.
g. Bundle the cables with the clamp tape.
h. Close the FAN door of the front left side of the connection destination DKU, and tighten the two screws.

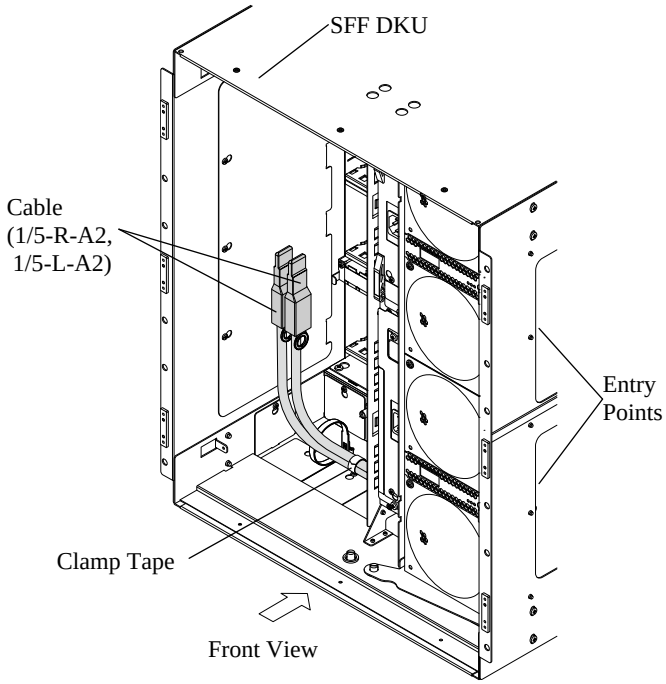

Fig. 3.12.4.9-60 Attachment of Cables

i. Loosen the two screws of the front right side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-46.)
j. Fix the cables with the repeat binder.

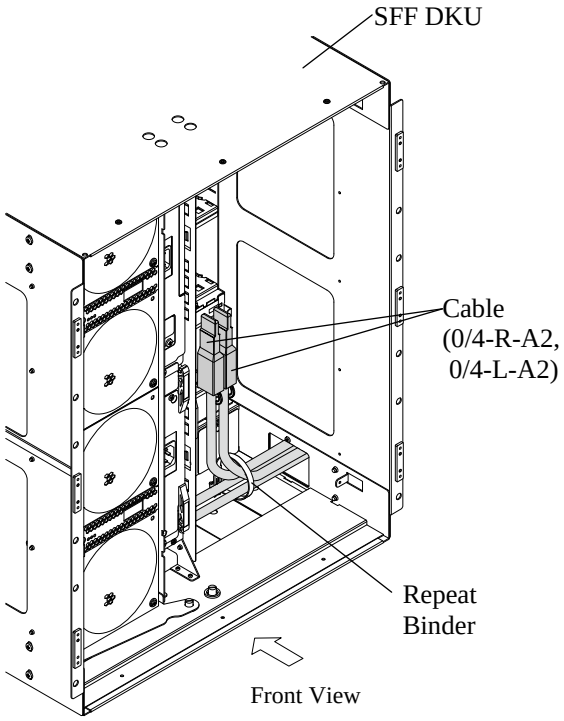

Fig. 3.12.4.9-61 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

6. Handling of Cable Extra Length
   a. Put the extra length of the cables into the clearance of the RACK.
   b. Install all removed plates in the front right side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 3.12.4.9-47.)
   c. Close all the FAN doors of the front right side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 3.12.4.9-46.)
   d. Install all removed plates in the front left side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 3.12.4.9-45.)
   e. Close all the FAN doors of the front left side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 3.12.4.9-44.)

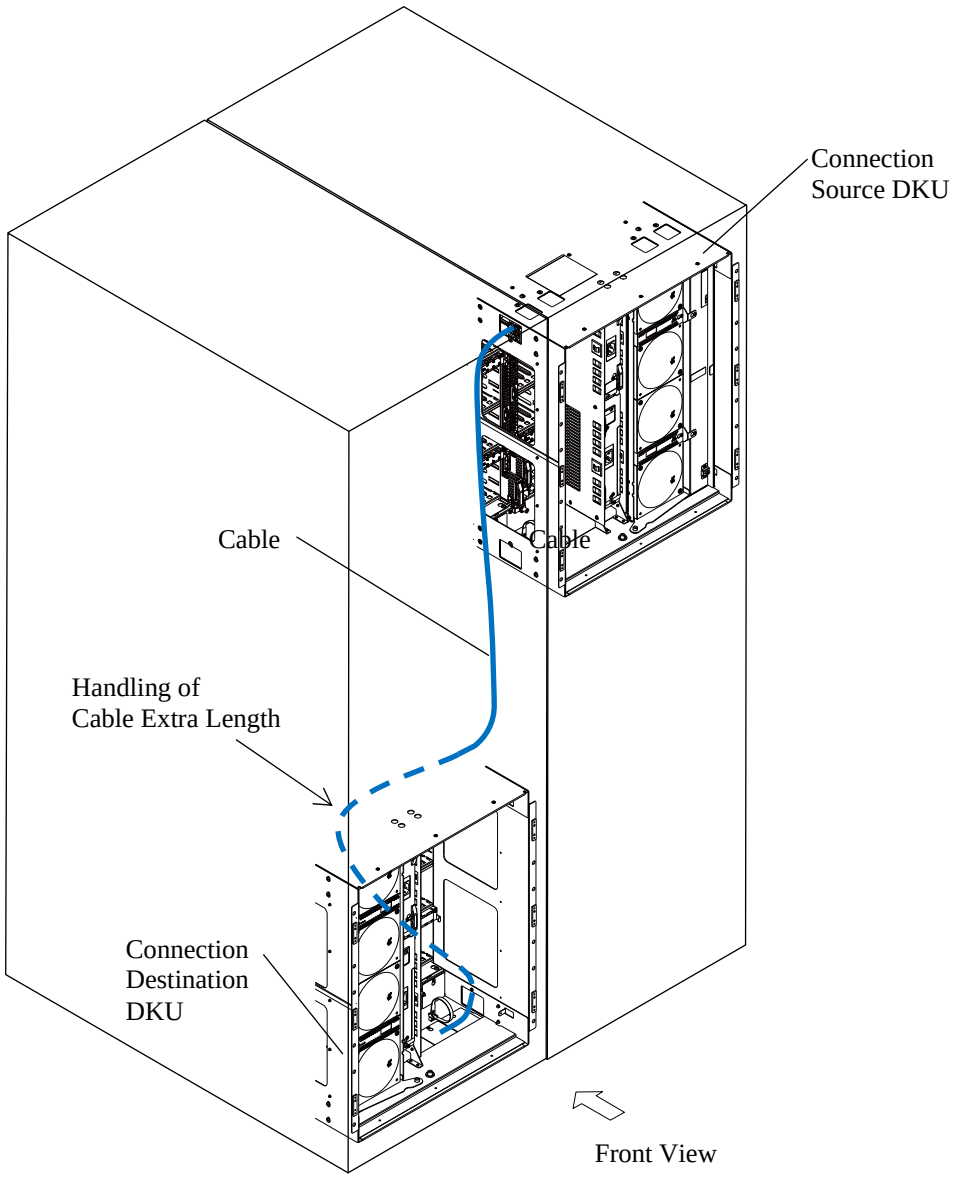

Fig. 3.12.4.9-62 Handling of Cable Extra Length

8. Cable Installation of the Rear Side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU

a. Remove the two hangers from the rear right side of the connection source DKU.
b. Insert the cables (3/7-R-A4 and 3/7-L-A4) into the clearance in the upper part of the DKUPS.
c. Wire the cables (2/6-R-A4, 2/6-L-A4). However, do not connect the cables with the SSW PCB at this stage.
d. Close the FAN door of the rear right side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.9-63.)

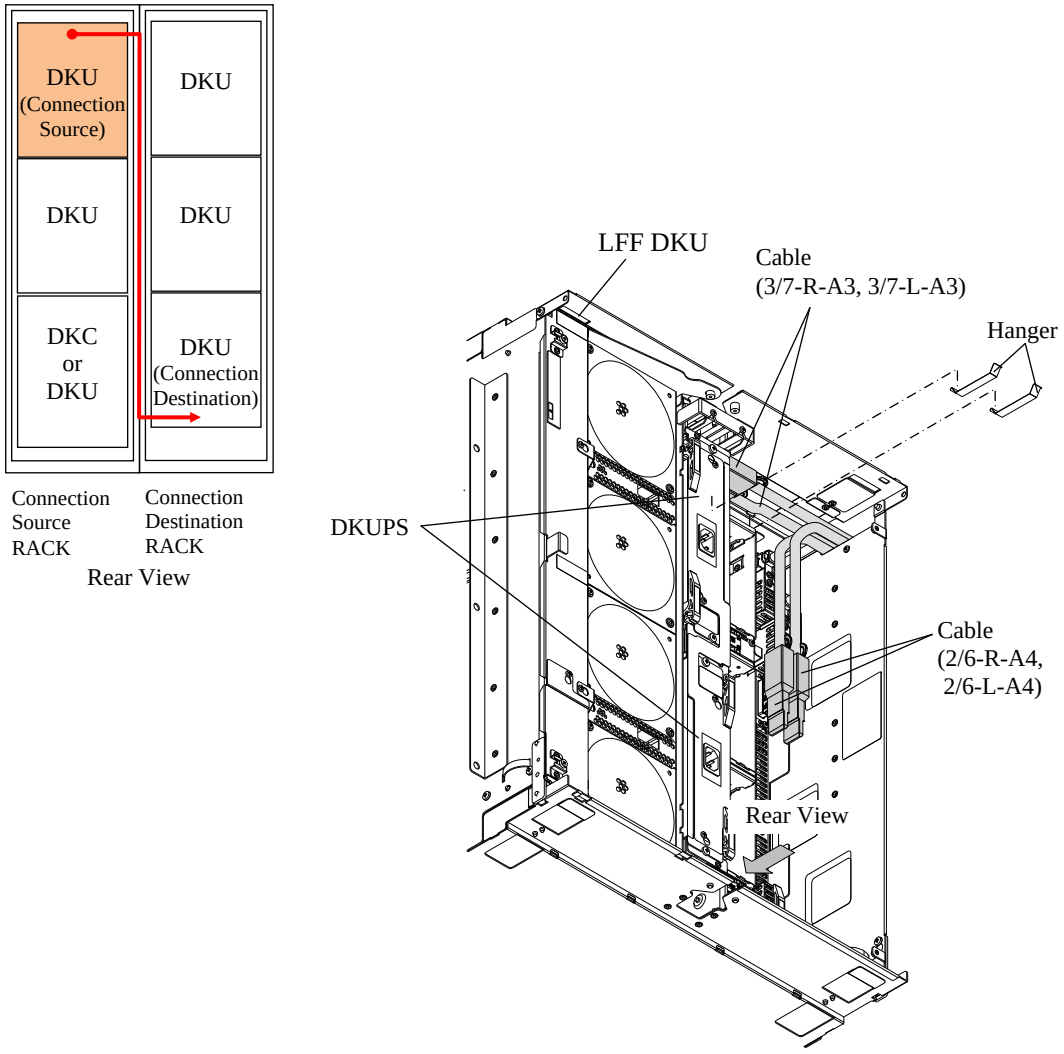

Fig. 3.12.4.9-68 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the rear left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-65.)
f. Remove the two hangers.
g. Pull the cables out from the upper part of the DKUPS, and wire the cables. However, do not connect the cables with the SSW PCB at this stage.
h. Install the two hangers, and fix the cables.
i. Close the FAN door of the rear left side of the connection source DKU, and tighten the two screws.

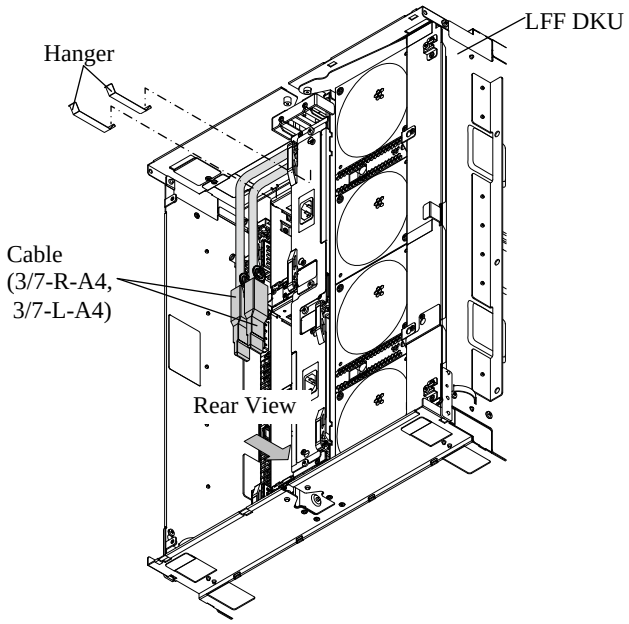

Fig. 3.12.4.9-69 Attachment of Cables

j. Loosen the two screws of the rear right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-63.)
k. Install the two hangers, and fix the cables.

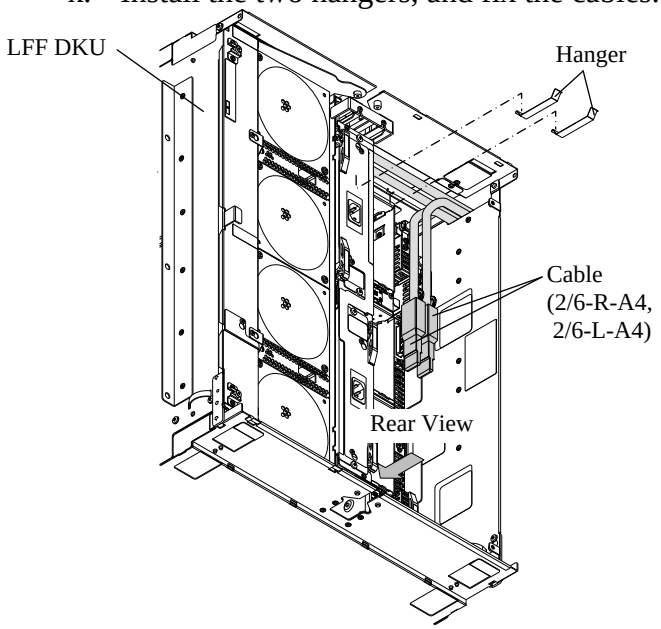

Fig. 3.12.4.9-70 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

When the Connection Source DKU is the SFF DKU

a. Insert the cables (3/7-R-A4 and 3/7-L-A4) into the clearance of the upper part of the DKUPS of the rear right side of the connection source DKU.
b. Wire the cables (2/6-R-A4 and 2/6-L-A4). However, do not connect the cables with SSW PCB at this stage.
c. Close the FAN door of the rear right side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.9-63.)

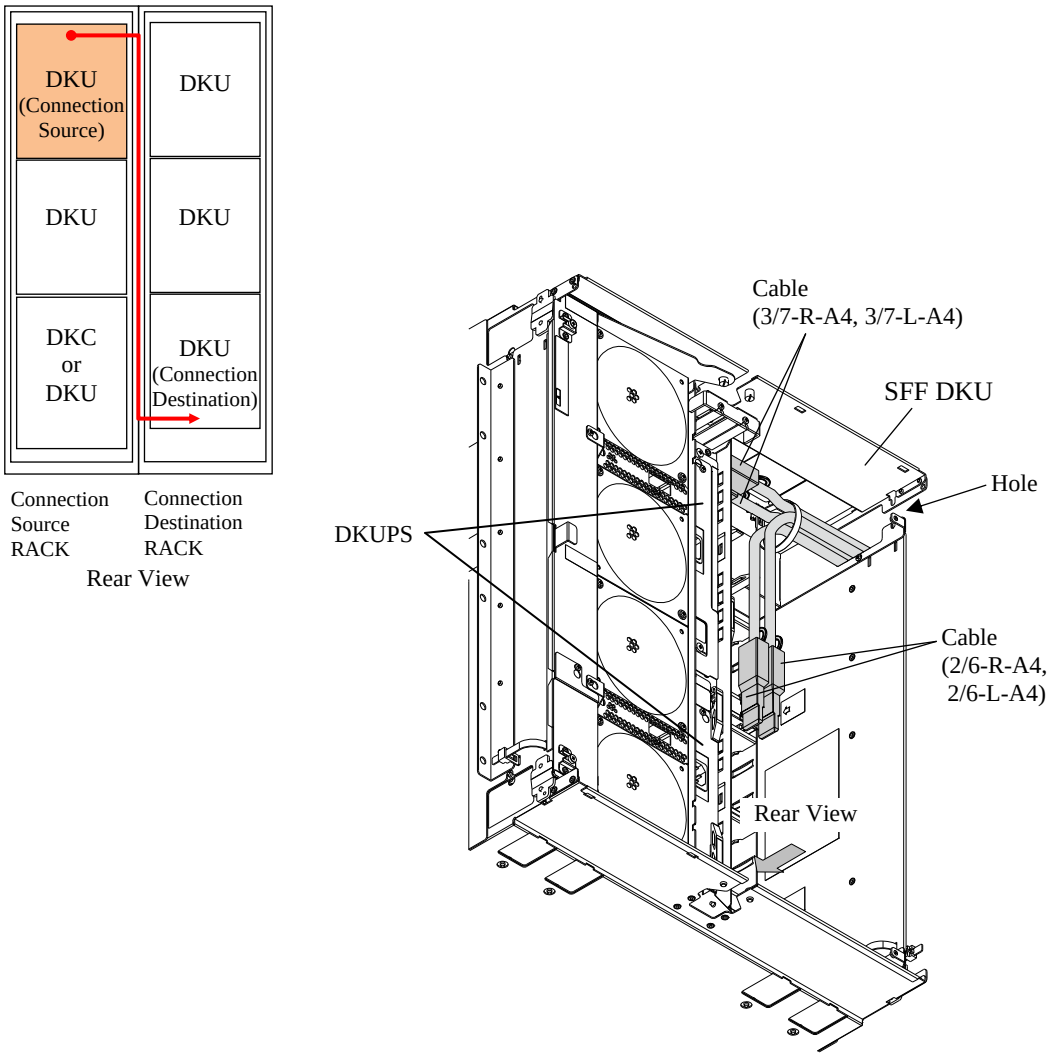

Fig. 3.12.4.9-71 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

d. Loosen the two screws of the rear left side of the connection source DKU, and open the FAN door. (Refer to Fig.3.12.4.9-65.)
e. Pull the cables out from the upper part of the DKUPS, and wire the cables. However, do not connect the cables with the SSW PCB at this stage.
f. Bundle the cables with the clamp tape.
g. Close the FAN door of the rear left side of the connection source DKU, and tighten the two screws.

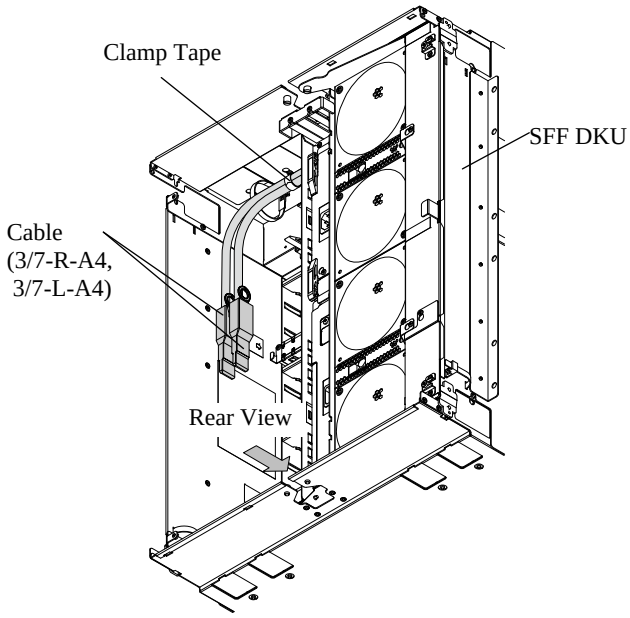

Fig. 3.12.4.9-72 Attachment of Cables

h. Loosen the two screws of the rear right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-63.)
i. Fix the cables with the repeat binder.
j. Install the cover, and tighten the two screws.

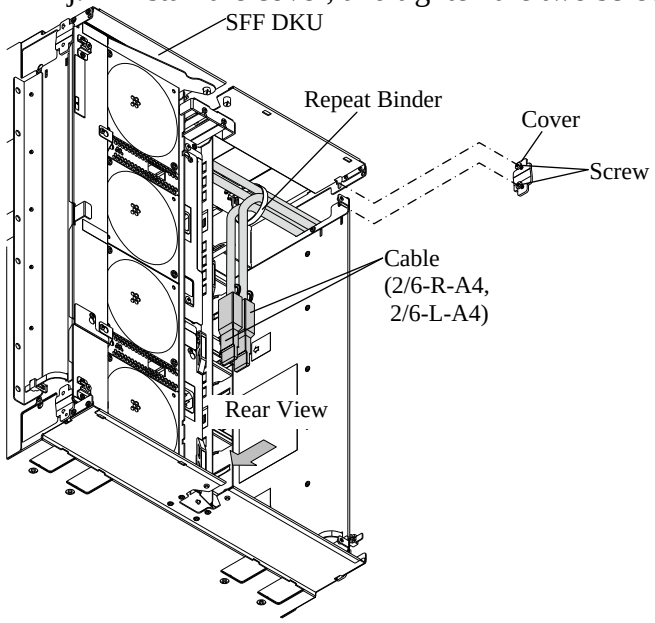

Fig. 3.12.4.9-73 Attachment of Cables

9. Fixation of Cables
   a. Fix the four cables with the two repeat binders of the DKU side.

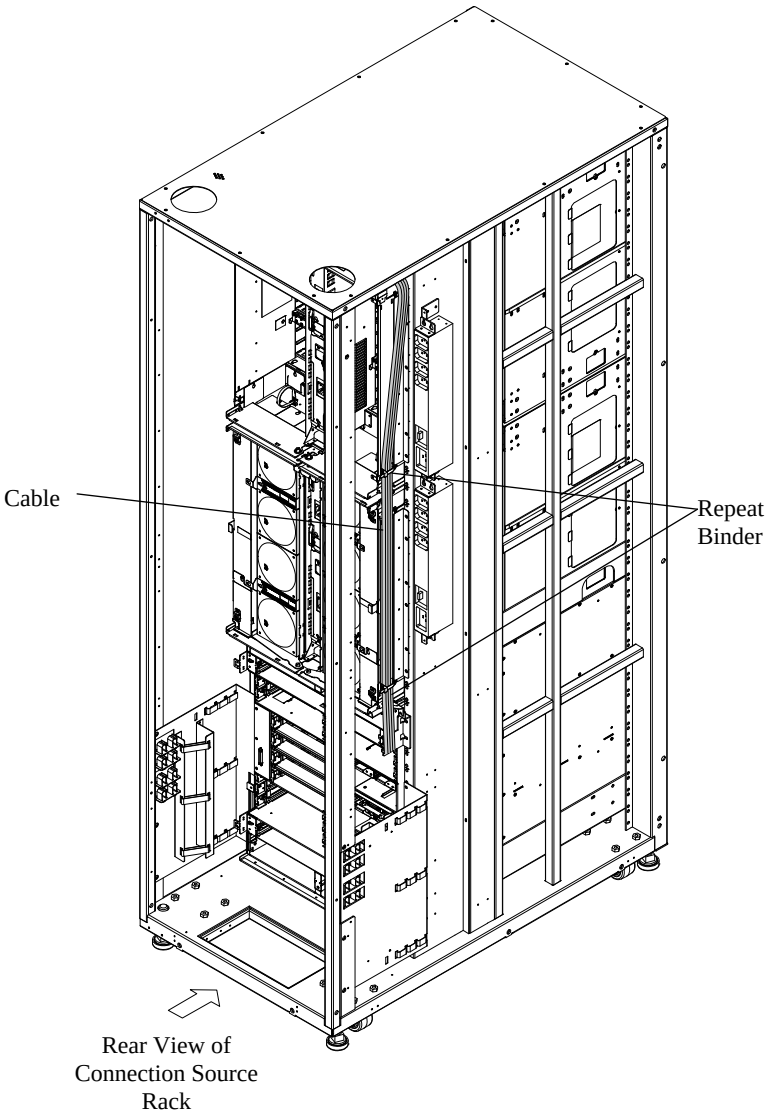

Fig. 3.12.4.9-74 Fixation of Cables

Copyright © 2010, Hitachi, Ltd.

10. Cable Installation of Rear Side of the Connection Destination DKU

When the Connection Destination DKU is the LFF DKU

a. Pull the cables in from the rear left side of the connection destination DKU.
b. Remove the two hangers.
c. Insert the cables (2/6-R-A2 and 2/6-L-A2) into the clearance of the lower part of the DKUPS.
d. Wire the Cables (3/7-R-A2 and 3/7-L-A2). However, do not connect the cables with the SSW PCB at this stage.
e. Close the FAN door of the rear left side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 3.12.4.9-65.)

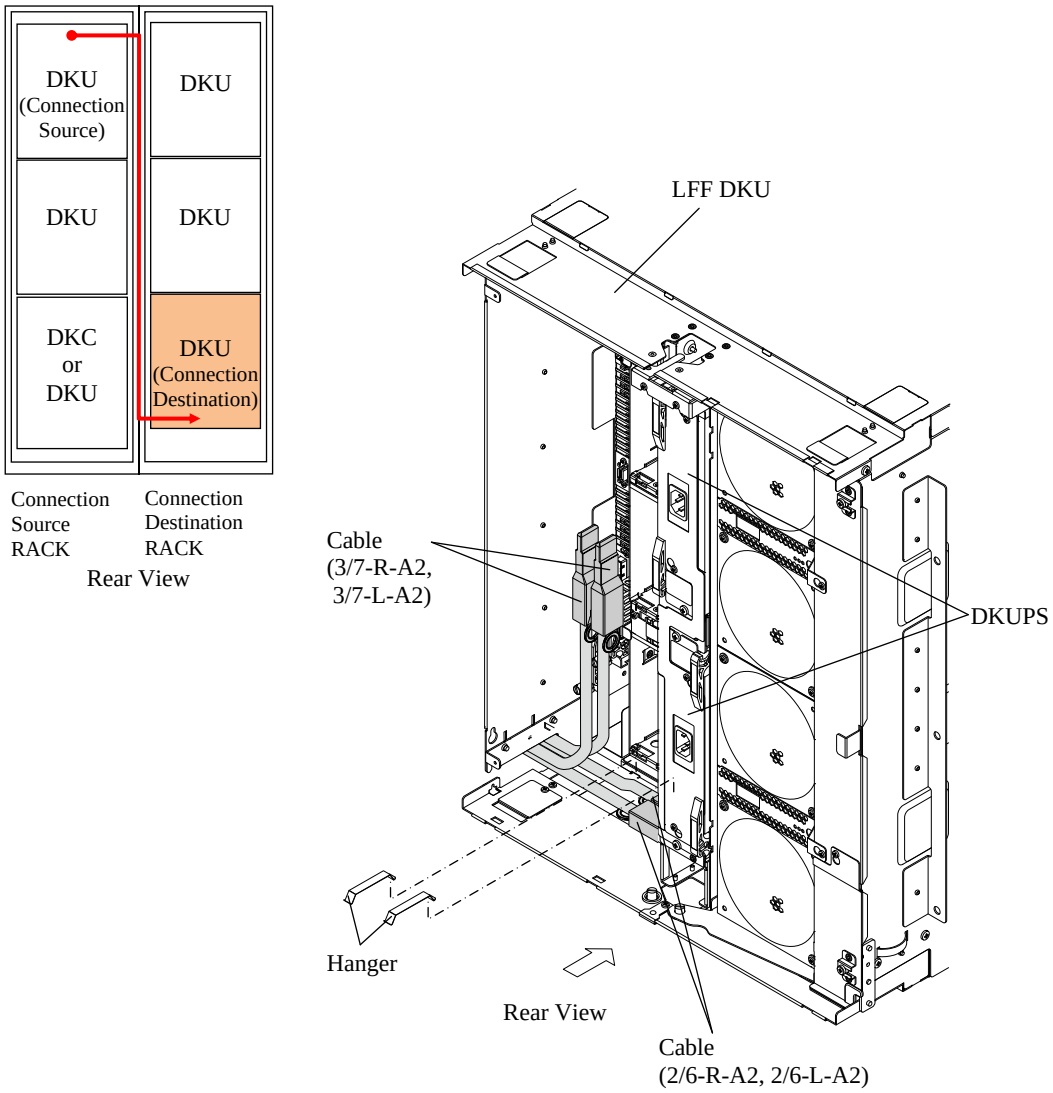

Fig. 3.12.4.9-75 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

f. Loosen the two screws of the rear right side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-63.)
g. Remove the two hangers.
h. Pull the cables out from the lower part of the DKUPS, and wire the cables. However, do not connect the cables with the SSW PCB at this stage.
i. Install the two hangers, and fix the cables.
j. Close the FAN door of the rear right side of the connection destination DKU, and tighten the two screws.

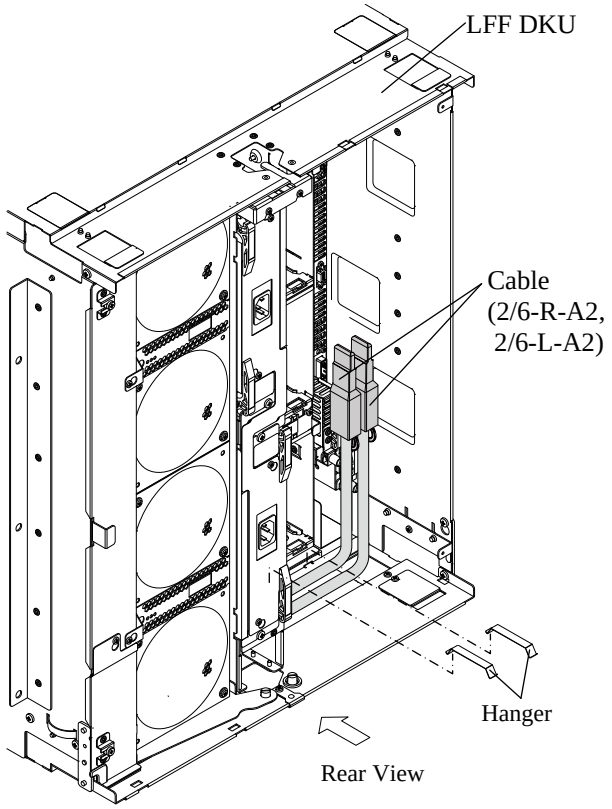

Fig. 3.12.4.9-76 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

k. Loosen the two screws of the rear left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-65.)
l. Remove the caps from the cables, and connect the cables with the SSW PCB.
m. Install the two hangers, and fix the cables.
n. Install the cover, and tighten the three screws.

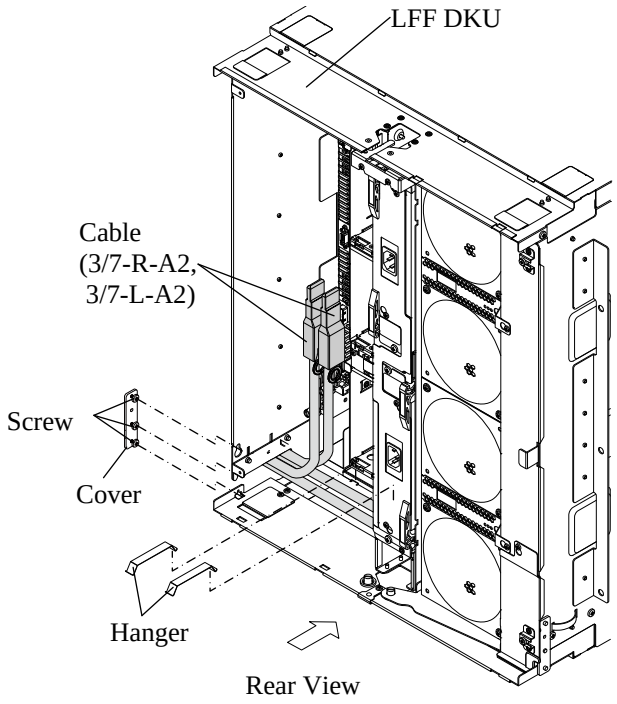

Fig. 3.12.4.9-77 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

When the Connection Destination DKU is the SFF DKU

a. Pull the cables in from the rear left side of the connection destination DKU.
b. Insert the cables (2/6-R-A2 and 2/6-L-A2) into the clearance of the lower part of the DKUPS.
c. Wire the cables (3/7-R-A2 and 3/7-L-A2).
d. Close the FAN door of the rear left side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 3.12.4.9-65.)

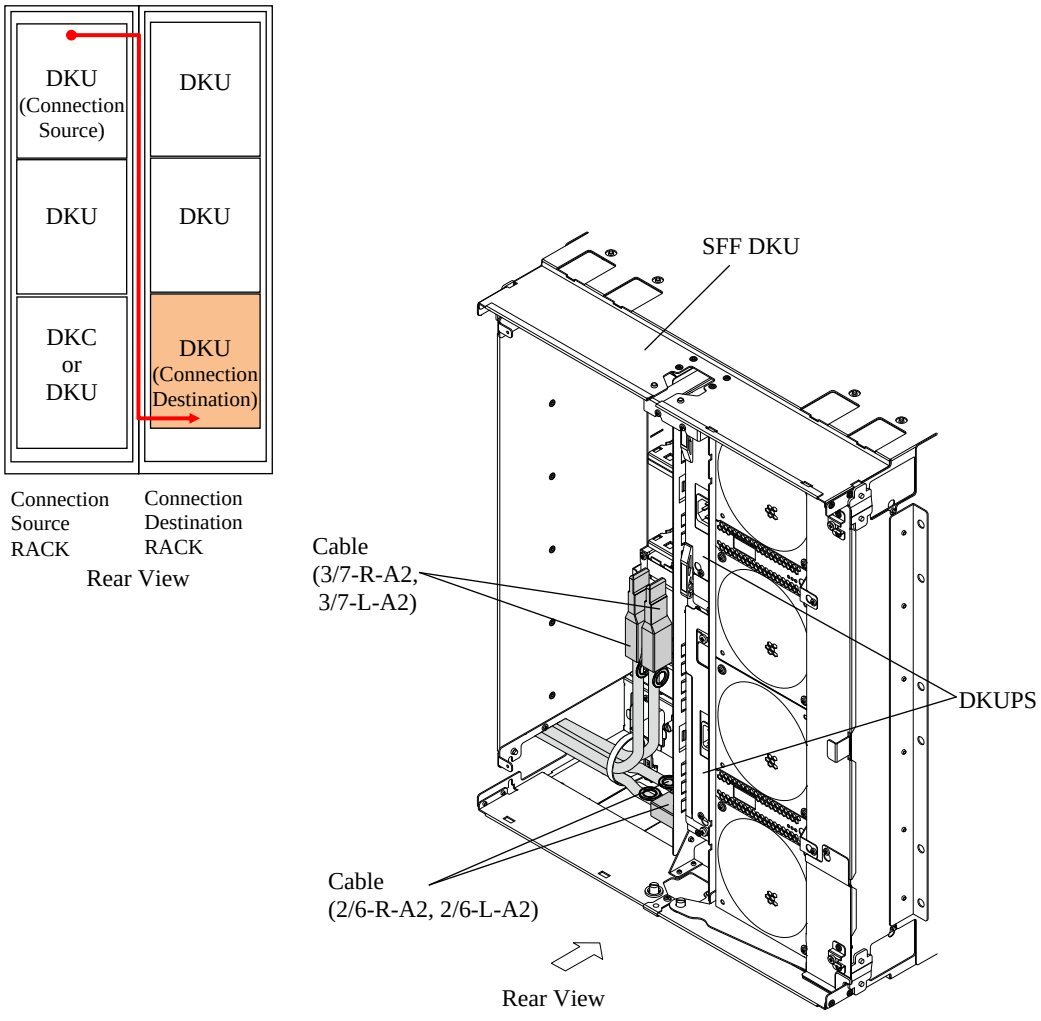

Fig. 3.12.4.9-78 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the rear right side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-63.)
f. Pull the cables out from the lower part of the DKUPS, and wire the cables. However, do not connect the cables with the SSW PCB at this stage.
g. Bundle the cables with the clamp tape.
h. Close the FAN door of the rear right side of the connection destination DKU, and tighten the two screws.

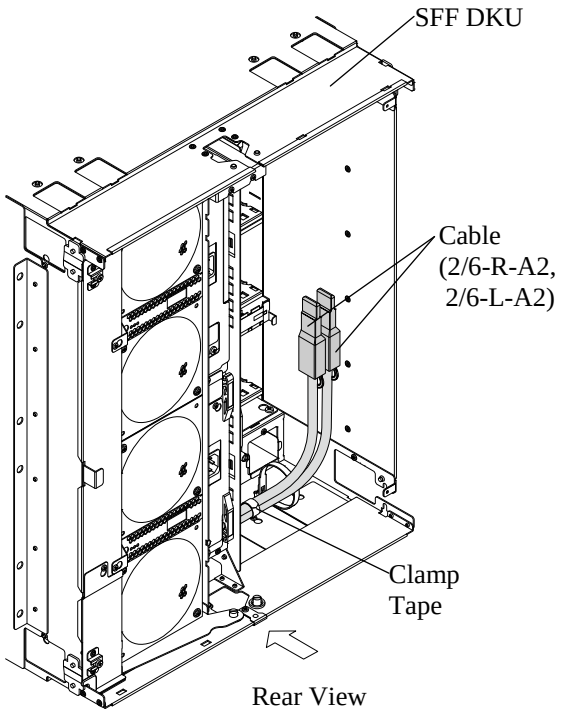

Fig. 3.12.4.9-79 Attachment of Cables

Copyright © 2010, Hitachi, Ltd.

i. Loosen the two screws of the rear left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 3.12.4.9-65.)
j. Fix the cables with the repeat binder.
k. Install the cover, and tighten the two screws.

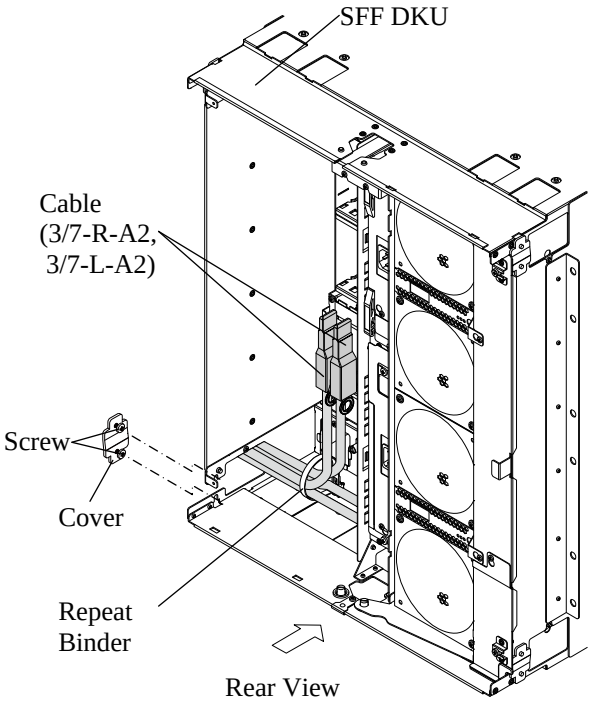

Fig. 3.12.4.9-80 Attachment of Cables

3.12.4.10 Installation Procedure of Device Interface Cable BF (DKC-F710I-BFC)

Installation Condition

DKC-F710I-BFC is a cable option to connect between 1st DKA of DKC-x and DKU-x0 (FBX DKU). When FBX DKU is installed in DKU-00 or DKU-10, this option is necessary.
Refer to below Table 3.12.4.10-1 for the condition of DKC-F710I-BFC installation, and go to the appropriate page.

Table 3.12.4.10-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable BF (DKC-F710I-BFC) is required to install.	INST03-12C-3620
2	When Device Interface Cable BF (DKC-F710I-BFC) is not required to install.	INST03-12C-3670

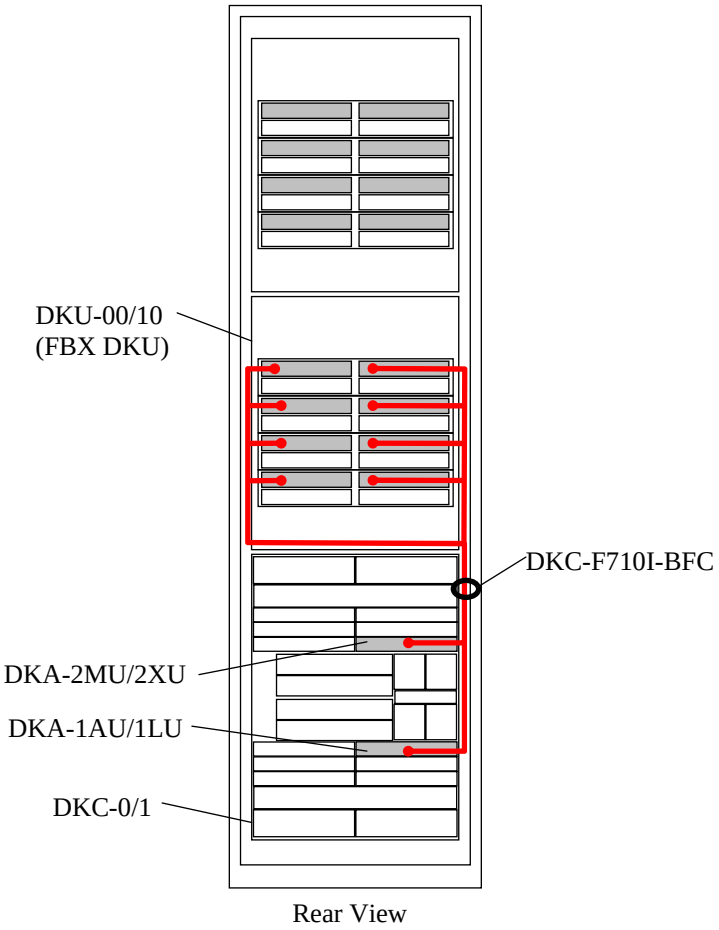

Fig. 3.12.4.10-1 Mounting Position of Device Interface Cable

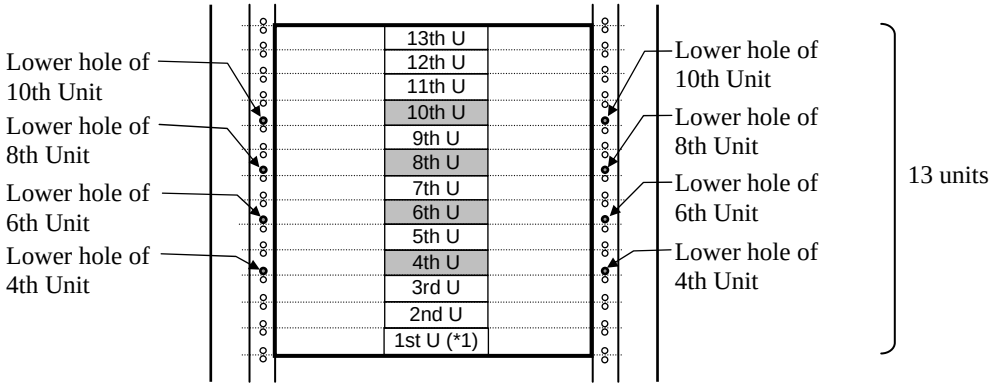
Copyright © 2012, Hitachi, Ltd.

1. Installing Clamp Tapes
   a. Fit rack nuts to the rear side of the rack frame (at eight places in total at right and left).



Rear View of Rack Frame

*1: Bottom Unit of Installation Position

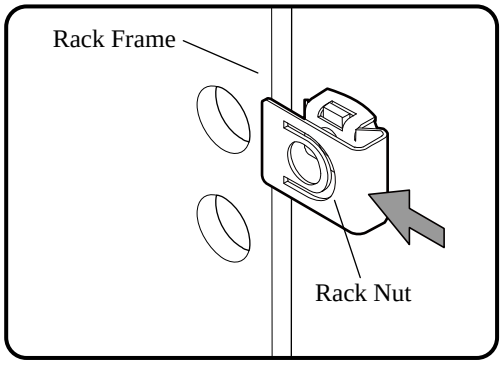


Fig. 3.12.4.10-2 Installing Rack Nuts

Copyright © 2012, Hitachi, Ltd.

b. Attach the clamp tape (16 in total) to the cleat (16 in total).

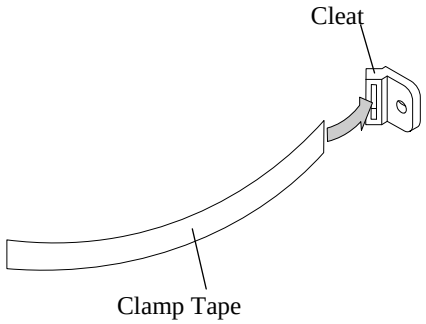

Fig. 3.12.4.10-3 Attaching Clamp Tapes to Cleats

c. Install eight clamp tapes to the rear side of the rack frame and fasten them with a WA socket bolt.

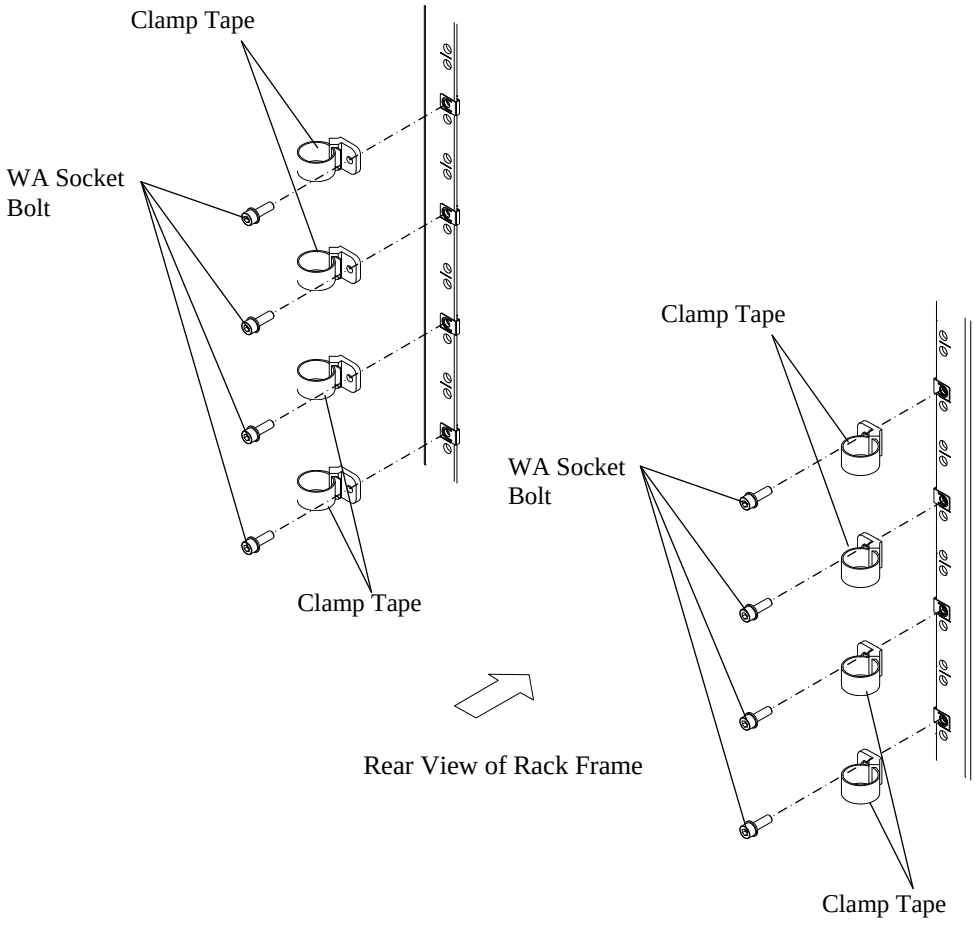

Fig. 3.12.4.10-4 Installing Clamp Tapes

Copyright © 2012, Hitachi, Ltd.

2. Installing Cables
   a. Route 8 cables on the rear side of the rack and fasten them with 13 clamp tapes.

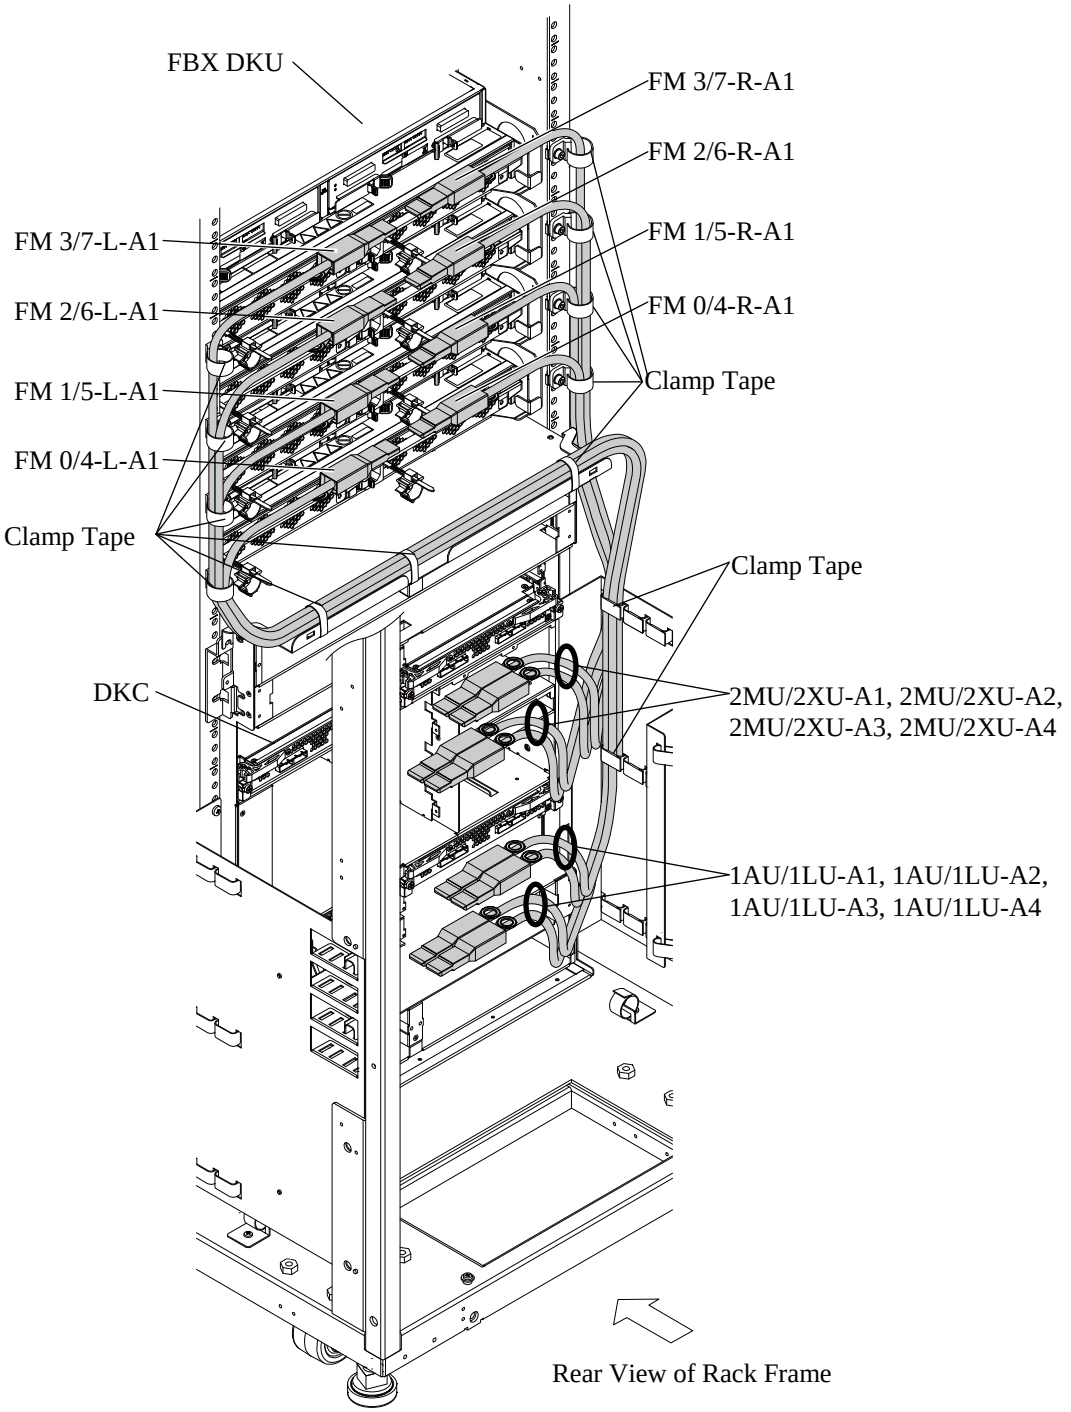

Fig. 3.12.4.10-5 Installing Cables

Copyright © 2012, Hitachi, Ltd.

b. Remove the caps from the cables.
c. Connect the cables with the SSW PCBs after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).
However, do not connect the cables with the DKA PCBs at this stage.

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

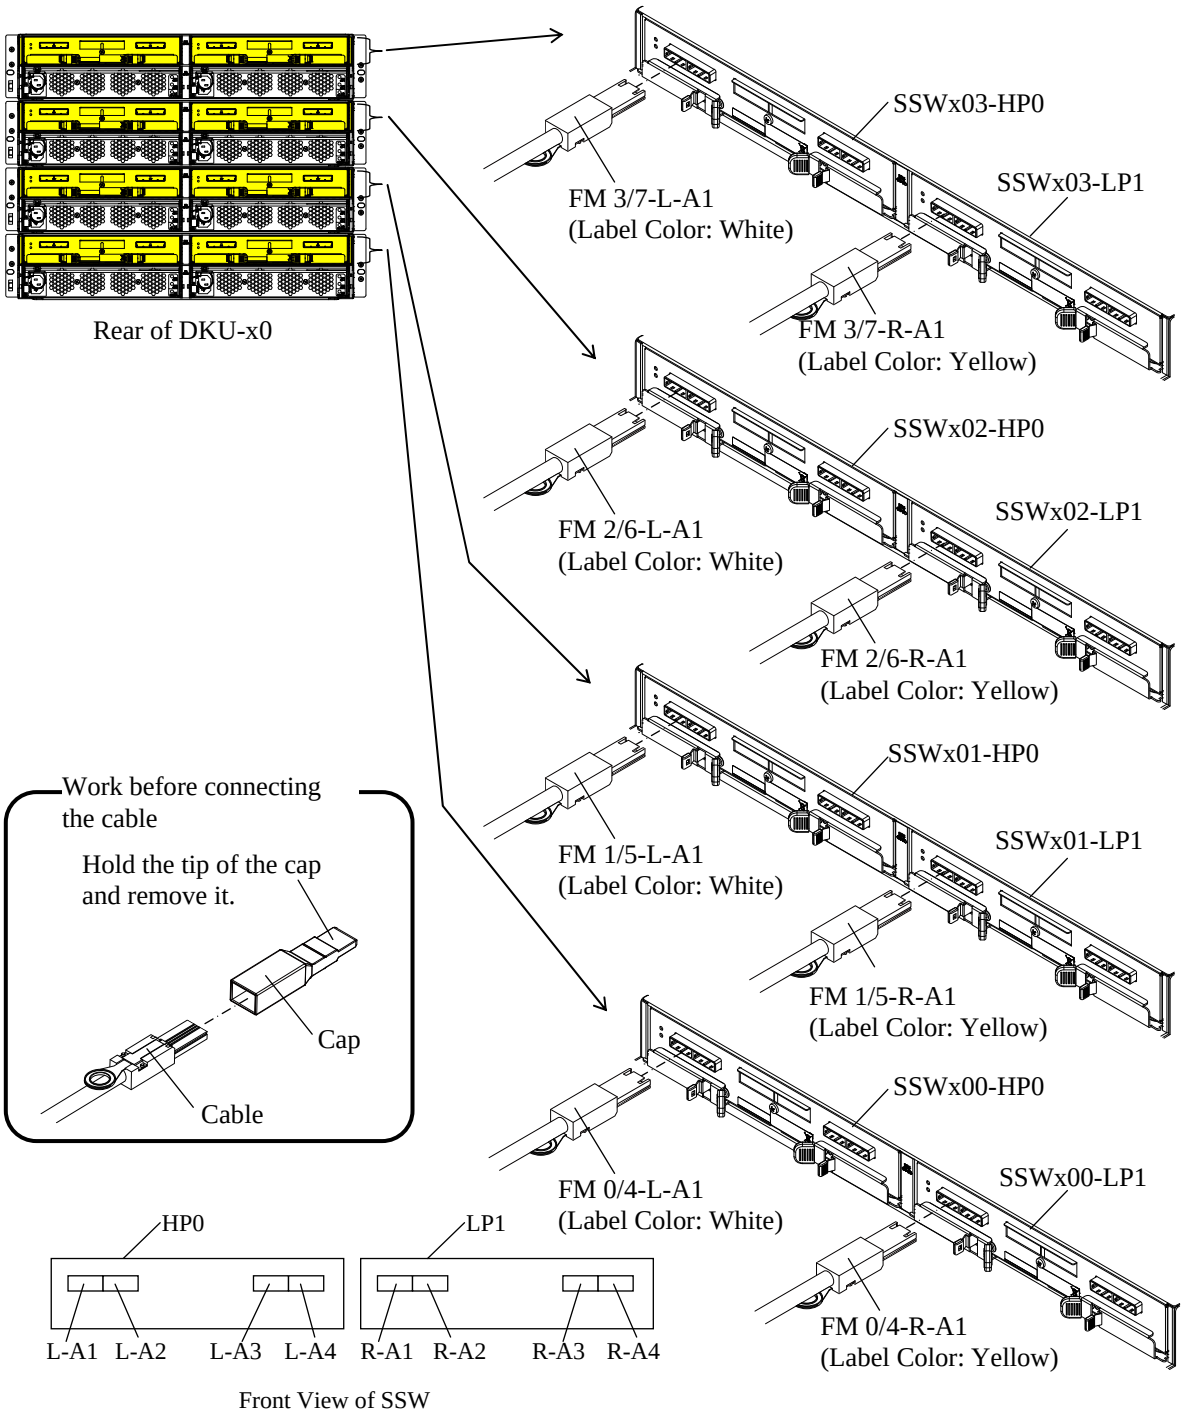

Fig. 3.12.4.10-6 Connection of Cables

Copyright © 2012, Hitachi, Ltd.

3. Attachment of Nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

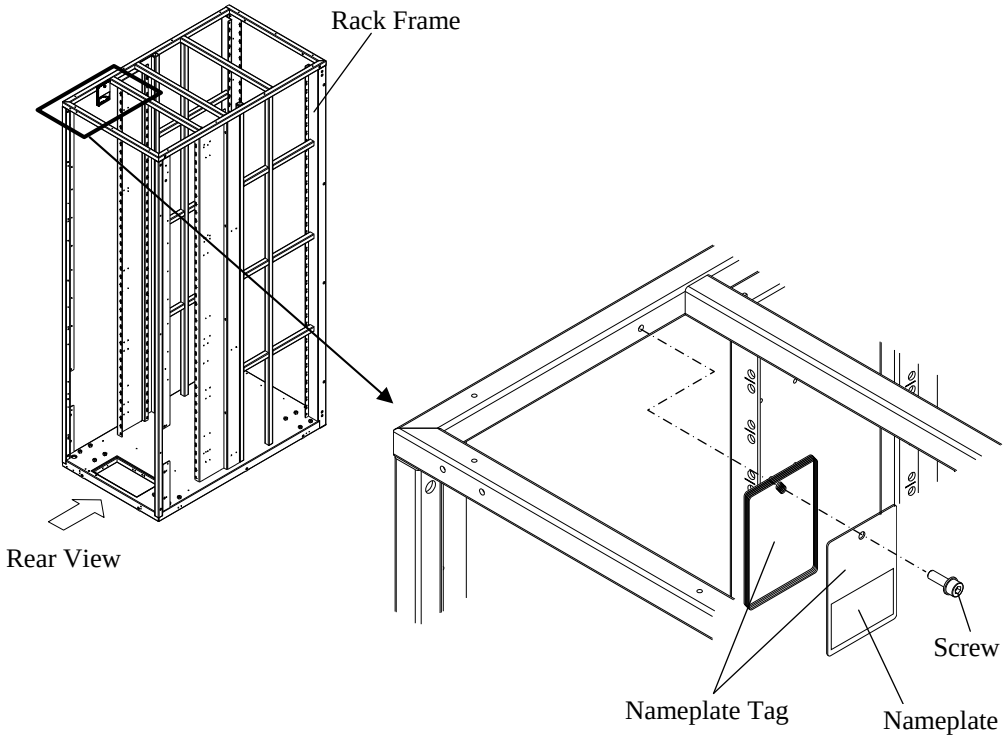

Fig. 3.12.4.10-7 Attachment of Nameplate

3.12.4.11 Installation Procedure of Device Interface Cable HBF (DKC-F710I-HBFC)

Installation Condition

DKC-F710I-HBFC is a cable option to connect between 2nd DKA of DKC-x and DKU-x0 (FBX DKU) with the high performance model. When the high performance model is chosen, this option is required to connect.
Refer to below Table 3.12.4.11-1 for the condition of DKC-F710I-HBFC installation, and go to the appropriate page.

Table 3.12.4.11-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable HBF (DKC-F710I-HBFC) is required to install.	INST03-12C-3680
2	When Device Interface Cable HBF (DKC-F710I-HBFC) is not required to install.	INST03-12C-3700

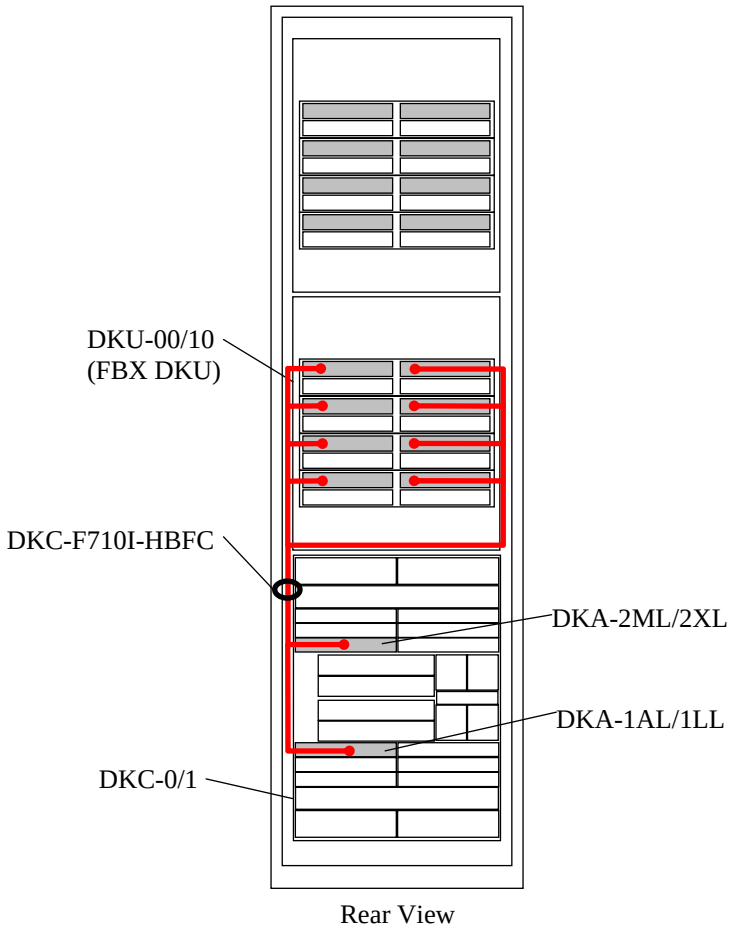

Fig. 3.12.4.11-1 Mounting Position of Device Interface Cable

Copyright © 2012, Hitachi, Ltd.

1. Installing Cables
   a. Route 8 cables on the rear side of the rack and fasten them with 13 clamp tapes. However, do not connect the cables with the SSWs and the DKA PCBs at this stage.

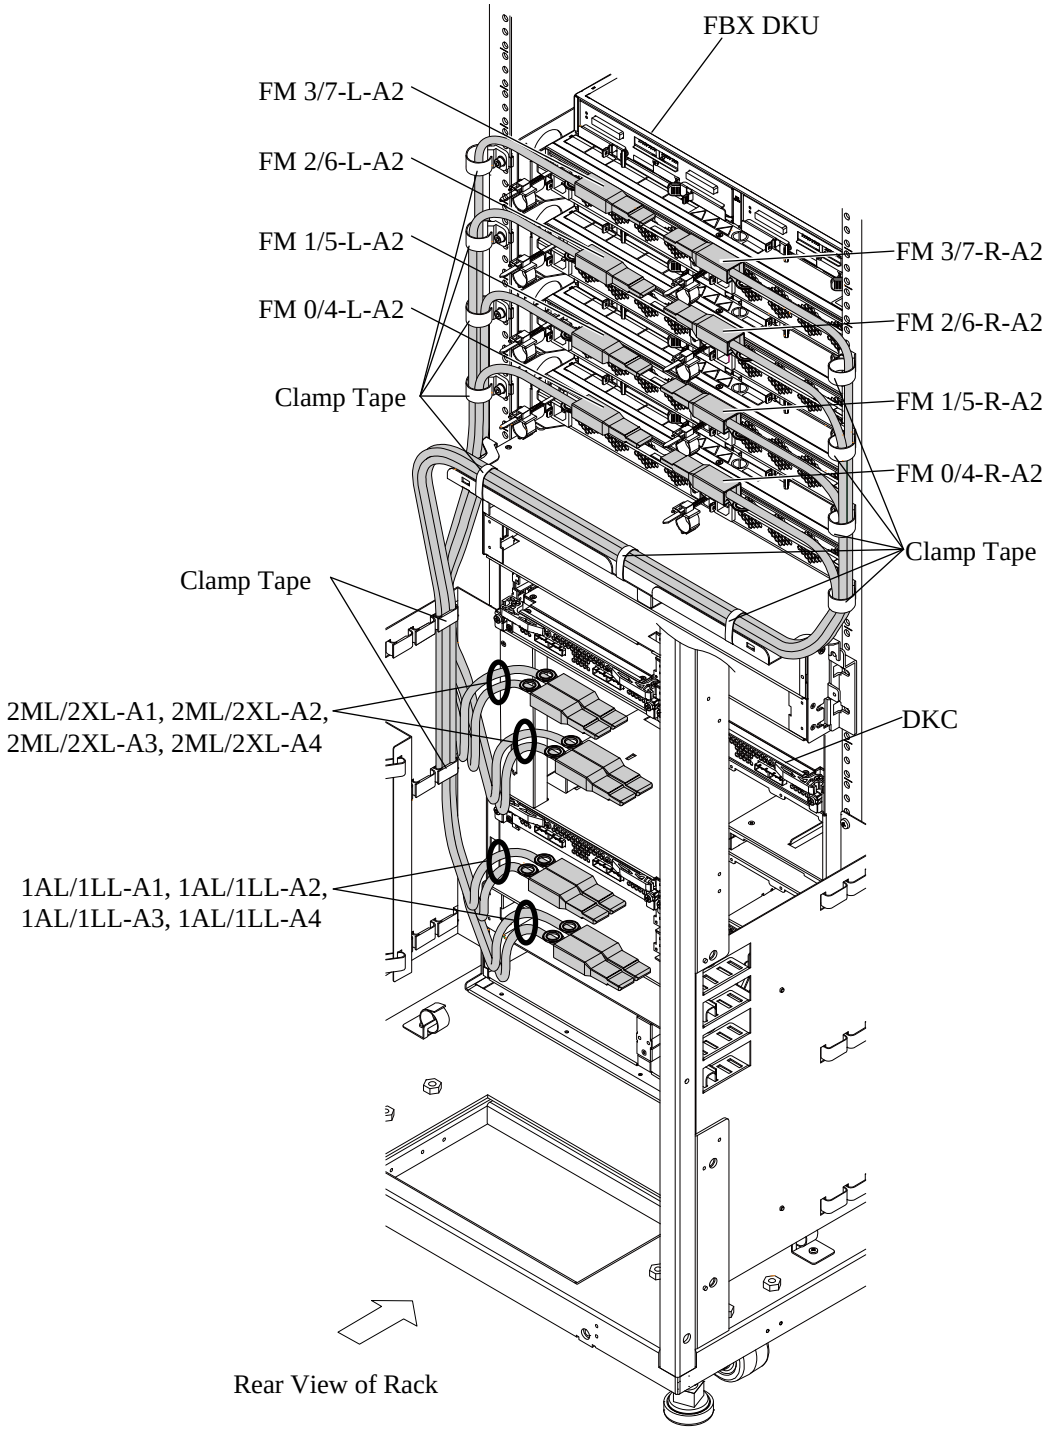

Fig. 3.12.4.11-2 Where to Route Cables

Copyright © 2012, Hitachi, Ltd.

2. Attachment of Nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

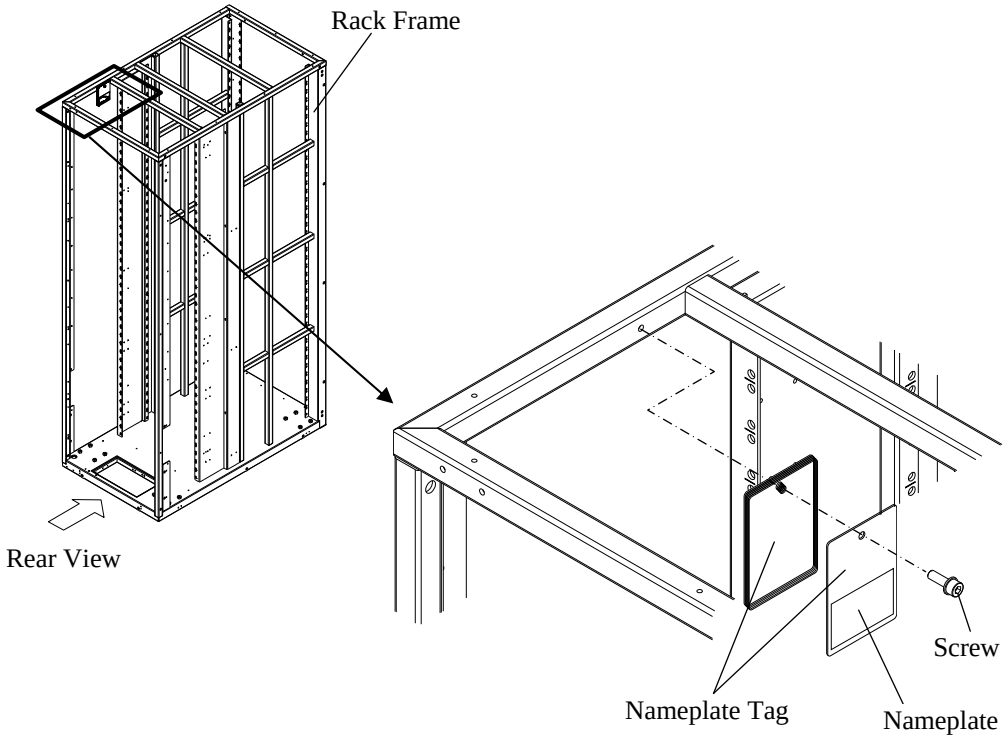

Fig. 3.12.4.11-3 Attachment of Nameplate

3.12.4.12 Installation Procedure of Device Interface Cable UF (DKC-F710I-UFC)

Installation Condition

DKC-F710I-UFC is a cable option to connect FBX DKU with LFF DKU/SFF DKU in a same rack.

Refer to below Table 3.12.4.12-1 for the condition of DKC-F710I-UFC installation, and go to the appropriate page.

Table 3.12.4.12-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable UF (DKC-F710I-UFC) is required to install.	INST03-12C-3720
2	When Device Interface Cable UF (DKC-F710I-UFC) is not required to install.	INST03-12C-4050

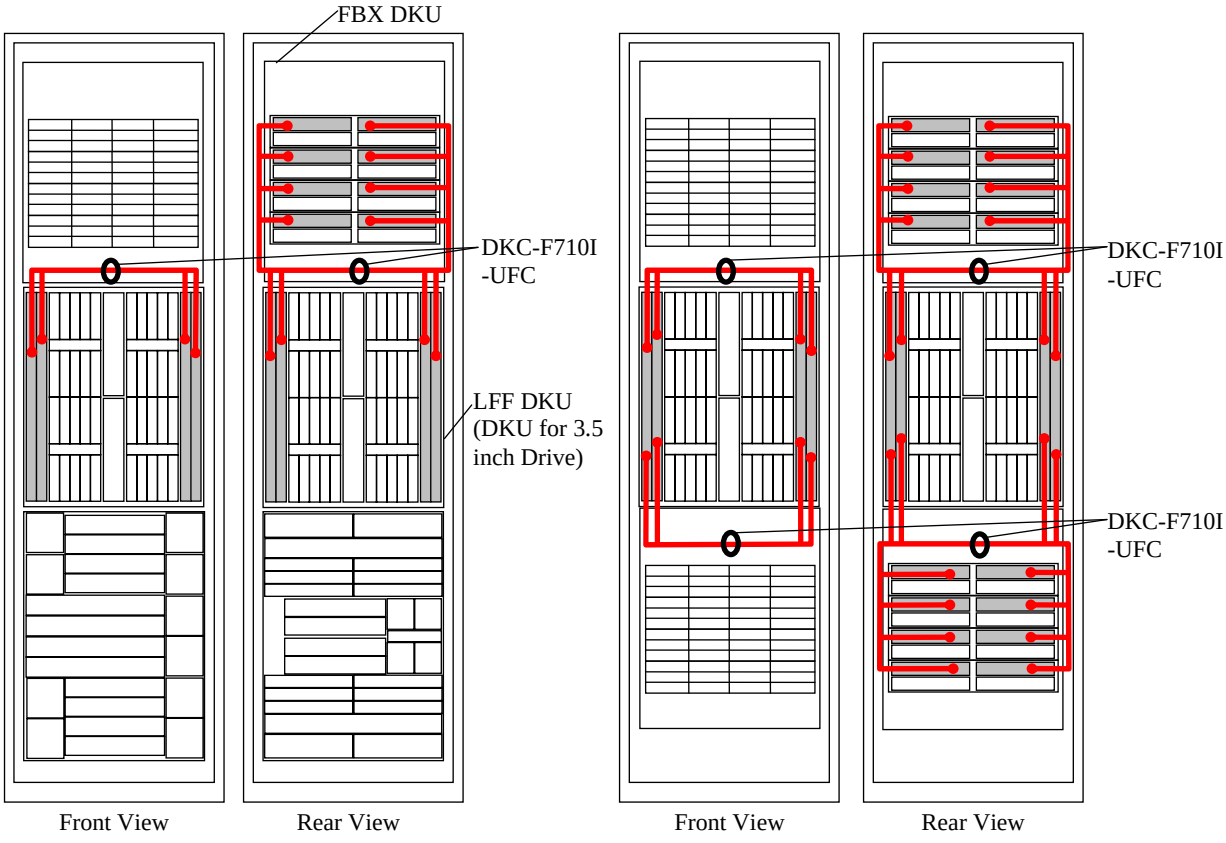

Fig. 3.12.4.12-1 Mounting Position of Device Interface Cable

When connecting upper FBX DKU with lower LFF DKU/SFF DKU

1. Installation of Tray
   a. Loosen four screws, slide the Cover (2U) to the right and pull the left edge toward you. Remove the Cover (2U) from the front of the rack.

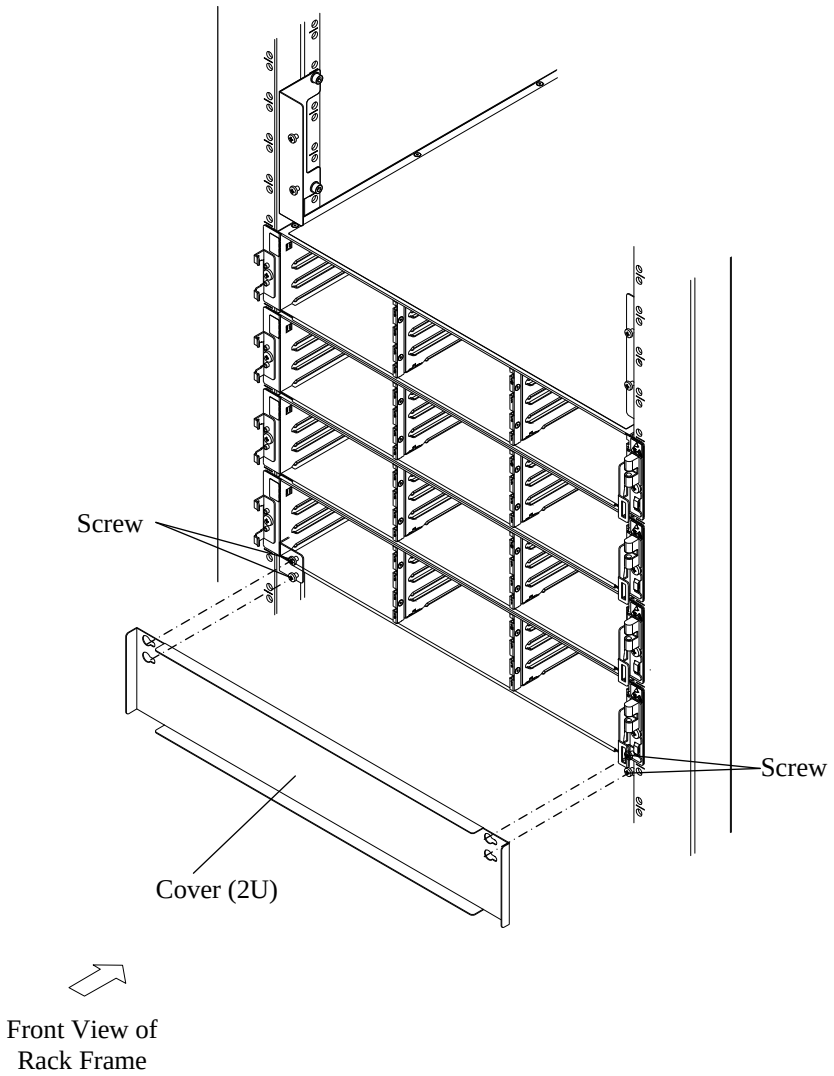

Fig. 3.12.4.12-3 Removal of Cover

Copyright © 2012, Hitachi, Ltd.

b. Attach rack nuts to the sides of the rack frame (at four places in total on the right and left sides).
c. Fit the Stopper and fasten it with four screws.

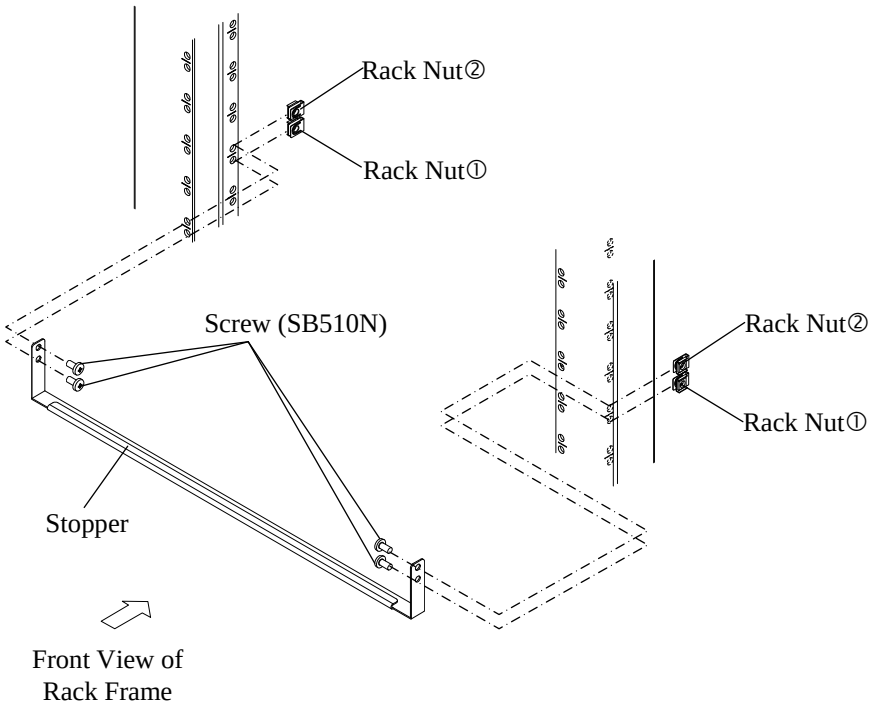

Fig. 3.12.4.12-4 Attachment of Stopper

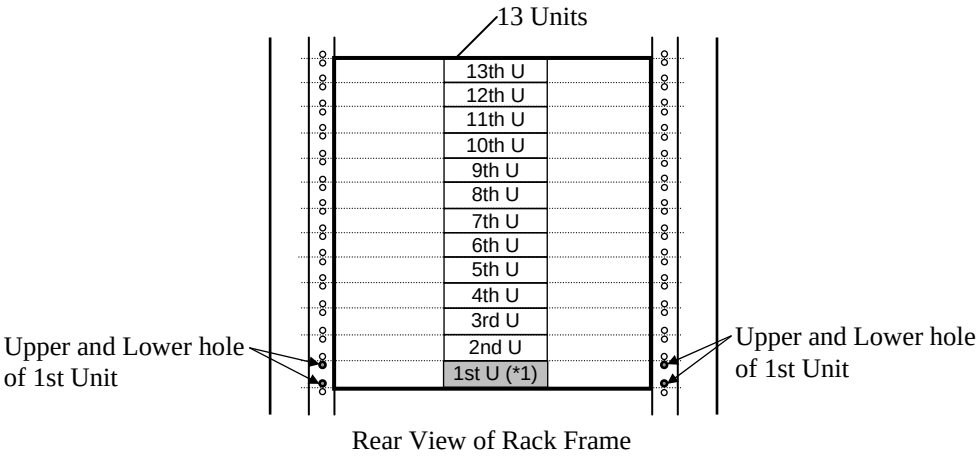
Table 3.12.4.12-2 Installation Position of Rack Nut

No.	Rack Nut No.	Installation Position (Frame Side)	Remarks
1	Rack Nut①	Upper hole 1st Unit	*1
2	Rack Nut②	Lower hole 2nd Unit	*1

*1: The 1st unit is the lowest unit in the installation position of the FBX.

Copyright © 2012, Hitachi, Ltd.

d. Attach rack nuts to the rear side of the rack frame (at four places in total on the right and left sides).



Rear View of Rack Frame

*1: Bottom unit of installation position

3. Cable installation of the rear side of the lower LFF DKU/SFF DKU
   a. Route four cables on the Tray and fasten them with the clamp tapes.

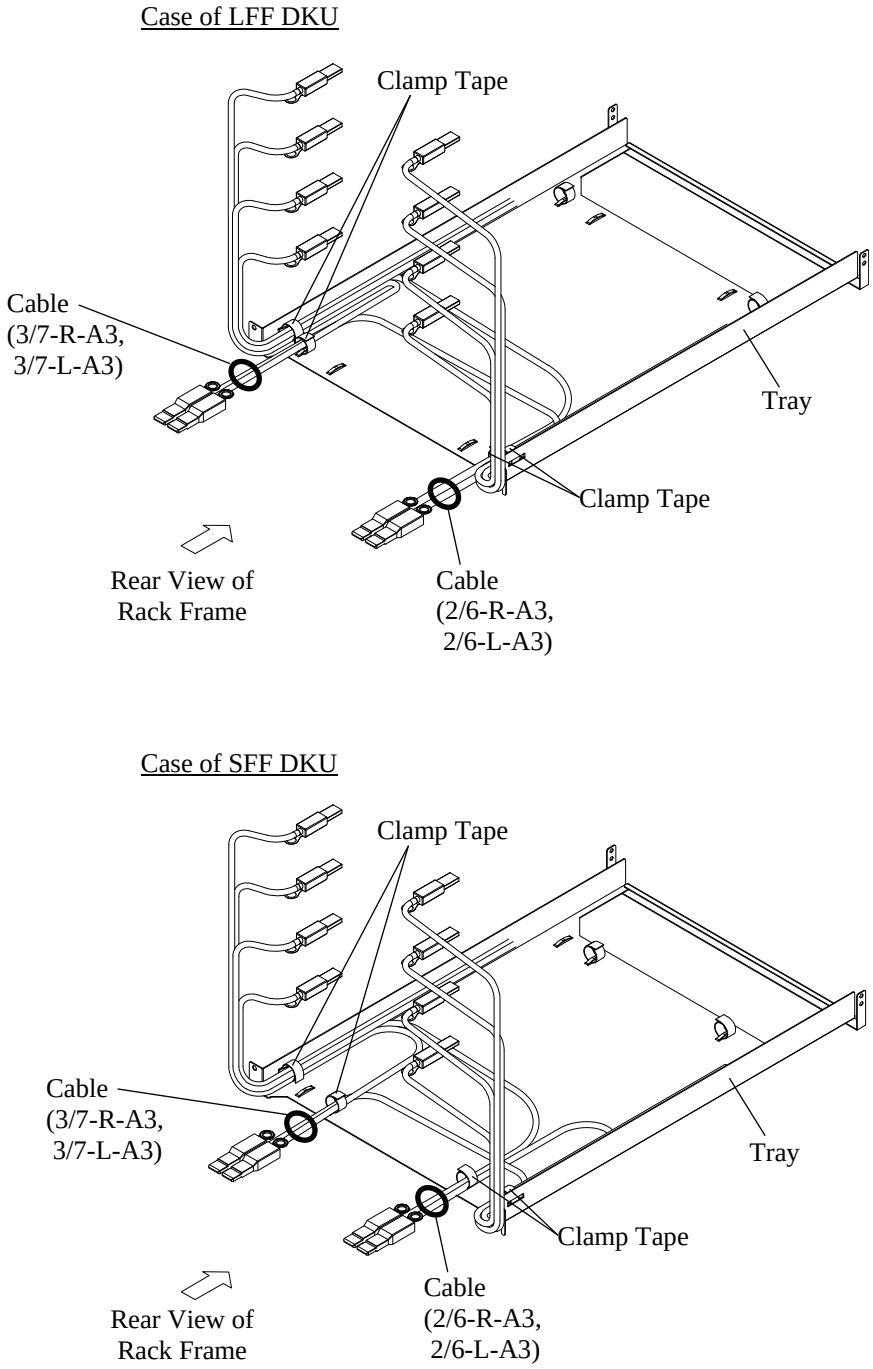

Fig. 3.12.4.12-12 Cable Routing

Copyright © 2012, Hitachi, Ltd.

b. Loosen the two screws of the rear right side of the DKU, and open the FAN door.

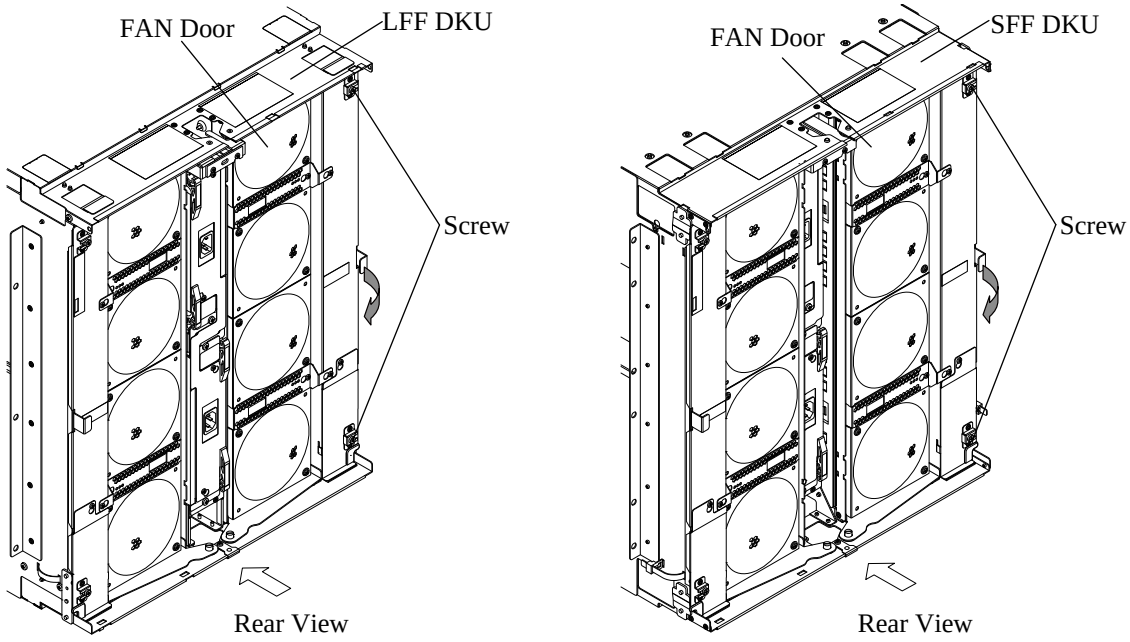

Fig. 3.12.4.12-13 FAN Door Opening

c. Loosen the screw of the rear right side of the DKU, and remove the cover.
d. Route the cables on the rear right side of the DKU. However, do not connect the cables with the SSW PCBs at this stage.
e. Close the FAN door of the rear right side of the DKU, and tighten the two screws.

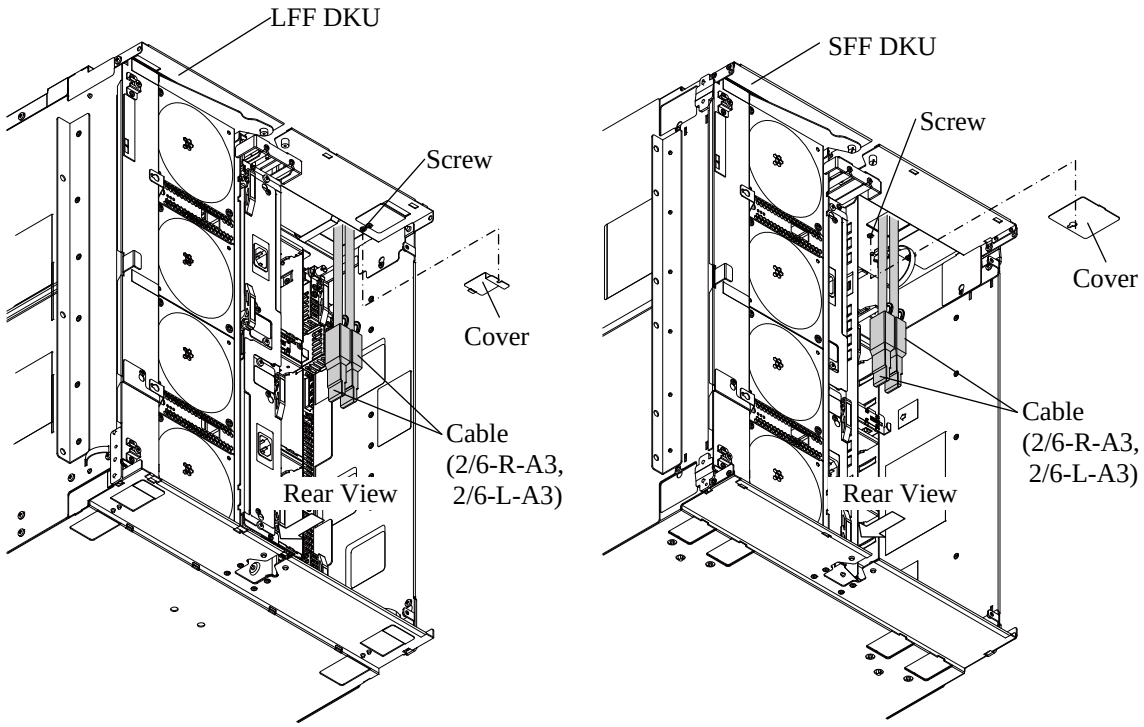

Fig. 3.12.4.12-14 Cable Installation

Copyright © 2012, Hitachi, Ltd.

f. Loosen the two screws of the rear left side of the DKU, and open the FAN door.

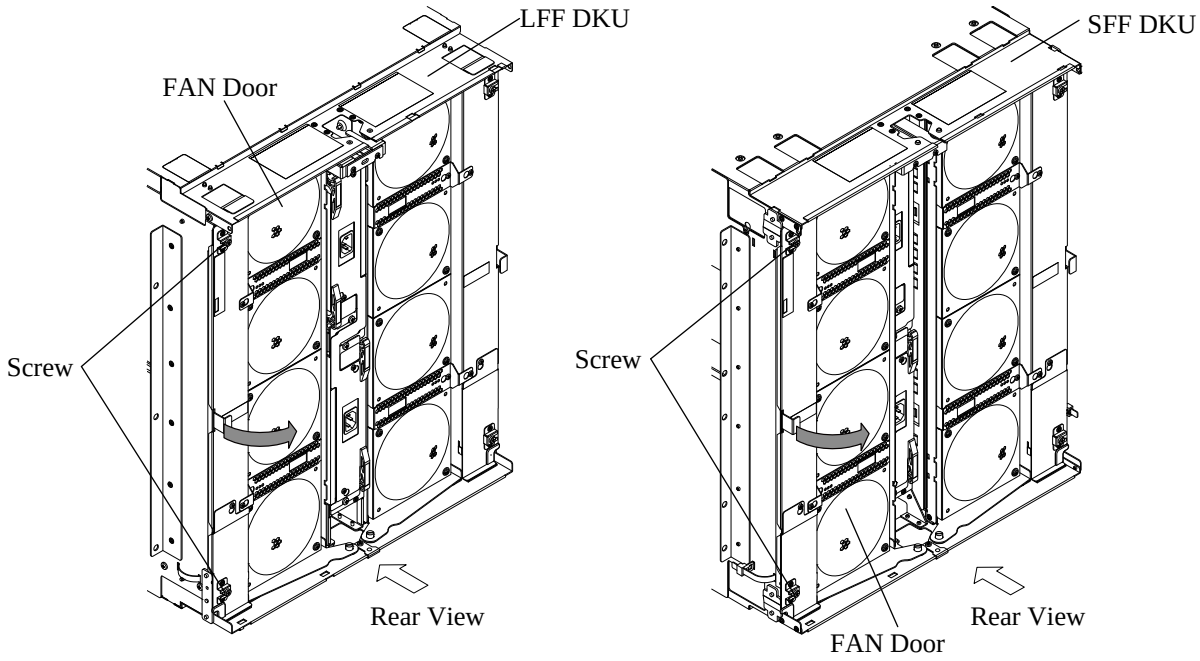

Fig. 3.12.4.12-15 FAN Door Opening

g. Loosen the screw of the rear left side of the DKU, and remove the cover.
h. Route the cables on the rear left side of the DKU. However, do not connect the cables with the SSW PCBs at this stage.
i. Close the FAN door of the rear left side of the DKU, and tighten the two screws.

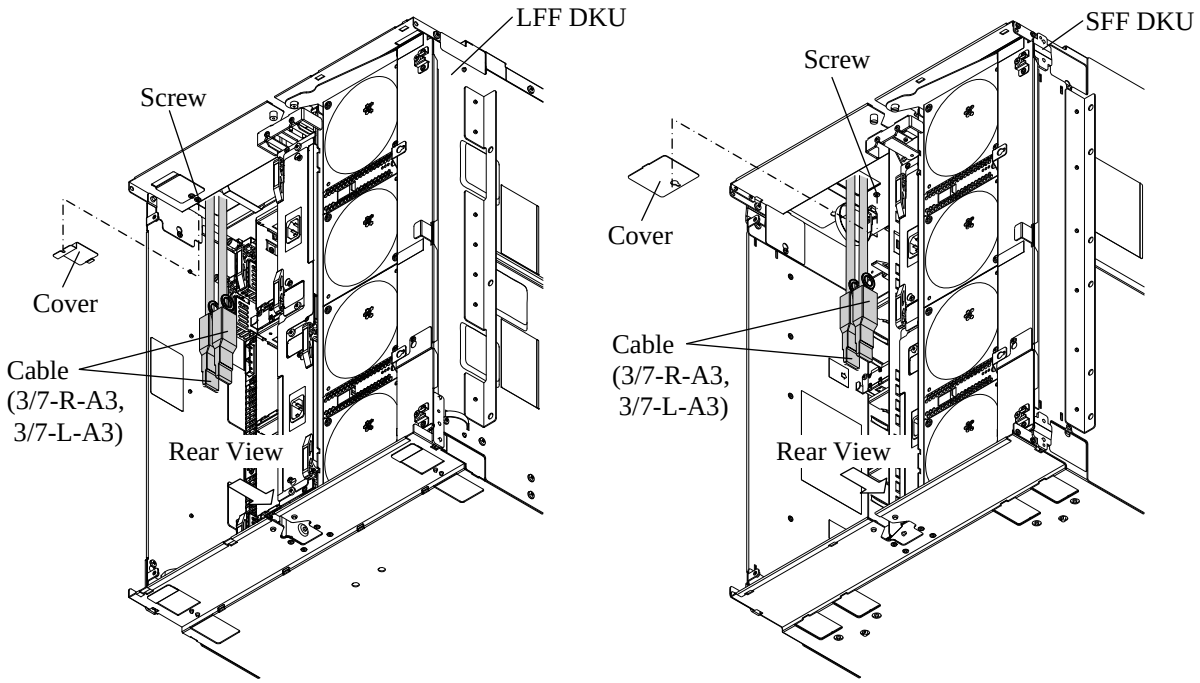

Fig. 3.12.4.12-16 Cable Installation

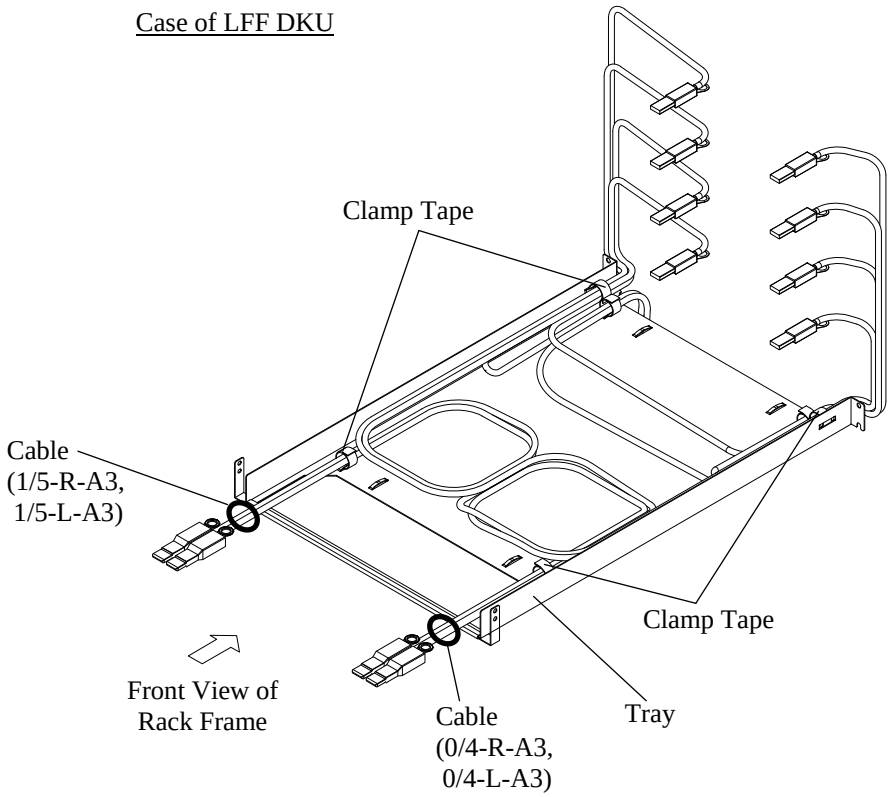
Copyright © 2012, Hitachi, Ltd.

4. Cable installation of the front side of the lower LFF DKU/SFF DKU
   a. Route four cables on the Tray and fasten them with the clamp tapes.



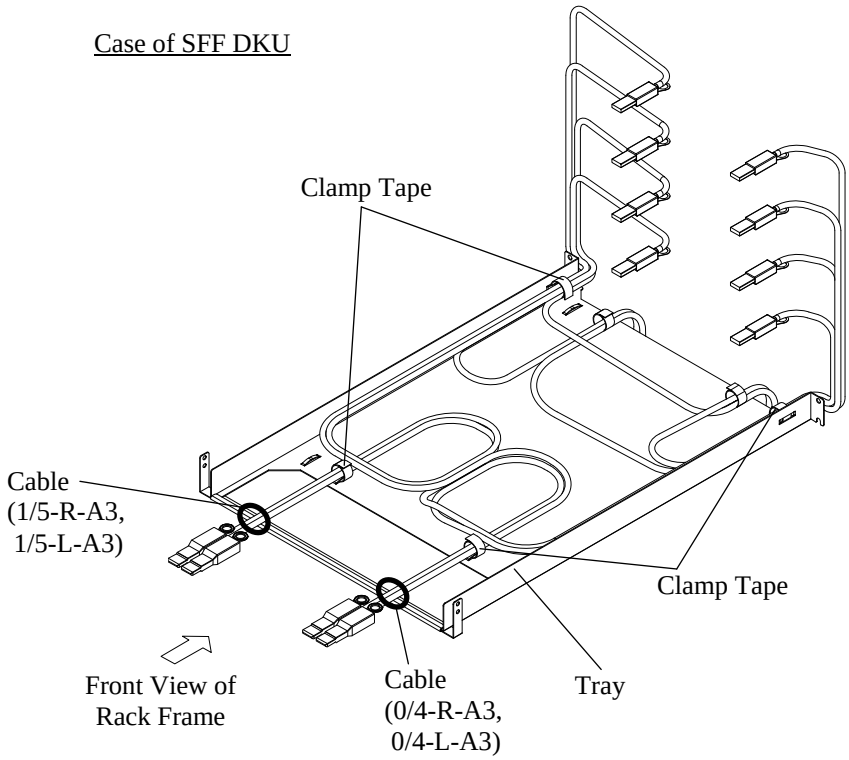


Fig. 3.12.4.12-17 Cable Routing

Copyright © 2012, Hitachi, Ltd.

b. Loosen the two screws of the front right side of the DKU, and open the FAN door.

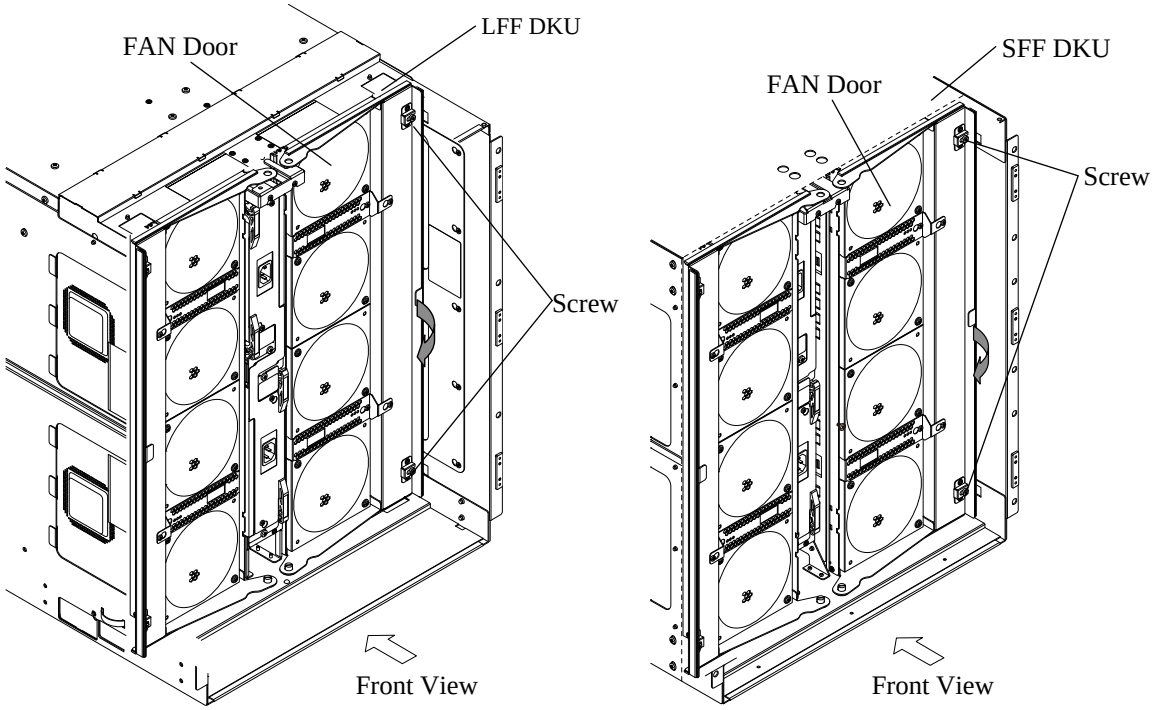

Fig. 3.12.4.12-18 FAN Door Opening

c. Loosen the screw of the front right side of the DKU, and remove the cover.
d. Route the cables on the front right side of the DKU. However, do not connect the cables with the SSW PCBs at this stage.
e. Close the FAN door of the front right side of the DKU, and tighten the two screws.

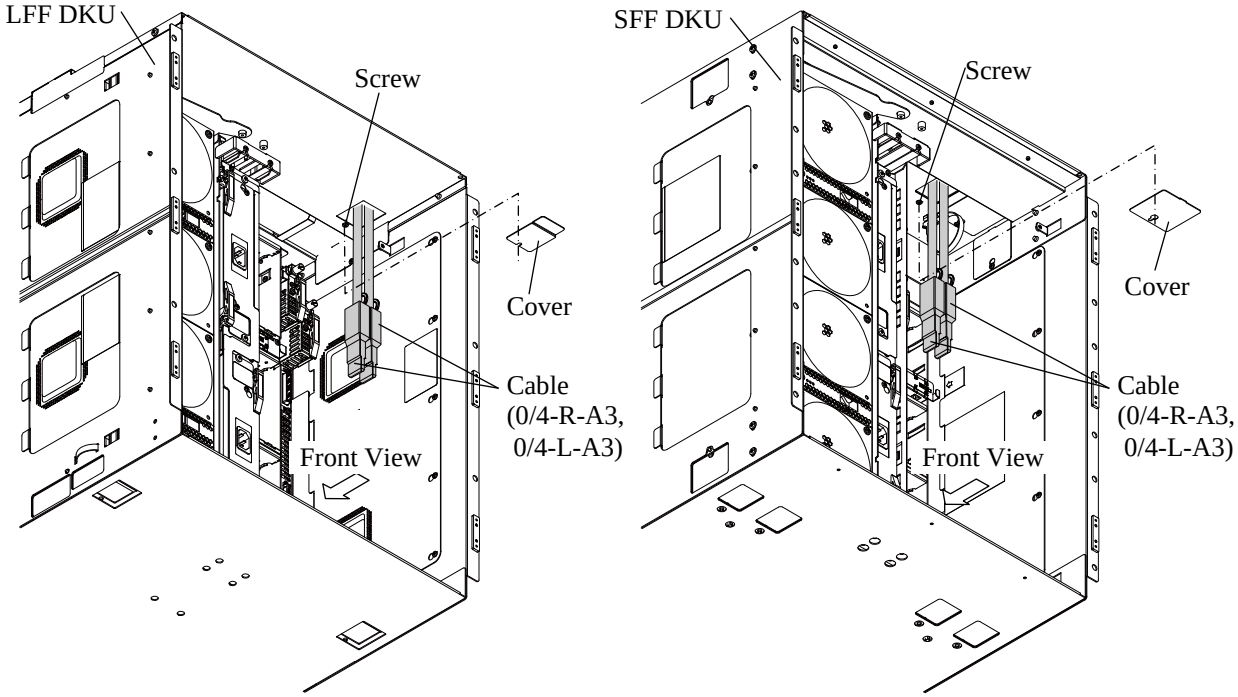

Fig. 3.12.4.12-19 Cable Installation

Copyright © 2012, Hitachi, Ltd.

f. Loosen the two screws of the front left side of the DKU, and open the FAN door.

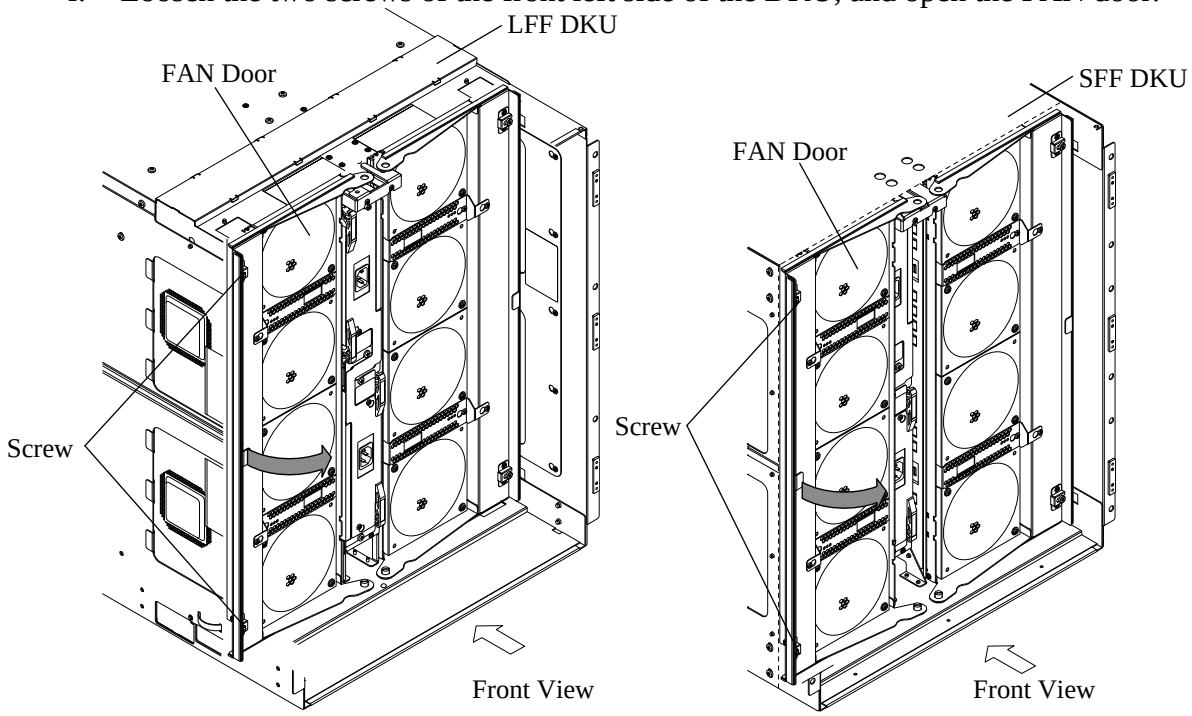

Fig. 3.12.4.12-20 FAN Door Opening

g. Loosen the screw of the front left side of the DKU, and remove the cover.
h. Route cables on the front left side of the DKU. However, do not connect the cables with the SSW PCBs at this stage.
i. Close the FAN door of the front left side of the DKU, and tighten the two screws.

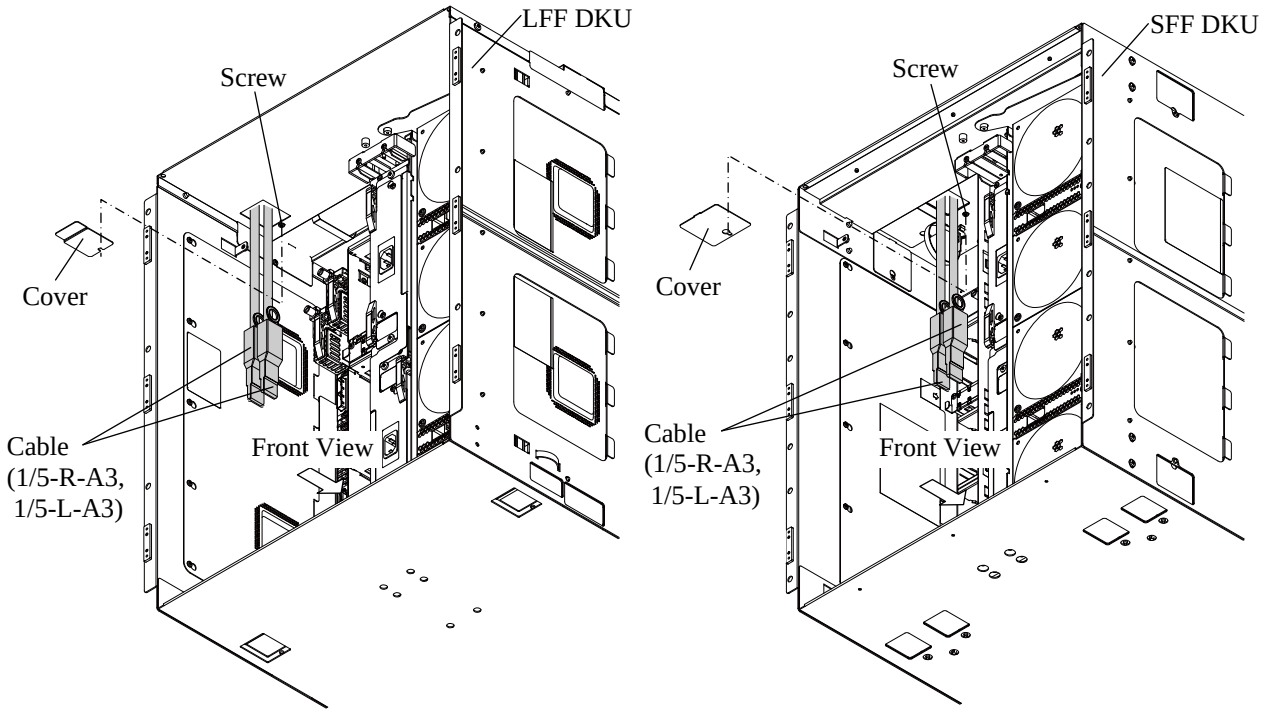

Fig. 3.12.4.12-21 Cable Installation

Copyright © 2012, Hitachi, Ltd.

5. Attachment of Cover
   a. Insert the right edge of the Cover (2U) in front of the bracket inside the rack frame. Slide the Cover (2U) to the left and fasten it with four screws at the fixation position. (Refer to Fig. 3.12.4.12-3.)

6. Attachment of Nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

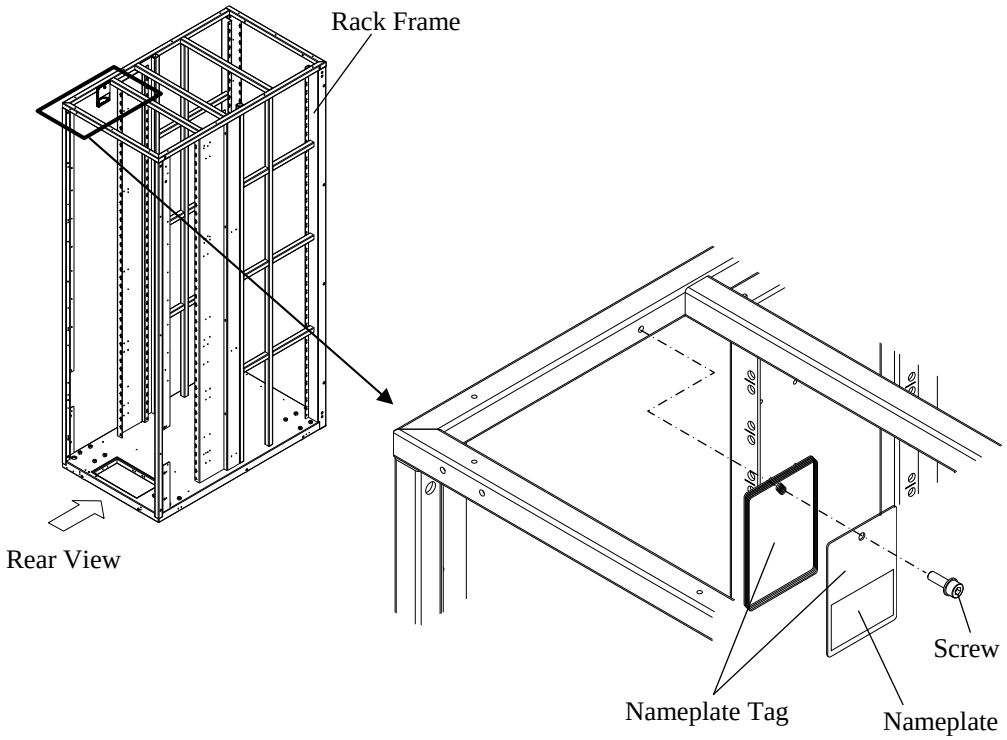

Fig. 3.12.4.12-22 Attachment of Nameplate

When connecting upper LFF DKU/SFF DKU with lower FBX DKU

1. Installation of Tray
   a. Loosen four screws, slide the Cover (3U) to the right and pull the left edge toward you. Remove the Cover (3U) from the front of the rack.

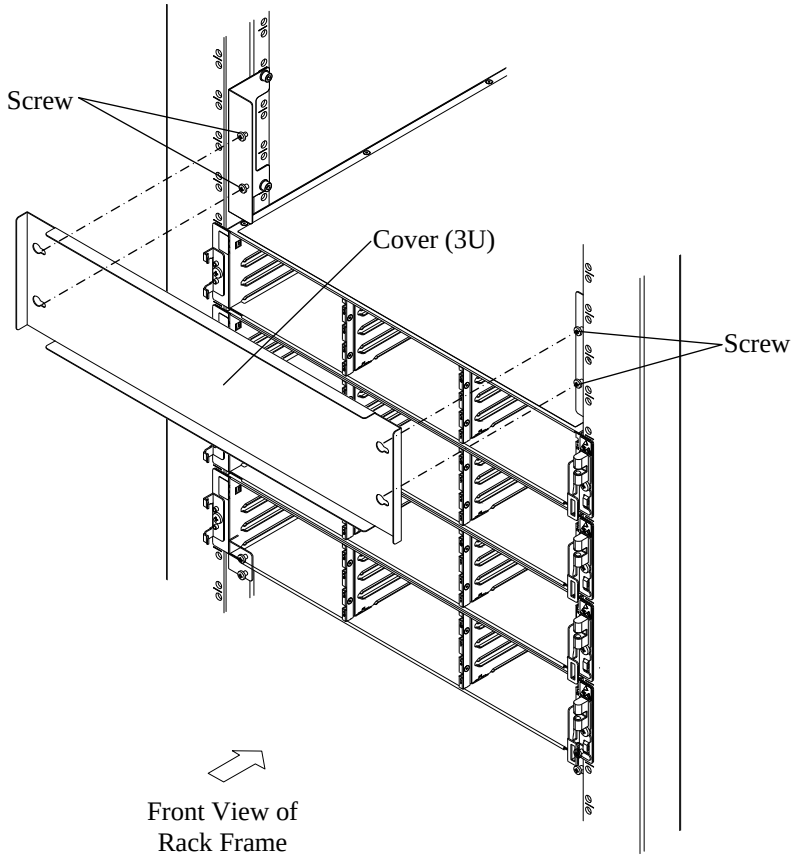

Fig. 3.12.4.12-23 Removal of Cover

Copyright © 2012, Hitachi, Ltd.

b. Attach rack nuts to the sides of the rack frame (at four places in total on the right and left sides).
c. Fit the Stopper and fasten it with four screws.

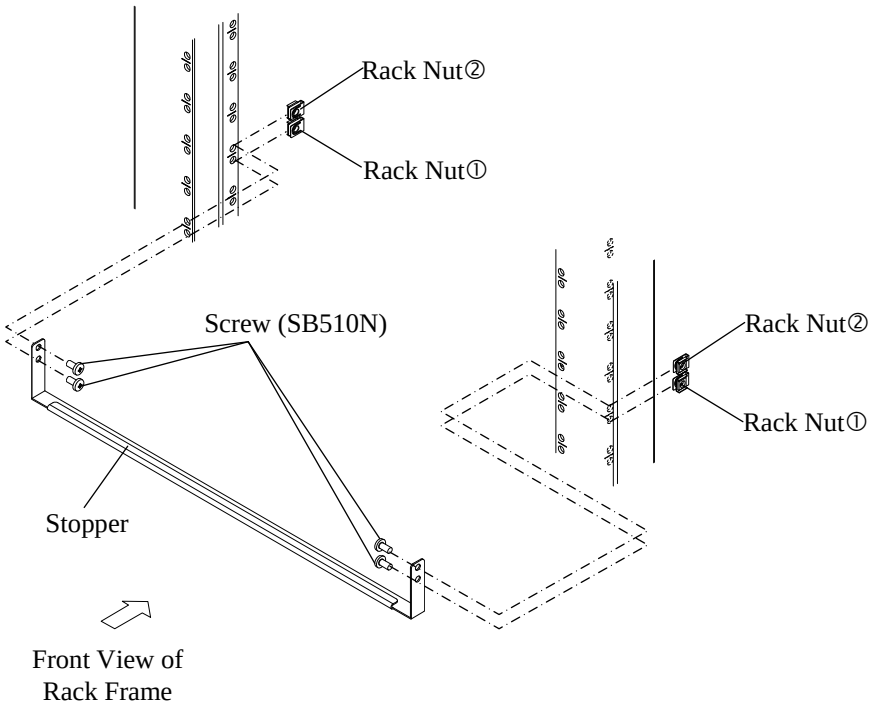

Fig. 3.12.4.12-24 Attachment of Stopper

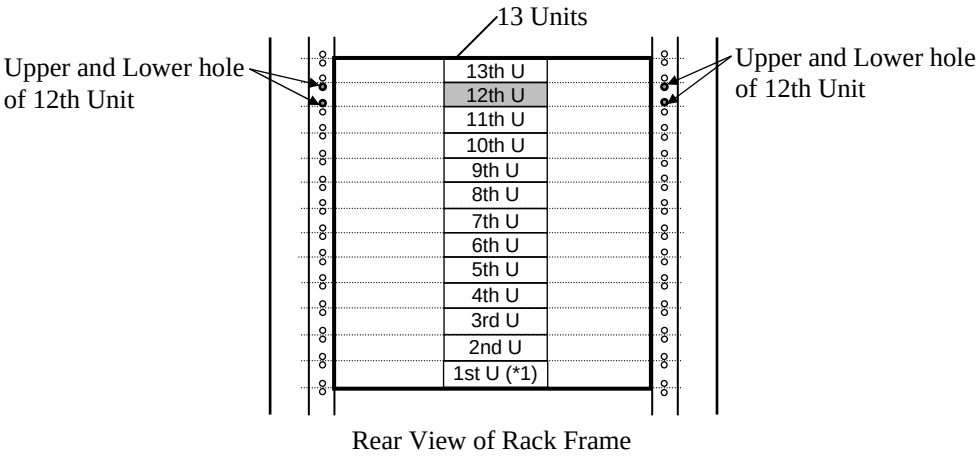
Table 3.12.4.12-3 Installation Position of Rack Nut

No.	Rack Nut No.	Installation Position (Frame Side)	Remarks
1	Rack Nut①	Upper hole 12th Unit	*1
2	Rack Nut②	Lower hole 13th Unit	*1

*1: The 1st unit is the lowest unit in the installation position of the FBX.

Copyright © 2012, Hitachi, Ltd.

d. Attach rack nuts to the rear side of the rack frame (at four places in total on the right and left sides).



Rear View of Rack Frame

2. Cable installation of the front side of the upper LFF DKU/SFF DKU
   a. Loosen the two screws of the front right side of the DKU, and open the FAN door.

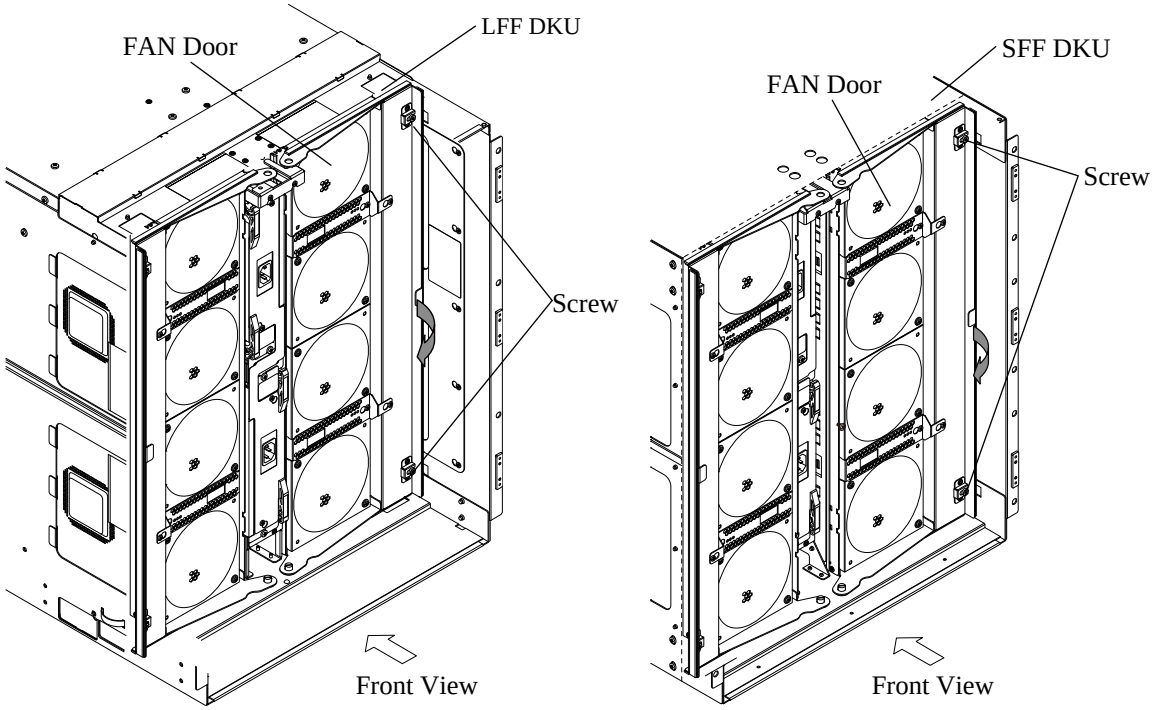

Fig. 3.12.4.12-27 FAN Door Opening

Copyright © 2012, Hitachi, Ltd.

b. Loosen the screw of the front right side of the DKU, and remove the cover.
c. Route the cables on the front right side of the DKU and remove the cap from the cables.
d. Connect the cables with the SSW PCBs in the upper DKU after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

e. Release the repeat binder on the front right side of the DKU and fasten the cables. (Only LFF DKU)
f. Close the FAN door of the front right side of the DKU, and tighten the two screws.

3.12.4.16 Installation Procedure of Device Interface Cable UFEX (DKC-F710I-UFEXC)

Installation Condition

DKC-F710I-UFEXC is a cable option to connect FBX DKU with LFF DKU/SFF DKU between two racks.
Refer to below Table 3.12.4.16-1 for the condition of DKC-F710I-UFEXC installation, and go to the appropriate page.

Table 3.12.4.16-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable UFEX (DKC-F710I-UFEXC) is required to install.	INST03-12C-4360
2	When Device Interface Cable UFEX (DKC-F710I-UFEXC) is not required to install.	INST03-12C-5090

The Case that Connection Source Is FBX DKU and Connection Destination Is LFF DKU/SFF DKU

1. Pattern of Cable Connection

There are four kinds of patterns that the connections source is the FBX DKU and the connection destination is the LFF DKU/SFF DKU when the Device Interface Cable UFEX (DKC-F710I-UFEXC) is installed into the rack.

For the case that the connection source is the LFF DKU/SFF DKU and the connection destination is the FBX DKU, refer to INST03-12C-4600.

In this procedure, the output side of the Device Interface Cable is defined as a Connection Source, and the RACK is called a Connection Source RACK, and the DKU is called a Connection Source DKU. Moreover, the input side of the Device Interface Cable is defined as a Connection Destination, and the RACK is called a Connection Destination RACK, and the DKU is called a Connection Destination DKU.

Before starting operation according to this procedure, understand each process name and the position.

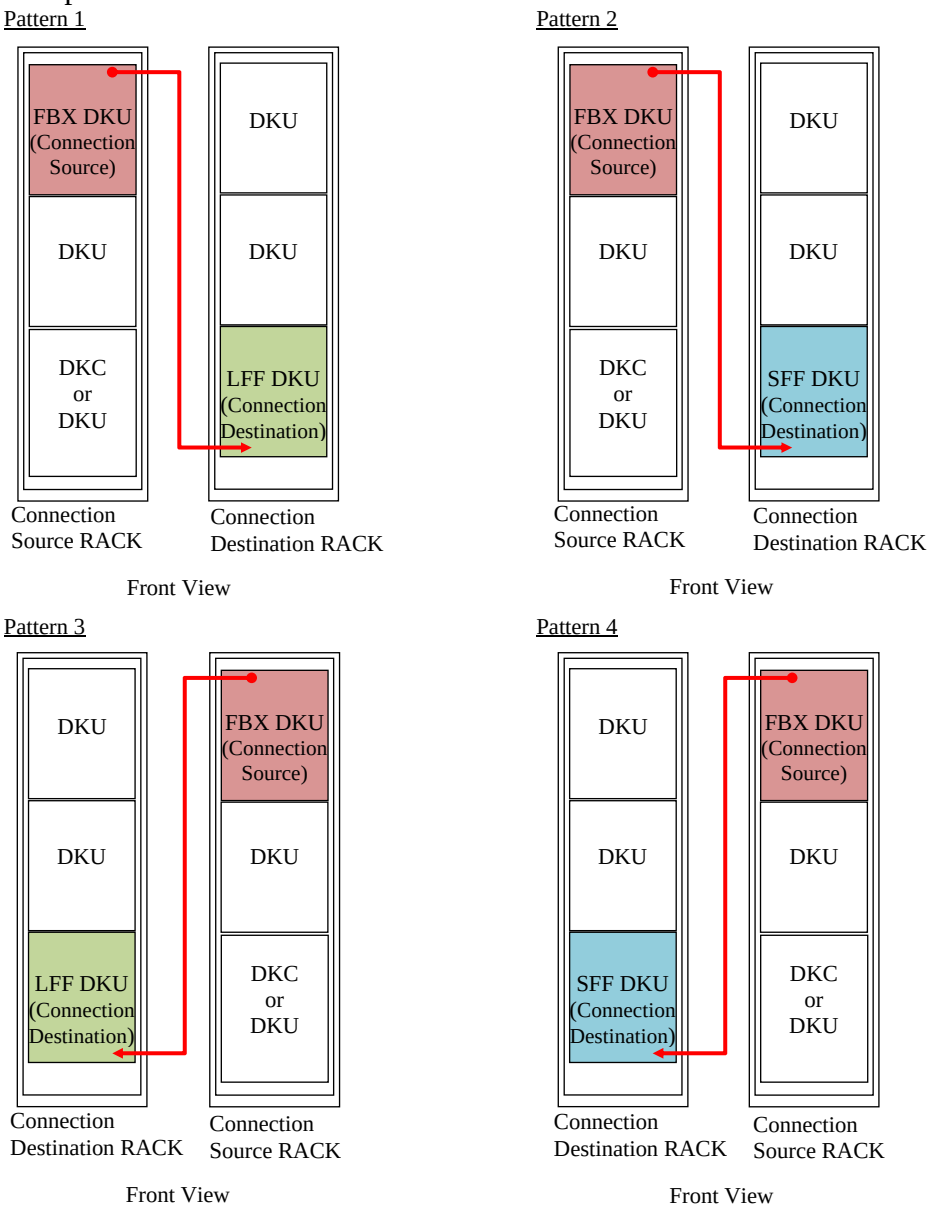

Fig. 3.12.4.16-3 Pattern of Cable Connection

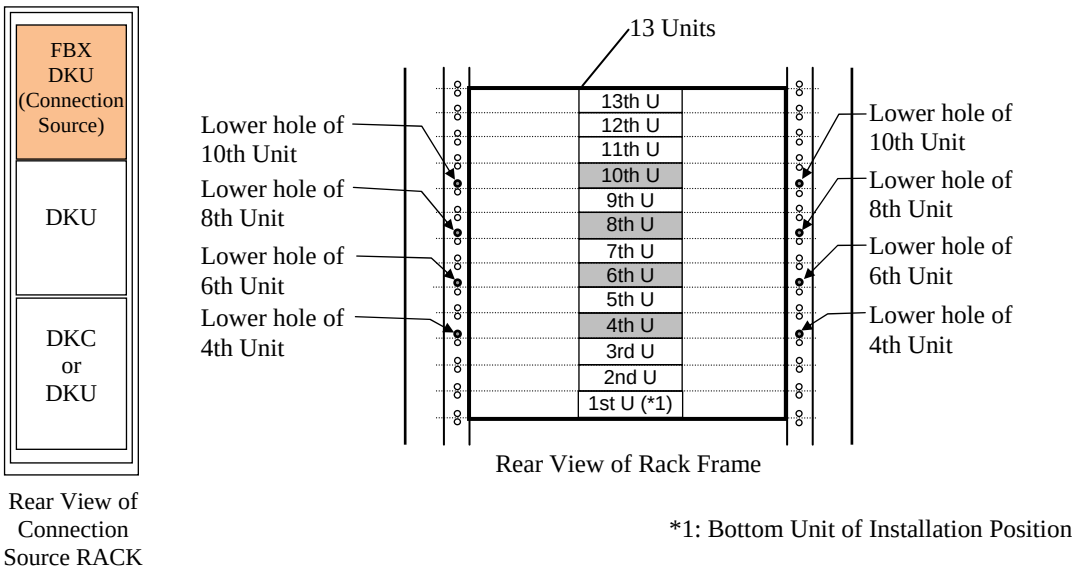
Copyright © 2012, Hitachi, Ltd.

2. Cable Installation of the Rear Side of the Connection Source FBX DKU
   a. Fit eight rack nuts to the rear side of the connection source rack.



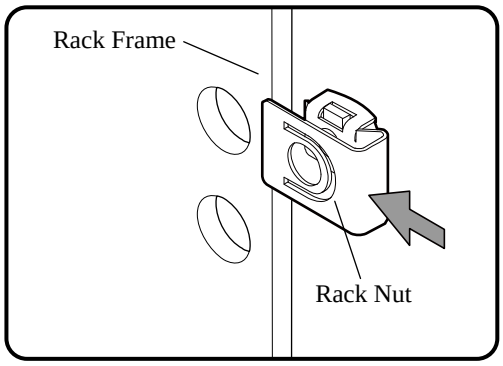


Fig. 3.12.4.16-4 Attachment of Rack Nuts

Copyright © 2012, Hitachi, Ltd.

b. Attach the clamp tape (9 in total) to the cleat (9 in total).

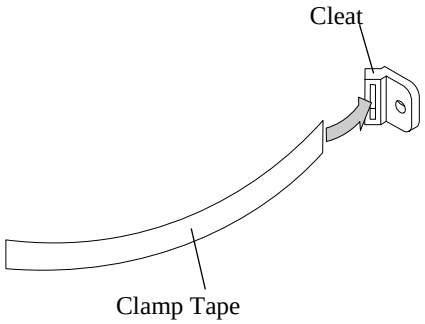

Fig. 3.12.4.16-5 Attaching Clamp Tapes to Cleats

c. Install eight clamp tapes to the rear side of the rack frame and fasten them with a WA socket bolt.

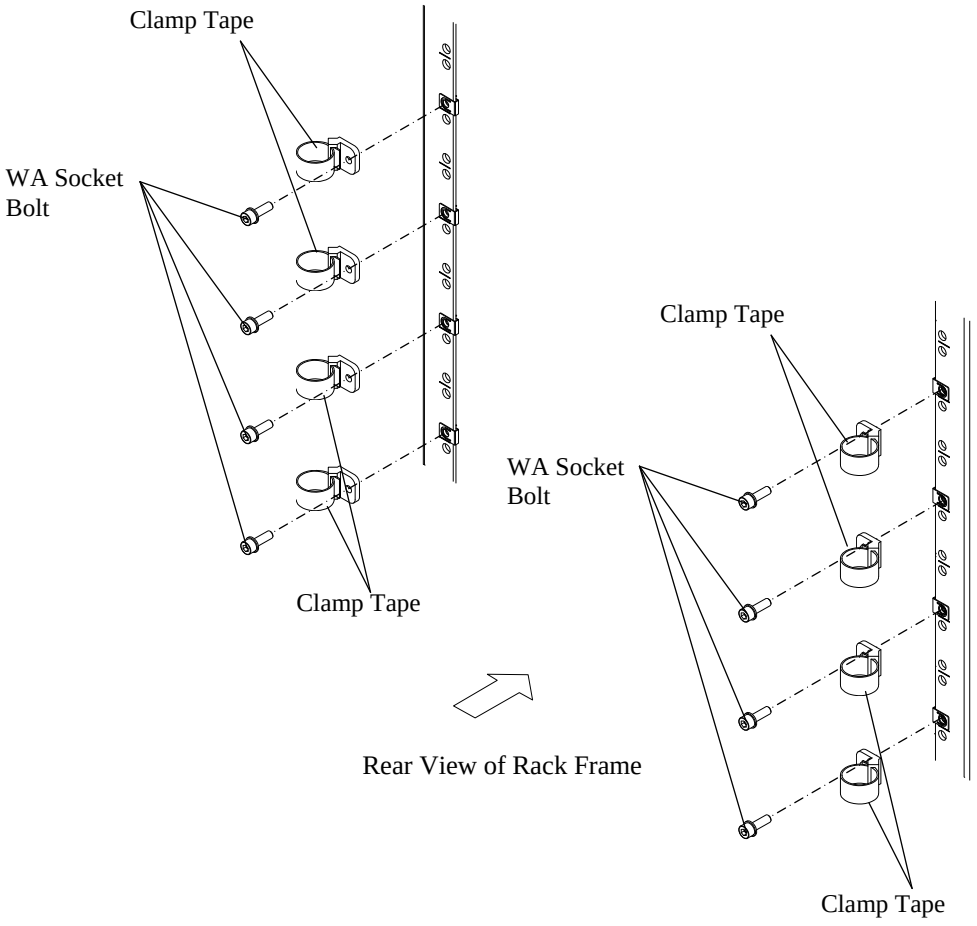

Fig. 3.12.4.16-6 Installing Clamp Tapes

Copyright © 2012, Hitachi, Ltd.

d. Attach a clamp tape to an opening of the bottom on the rear side of the connection source rack and fasten it with a WA socket bolt.

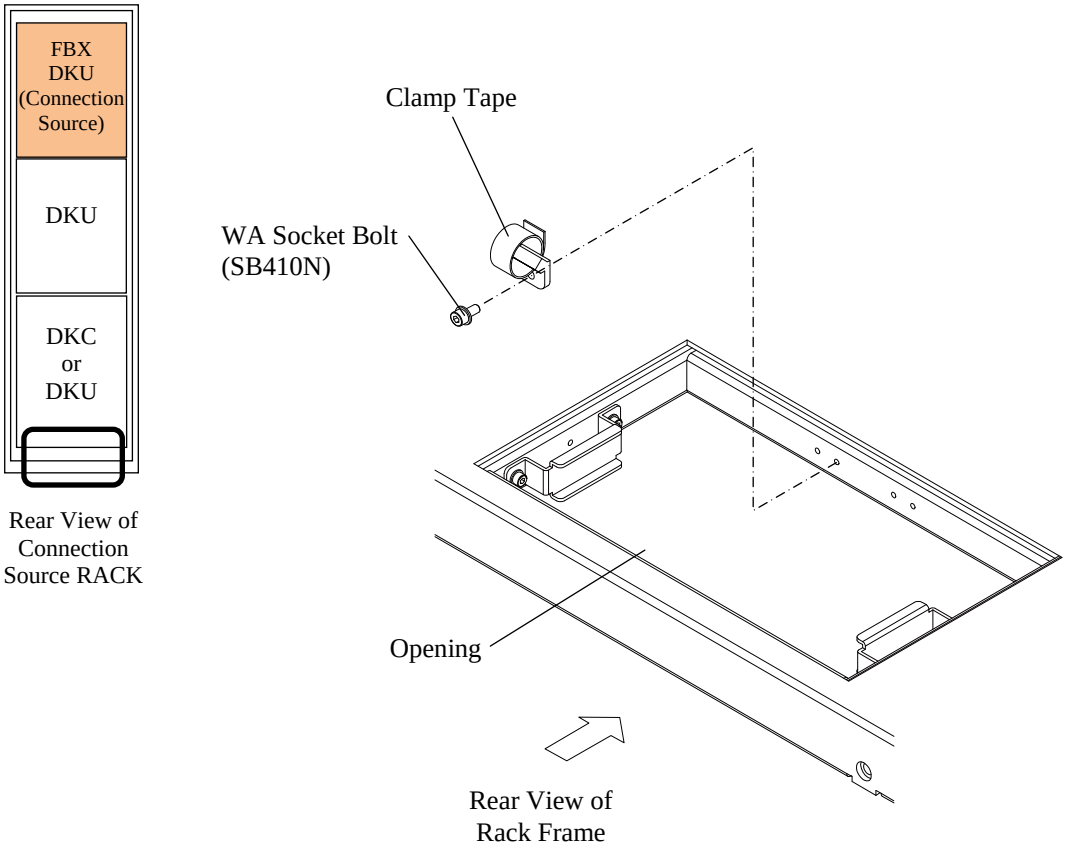

Fig. 3.12.4.16-7 Installing a Clamp Tape

Copyright © 2012, Hitachi, Ltd.

e. Install cables and fasten them with eight clamp tapes.
However, do not connect the cables with the SSWs of the connection source DKU at this stage.

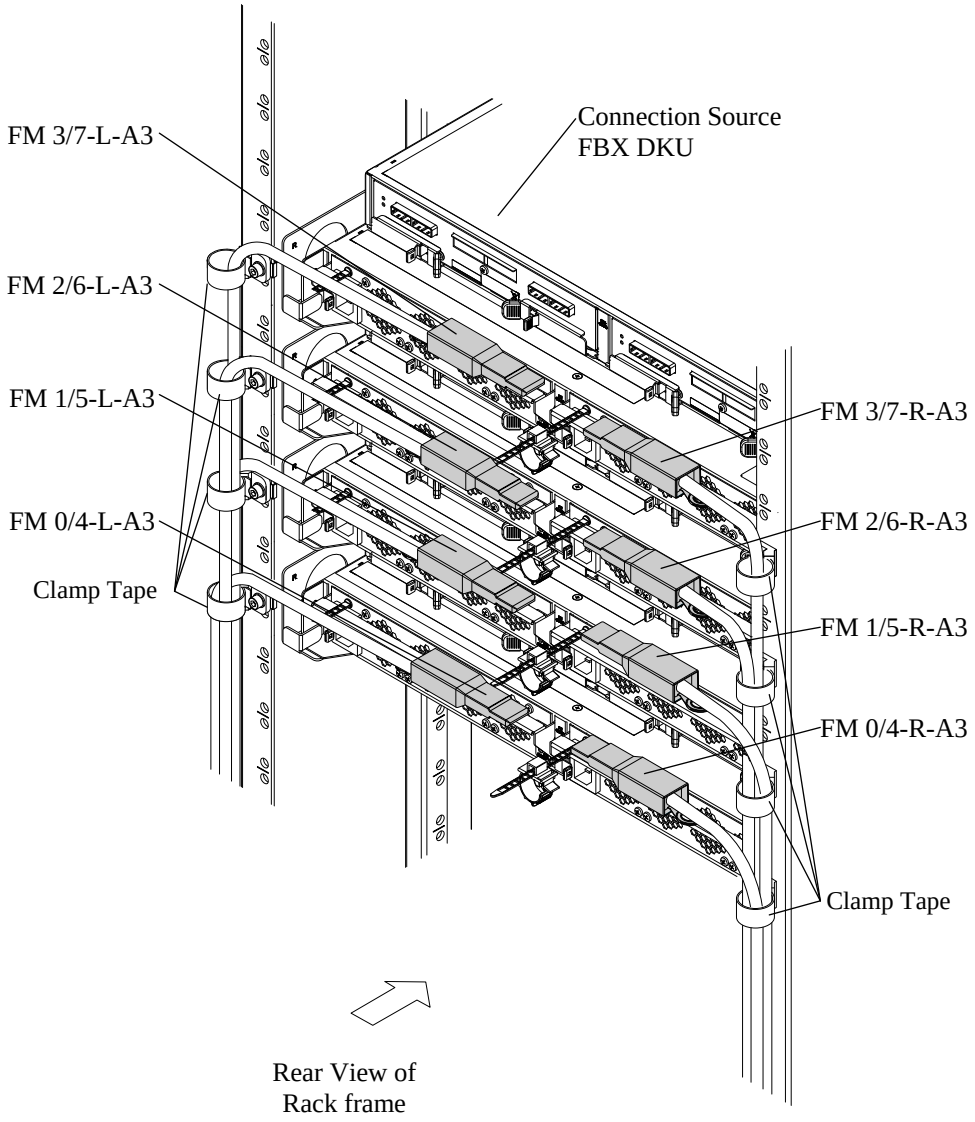

Fig. 3.12.4.16-8 Installing Cables

Copyright © 2012, Hitachi, Ltd.

3. Cable Routing between Racks
   a. Route cables between racks and fasten cables with the clamp tape of an opening of the bottom on the rear side of the connection source rack. Refer to Fig. 3.12.4.16-9 or Fig. 3.12.4.16-10.

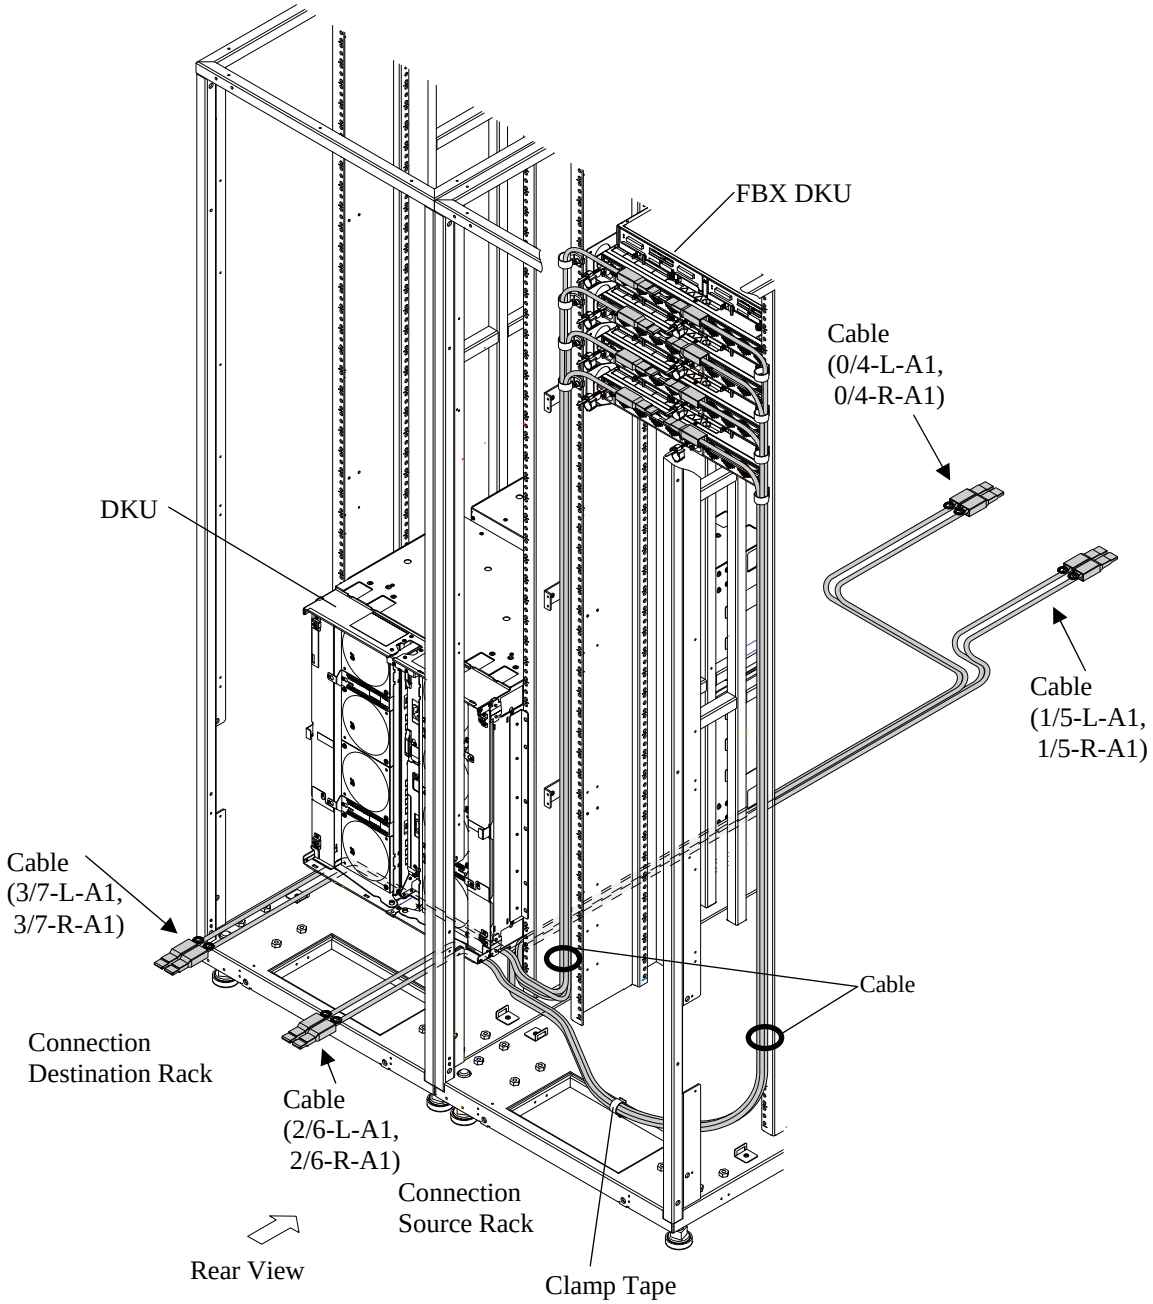

Fig. 3.12.4.16-9 Cable Routing (Cable Installation on the Right Side of the Connection Source Rack)

Copyright © 2012, Hitachi, Ltd.

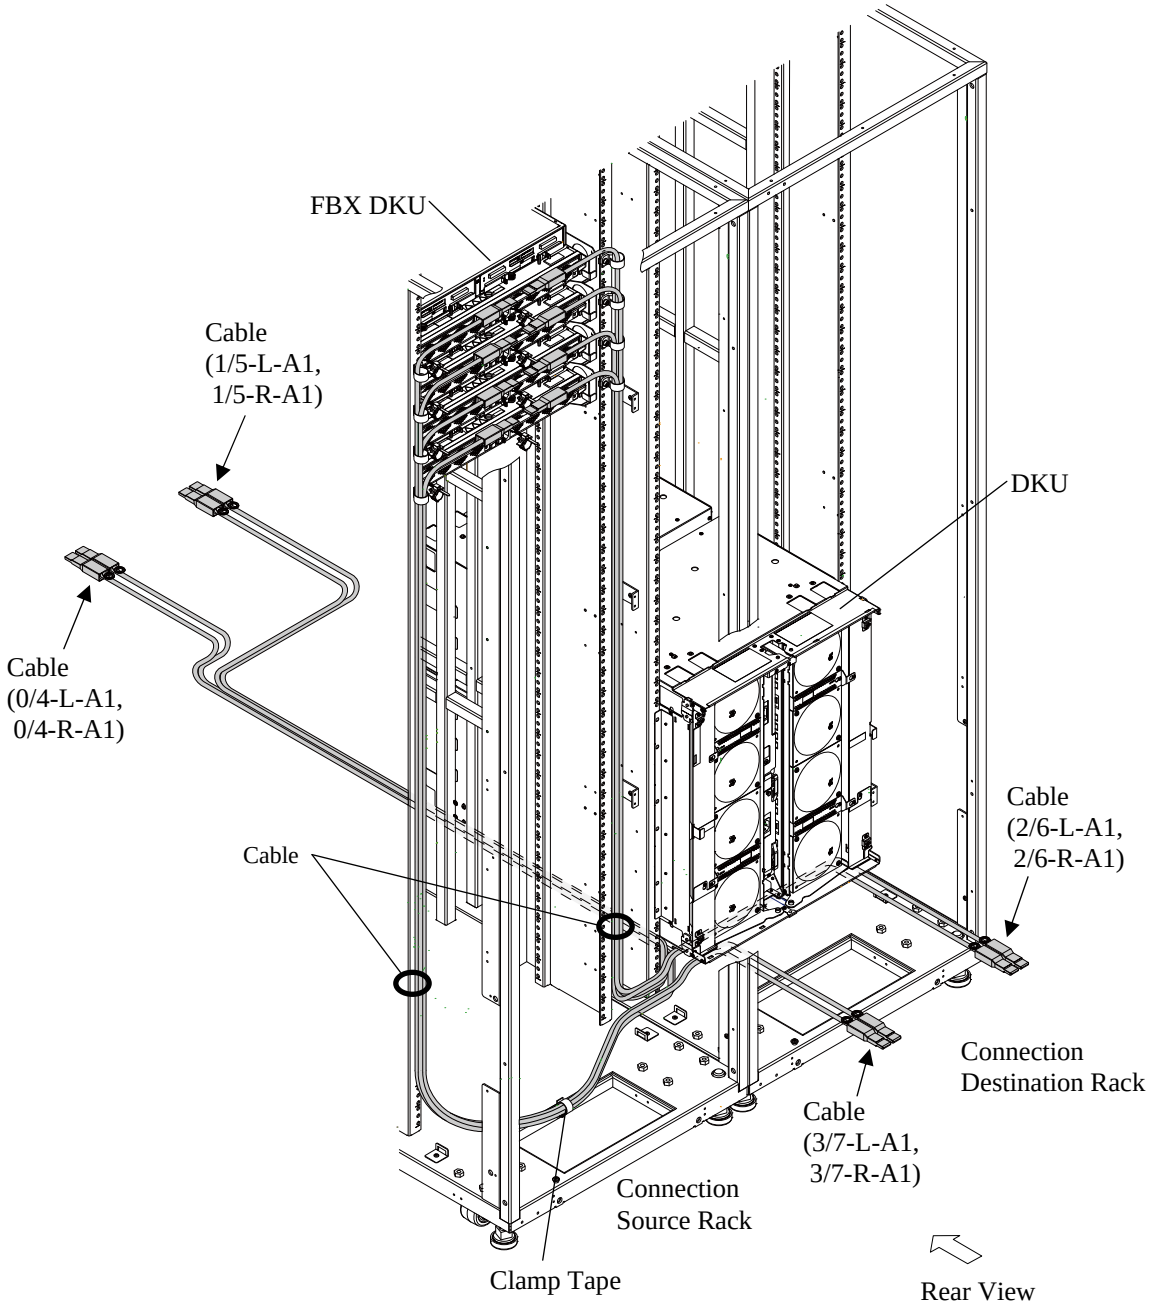

Fig. 3.12.4.16-10 Cable Routing (Cable Installation on the Left Side of the Connection Source Rack)

Copyright © 2012, Hitachi, Ltd.

4. Cable Installation of the rear side of the Connection destination DKU

When the Connection destination DKU is the LFF DKU

a. Loosen the two screws of the rear right side of the connection destination DKU, and open the FAN door.

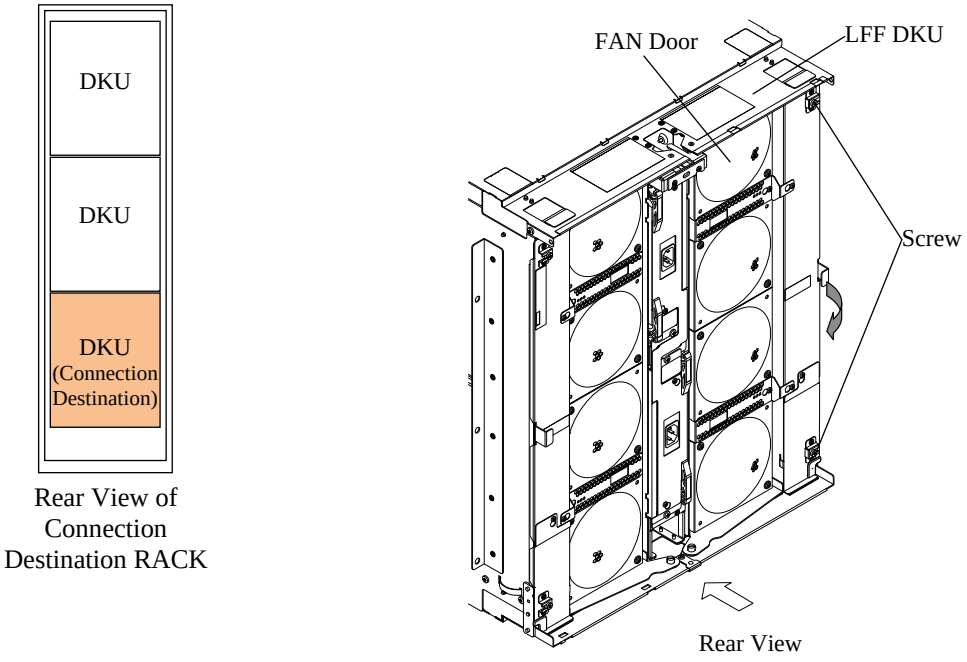

Fig. 3.12.4.16-11 FAN Door Opening

b. Loosen the screw of the rear right side of the connection destination DKU, and remove the cover.

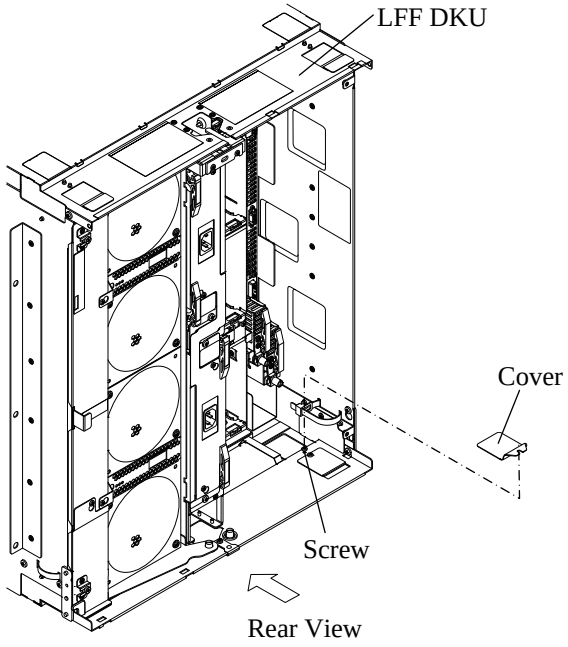

Fig. 3.12.4.16-12 Removal of Cover

Copyright © 2012, Hitachi, Ltd.

c. Release the repeat binder at the rear right side of connection destination DKU.
d. Remove the caps from the cables. Connect the cables with the SSW PCBs after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

e. Bundle and secure the cables with the repeat binder.
f. Loop the surplus cable length, bind it with the clamp tapes, and put it into the space between the bottom of the LFF DKU and the bottom of the rack.
g. Close the FAN door of the rear right side of the connection destination DKU, and tighten the two screws.

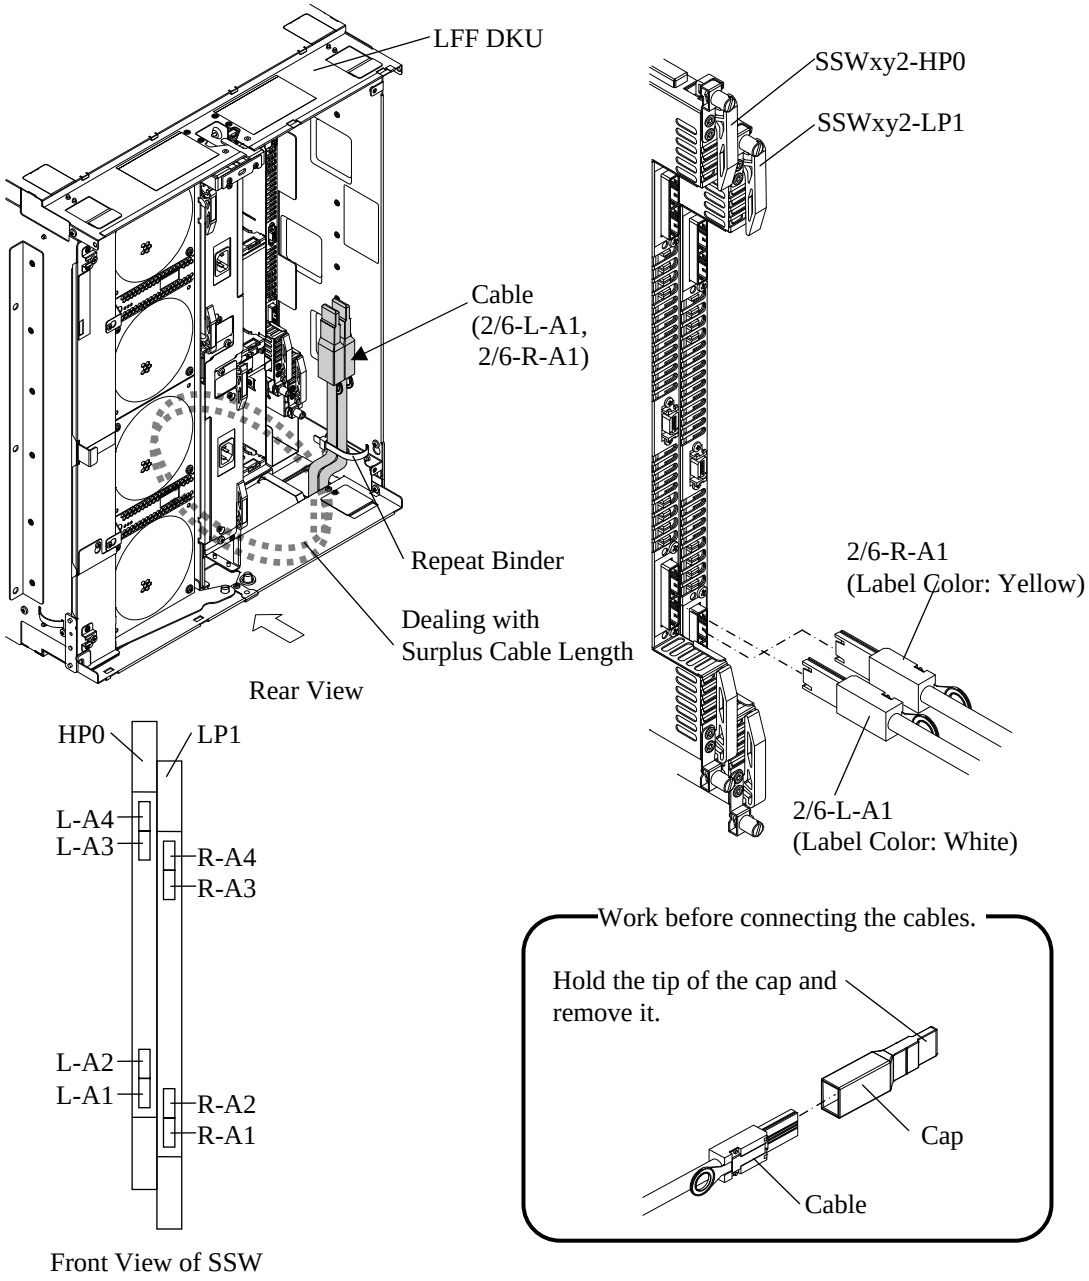

Fig. 3.12.4.16-13 Connection of Cables

Copyright © 2012, Hitachi, Ltd.

h. Loosen the two screws of the rear left side of the connection destination DKU, and open the FAN door.

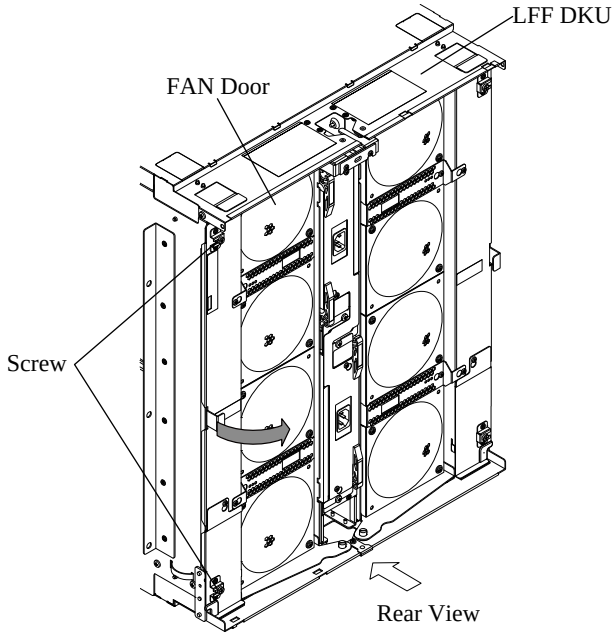

Fig. 3.12.4.16-14 FAN Door Opening

i. Loosen the screw of the rear left side of the connection destination DKU, and remove the cover.

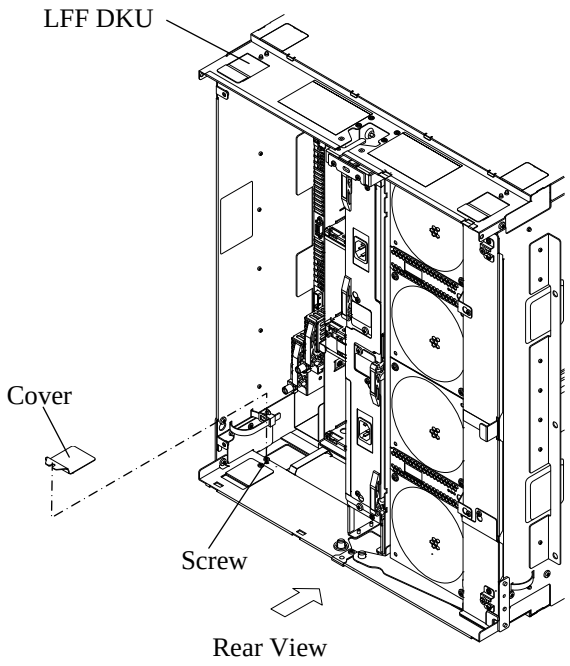

Fig. 3.12.4.16-15 Removal of Cover

Copyright © 2012, Hitachi, Ltd.

j. Release the repeat binder at the rear left side of connection destination DKU.
k. Remove the caps from the cables. Connect the cables with the SSW PCBs after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

l. Bundle and secure the cables with the repeat binder.
m. Loop the surplus cable length, bind it with the clamp tapes, and put it into the space between the bottom of the LFF DKU and the bottom of the rack.
n. Close the FAN door of the rear left side of the connection destination DKU, and tighten the two screws.

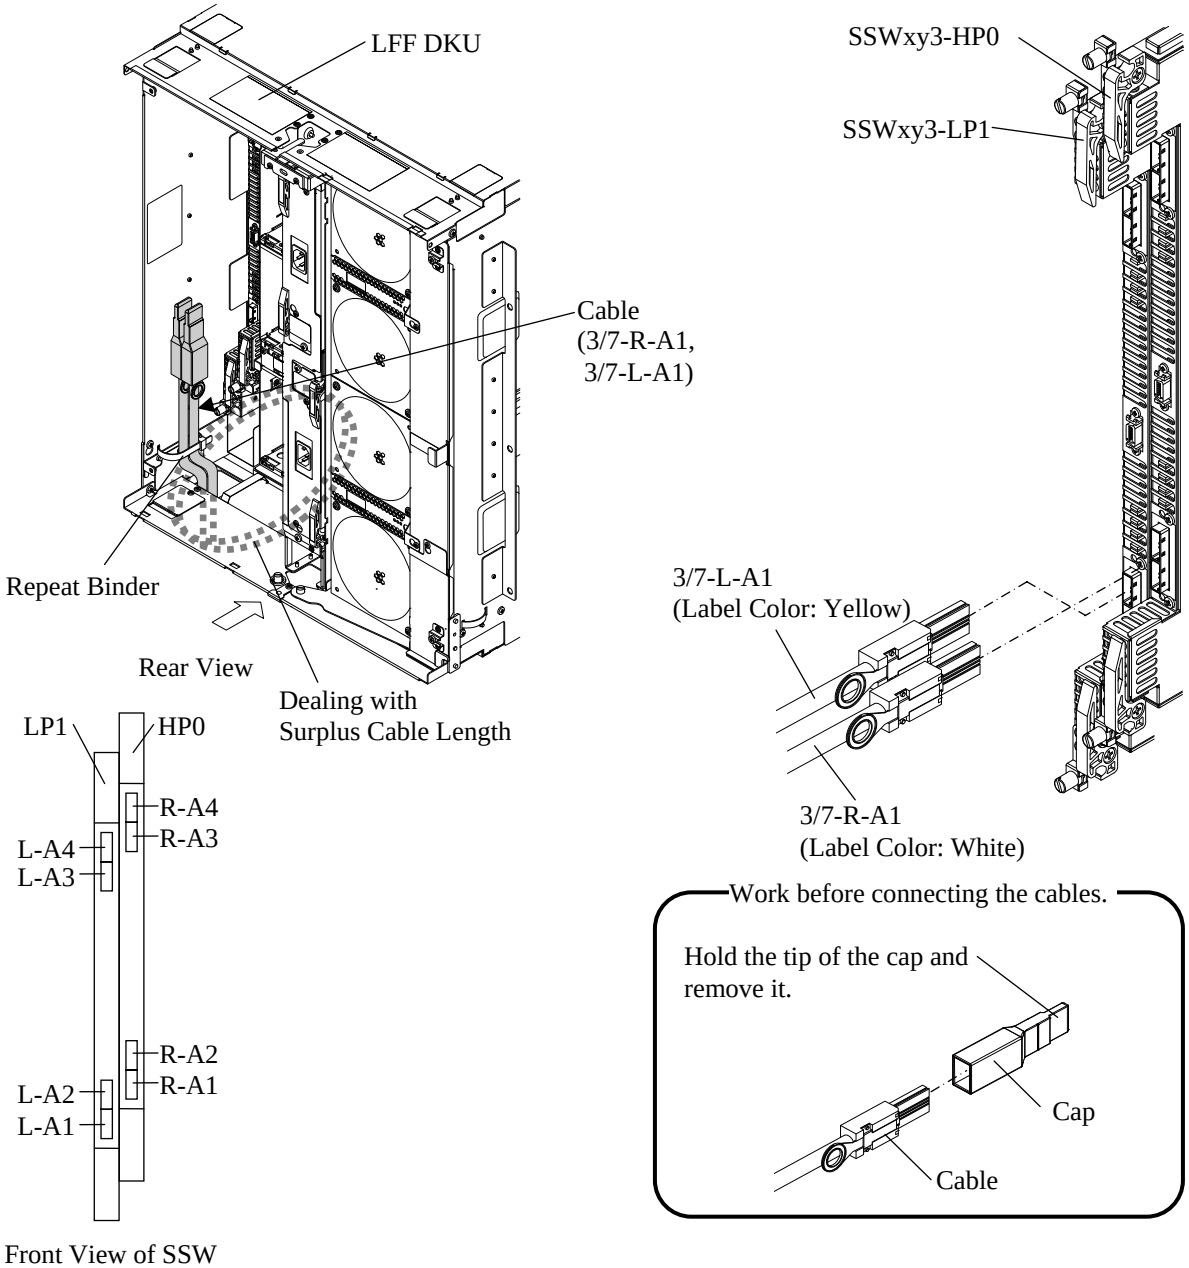

Fig. 3.12.4.16-16 Connection of Cables

h. Remove the caps from the cables. Connect the cables with the SSW PCBs after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

> Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

i Loop the surplus cable length, bind it with the clamp tapes, and put it into the space between the bottom of the SFF DKU and the bottom of the rack.

j. Close the FAN door of the rear left side of the connection destination DKU, and tighten the two screws.

The Case that Connection Source Is LFF DKU/SFF DKU and Connection Destination Is FBX DKU

1. Pattern of Cable Connection

   There are four kinds of patterns that the connections source is the LFF DKU/SFF DKU and the connection destination is the FBX DKU when the Device Interface Cable UFEX (DKC-F710I-UFEXC) is installed into the rack.

   In this procedure, the output side of the Device Interface Cable is defined as a Connection Source, and the RACK is called a Connection Source RACK, and the DKU is called a Connection Source DKU. Moreover, the input side of the Device Interface Cable is defined as a Connection Destination, and the RACK is called a Connection Destination RACK, and the DKU is called a Connection Destination DKU.

   Before starting operation according to this procedure, understand each process name and the position.

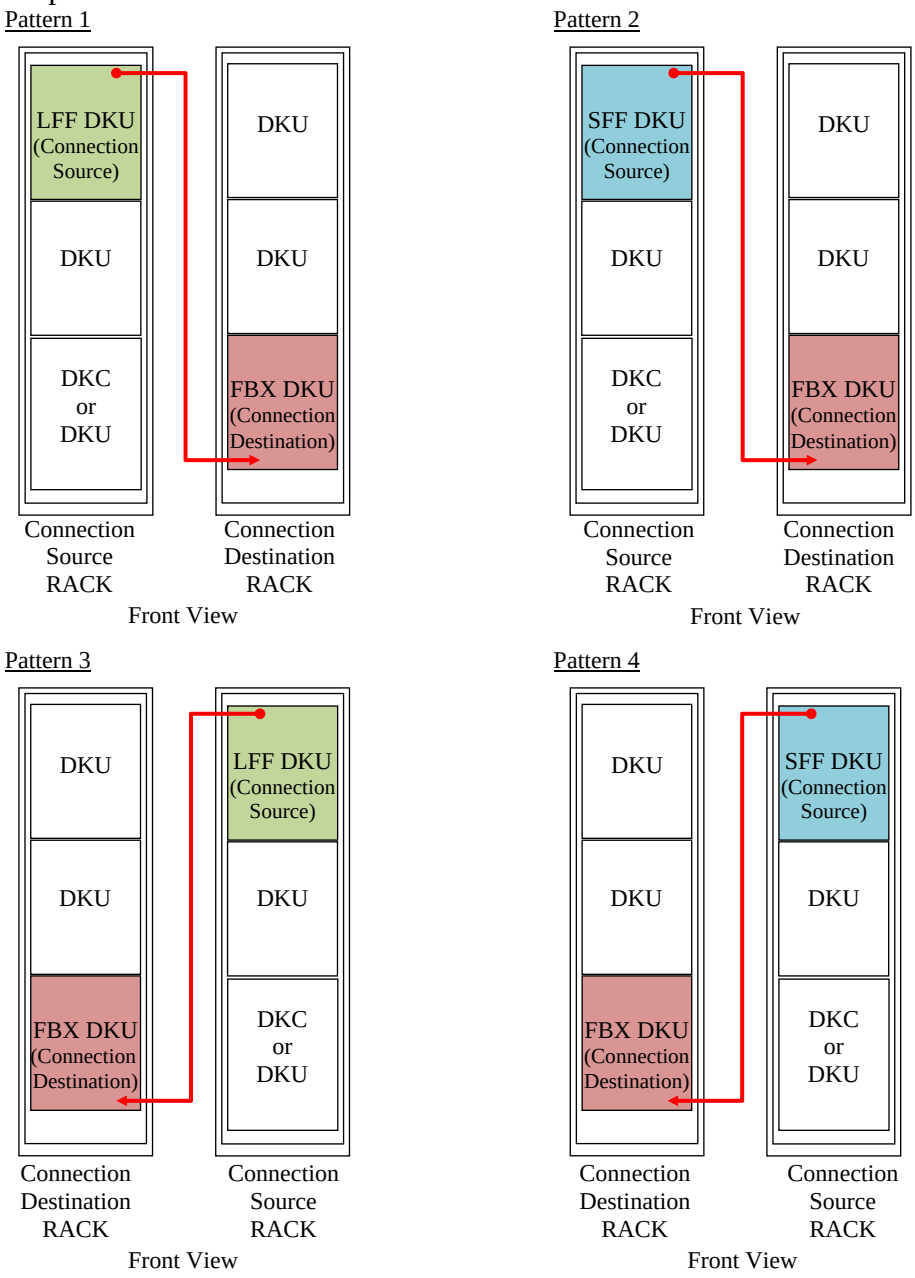

Fig. 3.12.4.16-36 Pattern of Cable Connection

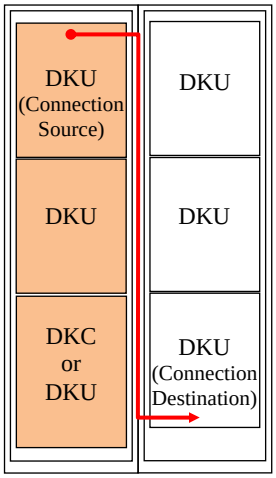
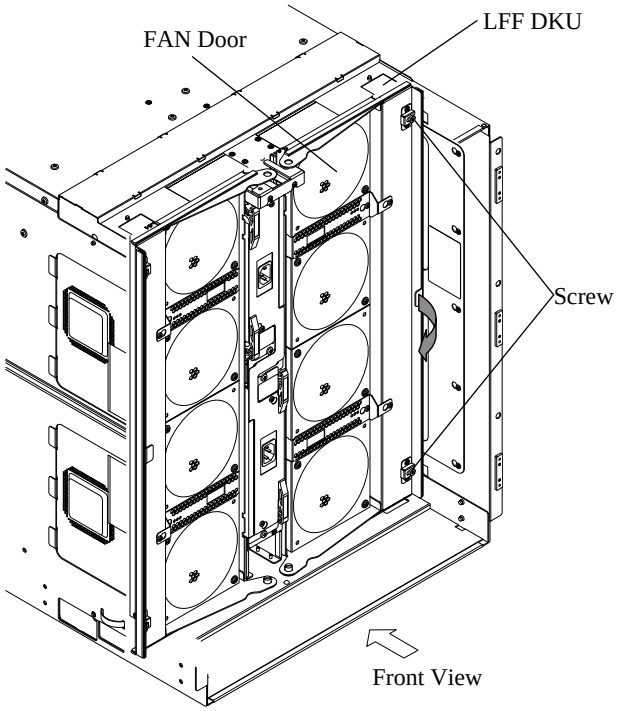
2. Removing the Plate of the Front of the Connection Source DKU

2-1 Cable Installation on the Right Side of the Connection Source Rack

a. Loosen the screws on the front right side of the DKUs (two screws on each DKU) that are installed in the connection source RACK, and open the FAN doors.





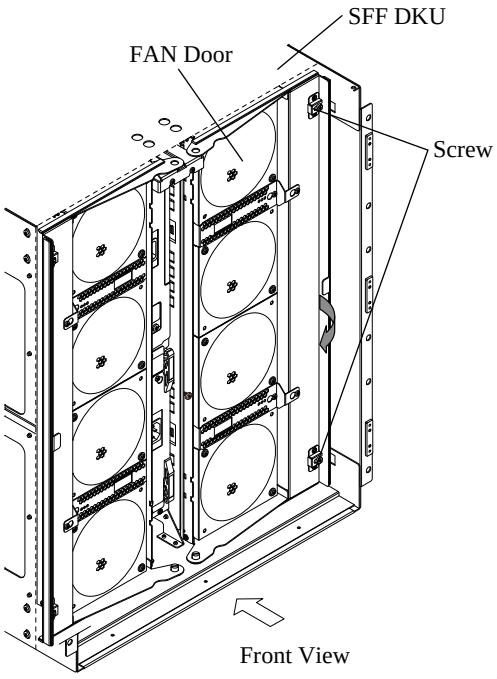


Fig. 3.12.4.16-37 FAN Door Opening

Copyright © 2012, Hitachi, Ltd.

b. Loosen the screws on the front right side of the DKUs (five screws on each DKU) that are installed in the connection source RACK, and remove the plates.

3. Cable Installation of the front side of the Connection Source DKU

3-1 Cable Installation on the Right Side of the Connection Source Rack

When the Connection Source DKU is the LFF DKU

a. Remove the two hangers from the front right side of the Connection Source DKU.
b. Insert the cables (1/5-R-A3 and 1/5-L-A3) into the clearance in the upper part of the DKUPS.
c. Wire the cables (0/4-R-A3 and 0/4-L-A3). However, do not connect the cables with the SSW PCBs at this stage.
d. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws. (Refer to the Fig. 3.12.4.16-37.)

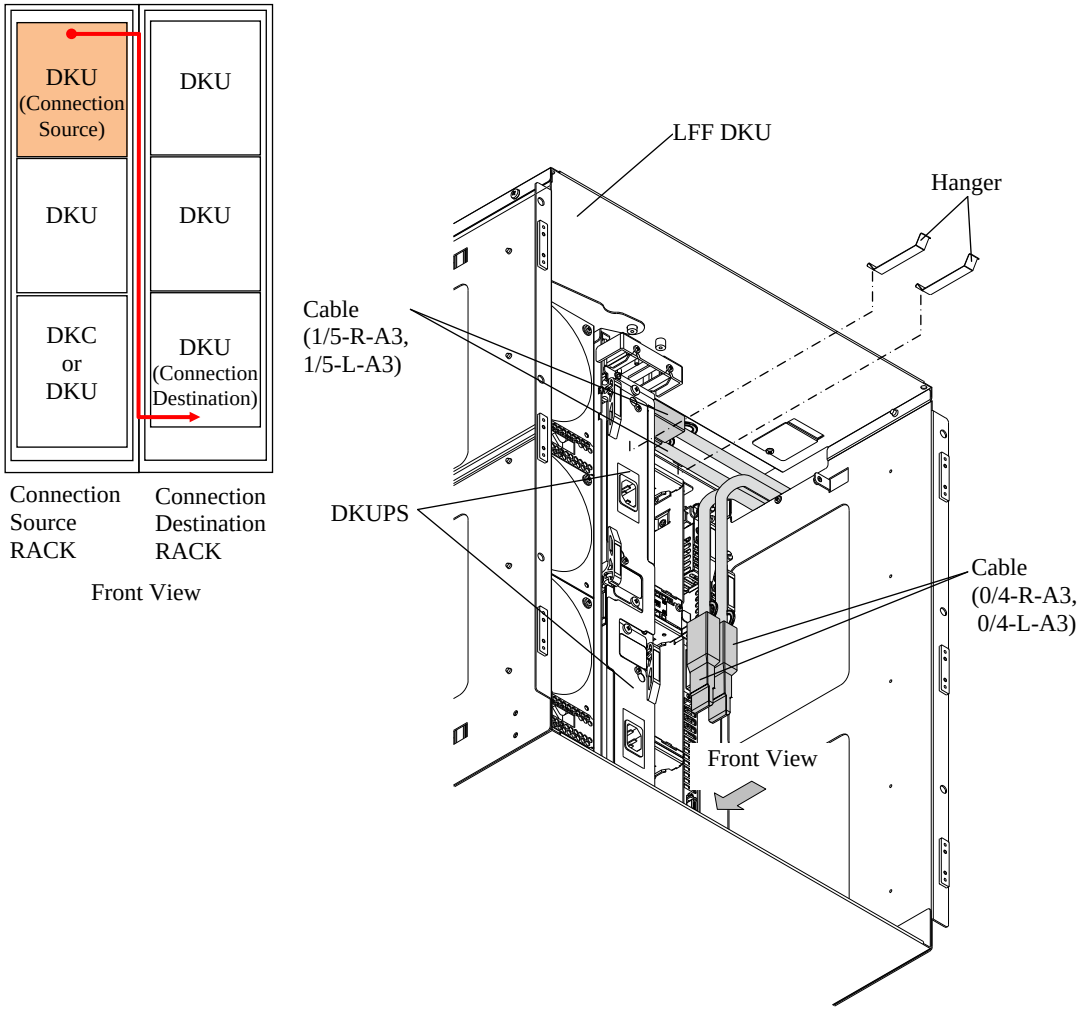

Fig. 3.12.4.16-49 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

e. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.16-40.)
f. Remove the two hangers.
g. Reach into the entry points of the right side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCBs at this stage.
h. Install the two hangers.
i. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws.

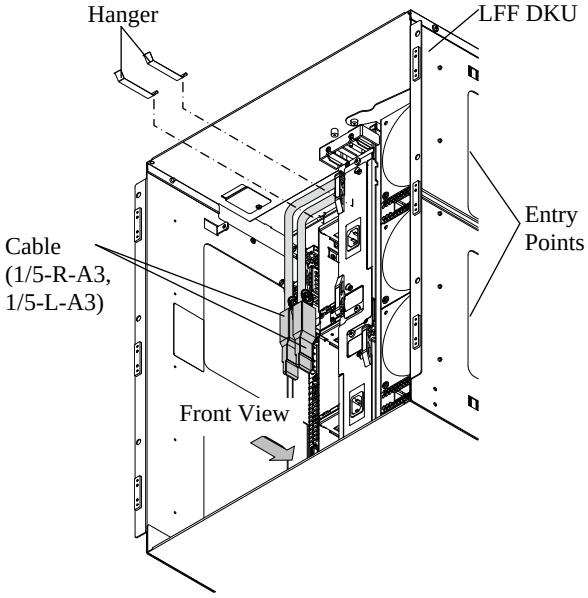

Fig. 3.12.4.16-50 Attachment of Cables

j. Loosen the two screws of front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.16-37.)
k. Install the two hangers, and fix the cables.

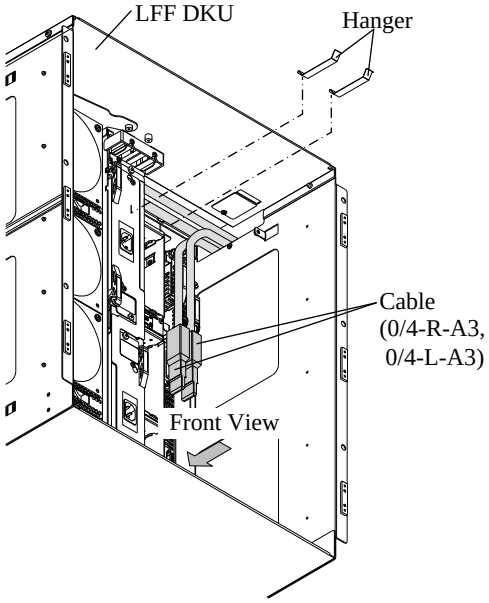

Fig. 3.12.4.16-51 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

When the Connection Source DKU is the SFF DKU

a. Insert the cables (1/5-R-A3 and 1/5-L-A3) into the clearance of the upper part of the DKUPS of the front right side of the connection source DKU.
b. Wire the cables (0/4-R-A3 and 0/4-L-A3). However, do not connect the cables with the SSW PCBs at this stage.
c. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.16-37.)

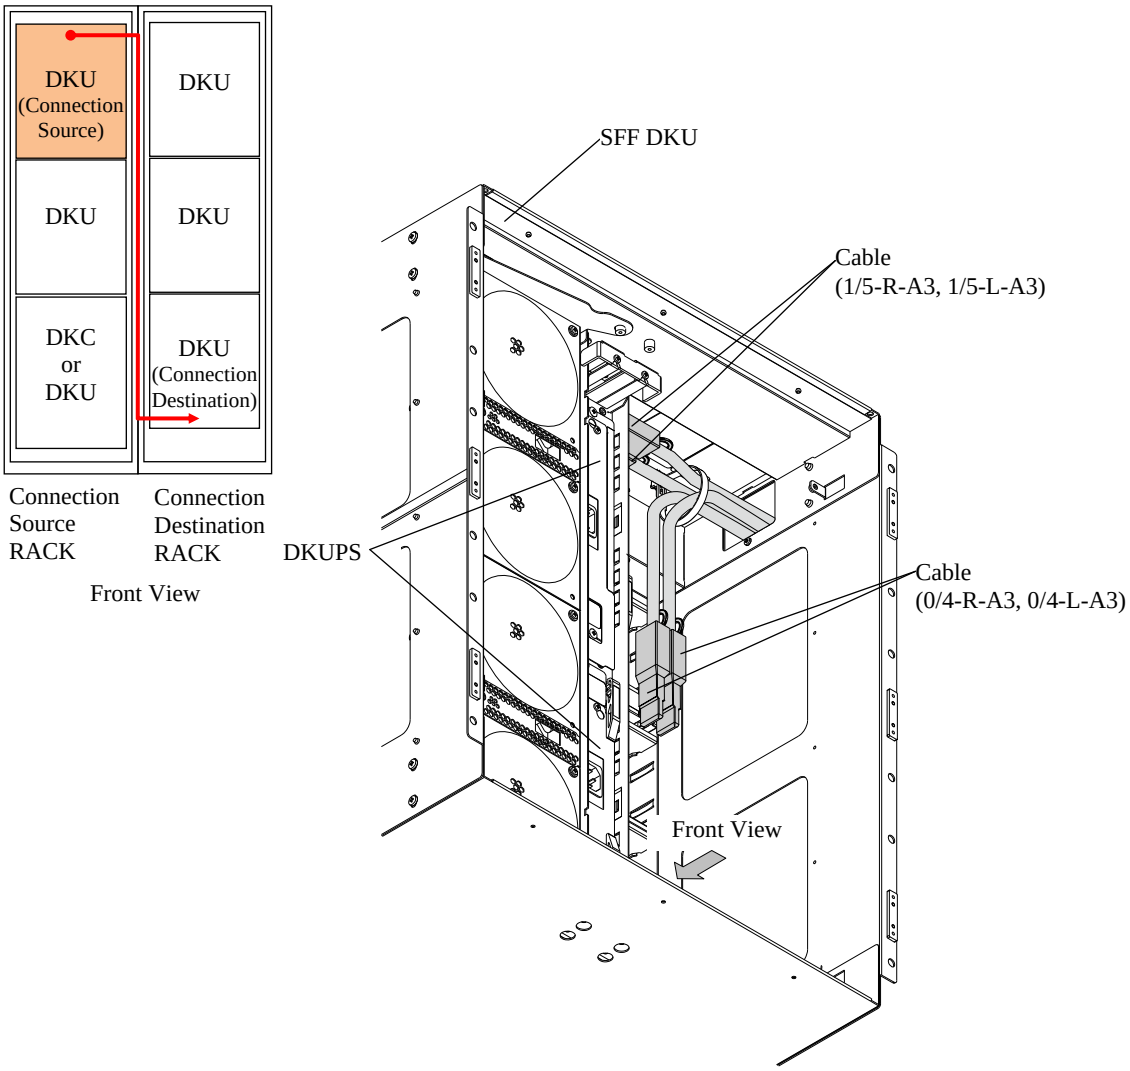

Fig. 3.12.4.16-52 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

d. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.16-40.)
e. Reach into the entry points of the right side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCBs at this stage.
f. Bundle the cables with the clamp tape.
g. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws.

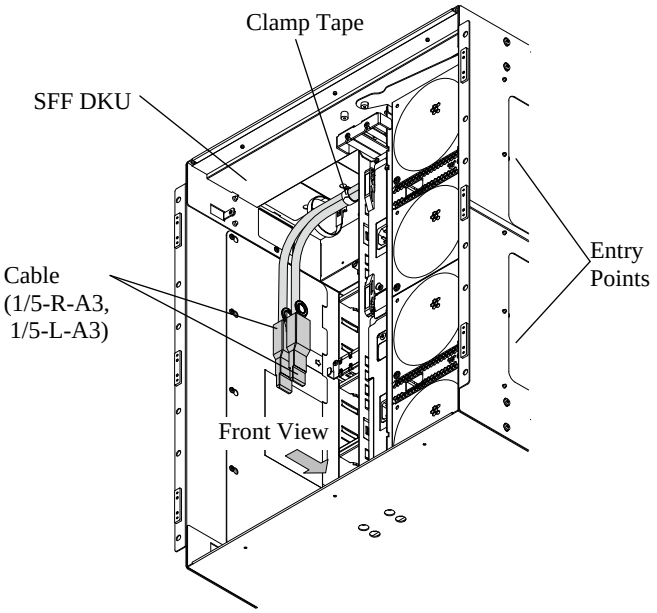

Fig. 3.12.4.16-53 Attachment of Cables

h. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.16-37.)
i. Fix the four cables with the repeat binder.

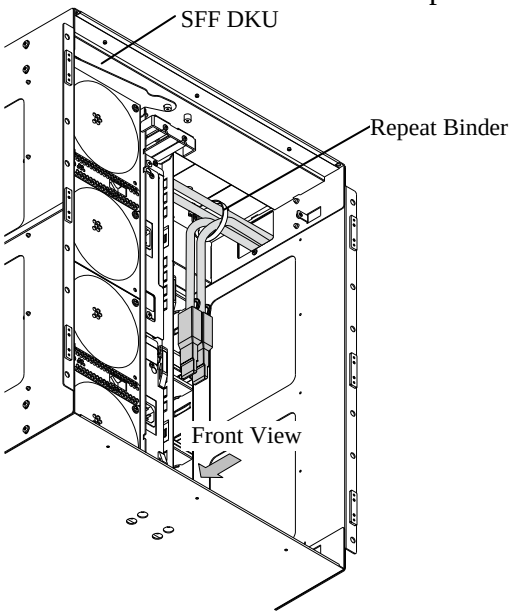

Fig. 3.12.4.16-54 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

3-2 Cable Installation on the Left Side of the Connection Source Rack

When the Connection Source DKU is the LFF DKU

a. Remove the two hangers from the front left side of the connection source DKU.
b. Insert the cables (0/4-R-A3 and 0/4-L-A3) in the clearance of the upper part of the DKUPS.
c. Wire the cables (1/5-R-A3 and 1/5-L-A3). However, do not connect the cables with the SSW PCBs at this stage.
d. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.16-43.)

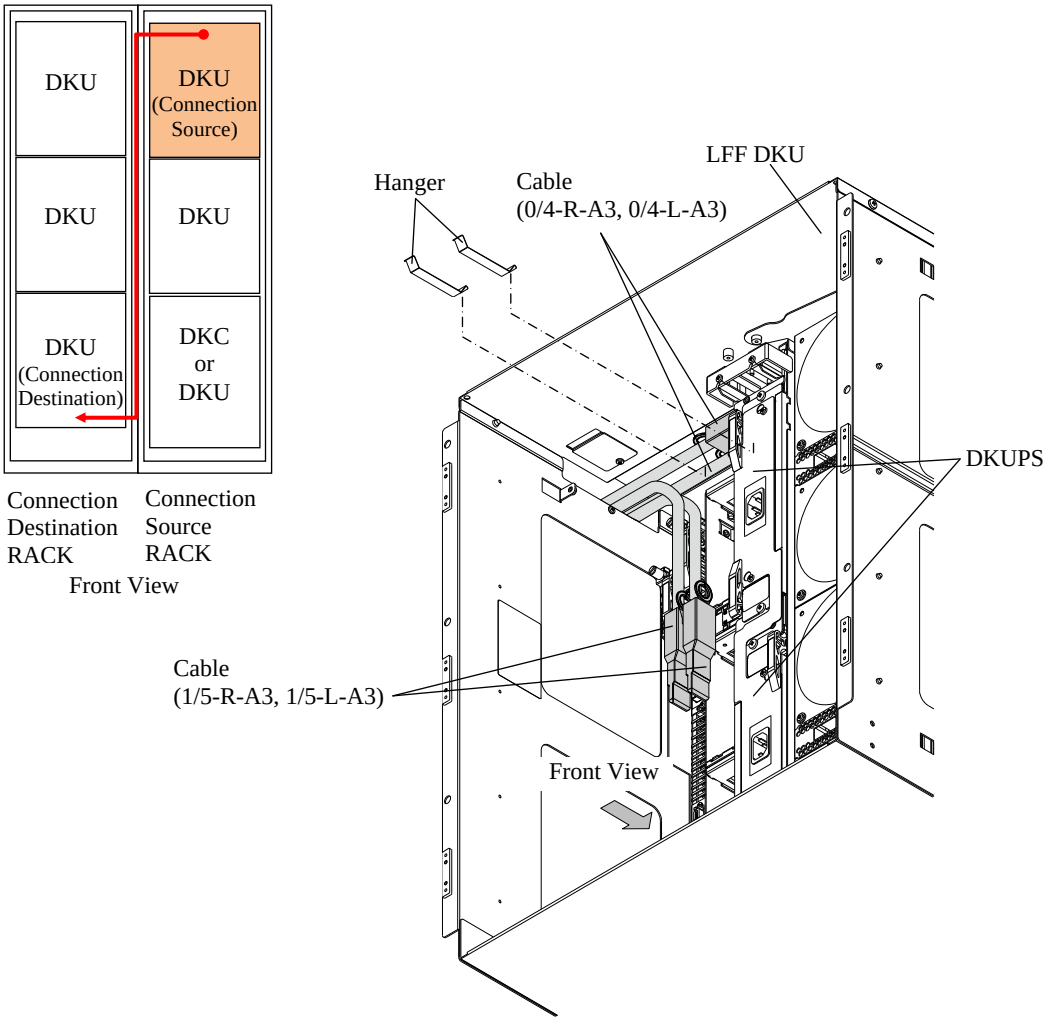

Fig. 3.12.4.16-55 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

e. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.16-46.)
f. Remove the two hangers.
g. Reach into the entry points of the left side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCBs at this stage.
h. Install the two hangers, and fix the cables.
i. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws.

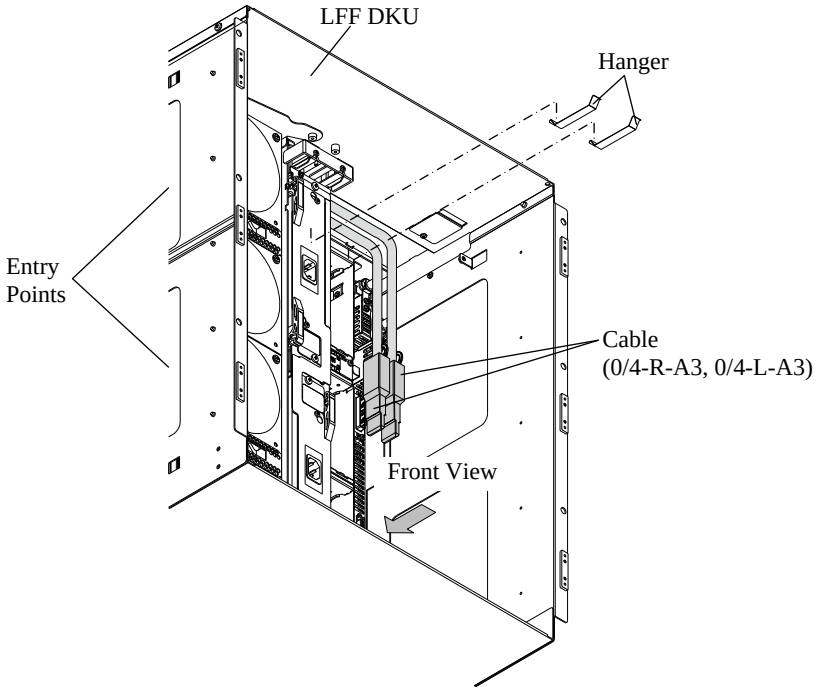

Fig. 3.12.4.16-56 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

j. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.16-43.)
k. Install the two hangers, and fix the cables.

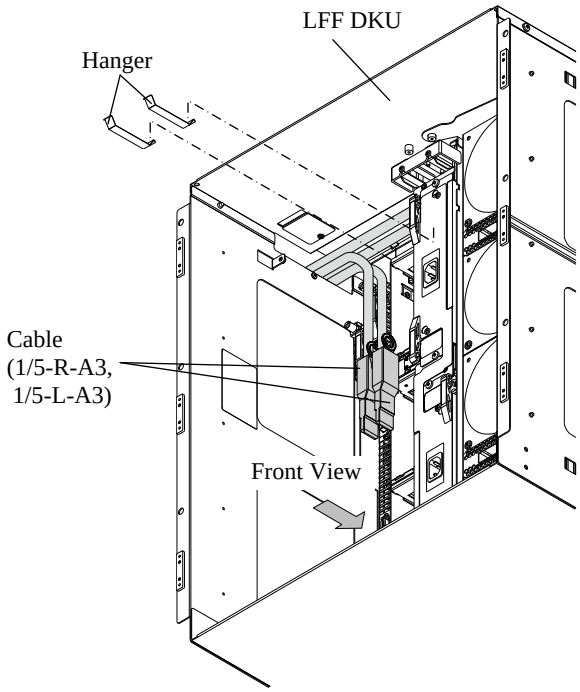

Fig. 3.12.4.16-57 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

When the Connection Source DKU is the SFF DKU

a. Insert the cables (0/4-R-A3 and 0/4-L-A3) into the clearance of the upper part of the DKUPS of the connection source DKU.
b. Wire the cables (1/5-R-A3 and 1/5-L-A3). However, do not connect the cables with the SSW PCBs at this stage.
c. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.16-43.)

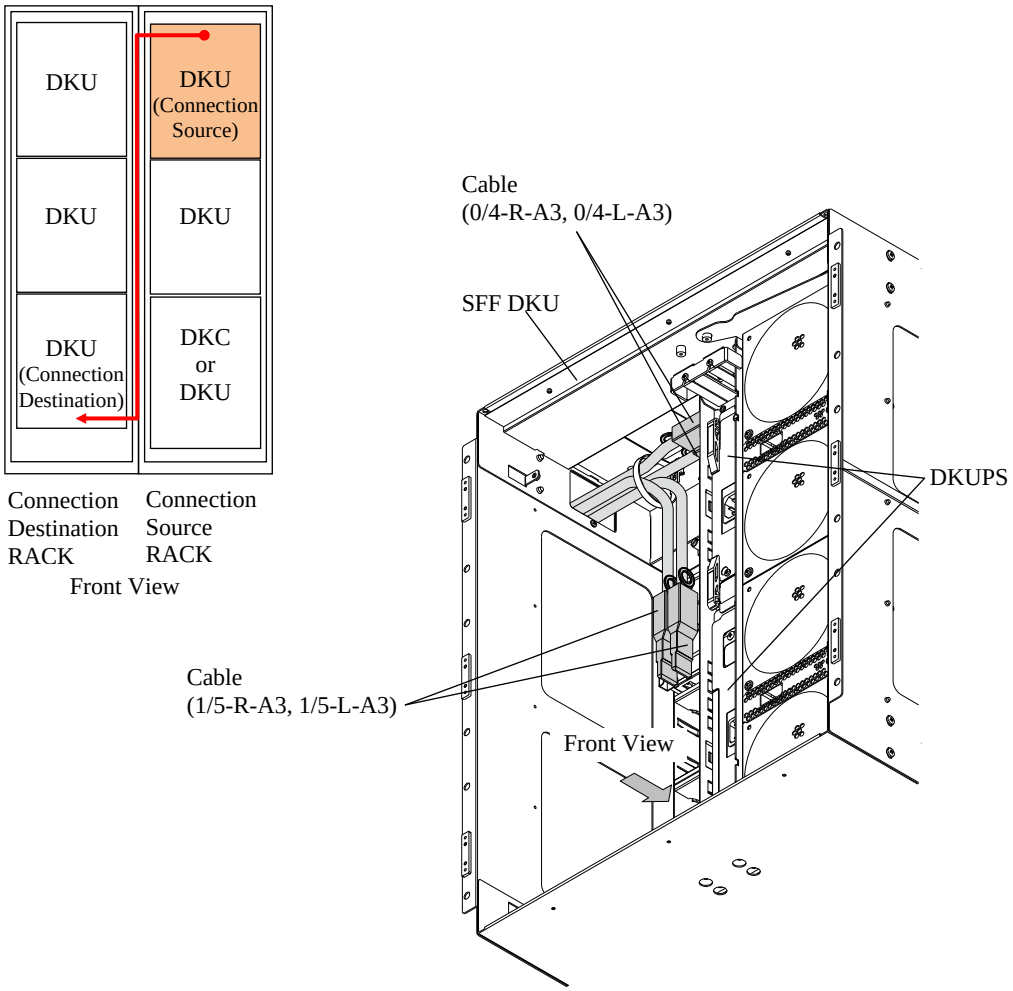

Fig. 3.12.4.16-58 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

d. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.16-46.)
e. Reach into the entry points of the left side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCBs at this stage.
f. Bundle the cables with the clamp tape.
g. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws.

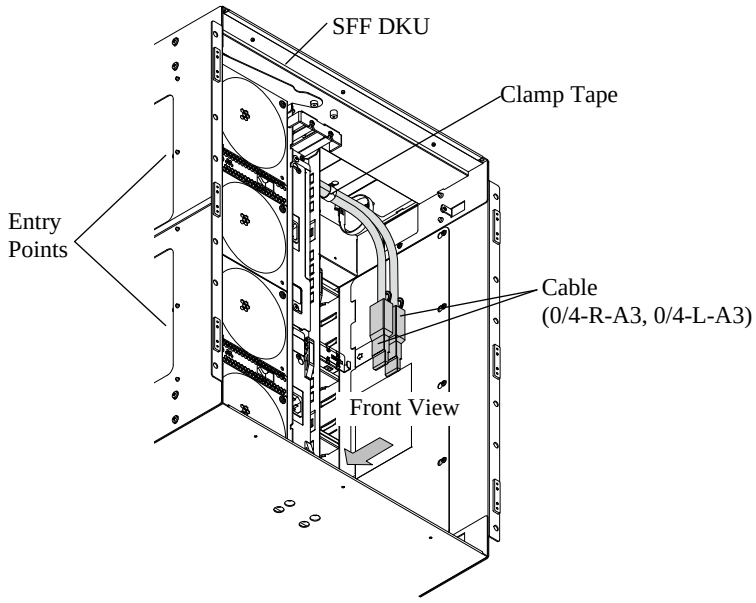

Fig. 3.12.4.16-59 Attachment of Cables

h. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.16-43.)
i. Fix the cables with the repeat binder.

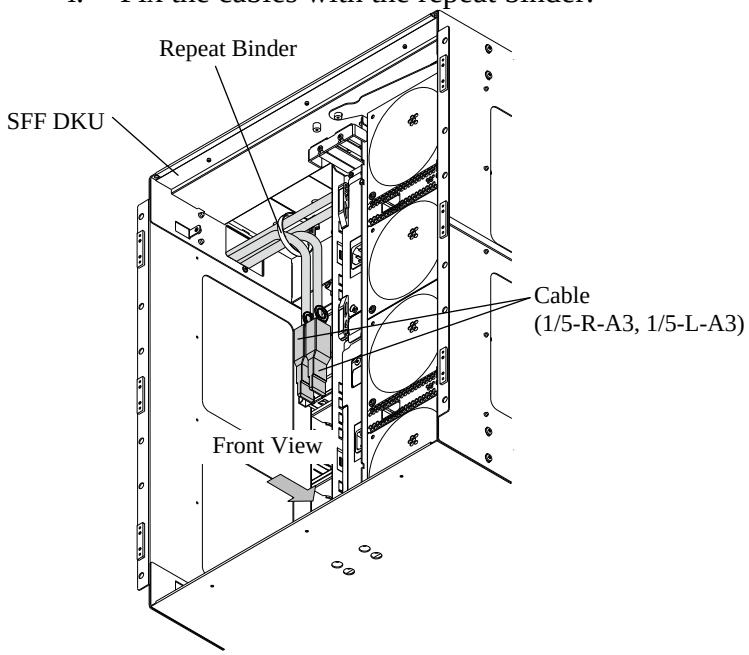

Fig. 3.12.4.16-60 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

4. Fixation of Cables
   a. Fix the four cables with the repeat binder of the connection source RACK side. (Refer to Fig. 3.12.4.16-61 or Fig. 3.12.4.16-62.)

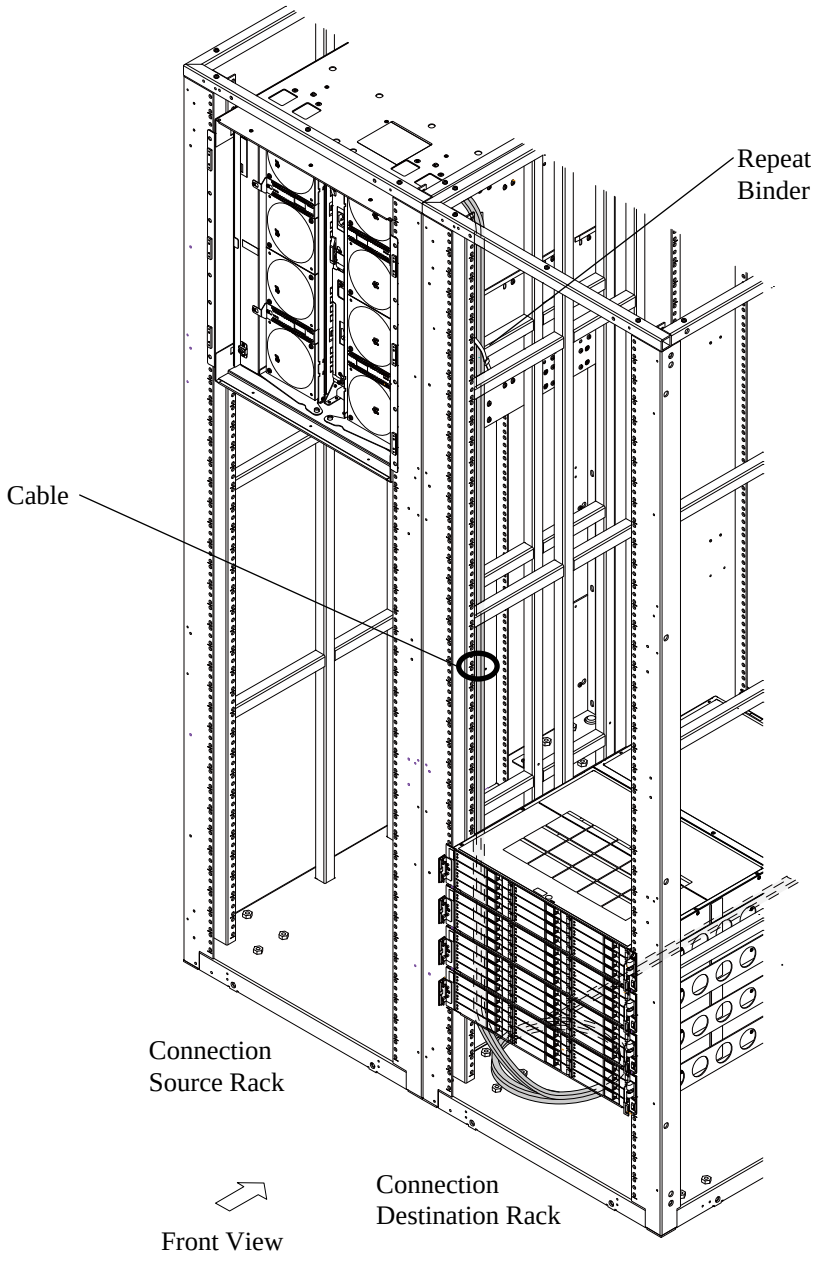

Fig. 3.12.4.16-61 Securing the Cables (Cable Installation on the Right Side of the Connection Source Rack)

5. Installing the Plate

5-1 Cable Installation on the Right Side of the Connection Source Rack

a. Install all removed plates in the front right side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 3.12.4.16-38.)
b. Close all the FAN doors of the front right side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 3.12.4.16-37.)
c. Install all removed plates in the front left side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 3.12.4.16-41.)
d. Close all the FAN doors of the front left side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 3.12.4.16-40.)

5-2 Cable Installation on the Left Side of the Connection Source Rack

a. Install all removed plates in the front right side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 3.12.4.16-47.)
b. Close all the FAN doors of the front right side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 3.12.4.16-46.)
c. Install all removed plates in the front left side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 3.12.4.16-44.)
d. Close all the FAN doors of the front left side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 3.12.4.16-43.)

Copyright © 2012, Hitachi, Ltd.

6. Removing the Cover of the Rear of the Connection Source DKU

6-1 Cable Installation on the Right Side of the Connection Source Rack

a. Loosen the screws of the rear left side of the connection source DKU, and open the FAN door.

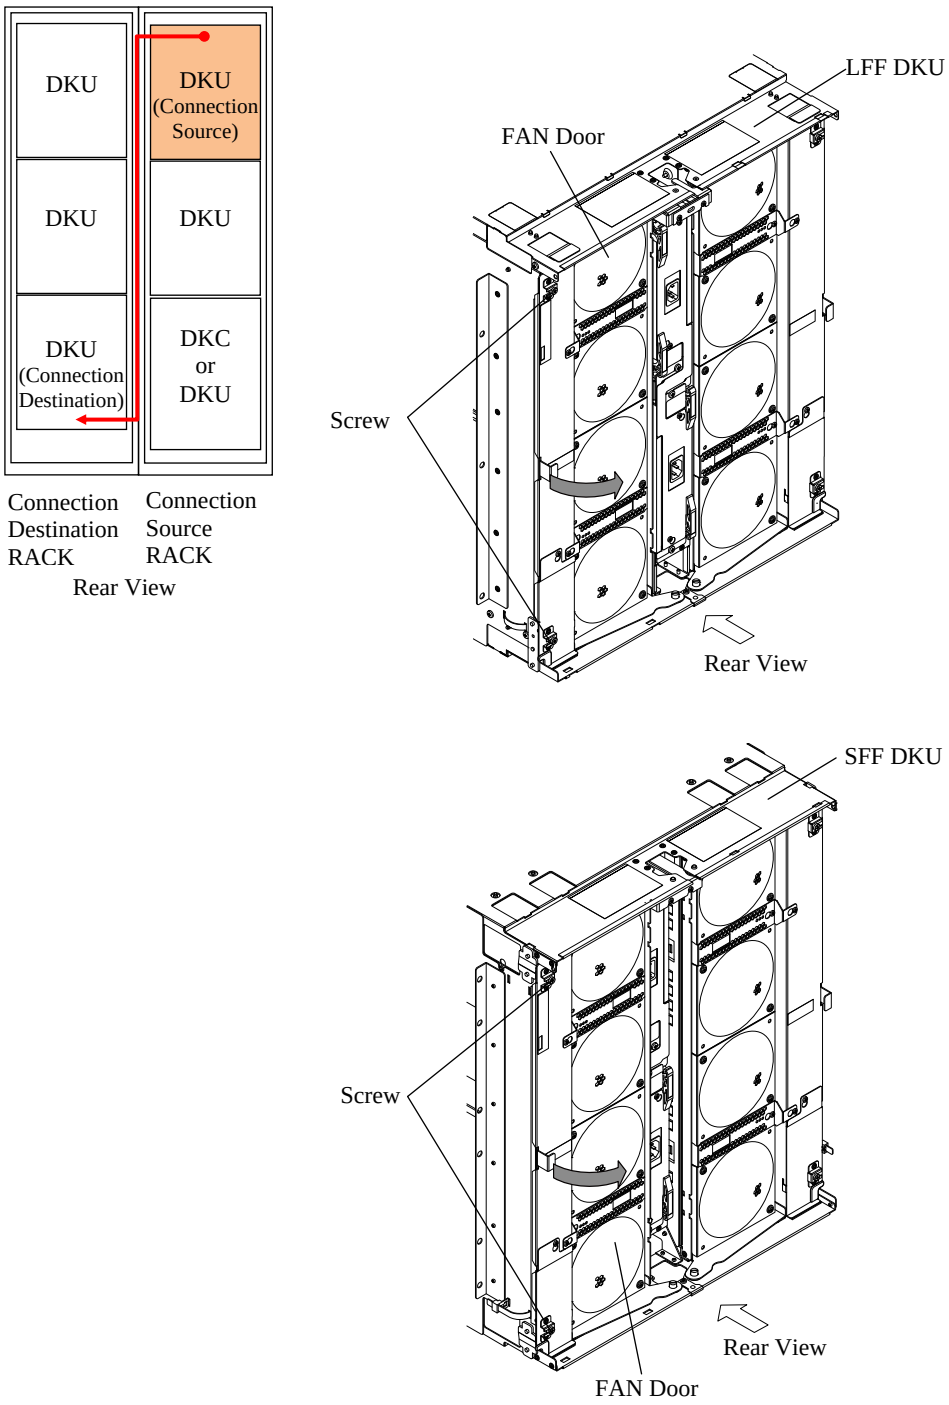

Fig. 3.12.4.16-63 FAN Door Opening

Copyright © 2012, Hitachi, Ltd.

b. Loosen the screws of the rear left side of the connection source DKU, and remove the cover(s). (In the case of the LFF DKU, the number of the cover is one cover while that of the SFF DKU is two covers.)

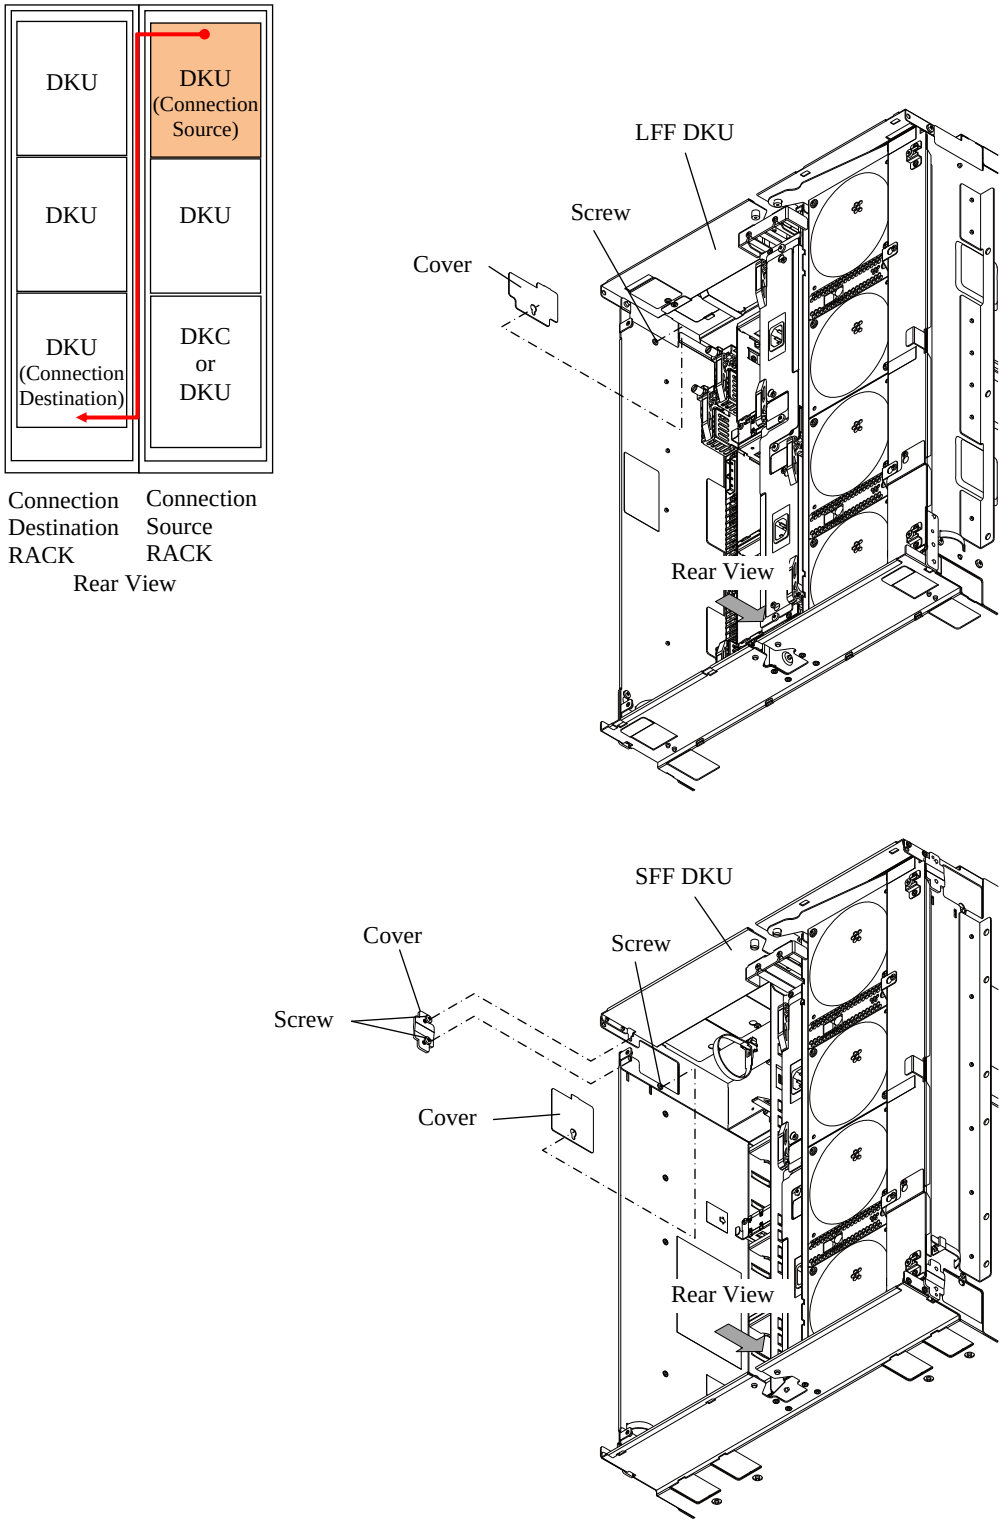

Fig. 3.12.4.16-64 Removal of Covers

Copyright © 2012, Hitachi, Ltd.

c. Wire the cables from the upper part to the lower part of the rear side of the RACK.
d. Pull the wired cables in from the rear left side of the connection source DKU.

7. Cable Installation of the Rear Side of the Connection Source DKU

7-1 Cable Installation on the Right Side of the Connection Source Rack

When the Connection Source DKU is the LFF DKU

a. Remove the two hangers from the rear left side of the connection source DKU.
b. Insert the cables (2/6-R-A3 and 2/6-L-A3) in the clearance of the upper part of the DKUPS.
c. Wire the cables (3/7-R-A3 and 3/7-L-A3). However, do not connect the cables with SSW PCBs at this stage.
d. Close the FAN door of the rear left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.16-63.)

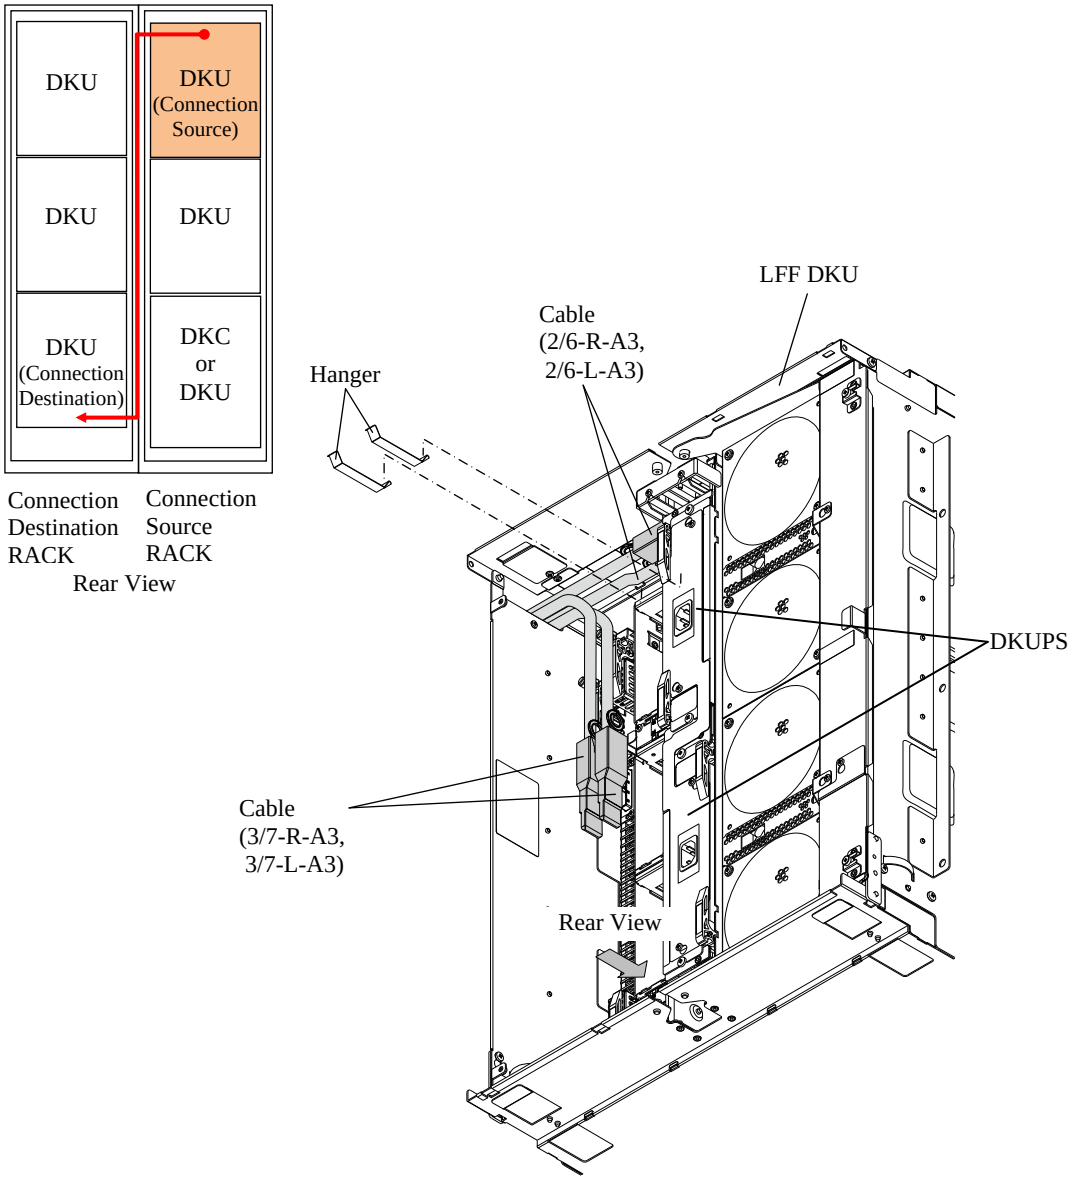

Fig. 3.12.4.16-69 Attachment of Cables

9. Cable Installation of the Connection Destination FBX DKU
   a. Fit rack nuts to the rear side of the rack frame (at eight places in total at right and left).

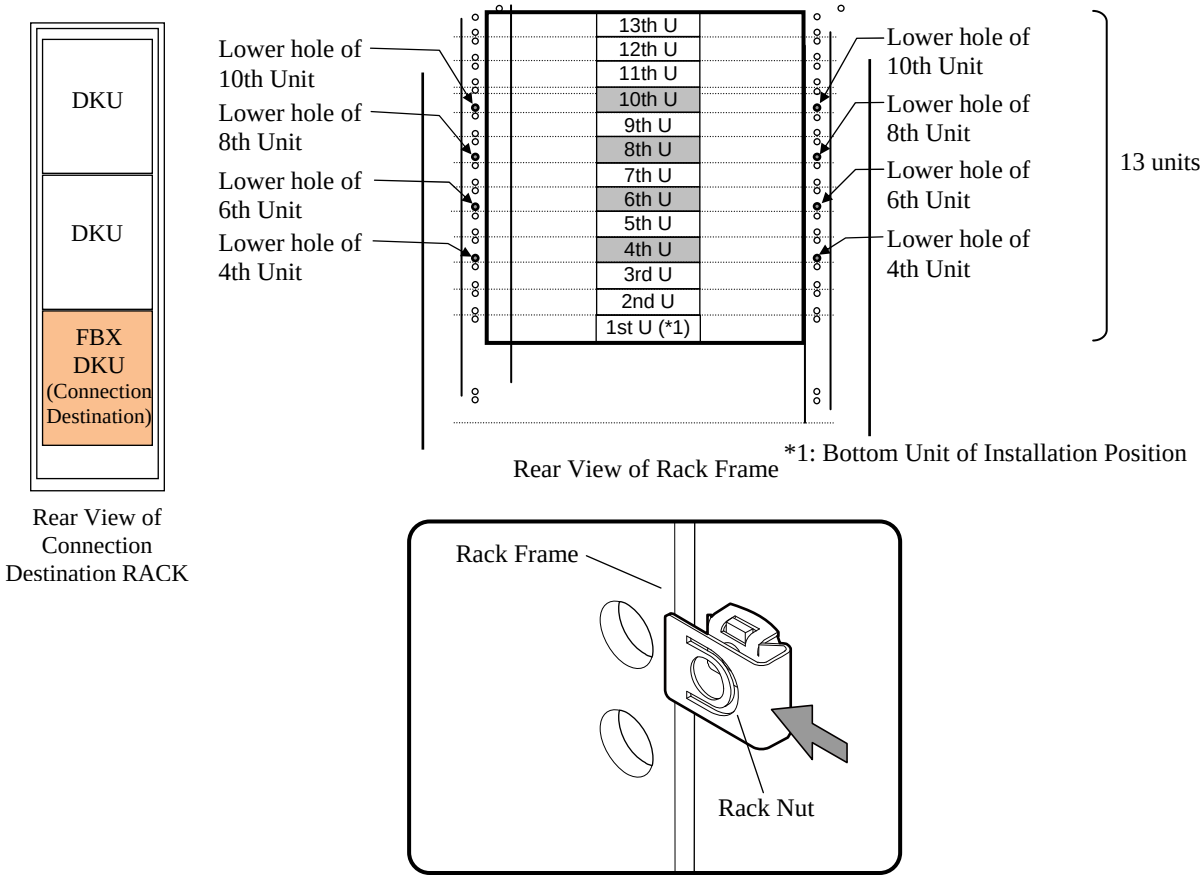

Fig. 3.12.4.16-89 Installing Rack Nuts

Copyright © 2012, Hitachi, Ltd.

b. Attach the clamp tape (8 in total) to the cleat (8 in total). (Refer to Fig. 3.12.4.16-85.)
c. Install eight clamp tapes to the rear side of the rack frame and fasten them with a WA socket bolt.

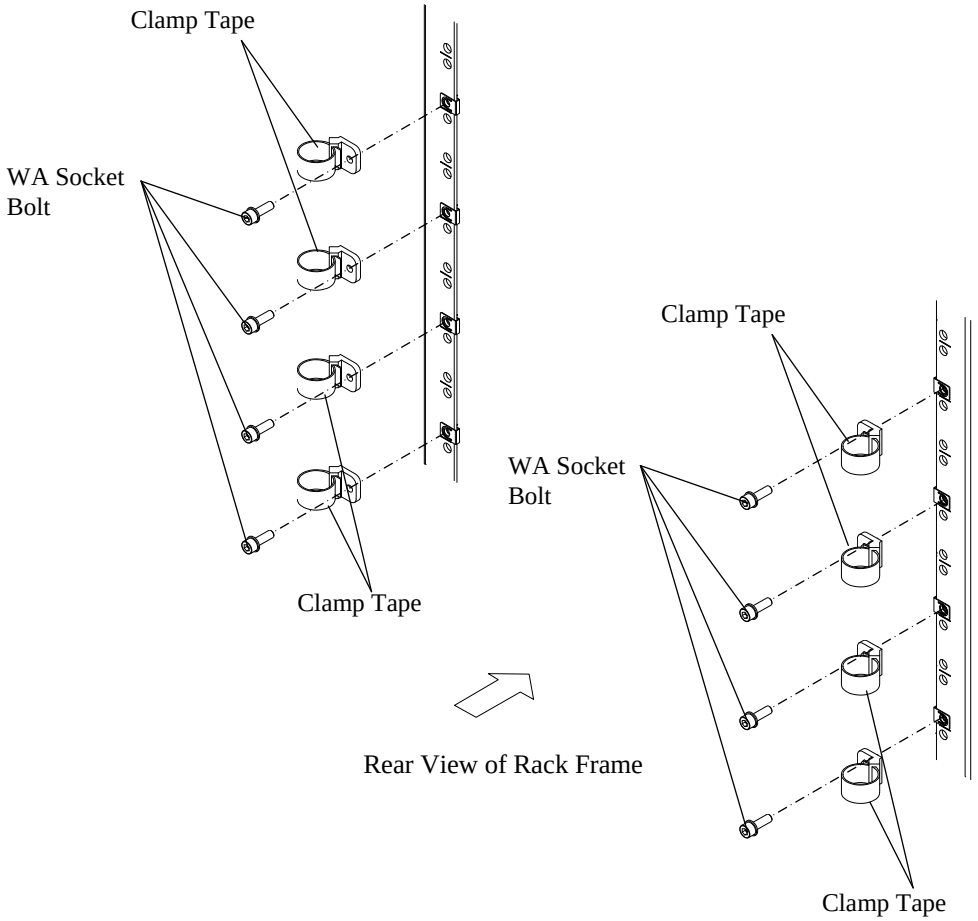

Fig. 3.12.4.16-90 Installing Clamp Tapes

Copyright © 2012, Hitachi, Ltd.

d. Install cables and fasten them with eight clamp tapes.

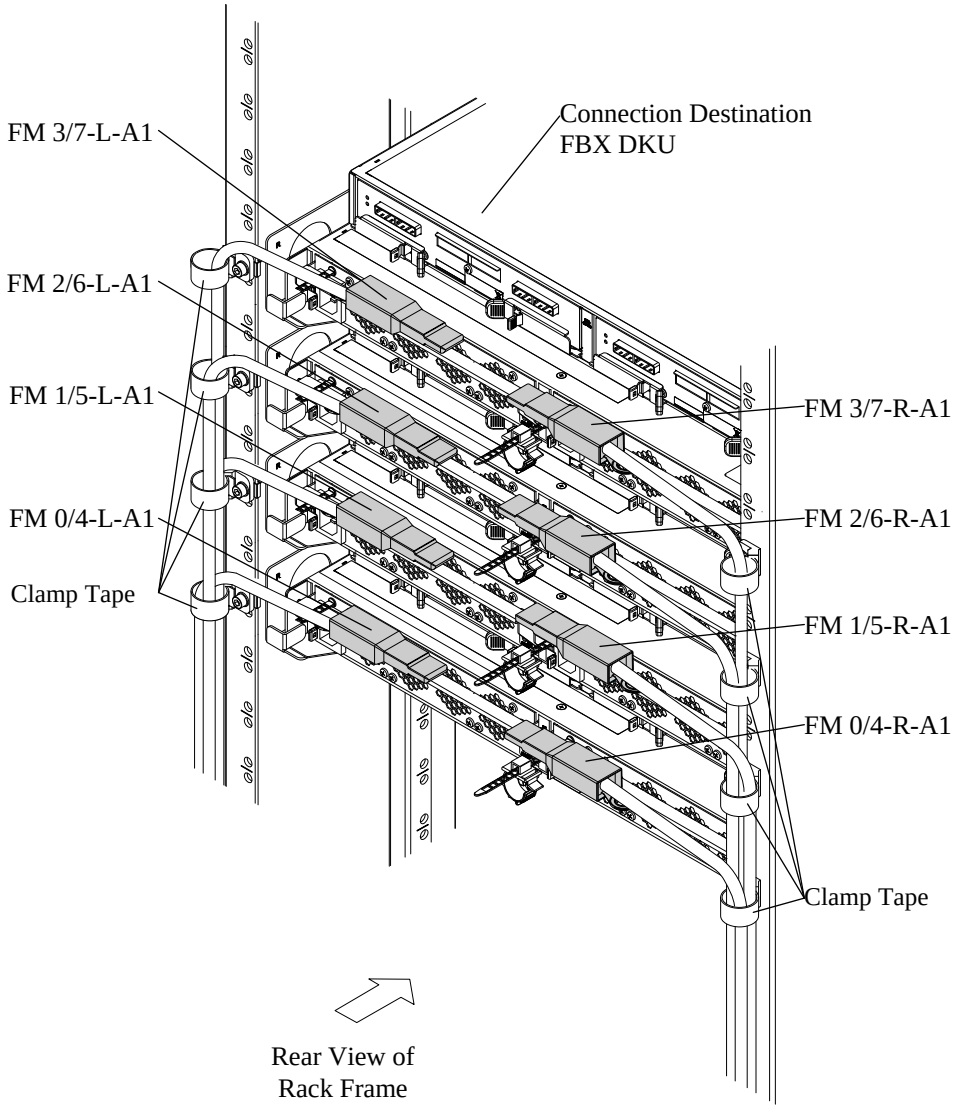

Fig. 3.12.4.16-91 Installing Cables

Copyright © 2012, Hitachi, Ltd.

e. Remove the caps from the cables.
f. Connect the cables with the SSW PCBs of the connection destination DKU after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

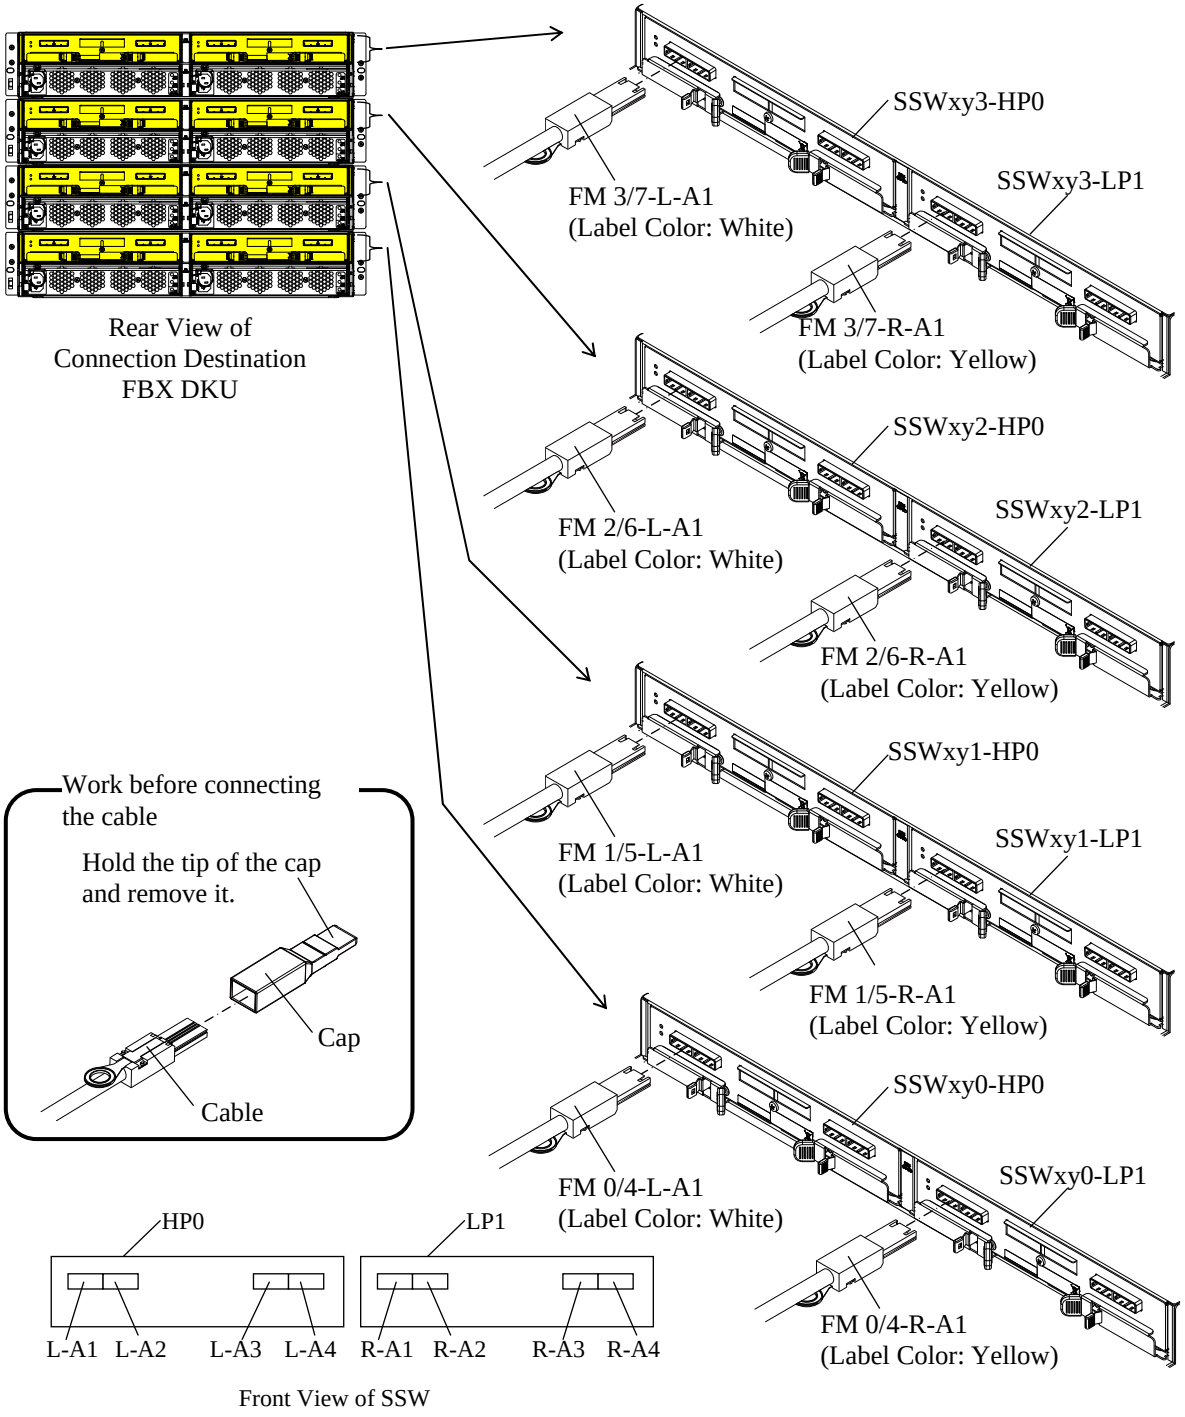

Fig. 3.12.4.16-92 Connection of Cables

3.12.4.17 Installation Procedure of Device Interface Cable HUFEX (DKC-F710I-HUFEXC)

Installation Condition

DKC-F710I-HUFEXC is a cable option for the high performance model to connect FBX DKU with LFF DKU/SFF DKU between two racks.
Refer to below Table 3.12.4.17-1 for the condition of DKC-F710I-HUFEXC installation, and go to the appropriate page.

Table 3.12.4.17-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable HUFEX (DKC-F710I-HUFEXC) is required to install.	INST03-12C-5110
2	When Device Interface Cable HUFEX (DKC-F710I-HUFEXC) is not required to install.	INST03-12C-5690

The Case that Connection Source Is FBX DKU and Connection Destination Is LFF DKU/SFF DKU

1. Pattern of Cable Connection

There are four kinds of patterns that the connections source is the FBX DKU and the connection destination is the LFF DKU/SFF DKU when the Device Interface Cable HUFEX (DKC-F710I-HUFEXC) is installed into the rack.

For the case that the connection source is the LFF DKU/SFF DKU and the connection destination is the FBX DKU, refer to INST03-12C-5260.

In this procedure, the output side of the Device Interface Cable is defined as a Connection Source, and the RACK is called a Connection Source RACK, and the DKU is called a Connection Source DKU. Moreover, the input side of the Device Interface Cable is defined as a Connection Destination, and the RACK is called a Connection Destination RACK, and the DKU is called a Connection Destination DKU.

Before starting operation according to this procedure, understand each process name and the position.

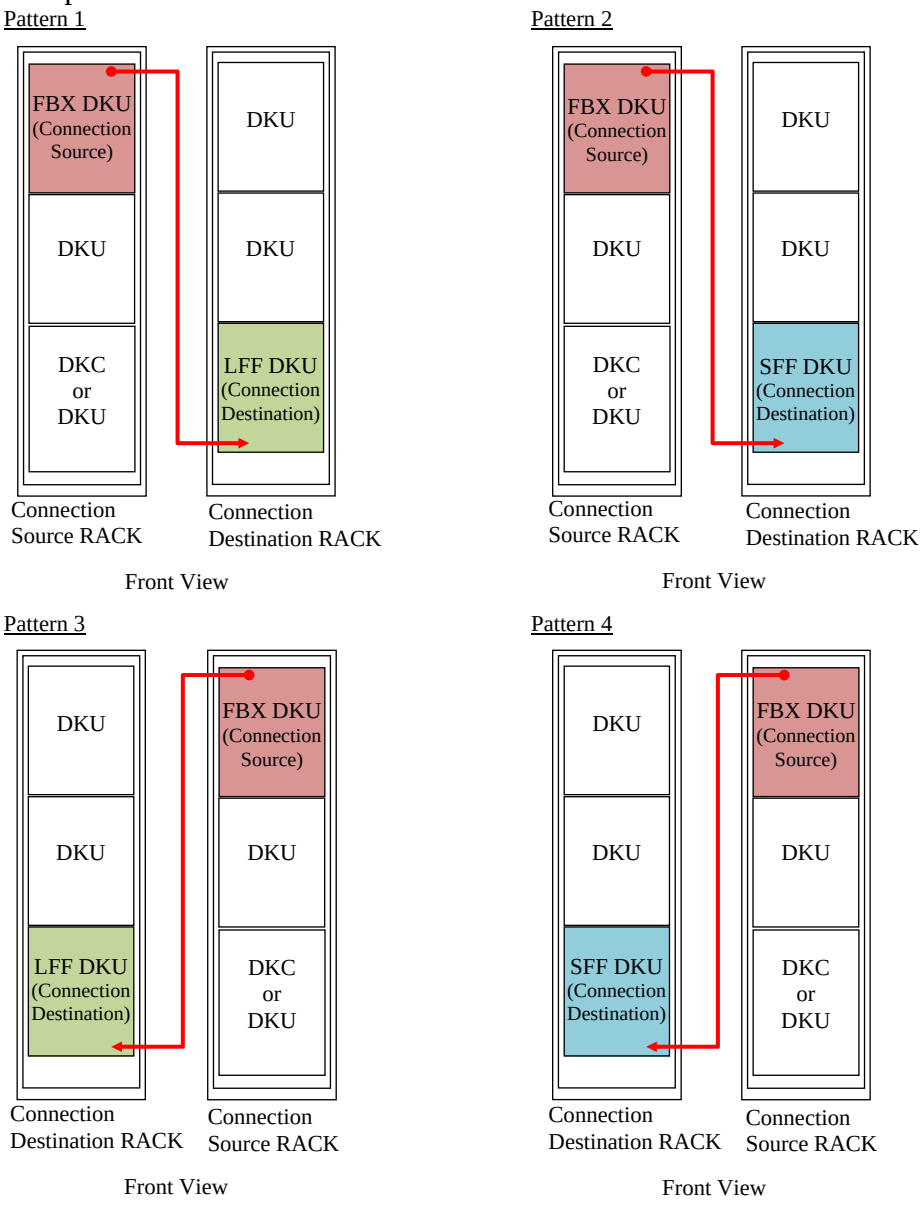

Fig. 3.12.4.17-3 Pattern of Cable Connection

Copyright © 2012, Hitachi, Ltd.

2. Cable Installation of the Rear Side of the Connection Source FBX DKU
   a. Install cables and fasten them with eight clamp tapes.
      However, do not connect cables with SSWs at this stage.

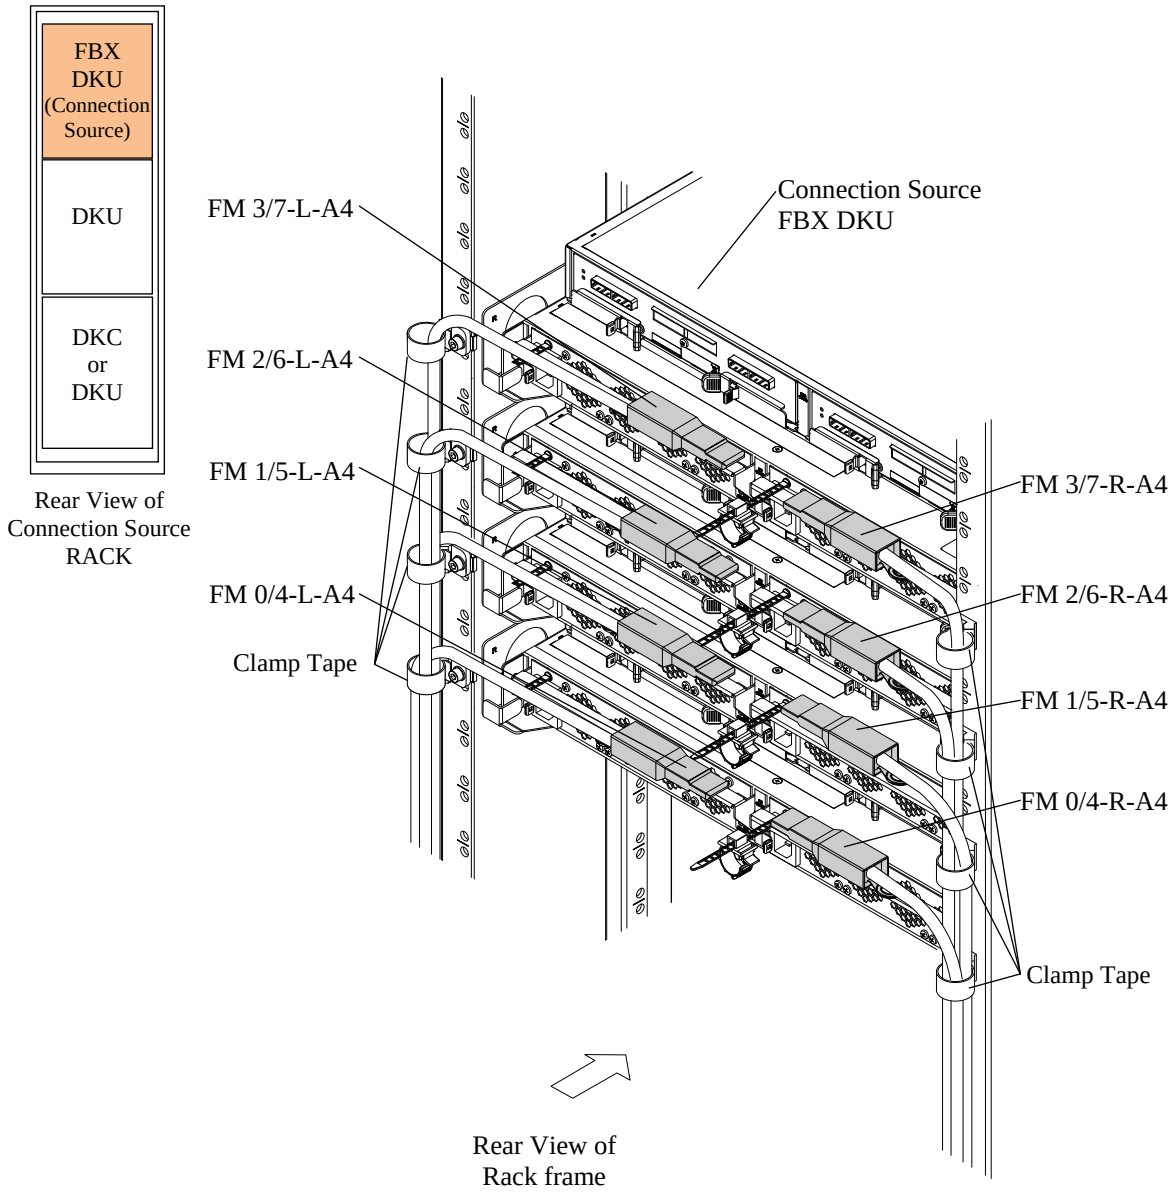

Fig. 3.12.4.17-4 Installing Cables

Copyright © 2012, Hitachi, Ltd.

3. Cable Routing between Racks
   a. Route cables between racks and fasten cables with the clamp tape of an opening of the bottom on the rear side of the connection source rack. Refer to Fig. 3.12.4.17-5 or Fig. 3.12.4.17-6.

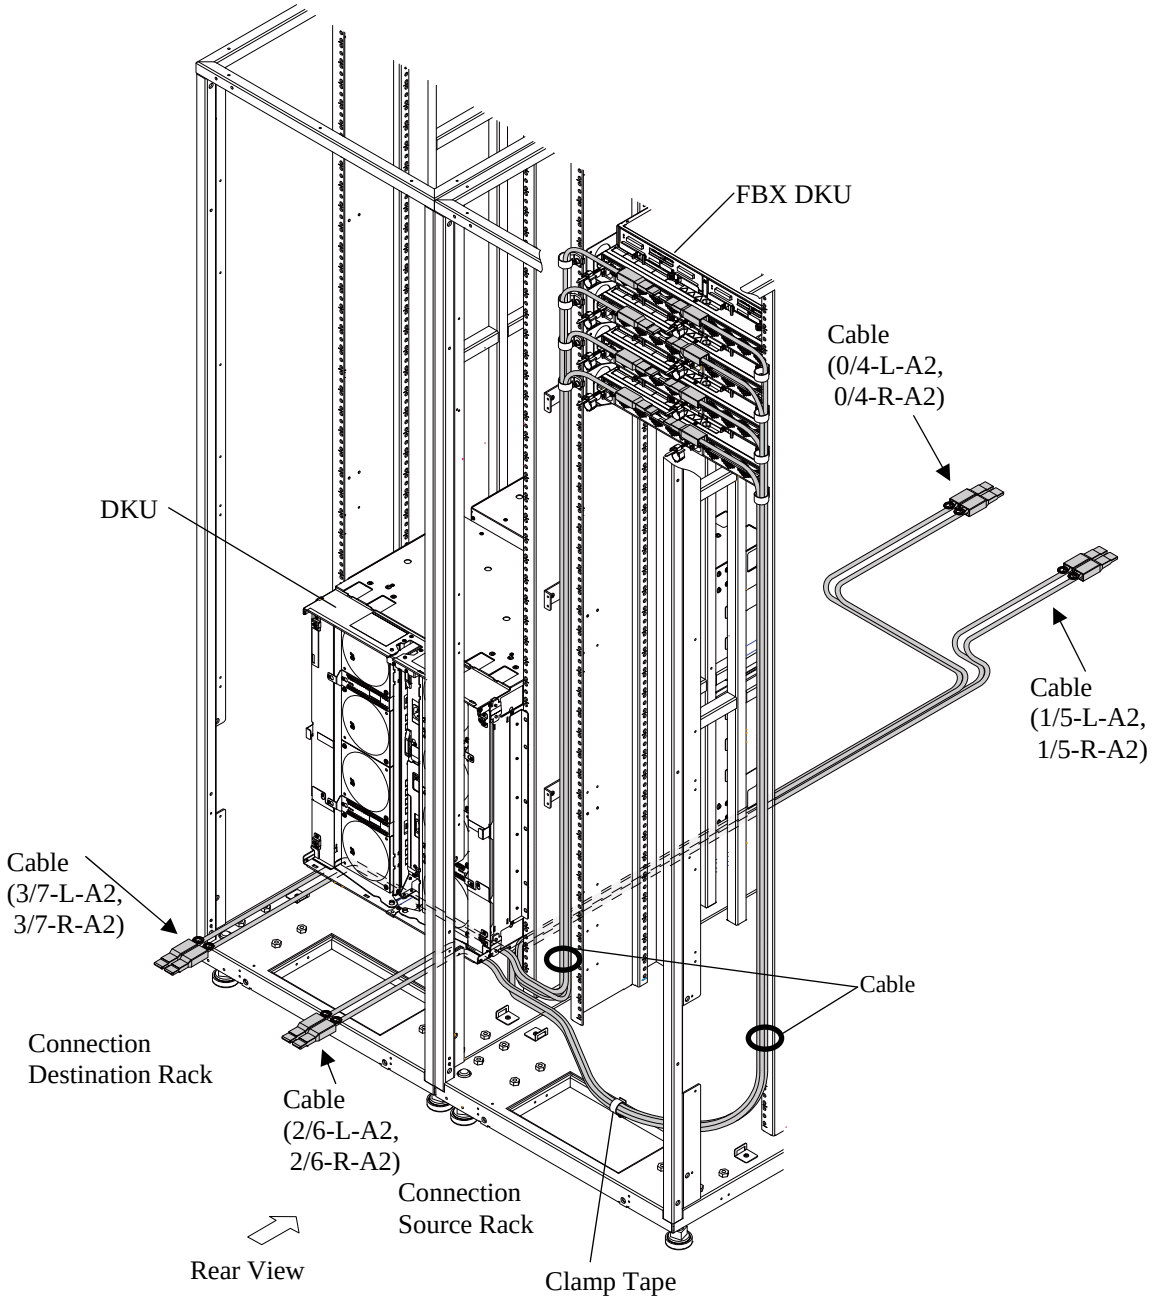

Fig. 3.12.4.17-5 Fixation of Cables (Cable Installation on the Right Side of the Connection Source Rack)

Copyright © 2012, Hitachi, Ltd.

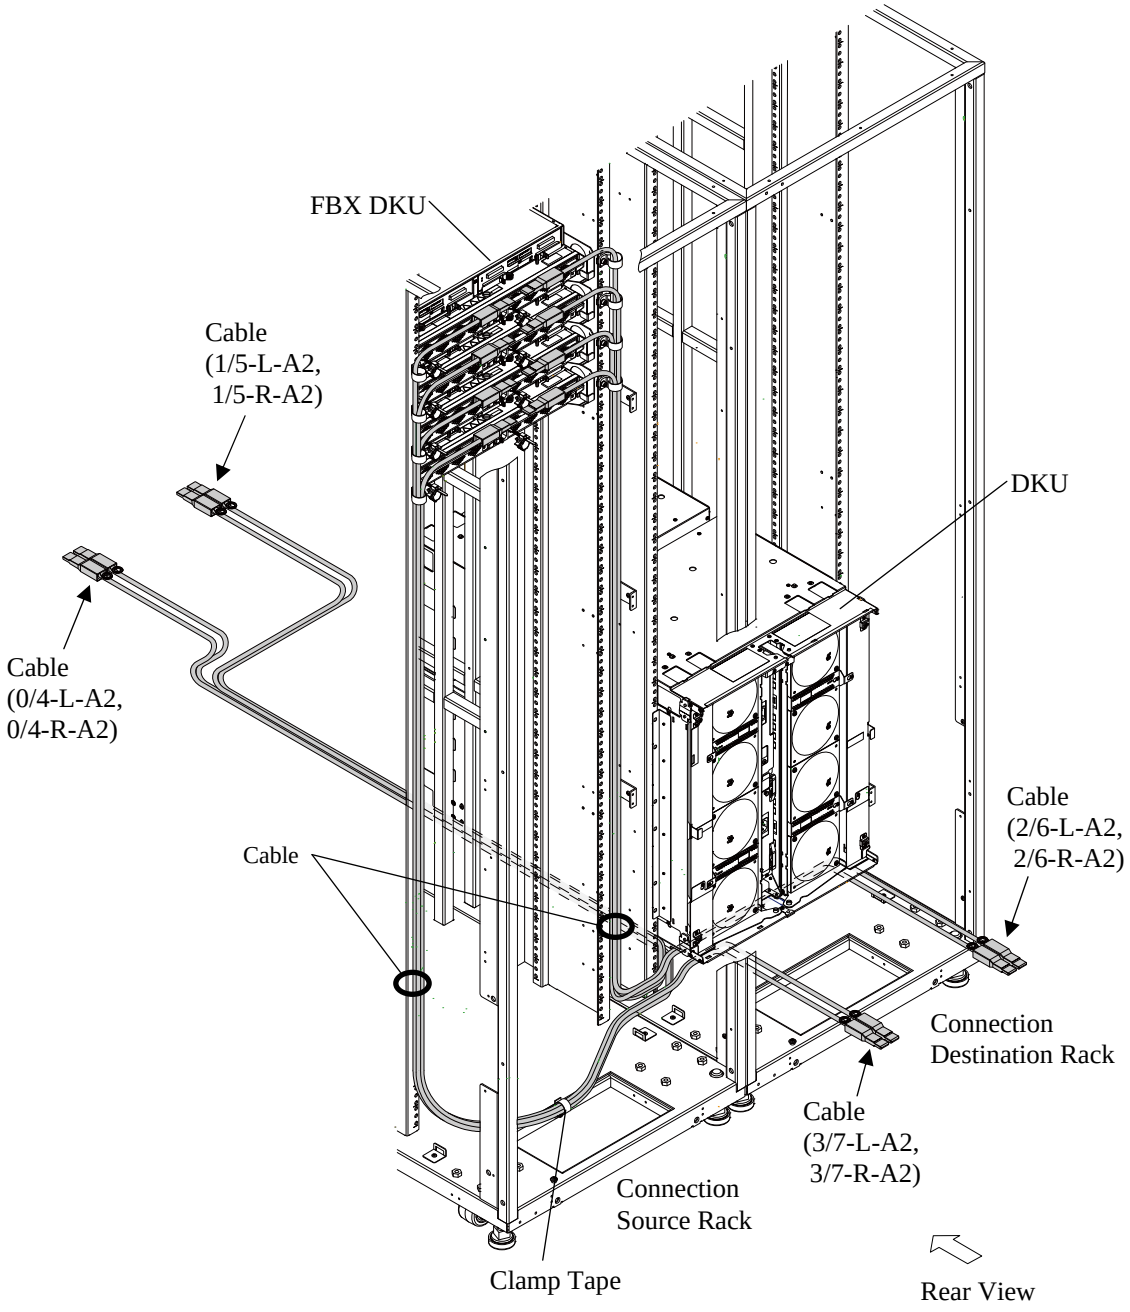

Fig. 3.12.4.17-6 Fixation of Cables (Cable Installation on the Left Side of the Connection Source Rack)

4. Cable Installation of the rear side of the Connection destination DKU

When the Connection destination DKU is the LFF DKU

a. Loosen the two screws of the rear right side of the connection destination DKU, and open the FAN door.

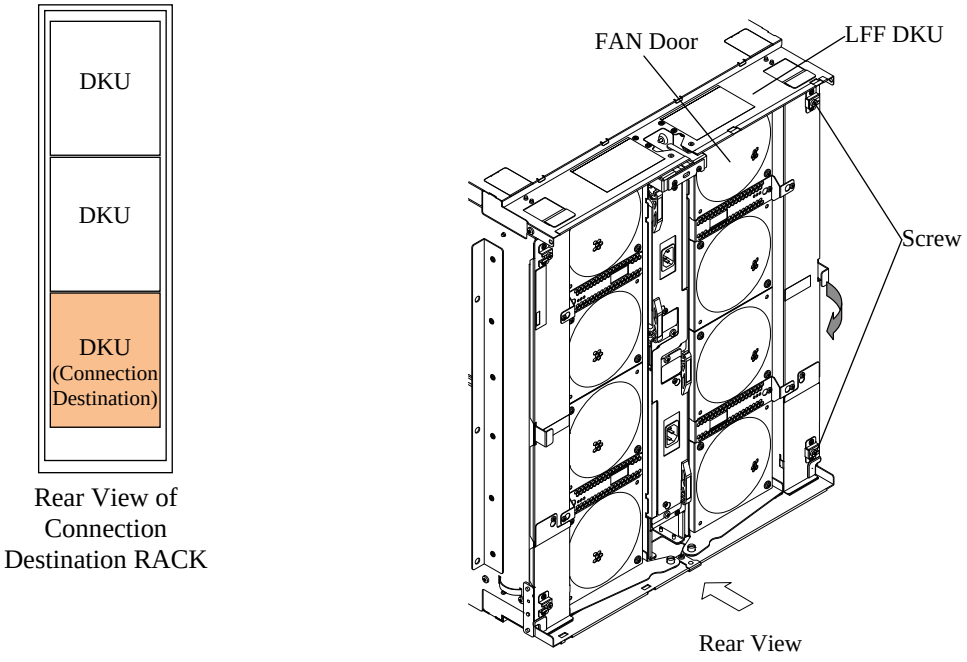

Fig. 3.12.4.17-7 FAN Door Opening

Copyright © 2012, Hitachi, Ltd.

b. Release the repeat binder at the rear right side of connection destination DKU.
c. Route the cables (2/6-L-A2, 2/6-R-A2).
   However, do not connect the cables with the SSW PCBs at this stage.
d. Bundle and secure the cables with the repeat binder.
e. Loop the surplus cable length, bind it with the clamp tapes, and put it into the space between the bottom of the LFF DKU and the bottom of the rack.
f. Close the FAN door of the rear right side of the connection destination DKU, and tighten the two screws.

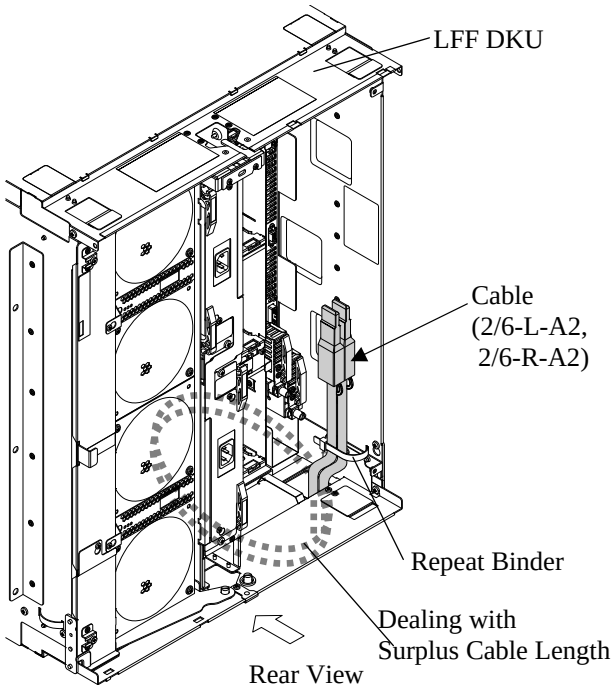

Fig. 3.12.4.17-8 Attachment of Cables

g. Loosen the two screws of the rear left side of the connection destination DKU, and open the FAN door.

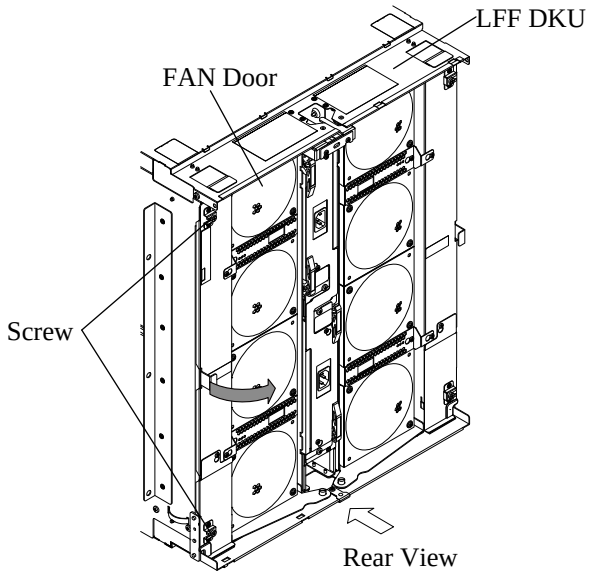

Fig. 3.12.4.17-9 FAN Door Opening

h. Release the repeat binder at the rear left side of connection destination DKU.
i. Route the cables (3/7-R-A2, 3/7-L-A2).
However, do not connect the cables with the SSW PCBs at this stage.
j. Bundle and secure the cables with the repeat binder.
k. Loop the surplus cable length, bind it with the clamp tapes, and put it into the space between the bottom of the LFF DKU and the bottom of the rack.
l. Close the FAN door of the rear left side of the connection destination DKU, and tighten the two screws.

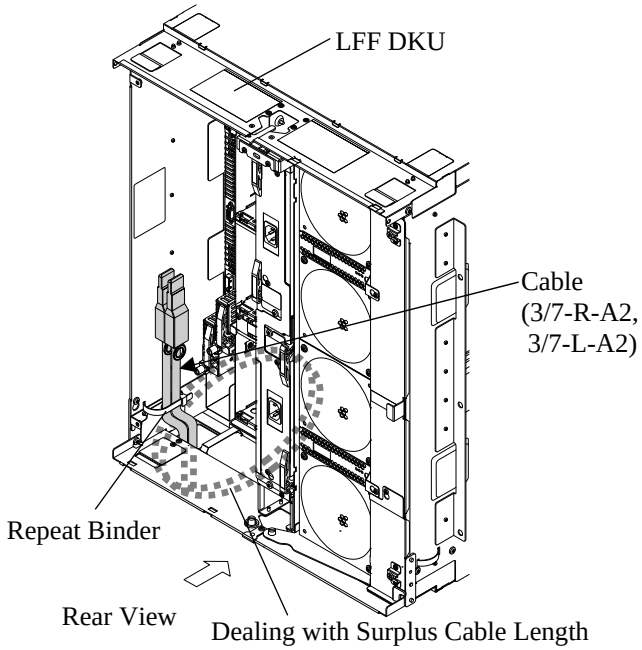

Fig. 3.12.4.17-10 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

When the Connection destination DKU is the SFF DKU

a. Loosen the two screws of the rear right side of the connection destination DKU, and open the FAN door.

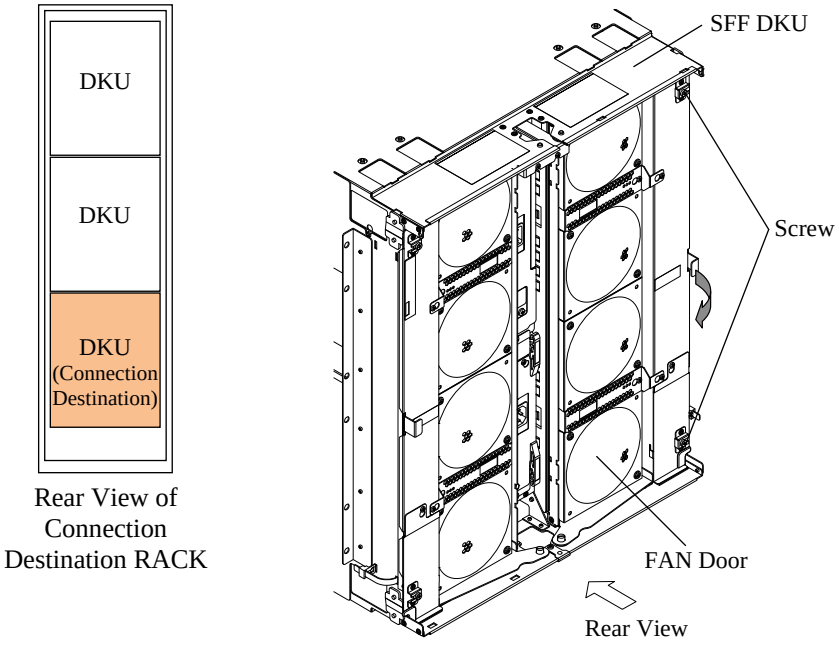

Fig. 3.12.4.17-11 FAN Door Opening

b. Route the cables (2/6-L-A2, 2/6-R-A2).
   However, do not connect the cables with the SSW PCBs at this stage.
c. Loop the surplus cable length, bind it with the clamp tapes, and put it into the space between the bottom of the SFF DKU and the bottom of the rack.
d. Close the FAN door of the rear right side of the connection destination DKU, and tighten the two screws.

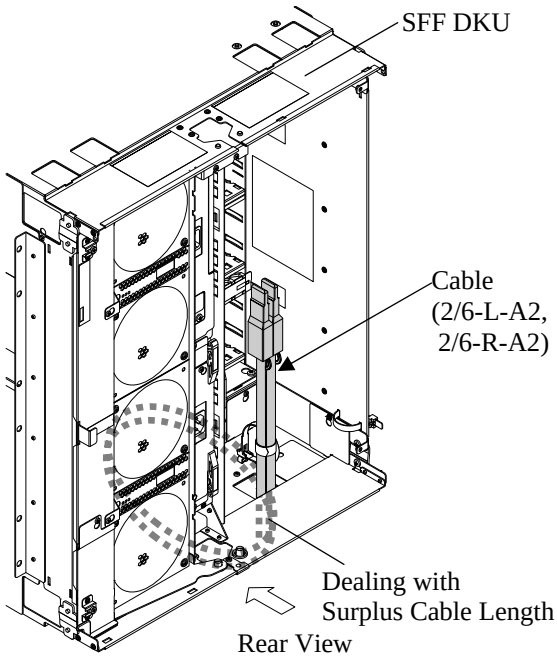

Fig. 3.12.4.17-12 Attachment of Cables

e. Loosen the two screws of the rear left side of the connection destination DKU, and open the FAN door.

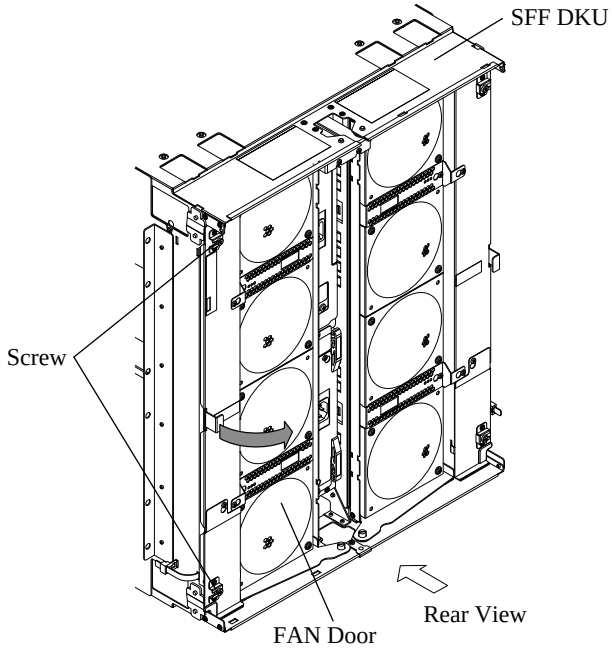

Fig. 3.12.4.17-13 FAN Door Opening

f. Route the cables (3/7-R-A2, 3/7-L-A2).
However, do not connect the cables with the SSW PCBs at this stage.
g. Loop the surplus cable length, bind it with the clamp tapes, and put it into the space between the bottom of the SFF DKU and the bottom of the rack.
h. Close the FAN door of the rear left side of the connection destination DKU, and tighten the two screws.

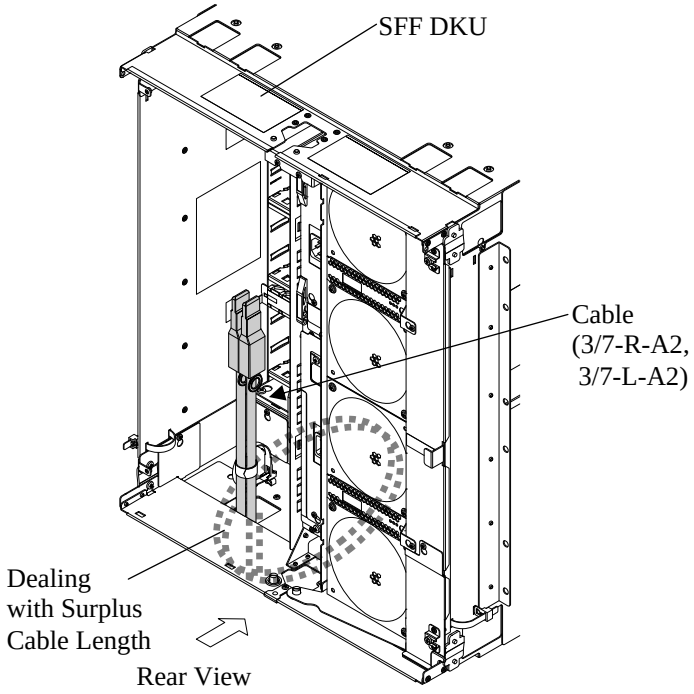

Fig. 3.12.4.17-14 Attachment of Cables

5. Cable Installation of the front side of the Connection destination DKU

When the Connection destination DKU is the LFF DKU

a. Loosen the two screws of the front right side of the connection destination DKU, and open the FAN door.

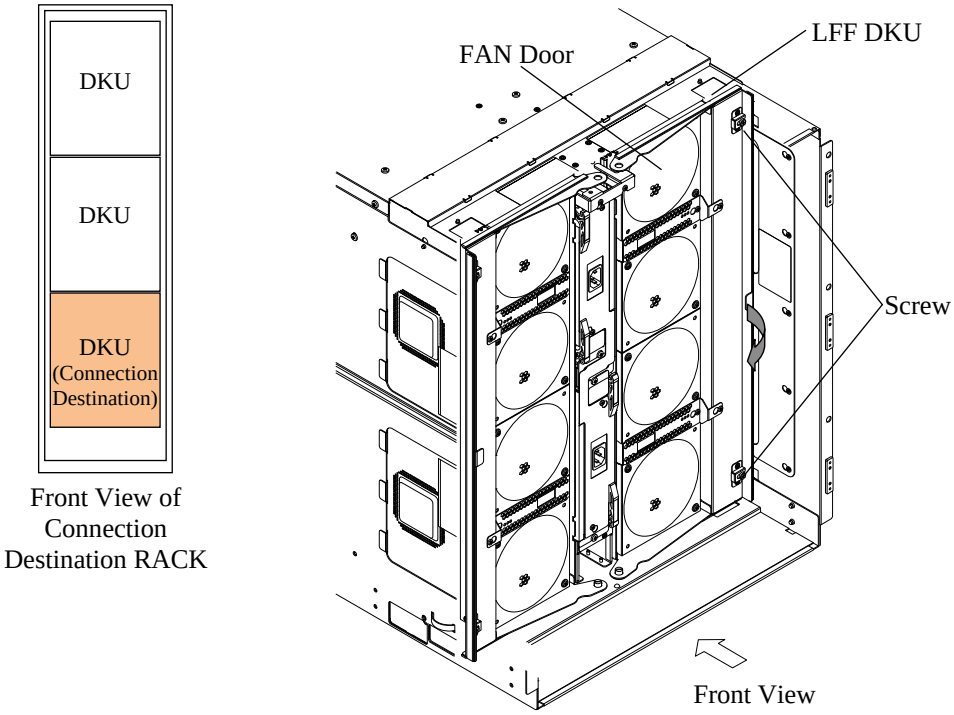

Fig. 3.12.4.17-15 FAN Door Opening

Copyright © 2012, Hitachi, Ltd.

b. Release the repeat binder at the rear front side of connection destination DKU.
c. Route the cables (0/4-R-A2, 0/4-L-A2).
   However, do not connect the cables with the SSW PCBs at this stage.
d. Bundle and secure the cables with the repeat binder.
e. Loop the surplus cable length, bind it with the clamp tapes, and put it into the space between the bottom of the LFF DKU and the bottom of the rack.
f. Close the FAN door of the front right side of the connection destination DKU, and tighten the two screws.

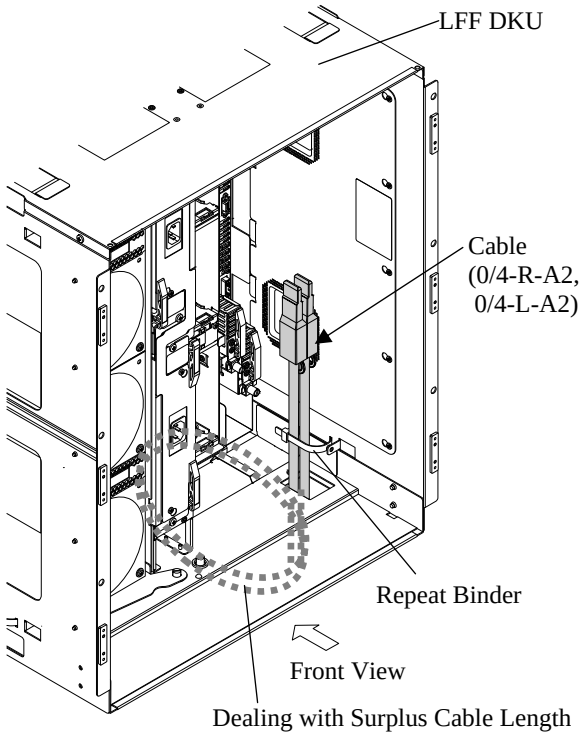

Fig. 3.12.4.17-16 Attachment of Cables

g. Loosen the two screws of the front left side of the connection destination DKU, and open the FAN door.

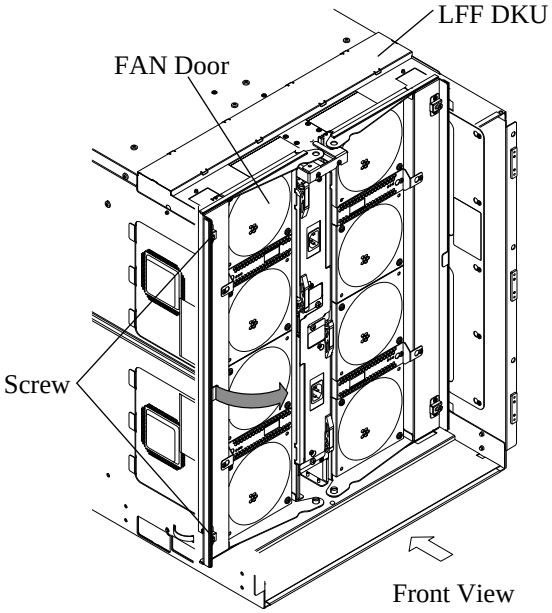

Fig. 3.12.4.17-17 FAN Door Opening

h. Release the repeat binder at the front left side of connection destination DKU.
i. Route the cables (1/5-L-A2, 1/5-R-A2).
However, do not connect the cables with the SSW PCBs at this stage.
j. Bundle and secure the cables with the repeat binder.
k. Loop the surplus cable length, bind it with the clamp tapes, and put it into the space between the bottom of the LFF DKU and the bottom of the rack.
l. Close the FAN door of the front left side of the connection destination DKU, and tighten the two screws.

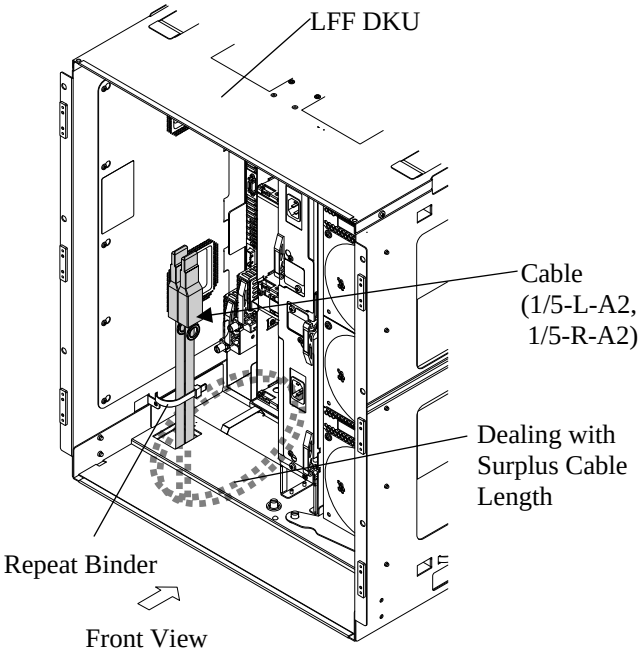

Fig. 3.12.4.17-18 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

When the Connection destination DKU is the SFF DKU

a. Loosen the two screws of the front right side of the connection destination DKU, and open the FAN door.

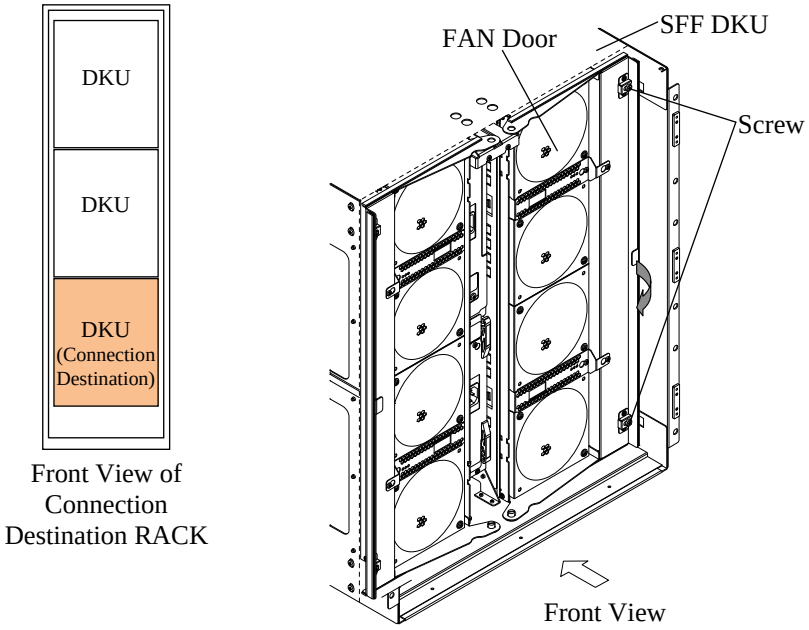

Fig. 3.12.4.17-19 FAN Door Opening

b. Route the cables (0/4-R-A2, 0/4-L-A2).
However, do not connect the cables with the SSW PCBs at this stage.
c. Loop the surplus cable length, bind it with the clamp tapes, and put it into the space between the bottom of the SFF DKU and the bottom of the rack.
d. Close the FAN door of the front right side of the connection destination DKU, and tighten the two screws.

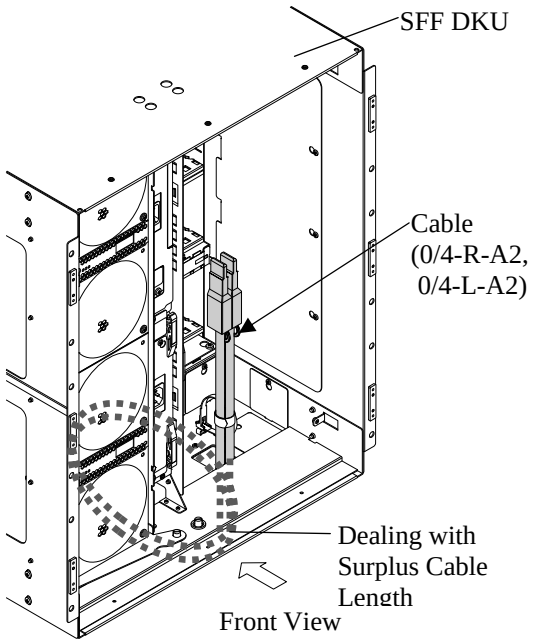

Fig. 3.12.4.17-20 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

e. Loosen the two screws of the front left side of the connection destination DKU, and open the FAN door.

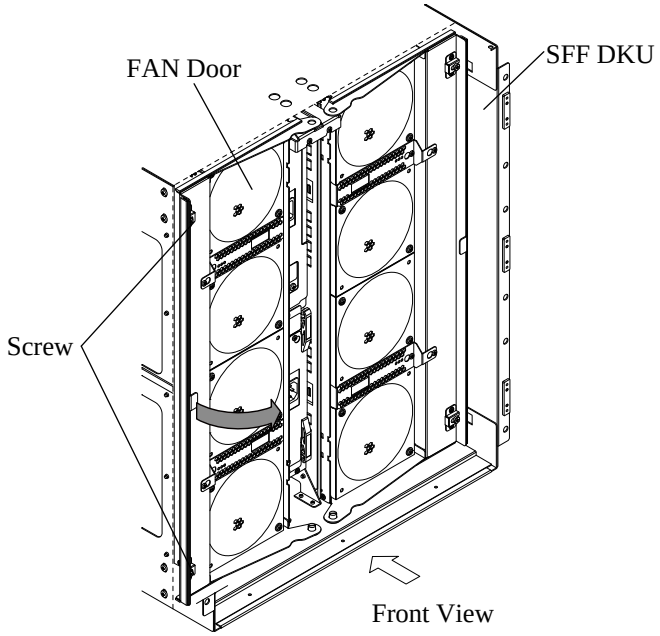

Fig. 3.12.4.17-21 FAN Door Opening

f. Route the cables (1/5-L-A2, 1/5-R-A2).
However, do not connect the cables with the SSW PCBs at this stage.
g. Loop the surplus cable length, bind it with the clamp tapes, and put it into the space between the bottom of the SFF DKU and the bottom of the rack.
h. Close the FAN door of the front left side of the connection destination DKU, and tighten the two screws.

6. Attachment of Nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

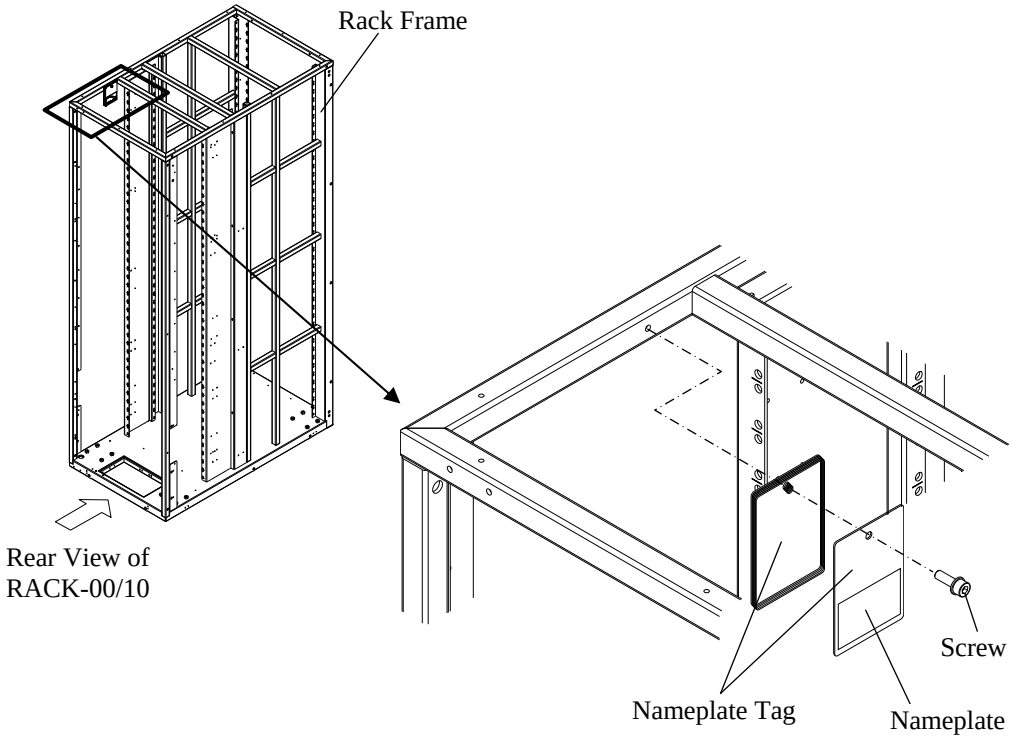

Fig. 3.12.4.17-23 Attachment of Nameplate

3. Cable Installation of the front side of the Connection Source DKU

3-1 Cable Installation on the Right Side of the Connection Source Rack

When the Connection Source DKU is the LFF DKU

a. Remove the two hangers from the front right side of the Connection Source DKU.
b. Insert the cables (1/5-R-A4 and 1/5-L-A4) into the clearance in the upper part of the DKUPS.
c. Wire the cables (0/4-R-A4 and 0/4-L-A4). However, do not connect the cables with the SSW PCBs at this stage.
d. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws. (Refer to the Fig. 3.12.4.17-25.)

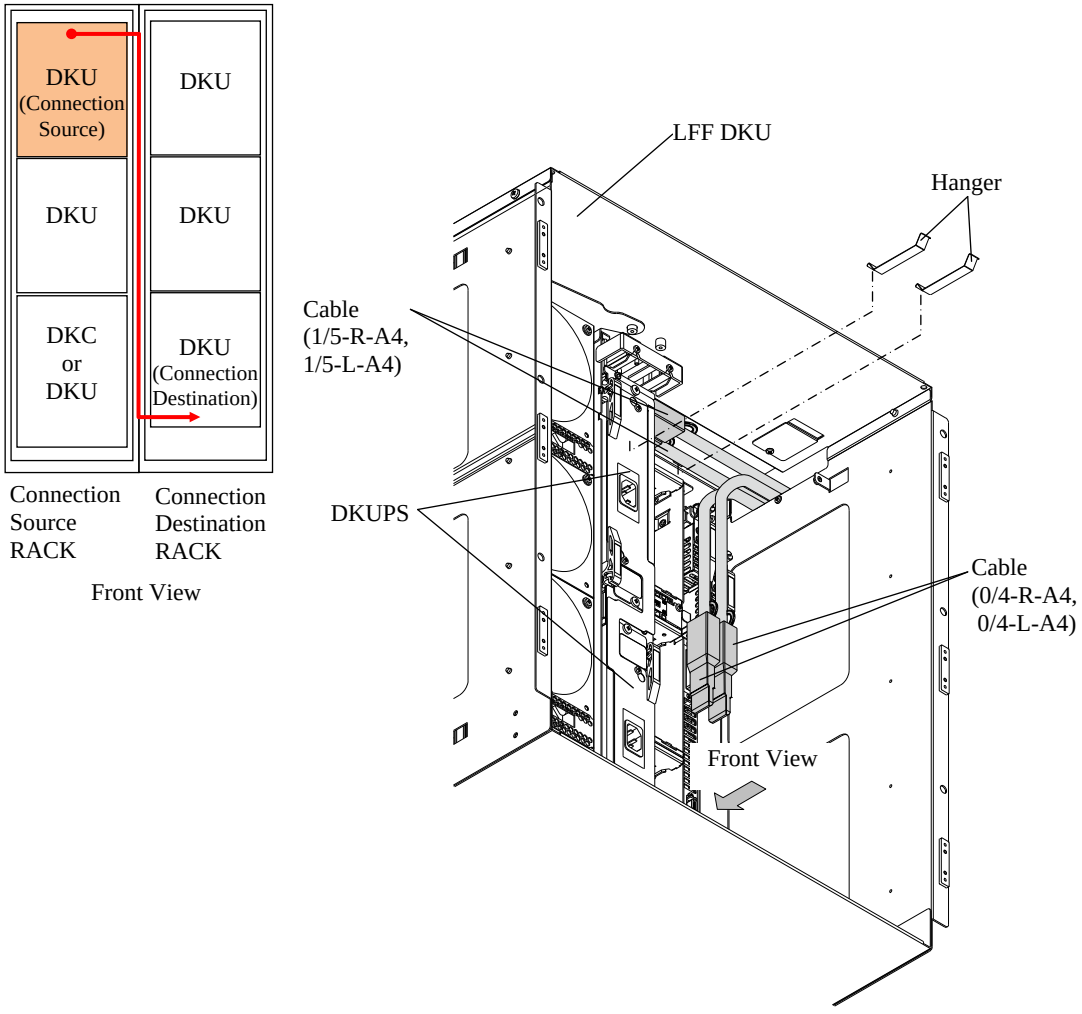

Fig. 3.12.4.17-35 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

e. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.17-27.)
f. Remove the two hangers.
g. Reach into the entry points of the right side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCBs at this stage.
h. Install the two hangers.
i. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws.

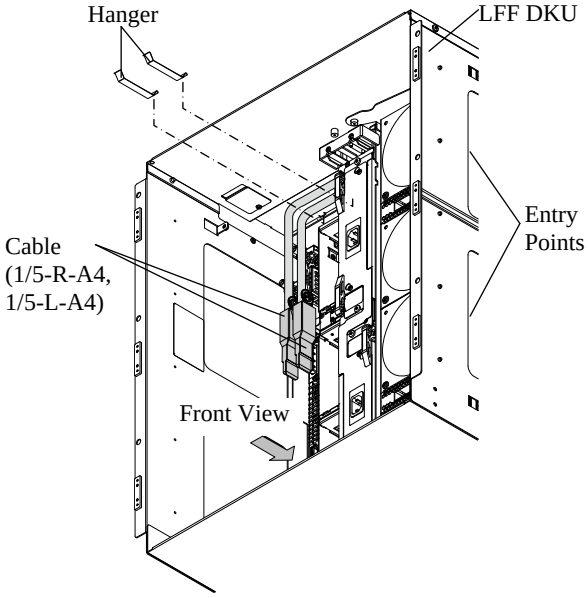

Fig. 3.12.4.17-36 Attachment of Cables

j. Loosen the two screws of front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.17-25.)
k. Install the two hangers, and fix the cables.

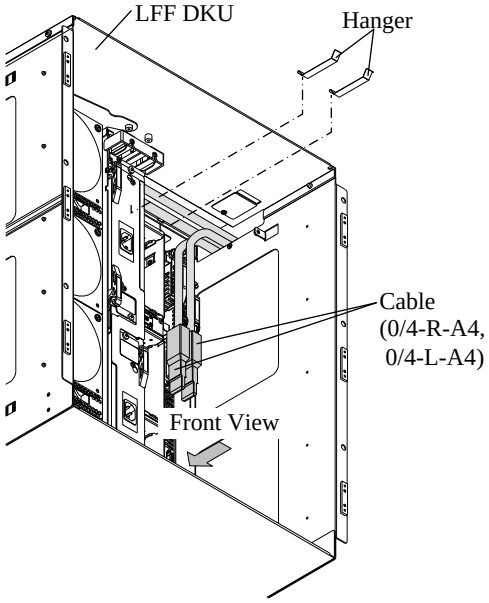

Fig. 3.12.4.17-37 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

When the Connection Source DKU is the SFF DKU

a. Insert the cables (1/5-R-A4 and 1/5-L-A4) into the clearance of the upper part of the DKUPS of the front right side of the connection source DKU.
b. Wire the cables (0/4-R-A4 and 0/4-L-A4). However, do not connect the cables with the SSW PCBs at this stage.
c. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.17-25.)

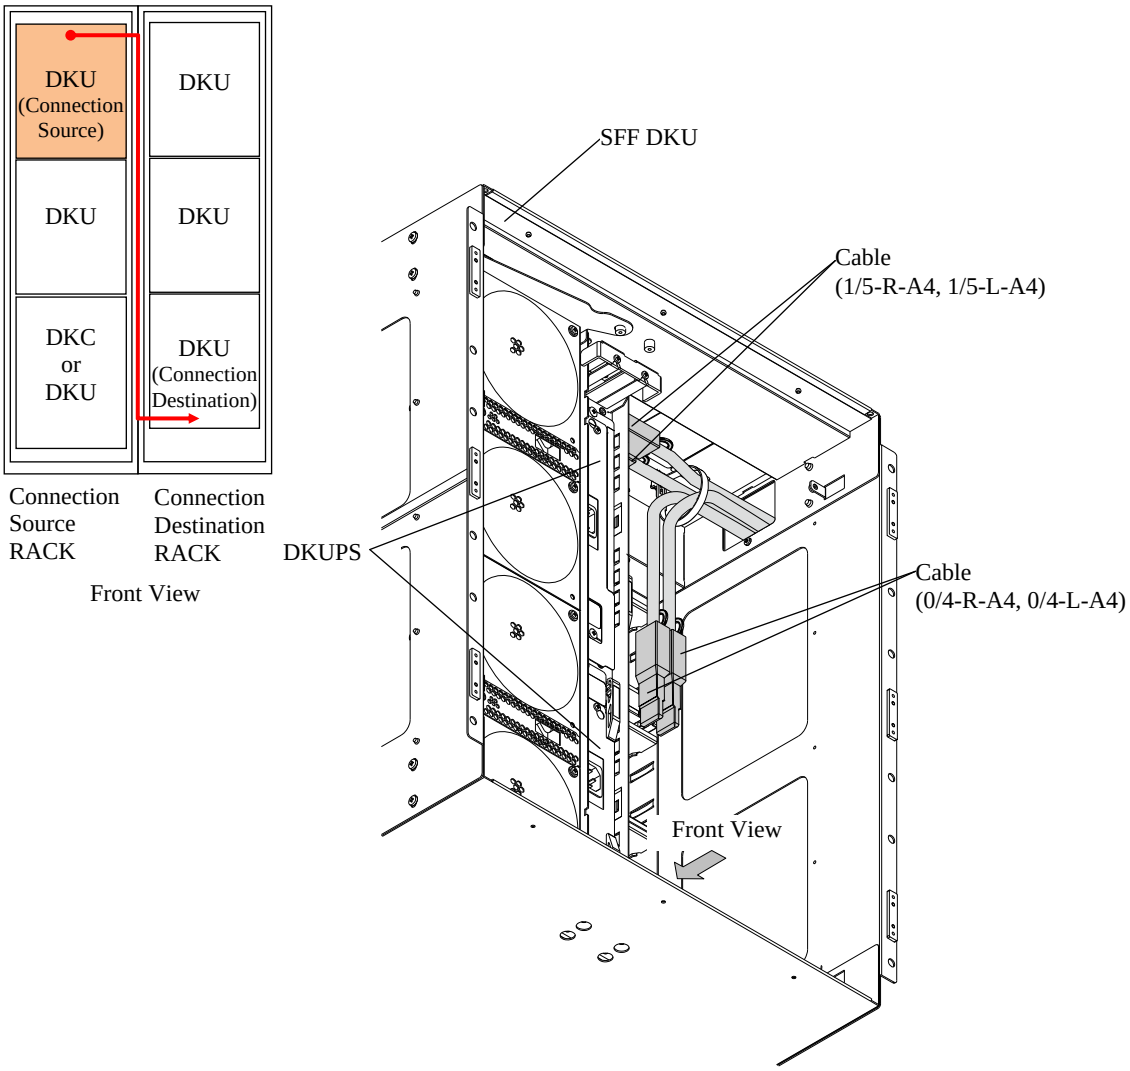

Fig. 3.12.4.17-38 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

d. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.17-27.)
e. Reach into the entry points of the right side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCBs at this stage.
f. Bundle the cables with the clamp tape.
g. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws.

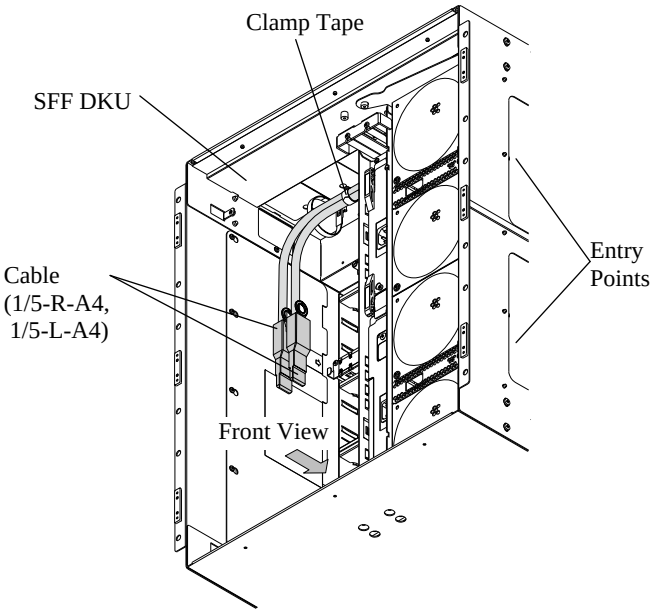

Fig. 3.12.4.17-39 Attachment of Cables

h. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.17-25.)
i. Fix the four cables with the repeat binder.

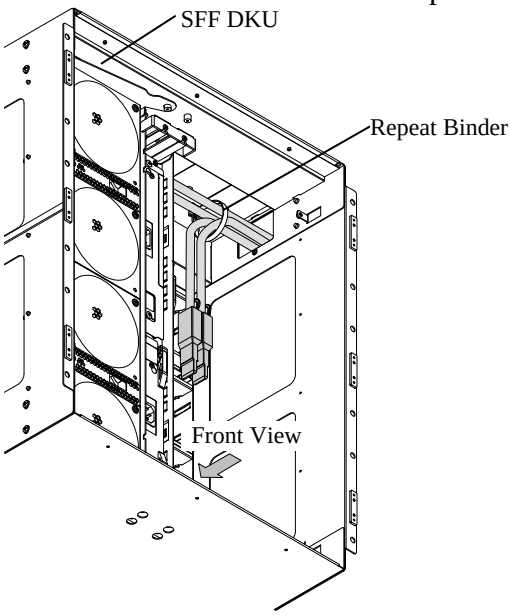

Fig. 3.12.4.17-40 Attachment of Cables

3-2 Cable Installation on the Left Side of the Connection Source Rack

When the Connection Source DKU is the LFF DKU

a. Remove the two hangers from the front left side of the connection source DKU.
b. Insert the cables (0/4-R-A4 and 0/4-L-A4) in the clearance of the upper part of the DKUPS.
c. Wire the cables (1/5-R-A4 and 1/5-L-A4). However, do not connect the cables with the SSW PCBs at this stage.
d. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.17-30.)

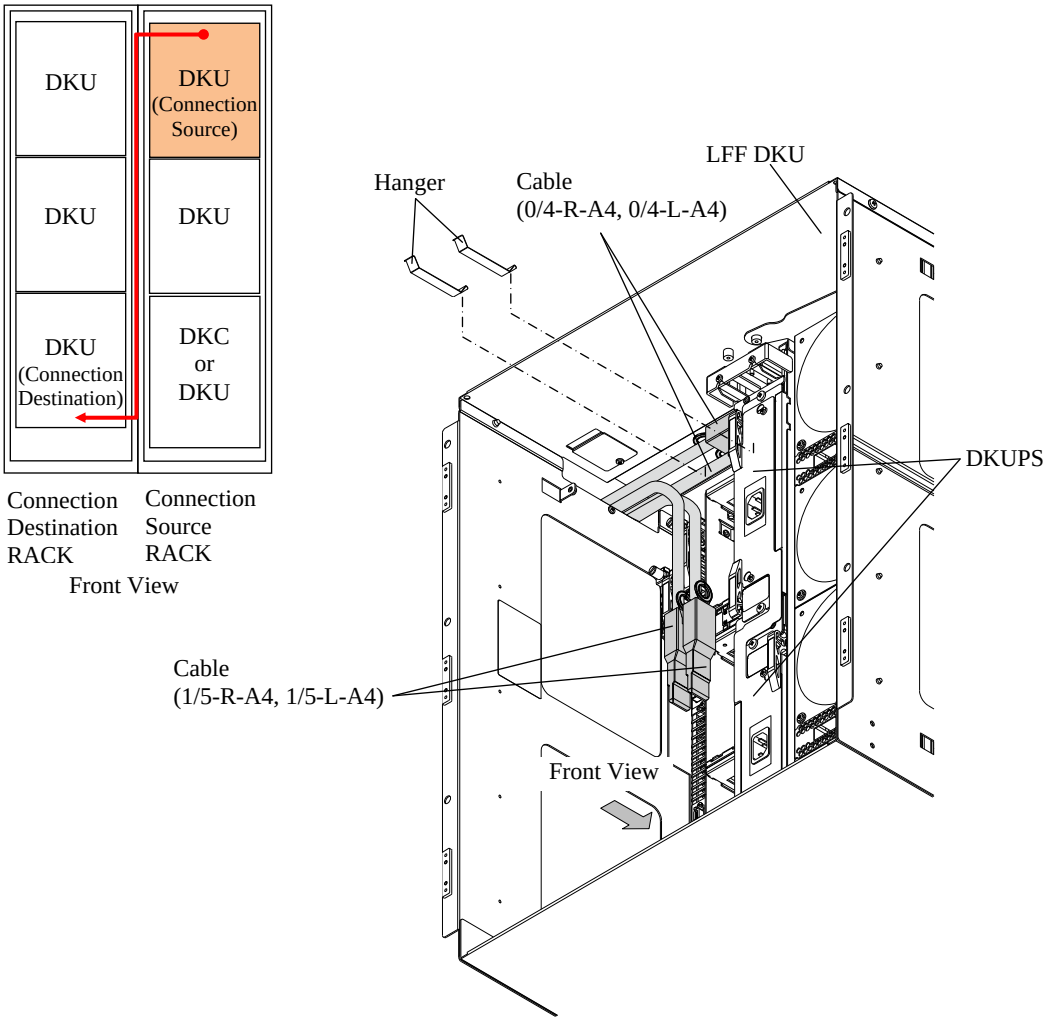

Fig. 3.12.4.17-41 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

e. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.17-32.)
f. Remove the two hangers.
g. Reach into the entry points of the left side of the DKU, and pull the cables out from the upper part of the DKUPS by using both hands. However, do not connect the cables with the SSW PCBs at this stage.
h. Install the two hangers, and fix the cables.
i. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws.

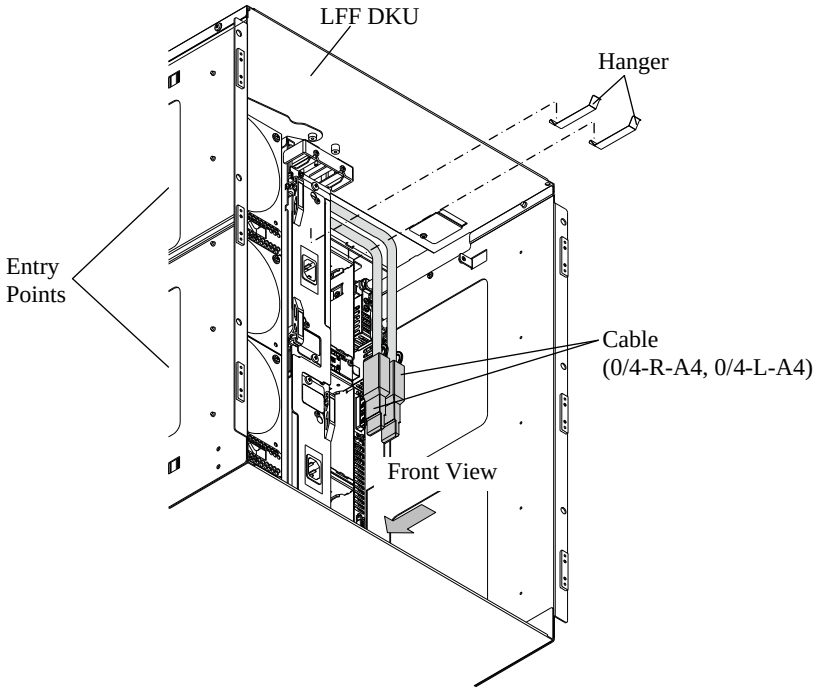

Fig. 3.12.4.17-42 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

j. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.17-30.)
k. Install the two hangers, and fix the cables.

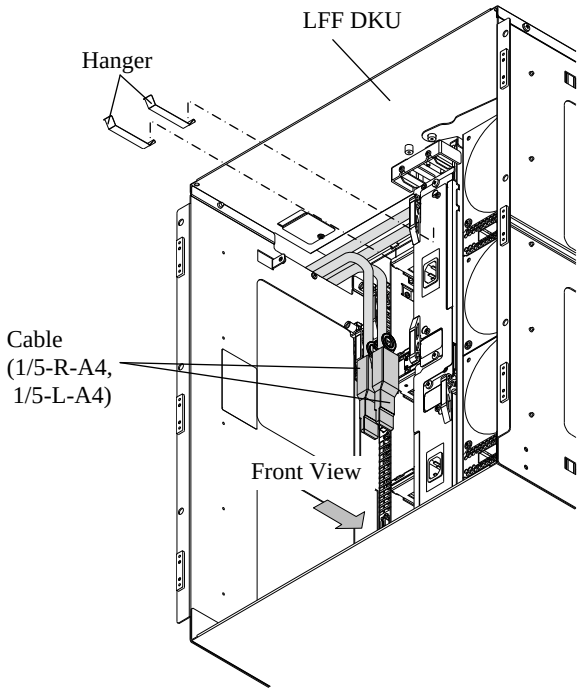

Fig. 3.12.4.17-43 Attachment of Cables

5. Installing the Plate

5-1 Cable Installation on the Right Side of the Connection Source Rack

a. Install all removed plates in the front right side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 3.12.4.17-26.)
b. Close all the FAN doors of the front right side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 3.12.4.17-25.)
c. Install all removed plates in the front left side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 3.12.4.17-28.)
d. Close all the FAN doors of the front left side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 3.12.4.17-27.)

5-2 Cable Installation on the Left Side of the Connection Source Rack

a. Install all removed plates in the front right side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 3.12.4.17-33.)
b. Close all the FAN doors of the front right side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 3.12.4.17-32.)
c. Install all removed plates in the front left side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 3.12.4.17-31.)
d. Close all the FAN doors of the front left side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 3.12.4.17-30.)

f. Remove the two hangers.
g. Pull the cables out from the upper part of the DKUPS, and wire the cables. However, do not connect the cables with the SSW PCBs at this stage.
h. Install the two hangers, and fix the cables.
i. Close the FAN door of the rear left side of the connection source DKU, and tighten the two screws.

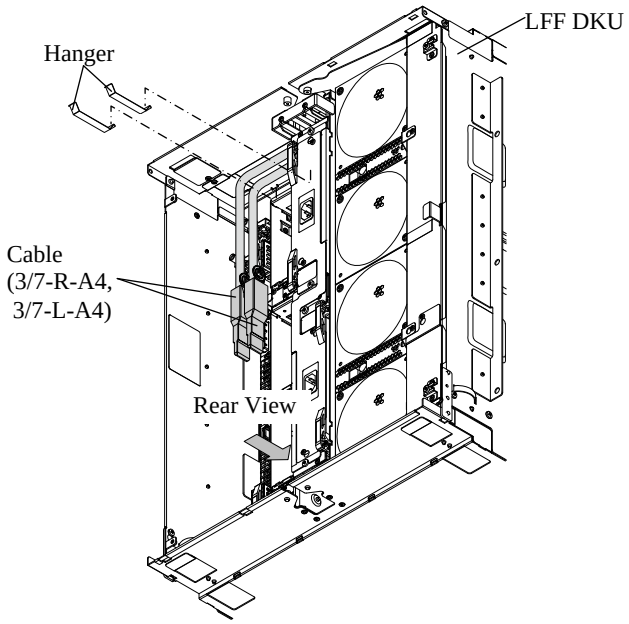

Fig. 3.12.4.17-65 Attachment of Cables

j. Loosen the two screws of the rear right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.17-52.)
k. Install the two hangers, and fix the cables.

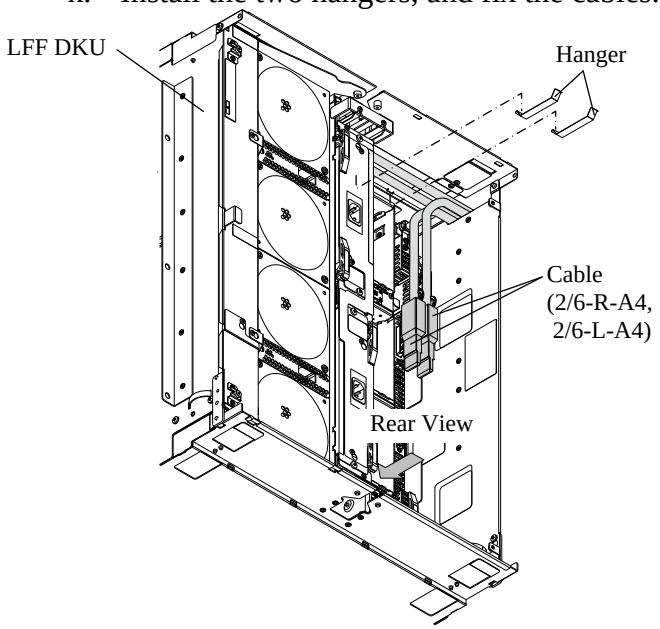

Fig. 3.12.4.17-66 Attachment of Cables

Copyright © 2012, Hitachi, Ltd.

When the Connection Source DKU is the SFF DKU

a. Insert the cables (3/7-R-A4 and 3/7-L-A4) into the clearance of the upper part of the DKUPS of the rear right side of the connection source DKU.
b. Wire the cables (2/6-R-A4 and 2/6-L-A4). However, do not connect the cables with SSW PCBs at this stage.
c. Close the FAN door of the rear right side of the connection source DKU, and tighten the two screws. (Refer to Fig. 3.12.4.17-52.)

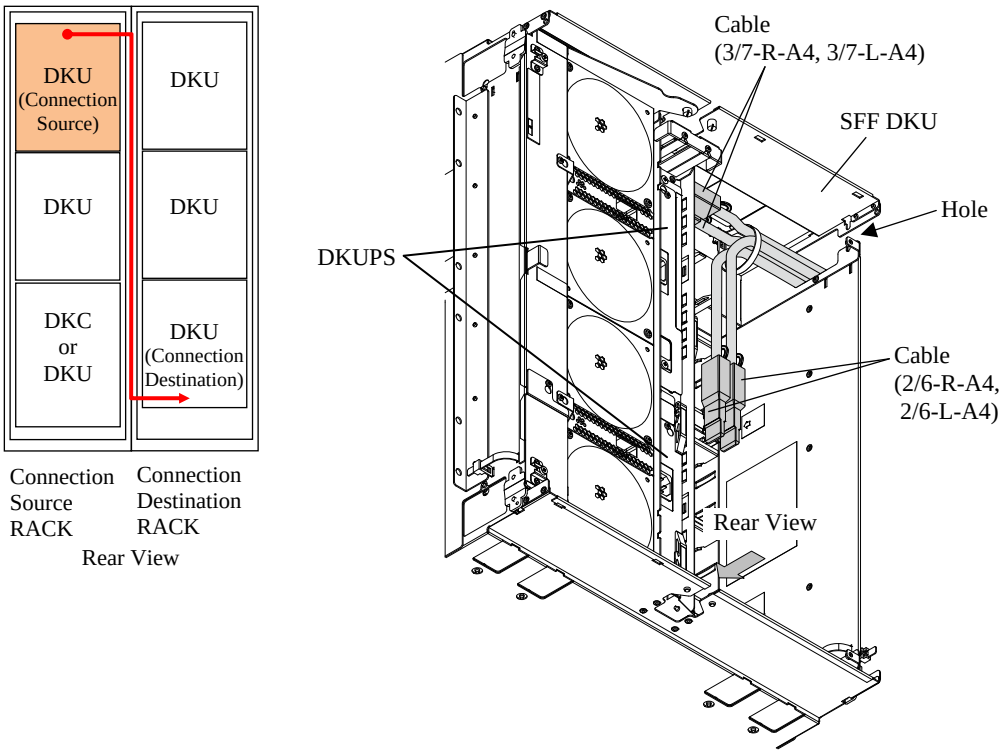

Fig. 3.12.4.17-67 Attachment of Cables

d. Loosen the two screws of the rear left side of the connection source DKU, and open the FAN door.

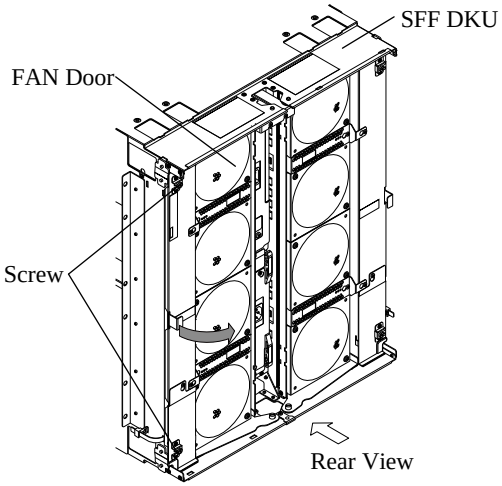

Fig. 3.12.4.17-68 FAN Door Opening

Copyright © 2012, Hitachi, Ltd.

e. Pull the cables out from the upper part of the DKUPS, and wire the cables. However, do not connect the cables with the SSW PCBs at this stage.
f. Bundle the cables with the clamp tape.
g. Close the FAN door of the rear left side of the connection source DKU, and tighten the two screws.

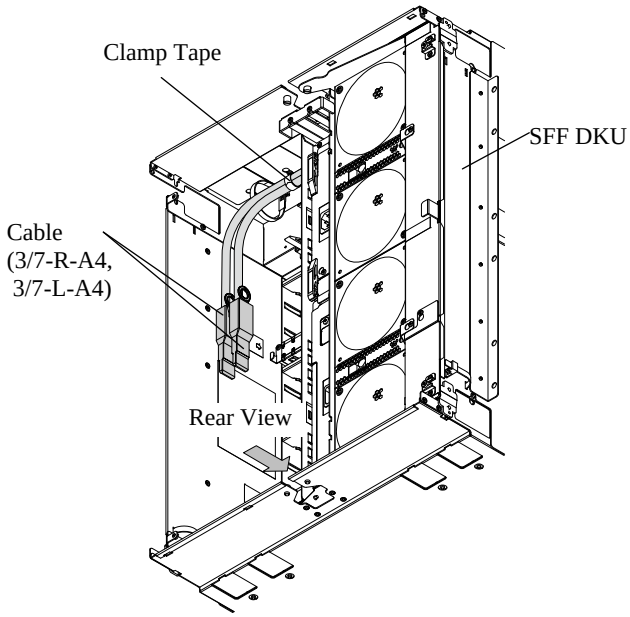

Fig. 3.12.4.17-69 Attachment of Cables

h. Loosen the two screws of the rear right side of the connection source DKU, and open the FAN door. (Refer to Fig. 3.12.4.17-52.)
i. Fix the cables with the repeat binder.
j. Install the cover, and tighten the two screws.

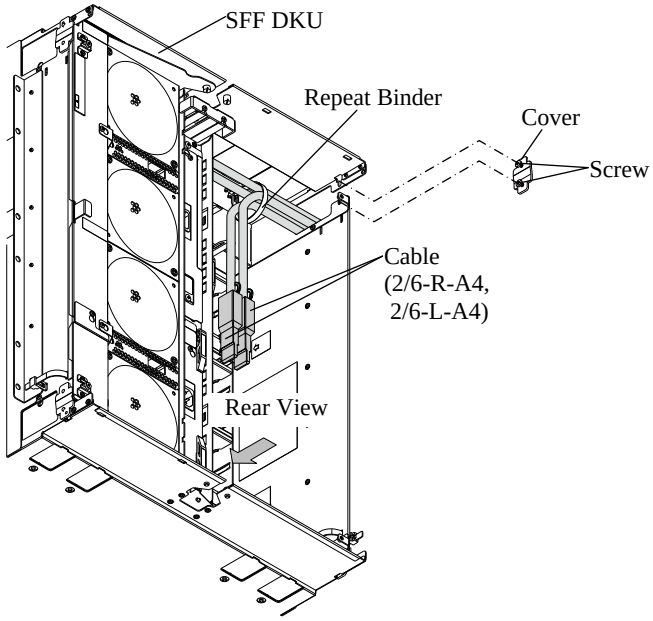

Fig. 3.12.4.17-70 Fixation of Cables

Copyright © 2012, Hitachi, Ltd.

8. Fixing the Cables
   a. Fix the four cables with the two repeat binders of the DKU side. (Refer to Fig. 3.12.4.17-71 or Fig. 3.12.4.17-72.)

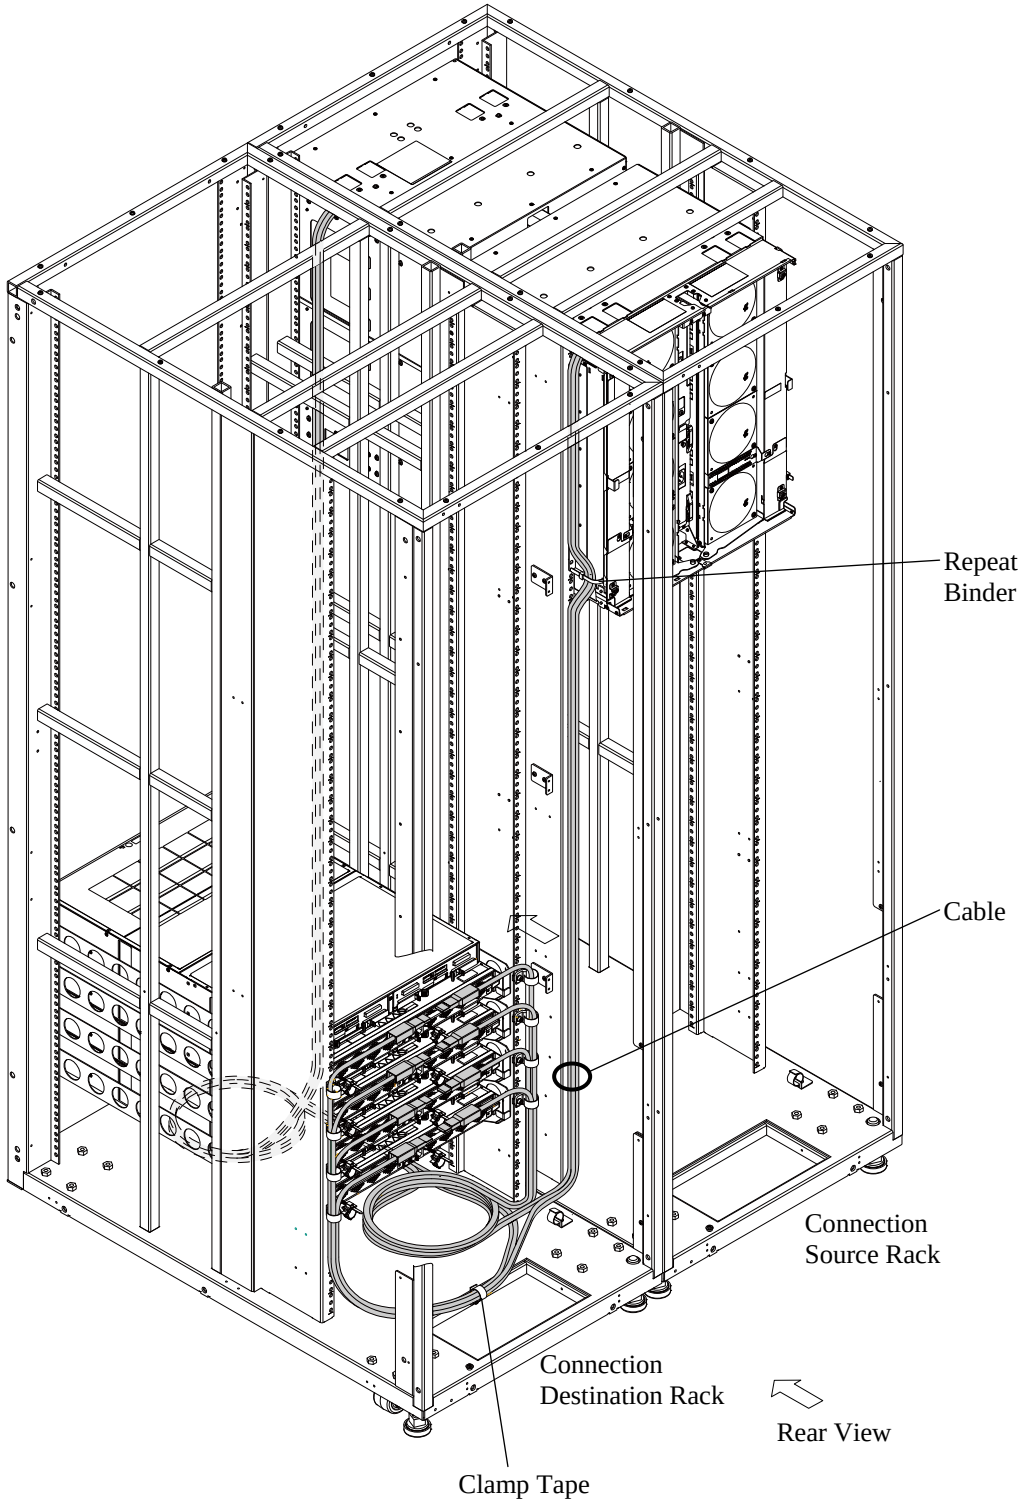

Fig. 3.12.4.17-71 Fixation of Cables (Cable Installation on the Right Side of the Connection Source Rack)

Copyright © 2012, Hitachi, Ltd.

9. Cable Installation of the Connection Destination FBX DKU
   a. Install cables and fasten them with eight clamp tapes.
      However, do not connect the cables with the SSWs at this stage.

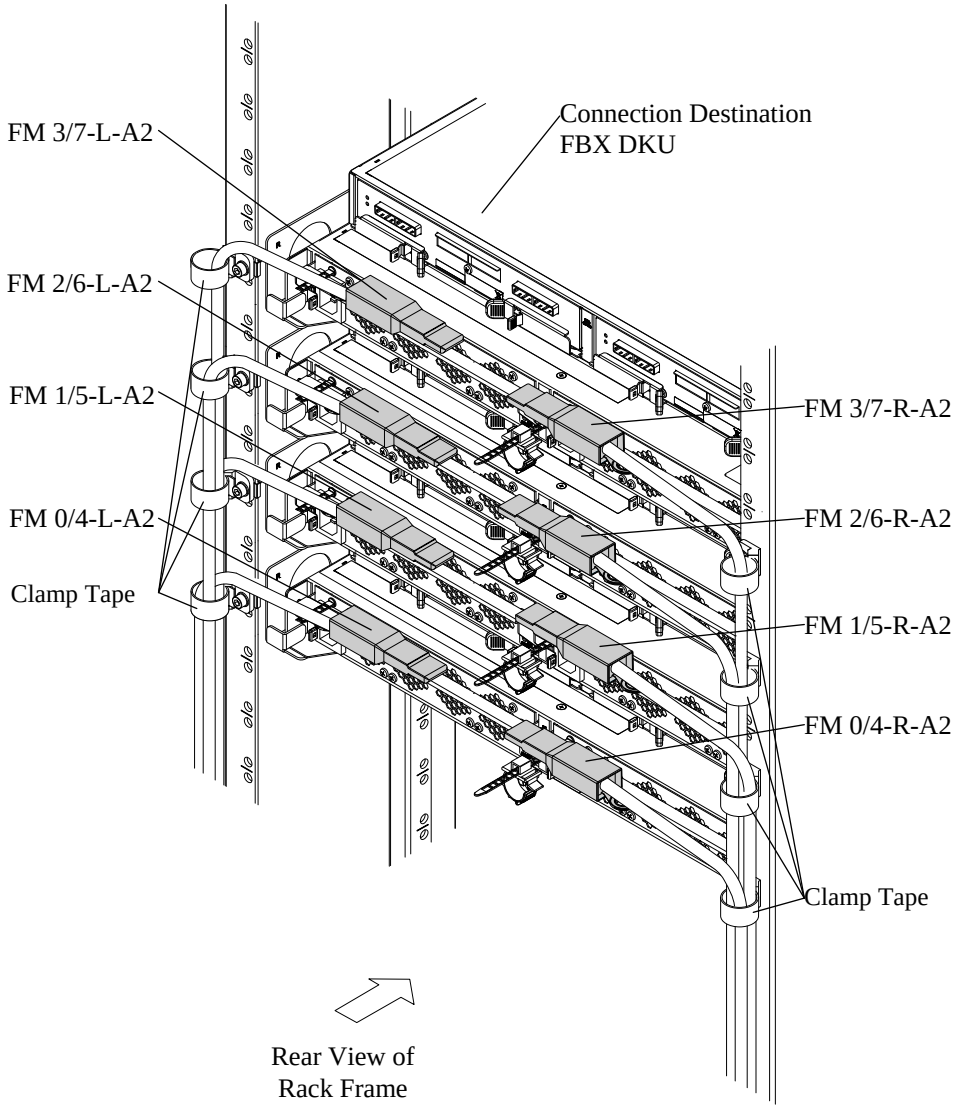

Fig. 3.12.4.17-73 Installing Cables

Copyright © 2012, Hitachi, Ltd.

10. Attachment of Nameplate
    a. Remove the screw from the rack frame and remove the nameplate tags.
    b. Attach the nameplate to the nameplate tag.
    c. Attach all the nameplate tags with the screw.

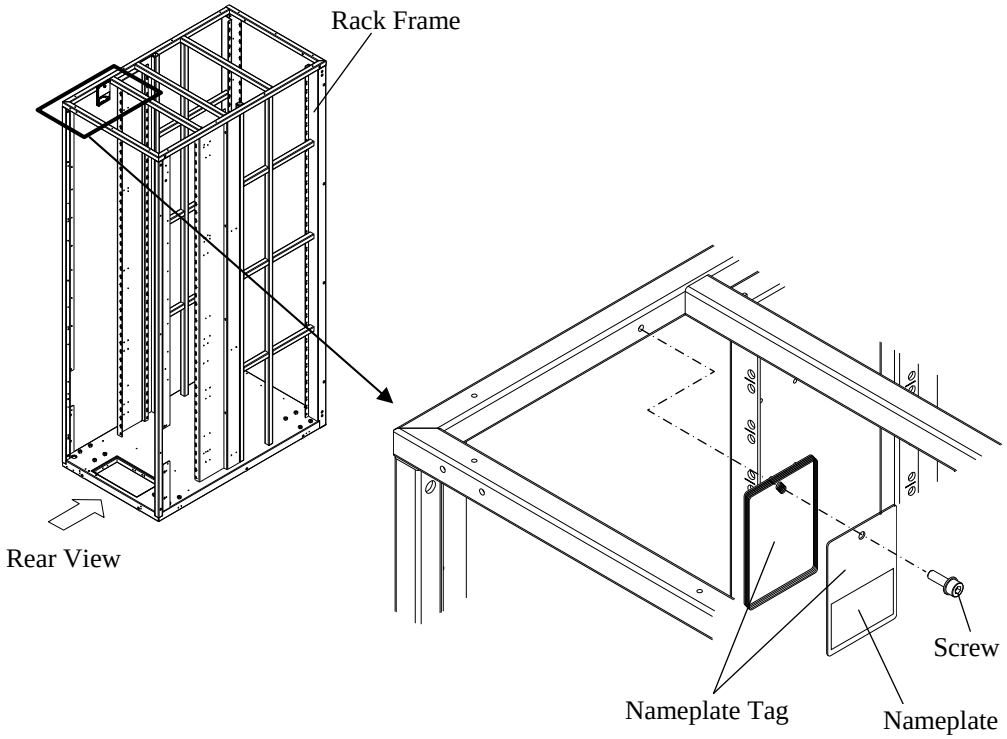

Fig. 3.12.4.17-74 Attachment of Nameplate

3.12.4.18 Installation Procedure of Device Interface Cable FFEX (DKC-F710I-FFEXC)

Installation Condition

DKC-F710I-FFEXC is a cable option to connect FBX DKU to another FBX DKU between two racks.

Refer to below Table 3.12.4.18-1 for the condition of DKC-F710I-FFEXC installation, and go to the appropriate page.

Table 3.12.4.18-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable FFEX (DKC-F710I-FFEXC) is required to install.	INST03-12C-5700
2	When Device Interface Cable FFEX (DKC-F710I-FFEXC) is not required to install.	INST03-12C-5790

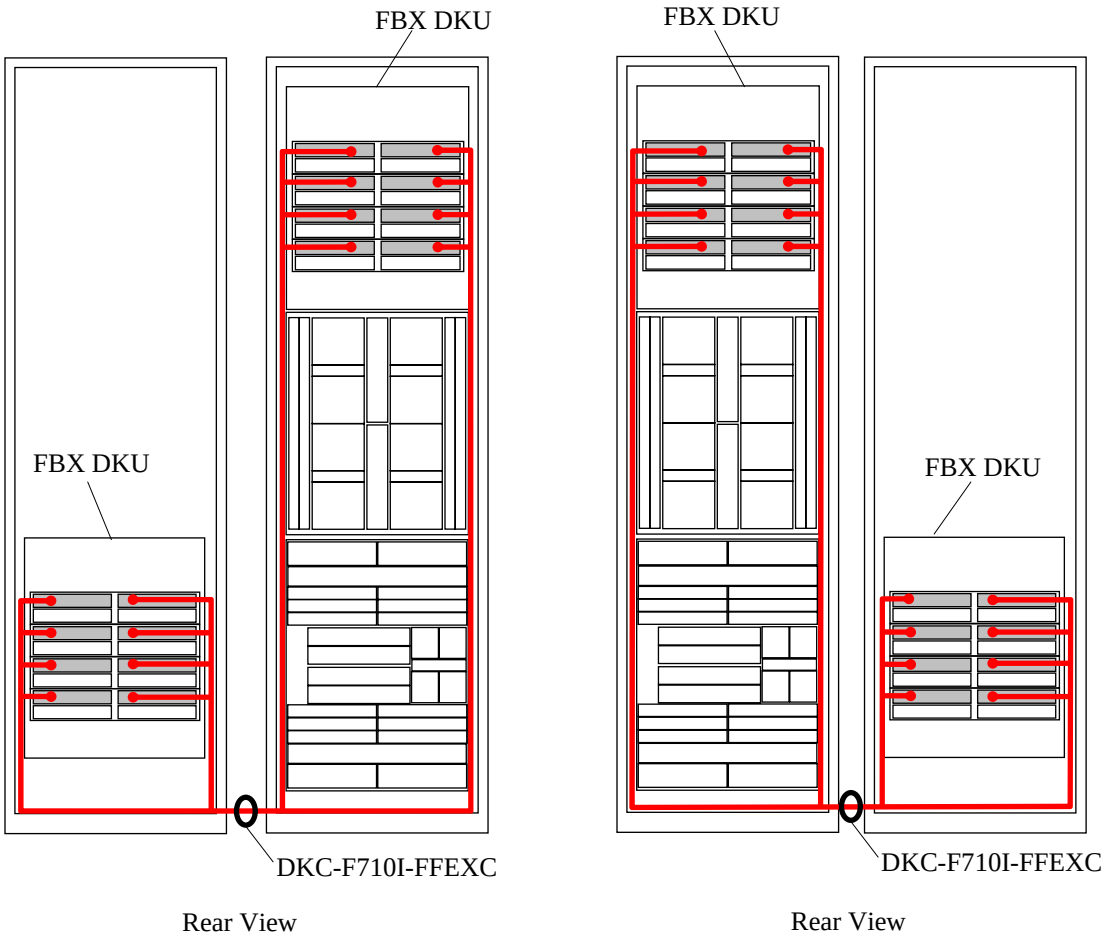

Fig. 3.12.4.18-1 Mounting Position of DEV Interface Cable

Copyright © 2012, Hitachi, Ltd.

1. Pattern of Cable Connection
   There is one kind of pattern that the Device Interface Cable FFEX (DKC-F710I-FFEXC) is installed in a rack. That is connection between FBX DKUs.
   When a rack is added at the right side of the storage system, the DKC-F710I-FFEXC is installed at the right side of the existing rack. When a rack is added at the left side of the storage system, the DKC-F710I-FFEXC is installed at the left side of the existing rack.
   In this procedure, the existing RACK is called a connection source RACK, and newly increased RACK is called a connection destination RACK.
   Before starting operation according to this procedure, understand each process name and the position.

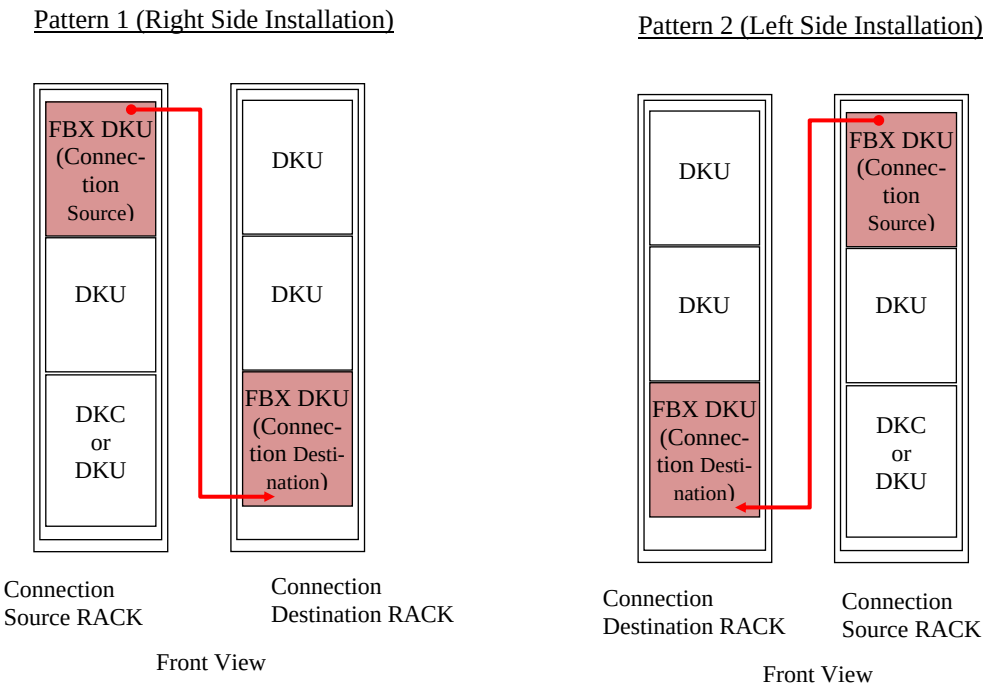

Fig. 3.12.4.18-2 Pattern of Cable Connection

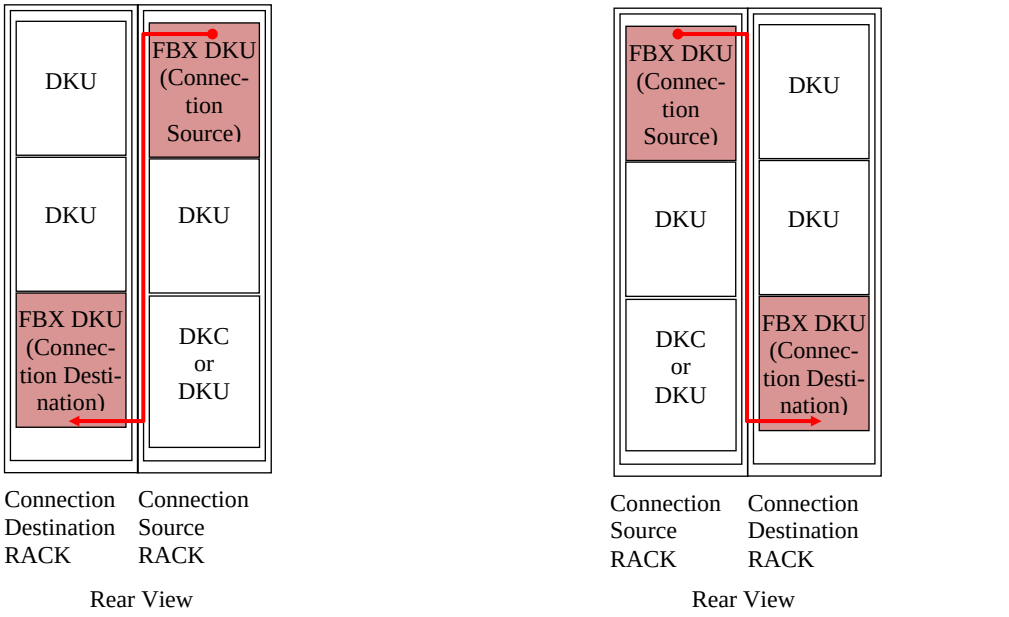
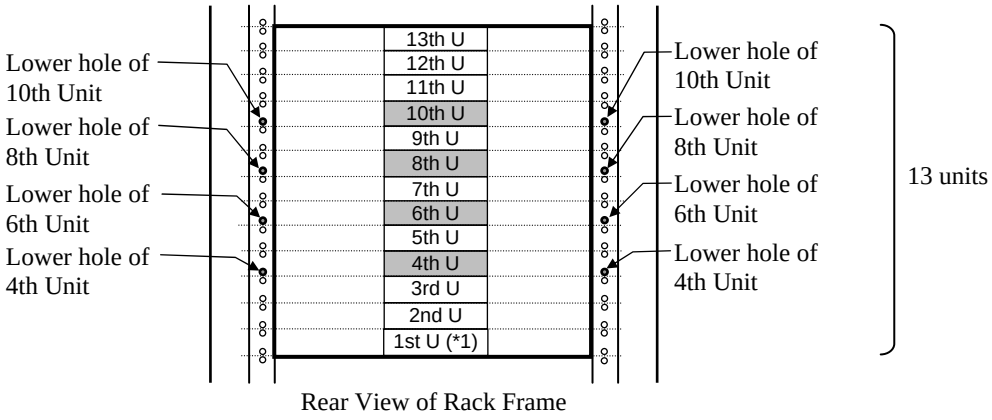
Copyright © 2012, Hitachi, Ltd.

2. Installing Clamp Tapes
   a. Fit eight rack nuts to the rear side of the connection source rack.
   b. Fit eight rack nuts to the rear side of the connection destination rack.





Rear View of Rack Frame

*1: Bottom Unit of Installation Position

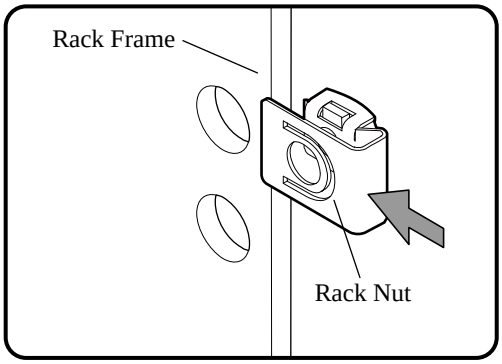


Fig. 3.12.4.18-3 Installing Rack Nuts

f. Attach a clamp tape to an opening of the bottom on the rear side of the connection source rack and fasten it with a WA socket bolt.

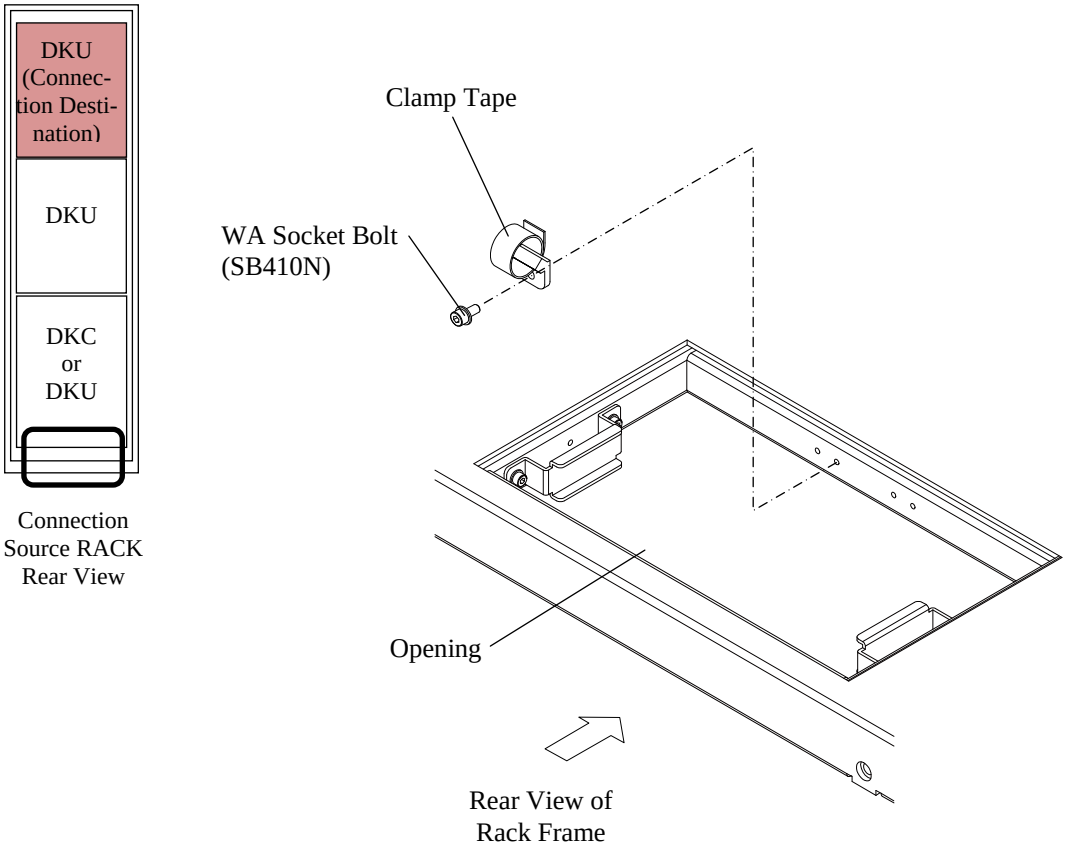

Fig. 3.12.4.18-6 Installing a Clamp Tape

Copyright © 2012, Hitachi, Ltd.

3. Installing Cables
   a. Route 8 cables on the rear side of the rack and fasten them with 17 clamp tapes. See Fig. 3.12.4.18-7 or Fig. 3.12.4.18-8.

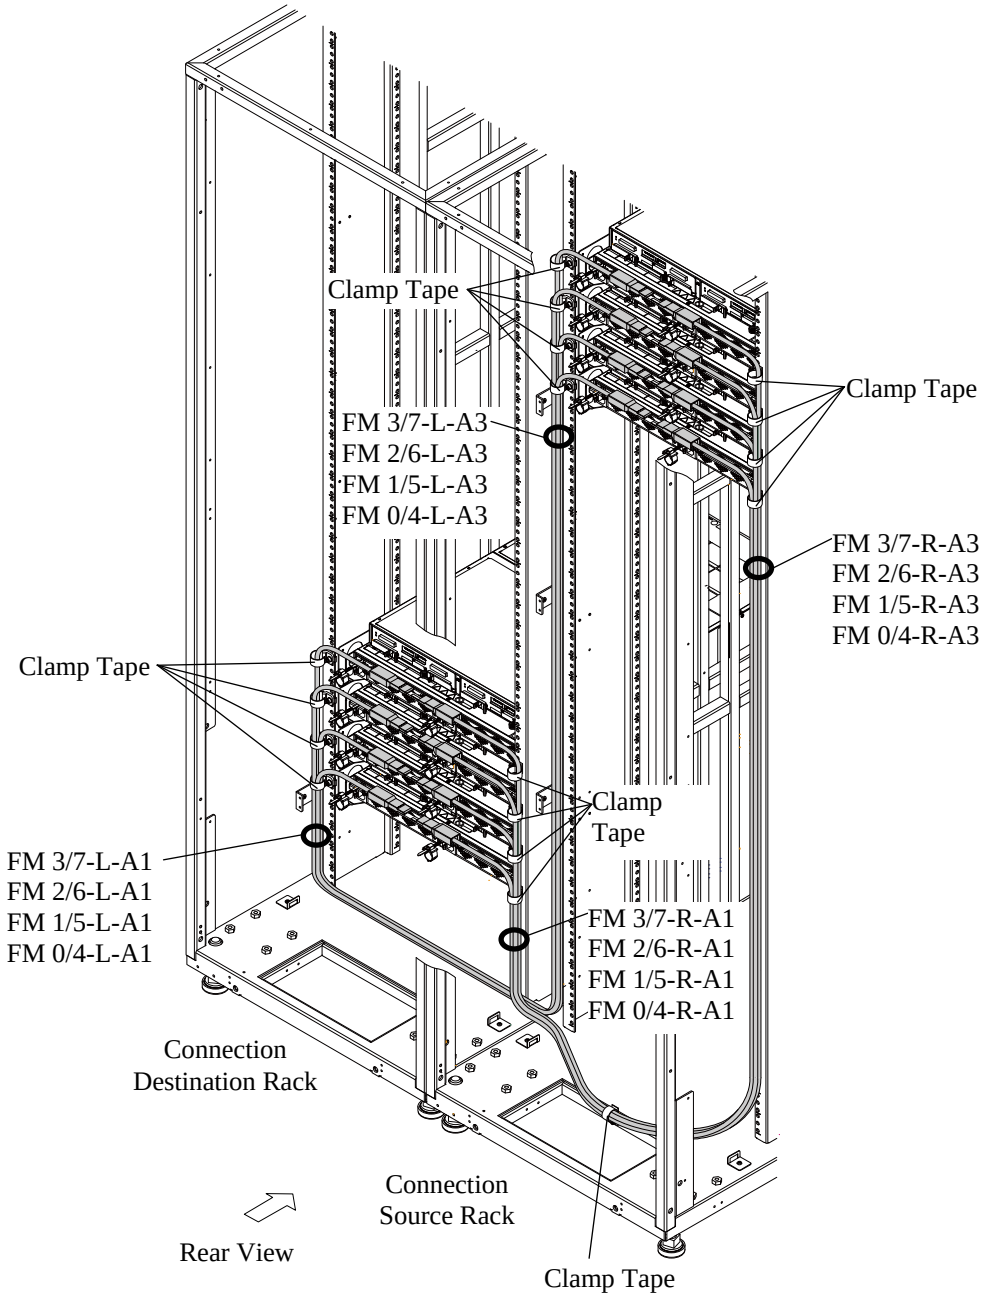

Fig. 3.12.4.18-7 Cable Routing (Right Side Installation)

Copyright © 2012, Hitachi, Ltd.

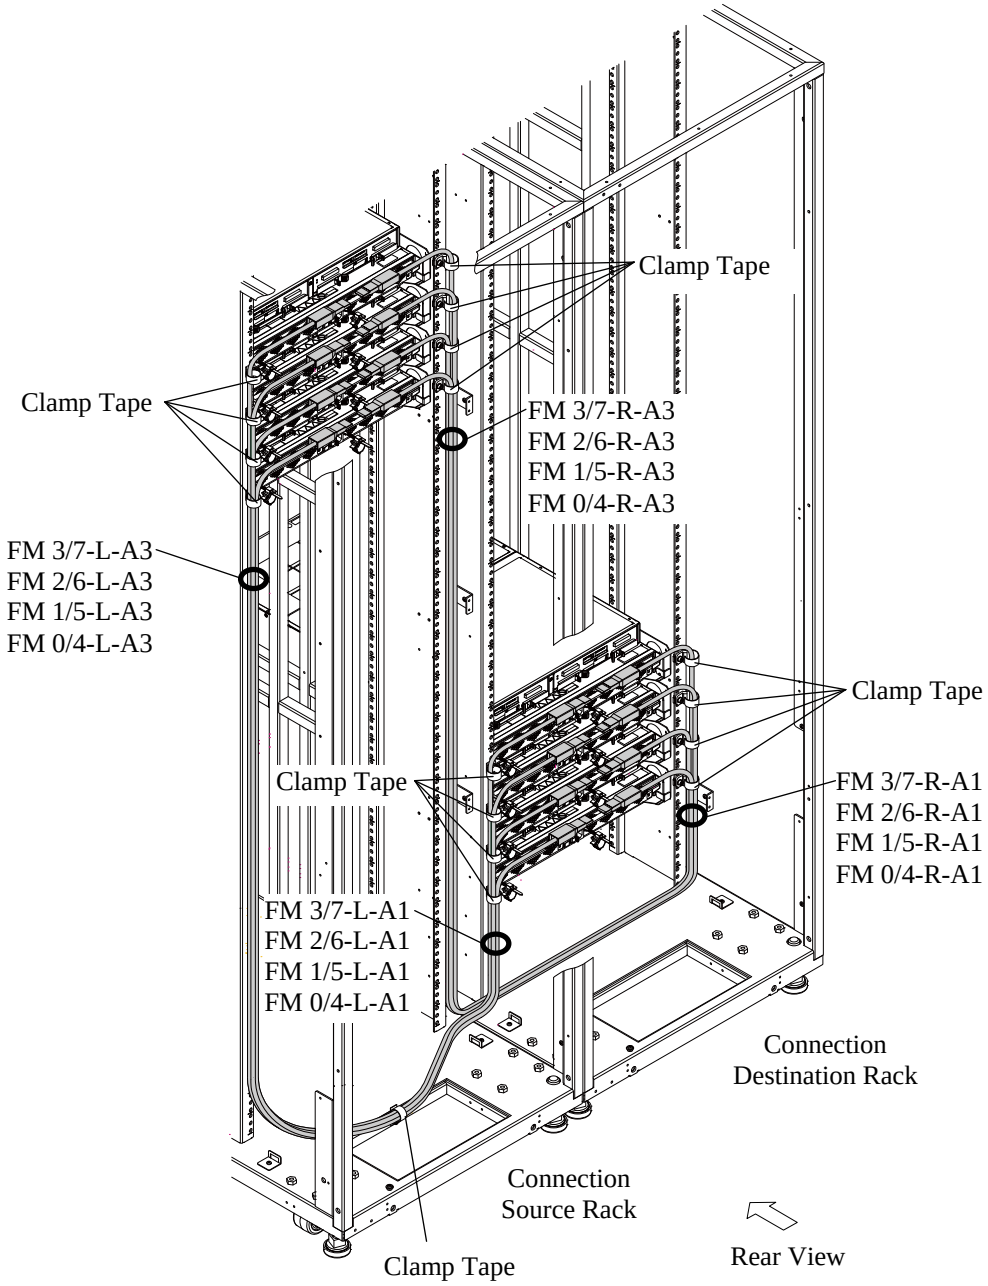

Fig. 3.12.4.18-8 Cable Routing (Left Side Installation)

Copyright © 2012, Hitachi, Ltd.

4. Connection Cables
   a. Remove the caps from the cables.
   b. Connect eight cables with the SSW PCBs in the destination DKU after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180). However, do not connect the cables with the SSWs in the Connection source DKU at this stage.

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

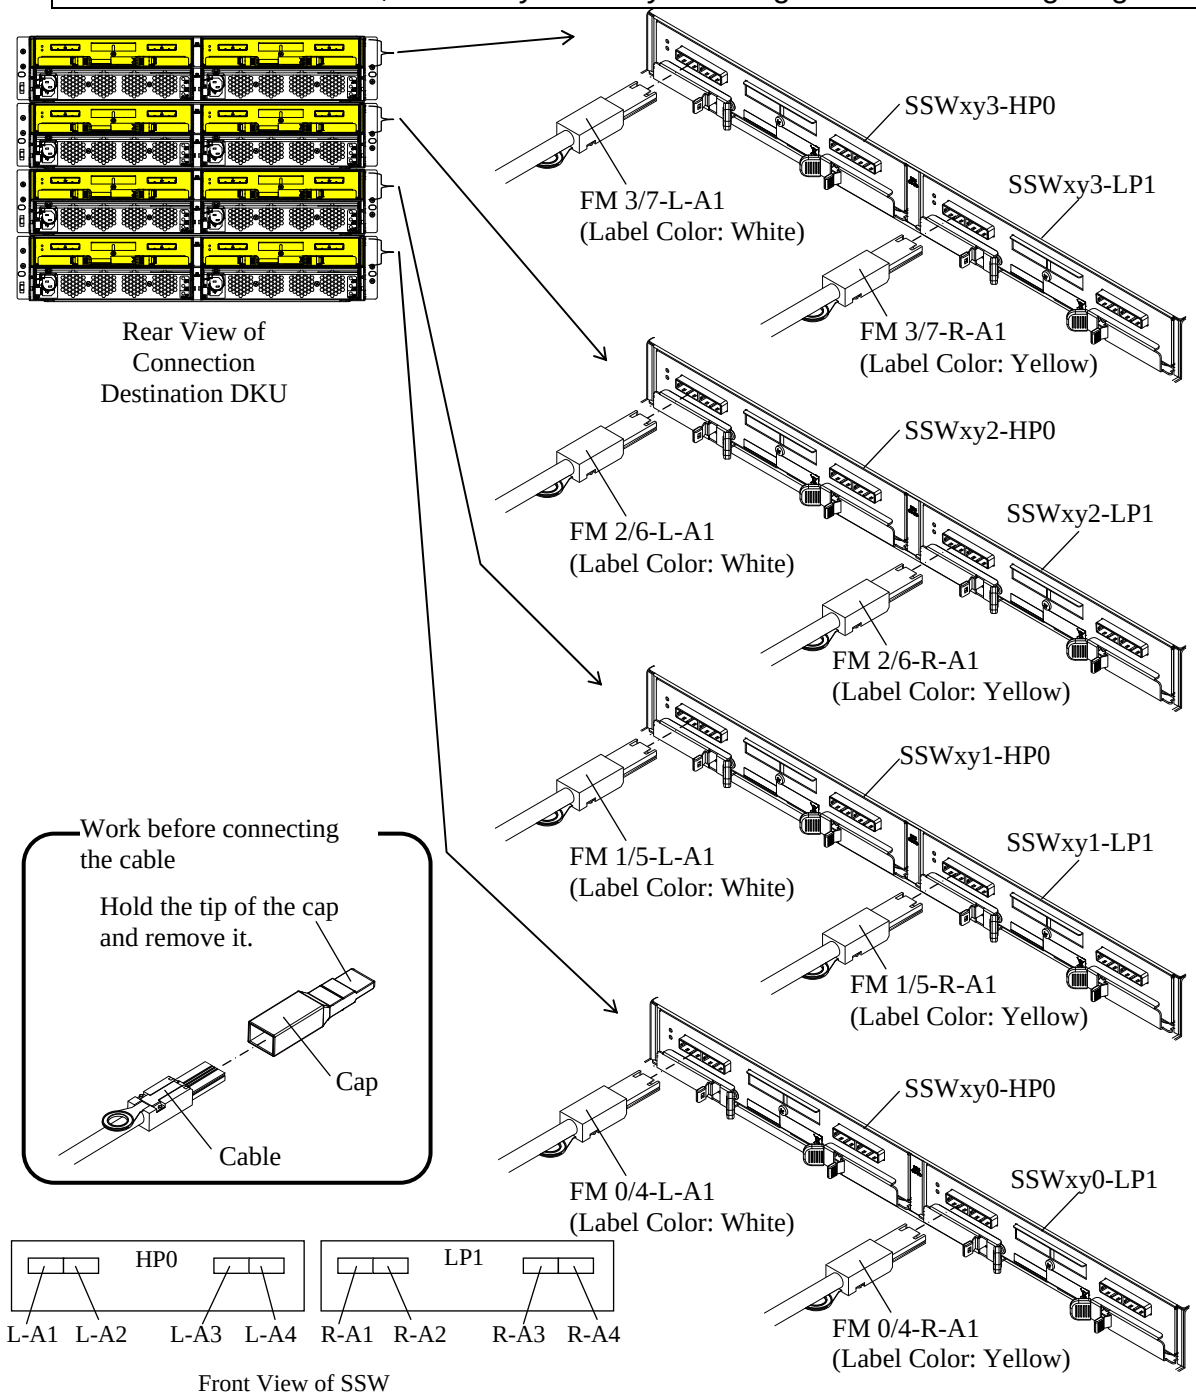

Fig. 3.12.4.18-9 Connection of Cables

Copyright © 2012, Hitachi, Ltd.

5. Attachment of Nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

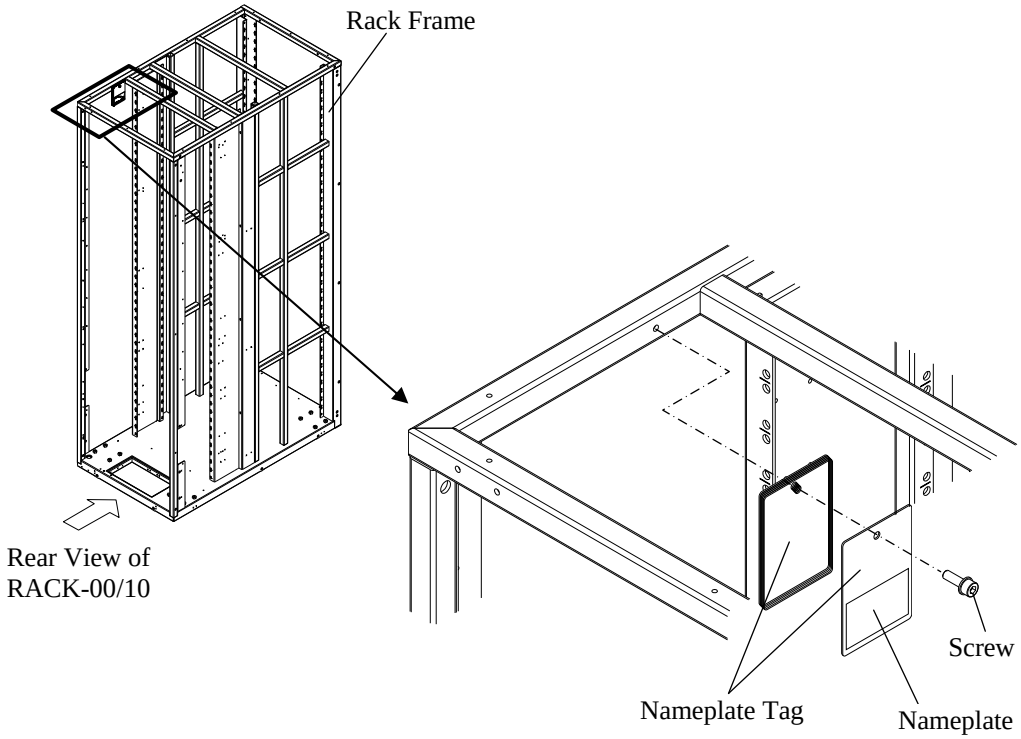

Fig. 3.12.4.18-10 Attachment of Nameplate

3.12.4.19 Installation Procedure of Device Interface Cable HFFEX (DKC-F710I-HFFEXC)

Installation Condition

DKC-F710I-HFFEXC is a cable option for the high performance model to connect FBX DKU to another FBX DKU between two racks.
Refer to below Table 3.12.4.19-1 for the condition of DKC-F710I-HFFEXC installation, and go to the appropriate page.

Table 3.12.4.19-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable HFFEX (DKC-F710I-HFFEXC) is required to install.	INST03-12C-5800
2	When Device Interface Cable HFFEX (DKC-F710I-HFFEXC) is not required to install.	INST03-12C-5840

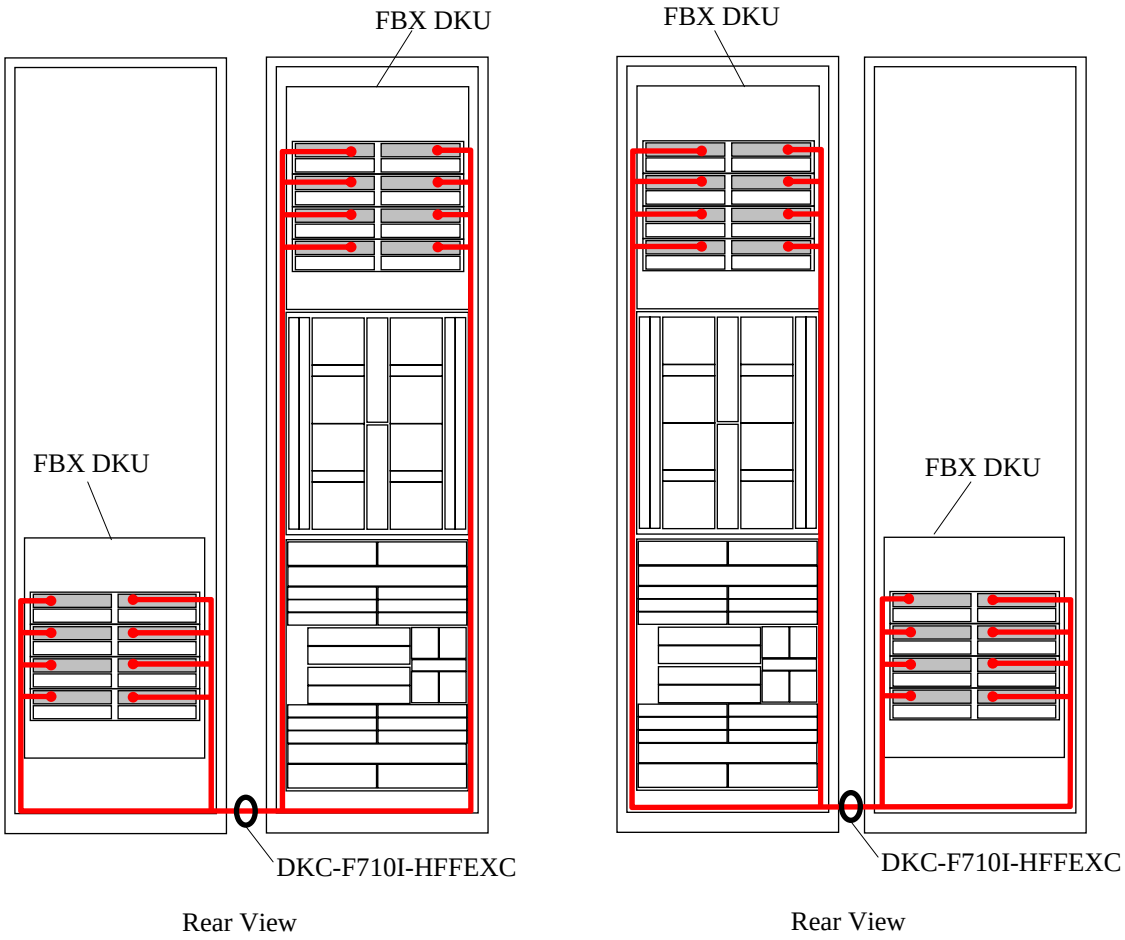

Fig. 3.12.4.19-1 Mounting Position of DEV Interface Cable

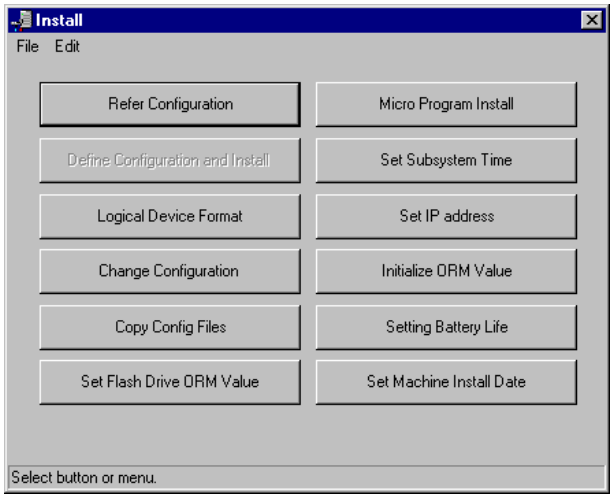
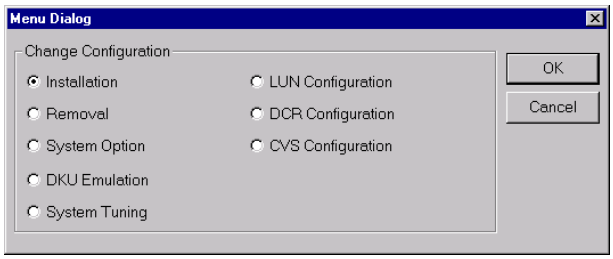
3.12.4.20 Setting up the New Device Structure Information

(1) <Mode Change>
Change the mode to Modify Mode.
Select (CL) [Install].

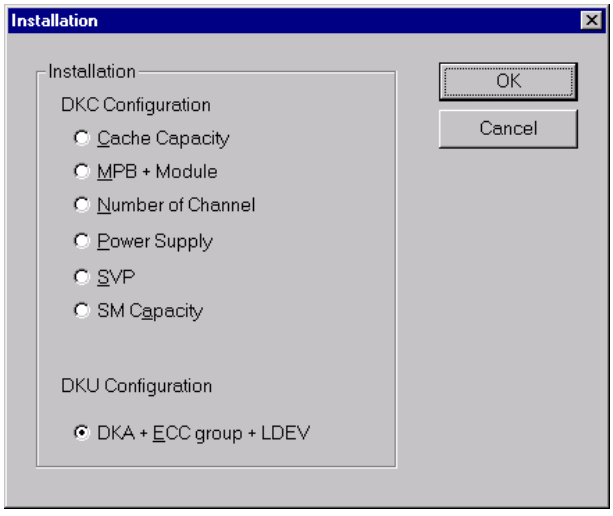
(2) <Start the 'Menu Dialog' screen>
Select (CL) [Change Configuration].



(3) <Start Device Structure Setup screen>
Select (CL) [Installation] in the "Menu Dialog" dialog box and select (CL) [OK].



(4) <Select a changed part>
Select (CL) [DKA + ECC group + LDEV], and select (CL) [OK].

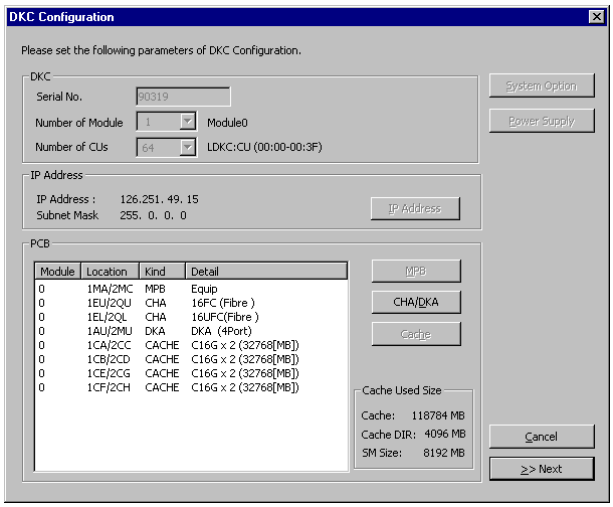


Copyright © 2012, Hitachi, Ltd.

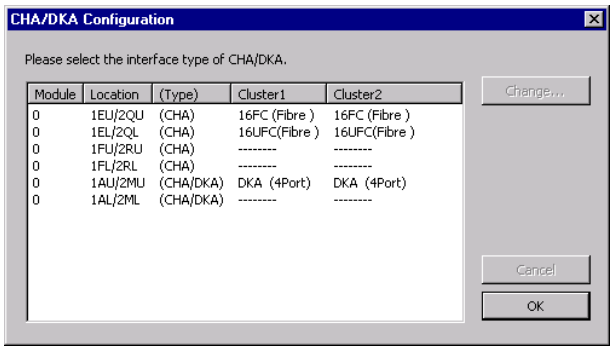
(5) <DKC Configuration screen>
Select (CL) [CHA/DKA] in the 'DKC Configuration' screen.
Go to Step (6).

After confirming input items, select (CL) the [>>Next] button.
Go to Step (7).
In the case of selecting (CL) [Cancel], this operation procedure terminates

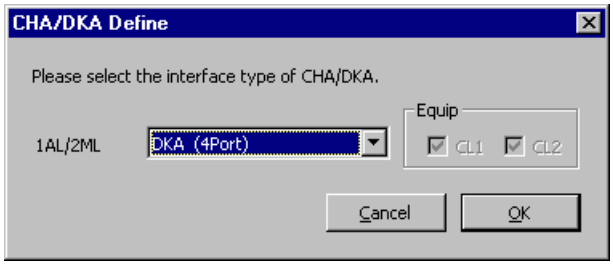
Note: There may be a case where an addition of the SM is required to add the CU.



(6) <Setting DKA>
Define the DKA in the 'CHA/DKA Configuration' screen.
Select (CL) the location to be added, and then select (CL) [Change...].
Go to Step (6)-1.
After confirming the input items, select (CL) [OK].
Go back to Step (5).



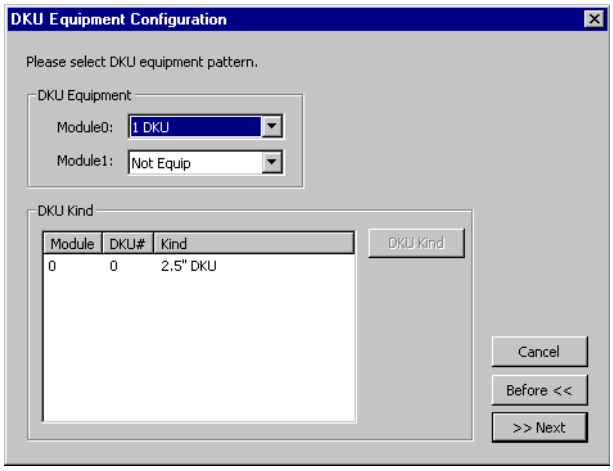
(6)-1 <Select DKA>
Define the DKA in the 'CHA/DKA Define' screen.
After setting, select (CL) [OK].
Go back to Step (6).



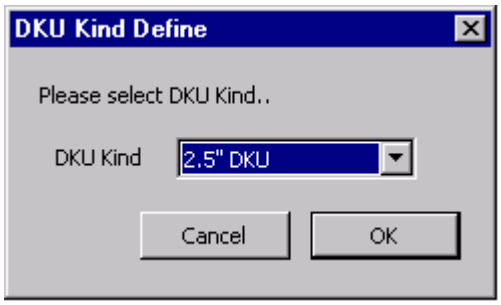
Copyright © 2012, Hitachi, Ltd.

(7) <DKU Equipment Configuration screen>
Define the pattern of DKU Equipment in the 'DKU Equipment Configuration' screen.

When you want to set the DKU type, select (CL) the installed target DKU, and then select (CL) [DKU Kind].
Go to Step (7)-1.
After setting, select (CL) [>>Next].
Go to Step (8).



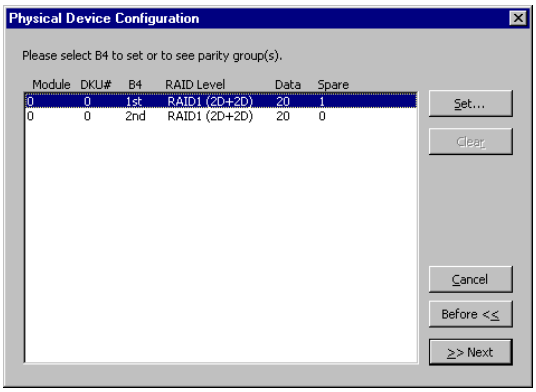
(7)-1 <DKU Kind Define screen>
Set the DKU type, select (CL) [OK].
Go back to Step (7).



Copyright © 2012, Hitachi, Ltd.

(8) <Change Drive Configuration Information>
Define the drive configuration according to the 'Physical Device Configuration' screen.
Detailed procedure is shown below.
[Set...]: Defines the parity group or spare disk. Go to Step (9).
[Clear]: Cancels the setting of the B4.
After setting up all items, select (CL) [>>Next]. Go to Step (10).

Selecting (CL) [Before<<] returns to Step (7).



• Relation between B4 and HDU Location (Refer to LOC02-40 ~ 50 for Location.)

B4	Location	
	DKU	HDU
1st	DKU-00	HDU-000, 001, 002, 003
2nd	DKU-00	HDU-004, 005, 006, 007
3rd	DKU-10	HDU-100, 101, 102, 103
4th	DKU-10	HDU-104, 105, 106, 107
5th	DKU-01	HDU-010, 011, 012, 013
6th	DKU-01	HDU-014, 015, 016, 017
7th	DKU-11	HDU-110, 111, 112, 113
8th	DKU-11	HDU-114, 115, 116, 117
9th	DKU-02	HDU-020, 021, 022, 023
10th	DKU-02	HDU-024, 025, 026, 027
11th	DKU-12	HDU-120, 121, 122, 123
12th	DKU-12	HDU-124, 125, 126, 127
13th	DKU-03	HDU-030, 031, 032, 033
14th	DKU-03	HDU-034, 035, 036, 037
15th	DKU-13	HDU-130, 131, 132, 133
16th	DKU-13	HDU-134, 135, 136, 137

B4	Location	
	DKU	HDU
17th	DKU-04	HDU-040, 041, 042, 043
18th	DKU-04	HDU-044, 045, 046, 047
19th	DKU-14	HDU-140, 141, 142, 143

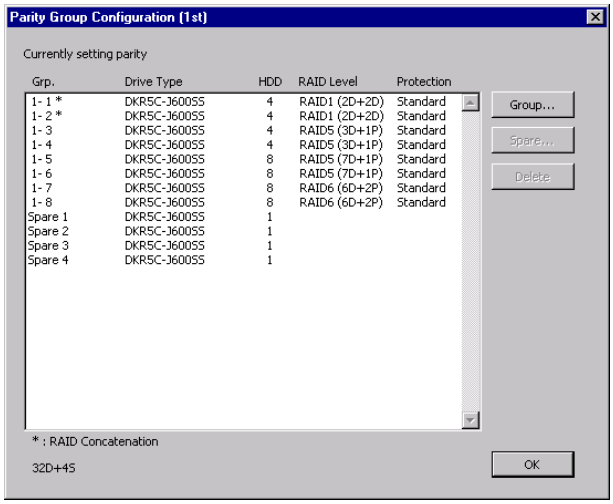
(9) <Define Parity Group>

Note: If SAS HDD and SATA HDD are concurrently installed, and LDEV Format is performed, the SAS HDD is unavailable until Format of the SATA HDD is completed. In this case, install the HDDs separately, first the SAS HDD, and then the SATA HDD. To identify SAS HDD/SATA HDD, please refer to INST01-40.

The 'Parity Group Configuration' dialog box is displayed.



[Group...]: Defines the parity group.
See Step (9)-1.

[Spare...]: Defines the spare drive.
See Step (9)-2.

[Delete]: Deletes the added parity group or spare drive.

Grp*: A parity group where RAID Concatenation is installed.

Protection: Protection Level.

- Standard: SAS drives/SSD drives.
- SATA-E: Enhanced method of SATA drives.
- SATA-W/V: Write & Verify method of SATA drives.

(Please refer to THEORY OF OPERATION SECTION)

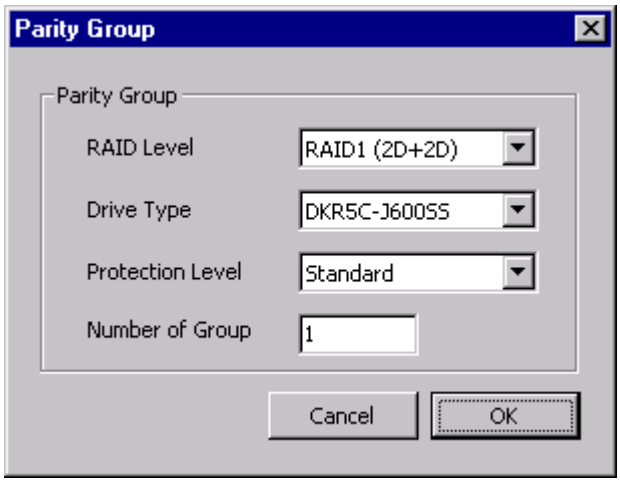
Note: If you want to set any Spare Drives in B4, please define the Spare Drives first.

After setting up all items, select (CL) [OK].
Go back to Step (8).

Copyright © 2012, 2014, Hitachi, Ltd.

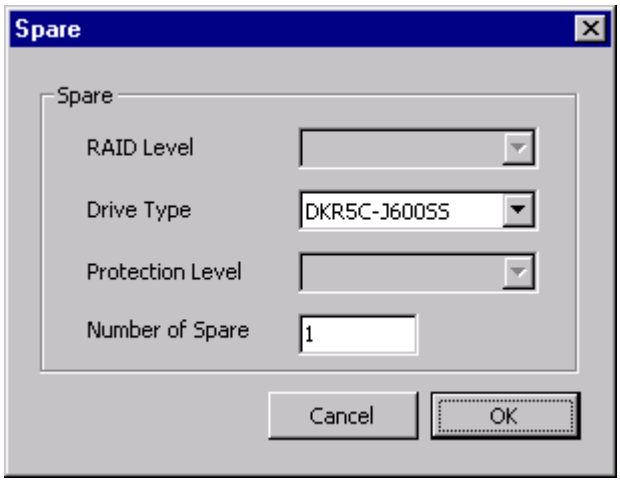
(9)-1

Define the RAID Level, the Drive Type (*1), the Protection Level and the Number of Group in the 'Parity Group' dialog box.
Then select (CL) [OK].
Go back to Step (9).



(9)-2

Define the Drive Type (*1) and the Number of Spare Drives in the 'Spare' dialog box.
Then select (CL) [OK].
Go back to Step (9).



*1: For the Drive Type, see the label on the drive.

(10) <Define Device Emulation>

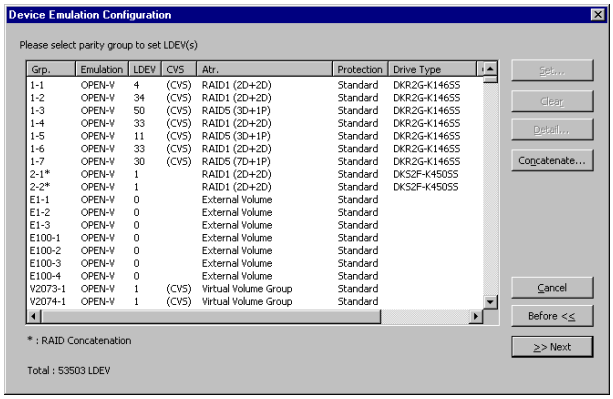
After setting up all items corresponding (10)-1 to (10)-3 for definition of Device Emulation, select (CL) [>>Next].
Selecting (CL) [Before<<] returns you to the previous screen.
In the case of only spare drive installation, select (CL) [>>Next]. Go to Step (11).

- If defining Device Emulation, go to Step (10)-1.
- If setting RAID concatenation, go to Step (10)-2.
- If defining of Customized Volume Size (CVS) and System Disk, go to Step (10)-3.

(10)-1 <Define Device Emulation>

Select (CL) parity group and select (CL) [Set...]. Go to Step (10)-1-1.

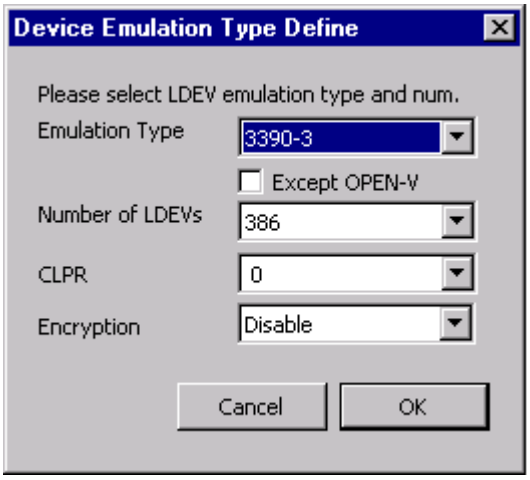
(CVS): A parity group where CVS is installed.
Grp*: A parity group where RAID Concatenation is installed.



(10)-1-1

After setting up all items in the 'Device Emulation Type Define' dialog box, select (CL) [OK].
Go back to Step (10).

Selecting (CL) [Cancel] returns to step (10)-1 without reflecting the setting items.



Note: OPEN-V is a recommended OPEN volume. To set other than OPEN-V, please select "Except OPEN-V".

Note: "0" can be set to the value of Number of LDEVs for all the emulation types.
If you don't know the LDEV size you will use, set "0". You can save time by setting "0" because LDEV format will not run.
When you set "0", please make LDEVs later using the CVS function.

Note: If 3390-A is selected, a 3390-A volume whose capacity is as large as that of standard capacity of the specified emulation type can be created by specifying (3390-3 size), (3390-9 size), (3390-L size), or (3390-M size) in the "Number of LDEVs". If a parity group consists of drives with 1TB or larger is specified, only (3390-M size) can be selected in the "Number of LDEVs".

Copyright © 2012, Hitachi, Ltd.

(10)-2 <Setting RAID concatenation>

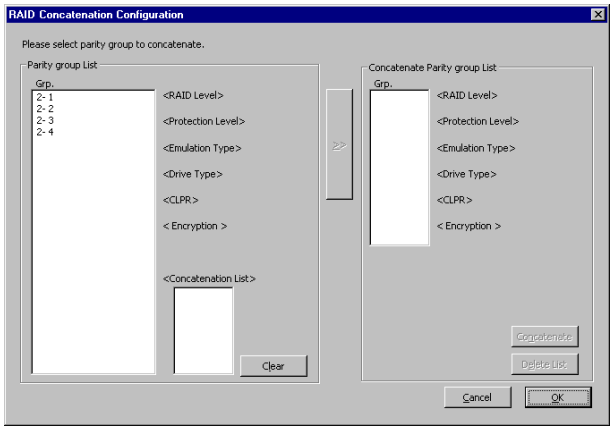
Select (CL) [Concatenate...].

When setting RAID concatenation is not executed, go back to Step (10).

(10)-2-1

Parity groups to which the RAID concatenation can be applied are displayed in the Parity group List.

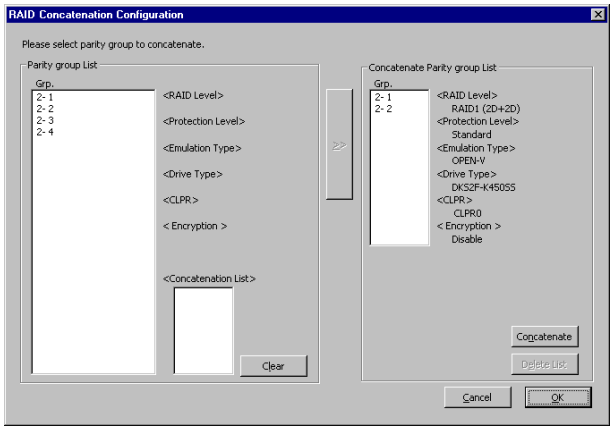
Select (CL) parity groups to which you want to apply the RAID concatenation and press (CL) the [>>] button. Go to Step (10)-2-2.



Note: Only the parity groups, which have been added and to which the RAID concatenation can be applied are displayed in the Parity group List.

(10)-2-2

The selected parity groups are registered in the Concatenate Parity group List. Then press (CL) the [Concatenate] button. Go to Step (10)-2-3.

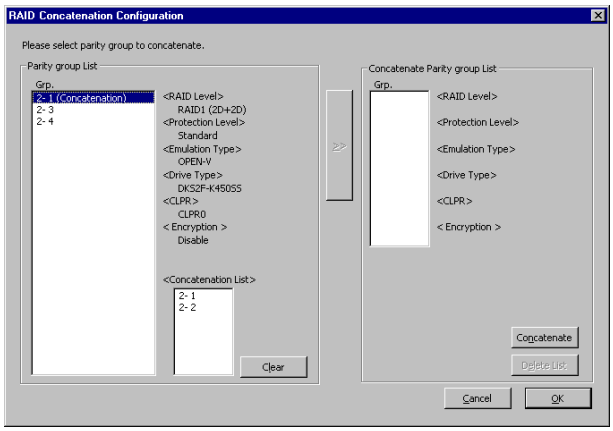


Note: The [Concatenate] button cannot be pressed if the concatenation does not meet a condition of the RAID concatenation. Adjust the number of the parity groups in the Concatenate Parity group List.

Copyright © 2012, Hitachi, Ltd.

(10)-2-3

When the RAID concatenation is completed, “(Concatenation)” is displayed in the Parity group List. Selecting the “(Concatenation)” displays the concatenated parity groups in the Concatenation List.
Pressing the [Clear] button cancels the RAID concatenation.



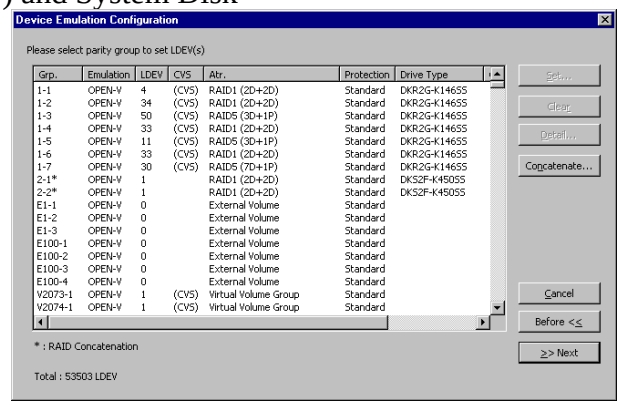
When all the settings of the RAID concatenation are completed, press (CL) the [OK] button. Go back to Step (10).
Pressing (CL) the [Cancel] button returns the routine to Step (10).

Copyright © 2012, Hitachi, Ltd.

(10)-3 <Defining of Customized Volume Size (CVS) and System Disk>

Select (CL) a parity group for which the LDEV emulation type and the number of LDEVs have been set on the 'Device Emulation Configuration' screen and select (CL) [Detail…].

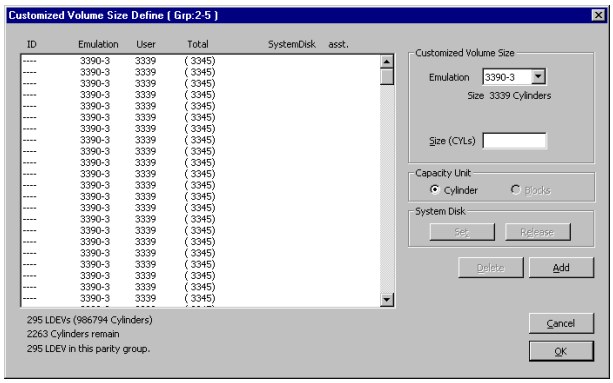
When you do not perform the CVS, go back to Step (10).



Copyright © 2012, Hitachi, Ltd.

(10)-3-1

A volume other than OPEN-V can be defined in the 'Customized Volume Size Define' screen.



- Set of a CVS volume
  Perform ① Delete of the Volume and ② Add of the Volume.
- Set of the System Disk in a normal volume
  Perform ③ Set of the System Disk.
- Set of the System Disk in a CVS volume
  Perform ① Delete of the Volume, ② Add of the Volume, and then ③ Set of the System Disk.

① Delete of the Volume

A volume can be deleted by selecting (CL) the volume from the LDEV list box and selecting (CL) [Delete].

② Add of the Volume

A volume can be added by entering the LDEV emulation type and the user size (Mbyte/Blocks or Cylinder) of the customized volume (CV) and selecting [Add].
(It can be added in the optional space "empty" by selecting (CL) "empty" from the LDEV list box.)
The two or more CVs can be registered when the operation above is performed repeatedly.

③ Set of the System Disk

The System Disk can be set by selecting (CL) the volume from the LDEV list box and selecting (CL) [Set].
The System Disk registered by mistake can be released by selecting (CL) the System Disk from the LDEV list box and selecting (CL) [Release].

Adding or deleting or setting System Disk operation can be done for any number of times. The last setting is reflected by selecting (CL) [OK].

Note: The two or more volumes can be selected and deleted or set System Disk.

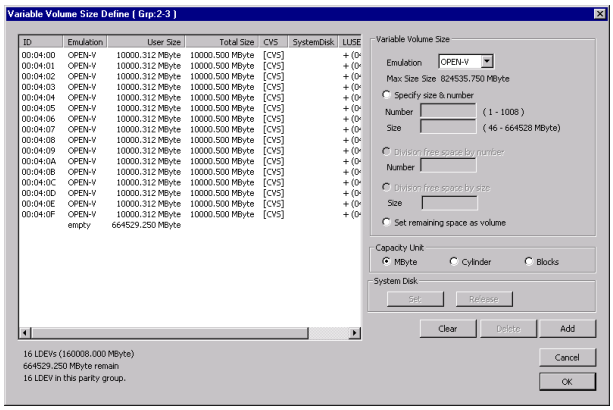
The routine returns to the preceding window by selecting (CL) [Cancel].
The routine returns to the preceding window and the change is reflected by selecting (CL) [OK].

Copyright © 2012, Hitachi, Ltd.

(10)-3-2 <Definition of OPEN-V>

Open-V can be defined in the 'Variable Volume Size Define' window.

- Set of a CVS volume
  Perform ① Delete of the Volume and ② Add of the Volume.
- Set of the System Disk in a normal volume
  Perform ③ Set of the System Disk.
- Set of the System Disk in a CVS volume
  Perform ① Delete of the Volume, ② Add of the Volume, and then ③ Set of the System Disk.



① Delete of the Volume

The volume can be deleted by selecting (CL) [Delete] in the state (CL) of selecting (CL) the volume in the LDEV list box.
All the volumes in the LDEV list box can be deleted by selecting (CL) [Clear].

② Add of the Volume

It can be added by selecting (CL) Variable Volume Size from the status "select (CL) 'empty'" or "no selection" in the LDEV list box and selecting (CL) [Add].

③ Set of the System Disk

The System Disk can be set by selecting (CL) the volume from the LDEV list box and selecting (CL) [Set].
The System Disk registered by mistake can be released by selecting (CL) the System Disk from the LDEV list box and selecting (CL) [Release].

Adding or deleting or setting System Disk operation can be done for any number of times. The last setting is reflected by selecting (CL) [OK].

Note: The two or more volumes can be selected and deleted or set System Disk.

- Variable Volume Size

"Specify size & number"	: Defines the specified number of the specified user size.
"Division free space by number"	: Defines the volume divided by the specified number. However, this can be selected only when all the volumes have been deleted.
"Division free space by size"	: Defines the volumes whose user sizes are all specified. However, this can be selected only when all the volumes have been deleted.
"Set remaining space as volume"	: Defines the volume in the remaining space (empty).

Copyright © 2012, Hitachi, Ltd.

- Capacity Unit
  "MByte" : Makes data displayed or entered by [Mbyte].
  "Cylinder" : Makes data displayed or entered by the [Cylinder].
  "Blocks" : Makes data displayed or entered by the [Blocks].
- LUSE : When the LUSE is connected, "+" is displayed.
- asst. : When Path/LUSE/Pool-VOL is defined, "+" is displayed.

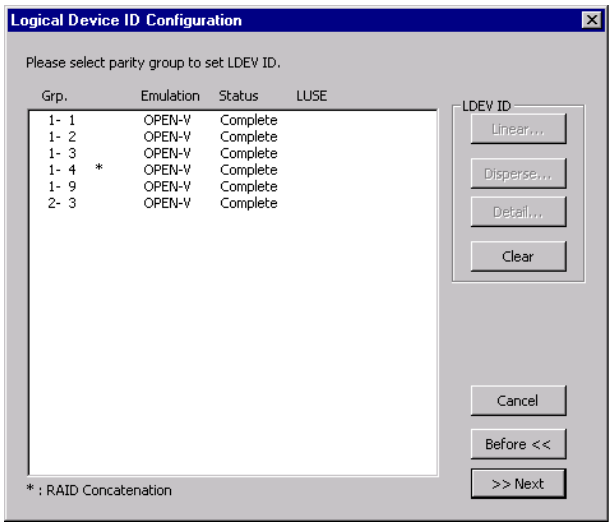
  Note: Even if the journal volume is defined, "+" is not displayed.

[Clear] : Deletes all the volumes.
[Delete] : Deletes all the selected volumes.
[Add] : Adds volumes.
[Set] : Sets System Disk.
[Release] : Release System Disk.
[Cancel] : Invalidates the setting, and returns to the preceding window.
[OK] : Confirms the setting, and returns to the preceding window.

Copyright © 2012, Hitachi, Ltd.

(11) <Define LDEV ID>

(11)-1



Definition Screen for LDEV ID.
Select (CL) the parity group to be defined and select (CL) a function from the [LDEV ID] list box.

[Linear...]: LDEV ID is assigned to LDEV in the order of parity groups. See Step (11)-3.

[Disperse...]: LDEV is assigned discretely in the order of parity groups. See Step (11)-3.

[Detail...]: A screen to define LDEV in detail is displayed. See Step (11)-2. (When plural groups are selected (CL), it is invalid.)

[Clear]: Select (CL) [Clear] to delete.

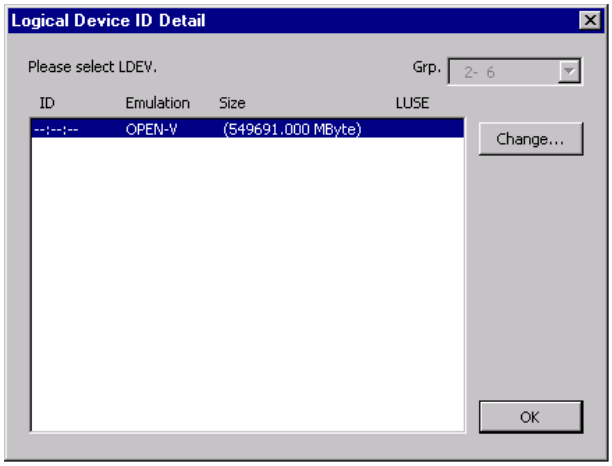
Grp*: The top parity group where RAID Concatenation is installed.

Status: Status of LDEV ID.

① “Complete” : LDEV ID is assigned.
② “-------” : LDEV ID is not assigned.
③ “Error” : Invalid LDEV ID is assigned.

After setting up all items, select (CL) [Detail...] to confirm the items that have been setup, and select (CL) [>>Next]. Go to Step (12).

(11)-2 <Detailed Definition Screen for LDEV ID>



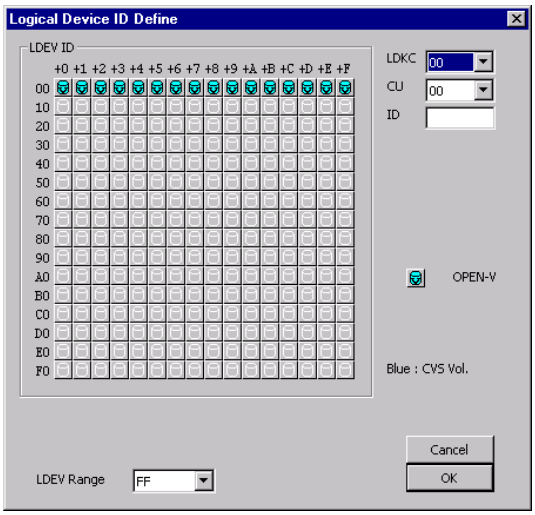
LDEV ID is defined in detail for each LDEV in the parity group.
Select (CL) LDEV from the list box and select (CL) [Change...].
The screen for LDEV ID input is displayed.
After setting, select (CL) [OK]. Go back to Step (11)-1.

• ‘-----’ is displayed in the CU area and the ID area for the LDEV to which LDEV ID is not assigned.

Note: In the case of a RAID Concatenation Group, LDEV of the parity group selected by the “Grp List” is displayed.

Copyright © 2012, Hitachi, Ltd.

(11)-3 <Input LDEV ID>

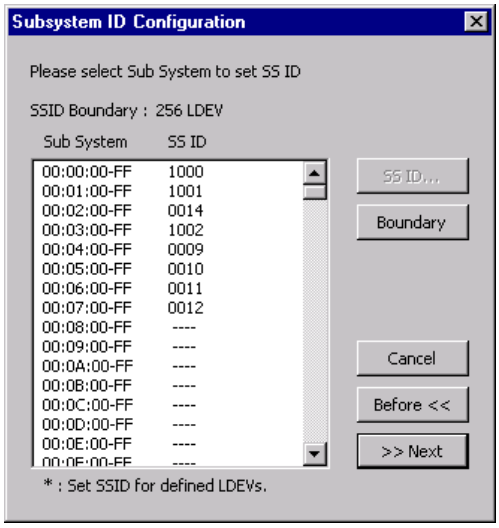


Select LDKC in the LDKC combo box.
Select CU in the CU combo box.
The status of usage of ID in the CU is displayed in the LDEV ID panel.
White disk of panel: not used
Patterned disk of panel: using
Input LDEV ID you want to set or the head LDEV ID in the ID Edit box.
After setting, select (CL) [OK].
Go back to Step (11).

Note: The definition range (terminal) is decided with LDEV Range.
For example, if LEDV Range is defined as 7F, LDEV ID is assigned only within the range of 00 to 7F.

---

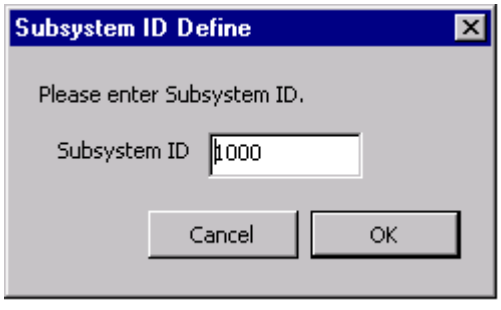
(12) <Define Subsystem ID>



To define Subsystem ID, select (CL) the item from the list box and select (CL) [SS ID...].
Go to Step (12)-1.

After setting, select (CL) [>>Next].
Go to Step (13).

(12)-1



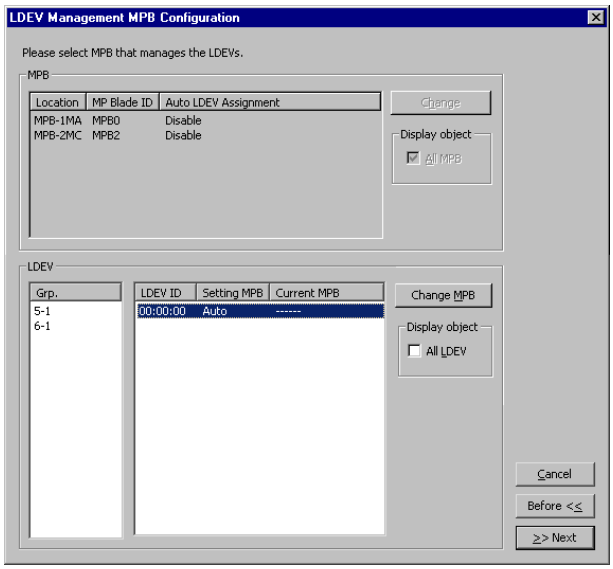
Define Subsystem ID and select (CL) [OK].
Go back to Step (12).

Copyright © 2012, Hitachi, Ltd.

(13) <Define LDEV Management MPB>

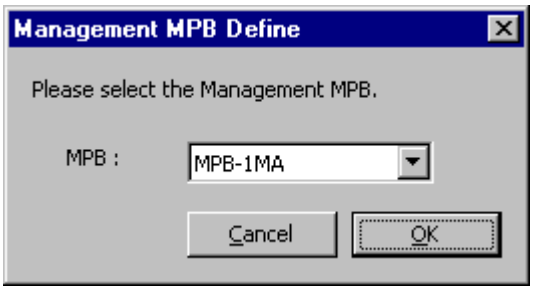
In the 'LDEV Management MPB Configuration' screen, select (CL) [Change MPB].
Go to Step (13)-1.

After the setting is completed, select (CL) [>>Next].
(Go to Step 14)



(13)-1

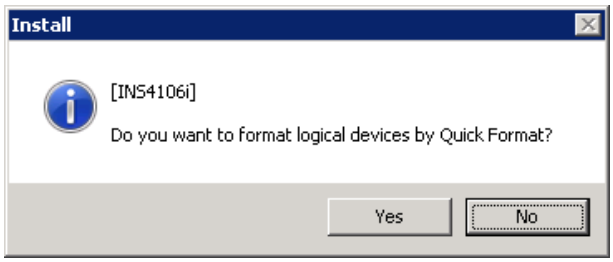
Define Management MPB and select (CL) [OK].
Go back to Step (13).



Copyright © 2012, 2014, Hitachi, Ltd.

(14) <Selection of format>

Select (CL) [Yes] in response to “Do you want to format logical devices by Quick Format?” when you execute Quick Format. When [No] is selected (CL), usual LDEV Format is executed.



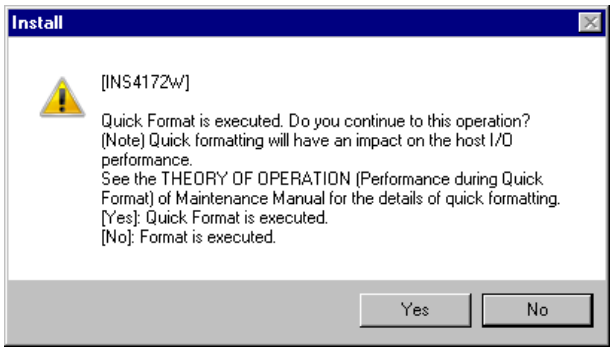
Note: Next, Quick Format cannot be executed in the shown volume.

- external volume
- Volumes whose access attribute is not Read/Write
- Pool volumes (pool-VOLs)
- Journal volumes

When [Yes] is selected Go to Step (14)-1.
When [No] is selected Go to Step (15).

(14)-1 <Execution of Quick Format>

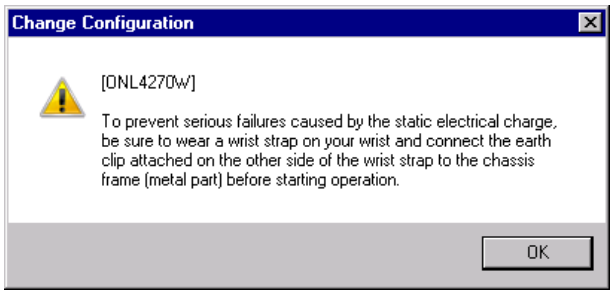
For the message “Quick Format is executed. Do you continue to this operation?
(Note) Quick formatting will have an impact on the host I/O performance.
See the THEORY OF OPERATION (Performance during Quick Format) of Maintenance Manual for the details of quick formatting.
[Yes]: Quick Format is executed.
[No]: Format is executed.”, select (CL) [Yes] when Quick Format is to be executed. Select (CL) [No] when normal LDEV format is to be executed.



Copyright © 2012, Hitachi, Ltd.

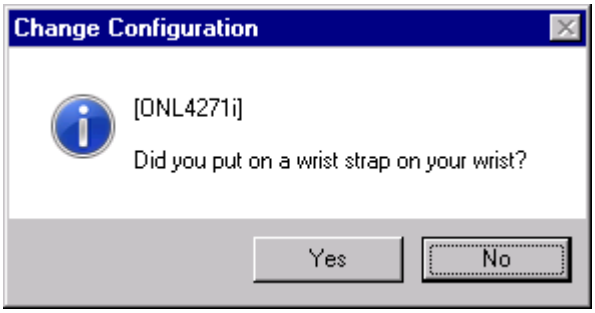
(15) <Wear a wrist strap>

Select (CL) [OK] in response to “To prevent serious failures caused by the static electrical charge, be sure to wear a wrist strap on your wrist and connect the earth clip attached on the other side of the wrist strap to the chassis frame (metal part) before starting operation.”.



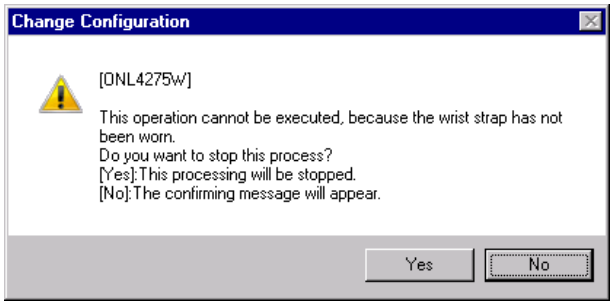
(15)-1<Confirm wearing wrist strap>

In response to a message, “Did you put on a wrist strap on your wrist?”.
Select [Yes] when wrist strap is on your wrist.
Select [No] when there is no wrist strap on your wrist.
When [No] is selected (CL), go to Step (15)-2.



(15)-2

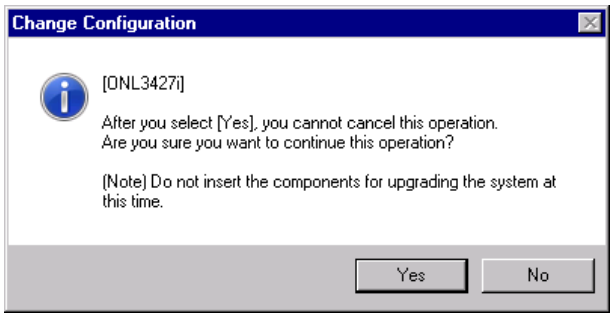
In response to a message, “This operation cannot be excuted, because the wrist strap has not been worn. Do you want to stop this process?
[Yes]: This processing will be stopped.
[No]: This confirming message will appear.”
When [Yes] is selected (CL), the routine is returned to Step (2) on page INST03-12C-5840.
When [No] is selected (CL), returned to Step (15).



Copyright © 2012, 2014, Hitachi, Ltd.

(16) <Start installation>

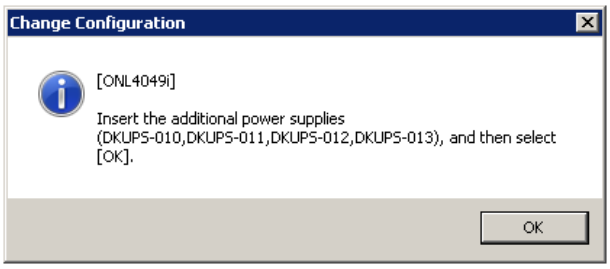
Select (CL) [Yes] in response to “After you select [Yes], you cannot cancel this operation. Are you sure you want to continue this operation? (Note) Do not insert the components for upgrading the system at this time.”.
When [No] is selected (CL), the routine is returned to Step (2) on page INST03-12C-5840.



---

(17)

Select (CL) [OK] in response to “Insert the additional power supplies (DKUPS-nnn,DKUPS-nnn,DKUPS-nnn,DKUPS-nnn), and then select [OK].”.

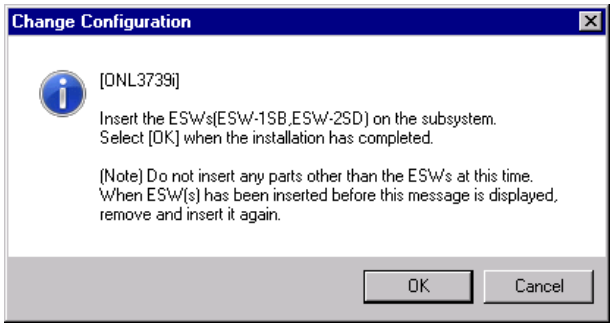


- When a message is displayed, perform the install hardware components according to the DKUPS hardware installation procedure. (Refer to INST03-06-230)

---

(18) <Perform ESW hardware installation>

“Insert the ESWs(ESW-nnn,ESW-nnn) on the subsystem. Select [OK] when the installation has completed. (Note) Do not insert any parts other than the ESWs at this time. When ESW(s) has been inserted before this message is displayed, remove and insert it again.” is displayed, when ESW install is required.



- When a message is displayed, perform the install hardware components according to the ESW hardware installation procedure.
  When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) needs to be installed, install it together with the ESW.
- When a message is not displayed, go to Step (2) in “6. SVP pre procedure (INST03-12C-6075).”

Note: Do not press the [OK] button by mistake before installing the part(s) to be added in the subsystem.

3.12.4.21 Installation Procedure of Express Switch and Inter-Controller Connecting Kit (DKC-F710I-ESW/MDEXC)

Installation Condition

The Express Switch (DKC-F710I-ESW) is an indispensable option that is to be installed when the subsystem configuration is one of the following.

In case of DKC-0

① Addition of the first set (1SA/2SC)
- Indispensable option

② Addition of the second set (1SB/2SD)
- When the high performance model is selected
- When the CHA is installed in the Option 2 (1FU/2RU) or the Option 3 (1FL/2RL) of the CHA slots
- When the DKA or the CHA is installed in the Option 1 (1AL/2ML) of the DKA slots

In case of DKC-1

① Addition of the first set (1SE/2SG)
- Indispensable option

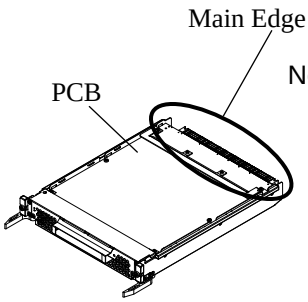
② Addition of the second set (1SF/2SH)
- When the high performance model is selected
- When the CHA is installed in the Option 2 (1HU/2UU) or the Option 3 (1HL/2UL) of the CHA slots
- When the DKA or the CHA is installed in the Option 1 (1LL/2XL) of the DKA slots

Twin DKC Model

For the twin DKC model, the ESWs that are installed in the DKC-0 and the DKC-1 should be the same in number.
- When ESWs are installed in the ESW slot option 1 (1SB/2SD) of the DKC-0, ESWs should be installed in the ESW slot option 1 (1SF/2SH) of the DKC-1 even if it fails to meet the installation requirements.
- When ESWs are installed in the ESW slot option 1 (1SF/2SH) of the DKC-1, ESWs should be installed in the ESW slot option 1 (1SB/2SD) of the DKC-0 even if it fails to meet the installation requirements.

Copyright © 2012, Hitachi, Ltd.

1. Insertion of ESW PCB
   a. Loosen the screws and remove the dummy plates. (This procedure is not required if the PCB should be installed in the Basic slots.)
   b. Insert the ESW PCBs to the DKC and fasten the screws.



Note: 1. Check that the main edge connector of the PCB has no deformation, damage or sticking of dust before installing the PCB. (See INST03-01-70.)
2. When installing the PCB, hold the right and left of the PCB with both hands, and insert it straight not to contact the neighboring PCB.

Table 3.12.4.21-1 Location of the ESW PCB

DKC	Addition No.	Slot No.		Location No.		Remarks
		Cluster 1	Cluster 2	Cluster 1	Cluster 2	
DKC-0	Basic	1SA	2SC	ESW-1SA	ESW-2SC	
	Option 1	1SB	2SD	ESW-1SB	ESW-2SD	
DKC-1	Basic	1SE	2SG	ESW-1SE	ESW-2SG	
	Option 1	1SF	2SH	ESW-1SF	ESW-2SH	

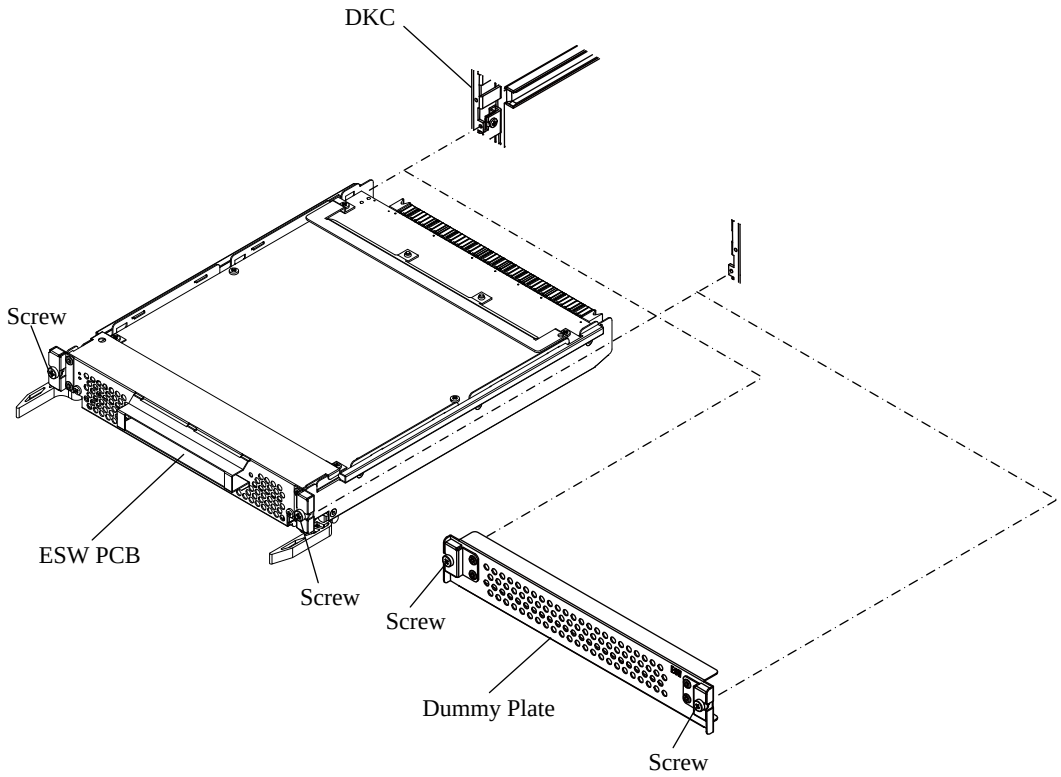


Fig. 3.12.4.21-1 Insertion of ESW PCB

Copyright © 2012, Hitachi, Ltd.

2. Storage of Dummy Plates (This procedure is not required if the PCB should be installed in the Basic slots.)
   a. Remove the pocket ASSY from the front of the frame.
   b. Install the two removed dummy plates in the pocket ASSY, and tighten them with the four screws.
   c. Install the pocket ASSY in the front of the frame.

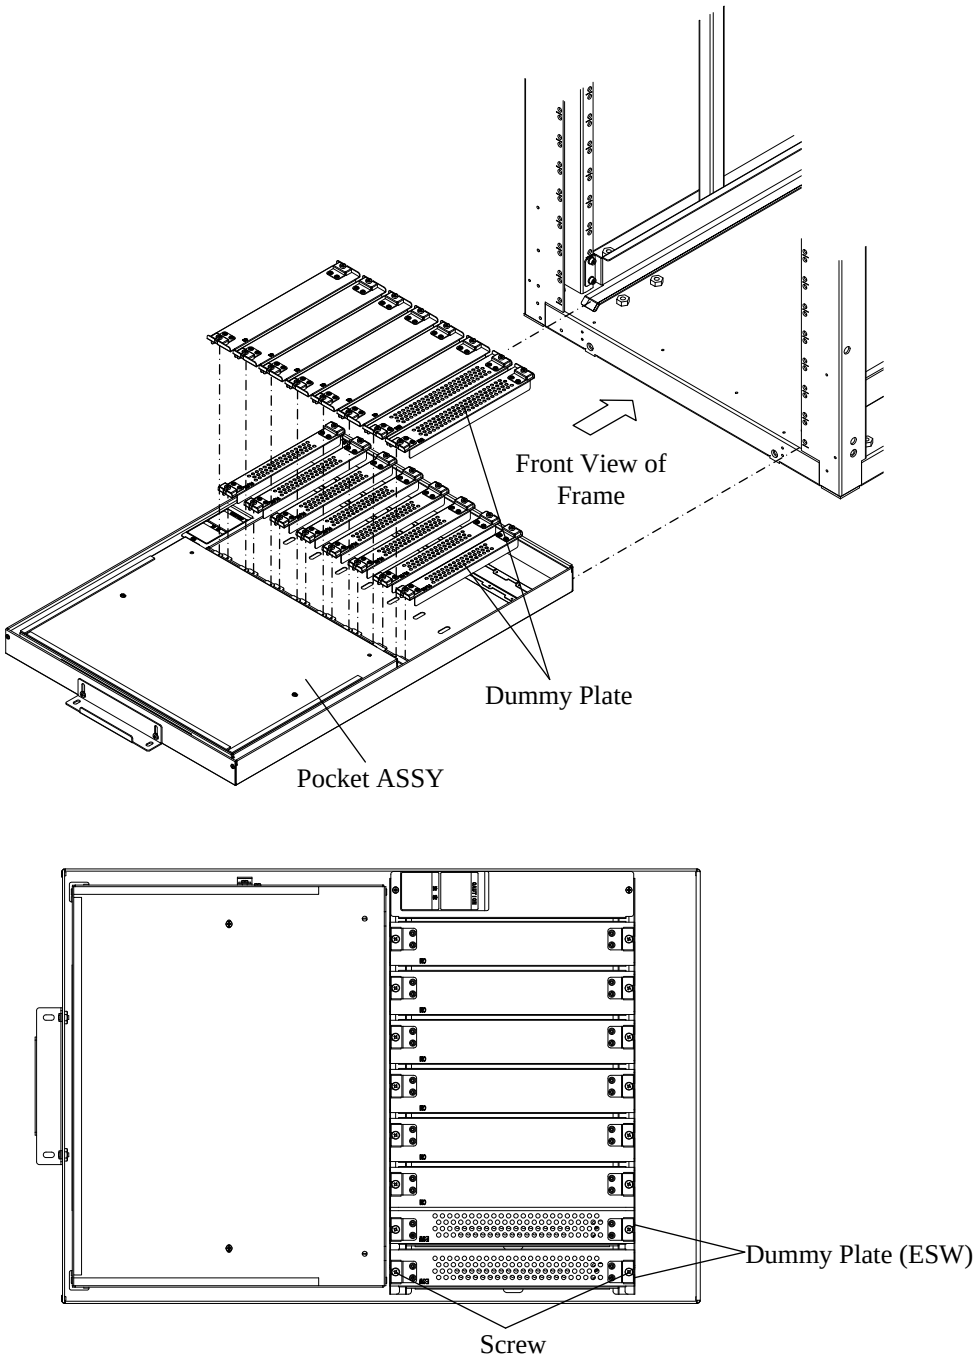

Fig. 3.12.4.21-2 Storage of Dummy Plates

Copyright © 2012, Hitachi, Ltd.

3. Attachment of the nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

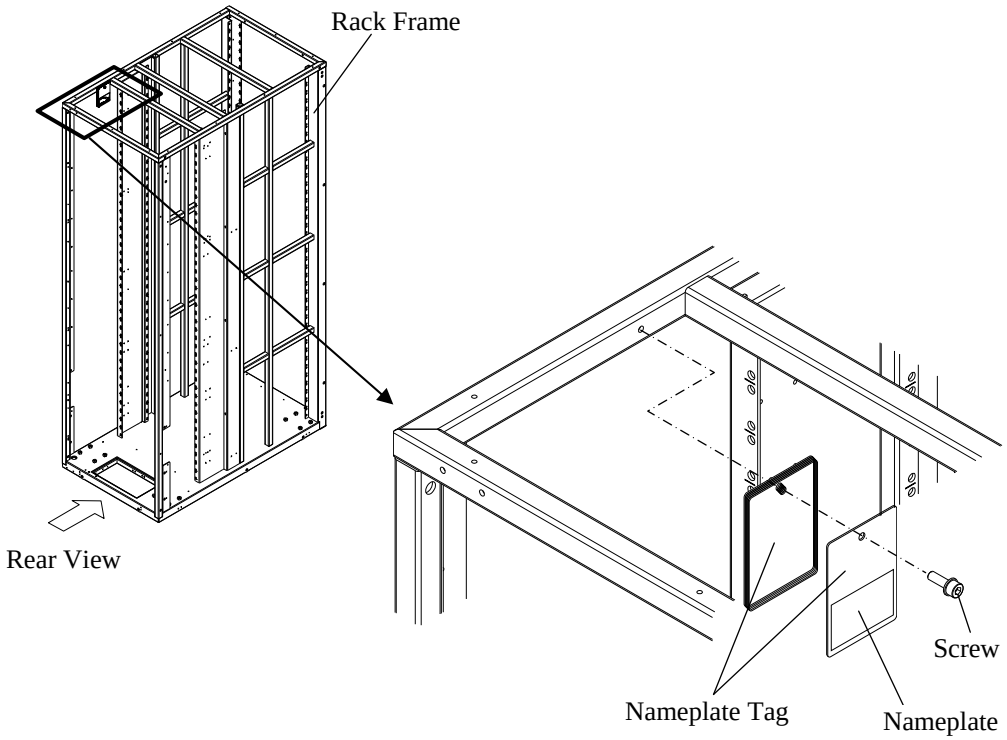

Fig. 3.12.4.21-3 Attachment of Nameplate

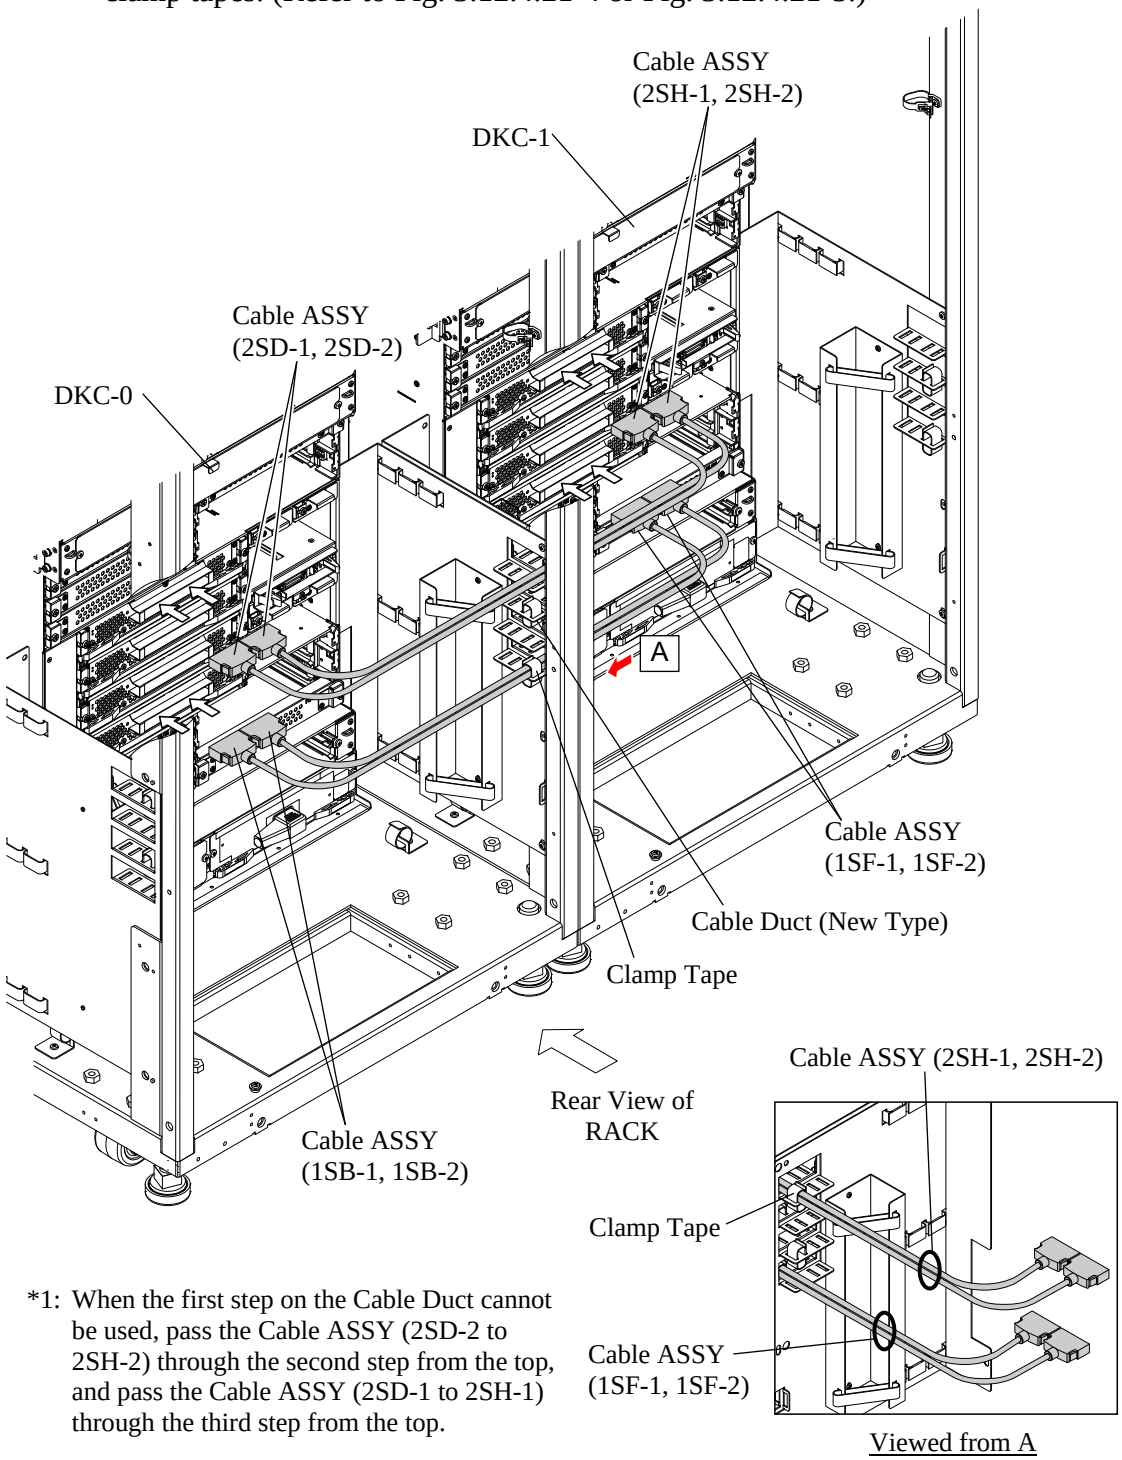
Copyright © 2014, Hitachi, Ltd.

4. When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) is required to install, install the cable ASSY.
   When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) is not required to install, go to the procedure 6 (INST03-12C-6075).

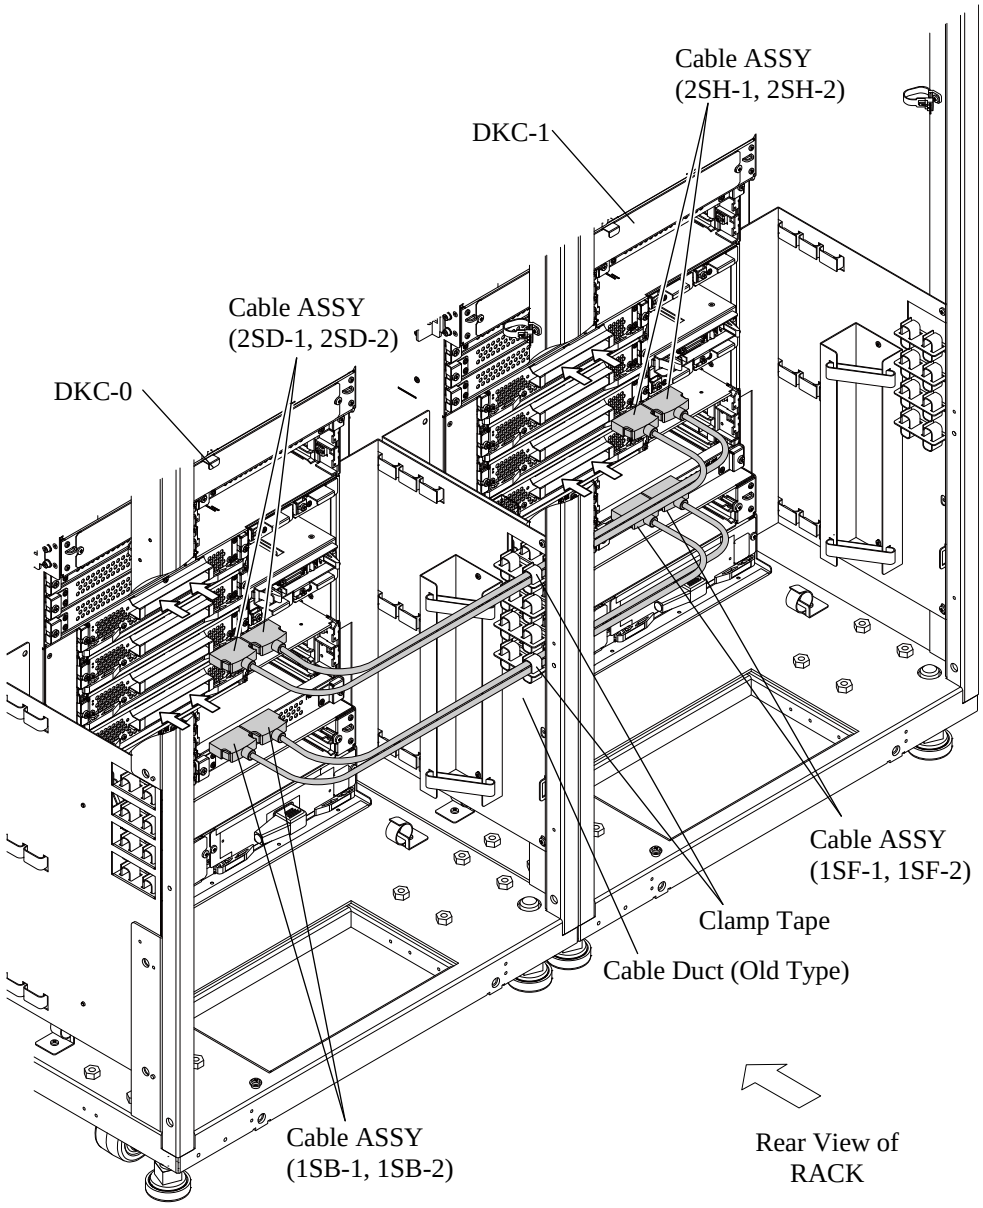
   a. Wire the four Cable ASSYs to the rear side of the RACK, and fix them with the two or four clamp tapes. (Refer to Fig. 3.12.4.21-4 or Fig. 3.12.4.21-5.)



*1: When the first step on the Cable Duct cannot be used, pass the Cable ASSY (2SD-2 to 2SH-2) through the second step from the top, and pass the Cable ASSY (2SD-1 to 2SH-1) through the third step from the top.

Fig. 3.12.4.21-4 Installation of Cables (DKC-0 ↔ DKC-1, New Type)

Copyright © 2014, Hitachi, Ltd.



*1: When the first step on the Cable Duct cannot be used, pass the Cable ASSY (2SD-2 to 2SH-2) through the second step from the top, and pass the Cable ASSY (2SD-1 to 2SH-1) through the third step from the top.

Fig. 3.12.4.21-5 Installation of Cables (DKC-0 ↔ DKC-1, Old Type)

Copyright © 2014, Hitachi, Ltd.

b. Remove the four black caps from the ESW (1SB and 2SD) of the DKC-0, and connect the cables (1SB-1, 1SB-2, 2SD-1 and 2SD-2).
c. Remove the four black caps from the ESW (1SF and 2SH) of the DKC-1, and connect the cables (1SF-1, 1SF-2, 2SH-1 and 2SH-2).

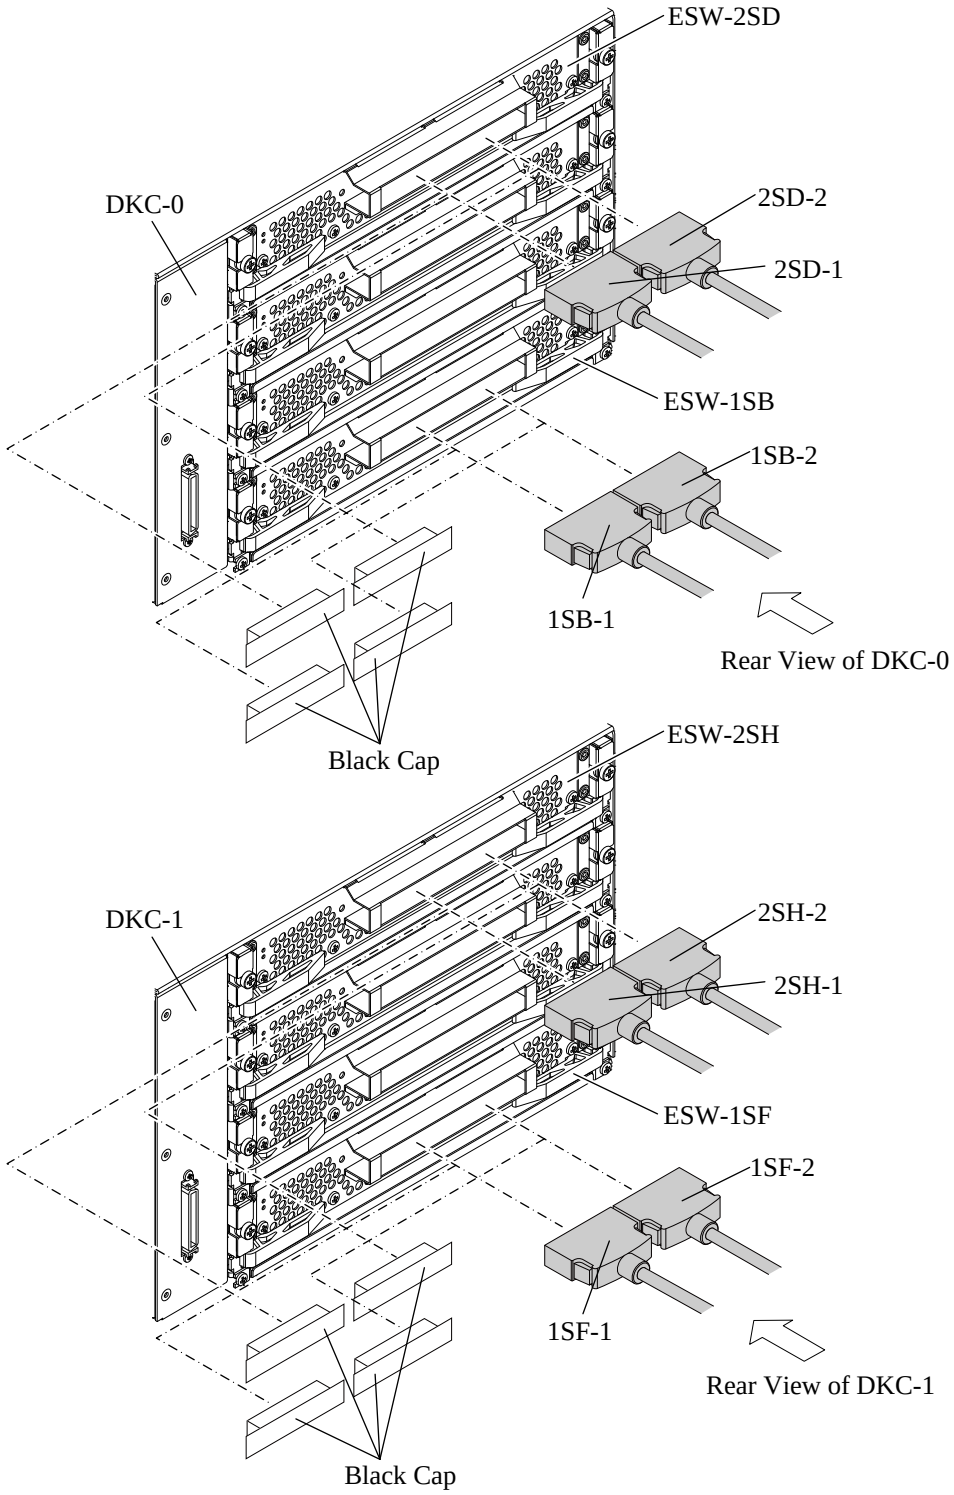


Fig. 3.12.4.21-6 Connection of Cables

Copyright © 2014, Hitachi, Ltd.

5. Attachment of Nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

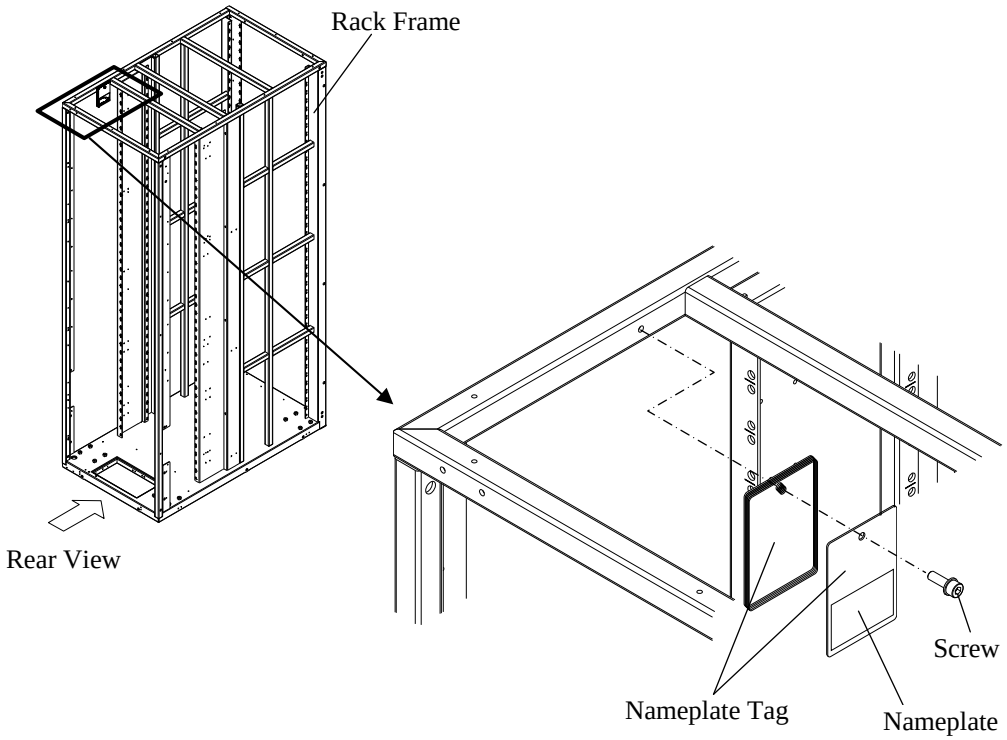

Fig. 3.12.4.21-7 Attachment of Nameplate

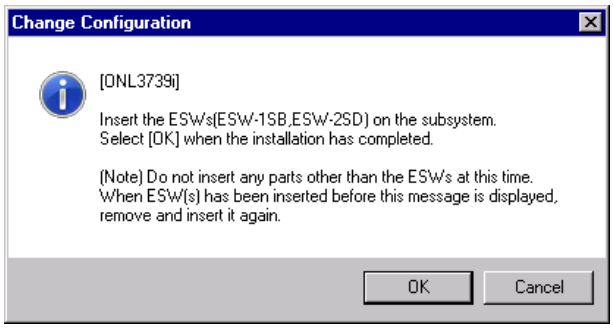
6. SVP pre procedure

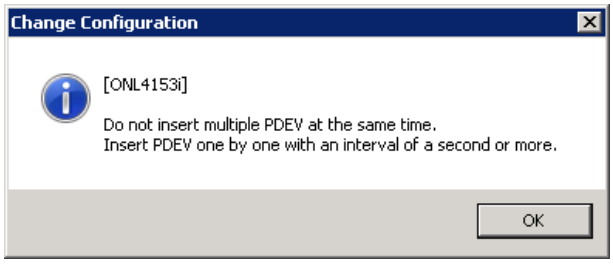
(1) <Making sure of completion of the hardware addition>
After the ESW addition is completed, select (CL) [OK] in response to a message, "Insert the ESWs(ESW-nnn,ESW-nnn) on the subsystem. Select [OK] when the installation has completed. (Note) Do not insert any parts other than the ESWs at this time. When ESW(s) has been inserted before this message is displayed, remove and insert it again.".



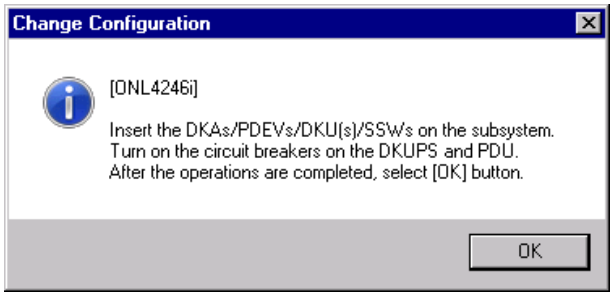
(2) <Download microprogram>
Microprograms are automatically downloaded for each processor.

(3) <Install DKA>
"Upgrading of the DKA..."

(4) <Notes when insert of PDEV>
"Do not insert multiple PDEV at the same time. Insert PDEV one by one with an interval of a second or more." is displayed. Select (CL) [OK].



(5) <Check that hardware components are installed>
At this point refrain from pressing the [OK] button.
"Insert the DKAs/PDEVs/DKU(s)/SSWs on the subsystem. Turn on the circuit breakers on the DKUPS and PDU. After the operations are completed, select [OK] button." is displayed.



Note: When the breaker of PDU is OFF, please turn it on.

Copyright © 2012, Hitachi, Ltd.

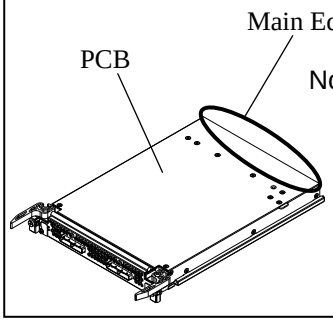
3.12.4.22 Installation Procedure of SAS Control Adapter (DKC-F710I-SCA)

Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

1. Insertion of the PCBs
   a. If the dummy plates are installed in the installation location, loosen the screws and remove the dummy plates. Refer to the Table 3.12.4.22-1 and Fig. 3.12.4.22-1.
      If not, go to step b.

Note: Remove the dummy plate just before installing the PCB.
If the dummy plate is kept removed for a long time, the wind doesn't flow among installed PCBs, causing the PCBs' temperature rise which may result in temperature warning or temperature alarm.

   b. Insert the PCBs to the correct locations in the DKC and fasten the screw.



Note:
- Check that the main edge connector of the PCB has no deformation, damage or sticking of dust before installing the PCB. (See INST03-01-70.)
- When installing the PCB, hold the right and left of the PCB with both hands, and insert it straight not to contact the neighboring PCB.

Table 3.12.4.22-1 Inserting Location

DKC	Addition No.	Location No.		Number of DKAs set through the SVP		Remarks
		Cluster 1	Cluster 2			
DKC-0	Basic	DKA-1AU	DKA-2MU	2	4	
	Option 1	DKA-1AL	DKA-2ML	—		
DKC-1	Basic	DKA-1LU	DKA-2XU	2	4	
	Option 1	DKA-1LL	DKA-2XL	—		

Copyright © 2012, Hitachi, Ltd.

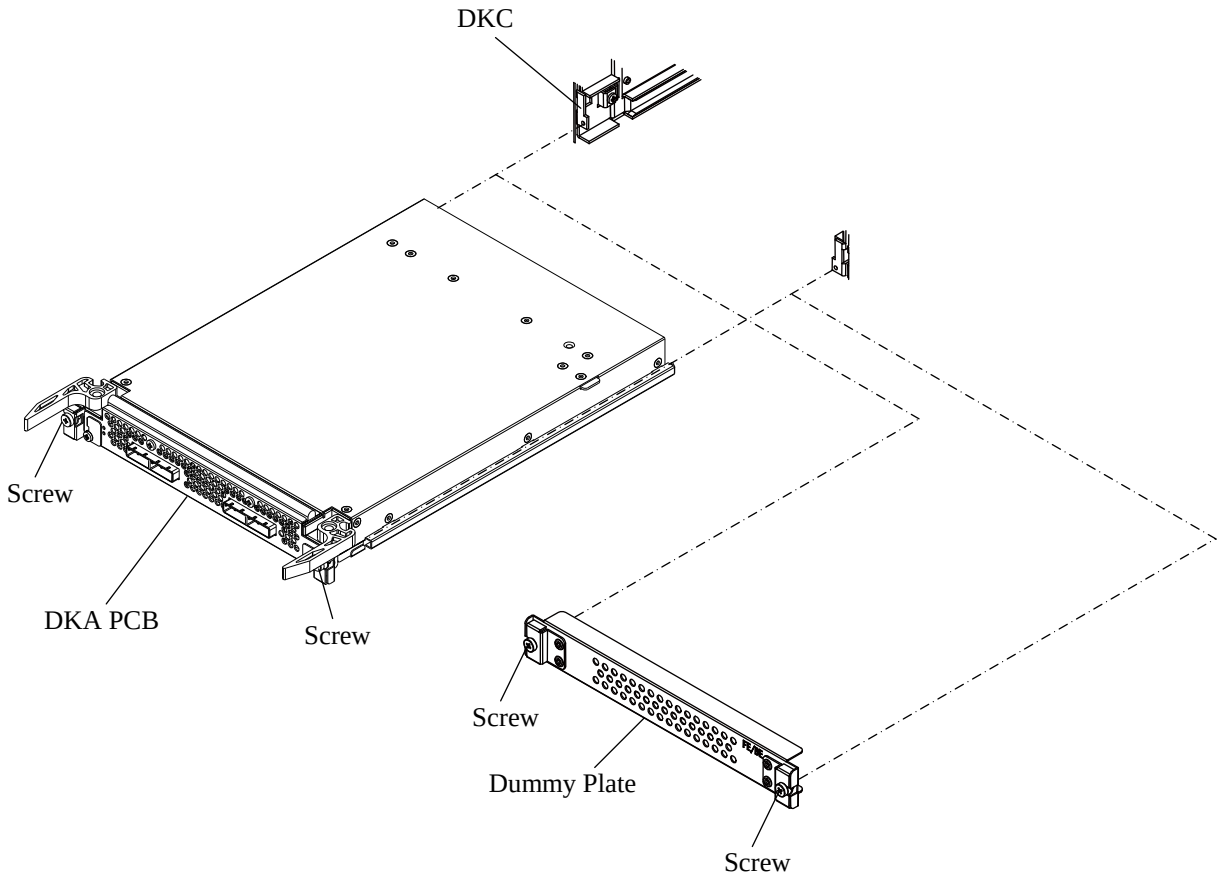


Fig. 3.12.4.22-1 Insertion of PCB

Copyright © 2012, Hitachi, Ltd.

2. Storage of Dummy Plates (This procedure is not required if the PCB should be installed in the Basic slots.)
   a. Remove the pocket ASSY from the front of the frame.
   b. Install the two removed dummy plates in the pocket ASSY, and tighten them with the four screws.
      When dummy plates are installed in the upper part, remove the upper dummy plates once, install the lower dummy plates, and then install the upper dummy plates again.
   c. Install the pocket ASSY in the front of the frame.

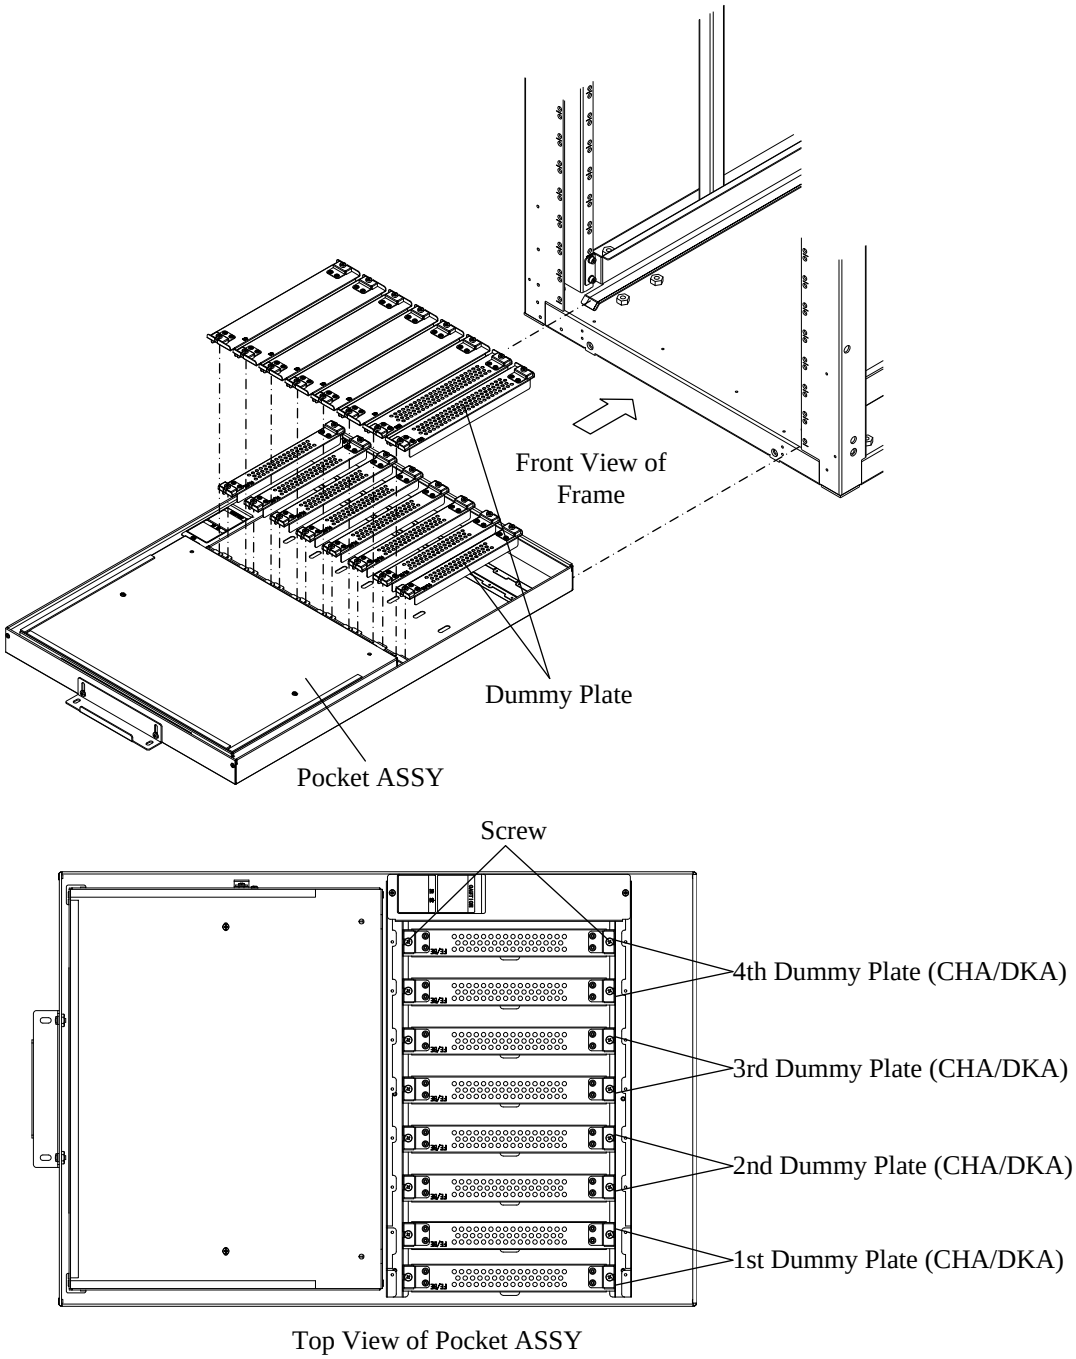

Fig. 3.12.4.22-2 Storage of Dummy Plates

3. Connection of cables
   In the case of Basic in DKC-0

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

a. Remove the caps from the DEV interface cables.
b. Connect the cables to the DKA PCBs in the DKC-0.

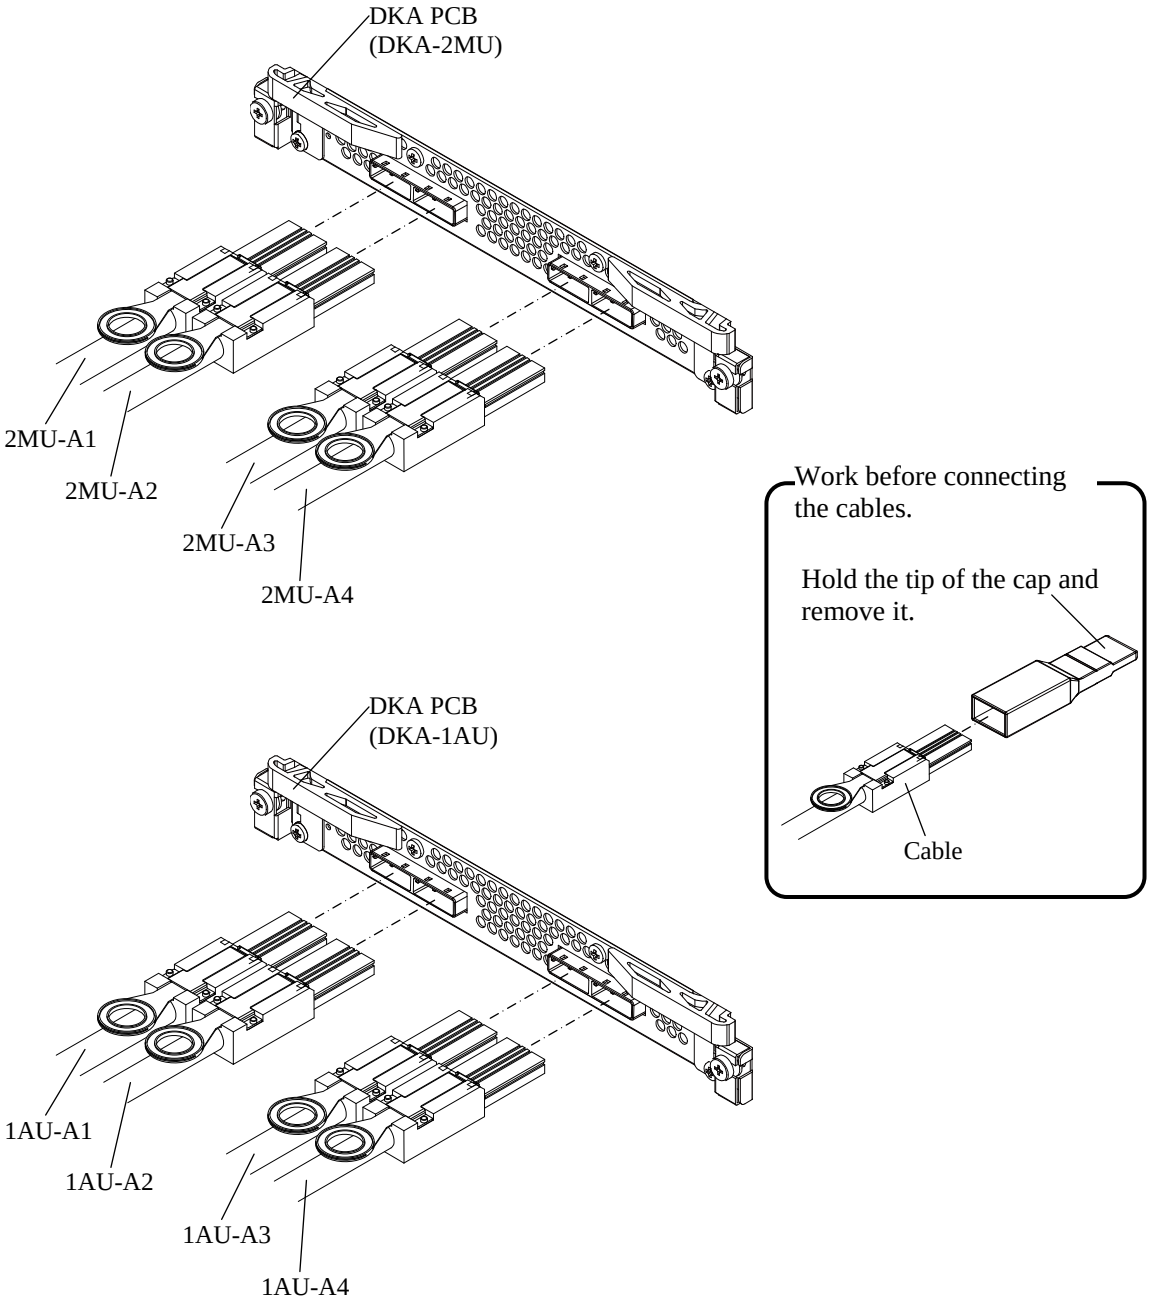

Fig. 3.12.4.22-3 Connection of cable (Basic in DKC-0)

Copyright © 2012, Hitachi, Ltd.

In the case of Option 1 in DKC-0

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

a. Remove the caps from the DEV interface cables.
b. Connect the cables to the DKA PCBs in the DKC-0.

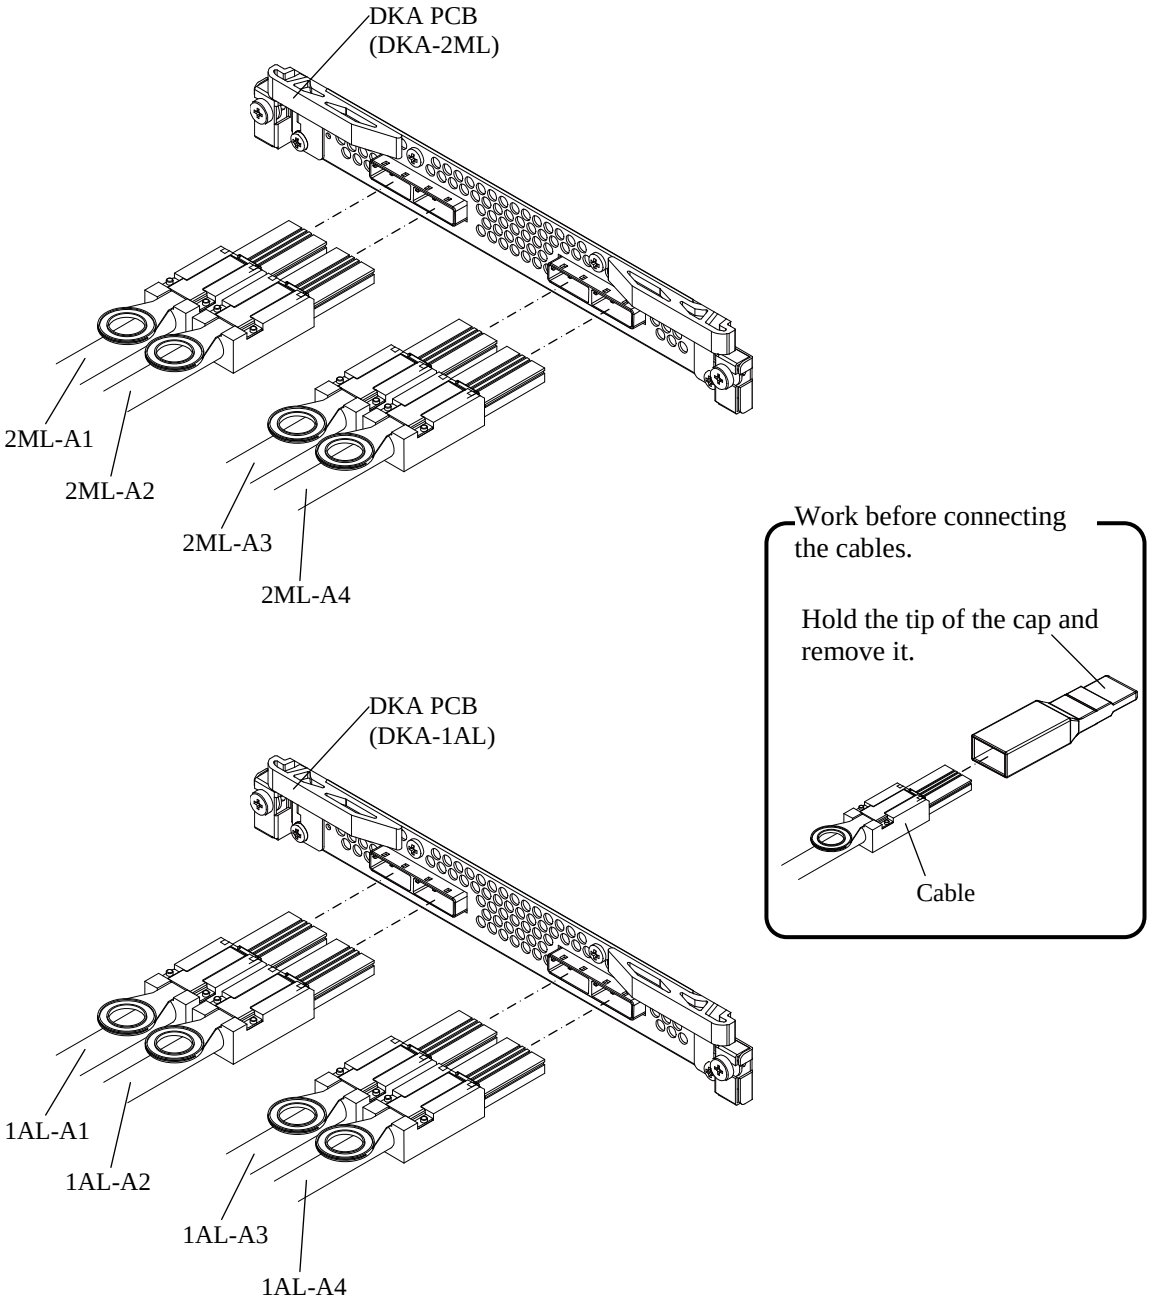

Fig. 3.12.4.22-4 Connection of cable (Option 1 in DKC-0)

3.12.4.23 Installation Procedure of drive

> **⚠ CAUTION**
>
> If No Charging of FMD (SIM = 50EXYY) occurs in installation of a FMD, the FMD ACTIVE LED will change to low-speed blinking. In this case, it takes 90 minutes at most for the FMD ACTIVE LED to go out and for the battery in the FMD to be fully charged.

1. Confirmation of position to install drive
   (i) RAID5 (3D+1P) / RAID1 (2D+2D), DKU for 3.5 inch Drive
   Relations between the installation locations of the RAID groups and the RAID group numbers set through the SVP are shown in Table 3.12.4.23-1.

2. Installation of the Drive

2-1 In case of 3.5 inch/2.5 inch drive

> Notice: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

To increase drives in DKU, opening the FAN door of DKU is necessary.
Though there are four FAN doors per DKU, only one door can be opened at once.
Therefore, the FAN door can be opened from ① to ④ order by repeating the procedure from a to e.

a. Loosen the two screws and open the FAN door.

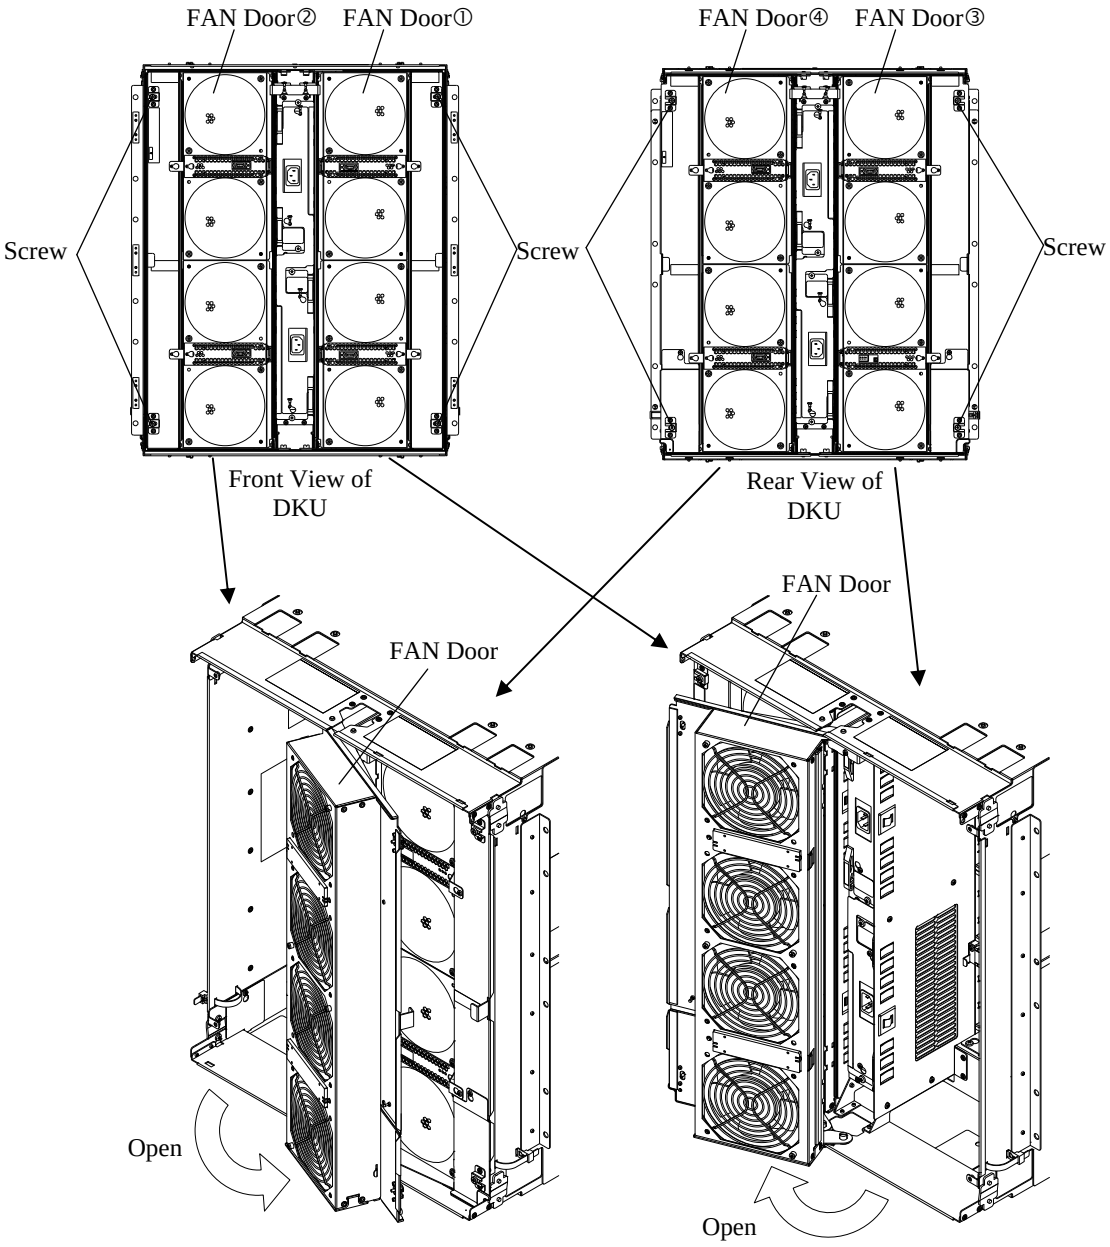

Fig. 3.12.4.23-13 Opening of FAN Door

Copyright © 2012, Hitachi, Ltd.

b. Remove the dummy canister from the HDU.

Notice: Since the HDD is a precision component, handle it very carefully not to apply a vibration or shock to it.

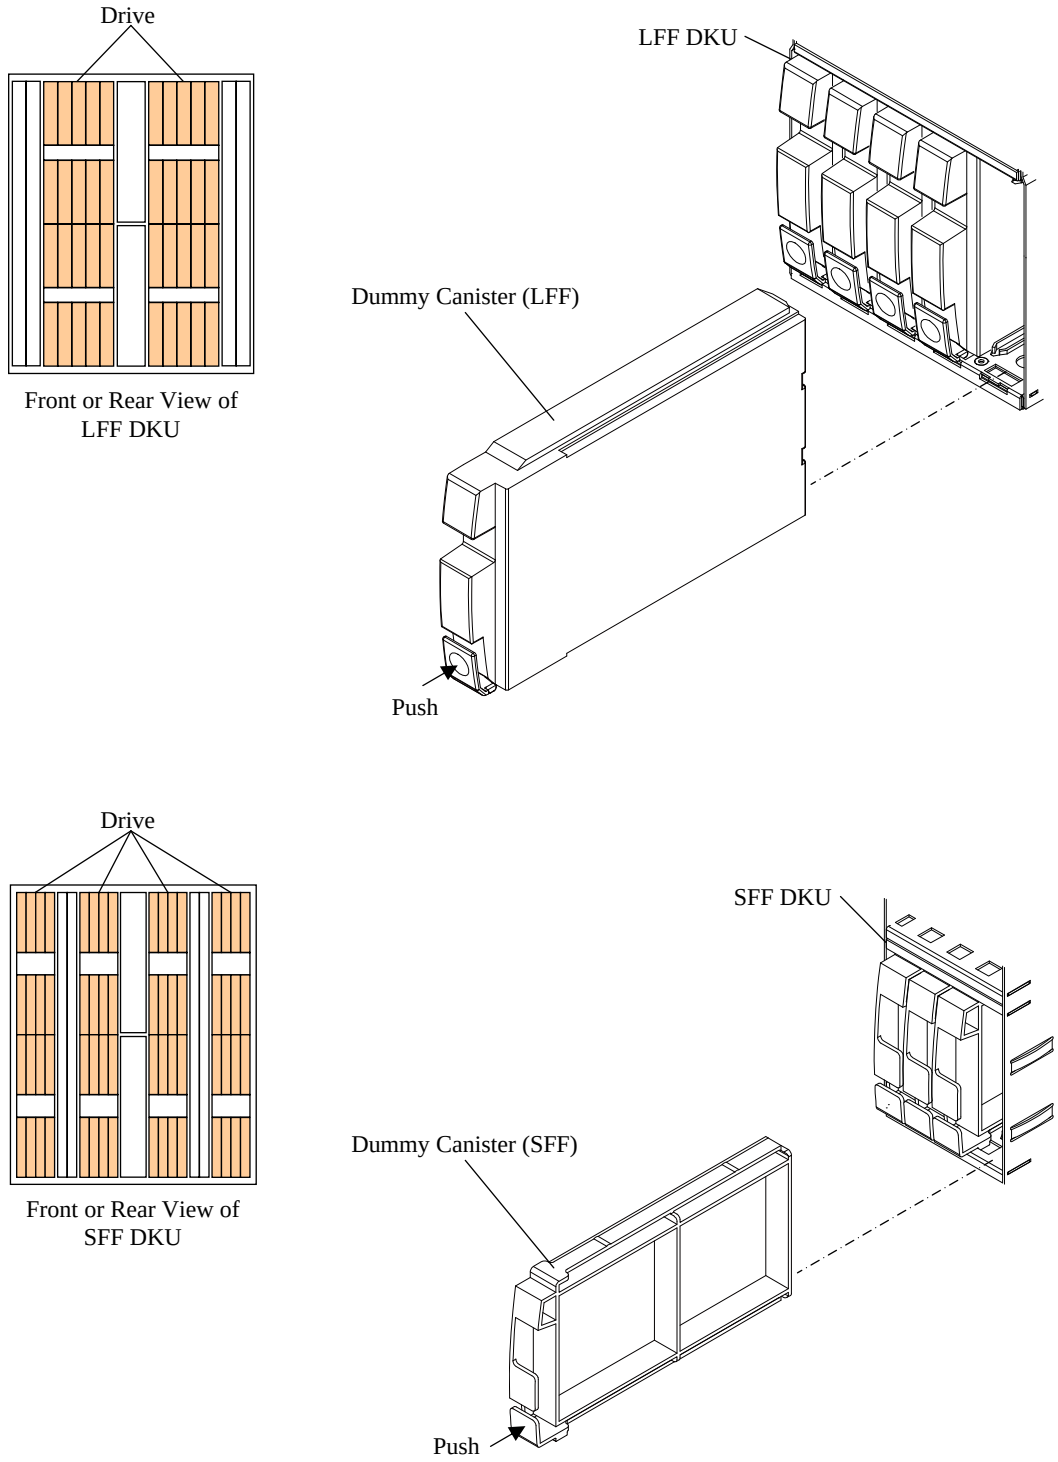

Fig. 3.12.4.23-14 Removal of Dummy Canister

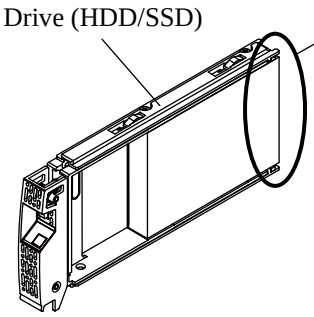
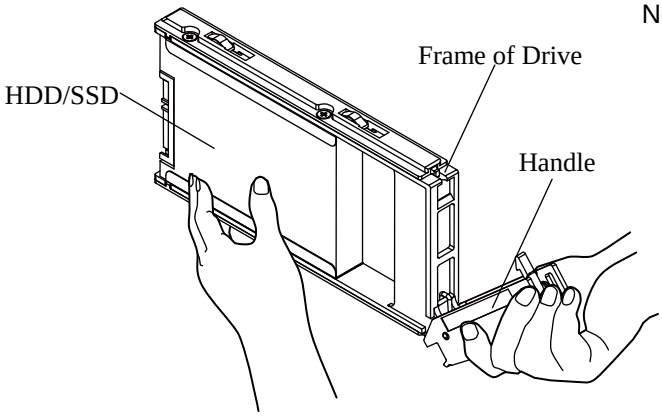
Copyright © 2012, Hitachi, Ltd.

c. Check the condition of the drive before installing it.



Note: Check that the main edge connector of the drive (HDD/SSD) has no deformation, damage or sticking of dust before installing the drive.

Handling of Drive

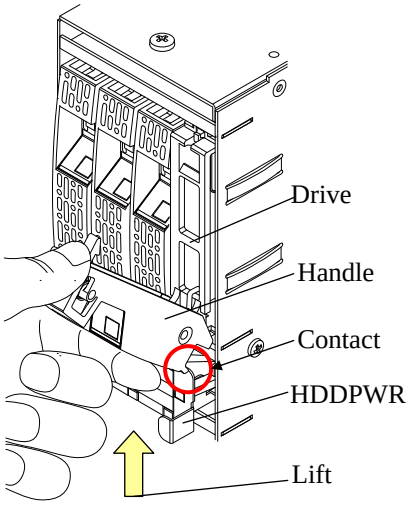


Note on the installation: Do not insert the drive by pushing its frame.

Copyright © 2012, Hitachi, Ltd.

d. Drive install procedure

Caution:
When two or more HDDs are inserted at the same time (*1), the already operating HDD might have blockade.
Insert HDD one by one at a second (*2) interval.
Don't insert HDD that doesn't define in the configuration.
*1: Able to insert HDDs to both front and rear at the same time.
*2: Interval of time necessary for stabilizing the voltage of back board after an HDD's insertion.

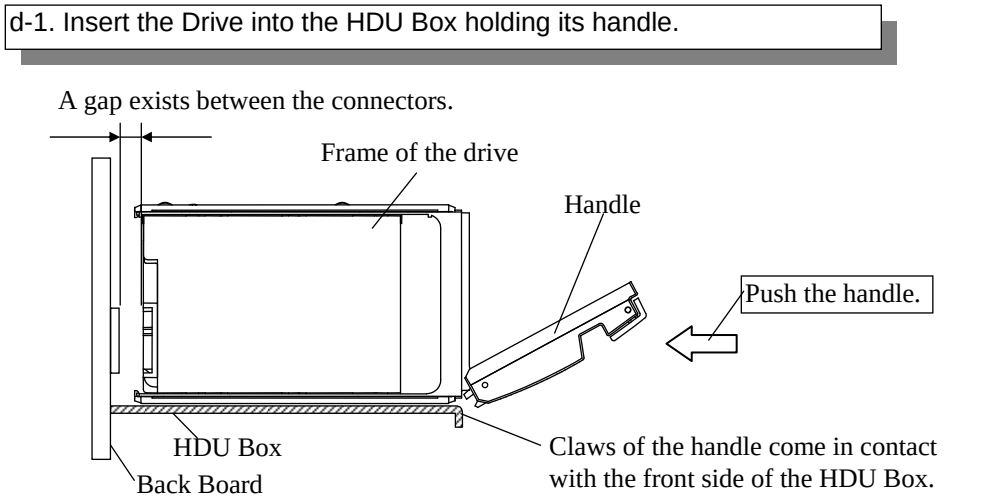


Instruction for the insertion and removal of the 2.5-inch drive:

The upper part of HDDPWR might come in contact with the lower part of the drive, and it becomes an obstruction of the insertion and removal at the time of the 2.5-inch drive insertion and removal. In this case, avoid the HDDPWR by lifting the drive lightly.

Copyright © 2012, Hitachi, Ltd.

d-1 Insert the drive into the HDU holding its handle. (Insert the drive until the claws that are located at the bottom of the handle come in contact with the front side of the HDU.)
d-2 Turn the handle at a stroke by pushing its top with your thumb. (Turn the handle until it latches with the stopper. Do not stop the handle on its way of turning.)



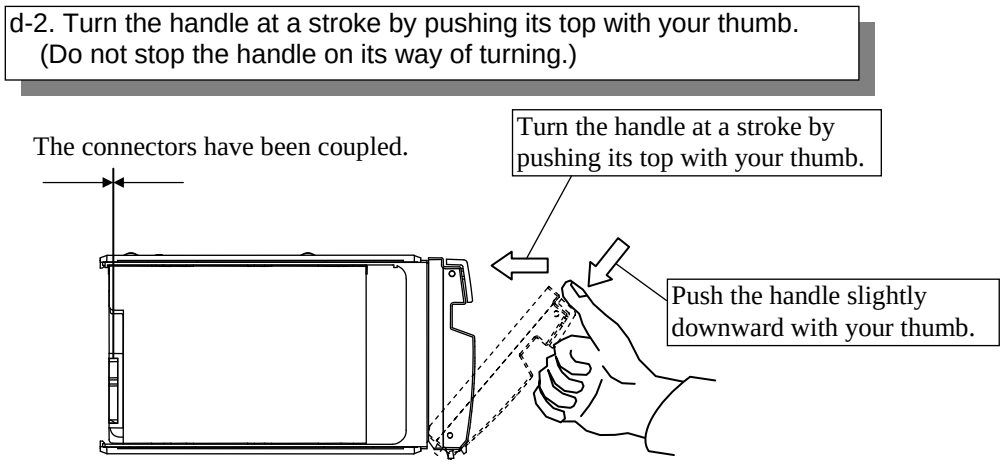


Fig. 3.12.4.23-15 Method of Installing Drive

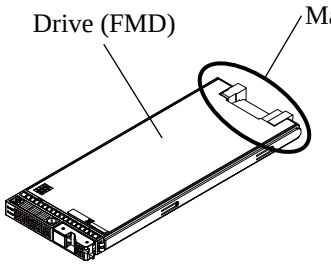
e. Close the FAN door, and tighten the two screws. (Refer to Fig. 3.12.4.23-13.)

Copyright © 2012, Hitachi, Ltd.

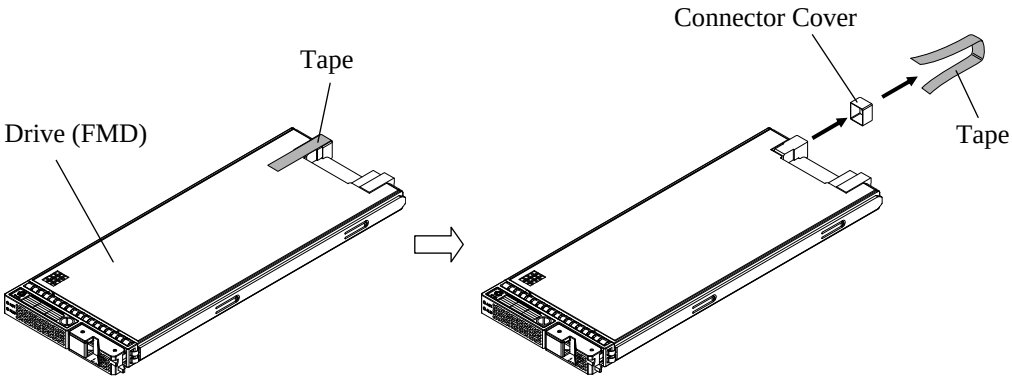
2-2 In case of FMD

a. Check the condition of the drive before installing it.



Note: Check that the main edge connector of the drive (FMD) has no deformation, damage or sticking of dust before installing the drive.

Note: Be sure to detach the tape and remove the connector cover when installing the FMD. Installing the FMD with the connector cover attached may cause equipment damage or failure.



Copyright © 2012, Hitachi, Ltd.

b. Remove the Dummy FMD from the installing position of a drive.
Release the hook while pressing the lock to the left to pull the Dummy FMD toward you.

c. Open the handle fully and fit the drive in the guide rail and slide it in the direction shown by the arrow not to give a shock.

Note: When handling the drive, hold the rail side because the shield spring is subject to breakage.

d. Push the drive in until it reaches the position where a hook of the handle can be entered into the square hole on a frame.

e. Pull the stopper lightly and close the handle, and then press the stopper to have the lock on.
If the handle is closed in the state where the hook of the handle cannot enter into the square hole, the drive cannot be installed correctly because it runs into the frame of the FBX DKU.

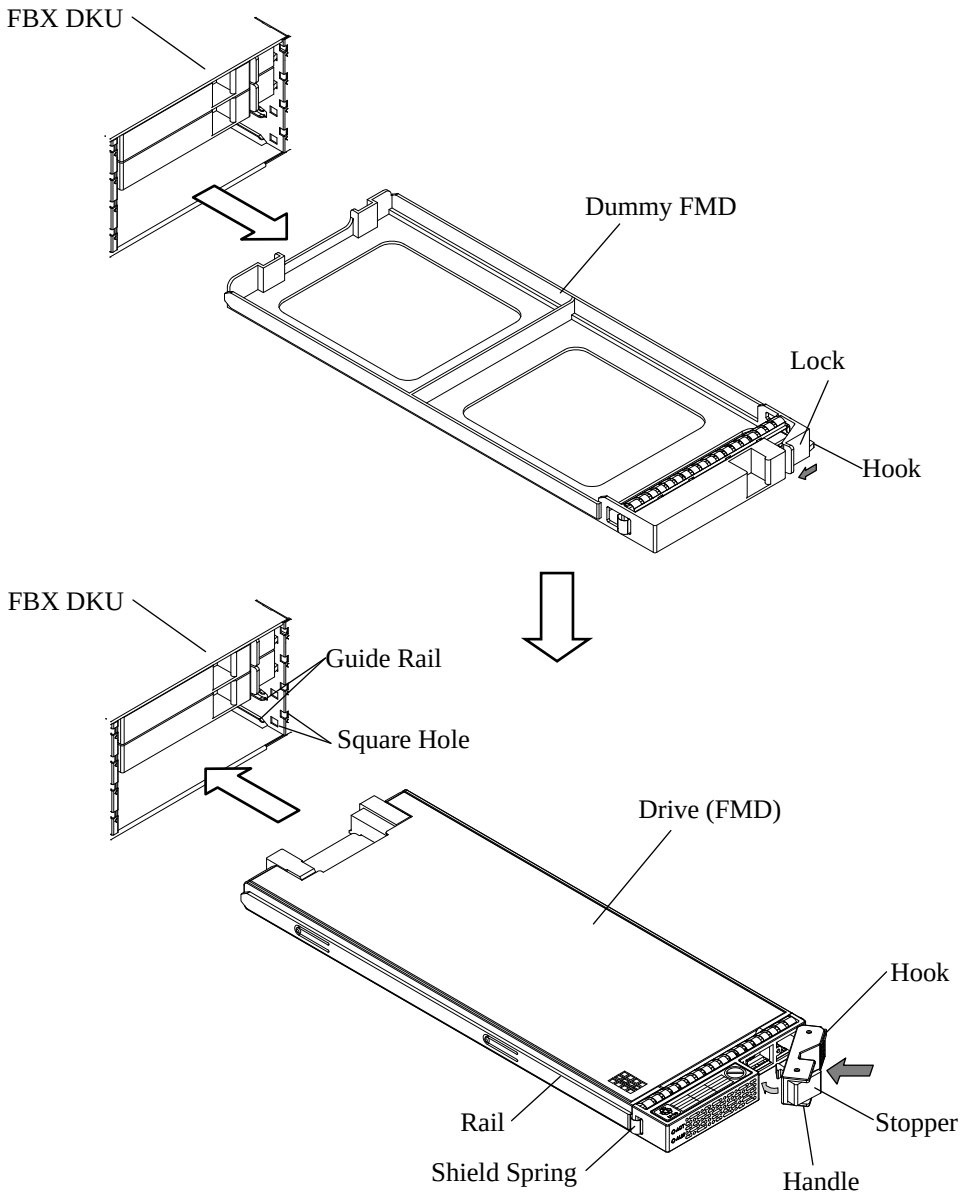


Fig. 3.12.4.23-16 Installation of Drive (In case of FMD)

3.12.4.24 Connection of Device Interface Cable (DKC-F710I-BUC/HBUC/UUC/HUUC/USC/HUSC/RLEXC/HRLEXC/BFC/HBFC/UFC/HUFC/FFC/HFFC/UFEXC/HUFEXC/FFEXC/HFFEXC)

1. When you need to install DKC-F710I-BUC/BFC, connect the cables.
   When you do not need to install DKC-F710I-BUC/BFC, go to step 2 (INST03-12C-7070).
   a. Remove the caps from the cables referring to Fig. 3.12.4.24-1 or Fig. 3.12.4.24-2. Connect the cables to the DKA PCBs in the DKC after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

> Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

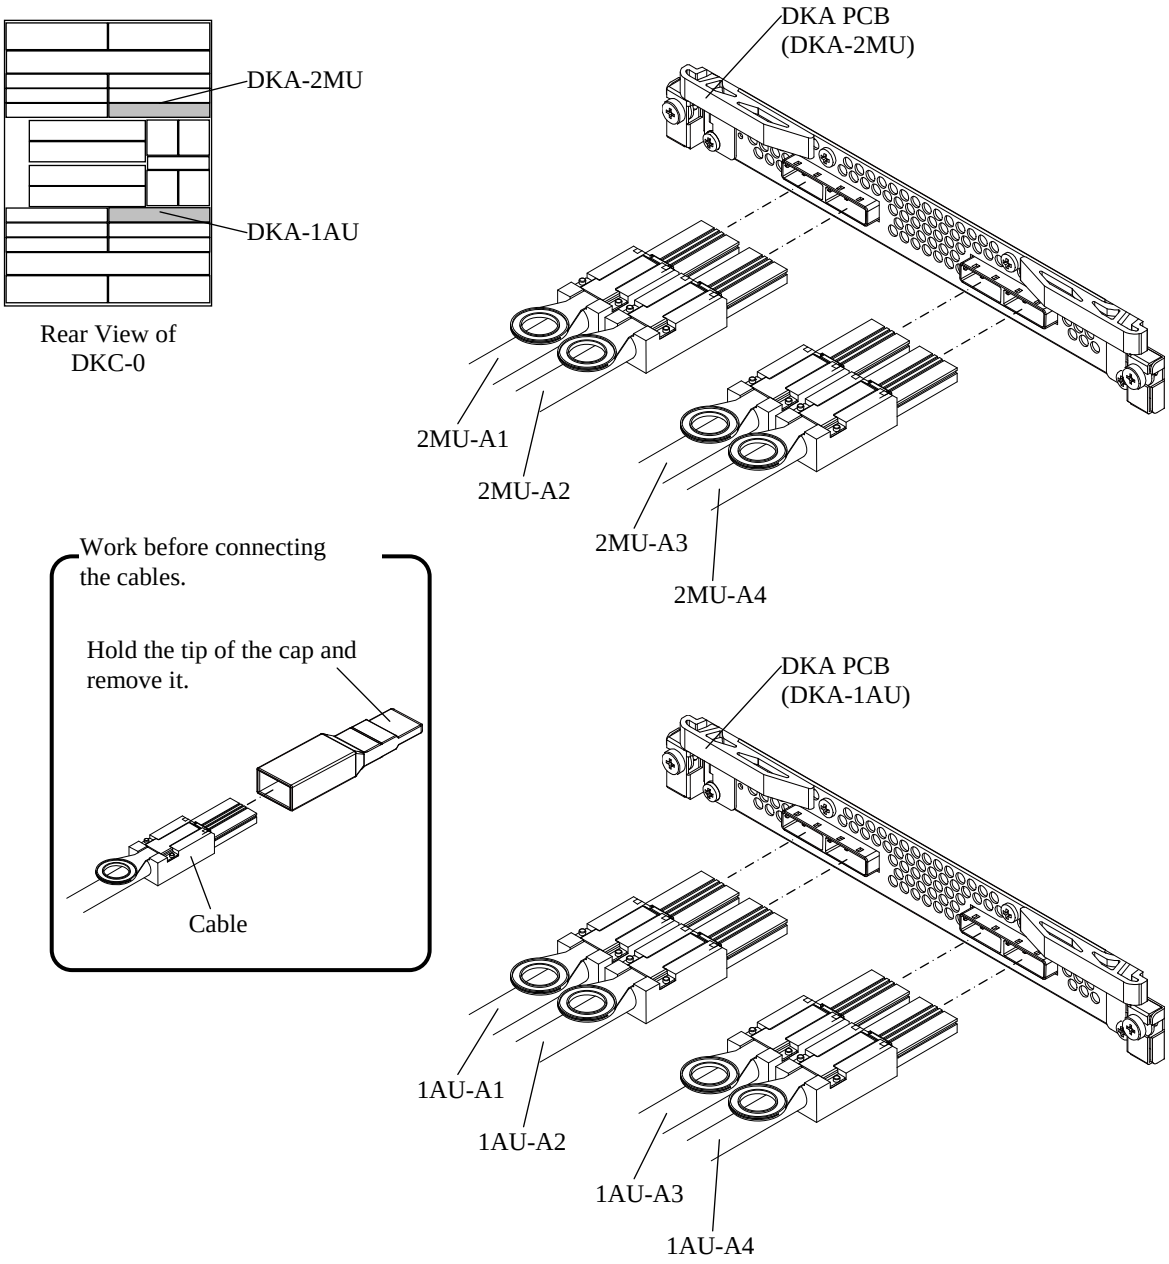

Fig. 3.12.4.24-1 Connection of Cables (BUC/BFC_C0)

Copyright © 2012, Hitachi, Ltd.

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

Copyright © 2012, 2013, Hitachi, Ltd.

2. When you need to install DKC-F710I-HBUC, connect the cables.
   When you do not need to install DKC-F710I-HBUC, go to step 3 (INST03-12C-7170).
   a. Remove the caps from the cables referring to Fig. 3.12.4.24-3 or Fig. 3.12.4.24-4. Connect the cables to the DKA PCBs in the DKC after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

> Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

3. When you need to install DKC-F710I-UUC, connect the cables.
   When you do not need to install DKC-F710I-UUC, go to step 4 (INST03-12C-7250).
   a. Loosen the two screws of the front right side of the lower DKU, and open the FAN door.

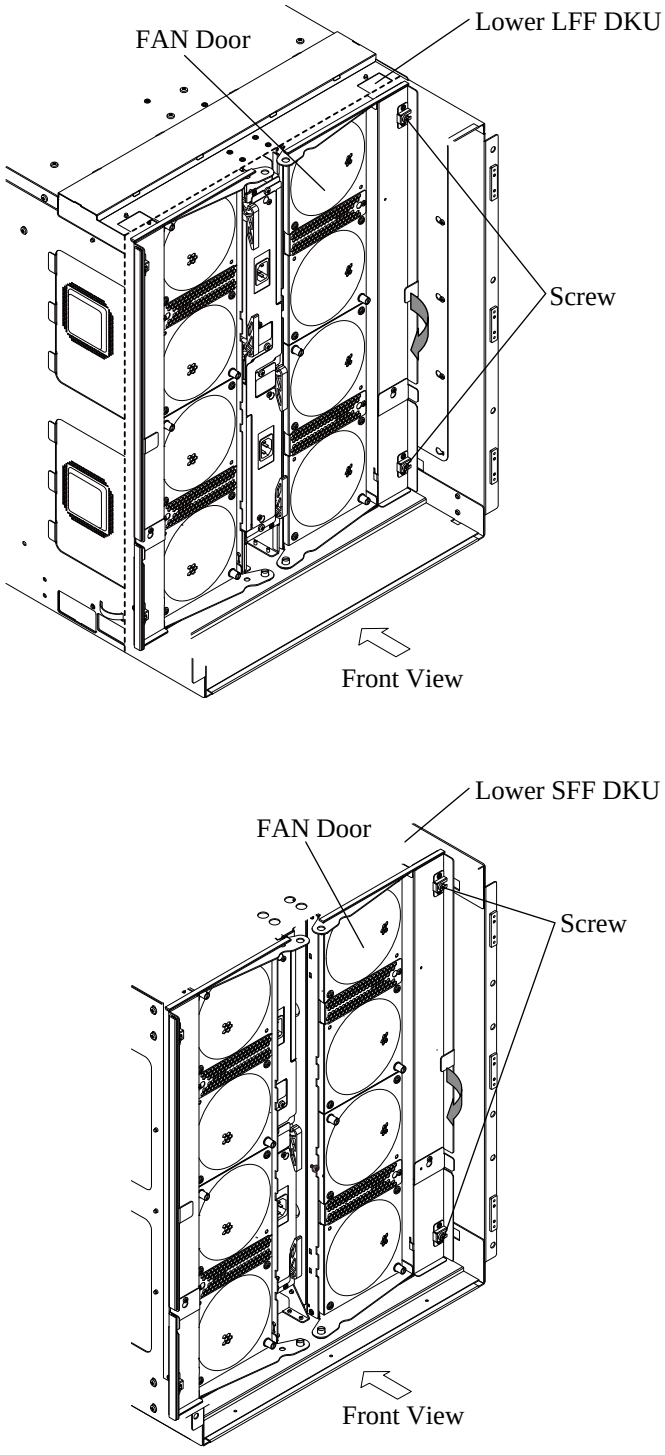

Fig. 3.12.4.24-13 Opening of FAN Door

Copyright © 2012, Hitachi, Ltd.

b. Remove the caps from the cables. Connect the cables with the SSW PCBs in the lower DKU after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

c. Close the FAN door of the front right side of the lower DKU, and tighten the two screws. (Refer to Fig. 3.12.4.24-13.)

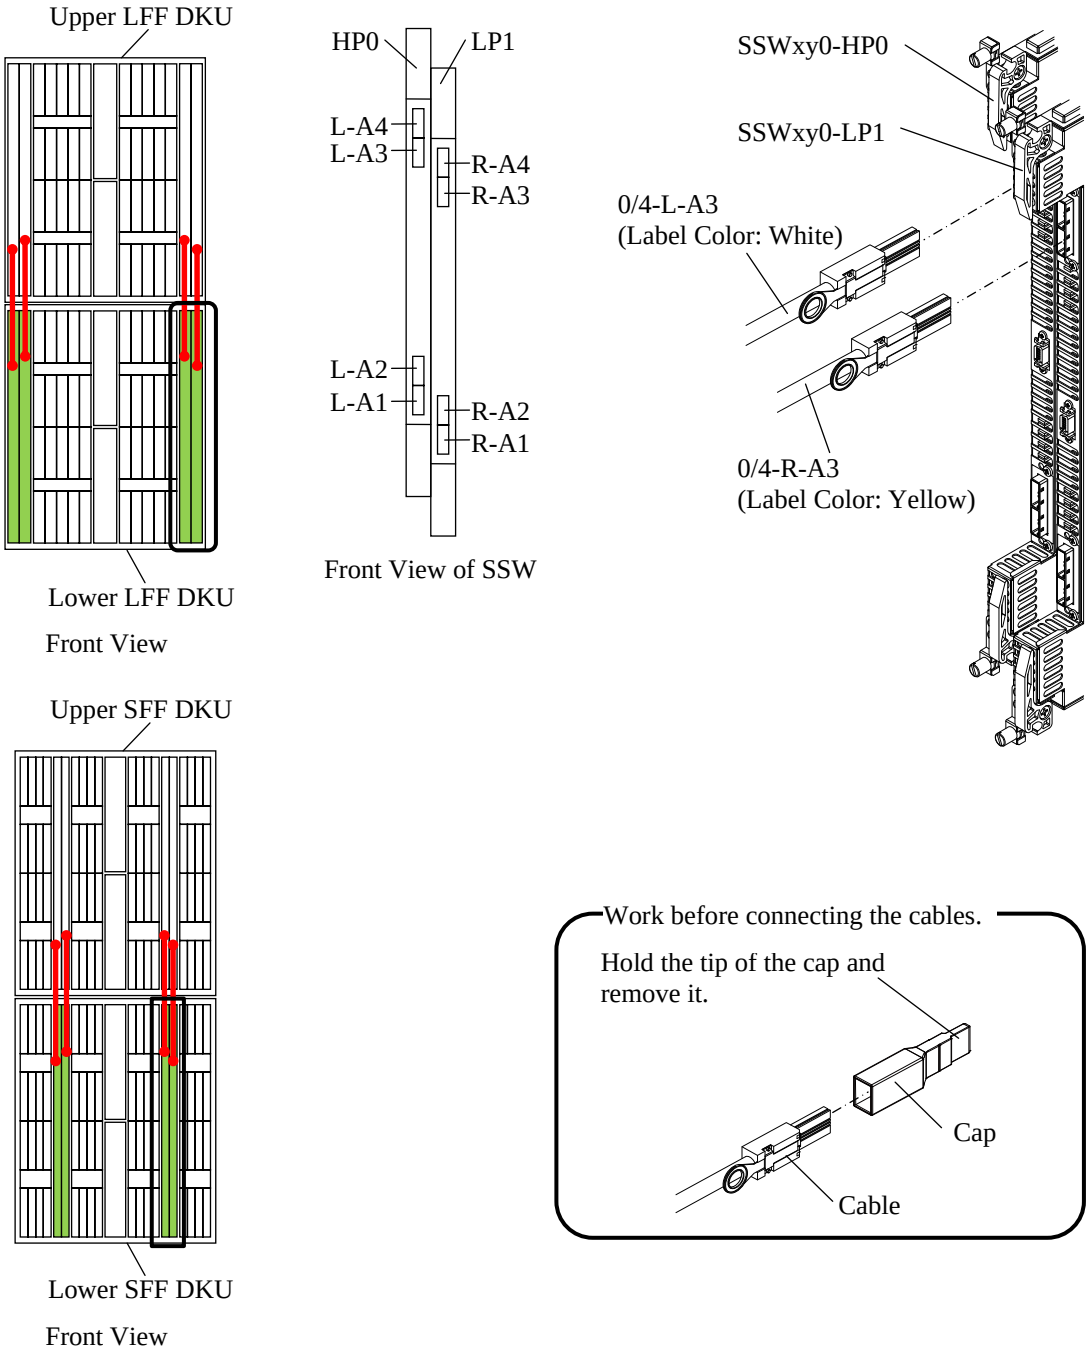

Fig. 3.12.4.24-14 Connection of Cables (UUC_L0)

Copyright © 2012, Hitachi, Ltd.

b. Loosen the two screws of the rear right side of the lower DKU, and open the FAN door.

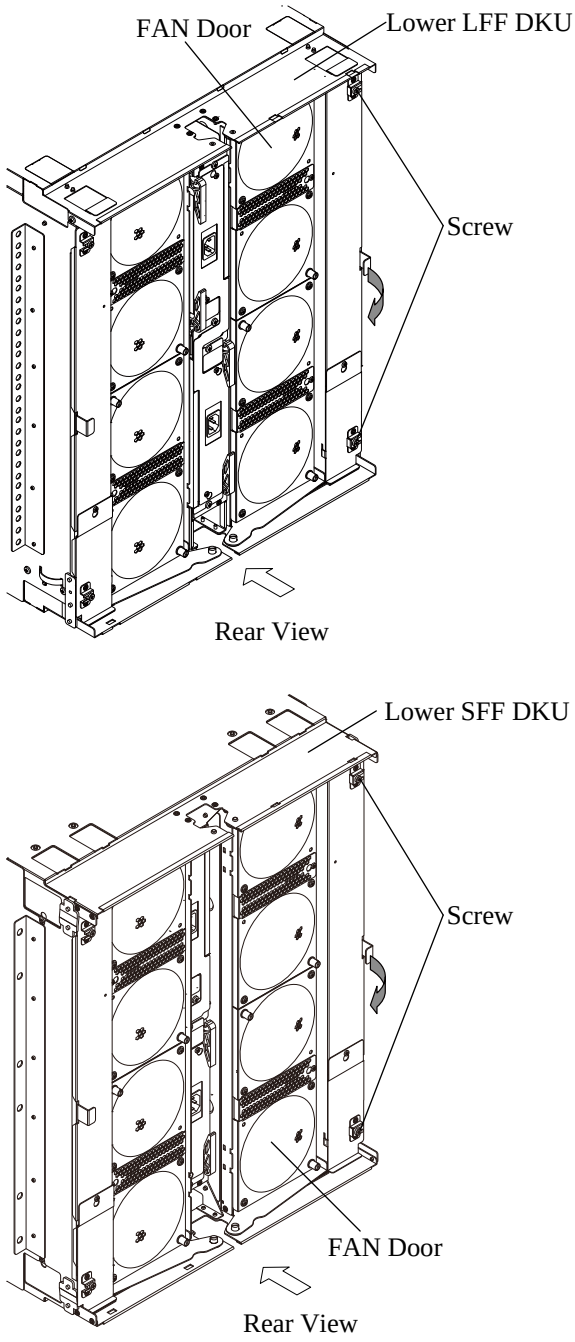

Fig. 3.12.4.24-74 FAN Door Opening

Copyright © 2012, Hitachi, Ltd.

c. Remove the caps from the cables. Connect the cables with the SSW PCBs in the lower DKU after checking "3.1.7 Notes when connecting the DEV interface cable" (INST03-01-180).

Note: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

d. Close the FAN door of the rear right side of the DKU, and tighten the two screws. (Refer to Fig. 3.12.4.24-74.)

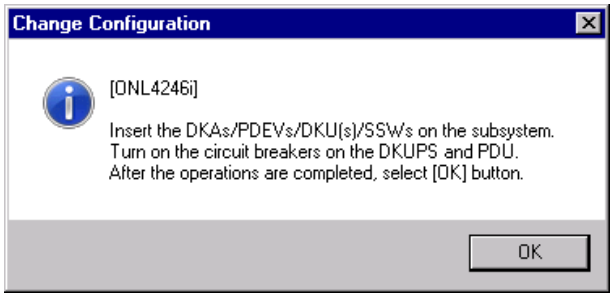
3.12.4.25 SVP post procedure

(1) <Check that hardware components are installed>
Select (CL) [OK] after making sure that all hardware components are installed correctly in response to “Insert the DKAs/PDEVs/DKU(s)/SSWs on the subsystem. Turn on the circuit breakers on the DKUPS and PDU. After the operations are completed, select [OK] button.”.



Note: Confirm that all the DEV Interface Cables to install are connected to the SSW PCBs. If the DEV Interface Cables are not connected, connect the Cables referring to “3.12.4.24 Connection of Device Interface Cable” (INST03-12C-7050).
When the breaker of PDU is OFF, please turn it on.

---

(2) <DKU PATH INLINE>
When DKA is installed, “DKU PATH INLINE is now running...” is displayed.

---

(3) <LDEV FORMAT>
“Formatting logical devices...” is displayed when Parity Group is defined.

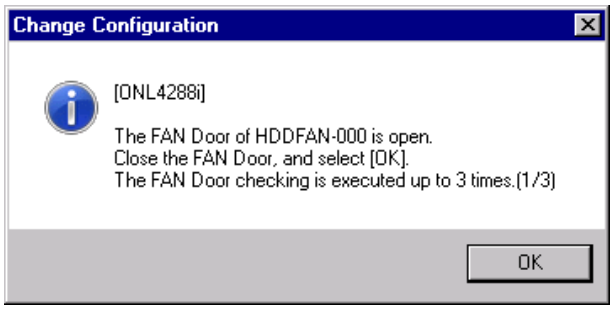
Note: If the SATA drive is included in the format target, SIM = 0x4100XX is output at the end.

It goes to (3)-1 when HDDFAN doors of the object are not closed.
It goes to (4) when HDDFAN doors of the object are closed.

Copyright © 2012, 2014, Hitachi, Ltd.

(3)-1

"The FAN Door of HDDFAN-xxx is open. Close the FAN Door, and select [OK]. The FAN Door checking is executed up to 3 times. (n/3)" is displayed. After the FAN door is closed, select (CL) [OK] in response to this message.



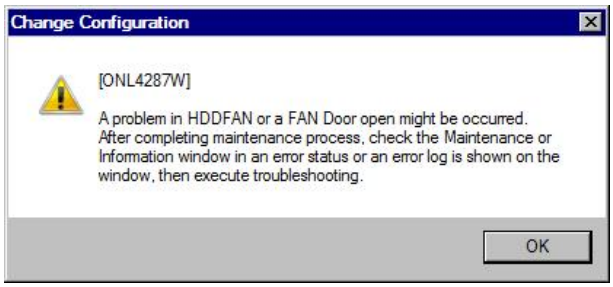
It returns to (3)-1 when HDDFAN doors of the object are not closed.
It goes to (4) when HDDFAN doors of the object are closed.

Note: It goes to (3)-1 when it cannot be confirmed that the FAN doors are closed in the three times FAN door check.

---

(3)-2

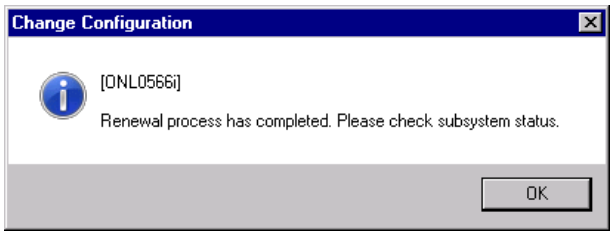
"A problem in HDDFAN or a FAN Door open might be occurred. After completing the maintenance process, check the Maintenance or Information window in an error status or an error log is shown on the window, then execute troubleshooting." is displayed.
Select (CL) [OK] in response to this message.



---

(4) <End of system update processing>

"Renewal process has completed. Please check subsystem status." is displayed when recovery processing on all installed components is completed. Select (CL) [OK] in response to this message.



---

(4)-1 <QUICK FORMAT>

Refer to the logical device window in the "Maintenance" window to check that the Quick Format is in progress. (SVP03-280 through 370)

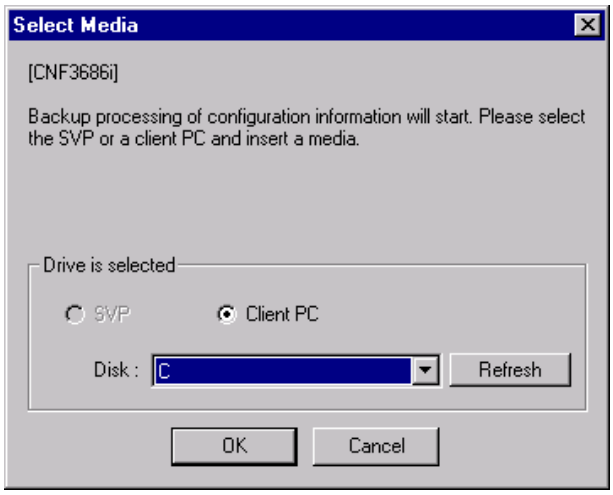
Note: It is necessary to check only if you select the Quick Format in INST03-12C-6000 Step (14)-1.

Copyright © 2012, Hitachi, Ltd.

(5)

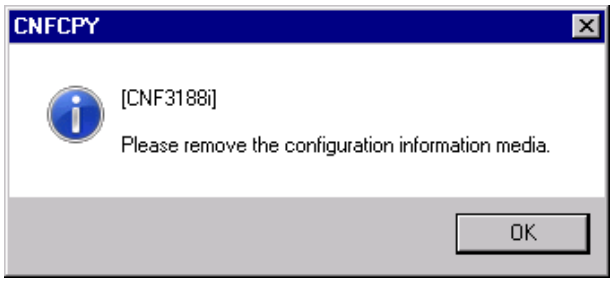
Execute an operation for backing up the configuration information.
Prepare the removable media for backup and insert the media.
Please select (CL) the [Refresh] button, and update drive information.
Select (CL) the drive and the PC in which the media was inserted. Select (CL) the [OK] button.

Note: For the procedure of backing up the configuration information to a CD-R, see page MICRO07-140.



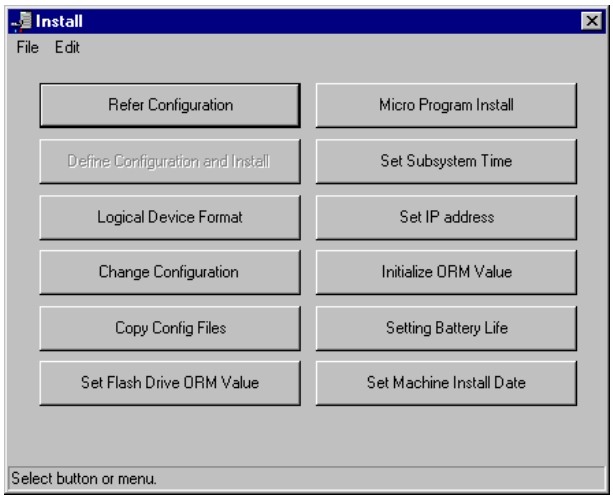
(6)

When this procedure is completed, the message “Please remove the configuration information media.” is displayed.
Remove the configuration information media, Select (CL) [OK].



(7)

After the procedure is completed, return to ‘Install’.
Select (CL) [File]-[Exit].



CAUTION

Check the Expander/SSW micro-program version of the installed SSW.

(8) <Mode Change>
Change the mode to View Mode.

3.12.4.26 Attachment of Bezels

1. Attach the removed Bezels.
   a. Attach the Bezel and fix the brackets with the two pins.
   b. Closing the bezel by pushing the pocket door pull.
   c. Turn the key 90 degrees counterclockwise direction to lock the Bezel, and take out the key from the keyhole.
   d. Push the left middle side of the Bezel until it clicks.

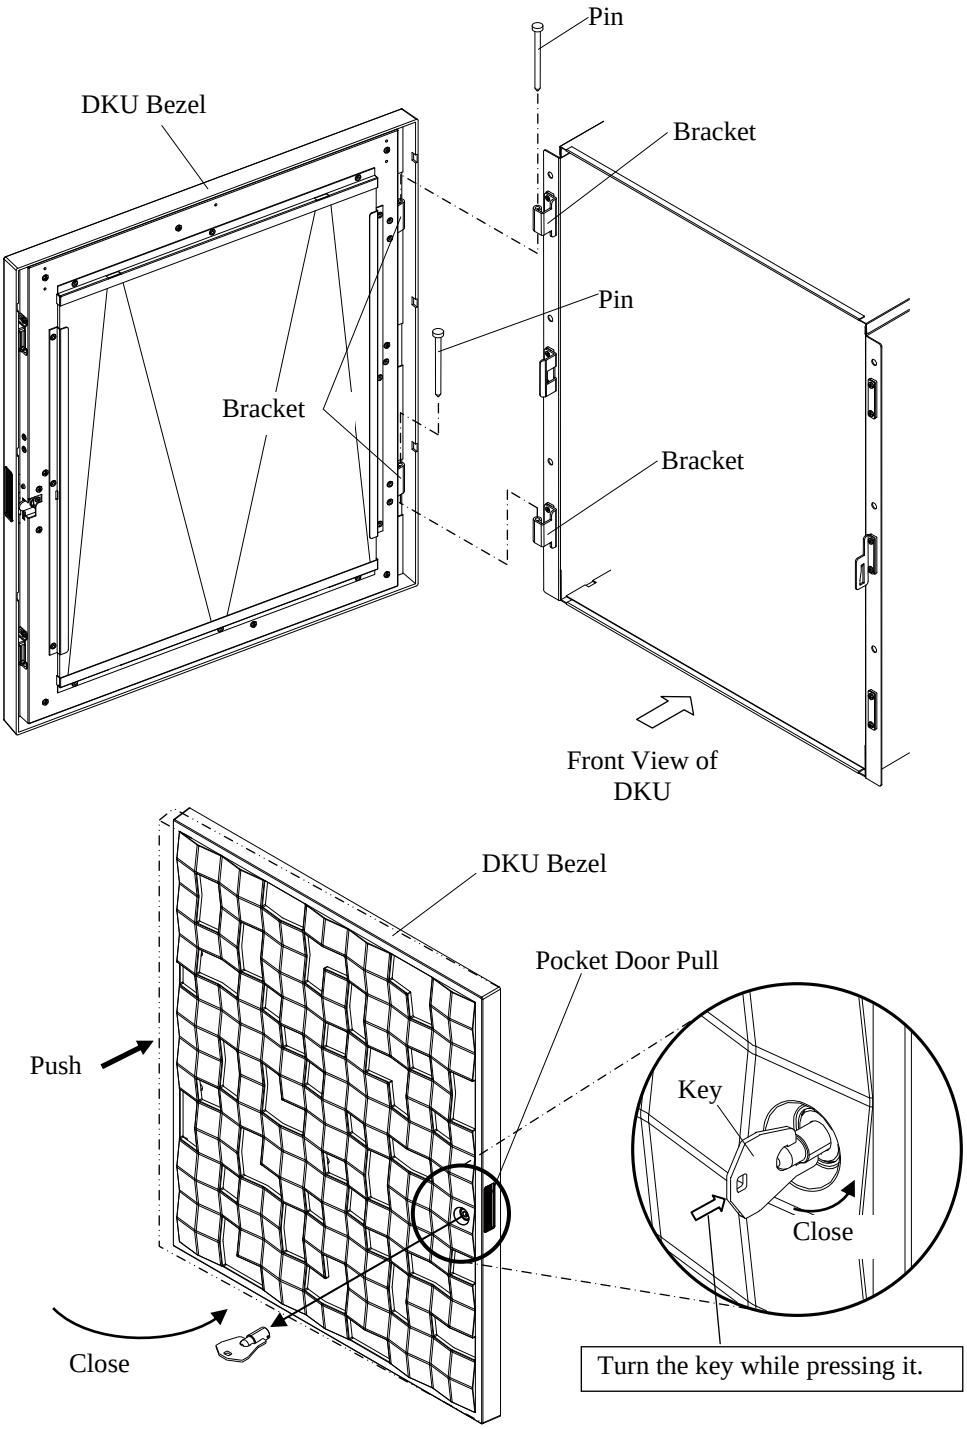

Fig. 3.12.4.26-1 Attachment of DKU Bezel

Copyright © 2012, Hitachi, Ltd.

2. Return to the work table and perform rest of the works.
   New Installation: INST02-20
   Non-Disruptive Installation: INST02-50

Copyright © 2010, 2012, Hitachi, Ltd.

3.13 Installation of Service Processor (DKC-F710I-SVP)

⚠ CAUTION

This work takes about three hours. During the work, the Web Console cannot be used for some time because of a rebooting of the SVP PC and verification.
Inform the customer of the following before starting the addition.

① During this installation, customer cannot use Web Console/Storage Navigator via a customer PC.

② When SNMP is being used:
- 'cold start' trap is reported several times.
- The obstacle trap which occurred during work may not be notified.
- SNMP command may not answer normally.

③ The following SIMs may occur during this work, just complete them when finished:
- BFE3F2 - SVP settings are duplicated
- BF86A3 - JP remains

④ When the DKC-F710I-MP/MPR is installed in the DKC710I-CBXA/CBXG (*1), the HUBBOX (DKC-F710I-HUB) is installed as well.
In this case, remove the HUBBOX and install the SVP redundant option to the same mounting position as the HUBBOX. The removing the HUBBOX and installing the SVP must be operated according to the additional installation procedures.
In addition, instruct customer to store the removed HUBBOX as it will be necessary when removing the SVP. (The DKC-1 (DKC710I-CBXB/CBXH) of this instruction is excluded.)

*1: The installation requirements of the HUBBOX are according to the configuration of the DKC-F710I-MP/MPR in the DKC710I-CBXA/CBXG.
(DKC710I-CBXB/CBXH is excluded.)

Table 3.13-1 Installation Requirements of DKC-F710I-MP/MPR and HUBBOX

No.	Number of DKC-F710I-MP/MPR installed in DKC710I-CBXA/CBXG	SVP-OPTION/HUBBOX-01 Slot	
		Without SVP Duplication	With SVP Duplication
1	—	Free space	SVP
2	1	HUBBOX	SVP

3.13.1 Installation Procedure of Service Processor (DKC-F710I-SVP)

3.13.1.1 Installation Procedure

1. Operating the Basic SVP

1-1 Connecting the Console PC to the SVP

(1)

Connect the Console PC to the Basic SVP using SVP Connect Utility.

The login user is different by the presence of the microprogram.

[Connected to]
The Basic SVP xxx.xxx.xxx.15 in the subsystem concerned

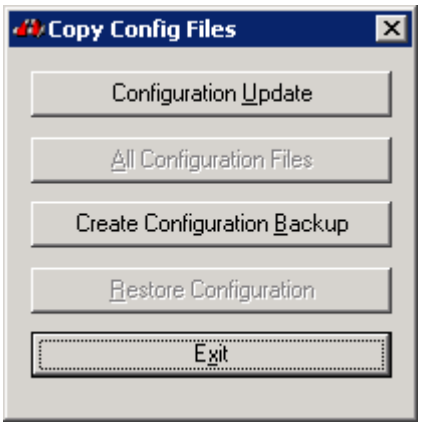
1-2 Config Back up

(1) <Mode change>
Change the mode to [Modify].

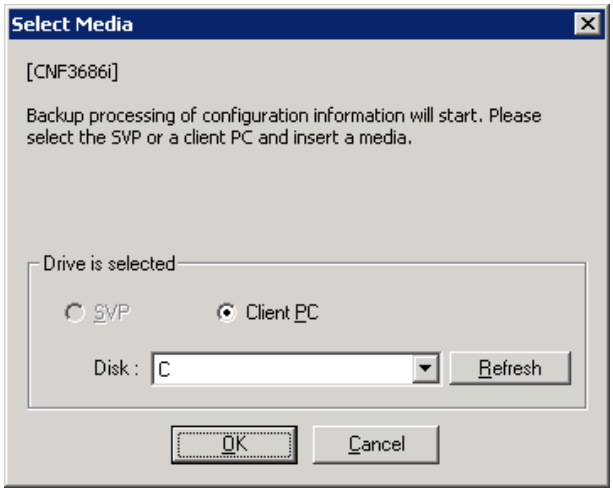
(2)
Select (CL) [Install] in the 'SVP' window and select (CL) [Copy Config Files] in the 'Install'.

(3)
Select (CL) [Create Configuration Backup] in the 'Copy Config Files'.

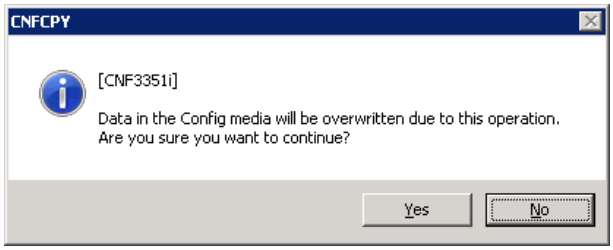


(4)
Execute an operation for backing up the configuration information.
Prepare the removable media for backup and insert the media.
Please select (CL) the [Refresh] button, and update drive information.
Select (CL) the drive and the PC in which the media was inserted. Select (CL) the [OK] button.

Note: For the procedure of backing up the configuration information to a CD-R, see page MICRO07-140.



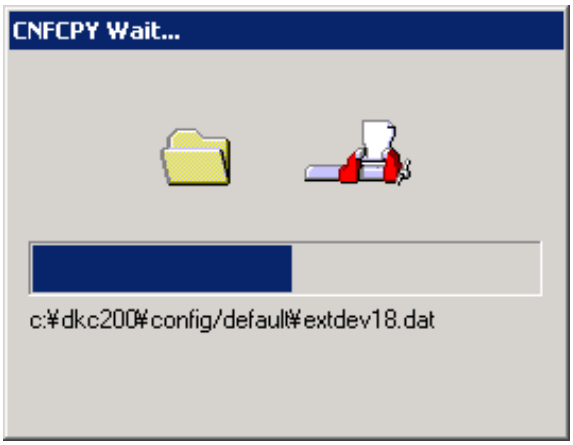
(5)
When you want to continue the process, select the [Yes] button. When the backup to the Config media is not necessary, select the [No] button.



Copyright © 2010, Hitachi, Ltd.

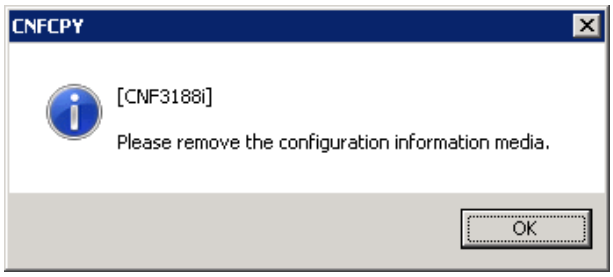
(6)

Backup the configuration information to the Config media for backup. While this operation is being done, the 'CNFCPY Wait...' window is displayed.



(7)

After the Config media is pulled out, select (CL) the [OK] in response to the message "Please remove the configuration information media.".



(8)

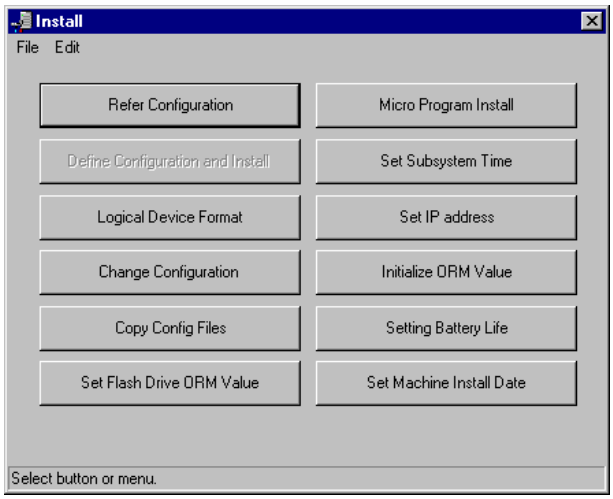
Select (CL) [Exit] of the 'Copy Config Files' to finish this operation.

Copyright © 2010, 2012, Hitachi, Ltd.

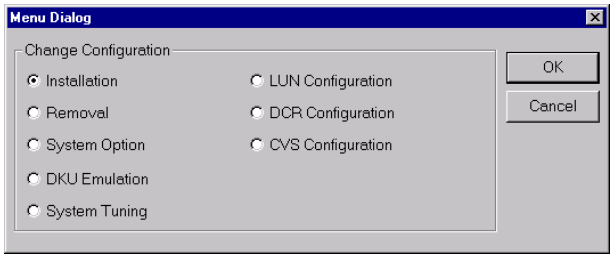
1-3 Setting of SVP Installation

(1) <Start [Install]>
Select (CL) [Install] from 'SVP'.

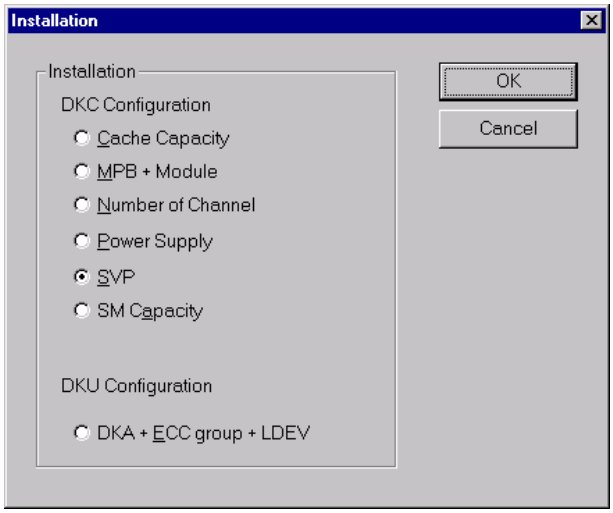
(2) <Select [Change Configuration]>
Select (CL) [Change Configuration] from 'Install'.



(3) <Select [Installation]>
Select (CL) [Installation] from 'Menu Dialog', and select (CL) [OK] button.

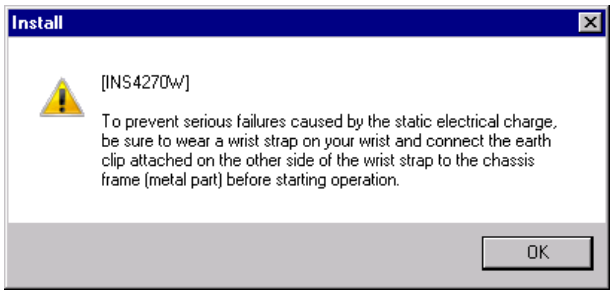


(4) <Select a part to be changed>
Select (CL) [SVP], and select (CL) [OK] button.

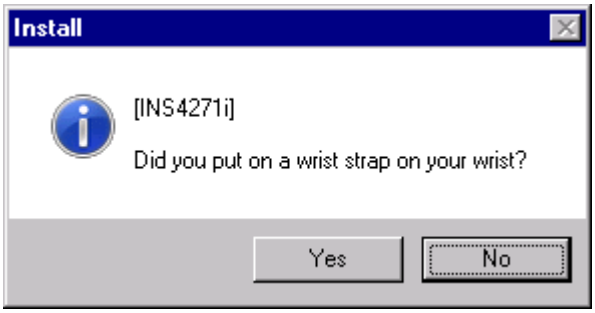


Copyright © 2010, Hitachi, Ltd.

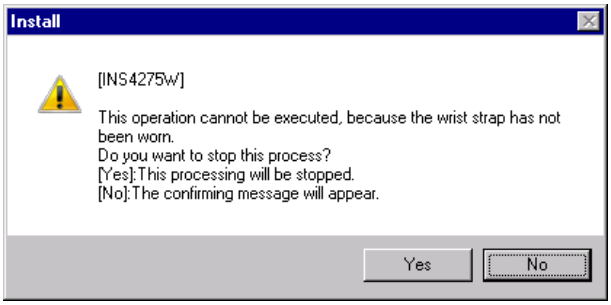
(5) <Wear a wrist strap>
Select (CL) [OK] in response to "To prevent serious failures caused by the static electrical charge, be sure to wear a wrist strap on your wrist and connect the earth clip attached on the other side of the wrist strap to the chassis frame (metal part) before starting operation.".



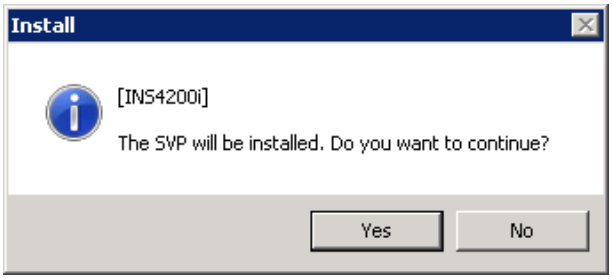
(5)-1 <Confirm wearing wrist strap>
In response to a message, "Did you put on a wrist strap on your wrist?".
Select [Yes] when wrist strap is on your wrist.
Select [No] when there is no wrist strap on your wrist.
When [No] is selected (CL), go to Step (5)-2.



(5)-2
In response to a message, "This operation cannot be excuted, because the wrist strap has not been worn. Do you want to stop this process?
[Yes]: This processing will be stopped.
[No]: This confirming message will appear."
When [Yes] is selected (CL), the routine is returned to Step (2) on page INST03-13-50.
When [No] is selected (CL), returned to Step (5).



(6) <Start Installation>
Select (CL) [Yes] button in response to "The SVP will be installed. Do you want to continue?".
Select (CL) [No] button. Return to step (2).

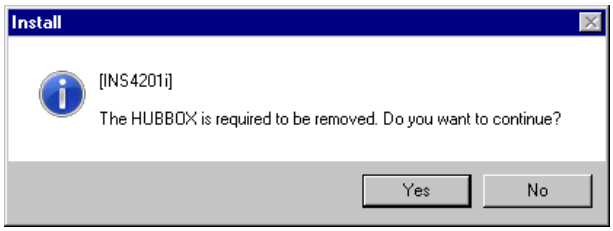


Copyright © 2010, Hitachi, Ltd.

(7) <Confirmation message>
If there is not the HUBBOX, go to step (13).

If there is the HUBBOX, “The HUBBOX is required to be removed. Do you want to continue?” message is displayed.

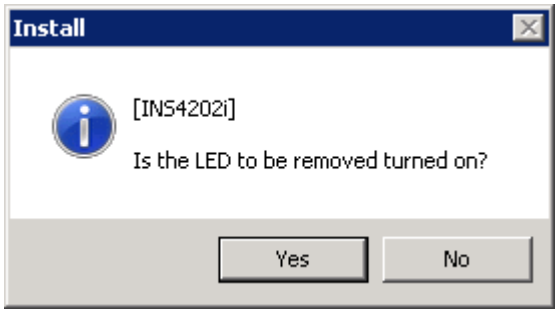
Select (CL) [Yes] button. Go to step (8).
Select (CL) [No] button. Return to step (2).



---

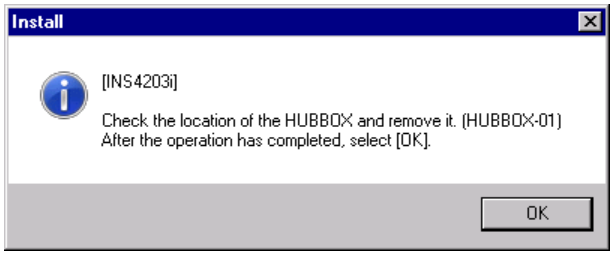
(8) <Check shut down LED>
“Is the LED to be removed turned on?”message is displayed.

If the Shut down LED is on, select (CL) [Yes] button and go to step (10).
If the Shut down LED is off, select (CL) [No] button and go to step (9).



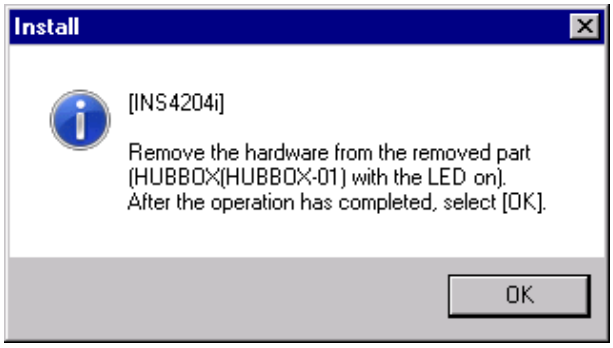
---

(9) <Removal of the HUBBOX>
“Check the location of the HUBBOX and remove it. (HUBBOX-xx) After the operation has completed, select [OK].” message is displayed.
Go to step (10).



---

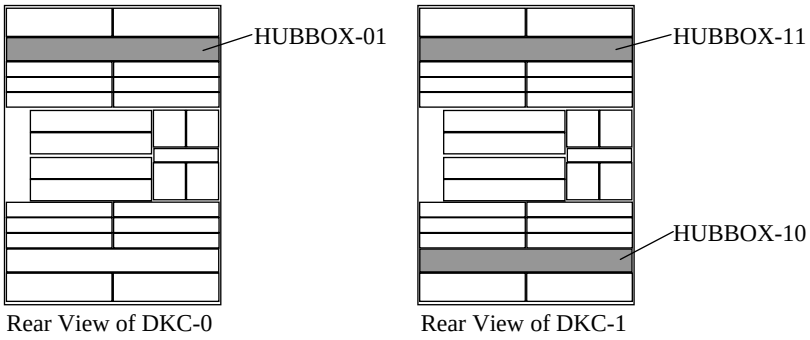
(10) <Removal of the HUBBOX>
“Remove the hardware from the removed part (HUBBOX(HUBBOX-nn) with the LED on). After the operation has completed, select [OK].” message is displayed.

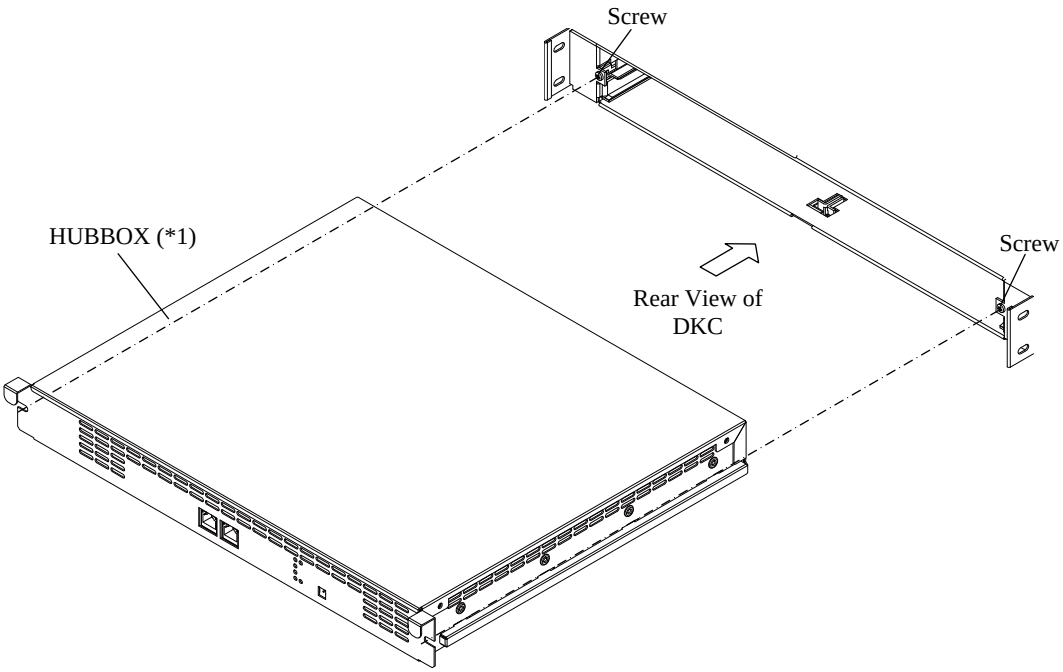


Copyright © 2010, 2011, Hitachi, Ltd.

(10) <De-Installation Procedure of HUB Kit>

a. Loosen the two screws and remove the HUBBOX.





*1: There are two types of HUBBOXes with different appearance.

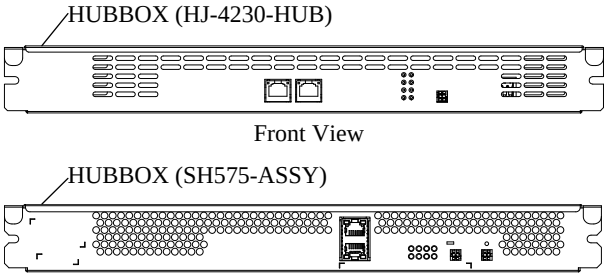


Fig. 3.13.1.1-1 Removal of HUBBOX

Copyright © 2010, Hitachi, Ltd.

(11) <Removal of the nameplate>

a. Remove the screw from the rack frame and remove the nameplate tags to be installed.
b. Remove the nameplate from the nameplate tag.
c. Attach all the nameplate tags with the screw.

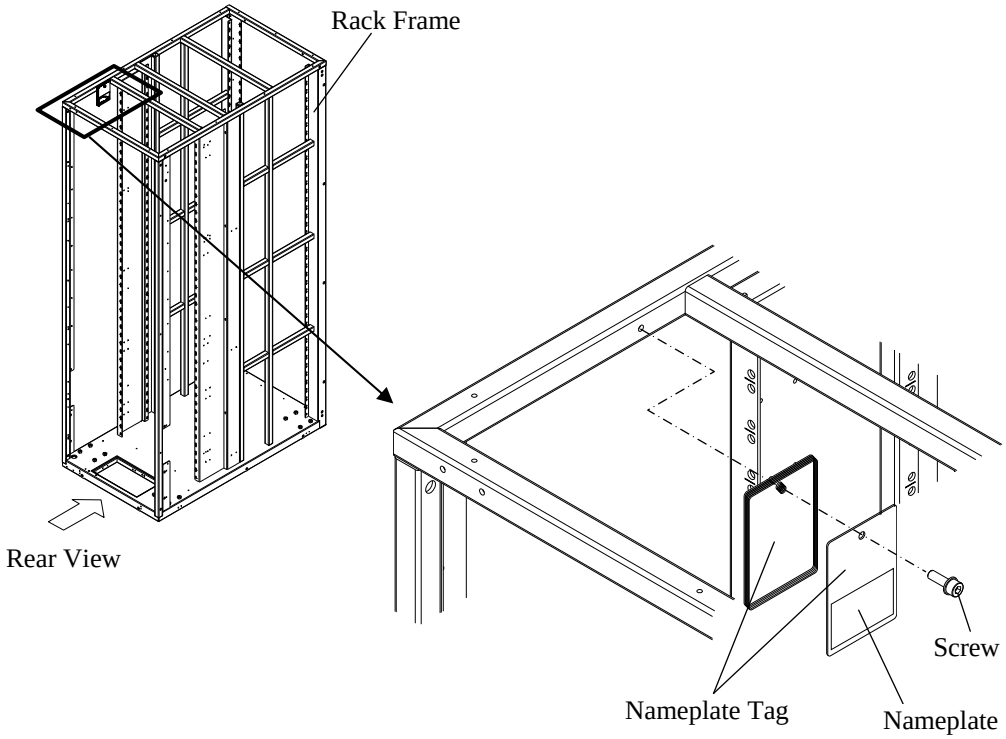

Fig. 3.13.1.1-2 Removal of Nameplate

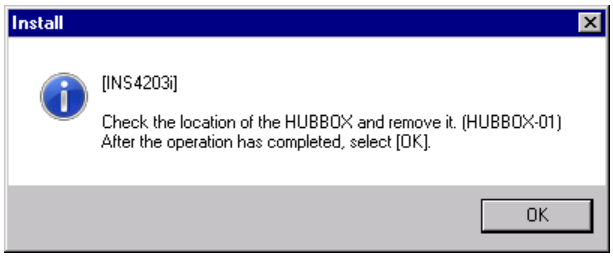
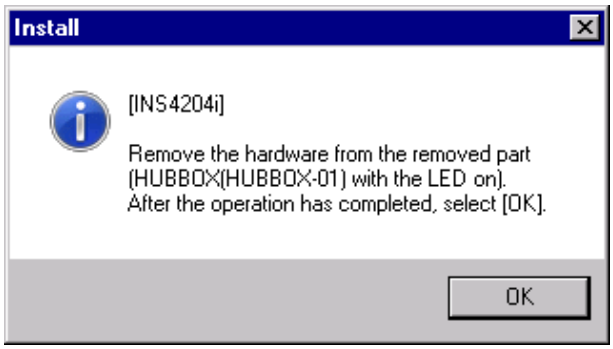
Copyright © 2010, Hitachi, Ltd.

(12) <Removal of the HUBBOX>

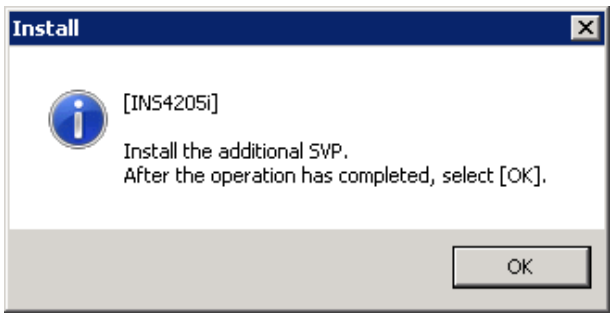
After remove the HUBBOX, select (CL) [OK].





(13) <Installation of SVP>

"Install the additional SVP. After the operation has completed, select [OK]." message is displayed.

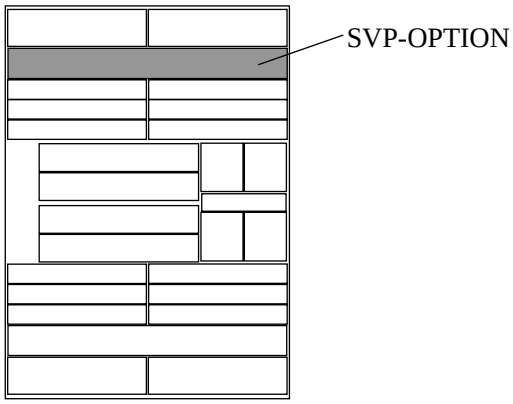


Copyright © 2010, Hitachi, Ltd.

2. Installation Procedure of Service Processor

2-1 Installation of SVP

(1) When removing the dummy plates from the SVP-OPTION slot is required, loosen the two screws and remove the dummy plate.
When removing the dummy plates from the SVP-OPTION slot is unnecessary, go to the step (2).



Rear View of DKC-0

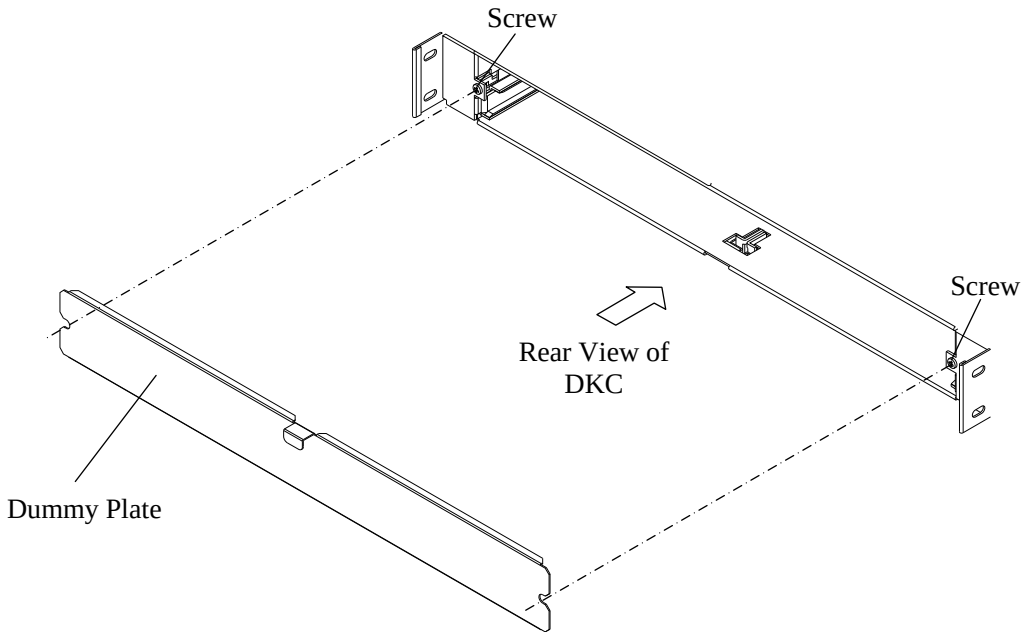


Fig. 3.13.1.1-3 Removal of Dummy Plate

Copyright © 2010, Hitachi, Ltd.

(2) Insert the Maintenance Jumper into the JP1 on the SVP-OPTION. (The insertion of the jumper is unnecessary for the SVP-BASIC)
(3) Install the SVP and fasten the two screws.
Note: Confirm the vertical direction of the SVP. If the direction is wrong, the SVP will not be ON.

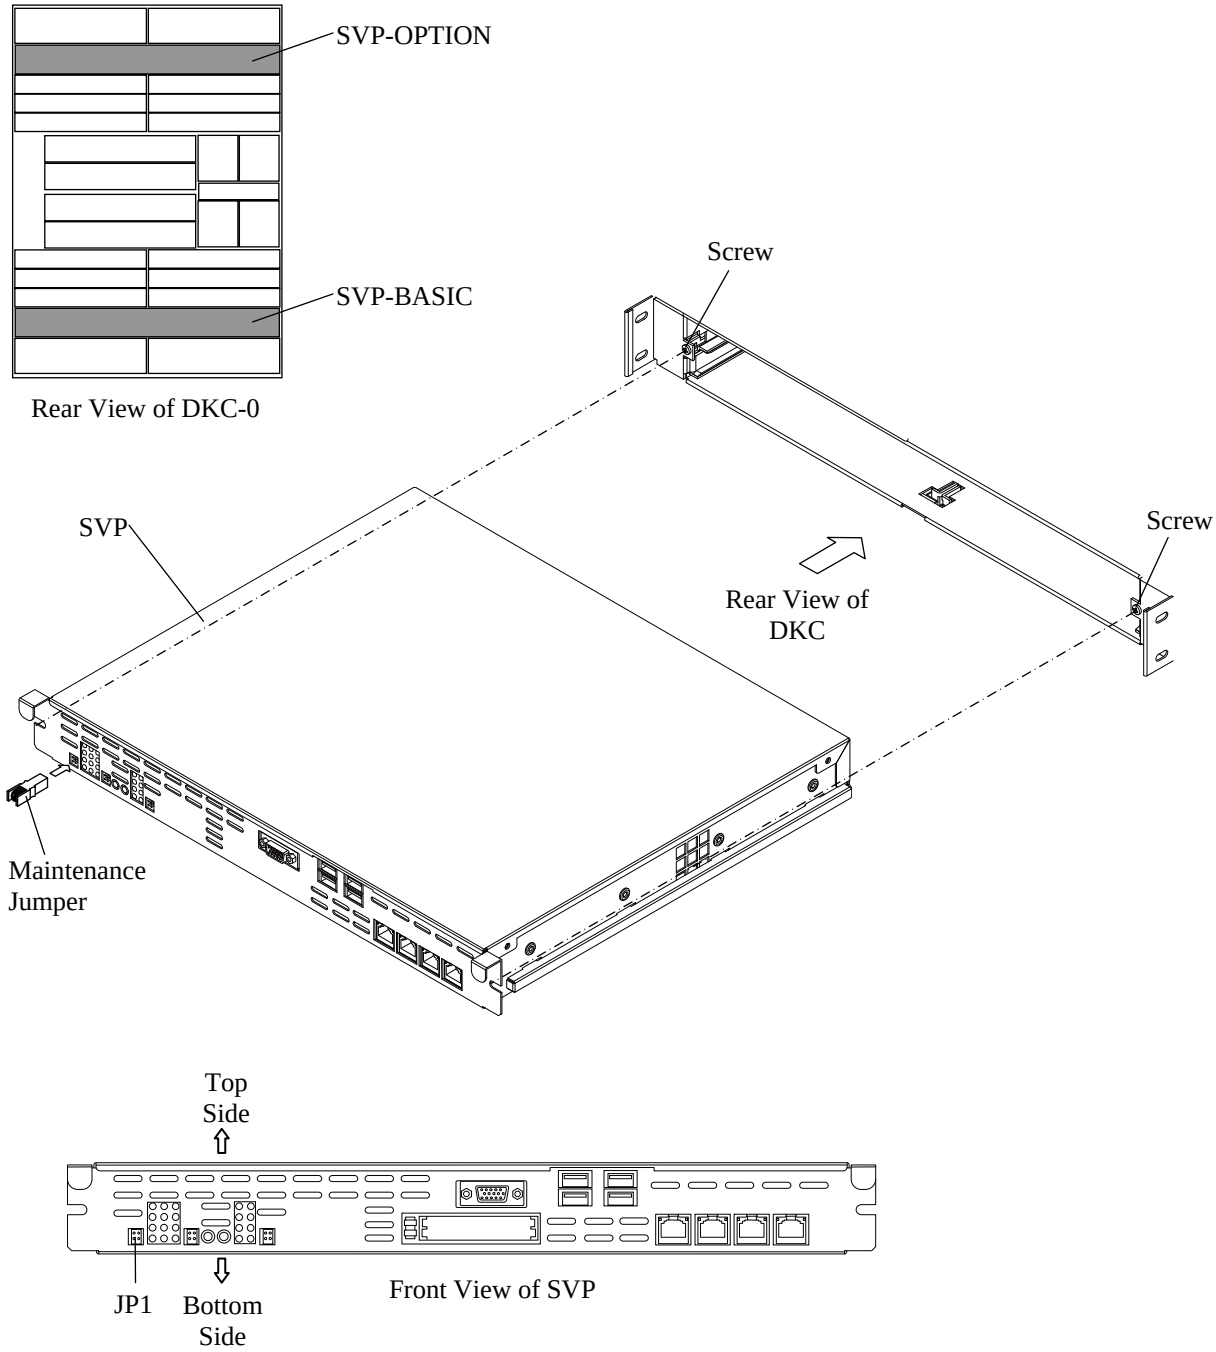

Fig. 3.13.1.1-4 Installation of SVP

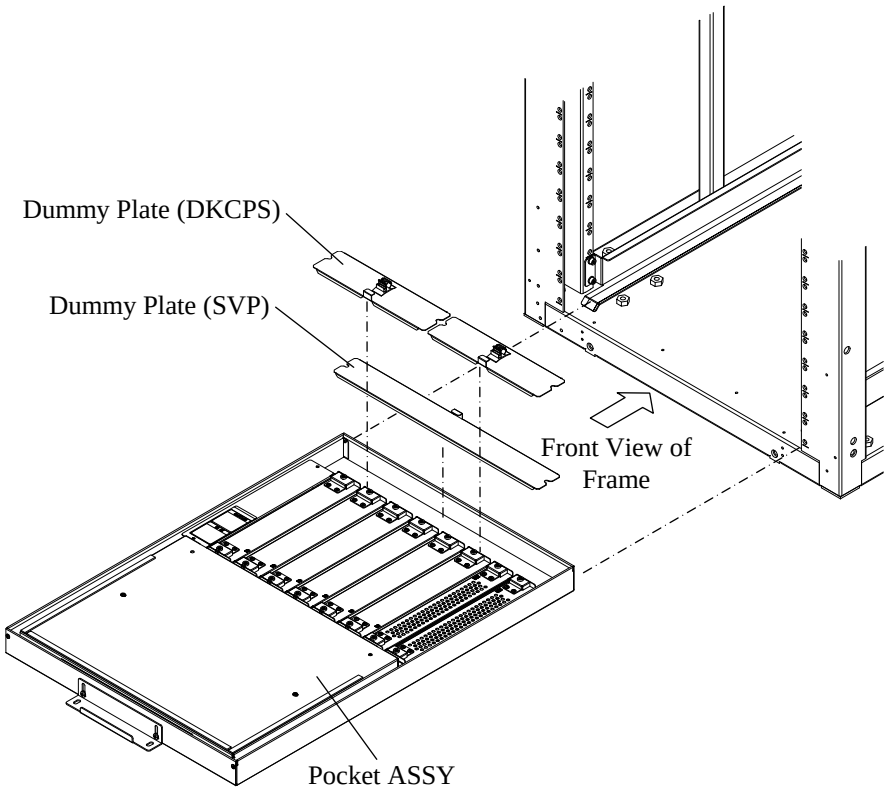
Copyright © 2010, Hitachi, Ltd.

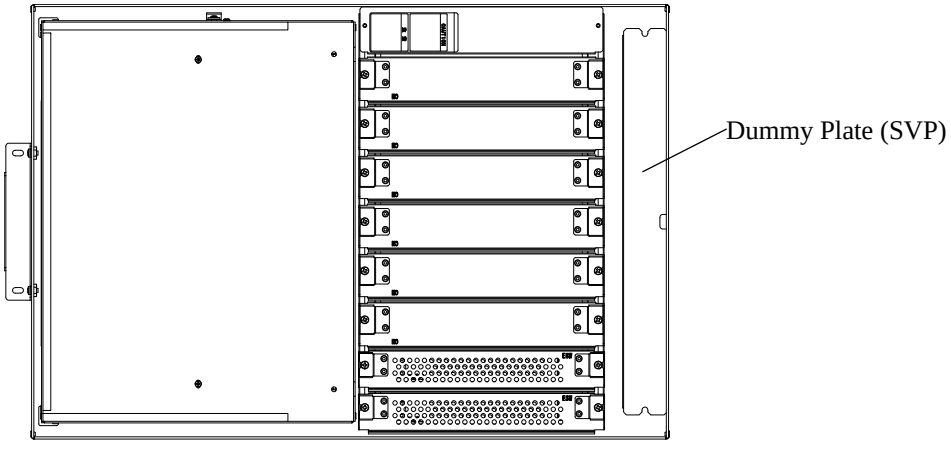
2-2 Storage of Dummy Plate

(1) When there are removed dummy plates, remove the pocket ASSY from the front of the frame.
When there are no removed dummy plates, go to the step 2-3.

(2) Attach the removed dummy plates to the pocket ASSY.

(3) Install the Pocket ASSY in the front of the frame.





Top View of Pocket ASSY

Fig. 3.13.1.1-5 Storage of Dummy Plate

Copyright © 2010, Hitachi, Ltd.

2-3 Attachment of the nameplate

(1) Remove the screw from the rack frame and remove the nameplate tags.

(2) Attach the nameplate to the nameplate tag.

(3) Attach all the nameplate tags with the screw.

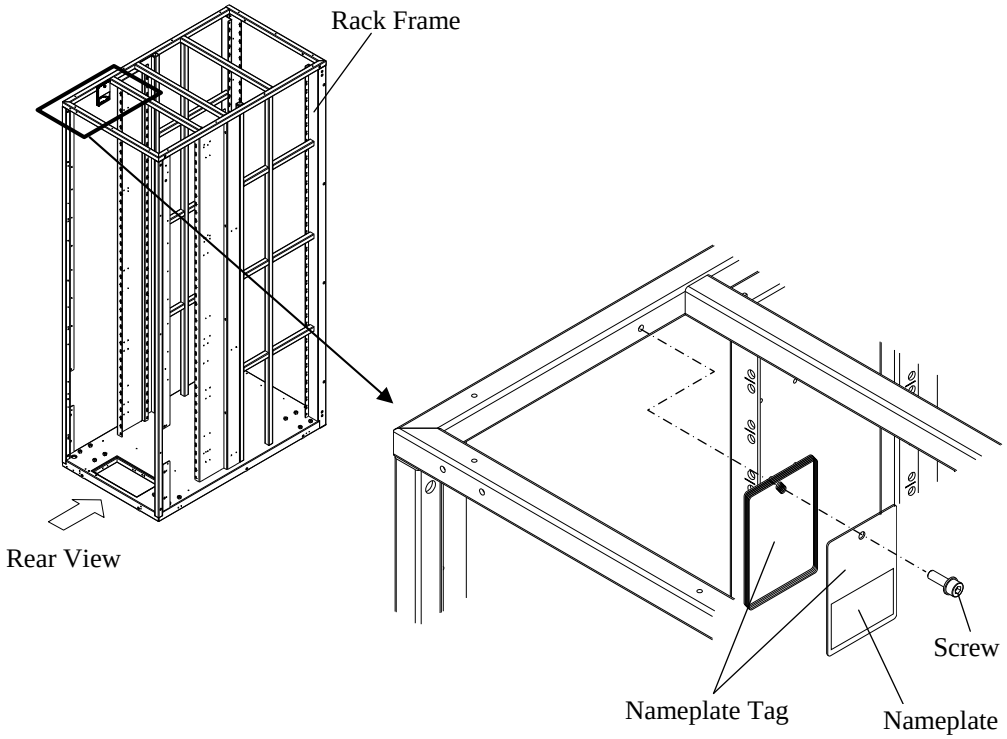


Fig. 3.13.1.1-6 Attachment of Nameplate

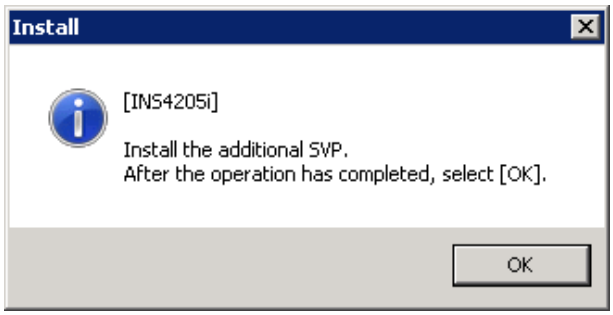
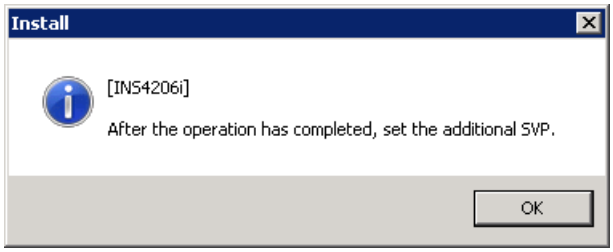
Copyright © 2010, Hitachi, Ltd.

3. Operating the Basic SVP

3-1 <Confirmation of the SVP installation>
After the Installation of SVP, select (CL) [OK].



3-2 <Operation of after the SVP installation>
"After the operation has completed, set the additional SVP." message is displayed.



Copyright © 2010, Hitachi, Ltd.

4. Operating the Additional SVP

4-1 Connecting the Console PC

Connect the console PC to the SVP has been installed using the utility for connection.

The login user is different by the presence of the microprogram.

[Connected to] Additional SVP 126.255.255.15

Note: When the IP address of the console PC is not 126.xxx.xxx.13, change the IP address of the console PC to 126.255.255.13 once, and then connect it to SVP.

In this section, using two user type to connect with the SVP. If you don't know the password, please contact with the technical support division. When there is no description, using "Installed User".

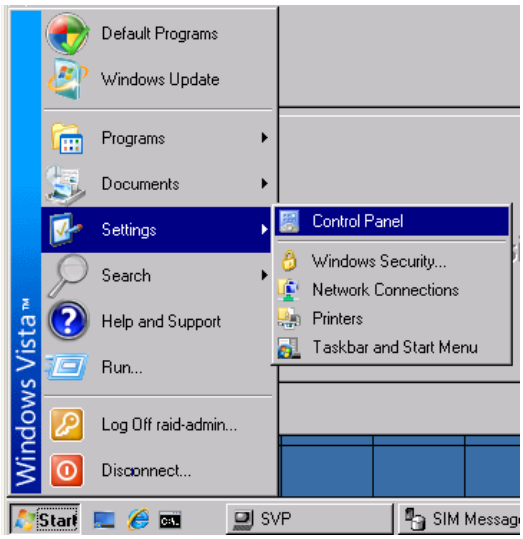
After you input a user name and the password, input "Maintenance Password". If you don't know the "Maintenance Password", please contact with the technical support division.

Copyright © 2010, Hitachi, Ltd.

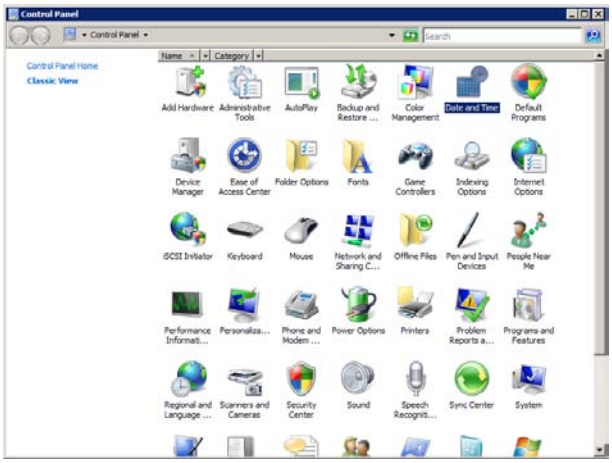
4-2 Setting the Data and Time

<Making sure of the setting of a time zone>

(1) Open the ‘Control Panel’ window.
Select (DR) [Settings]-[Control Panel] from the [Start] menu.

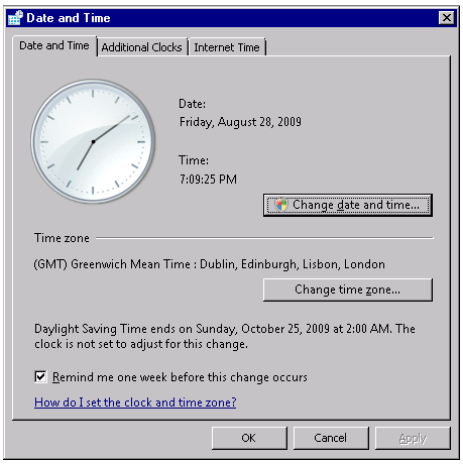


(2) Open the ‘Date and Time’ window.
Select (DC) [Date and Time] in the ‘Control Panel’ window.

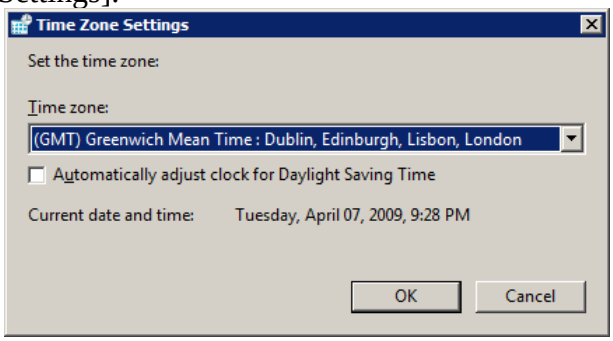


Copyright © 2010, Hitachi, Ltd.

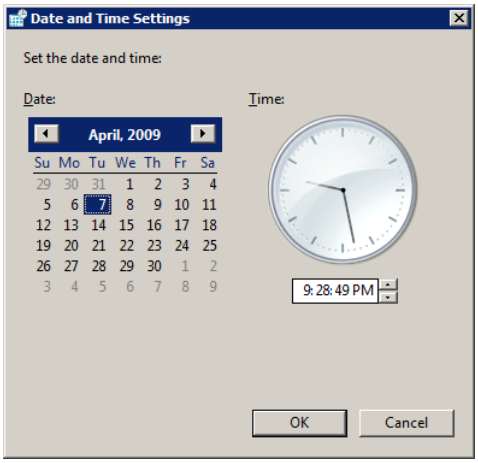
(3) Select [Chage time zone].
Select (CL) [Change time zone...].



(4) Make sure of the setting of the [Time Zone Settings].
Make sure that the 'Time Zone Settings' is set as "[GMT] Greenwich Mean Time; Dublin, Edinburgh, Lisbon, London" irrespective of a place where the subsystem is installed.
Besides, make sure that the check box to the left of the statement, "Automatically adjust clock for Daylight Saving Time" is blank (not checked).



(5) <Set the [Date and Time Settings]>
Select (CL) [Change date and time...].
Check if the 'Date and Time Settings' is set to the current time and date.
If not, reset it correctly. Then, select (CL) [OK].

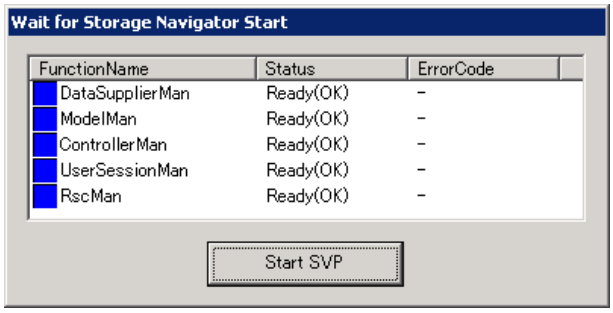


(6) Close the 'Control Panel' window.
Select (DR) [File] and [Close] in this order in the 'Control Panel' window.

Copyright © 2010, Hitachi, Ltd.

4-3 <Installing the Microprogram>

4-3-1 Preparation



When the Microprogram has already been installed (when “Wait for Storage Navigator Start” is displayed in desktop window) in the Additional SVP, perform the following operations. When the Microprogram is not installed, go to 4-3-2.

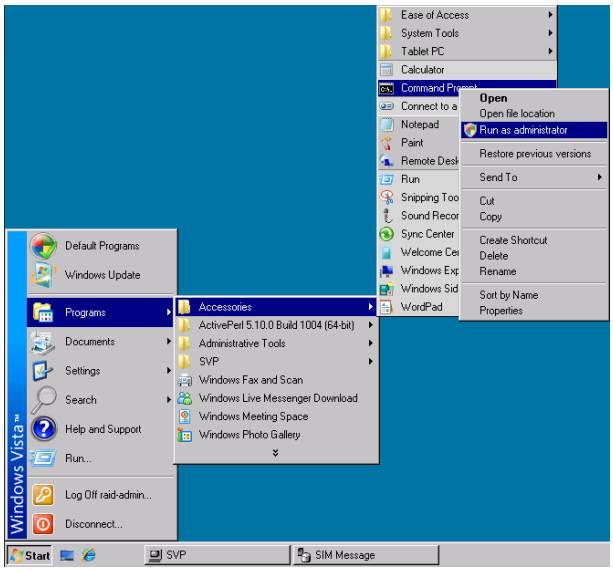
① Perform uninstalling Apache program. (Go to 4-3-1-1 Uninstalling Apache)
② Perform uninstalling Tomcat program. (Go to 4-3-1-2 Uninstalling Tomcat program)
③ Perform uninstalling SMI-S Provider program. (Go to 4-3-1-3 Uninstalling SMI-S Provider program)
④ Perform uninstalling Java program. (Go to 4-3-1-4 Uninstalling Java program)
⑤ Perform uninstalling Perl program. (Go to 4-3-1-5 Uninstalling Perl program)
⑥ Perform uninstalling Flash Player program. (Go to 4-3-1-6 Uninstalling Flash Player program)

Copyright © 2010, Hitachi, Ltd.

4-3-1-1 Uninstalling Apache

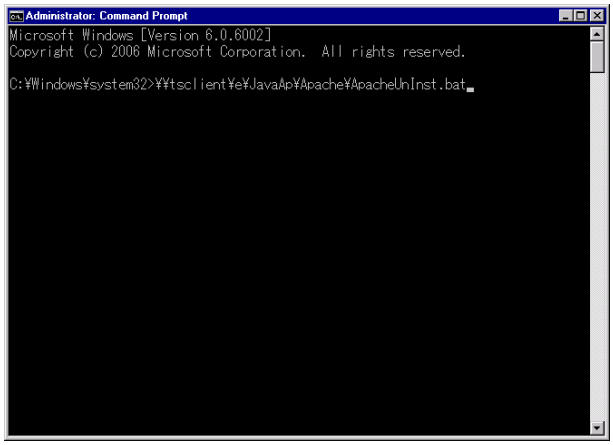
(1) Mount the OSS media
Insert the OSS media (the second media) to the CD-ROM drive in the Console PC.

(2) Launch the Command Prompt as administrator
Select (CL) [Start]-[Programs]-[Accessories], and launch the Command Prompt with 'Run as administrator' in right-click menu.



(3) Launch the uninstallation batch
Enter "\\tsclient\e\JavaAp\Apache\ApacheUnInst.bat" into the Command Prompt, and press the Enter key.

At the end of this process, the Command Prompt will close automatically.



Note: The input value is the form of
"\\tsclient\<drive letter>\ JavaAp\Apache\ApacheUnInst.bat".
A drive letter is made the drive which inserted the OSS media.

The above is a case where the CD-ROM drive is assigned a drive letter E.

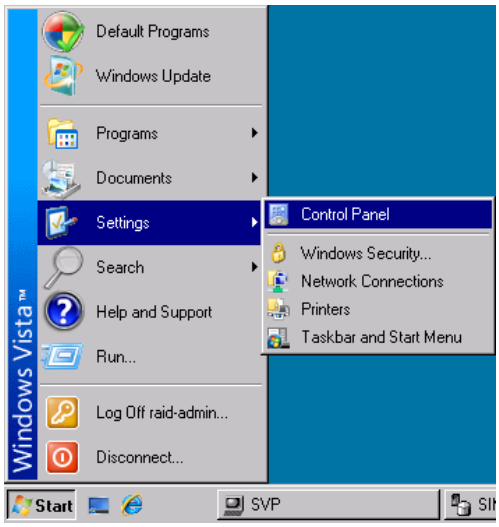
(4) Take out the OSS media
Take out the OSS media (the second media) from the CD-ROM drive in the Console PC.

Copyright © 2010, Hitachi, Ltd.

4-3-1-2 Uninstalling Tomcat program

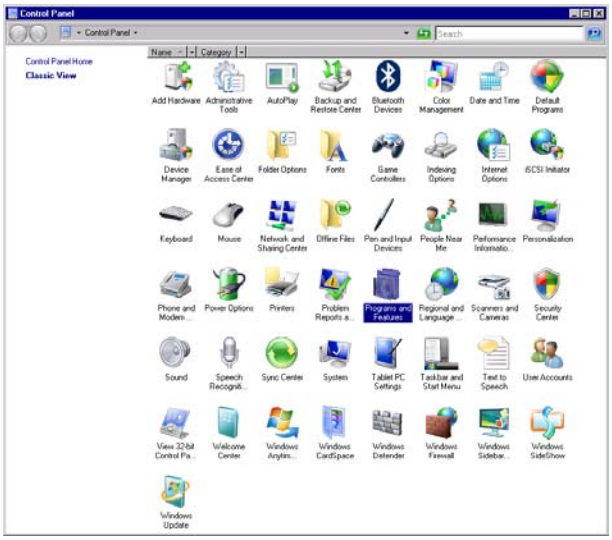
(1)

Select (CL) [Start]-[Settings]-[Control Panel].



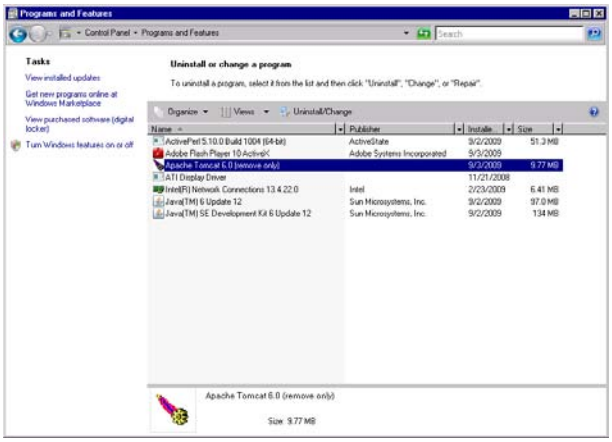
(2)

Select (DC) [Programs and Features].



(3)

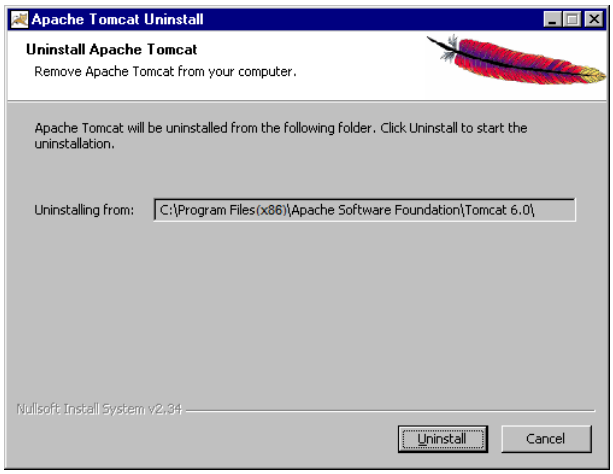
Select (CL) [Apache Tomcat 6.0 (remove only)], and select (CL) [Uninstall/Change].
If there is no [Apache Tomcat 6.0 (remove only)] in the list, go to 4-3-1-3.



Copyright © 2010, Hitachi, Ltd.

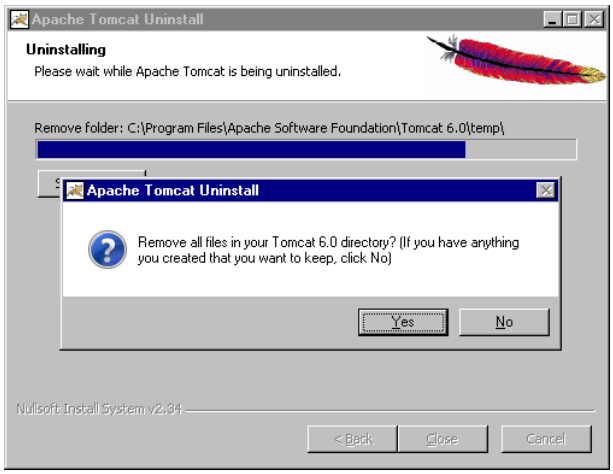
(4)

Select (CL) [Uninstall].



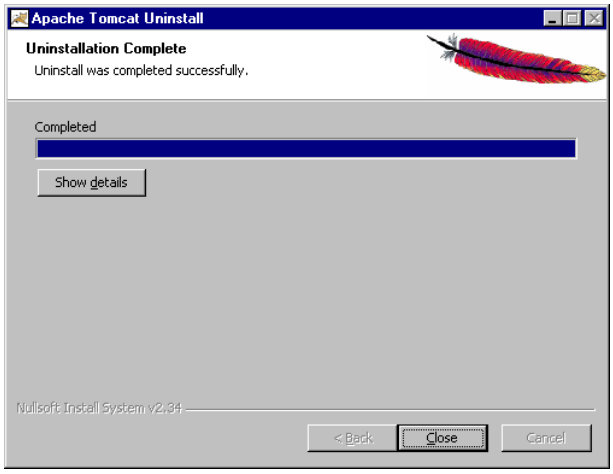
(5)

If the following message box is displayed, select (CL) [Yes].



(6)

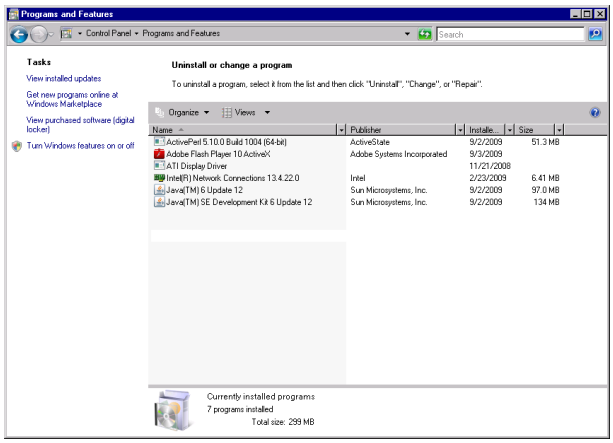
When “Uninstallation Complete” dialogue box is displayed, select (CL) [Close].



Copyright © 2010, 2012, Hitachi, Ltd.

(7)

[Apache Tomcat 6.0 (remove only)] in ‘Programs and Features’ window was deleted.
Close the window.

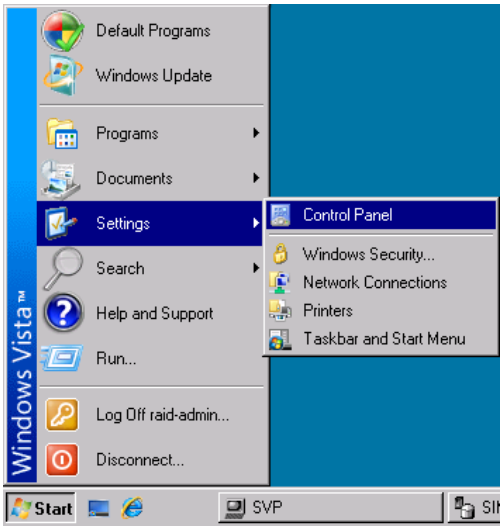


Notice: Until procedure 4-3-1 is finished, please don’t logout or shutdown SVP.
If you do them, SVP may no longer work properly. If a shutdown request message is displayed, please don’t shutdown.

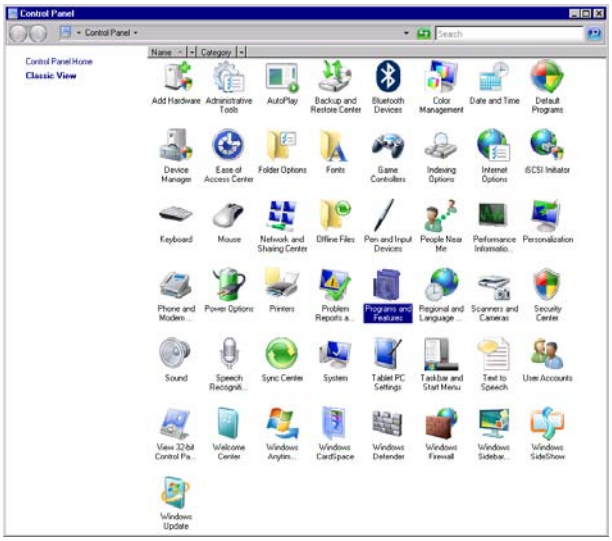
Copyright © 2010, Hitachi, Ltd.

4-3-1-3 Uninstalling SMI-S Provider program

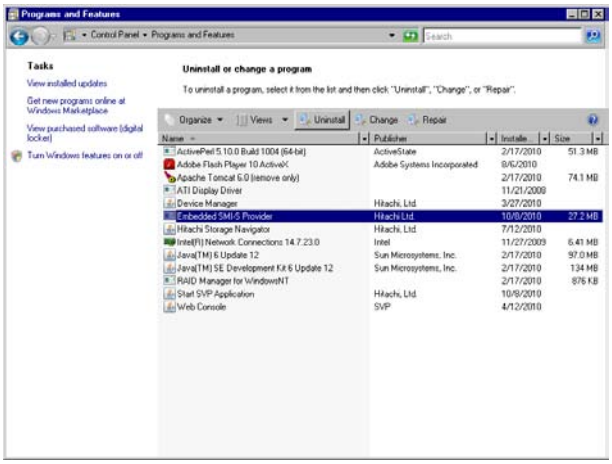
(1) Launch the Control Panel
Select (CL) [Start]-[Settings]-[Control Panel].



(2) Launch the Program and Features
Select (DC) [Programs and Features].

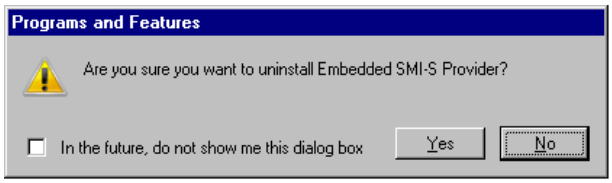


(3) Run uninstallation
Select (CL) [Embedded SMI-S Provider], and select (CL) [Uninstall] button.
If there is no [Embedded SMI-S Provider] in the list, go to 4-3-1-4.

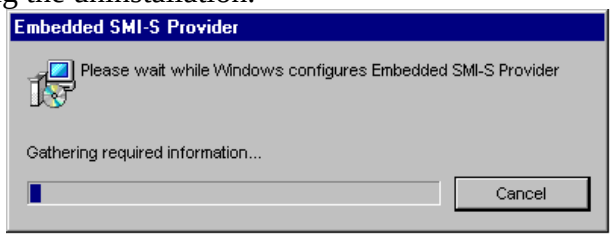


Copyright © 2010, Hitachi, Ltd.

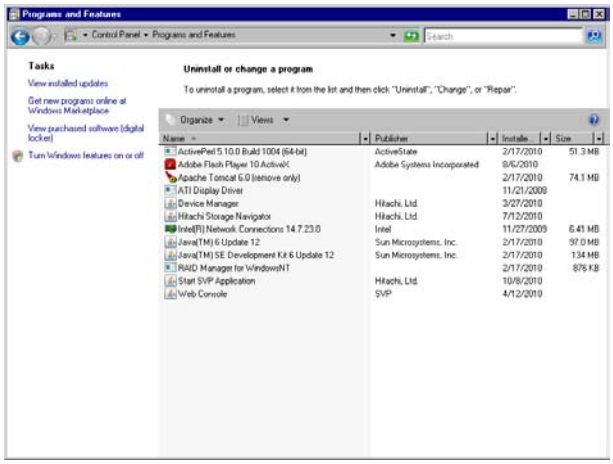
(4) Make sure the massage
If following message box is displayed, select (CL) [Yes].
"Are you sure you want to uninstall Embedded SMI-S Provider?"



(5) The dialog box is displayed while processing the uninstallation.
At the end of this process, the dialog box will close automatically.



(6) Check the result and close the window.
[Embedded SMI-S Provider] in 'Programs and Features' window was deleted.
Close the window.



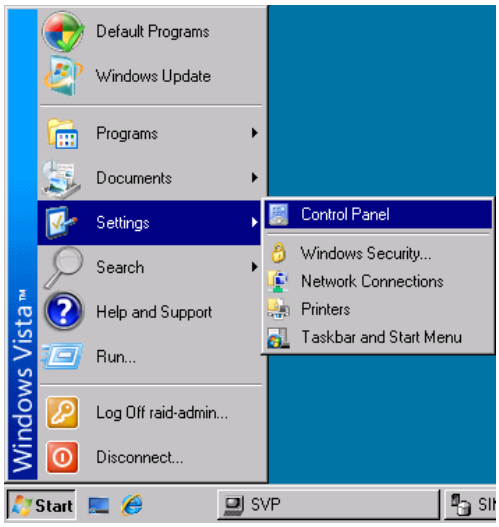
Notice: When the SVP High Reliability Kit is installed, you need to install it for the standby SVP in the same procedure.
About the switching SVP, refer to Post-Procedure "2.18. SVP Switching" in the "SVP SECTION".

Copyright © 2010, Hitachi, Ltd.

4-3-1-4 Uninstalling Java program

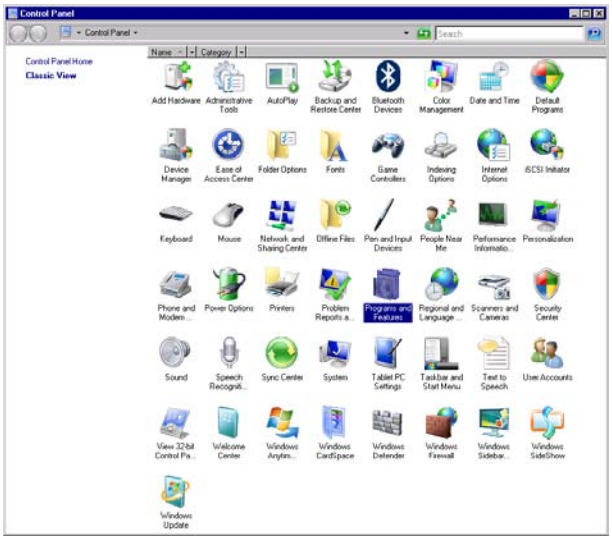
(1)

Select (CL) [Start]-[Settings]-[Control Panel] in this order.



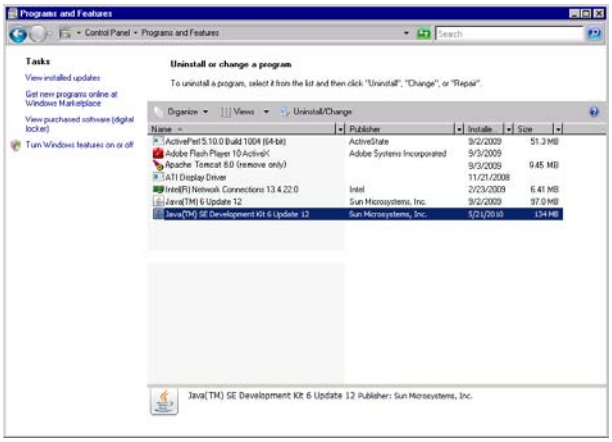
(2)

Select (DC) [Programs and Features].



(3)

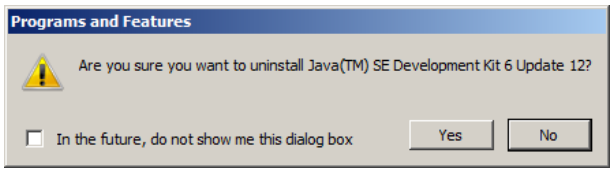
Select [Java(TM) SE Development Kit 6 Update 12], and then select (CL) [Uninstall/Change].
If there is no [Java(TM) SE Development Kit 6 Update 12] in the list, go to (8).



Copyright © 2010, 2012, Hitachi, Ltd.

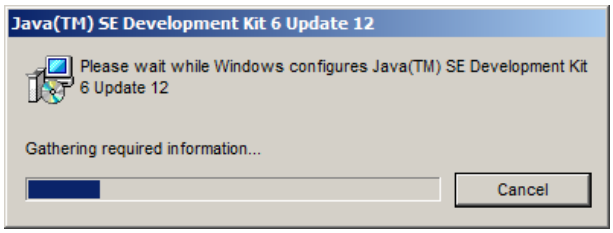
(4)

A message, “Are you sure you want to uninstall Java(TM) SE Development Kit 6 Update 12?” is displayed.
Select (CL) [Yes].



(5)

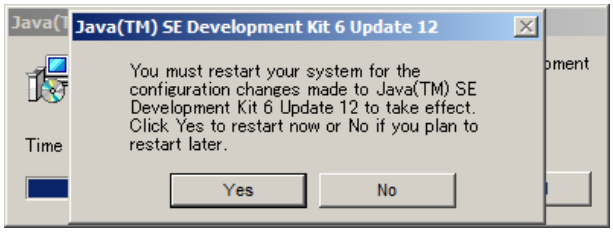
Uninstallation of Java is started.



(6)

When this window is not displayed, go to (7).
When this window is displayed, select (CL) [No]. (*1)

Notice: Don’t select [Yes]. If you do them, SVP may no longer work properly.

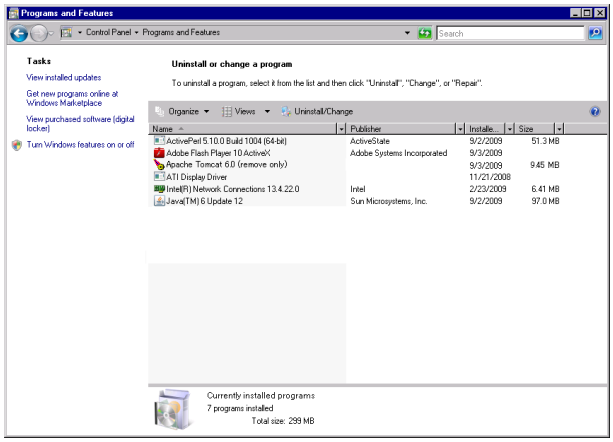


*1: If selecting (CL) [Yes], SVP will be rebooted. In this case, follow the procedures below.

- Login to SVP after rebooting.
  Refer to “4-1. Connecting the Console PC” (INST03-13-160) to choose login user name.
- When following messages are displayed, select (CL) [OK].
  “Unable to log into the SVP, because there is a problem with its system requirements. Reboot it, and then reconfigure the SVP.”
- Continue procedures (8) after SVP rebooting.
  Refer to “4-1. Connecting the Console PC” (INST03-13-160). Please use “Preinstalled User”.

(7)

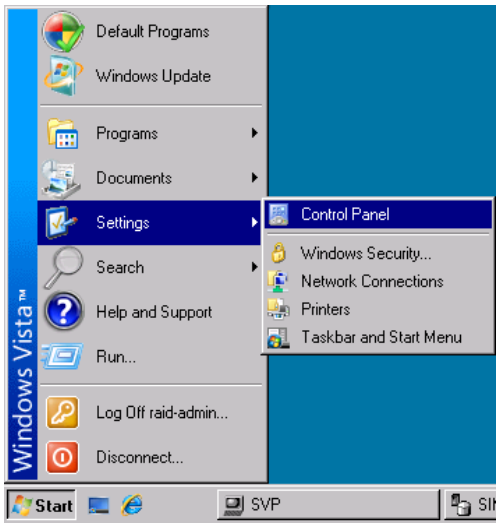
The [Java(TM) SE Development Kit 6 Update 12] is deleted from the ‘Programs and Features’ window.
Close the window by selecting (CL) the [×] button.



Copyright © 2010, Hitachi, Ltd.

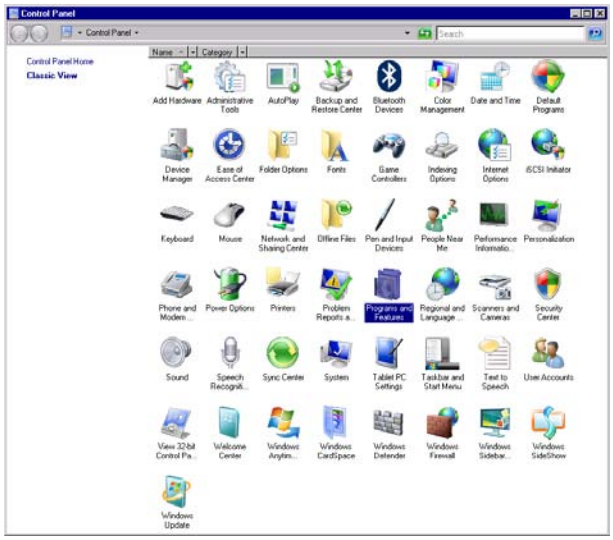
(8)

Select (CL) [Start] -[Settings]-[Control Panel] in this order.



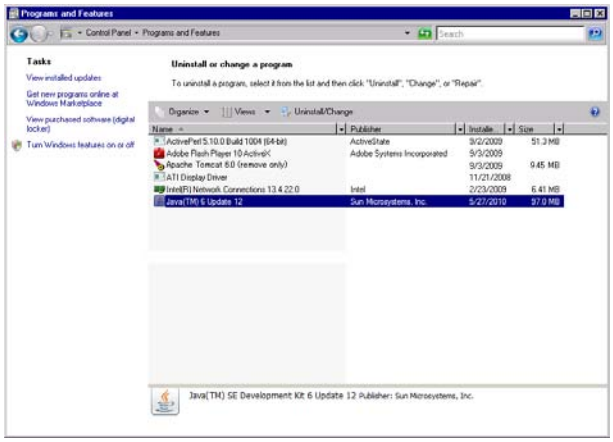
(9)

Select (DC) [Programs and Features].



(10)

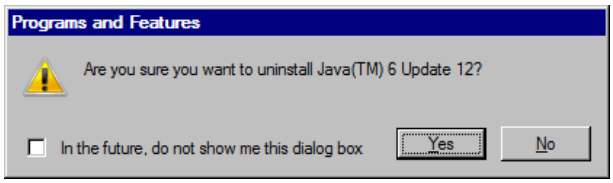
Select [Java(TM) 6 Update 12], and then select (CL) [Uninstall/Change].
If there is no [Java(TM) 6 Update 12] in the list, go to 4-3-1-5.



Copyright © 2010, Hitachi, Ltd.

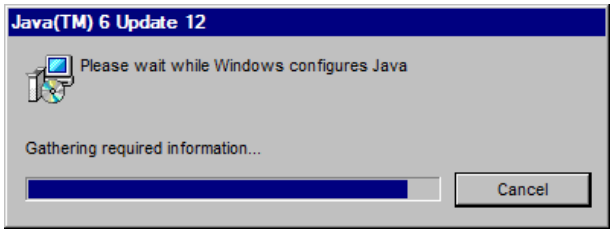
(11)

A message, “Are you sure you want to uninstall Java(TM) 6 Update 12?” is displayed.
Select (CL) [Yes].



(12)

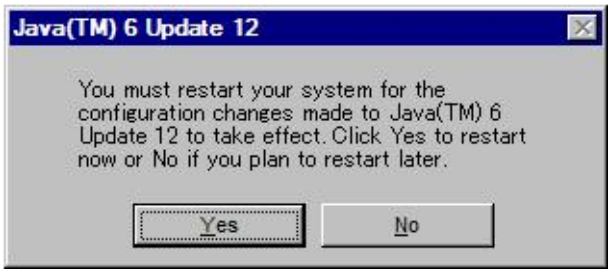
Uninstallation of Java is started.



Copyright © 2010, 2012, Hitachi, Ltd.

(13)

When this window is not displayed, go to (14).
When this window is displayed, select (CL) [No]. (*1)



Notice: Don't select [Yes]. If you do them, SVP may no longer work properly.

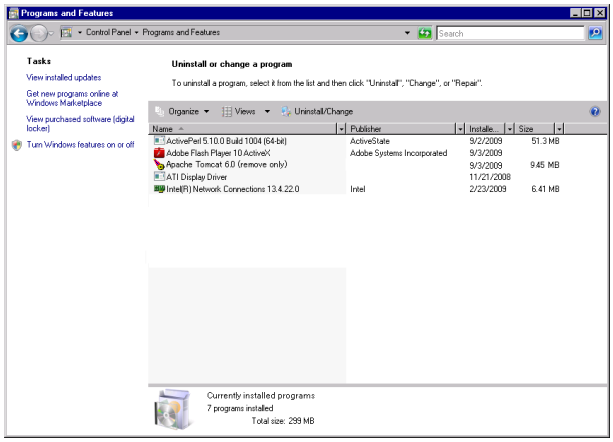
*1: If selecting (CL) [Yes], SVP will be rebooted. In this case, follow the procedures below.

- Login to SVP after rebooting.
  Refer to "4-1. Connecting the Console PC" (INST03-13-160) to choose login user name.
- When following messages are displayed, select (CL) [OK].
  "Unable to log into the SVP, because there is a problem with its system requirements. Reboot it, and then reconfigure the SVP."
- Continue procedures 4-3-1-5 after SVP rebooting.
  Refer to "4-1. Connecting the Console PC" (INST03-13-160). Please use "Preinstalled User".

---

(14)

The [Java(TM) 6 Update 12] is deleted from the 'Programs and Features' window.
Close the window by selecting (CL) the [×] button.

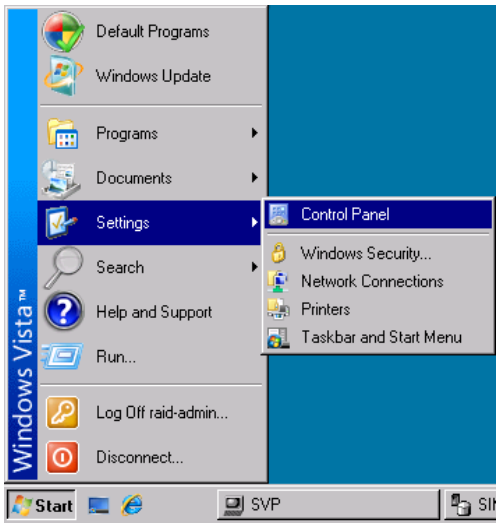


Copyright © 2010, Hitachi, Ltd.

4-3-1-5 Uninstalling Perl program

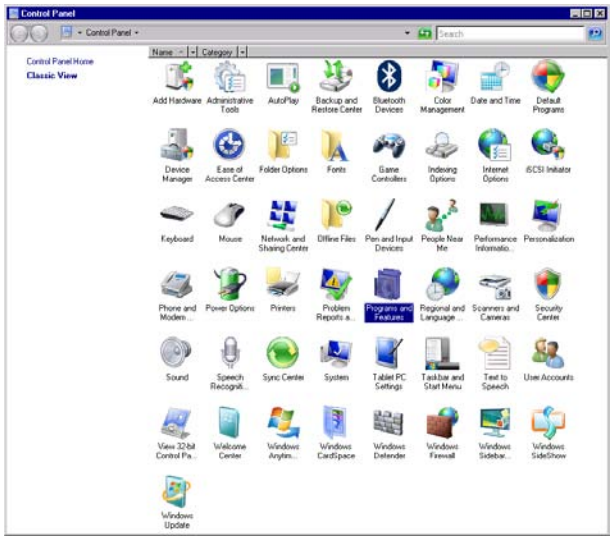
(1)

Select (CL) [Start] -[Settings]-[Control Panel] in this order.



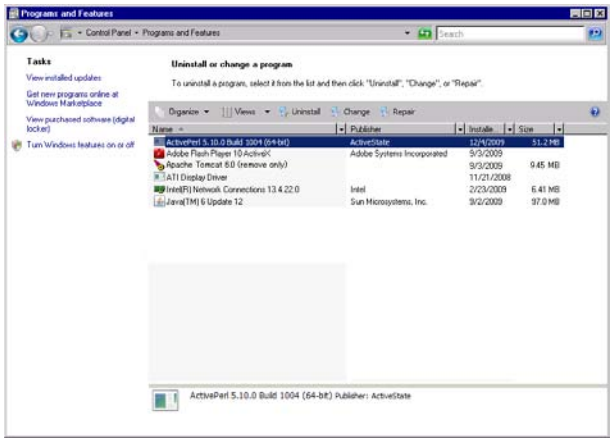
(2)

Select (DC) [Programs and Features].



(3)

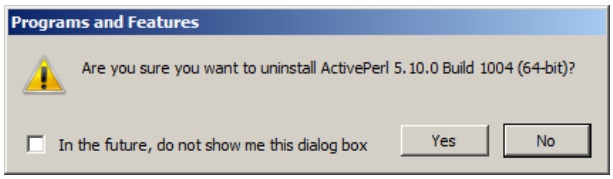
Select [ActivePerl 5.10.0 Build 1004 (64-bit)], and then select (CL) [Uninstall].
If there is no [ActivePerl 5.10.0 Build 1004 (64-bit)] in the list, go to 4-3-1-6.



Copyright © 2010, Hitachi, Ltd.

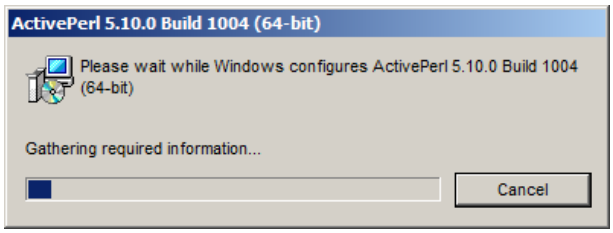
(4)

A message, “Are you sure you want to uninstall ActivePerl 5.10.0 Build 1004 (64-bit)?” is displayed.
Select (CL) [Yes].



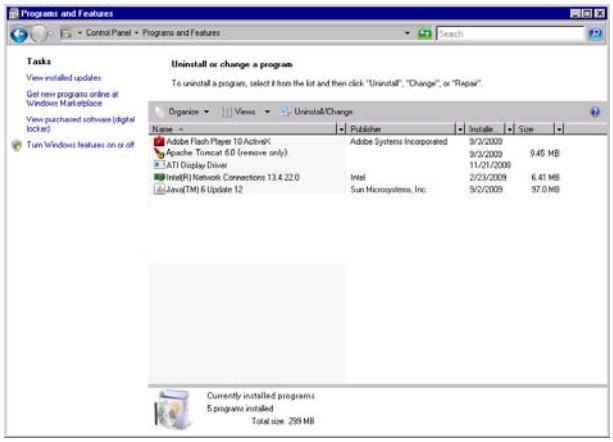
(5)

Uninstallation of Perl is started.



(6)

The [ActivePerl 5.10.0 Build 1004 (64-bit)] is deleted from the ‘Programs and Features’ window.
Close the window by selecting (CL) the [×] button.

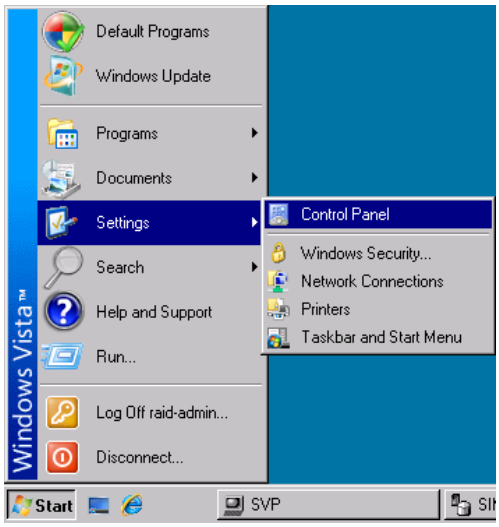


Copyright © 2010, Hitachi, Ltd.

4-3-1-6 Uninstalling Flash Player program

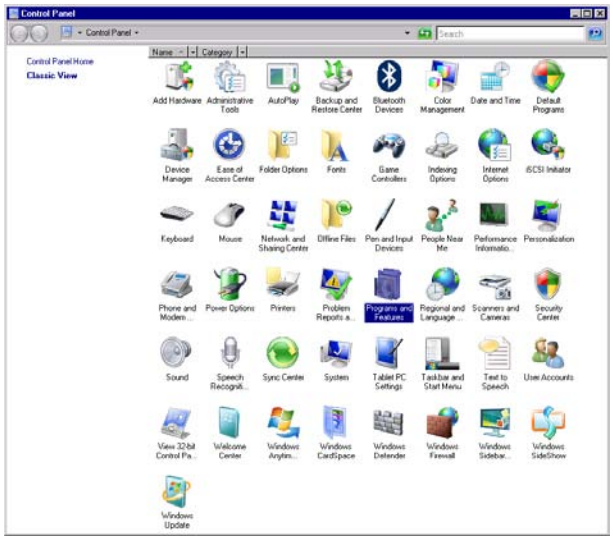
(1)

Select (CL) [Start] -[Settings]-[Control Panel] in this order.



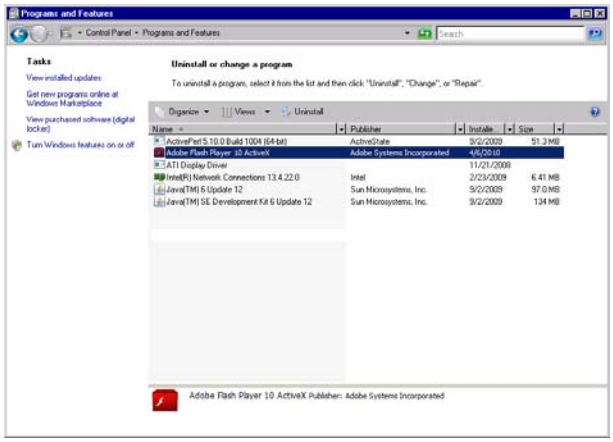
(2)

Select (DC) [Programs and Features].



(3)

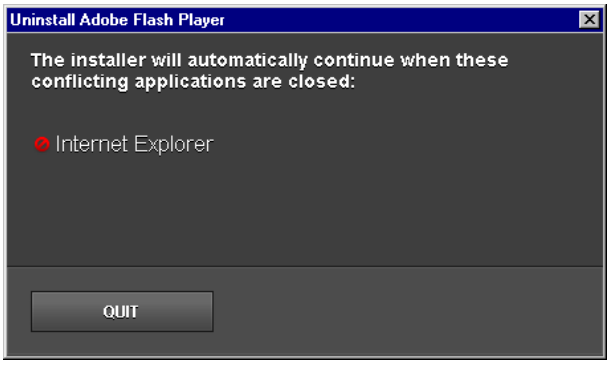
Select [Adobe Flash Player 10 ActiveX], and then select (CL) [Uninstall].
If there is no [Adobe Flash Player 10 ActiveX] in the list, go to 4-3-2.



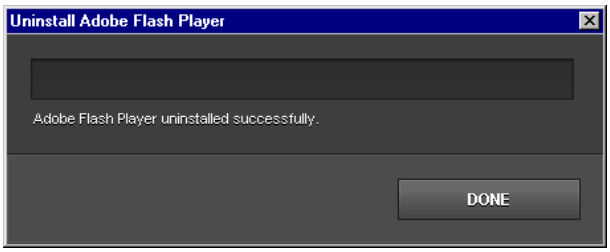
Copyright © 2010, Hitachi, Ltd.

(4) Starting uninstallation
Select (CL) [UNINSTALL].

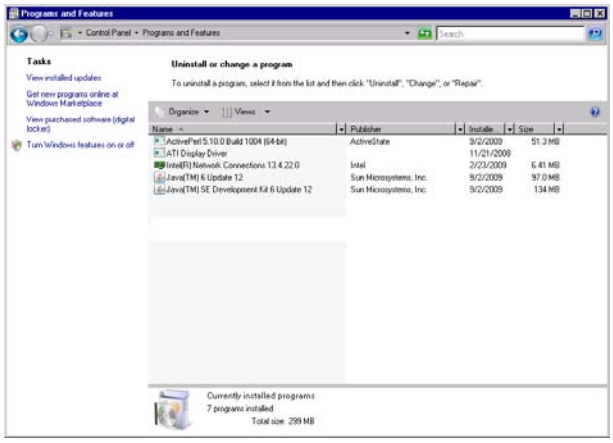
(5) Finishing application
If some applications were using Flash Player, the application name is displayed. Please finish the applications.



(6) Finishing uninstallation
Select (CL) [DONE].



(7)
The [Adobe Flash Player 10 ActiveX] is deleted from the 'Programs and Features' window.
Close the window by selecting (CL) the [×] button.



Copyright © 2010, Hitachi, Ltd.

4-3-2 <Starting Installation>

① Insert a micro program media in the CD-ROM drive of Client PC and wait for one minutes or so.

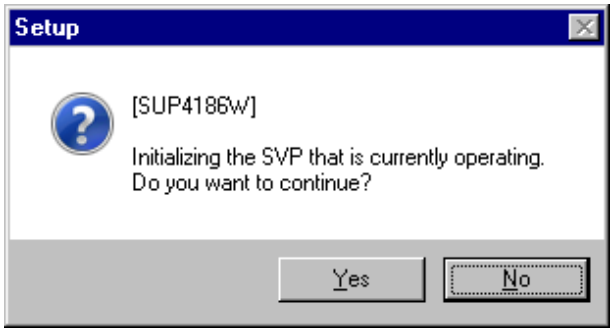
② Select (CL) [RUN...] from the “Start” menu. Enter “\\tsclient\E\setup.exe” and select (CL) the [OK] button.

Notice1: Select the drive which inserted a CD-R in ②.

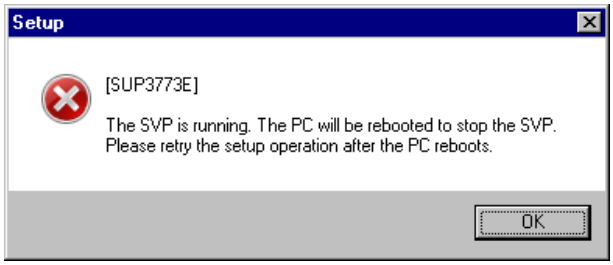
“\\tsclient\E\setup.exe”

- Input the drive name of the CD-ROM drive of Client PC.
- Indicate Client PC. (This spelling is inputted.)

Notice2: When the SVP is running, the message “Initializing the SVP that is currently operating. Do you want to continue?” is displayed. Select (CL) [Yes].



Then the message “The SVP is running. The PC will be rebooted to stop the SVP. Please retry the setup operation after the PC reboots.” is displayed, and the PC reboots if selecting (CL) [OK]. After waiting for about five minutes, install the microprogram again after rebooting the PC.



Refer to “4-1 Connecting the Console PC” (INST03-13-160). Please use “Preinstalled User” to connect with SVP.

Copyright © 2010, Hitachi, Ltd.

4-4 <Using another media>

4-4-1 <Installing the Configuration Information>

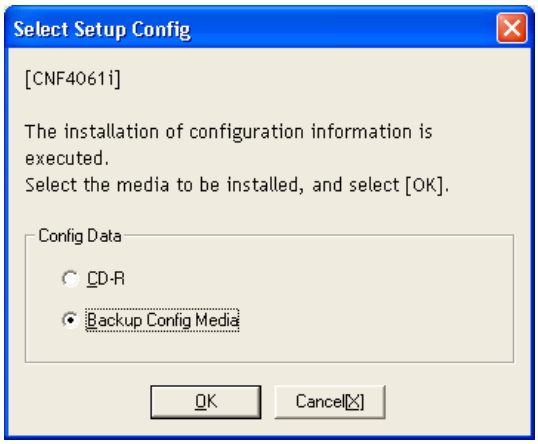
(1)

Prepare the Config media which did backup.

---

(2)

Select (CL) Backup Config Media in the 'Select Setup Config' window and select (CL) the [OK] button.

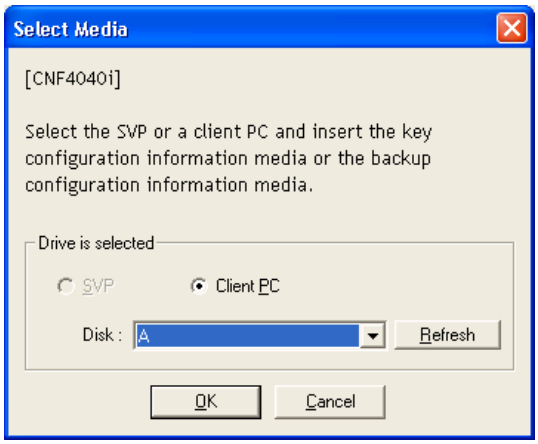


Copyright © 2010, Hitachi, Ltd.

(3)

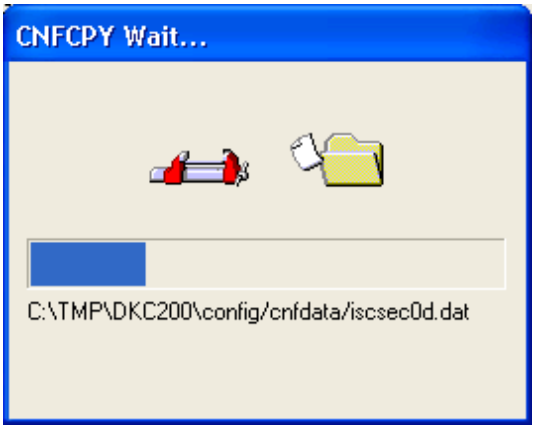
Select the drive which insert the Backup Config Media (prepared with step (1)), and select (CL) the [OK] button.

Select (CL) [Refresh] button, Disk is updated to the latest information.



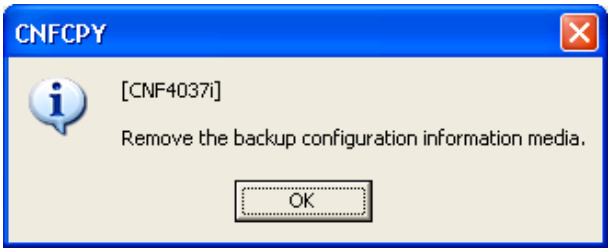
(4)

Perform copy processing of the configuration information from the Backup Config Media to the SVP.
The 'CNFCPY Wait...' window is displayed during this time.



(5)

Select (CL) the [OK] button after removing the configuration information media.

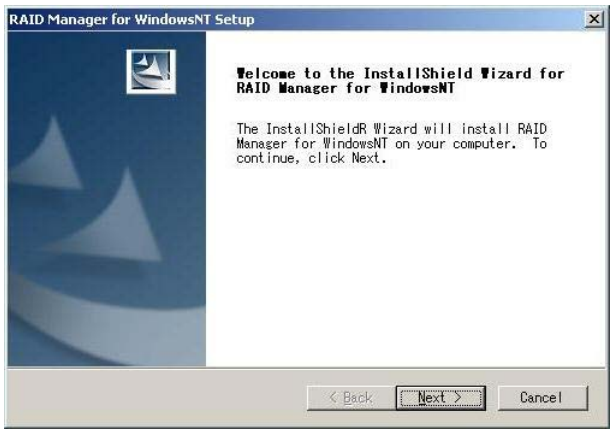


Copyright © 2010, 2011, Hitachi, Ltd.

4-4-2 <Installing the RAID Manager>

(1)

Select (CL) [Next>].

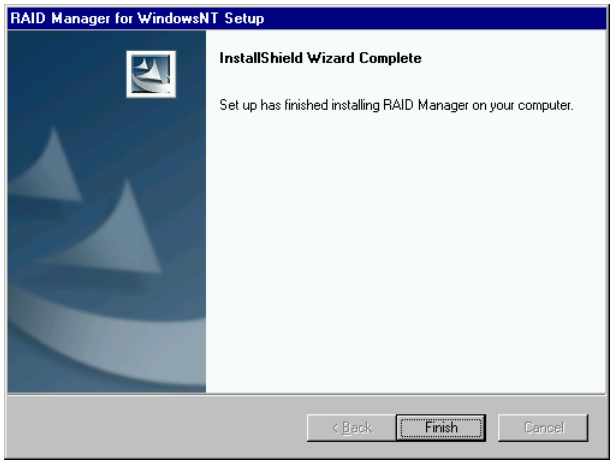


(2)

Select (CL) [Next>].

(3)

Select (CL) [Finish].



Copyright © 2010, Hitachi, Ltd.

4-4-3 <Installing the OSS media>

(1)

When the message of “Insert the second CD-R.” is displayed, replace it to the second media. Select (CL) [OK] after the replacement.

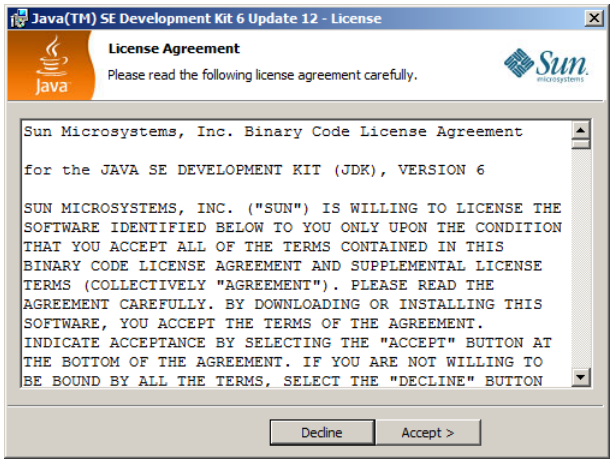
Copyright © 2010, Hitachi, Ltd.

4-5 Setting Up of JAVA

Perform setting up operation of Java.
When JAVA has already been installed, go to Section 4-6.

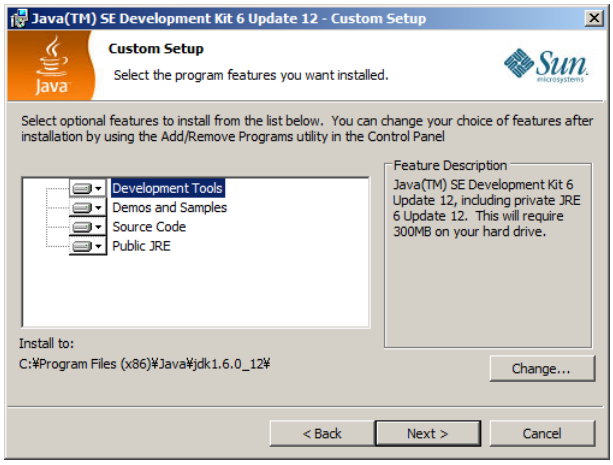
(1)

Select (CL) [Accept>].



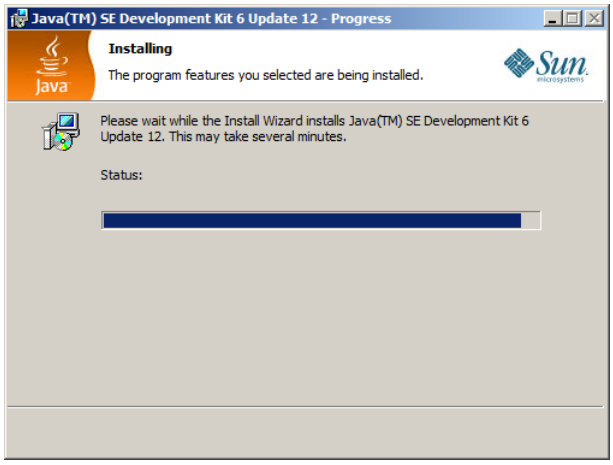
(2)

Select (CL) [Next>].



(3)

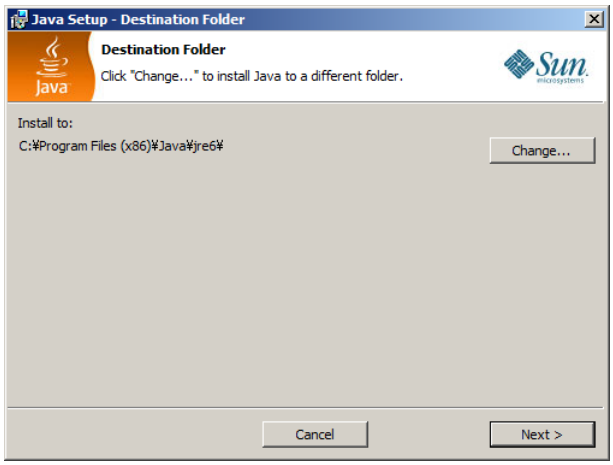
Copying of the file is started.



Copyright © 2010, 2012, Hitachi, Ltd.

(4)

Select (CL) [Next>].

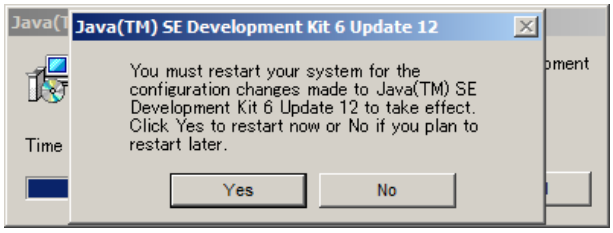


(5)

Select (CL) [Finish].
If [Register your JDK] window opens, close it.

(6)

When this window is not displayed, go to Section 4-6.
When this window is displayed, select (CL) [No].



Notice: Don't select [Yes]. If you do them, SVP may no longer work properly.

Notice: Until SVP is shutdown in procedure 4-10, please don't logout or shutdown SVP. If you do them, SVP may no longer work properly. If a shutdown request message is displayed, please don't shutdown.

Copyright © 2010, Hitachi, Ltd.

4-6 The Setting of Apache SSL communication

The things of default are set in the key creation for SSL communication and the certificate file. When you install an SSL communication key and a certificate file responding to the customer's request, see "Hitachi Storage Navigator User Guide".

It advances to step 4-7 when setting it by default.

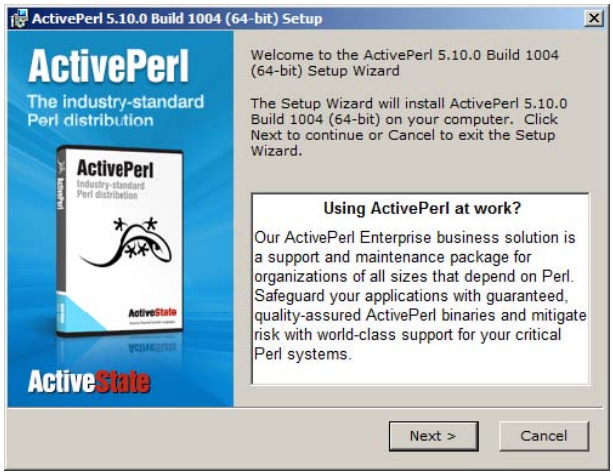
Copyright © 2010, Hitachi, Ltd.

4-7 Setting Up of Perl

Perform setting up operation of Perl.
When Perl has already been installed, go to Section 4-8.

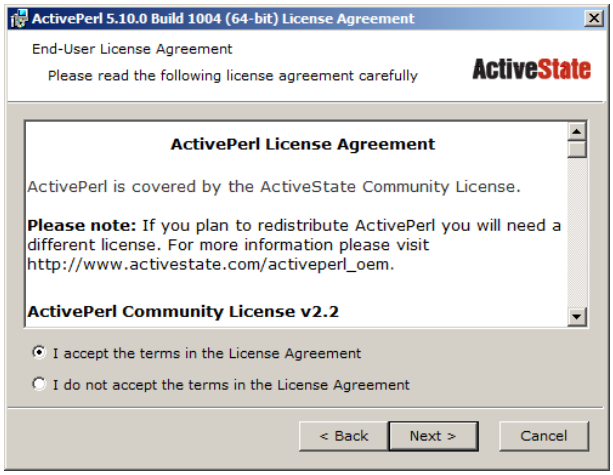
(1)

Select (CL) [Next>].



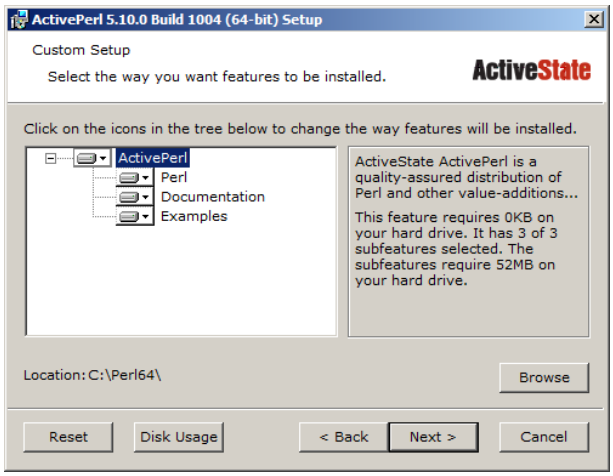
(2)

After selecting “I accept the terms in the License Agreement”, select (CL) [Next>].



(3)

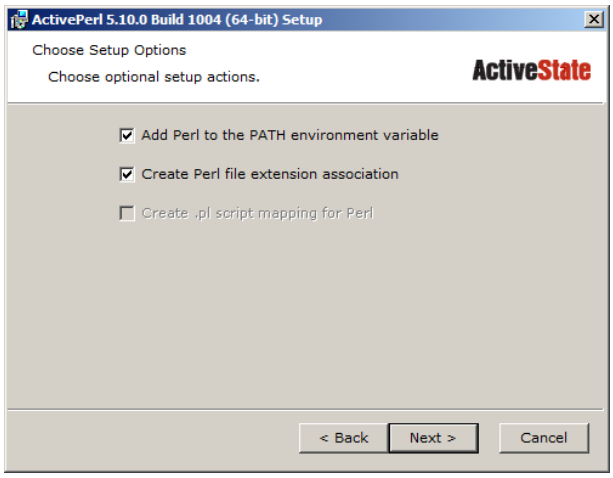
Select (CL) [Next>].



Copyright © 2010, Hitachi, Ltd.

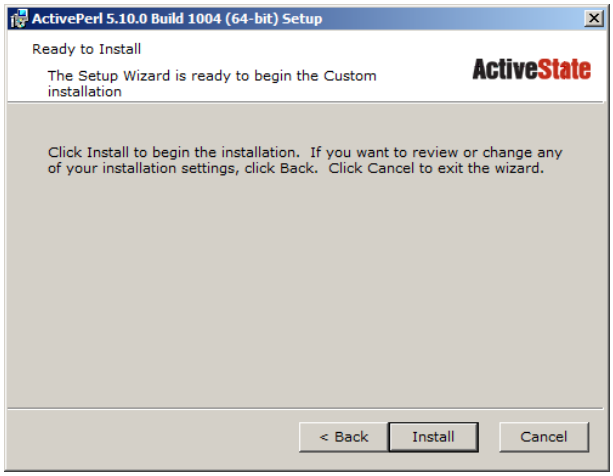
(4)

Select (CL) [Next>].



(5)

Select (CL) [Install].
Copying of the file is started.



(6)

When the copying of the file is completed, this window is displayed. Remove the check mark from the left side check box of the “Display the release notes” and select (CL) [Finish].

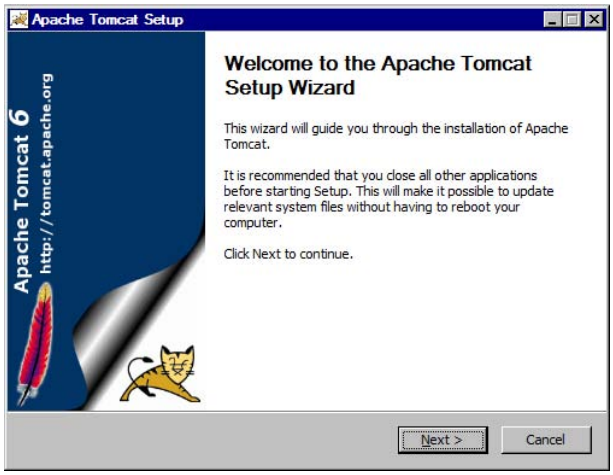
Copyright © 2010, Hitachi, Ltd.

4-8 Setting Up of Tomcat

Perform setting up operation of Tomcat.
When Tomcat has already been installed, go to Section 4-9.

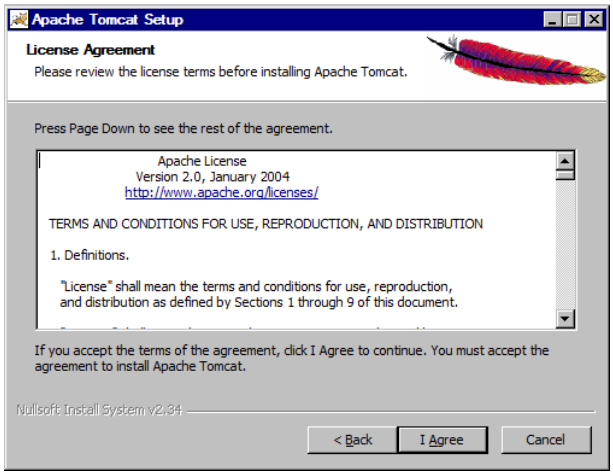
(1)

Select (CL) [Next>].



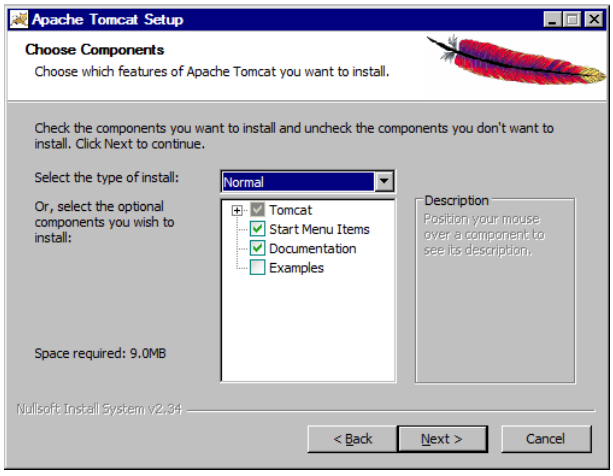
(2)

Select (CL) [I Agree].



(3)

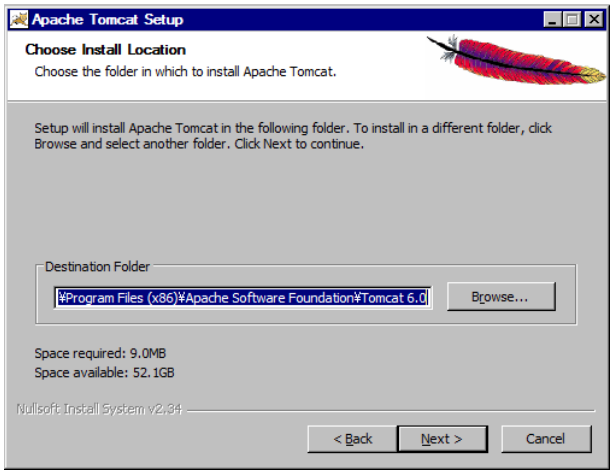
Select (CL) [Next>].



Copyright © 2010, Hitachi, Ltd.

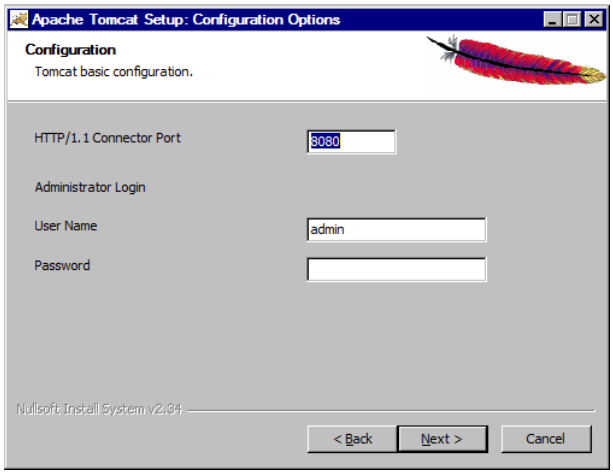
(4)

Select (CL) [Next>].



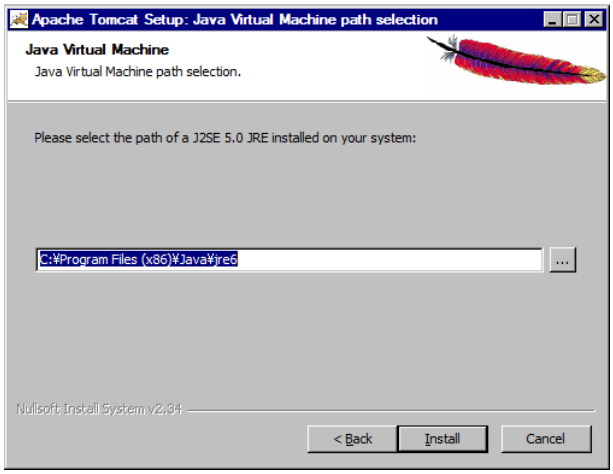
(5)

Select (CL) [Next>].



(6)

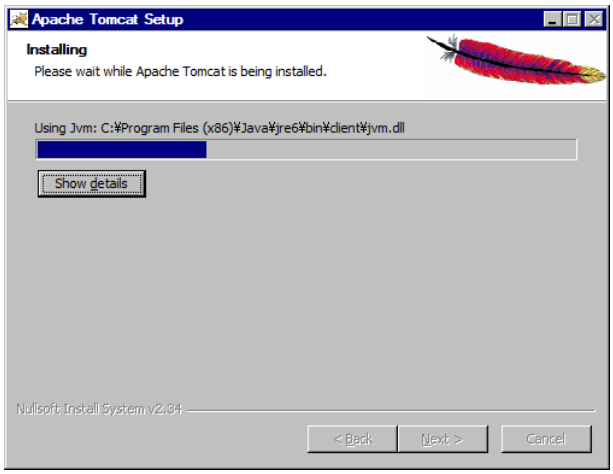
Select (CL) [Install].



Copyright © 2010, Hitachi, Ltd.

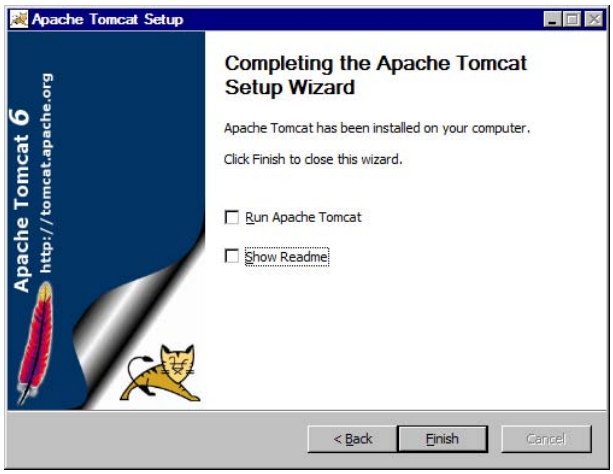
(7)

Wait while installing.



(8)

Uncheck all the checkboxes, and select (CL) [Finish].

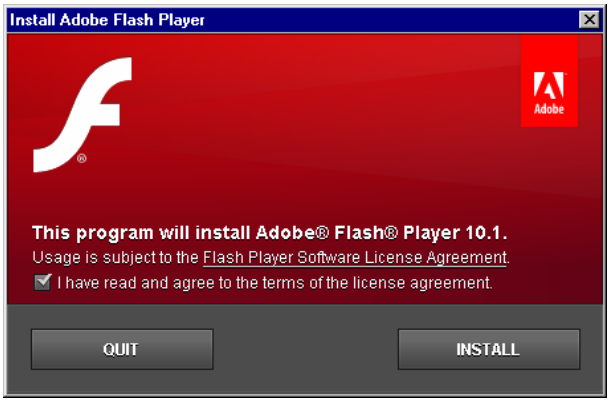


Copyright © 2010, Hitachi, Ltd.

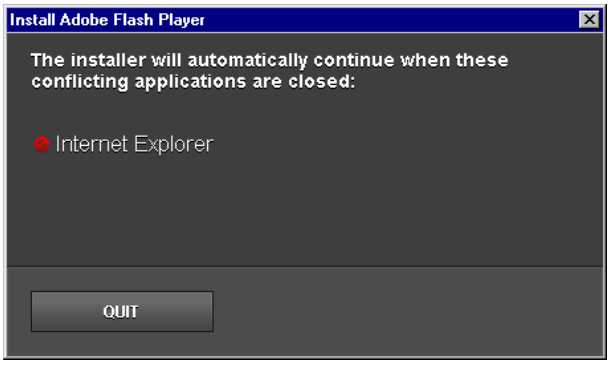
4-9 Setting Up of Flash Player

Perform setting up operation of Flash Player.
When Flash Player has already been installed, go to Section 4-10.

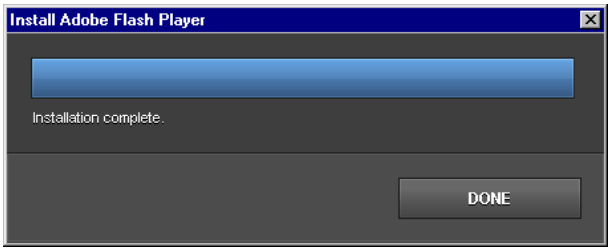
(1) Starting installation
Select (CL) [I have read and agree to the terms of the license agreement.], and select (CL) [INSTALL].



(2) Finishing application
If some applications were using Flash Player, the application name is displayed. Please finish the applications.



(3) Finishing installation
Select (CL) [DONE].

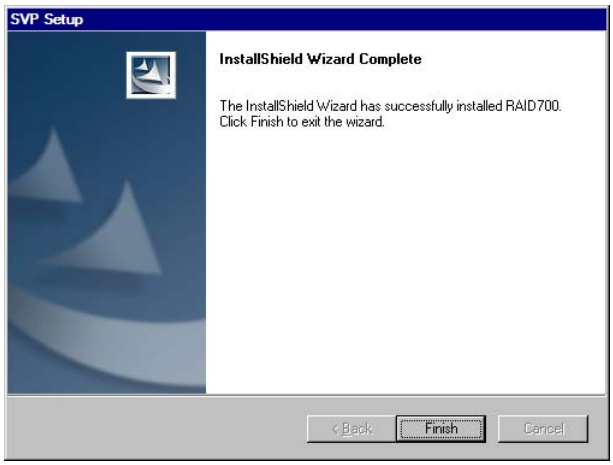


Copyright © 2010, Hitachi, Ltd.

4-10<Rebooting the SVP>

When the setting up is completed, remove the CD-ROM and select (CL) [Finish].
The SVP automatically restarts. When it reboots, the connection between the Console PC and the Additional SVP is cut off. Wait for about five minutes, and then reconnect the Console PC to the Additional SVP.

[Connected to]
The Additional SVP 126.255.255.15



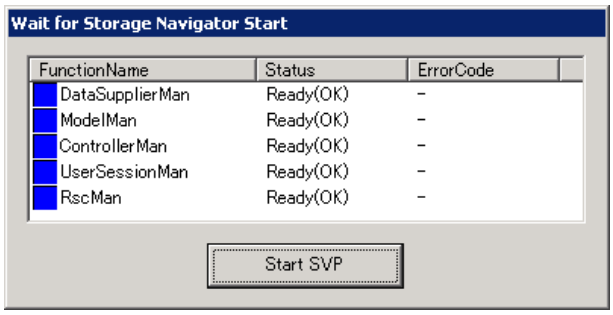
Copyright © 2010, Hitachi, Ltd.

4-11 <Setting an IP Address and Duplication of Additional SVP>

(1) <Starting SVP program>

<When Web Console isn't working>

Select (CL) [Start SVP].



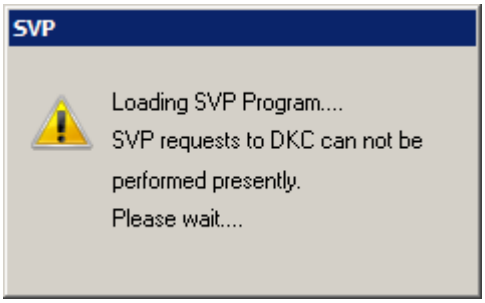
<When Web Console is working>

Select (CL) [Maintenance] - [Maintenance Components (General)].

---

(2) <Changing the mode>

Change the mode by selecting [Modify Mode].



Note: Please wait for changing the mode into [Modify Mode] till the following message is closed.
"Loading SVP Program.... SVP requests to DKC can not be performed presently. Please wait...."
A message is closed within five minutes after SVP started.
(If you do not find whether the message is closed, please confirm "Function Name: DKC" in 'Web Server Status' window.
If you can find the lamp yellow, you can change the mode into [Modify Mode].)

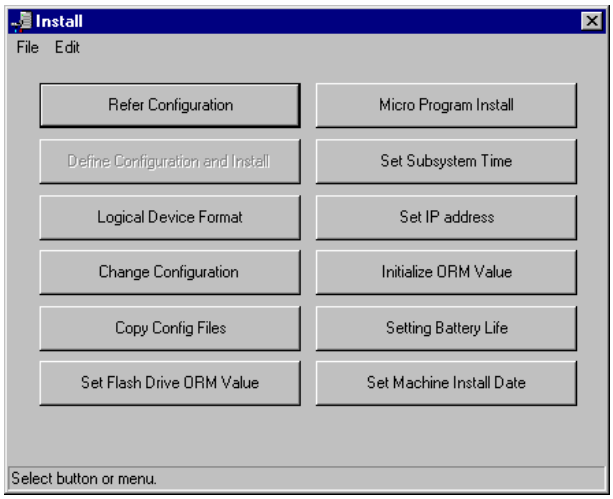
---

(3) <Opening the Install window>

Select (CL) [Install] from the [SVP] menu.

Copyright © 2010, 2012, Hitachi, Ltd.

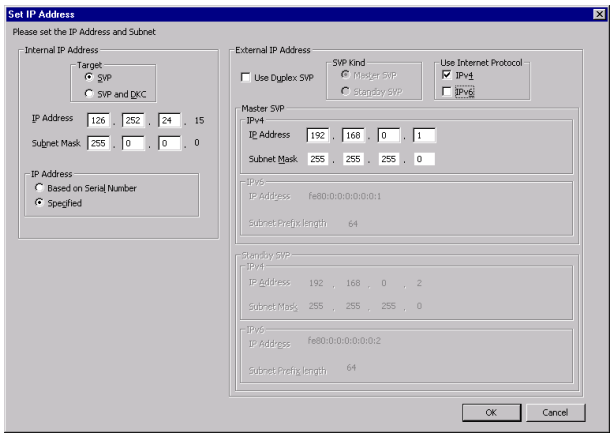
(4) <Selecting [Set SVP IP Address]>
Select (CL) [Set IP Address] in the 'Install' window.



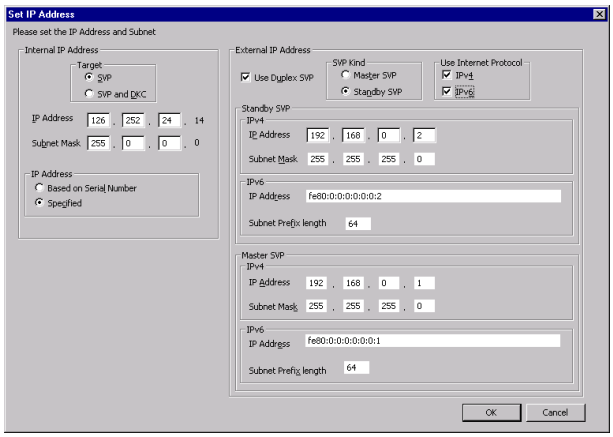
Note: Although it may be an error display if the Web Server Status window is displayed before the IP address setting work of SVP is completed, there is no problem because it is the one by the process of the SVP replacement.

Copyright © 2010, Hitachi, Ltd.

(5) <Verifying an IP address>
Select (CL) [SVP] in the Internal IP Address, and check if the IP Address and the Subnet Mask of the Internal IP Address are set up correctly.



(6) <Setting the SVP duplication>
(a) Check (CL) [Use Duplex SVP] in the External IP address box.
(b) Select (CL) [Standby SVP] in the SVP Kind box.
(c) Enter the IP addresses and subnet masks of the Master and Standby SVPs, and then select (CL) [OK].



* You do not have to enter the information of Item (c) above when the setting of the external IP address is not required.
Go to step (8).

Note: When the Service Processor is installed, information transmission to Standby SVP is performed once per a day. The Standby SVP reboots for the application after the information transfer. Even if a Standby SVP does not have setting of periodical reboot, Standby SVP reboots. For example, Standby SVP reboots at around 13:30 with the equipment which transmits at 13:00. The time of a reboot changes by transfer information quantity.

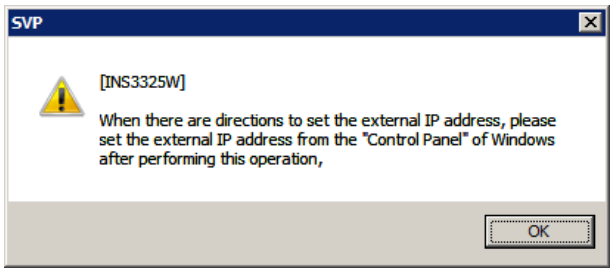
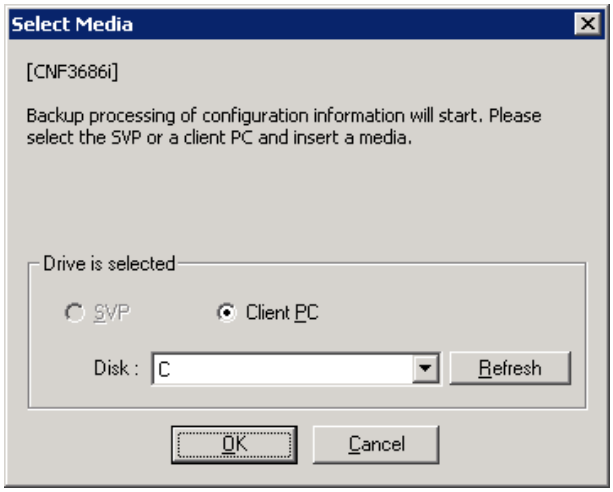
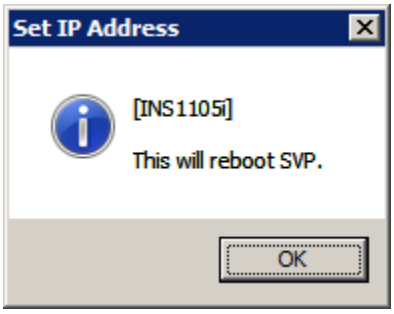
(7) <Confirming the external IP address setting>
When a message, “When there are directions to set the external IP address, please set the external IP address from the “Control Panel” of Windows after performing this operation,” is displayed, select (CL) the [OK] button.



(8) <Inserting the media containing the configuration information>
Select (CL) the [Cancel] button.



(9) <Confirming rebooting of the SVP>
Select (CL) [OK] in response to a message, “This will reboot SVP.”



When the setting up is completed, the SVP reboots automatically. When it reboots, the connection between the Console PC and the Additional SVP is cut off. Wait for about five minutes, and then reconnect the Console PC to the Additional SVP.

[Connected to]
The IP Address xxx.xxx.xxx.14 which is set up in the Additional SVP by step 4-11 (5) in the subsystem concerned.

Note: When the IP address of the console PC is changed in “4-1 Connecting the Console PC”, return the IP address of the console PC to xxx.xxx.xxx.13, and then connect it to SVP.

Copyright © 2010, Hitachi, Ltd.

4-12 <Setting an external IP address>

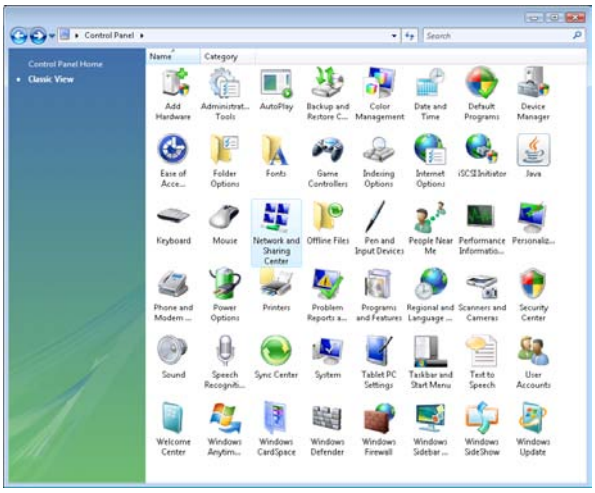
When the setting of the external IP address is not required, go to Step 5.

Copyright © 2010, Hitachi, Ltd.

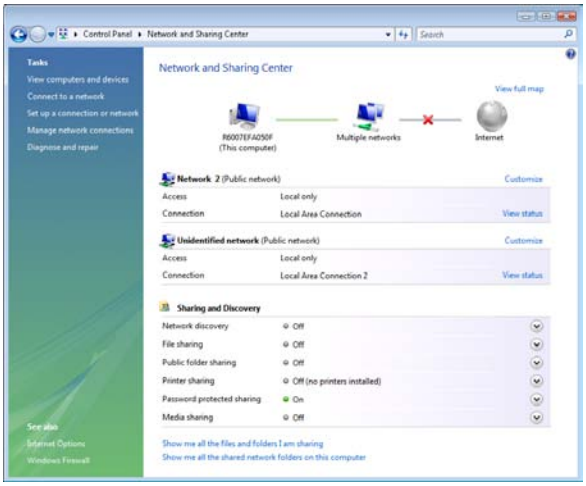
(1)

(a) <Opening the Control Panel window>
Select (DR) [Settings]-[Control Panel] from the [Start] menu.

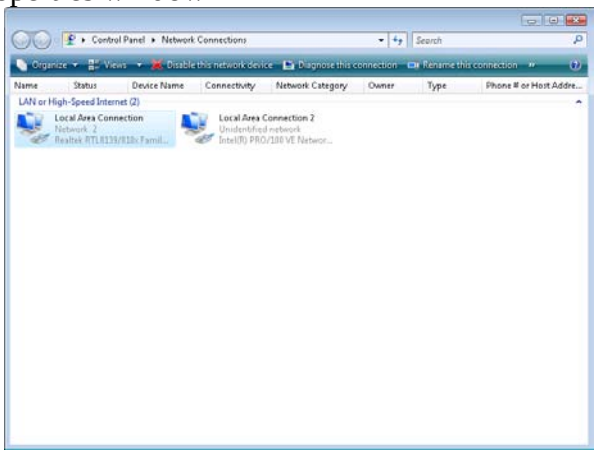
(b) <Opening the Network and Sharing Center window>
Select (CL) [Network and Sharing Center] in the 'Control Panel' window.



(c) <Opening the Manage network connections window>
Select (CL) [Manage network connections] in the 'Network and Sharing Center' window.



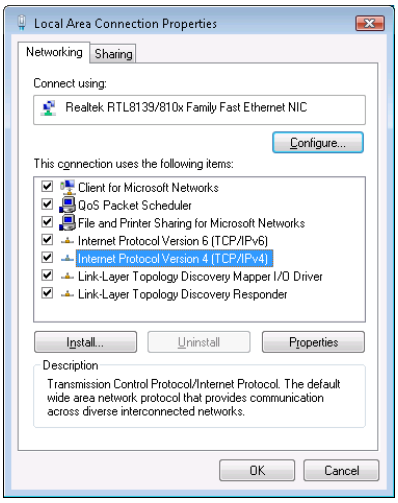
(d) <Opening the Local Area Connection Properties window>
Select (CL) [Local Area Connection] in the 'Network Connections' window and select (CL) [Properties] by clicking the right mouse button.



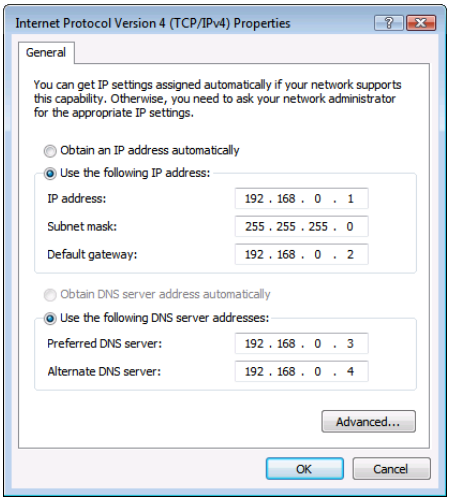
Copyright © 2010, 2013, Hitachi, Ltd.

(e)

Select (CL) [Internet Protocol Version 4 (TCP/IPv4)] in the 'Local Area Connection Properties' window and select (CL) the [Properties] button.

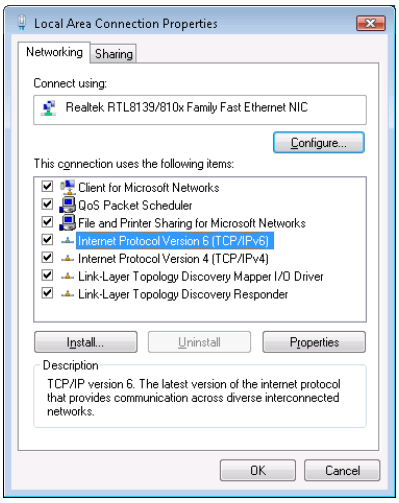


(f) <Setting the external IP address>
Set the "IP address", "Subnet mask", "Default gateway", "Preferred DNS server" and "Alternate DNS server" and select (CL) the [OK] button.
When you do not set IPv6, go to step (i).



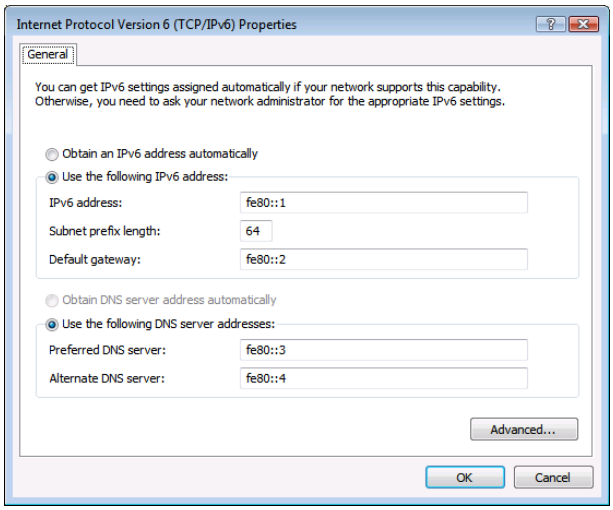
(g)

Select (CL) [Internet Protocol Version 6 (TCP/IPv6)] in the 'Local Area Connection Properties' window and select (CL) the [Properties] button.



Copyright © 2010, 2013, Hitachi, Ltd.

(h) <Setting the external IP address>
Set the
“IPv6 address”,
“Subnet prefix length” ,
“Default gateway”,
“Preferred DNS server” and
“Alternate DNS server”
and select (CL) the [OK] button.



(i)
After the setting is completed, select (CL) the [OK] button in the “Local Area Connection Properties” window.
Close the ‘Manage network connections’ window.

4-13<Setting Web Console>
Make a setting of the WEB CONSOLE (WEB CONSOLE SECTION “1. Before using Web Console ”). (WEB01-10)

4-14<Erasing logs>
Erase all logs that were made during operation of the SVP. (SVP02-220)

Copyright © 2010, Hitachi, Ltd.

5. Operating the Basic SVP
Operate the basic SVP as follows.

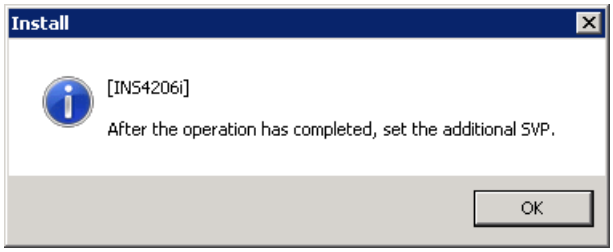
5-1 Connecting the Console PC
Connect the Console PC to the Basic SVP.

The login user is different by the presence of the microprogram.

[Connected to]
The Basic SVP xxx.xxx.xxx.15 in the subsystem concerned

5-2

(1) <Operation of SVP installation>
Select (CL) [OK] button, in response to "After the operation has completed, set the additional SVP."



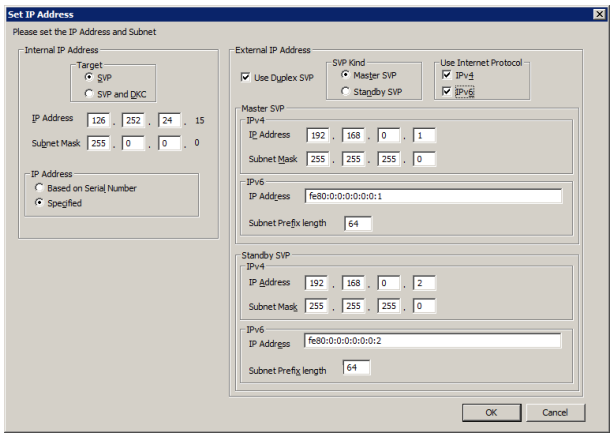
Copyright © 2010, Hitachi, Ltd.

(2) <Setting the SVP duplication>

(a) Check (CL) [Use Duplex SVP] in the External IP Address box.

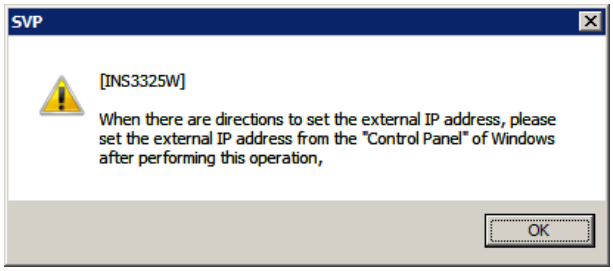
(b) Select (CL) [Master SVP] in the SVP Kind box.

(c) Enter the IP addresses and subnet masks of the Master and Standby SVPs, and then select (CL) [OK].



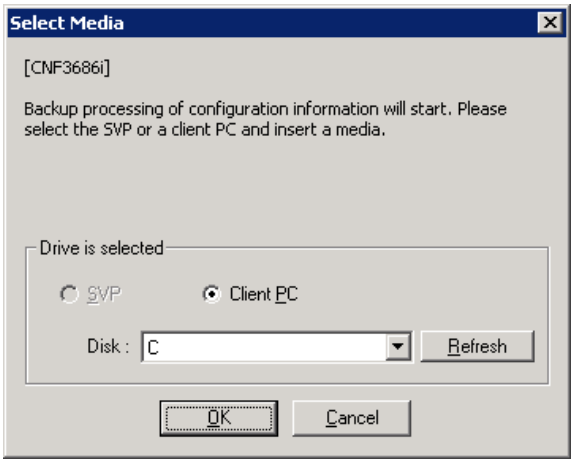
* You do not have to enter the information of Item (c) above when the setting of the external IP address is not required.
Go to step (4).

(3) <Confirming the external IP address setting>
When a message, “When there are directions to set the external IP address, please set the external IP address from the “Control Panel” of Windows after performing this operation,” is displayed, select (CL) the [OK] button.



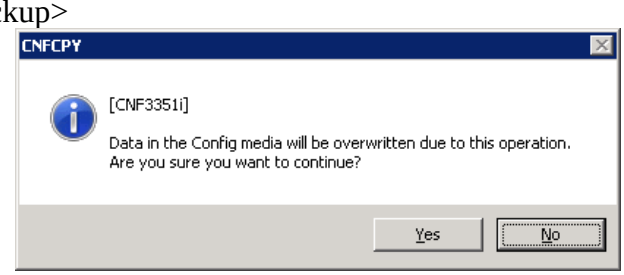
(4) <Inserting the media containing the configuration information>
Execute an operation for backing up the configuration information.
Prepare the removable media for backup and insert the media.
Please select (CL) the [Refresh] button, and update drive information.
Select (CL) the drive and the PC in which the media was inserted. Select (CL) the [OK] button.

Note: For the procedure of backing up the configuration information to a CD-R, see page MICRO07-140.

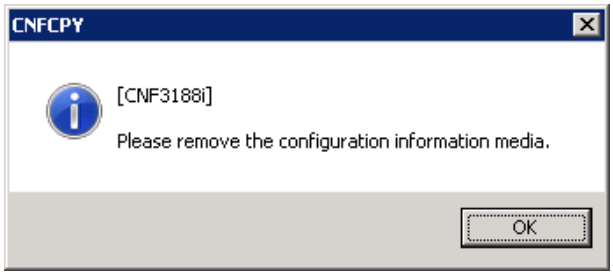


Copyright © 2010, Hitachi, Ltd.

(5) <Confirming the configuration information backup>
When you want to continue the process, select (CL) the [Yes] button.
When the backup to the Config media is not necessary, select (CL) the [No] button.



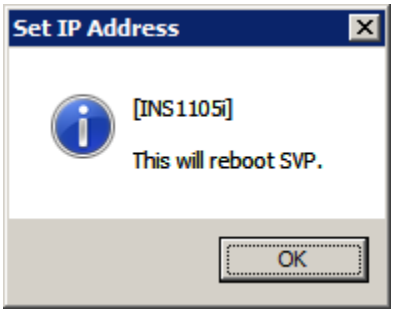
(6) <Taking out the media containing the configuration information>
When this procedure is completed, the message “Please remove the configuration information media.” is displayed.
Remove the configuration information media, Select (CL) [OK].



(7) <Confirming rebooting of the SVP>
Select (CL) [OK].

When the SVP reboots, the connection between the Console PC and the Basic SVP is cut off. Wait for about five minutes, and then reconnect the Console PC to the Basic SVP.

[Connected to]
The Basic SVP xxx.xxx.xxx.15 in the subsystem concerned



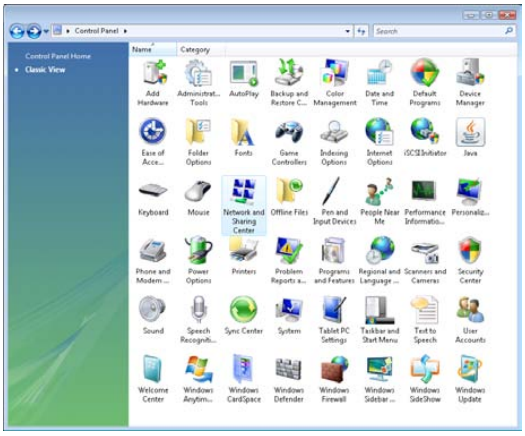
Copyright © 2010, Hitachi, Ltd.

5-3 <Setting an external IP address>
When the setting of the external IP address is not required, go to Step 6.

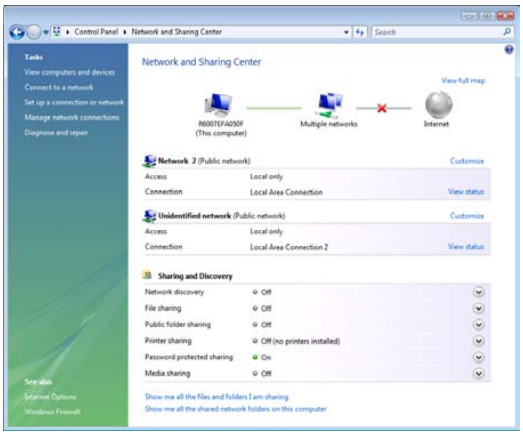
(1)

(a) <Opening the Control Panel window>
Select (DR) [Settings]-[Control Panel] from the [Start] menu.

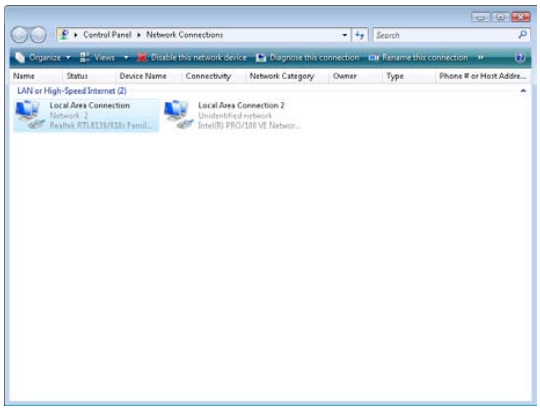
(b) <Opening the Network and Sharing Center window>
Select (CL) [Network and Sharing Center] in the 'Control Panel' window.



(c) <Opening the Manage network connections window>
Select (CL) [Manage network connections] in the 'Network and Sharing Center' window.



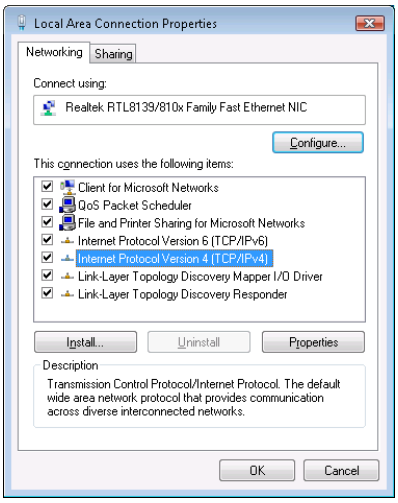
(d) <Opening the Public LAN Properties window>
Select (CL) [Public LAN] in the 'Network Connections' window and select (CL) [Properties] by clicking the right mouse button.
When you do not set IPv4, go to step (g).



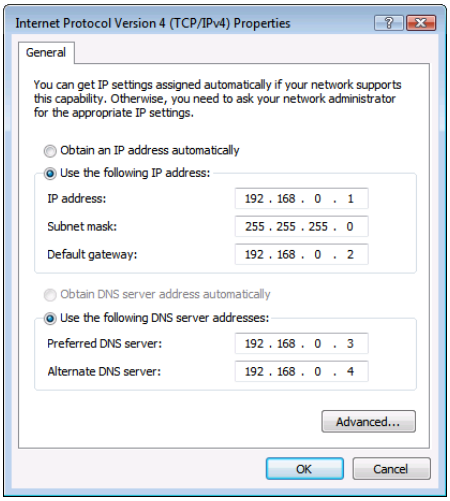
Copyright © 2010, 2013, Hitachi, Ltd.

(e)

Select (CL) [Internet Protocol Version 4 (TCP/IPv4)] in the 'Public LAN Properties' window and select (CL) the [Properties] button.

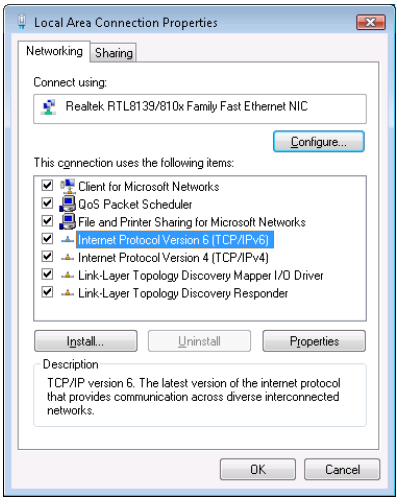


(f) <Setting the external IP address>
Set the "IP address", "Subnet mask", "Default gateway", "Preferred DNS server" and "Alternate DNS server" and select (CL) the [OK] button.
When you do not set IPv6, go to step (i).



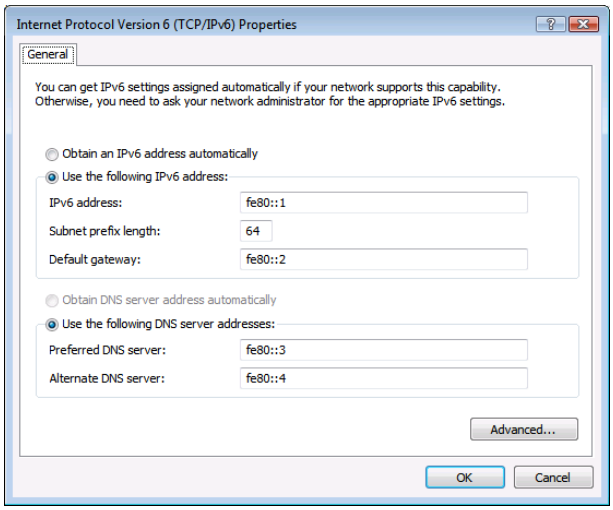
(g)

Select (CL) [Internet Protocol Version 6 (TCP/IPv6)] in the 'Public LAN Properties' window and select (CL) the [Properties] button.



Copyright © 2010, 2013, Hitachi, Ltd.

(h) <Setting the external IP address>
Set the
“IPv6 address”,
“Subnet prefix length” ,
“Default gateway”,
“Preferred DNS server” and
“Alternate DNS server”
and select (CL) the [OK] button.



(i)
After the setting is completed, select (CL) the [Close] button(In case of no change of IP address, select(CL)[OK] button) in the “Public LAN Properties” window.
Close the ‘Manage network connections’ window.

6. Executing SSVP Reset
   a. Loosen the screw, and remove the jumper cover from the DKCPANEL.

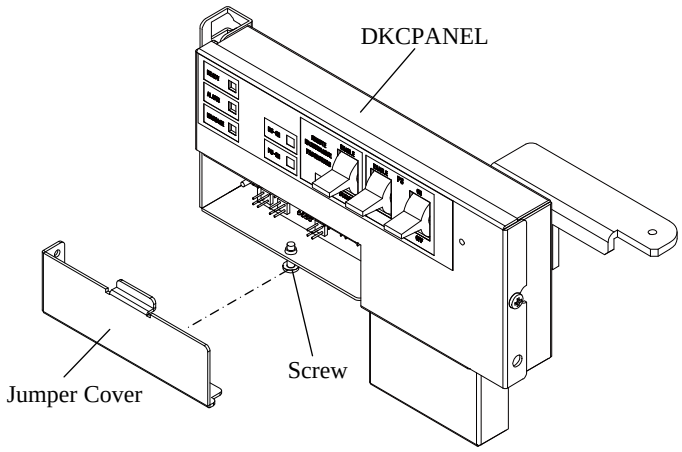

Fig. 3.13.1.1-7 Removal of Jumper Cover

   b. Insert the maintenance jumper into SSVP ALARM RESET jumper (JP3) on the DKCPANEL. And then, remove the maintenance jumper. Confirm that four SSVP STATUSLED of DKCPANEL turns on and turns off the light.
   c. Attach the jumper cover to the DKCPANEL, and tighten the screw.

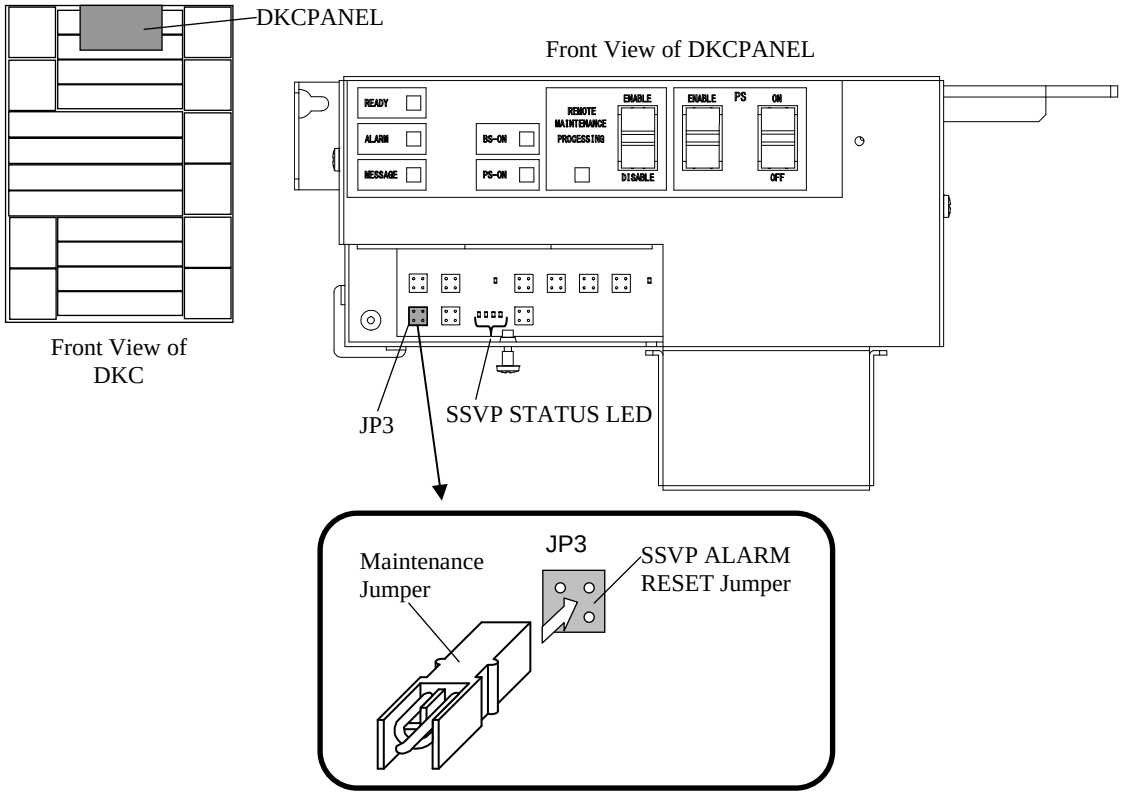

Fig. 3.13.1.1-8 Location of SSVP ALARM RESET Jumper

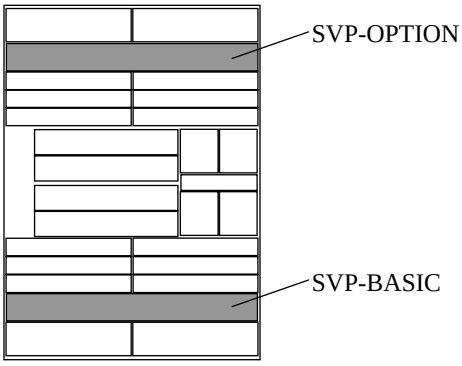
   d. Remove the maintenance jumper of the JP1 on the SVP-OPTION. (Refer to Fig. 3.13.1.1-4.)

Copyright © 2010, Hitachi, Ltd.

3.13.1.2 Confirmation Procedure

1. Verifying the LED
   Make sure that statuses of LEDs on the SVP-BASIC and SVP-OPTION are those shown in the figure below in a lighting part.



Rear View of DKC-0

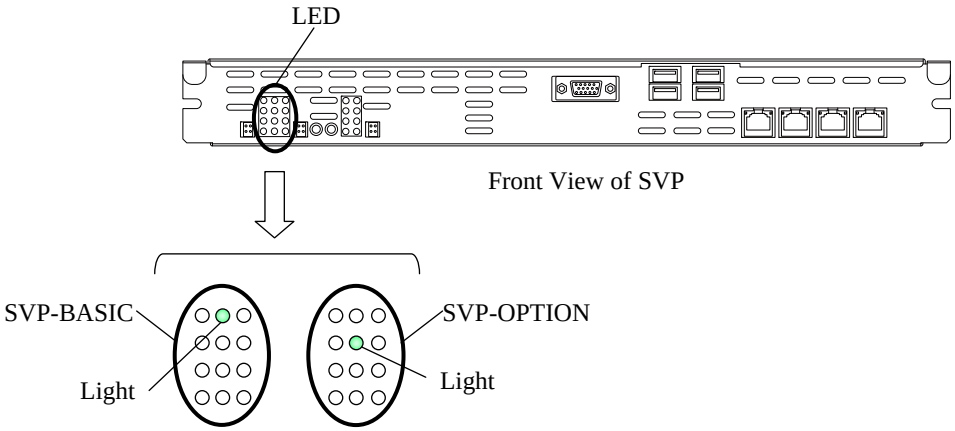


Fig. 3.13.1.2-1 Confirmation of LEDs

Copyright © 2010, Hitachi, Ltd.

2. Operating the Basic SVP

Notice: This operation needs that Standby SVP is a View mode.

(1) Connecting the Console PC
Check if the Console PC is connected to the Basic SVP.
If not connected, connect it.

[Connected to]
The Basic SVP xxx.xxx.xxx.15

---

(2) <Initial screen>

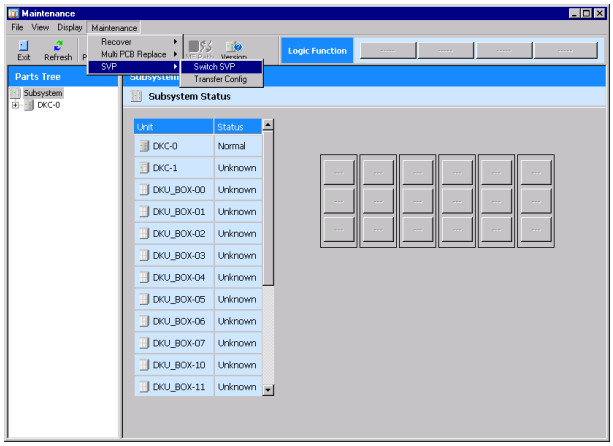
---

(3) <Operation mode change>
Change the mode to [Modify Mode].
Select (CL) [Maintenance].

---

(4)

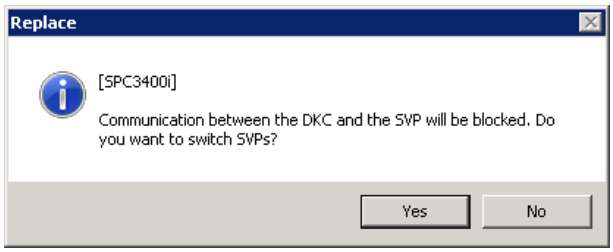
Select (CL) [Maintenance]-[SVP]-[Switch SVP] from the menu.



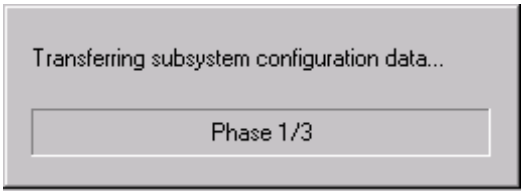
Copyright © 2010, 2011, Hitachi, Ltd.

(5) <Execution>
Execute switching.
Select (CL) [Yes].

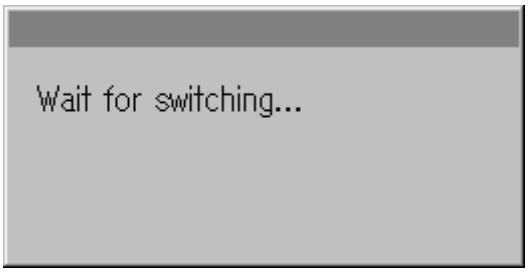
* Switching takes about 20 minutes.



(6) <Configuration Information Transfer>
The message “Transferring subsystem configuration data...” is displayed.



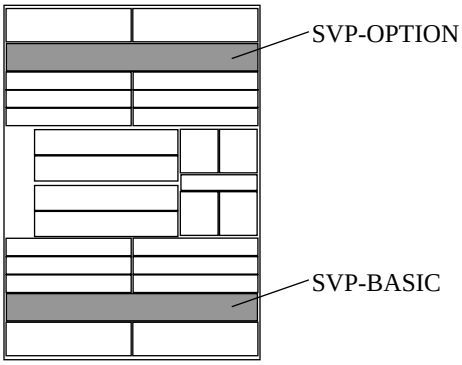
(7) <SVP Switching Start>
The message “Wait for switching...” is displayed.
The Basic SVP and the Console PC are disconnected for the SVP switching process.
Wait for about three minutes until the switching is completed.



Copyright © 2010, Hitachi, Ltd.

(8) Verifying the LED

Make sure that statuses of LEDs on the SVP-BASIC and SVP-OPTION are those as shown in the figure below in a lighting part.



Rear View of DKC-0

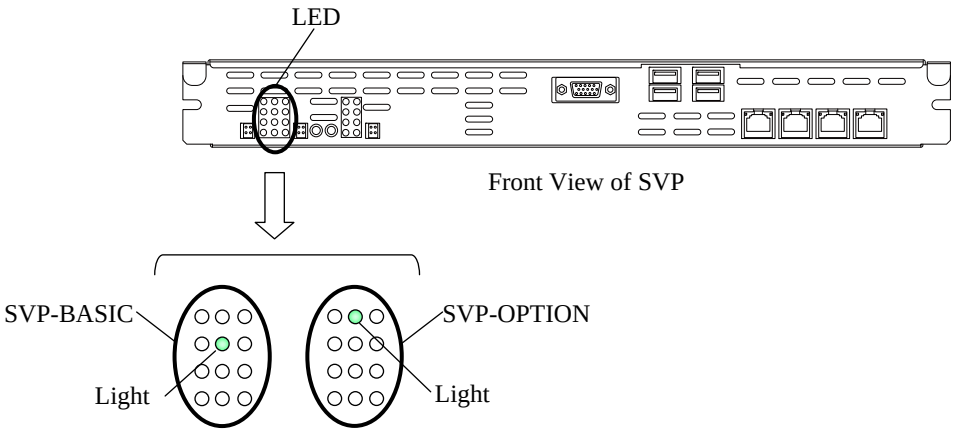


Fig. 3.13.1.2-2 Confirmation of LEDs

Copyright © 2010, Hitachi, Ltd.

3. Operating the Additional SVP

Notice: This operation needs that Standby SVP is a View mode.

(1) <Connection to the Additional SVP>
The Additional SVP restarts by the SVP switching indication from the Basic SVP.
Connect the Console PC to the Additional SVP.

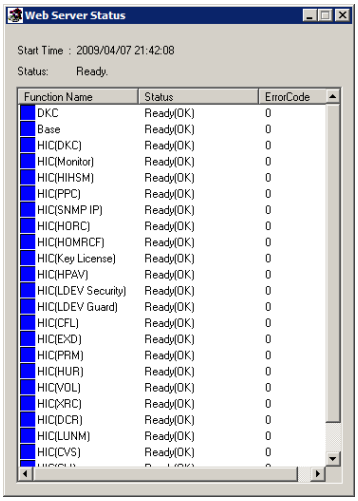
[Connected to]
The Additional SVP xxx.xxx.xxx.15

---

(2) <Initial Window>
Press the [Web Server Status] button.

---

(3) <Web Server Status Window>
Check if all function's Status displays Ready.
After confirmation, close Web Server Status screen.



---

(4) <Operation mode change>
Change the mode to [Modify Mode].
Select (CL) [Maintenance].

Copyright © 2010, Hitachi, Ltd.

(5) <Maintenance window>
Make sure that the 'Maintenance' window is open normally.
Close 'Maintenance' window.

---

(6) <Web Console>
If Customer doesn't use Web Console/Storage Navigator via a customer PC, don't need to do the following confirmation work.
Please run Web Console/Storage Navigator from customer PC, and check whether you can login using by Customer user-id and password. (The user-id and password are defined by customer. Therefore, entrust a customer with a login test.)
If you can see the main screen of Web Console/Storage Navigator, the confirmation work is done.

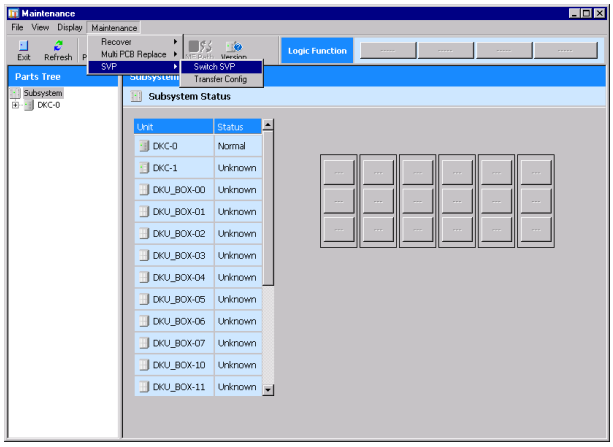
---

(7) <Select Maintenance>
Select (CL) [Maintenance].

---

(8)

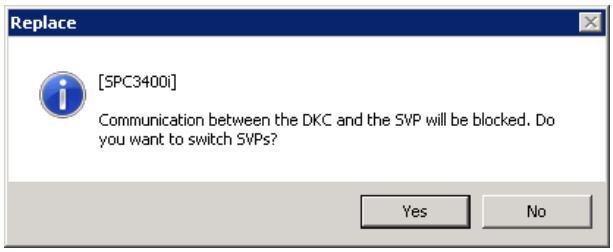
Select (CL) [Maintenance]-[SVP]-[Switch SVP] from the menu.



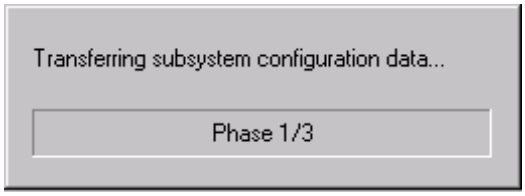
Copyright © 2010, 2011, Hitachi, Ltd.

(9) <Execution>
Execute switching.
Select (CL) [Yes].

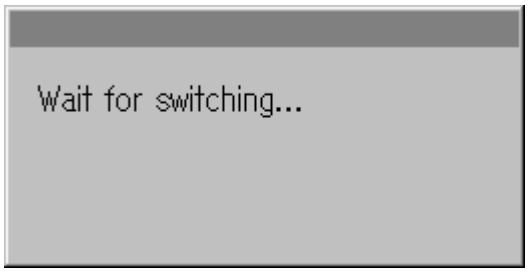
* Switching takes about 20 minutes.



(10) <Configuration Information Transfer>
The message “Transferring subsystem configuration data...” is displayed.



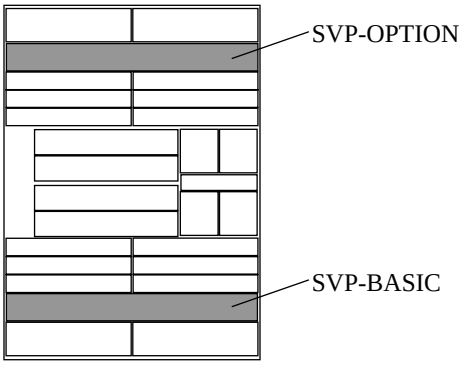
(11) <SVP Switching Start>
The message “Wait for switching...” is displayed.
The Additional SVP and the Console PC are disconnected for the SVP switching process.
Wait for about three minutes until the switching is completed.



Copyright © 2010, Hitachi, Ltd.

(12) Verifying the LED

Make sure that statuses of LEDs on the SVP-BASIC and SVP-OPTION are those shown in the figure below in a lighting part.



Rear View of DKC-0

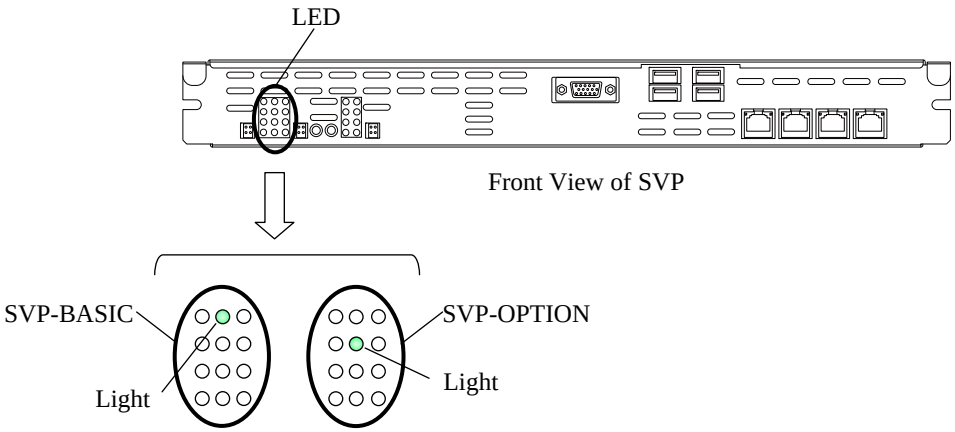


Fig. 3.13.1.2-3 Confirmation of LEDs

Copyright © 2010, Hitachi, Ltd.

4. Operating the Basic SVP

(1) Connecting the Console PC

Connect the Console PC to the Additional SVP.

[Connected to]
The Basic SVP xxx.xxx.xxx.15

---

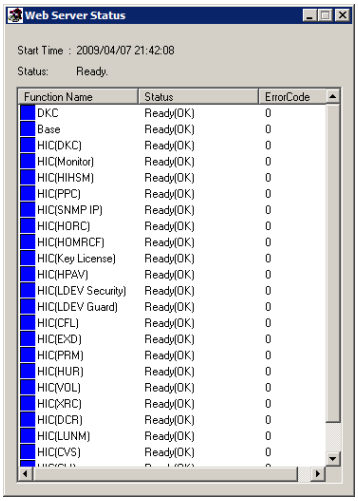
(2) <Initial Window>

Press the “Web Server Status” button.

---

(3) <Web Server Status Window>

If all function’s Status displays Ready, switching is completed.



End of verification of the setting.

---

5. Return to the working table and do the rest of the work.

New Installation: INST02-20
Non-Disruptive Installation: INST02-50

Copyright © 2010, 2013, Hitachi, Ltd.

3.14 Power ON/OFF Procedure

Note: When some control frames (DKCs) are installed in the Disk-less configuration, check the serial number of target DKC on the SVP screen and beware of a attachment position to prevent mistakes. (See “5.2.4 Refer Configuration 3. <DKC Configuration window>” (INST05-510).)

3.14.1 Power ON Procedure

<Precautions>
Do not remove the battery connectors from the cache PCB when the subsystem has electricity and the BS-ON LED is lit (breakers ON and AC input has electricity). If you remove the battery connectors, the abnormality of the batteries is detected as the batteries are being charged and have electricity during the BS-ON LED is lit.
If you power on the subsystem when the abnormality of the batteries is detected in both the clusters, the subsystem is prohibited from starting for a certain period of time (maximum 90 minutes) and the battery charging SIM = FE00XX and the battery warning SIM = FFFA0X are generated as cache data backup cannot be performed in the case of power outage.
If the battery warning SIM = FFFA0X is generated by removing the battery connectors, follow “41. Procedure When SIM = FE00XX is Generated” (TRBL41-10) and perform recovery operation of the battery warning as the battery cannot be recovered by connecting. Unless recovery operation of the battery warning is performed, the data in cache memory cannot be guaranteed in the case of power outage.

Copyright © 2013, Hitachi, Ltd.

1. Power ON Procedure of Subsystem
   a. Connect the battery cable for the CM PCB.
      (i) Open the DKCPANEL to connect the battery cables of the CM PCB location (CACHE-2CD, 2CG, 2CH, 2CM, 2CQ, 2CR).
      For the CM PCB location other than the above, go to the procedure (iii).
      (ii) Loosen the screw, slide the DKCPANEL to the far right, and open the DKCPANEL.

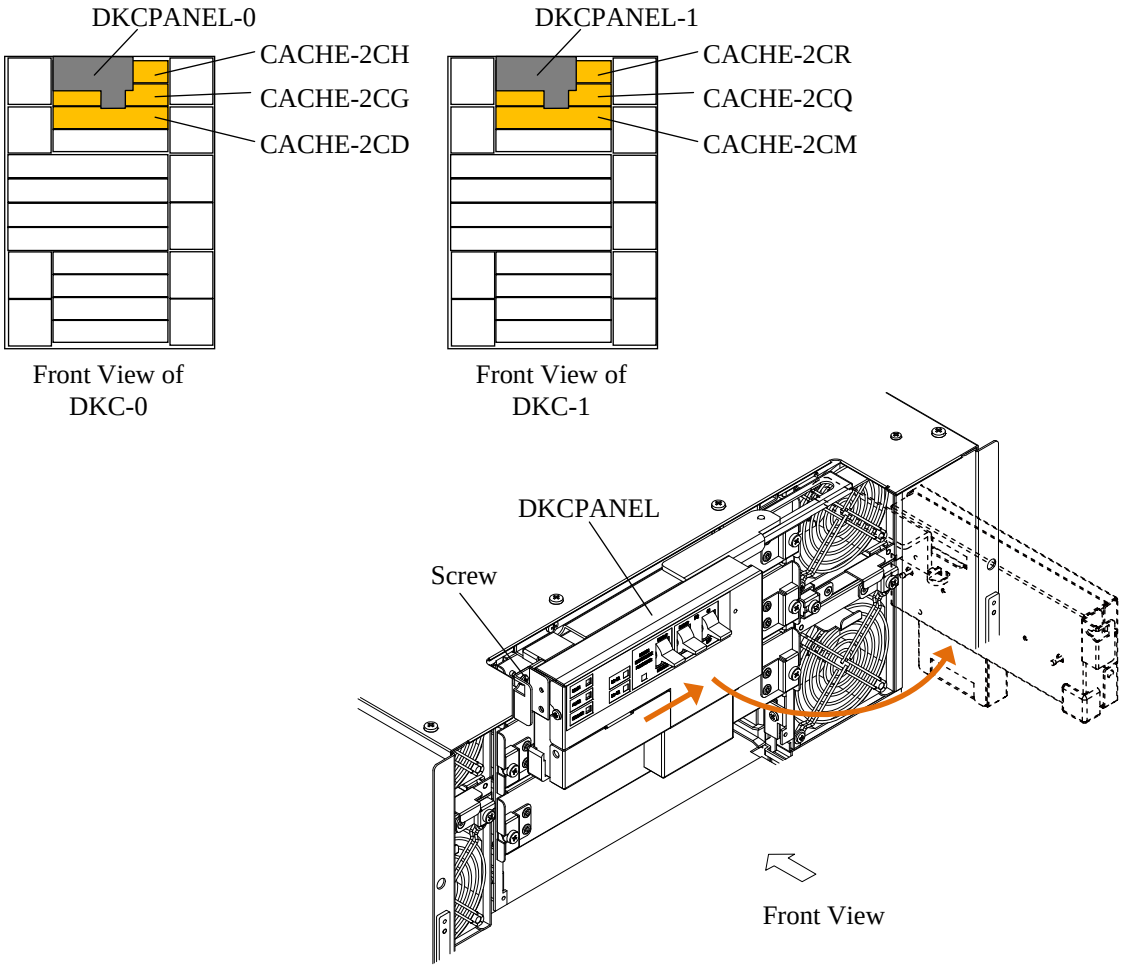


Fig. 3.14.1-1 Shifting of DKCPANEL

Copyright © 2010, Hitachi, Ltd.

(iii) Loosen all screws (two screws per PCB) of the CM PCBs that are installed in the front side of the DKC, and remove the cover.
(iv) Connect all battery cables with the connectors.
(v) Install the covers to all PCBs, and secure them with the screws.
(vi) Replace the DKCPANEL and secure it with the screw if the DKCPANEL is opened.

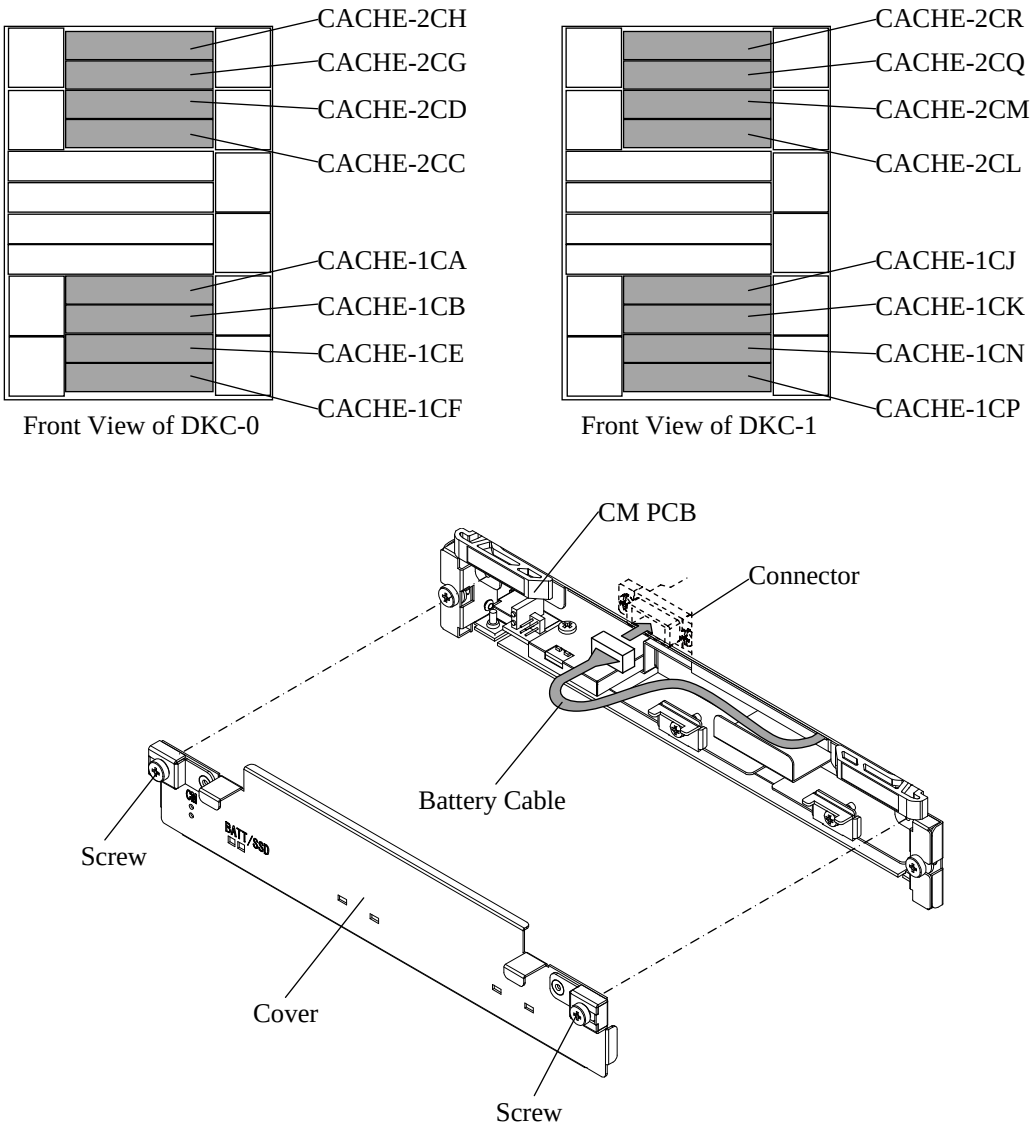

Fig. 3.14.1-2 Connection of Battery Cables

Copyright © 2010, 2012, Hitachi, Ltd.

b. Turn on the main circuit breakers at the PDUs on the Rack frames.
The equipment is in a standby mode when the PDU breaker is in a power-on state and the power of equipment is off, therefore the FANs of the DKC and the DKU continue to operate (*1). Execute this operation just before the power-on processing of the following procedure b when the standby electricity must be controlled, because the standby electricity (*2) exists in the equipment under this condition.
*1: All the FANs of DKC and DKU continue to operate.
*2: The maximum standby electricity is 0.79kVA per DKC, and 1.34kVA per DKU. (Refer to Table 3.14.1-1.)

Table 3.14.1-1 Maximum Standby Electricity per DKC/DKU Frame

Frame	DKC (CBX/CBXA/CBXG/ CBXB/CBXH) [kVA]	DKU (UBX/SBX) [kVA]	Subtotal [kVA]
RACK-00 Frame	0.79	1.34 × 2	3.47
RACK-10 Frame	0.79	1.34 × 2	3.47
RACK-01 Frame	—	1.34 × 3	4.02
RACK-02 Frame	—	1.34 × 3	4.02
RACK-11 Frame	—	1.34 × 3	4.02
RACK-12 Frame	—	1.34 × 3	4.02
Total [kVA]			23.02

Copyright © 2010, Hitachi, Ltd.

c. Turn the “POWER ON/OFF” switch to “ON”, while turning the POWER ON/OFF ENABLE switch to the ENABLE position.

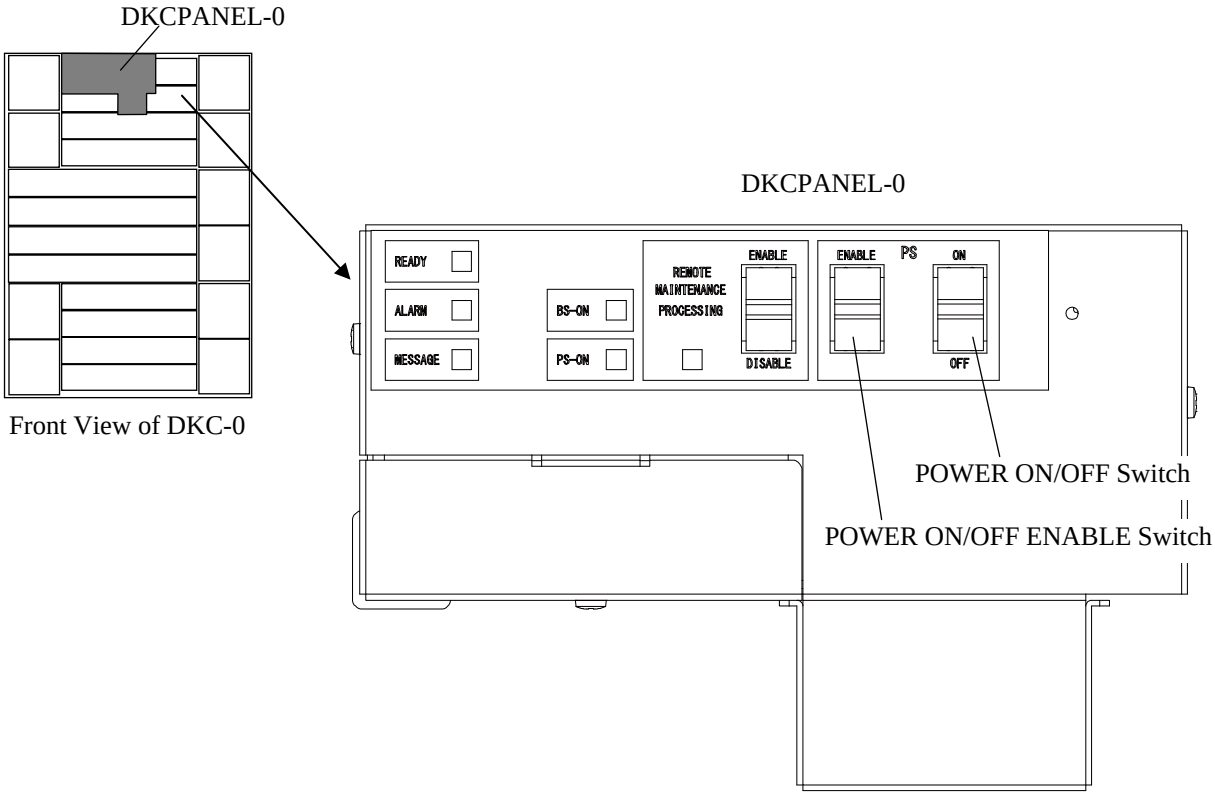

Fig. 3.14.1-3 Switch on DKCPANEL

Copyright © 2010, Hitachi, Ltd.

2. Power ON Procedure of additional Rack frame
   a. Connect the battery cable for the CM PCB.
      (i) Open the DKCPANEL to connect the battery cables of the CM PCB location (CACHE-2CM, 2CQ, 2CR).
      For the CM PCB location other than the above, go to the procedure (iii).
      (ii) Loosen the screw, slide the DKCPANEL to the far right, and open the DKCPANEL.

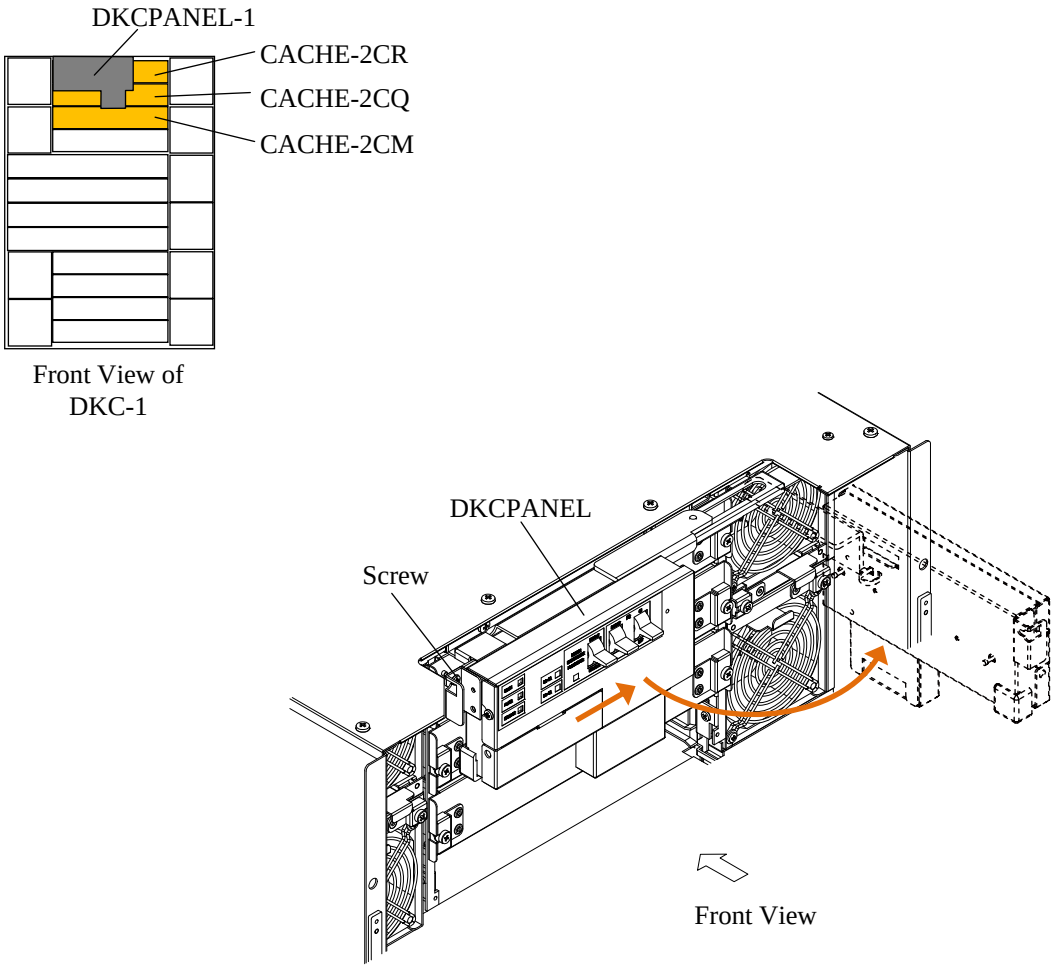

Fig. 3.14.1-4 Shifting of DKCPANEL

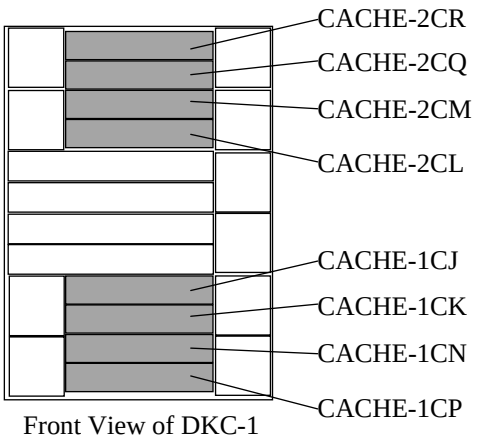
Copyright © 2010, Hitachi, Ltd.

(iii) Loosen all screws (two screws per PCB) of the CM PCBs that are installed in the front side of the DKC, and remove the cover.
(iv) Connect all battery cables with the connectors.
(v) Install the covers to all PCB s, and secure them with the screws.
(vi) Replace the DKCPANEL and secure it with the screw if the DKCPANEL is opened.



Front View of DKC-1

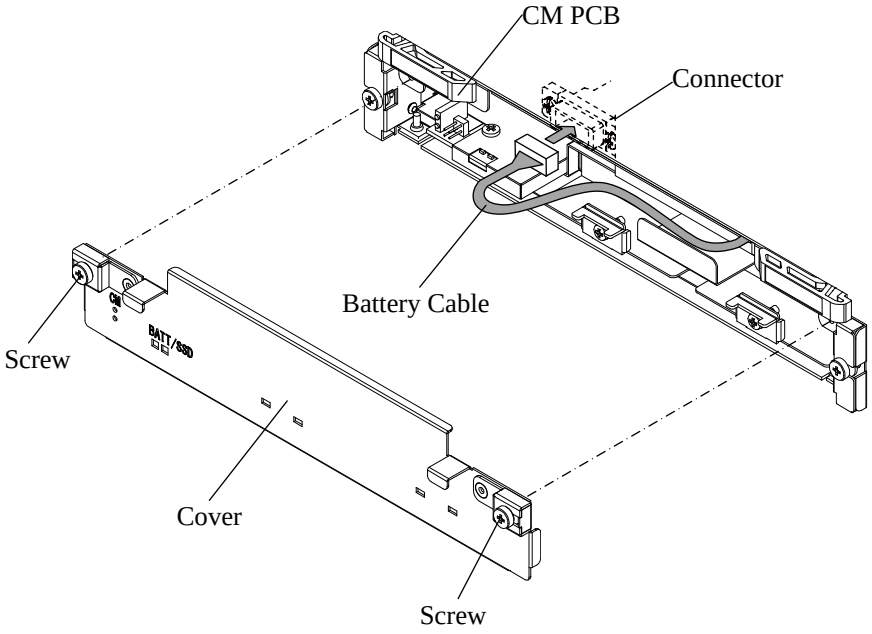


Fig. 3.14.1-5 Connection of Battery Cables

b. Turn on the circuit breakers at the PDUs on the additional Rack frame.

Copyright © 2010, Hitachi, Ltd.

3. Power ON Procedure of Subsystem in Power-On State of PDU Breaker
   a. Turn the “POWER ON/OFF” switch to “ON”, while turning the POWER ON/OFF ENABLE switch to the ENABLE position.

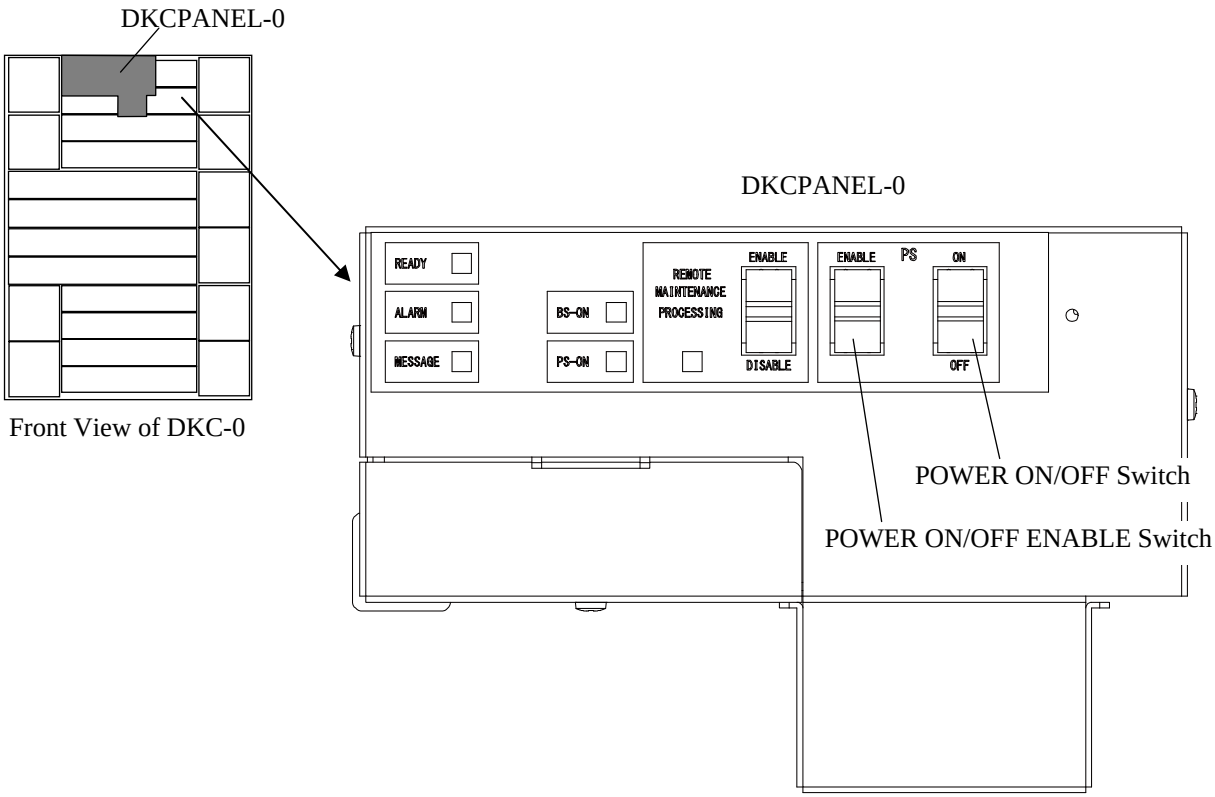

Fig. 3.14.1-6 Switch on DKCPANEL

Copyright © 2010, 2013, Hitachi, Ltd.

3.14.2 Power OFF Procedure

1. Power OFF Procedure of Subsystem

CAUTION

Please confirm that maintenance operations (except for configuration information setting) has been completed before powering OFF DKC.
When turning the breaker off before or during a power-off operation, an emergency processing that transfers data to the SSD is performed with the battery.
Make sure the power is completely turned off after executing the following procedures because the emergency processing drains the batteries and prolongs the next power-on time according to the remaining battery charge.

<Precautions>
Do not remove the battery connectors from the cache PCB when the subsystem has electricity and the BS-ON LED is lit (breakers ON and AC input has electricity). If you remove the battery connectors, the abnormality of the batteries is detected as the batteries are being charged and have electricity during the BS-ON LED is lit.
If you power on the subsystem when the abnormality of the batteries is detected in both the clusters, the subsystem is prohibited from starting for a certain period of time (maximum 90 minutes) and the battery charging SIM = FE00XX and the battery warning SIM = FFFA0X are generated as cache data backup cannot be performed in the case of power outage.
If the battery warning SIM = FFFA0X is generated by removing the battery connectors, follow “41. Procedure When SIM = FE00XX is Generated” (TRBL41-10) and perform recovery operation of the battery warning as the battery cannot be recovered by connecting. Unless recovery operation of the battery warning is performed, the data in cache memory cannot be guaranteed in the case of power outage.

Copyright © 2013, Hitachi, Ltd.

a. Turn the “POWER ON/OFF” switch to “OFF”, while turning the POWER ON/OFF ENABLE switch to the ENABLE position. (Refer to Fig. 3.14.2-1.)

b. Procedure for checking the power OFF of Subsystem
Perform all checks of the following (i) and (ii), and confirm the power OFF status of Subsystem.
Even if the equipment is in the state of the power-off, the FANs of the DKC and the DKU continue to operate (*1) because the equipment is in a standby mode. Execute the power-off processing of the PDU breaker as the following procedure d when the standby electricity must be controlled, because the standby electricity (*2) exists in the equipment under this condition.

*1: All the FANs of DKC and DKU continue to operate.

*2: The maximum standby electricity is 0.79kVA per DKC, and 1.34kVA per DKU. (Refer to Table 3.14.1-1.)

(i) Checking the PS-ON LED OFF
Move to the position where you can see the DKCPANEL from the front to be able to check that the BS-ON LED on the DKCPANEL is on.
Check that the BS-ON LED is on and the PS-ON LED is off (*3). When the BS-ON LED is off, turn on the power of Subsystem again and perform the power OFF procedure from Step a.

*3: At this time, HDD ENABLE LED (green light) of SSD may light, however it is acceptable.

Copyright © 2010, 2011, Hitachi, Ltd.

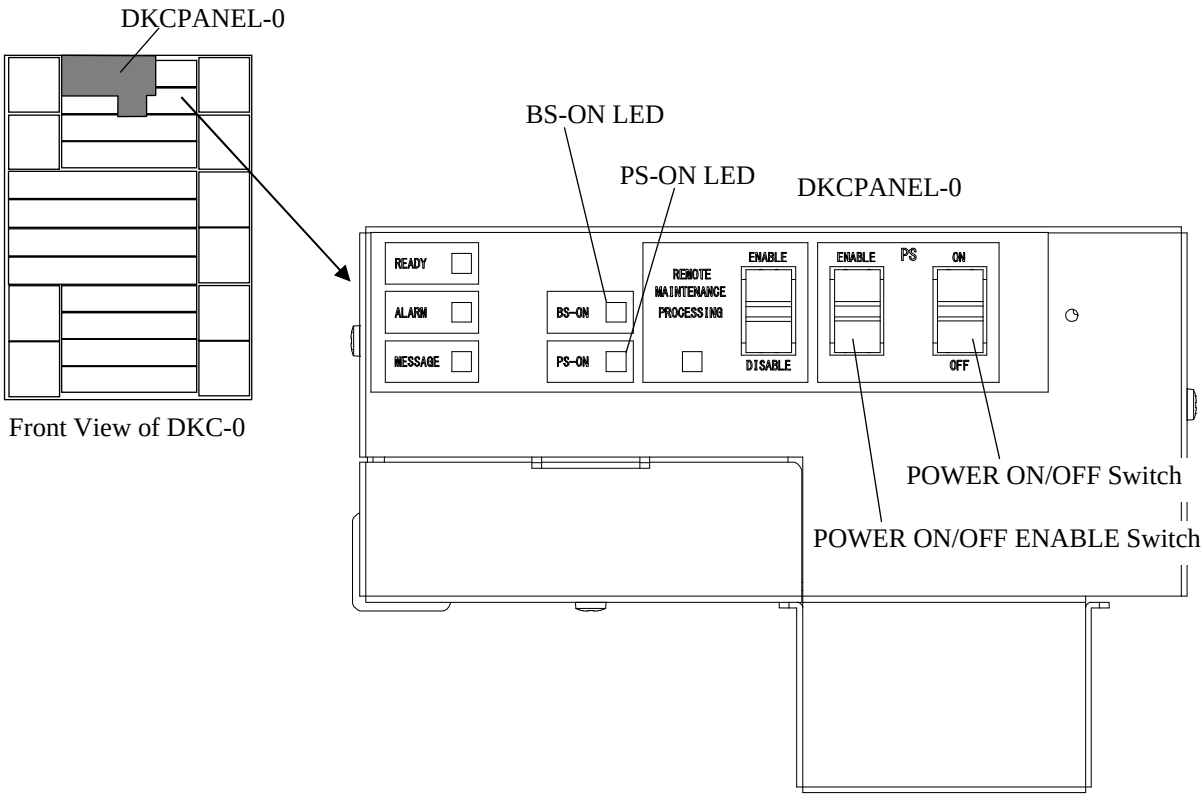

Fig. 3.14.2-1 Switch on DKCPANEL

(ii) Checking the SVP Power Off Event Log
Check that there are the logs of "System OFF" of the date or later which the power OFF operation in Step a is operated to the Power Event Log for 1MP or more referring to the log display in the SVP Section (SVP02-130).

c. Turn off the power of the SVP referring to the SVP Section (SVP01-160).

Note: Make sure to perform the procedure d within 15 minutes after turning OFF the power of SVP. If the condition that SVP is OFF and breaker is ON continues for more than 15 minutes, the following occurs.
(If SVP High Availability kit is not installed) SVP power is forcibly turned ON.
(If SVP High Availability kit is installed) SVP failover takes place.

d. Turn off the main circuit breakers at the PDUs on the Rack frames.

Copyright © 2010, Hitachi, Ltd.

2. Power OFF Procedure of additional Rack frame
   a. Turn off the main circuit breakers at the PDUs on the additional Rack frame.

Copyright © 2010, Hitachi, Ltd.

3. Power OFF Procedure of Subsystem in Power-On State of PDU Breaker

CAUTION

Please confirm that maintenance operations (except for configuration information setting) have been completed before powering OFF DKC.

Notes on the Power OFF Operation of Device.

Confirm the below requirements when turning off the device.
- Make sure the SVP Mode is "View".
- All users from Navigator should log off.

a. Turn the "POWER ON/OFF" switch to "OFF", while turning the POWER ON/OFF ENABLE switch to the ENABLE position.

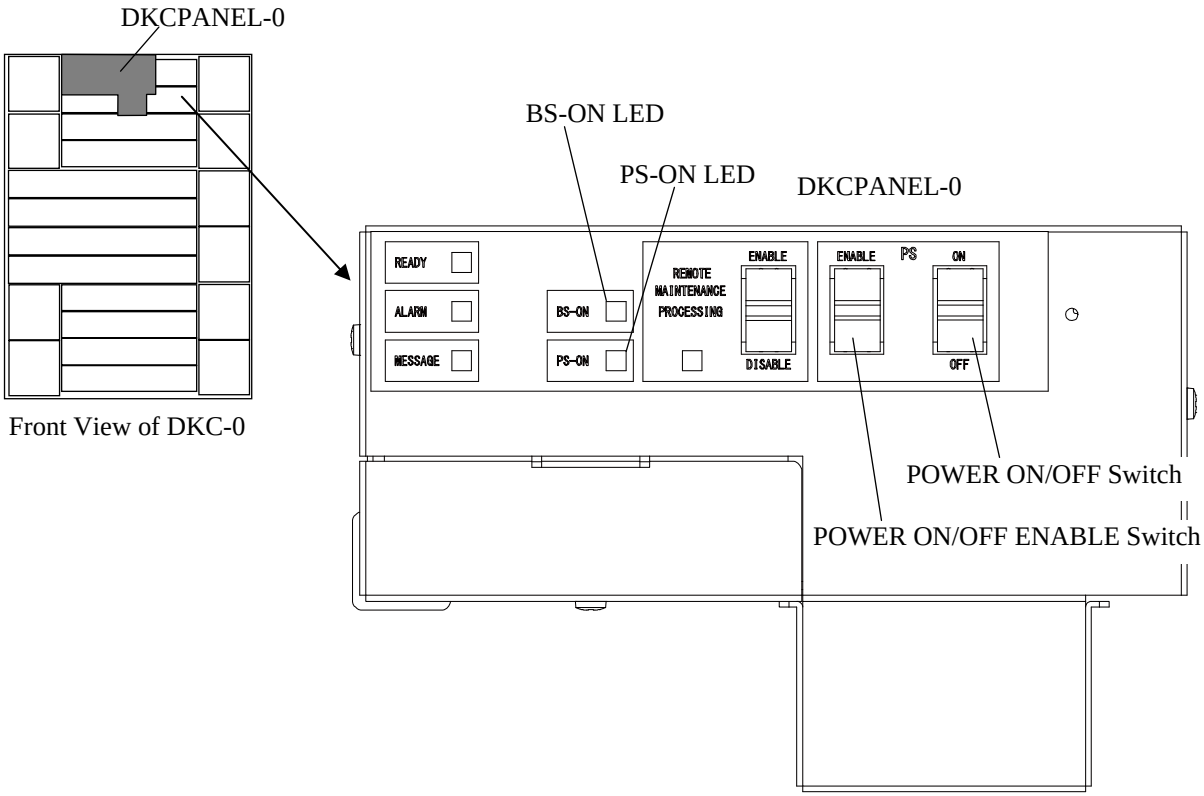

Fig. 3.14.2-2 Switch on DKCPANEL

Copyright © 2010, 2011, Hitachi, Ltd.

b. Procedure for checking the power OFF of Subsystem
Perform all checks of the following (i) and (ii), and confirm the power OFF status of Subsystem.
Even if the equipment is in the state of the power-off, the FANs of the DKC and the DKU continue to operate (*1) because the equipment is in a standby mode. The standby electricity (*2) exists in the equipment under this condition.

*1: All the FANs of DKC and DKU continue to operate.

*2: The maximum standby electricity is 0.79kVA per DKC, and 1.34kVA per DKU. (Refer to Table 3.14.1-1.)

(i) Checking the PS-ON LED OFF
Move to the position where you can see the DKCPANEL from the front to be able to check that the BS-ON LED on the DKCPANEL is on.
Check that the BS-ON LED is on and the PS-ON LED is off (*3). When the BS-ON LED is off, turn on the power of Subsystem again and perform the power OFF procedure from Step a.

*3: At this time, HDD ENABLE LED (green light) of SSD may light, however it is acceptable.

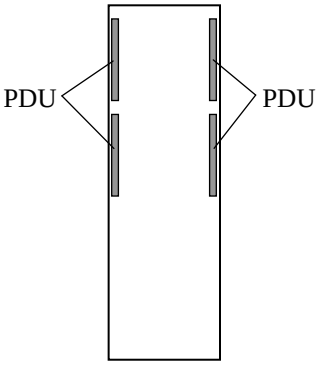
(ii) Checking the SVP Power Off Event Log
Check that there are the logs of “System OFF” of the date or later which the power OFF operation in Step a is operated to the Power Event Log for 1MP or more referring to the log display in the SVP Section (SVP02-130).

Copyright © 2010, Hitachi, Ltd.

3.14.3 Method of Disconnecting Power Supply to Subsystem

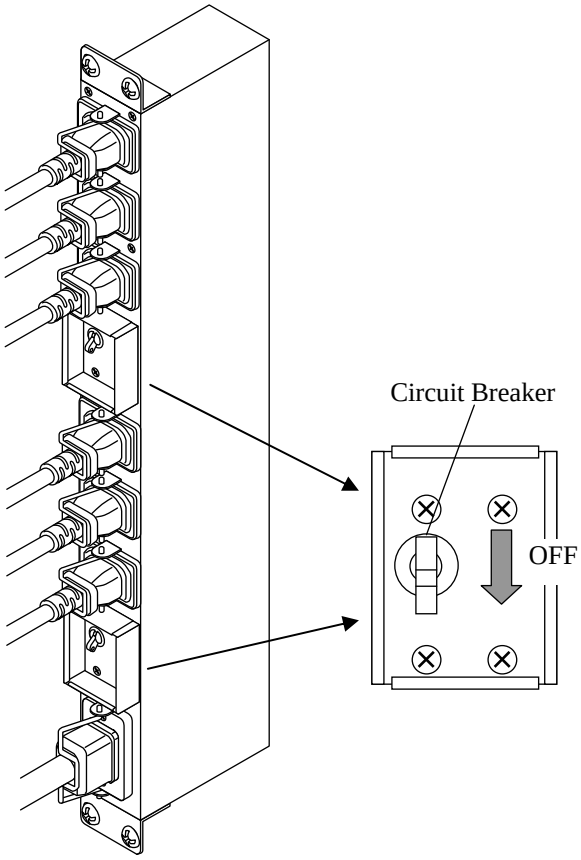
1. When there are some circuit breakers in PDU.
   a. Turn off the circuit breakers of PDU.

2. When there are no circuit breakers in PDU.
   a. Disconnect the power cables corresponding the each unit from PDU.



Rear View of
Rack Frame

PDU (When there are some circuit breakers)



PDU (When there is no circuit breakers)

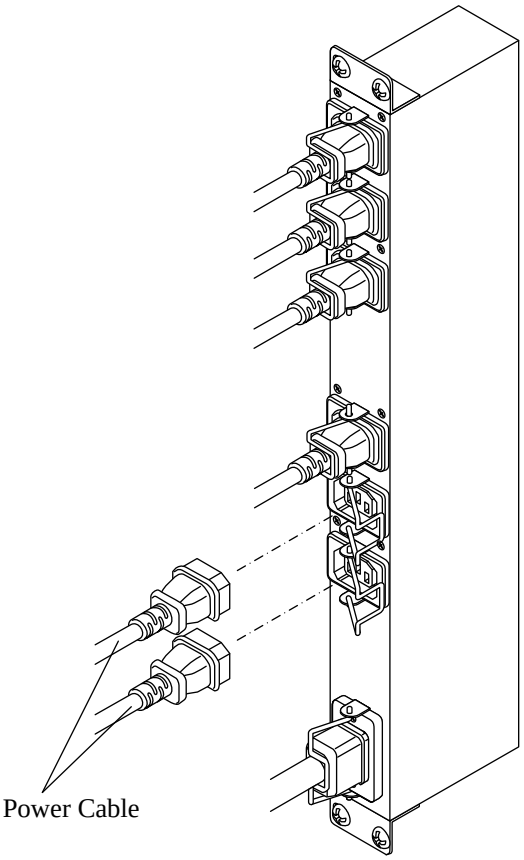


Fig. 3.14.3-1 Work Example of Disconnecting Power Supply

3.15 Mounting on Rack Frame

You can use a special lifter to mount the subsystem on the rack frame.
This section explains a procedure for the mounting using the special lifter.
If you do not use the lifter, you must follow another procedure.

CAUTION

Rack mounting and lifter operation should only be conducted by a person who has been trained and qualified since the subsystem could turn over or a worker could be caught under the subsystem.

(1) External appearance of the special lifter
Fig. 3.15-1 shows external appearance of the special lifter.

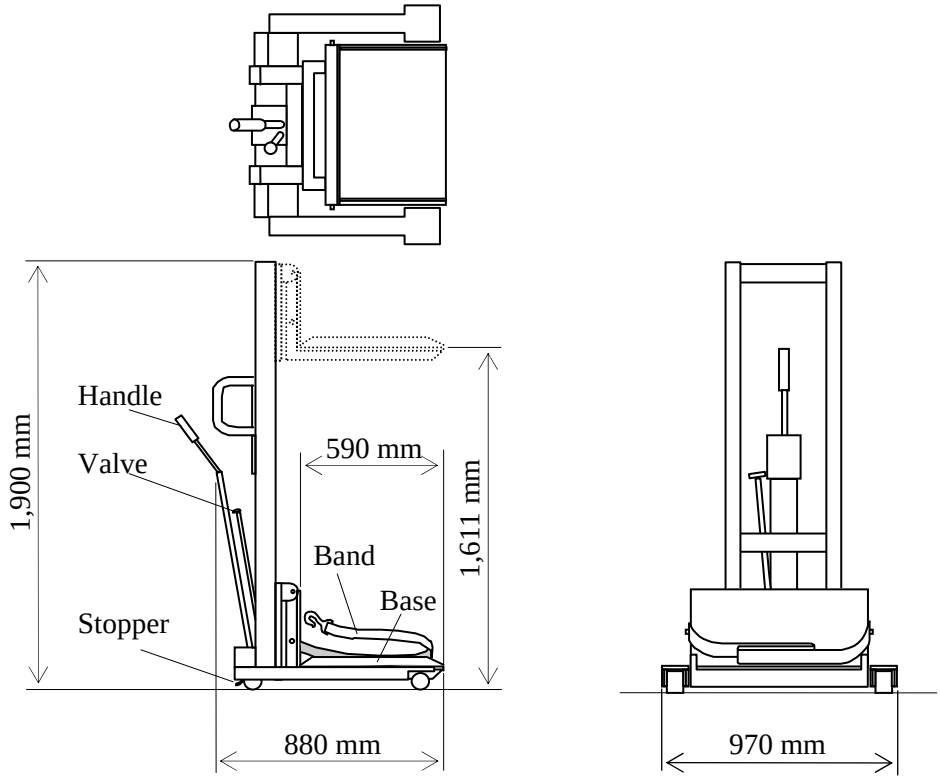

Fig. 3.15-1 External lifter

Copyright © 2010, 2011, Hitachi, Ltd.

3.15.1 Mounting lifter on rack frame

⚠ CAUTION

- Rack mounting and lifter operation should only be conducted by a person who has been trained and qualified since the subsystem could turn over or a worker could be caught under the subsystem.
- Be sure to perform the operation with two or more workers.
- Work carefully because the mass of the single DKC is about 180 kg and DKU is about 40 kg.

(1) Bring the special lifter close to the subsystem to be mounted and apply the brake to the lifter.
(2) Put the subsystem on the special lifter.
(3) Secure the subsystem to the lifter with a band of the lifter.
Bind the subsystem with the band tightly by fitting the length of the belt to the subsystem.

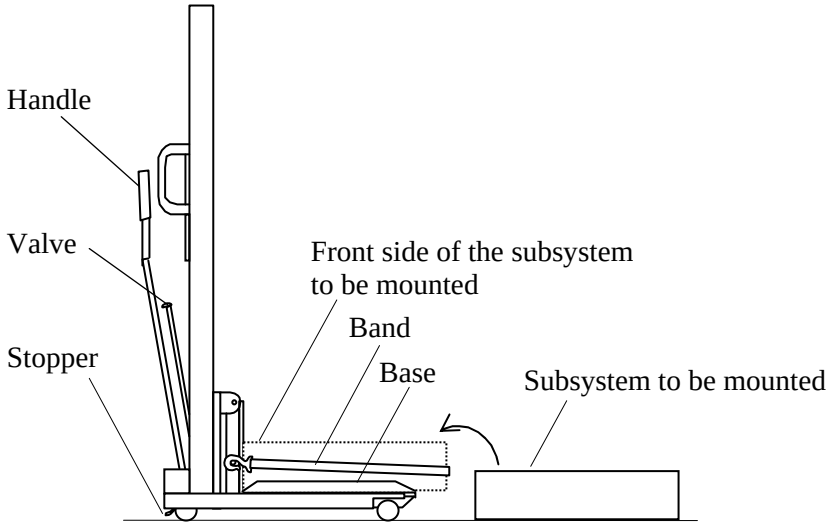

Fig. 3.15.1-1 Putting the Subsystems on Special Lifter

Copyright © 2010, Hitachi, Ltd.

3.15.2 Mounting subsystem on rack frame

⚠ WARNING

If the Subsystem falls when the elevator of the lifter is at a high position, a personal injury will be caused.

Perform the positioning, fastening, or other handlings very carefully.

⚠ CAUTION

- Rack mounting and lifter operation should only be conducted by a person who has been trained and qualified since the subsystem could turn over or a worker could be caught under the subsystem.
- Operate the valve slowly when opening it. If it is opened quickly, the elevator of the lifter descends rapidly and may cause personal injury.
- Be sure to perform the operation with two or more workers.
- Work carefully because the mass of the single DKC is about 180 kg and DKU is about 40 kg.
- Please be cautious of your safety and use a stepladder as you need while assembling or removing parts on top of the RACK frame.

(1) Take off the brake of the special lifter on which the subsystem has been put, and move the lifter close to the rack frame.
(2) Adjust the position of the subsystem so that it is seated in the center of the rack frame.
(3) Move the pumping handle of the special lifter to the right and left repeatedly to lift the subsystem up to the height suitable for the mounting.
Be careful not to lift the elevating base too high. If you lift it too high, lower it by opening the up/down valve gently.
(4) Remove the band and adjust the position of the subsystem so that the subsystem comes in the center in front of the rack frame. If the subsystem is positioned off-centered, a screw contacts the front bezel preventing the bezel from being opened or closed.
(5) Shift the subsystem onto the rails in the rack frame. When shifting the subsystem, push it in to the end gently.

Copyright © 2010, Hitachi, Ltd.

(6) After mounting the subsystem on the rack frame, lower the elevating base to the lowermost position by gently opening the up/down valve of the special lifter and take off the brake of the lifter.
(7) Move the special lifter to the place where the lifter does not disturb the following works.

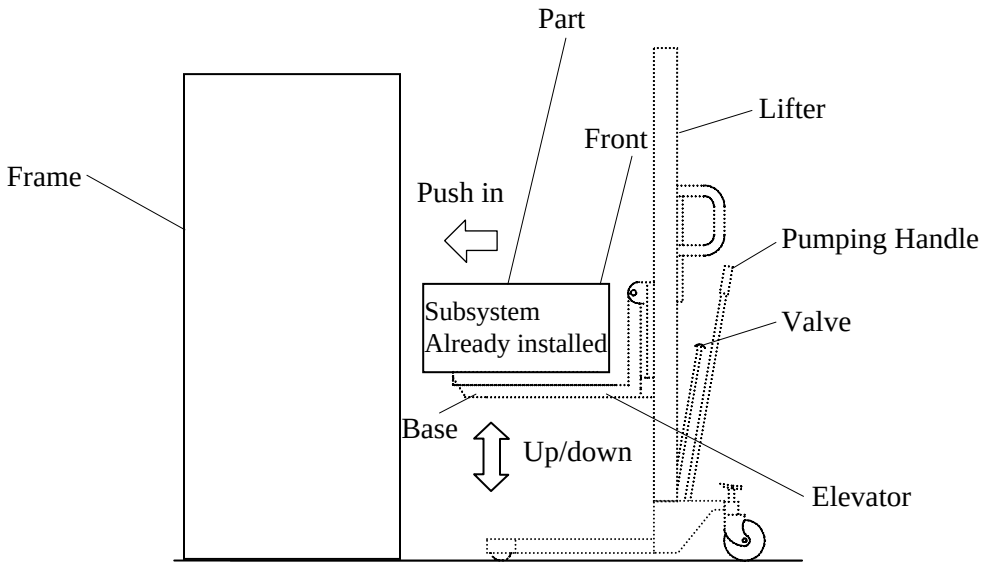

Fig. 3.15.2-1 Mounting Subsystem on Rack Frame

3.16 Installation of Filler Panel (DKC-F710I-FIHT)

Table 3.16-1 Parts List

No.	Model Number	Part Name	Part No.	Quantity	Remarks
1	DKC-F710I-FIHT	Filler Panel	5545408-A	1	

Copyright © 2010, Hitachi, Ltd.

3.16.1 Installation Procedure of Filler Panel

1. Installation of filler panel
   a. Set the left side of the filler panel.
   b. Set the right side of the filter panel while pushing it to the left.

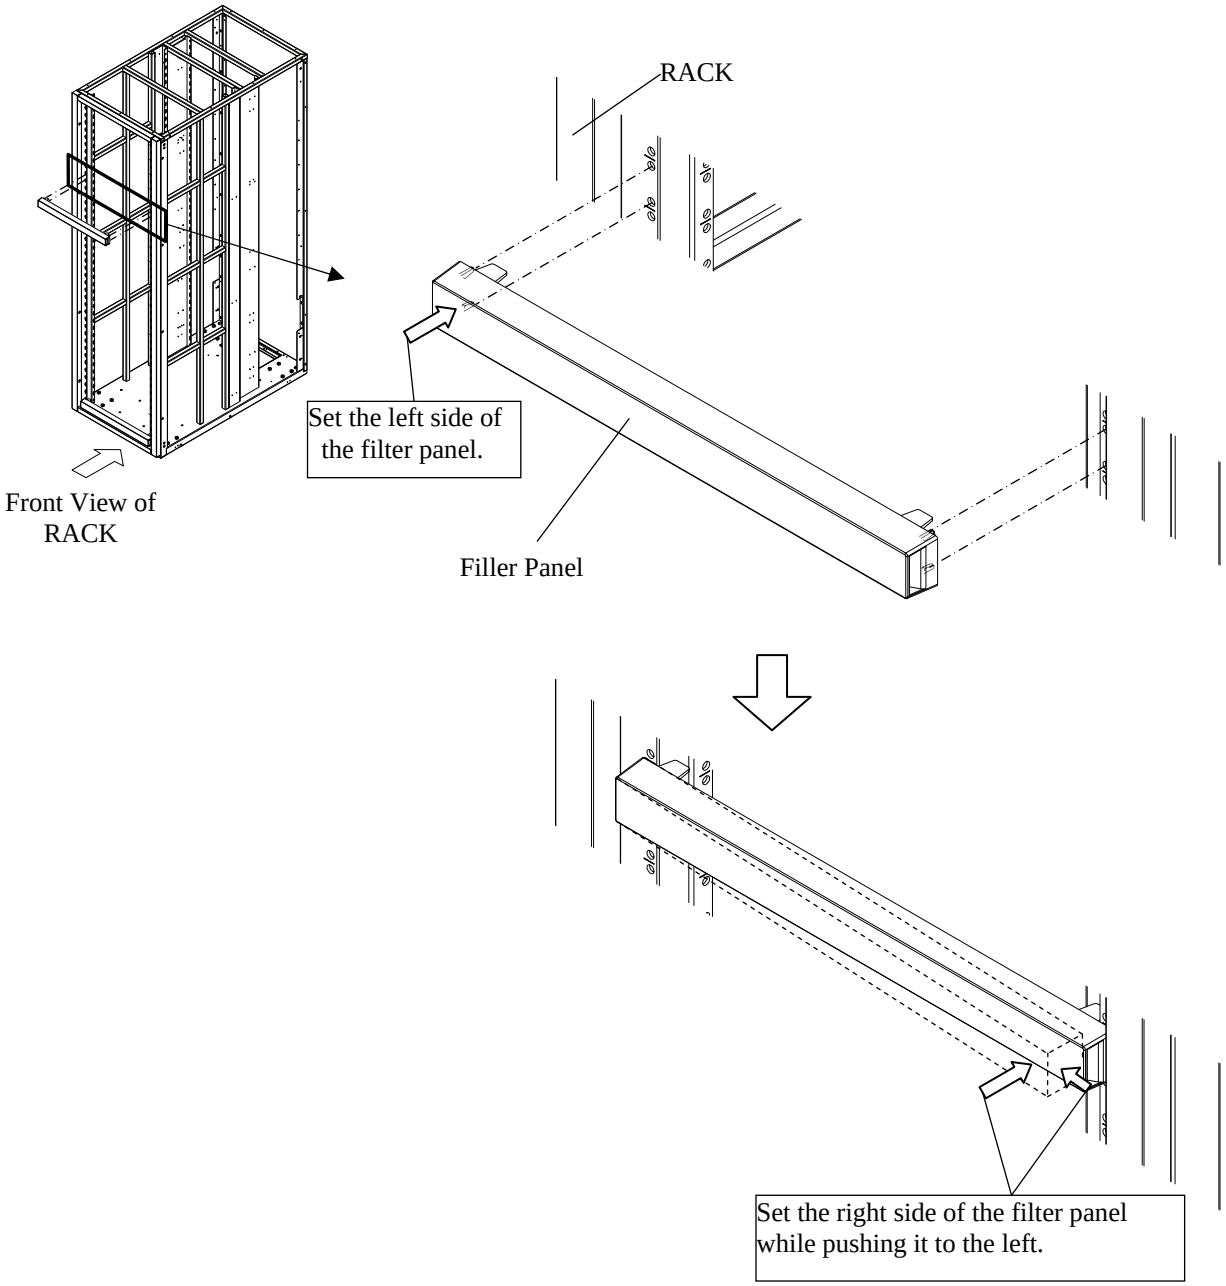

Fig. 3.16.1-1 Installation of Filler Panel

Copyright © 2010, Hitachi, Ltd.

2. Change of Nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Affix a necessary portion of the Label (QTY)(Accessory of Controller Chassis; DWG No.3268905-1) in layers on the DKC-F710I-FIHT nameplate and paint out numbers by black oil felt pen. However, when the nameplate is unused, do not affix the Label (QTY) in layers, and just paint it out.
   c. Attach all the nameplate tags with the screw.

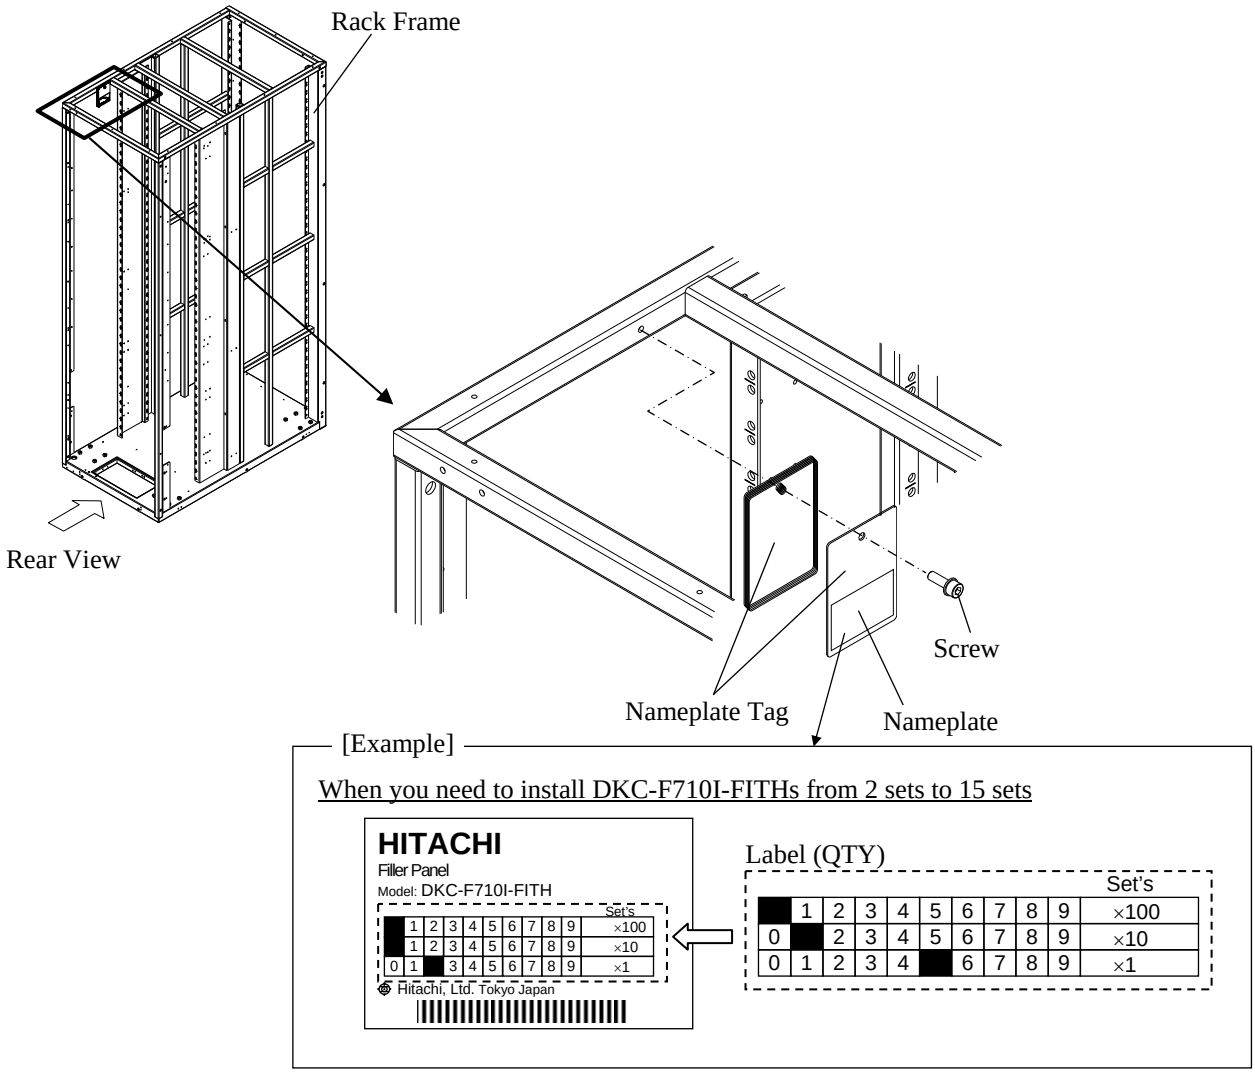

Fig. 3.16.1-2 Change of Nameplate

   d. Return to the working table and do the rest of the work.

3.17.1 Installation Procedure of Decoration Panel (DKC-F710I-DECO)

1. Installation of front panel
   a. Install the top panel on the front upper part of the RACK, and secure it with the two screws ①and two LL washers.
   b. Install the lower panel on the front lower part of the RACK, and secure it with the two screws ②.

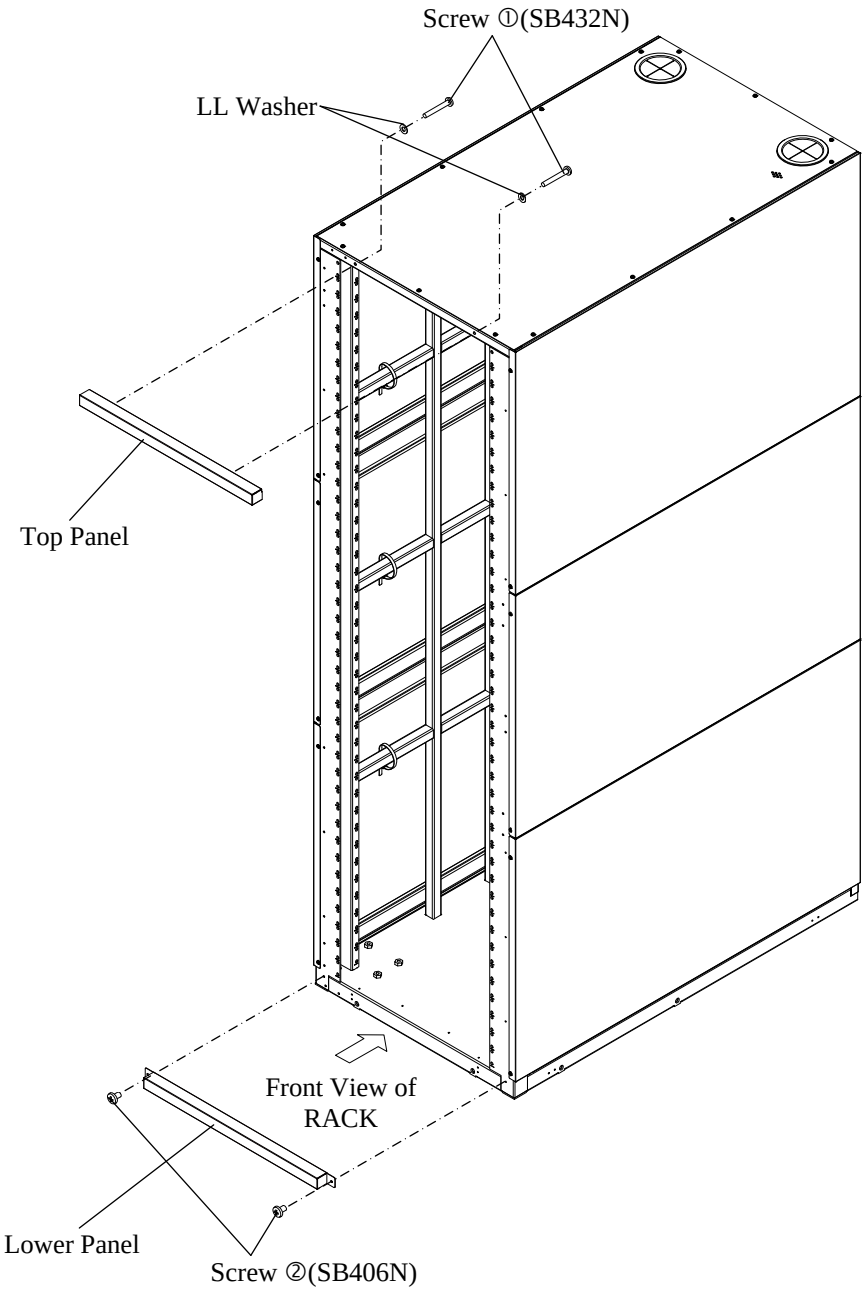

Fig. 3.17.1-1 Installation of Panels (Front)

Copyright © 2010, Hitachi, Ltd.

c. Install the two Angle Us on the front side of the RACK, and secure them with the four screws ①.
d. Install the two Angle Ls, and secure them with the four screws ②.
e. Install the panel R on the Angle U and panel L, and secure it with the four screws ③.
f. Install the panel L on the Angle U and Angle L, and secure it with the four screws ④.

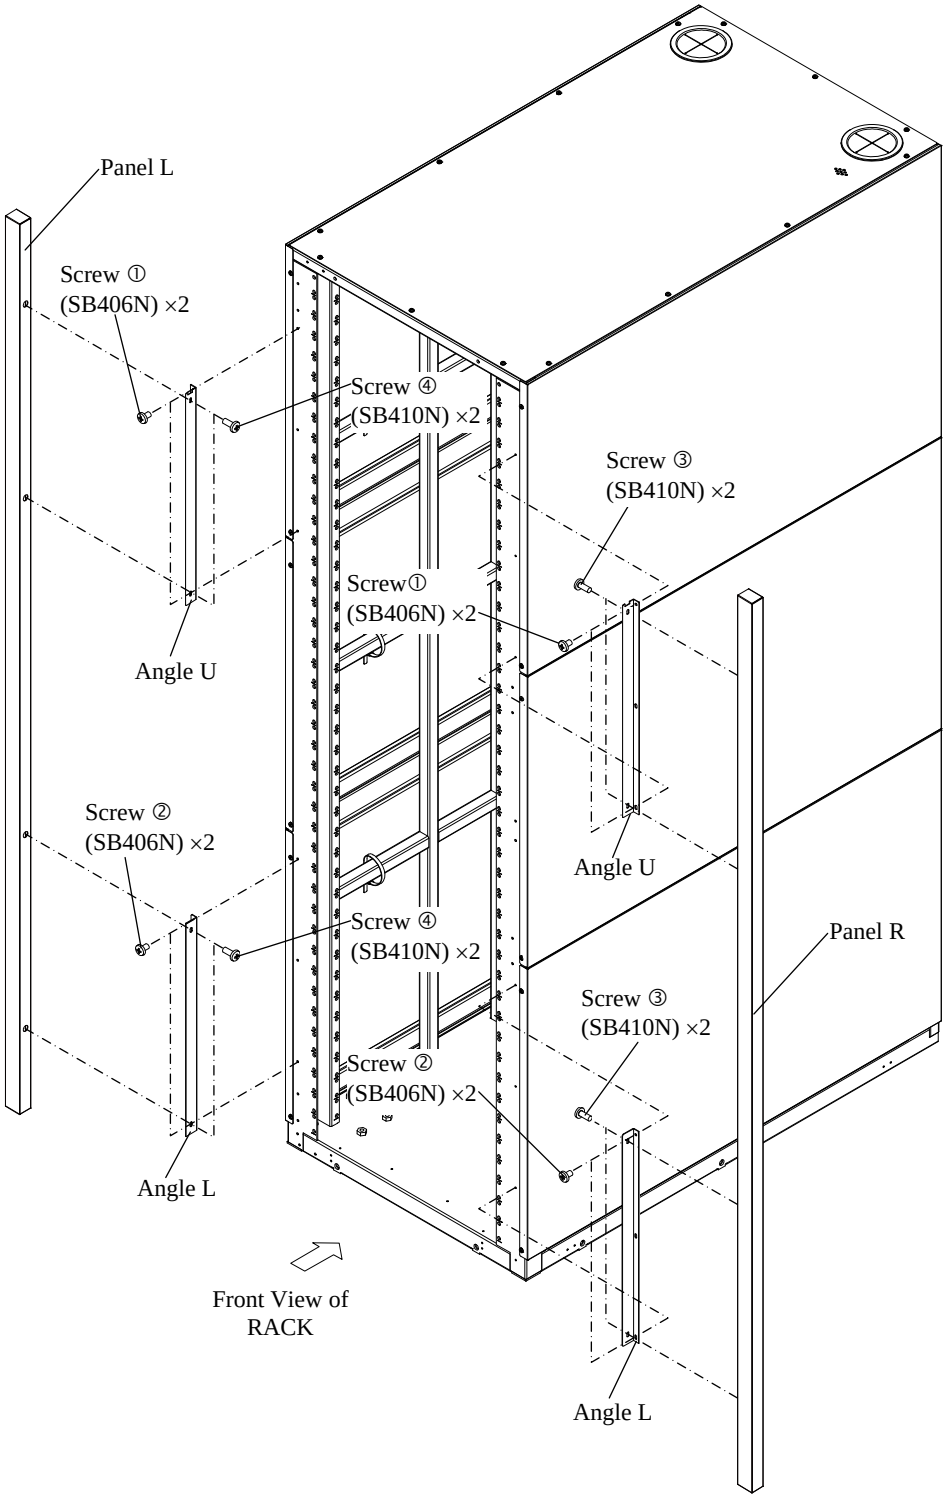

Fig. 3.17.1-2 Installation of Panels (Front)

Copyright © 2010, 2011, Hitachi, Ltd.

2. Installation of Rear Panels
   a. Install the Handle ASSY on the rear side of the rear door, and secure it with the four screws.
   b. When the rear door is unlocked, hung the key on the locking clamp of the rear side of the rear door.

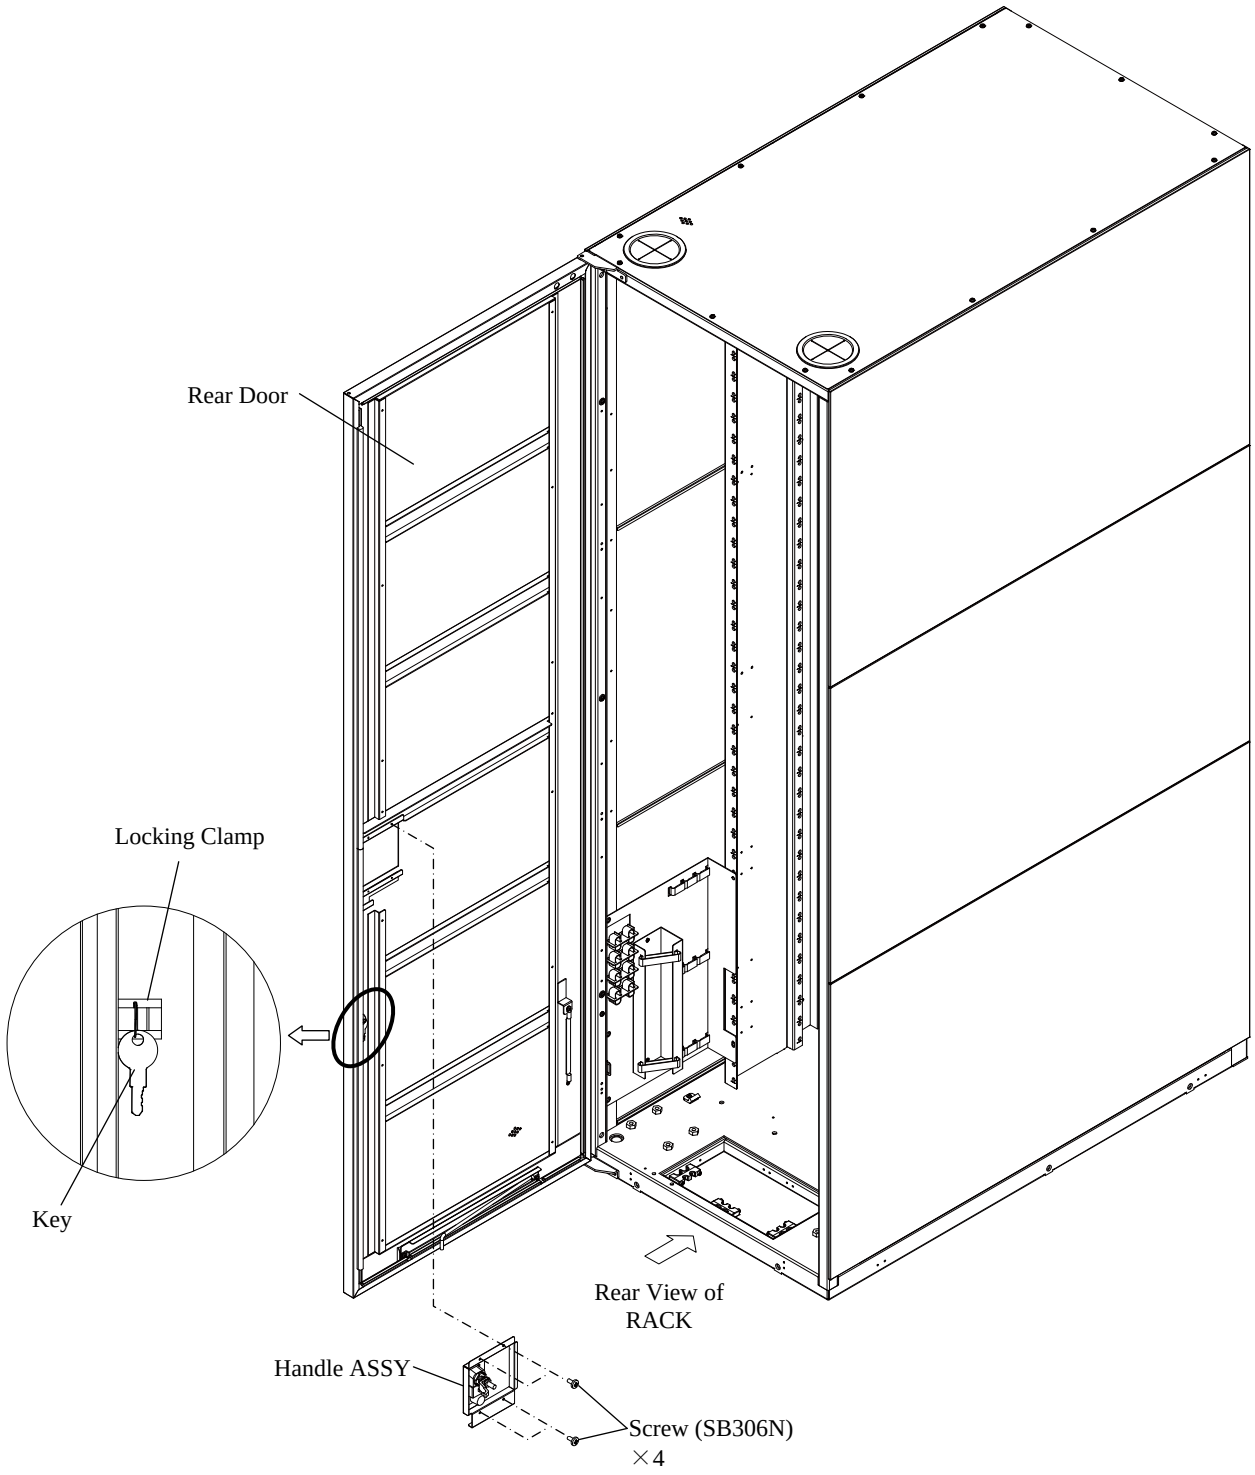

Fig. 3.17.1-3 Installation of Handle ASSY (Rear)

Copyright © 2010, 2011, Hitachi, Ltd.

Blank Sheet

Copyright © 2010, 2012, Hitachi, Ltd.

3. Attachment of the Nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

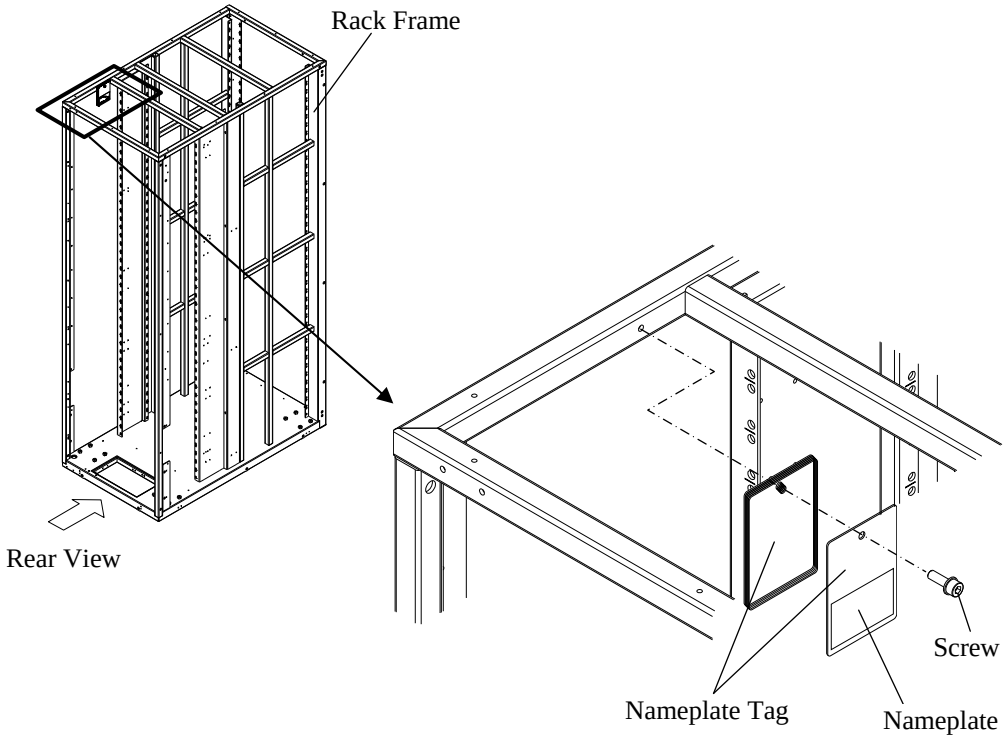

Fig. 3.17.1-4 Attachment of Nameplate

   d. Return to the working table and do the rest of the work.
   New Installation: INST02-10
   Non-Disruptive Installation: INST02-40

Copyright © 2010, Hitachi, Ltd.

3.17.2 Installation Procedure of Key Kit (DKC-F710I-KYP)

1. Installation of front parts.
   a. Install the spacer U and spacer L, and secure them with the four screws ①.
   b. Install the spacer M, and secure it with the two screws ②.
   c. Install the Hinge (U) ASSY and Hinge (L) ASSY, and secure them with the four socket bolts.
   d. Install the two supports (DOOR), and secure them with the four screws ③.
   e. Install the cushion, and secure it with the two screws ④ and the two LL washers ①.
   f. Install the two dampers, and secure them with the two screws ⑤ and the two LL washers ②.

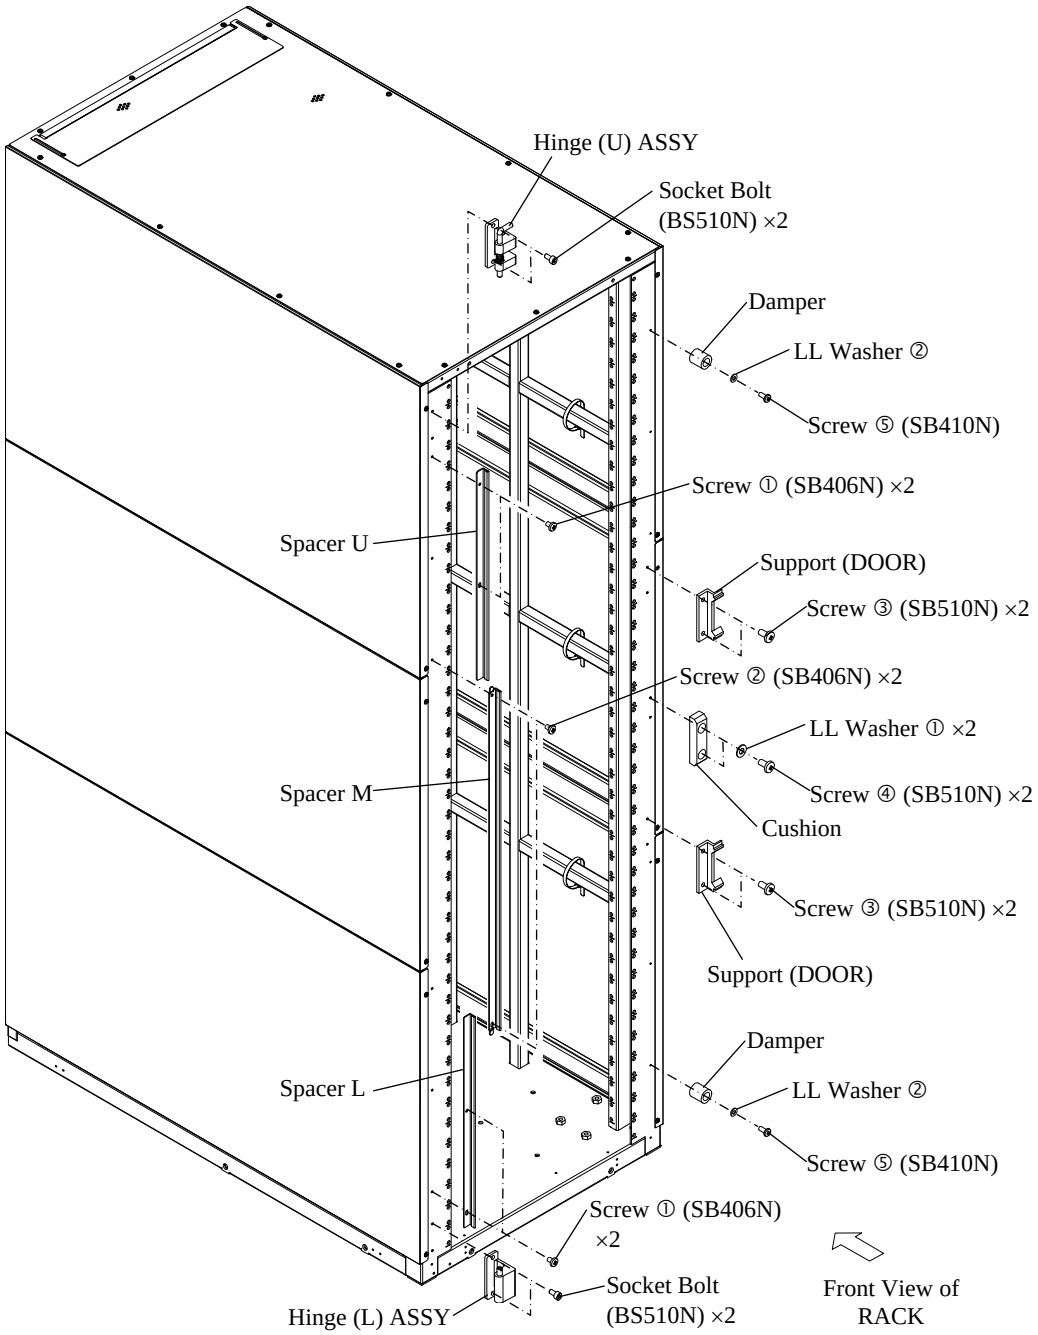

Fig. 3.17.2-1 Installation of Parts (Front)

Copyright © 2010, Hitachi, Ltd.

2. Installation of rear parts.
   a. Install the stopper bracket, and secure it with the two screws ①.
   b. Install the bracket (KEY), and secure it with the four screws ②.

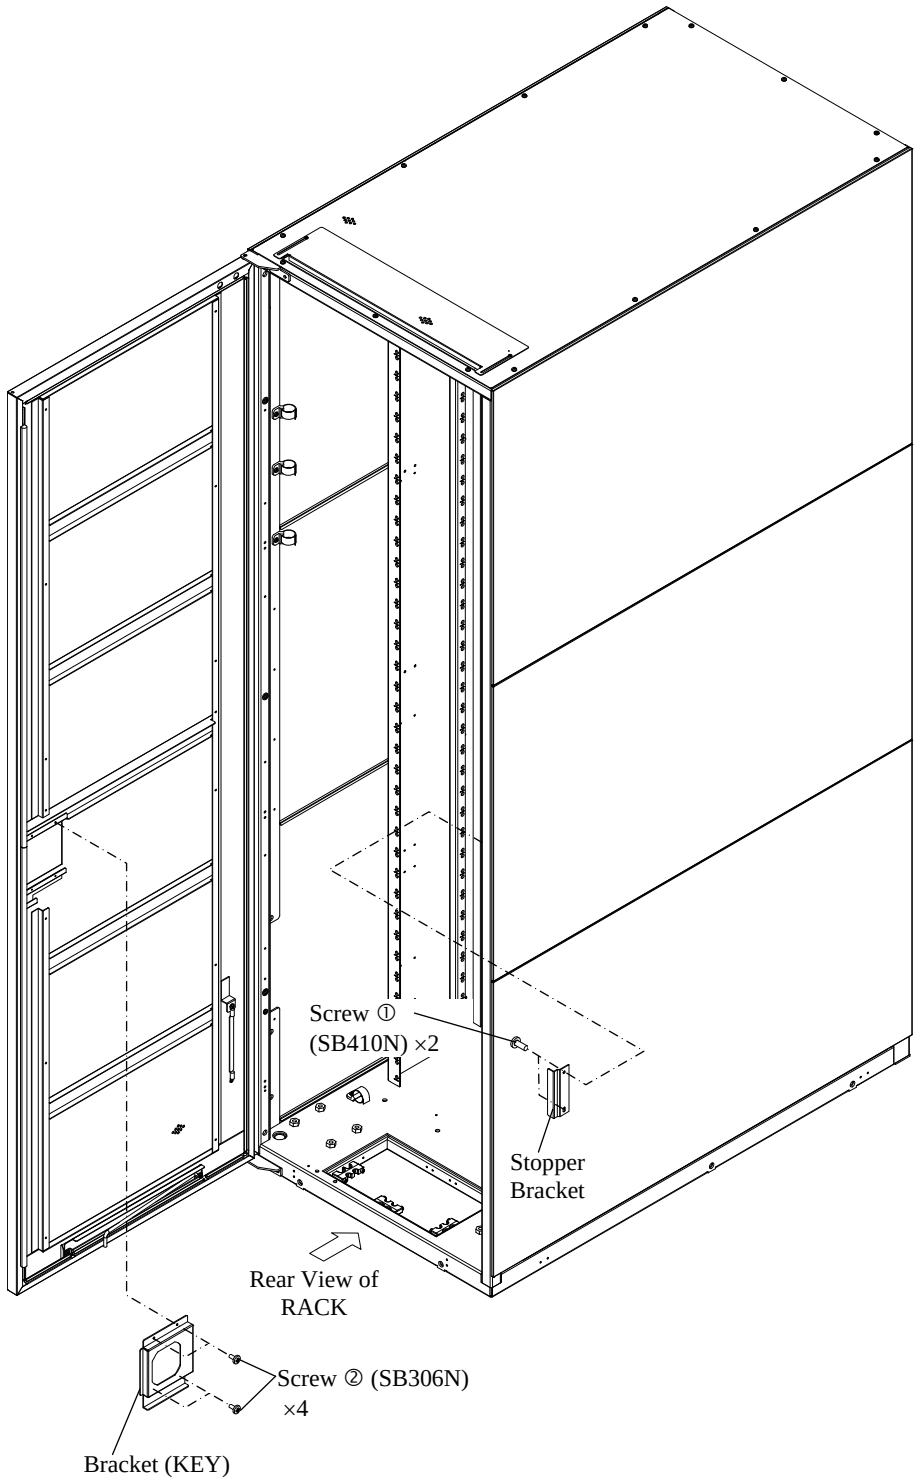

Fig. 3.17.2-2 Installation of Parts (Rear)

Copyright © 2010, 2012, Hitachi, Ltd.

3. Handling of the Nameplate
   a. The attachment of the nameplate of DKC-F710I-KYP is not needed.

4. Return to the working table and do the rest of the work.
   New Installation: INST02-10
   Non-Disruptive Installation: INST02-40

Copyright © 2010, Hitachi, Ltd.

3.17.3 Installation Procedure of PDU Bracket 1-Phase (DKC-F710I-PBR1)

1. Installation of Rear Panels
   a. Install the support L and support R on the rear side of the RACK, and secure them with the six screws ①.
   b. Install the eight screws ②in the support L and support R, and tighten them.
   c. Install the two holders each in the support L and support R, and secure them with the eight screws ③.

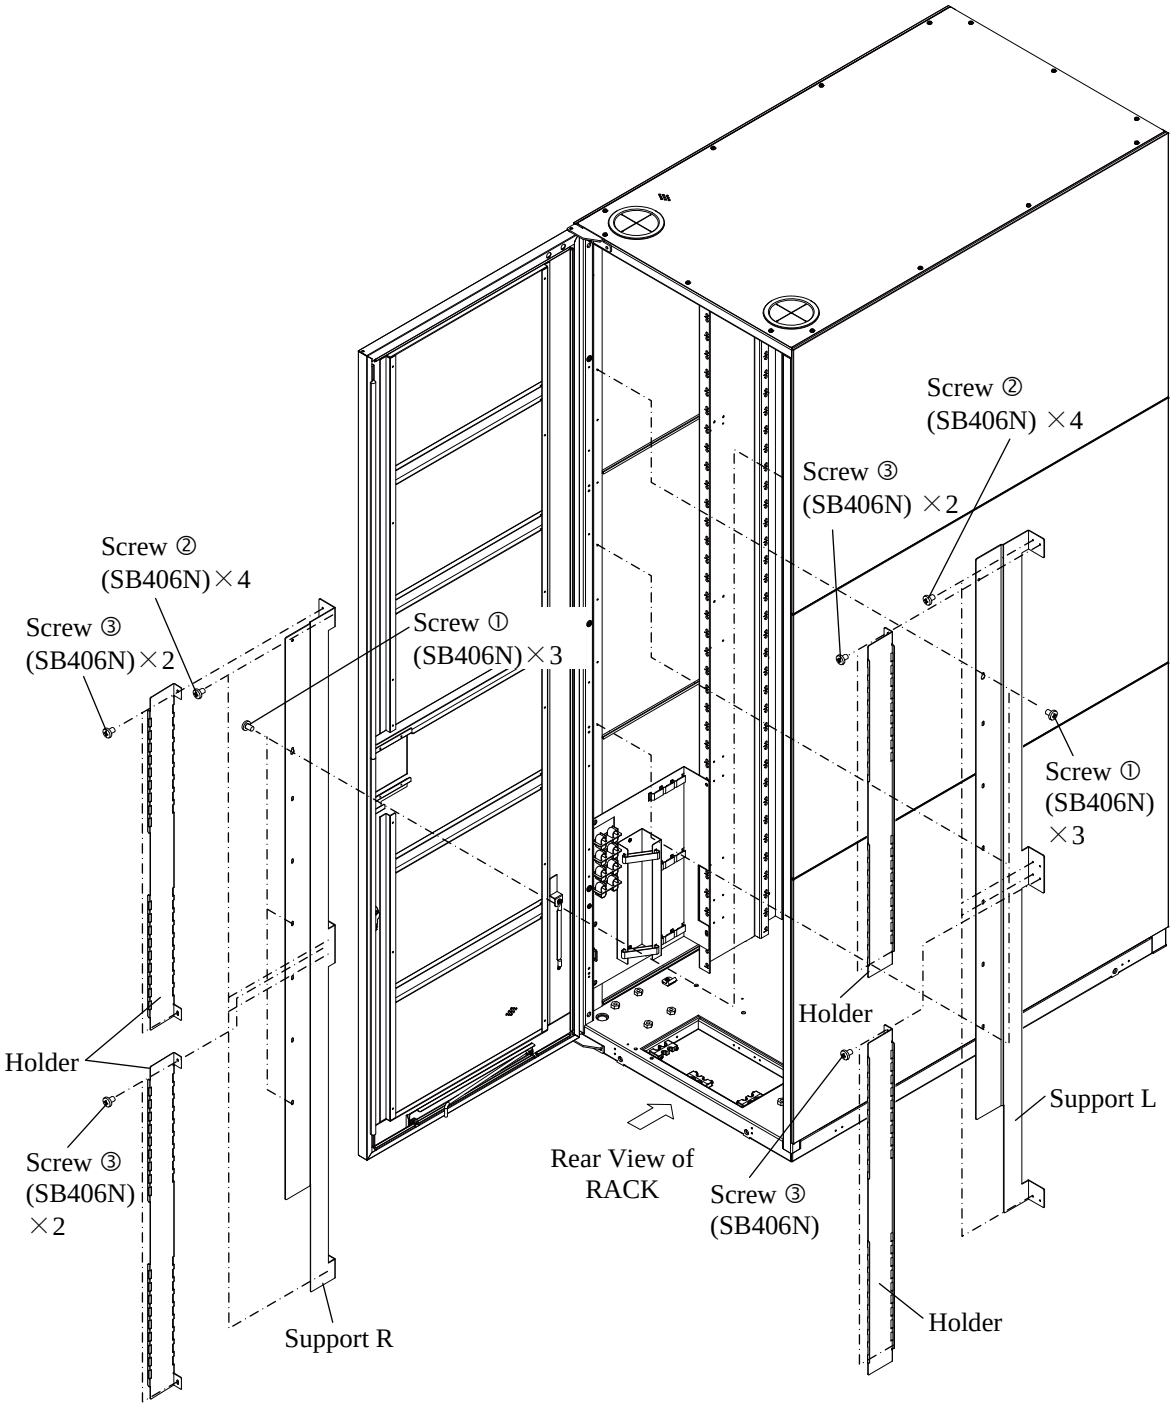

Fig. 3.17.3-1 Installation of Panels (Rear)

Copyright © 2010, Hitachi, Ltd.

2. Attachment of the Nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Attach the nameplate to the nameplate tag.
   c. Attach all the nameplate tags with the screw.

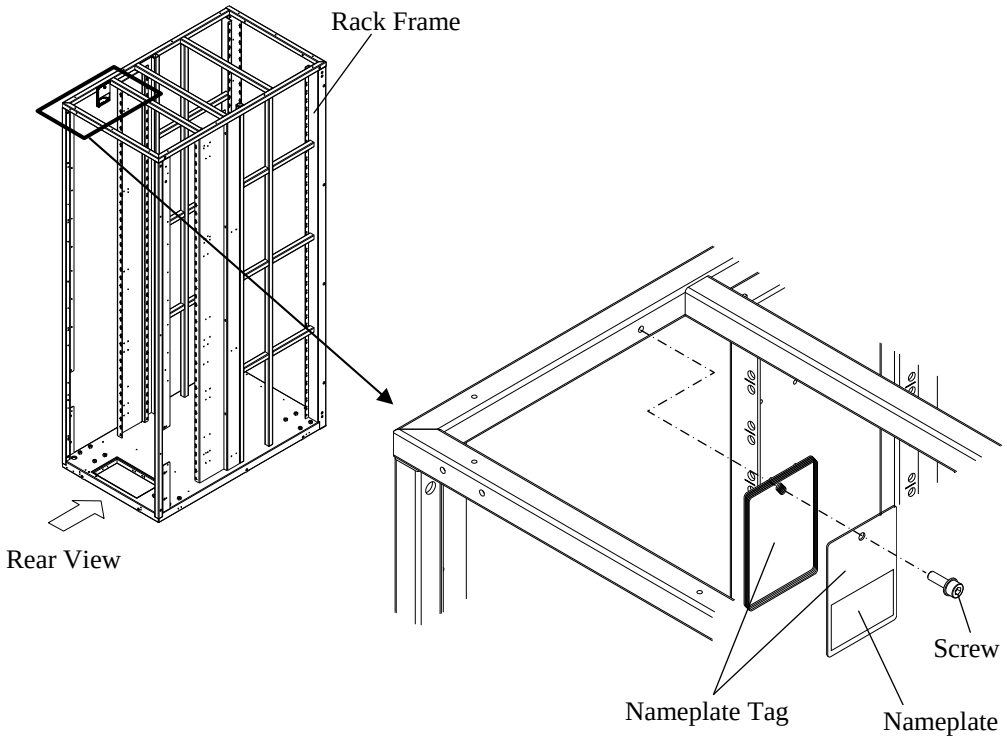

Fig. 3.17.3-2 Attachment of Nameplate

   d. Return to the working table and do the rest of the work.
   New Installation: INST02-10,
   Non-Disruptive Installation: INST02-40

Copyright © 2010, Hitachi, Ltd.

3.17.4 Installation Procedure of PDU Bracket 3-Phase (DKC-F710I-PBR3P)

1. Installation of rear parts
   a. Install the support (S1316) R and support (S1316) L, and secure them with the eight screws.

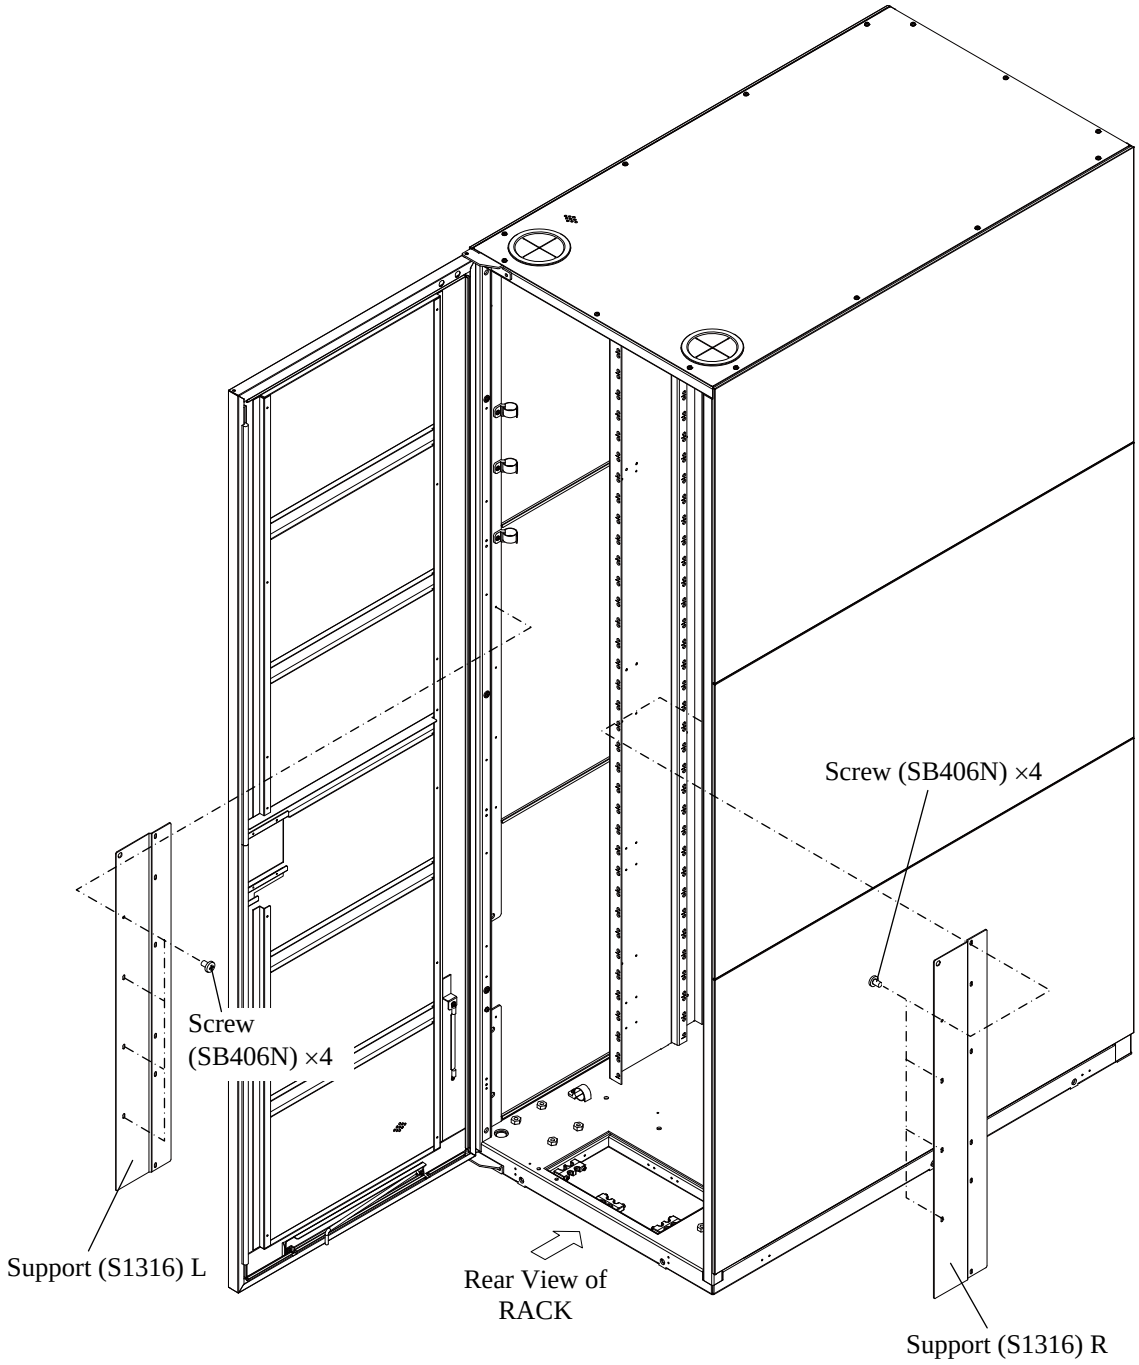

Fig. 3.17.4-1 Installation of Parts (Rear)

Copyright © 2010, Hitachi, Ltd.

2. Handling of the Nameplate
   a. The attachment of the nameplate of DKC-F710I-PBR3P is not needed.

3. Return to the working table and do the rest of the work.
   New Installation: INST02-10,
   Non-Disruptive Installation: INST02-40

Copyright © 2011, Hitachi, Ltd.

3.17.5 Installation Procedure of PDU Bracket 1-Phase (DKC-F710I-PBR1P)

1. Installation of rear parts
   a. Remove the screws from the rear side of the RACK, and remove all the cleats and clamp tapes.

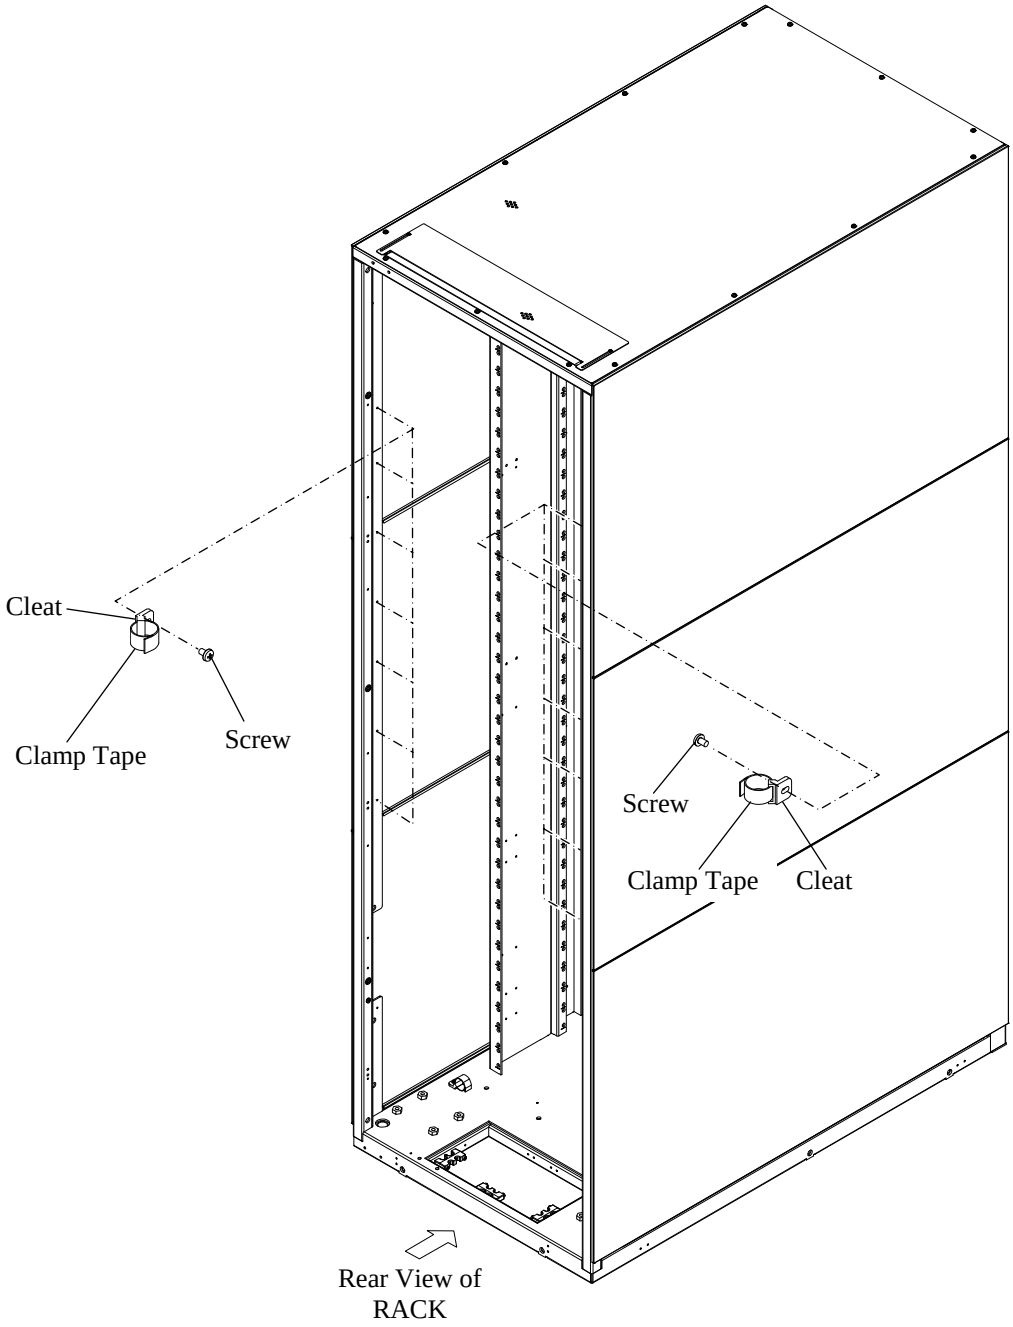

Fig. 3.17.5-1 Removal of Cleats and Clamp Tapes

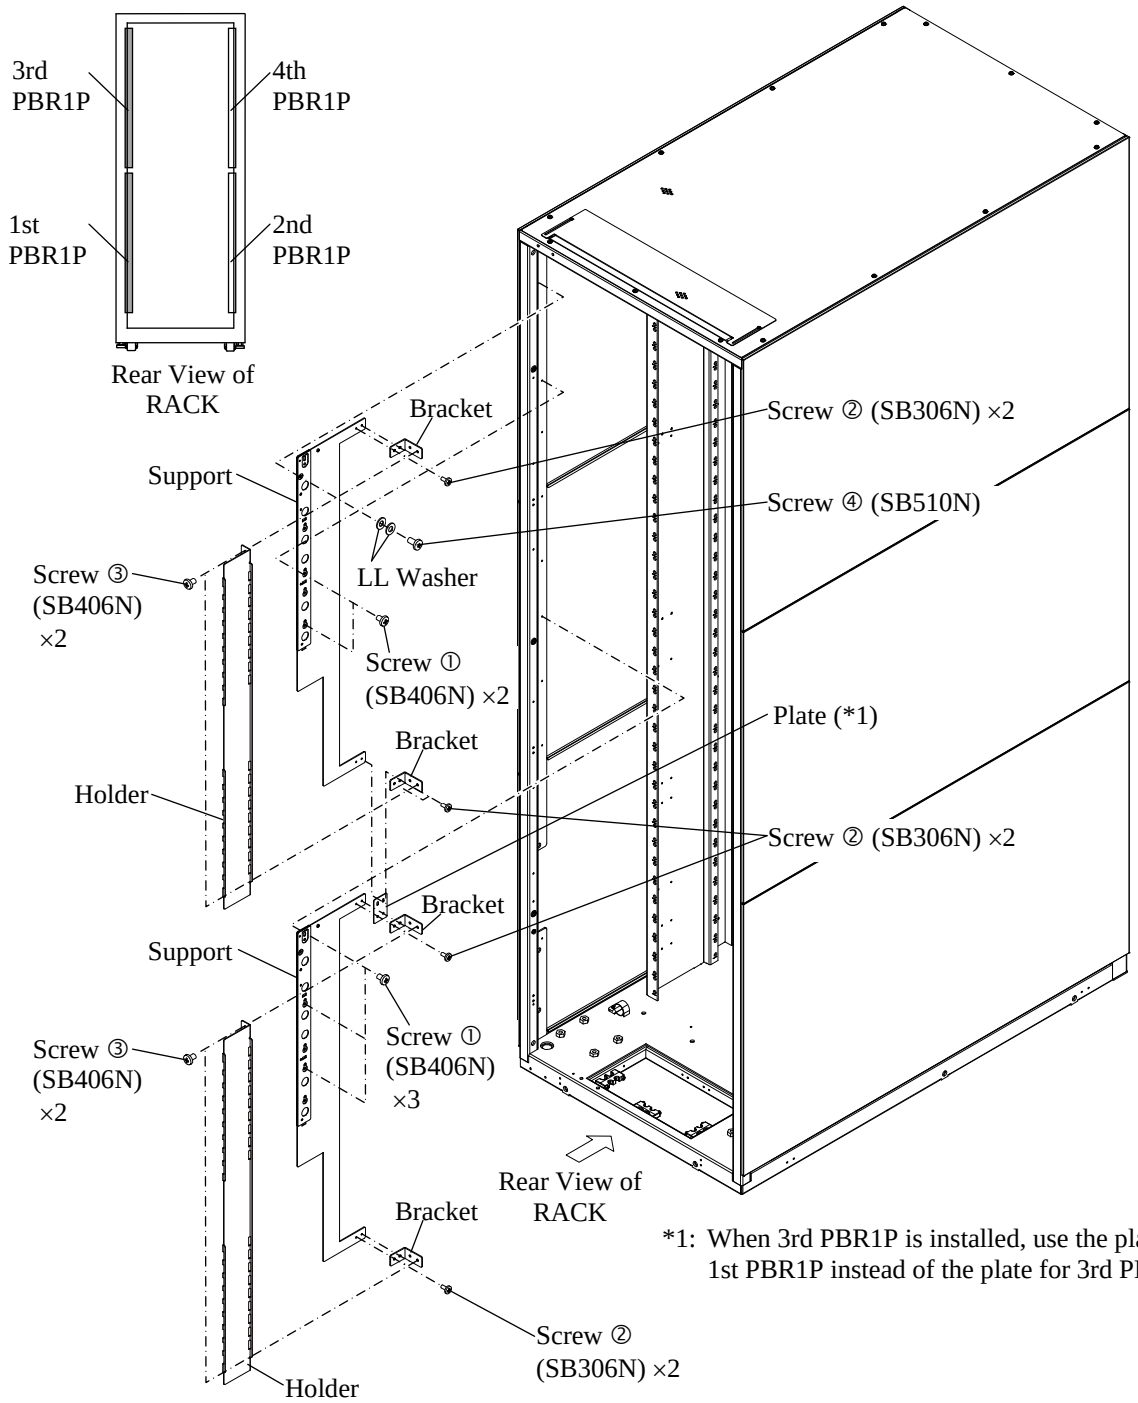
Copyright © 2011, Hitachi, Ltd.

1st PBR1P

b. Install the support, and secure it with the three screws ①.
c. Install the plate and two brackets, and secure them with the four screws ②.
d. Install the holder, and secure it with the two screws ③.

3rd PBR1P

b. Install the support, and secure it with the two screws ①, screw ④ and two LL washers.
c. Install the two brackets, and secure them with the four screws ②.
d. Install the holder, and secure it with the two screws ③.



*1: When 3rd PBR1P is installed, use the plate for 1st PBR1P instead of the plate for 3rd PBR1P.

Fig. 3.17.5-2 Installation of Parts (Rear Left)

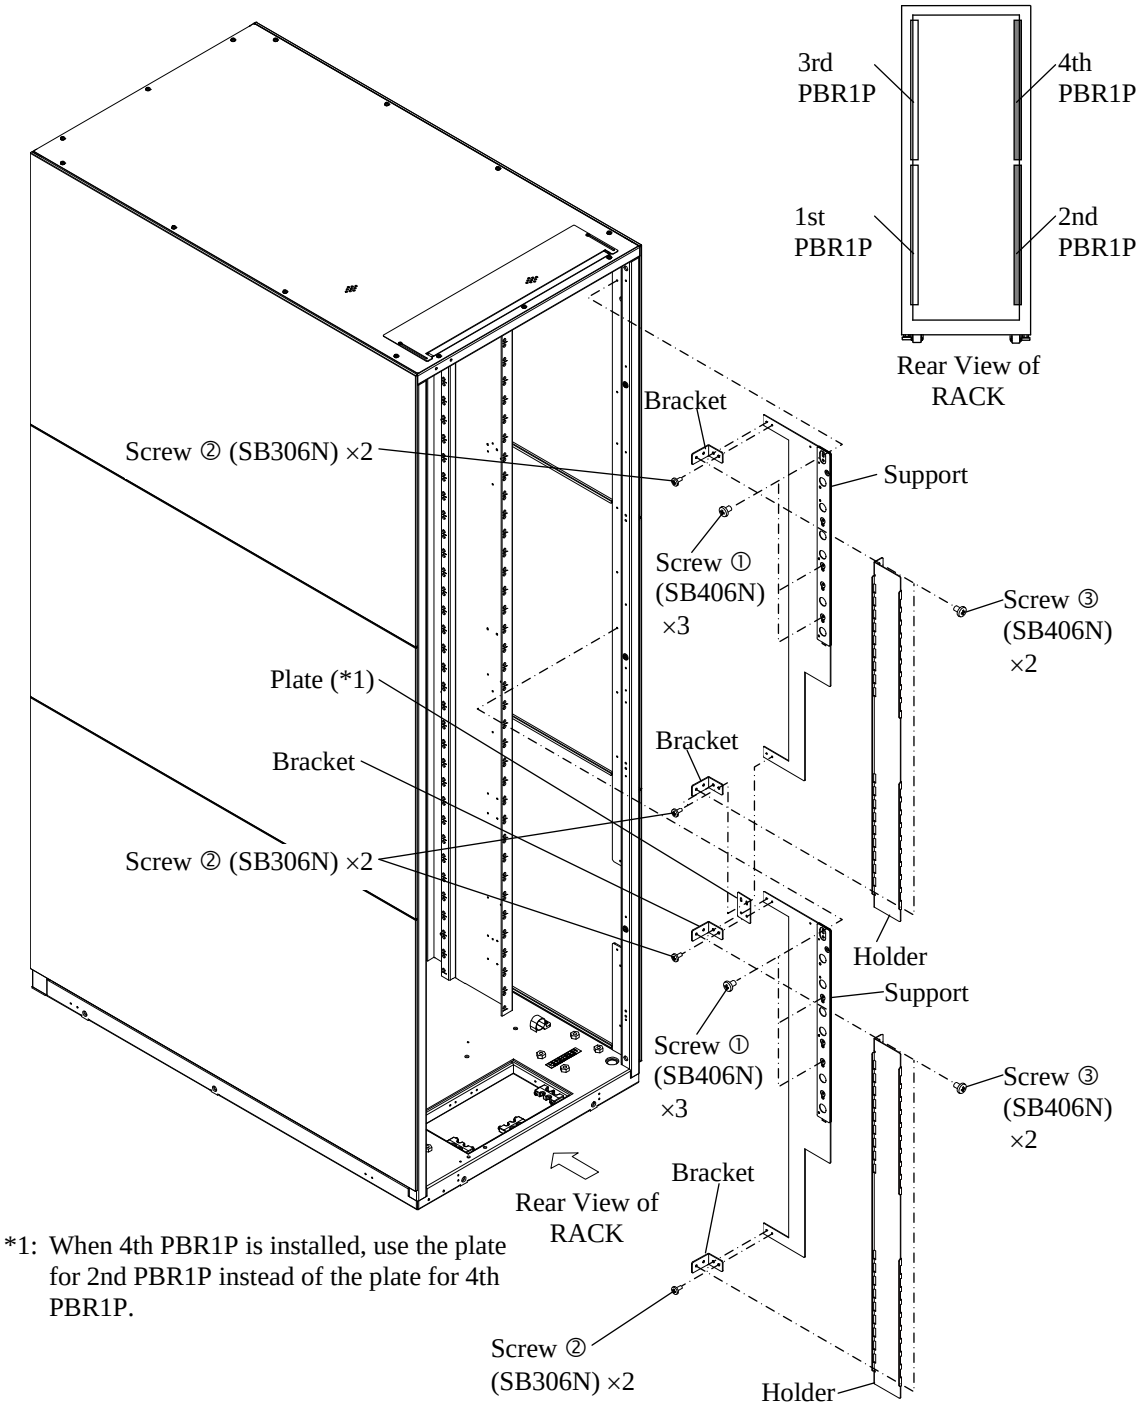
Copyright © 2011, Hitachi, Ltd.

2nd PBR1P

b. Install the support, and secure it with the three screws ①.
c. Install the plate and two brackets, and secure them with the four screws ②.
d. Install the holder, and secure it with the two screws ③.

4th PBR1P

b. Install the support, and secure it with the three screws ①.
c. Install the two brackets, and secure them with the four screws ②.
d. Install the holder, and secure it with the two screws ③.



*1: When 4th PBR1P is installed, use the plate for 2nd PBR1P instead of the plate for 4th PBR1P.

Fig. 3.17.5-3 Installation of Parts (Rear Right)

Copyright © 2011, Hitachi, Ltd.

2. Handling of the Nameplate
   a. The attachment of the nameplate of DKC-F710I-PBR1P is not needed.

3. Return to the working table and do the rest of the work.
   New Installation: INST02-10,
   Non-Disruptive Installation: INST02-40

Copyright © 2012, Hitachi, Ltd.

3.17.6 Installation Procedure of Key Kit (DKC-F710I-KYPN)

1. Installation of front parts
   a. Install the spacer U and spacer L, and secure them with the four screws ①.
   b. Install the spacer M, and secure it with the two screws ②.
   c. Install the Hinge (U) 2 ASSY and Hinge (L) 2 ASSY, and secure them with the four socket bolts.
   d. Install the two supports (DOOR), and secure them with the four screws ③.
   e. Install the two spacers (DOOR U), and secure them with the four screws ④.

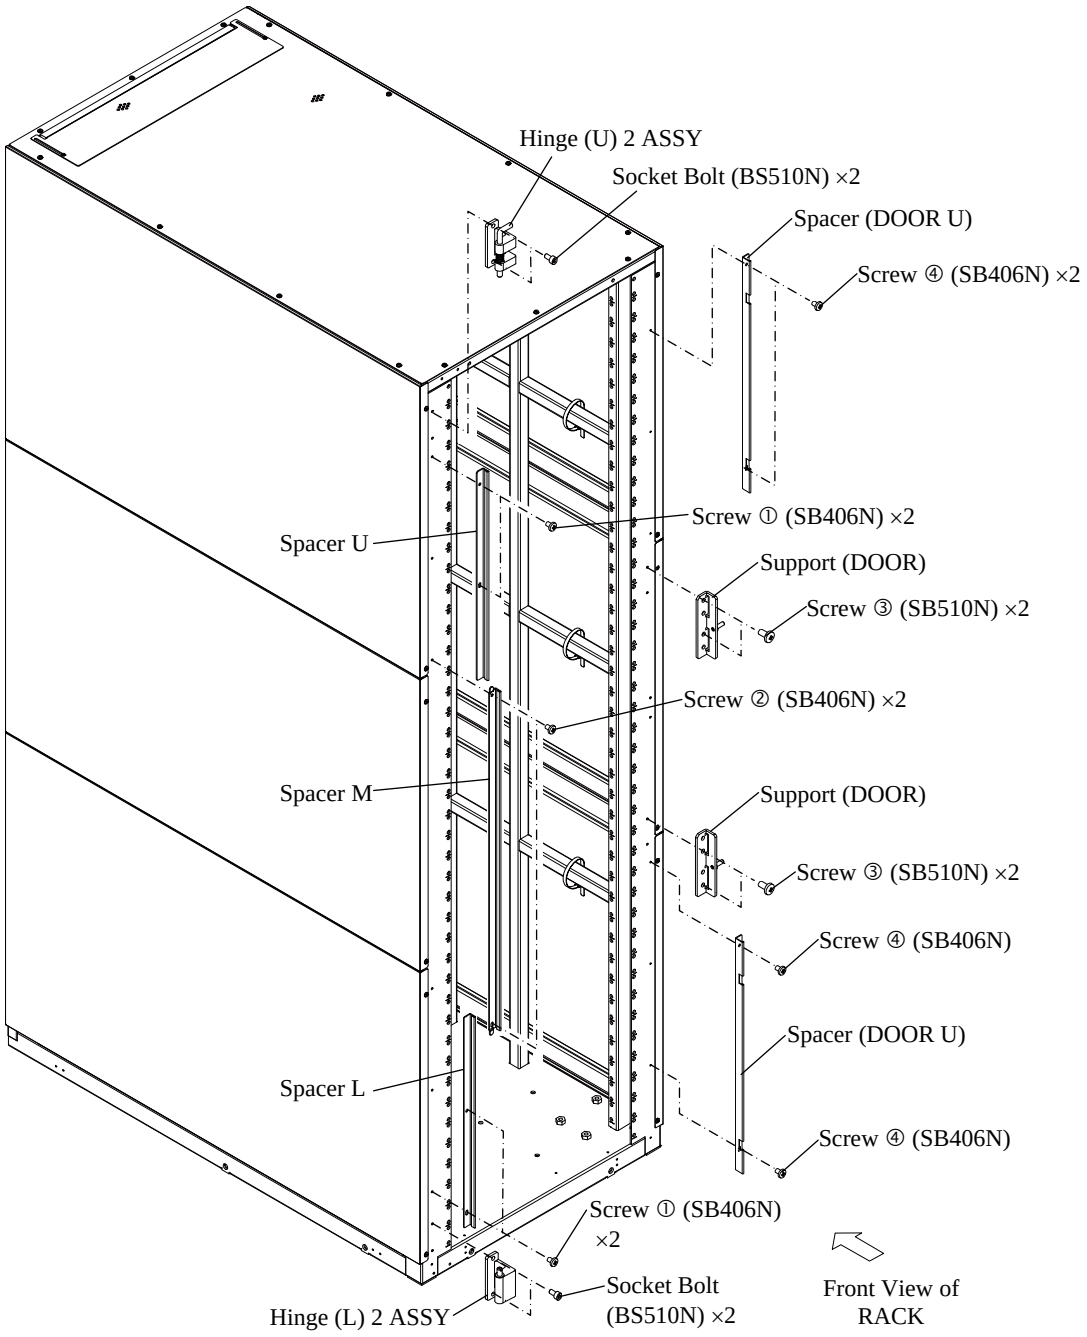


Fig. 3.17.6-1 Installation of Parts (Front)

Copyright © 2012, Hitachi, Ltd.

2. Installation of rear parts
   a. Install the stopper bracket, and secure it with the two screws ①.
   b. Install the bracket (KEY), and secure it with the four screws ②.

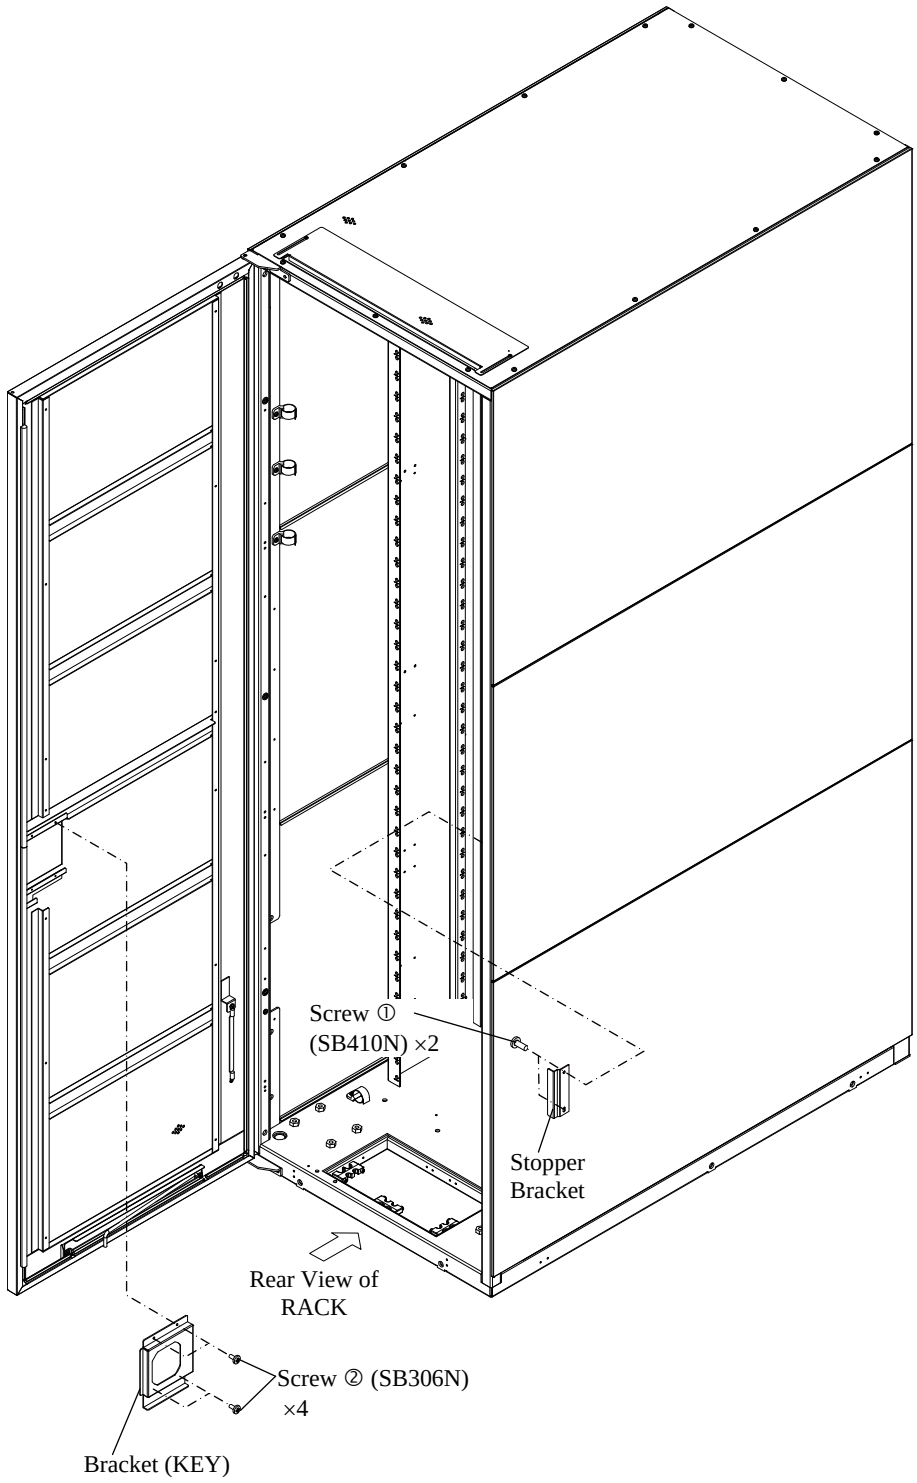

Fig. 3.17.6-2 Installation of Parts (Rear)

Copyright © 2012, Hitachi, Ltd.

3. Handling of the Nameplate
   a. The attachment of the nameplate of DKC-F710I-KYPN is not needed.

4. Return to the working table and do the rest of the work.
   New Installation: INST02-10
   Non-Disruptive Installation: INST02-40

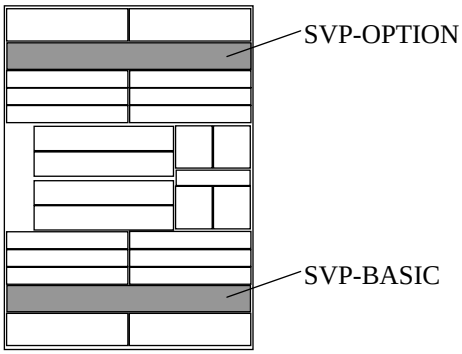
3.18 LAN Cable Wiring for SVP

The SVP consists of the four LAN ports in all. The applications of the LAN cables that are connected to these LAN ports are shown the table below.
Refer to the table below for the LAN cable wiring operation procedures.
Please note that the EMI cores should be installed in each LAN cable to connect them to the three LAN ports (PUBLIC, INTERNAL, CONSOLE).



Rear View of DKC-0

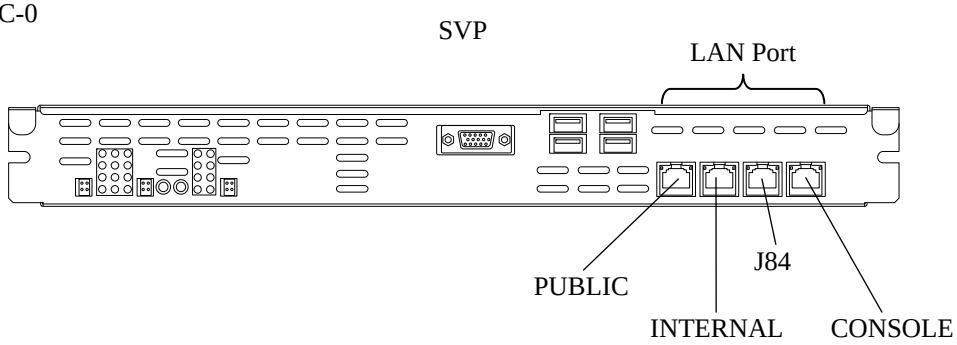


Fig. 3.18-1 LAN Port Positions of SVP

Table 3.18-1 Application of LAN Cables for SVP

No.	Port Name	Work	Pages	EMI Core	Note
1	PUBLIC	When SNMP Web Console is used	INST03-18-20, 30	Required	Connected to both SVP-BASIC and SVP-OPTION.
2	INTERNAL	When connected to other devices	INST03-18-20	Required	Only connected to SVP-BASIC. Unnecessary to SVP-OPTION.
3	J84	When DKC-F710I-MDEXC is used	INST03-07-110	Unnecessary	In the twin DKC configuration, connect to the HUBBOX-10 (J83) in the DKC-1. (The SVP-OPTION is unused.)
4	CONSOLE	When CE Laptop PC is used	INST03-01-140	Required	Generally, only connected to SVP-BASIC. Connected to SVP-OPTION only when a trouble occurs on SVP-BASIC.

Copyright © 2010, 2012, Hitachi, Ltd.

3.18.1 Procedures of LAN Cable Wiring for SVP

1. Connecting the LAN Cable with the SVP-BASIC

> Note: To connect the LAN cable with the INTERNAL port of the SVP, connect it only with the SVP-BASIC.
> Connecting the cable with the INTERNAL port of the SVP-OPTION is not necessary.

a. Wire the LAN cable after pulling the cable into the RACK.
b. Pass the LAN cable through the EMI core, and wind the cable in the EMI core once.
c. Connect the LAN cable with the SVP-BASIC port (PUBLIC or INTERNAL)
d. Secure the LAN cable with the clamp tape.

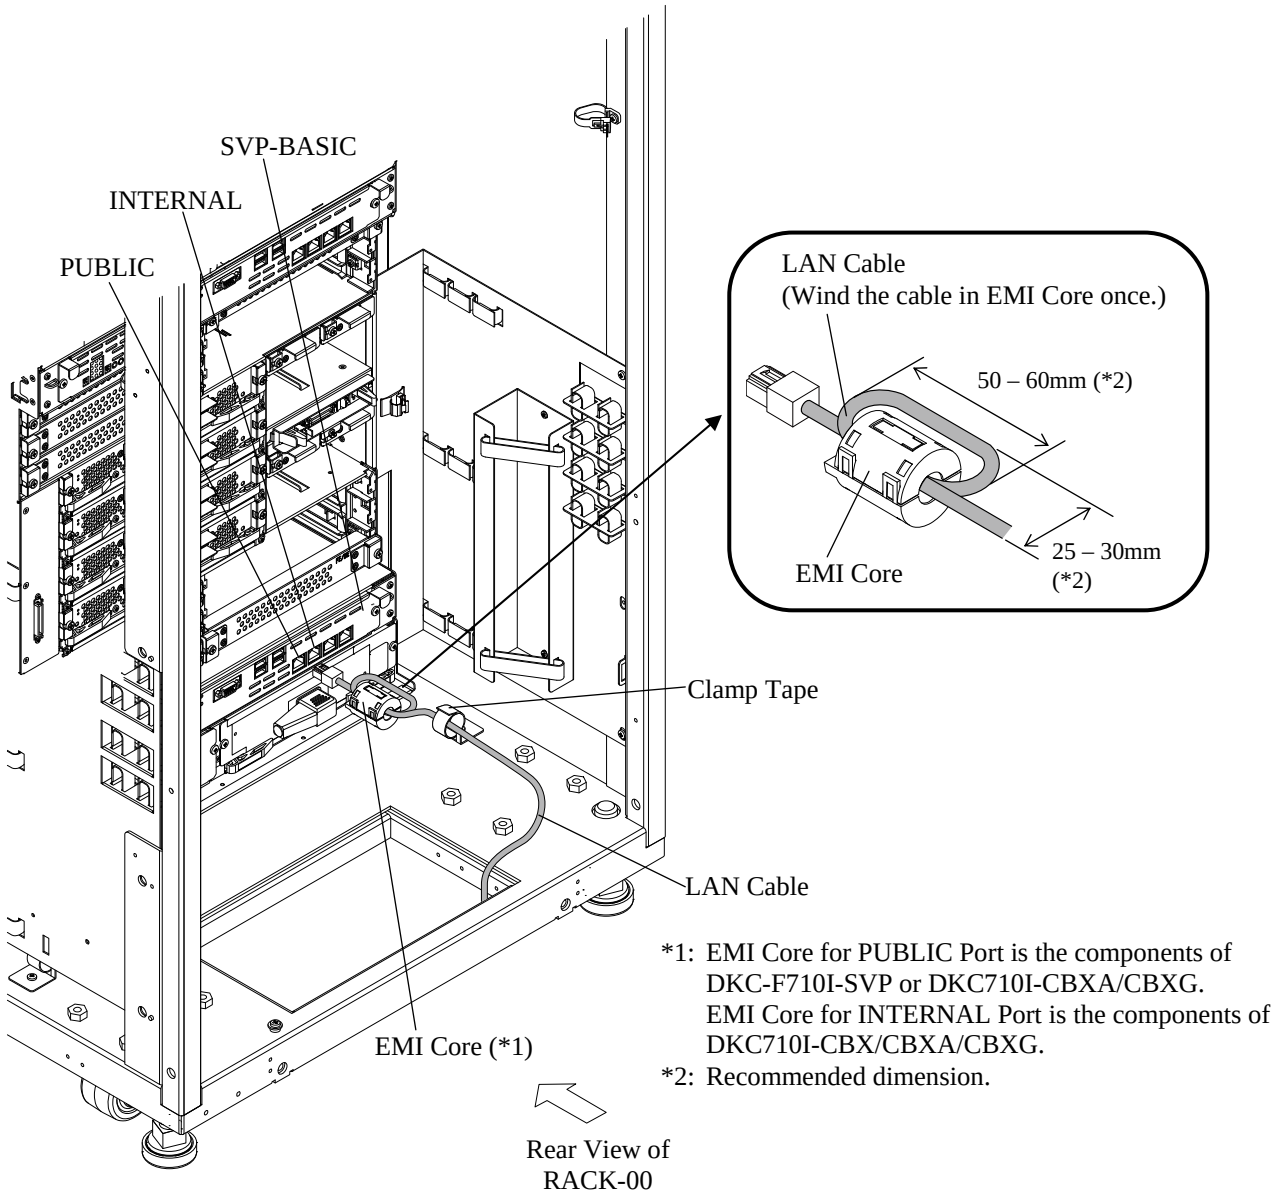

Fig. 3.18.1-1 Connection of LAN Cable (SVP-BASIC)

Copyright © 2010, Hitachi, Ltd.

2. Wiring LAN Cable with SVP-OPTION

Note: To connect the LAN cable with the INTERNAL port of the SVP, connect it only with the SVP-BASIC.
Connecting the cable with the INTERNAL port of the SVP-OPTION is not necessary.

a. Wire the LAN cable after pulling the cable into the RACK.
b. Pass the LAN cable through the EMI core, and wind the cable in the EMI core once.
c. Connect the LAN cable with the PUBLIC port of the SVP-OPTION.
d. Secure the LAN cable with the three clamp tapes.

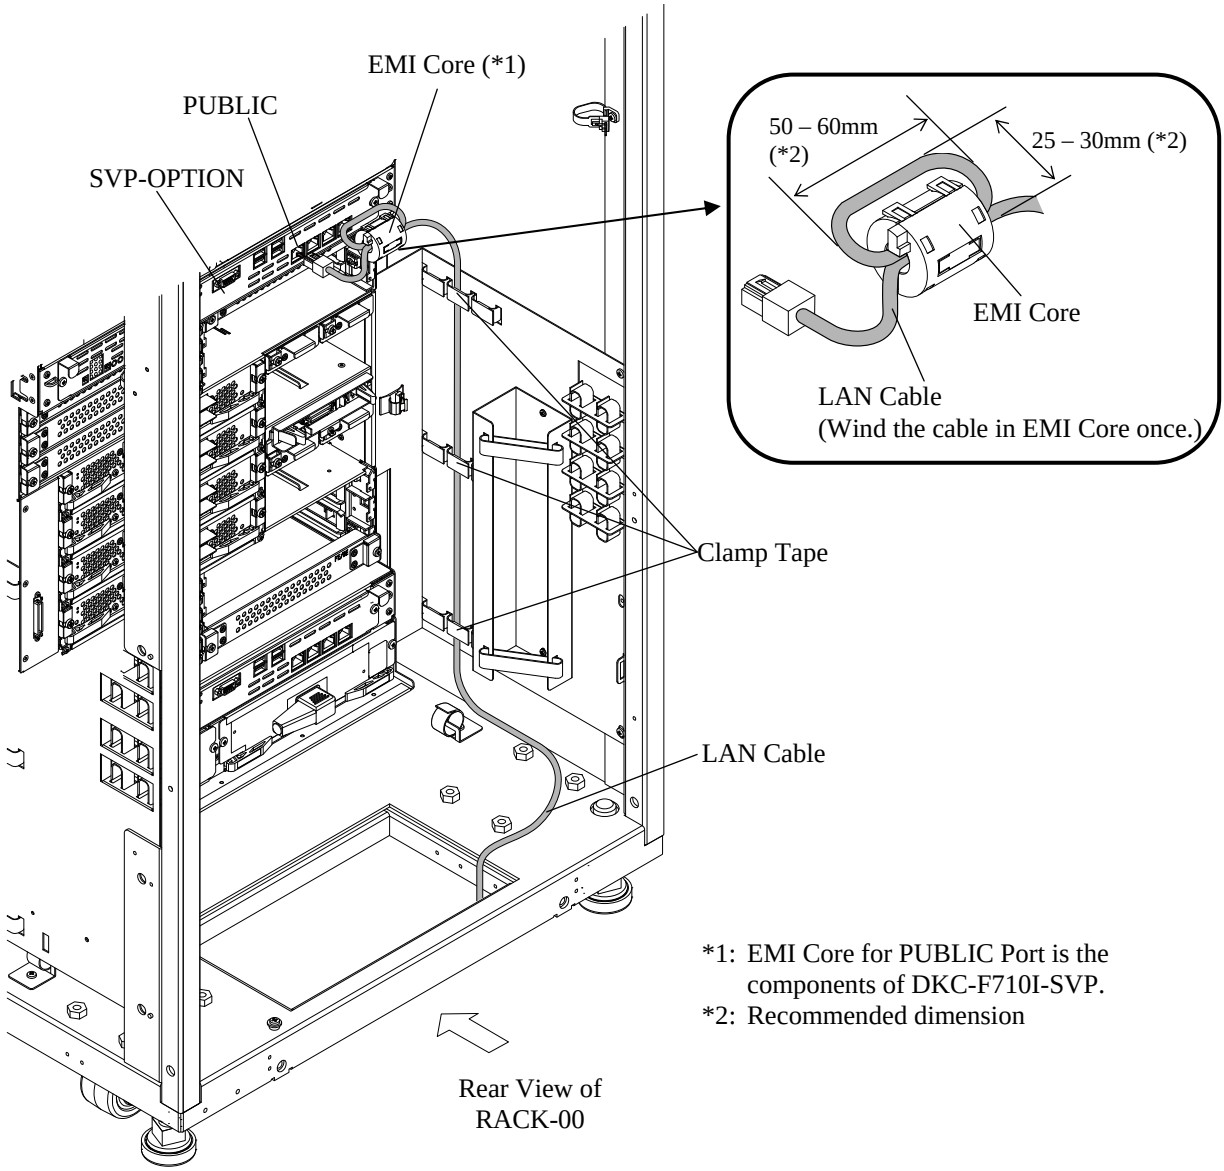

Fig. 3.18.1-2 Connection of LAN Cable (SVP-OPTION)

3.19 Installation of SM Size without adding Cache Memory

Note:
The CM capacity decreases if SM size is increased by this operation. Make sure there will be no performance effect and so on in the configuration to be built. For the information on cache memory capacity, please refer to INST06-70.

Rough time of SM size installation becomes addition of the following A, B and C.

Table 3.19-1 Rough time of installation

	Process	Time	Remarks
A	Basic CM PCB blocking time	5 ~ 60min × 2 (*1)	
B	Basic CM PCB diagnosis time	10min × 2	
C	Basic CM PCB recovering time	5 ~ 20min × 2 (*1)	

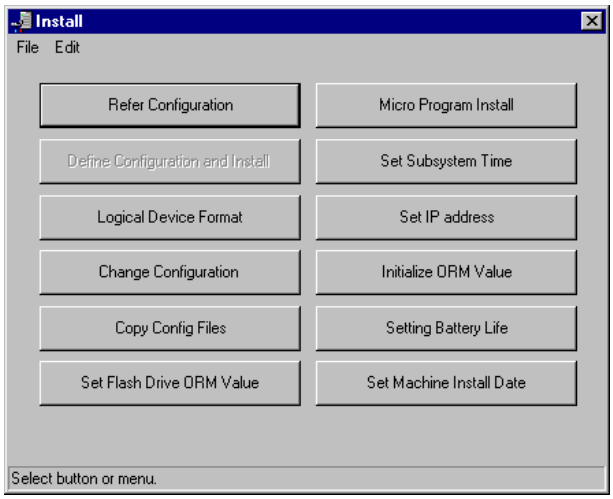
*1: Standard processing time is indicated. The processing time depends on the use situation, especially, the influence of the amount of write pending is received. When the amount of write pending is large, time more than the indication value might be required.

Copyright © 2011, 2012, Hitachi, Ltd.

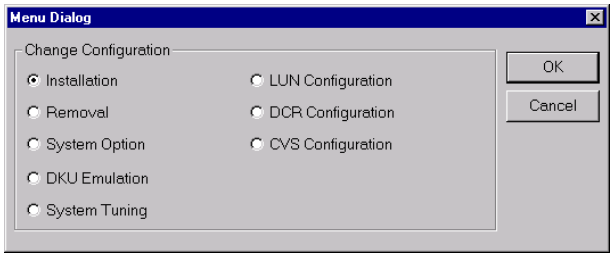
1. Setting up the New Device Structure Information

(1) <Mode Change>
Change the mode to Modify Mode.
Select (CL) [Install].

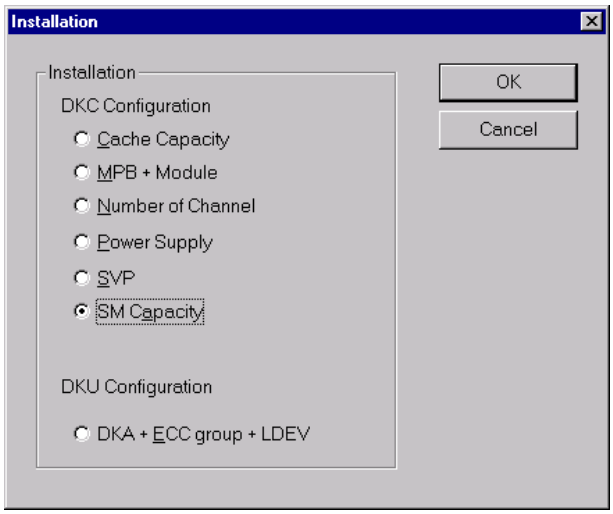
(2) <Start the 'Menu Dialog' screen>
Select (CL) [Change Configuration].



(3) <Start Device Structure Setup screen>
Select (CL) [Installation] in the 'Menu Dialog' dialog box and select (CL) [OK].



(4) <Select a part to be changed>
Select (CL) [SM Capacity], and select (CL) [OK].

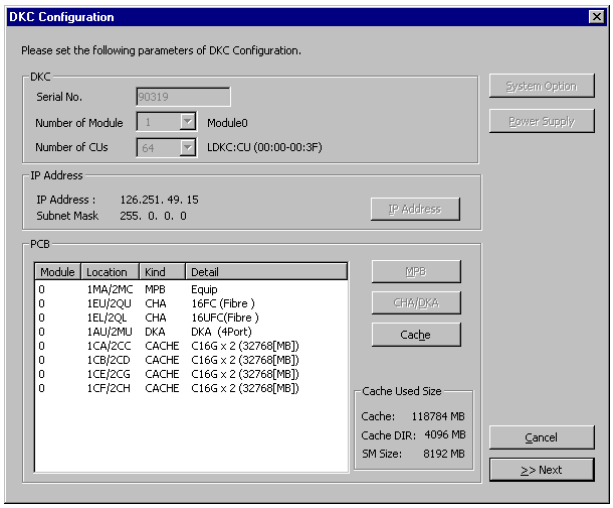


Copyright © 2011, 2012, Hitachi, Ltd.

(5) <DKC Configuration screen>
In the 'DKC Configuration' screen, select (CL) [Cache].
(Go to step (6).)

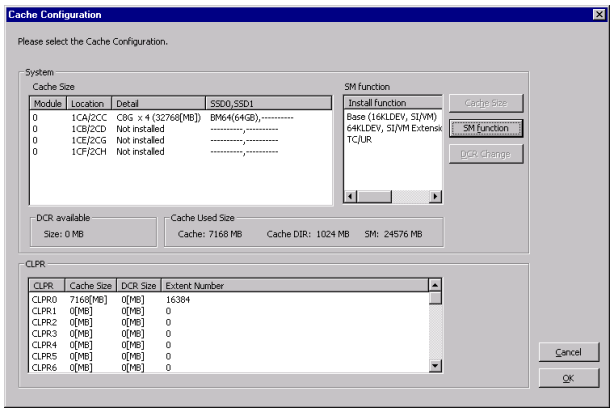
Note: It is impossible to install multiple types of parts at the same time.

Make sure that the all input items are correct and select (CL) [>>Next].
Go to step (7).

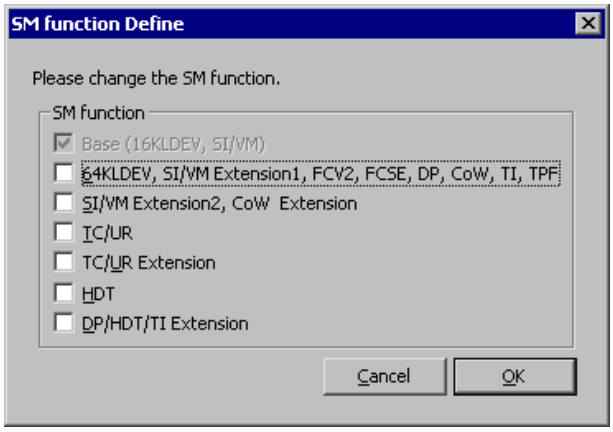


(6) <Cache Configuration screen>
Select (CL) [SM function] in the 'Cache Configuration' screen.
Go to Step (6)-1.

Make sure that the all input items are correct and select (CL) [OK].
Go back to Step (5).



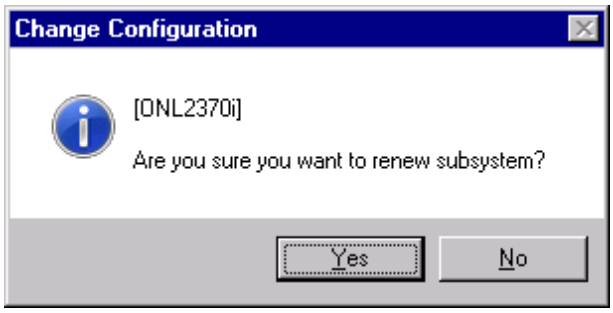
(6)-1 <SM function Define screen>
Set the SM function in the 'SM function Define' screen, select (CL) [OK].
Go back to Step (6).



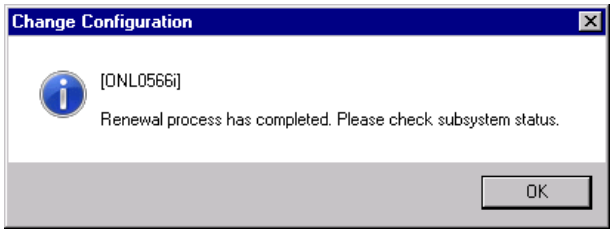
Copyright © 2011, Hitachi, Ltd.

(7) <Start installation>
Select (CL) [Yes] in response to “Are you sure you want to renew subsystem?”.

When [No] is selected (CL), returns to INST03-19-20 step (2).



(8) <End of system update processing>
“Renewal process has completed. Please check subsystem status.” is displayed when recovery processing on all installed components is completed. Select (CL) [OK] in response to this message.

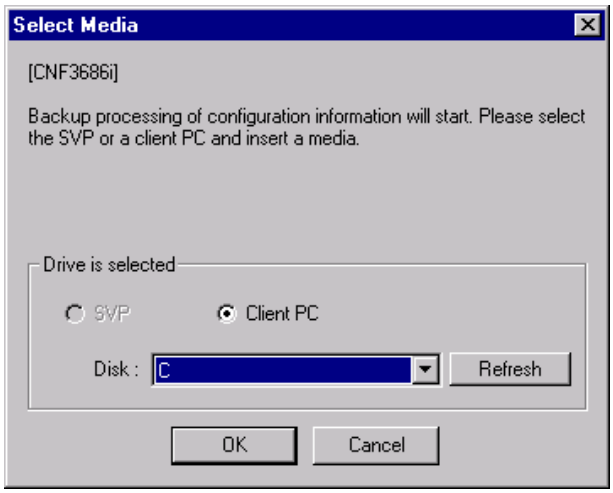


Copyright © 2011, 2012, Hitachi, Ltd.

(9)

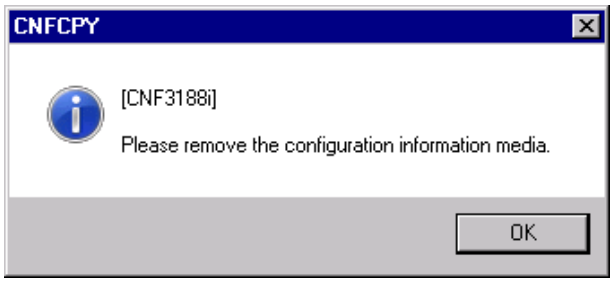
Execute an operation for backing up the configuration information.
Prepare the removable media for backup and insert the media.
Please select (CL) the [Refresh] button, and update drive information.
Select (CL) the drive and the PC in which the media was inserted. Select (CL) the [OK] button.

Note: For the procedure of backing up the configuration information to a CD-R, see page MICRO07-140.



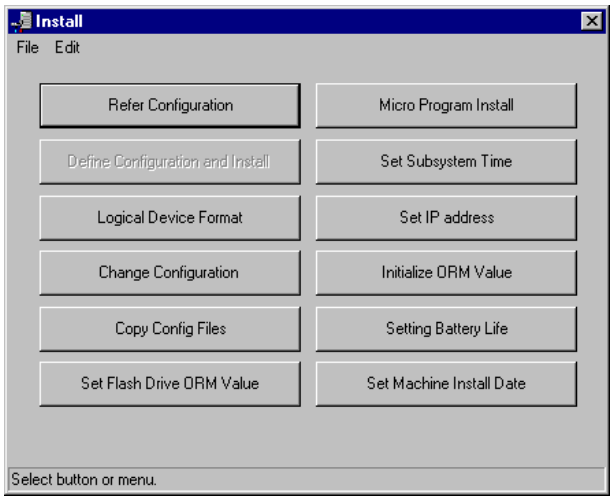
(10)

When this procedure is completed, the message “Please remove the configuration information media.” is displayed.
Remove the configuration information media, select (CL) [OK].



(11)

After the procedure is completed, return to “Install”.
Select (CL) [File]-[Exit].



(12) <Mode Change>

Change the mode to View Mode.

Copyright © 2011, 2014, Hitachi, Ltd.

3.20 Installation of 30A 1-Phase PDU Kit (DKC-F710I-PDU30P/PDU30F)

Table 3.20-1 Parts List

No.	Model Number	Part Name	Part No.	Quantity	Remarks
1	DKC-F710I-PDU30P	30A PDU ASSY	3284050-A	4	PDU30
		PDB Bracket	5535646-1	4	
		PDB Bracket (20/30)	5546418-1	2	PDB Bracket L
		PDB Bracket (20/30)	5546418-2	2	PDB Bracket R
		Bracket (30A PS)	5546460-1	2	
		Screw	SB406N	24	
		WA Socket Bolt	3261959-410	4	
		Nameplate (HDS)	2852548-66	1	ITPD
2	DKC-F710I-PDU30F	30A PDU ASSY (NF)	3284050-A	2	PDU30
		Rack Nut	5510146-1	4	
		Bracket 1	5549612-1	1	
		Bracket 2	5549613-1	1	
		Bracket 3	5549654-1	2	
		Screw	SB408N	10	
		Screw	SB510N	4	
		WA Socket Bolt	3261959-410	2	
		Nameplate (HDS)	2852548-xx	1	ITPD

3.20.1 Installation Procedure of 30A 1-Phase PDU Kit

1. Confirmation of the Additional Installation Positions
   a. Confirm the additional installation positions of 30A 1-Phase PDU Kit.

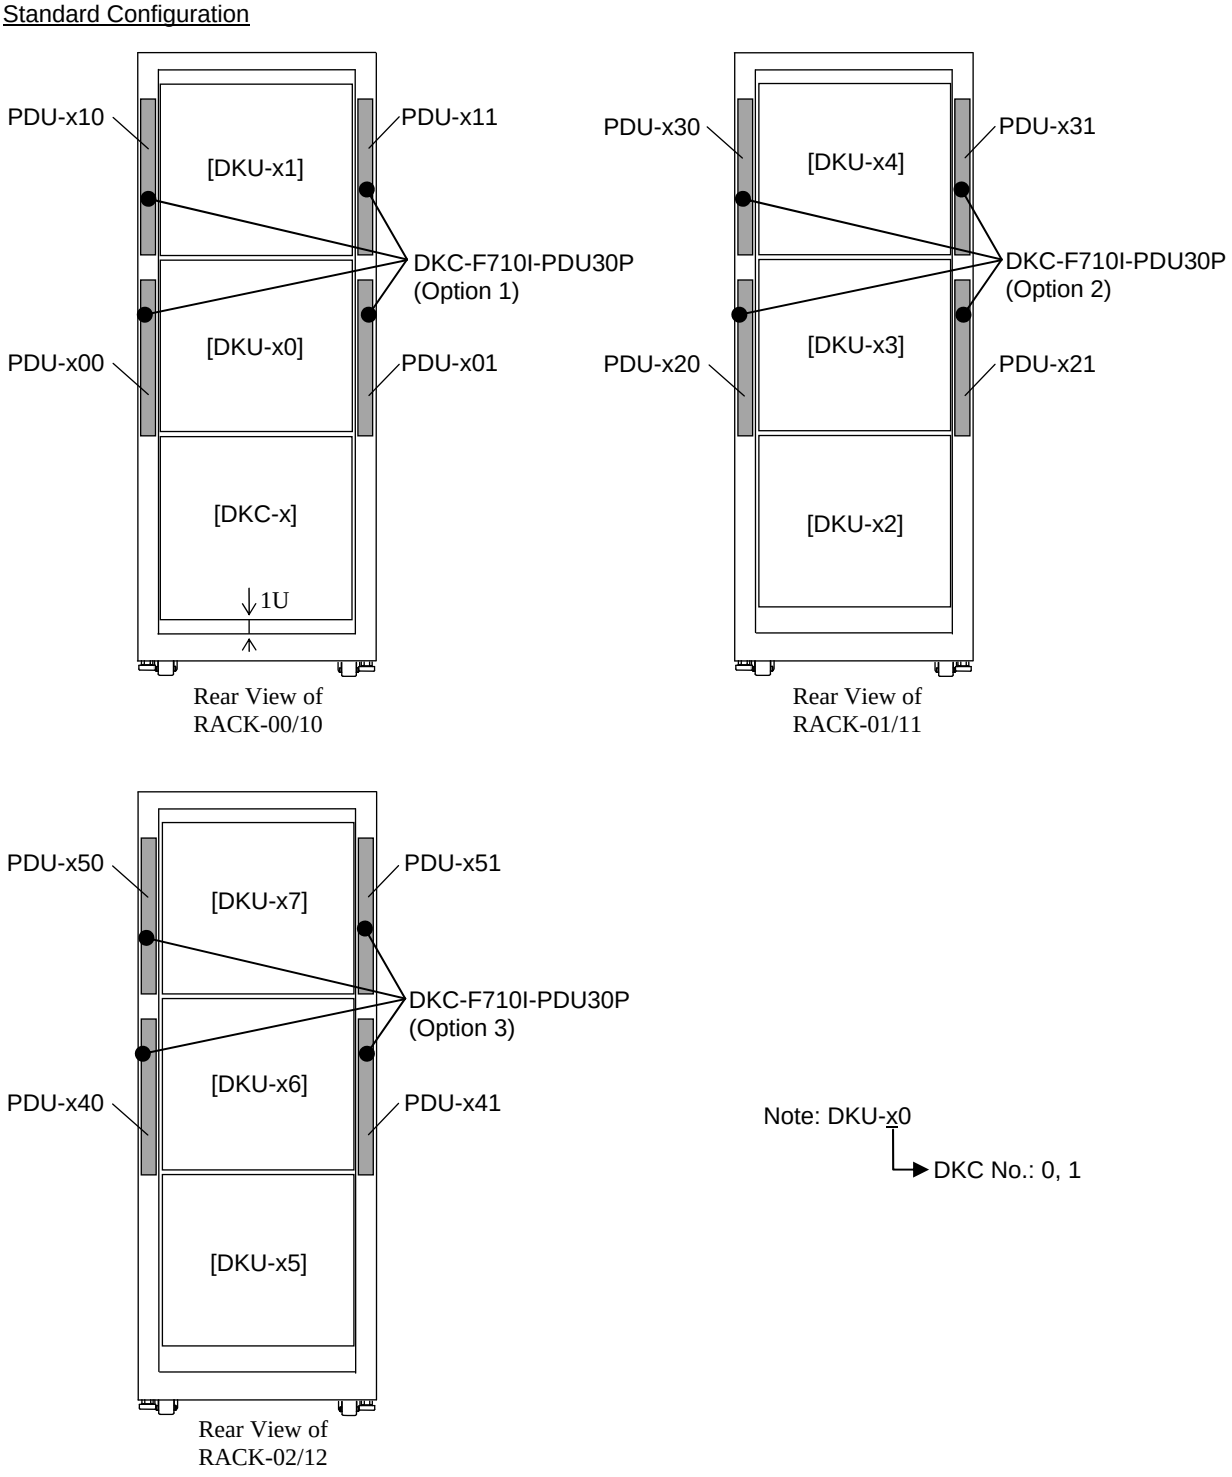

Fig. 3.20.1-1 Additional Installation Positions of 30A 1-Phase PDU Kit

Copyright © 2011, Hitachi, Ltd.

2. PDU Installation
   a. Install four brackets on the rear right side of the rack, and secure them with eight screws.
   b. Install four brackets on the left side in the same way as the right side.

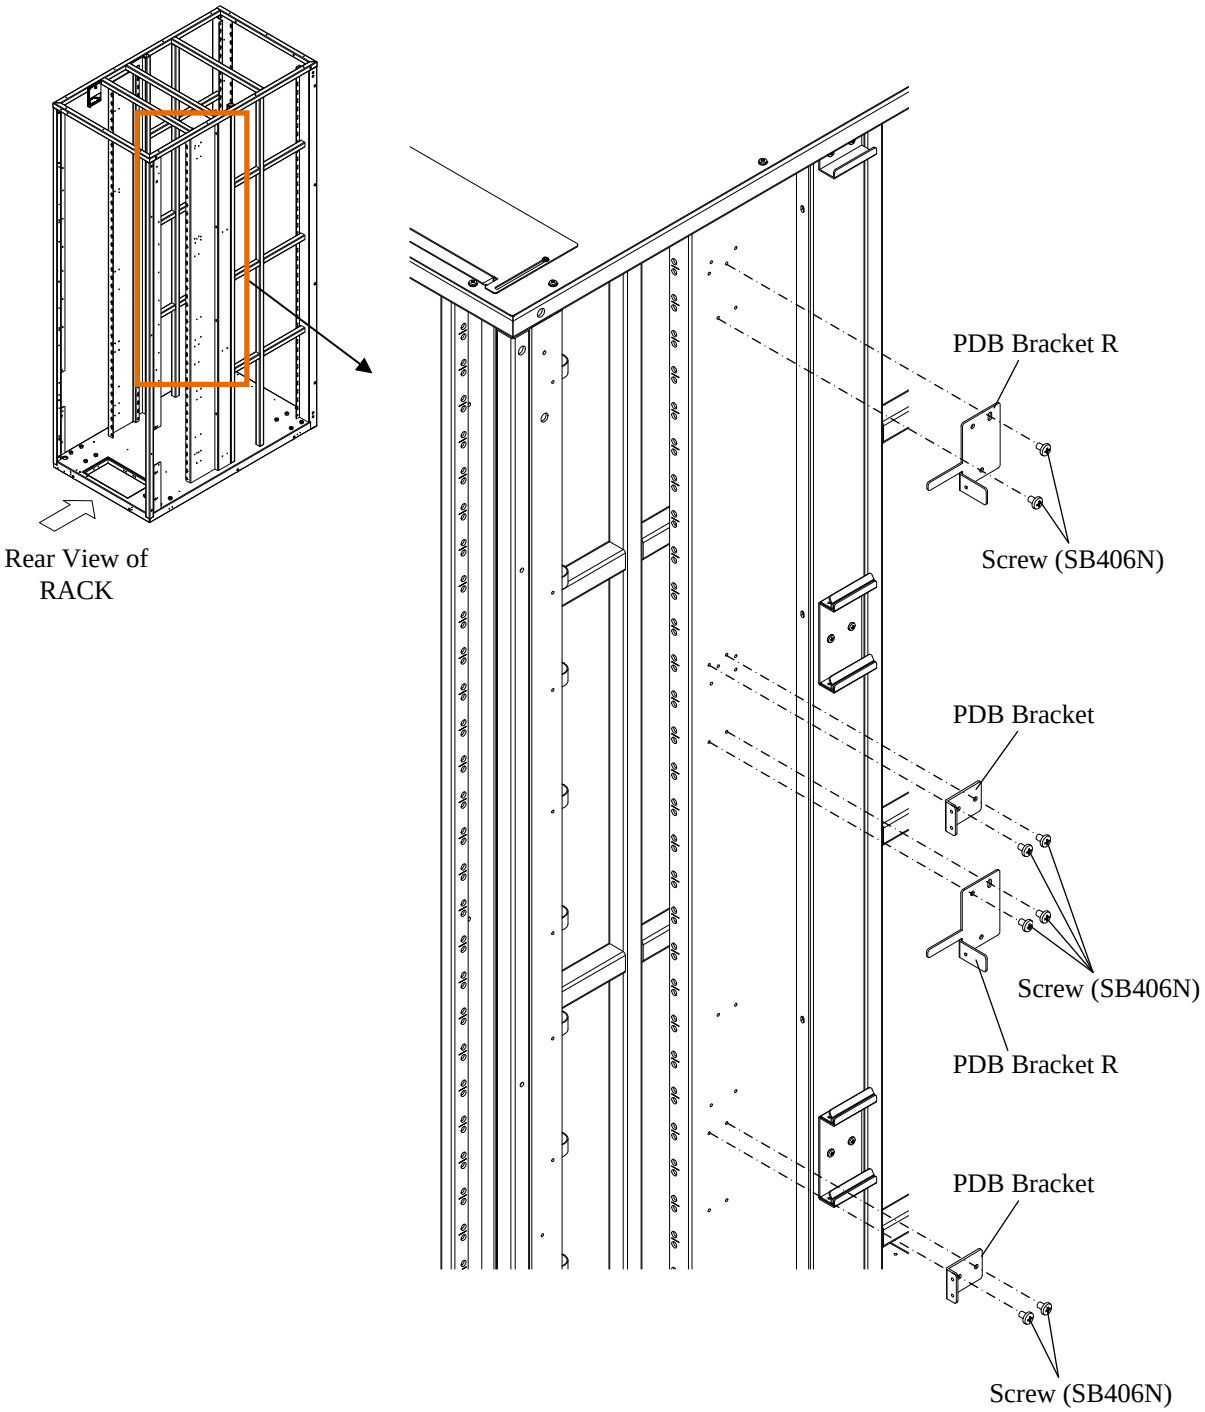

Fig. 3.20.1-2 Bracket Installation

Copyright © 2011, Hitachi, Ltd.

c. Turn the breaker of installed PDU30 off.
d. Install two PDU30s on the rear right side of the rack, and secure them with four screws.
e. Install two PDU30s on the left side in the same way as the right side.

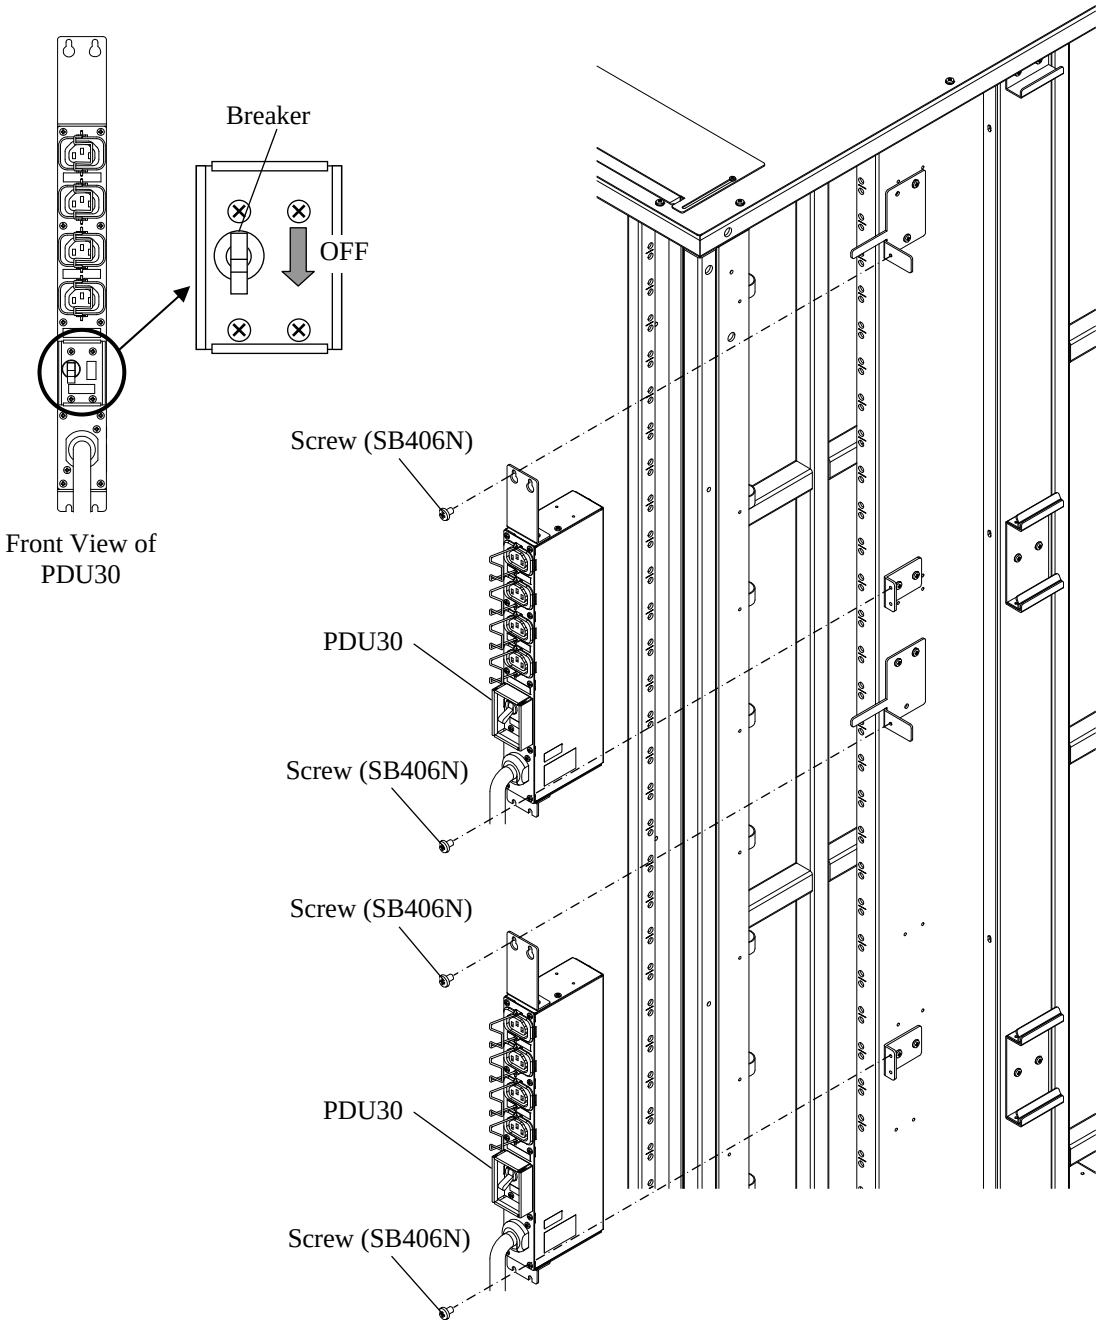

Fig. 3.20.1-3 PDU30 Installation

Copyright © 2011, Hitachi, Ltd.

3. Power Cable Fixation

   When wiring for the power cables from the round opening of the top cover

   a. Wire the power cables that come out from the opening of the top cover, and secure them with the clamp tapes.

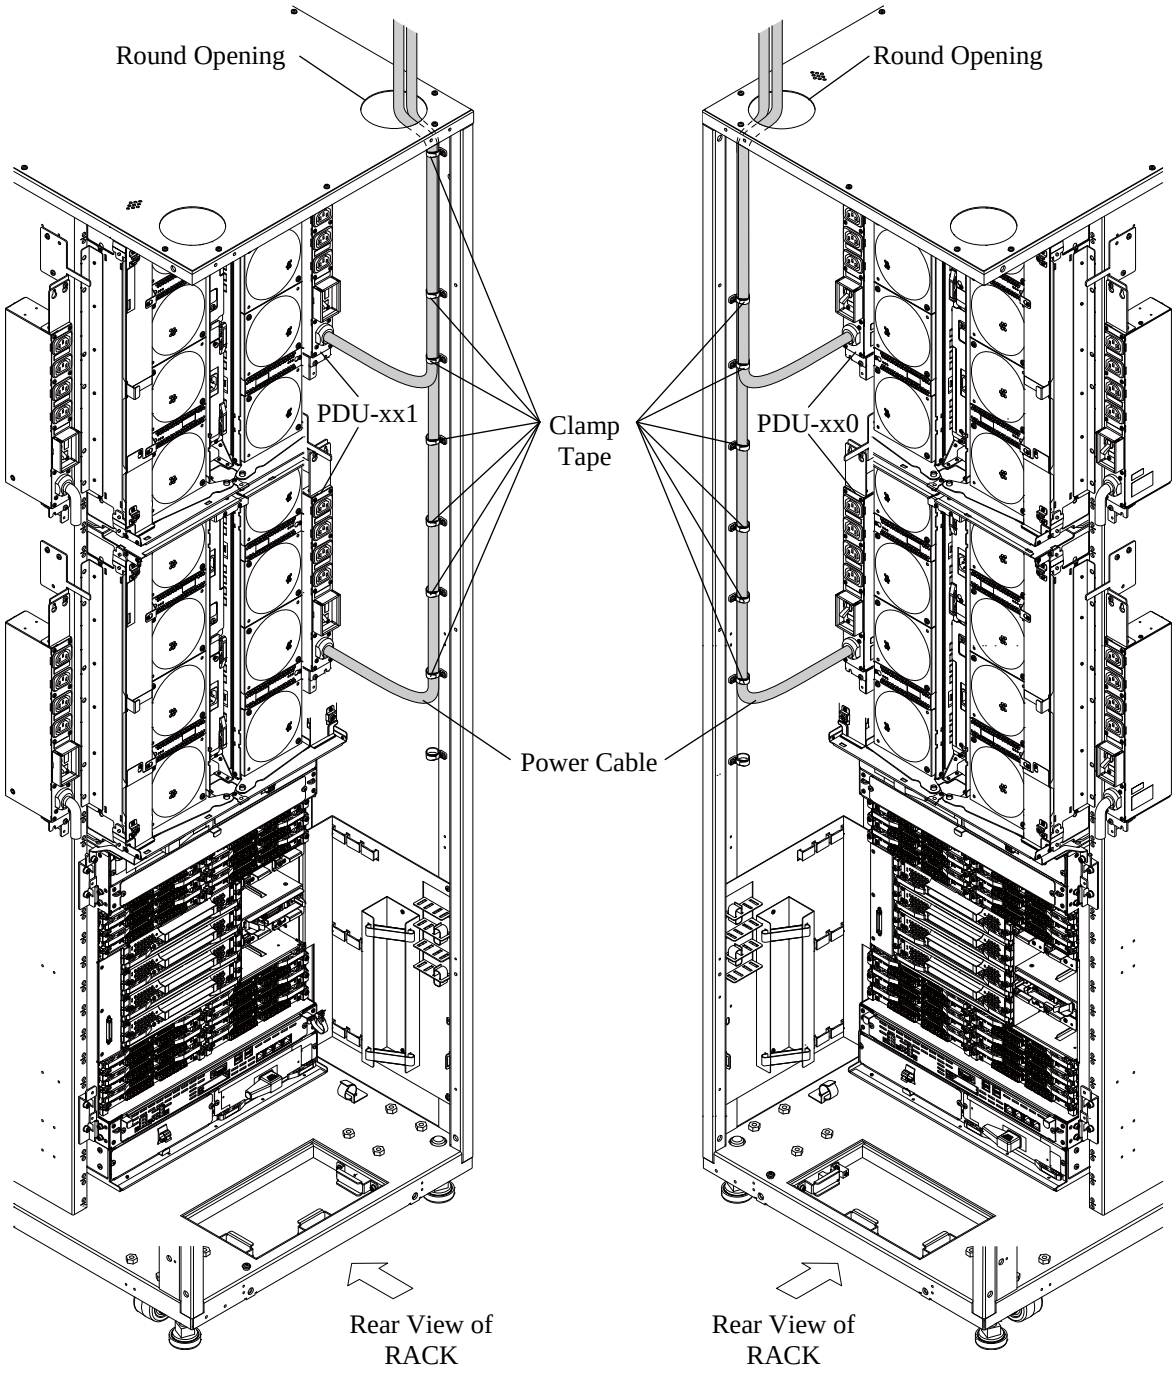

Fig. 3.20.1-4 Power Cable Wiring (Round Opening)

Copyright © 2011, Hitachi, Ltd.

When wiring for the power cables from the window opening of the top cover

a. Loosen the two screws of the top cover, and slide the window opening toward the front side.
b. Wire the power cables that come out from the opening of the top cover, and secure them with the clamp tapes.
c. Slide the window to close the opening, and retighten it with the two screws.

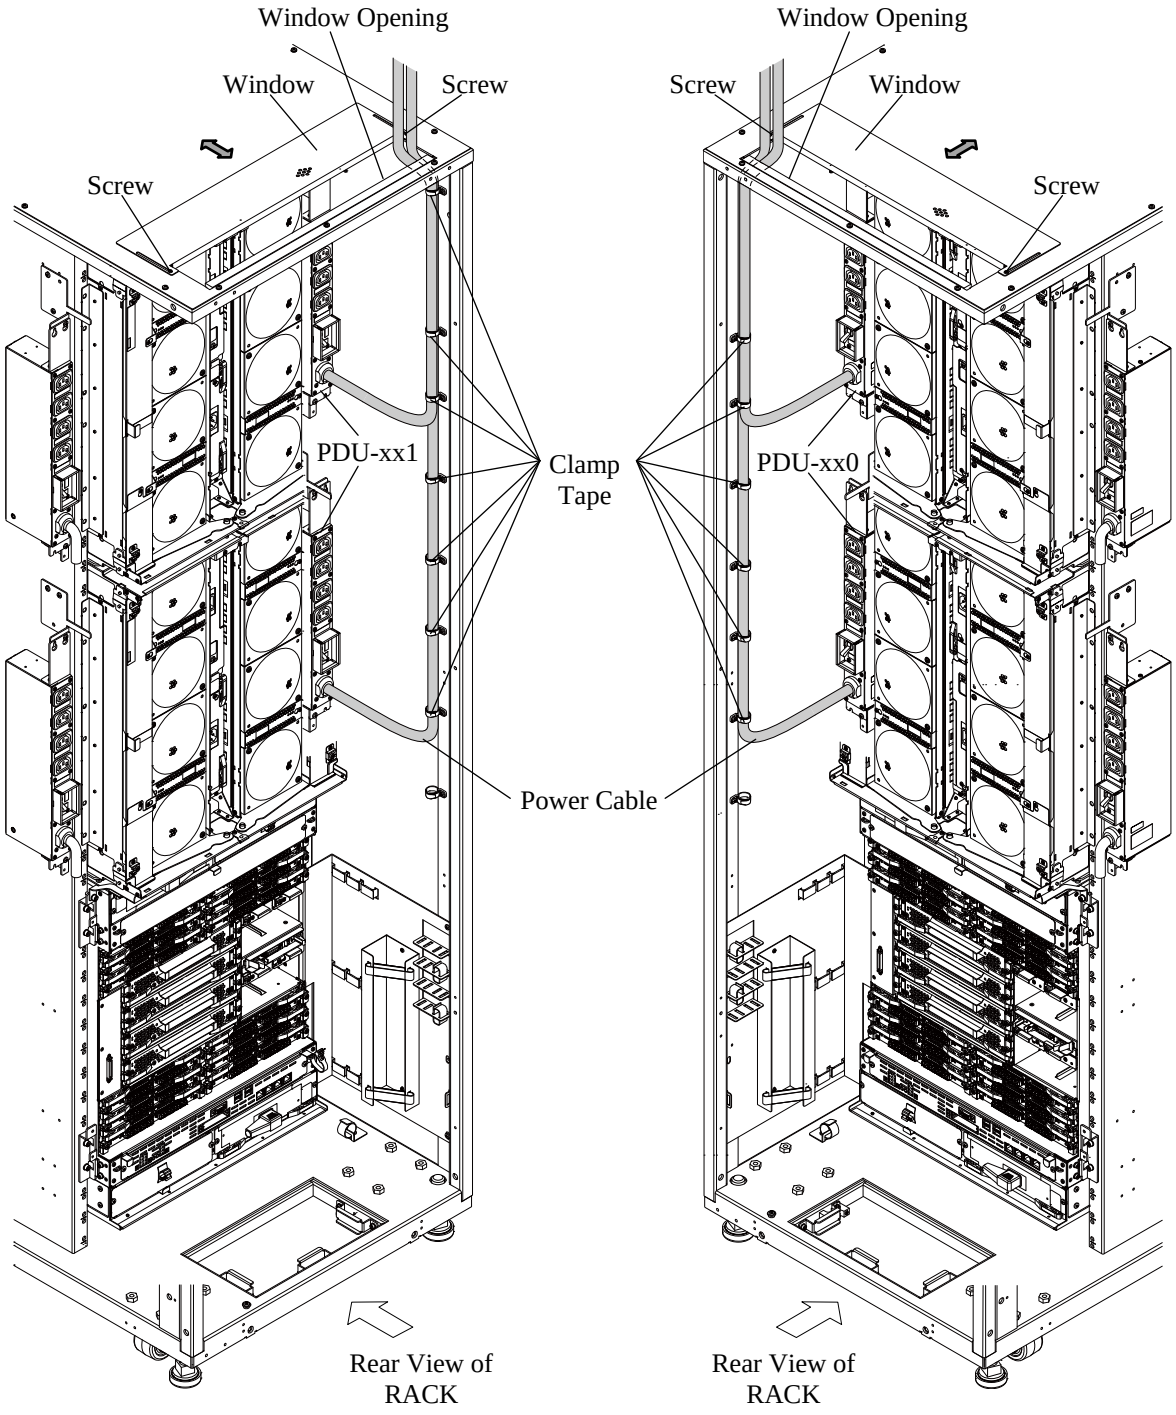

Fig. 3.20.1-5 Power Cable Wiring (Window Opening)

Blank Sheet

Copyright © 2011, Hitachi, Ltd.

4. Handling of the Nameplate
   a. The attachment of the nameplate of DKC-F710I-PDU30P is not needed.

5. Return to the working table and do the rest of the work.
   New Installation: INST02-10,
   Non-Disruptive Installation: INST02-40

Copyright © 2012, Hitachi, Ltd.

3.20.2 Installation Procedure of 30A 1-Phase PDU Kit (DKC-F710I-PDU30F)

1. Confirmation of the Additional Installation Positions
   a. The table below shows the installation position of the PDU30F depending on rack configuration. The PDU30F is necessary when the FBX is installed in the middle part ② or the upper part ③ of the rack.

Table 3.20.2-1 PDU30F Installation Position Depending on Rack Configuration

FBX Installation Position	RACK-00/10	RACK-01/11	RACK-02/12	PDU30F Installation Position
Lower Part	—			Installation of PDU30F is not necessary.
Middle Part ①				Installation of PDU30F is not necessary.
Middle Part ②	—			It is necessary to install PDU30F in the bottom of the rack.

Copyright © 2012, Hitachi, Ltd.

(Continued from preceding page)

FBX Installation Position	RACK-00/10	RACK-01/11	RACK-02/12	PDU30F Installation Position
Upper Part ①				It is necessary to install PDU30F in the top of the rack.
Upper Part ②	—			PDU30F is already installed in the bottom of the rack.
Upper Part ③	—			Installation of PDU30F is not necessary.

Copyright © 2012, Hitachi, Ltd.

2. PDU30F Installation Positions
   a. Confirm PDU30F installation positions.

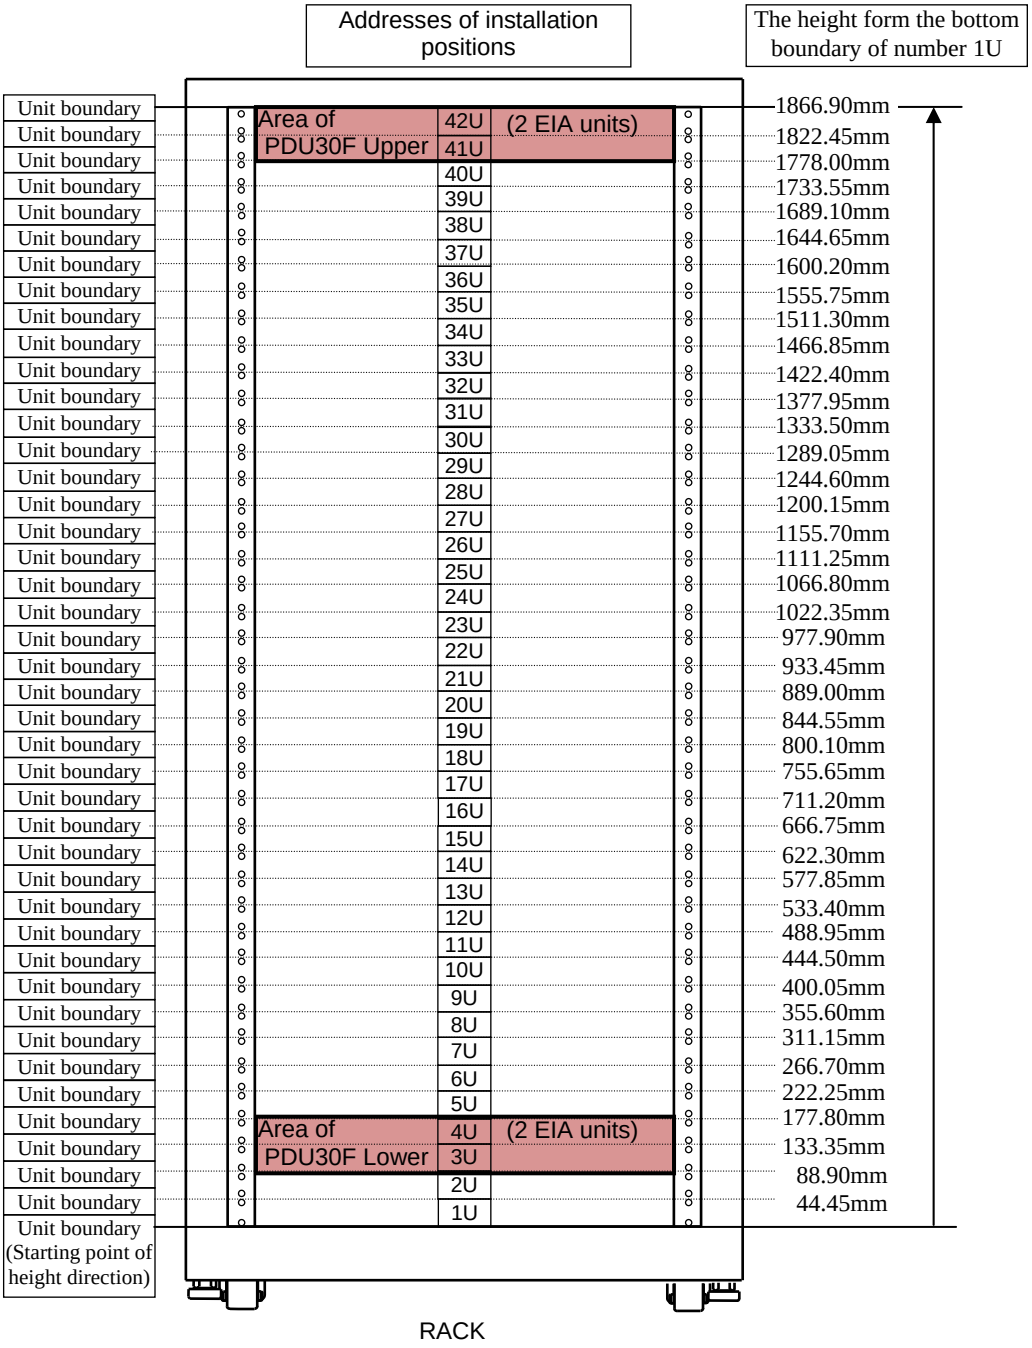

Fig. 3.20.2-1 PDU30F Installation Positions

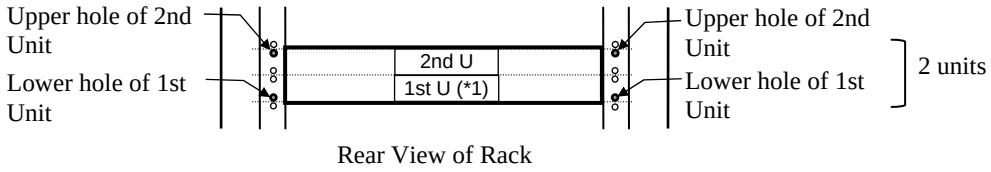
Copyright © 2012, Hitachi, Ltd.

3. Installing rack nuts
   a. Fit the two rack nuts to each of the right and left beams on the rear side of the rack frame.



Rear View of Rack

*1: Bottom Unit of Installation Position

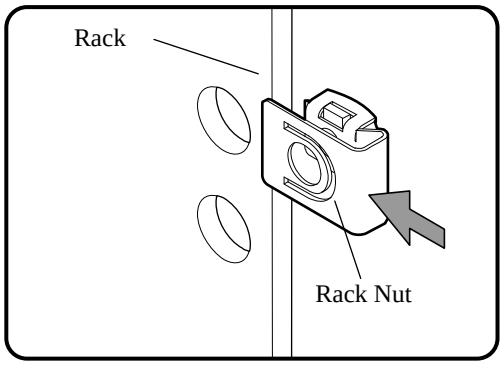


Fig. 3.20.2-2 Installation of Rack Nuts

Copyright © 2012, Hitachi, Ltd.

4. Installing Brackets 3
   a. Attach four screws (eight in total) to the Bracket 3 (two in total) temporarily.

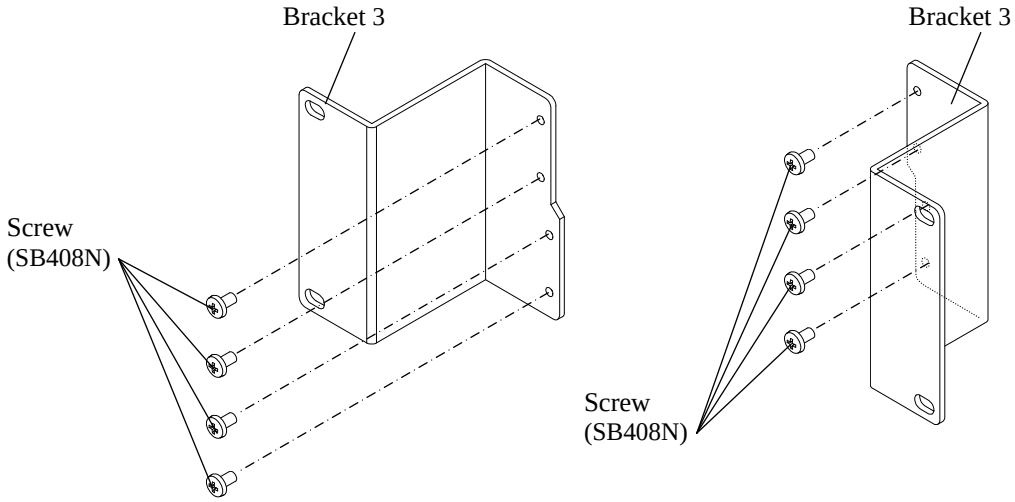

Fig. 3.20.2-3 Attaching Screws

   b. Fasten the Bracket 3 (two in total) to the rack with two screws (four in total).

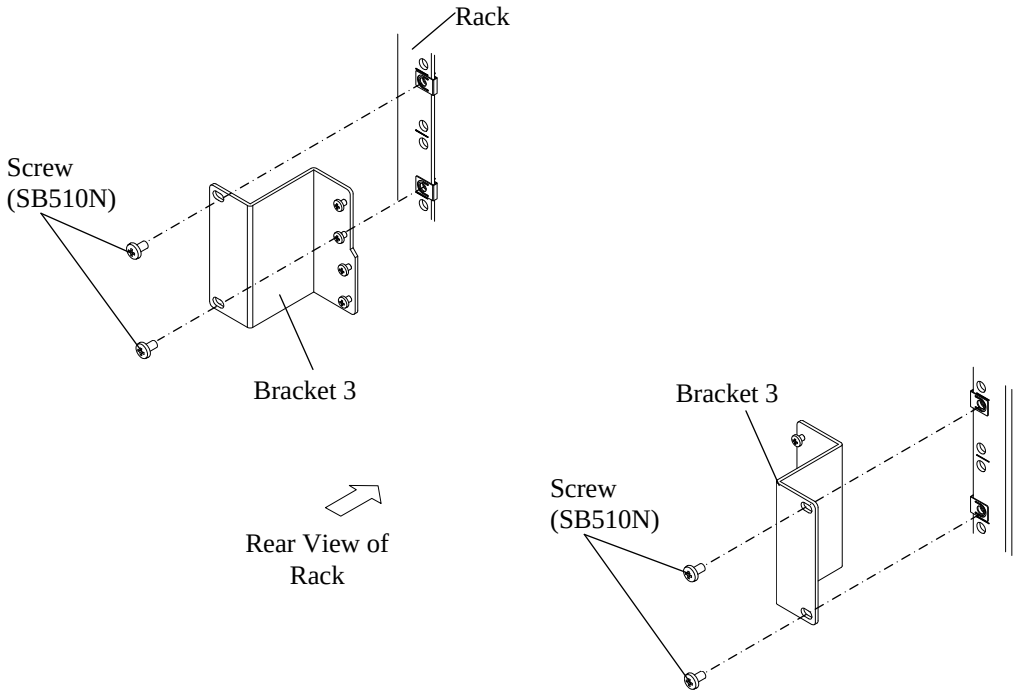

Fig. 3.20.2-4 Fastening Bracket 3

Copyright © 2012, Hitachi, Ltd.

5. PDU30 (NF) Installation

When installing the PDU30F in the top of the rack (In the case that FBX Installation Position is Upper Part ① in Table 3.20.2-1)

a. Turn off the breaker of the PDU30 (NF) to be installed.
b. Insert the upper PDU30 (NF), slightly move it to the right, and fasten it with four screws.
c. Insert the lower PDU30 (NF), slightly move it the left, and fasten it with four screws.

When installing the PDU30F in the bottom of the rack (In the case that FBX Installation Position is Middle Part ② in Table 3.20.2-1)

a. Turn off the breaker of the PDU30 (NF) to be installed.
b. Insert the lower PDU30 (NF), slightly move it the left, and fasten it with four screws.
c. Insert the upper PDU30 (NF), slightly move it to the right, and fasten it with four screws.

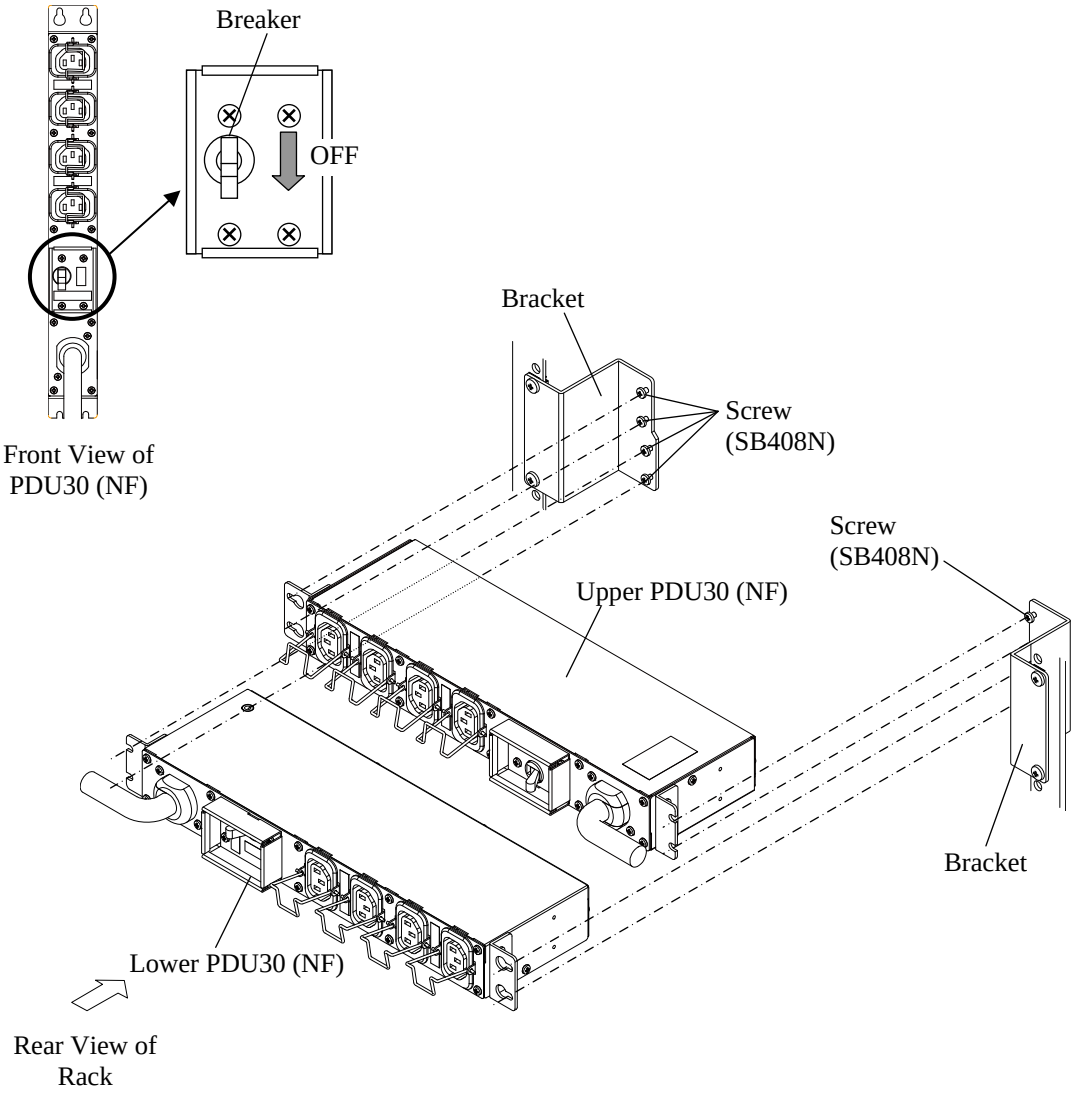

Fig. 3.20.2-5 PDU30 (NF) Installation

Copyright © 2012, Hitachi, Ltd.

6. Power Cable Fixation

6-1 In the case the PDU30F is installed in the top of the rack

<u>When wiring for the power cables from the round opening of the top cover</u>

a. Wire the power cables that come out from the opening of the top cover.

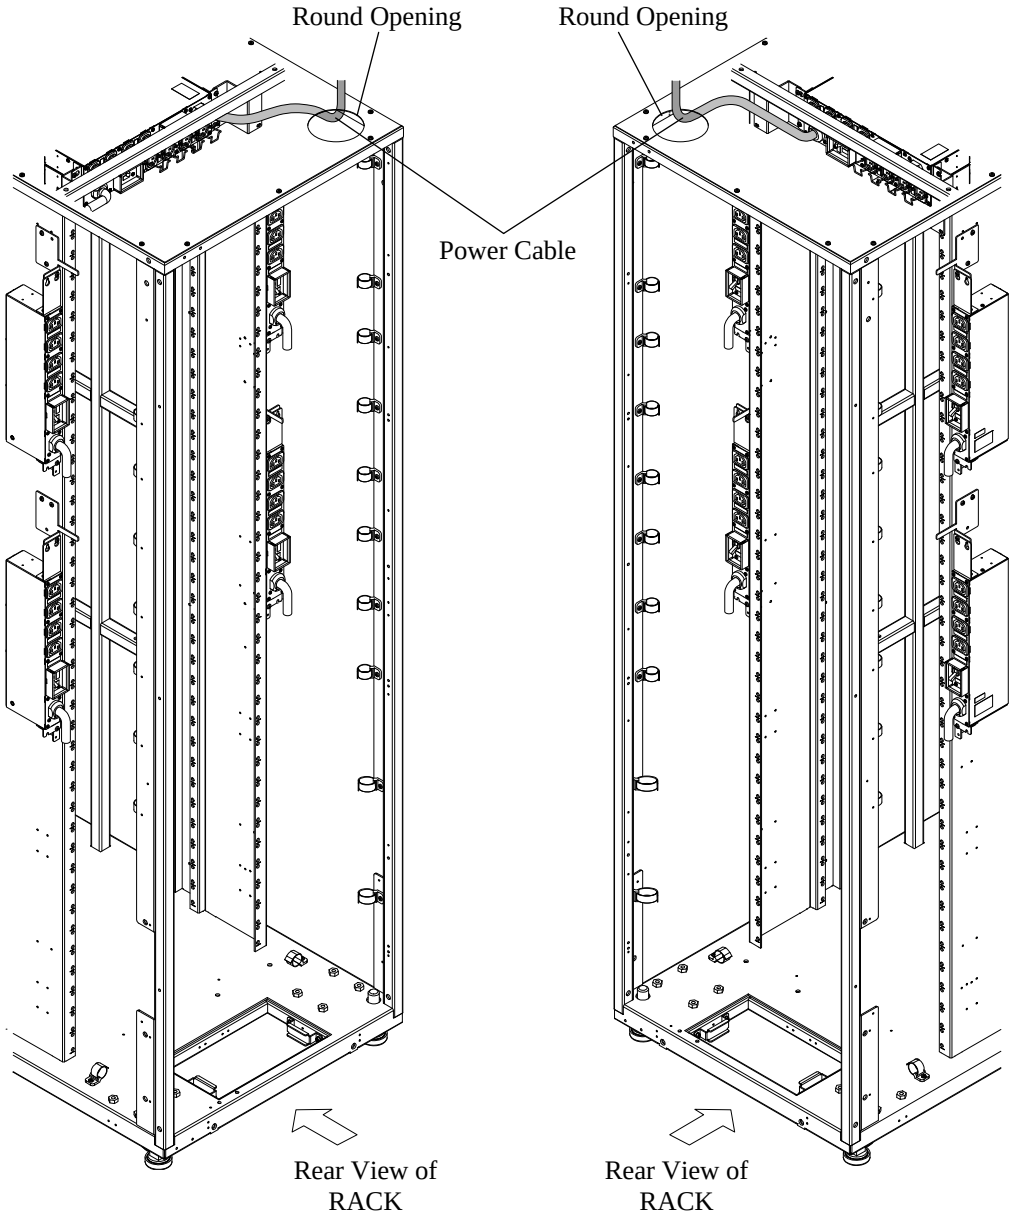

Fig. 3.20.2-6 Power Cable Wiring (When PDU30F Installed in the Top of Rack)

Copyright © 2012, Hitachi, Ltd.

When wiring for the power cables from the window opening of the top cover

a. Loosen the two screws of the top cover, and slide the window opening toward the front side.
b. Wire the power cables that come out from the opening of the top cover.
c. Slide the window to close the opening, and retighten it with the two screws.

6-2 In the case the PDU30F is installed in the bottom of the rack

<u>When wiring for the power cables from the round opening of the top cover</u>

a. Wire the power cables that come out from the opening of the top cover, and secure them with the clamp tapes.

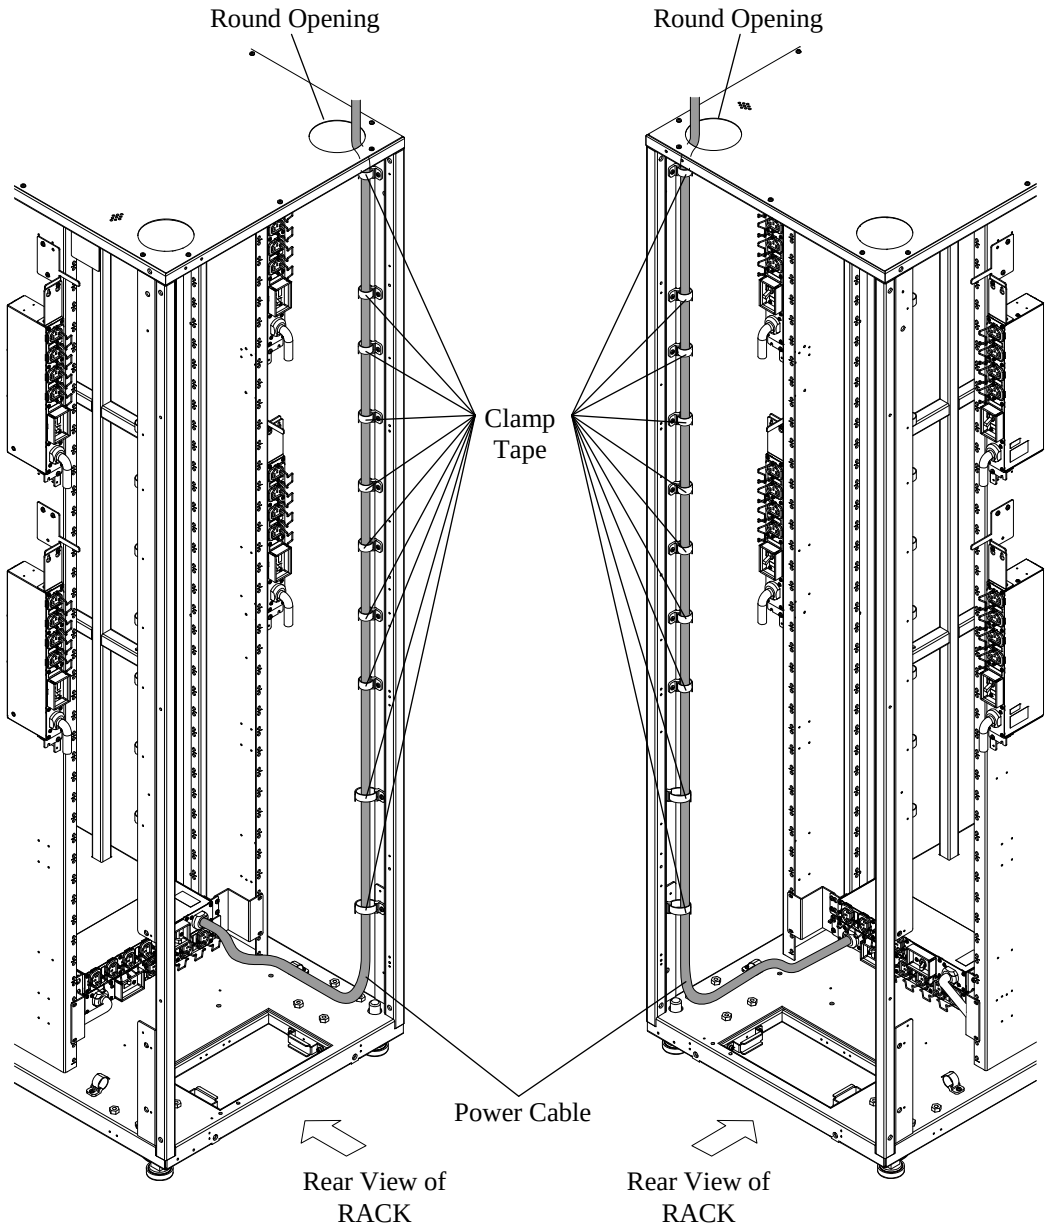

Fig. 3.20.2-8 Power Cable Wiring (When PDU30F Installed in the Bottom of Rack)

Copyright © 2012, Hitachi, Ltd.

When wiring for the power cables from the window opening of the top cover

a. Loosen the two screws of the top cover, and slide the window opening toward the front side.
b. Wire the power cables that come out from the opening of the top cover, and secure them with the clamp tapes.
c. Slide the window to close the opening, and retighten it with the two screws.

7. Handling of the Nameplate
   a. The attachment of the nameplate of DKC-F710I-PDU30F is not needed.

8. Return to the working table and do the rest of the work.
   New Installation: INST02-10
   Non-Disruptive Installation: INST02-40

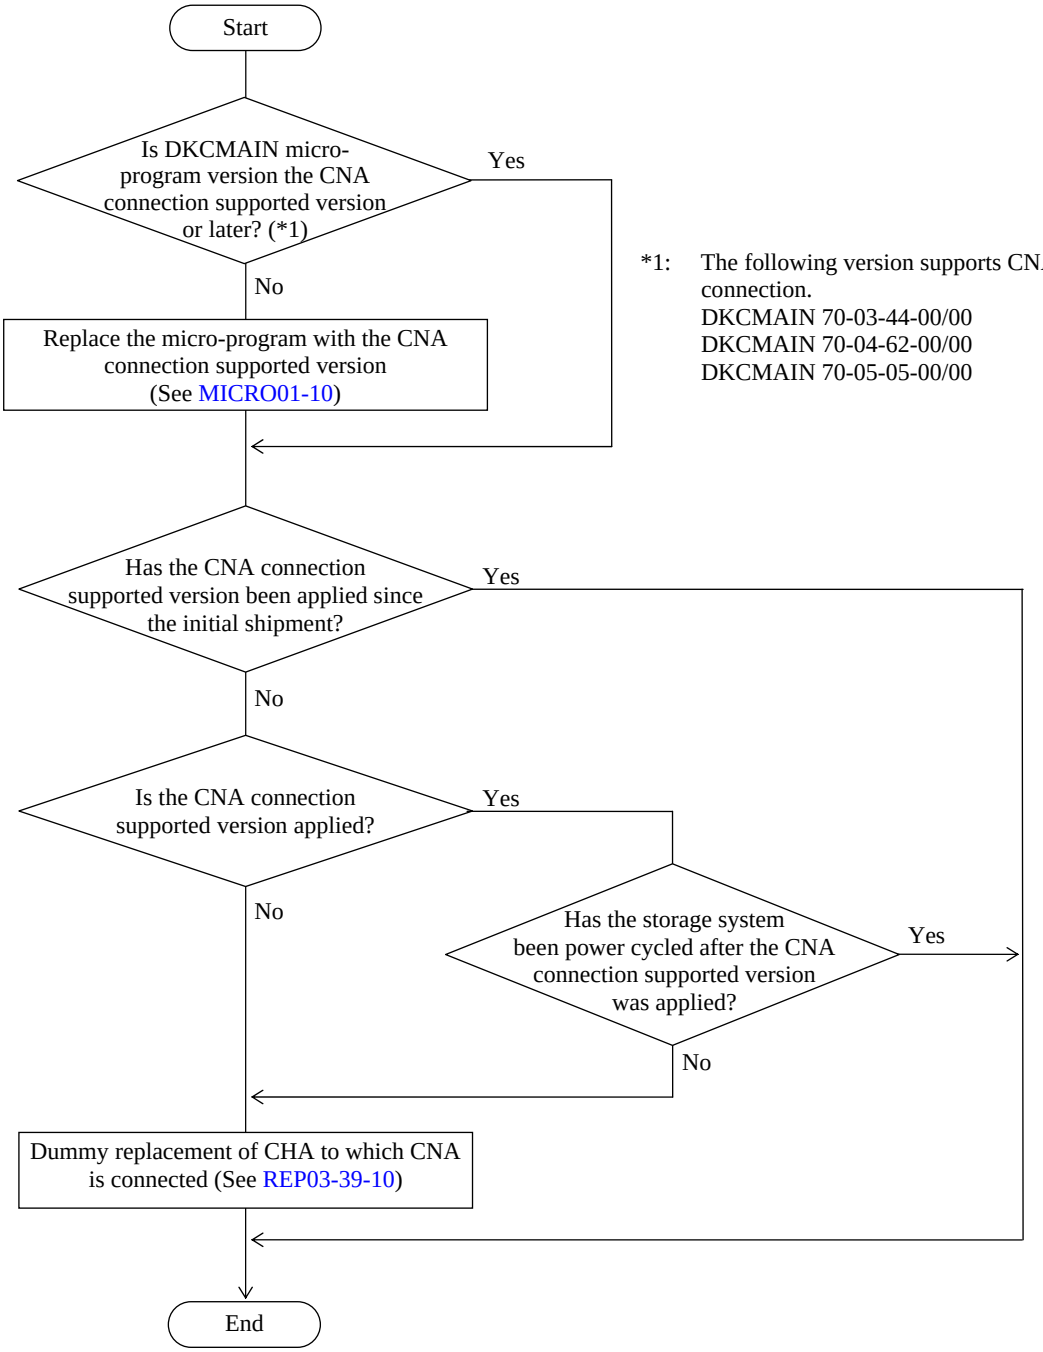
3.21 Procedure for connecting Converged Network Adapter (CNA)

3.21.1 Overview

This procedure is for changing the configuration to support Converged Network Adapter (CNA) connection when a new host is connected.

Note: If CNA is connected without performing this procedure, MP may be blocked when a host I/O is issued.

3.21.2 Operation flow



*1: The following version supports CNA connection.
DKCMAIN 70-03-44-00/00
DKCMAIN 70-04-62-00/00
DKCMAIN 70-05-05-00/00

4.1.1 Flowchart

There are three cases (① to ③) of these removal works as shown in the following table. Perform the work referring to the flowchart of each work.

Case	Option De-Installation Procedure	Page
①	When performing removal of the data/spare Drive (DKC-F710I-146KCM/300JCM/300JCS/300KCM/500HCM/ 600JCM/600JCS/900JCM/1R0HCM/1R2JCM/2R0H2M/2R0H3M/ 3R0H3M/4R0H3M/200MCM/200SAM/200SCM/400MCM/ 400SCM/800MCM/400S1M/1R6FM/3R2FM)	INST04-01-70
②	When performing removal of the DKA and ESW (DKC-F710I-SCA/ESW)	INST04-01-70
③	When performing removal of the data/spare Drive, DKA, ESW and DEV interface cable that accompanies the removal of the DKU (DKC-F710I-ESW/SCA/BUC/HBUC/UUC/HUUC/USC/HUSC/ RLEXC/HRLEXC/BFC/HBFC/UFC/HUFC/FFC/HFFC/UFEXC/ HUFEXC/FFEXC/HFFEXC/146KCM/300JCM/300JCS/300KCM/ 500HCM/600JCM/600JCS/900JCM/1R0HCM/1R2JCM/2R0H2M/ 2R0H3M/3R0H3M/4R0H3M/200MCM/200SAM/200SCM/ 400MCM/400SCM/800MCM/400S1M/1R6FM/3R2FM)	INST04-01-80

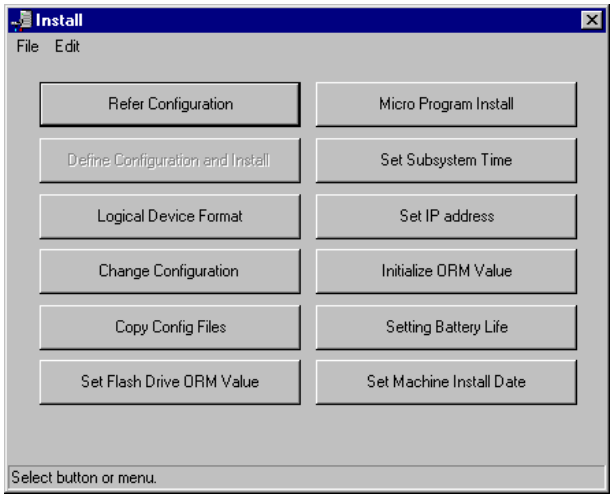
4.1.2 When performing removal of the data/spare Drive (DKC-F710I-146KCM/300JCM/300JCS/300KCM/500HCM/600JCM/600JCS/900JCM/1R0HCM/1R2JCM/2R0H2M/2R0H3M/3R0H3M/4R0H3M/200MCM/200SAM/200SCM/400MCM/400SCM/800MCM/400S1M/1R6FM/3R2FM)

1. Setting up the New Device Structure Information

(1) <Mode Change>
Change the mode to Modify Mode.
Select (CL) [Install].

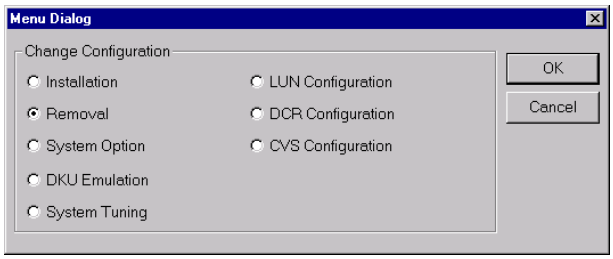
---

(2) <Start the 'Menu Dialog' screen>
Select (CL) [Change Configuration].



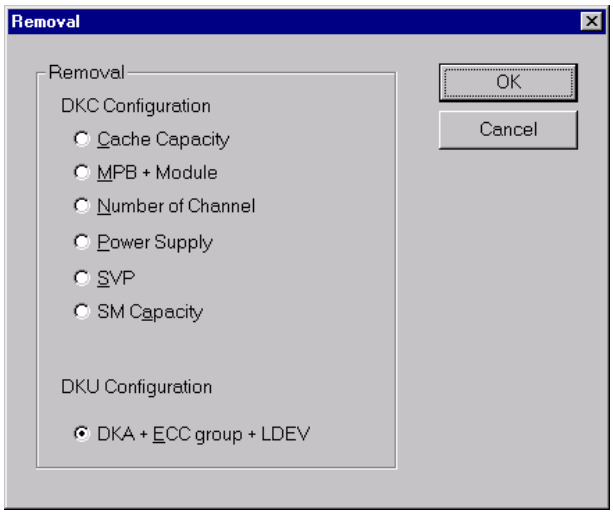
---

(3) <Start Device Structure Setup screen>
Select (CL) [Removal] in the 'Menu Dialog' dialog box and select (CL) [OK].



Copyright © 2010, 2011, Hitachi, Ltd.

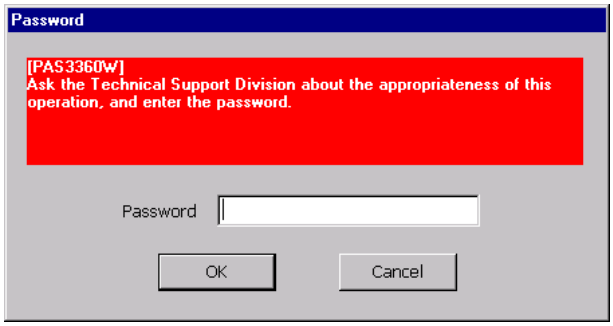
(4) <Selecting a part to be changed>
Select (CL) [DKA + ECC group + LDEV] and select (CL) the [OK].



(5)
Select (CL) [No] in response to "Removal of features may cause fatal damage to subsystem. Check that any features be removed are not required by host operations. Data will be lost from any ECC group that are removed. Do you want to stop this process?".

Note: The Alias information which is set to the LDEV included in the ECC to remove is also deleted at the same time. When the Alias is set, migrate the Alias information to another LDEV before removal or reset it after removal.

(6) <Input password>
Enter the password and select (CL) [OK].

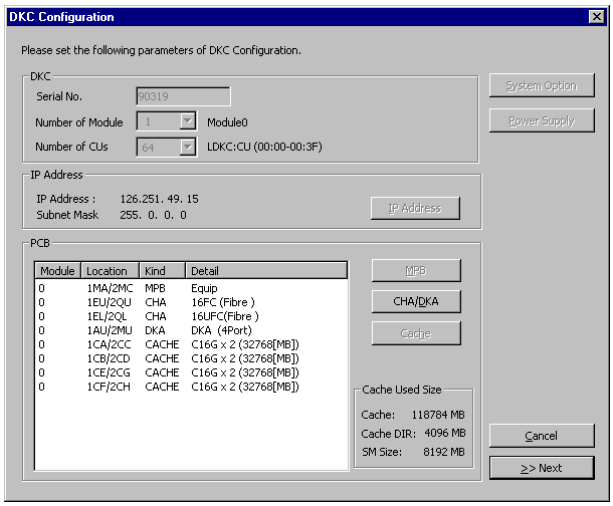


⚠ CAUTION

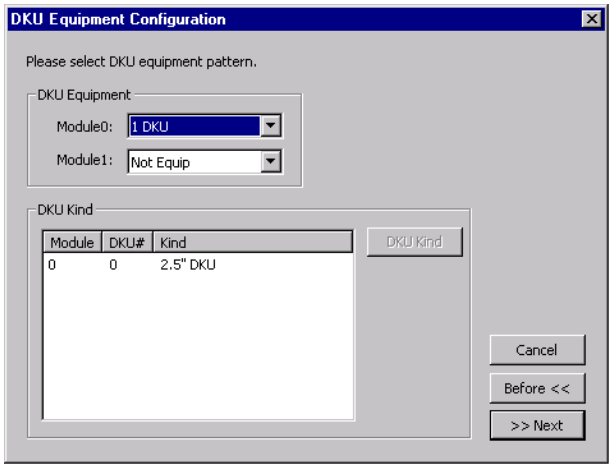
This is a special (exceptional) operation that can cause a serious failure such as a system down or a data loss if a wrong part to be removed is selected, and requires an input of a password. Ask the technical support division about the appropriateness of the operation, and input the password after getting an approval of executing the operation.

Copyright © 2010, 2011, Hitachi, Ltd.

(7) <Updating the configuration information>
Select (CL) the [>>Next] in the 'DKC Configuration' window.
Go to Step (8).

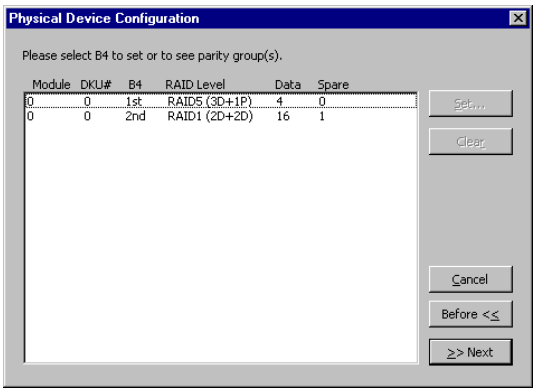


(8) <Setting the DKU frame>
Select (CL) the [>>Next] in the 'DKU Equipment Configuration' window.
Go to Step (9).



Copyright © 2010, Hitachi, Ltd.

(9) <Changing the drive configuration information>
Define the drive configuration according to the 'Physical Drive Configuration' window.
The detailed procedure is explained below.
[Set...]: Defines a parity group or a spare disk. The routine goes to step (9)-1.
[Clear]: Clears the setting of the B4.



After all the settings are made, select (CL) the [>>Next]. Go to step (10).
When the [Before<<] is selected (CL), the window is returned to step (8).

• Relation between B4 and HDU Location (Refer to LOC02-40 ~ 50 for Location.)

B4	Location	
	DKU	HDU
1st	DKU-00	HDU-000, 001, 002, 003

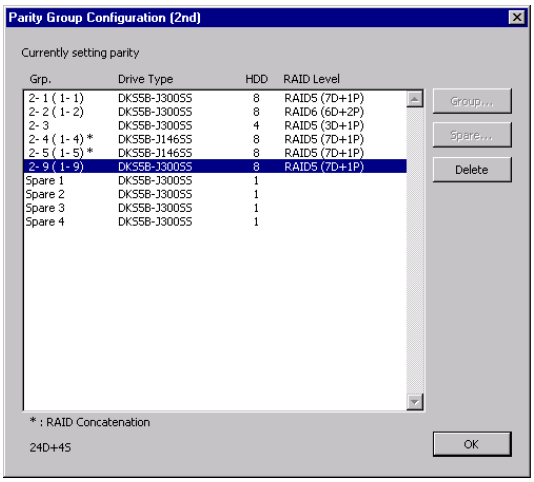
(9)-1 <Defining the parity group>

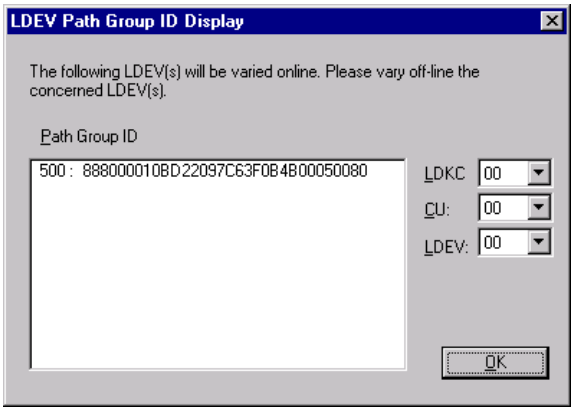
Select (CL) the group to be removed or spare disk, and then select (CL) the [Delete] in the 'Parity Group Configuration' dialog box.
After the setting is made, select (CL) the [OK]. The routine is returned to Step (9).

Grp*: A parity group for which the RAID concatenation is set.



(10) <Display LDEV Path Group ID>

When some of the LDEVs to be uninstalled are connected to hosts because a Vary On-line operation was performed, the "LDEV Path Group ID Display" window appears.



LDKC/CU/LDEV:

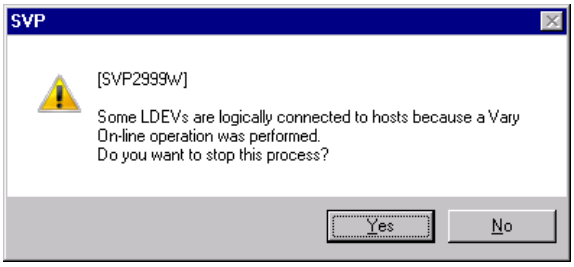
Only the LDEVs to be installed, which are connected to hosts, are displayed

Path Group ID:

List of Path Group IDs of the hosts connected to the LDEVs to be uninstalled. Depending on the host, the LPAR information may be registered in the 4th byte of the Path Group ID (7th and 8th characters on the window. "01" on the window above), and the host serial number may be registered in the 5th and 6th bytes (9th to 12th characters on the window. "0BD2" on the window above).

Note: The LPAR information and the HOST serial number may not be registered respectively in the 4th byte and the 5th to 6th byte of Path Group ID depending on the connected host OS. When you cannot specify the target HOST by Path Group ID, execute the Vary Offline operation again from all HOSTs connected to the LDEV to be uninstalled.

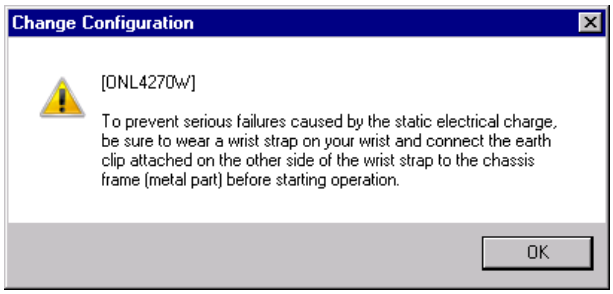
After clicking [OK], click [Yes] for the message, "Some LDEVs are logically connected to hosts because a Vary On-line operation was performed. Do you want to stop this process?" After that, disconnect all the LDEVs to be uninstalled from the host and perform the uninstallation again.



Copyright © 2010, Hitachi, Ltd.

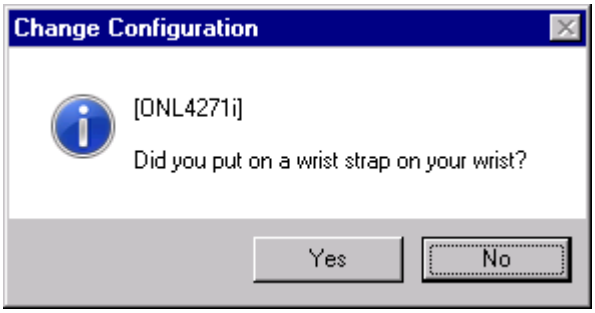
(11) <Wear a wrist strap>

Select (CL) [OK] in response to “To prevent serious failures caused by the static electrical charge, be sure to wear a wrist strap on your wrist and connect the earth clip attached on the other side of the wrist strap to the chassis frame (metal part) before starting operation.”.



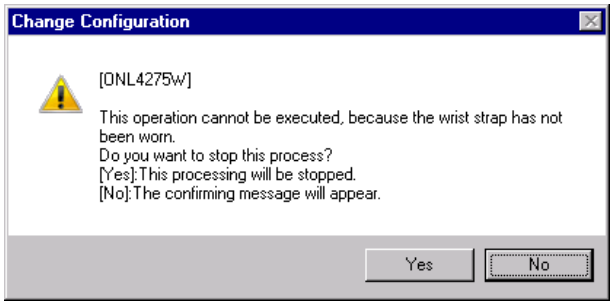
(11)-1 <Confirm wearing wrist strap>

In response to a message, “Did you put on a wrist strap on your wrist?”.
Select [Yes] when wrist strap is on your wrist.
Select [No] when there is no wrist strap on your wrist.
When the [No] is selected, go to Step (11)-2.



(11)-2

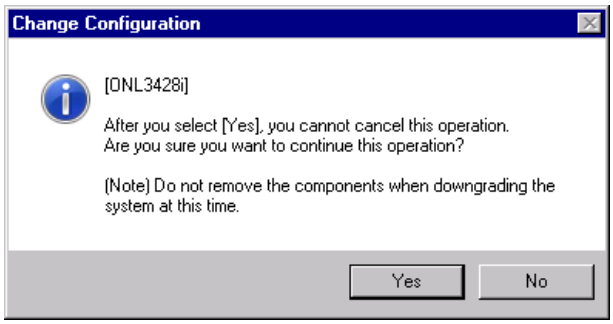
In response to a message, “This operation cannot be excuted, because the wrist strap has not been worn. Do you want to stop this process?
[Yes]: This processing will be stopped.
[No]: This confirming message will appear.”
When [Yes] is selected (CL), the routine is returned to Step (2) on page INST04-01A-10.
When [No] is selected (CL), returned to Step (11).



Copyright © 2010, Hitachi, Ltd.

(12) <Starting the removal>

In response to a message, “After you select [Yes], you cannot cancel this operation. Are you sure you want to continue this operation? (Note) Do not remove the components when downgrading the system at this time.” select (CL) [Yes].



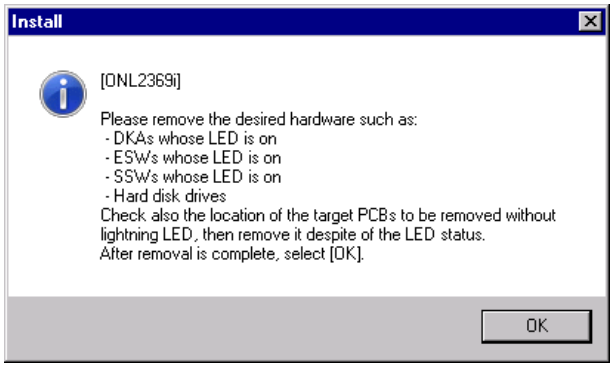
When the [No] is selected, the routine is returned to step (2) on page INST04-01A-10.

---

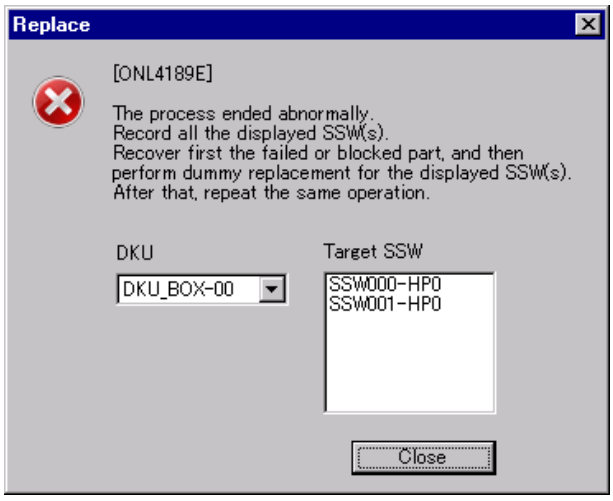
(13) <Removing the hardware>

Do not push the [OK] button at this time yet. A message, “Please remove the desired hardware such as:
- DKAs whose LED is on
- ESWs whose LED is on
- SSWs whose LED is on
- Hard disk drives

Check also the location of the target PCBs to be removed without lightning LED, then remove it despite of the LED status. After removal is complete, select [OK].” is displayed.



Perform the dummy replacement of the displayed SSW(s) when the window is displayed. Select the DKU list and record the target SSW(s) because two or more DKU might be listed.
Select (CL) [Close] button and perform the dummy replacement of the target SSW(s).



Refer to the subsystem configurations. (Refer to INST05-510)
And retry the operation after completing the dummy replacement of the SSW(s) if removal was not completed.

2-2 De-Installation of Drive

2-2-1 In case of 3.5 inch /2.5 inch drive

> Notice: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

To increase drives in DKU, opening the FAN door of DKU is necessary.
Though there are four FAN doors per DKU, only one door can be opened at once.
Therefore, the FAN door can be opened from ① to ④ order by repeating the procedure from a to h.

a. Loosen the two screws and open the FAN door.

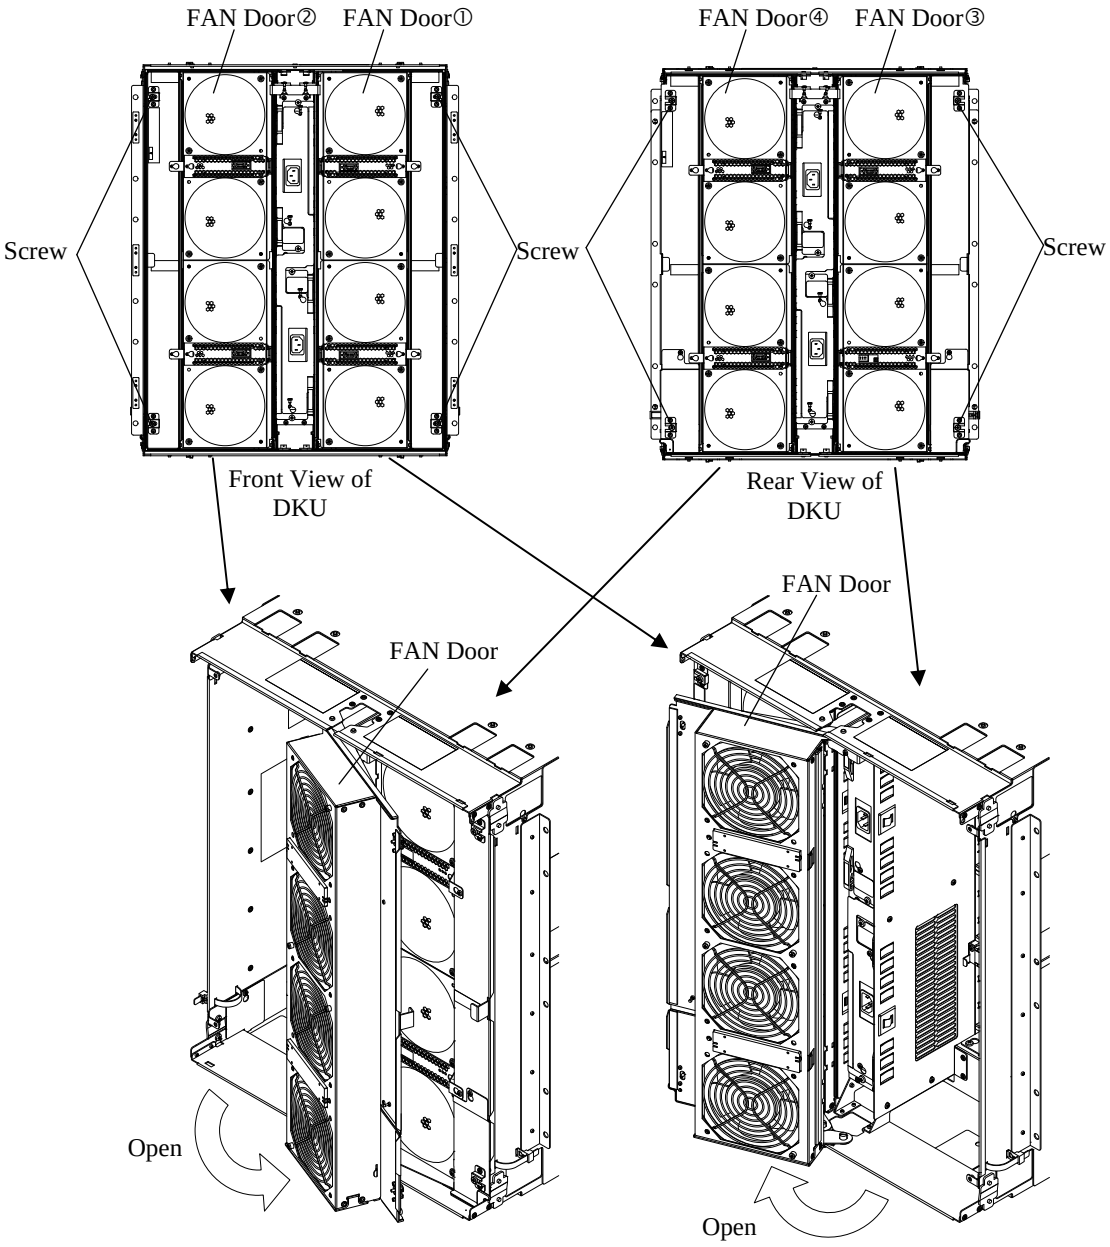

Fig. 4.1.2-7 Opening of FAN Door

Copyright © 2010, Hitachi, Ltd.

b. Check that the Shut Down LED on the HDDPWR corresponding to drive (HDD/SSD) is turned on. (It should be RED.) Refer to Fig. 4.1.2-8 or 4.1.2-9.

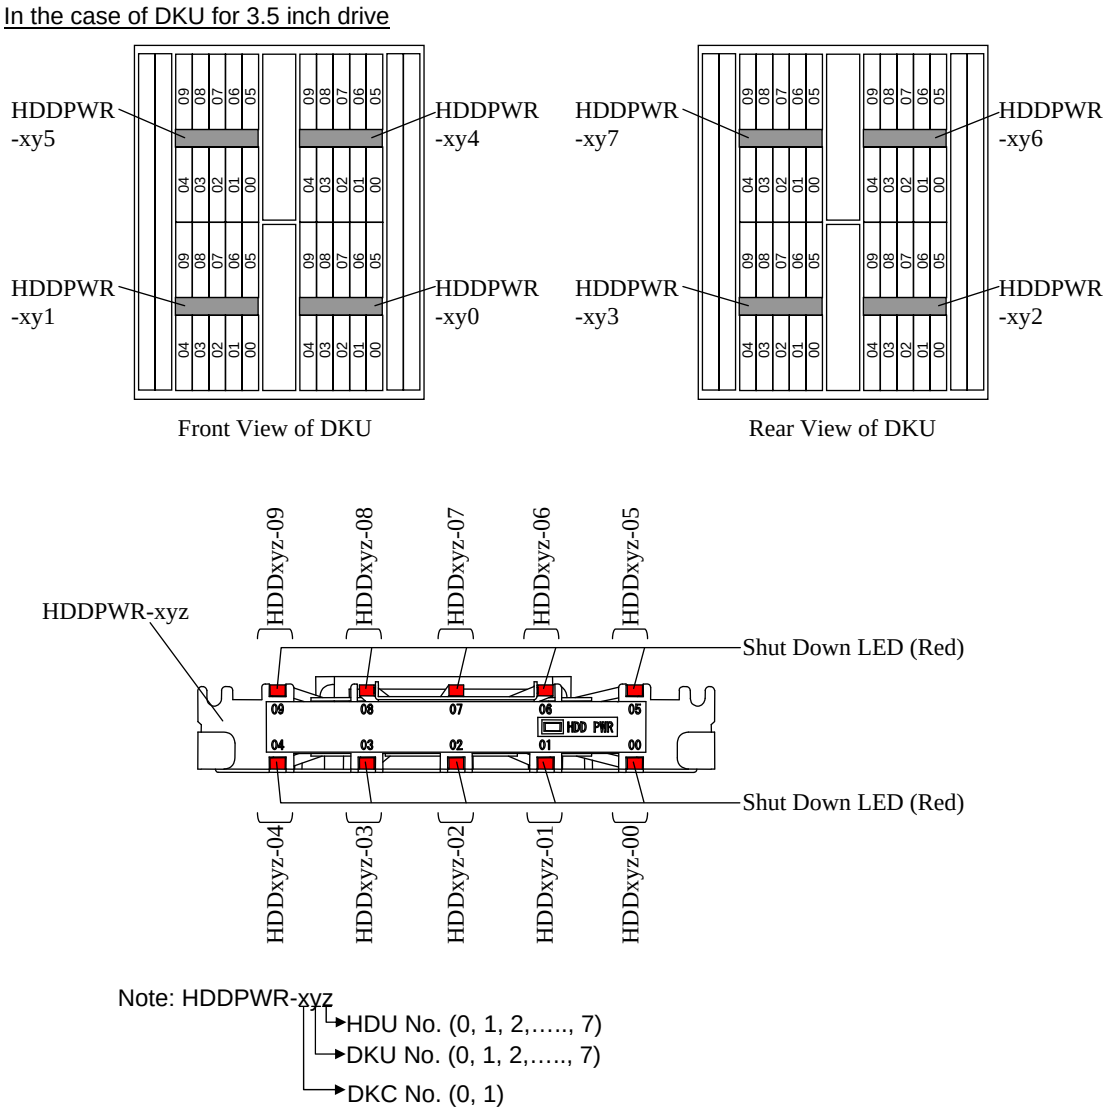

Fig. 4.1.2-8 Checking of Shut Down LED (In the case of DKU for 3.5 inch drive)

Copyright © 2010, Hitachi, Ltd.

In the case of DKU for 2.5 inch drive

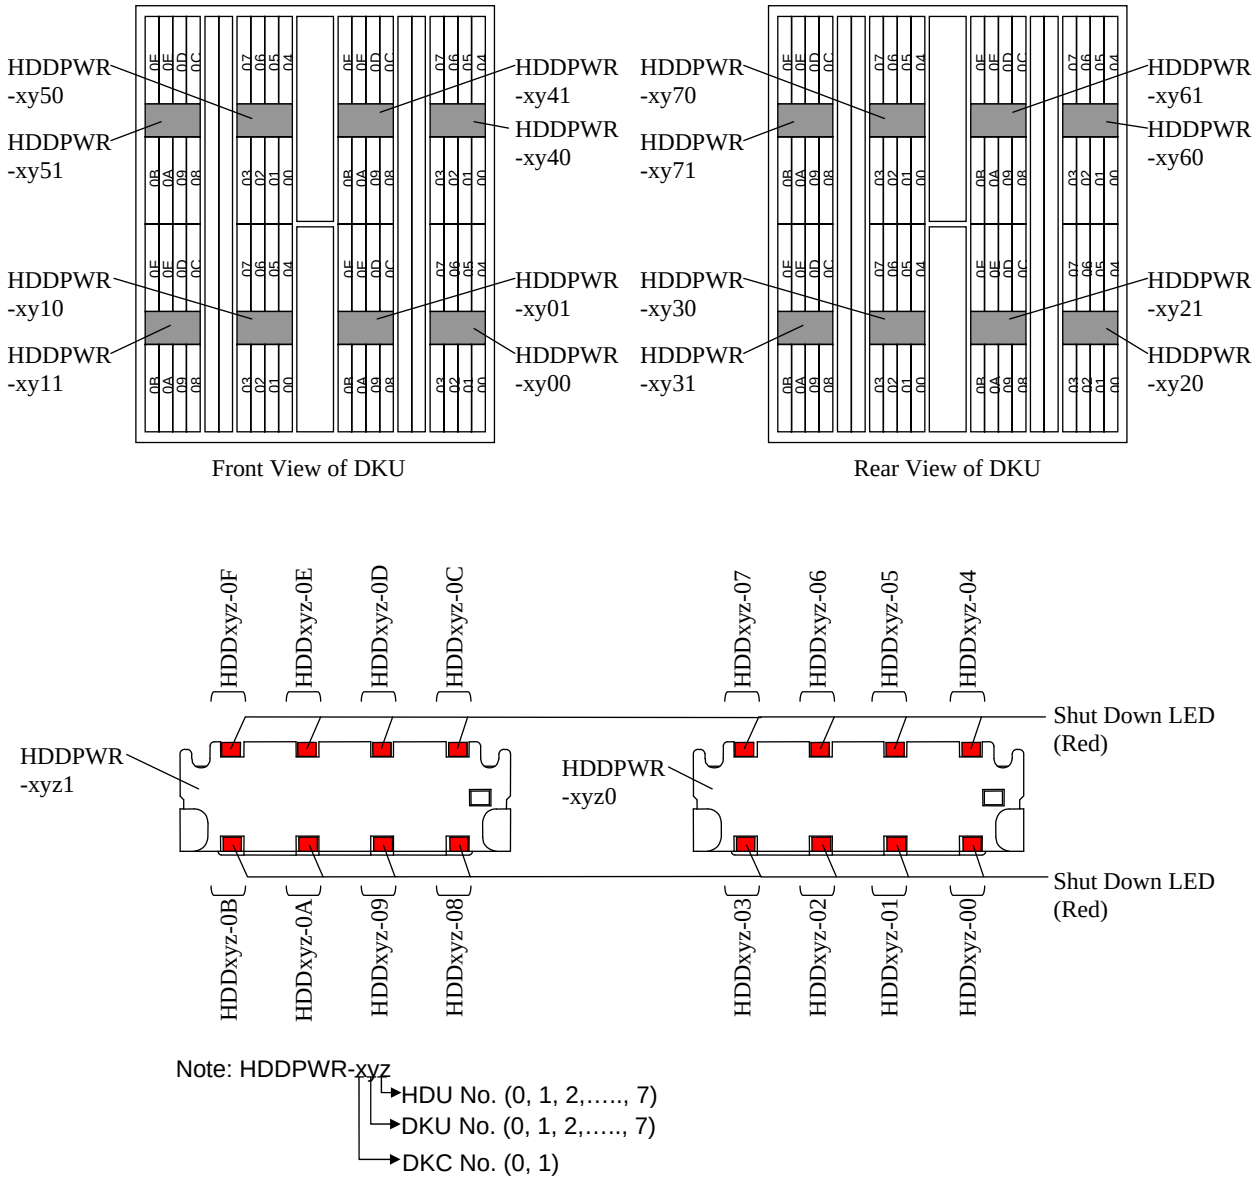

Fig. 4.1.2-9 Checking of Shut Down LED (In the case of DKU for 2.5 inch drive)

Copyright © 2010, Hitachi, Ltd.

Note: Since the HDD is a precision component, handle it very carefully not to apply a vibration or shock to it.

In the case of DKU for 3.5inch drive

c. Push up the stopper of drive, and bring the handle down. Don't pull the handle during this process.
d. Push down the handle.
e. Pull out the drive.
f. Fig. 4.1.2-11 illustrates the case of wrong procedure.

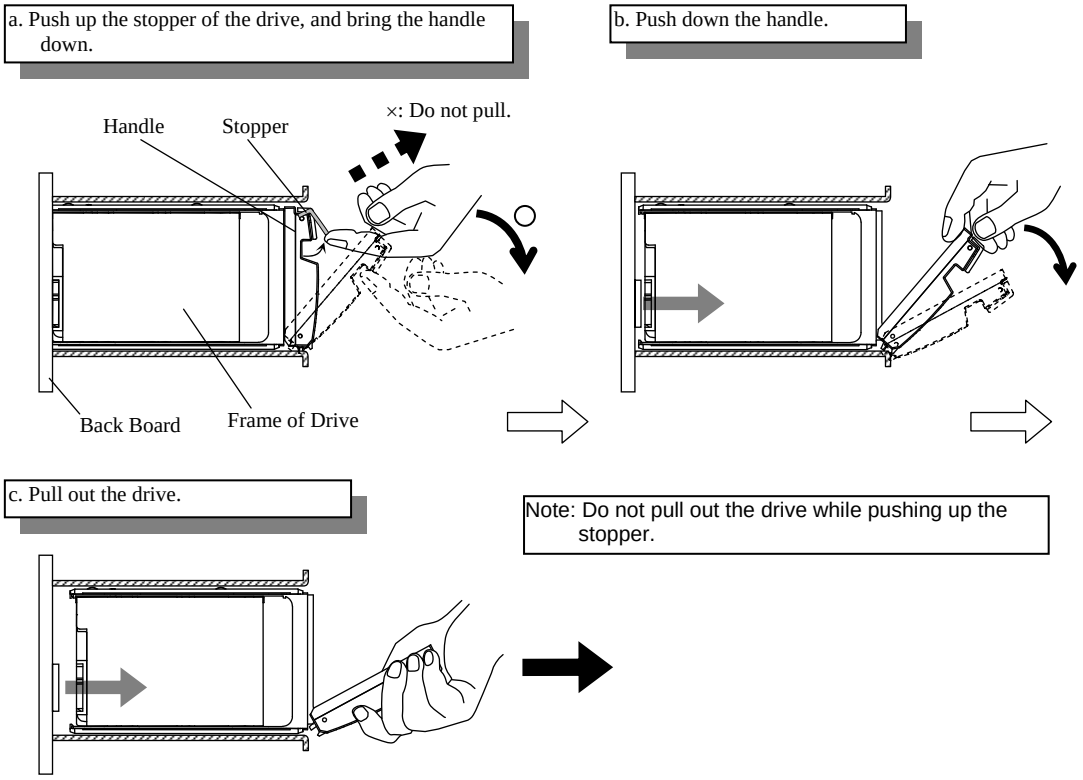

Fig. 4.1.2-10 Removal of Drive

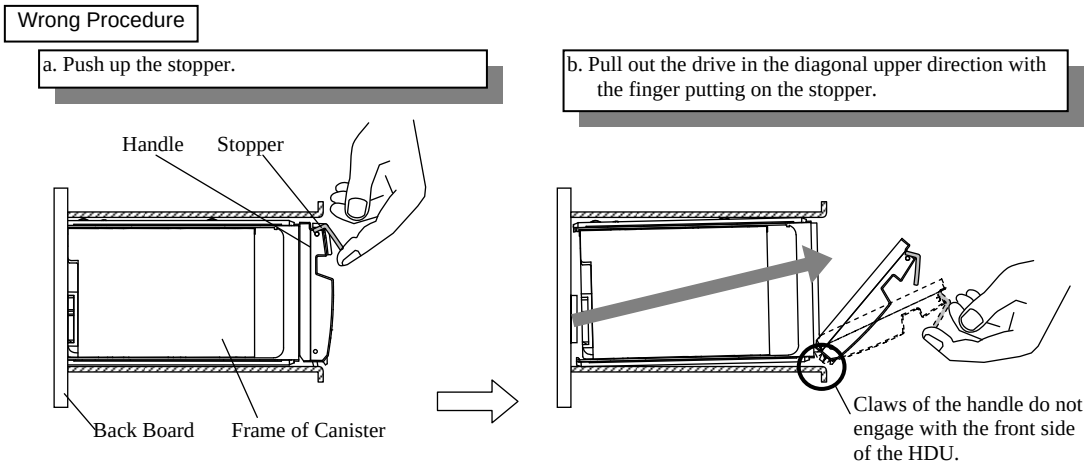

Fig. 4.1.2-11 Removal of Drive (Wrong Procedure)

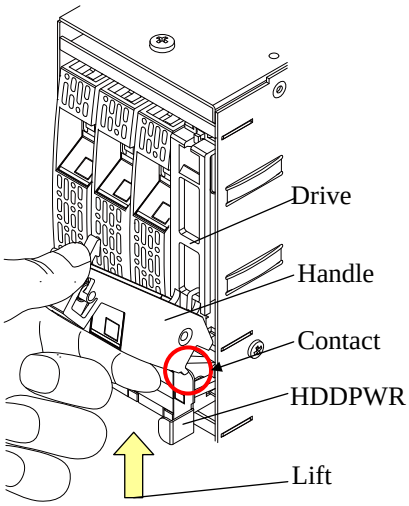
Copyright © 2010, Hitachi, Ltd.

In the case of DKU for 2.5inch drive



Instruction for the insertion and removal of the 2.5-inch drive:

The upper part of HDDPWR might come in contact with the lower part of the drive, and it becomes an obstruction of the insertion and removal at the time of the 2.5-inch drive insertion and removal. In this case, avoid the HDDPWR by lifting the drive lightly.

c. Push the stopper of drive, and bring the handle down. Don't pull the handle during this process.
d. Push down the handle.
e. Pull out the drive.
f. Fig. 4.1.2-13 illustrates the case of wrong procedure.

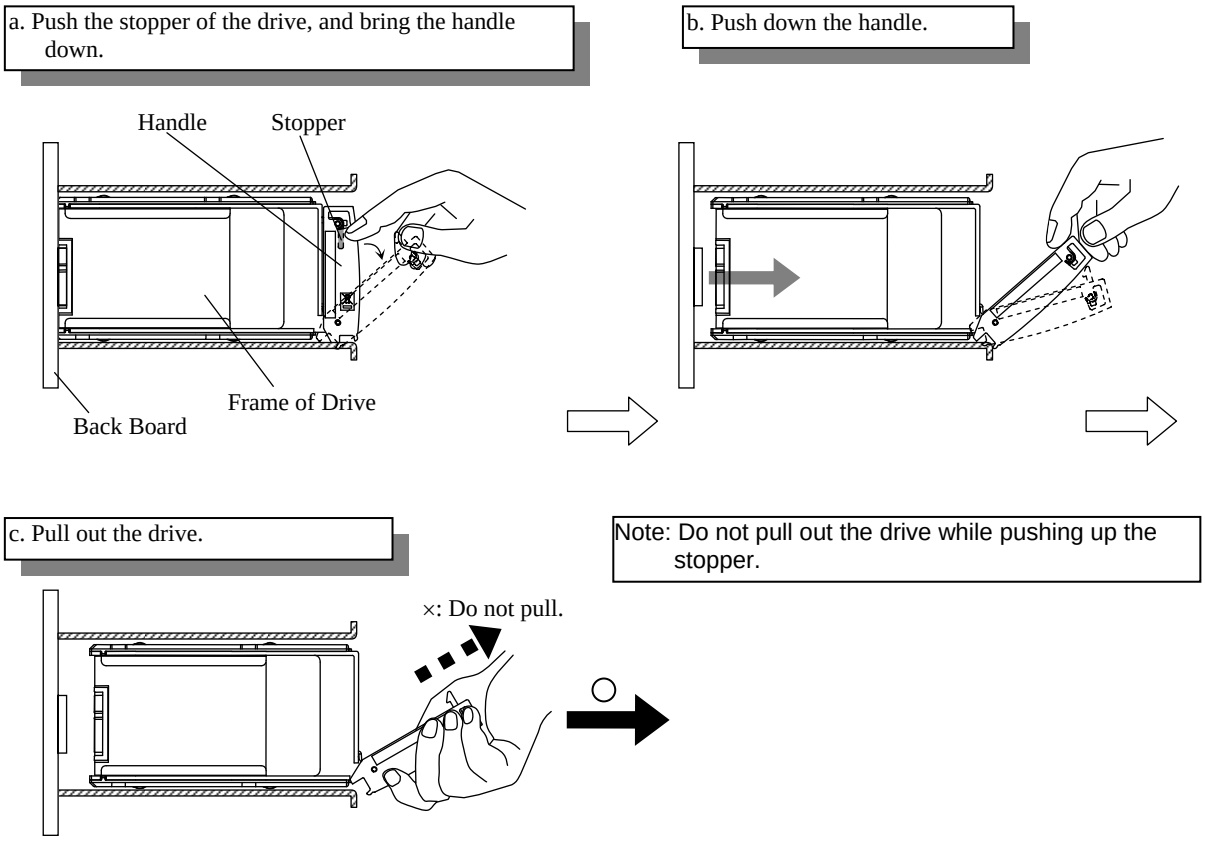


Fig. 4.1.2-12 Removal of Drive

g. Insert the dummy canister to the HDU.

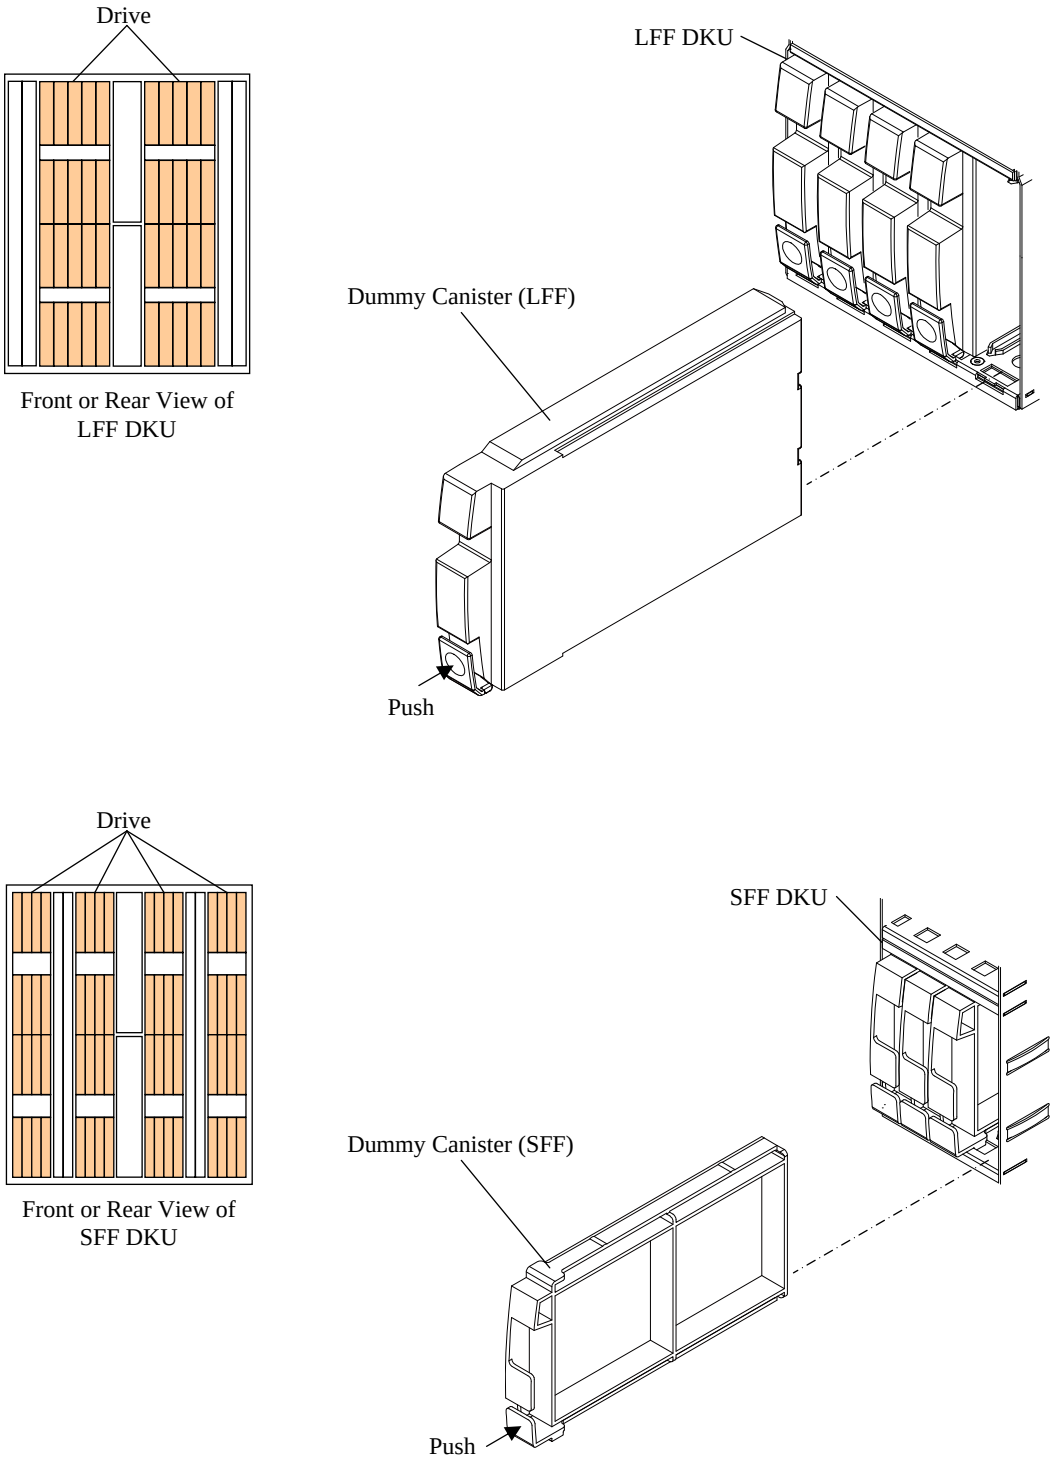

Fig. 4.1.2-14 Insertion of Dummy Canister

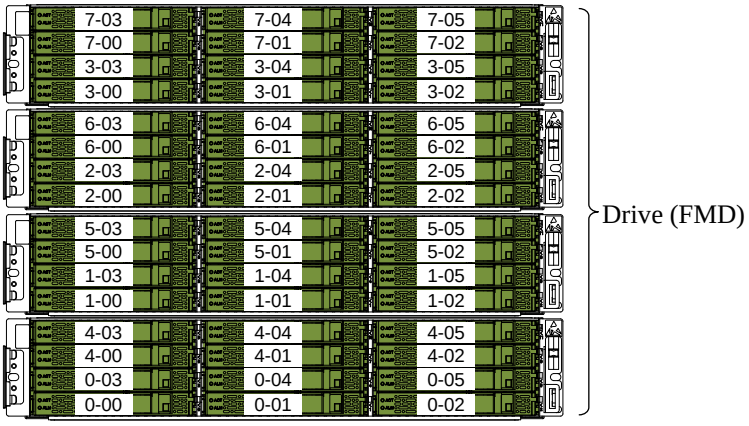
h. Close the FAN door, and tighten the two screws. (Refer to Fig. 4.1.2-7.)

Copyright © 2012, Hitachi, Ltd.

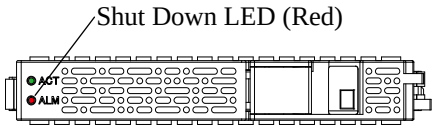
2-2-2 In case of FMD

Notice:	Just after the FMD is removed, the fans of the DKUPS equipped in the rear of the FBX DKU rotate at the highest speed. In 30 minutes after the removal of the FMD, the fans of the DKUPS rotate at the speed suitable for environmental temperature.

a. Check that the Shut Down LED on drive is turned on.



Front View of FBX DKU



Front View of Drive (FMD)

Fig. 4.1.2-15 Checking of Shut Down LED (In case of FMD)

Copyright © 2012, Hitachi, Ltd.

b. Pull the stopper of the drive handle toward you to have the lock off.
c. Tilt the handle toward you, and then remove the drive by pulling it out taking care not to apply a shock to it.

   Note: When handling the drive, hold the rail side because the shield spring is subject to breakage.
d. Install the dummy FMD into de-installation position of a drive.

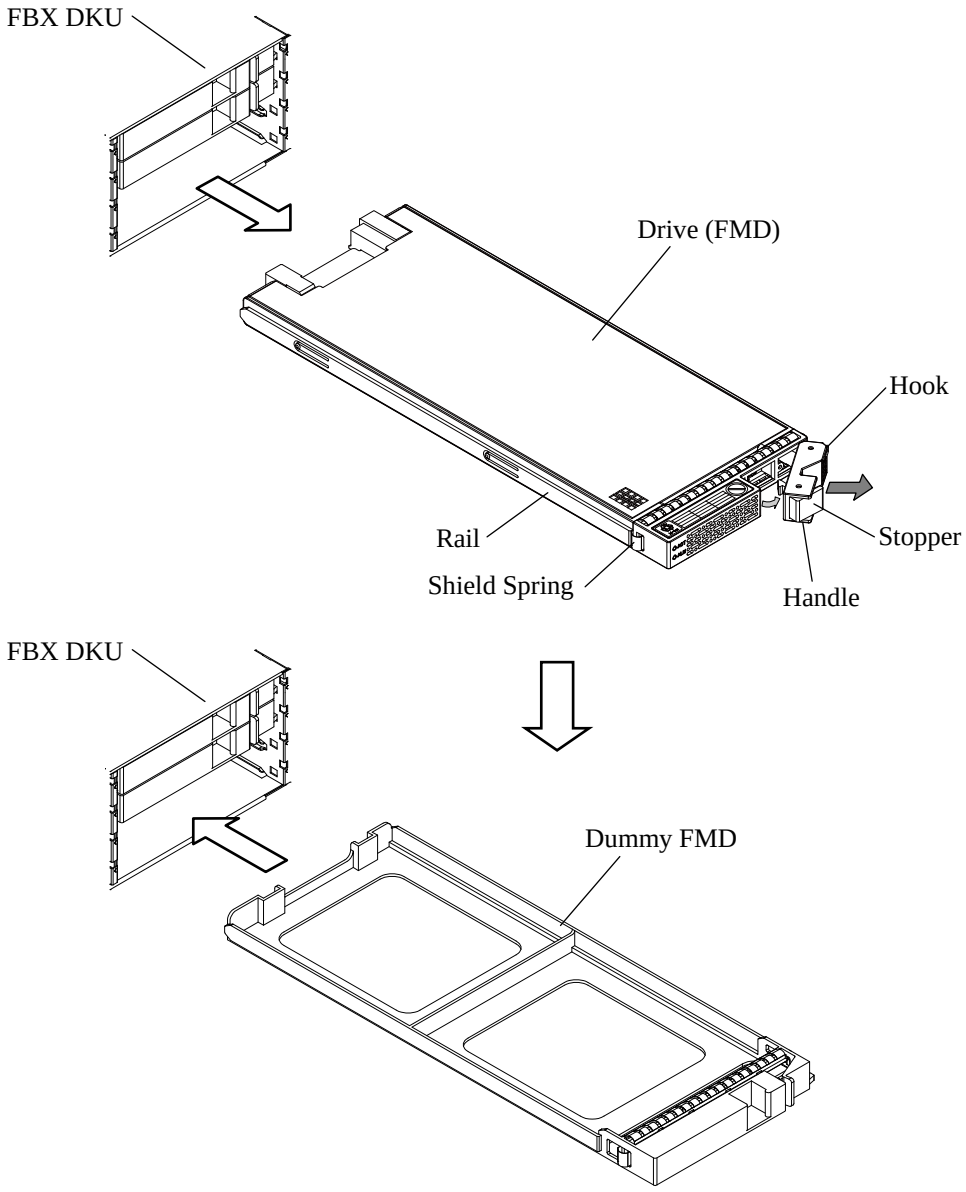


Fig. 4.1.2-16 Removal of Drive

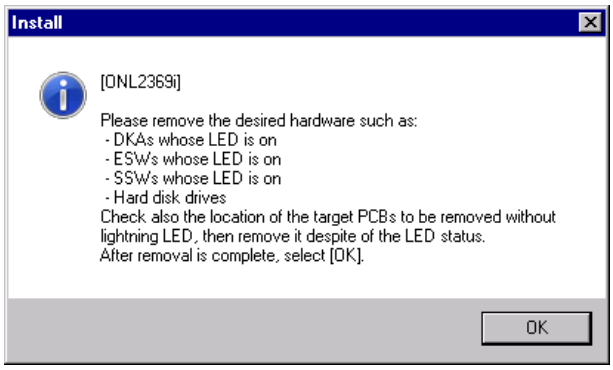
3. SVP post procedure

(1)



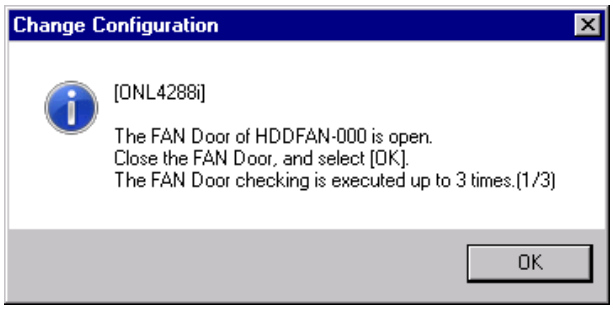
In response to a message, “Please remove the desired hardware such as:
- DKAs whose LED is on
- ESWs whose LED is on
- SSWs whose LED is on
- Hard disk drives

Check also the location of the target PCBs to be removed without lightning LED, then remove it despite of the LED status. After removal is complete, select [OK].”, select (CL) [OK].

It goes to (1)-1 when HDDFAN doors of the object are not closed.
It goes to (2) when HDDFAN doors of the object are closed.

---

(1)-1



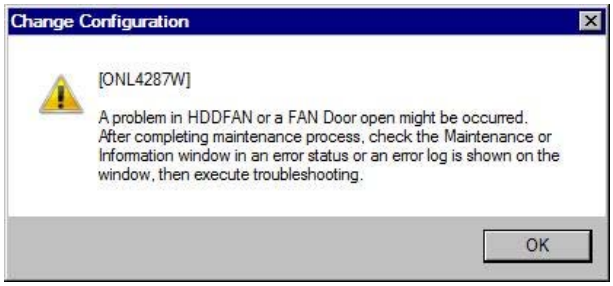
“The FAN Door of HDDFAN-xxx is open.
Close the FAN Door, and select [OK].
The FAN Door checking is executed up to 3 times. (n/3)” is displayed.
After the FAN door is closed, select (CL) [OK] in response to this message.

It returns to (1)-1 when HDDFAN doors of the object are not closed.
It goes to (2) when HDDFAN doors of the object are closed.

Note: It goes to (1)-2 when it cannot be confirmed that the FAN doors are closed in the three times FAN door check.

---

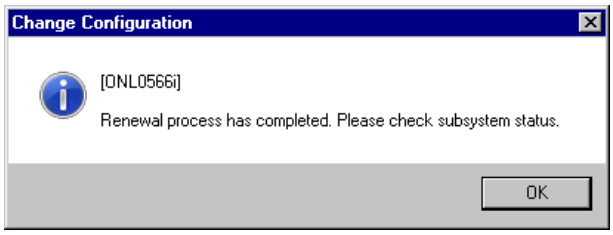
(1)-2



“A problem in HDDFAN or a FAN Door open might be occurred.
After completing the maintenance process, check the Maintenance or Information window in an error status or an error log is shown on the window, then execute troubleshooting.” is displayed.
Select (CL) [OK] in response to this message.

Copyright © 2010, Hitachi, Ltd.

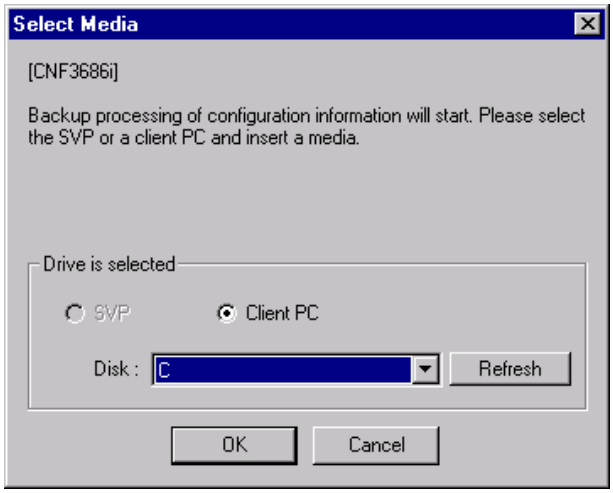
(2) <Making sure of completion of the removal>
A message, “Renewal process has completed. Please check subsystem status.” is displayed.
In response to the message, select (CL) [OK].



(3)

Execute an operation for backing up the configuration information.
Prepare the removable media for backup and insert the media.
Please select (CL) the [Refresh] button, and update drive information.
Select (CL) the drive and the PC in which the media was inserted. Select (CL) the [OK] button.

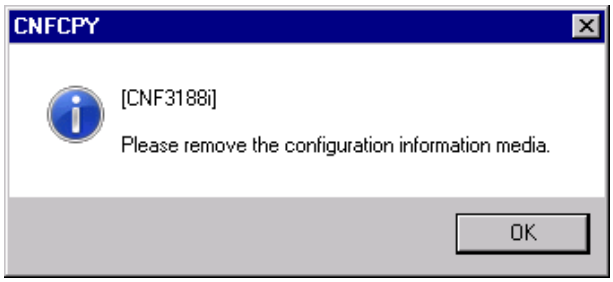
Note: For the procedure of backing up the configuration information to a CD-R, see page MICRO07-140.



Copyright © 2010, 2012, Hitachi, Ltd.

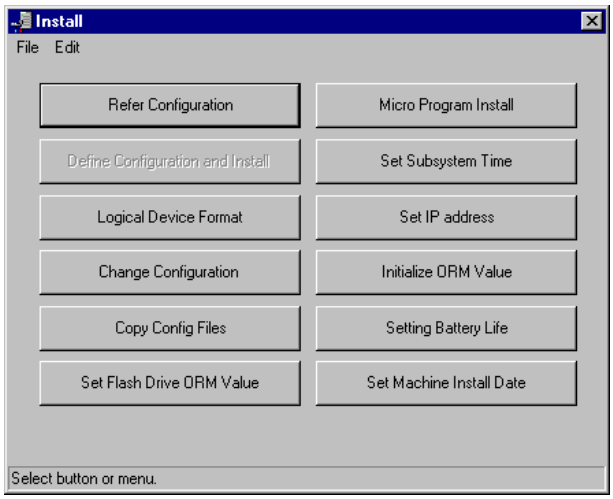
(4)

When this procedure is completed, the message “Please remove the configuration information media.” is displayed.
Remove the configuration information media, Select (CL) [OK].



(5)

After the procedure is completed, return to ‘Install’.
Select (CL) [File]-[Exit].



(6) <Mode Change>
Change the mode to View Mode.

Return to the work table (INST02-60) and perform rest of the works.

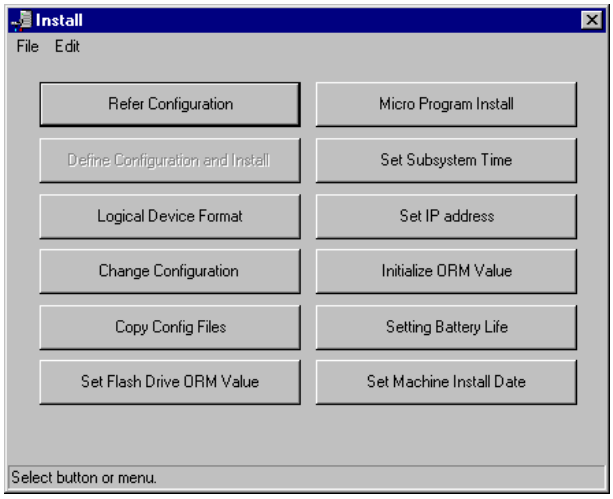
Copyright © 2010, 2012, Hitachi, Ltd.

4.1.3 When performing removal of the DKA and ESW (DKC-F710I-SCA/ESW)

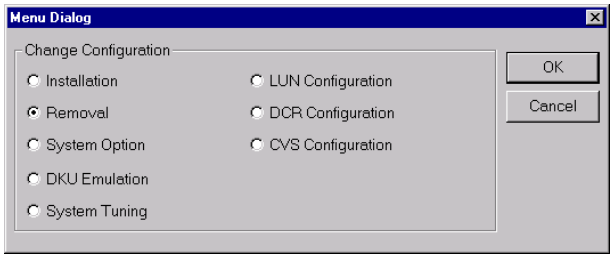
1. Setting up the New Device Structure Information

(1) <Mode Change>
Change the mode to Modify Mode.
Select (CL) [Install].

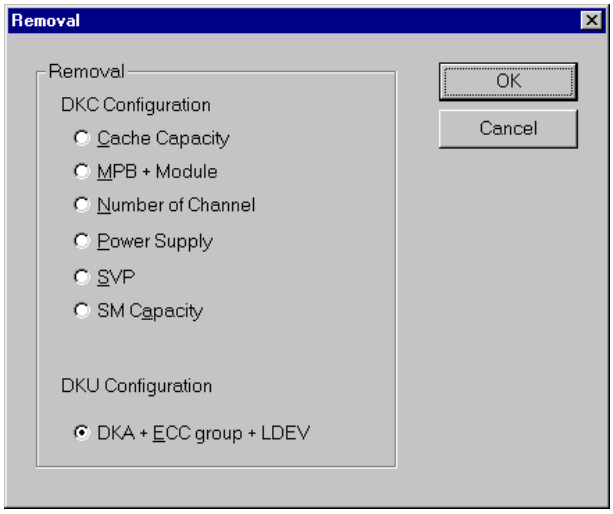
(2) <Start the 'Menu Dialog' screen>
Select (CL) [Change Configuration].



(3) <Start Device Structure Setup screen>
Select (CL) [Removal] in the "Menu Dialog" dialog box and select (CL) [OK].



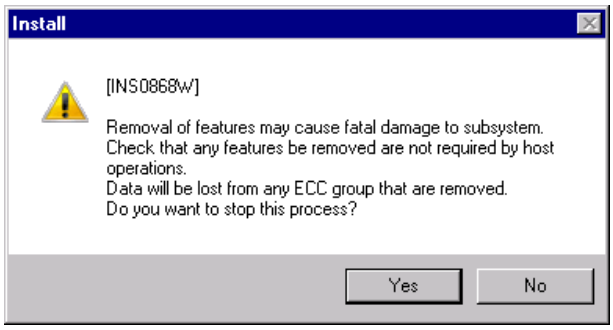
(4) <Select a part to be changed>
Select (CL) [DKA + ECC group + LDEV], and select (CL) [OK].



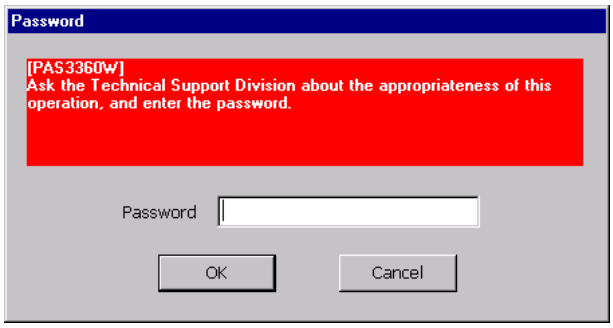
Copyright © 2010, Hitachi, Ltd.

(5)

Select (CL) [No] in response to “Removal of features may cause fatal damage to subsystem. Check that any features be removed are not required by host operations. Data will be lost from any ECC group that are removed. Do you want to stop this process?”.



(6) <Input password>
Enter the password and select (CL) [OK].

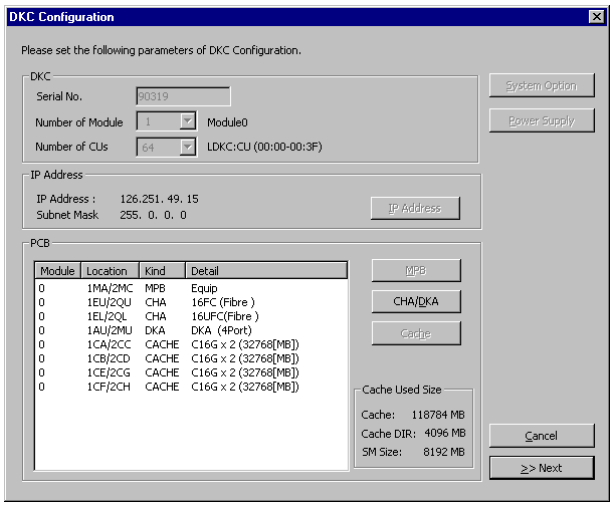


CAUTION

This is a special (exceptional) operation that can cause a serious failure such as a system down or a data loss if a wrong part to be removed is selected, and requires an input of a password. Ask the technical support division about the appropriateness of the operation, and input the password after getting an approval of executing the operation.

(7) <Update Configuration Information>
Select (CL) [CHA/DKA] in the ‘DKC Configuration’ window.
Go to Step (8).

After confirming input items, select (CL) the [>>Next] button.
Go to Step (9).
In the case of selecting (CL) [Cancel], this operation procedure terminates.

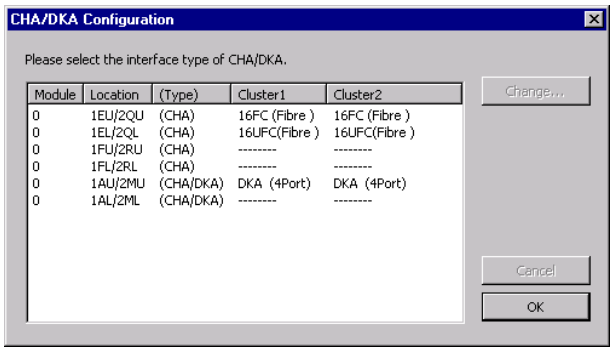


Copyright © 2010, Hitachi, Ltd.

(8) <Setting DKA>

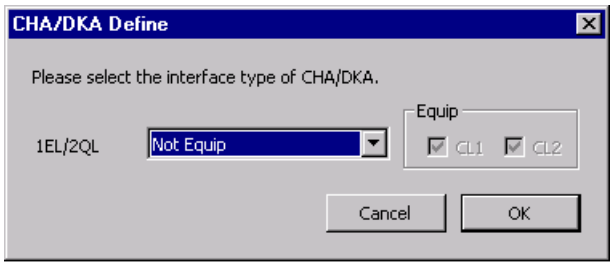
In the 'CHA/DKA Configuration' window, select the location(s) where the DKA is to be removed from and select (CL) the [Change...]. Advances the routine to step (8)-1. After setting it, select (CL) the [OK] button. Go back to Step (7).

Refer to INST01-50 for the SVP screen display and the conversion of the option type names.



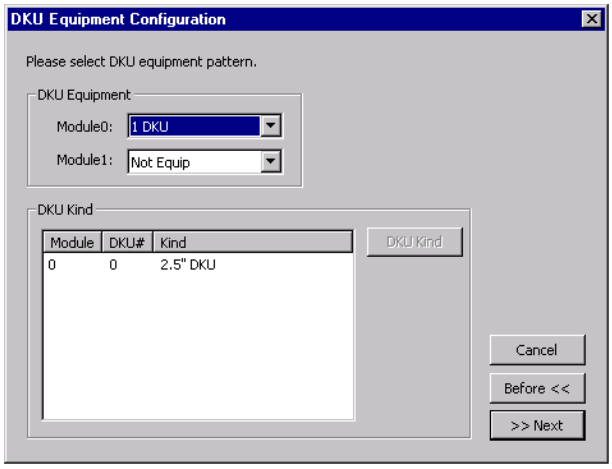
(8)-1 <Set the DKA type>

In the 'CHA/DKA Define' window, select the [Not Equip]. After the setting is completed, select (CL) the [OK].
The routine is returned to step (8).



(9) <DKU Equipment Configuration window>

Select (CL) [>>Next] in the 'DKU Equipment Configuration' window.
Go to Step (10).

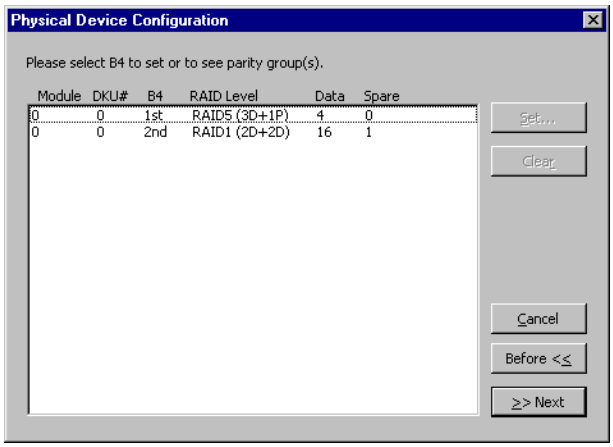


Copyright © 2010, Hitachi, Ltd.

(10) <Change Drive Configuration Information>

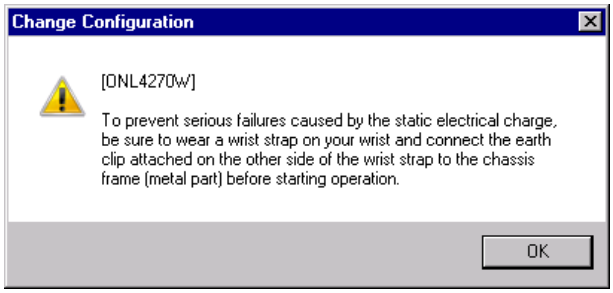
Select (CL) [>>Next] in the 'Physical Device Configuration' window.
Go to Step (11).

Selecting (CL) [Before<<] returns to Step (9).



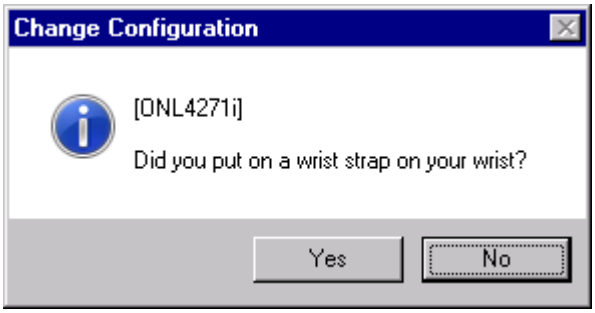
(11) <Wear a wrist strap>

Select (CL) [OK] in response to "To prevent serious failures caused by the static electrical charge, be sure to wear a wrist strap on your wrist and connect the earth clip attached on the other side of the wrist strap to the chassis frame (metal part) before starting operation.".



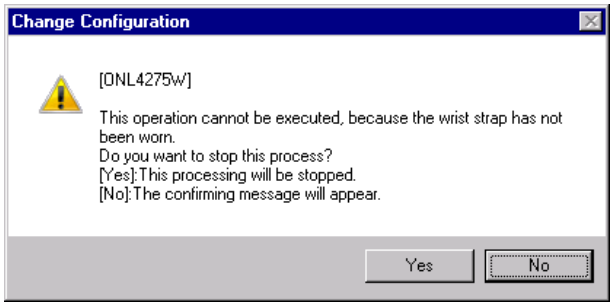
(11)-1 <Confirm wearing wrist strap>

In response to a message, "Did you put on a wrist strap on your wrist?".
Select [Yes] when wrist strap is on your wrist.
Select [No] when there is no wrist strap on your wrist.
When the [No] is selected, go to Step (11)-2.



(11)-2

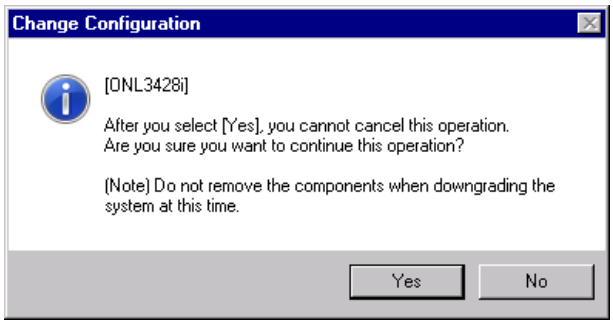
In response to a message, "This operation cannot be excuted, because the wrist strap has not been worn. Do you want to stop this process?
[Yes]: This processing will be stopped.
[No]: This confirming message will appear."
When [Yes] is selected (CL), the routine is returned to Step (2) on page INST04-01B-10.
When [No] is selected (CL), returned to Step (11).



Copyright © 2010, 2014, Hitachi, Ltd.

(12) <Starting the removal>

In response to a message, “After you select [Yes], you cannot cancel this operation. Are you sure you want to continue this operation? (Note) Do not remove the components when downgrading the system at this time.” select (CL) [Yes].



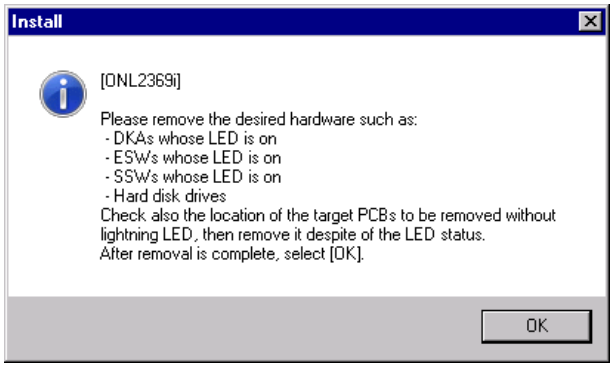
When the [No] is selected, the routine is returned to Step (2) on page INST04-01B-10.

---

(13) <Removing the hardware>

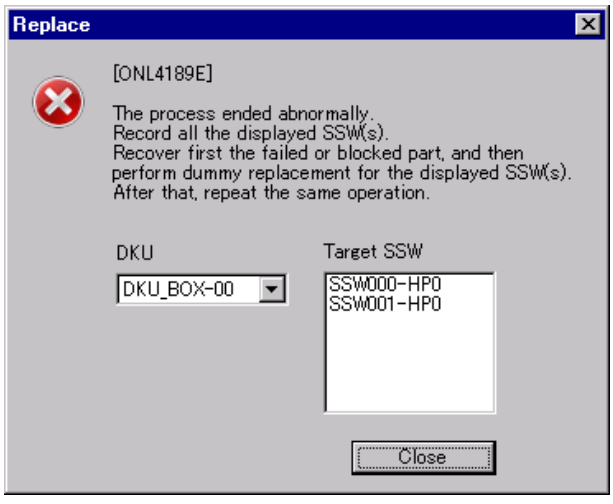
Do not push the [OK] button at this time yet. A message, “Please remove the desired hardware such as:
- DKAs whose LED is on
- ESWs whose LED is on
- SSWs whose LED is on
- Hard disk drives

Check also the location of the target PCBs to be removed without lightning LED, then remove it despite of the LED status. After removal is complete, select [OK].” is displayed.



When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) needs to be removed, remove it together with the ESW.

Perform the dummy replacement of the displayed SSW(s) when the window is displayed. Select the DKU list and record the target SSW(s) because two or more DKU might be listed.
Select (CL) [Close] button and perform the dummy replacement of the target SSW(s).



Refer to the subsystem configurations. (Refer to INST05-510)
And retry the operation after completing the dummy replacement of the SSW(s) if removal was not completed.

2. De-Installation Procedure of Disk Adapter

Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

2-1 Confirmation of the Shut Down LED

a. While referring to Fig. 4.1.3-1 and Table 4.1.3-1, check the Shut Down LED on the PCB

CAUTION: A system down may be caused if the Maintenance jumper is inserted in a PCB other than that to be removed. Make sure that it is a PCB to be added.

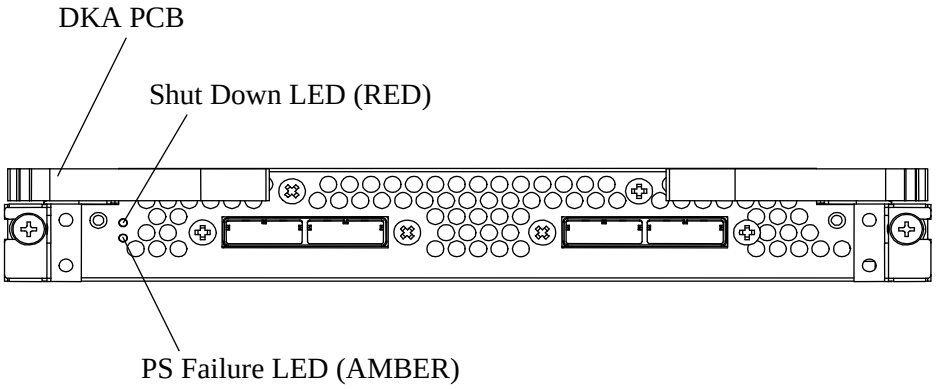

Fig. 4.1.3-1 Location of the Shut Down LED

Table 4.1.3-1 PCB Location List

DKC	Addition No.	Location No.		Number of DKAs set through the SVP		Remarks
		Cluster 1	Cluster 2			
DKC-0	Basic	DKA-1AU	DKA-2MU	2	4	
	Option 1	DKA-1AL	DKA-2ML	—		
DKC-1	Basic	DKA-1LU	DKA-2XU	2	4	
	Option 1	DKA-1LL	DKA-2XL	—

2-2 Disconnection of cables

In the case of Basic in DKC-0

a. Disconnect the cables from the DKA PCBs.

CAUTION: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

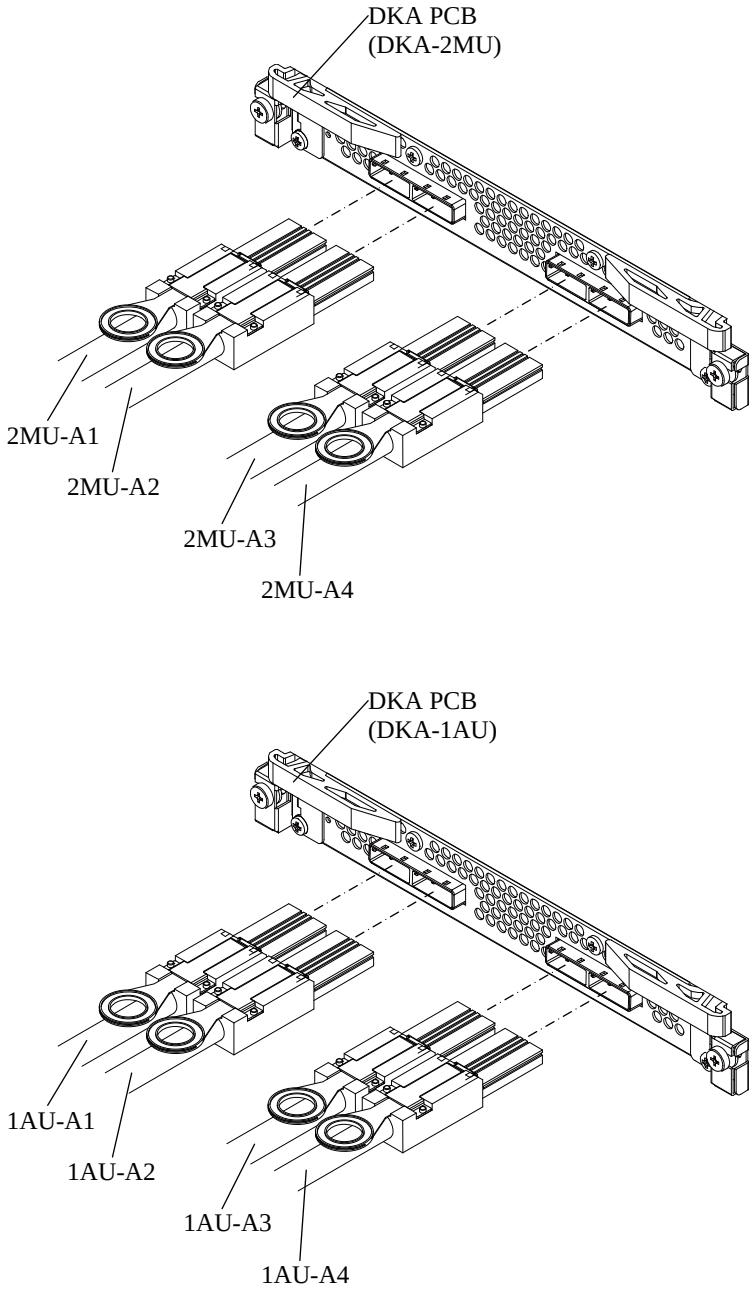

Fig.4.1.3-2 Disconnection of cables (Basic in DKC-0)

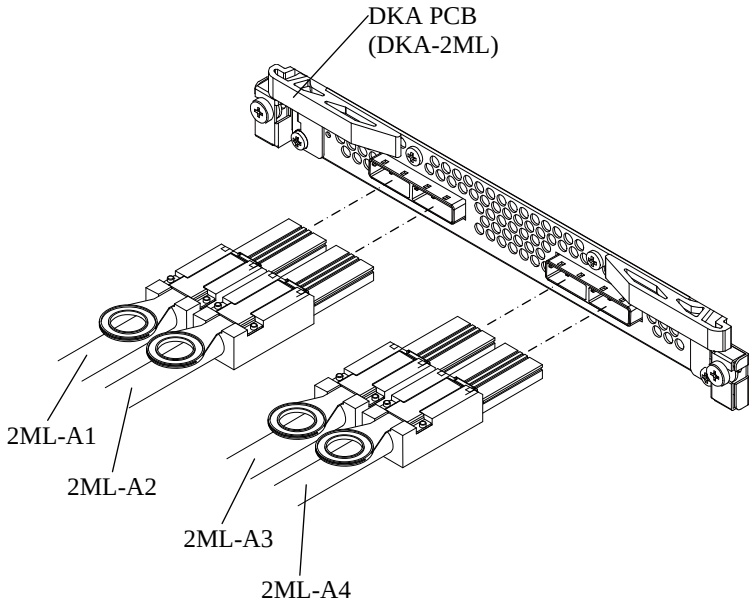
Copyright © 2010, Hitachi, Ltd.

In the case of Option 1 in DKC-0

a. Disconnect the cables from the DKA PCBs.

CAUTION: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.



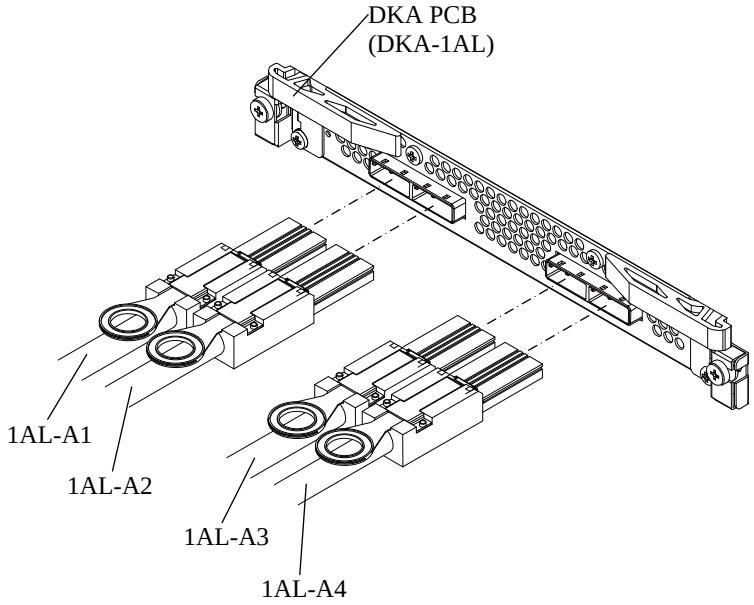


Fig.4.1.3-3 Disconnection of Cables (Option 1 in DKC-0)

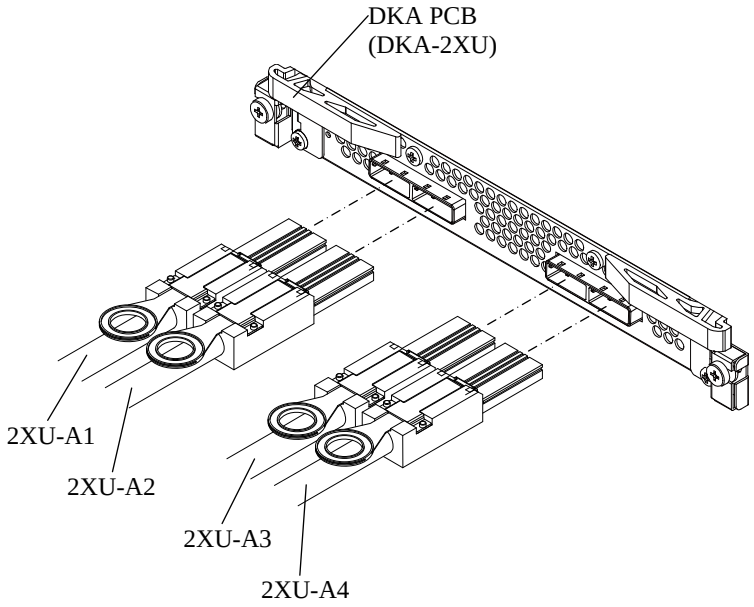
Copyright © 2010, Hitachi, Ltd.

In the case of Basic in DKC-1

a. Disconnect the cables from the DKA PCBs.

CAUTION: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.



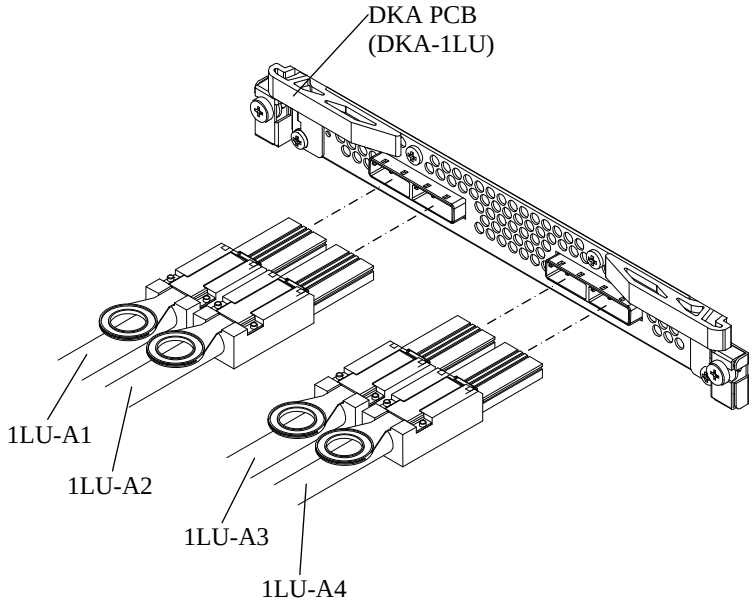


Fig.4.1.3-4 Disconnection of Cables (Basic in DKC-1)

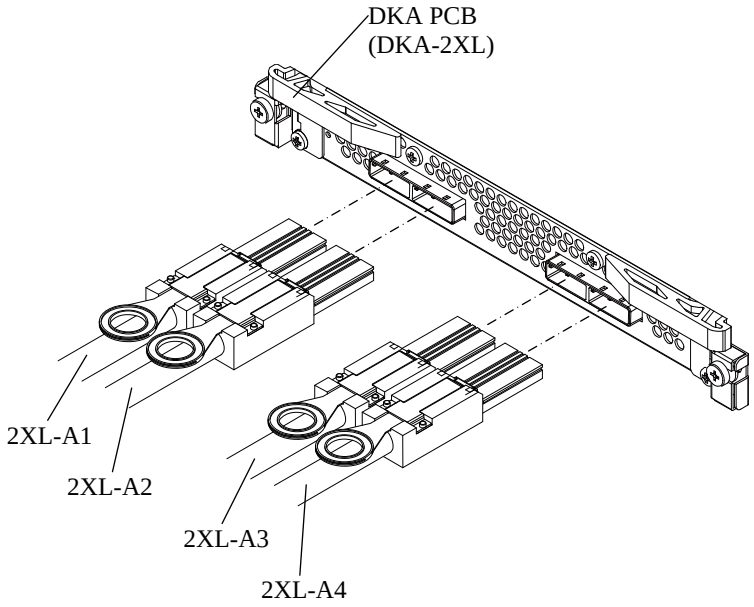
Copyright © 2010, Hitachi, Ltd.

In the case of Option 2 in DKC-0

a. Disconnect the cables from the DKA PCBs.

CAUTION: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.



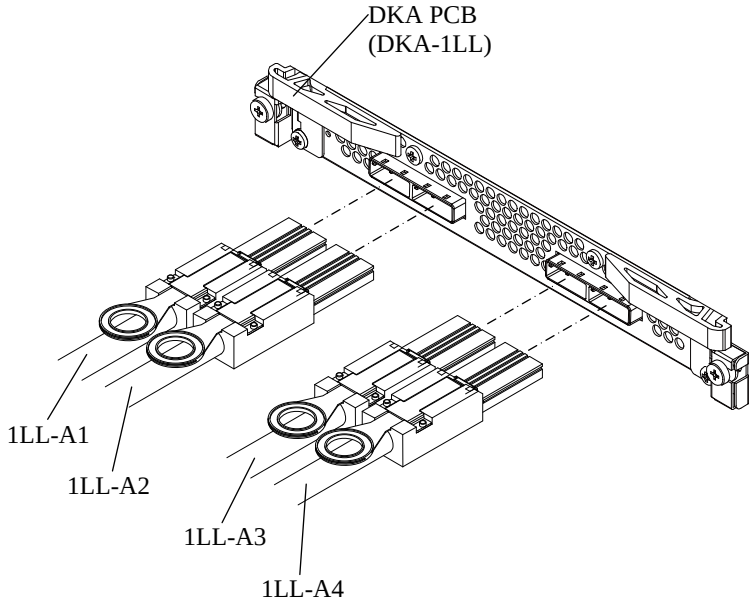


Fig.4.1.3-5 Disconnection of Cables (Option 1 in DKC-1)

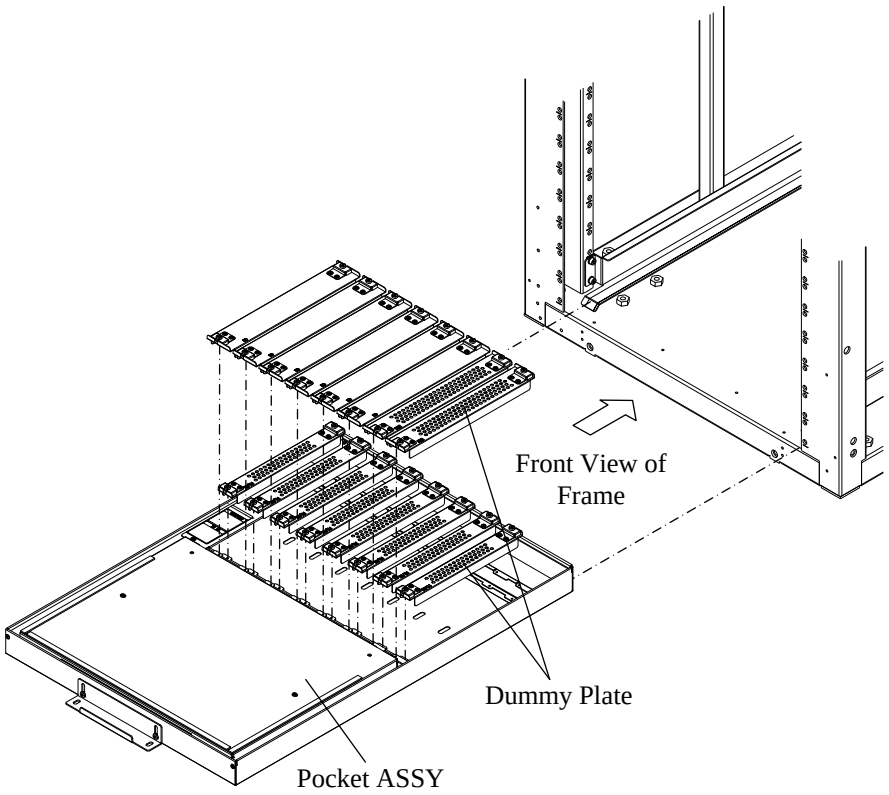
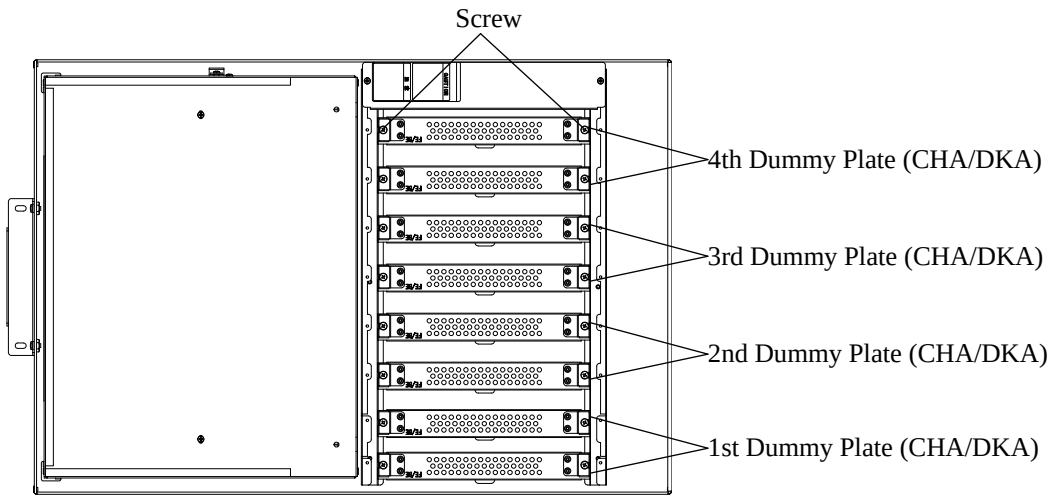
2-3 Removal of Dummy Plates

a. Remove the pocket ASSY from the front of the frame.
b. Loosen the four screws and remove the two dummy plates from the pocket ASSY. When dummy plates are installed in the upper part, remove the upper dummy plates once, remove the lower dummy plates, and then install the upper dummy plates again.
c. Install the pocket ASSY in the front of the frame.





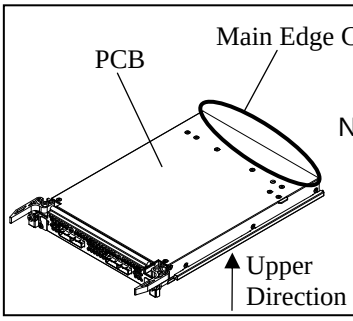
Top View of Pocket ASSY

Fig. 4.1.3-6 Removal of Dummy Plates

Copyright © 2010, 2011, Hitachi, Ltd.

2-4 Removal of the PCBs

a. Loosen the screws and remove the PCBs from the DKC.



Note: When removing the PCB, hold the right and left of the PCB with both hands, and pull it out straight not to contact the neighboring PCB.
(If it thinks that it is hard to extract, raise and extract a little upwards.)

b. Attach the dummy plates and fasten the screws.

Note: Install the dummy plate immediately after removing the PCB.
If the PCB is kept removed for a long time, the wind doesn't flow among installed PCBs, causing the PCBs' temperature rise which may result in temperature warning or temperature alarm.

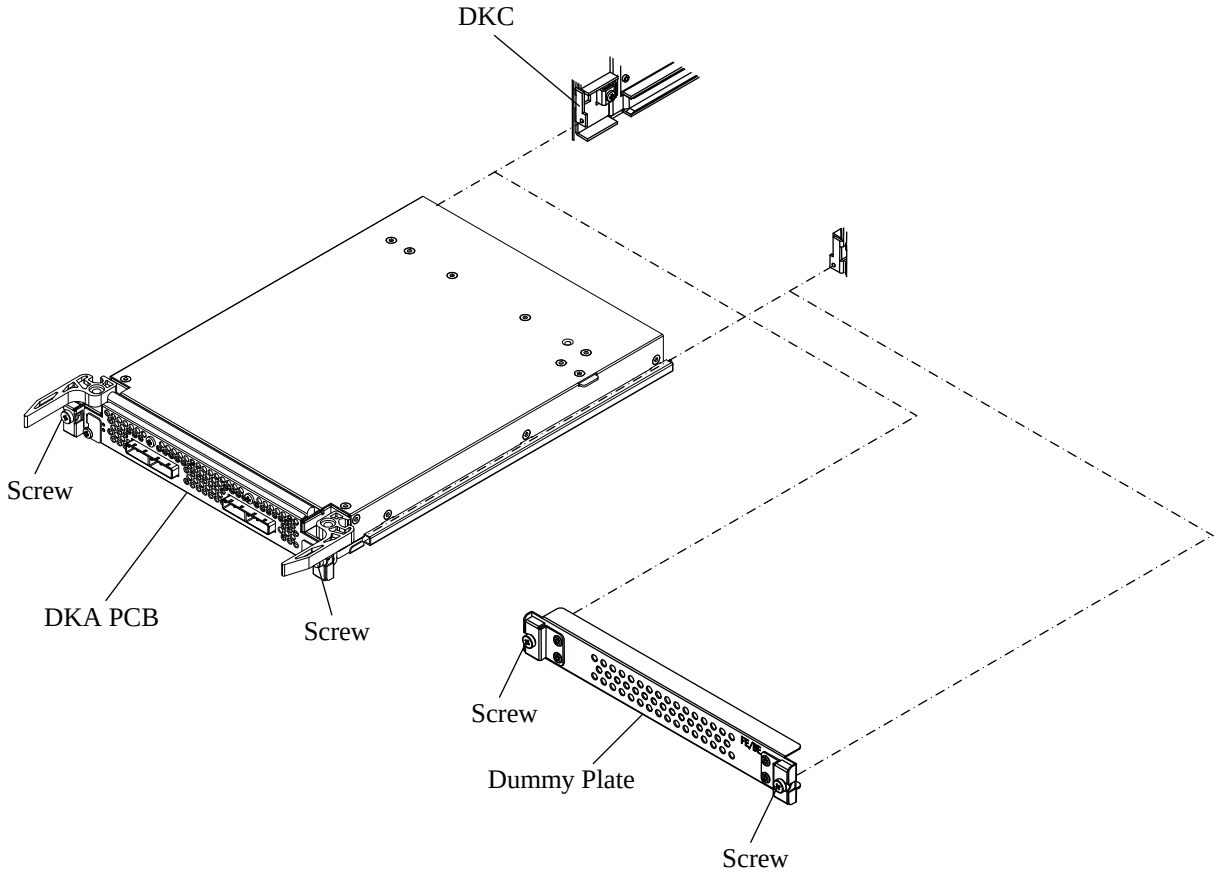


Fig. 4.1.3-7 Removal of PCB

Copyright © 2010, Hitachi, Ltd.

2-5 Removal of the nameplate

a. Remove the screw from the rack frame and remove the nameplate tags to be installed.
b. Remove the nameplate from the nameplate tag.
c. Attach all the nameplate tags with the screw.

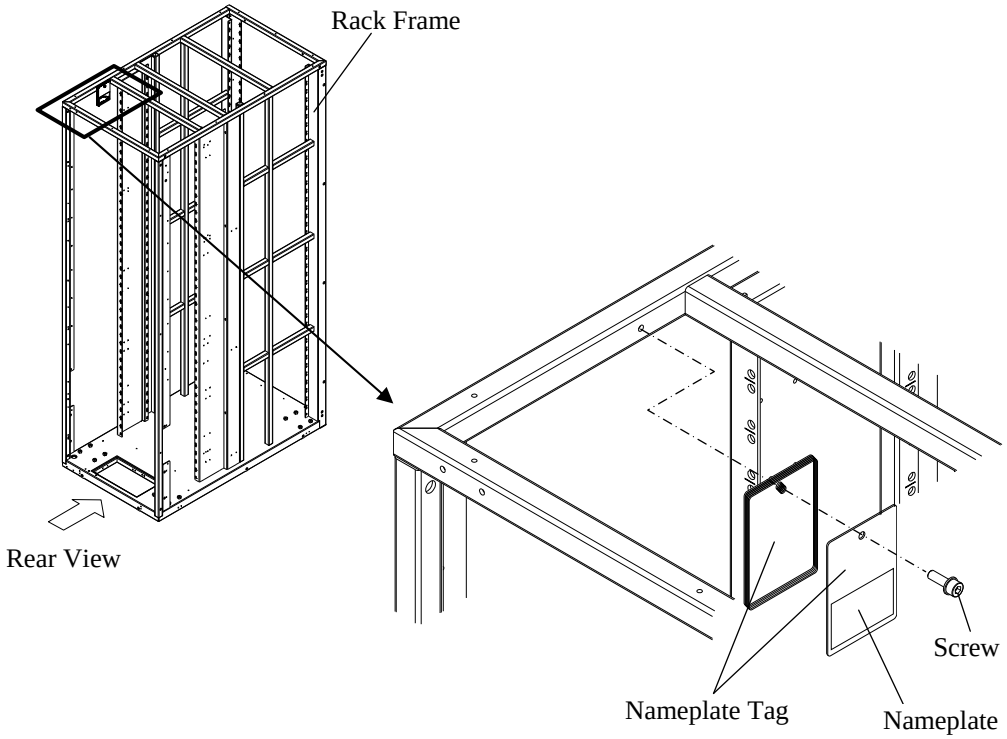

Fig. 4.1.3-8 Removal of Nameplate

Copyright © 2010, Hitachi, Ltd.

3. De-Installation Procedure of PCI Express Switch Adapter

De-Installation Condition

The PCI Express Switch Adapter (DKC-F710I-ESW) is an indispensable option that is to be removed when the subsystem configuration of DKC is corresponding to the following conditions.

In case of DKC-0

When it corresponds to all the following two conditions, remove the second set (1SB/2SD)

- When the standard model is selected
- When the CHA is removed from the Option 2 (1FU/2RU) and the Option 3 (1FL/2RL) of the CHA slots
- When the DKA or the CHA is removed from the Option 1 (1AL/2ML) of the DKA slots

In case of DKC-1

When it corresponds to all the following two conditions, remove the second set (1SF/2SH)

- When the standard model is selected
- When the CHA is removed from the Option 2 (1HU/2UU) and the Option 3 (1HL/2UL) of the CHA slots
- When the DKA or the CHA is removed from the Option 1 (1LL/2XL) of the DKA slots

Twin DKC Model

For the twin DKC model, the ESWs that are installed in the DKC-0 and the DKC-1 should be the same in number.

- The ESWs (1SB/2SD/1SF/2SH) can be removed from the DKC-0 and the DKC-1 only when it meets both requirements of removing the ESWs from the ESW slot option 1 (1SB/2SD) of the DKC-0 and requirements of removing ESWs from the ESW slot option 1 (1SF/2SH) of the DKC-1.

Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

Copyright © 2010, Hitachi, Ltd.

3-1 Confirmation of the Shut Down LED

a. While referring to Fig. 4.1.3-9 and Table 4.1.3-2, check the Shut Down LED on the PCB.

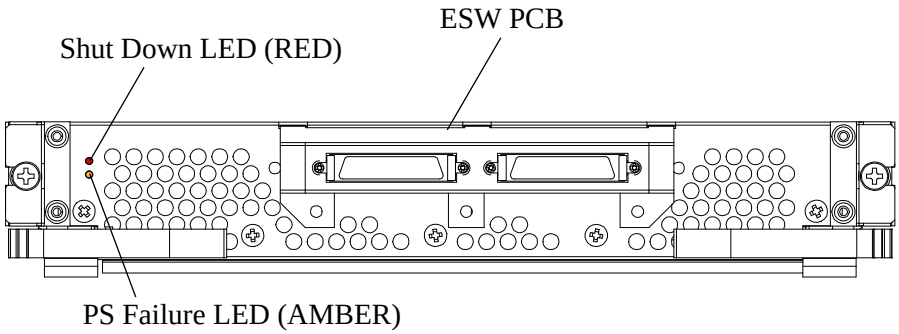

Fig. 4.1.3-9 Location of the Shut Down LED

Table 4.1.3-2 Location of the ESW PCB

DKC	Addition No.	Slot No.		Location No.		Remarks
		Cluster 1	Cluster 2	Cluster 1	Cluster 2	
DKC-0	Option 1	1SB	2SD	ESW-1SB	ESW-2SD	
DKC-1	Option 1	1SF	2SH	ESW-1SF	ESW-2SH	

Copyright © 2010, Hitachi, Ltd.

3-2 Removal of Dummy Plates

a. Remove the pocket ASSY from the front of the frame.
b. Loosen the four screws and remove the two dummy plates from the pocket ASSY.
c. Install the pocket ASSY in the front of the frame.

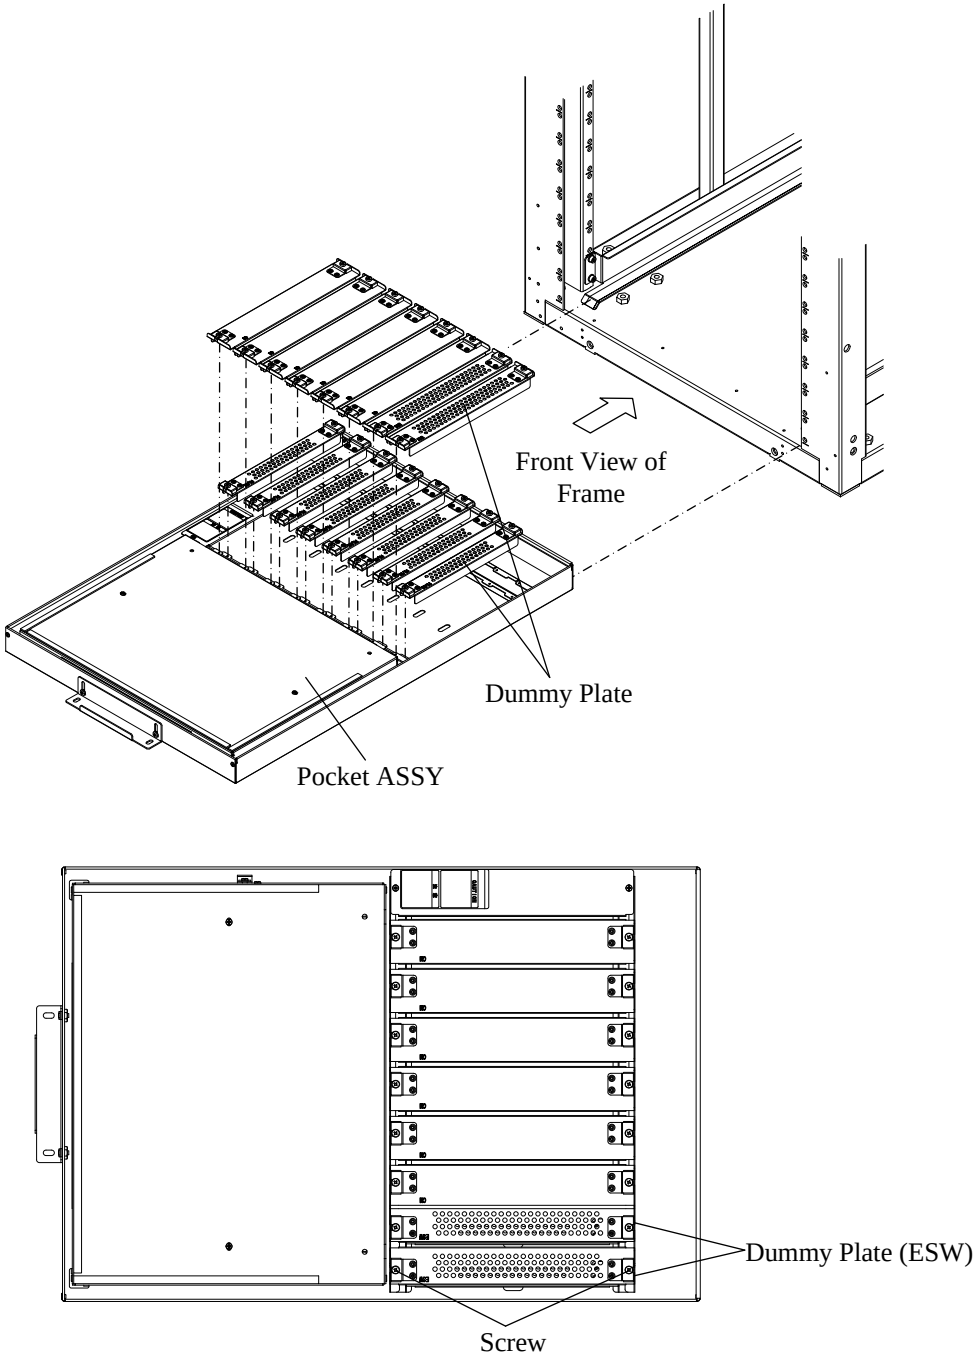

Fig. 4.1.3-10 Removal of Dummy Plates

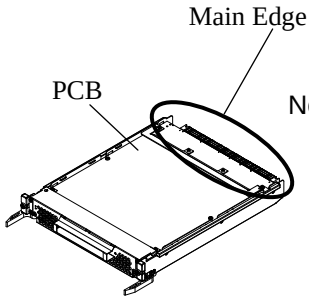
Copyright © 2010, 2011, Hitachi, Ltd.

3-3 Removal of ESW PCB

a. Loosen the screws and remove the ESW PCBs. from the DKC. Refer to Table 4.1.3-2 and Fig. 4.1.3-11.
b. Attach the dummy plates and fasten the screws.



Note: When removing the PCB, hold the right and left of the PCB with both hands, and pull it out straight not to contact the neighboring PCB.

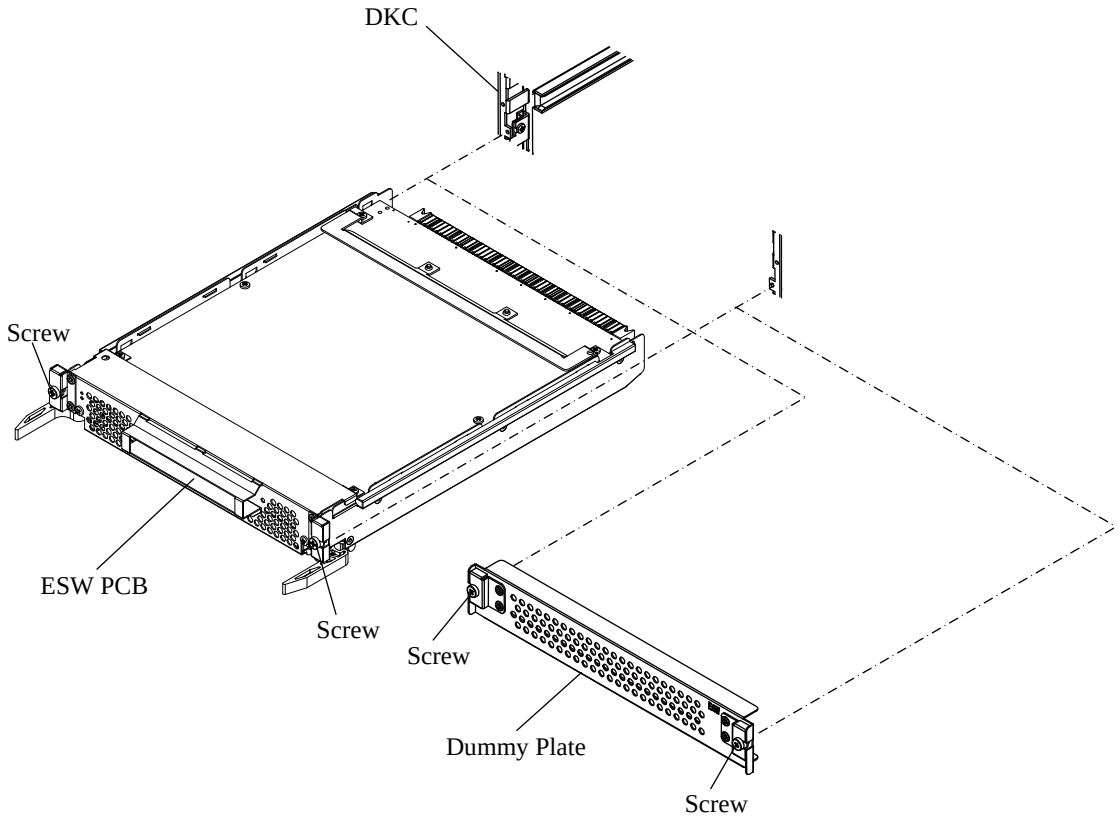


Fig. 4.1.3-11 Removal of PCB

Copyright © 2010, Hitachi, Ltd.

3-4 Removal of nameplate

a. Remove the screw from the rack frame and remove the nameplate tags to be installed.
b. Remove the nameplate from the nameplate tag.
c. Attach all the nameplate tags with the screw.

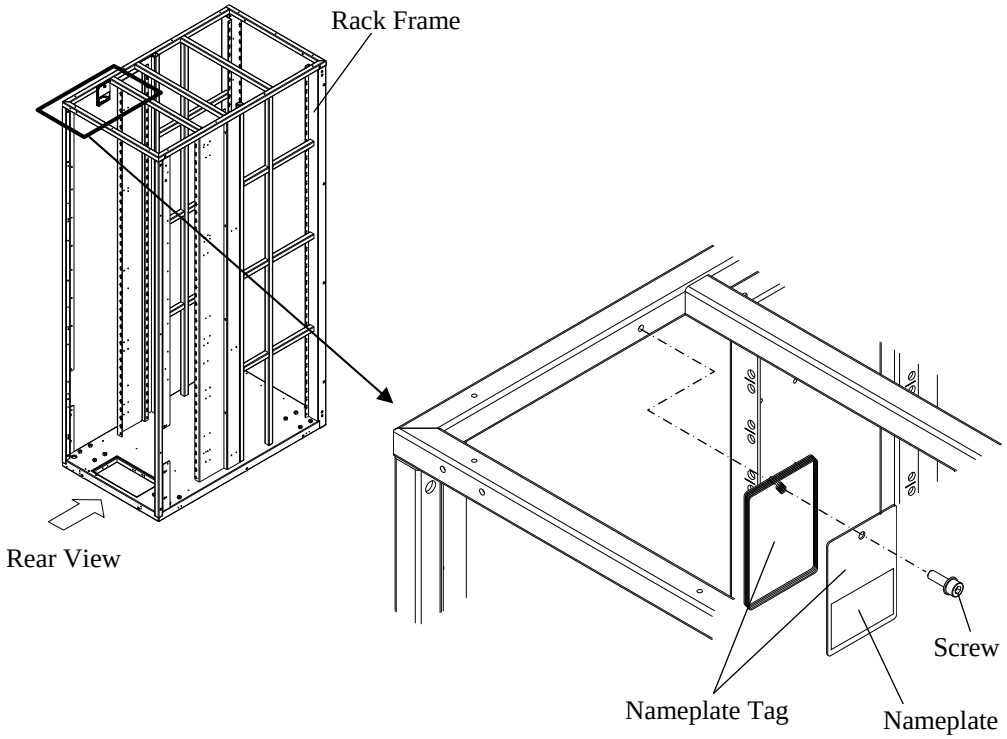

Fig. 4.1.3-12 Removal of Nameplate

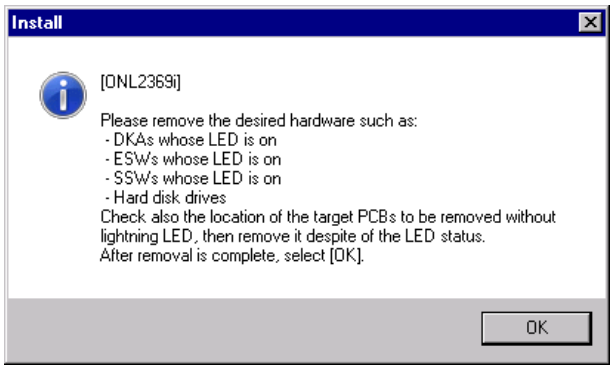
4. SVP post procedure

(1)

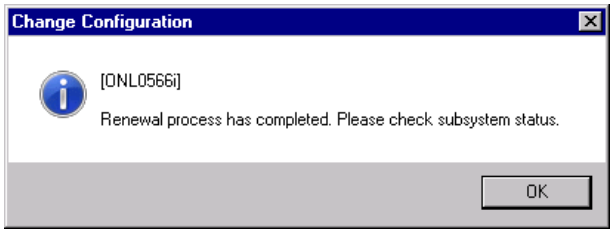


In response to a message, “Please remove the desired hardware such as:
- DKAs whose LED is on
- ESWs whose LED is on
- SSWs whose LED is on
- Hard disk drives

Check also the location of the target PCBs to be removed without lightning LED, then remove it despite of the LED status. After removal is complete, select [OK].”, select (CL) [OK].

---

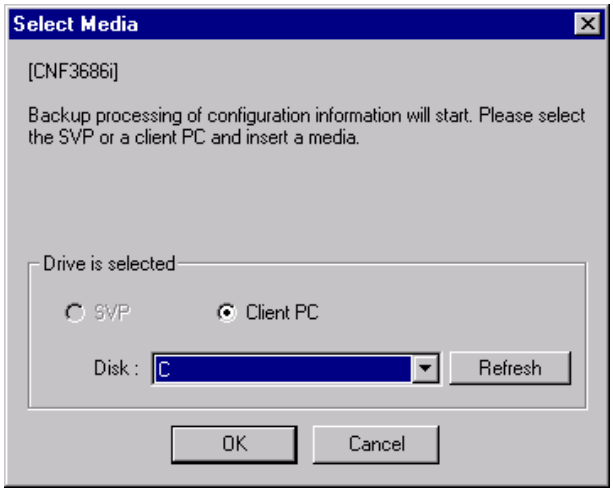
(2) <Making sure of completion of the removal>



A message, “Renewal process has completed. Please check subsystem status.” is displayed. In response to the message, select (CL) [OK].

---

(3)



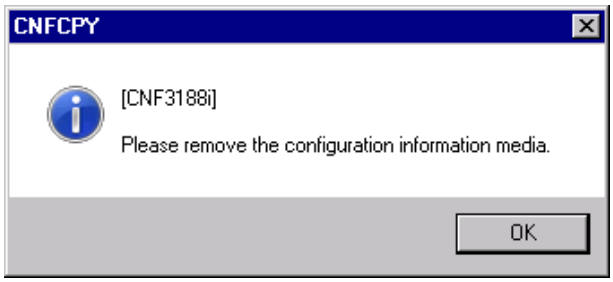
Execute an operation for backing up the configuration information.
Prepare the removable media for backup and insert the media.
Please select (CL) the [Refresh] button, and update drive information.
Select (CL) the drive and the PC in which the media was inserted. Select (CL) the [OK] button.

Note: For the procedure of backing up the configuration information to a CD-R, see page MICRO07-140.

Copyright © 2010, 2012, Hitachi, Ltd.

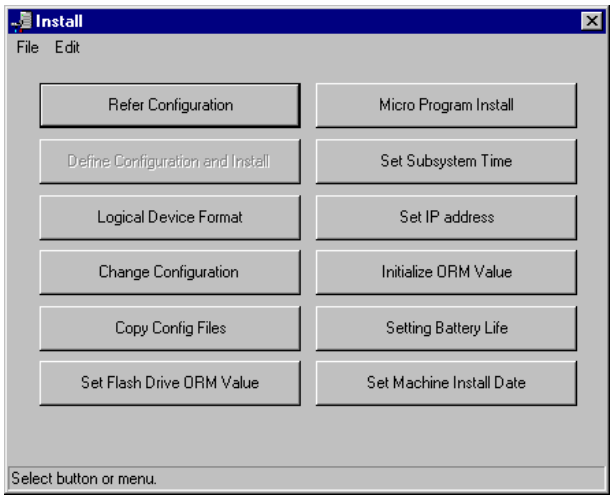
(4)

When this procedure is completed, the message “Please remove the configuration information media.” is displayed.
Remove the configuration information media, Select (CL) [OK].



(5)

After the procedure is completed, return to ‘Install’.
Select (CL) [File]-[Exit].



(6) <Mode Change>
Change the mode to View Mode.

Return to the work table (INST02-60) and perform rest of the works.

When DKC-F710I-SBX (SFF drive chassis) and DKC-F710I-UBX (LFF drive chassis) is installed in the same rack, DKC-F710I-USC/HUSC must be used to connect each chassis.

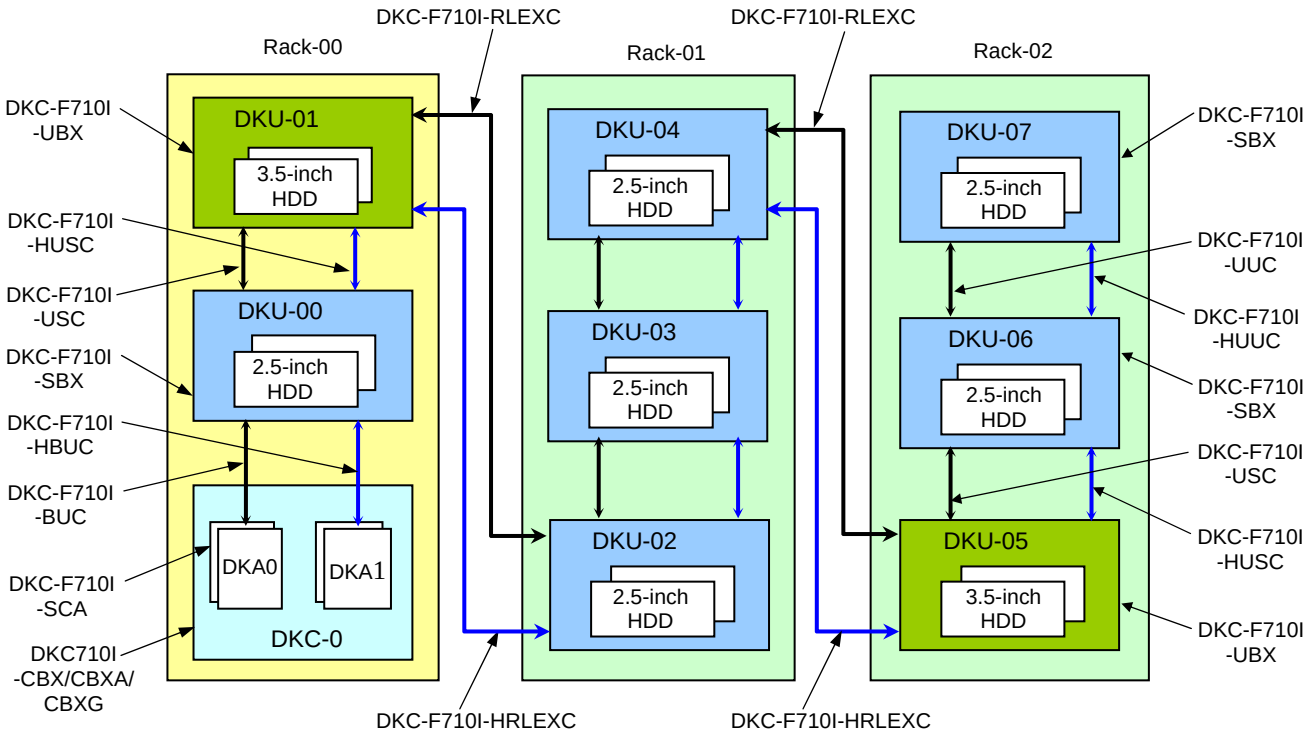

Fig. 4.1.4-2 Intermixed Configurations of DKC-F710I-SBX and DKC-F710I-UBX

Copyright © 2012, Hitachi, Ltd.

Intermixed configurations of DKC-F710I-SBX, DKC-F710I-UBX, and DKC-F710I-FBX (Flash Module Drive Chassis) in the storage system are shown below.
A maximum of two DKC-F710I-FBX can be controlled by a single DKC.

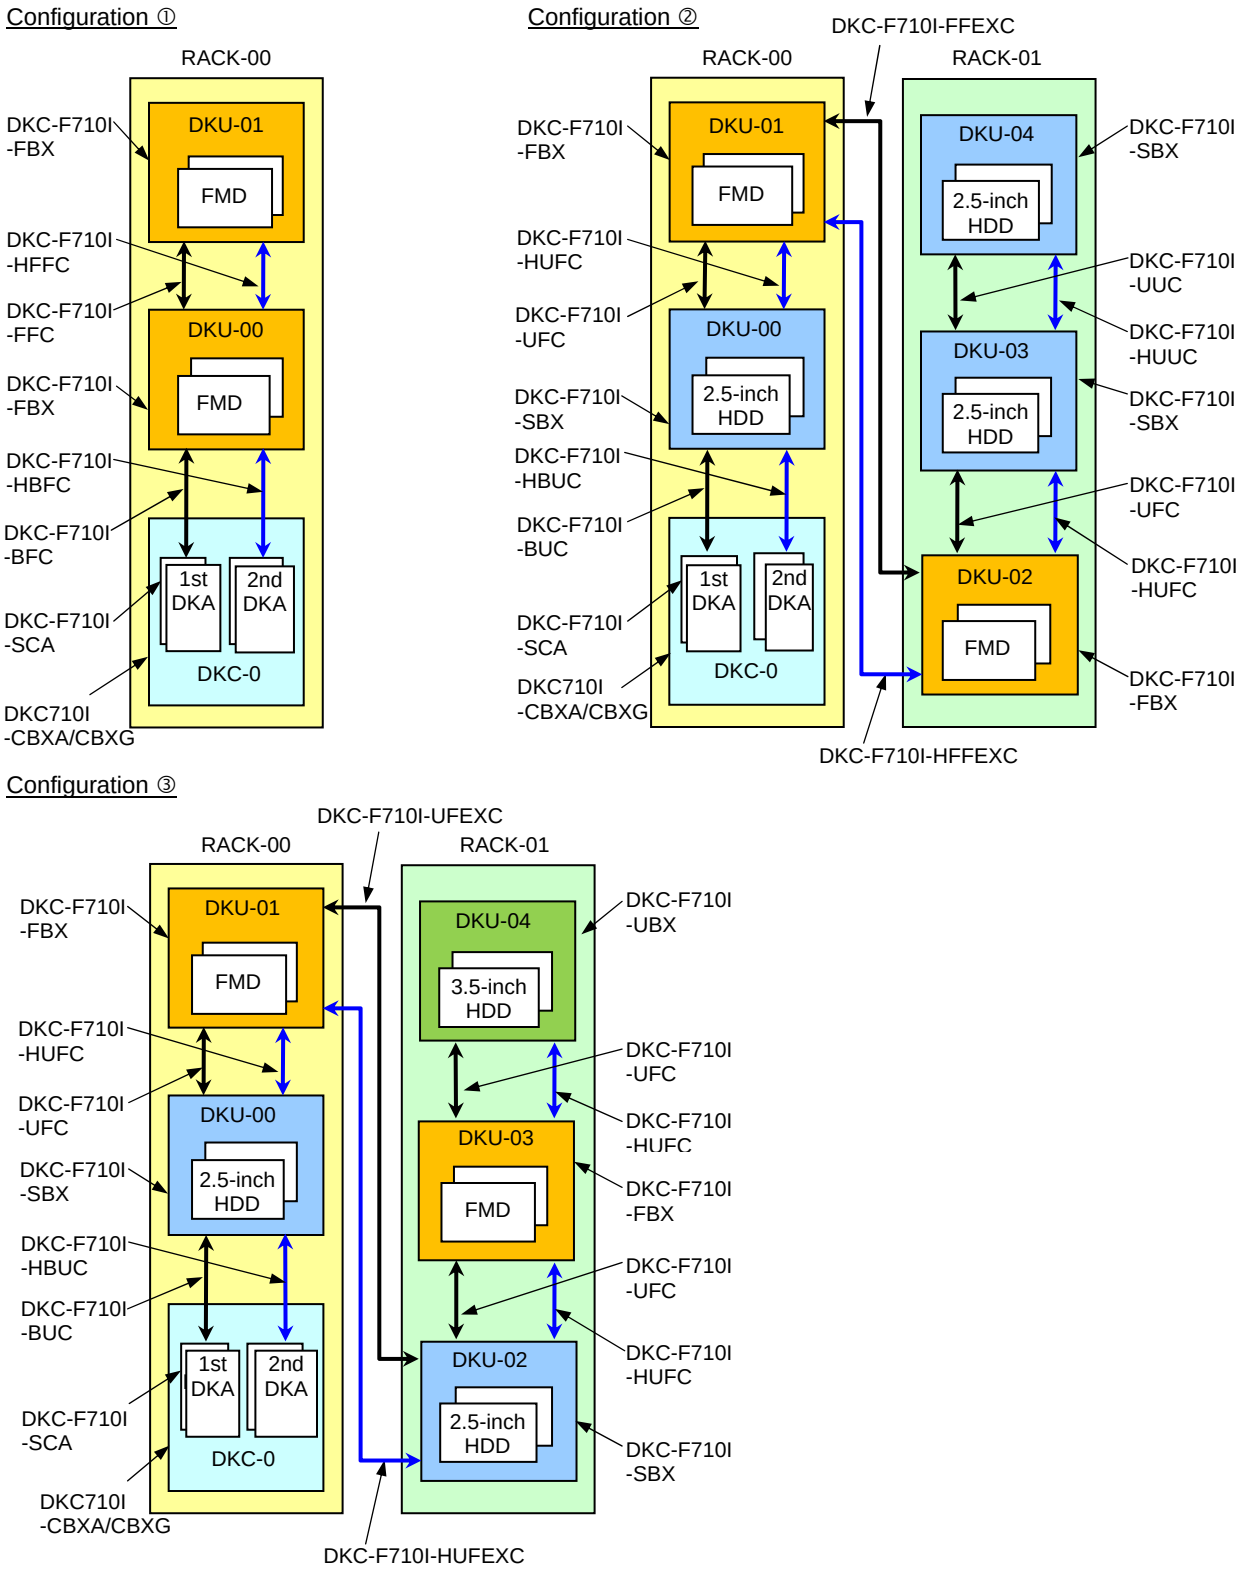

Fig. 4.1.4-3 Intermixed Configurations of DKC-F710I-SBX, UBX and FBX

4.1.4.1 Removal of Bezels

1. Remove the Bezels from DKUs which install the cables.
   a. Insert the key into the Bezel keyhole, and turn the key 90 degrees clockwise direction to unlock. (The stopper of the left side of the Bezel is also unlocked, and the Bezel can be opened.)
   b. Open the bezel by pulling the pocket door pull.
   c. Remove the two pins and remove the Bezel.

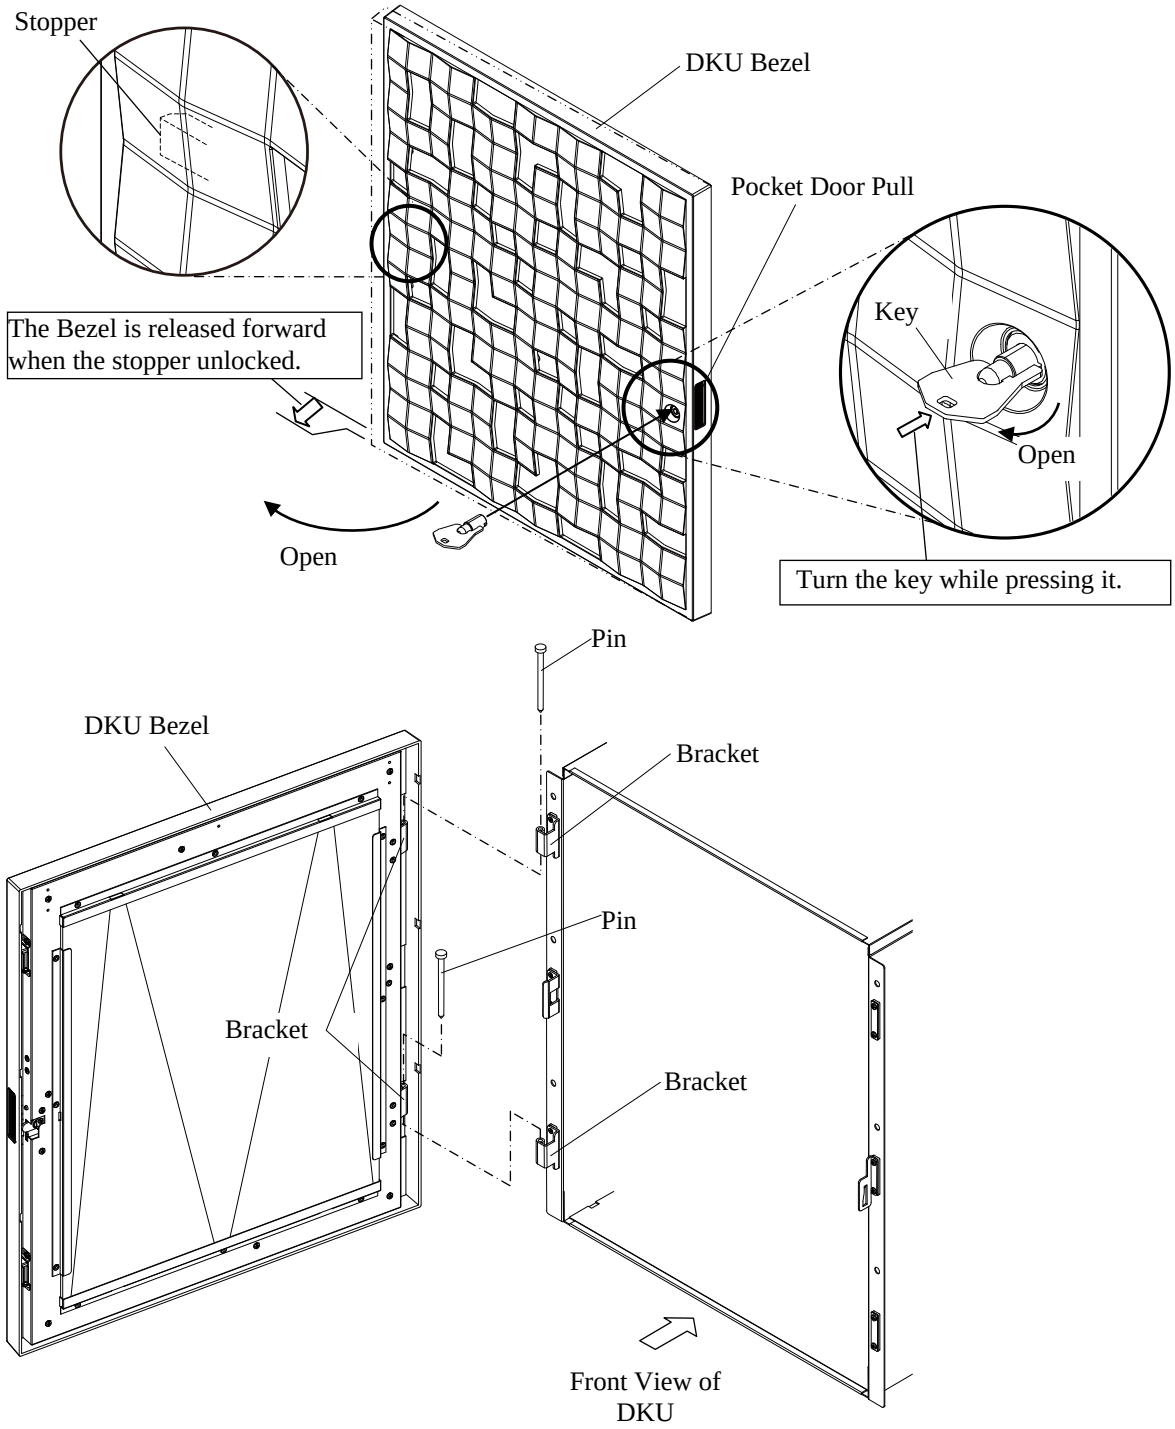

Fig. 4.1.4.1-1 Removal of DKU Bezel

Copyright © 2010, Hitachi, Ltd.

2. When you need to remove the Drive Interface Cables from the LFF DKU, take the jig out from the pocket ASSY.
   When you do not need to remove the Drive Interface Cables from the LFF DKU, proceed to the step 3.
   a. Remove the pocket ASSY from the front of the RACK-x0.
   b. Take the jig out from the pocket ASSY.
   c. Install the pocket ASSY in the front of the frame.

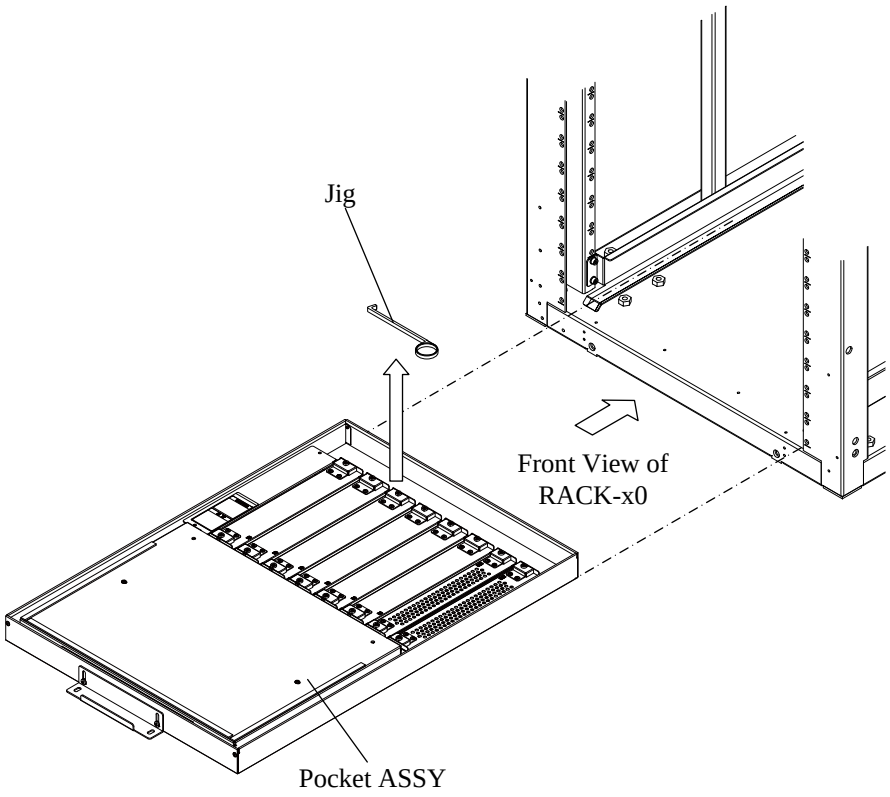

Fig. 4.1.4.1-2 Storage of Jig

3. Stopper operation when opening and closing the FAN door of the DKU
   a. When opening and closing the FAN Door of DKU for removing the device interface cables, operate the stopper of the FAN door according to “3.1.6 Setting of Stopper for FAN Door” (INST03-01-160).
      • When opening the FAN door, put the stopper of the FAN door into the openable and closable state.
      • When closing the FAN door, put the FAN door stopper into the neutral state.

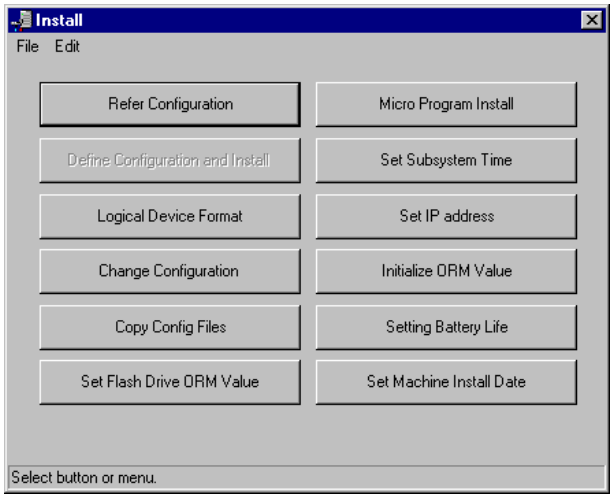
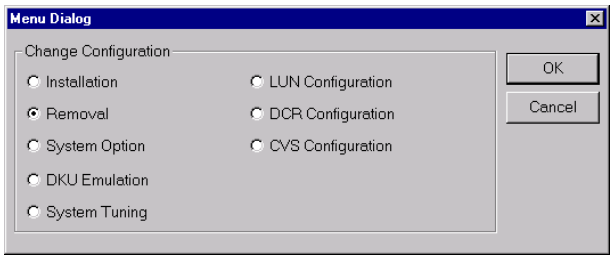
4.1.4.2 Setting up the New Device Structure Information

(1) <Mode Change>
Change the mode to Modify Mode.
Select (CL) [Install].

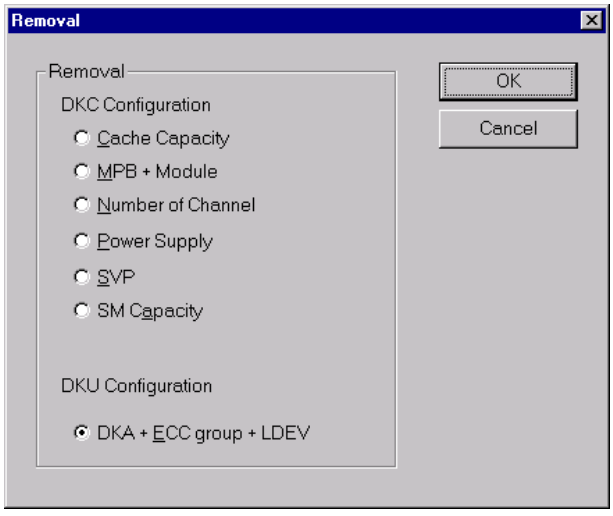
(2) <Start the 'Menu Dialog' screen>
Select (CL) [Change Configuration].



(3) <Start Device Structure Setup screen>
Select (CL) [Removal] in the "Menu Dialog" dialog box and select (CL) [OK].



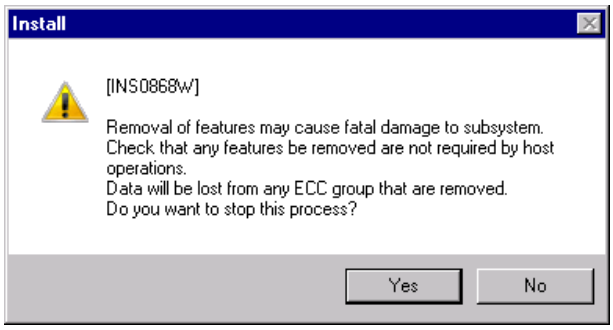
(4) <Selecting a part to be changed>
Select (CL) [DKA + ECC group + LDEV] and select (CL) the [OK].



Copyright © 2010, Hitachi, Ltd.

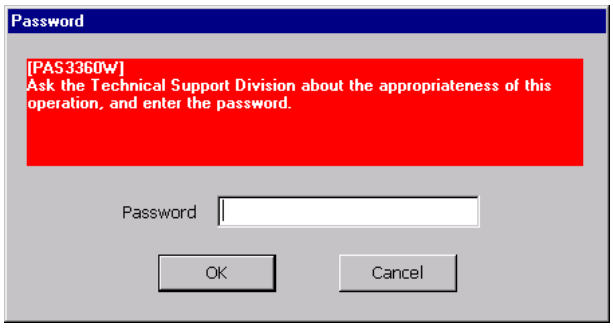
(5)

Select (CL) [No] in response to “Removal of features may cause fatal damage to subsystem. Check that any features be removed are not required by host operations. Data will be lost from any ECC group that are removed. Do you want to stop this process?”.



Note: The Alias information which is set to the LDEV included in the ECC to remove is also deleted at the same time. When the Alias is set, migrate the Alias information to another LDEV before removal or reset it after removal.

(6) <Input password>
Enter a password and select (CL) the [OK].

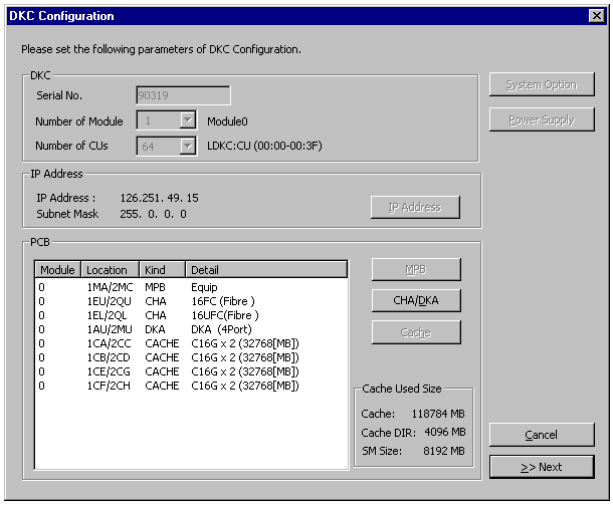


CAUTION

This is a special (exceptional) operation that can cause a serious failure such as a system down or a data loss if a wrong part to be removed is selected, and requires an input of a password. Ask the technical support division about the appropriateness of the operation, and input the password after getting an approval of executing the operation.

(7) <Updating the configuration information>
In the ‘DKC Configuration’ window, select (CL) the [CHA/DKA]. Go to step (8).

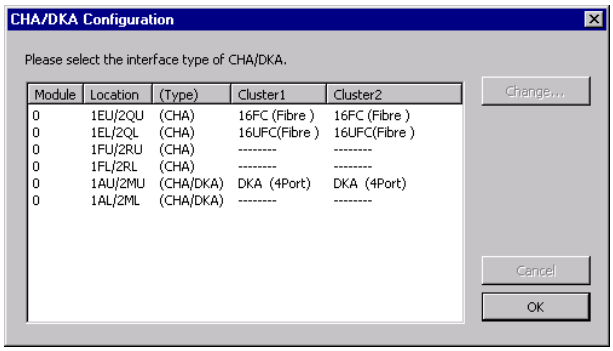
After the setting is made, select (CL) the [>>Next]. Go to step (9).



Copyright © 2010, Hitachi, Ltd.

(8) <Setting the DKA>

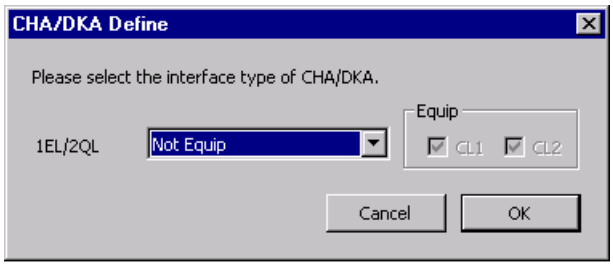
In the 'CHA/DKA Configuration' window, select the location(s) where the DKA is to be removed from and select (CL) the [Change...]. Advances the routine to step (8)-1.
After the setting is completed, select (CL) [OK].
The routine is returned to step (7).



Refer to INST01-50 for the SVP screen display and the conversion of the option type names.

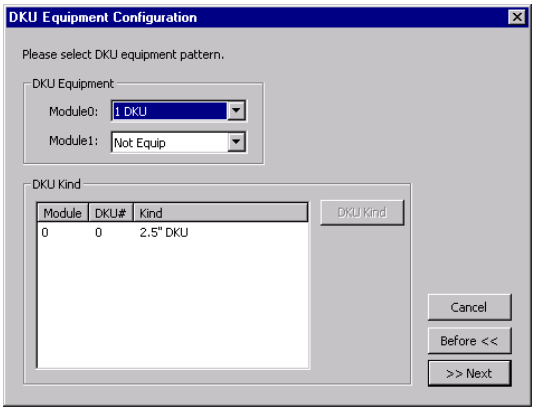
(8)-1 <Select the DKA type>

In the 'CHA/DKA Define' window, select the [Not Equip].
After the setting is completed, select (CL) the [OK].
The routine is returned to step (8).



(9) <Setting the DKU frame>

Define the DKU equipment in the 'DKU Equipment Configuration' window.
After the setting is made, select (CL) the [>>Next].
Go to step (10).



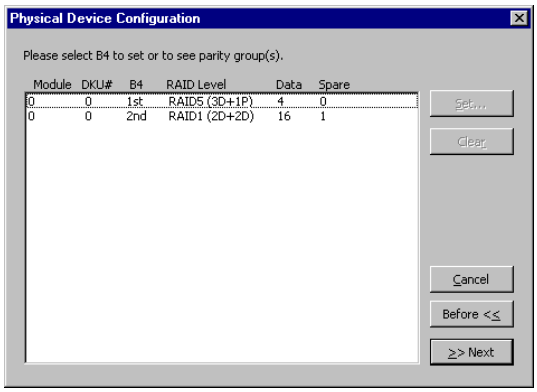
Copyright © 2010, Hitachi, Ltd.

(10) <Changing the drive configuration information>

Define the drive configuration according to the 'Physical Drive Configuration' window.
The detailed procedure is explained below.

[Set...]: Defines a parity group or a spare disk. The routine goes to step (10)-1.

[Clear]: Clears the setting of the B4.



After all the settings are made, select (CL) the [>>Next]. Go to step (11).
When the [Before<<] is selected (CL), the window is returned to step (9).

• Relation between B4 and HDU Location (Refer to LOC02-40 ~ 50 for Location.)

B4	Location	
	DKU	HDU
1st	DKU-00	HDU-000, 001, 002, 003
2nd	DKU-00	HDU-004, 005, 006, 007

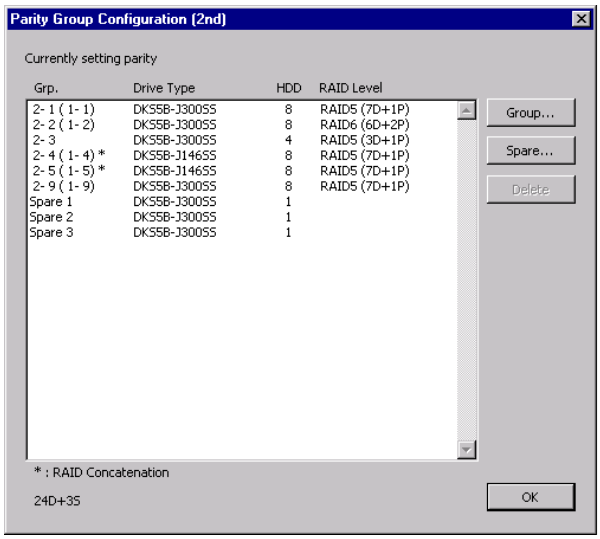
(10)-1 <Defining the parity group>

Select (CL) the group to be removed, and then select (CL) the [Delete] in the 'Parity Group Configuration' dialog box.

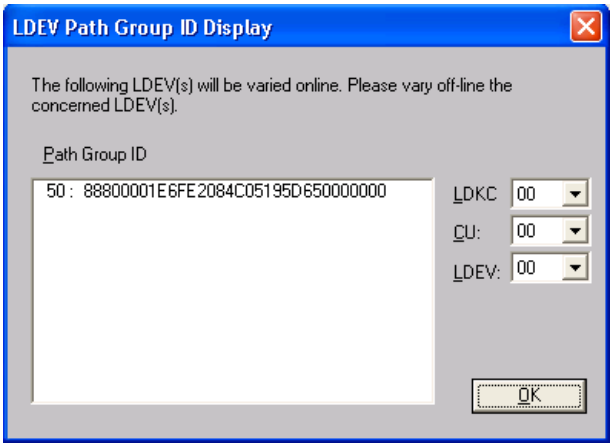
After the setting is made, select (CL) the [OK]. The routine is returned to step (10).

Grp*: A parity group for which the RAID concatenation is set.



(11) <Display LDEV Path Group ID>

When some of the LDEVs to be uninstalled are connected to hosts because a Vary On-line operation was performed, the "LDEV Path Group ID Display" window appears.



LDKC/CU/LDEV:

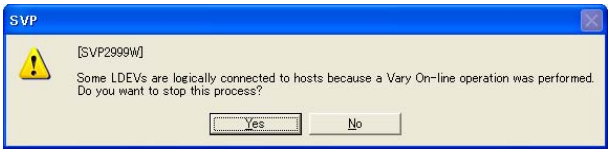
Only the LDEVs to be installed, which are connected to hosts, are displayed

Path Group ID:

List of Path Group IDs of the hosts connected to the LDEVs to be uninstalled.

Depending on the host, the LPAR information may be registered in the 4th byte of the Path Group ID (7th and 8th characters on the window. "01" on the window above), and the host serial number may be registered in the 5th and 6th bytes (9th to 12th characters on the window. "E6FE" on the window above).

After clicking [OK], click [Yes] for the message, "Some LDEVs are logically connected to hosts because a Vary On-line operation was performed. Do you want to stop this process?"

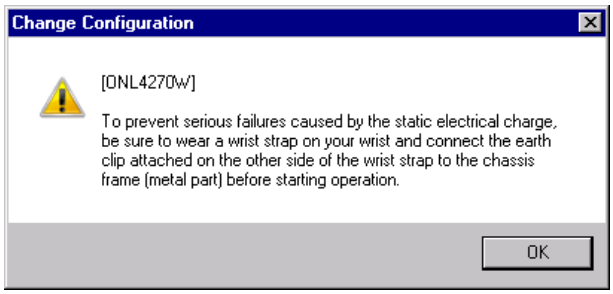


After that, disconnect all the LDEVs to be uninstalled from the host and perform the uninstallation again.

Copyright © 2010, Hitachi, Ltd.

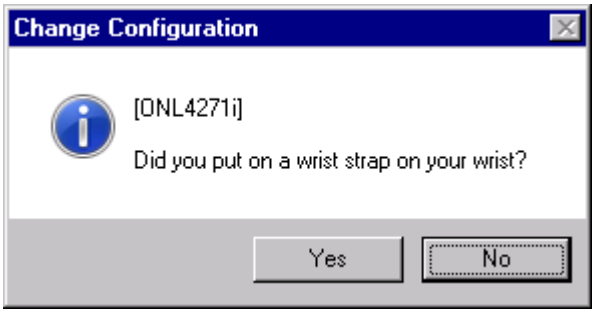
(12) <Wear a wrist strap>

Select (CL) [OK] in response to “To prevent serious failures caused by the static electrical charge, be sure to wear a wrist strap on your wrist and connect the earth clip attached on the other side of the wrist strap to the chassis frame (metal part) before starting operation.”.



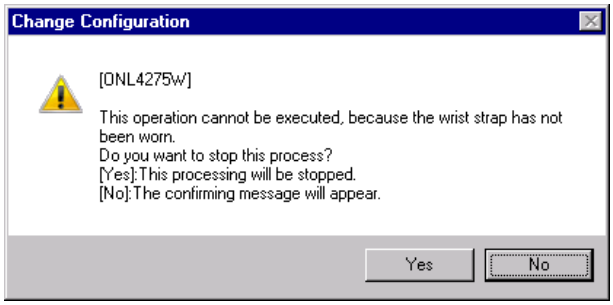
(12)-1 <Confirm wearing wrist strap>

In response to a message, “Did you put on a wrist strap on your wrist?”.
Select [Yes] when wrist strap is on your wrist.
Select [No] when there is no wrist strap on your wrist.
When the [No] is selected, go to Step (12)-2.



(12)-2

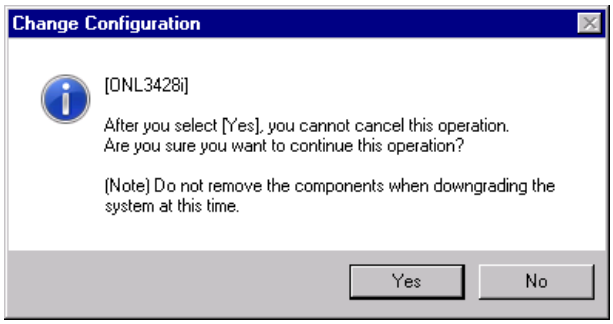
In response to a message, “This operation cannot be excuted, because the wrist strap has not been worn. Do you want to stop this process?
[Yes]: This processing will be stopped.
[No]: This confirming message will appear.”
When [Yes] is selected (CL), the routine is returned to Step (2) on page INST04-01C-60.
When [No] is selected (CL), returned to Step (12).



Copyright © 2010, 2014, Hitachi, Ltd.

(13) <Starting the removal>

In response to a message, “After you select [Yes], you cannot cancel this operation. Are you sure you want to continue this operation? (Note) Do not remove the components when downgrading the system at this time.” select (CL) [Yes].

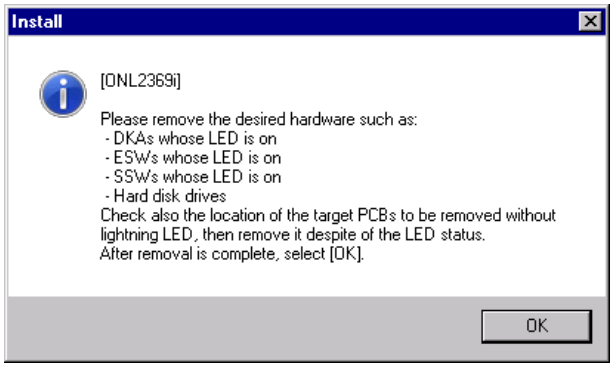


When the [No] is selected, the routine is returned to Step (2) on page INST04-01C-60.

(14) <Removing the hardware>

Do not push the [OK] button at this time yet. A message, “Please remove the desired hardware such as:
- DKAs whose LED is on
- ESWs whose LED is on
- SSWs whose LED is on
- Hard disk drives

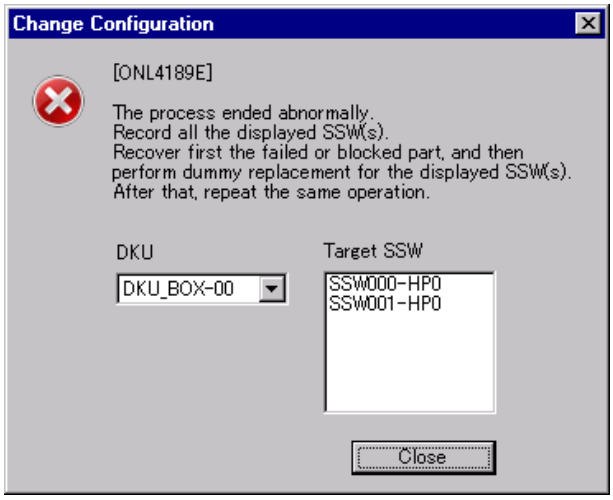
Check also the location of the target PCBs to be removed without lightning LED, then remove it despite of the LED status.
After removal is complete, select [OK].” is displayed.



When the Inter-Controller Connecting Kit (DKC-F710I-MDEXC) needs to be removed, remove it together with the ESW.

Copyright © 2010, Hitachi, Ltd.

Perform the dummy replacement of the displayed SSW(s) when the window is displayed. Select the DKU list and record the displayed SSW(s) because two or more DKU might be listed.
Select (CL) [Close] button and follow the recovery procedure below.



Refer to the subsystem configurations.
(Refer to INST05-510)
And follow the recovery procedure #1 if DKU removal was not completed, or follow #2 if it was completed.

Note: If selecting (CL) [Close] button without recording the SSW(s) to be replaced, set all the SSW connected to the HDD to be uninstalled to the recorded status when performing either of the following recovery procedures.

<Recovery procedure #1>
(1) Refer to the Maintenance window, and if any part is found to fail, recover it by replacement.
(2) Perform dummy replacement of all the recorded SSW(s).
(3) Uninstall again the DKU frame.

<Recovery procedure #2>
(1) Refer to the Maintenance window, and if any part is found to fail, recover it by replacement.
(2) To perform the dummy replacement of the recorded SSW, first remove the cable connected with the DKU to be replaced, when the SSW remained removed, and then mount the SSW.
(3) If any cable still remained connected to the DKU to be uninstalled and also connected to the SSW not recorded, remove the cable without performing SSW replacement.

2. De-Installation of Drive

2-1 In case of 3.5 inch /2.5 inch drive

> Notice: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

To increase drives in DKU, opening the FAN door of DKU is necessary.
Though there are four FAN doors per DKU, only one door can be opened at once.
Therefore, the FAN door can be opened from ① to ④ order by repeating the procedure from a to h.

a. Loosen the two screws and open the FAN door.

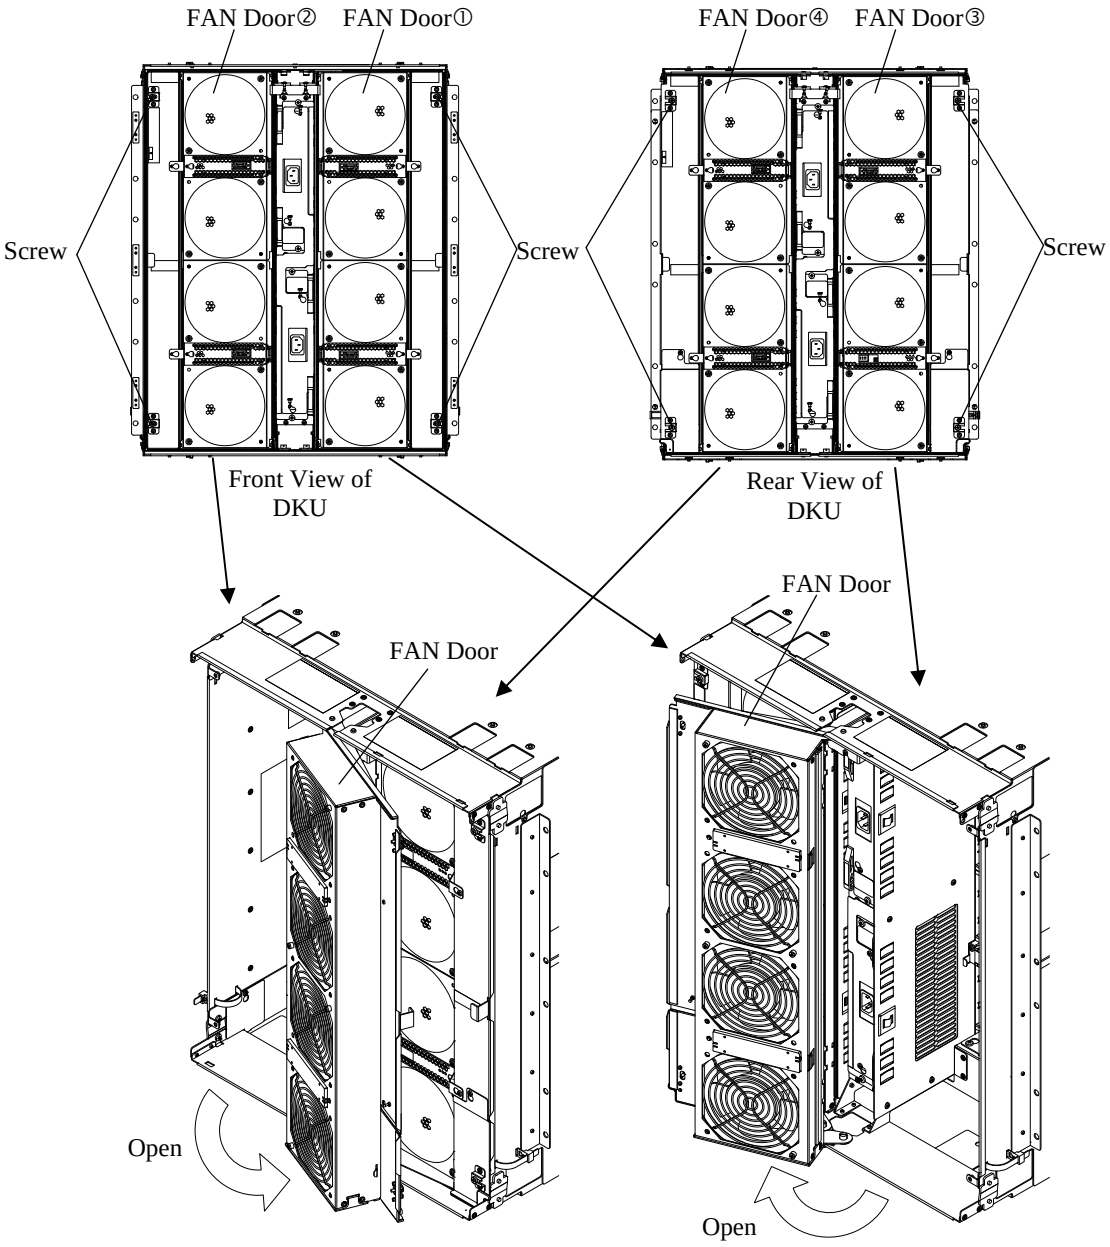

Fig. 4.1.4.3-7 Opening of FAN Door

Copyright © 2010, Hitachi, Ltd.

b. Check that the Shut Down LED on the HDDPWR corresponding to drive (HDD/SSD) is turned on. (It should be RED.) Refer to Fig. 4.1.4.3-8 or 4.1.4.3-9.

In the case of DKU for 3.5 inch drive

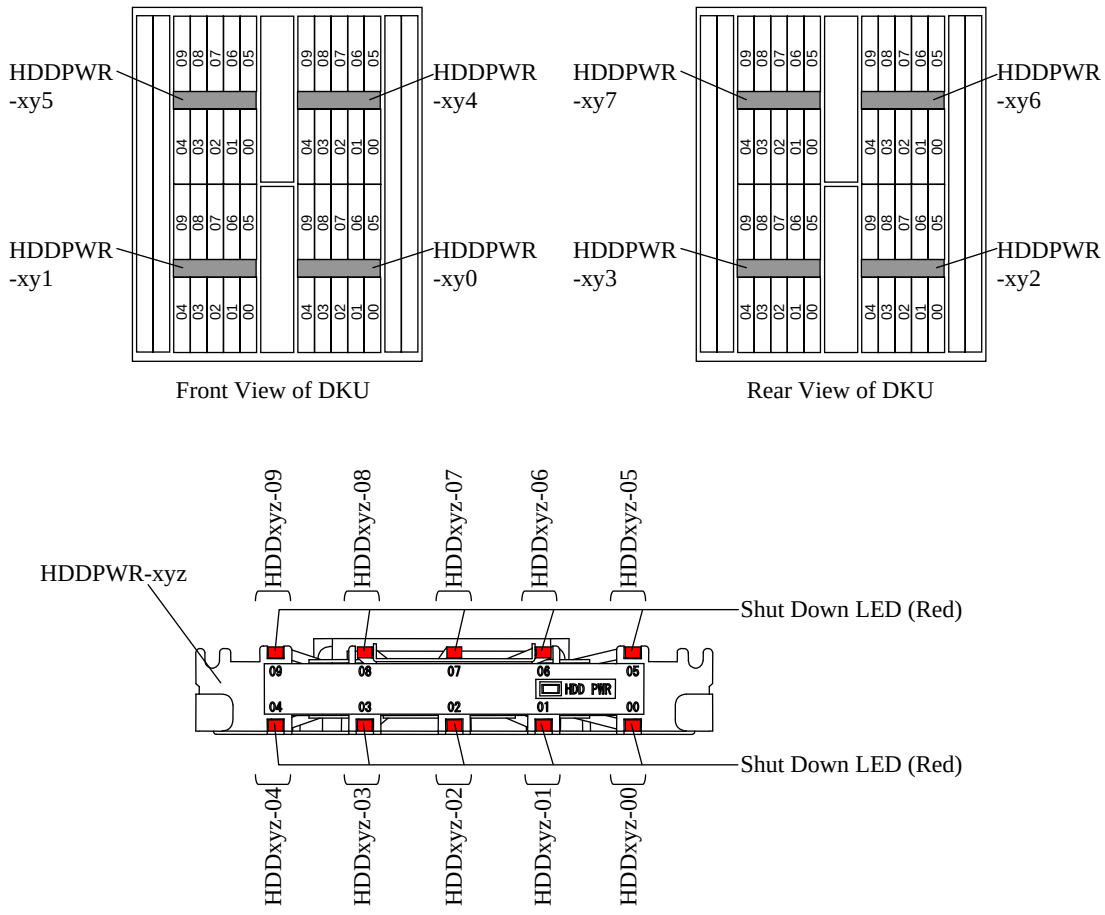

Fig. 4.1.4.3-8 Checking of Shut Down LED (In the case of DKU for 3.5 inch drive)

Copyright © 2010, Hitachi, Ltd.

In the case of DKU for 2.5 inch drive

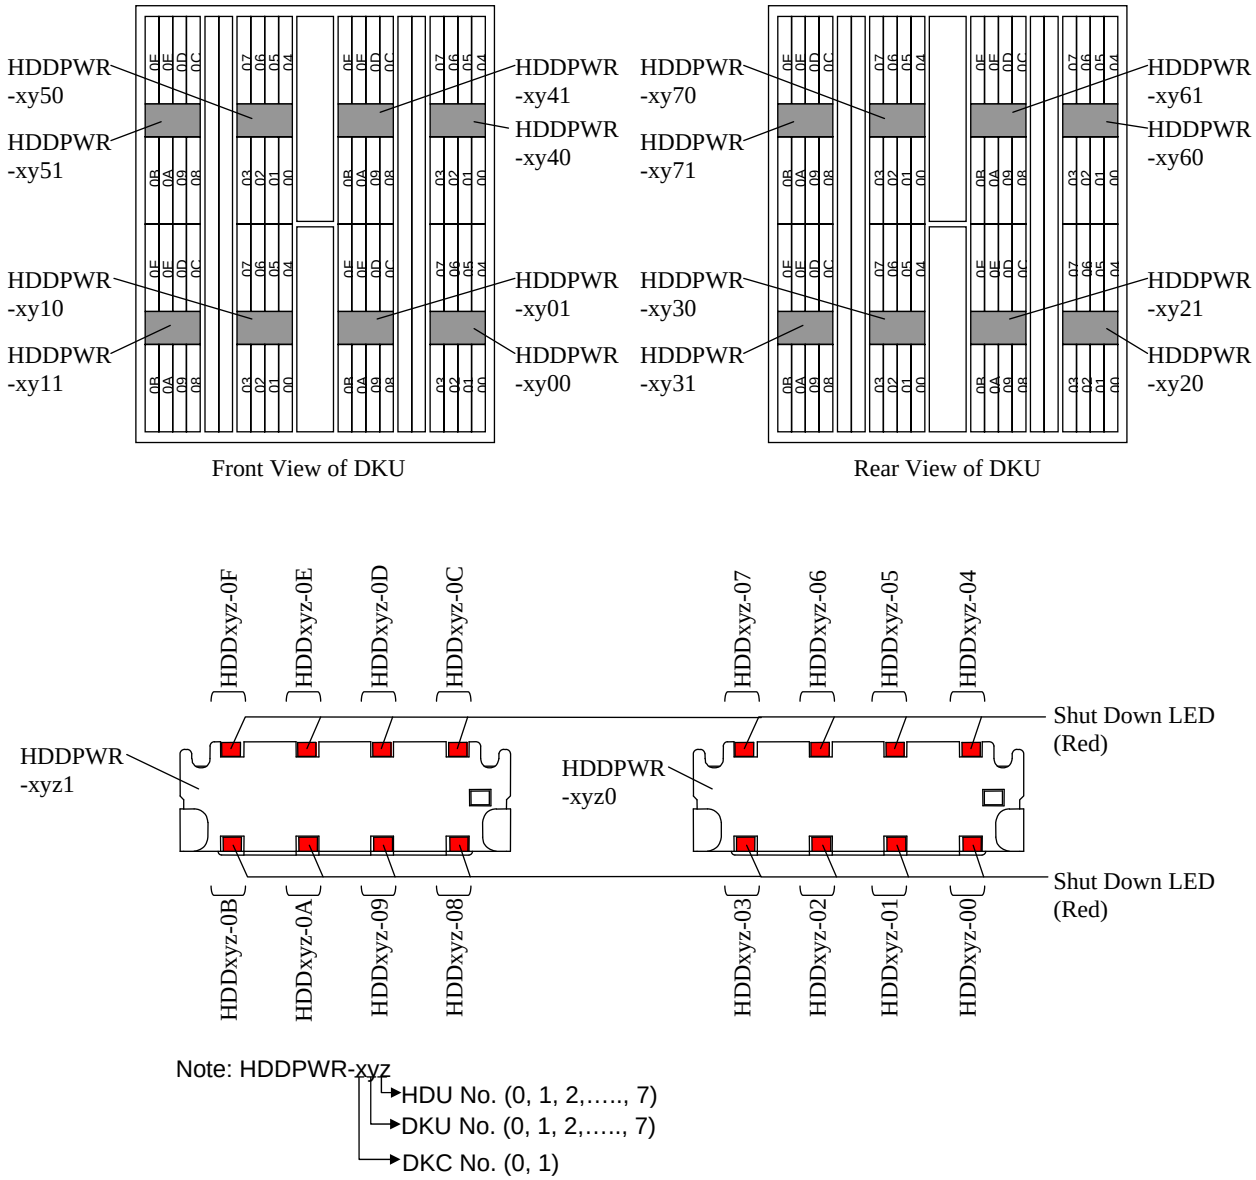

Fig. 4.1.4.3-9 Checking of Shut Down LED (In the case of DKU for 2.5 inch drive)

Copyright © 2010, Hitachi, Ltd.

Note: Since the HDD is a precision component, handle it very carefully not to apply a vibration or shock to it.

In the case of DKU for 3.5inch drive

c. Push up the stopper of drive, and bring the handle down. Don't pull the handle during this process.
d. Push down the handle.
e. Pull out the drive.
f. Fig. 4.1.4.3-11 illustrates the case of wrong procedure.

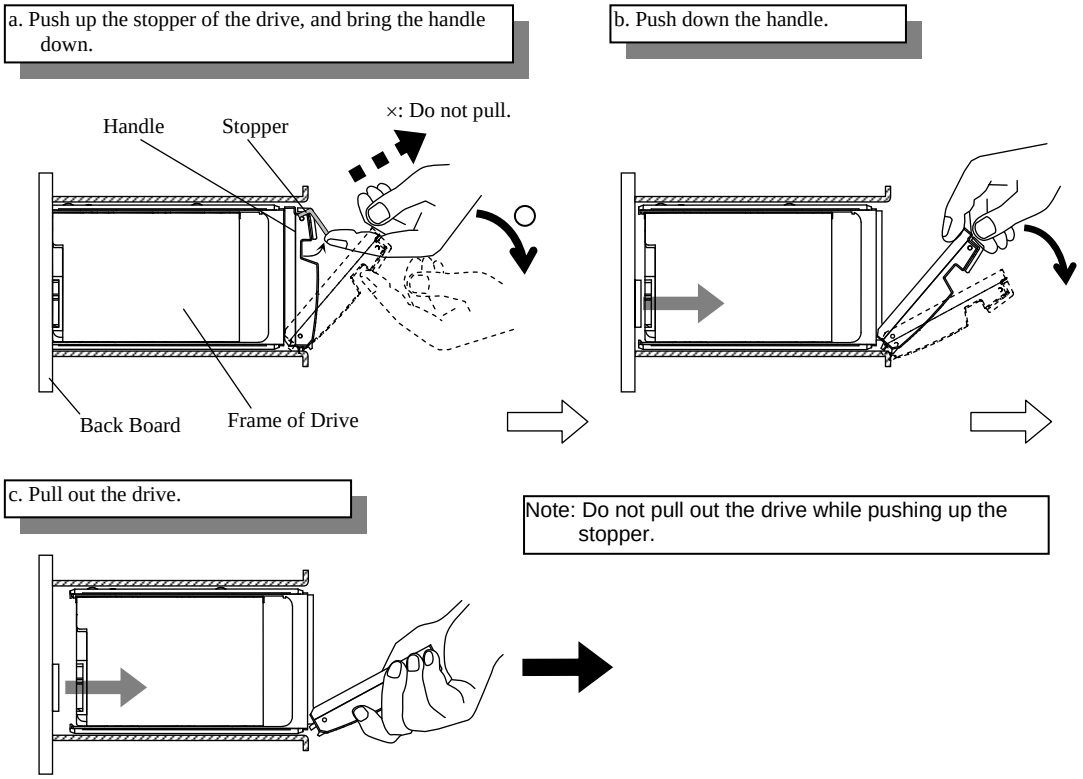

Fig. 4.1.4.3-10 Removal of Drive

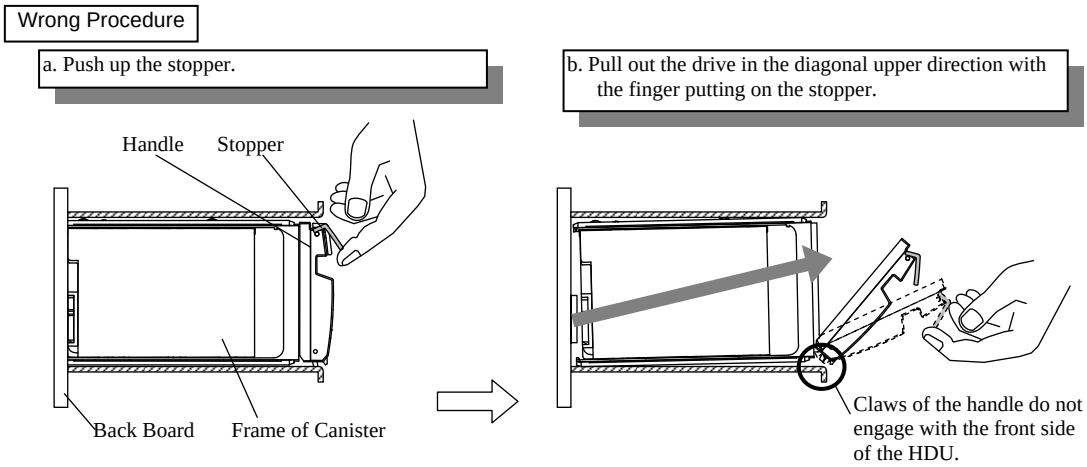

Fig. 4.1.4.3-11 Removal of Drive (Wrong Procedure)

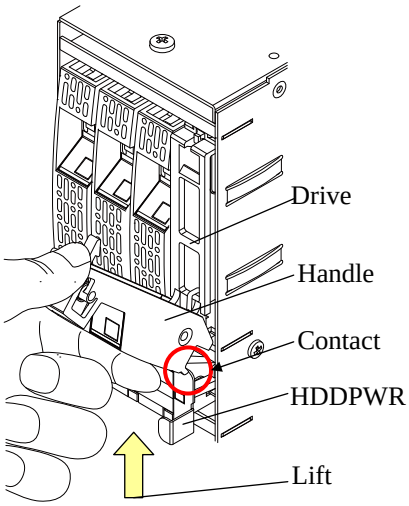
Copyright © 2010, Hitachi, Ltd.

In the case of DKU for 2.5inch drive



Instruction for the insertion and removal of the 2.5-inch drive:

The upper part of HDDPWR might come in contact with the lower part of the drive, and it becomes an obstruction of the insertion and removal at the time of the 2.5-inch drive insertion and removal. In this case, avoid the HDDPWR by lifting the drive lightly.

c. Push the stopper of drive, and bring the handle down. Don't pull the handle during this process.
d. Push down the handle.
e. Pull out the drive.
f. Fig. 4.1.4.3-13 illustrates the case of wrong procedure.

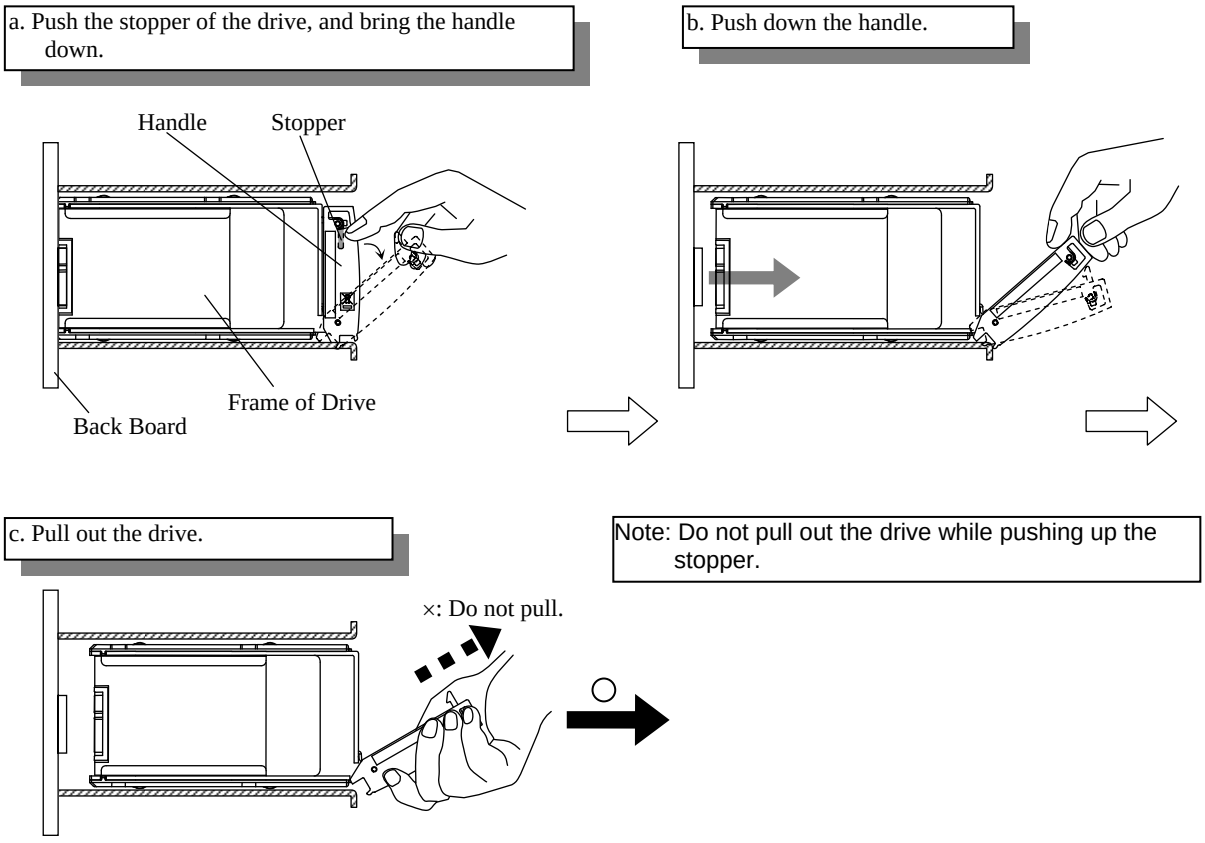


Fig. 4.1.4.3-12 Removal of Drive

g. Insert the dummy canister to the HDU.

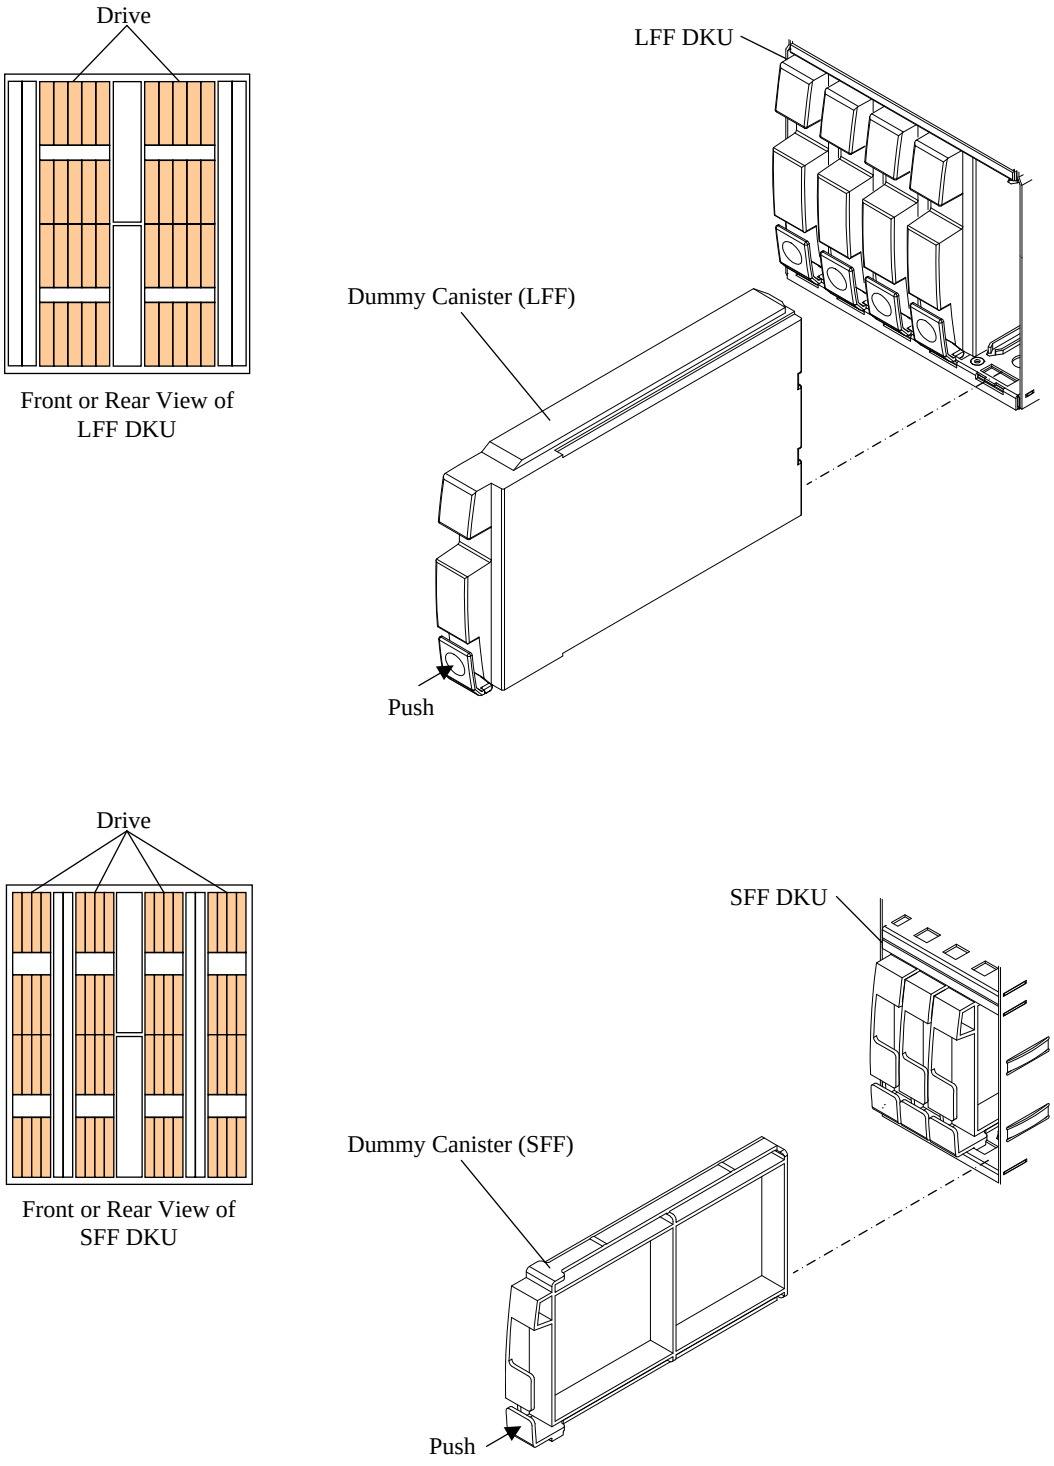

Fig. 4.1.4.3-14 Insertion of Dummy Canister

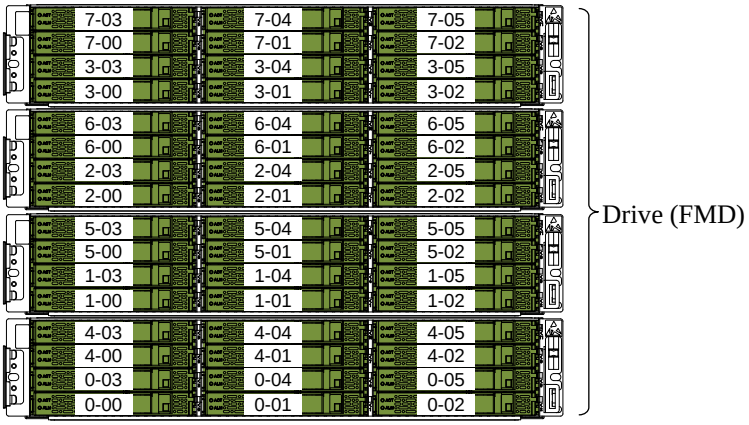
h. Close the FAN door, and tighten the two screws. (Refer to Fig. 4.1.4.3-7.)

Copyright © 2012, Hitachi, Ltd.

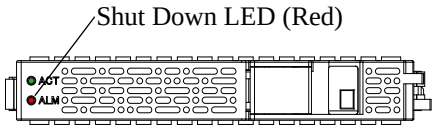
2-2 In case of FMD

Notice:	Just after the FMD is removed, the fans of the DKUPS equipped in the rear of the FBX DKU rotate at the highest speed. In 30 minutes after the removal of the FMD, the fans of the DKUPS rotate at the speed suitable for environmental temperature.

a. Check that the Shut Down LED on drive is turned on.



Front View of FBX DKU



Front View of Drive (FMD)

Fig. 4.1.4.3-15 Checking of Shut Down LED (In case of FMD)

Copyright © 2012, Hitachi, Ltd.

b. Pull the stopper of the drive handle toward you to have the lock off.
c. Tilt the handle toward you, and then remove the drive by pulling it out taking care not to apply a shock to it.

   Note: When handling the drive, hold the rail side because the shield spring is subject to breakage.

d. Install the dummy FMD into de-installation position of a drive.

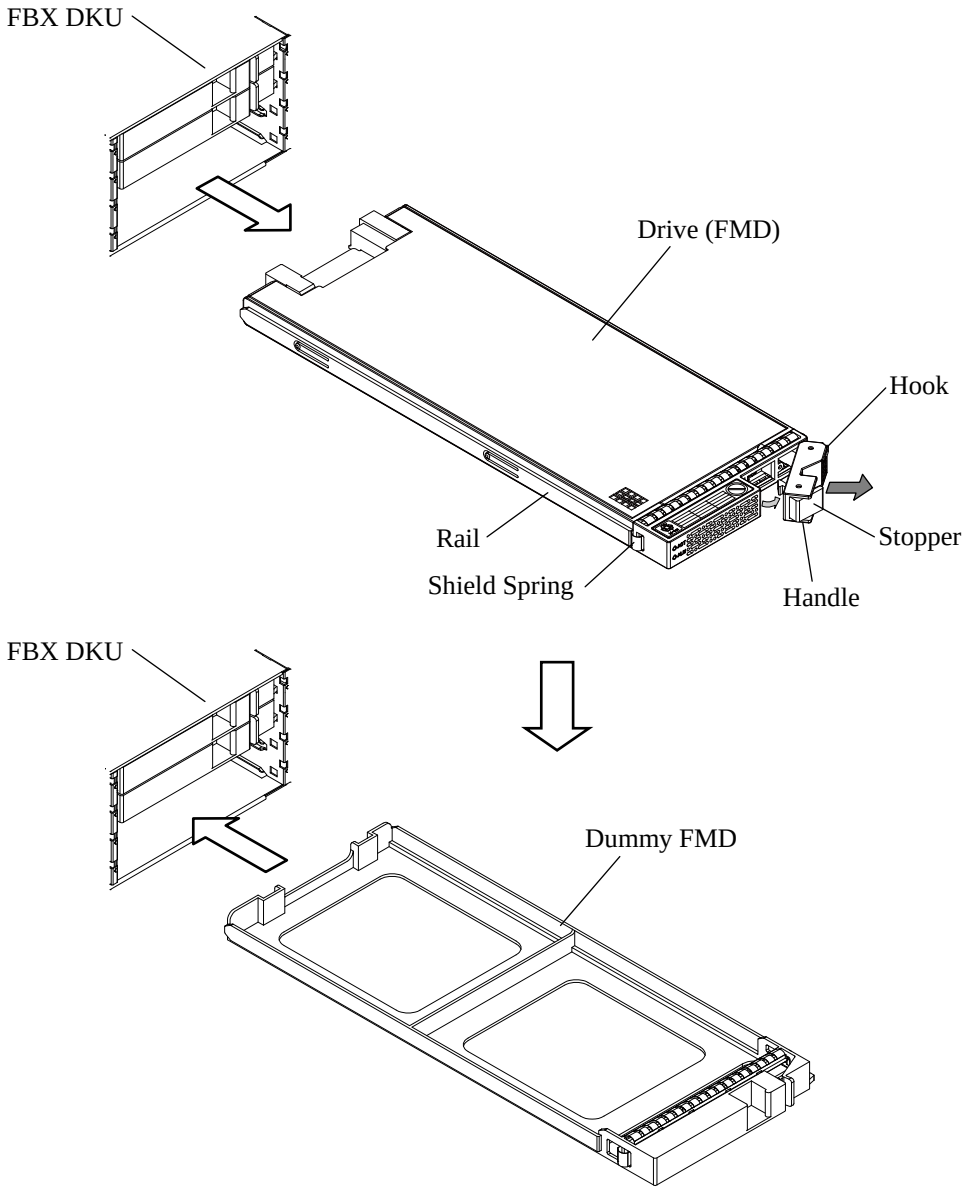


Fig. 4.1.4.3-16 Removal of Drive

4.1.4.4 De-Installation Procedure of Disk Adapter (DKC-F710I-SCA)

Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

1. Confirmation of the Shut Down LED
   a. While referring to Fig. 4.1.4.4-1 and Table 4.1.4.4-1, check the Shut Down LED on the PCB

CAUTION: A system down may be caused if the Maintenance jumper is inserted in a PCB other than that to be removed. Make sure that it is a PCB to be added.

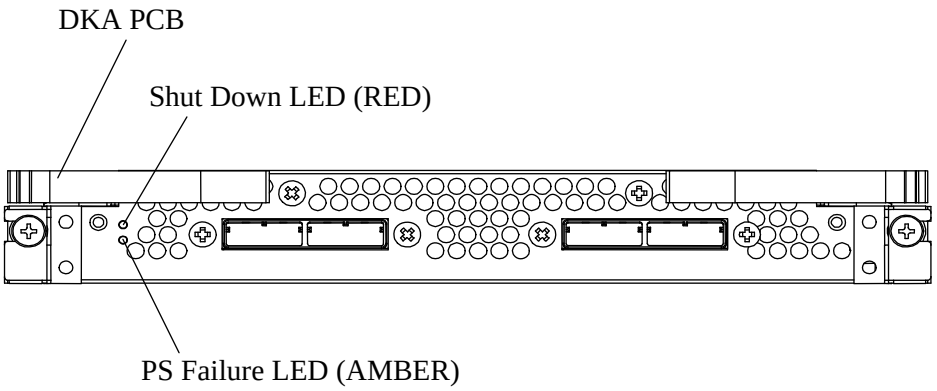

Fig. 4.1.4.4-1 Location of the Shut Down LED

Table 4.1.4.4-1 PCB Location List

DKC	Addition No.	Location No.		Number of DKAs set through the SVP		Remarks
		Cluster 1	Cluster 2			
DKC-0	Basic	DKA-1AU	DKA-2MU	2	4	
	Option 1	DKA-1AL	DKA-2ML	—		
DKC-1	Basic	DKA-1LU	DKA-2XU	2	4	
	Option 1	DKA-1LL	DKA-2XL	—		

Copyright © 2010, Hitachi, Ltd.

2. Disconnection of cables

In the case of Basic in DKC-0

a. Disconnect the cables from the DKA PCBs.

CAUTION: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

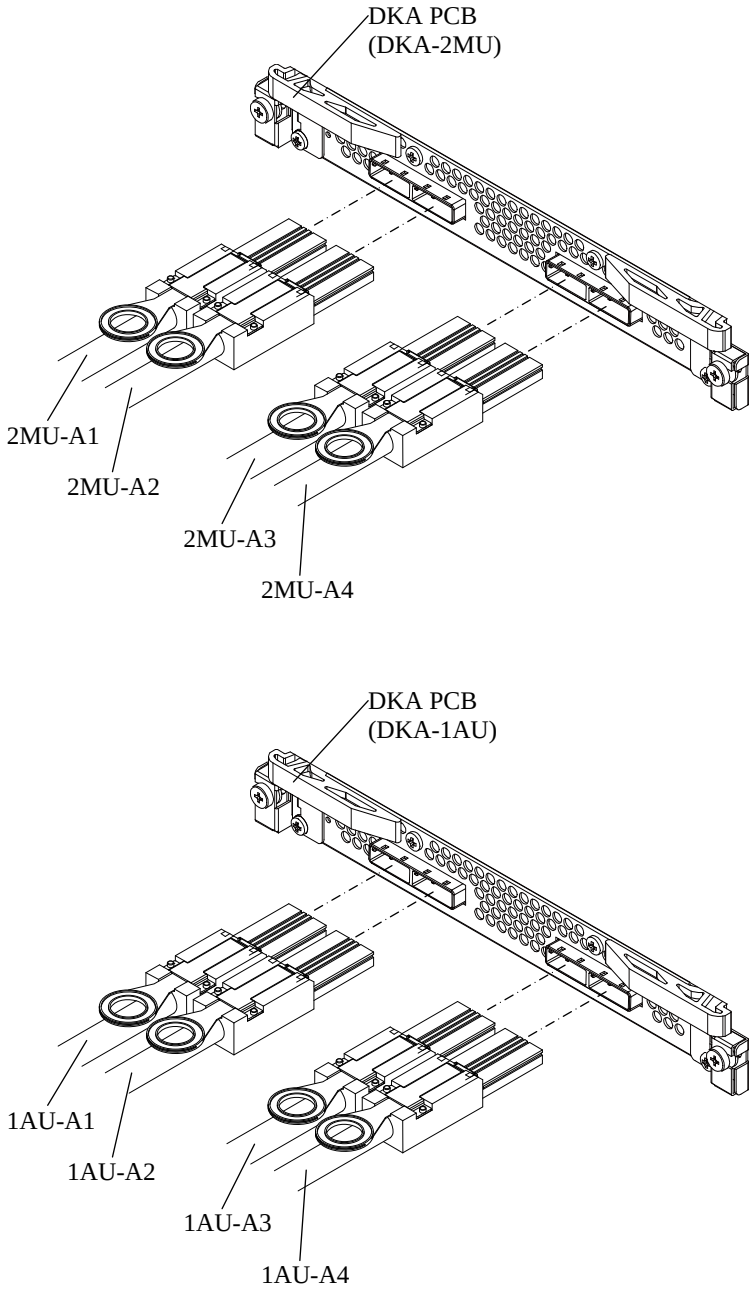

Fig.4.1.4.4-2 Disconnection of cables (Basic in DKC-0)

Copyright © 2010, Hitachi, Ltd.

In the case of Option 1 in DKC-0

a. Disconnect the cables from the DKA PCBs.

CAUTION: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.

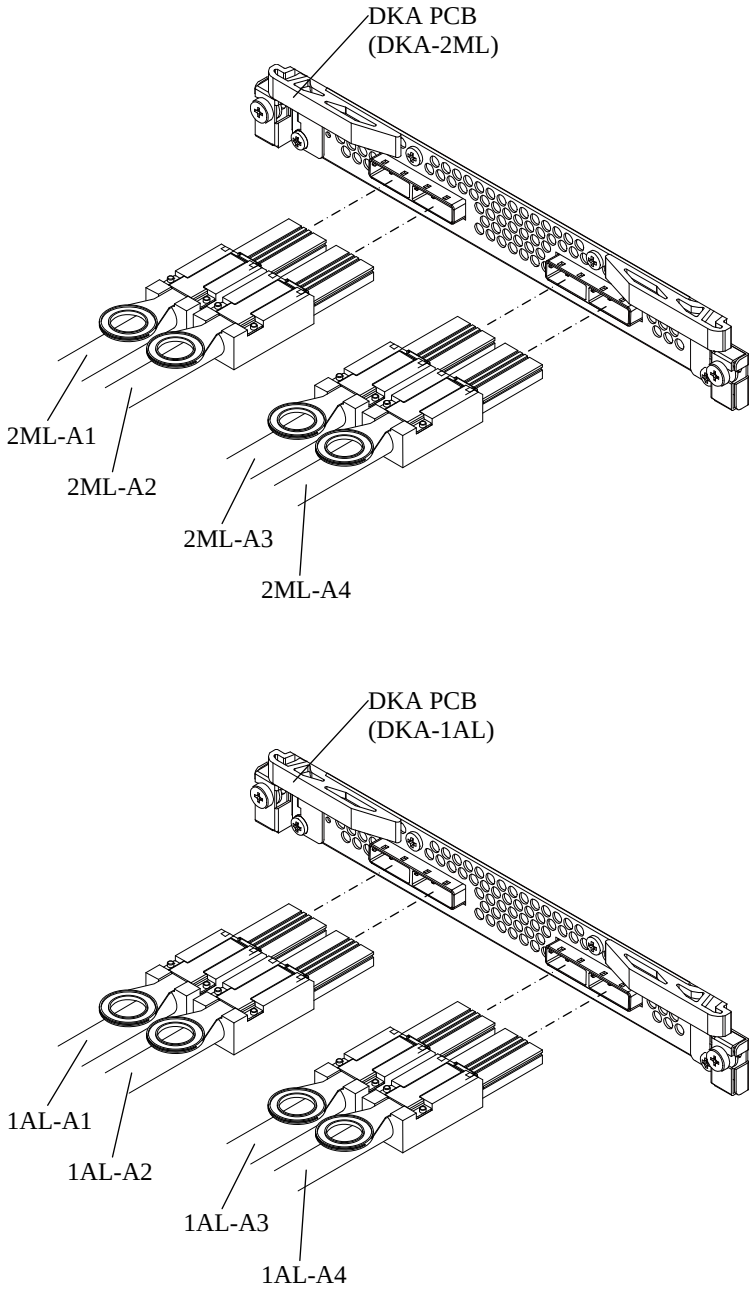

Fig.4.1.4.4-3 Disconnection of Cables (Option 1 in DKC-0)

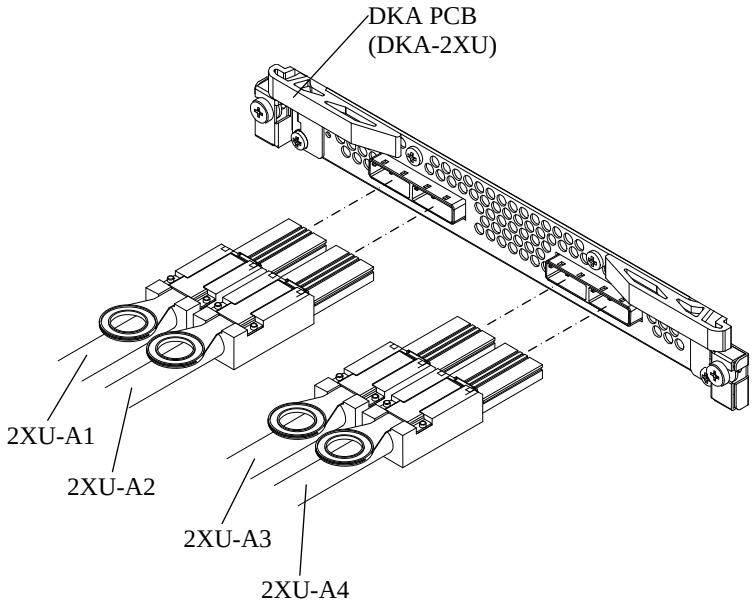
Copyright © 2010, Hitachi, Ltd.

In the case of Basic in DKC-1

a. Disconnect the cables from the DKA PCBs.

CAUTION: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.



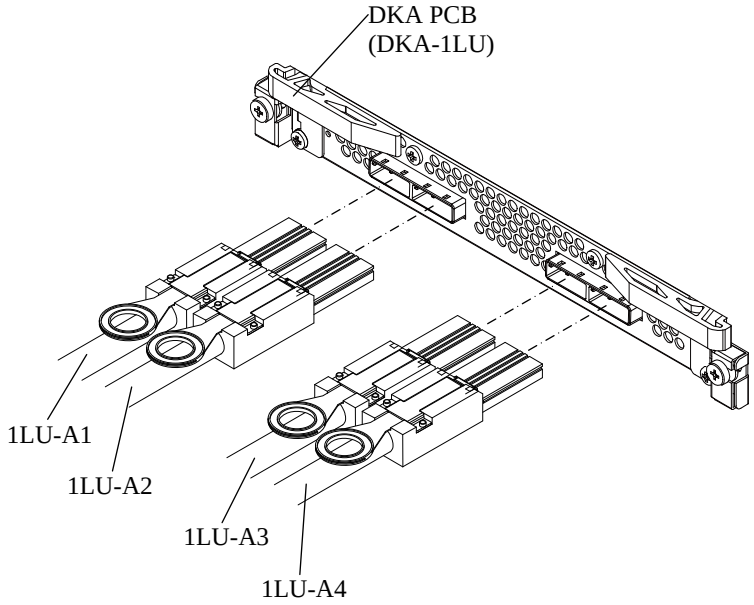


Fig.4.1.4.4-4 Disconnection of Cables (Basic in DKC-1)

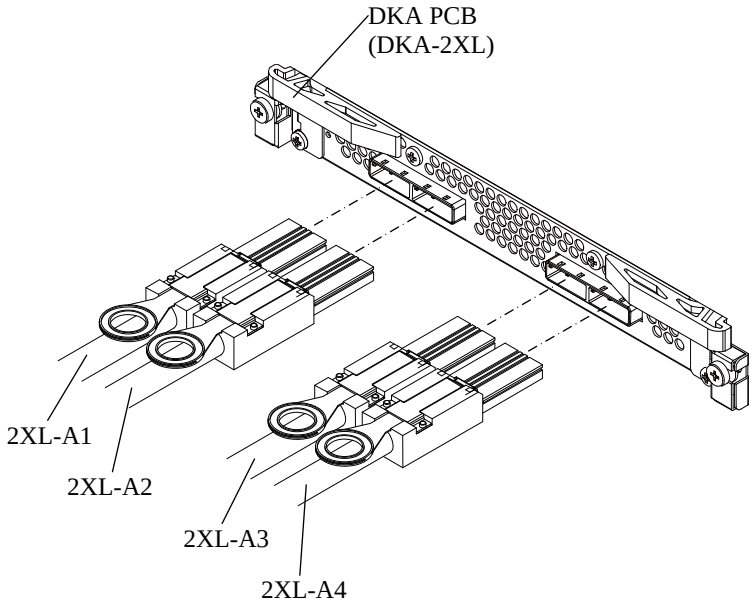
Copyright © 2010, Hitachi, Ltd.

In the case of Option 2 in DKC-0

a. Disconnect the cables from the DKA PCBs.

CAUTION: A serious failure occurs if any of cables/connectors is wrongly connected. Since a label bearing a connection destination is affixed on each cable/connector, work very carefully referring to it and the wiring diagram.



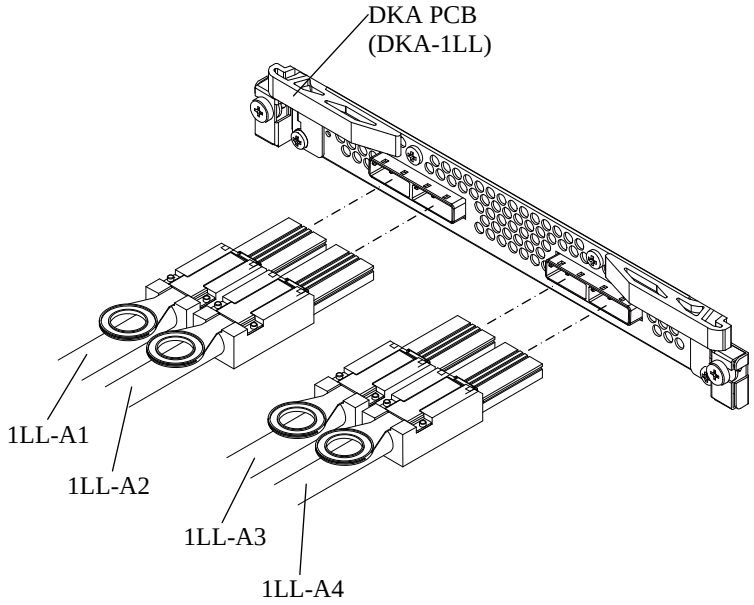


Fig.4.1.4.4-5 Disconnection of Cables (Option 1 in DKC-1)

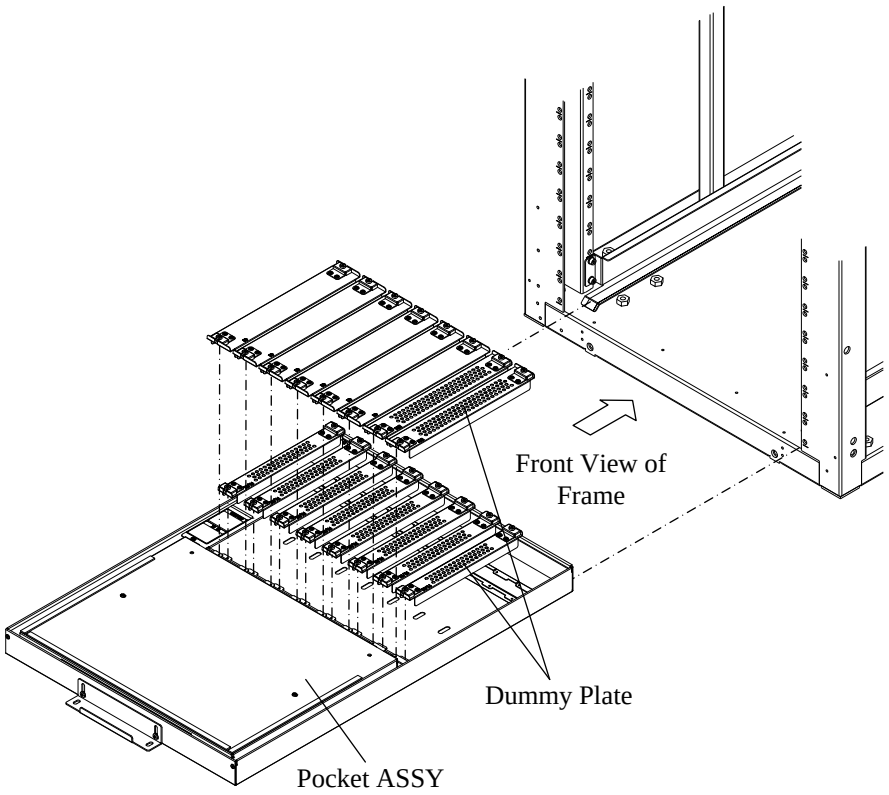
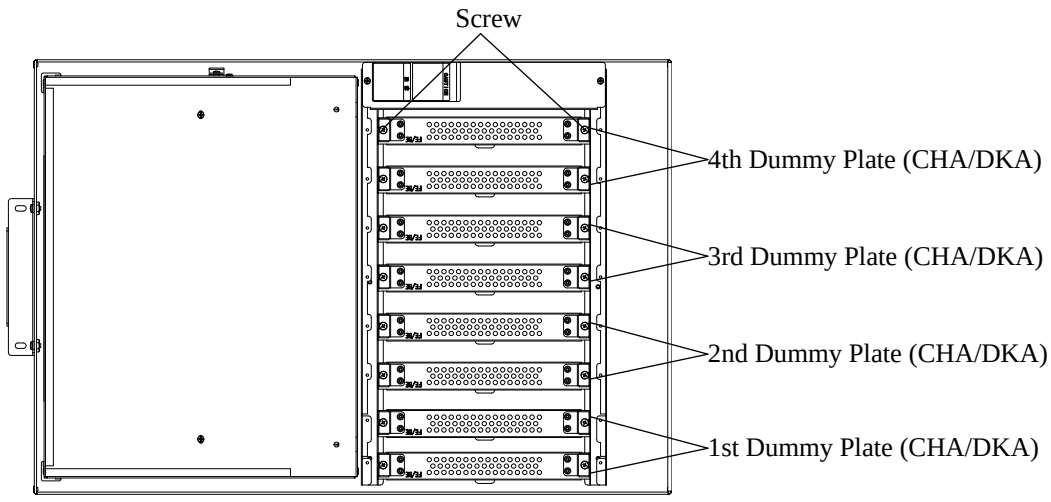
3-3 Removal of Dummy Plates

a. Remove the pocket ASSY from the front of the frame.
b. Loosen the four screws and remove the two dummy plates from the pocket ASSY. When dummy plates are installed in the upper part, remove the upper dummy plates once, remove the lower dummy plates, and then install the upper dummy plates again.
c. Install the pocket ASSY in the front of the frame.





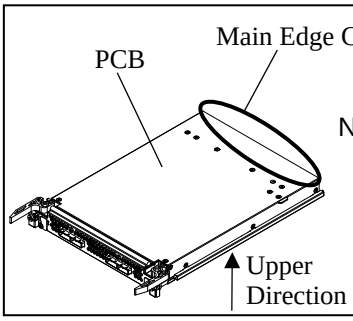
Top View of Pocket ASSY

Fig. 4.1.4.4-6 Removal of Dummy Plates

Copyright © 2010, 2011, Hitachi, Ltd.

4. Removal of the PCBs
   a. Loosen the screws and remove the PCBs from the DKC.

CAUTION: A serious failure occurs if a wrong PCB is removed.
Remove the PCB after making sure that the Shut Down LED is on.



Note: When removing the PCB, hold the right and left of the PCB with both hands, and pull it out straight not to contact the neighboring PCB.
(If it thinks that it is hard to extract, raise and extract a little upwards.)

   b. Attach the dummy plates and fasten the screws.

Note: Install the dummy plate immediately after removing the PCB.
If the PCB is kept removed for a long time, the wind doesn't flow among installed PCBs, causing the PCBs' temperature rise which may result in temperature warning or temperature alarm.

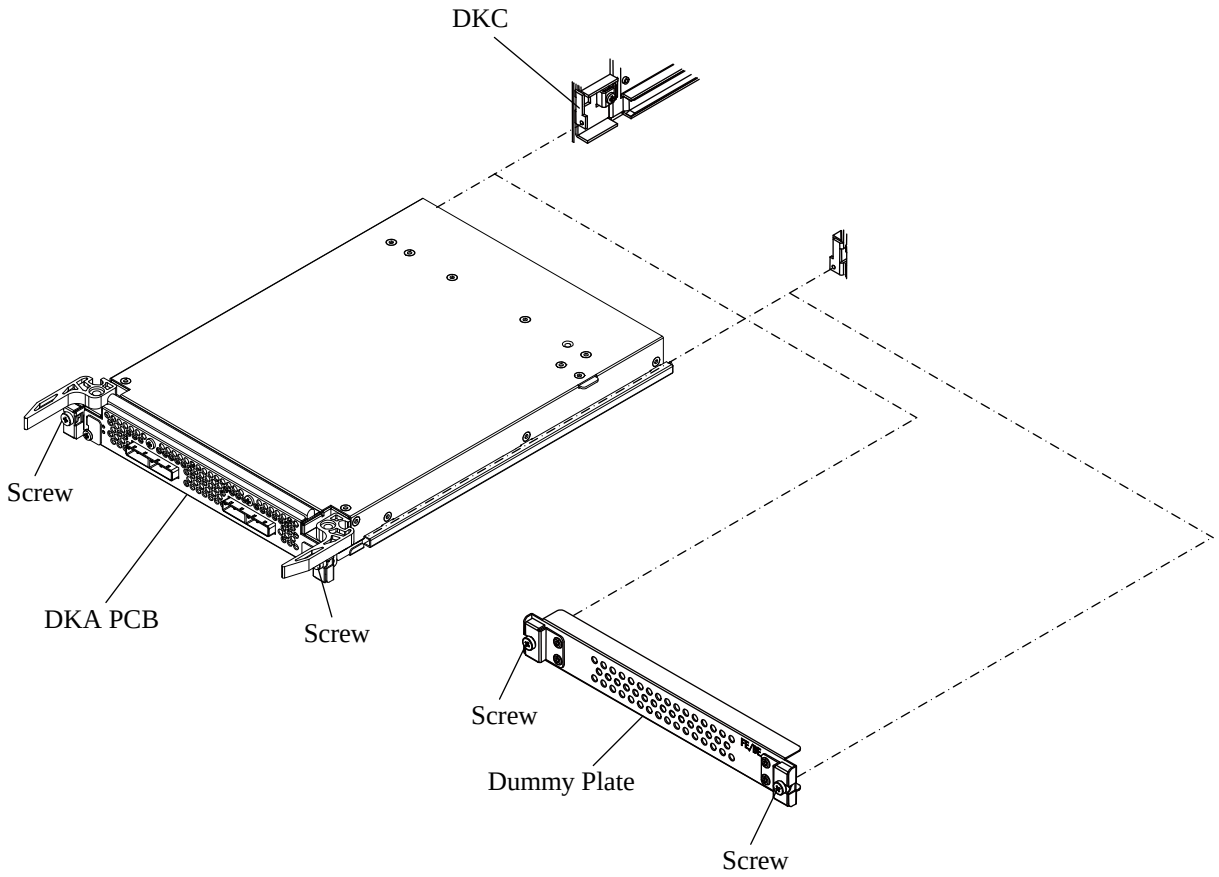


Fig. 4.1.4.4-7 Removal of PCB

Copyright © 2010, Hitachi, Ltd.

5. Removal of the nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Remove the nameplate from the nameplate tag.
   c. Attach all the nameplate tags with the screw.

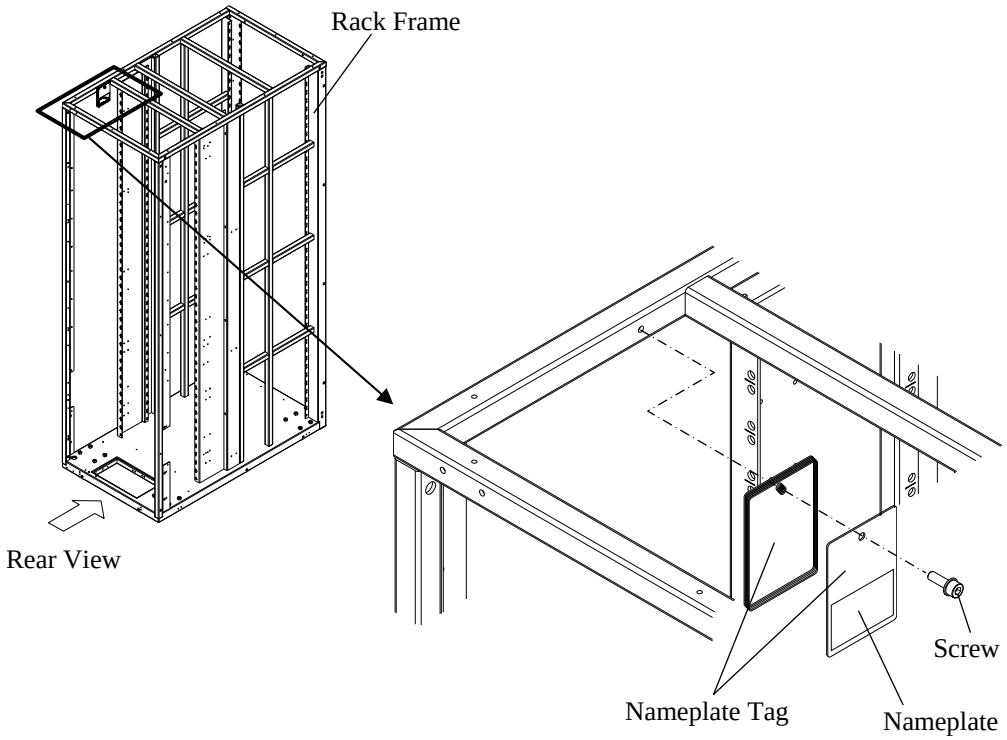

Fig. 4.1.4.4-8 Removal of Nameplate

4.1.4.5 De-Installation Procedure of Express Switch (DKC-F710I-ESW)

De-Installation Condition

The Express Switch (DKC-F710I-ESW) is an indispensable option that is to be removed when the subsystem configuration of DKC is corresponding to the following conditions.

In case of DKC-0

When it corresponds to all the following two conditions, remove the second set (1SB/2SD)

- When the standard model is selected
- When the CHA is removed from the Option 2 (1FU/2RU) and the Option 3 (1FL/2RL) of the CHA slots
- When the DKA or the CHA is removed from the Option 1 (1AL/2ML) of the DKA slots

In case of DKC-1

When it corresponds to all the following two conditions, remove the second set (1SF/2SH)

- When the standard model is selected
- When the CHA is removed from the Option 2 (1HU/2UU) and the Option 3 (1HL/2UL) of the CHA slots
- When the DKA or the CHA is removed from the Option 1 (1LL/2XL) of the DKA slots

Twin DKC Model

For the twin DKC model, the ESWs that are installed in the DKC-0 and the DKC-1 should be the same in number.

- The ESWs (1SB/2SD/1SF/2SH) can be removed from the DKC-0 and the DKC-1 only when it meets both requirements of removing the ESWs from the ESW slot option 1 (1SB/2SD) of the DKC-0 and requirements of removing ESWs from the ESW slot option 1 (1SF/2SH) of the DKC-1.

Copyright © 2010, Hitachi, Ltd.

When the DKC-F710I-ESW is not removed, skip this procedure and go to the following procedure. Refer to Table 4.1.4.5-1.

Table 4.1.4.5-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When you need to remove Express Switch (DKC-F710I-ESW)	INST04-01C-800
2	When you do not need to remove Express Switch (DKC-F710I-ESW)	INST04-01C-840

1. Confirmation of the Shut Down LED

Note: Be sure to wear your wrist strap and attach to ground prior to performing the following work. This will ensure that the IC and LSI on the PCB are protected from static electricity.

a. While referring to Fig. 4.1.4.5-2 and Table 4.1.4.5-2, check the Shut Down LED on the PCB.

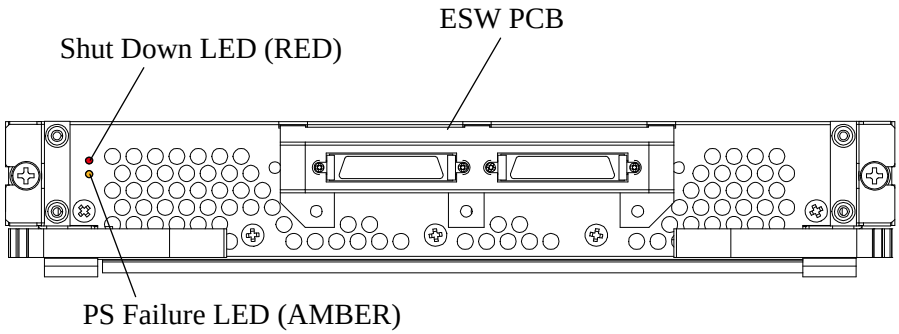

Fig. 4.1.4.5-2 Location of the Shut Down LED

Table 4.1.4.5-2 Location of the ESW PCB

DKC	Addition No.	Slot No.		Location No.		Remarks
		Cluster 1	Cluster 2	Cluster 1	Cluster 2	
DKC-0	Option 1	1SB	2SD	ESW-1SB	ESW-2SD	
DKC-1	Option 1	1SF	2SH	ESW-1SF	ESW-2SH

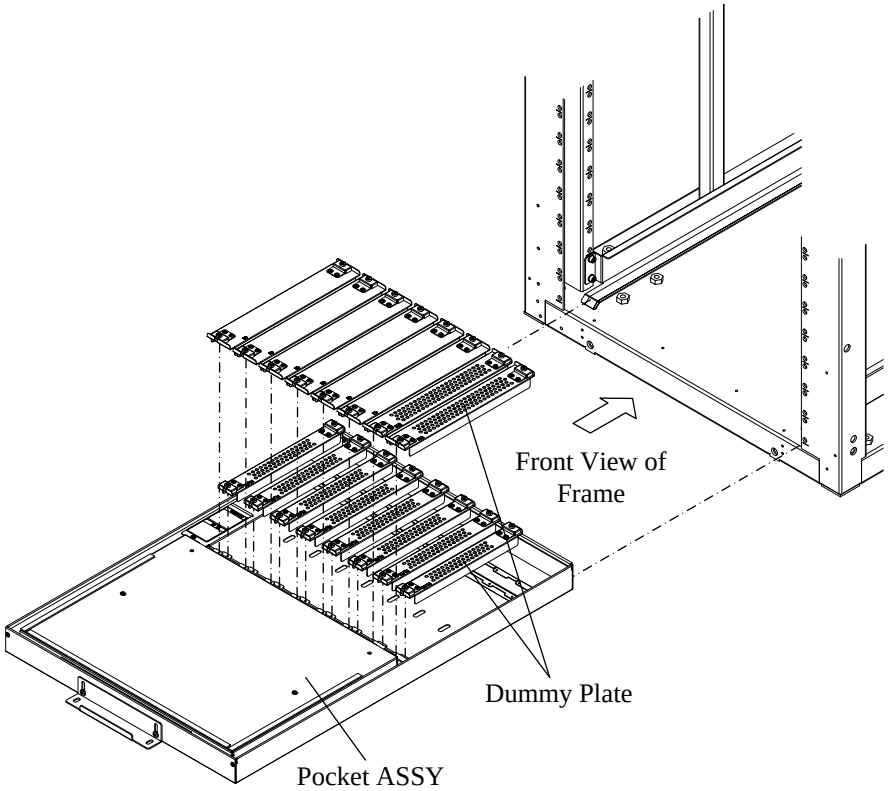
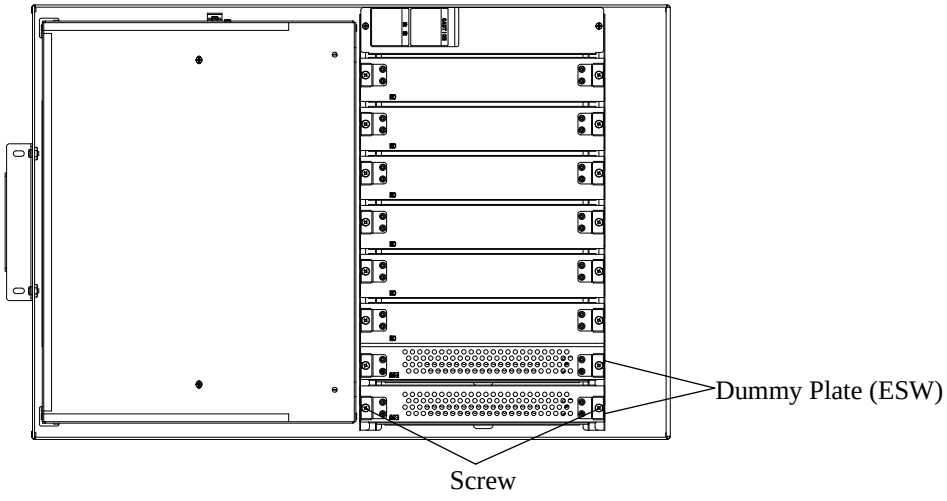
2. Removal of Dummy Plates
   a. Remove the pocket ASSY from the front of the frame.
   b. Loosen the four screws and remove the two dummy plates from the pocket ASSY.
   c. Install the pocket ASSY in the front of the frame.



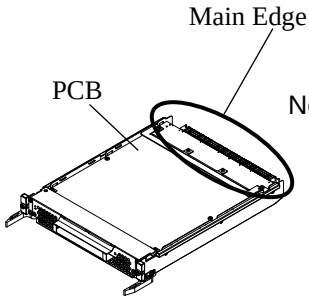


Top View of Pocket ASSY

Fig. 4.1.4.5-3 Removal of Dummy Plates

Copyright © 2010, 2011, Hitachi, Ltd.

3. Removal of ESW PCB
   a. Loosen the screws and remove the ESW PCBs. from the DKC. Refer to Table 4.1.4.5-2 and Fig. 4.1.4.5-4.
   b. Attach the dummy plates and fasten the screws.



Note: When removing the PCB, hold the right and left of the PCB with both hands, and pull it out straight not to contact the neighboring PCB.

4.1.4.6 De-Installation Procedure of Device Interface Cable HBU (DKC-F710I-HBUC)

De-Installation Condition

DKC-F710I-HBUC is a cable option to connect between 2nd DKA of DKC-x and DKU-x0 with the high performance model.
When the DKUx0 is necessary to de-install with the high performance model, this option is required to remove.
Refer to below Table 4.1.4.6-1 for the condition of DKC-F710I-HBUC installation, and go to the appropriate page.

Table 4.1.4.6-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable HBU (DKC-F710I-HBUC) is required to remove.	INST04-01C-860
2	When Device Interface Cable HBU (DKC-F710I-HBUC) is not required to remove.	INST04-01C-1190

When removing the cables between the LFF DKU and the DKC is necessary

1. Removing the Cables
   a. Remove the cables from the DKA PCBs.

CAUTION:	A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

4.1.4.7 De-Installation Procedure of Device Interface Cable BU (DKC-F710I-BUC)

De-Installation Condition

DKC-F710I-BUC is a cable option to connect between 1st DKA of DKC-x and DKU-x0. When the DKU-x0 is necessary to de-install, this option is required to remove.
Refer to below Table 4.1.4.7-1 for the condition of DKC-F710I-BUC de-installation, and go to the appropriate page.

Table 4.1.4.7-1 Work Procedure Table

No.	Condition of Work Procedure	Page

4.1.4.8 De-Installation Procedure of Device Interface Cable HUU (DKC-F710I-HUUC)

De-Installation Condition

DKC-F710I-HUUC is a cable option to connect between DKUs in the same chassis with the high performance model.
When the LFF DKU (DKU for 3.5 inch Drive) is removed from the upper level of the LFF DKU, or when the SFF DKU (DKU for 2.5 inch Drive) is removed from the upper level of the SFF DKU, with the high performance model, this option is required to de-install.
Refer to below Table 4.1.4.8-1 for the condition of DKC-F710I-HUUC installation, and go to the appropriate page.

Table 4.1.4.8-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable HUU (DKC-F710I-HUUC) is required to remove.	INST04-01C-1560
2	When Device Interface Cable HUU (DKC-F710I-HUUC) is not required to remove.	INST04-01C-1820

When removing the cables between the LFF DKU and the LFF DKU is necessary

1. Cable de-installation of the front right side of the DKU
   a. Loosen the four screws of the front right side of the DKUs, and open the two FAN doors.

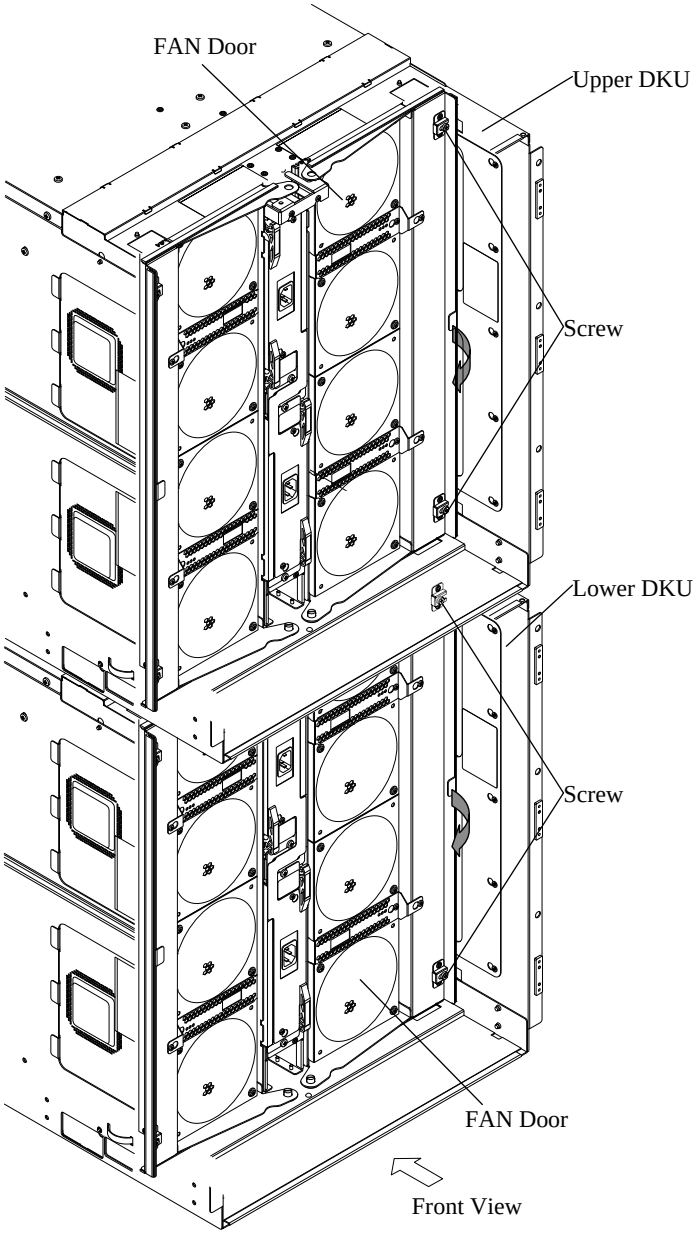

Fig. 4.1.4.8-3 FAN Door Opening

Copyright © 2010, 2011, Hitachi, Ltd.

b. Disconnect the two cables from the SSW PCBs of the front right side of the upper DKU by using a jig. Cap the cables afterward.
c. Disconnect the two cables from the SSW PCBs of the front right side of the lower DKU by using a jig. Cap the cables afterward.

CAUTION: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

4.1.4.10 De-Installation Procedure of Device Interface Cable HUS (DKC-F710I-HUSC)

De-Installation Condition

DKC-F710I-HUSC is a cable option to connect between LFF DKU (DKU for 3.5 inch Drive) and SFF DKU (DKU for 2.5 inch Drive) in the same chassis with the high performance model. When the SFF DKU is removed from the upper level of the LFF DKU, or when the LFF DKU is removed from the upper level of the SFF DKU, with the high performance model, this option is required to de-install.
Refer to below Table 4.1.4.10-1 for the condition of DKC-F710I-HUSC installation, and go to the appropriate page.

Table 4.1.4.10-1 Work Procedure Table

When removing the cables between the upper LFF DKU and the lower SFF DKU is necessary

1. Cable de-installation of the front right side of the DKU
   a. Loosen the four screws of the front right side of the DKUs, and open the two FAN doors.

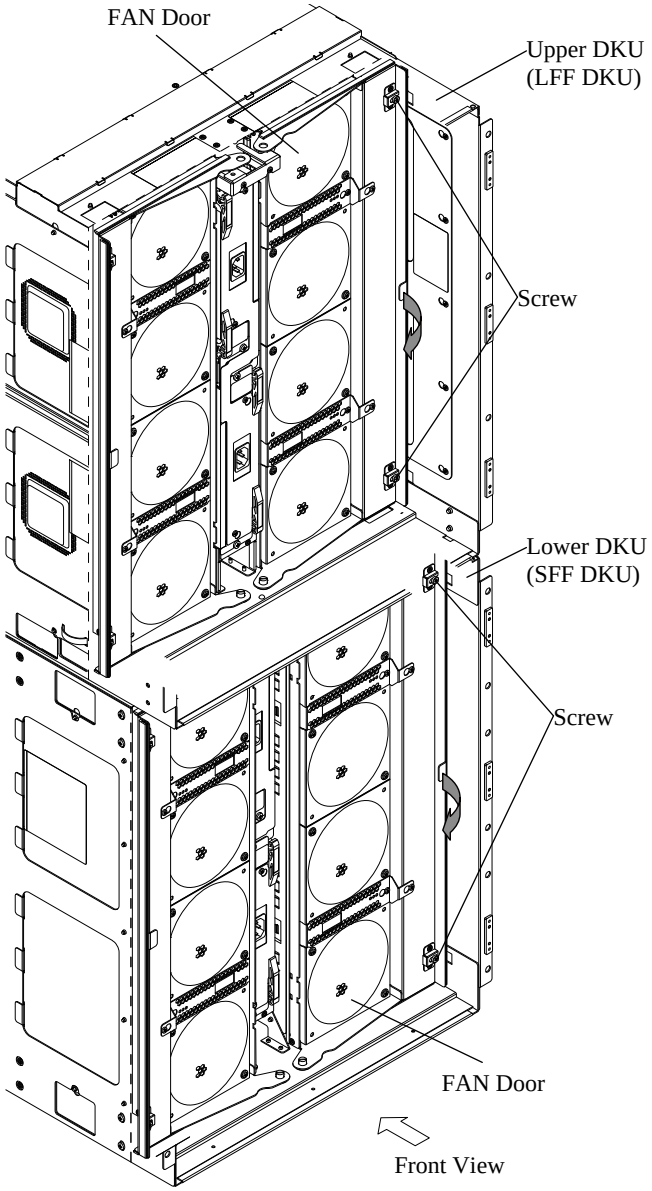

Fig. 4.1.4.10-2 FAN Door Opening

Copyright © 2010, 2011, Hitachi, Ltd.

b. Disconnect the two cables from the SSW PCBs of the front right side of the upper DKU by using a jig. Cap the cables afterward.
c. Disconnect the two cables from the SSW PCBs of the front right side of the lower DKU. Cap the cables afterward.

CAUTION: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

4.1.4.11 De-Installation Procedure of Device Interface Cable US (DKC-F710I-USC)

De-Installation Condition

DKC-F710I-USC is a cable option to connect between LFF DKU (DKU for 3.5 inch Drive) and SFF DKU (DKU for 2.5 inch Drive) in the same chassis.
When the SFF DKU is removed from the upper level of the LFF DKU, or when the LFF DKU is removed from the upper level of the SFF DKU, this option is required to de-install.
Refer to below Table 4.1.4.11-1 for the condition of DKC-F710I-USC installation, and go to the appropriate page.

Table 4.1.4.11-1 Work Procedure Table

No.	Condition of Work Procedure	Page

4.1.4.12 De-Installation Procedure of Device Interface Cable HRLEX (DKC-F710I-HRLEXC)

De-Installation Condition

DKC-F710I-HRLEXC is a cable option to connect between DKUs in the different chassis with the high performance model.
When disconnecting the DKUs from the different chassis with the high performance model, this option is required to de-install.
Refer to below Table 4.1.4.12-1 for the condition of DKC-F710I-HRLEXC installation, and go to the appropriate page.

Table 4.1.4.12-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable HRLEX (DKC-F710I-HRLEXC) is required to remove.	INST04-01C-2820
2	When Device Interface Cable HRLEX (DKC-F710I-HRLEXC) is not required to remove.	INST04-01C-3460

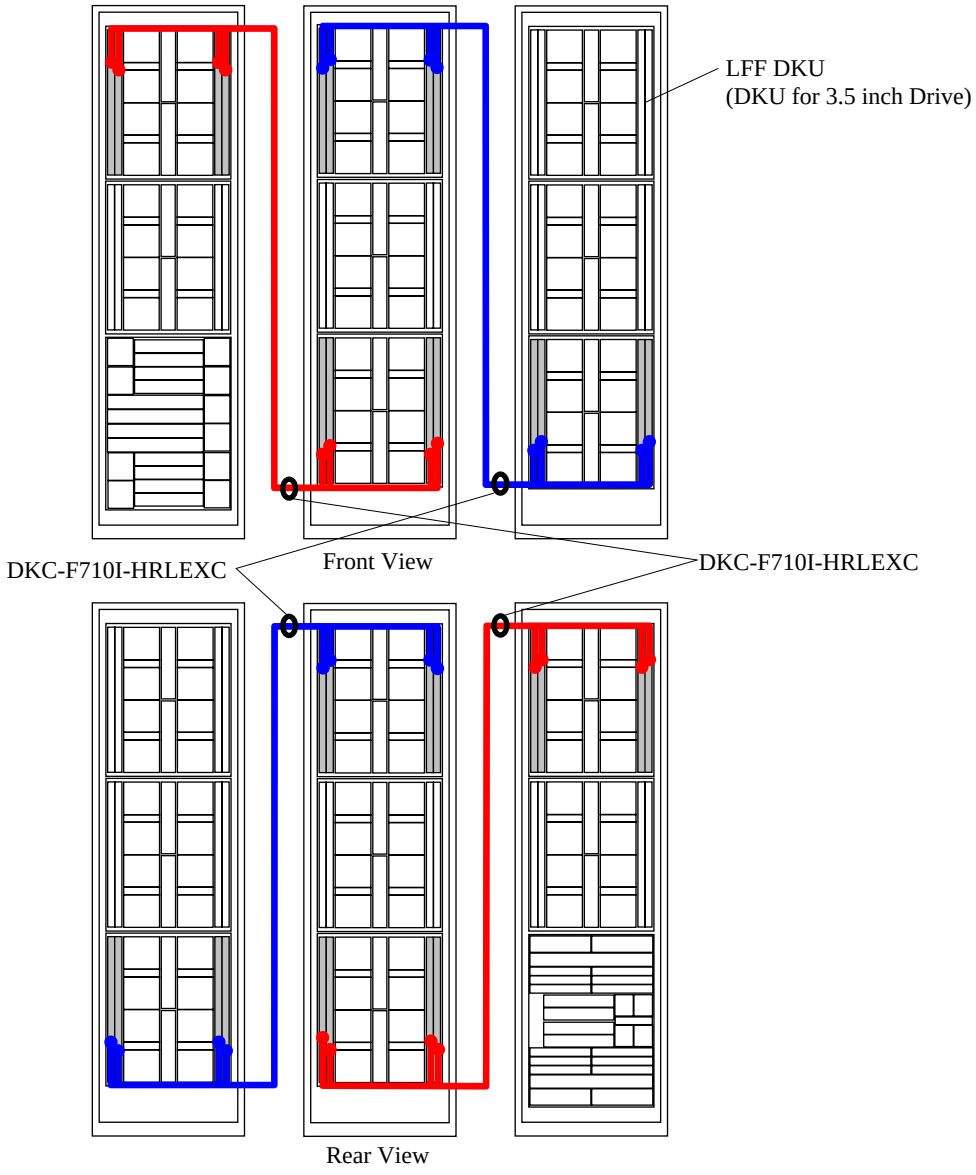

Fig. 4.1.4.12-1 Mounting Position of Device Interface Cable

When you need to remove Device Interface Cable HRLEX from the Right Side of the Connection Source Rack

1. Pattern of Cable De-installation

   There are four kinds of pattern in all that decreases the Device Interface Cable HRLEX (DKC-F710I-HRLEXC) at the right side of the RACK by the combination of the DKU.

   When decreasing DKC-F710I-HRLEX at the left side of the rack, refer to the page INST04-01C-3140.

   In this procedure, the output side of the Device Interface Cable is defined as a Connection Source, and the RACK is called a Connection Source RACK, and the DKU is called a Connection Source DKU. Moreover, the input side of the Device Interface Cable is defined as a Connection Destination, and the RACK is called a Connection Destination RACK, and the DKU is called a Connection Destination DKU.

   Before starting operation according to this procedure, understand each process name and the position.

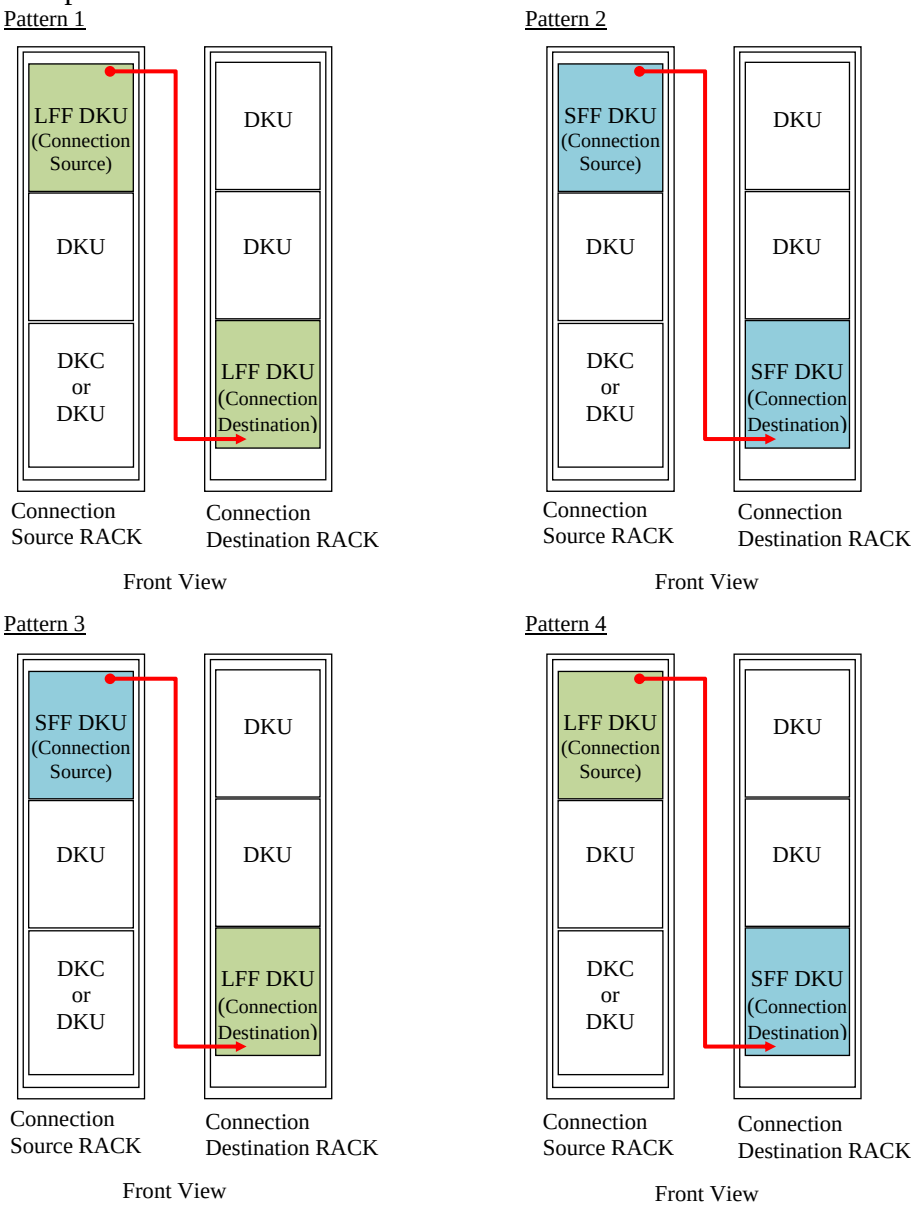

Fig. 4.1.4.12-3 Pattern of Cable Connection (Right Side Decreasing)

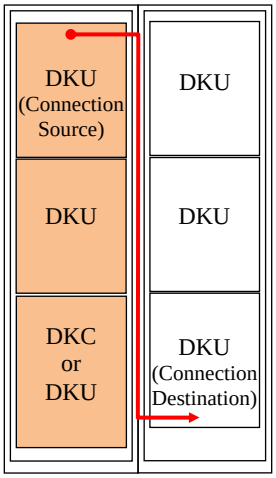
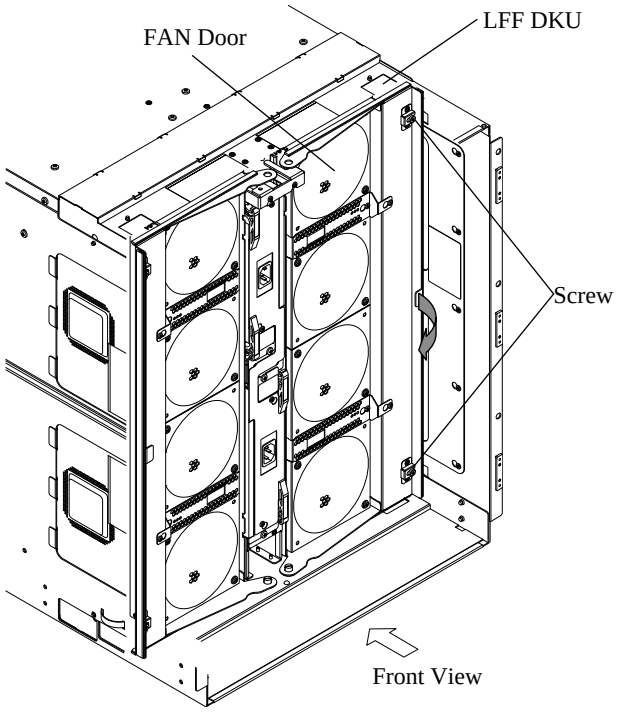
Copyright © 2010, Hitachi, Ltd.

2. Cable De-installation of the Front Side of the RACK
   a. Loosen all screws of the front right side of the DKU (two screws in each DKU) that is installed in the connection source RACK, and open the FAN door.





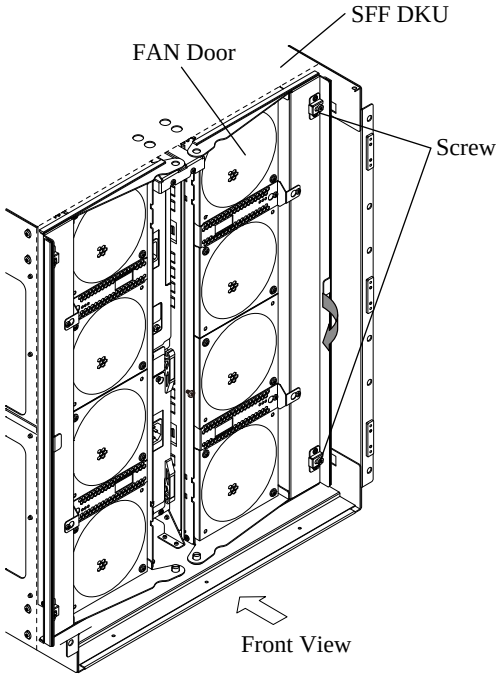


Fig. 4.1.4.12-4 FAN Door Opening

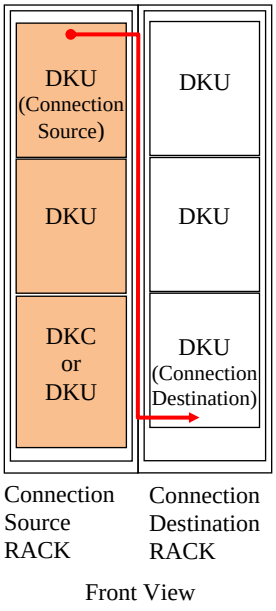
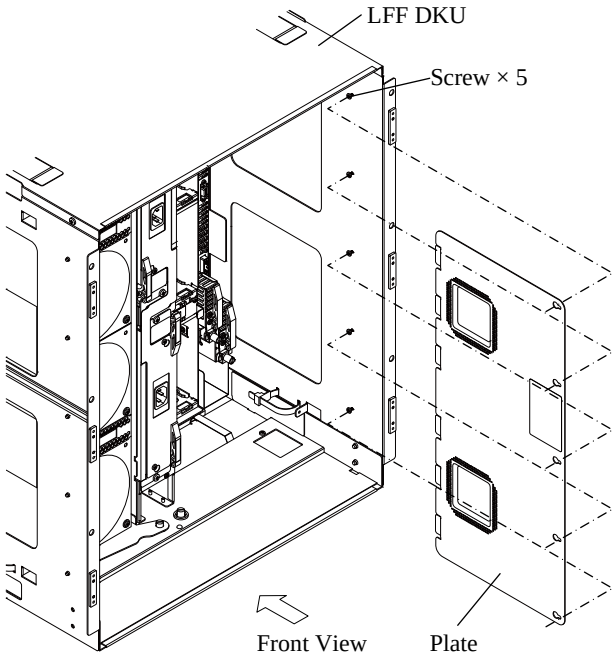
Copyright © 2010, 2011, Hitachi, Ltd.

b. Loosen all screws of the front right side of the DKU (five screws in each DKU) that is installed in the connection source RACK, and remove the plate.





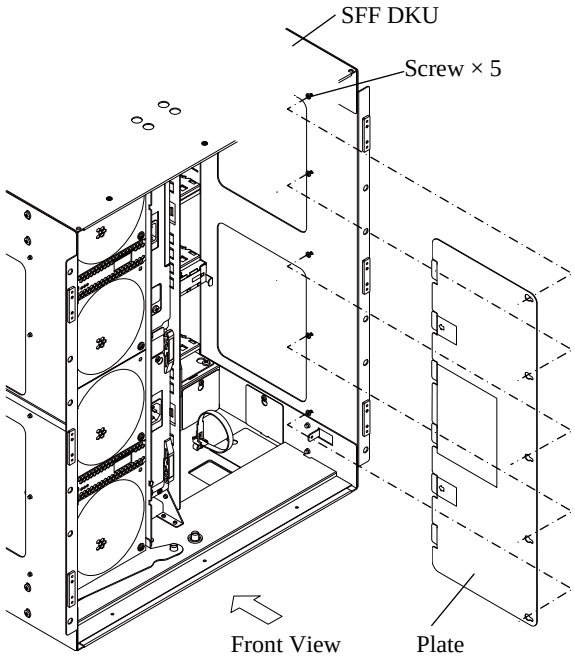


Fig. 4.1.4.12-5 Removal of Plates

Copyright © 2010, Hitachi, Ltd.

c. Loosen all screws of the front left side of the DKU (two screws in each DKU) that is installed in the connection destination RACK, and open the FAN door.

Copyright © 2010, 2011, Hitachi, Ltd.

d. Loosen all screws of the front left side of the DKU (five screws in each DKU) that is installed in the connection destination RACK, and remove the plate.

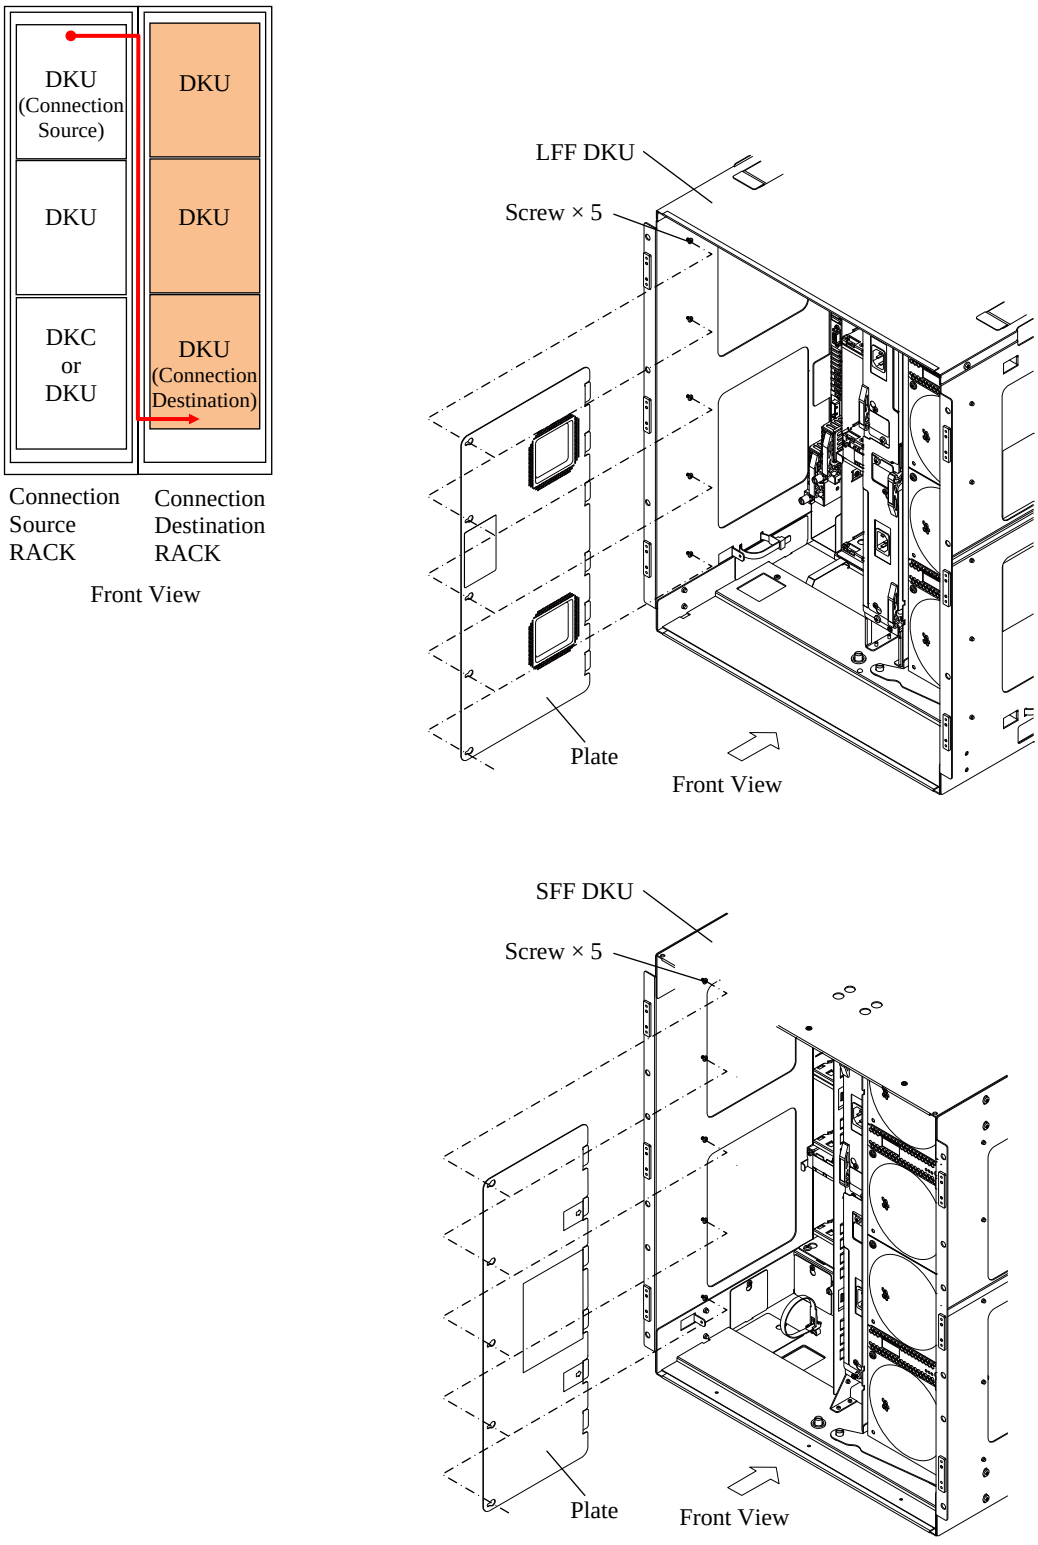

Fig. 4.1.4.12-7 Removal of Plate

Copyright © 2010, Hitachi, Ltd.

3. Cable De-installation of the Front Side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU.

a. Disconnect the cables (0/4-R-A4 and 0/4-L-A4) from the SSW PCBs of the front right side of the connection source DKU by using a jig. Cap the cables afterward.

Notice:	A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

b. Remove the two hangers.
c. Pull out the cables (0/4-R-A4 and 0/4-L-A4) from the connection source DKU.
d. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws. (Refer to the Fig. 4.1.4.12-4.)

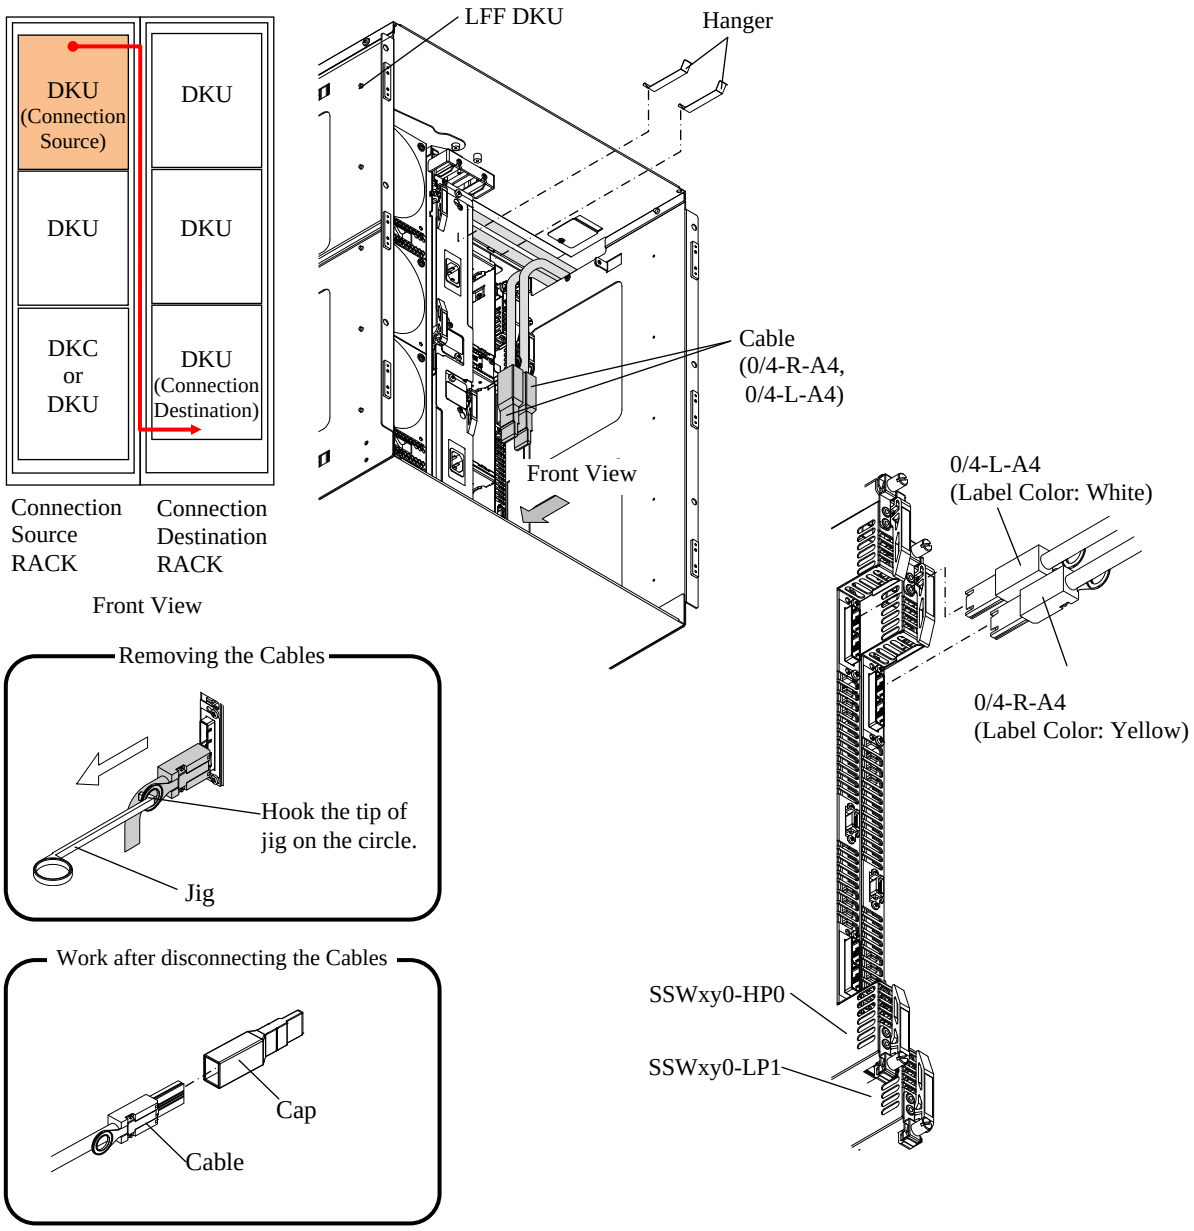

Fig. 4.1.4.12-8 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.12-6.)
f. Disconnect the cables (1/5-R-A4 and1/5-L-A4) from the SSW PCBs. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

g. Remove the two hangers.
h. Reach into the entry points of the right side of the DKU, and pull the cables out from the DKU by using both hands.
i. Install the two hangers.
j. Close the FAN door of the front left side of the connection source DKU, and loosen the two screws.
k. Loosen the two screws of front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.12-4.)
l. Install the two hangers to front right side of the connection source DKU. (Refer to Fig. 4.1.4.12-8.)

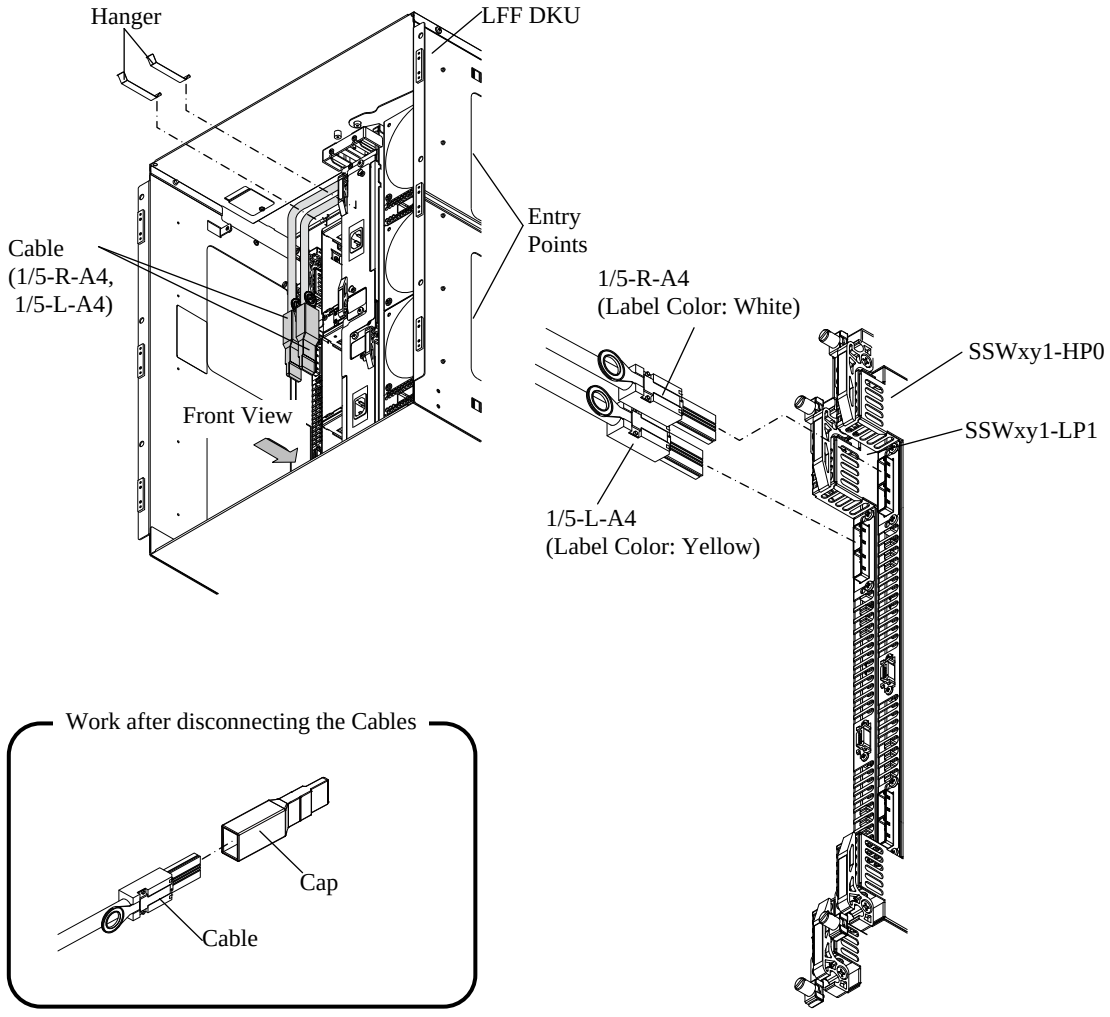

Fig. 4.1.4.12-9 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

When the Connection Source DKU is the SFF DKU

a. Disconnect the cables (0/4-R-A4 and 0/4-L-A4) from the SSW PCBs of the front right side of the connection source DKU. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

b. Open the repeat binder.
c. Pull out the cables (0/4-R-A4 and 0/4-L-A4) from the connection source DKU.
d. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws. (Refer to Fig. 4.1.4.12-4.)

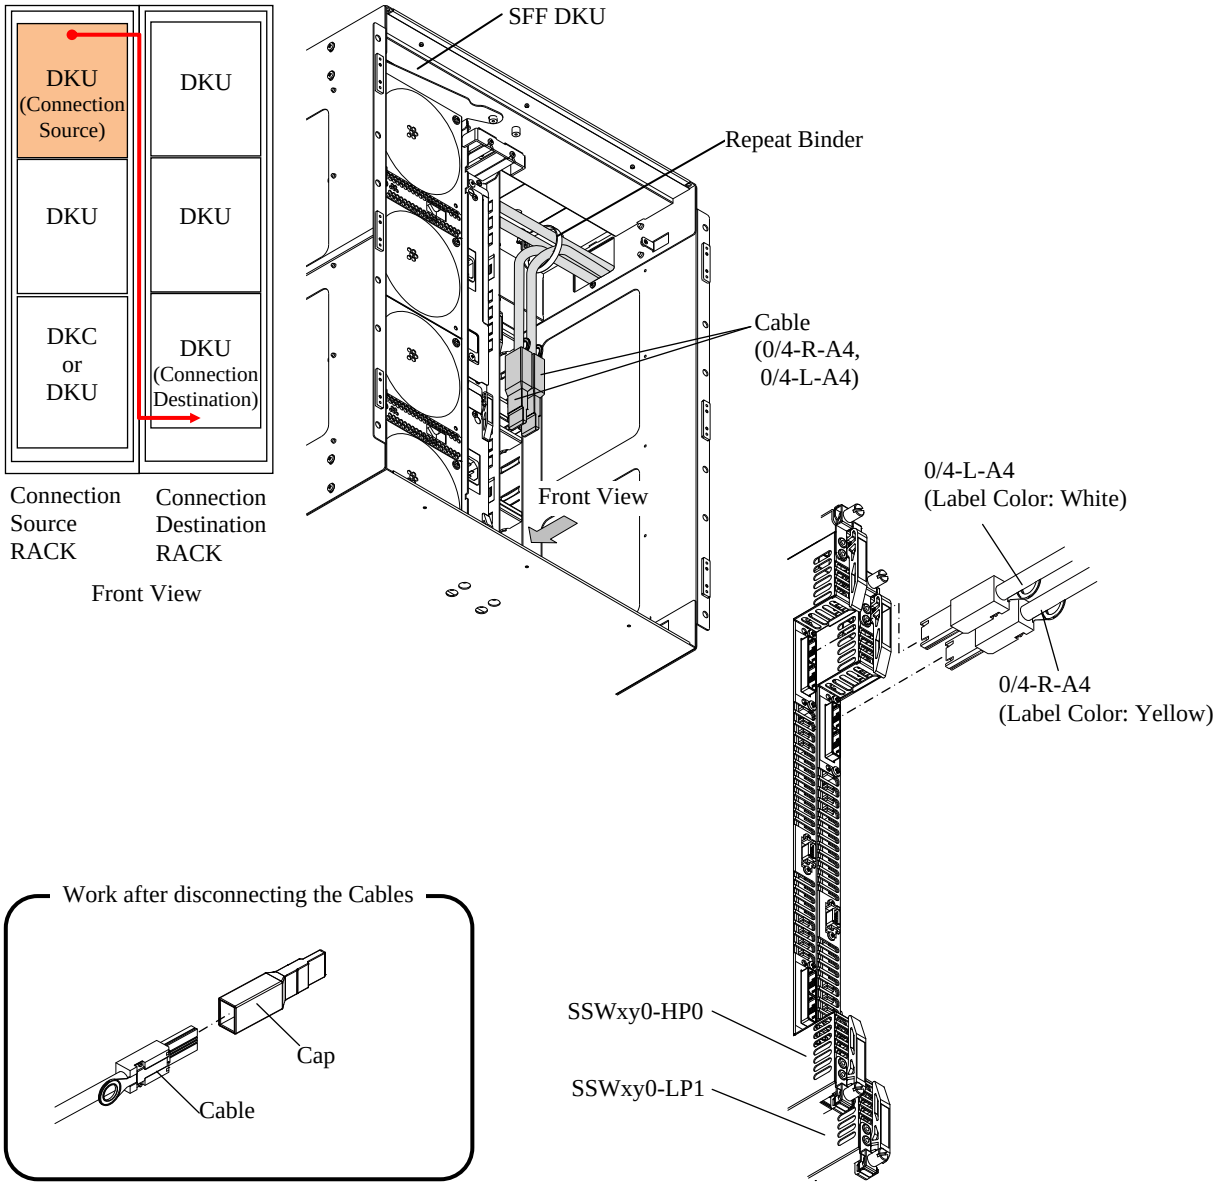

Fig. 4.1.4.12-10 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.12-6.)
f. Disconnect the cables (1/5-R-A4 and 1/5-L-A4) from the SSW PCBs. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

g. Remove the clamp tape from the cables.
h. Reach into the entry points of the right side of the DKU, and pull the cables out from the DKU by using both hands.
i. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws.
j. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.12-4.)
k. Close the repeat binder of the front right side of the connection source DKU. (Refer to Fig. 4.1.4.12-10.)

4. Cable De-installation of the Front Side of the Connection Destination DKU

When the Connection Destination DKU is the LFF DKU

a. Disconnect the cables (1/5-R-A2 and 1/5-L-A2) from the SSW PCBs of the front left side of the connection destination DKU. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

b. Remove the two hangers.
c. Pull out the cables (1/5-R-A2 and 1/5-L-A2) from the connection destination DKU.
d. Close the FAN door of the front left side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 4.1.4.12-6.)

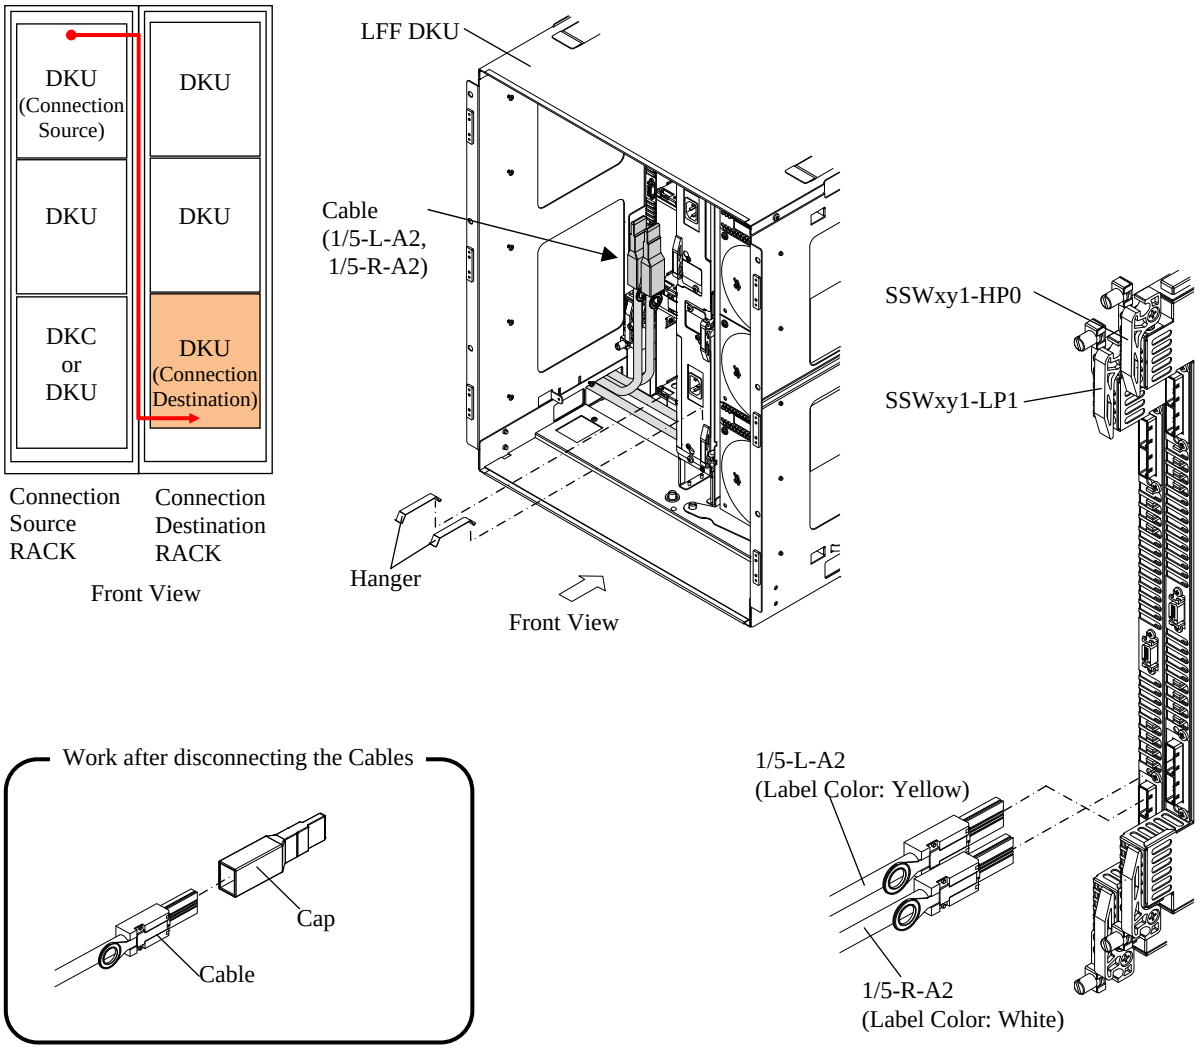

Fig. 4.1.4.12-12 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the front right side of the connection destination DKU, and open the FAN door. (Refer to Fig. 4.1.4.12-4.)
f. Disconnect the cables (0/4-R-A2 and 0/4-L-A2) from the SSW PCBs by using a jig. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

g. Remove the two hangers.
h. Reach into the entry points of the left side of the DKU, and pull the cables out from the DKU by using both hands.
i. Install the two hangers.
j. Close the FAN door of the front right side of the connection destination DKU, and tighten the two screws.
k. Loosen the two screws of the front left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 4.1.4.12-6.)
l. Install the two hangers of the front left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 4.1.4.12-12.)

5. Removal of Cables
   a. Open the two repeat binders of the connection source RACK side, and remove the four cables.
   b. Close the two repeat binders.
   c. Install all removed plates in the front right side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 4.1.4.12-5.)
   d. Close all the FAN doors of the front right side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 4.1.4.12-4.)
   e. Install all removed plates in the front left side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 4.1.4.12-7.)
   f. Close all the FAN doors of the front left side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 4.1.4.12-6.)

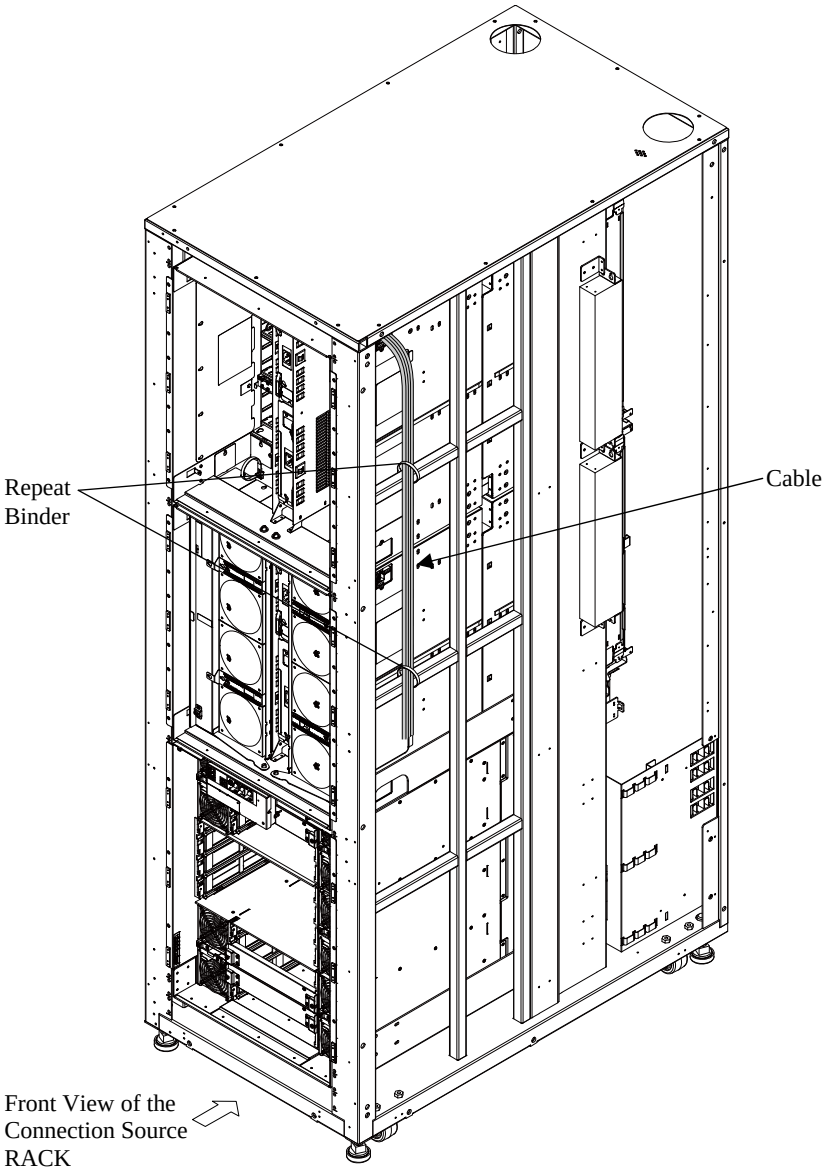

Fig. 4.1.4.12-16 Removal of Cables

7. Cable De-installation of the Rear Side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU

a. Disconnect the cables (3/7-R-A4 and 3/7-L-A4) from the SSW PCBs of the rear left side of the connection source DKU. Cap the cables afterward.

Notice:	A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

b. Remove the two hangers from the rear left side of the connection source DKU.
c. Pull out the cables (3/7-R-A4 and 3/7-L-A4) from the connection source DKU.
d. Close the FAN door of the rear left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 4.1.4.12-17.)

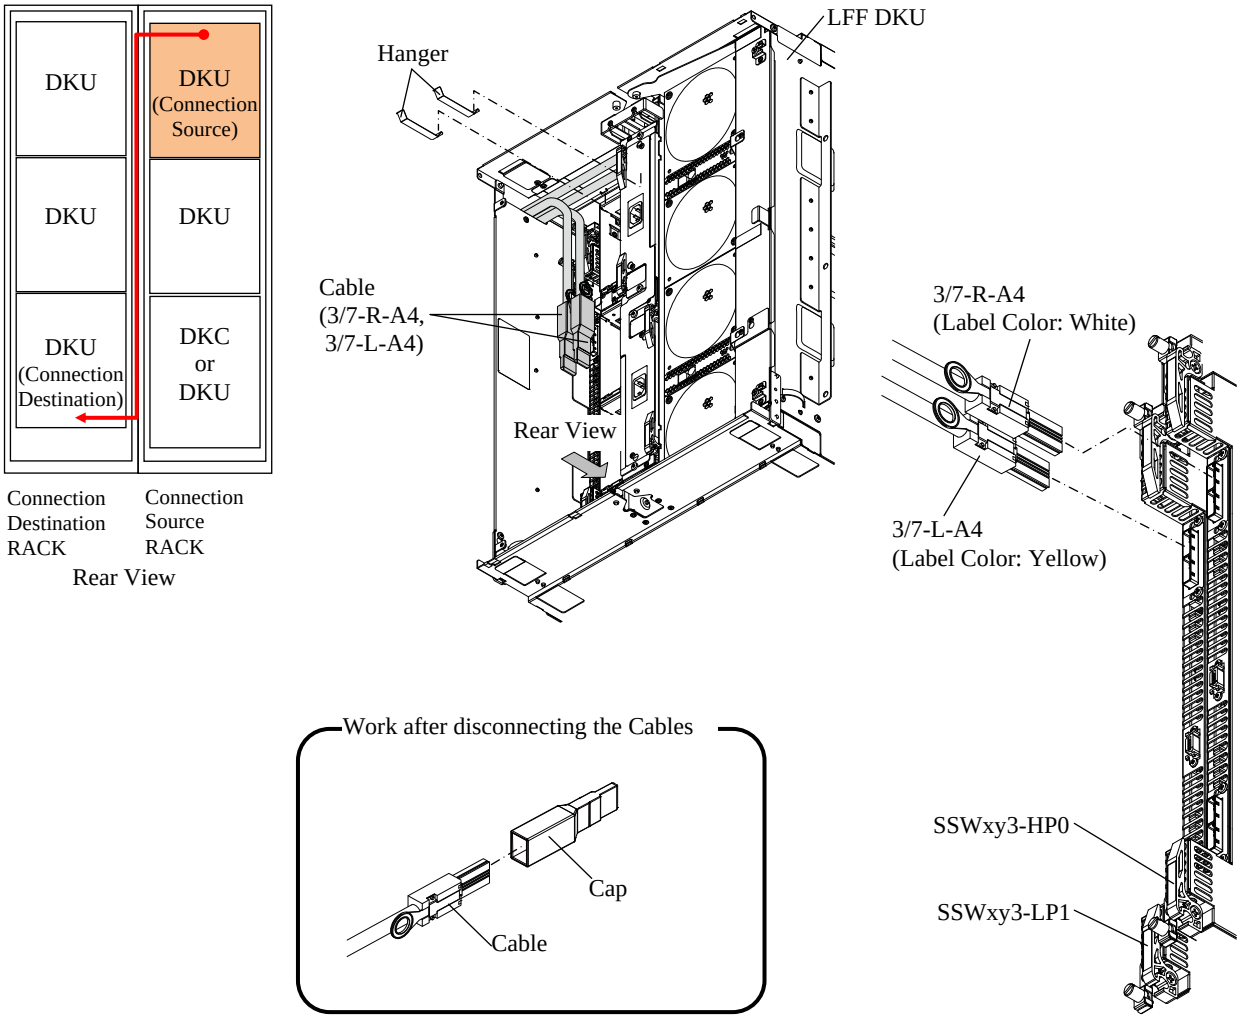

Fig. 4.1.4.12-21 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the rear right side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.12-19.)
f. Disconnect the cables (2/6-R-A4 and 2/6-L-A4) from the SSW PCBs by using a jig. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

g. Remove the two hangers.
h. Pull out the cables from the rear left side of the connection source DKU, and insert the tip of the cables (2/6-R-A4 and 2/6-L-A4) into the upper part of the DKUPS.
i. Install the two hangers.
j. Close the FAN door of the rear right side of the connection source DKU, and tighten the two screws.

When you need to remove Device Interface Cable HRLEX from the Left Side of the Connection Source Rack

1. Pattern of Cable De-installation
   There are four kinds of pattern in all that decreases the Device Interface Cable HRLEX (DKC-F710I-HRLEXC) from the left side of the RACK by the combination of the DKU.
   In this procedure, the output side of the Device Interface Cable is defined as a Connection Source, and the RACK is called a Connection Source RACK, and the DKU is called a Connection Source DKU. Moreover, the input side of the Device Interface Cable is defined as a Connection Destination, and the RACK is called a Connection Destination RACK, and the DKU is called a Connection Destination DKU.
   Before starting operation according to this procedure, understand each process name and the position.

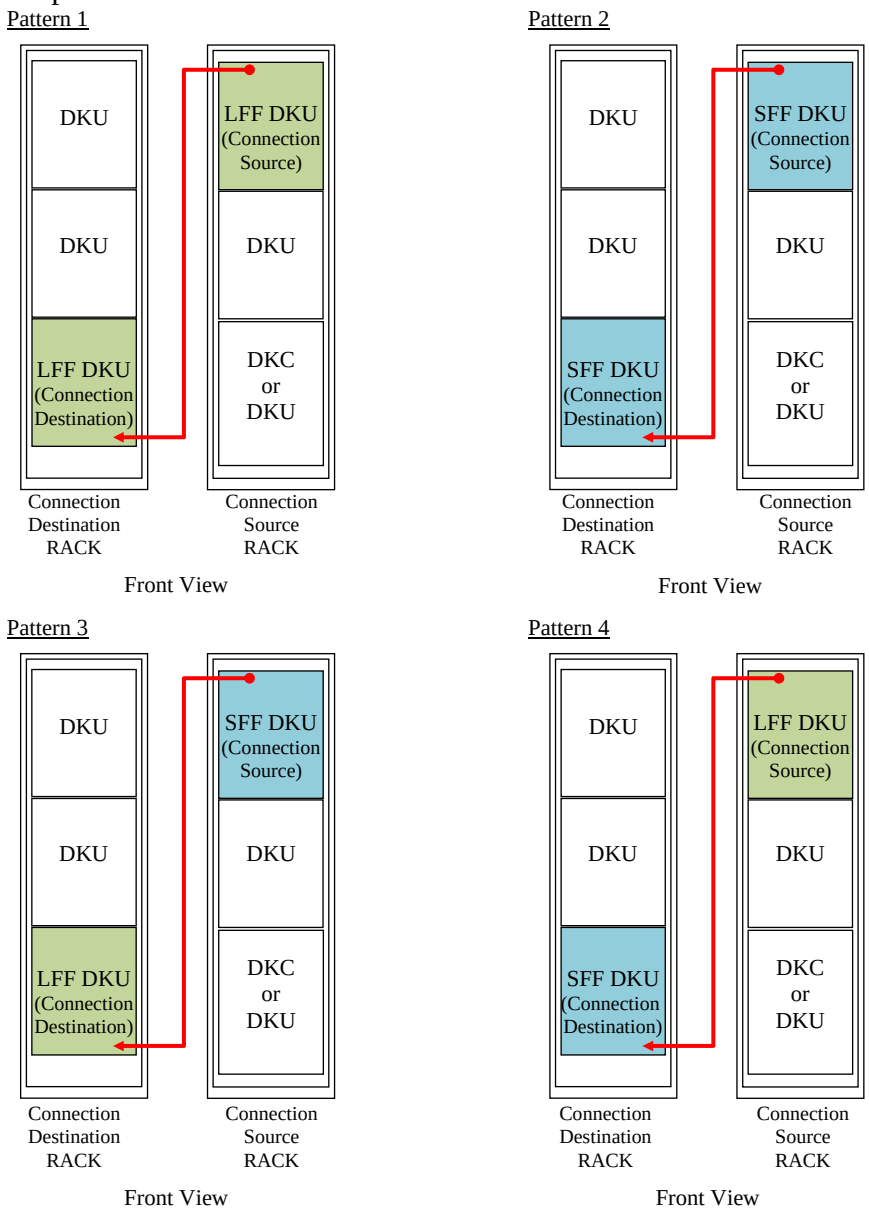

Fig. 4.1.4.12-35 Pattern of Cable De-installation (Left Side Decreasing)

Copyright © 2010, Hitachi, Ltd.

2. Cable Removal of the Front Side of the RACK
   a. Loosen all screws of the front left side of the DKU (two screws in each DKU) that is installed in the connection source RACK, and open the FAN door.

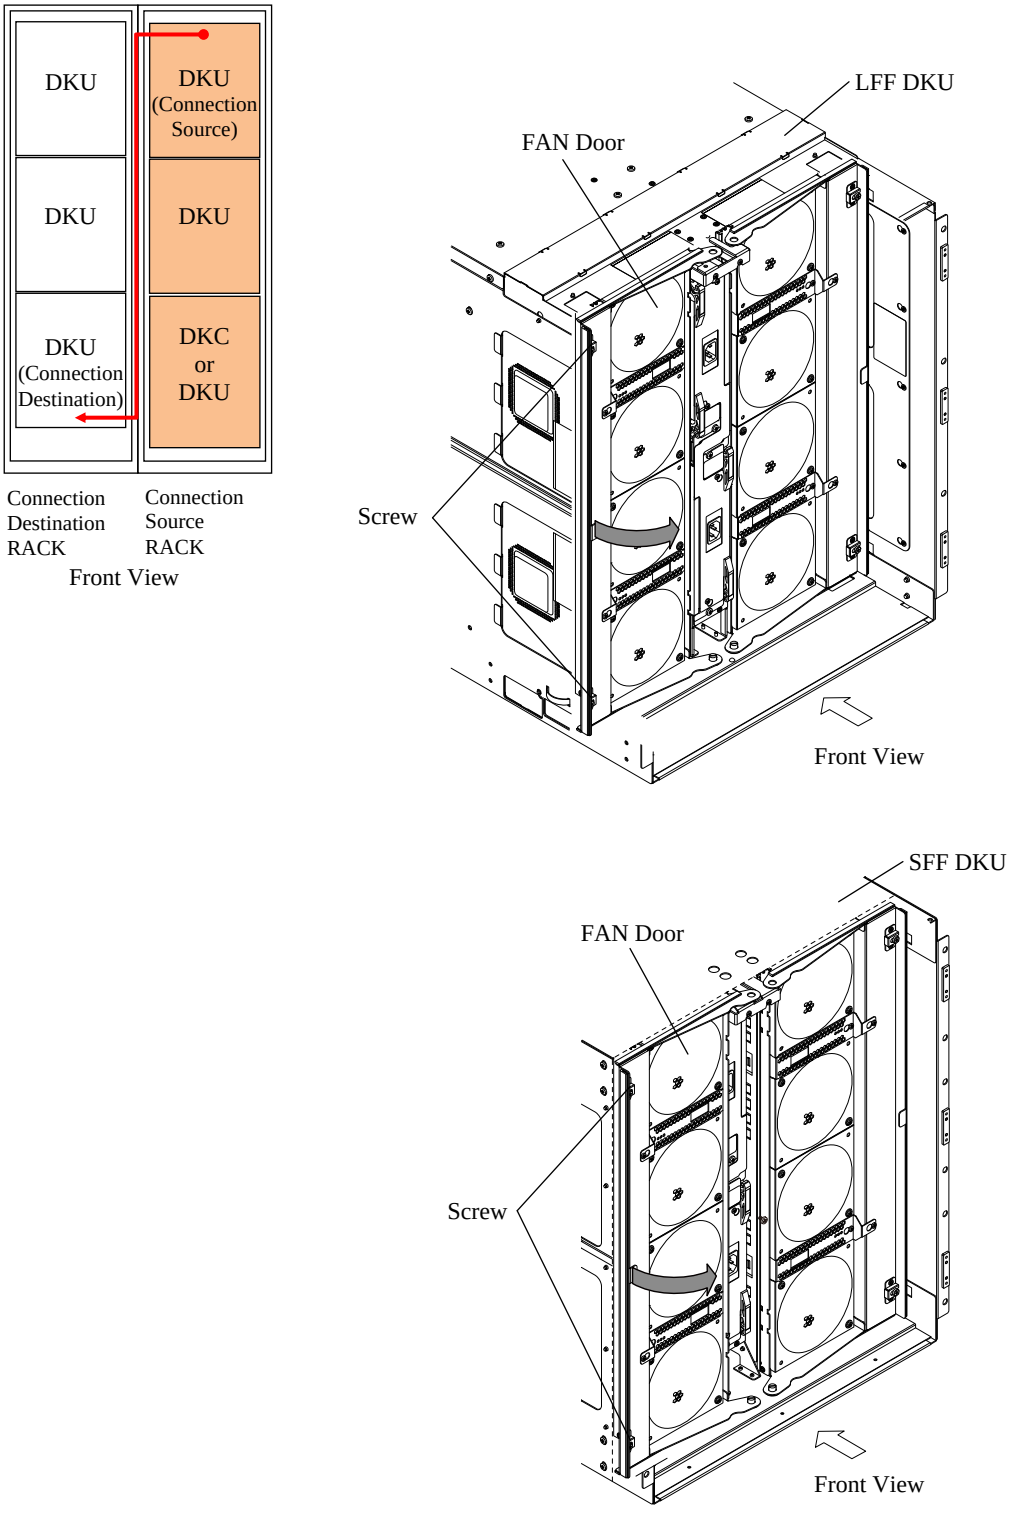

Fig. 4.1.4.12-36 FAN Door Opening

Copyright © 2010, 2011, Hitachi, Ltd.

b. Loosen all screws of the front left side of the DKU (five screws in each DKU) that is installed in the connection source RACK, and remove the plate.

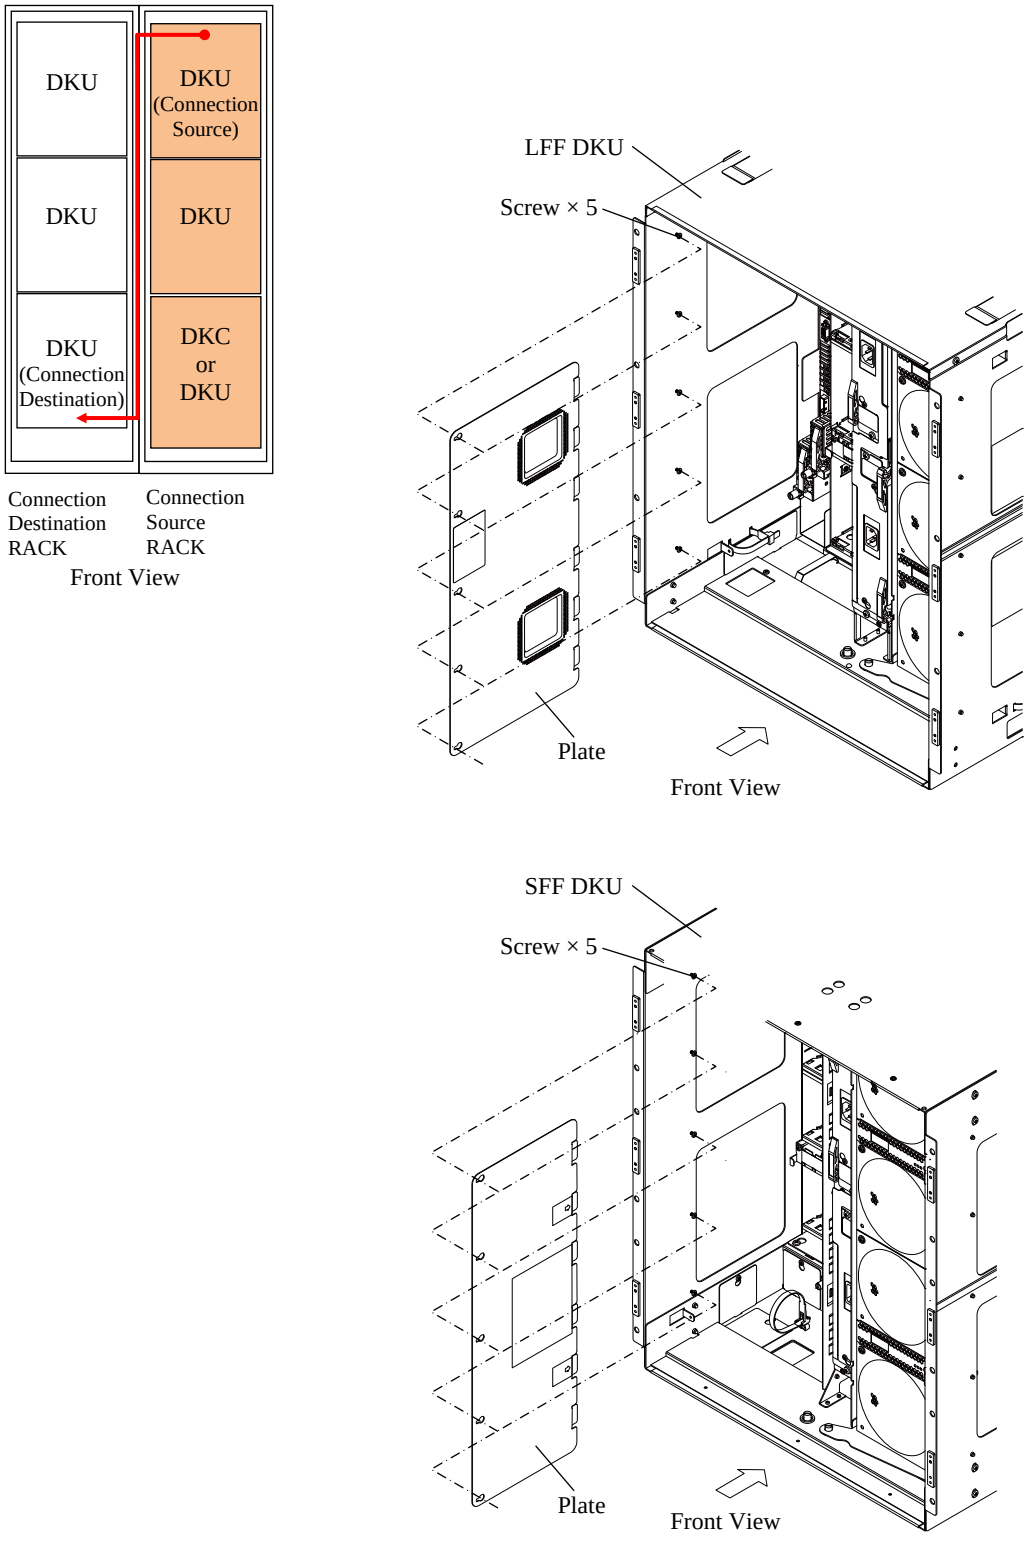

Fig. 4.1.4.12-37 Removal of Plate

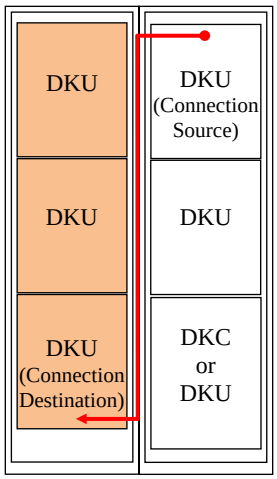
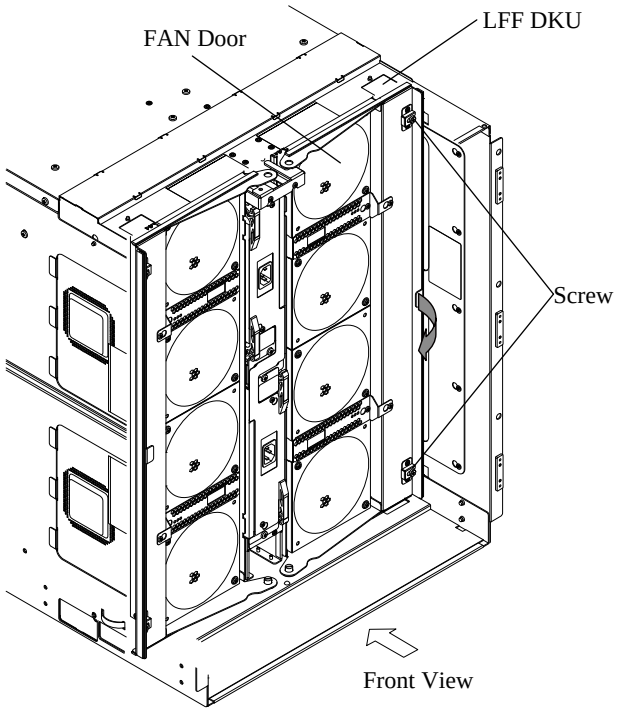
Copyright © 2010, Hitachi, Ltd.

c. Loosen the two screws of the front right side of all DKU that is installed in the connection destination RACK, and open the FAN door.





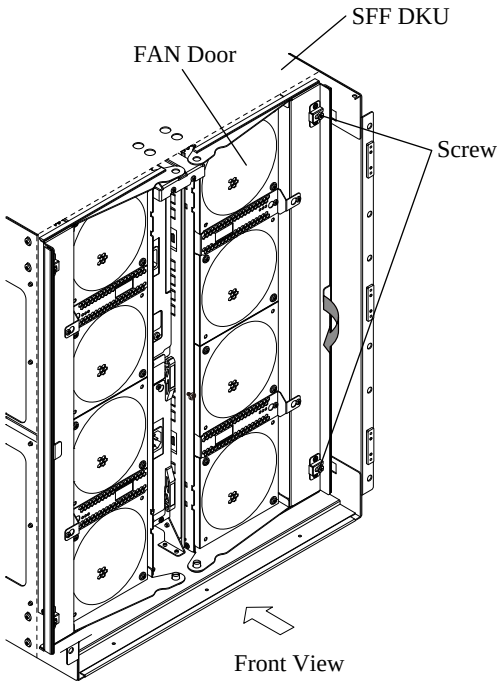


Fig. 4.1.4.12-38 FAN Door Opening

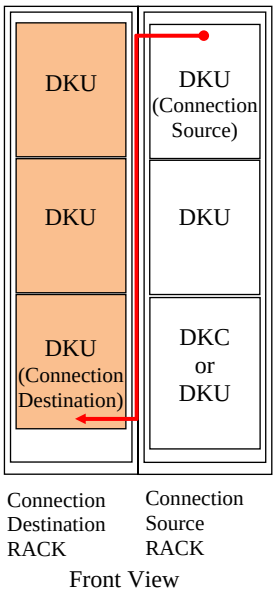
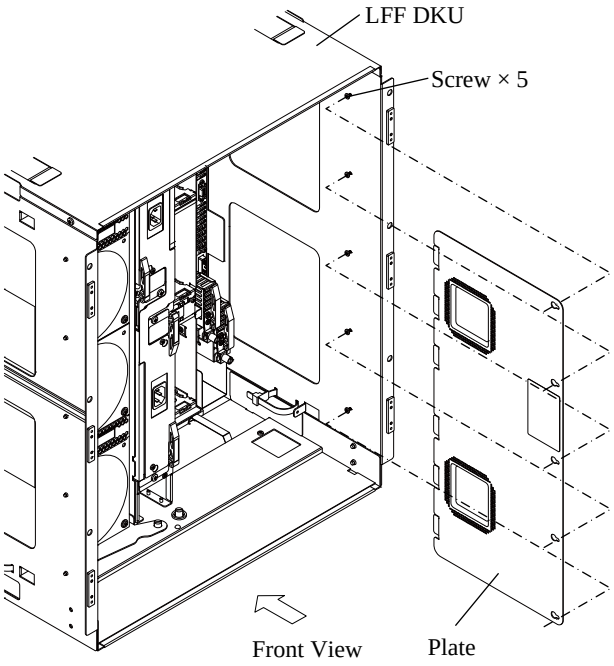
Copyright © 2010, 2011, Hitachi, Ltd.

d. Loosen all screws of the front right side of the DKU (five screws in each DKU) that is installed in the connection destination RACK, and remove the plate.





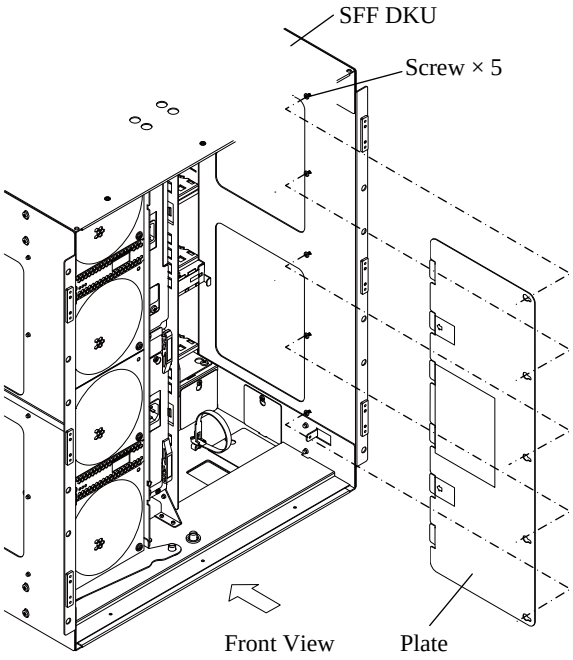


Fig. 4.1.4.12-39 Removal of Plate

3. Cable De-installation of the Front Side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU

a. Disconnect the cables (1/5-R-A4 and 1/5-L-A4) from the SSW PCBs of the front left side of the connection source DKU. Cap the cables afterward.

Notice:	A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

b. Remove the two hangers.
c. Pull out the cables (1/5-R-A4 and 1/5-L-A4) from the connection source DKU.
d. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 4.1.4.12-36.)

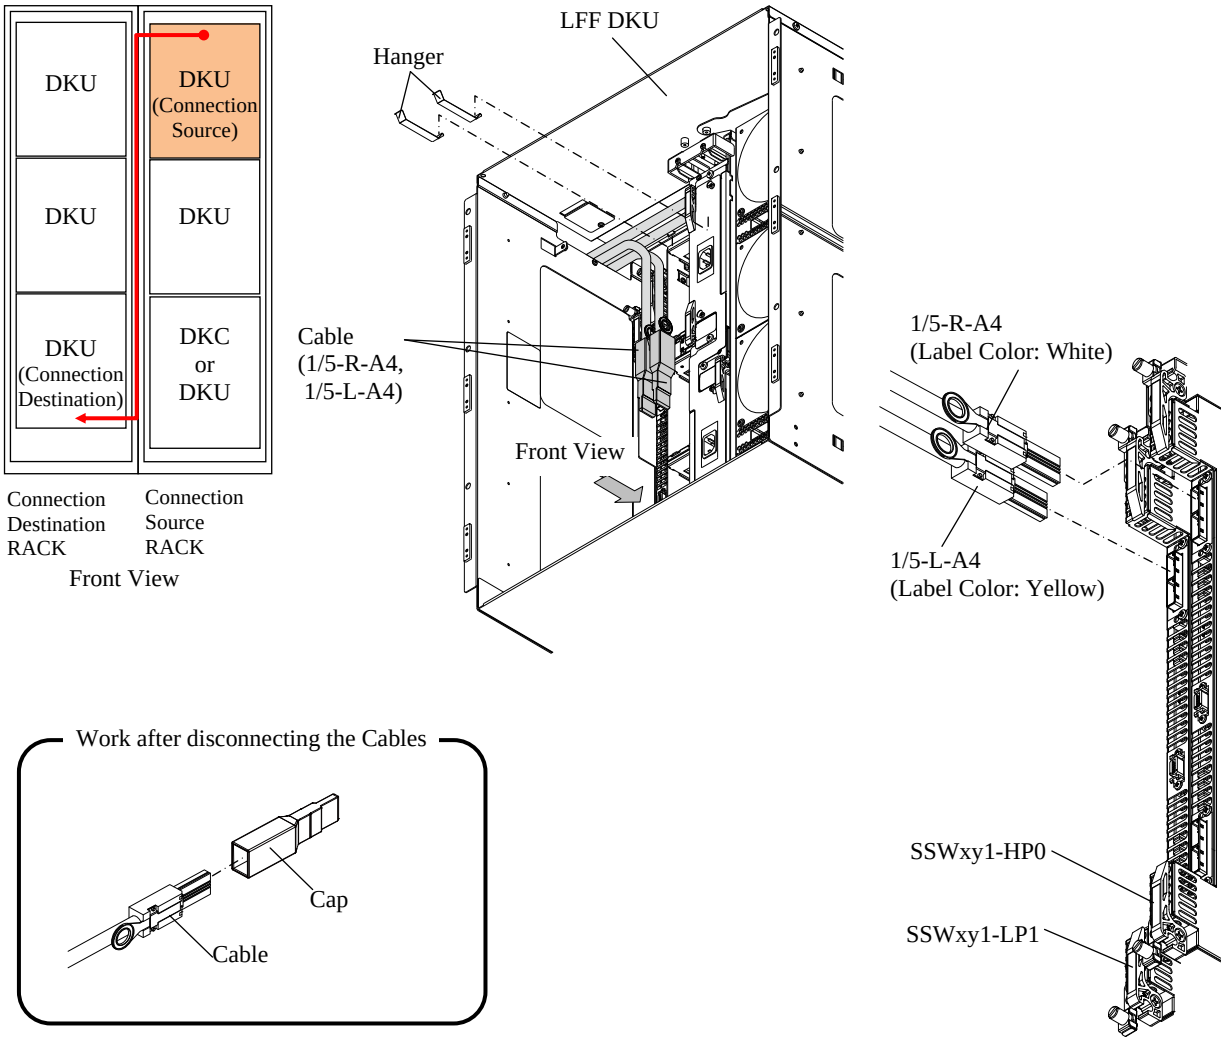

Fig. 4.1.4.12-40 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.12-38.)
f. Disconnect the cables (0/4-R-A4 and 0/4-L-A4) from the SSW PCBs by using a jig. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

g. Remove the two hangers.
h. Reach into the entry points of the left side of the DKU, and pull the cables out from the DKU by using both hands.
i. Install the two hangers.
j. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws.
k. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.12-36.)
l. Install the two hangers of the front left side of the connection source DKU. (Refer to Fig. 4.1.4.12-44.)

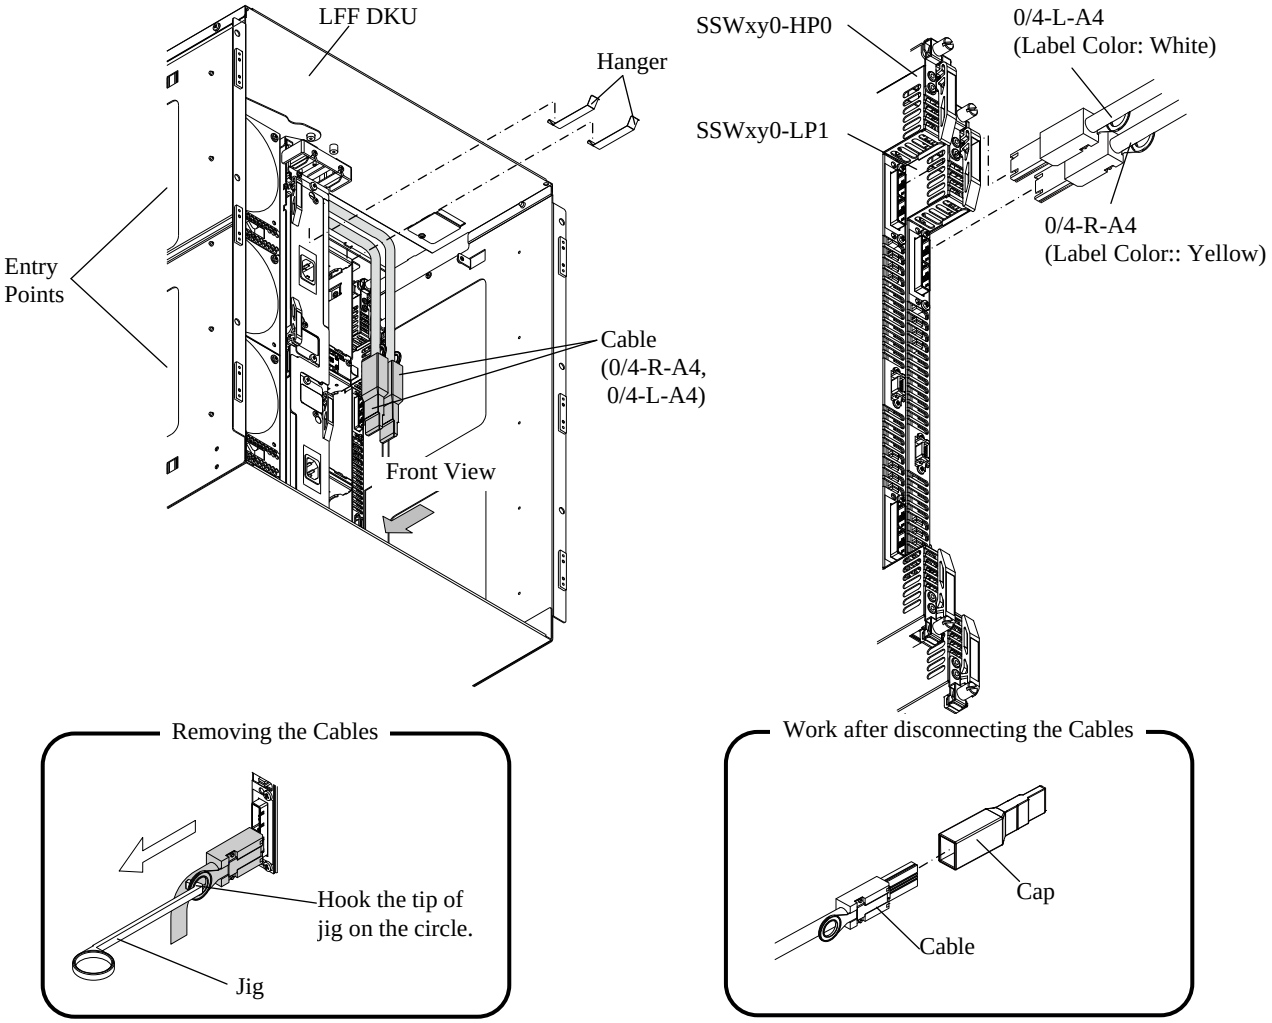

Fig. 4.1.4.12-41 Removal of Cables

5. Removal of Cables
   a. Open the two repeat binders of the connection source RACK side, and remove the four cables.
   b. Close the two repeat binders.
   c. Install all removed plates in the front left side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 4.1.4.12-41.)
   d. Close all the FAN doors of the front left side of each DKU of the connection source RACK, and tighten the screws. (Refer to Fig. 4.1.4.12-36.)
   e. Install all removed plates in the front right side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 4.1.4.12-43.)
   f. Close all the FAN doors of the front right side of each DKU of the connection destination RACK, and tighten the screws. (Refer to Fig. 4.1.4.12-38.)

7. Cable De-installation of the Rear Side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU

a. Disconnect the cables (2/6-R-A4 and 2/6-L-A4) from the SSW PCBs of the rear right side of the connection source DKU by using a jig. Cap the cables afterward.

> Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

b. Remove the two hangers.
c. Pull out the cables (2/6-R-A4 and 2/6-L-A4) from the connection source DKU.
d. Close the FAN door of the rear right side of the connection source DKU, and tighten the two screws. (Refer to Fig. 4.1.4.12-49.)

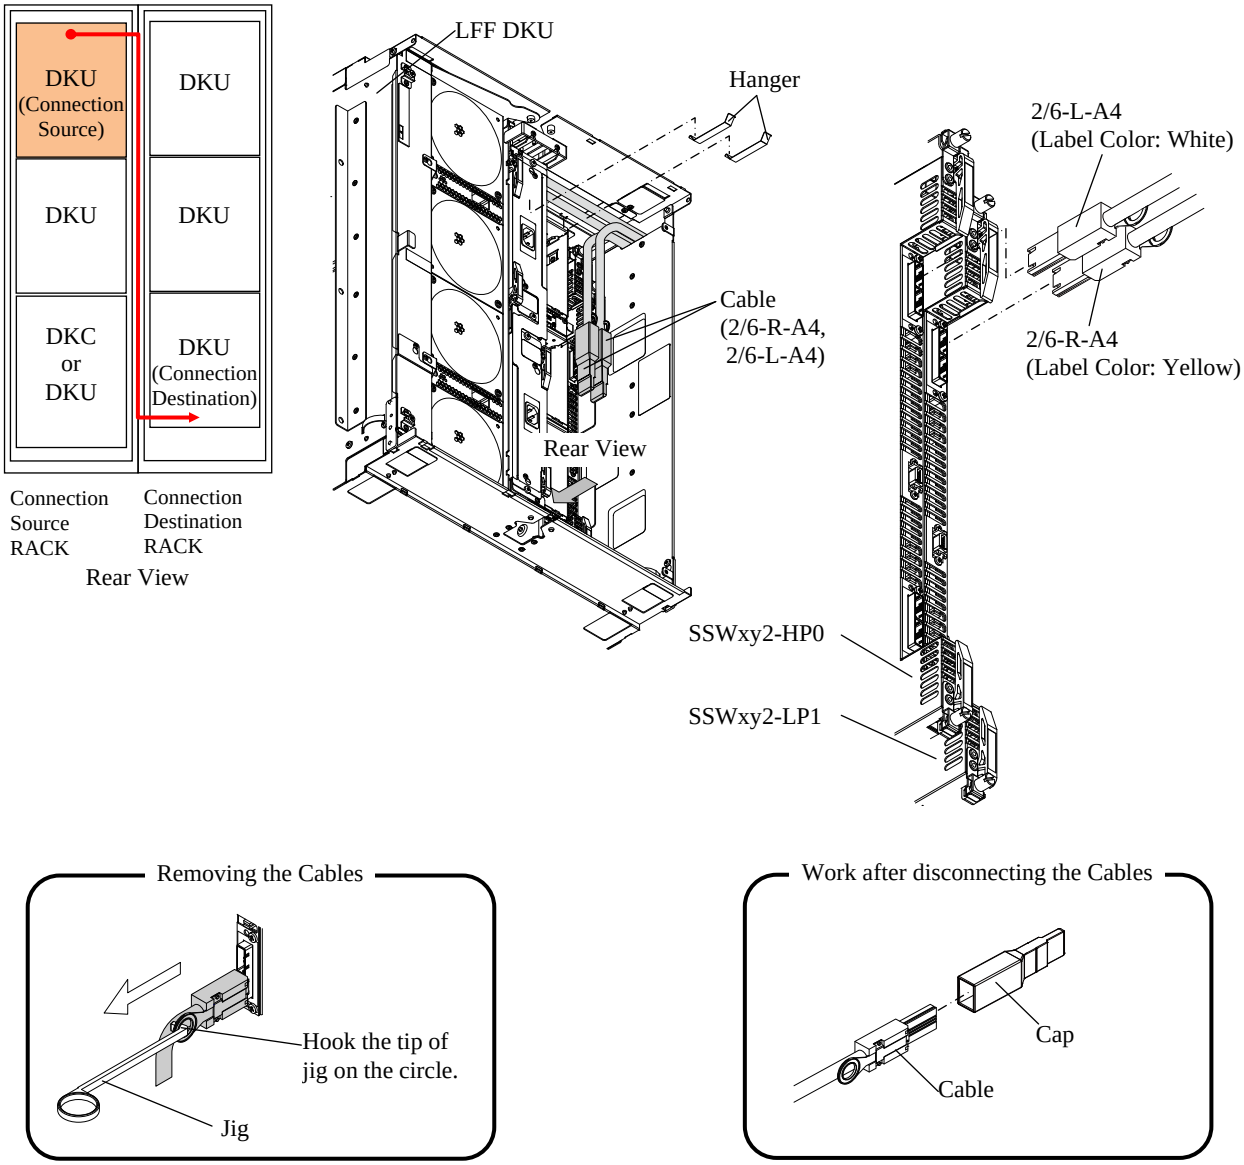

Fig. 4.1.4.12-53 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the rear left side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.12-51.)
f. Disconnect the cables (3/7-R-A4 and 3/7-L-A4) from the SSW PCBs. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

g. Remove the two hangers.
h. Pull out the cables from the rear right side of the connection source DKU, and insert the tip of the cables (3/7-R-A4 and 3/7-L-A4) into the upper part of the DKUPS.
i. Install the two hangers.
j. Close the FAN door of the rear left side of the connection source DKU, and tighten the two screws.

8. Cable De-installation of Rear Side of the Connection Destination DKU

When the Connection Destination DKU is the LFF DKU

a. Disconnect the cables (3/7-R-A2 and 3/7-L-A2) from the SSW PCBs of the rear left side of the connection destination DKU. Cap the cables afterward.

Notice:	A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

b. Remove the two hangers.
c. Pull out the cables (3/7-R-A2 and 3/7-L-A2) from the connection destination DKU.
d. Close the FAN door of the rear left side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 4.1.4.12-51.)

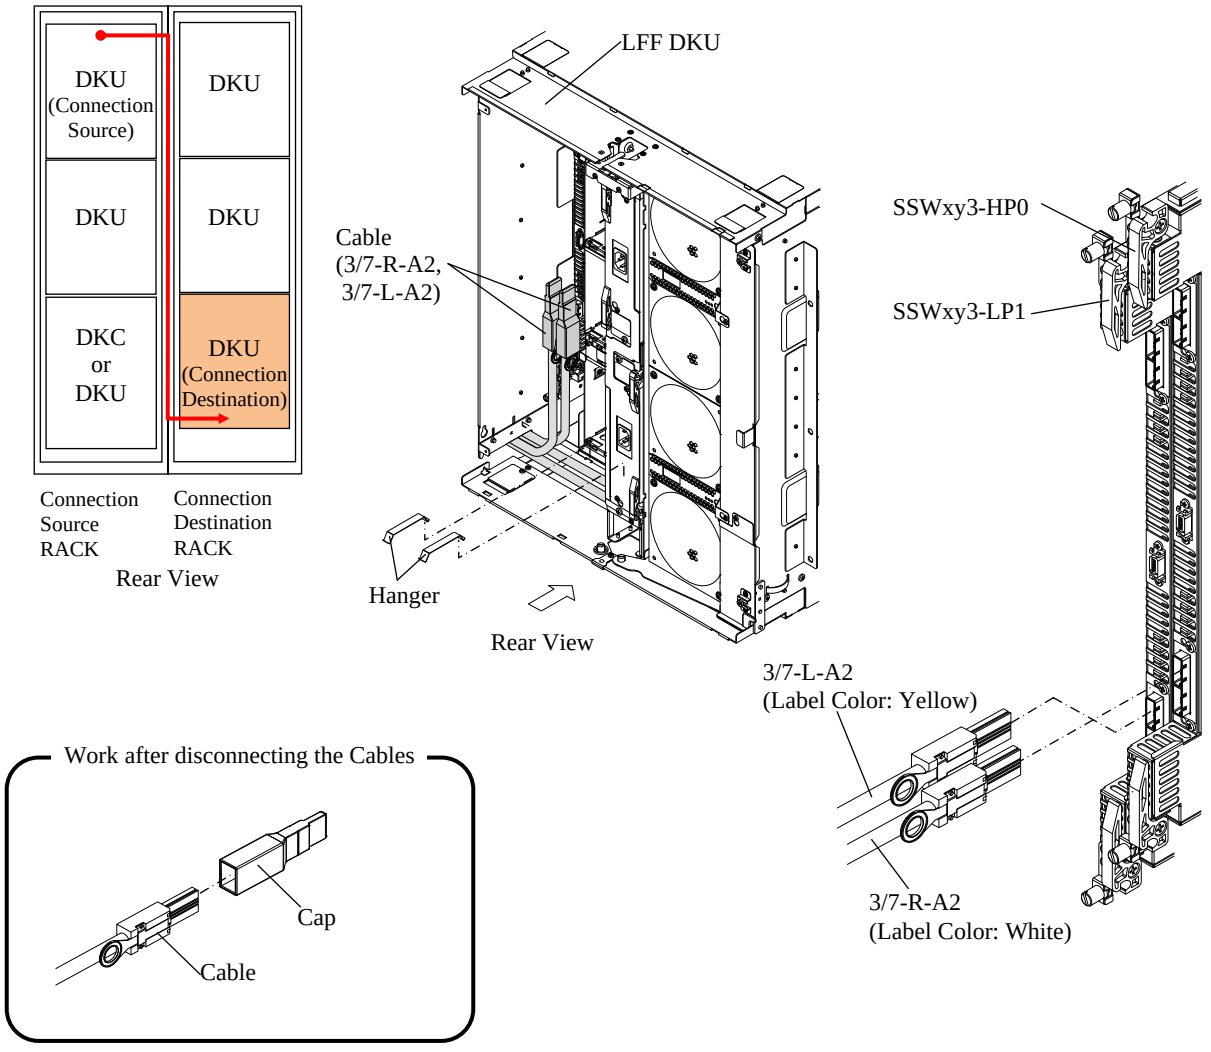

Fig. 4.1.4.12-59 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the rear right side of the connection destination DKU, and open the FAN door. (Refer to Fig. 4.1.4.12-49.)
f. Disconnect the cables (2/6-R-A2 and 2/6-L-A2) from the SSW PCBs by using a jig. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

g. Remove the two hangers.
h. Pull out the cables from the rear left side of the connection destination DKU, and insert the tip of the cables (2/6-R-A2 and 2/6-L-A2) into the lower part of the DKUPS.
i. Install the two hangers.
j. Close the FAN door of the rear right side of the connection destination DKU, and tighten the two screws.

9. Removal of Cables
   a. Open the two repeat binders of the DKU side, and remove the four cables.
   b. Close the two repeat binders
   c. Attach the cover to the rear right side of the DKU, and tighten the screw. (Only SFF DKU)
   d. Close the FAN door of the rear right side of the connection source of the DKU, and tighten the screw. (Refer to Fig. 4.1.4.12-49.)
   e. Attach the cover to the rear left side of the DKU, and tighten the screws.
   f. Close the FAN door of the rear left side of the connection destination DKU, and tighten the screw. (Refer to Fig. 4.1.4.12-51.)

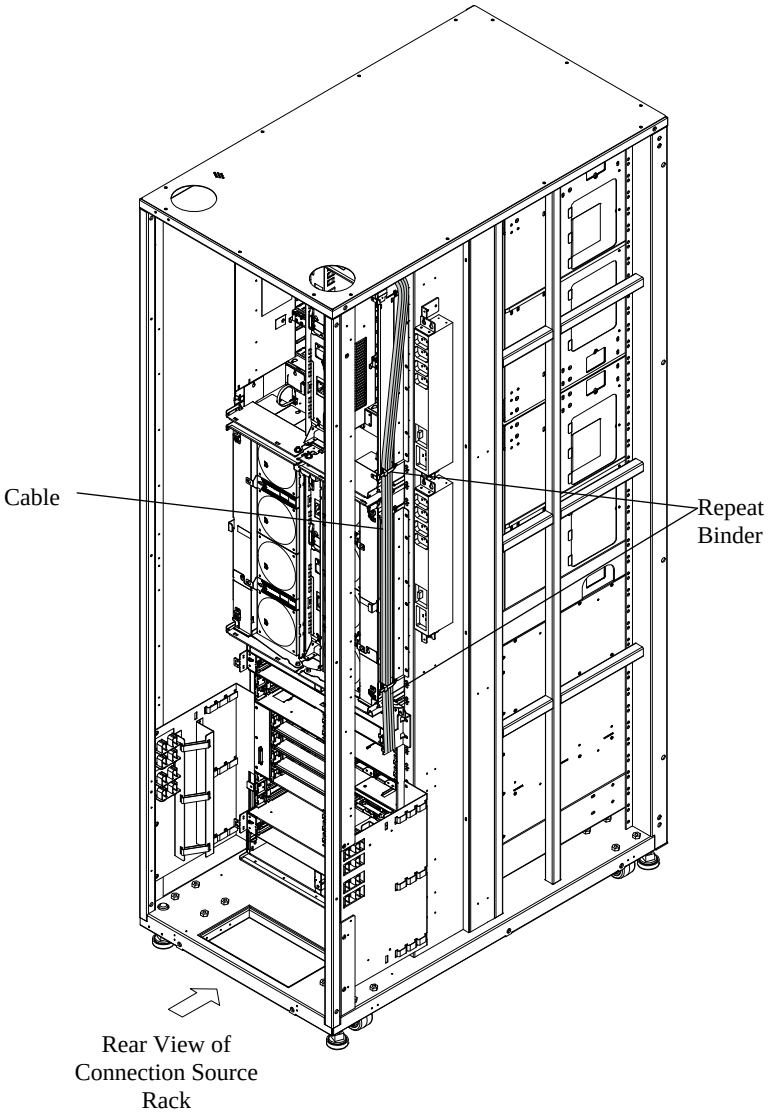

Fig. 4.1.4.12-65 Removal of Cables

4.1.4.13 De-Installation Procedure of Device Interface Cable RLEX (DKC-F710I-RLEXC)

De-Installation Condition

DKC-F710I-RLEXC is a cable option to connect between DKUs in the different chassis. When disconnecting the DKUs from the different chassis, this option is required to de-install. Refer to below Table 4.1.4.13-1 for the condition of DKC-F710I-RLEXC installation, and go to the appropriate page.

Table 4.1.4.13-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable RLEX (DKC-F710I-RLEXC) is required to remove.	INST04-01C-3480
2	When Device Interface Cable RLEX (DKC-F710I-RLEXC) is not required to remove.	INST04-01C-4200

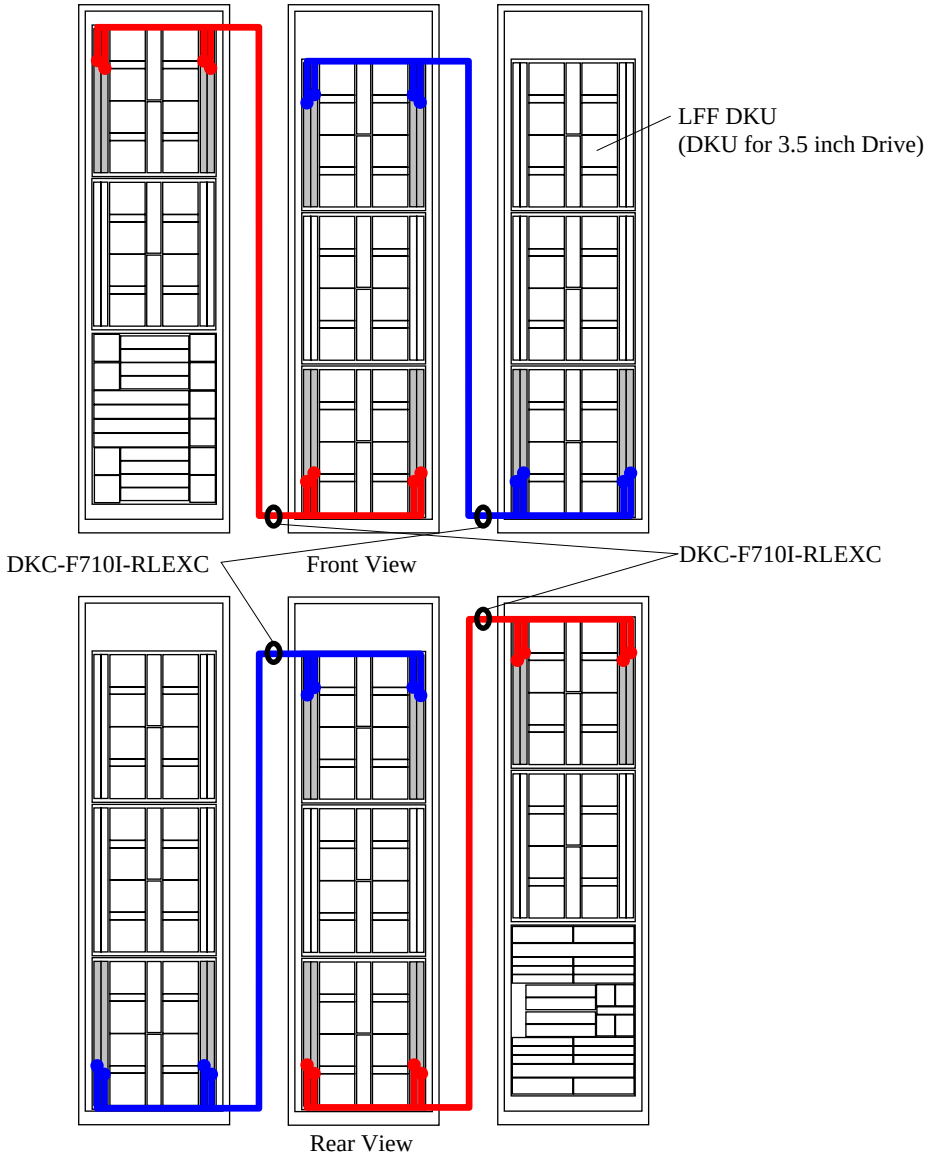

Fig. 4.1.4.13-1 Mounting Position of Device Interface Cable

Copyright © 2010, 2011, Hitachi, Ltd.

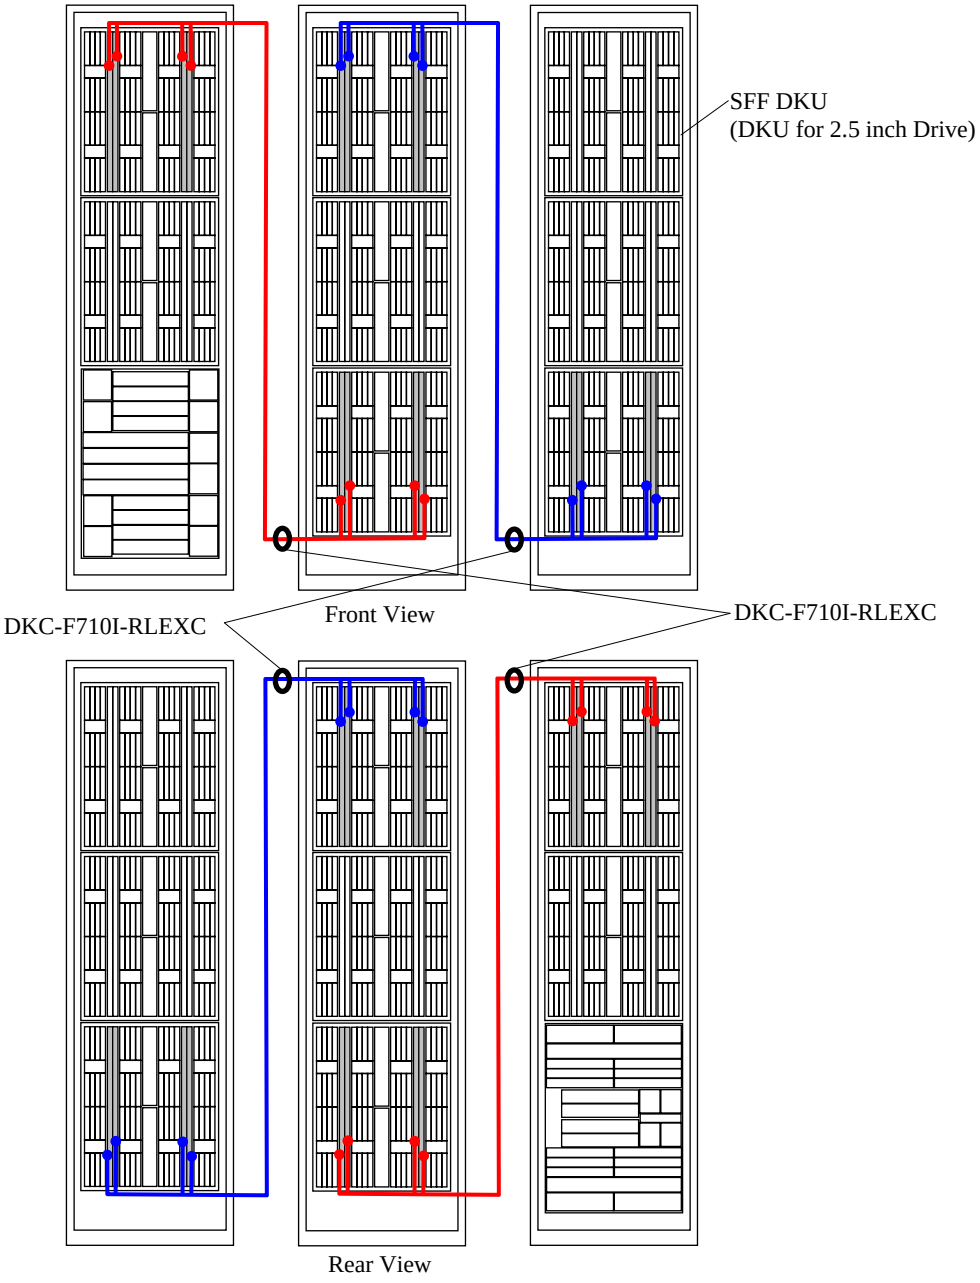

Fig. 4.1.4.13-2 Mounting Position of Device Interface Cable

Copyright © 2010, Hitachi, Ltd.

When you need to remove Device Interface Cable RLEX from the Right Side of the Connection Source Rack

1. Pattern of Cable De-installation

   There are four kinds of pattern in all that decreases the Device Interface Cable RLEX (DKC-F710I-RLEXC) at the right side of the RACK by the combination of the DKU.

   When decreasing DKC-F710I-RLEX at the left side of the rack, refer to the page INST04-01C-3840.

   In this procedure, the output side of the Device Interface Cable is defined as a Connection Source, and the RACK is called a Connection Source RACK, and the DKU is called a Connection Source DKU. Moreover, the input side of the Device Interface Cable is defined as a Connection Destination, and the RACK is called a Connection Destination RACK, and the DKU is called a Connection Destination DKU.

   Before starting operation according to this procedure, understand each process name and the position.

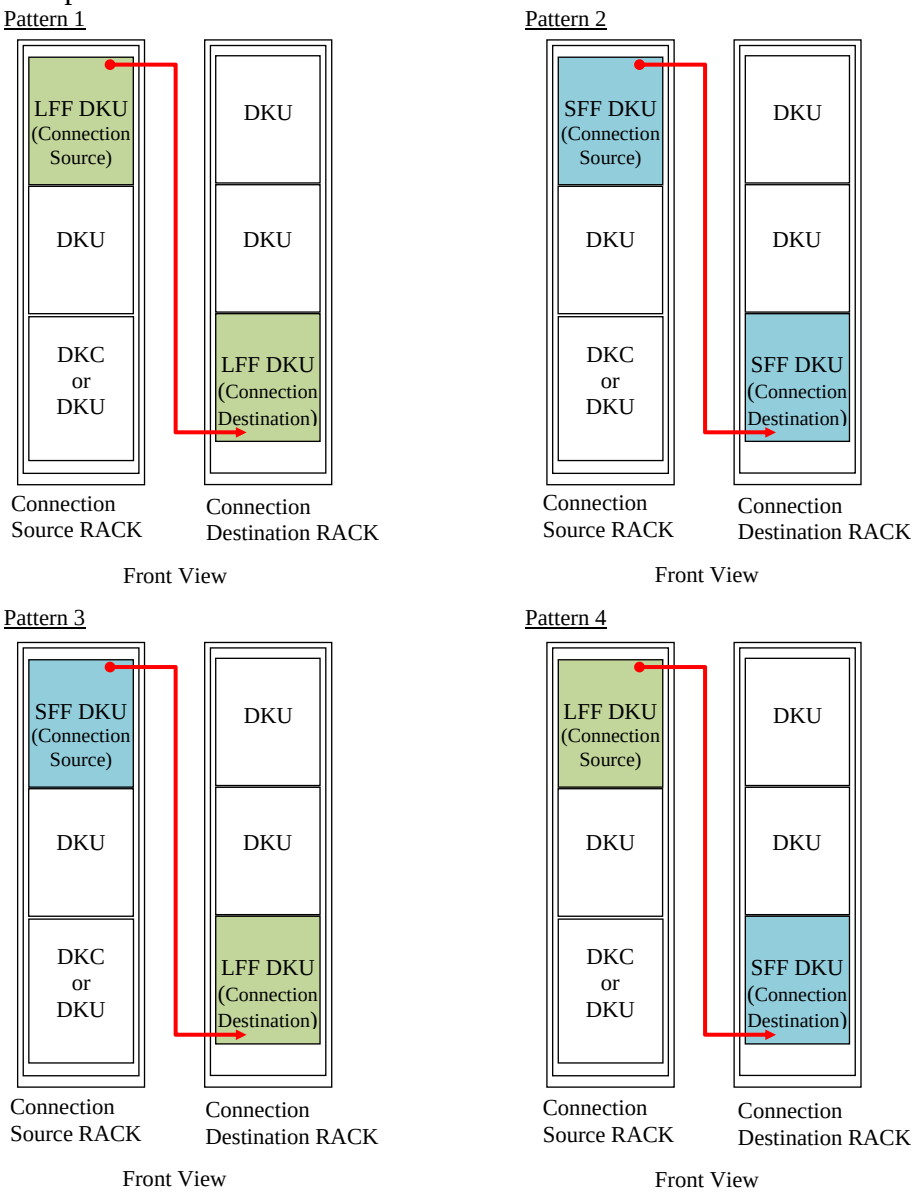

Fig. 4.1.4.13-3 Pattern of Cable De-installation (Right Side Decreasing)

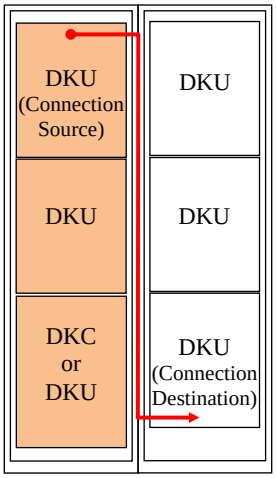
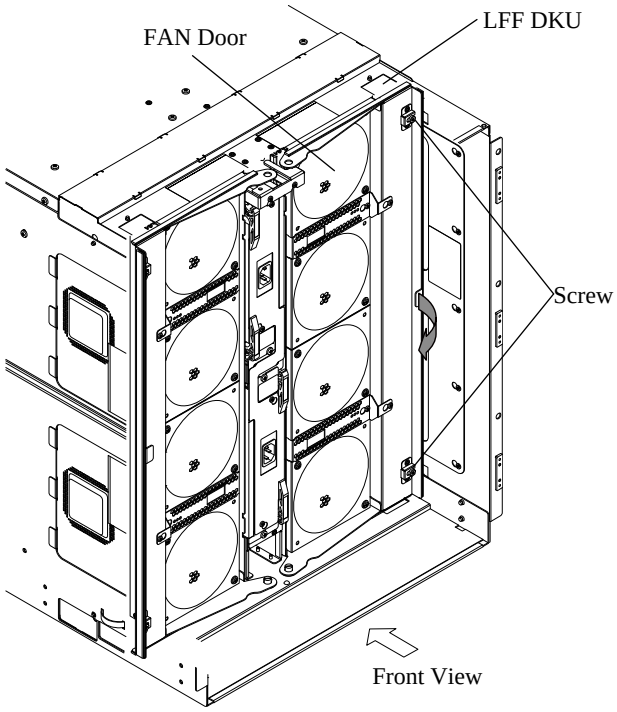
Copyright © 2010, Hitachi, Ltd.

2. Cable De-installation of the Front Side of the RACK
   a. Loosen all screws of the front right side of the DKU (two screws in each DKU) that is installed in the connection source RACK, and open the FAN door.





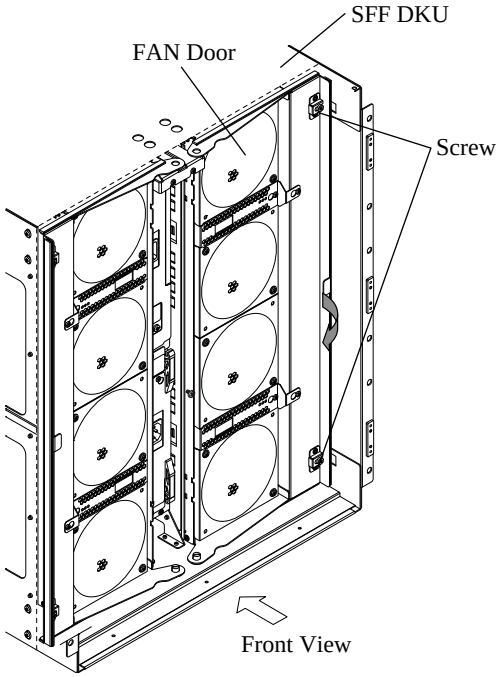


Fig. 4.1.4.13-4 FAN Door Opening

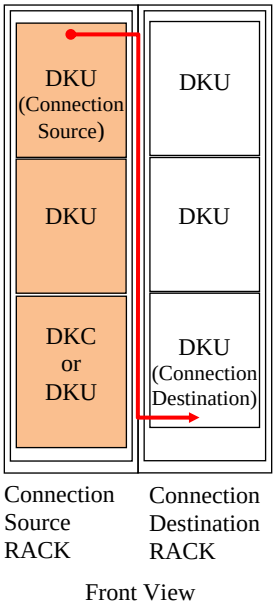
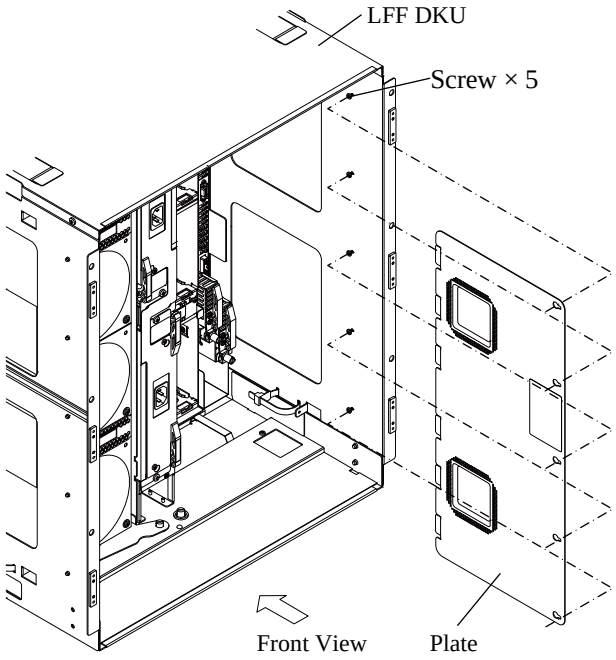
Copyright © 2010, 2011, Hitachi, Ltd.

b. Loosen all screws of the front right side of the DKU (five screws in each DKU) that is installed in the connection source RACK, and remove the plate.





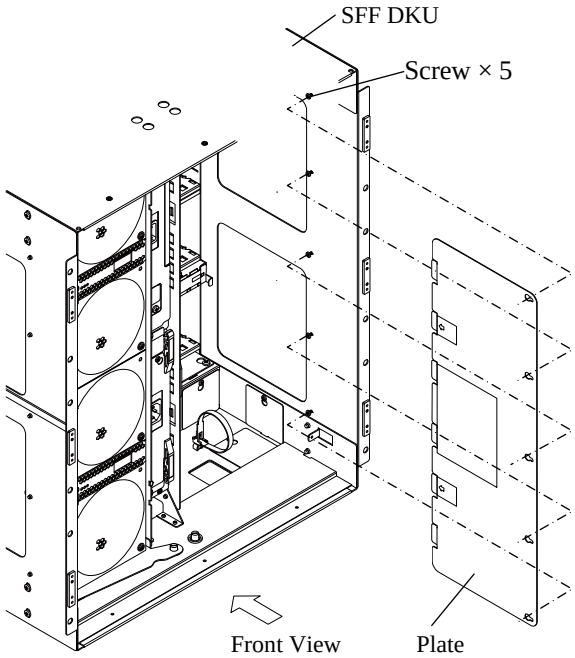


Fig. 4.1.4.13-5 Removal of Plates

Copyright © 2010, Hitachi, Ltd.

c. Loosen all screws of the front left side of the DKU (two screws in each DKU) that is installed in the connection destination RACK, and open the FAN door.

d. Loosen all screws of the front left side of the DKU (five screws in each DKU) that is installed in the connection destination RACK, and remove the plate.

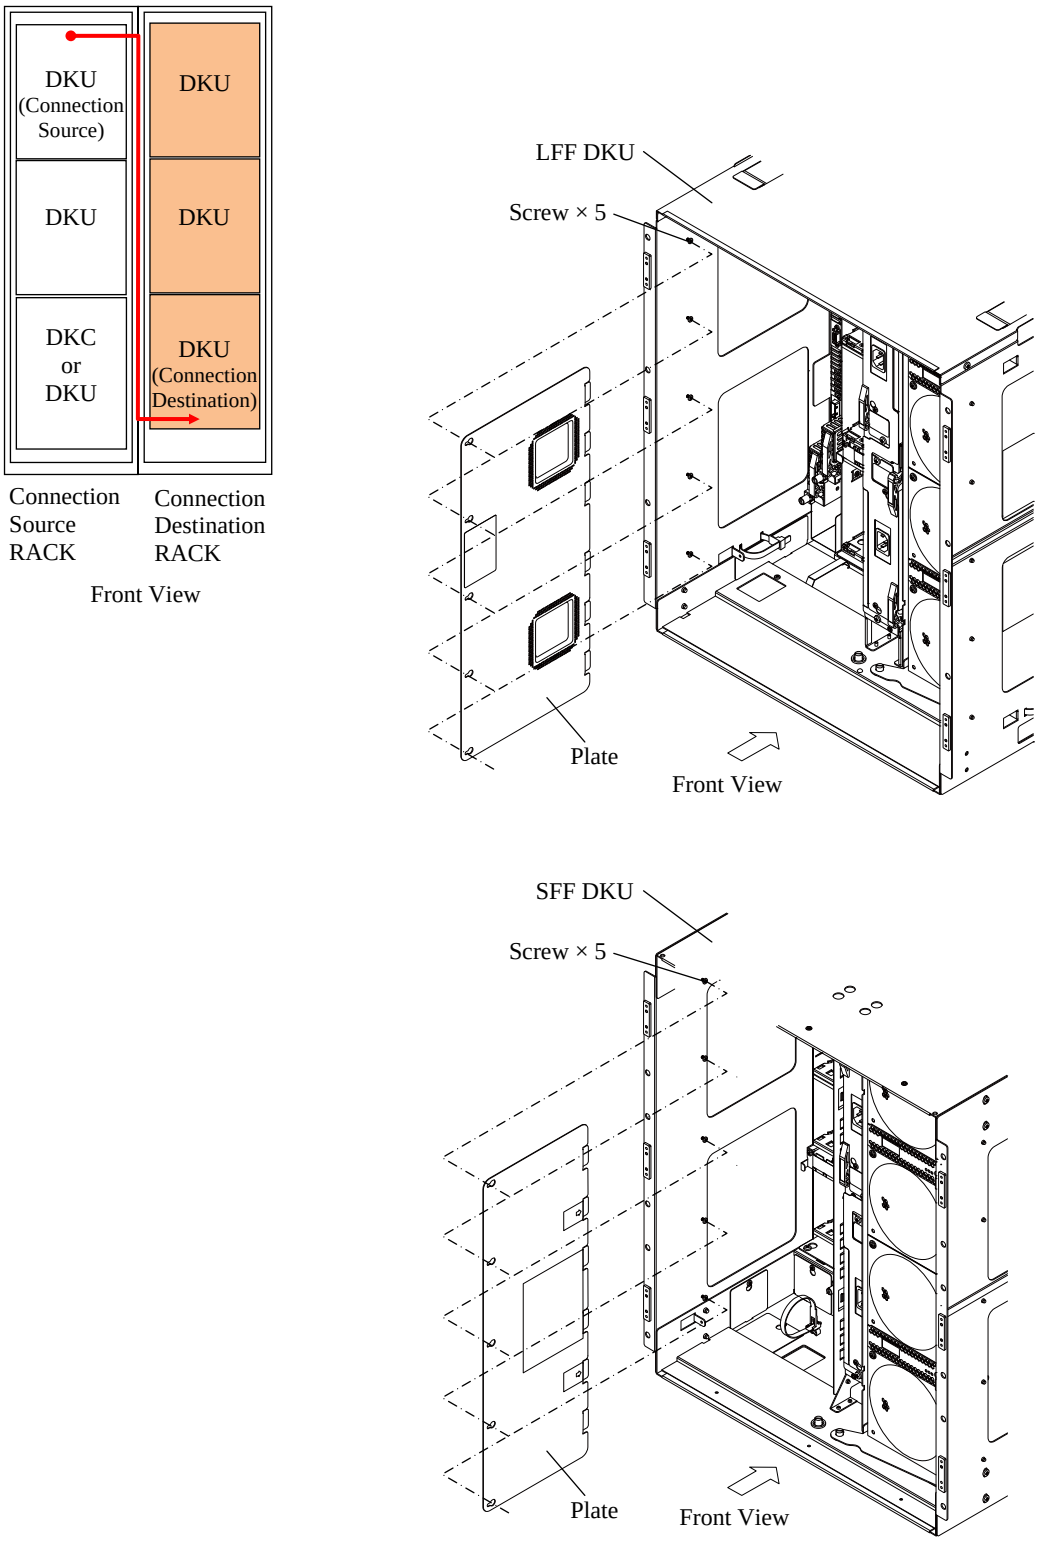

Fig. 4.1.4.13-7 Removal of Plate

Copyright © 2010, Hitachi, Ltd.

3. Cable De-installation of the Front Side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU.

a. Disconnect the cables (0/4-R-A3 and 0/4-L-A3) from the SSW PCBs of the front right side of the connection source DKU by using a jig. Cap the cables afterward.

Notice:	A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

b. Remove the two hangers.
c. Pull out the cables (0/4-R-A3 and 0/4-L-A3) from the connection source DKU.
d. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws. (Refer to the Fig. 4.1.4.13-4.)

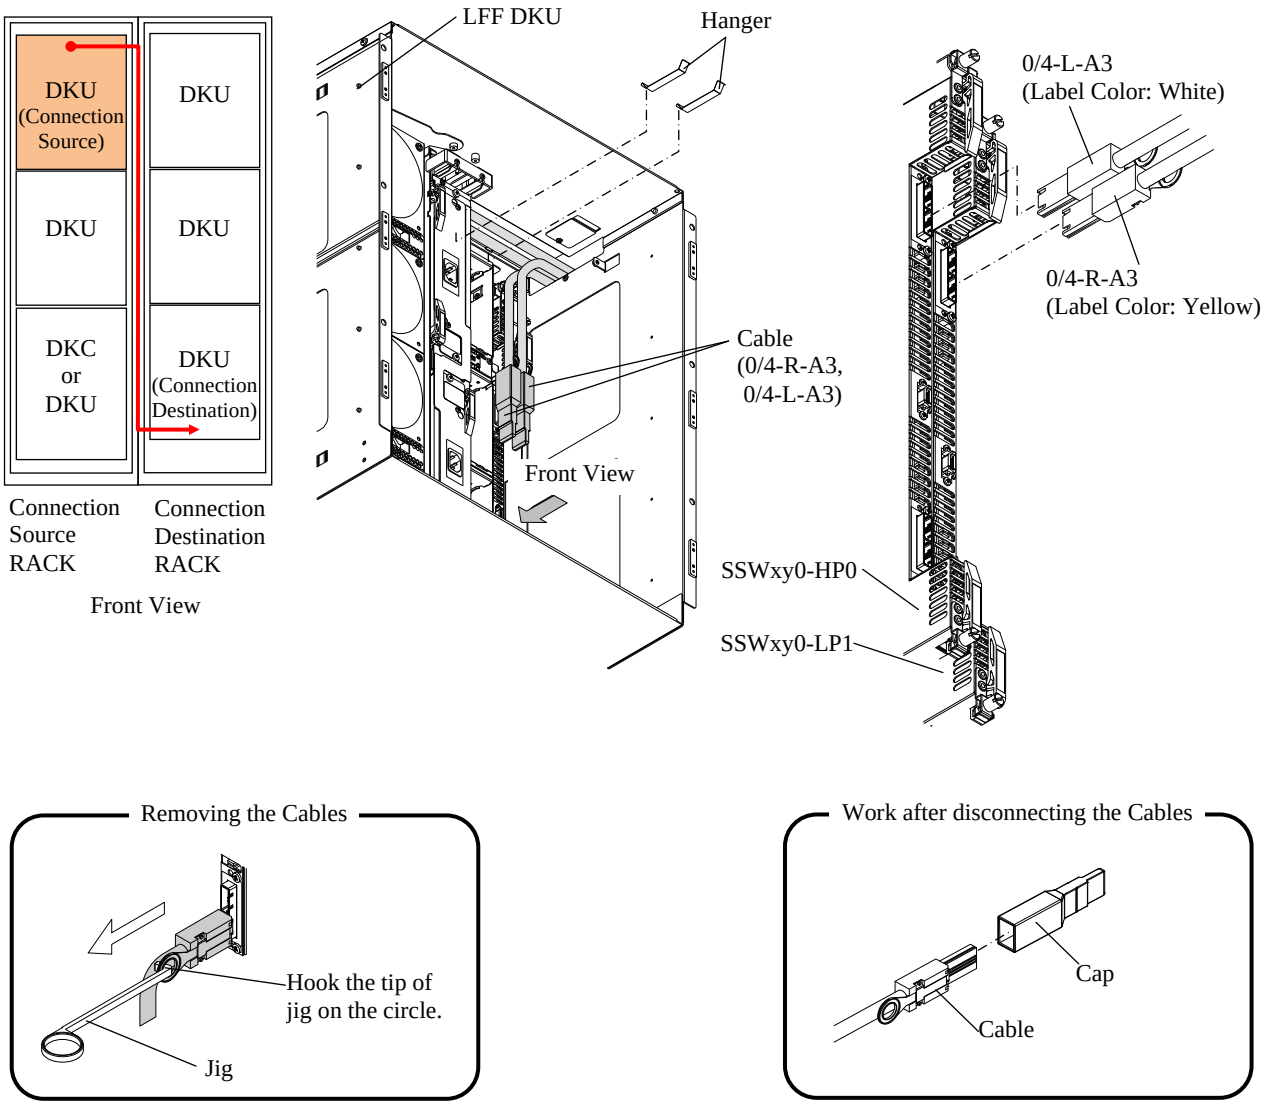

Fig. 4.1.4.13-8 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.13-6.)
f. Disconnect the cables (1/5-R-A3 and1/5-L-A3) from the SSW PCBs. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

g Remove the two hangers.
h. Reach into the entry points of the right side of the DKU, and pull the cables out from the DKU by using both hands.
i. Install the two hangers.
j. Close the FAN door of the front left side of the connection source DKU, and loosen the two screws.
k. Loosen the two screws of front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.13-4.)
l. Install the two hangers to front right side of the connection source DKU. (Refer to Fig. 4.1.4.13-8.)

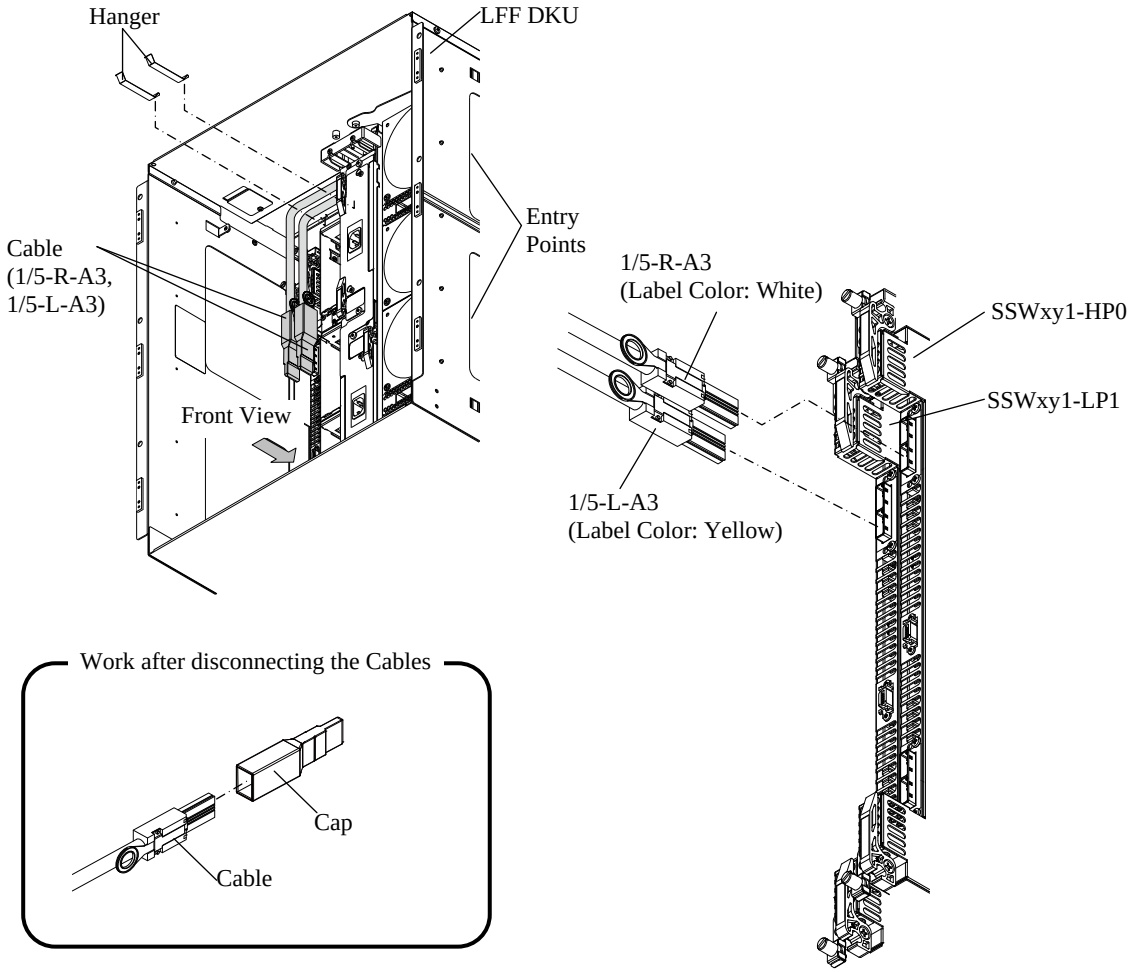

Fig. 4.1.4.13-9 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

When the Connection Source DKU is the SFF DKU

a. Disconnect the cables (0/4-R-A3 and 0/4-L-A3) from the SSW PCBs of the front right side of the connection source DKU. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

b. Open the repeat binder.
c. Pull out the cables (0/4-R-A3 and 0/4-L-A3) from the connection source DKU.
d. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws. (Refer to Fig. 4.1.4.13-4.)

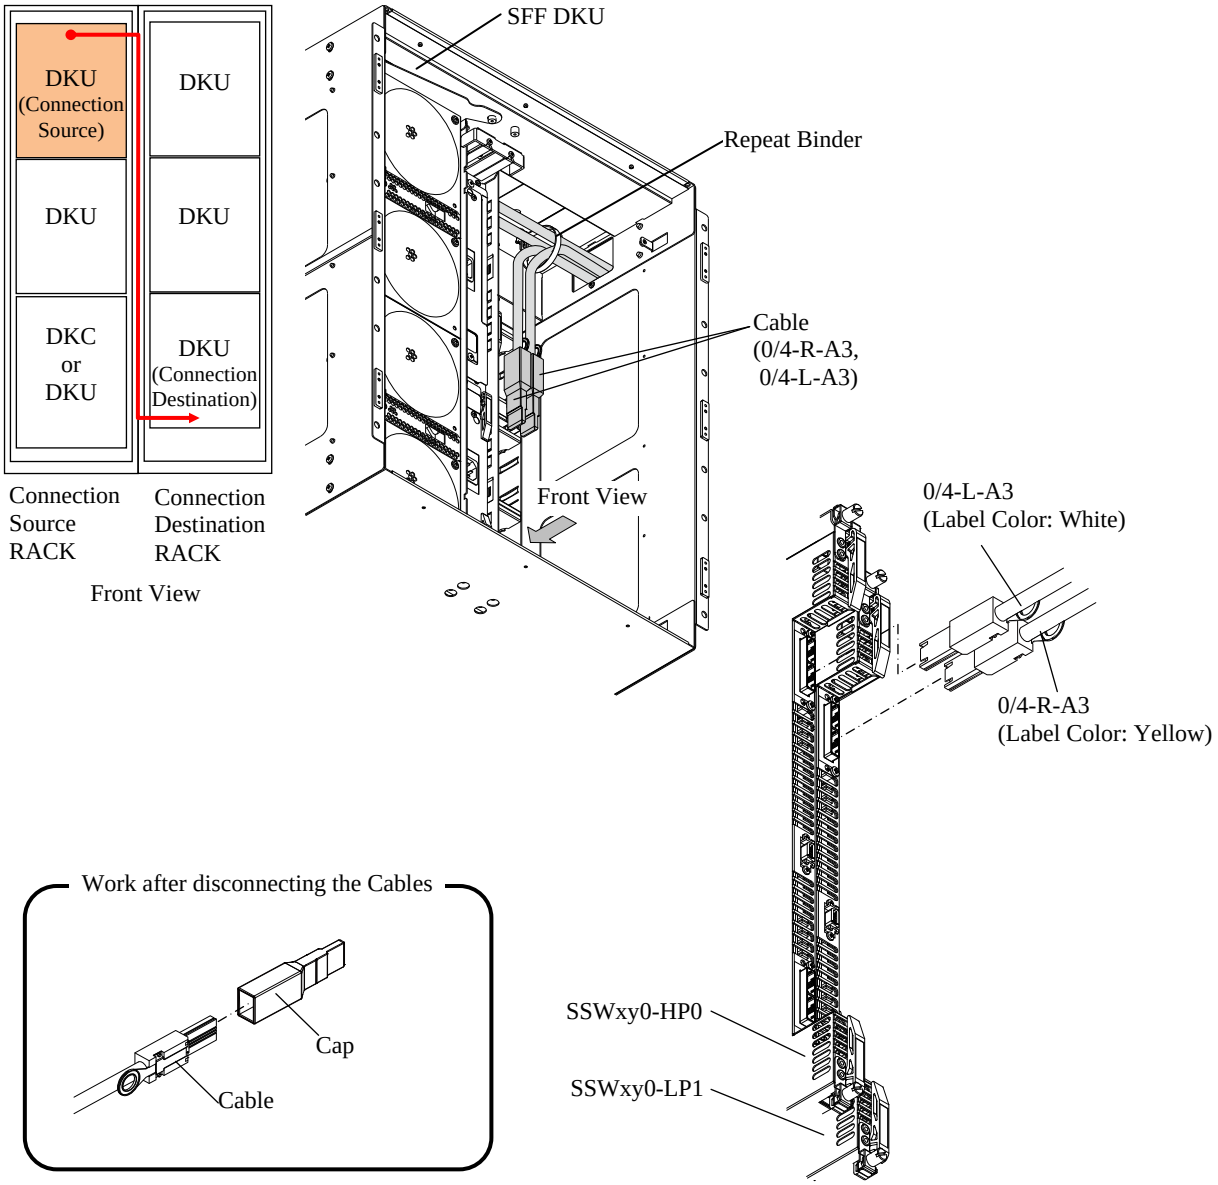

Fig. 4.1.4.13-10 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.13-6.)
f. Disconnect the cables (1/5-R-A3 and 1/5-L-A3) from the SSW PCBs. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

g. Remove the clamp tape from the cables.
h. Reach into the entry points of the right side of the DKU, and pull the cables out from the DKU by using both hands.
i. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws.
j. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.13-4.)
k. Close the repeat binder of the front right side of the connection source DKU. (Refer to Fig. 4.1.4.13-10.)

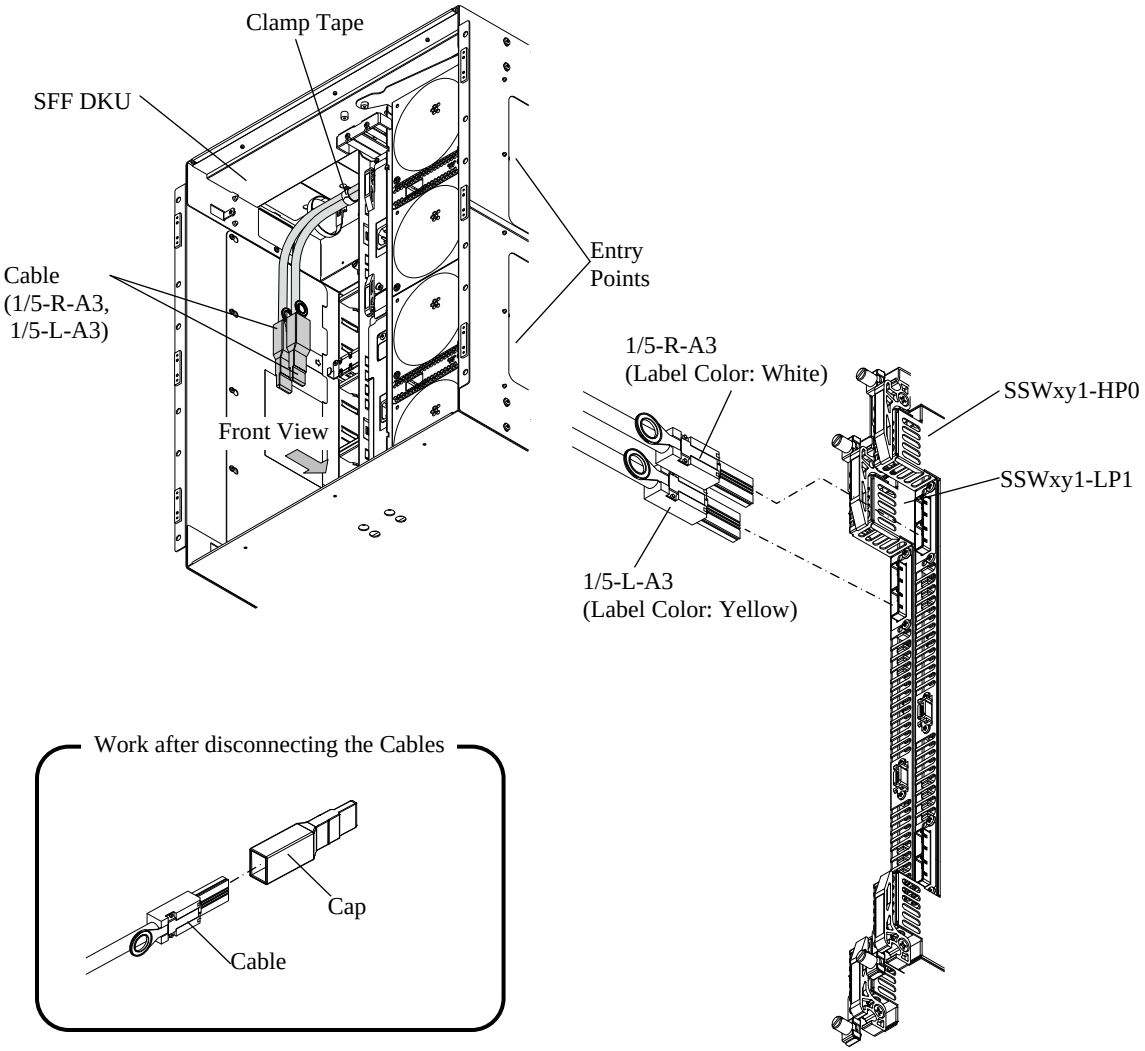

Fig. 4.1.4.13-11 Removal of Cables

4. Cable De-installation of the Front Side of the Connection Destination DKU

When the Connection Destination DKU is the LFF DKU

a. Disconnect the cables (1/5-R-A1 and 1/5-L-A1) from the SSW PCBs of the front left side of the connection destination DKU. Cap the cables afterward.

Notice:	A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

b. Remove the two hangers.
c. Pull out the cables (1/5-R-A1 and 1/5-L-A1) from the connection destination DKU.
d. Close the FAN door of the front left side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 4.1.4.13-6.)

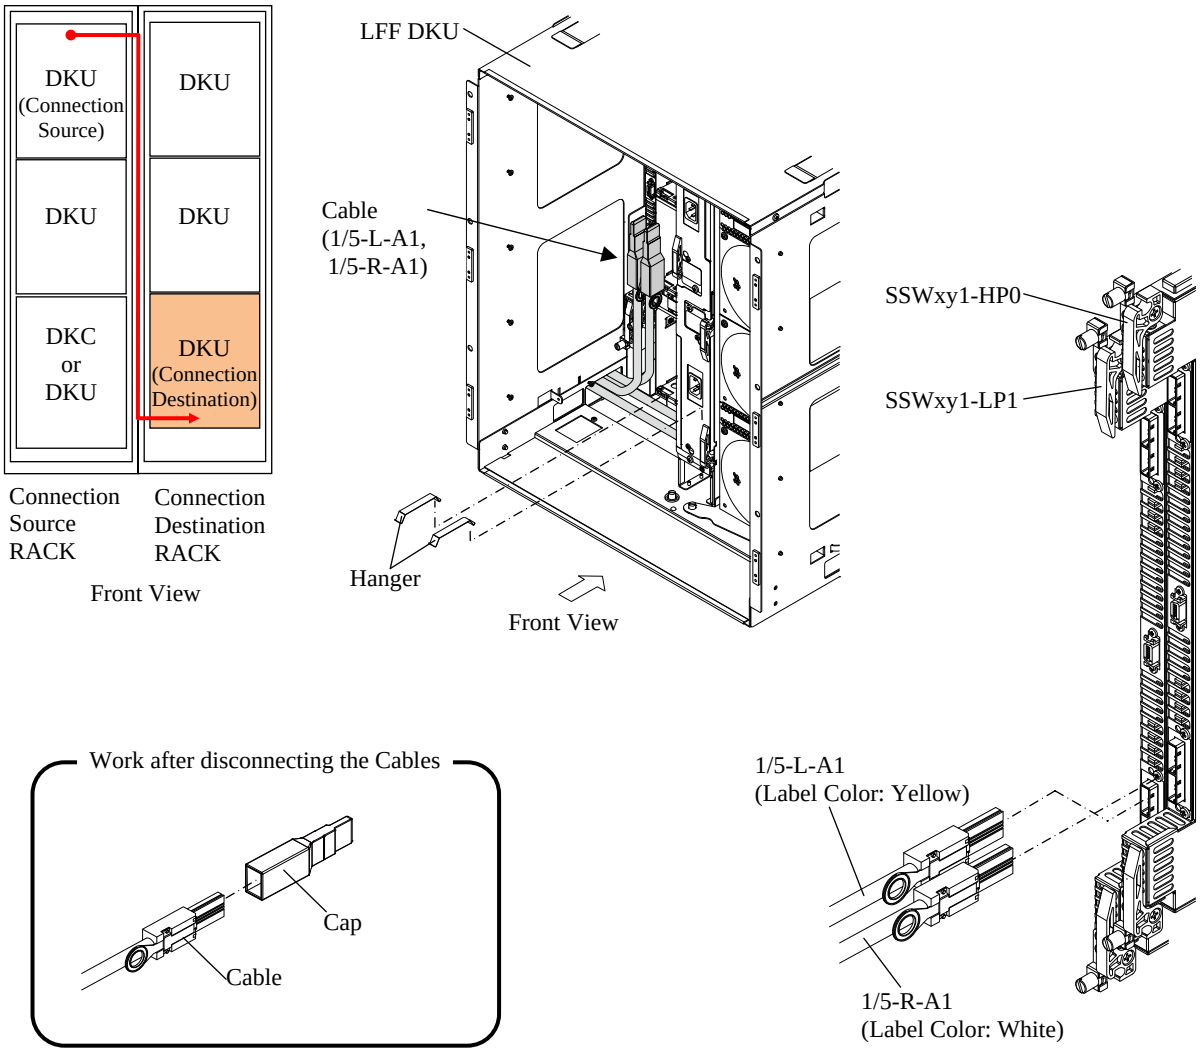

Fig. 4.1.4.13-12 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the front right side of the connection destination DKU, and open the FAN door. (Refer to Fig. 4.1.4.13-4.)
f. Disconnect the cables (0/4-R-A1 and 0/4-L-A1) from the SSW PCBs by using a jig. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

g. Remove the two hangers.
h. Reach into the entry points of the left side of the DKU, and pull the cables out from the DKU by using both hands.
i. Install the two hangers.
j. Close the FAN door of the front right side of the connection destination DKU, and tighten the two screws.
k. Loosen the two screws of the front left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 4.1.4.13-6.)
l. Install the two hangers of the front left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 4.1.4.13-12.)

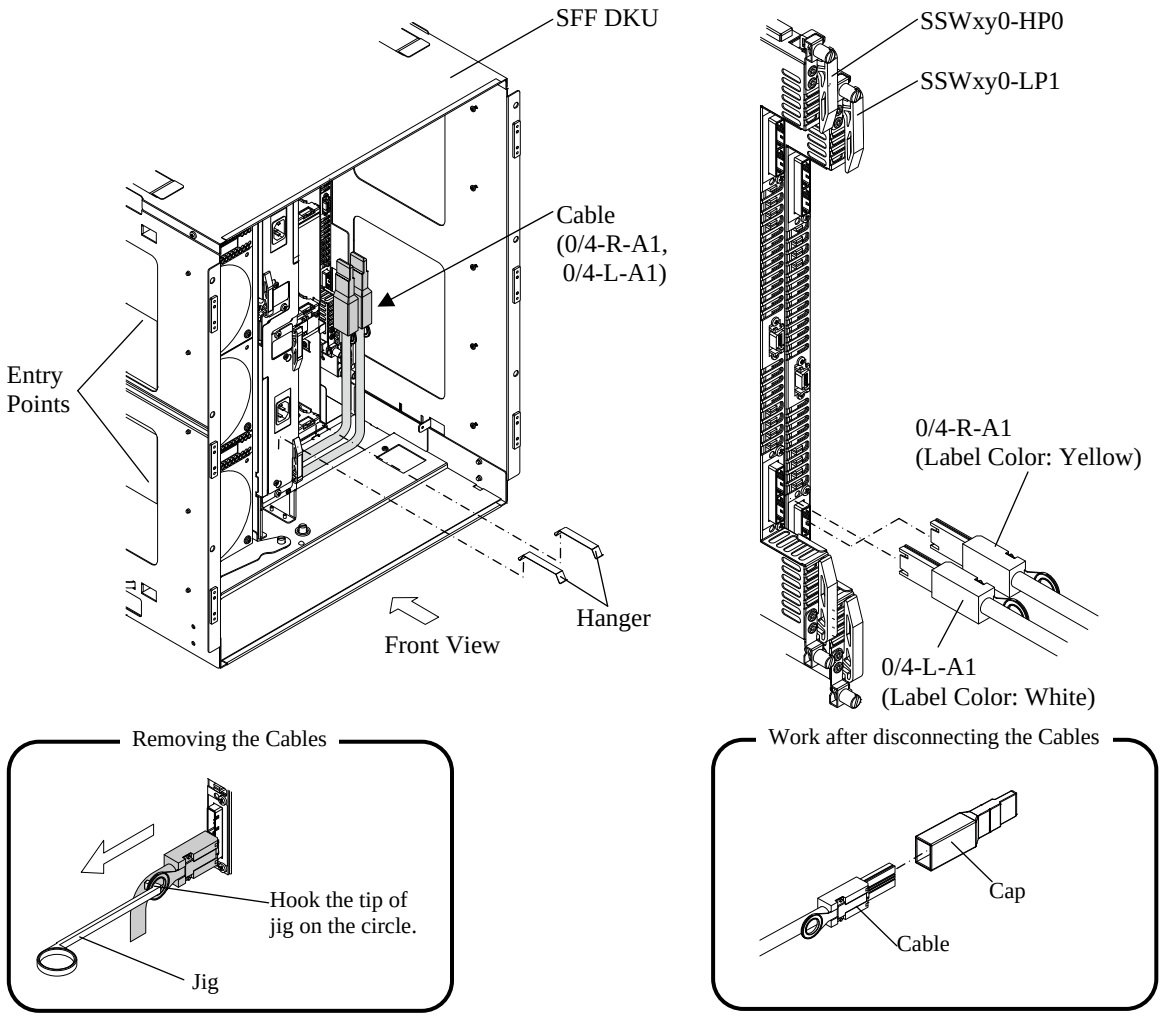

Fig.4.1.4.13-13 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

When the Connection Destination DKU is the SFF DKU.

a. Disconnect the cables (1/5-R-A1 and 1/5-L-A1) from the SSW PCBs of the front left side of the connection destination DKU. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

b. Open the repeat binder.
c. Pull out the cables (1/5-R-A1 and 1/5-L-A1) from the connection destination DKU.
d. Close the FAN door of the front left side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 4.1.4.13-6.)

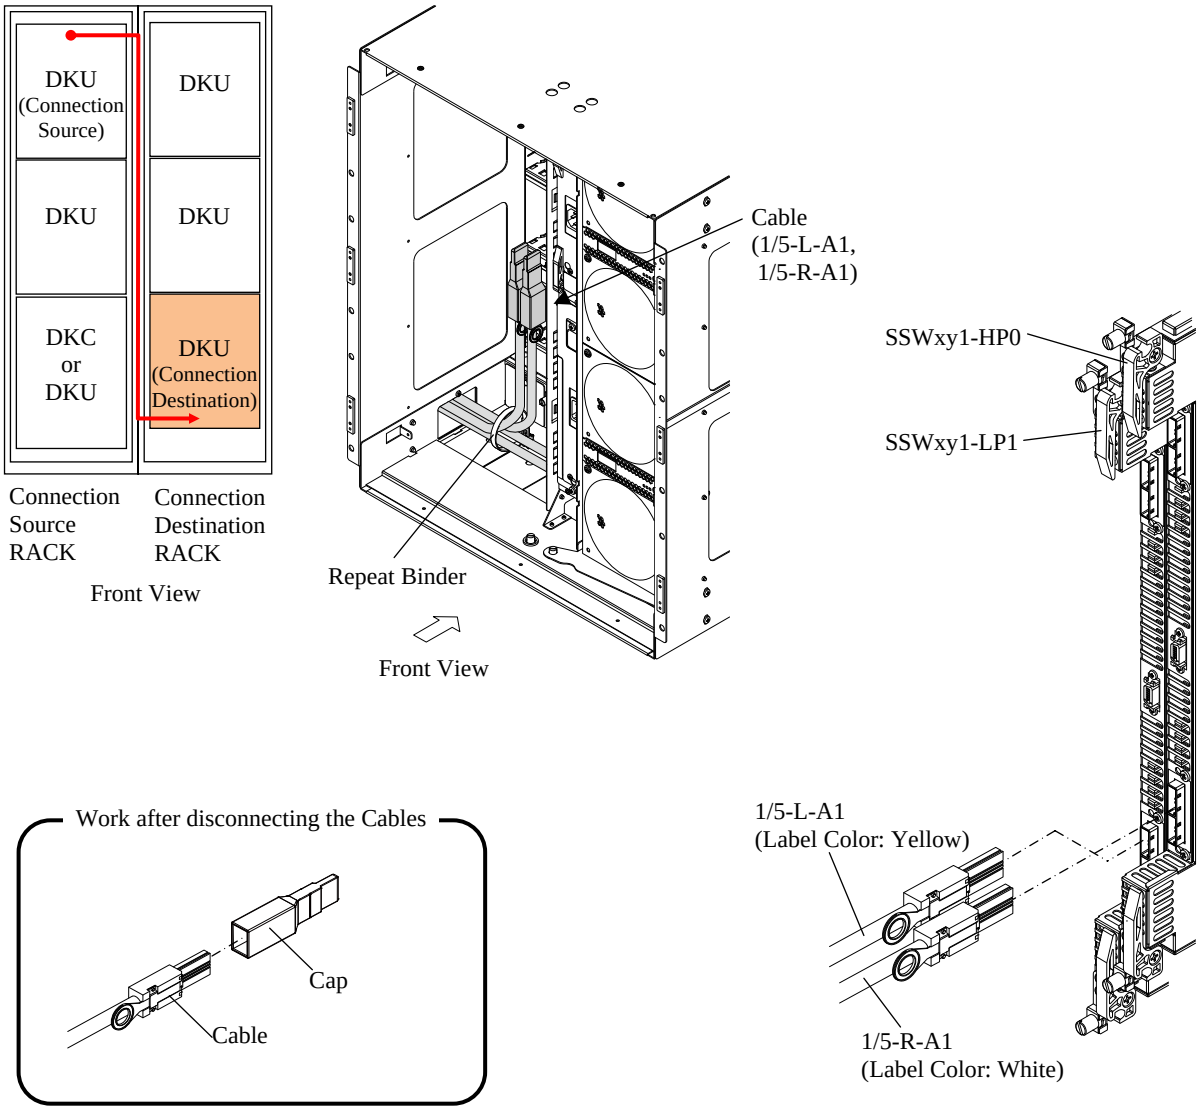

Fig. 4.1.4.13-14 Removal of Cables

7. Cable De-installation of the Rear Side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU

a. Disconnect the cables (3/7-R-A3 and 3/7-L-A3) from the SSW PCBs of the rear left side of the connection source DKU. Cap the cables afterward.

> Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

b. Remove the two hangers from the rear left side of the connection source DKU.
c. Pull out the cables (3/7-R-A3 and 3/7-L-A3) from the connection source DKU.
d. Close the FAN door of the rear left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 4.1.4.13-19.)

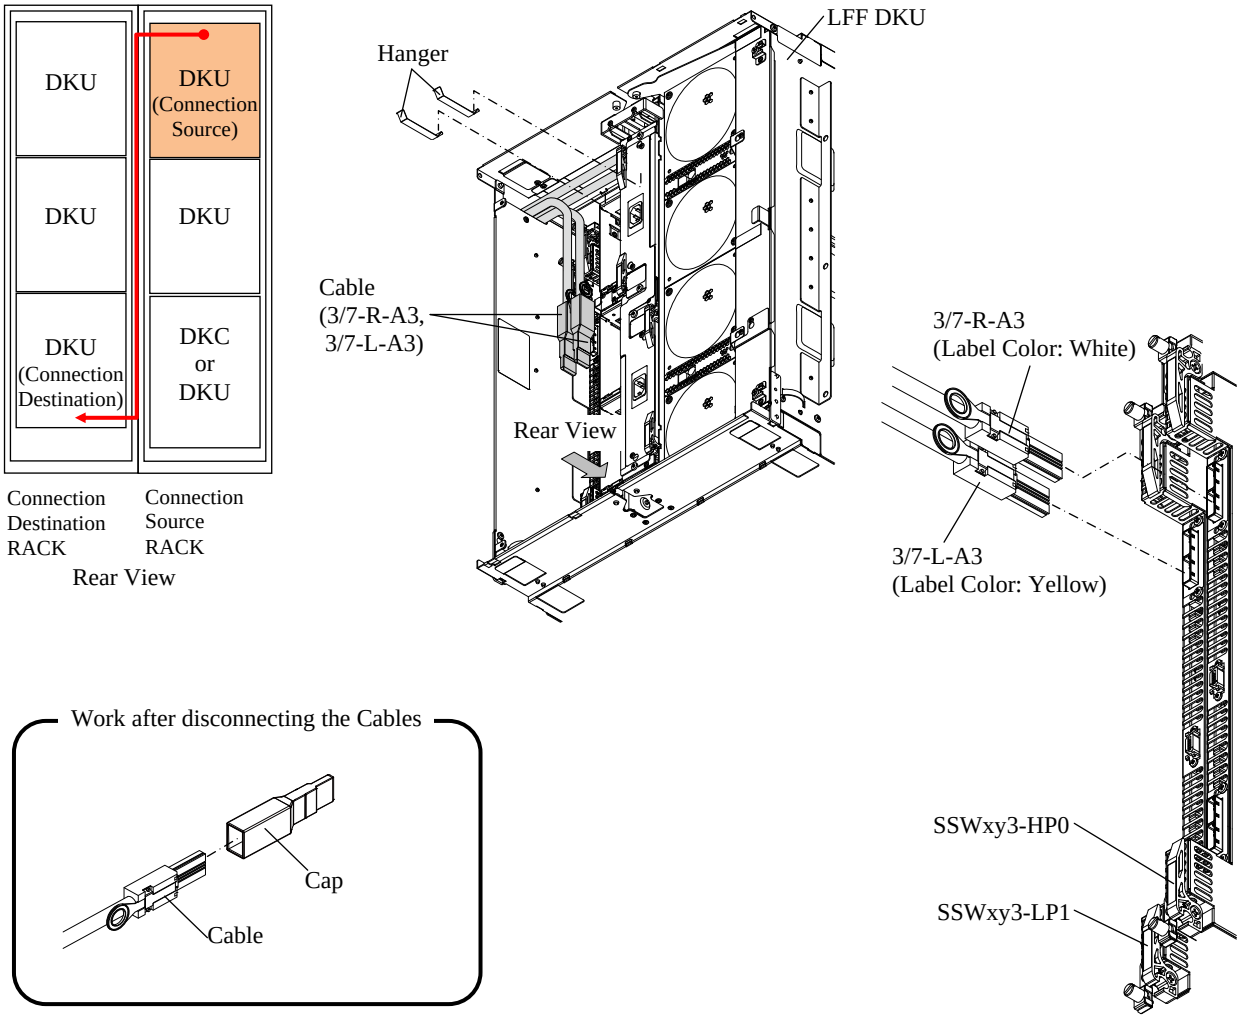

Fig. 4.1.4.13-23 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the rear right side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.13-21.)
f. Disconnect the cables (2/6-R-A3 and 2/6-L-A3) from the SSW PCBs by using a jig. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

g. Remove the two hangers.
h. Pull out the cables from the rear left side of the connection source DKU, and insert the tip of the cables (2/6-R-A3 and 2/6-L-A3) into the upper part of the DKUPS.
i. Install the two hangers.
j. Close the FAN door of the rear right side of the connection source DKU, and tighten the two screws.

8. Cable De-installation of the Rear Side of the Connection Destination DKU

When the Connection Destination DKU is the LFF DKU

a. Disconnect the cables (2/6-R-A1 and 2/6-L-A1) from the SSW PCBs of the rear right side of the connection destination DKU by using a jig. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

b. Remove the two hangers.
c. Pull out the cables (2/6-R-A1 and 2/6-L-A1) from the connection destination DKU.
d. Close the FAN door of the rear right side of the connection destination DKU, and tighten the two screws. (Refer to Fig. 4.1.4.13-21.)

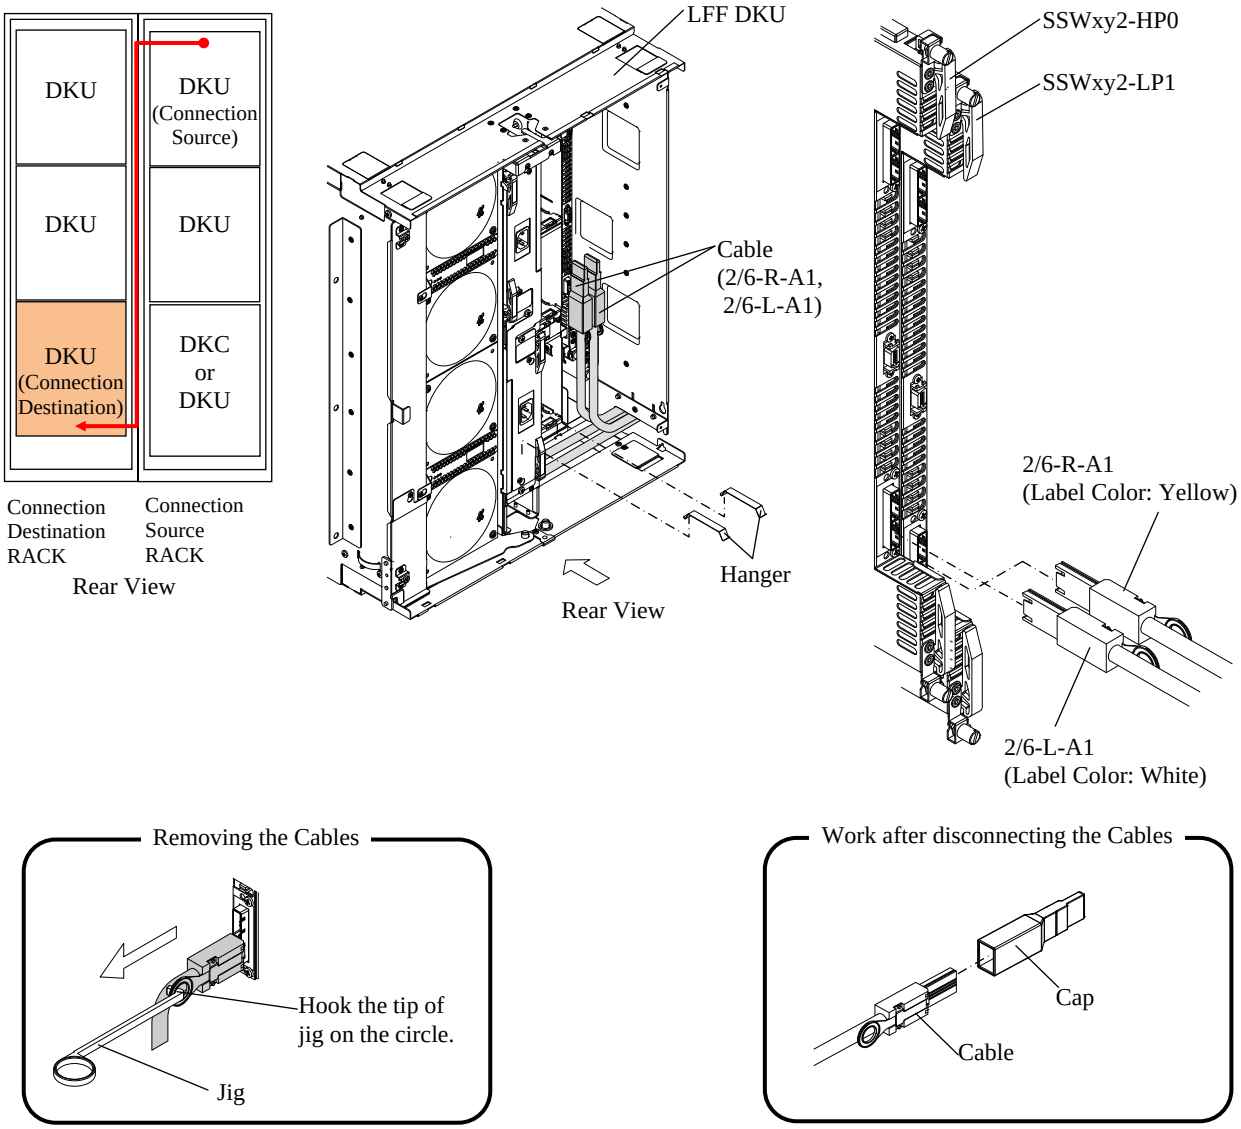

Fig. 4.1.4.13-29 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the rear left side of the connection destination DKU, and open the FAN door. (Refer to Fig. 4.1.4.13-19.)
f. Disconnect the cables (3/7-R-A1 and 3/7-L-A1) from the SSW PCBs. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

g. Remove the two hangers.
h. Pull out the cables from the rear right side of the connection destination DKU, and insert the tip of the cables (3/7-R-A1 and 3/7-L-A1) into the lower part of the DKUPS.
i. Install the two hangers.
j. Close the FAN door of the rear left side of the connection destination DKU, and tighten the two screws.

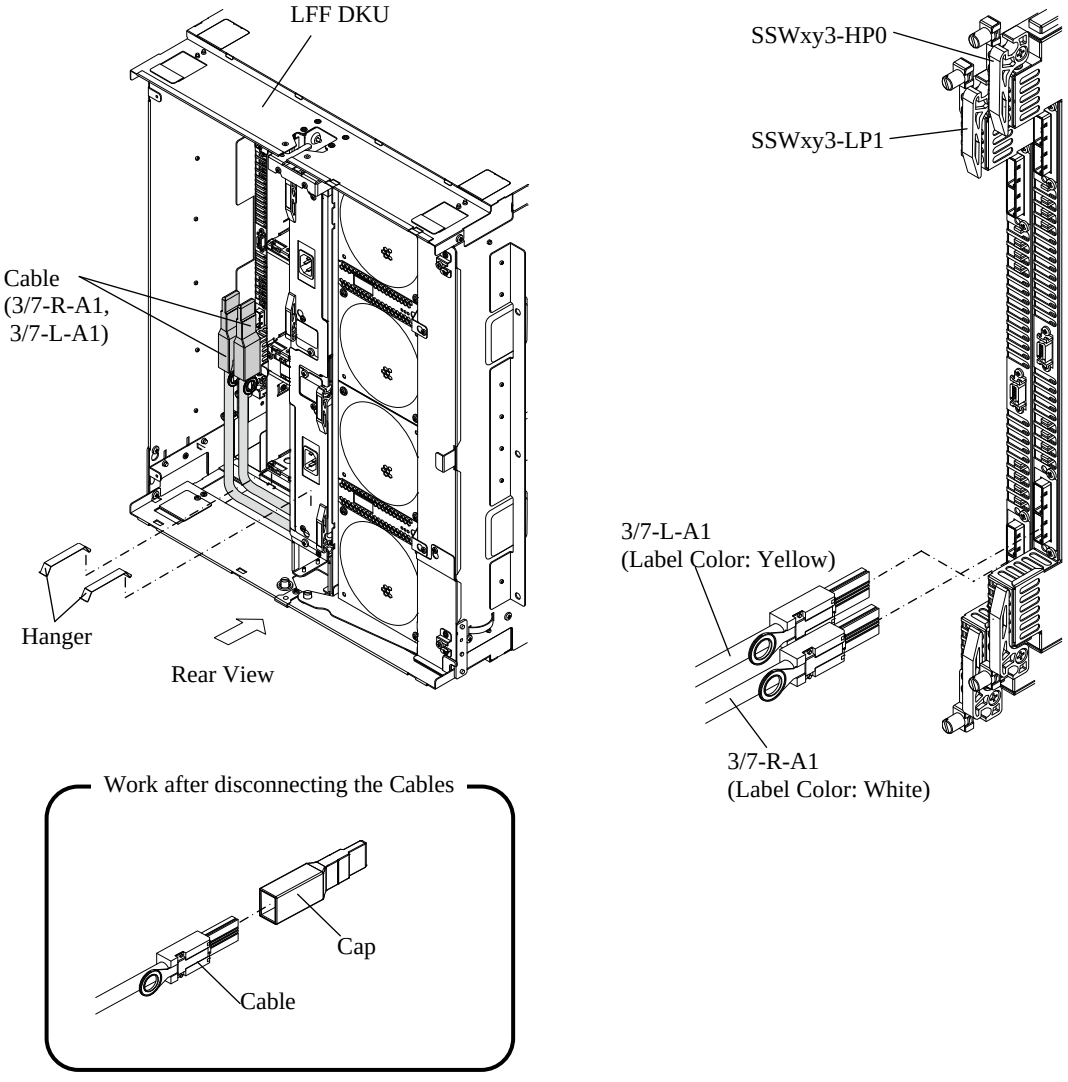

Fig. 4.1.4.13-30 Removal of Cables

When you need to remove Device Interface Cable RLEX from the Left Side of the Connection Source Rack

1. Pattern of Cable De-installation
   There are four kinds of pattern in all that decreases the Device Interface Cable RLEX (DKC-F710I-RLEXC) from the left side of the RACK by the combination of the DKU.
   In this procedure, the output side of the Device Interface Cable is defined as a Connection Source, and the RACK is called a Connection Source RACK, and the DKU is called a Connection Source DKU. Moreover, the input side of the Device Interface Cable is defined as a Connection Destination, and the RACK is called a Connection Destination RACK, and the DKU is called a Connection Destination DKU.
   Before starting operation according to this procedure, understand each process name and the position.

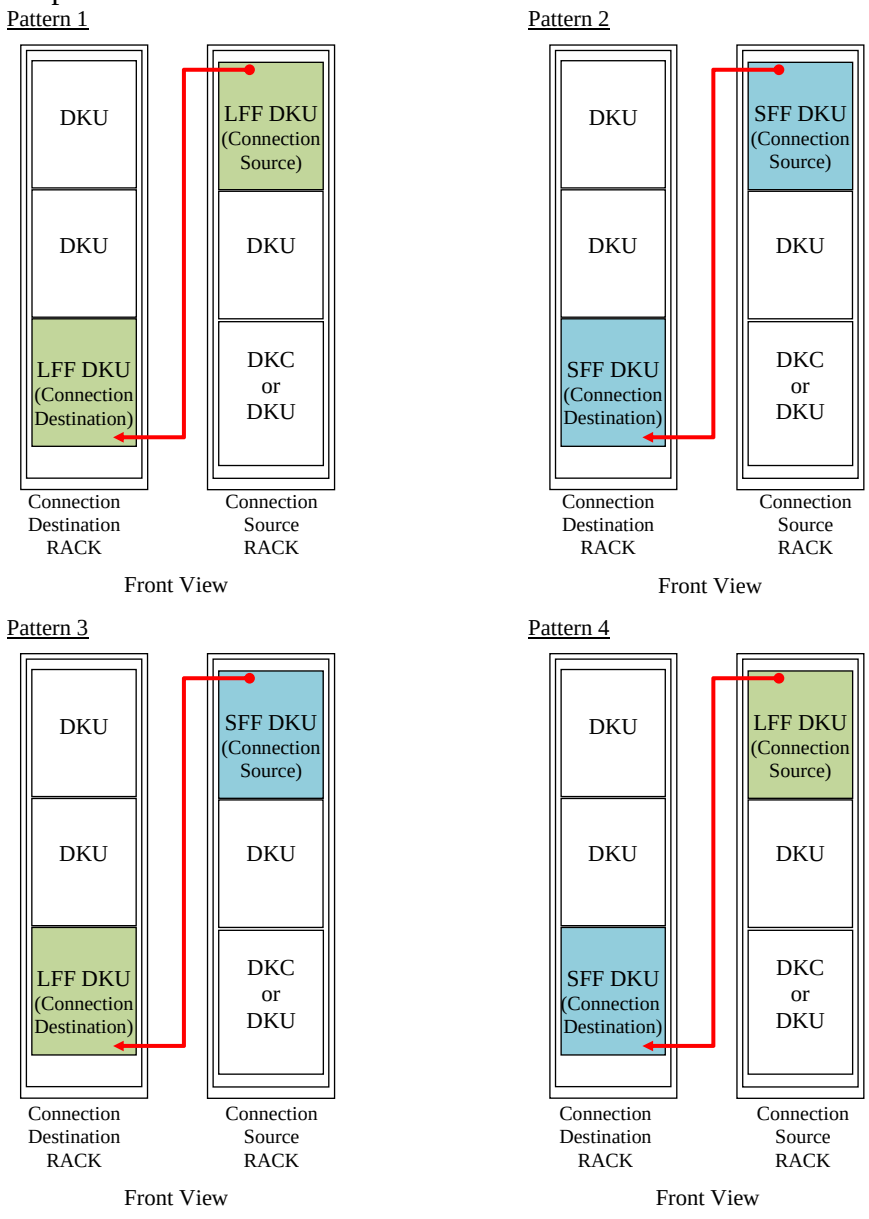

Fig. 4.1.4.13-39 Pattern of Cable Connection (Left Side Decreasing)

Copyright © 2010, Hitachi, Ltd.

2. Cable De-installation of the Front Side of the RACK
   a. Loosen all screws of the front left side of the DKU (two screws in each DKU) that is installed in the connection source RACK, and open the FAN door.

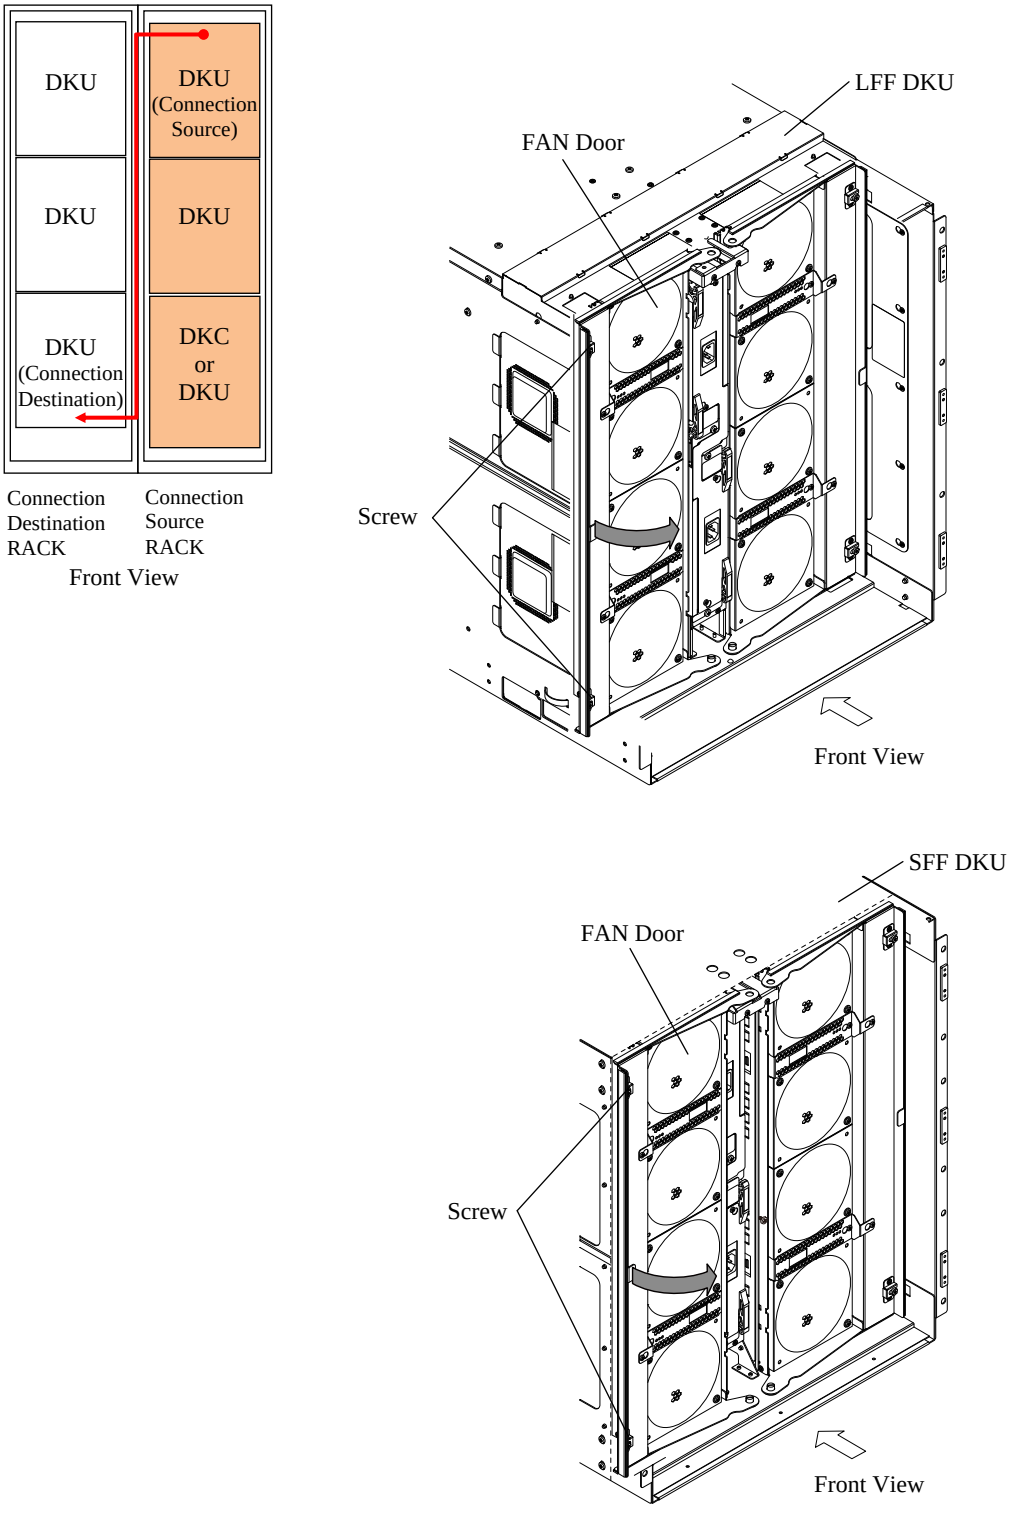

Fig. 4.1.4.13-40 FAN Door Opening

Copyright © 2010, 2011, Hitachi, Ltd.

b. Loosen all screws of the front left side of the DKU (five screws in each DKU) that is installed in the connection source RACK, and remove the plate.

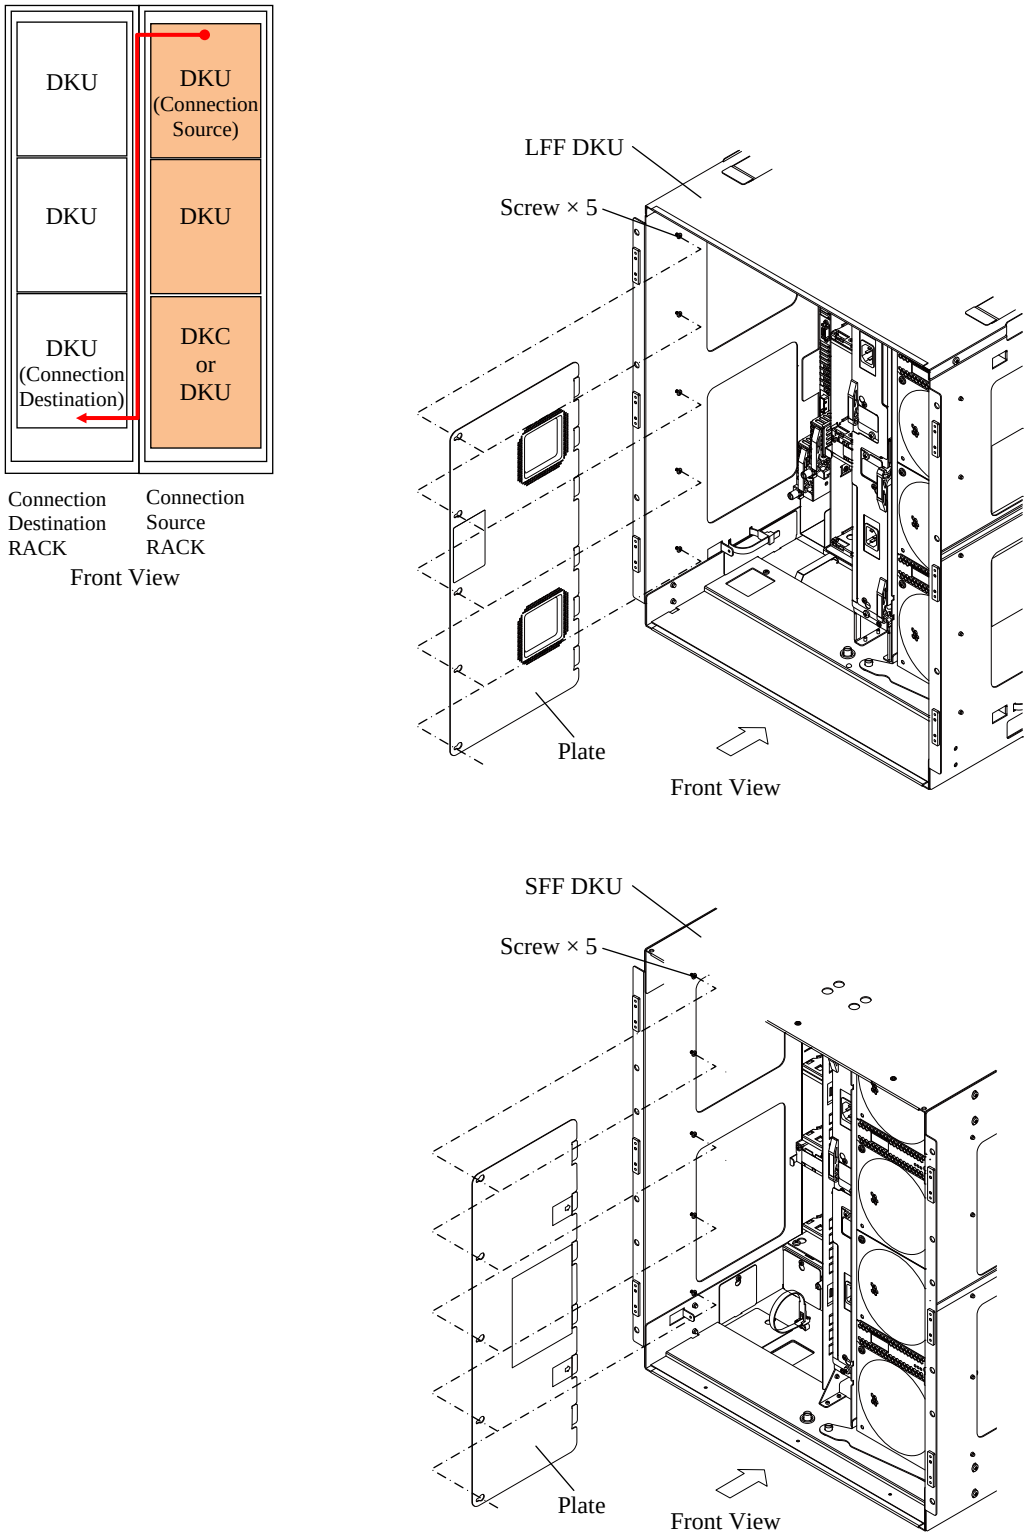

Fig. 4.1.4.13-41 Removal of Plate

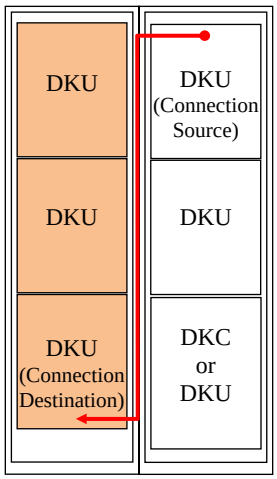
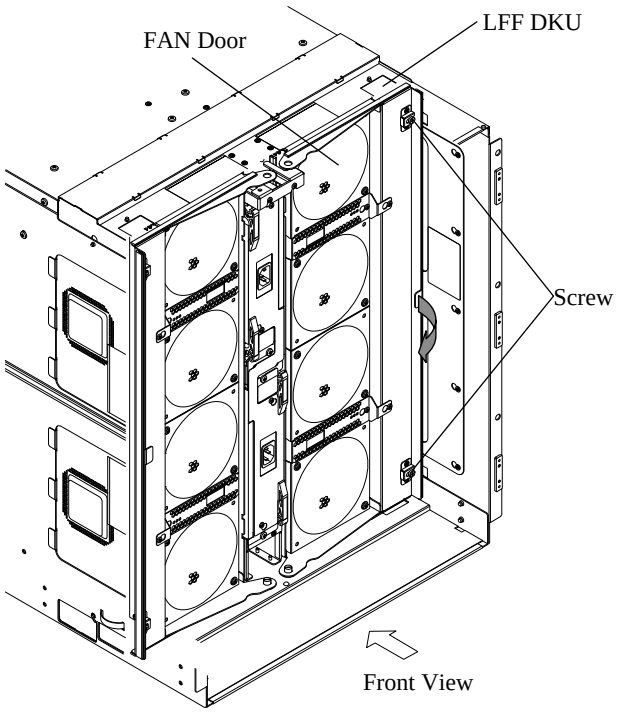
Copyright © 2010, Hitachi, Ltd.

c. Loosen the two screws of the front right side of all DKU that is installed in the connection destination RACK, and open the FAN door.





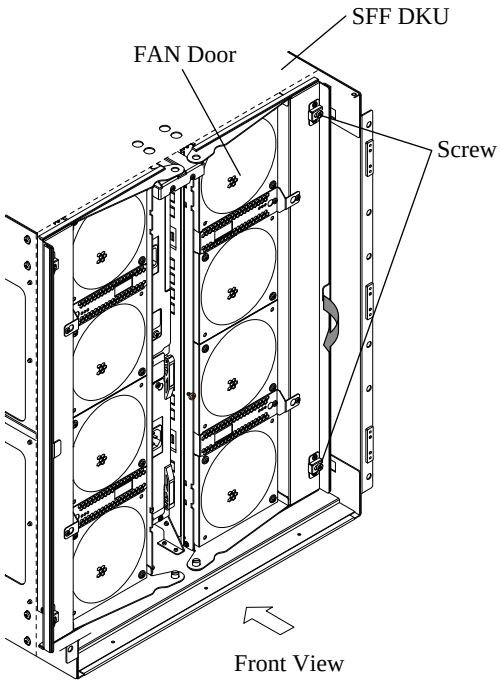


Fig. 4.1.4.13-42 FAN Door Opening

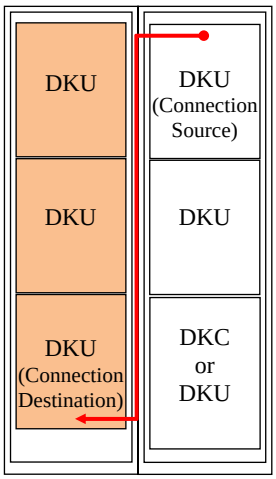
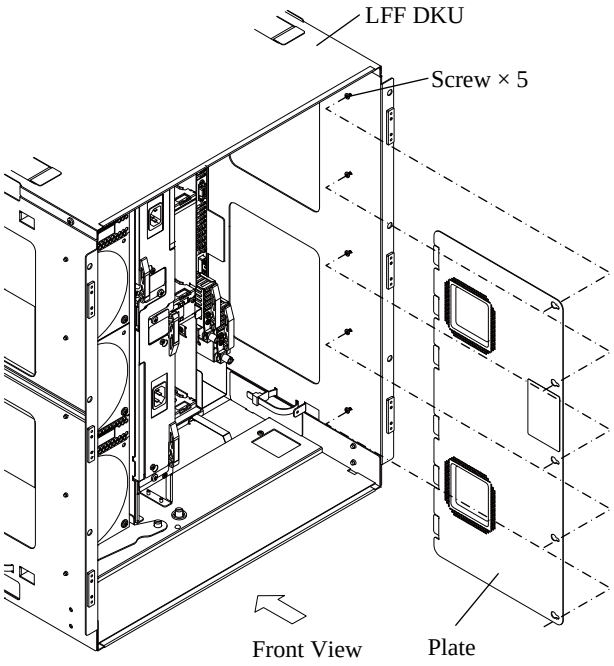
Copyright © 2010, 2011, Hitachi, Ltd.

d. Loosen all screws of the front right side of the DKU (five screws in each DKU) that is installed in the connection destination RACK, and remove the plate.





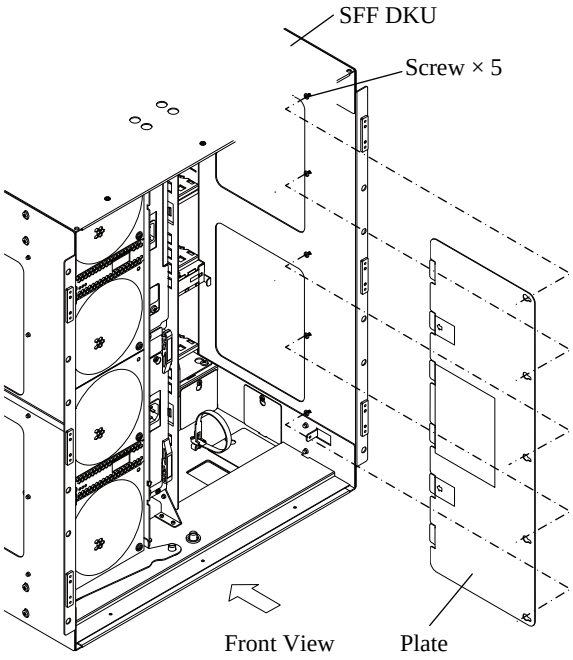


Fig. 4.1.4.13-43 Removal of Plate

Copyright © 2010, Hitachi, Ltd.

3. Cable De-installation of the Front Side of the Connection Source DKU

When the Connection Source DKU is the LFF DKU

a. Disconnect the cables (1/5-R-A3 and 1/5-L-A3) from the SSW PCBs of the front left side of the connection source DKU. Cap the cables afterward.

Notice:	A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

b. Remove the two hangers.
c. Pull out the cables (1/5-R-A3 and 1/5-L-A3) from the connection source DKU.
d. Close the FAN door of the front left side of the connection source DKU, and tighten the two screws. (Refer to Fig. 4.1.4.13-40.)

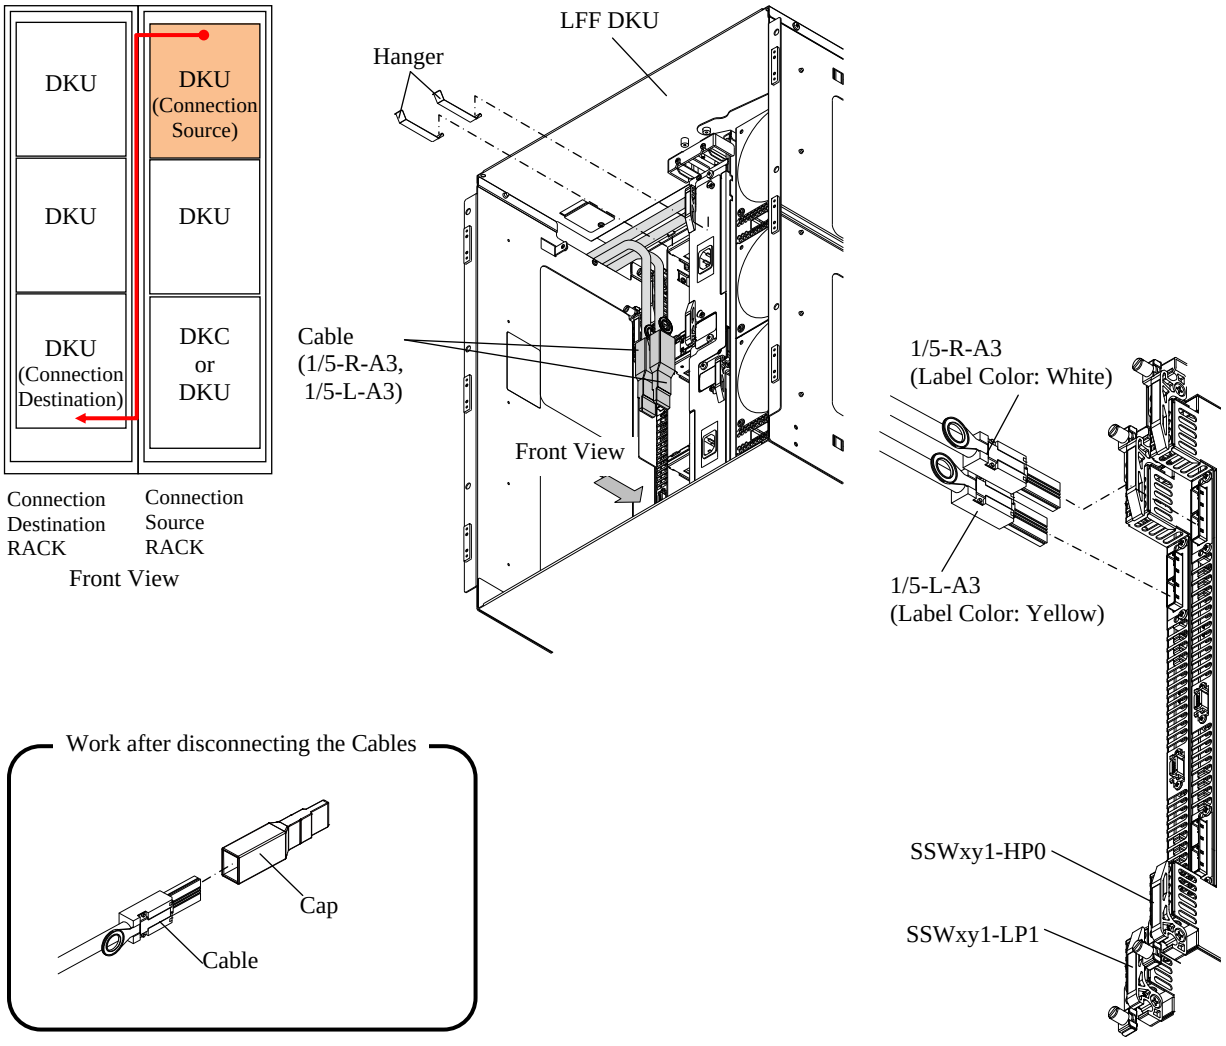

Fig. 4.1.4.13-44 Removal of Cables

Copyright © 2010, Hitachi, Ltd.

e. Loosen the two screws of the front right side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.13-42.)
f. Disconnect the cables (0/4-R-A3 and 0/4-L-A3) from the SSW PCBs by using a jig. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

g. Remove the two hangers.
h. Reach into the entry points of the left side of the DKU, and pull the cables out from the DKU by using both hands.
i. Install the two hangers.
j. Close the FAN door of the front right side of the connection source DKU, and tighten the two screws.
k. Loosen the two screws of the front left side of the connection source DKU, and open the FAN door. (Refer to Fig. 4.1.4.13-40.)
l. Install the two hangers of the front left side of the connection source DKU. (Refer to Fig. 4.1.4.13-44.)

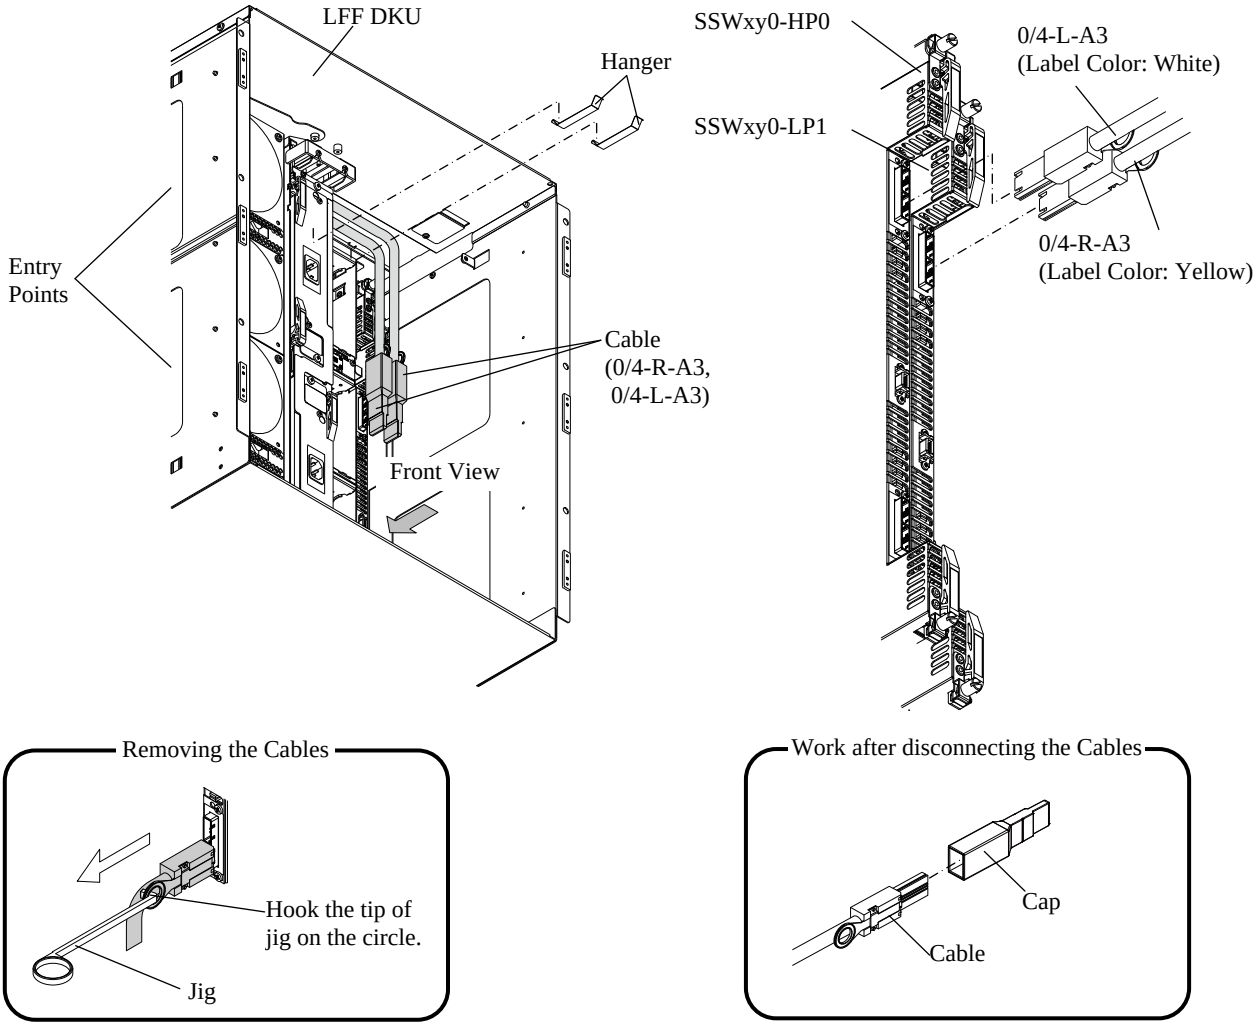

Fig. 4.1.4.13-45 Removal of Cables

4.1.4.14 De-Installation Procedure of Device Interface Cable HBF (DKC-F710I-HBFC)

De-Installation Condition

DKC-F710I-HBFC is a cable option to connect between 2nd DKA of DKC-x and DKU-x0 (FBX DKU) with the high performance model.
It is necessary to remove this cable option when DKU-00/01 is FBX DKU and 2nd DKA needs to be removed.
Refer to below Table 4.1.4.14-1 for the condition of DKC-F710I-HBFC installation, and go to the appropriate page.

Table 4.1.4.14-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable HBF (DKC-F710I-HBFC) is required to remove.	INST04-01C-4210
2	When Device Interface Cable HBF (DKC-F710I-HBFC) is not required to remove.	INST04-01C-4250

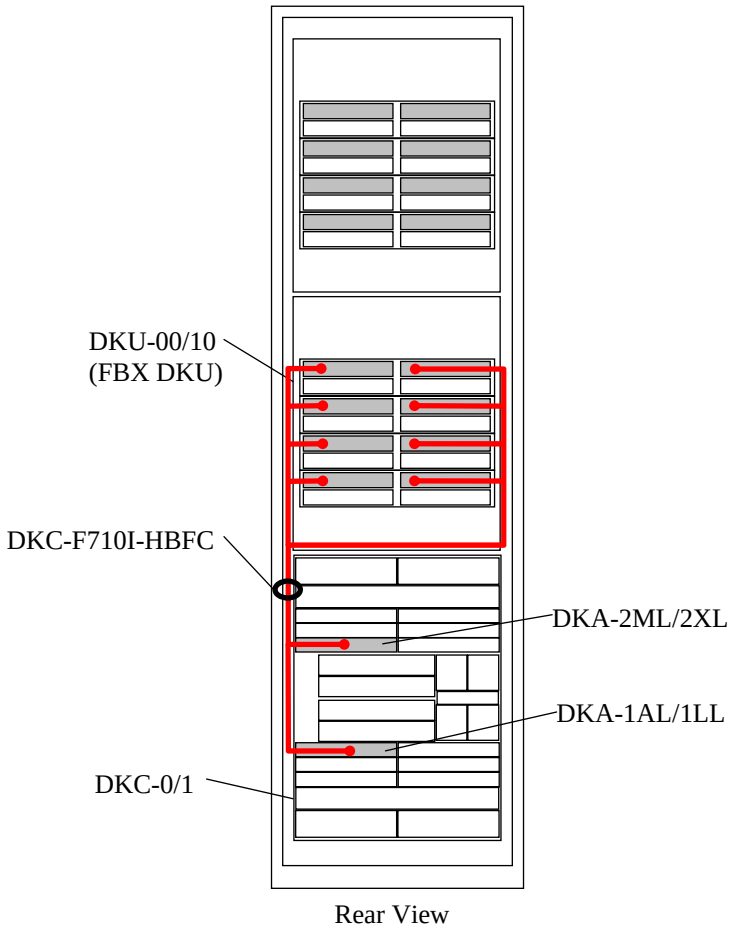

Fig. 4.1.4.14-1 Mounting Position of Device Interface Cable

1. Removing the Cables
   a. Remove the cables from the DKA PCBs and attach a cap to each of them.

CAUTION:	A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

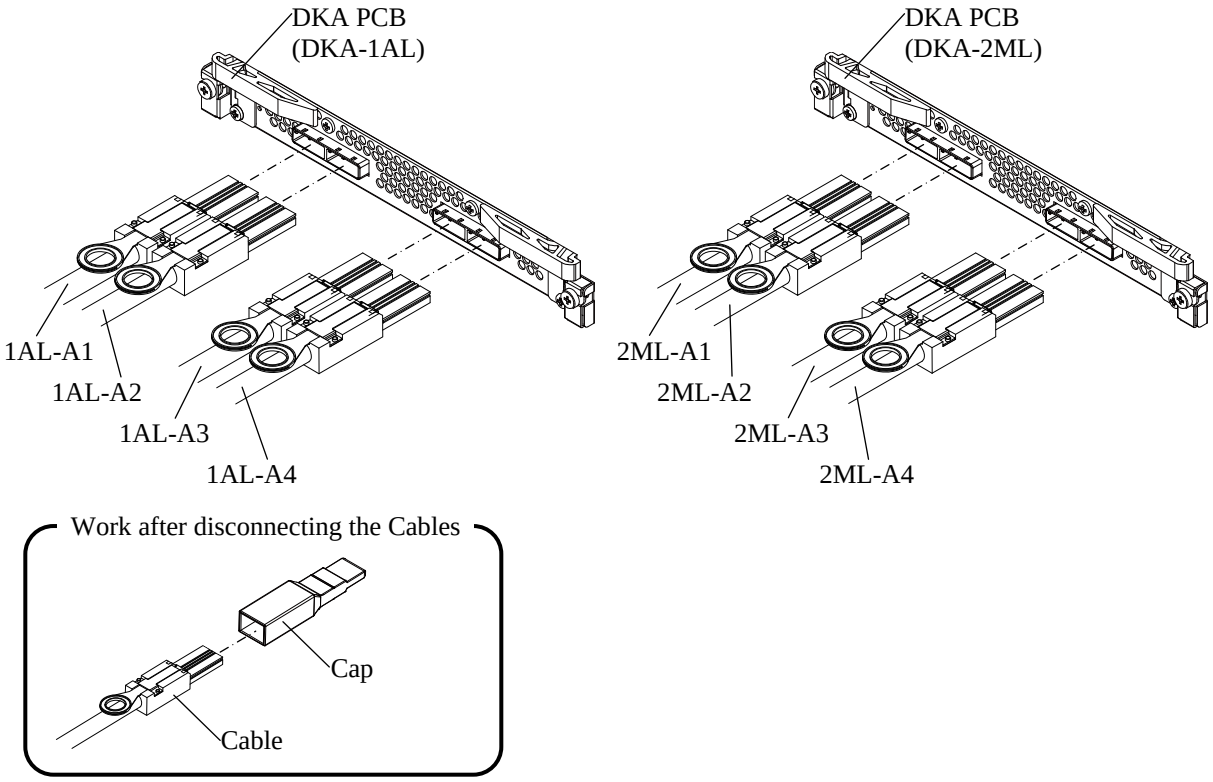

Fig. 4.1.4.14-2 Disconnection of Cables (Option 1 in the DKC-0)

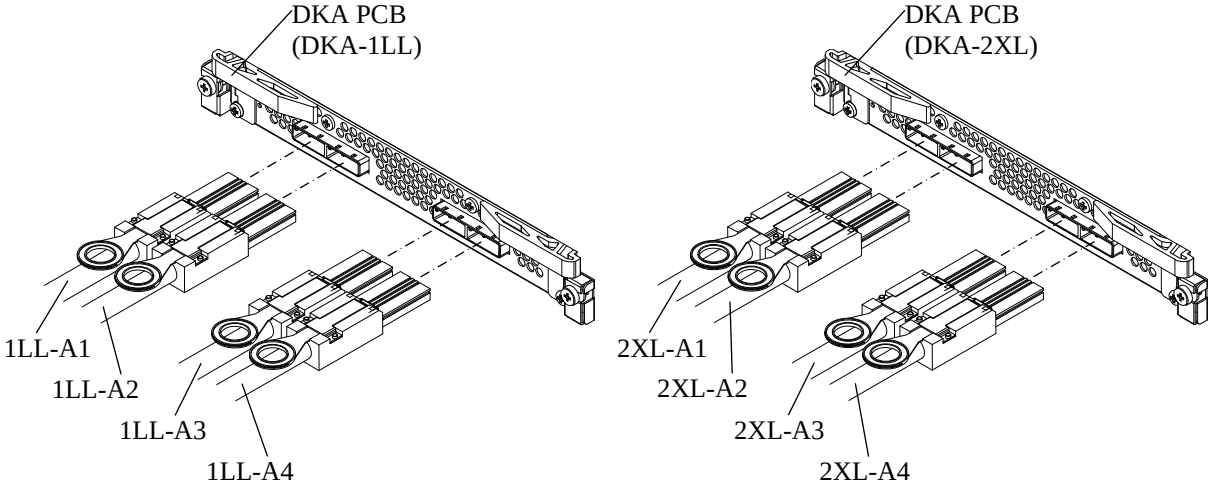

Fig. 4.1.4.14-3 Disconnection of Cables (Option 1 in DKC-1)

b. Disconnect eight cables from the SSWs in the rear of the FBX DKU and attach a cap to each of them.

CAUTION: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

2. Removing the Nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Remove the nameplate from the nameplate tag.
   c. Attach all the nameplate tags with the screw.

4.1.4.15 De-Installation Procedure of Device Interface Cable BF (DKC-F710I-BFC)

De-Installation Condition

DKC-F710I-BFC is a cable option to connect between 1st DKA of DKC-x and DKU-x0 (FBX DKU).
Refer to below Table 4.1.4.15-1 for the condition of DKC-F710I-BFC de-installation, and go to the appropriate page.

Table 4.1.4.15-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable BF (DKC-F710I-BFC) is required to remove.	INST04-01C-4260
2	When Device Interface Cable BF (DKC-F710I-BFC) is not required to remove.	INST04-01C-4320

4.1.4.16 De-Installation Procedure of Device Interface Cable HUF (DKC-F710I-HUFC)

De-Installation Condition

DKC-F710I-HUFC is a cable option for the high performance model to connect FBX DKU with LFF DKU/SFF DKU in a same rack.
Refer to below Table 4.1.4.16-1 for the condition of DKC-F710I-HUFC de-installation, and go to the appropriate page.

Table 4.1.4.16-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable HUF (DKC-F710I-HUFC) is required to remove.	INST04-01C-4340
2	When Device Interface Cable HUF (DKC-F710I-HUFC) is not required to remove.	INST04-01C-4600

When removing the cables between the upper FBX DKU and the lower LFF DKU/SFF DKU is necessary

1. Removal of Cover
   a. Loosen four screws, slide the Cover (2U) to the right and pull the left edge toward you. Remove the Cover (2U) from the front of the rack.

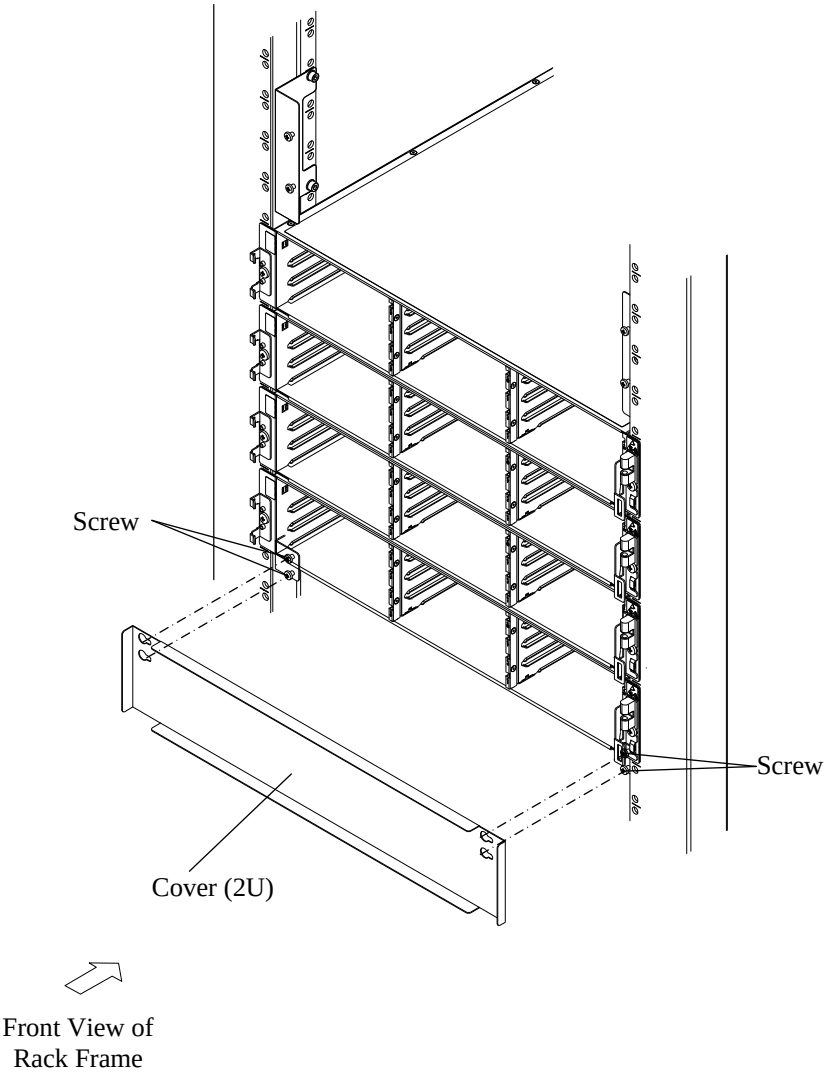

Fig. 4.1.4.16-3 Removal of Cover

Copyright © 2012, Hitachi, Ltd.

2. Cable de-installation of the front side of the lower LFF DKU/SFF DKU
   a. Loosen the two screws of the front right side of the DKU, and open the FAN door.

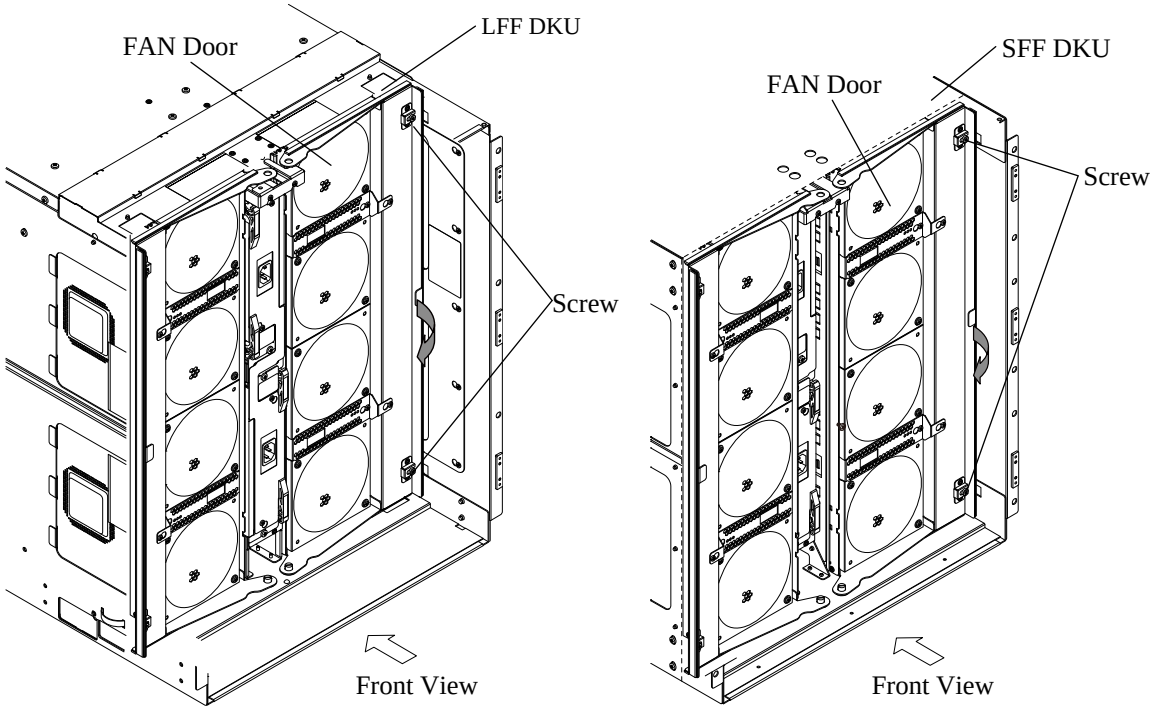

Fig. 4.1.4.16-4 FAN Door Opening

Copyright © 2012, Hitachi, Ltd.

b. Disconnect the two cables from the SSW PCBs of the front right side of the DKU. Cap the cables afterward.

CAUTION:	A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

c. Remove the cables from the front right side of the DKU.
d. Close the FAN door of the front right side of the DKU, and tighten the two screws.

5. Removal of Cables
   a. Open six clamp tapes and remove eight cables from the tray.

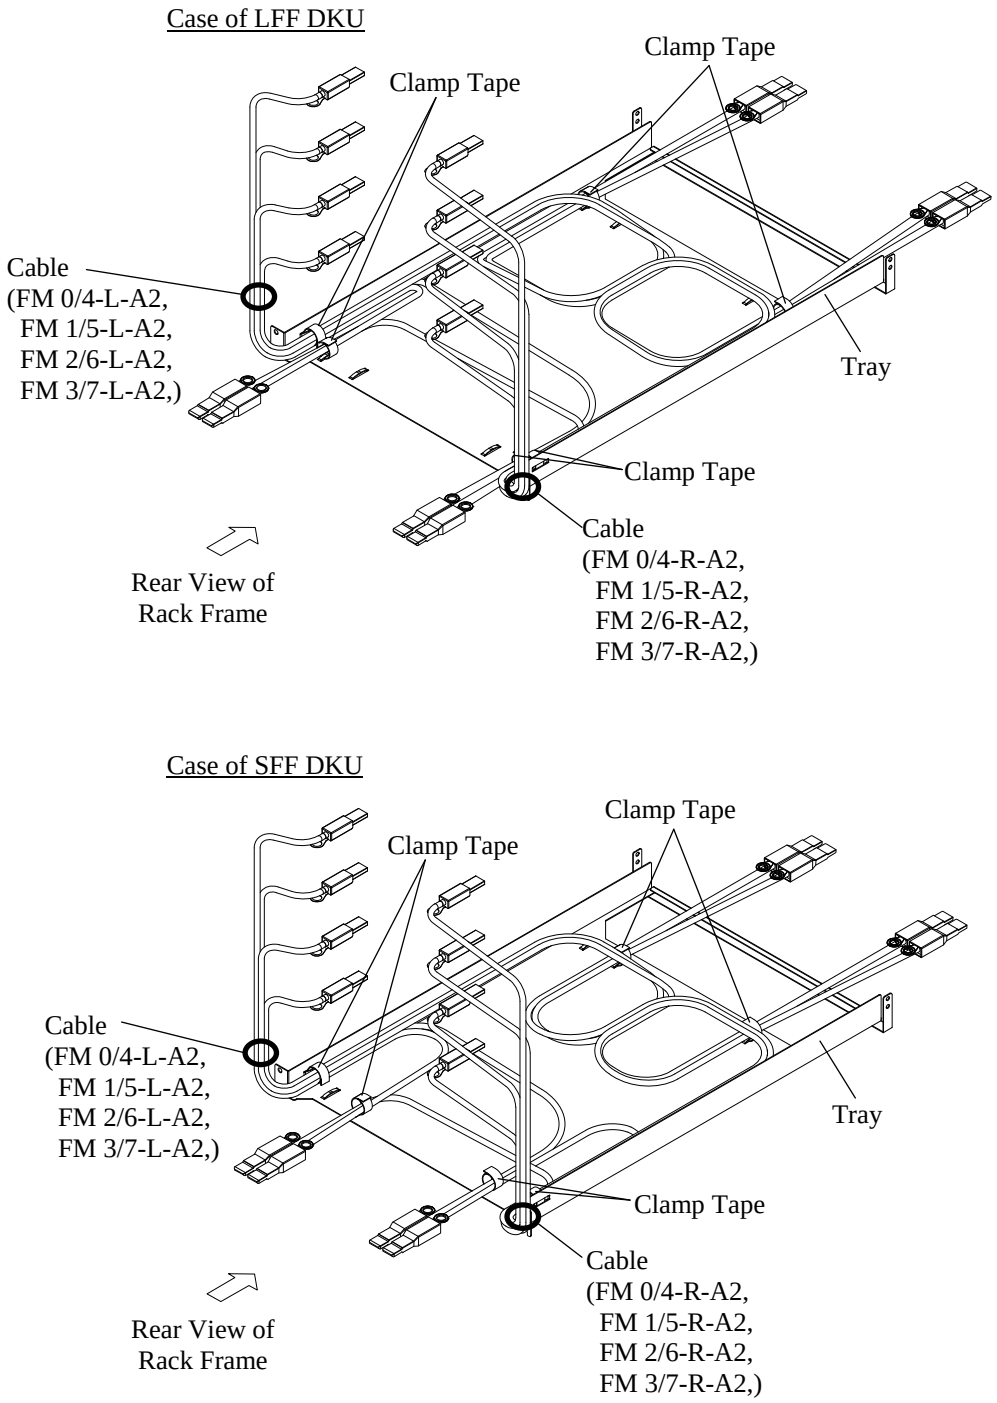

Fig. 4.1.4.16-14 Removal of Cables

Copyright © 2012, Hitachi, Ltd.

6. Attachment of Cover
   a. Insert the right edge of the Cover (2U) in front of the bracket inside the rack frame. Slide the Cover (2U) to the left and fasten it with four screws at the fixation position. (Refer to Fig. 4.1.4.16-3.)

7. Removal of Nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Remove the nameplate from the nameplate tag.
   c. Attach all the nameplate tags with the screw.

4.1.4.17 De-Installation Procedure of Device Interface Cable UF (DKC-F710I-UFC)

De-Installation Condition

DKC-F710I-UFC is a cable option to connect FBX DKU with LFF DKU/SFF DKU in a same rack.

Refer to below Table 4.1.4.17-1 for the condition of DKC-F710I-UFC de-installation, and go to the appropriate page.

Table 4.1.4.17-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable UF (DKC-F710I-UFC) is required to remove.	INST04-01C-4620
2	When Device Interface Cable UF (DKC-F710I-UFC) is not required to remove.	INST04-01C-4980

4. Cable de-installation of the front side of the upper LFF DKU/SFF DKU
   a. Loosen the two screws of the front right side of the DKU, and open the FAN door.

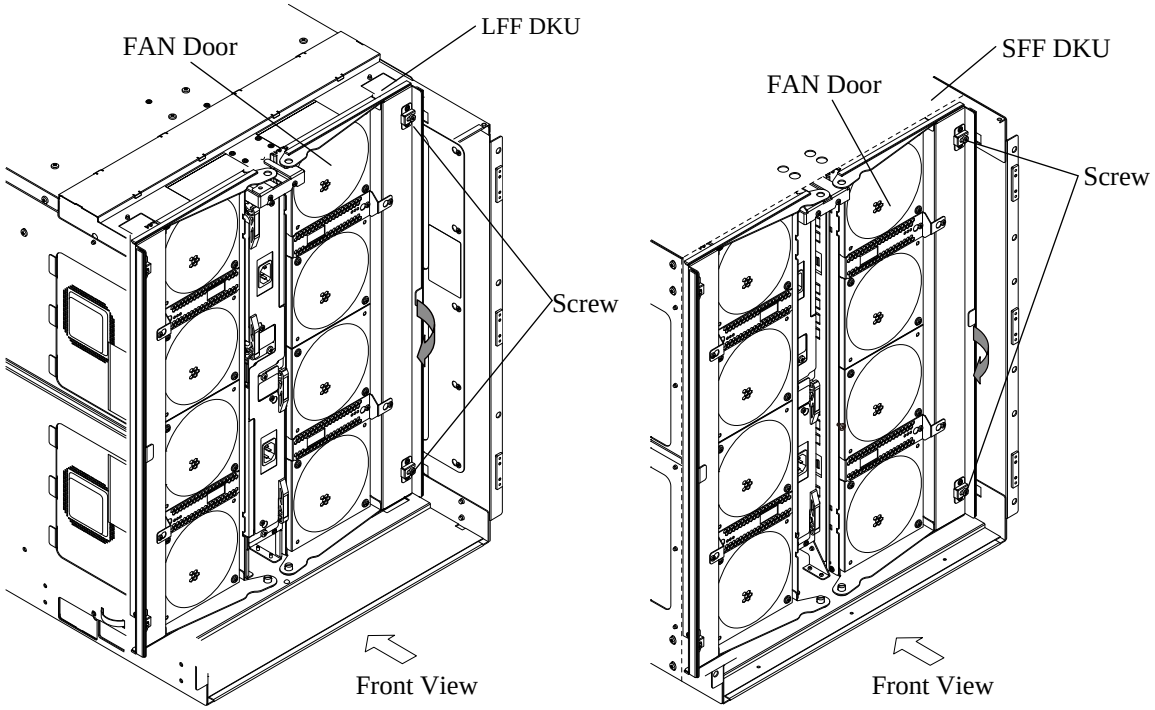

Fig. 4.1.4.17-32 FAN Door Opening

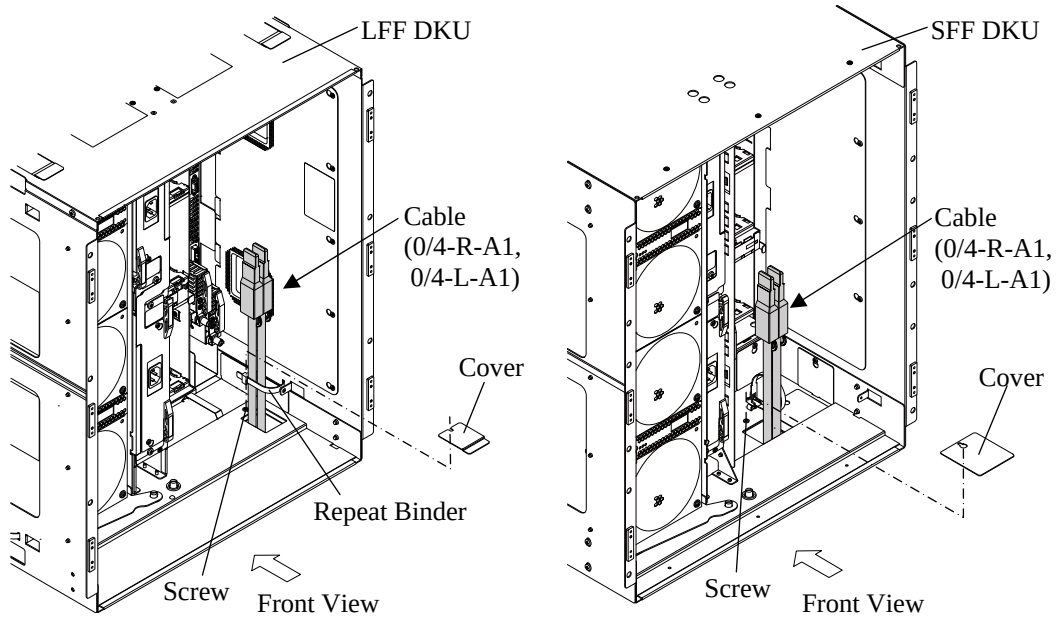
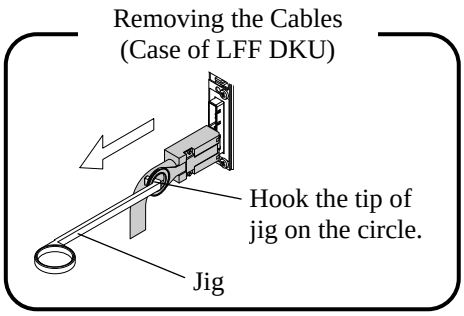
Copyright © 2012, Hitachi, Ltd.

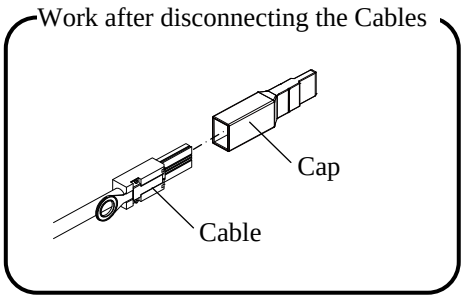
b. Disconnect the two cables from the SSW PCBs of the front right side of the DKU. Cap the cables afterward.

CAUTION: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

c. Release the repeat binder on the front right side of the DKU and remove the cables. (LFF DKU only)
d. Remove the cables from the front right side of the DKU.
e. Attach the cover to the front right of the DKU, and tighten the screw.
f. Close the FAN door of the front right side of the DKU, and tighten the two screws.







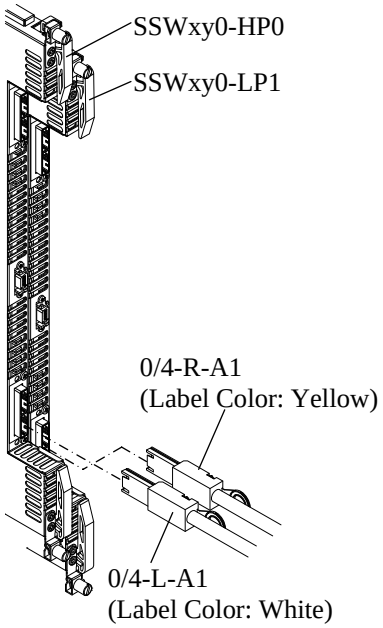


Fig. 4.1.4.17-33 Disconnection of Cables

h. Disconnect the two cables from the SSW PCBs of the front left side of the DKU. Cap the cables afterward.

CAUTION:	A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

i. Release the repeat binder on the front left side of the DKU and remove the cables. (LFF DKU only)
j. Remove the cables from the front left side of the DKU.
k. Attach the cover to the front left of the DKU, and tighten the screw.
l. Close the FAN door of the front left side of the DKU, and tighten the two screws.

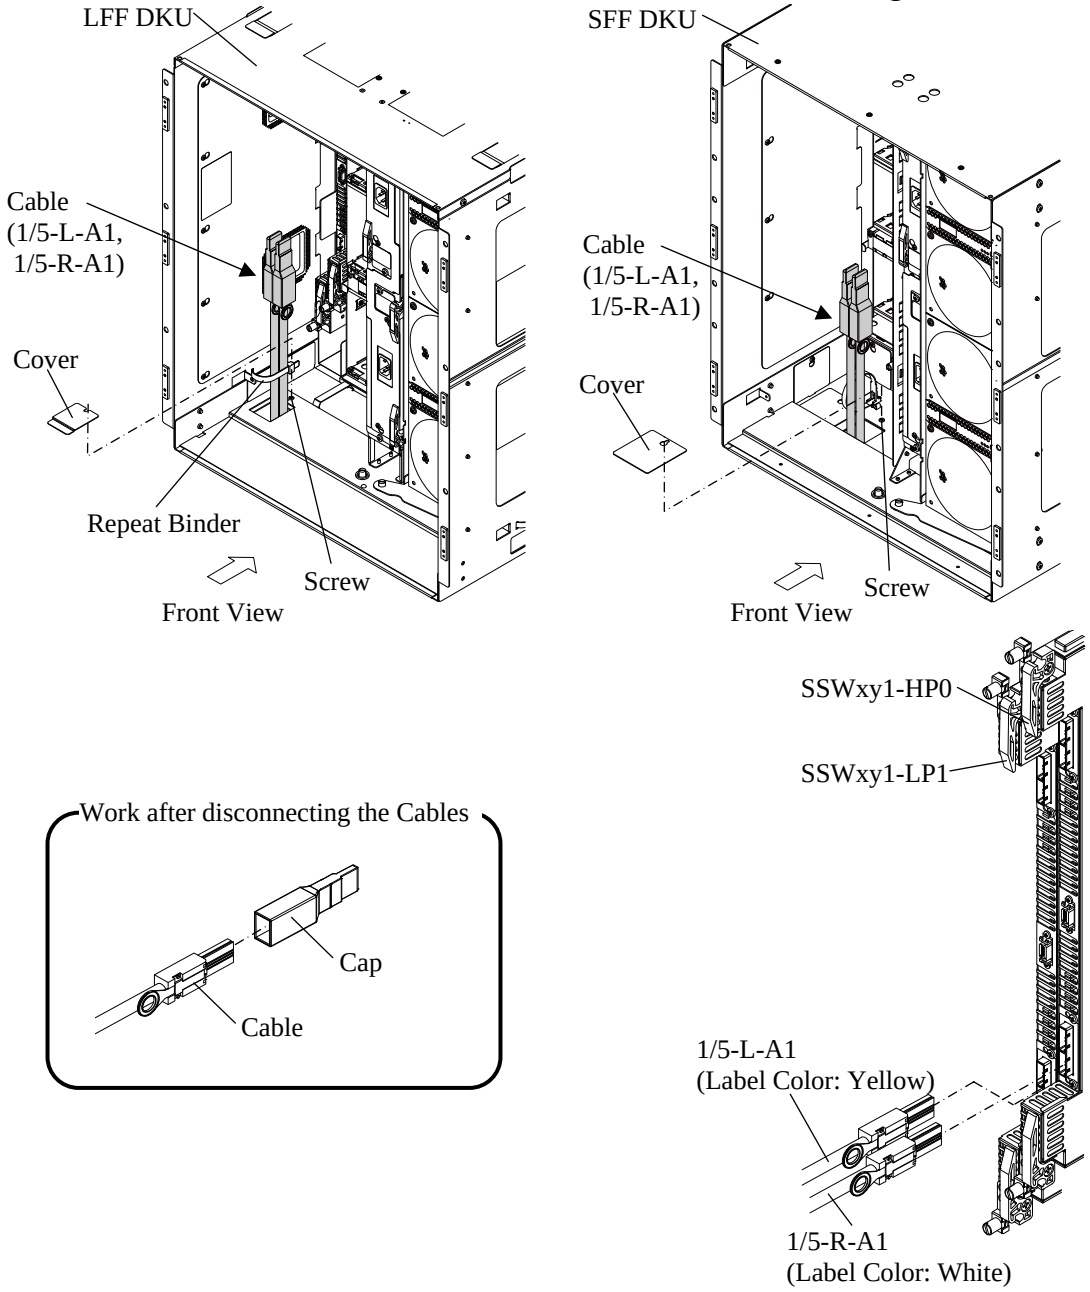

Fig. 4.1.4.17-35 Disconnection of Cables

6. Attachment of Covers
   a. Insert the right edge of the Cover (3U) in front of the bracket inside the rack frame. Slide the Cover (3U) to the left and fasten it with four screws at the fixation position. (Refer to Fig. 4.1.4.17-31.)

7. Removal of Nameplate
   a. Remove the screw from the rack frame and remove the nameplate tags.
   b. Remove the nameplate from the nameplate tag.
   c. Attach all the nameplate tags with the screw.

4.1.4.18 De-Installation Procedure of Device Interface Cable HFF (DKC-F710I-HFFC)

De-Installation Condition

DKC-F710I-HFFC is a cable option for the high performance model to connect FBX DKU with another FBX DKU in a rack.
Refer to below Table 4.1.4.18-1 for the condition of DKC-F710I-HFFC installation, and go to the appropriate page.

Table 4.1.4.18-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable HFF (DKC-F710I-HFFC) is required to remove.	INST04-01C-4990
2	When Device Interface Cable HFF (DKC-F710I-HFFC) is not required to remove.	INST04-01C-5030

4.1.4.20 De-Installation Procedure of Device Interface Cable HUFEX (DKC-F710I-HUFEXC)

De-Installation Condition

DKC-F710I-HUFEXC is a cable option for the high performance model to connect FBX DKU with LFF DKU/SFF DKU between two racks.
Refer to below Table 4.1.4.20-1 for the condition of DKC-F710I-HUFEXC installation, and go to the appropriate page.

Table 4.1.4.20-1 Work Procedure Table

No.	Condition of Work Procedure	Page
1	When Device Interface Cable HUFEX (DKC-F710I-HUFEXC) is required to remove.	INST04-01C-5130
2	When Device Interface Cable HUFEX (DKC-F710I-HUFEXC) is not required to remove.	INST04-01C-5780

The Case that Connection Source Is FBX DKU and Connection Destination Is LFF DKU/SFF DKU

1. Pattern of Cable De-installation

   There are four kinds of patterns that the connections source is the FBX DKU and the connection destination is the LFF DKU/SFF DKU when the Device Interface Cable HUFEX (DKC-F710I-HUFEXC) is removed from the rack.

   For the case that the connection source is the LFF DKU/SFF DKU and the connection destination is the FBX DKU, refer to INST04-01C-5350.

   In this procedure, the output side of the Device Interface Cable is defined as a Connection Source, and the RACK is called a Connection Source RACK, and the DKU is called a Connection Source DKU. Moreover, the input side of the Device Interface Cable is defined as a Connection Destination, and the RACK is called a Connection Destination RACK, and the DKU is called a Connection Destination DKU.

   Before starting operation according to this procedure, understand each process name and the position.

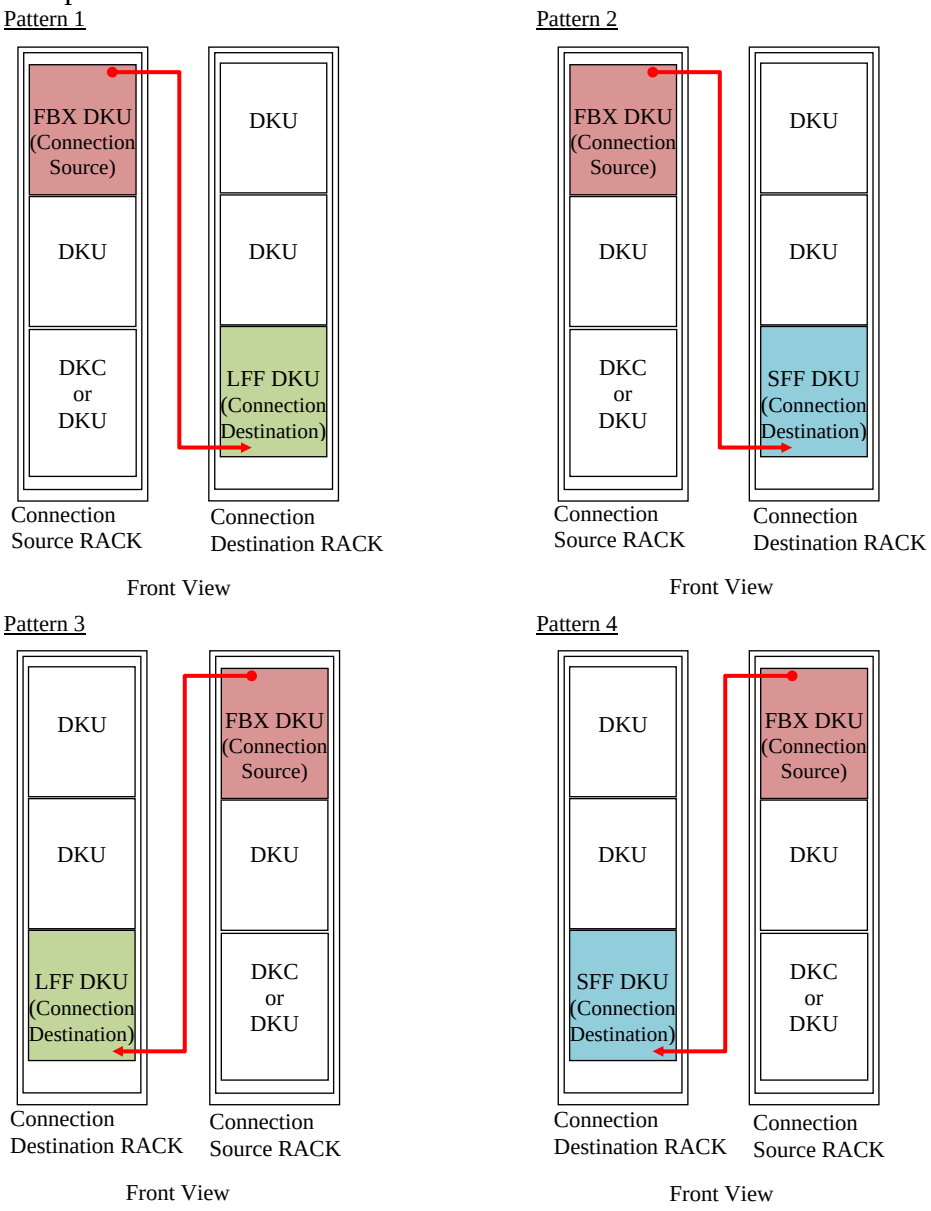

Fig. 4.1.4.20-3 Pattern of Cable De-installation

Copyright © 2012, Hitachi, Ltd.

2. Cable De-installation of the Rear Side of the Connection Source RACK
   a. Disconnect the cables from the SSWs of the rear side of the connection source DKU. Cap the cables afterward.

> Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

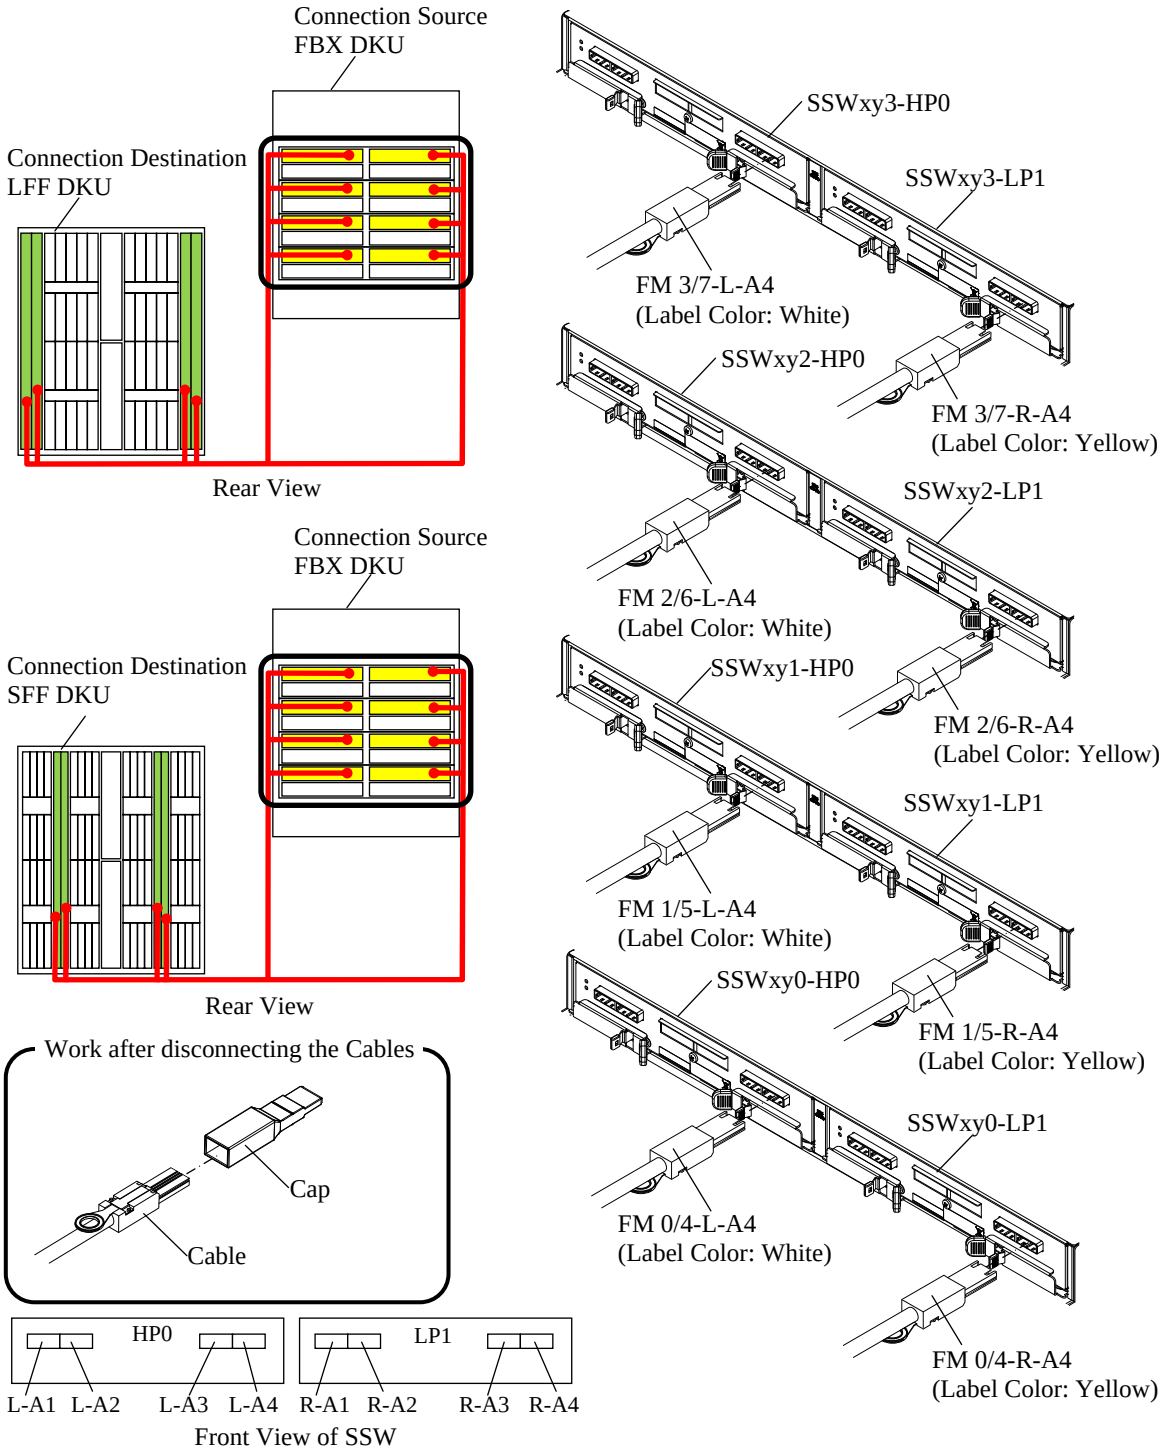

Fig. 4.1.4.20-4 Disconnection of Cables

Copyright © 2012, Hitachi, Ltd.

b. Open eight clamp tapes on the rear side of the rack and remove the cables.

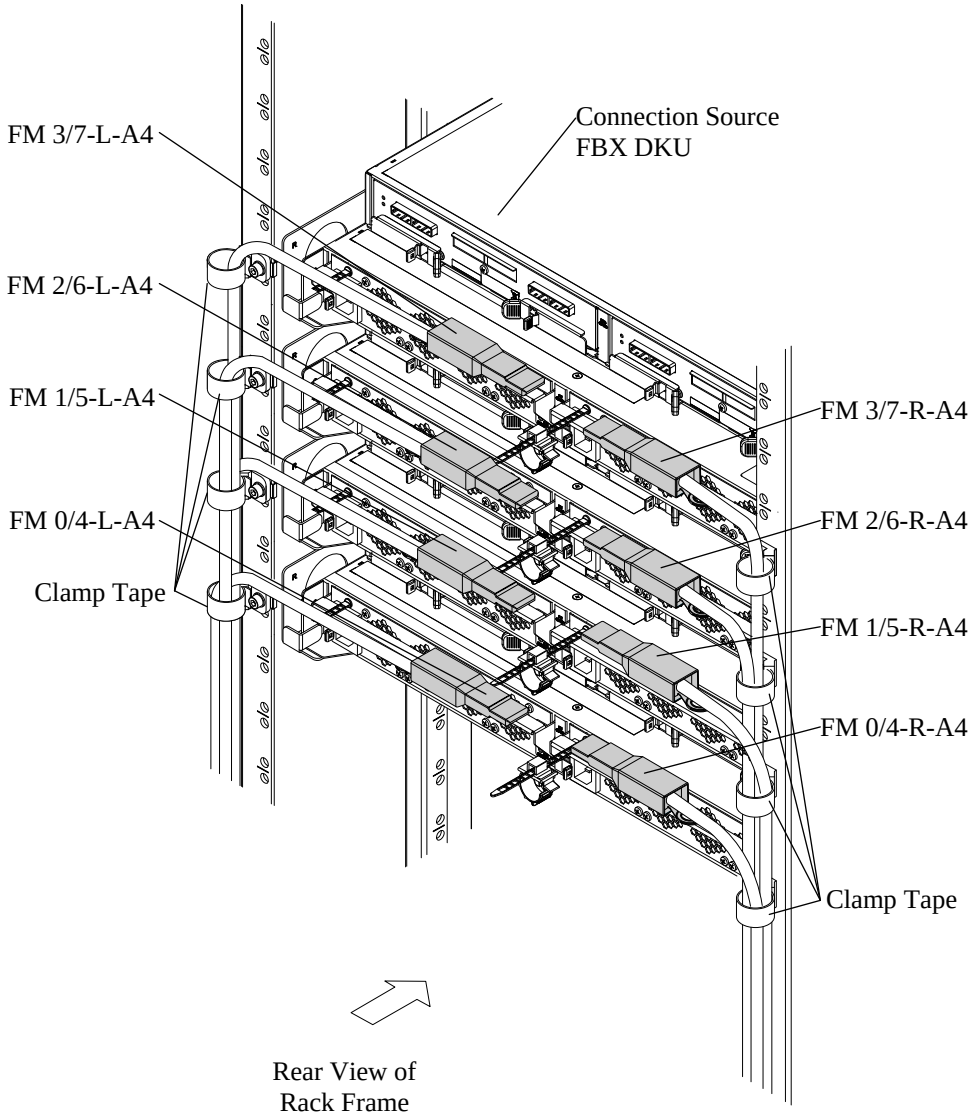

Fig. 4.1.4.20-5 Removal of Cables

3. Cable De-installation of the Rear Side of the Connection Destination DKU

When the Connection Destination DKU is the LFF DKU

a. Loosen the two screws of the rear right side of the connection destination DKU, and open the FAN door.

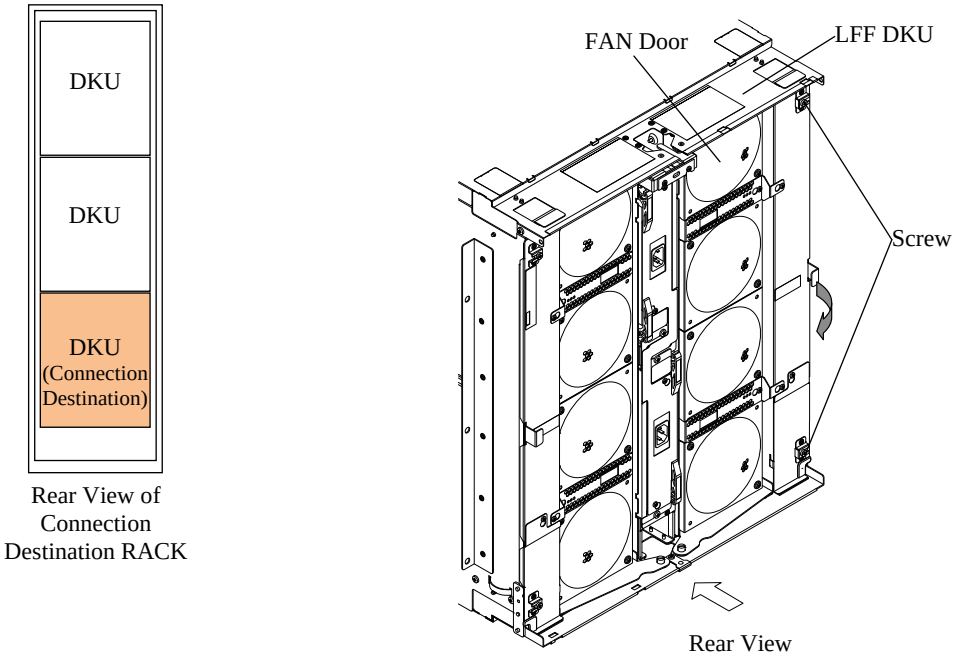

Fig. 4.1.4.20-6 FAN Door Opening

Copyright © 2012, Hitachi, Ltd.

b. Disconnect the cables (2/6-R-A2 and 2/6-L-A2) from the SSW PCBs of the rear right side of the connection destination DKU by using a jig. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

c. Release the repeat binder at the rear right side of connection destination DKU.
d. Disconnect the cables from the connection destination DKU and pull out the surplus cable length from the space between the bottom of the LFF DKU and the bottom of the rack.
e. Remove the clamp tapes from the cables.

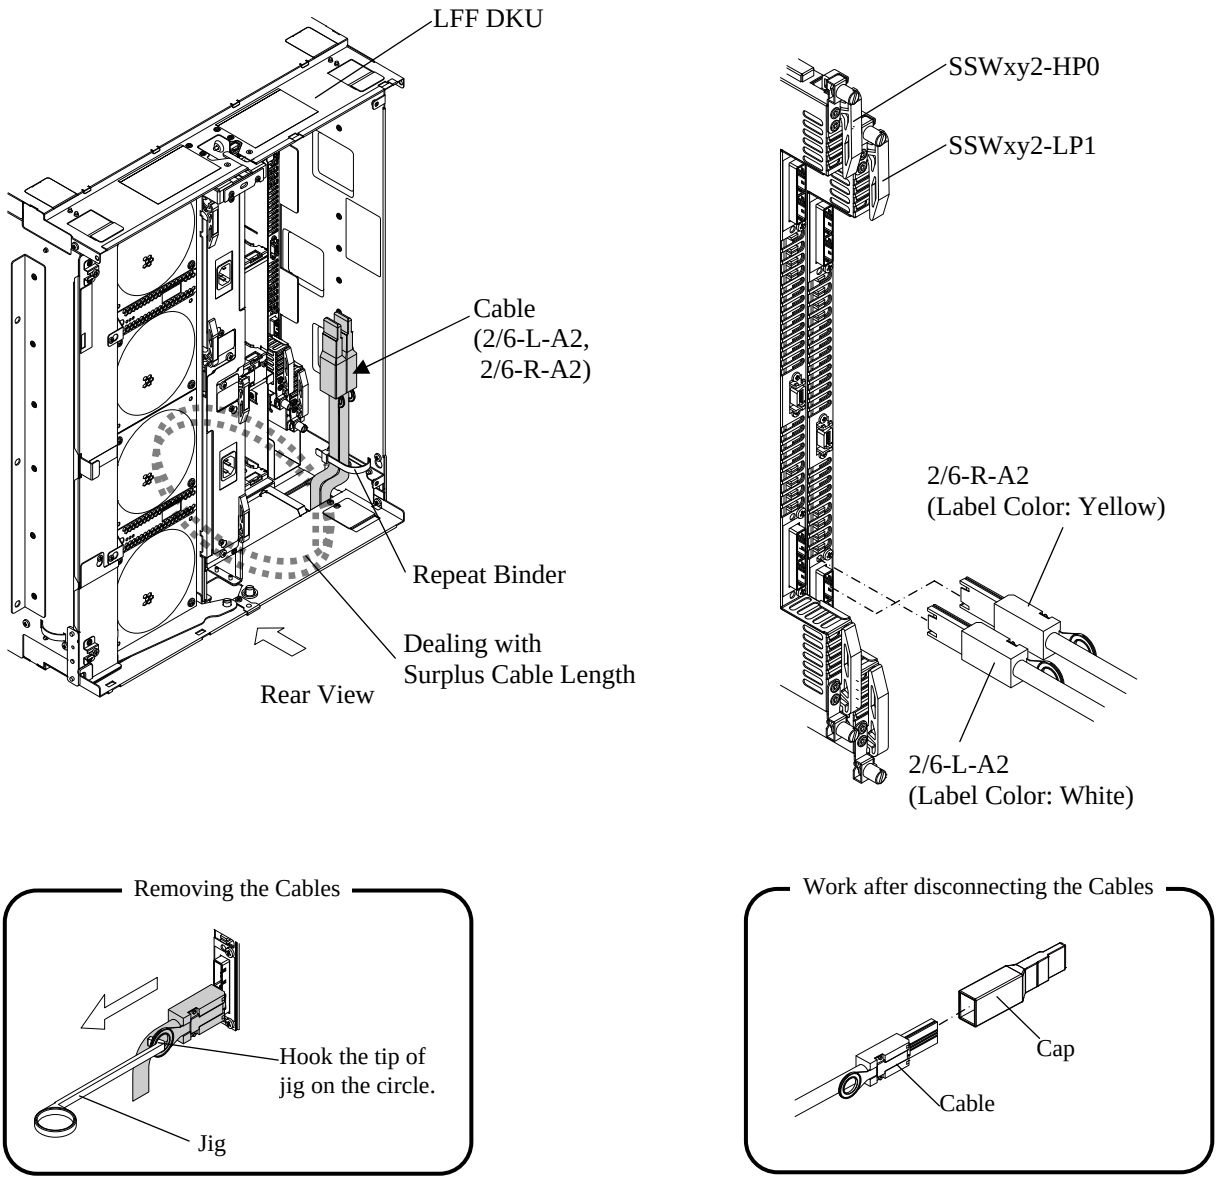

Fig. 4.1.4.20-7 Disconnection of Cables

Copyright © 2012, Hitachi, Ltd.

f. Close the FAN door of the rear right side of the connection destination DKU, and tighten the two screws.
g. Loosen the two screws of the rear left side of the connection destination DKU, and open the FAN door.

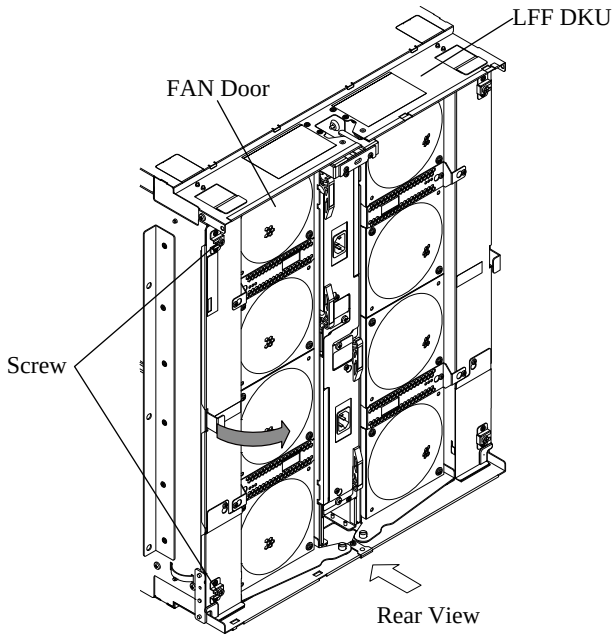

Fig. 4.1.4.20-8 FAN Door Opening

Copyright © 2012, Hitachi, Ltd.

h. Disconnect the cables (3/7-R-A2 and 3/7-L-A2) from the SSW PCBs of the rear left side of the connection destination DKU. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

i. Release the repeat binder at the rear left side of connection destination DKU.
j. Disconnect the cables from the connection destination DKU and pull out the surplus cable length from the space between the bottom of the LFF DKU and the bottom of the rack.
k. Remove the clamp tapes from the cables.
l. Close the FAN door of the rear left side of the connection destination DKU, and tighten the two screws.

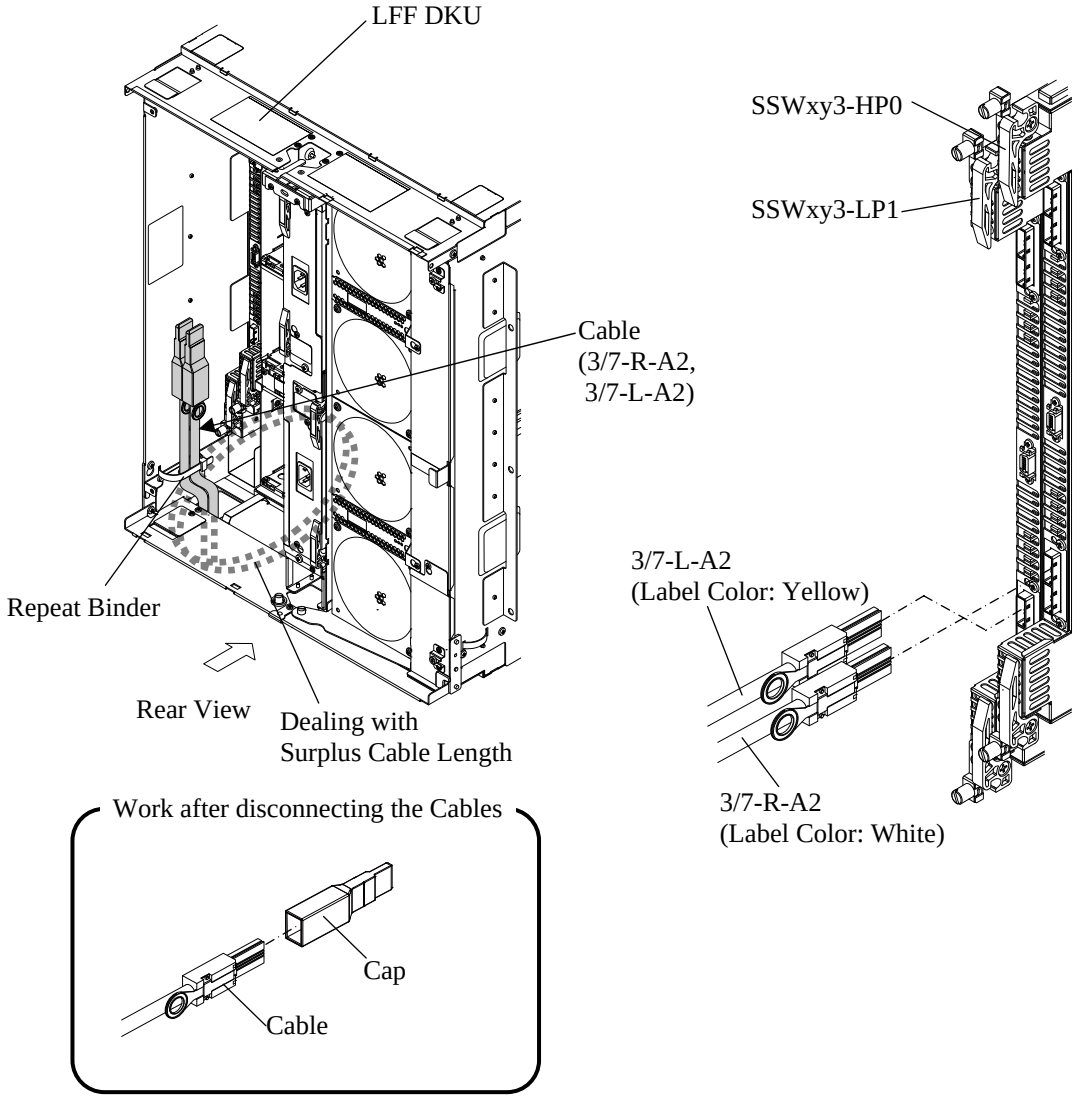

Fig. 4.1.4.20-9 Disconnection of Cables

When the Connection destination DKU is the SFF DKU

a. Loosen the two screws of the rear right side of the connection destination DKU, and open the FAN door.

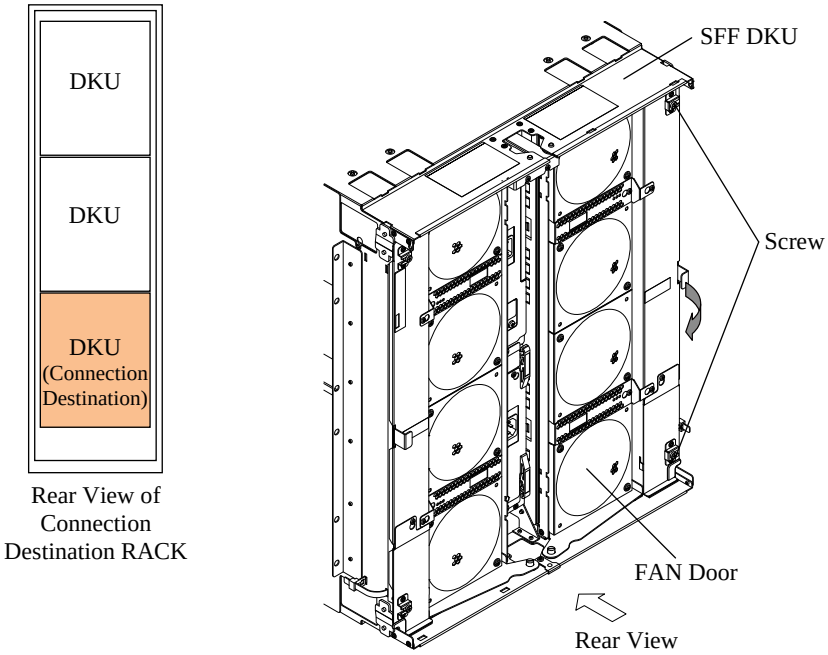

Fig. 4.1.4.20-10 FAN Door Opening

Copyright © 2012, Hitachi, Ltd.

b. Disconnect the cables (2/6-R-A2 and 2/6-L-A2) from the SSW PCBs of the rear right side of the connection destination DKU. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

c. Disconnect the cables from the connection destination DKU and pull out the surplus cable length from the space between the bottom of the SFF DKU and the bottom of the rack.
d. Remove the clamp tapes from the cables.

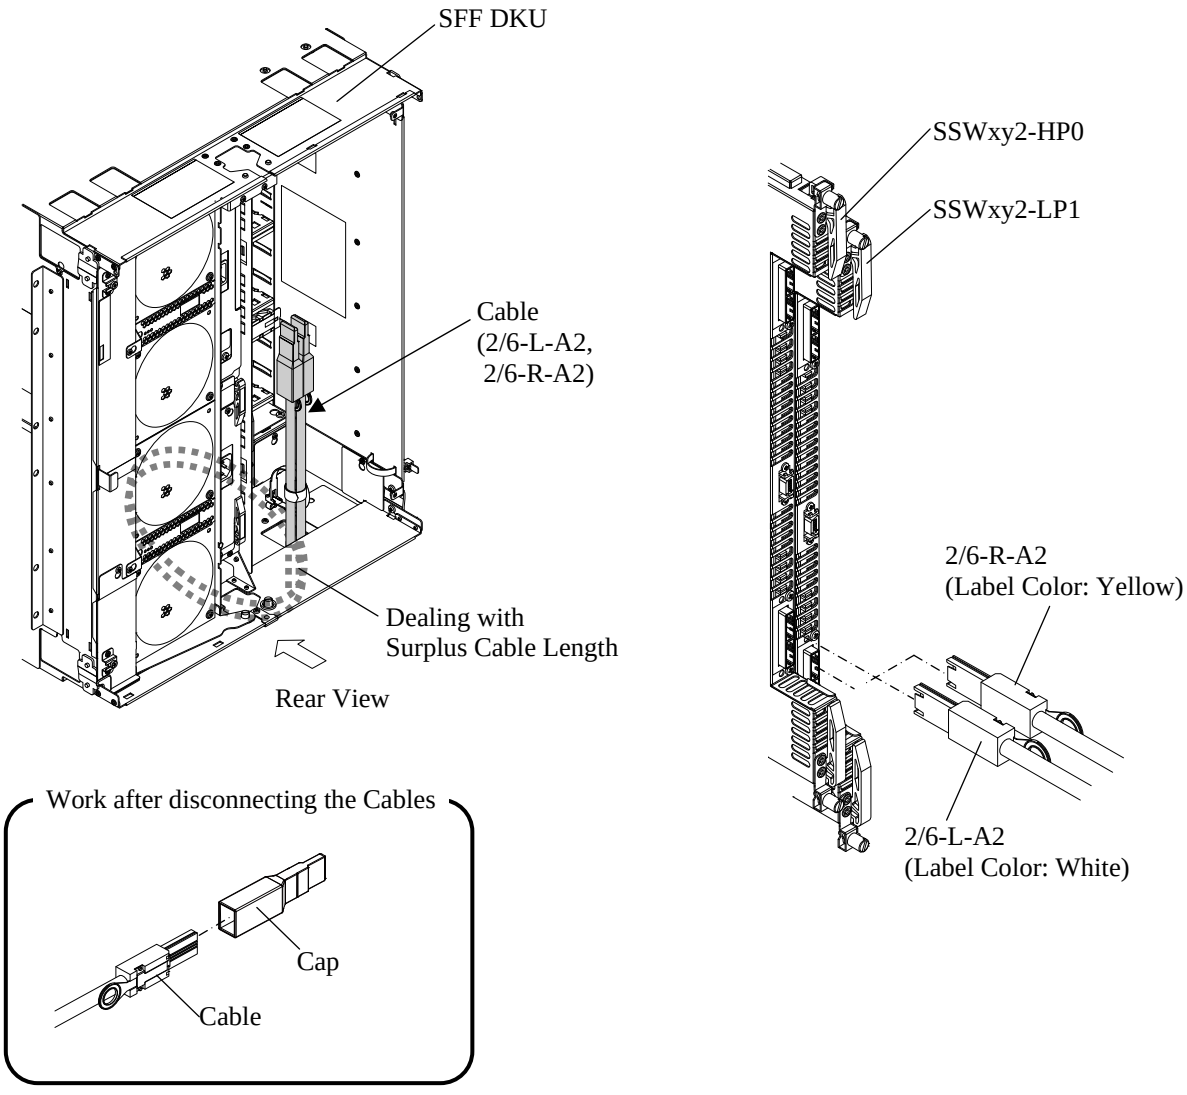

Fig. 4.1.4.20-11 Disconnection of Cables

Copyright © 2012, Hitachi, Ltd.

e. Close the FAN door of the rear right side of the connection destination DKU, and tighten the two screws.
f. Loosen the two screws of the rear left side of the connection destination DKU, and open the FAN door.

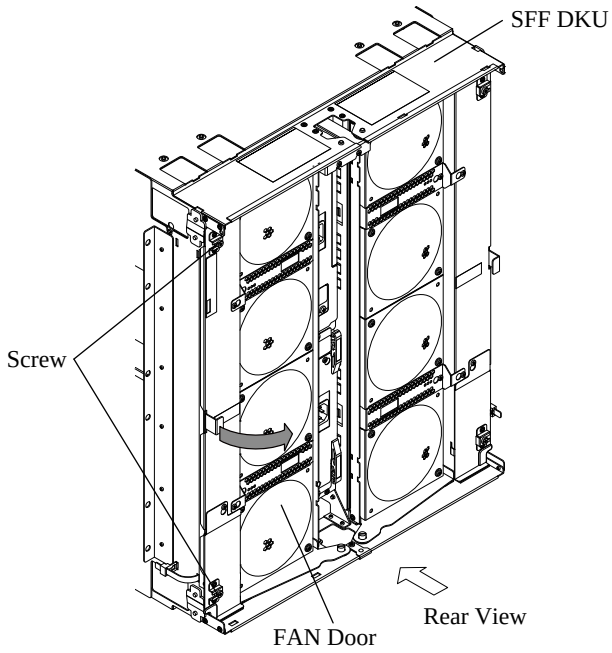

Fig. 4.1.4.20-12 FAN Door Opening

Copyright © 2012, Hitachi, Ltd.

g. Disconnect the cables (3/7-R-A2 and 3/7-L-A2) from the SSW PCBs of the rear left side of the connection destination DKU. Cap the cables afterward.

Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

h. Disconnect the cables from the connection destination DKU and pull out the surplus cable length from the space between the bottom of the SFF DKU and the bottom of the rack.
i. Remove the clamp tapes from the cables.
j. Close the FAN door of the rear left side of the connection destination DKU, and tighten the two screws.

Copyright © 2012, Hitachi, Ltd.

4. Cable De-installation of the Front Side of the Connection Destination DKU

When the Connection destination DKU is the LFF DKU

a. Loosen the two screws of the front right side of the connection destination DKU, and open the FAN door.

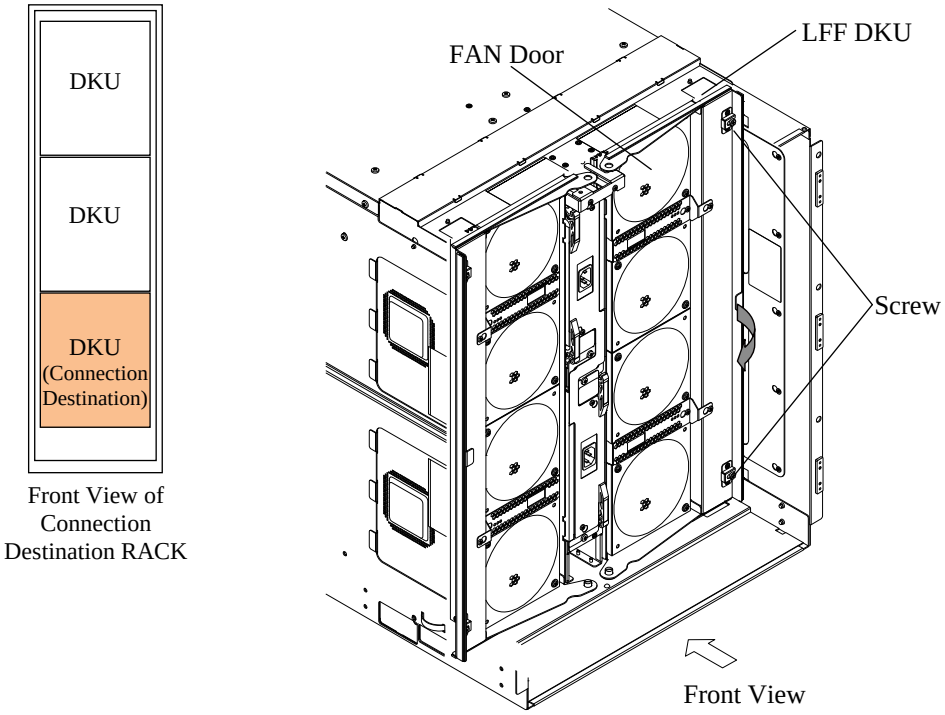

Fig. 4.1.4.20-14 FAN Door Opening

Copyright © 2012, Hitachi, Ltd.

b. Disconnect the cables (0/4-R-A2 and 0/4-L-A2) from the SSW PCBs of the front right side of the connection destination DKU by using a jig. Cap the cables afterward.

> Notice: A serious failure occurs if a wrong cable or connector is removed. Since a label bearing a connection destination is affixed on each cable or connector to be removed, work very carefully referring to it and the wiring diagram.

c. Release the repeat binder at the front right side of connection destination DKU.
d. Disconnect the cables from the connection destination DKU and pull out the surplus cable length from the space between the bottom of the LFF DKU and the bottom of the rack.
e. Remove the clamp tapes from the cables.
