

Error Description

The eBackup driver is not deployed in POD.

Possible Causes

The eBackup driver is not deployed in POD.

Handling Suggestion

Check whether the POD requires the backup service.

- If the POD does not require the backup service, skip this error.
- If the POD requires the backup service, skip this error and deploy the eBackup driver on the node by referring to **Installing and Configuring the eBackup Driver** in the appendix of the *HUAWEI CLOUD Stack 6.5.1 Capacity Expansion Guide* after the eBackup driver is upgraded.
