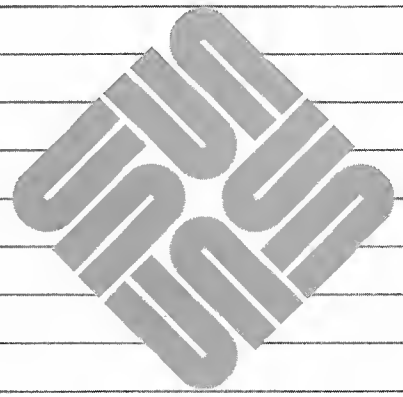
sun microsystems

Global Index



Part Number: 800-4778-10
Revision A of 27 March, 1990

The Sun logo, Sun Microsystems, Sun Workstation, NFS, and TOPS are registered trademarks of Sun Microsystems, Inc.

Sun, Sun-2, Sun-3, Sun-4, Sun386*i*, SPARCstation, SPARCserver, NeWS, NSE, OpenWindows, SPARC, SunInstall, SunLink, SunNet, SunOS, SunPro, and SunView are trademarks of Sun Microsystems, Inc.

UNIX is a registered trademark of AT&T; OPEN LOOK is a trademark of AT&T.

All other products or services mentioned in this document are identified by the trademarks or service marks of their respective companies or organizations, and Sun Microsystems, Inc. disclaims any responsibility for specifying which marks are owned by which companies or organizations.

Legal notice to users: Yellow Pages is a registered trademark in the United Kingdom of British Telecommunications plc, and may also be a trademark of various telephone companies around the world. Sun will be revising future versions of software and documentation to remove references to Yellow Pages.

Copyright © 1988, 1990 Sun Microsystems, Inc. – Printed in U.S.A.

All rights reserved. No part of this work covered by copyright hereon may be reproduced in any form or by any means – graphic, electronic, or mechanical – including photocopying, recording, taping, or storage in an information retrieval system, without the prior written permission of the copyright owner.

Restricted rights legend: use, duplication, or disclosure by the U.S. government is subject to restrictions set forth in subparagraph (c)(1)(ii) of the Rights in Technical Data and Computer Software clause at DFARS 52.227-7013 and in similar clauses in the FAR and NASA FAR Supplement.

The Sun Graphical User Interface was developed by Sun Microsystems, Inc. for its users and licensees. Sun acknowledges the pioneering efforts of Xerox in researching and developing the concept of visual or graphical user interfaces for the computer industry. Sun holds a non-exclusive license from Xerox to the Xerox Graphical User Interface, which license also covers Sun's licensees.

This product is protected by one or more of the following U.S. patents: 4,777,485 4,688,190 4,527,232 4,745,407 4,679,014 4,435,792 4,719,569 4,550,368 in addition to foreign patents and applications pending.

Special Characters

Topic	*Where to Look*
!	
history substitution — `csh`	*SunOS Reference Manual*, 100
logical negation operator — `csh`	*SunOS Reference Manual*, 103
`!!` event designator	*SunOS User's Guide: Doing More*, 27
`!$` event designator	*SunOS User's Guide: Doing More*, 27
`!*` argument designator	*SunOS User's Guide: Doing More*, 29
`!`*n* event designator	*SunOS User's Guide: Doing More*, 28
`!:`*n* argument designator	*SunOS User's Guide: Doing More*, 29
`!=` — not equal to operator — `csh`	*SunOS Reference Manual*, 103
`!?`*str*`?` event designator	*SunOS User's Guide: Doing More*, 29
`!^` argument designator	*SunOS User's Guide: Doing More*, 29
`!~` globbing pattern mismatch operator — `csh`	*SunOS Reference Manual*, 103
`!` adb verb	*Debugging Tools*, 96
`!` mail command	*SunOS Reference Manual*, 309
`!`*n* event designator	*SunOS User's Guide: Doing More*, 27
`!`*string* event designator	*SunOS User's Guide: Doing More*, 28
`#!` invoke shell to process script	*SunOS Reference Manual*, 105
# C shell comment symbol	*SunOS User's Guide: Customizing Your Environment*, 8
# mail command	*SunOS Reference Manual*, 309
`$` — variable substitution	*SunOS Reference Manual*, 102
`$#` — word count for variable	*SunOS Reference Manual*, 102
`$$` — process number of shell	*SunOS Reference Manual*, 103
`$<` — read value from terminal — `csh`	*SunOS Reference Manual*, 103
`$?` — variable set inquiry — `csh`	*SunOS Reference Manual*, 103
`$` adb verb	*Debugging Tools*, 96
`.$` (number of arguments) number register	*Using* `nroff` *and* `troff`, 89
%	
job control, reference to current job — `csh`	*SunOS Reference Manual*, 105
job to foreground/background — `csh`	*SunOS Reference Manual*, 111
modular division operator — `csh`	*SunOS Reference Manual*, 103
`%%` in checkpoint filename	*SunView User's Guide*, 127, 164
`%` in backup filename	*SunView User's Guide*, 127
&	
bitwise AND operator — `csh`	*SunOS Reference Manual*, 103
run command in background	*SunOS Reference Manual*, 99
`&&`	
execute on success — `csh`	*SunOS Reference Manual*, 99
logical AND operator — `csh`	*SunOS Reference Manual*, 103
`\&` (zero-width non-printing) function	*Using* `nroff` *and* `troff`, 113
`&` runs tool in the background	*SunView User's Guide*, 167
' quote character	*SunOS Reference Manual*, 99
( )	
command grouping — `csh`	*SunOS Reference Manual*, 99
group operators — `csh`	*SunOS Reference Manual*, 103
*	
filename wild card, zero or more of any characters	*SunOS Reference Manual*, 103
integer multiplication operator — `csh`	*SunOS Reference Manual*, 103
* (indicates executable)	*SunOS User's Guide: Getting Started*, 26
+ — integer addition operator — `csh`	*SunOS Reference Manual*, 103

,*file*, SCCS comma-file — *Programming Utilities and Libraries*, 94
- — integer subtraction operator — csh — *SunOS Reference Manual*, 103
. (current directory) — *SunOS User's Guide: Getting Started*, 14
. . (parent directory) — *SunOS User's Guide: Getting Started*, 14, 19, 21
. (dot) command — *SunOS Reference Manual*, 504
. prefix, explained — *SunOS User's Guide: Customizing Your Environment*, 7
/ — integer division operator — csh — *SunOS Reference Manual*, 103
/ (indicates directory) — *SunOS User's Guide: Getting Started*, 26
/ (pathname separator) — *SunOS User's Guide: Getting Started*, 10
/ (root directory) — *SunOS User's Guide: Getting Started*, 10
/ adb verb — *Debugging Tools*, 96
/ dbx command — *Debugging Tools*, 26
:$ argument designator — *SunOS User's Guide: Doing More*, 29
:* argument designator — *SunOS User's Guide: Doing More*, 29
:^ argument designator — *SunOS User's Guide: Doing More*, 29
:0 argument designator — *SunOS User's Guide: Doing More*, 29
: adb verb — *Debugging Tools*, 96
: command — *SunOS Reference Manual*, 106, 504
:g event modifier — *SunOS User's Guide: Doing More*, 30
: modifiers — history substitution — csh — *SunOS Reference Manual*, 100
:p event modifier — *SunOS User's Guide: Doing More*, 30
:s/*old*/*new*/ event modifier — *SunOS User's Guide: Doing More*, 30
; — command separation — *SunOS Reference Manual*, 99
< input redirection symbol — *SunOS User's Guide: Getting Started*, 75
  less than operator — csh — *SunOS Reference Manual*, 103
  redirect standard input — *SunOS Reference Manual*, 101
<<
  bitwise shift left — csh — *SunOS Reference Manual*, 103
  parse and pass input to command — *SunOS Reference Manual*, 101
<= — less than or equal to operator — csh — *SunOS Reference Manual*, 103
<rasterfile.h> — *4.1 Pixrect Reference Manual*, 69
<stdio.h> — *4.1 Pixrect Reference Manual*, 69
= (indicates AF_UNIX socket) — *SunOS User's Guide: Getting Started*, 26
== — is equal to operator — csh — *SunOS Reference Manual*, 103
=~ — globbing pattern match operator — csh — *SunOS Reference Manual*, 103
= adb verb — *Debugging Tools*, 96
= mail command — *SunOS Reference Manual*, 309
> output redirection symbol — *SunOS User's Guide: Getting Started*, 74
  greater than operator — csh — *SunOS Reference Manual*, 103
  redirect standard output — *SunOS Reference Manual*, 101
>! (overwrite file) — *SunOS User's Guide: Getting Started*, 75
>& redirect standard output and standard error — *SunOS User's Guide: Getting Started*, 79; *SunOS Reference Manual*, 101
>= — greater than or equal to operator — csh — *SunOS Reference Manual*, 103
>> append output — *SunOS User's Guide: Getting Started*, 75
  append standard output — *SunOS Reference Manual*, 101
  bitwise shift right — csh — *SunOS Reference Manual*, 103
>>& append standard output and standard error — *SunOS User's Guide: Getting Started*, 79; *SunOS Reference Manual*, 101
> in Text Editor icon — *SunView User's Guide*, 76
> adb verb — *Debugging Tools*, 96
? — filename wild card, any single characters — *SunOS Reference Manual*, 103
? adb verb — *Debugging Tools*, 96
? mail command — *SunOS Reference Manual*, 309
@ — arithmetic on variables — csh — *SunOS Reference Manual*, 111
@ (indicates link) — *SunOS User's Guide: Getting Started*, 26
@ adb verb — *Debugging Tools*, 96
[ ] — filename substitution, any character in list or range — *SunOS Reference Manual*, 103
[and] — *SunOS User's Guide: Getting Started*, 73

sun microsystems

% (page-number) number register — *Using* nroff *and* troff, 36, 99
♦ keys — *SunView User's Guide*, 150
" quote character — *SunOS Reference Manual*, 99
\ escape character — *SunOS Reference Manual*, 99
\!* — alias substitution, include command-line arguments — csh — *SunOS Reference Manual*, 101
\!* (alias argument designator) — *SunOS User's Guide: Getting Started*, 86
\!*n* (alias argument designator) — *SunOS User's Guide: Getting Started*, 86
\ (unpaddable space) function — *Using* nroff *and* troff, 112
^
  bitwise XOR operator — csh — *SunOS Reference Manual*, 103
  quick substitution — csh — *SunOS Reference Manual*, 101
\^ (thin space) function — *Using* nroff *and* troff, 112
^ and stty — *SunOS User's Guide: Customizing Your Environment*, 4
_ in text — *SunView User's Guide*, 95
_toupper() — convert character to upper-case, System V — *SunOS Reference Manual*, 929
` — command substitution — *SunOS Reference Manual*, 103
{ } — filename substitution, successive strings in enclosed list — *SunOS Reference Manual*, 103, 104
{ and } — *SunOS User's Guide: Getting Started*, 73
| pipe symbol — *SunOS User's Guide: Getting Started*, 76
  bitwise OR operator — csh — *SunOS Reference Manual*, 103
  pipe standard output — *SunOS Reference Manual*, 99
|& send diagnostic output through pipe — *SunOS User's Guide: Getting Started*, 79; *SunOS Reference Manual*, 99
\| (thick space) function — *Using* nroff *and* troff, 112
||
  execute on failure — csh — *SunOS Reference Manual*, 99
  logical OR operator — csh — *SunOS Reference Manual*, 103
| mail command — *SunOS Reference Manual*, 311
| with get_selection command — *SunView User's Guide*, 107
~
  filename substitution, home directory — *SunOS Reference Manual*, 103
  one's complement operator — csh — *SunOS Reference Manual*, 103
~! — mail tilde escape — *SunOS Reference Manual*, 307
~ (home directory) — *SunOS User's Guide: Getting Started*, 14, 19, 24
~. — mail tilde escape — *SunOS Reference Manual*, 307
~: — mail tilde escape — *SunOS Reference Manual*, 308
~< — mail tilde escape — *SunOS Reference Manual*, 308

  ? — *Debugging Tools*, 96
  @ — *Debugging Tools*, 96
  RETURN — *Debugging Tools*, 96
add_client — add NFS client — *System and Network Administration*, 173 *thru* 178
add_client command — *SunOS Reference Manual*, 1846
add_services — add software — *System and Network Administration*, 178 *thru* 185
add_services command — *SunOS Reference Manual*, 1848
addbib — create bibliography — *SunOS Reference Manual*, 21
addch () — *Programming Utilities and Libraries*, 272
addexportent () function — *SunOS Reference Manual*, 971
adding hardware to system — *System and Network Administration*, 315 *thru* 344
adding modules, STREAMS — *STREAMS Programming*, 76
adding suffix rules in make — *Programming Utilities and Libraries*, 136
additional auto_sigbits — *SunView 1.80 Update*, 39
additional paging/swapping devices, specify — swapon — *SunOS Reference Manual*, 2121
addmntent () — add a file system description file entry — *SunOS Reference Manual*, 998
add password file entry — putpwent () — *SunOS Reference Manual*, 1104
address
  binding — *Network Programming*, 309
  convenient testing — *Writing Device Drivers*, 64
  families — *Network Programming*, 318
  finding physical — *Writing Device Drivers*, 64
  kernel space — *Writing Device Drivers*, 51
  mapping of — *Writing Device Drivers*, 62

mapping Sun-3 — *Writing Device Drivers*, 63, 66
mapping Sun-3x — *Writing Device Drivers*, 63
mapping Sun-4 — *Writing Device Drivers*, 63, 66
mapping Sun386i — *Writing Device Drivers*, 64
selection of virtual — *Writing Device Drivers*, 62
space terminology — *Writing Device Drivers*, 5
user space — *Writing Device Drivers*, 51
variable length — *Network Programming*, 318
virtual space warning — *Writing Device Drivers*, 5
virtual to physical mapping — *Writing Device Drivers*, 65
wildcard — *Network Programming*, 309
addressing categories — *Assembly Language Reference*, 33 *thru* 35
alterable — *Assembly Language Reference*, 33
control — *Assembly Language Reference*, 33
data — *Assembly Language Reference*, 33
memory — *Assembly Language Reference*, 33
addressing modes — *Assembly Language Reference*, 30 *thru* 33
address mapping in `adb` — *Debugging Tools*, 102
address resolution display and control — `arp` — *SunOS Reference Manual*, 1854
Address Resolution Protocol — *System and Network Administration*, *see* ARP under protocols
address space limit checking — `check4` command — *SunOS Reference Manual*, 2104
address space limiting — `set4` command — *SunOS Reference Manual*, 2104
address space of a process — *System Services Overview*, 3, 4
address space unlimit — `unset4` command — *SunOS Reference Manual*, 2104
add route `ioctl` — `SIOCADDRT` — *SunOS Reference Manual*, 1454
`addstr()` — *Programming Utilities and Libraries*, 272
`adduser` — add new user account — *SunOS Reference Manual*, 1849
`adjacentscreens` — *SunOS Reference Manual*, 23
`adjtime()` — adjust time — *SunOS Reference Manual*, 700
`Adjust_is_pending_delete` default — *SunView User's Guide*, 163
adjusting — *Using* `nroff` *and* `troff`, 13
center — *Using* `nroff` *and* `troff`, 17
flush left, ragged right — *Using* `nroff` *and* `troff`, 17
flush right, ragged left — *Using* `nroff` *and* `troff`, 17
justified — *Using* `nroff` *and* `troff`, 17
adjusting a selection — *SunView User's Guide*, 16, 86, 96
adjusting with MIDDLE mouse button — *SunView User's Guide*, 4
`admin`, `sccs` subcommand — *Programming Utilities and Libraries*, 111, 112; *SunOS Reference Manual*, 460
administering
configuration information — *SunOS Reference Manual*, 2122
electronic mail — *System and Network Administration*, 635 *thru* 649
networks — *Network Programming*, 9
RFS — *System and Network Administration*, 555 *thru* 610
RFS domain — *SunOS Reference Manual*, 2067
secure NFS — *System and Network Administration*, 426
servers — *Network Programming*, 8
workstations — *System and Network Administration*, 169 *thru* 217
administering a system
basic tasks — *System and Network Administration*, 5
developing procedures — *System and Network Administration*, 8
files and databases — *System and Network Administration*, 37 *thru* 49
local vs. network — *System and Network Administration*, 37
administration
of RPC — *Network Programming*, 38
administrator's guide to security — *System and Network Administration*, 149 *thru* 167
administrator awareness of security issues — *System and Network Administration*, 166
`.ad` (adjust) request — *Using* `nroff` *and* `troff`, 17
`adv` — advertise RFS resources — *System and Network Administration*, 574
`adv` — advertise directory for remote RFS access — *SunOS Reference Manual*, 1852
advanced features, System V `curses` — *Programming Utilities and Libraries*, 313 *thru* 317
advanced operations, STREAMS — *STREAMS Programming*, 46

advanced selecting *SunView User's Guide*, 95
advanced topics, STREAMS *STREAMS Programming*, 132
`adv` command *SunOS User's Guide: Customizing Your Environment*, 47
`adventure` — exploration game *SunOS Reference Manual*, 1719
advertise table *SunOS User's Guide: Customizing Your Environment*, 47
advise paging system — `vadvise()` *SunOS Reference Manual*, 877
advisory locks *Network Programming*, 29
AF - address format *Network Programming*, 281
`.af` (format of number register) request *Using* `nroff` *and* `troff`, 103
`\a` (leader character) function *Using* `nroff` *and* `troff`, 60
Again, in Text menu *SunView User's Guide*, 130
  ignores Undo *SunView User's Guide*, 130
  used with Find *SunView User's Guide*, 131
the Agent *SunView System Programmer's Guide*, 13, 7
  notification of tiles *SunView System Programmer's Guide*, 15
  posting notification to tiles *SunView System Programmer's Guide*, 16
  removing a tile from *SunView System Programmer's Guide*, 18
  SunView model *SunView System Programmer's Guide*, 8
`agt_create()` function *SunOS Reference Manual*, 1277
`agt_enumerate()` function *SunOS Reference Manual*, 1277
`agt_trap()` *Programming Utilities and Libraries*, 45
`agt_trap()` function *SunOS Reference Manual*, 1277
`aint()` — convert to integral floating *SunOS Reference Manual*, 1323
`aiocancel()` — cancel an asynchronous operation *SunOS Reference Manual*, 905
`aioread()` — initiate asynchronous read *SunOS Reference Manual*, 906
`aiowait()` — wait for completion of asynchronous I/O operation *SunOS Reference Manual*, 908
`aioread()` — initiate asynchronous write *SunOS Reference Manual*, 906
`alarm`(3) *SunView Programmer's Guide*, 259
`alarm()` — schedule signal *SunOS Reference Manual*, 909
alarms with help *SunView 1.80 Update*, 21 *thru* 25
alert *SunView Programmer's Guide*, 185
  arrow *SunView Programmer's Guide*, 186
  beeping *SunView Programmer's Guide*, 187

brk() — set data segment break — *SunOS Reference Manual*, 706
broadcasting — *Network Programming*, 311
broadcast messages to all users on network — rwall — *SunOS Reference Manual*, 452
broadcast RPC — *Network Programming*, 56, 81
synopsis — *Network Programming*, 82
Broken pipe — *SunOS User's Guide: Basic Troubleshooting*, 11

brotcube — rotate a simple cube
.br (break lines) request
bsd — Berkeley 4.3 environment
4.2BSD
BSD and System V compatibility in 4.1
bsearch() — binary search of a sorted table
bss
.bss directive
bsuncube — display 3-D Sun logo
bubble, in scrollbar
buffer allocation priority, STREAMS
buffered binary I/O
    fread() — read from stream
    fwrite() — write to stream
buffered I/O library functions, introduction to
buffered I/O package
    accessing files
    standard input and output
buffering
    assign to stream — setbuf()
    assign to stream — setbuffer()
    assign to stream — setlinebuf()
    assign to stream — setvbuf()
building
    a better shared library
    a data definition (.sa) file
    a kernel
    a multiplexor, STREAMS
    an entire project with make
    a shared library, simple case
    a shared object .so file
    libraries with make
    NIS database — ypinit
    PIC components
    programs — make
    random library — ranlib
    shared-library applications
    system configuration files — config
build programs — make
built-in m4 macros
    changequote
    define
    divert
    divnum
    dnl
    dumpdef
    errprint
    eval
    ifdef
    ifelse
    include
    incr
    index
    len
    mktemp
    sinclude
    substr
    syscmd
    translit
    undefine
    undivert

sun microsystems

case command in Bourne shell
cat — concatenate files
cat: input *filename* is output
cat: No such file or directory
CATCHALL
catch dbx command
catch FPE in dbx
catclose — close a message catalog
cat command
    and redirection
    show invisible characters with -v
categories in Defaults Editor
Category cycle item, in Defaults Editor
catgets — read a program message
C/A/T interpreter — pti
catman — create cat files for manual pages
catopen — open a message catalog
cb — format filter for C source files
cballs — color demo
cbc_crypt()
cbrt() — cube root function
cc — C compiler
ccat — extract files compressed with compact
C compiler
.cc (set control character) request
cd — change directory
CD-ROM
    block and character data access
    data and file access
    disc specifications
    High Sierra file system support
    shared network access to CD-ROM
    SunCD driver
    SunCD software
cdc, sccs subcommand
cd command
    and the cdpath variable
    and the home variable
cd command, used in SunView
C debugger
cdevsw
    definition
cd mail command
cdpath variable
cdplayer — CD-ROM audio demo program
cdraw — color demo
control operations —cdromio
cdromio— CDROM control operations
cdtest
ceil() — ceiling — convert to integral floating
Center_string_items default
centered tabs
.ce (center lines) request
cfgetispeed() — get input baud rate
cfgetospeed() — get output baud rate
cflow — generate C flow graph

C shell commands
`%` — job to foreground/background — *SunOS Reference Manual*, 111
`:` — null command — *SunOS Reference Manual*, 106
`@` — arithmetic on variables — *SunOS Reference Manual*, 111
`alias` — shell macros — *SunOS Reference Manual*, 106
`bg` — job to background — *SunOS Reference Manual*, 106

`break` — exit loop *SunOS Reference Manual*, 106
`breaksw` — exit switch *SunOS Reference Manual*, 106
`case` — selector in switch *SunOS Reference Manual*, 106
`cd` — change directory *SunOS Reference Manual*, 106
`chdir` — change directory *SunOS Reference Manual*, 106
`continue` — cycle loop *SunOS Reference Manual*, 106
`default` — catchall in switch *SunOS Reference Manual*, 106
`dirs` — print directory stack *SunOS Reference Manual*, 106
`echo` — echo arguments *SunOS Reference Manual*, 106
`else` — alternative commands *SunOS Reference Manual*, 107
`end` — end loop *SunOS Reference Manual*, 107
`endif` — end conditional *SunOS Reference Manual*, 107
`endsw` — end switch *SunOS Reference Manual*, 110
`eval` — re-evaluate shell data *SunOS Reference Manual*, 106
`exec` — execute command *SunOS Reference Manual*, 106
`exit` — exit shell *SunOS Reference Manual*, 107
`fg` — job to foreground *SunOS Reference Manual*, 107
`foreach` — loop on list of names *SunOS Reference Manual*, 107
`glob` — filename expand wordlist *SunOS Reference Manual*, 107
`goto` — command transfer *SunOS Reference Manual*, 107
`hashstat` — display hashing statistics *SunOS Reference Manual*, 107
`history` — display history list *SunOS Reference Manual*, 107
`if` — conditional statement *SunOS Reference Manual*, 107
`jobs` — display job list *SunOS Reference Manual*, 107
`kill` — kill jobs and processes *SunOS Reference Manual*, 108
`limit` — alter resource limitations *SunOS Reference Manual*, 108
`login` — login new user *SunOS Reference Manual*, 108
`logout` — end session *SunOS Reference Manual*, 108
`nice` — run low priority process *SunOS Reference Manual*, 108
`nohup` — run command immune to hangups *SunOS Reference Manual*, 108
`notify` — request immediate notification *SunOS Reference Manual*, 108
`onintr` — handle interrupts in scripts *SunOS Reference Manual*, 109
`popd` — pop shell directory stack *SunOS Reference Manual*, 109
`pushd` — push shell directory stack *SunOS Reference Manual*, 109
`rehash` — recompute command hash table *SunOS Reference Manual*, 109
`repeat` — execute command repeatedly *SunOS Reference Manual*, 109
`set` — change value of shell variable *SunOS Reference Manual*, 109
`setenv` — set or display variables in environment *SunOS Reference Manual*, 109
`shift` — shift argument list *SunOS Reference Manual*, 109
`source` — read commands from file *SunOS Reference Manual*, 109
`stop` — halt job or process *SunOS Reference Manual*, 110
`suspend` — suspend shell *SunOS Reference Manual*, 110
`switch` — multi-way branch *SunOS Reference Manual*, 110
`time` — time command *SunOS Reference Manual*, 110
`umask` — change/display file creation mask *SunOS Reference Manual*, 110
`unalias` — remove aliases *SunOS Reference Manual*, 110
`unhash` — discard hash table *SunOS Reference Manual*, 110
`unlimit` — remove resource limitations *SunOS Reference Manual*, 110
`unset` — discard shell variables *SunOS Reference Manual*, 110
`unsetenv` — remove environment variables *SunOS Reference Manual*, 110
`wait` — wait for background process *SunOS Reference Manual*, 110

`addbib` — create bibliography, *SunOS Reference Manual*, 21
bibliographies and citations, *Formatting Documents*, 93 *thru* 105
changing fonts, *Formatting Documents*, 11
`checknr` — check nroff/troff files, *SunOS Reference Manual*, 63
`col` — filter reverse paper motions, *SunOS Reference Manual*, 79
`colcrt` command, *SunOS Reference Manual*, 81
`deroff` — delete `troff`, `tbl` and `eqn` constructs, *SunOS Reference Manual*, 149

`diffmk` — add change marks, *SunOS Reference Manual*, 158
display breakout, *Formatting Documents*, 14
displaying documents, *Formatting Documents*, 9
entering text, *Formatting Documents*, 4
`eqn` — set mathematical equations, *SunOS Reference Manual*, 180
`eqnchar` — special characters for equations, *SunOS Reference Manual*, 1798
`eqn` program, *Formatting Documents*, 129 *thru* 155
equation formatting, *Formatting Documents*, 19, 129 *thru* 155
`fmt` — simple formatter, *SunOS Reference Manual*, 198
font changes, *Formatting Documents*, 11
footnotes, *Formatting Documents*, 14
formatters, *Formatting Documents*, 1; *Using* `nroff` *and* `troff`, 1 *thru* 11
`indxbib` — make inverted index, *SunOS Reference Manual*, 242
jargon for typesetting, *Formatting Documents*, 3
keeping text on one page, *Formatting Documents*, 15
list of items, *Formatting Documents*, 12
`lookbib` — find bibliographic references, *SunOS Reference Manual*, 286
macro packages, *Formatting Documents*, 2
`-man` — macros to format manual pages, *SunOS Reference Manual*, 1813
`-man` macros, *Formatting Documents*, 53 *thru* 60
mathematical equations, *Formatting Documents*, 19, 129 *thru* 155
`-me` — macro package, *SunOS Reference Manual*, 1816
`-me` macros, *Formatting Documents*, 61 *thru* 92
`-ms` — macro package, *SunOS Reference Manual*, 1818
`-ms` macros, *Formatting Documents*, 23 *thru* 51
multiple columns, *Formatting Documents*, 15
`nroff` — document formatter, *SunOS Reference Manual*, 364
`nroff` program, *Using* `nroff` *and* `troff`, 1 *thru* 11
number registers, *Formatting Documents*, 21
outline of items, *Formatting Documents*, 13
paragraph types, *Formatting Documents*, 5
preprocessors, *Formatting Documents*, 2
printing documents, *Formatting Documents*, 9
`pti` — (old) `troff` interpreter, *SunOS Reference Manual*, 383
`ptx` — generate permuted index, *SunOS Reference Manual*, 424
quick reference, *Formatting Documents*, 8
`refer` — insert literature references, *SunOS Reference Manual*, 436
`refer` program, *Formatting Documents*, 93 *thru* 105
`roffbib` — print bibliographic database, *SunOS Reference Manual*, 442
sample paragraphs, *Formatting Documents*, 7
section headers, *Formatting Documents*, 11
`soelim` — eliminate .so's from nroff input, *SunOS Reference Manual*, 517
`sortbib` — sort bibliographic database, *SunOS Reference Manual*, 521
`spell` — check spelling, *SunOS Reference Manual*, 522
tables inside documents, *Formatting Documents*, 17, 107 *thru* 128
`tbl` — table formatter, *SunOS Reference Manual*, 566
`tbl` program, *Formatting Documents*, 107 *thru* 128
technical memorandum, *Formatting Documents*, 10
text formatters, *Formatting Documents*, 1; *Using* `nroff` *and* `troff`, 1 *thru* 11
`troff` — typeset documents, *SunOS Reference Manual*, 608
`troff` program, *Using* `nroff` *and* `troff`, 1 *thru* 11
typesetting jargon, *Formatting Documents*, 3
typing in text, *Formatting Documents*, 4
`vfontinfo` — examine font files, *SunOS Reference Manual*, 644
`vtroff` — format document for raster printer, *SunOS Reference Manual*, 652

`vwidth` — make font width table	*SunOS Reference Manual*, 653
`dodisk` — accounting shell procedure	*SunOS Reference Manual*, 1841
`... does not exist`	*SunOS User's Guide: Basic Troubleshooting*, 20
domain	*System and Network Administration*, *see* network
get name of current — `getdomainname()`	*SunOS Reference Manual*, 736

`environ()` — execute file	*SunOS Reference Manual*, 968
`environ` — user environment	*SunOS Reference Manual*, 1564
environment	
display variables — `printenv`	*SunOS Reference Manual*, 417

sun microsystems

get value — `getenv()`
set value — `putenv()`
SunView application usage
`tset` — set terminal characteristics for window usage
environment defined
environment switching
environment variables

`getenv()`
environment variables — in C shell
environment variables in C shell
environment variables in `mail`
EOF
`.eo` (set escape off) request
`eqn` — remove constructs — `deroff`
`eqnchar` — special characters for equations
`eqn` — mathematical typesetting
`eqn` program
accent marks
adjusting the spacing
big brackets
bracketing expressions
defining prepackaged strings
diacritical marks
displaying finished equations
`.EQ`/`.EN` pairs
escaping `eqn`'s formatting
examples
font changes
fractions
Greek letters
grouping parts of an equation
in-line equations
integrals
keywords and precedence
lining up two equations
`mark` and `lineup`
matrices with `matrix`
over and under expressions
piles with `pile`
point size changes
precedence and keywords
printing finished equations
quoted text
separating equations from text
spaces in the input
spaces in the output
square roots
subscripts and superscripts
summations
superscripts and subscripts
symbols and special names
text with in-line equations
troubleshooting
tuning the spacing
equation formatting in documents
`erand48()` — generate uniformly distributed random numbers
`erase`
directory — `rmdir()`
directory — `rmdir` command

F

Topic	*Where to Look*
`-f` C shell file inquiry — plain file	*SunOS Reference Manual*, 104, 308
F1 key	*SunView User's Guide*, 154
`f77`	*Sun-4 Assembly Language Reference*, 4
`fabs()` function	*SunOS Reference Manual*, 1314
`factor` game	*SunOS Reference Manual*, 1748
`FALSE`	*SunView System Programmer's Guide*, 167
`fastboot` — reboot system	*SunOS Reference Manual*, 1922; *System and Network Administration*, *see* booting
`fasthalt` — halt system	*SunOS Reference Manual*, 1922; *System and Network Administration*, *see* booting
`FASYNC`	*SunView System Programmer's Guide*, 29
fault handling in Bourne shell	*SunOS User's Guide: Doing More*, 74 *thru* 76
`fb` — Sun console frame buffer driver	*SunOS Reference Manual*, 1385
`fbio` — frame buffer control operations	*SunOS Reference Manual*, 1386
`FBIONREAD`	*SunView 1.80 Update*, 40
`fbtab` — framebuffer table	*SunOS Reference Manual*, 1570
`fchmod()`	*SunOS Reference Manual*, 708; *System Services Overview*, 38
`fchown()`	*SunOS Reference Manual*, 710
`fclose()` — close stream	*SunOS Reference Manual*, 973
`fcntl(2)`	*SunView Programmer's Guide*, 260, 264; *SunView System Programmer's Guide*, 29
`fcntl()`	*Network Programming*, 27; *SunOS Reference Manual*, 724
`fcntl` — file control options	*SunOS Reference Manual*, 1571
`fconvert()` — convert number to ASCII	*SunOS Reference Manual*, 963
`.fc` (set field characters) request	*Using* `nroff` *and* `troff`, 62
`FD_CLR()`	*Network Programming*, 288
`fd_set`	*SunView System Programmer's Guide*, 64
`FD_SET()`	*Network Programming*, 288
FDDI test	*Sundiag User's Guide*, 42
`fdformat` — floppy format format floppy	*SunOS Reference Manual*, 189
`FDKEJECT` — eject floppy	*SunOS Reference Manual*, 1383
`FDKIOGCHAR` — get floppy characteristics	*SunOS Reference Manual*, 1383
`FDKIOGETCHANGE` — get status of disk changed	*SunOS Reference Manual*, 1383
`fdopen()` — associate descriptor	*SunOS Reference Manual*, 979
`FE_PAIR_ABSOLUTE`	*SunView System Programmer's Guide*, 181
`FE_PAIR_DELTA`	*SunView System Programmer's Guide*, 181
`FE_PAIR_NONE`	*SunView System Programmer's Guide*, 181
`FE_PAIR_SET`	*SunView System Programmer's Guide*, 181
features in `make`, new	*Programming Utilities and Libraries*, 341
`feof()`	*C Programmer's Guide*, 47; *SunOS Reference Manual*, 974
`ferror()` — inquire error on stream	*SunOS Reference Manual*, 974
`fetch()` — retrieve datum under key	*SunOS Reference Manual*, 953
`fflush()`	*C Programmer's Guide*, 37; *SunOS Reference Manual*, 973
`ffs()`	*C Programmer's Guide*, 61; *SunOS Reference Manual*, 916
`fg` command	*SunOS Reference Manual*, 107
`fg` command (C shell only)	*SunOS User's Guide: Getting Started*, 89
`fgetc()`	*C Programmer's Guide*, 42; *SunOS Reference Manual*, 987; *System Services Overview*, 66
`fgetgraent()` function	*SunOS Reference Manual*, 992

fgetgrent () — get group file entry — *SunOS Reference Manual*, 993
fgetpwaent () function — *SunOS Reference Manual*, 1007
fgetpwent () — get password file entry — *SunOS Reference Manual*, 1009
fgets () — *C Programmer's Guide*, 44; *SunOS Reference Manual*, 1012; *System Services Overview*, 66

fgrep — pattern scanner — *SunOS Reference Manual*, 223
fi command — *SunOS Reference Manual*, 499
fi command in Bourne shell — *SunOS User's Guide: Doing More*, 62
|>field<| — *SunView User's Guide*, 141
field character — *Using* nroff *and* troff, 62
fields — *Using* nroff *and* troff, 62

creating directory — *System Services Overview*, 35
data — *Network Programming*, 1
definition — *SunOS User's Guide: Getting Started*, 12

delete directory entry — `unlink()` *SunOS Reference Manual*, 872
delete directory — `rmdir()` *SunOS Reference Manual*, 821
demount — `umount` *SunOS Reference Manual*, 2006
`unmount()` — demount file system *SunOS Reference Manual*, 873
display disk usage and limits — `quota` *SunOS Reference Manual*, 426
display free space *SunOS Reference Manual*, 152
dump information — `dumpfs` *SunOS Reference Manual*, 1909
`edquota` — edit user quotas *SunOS Reference Manual*, 1910
`edquota` command *System and Network Administration*, 122
erase directory entry — `unlink()` *SunOS Reference Manual*, 872
erase directory — `rmdir()` *SunOS Reference Manual*, 821
`/etc` directory in 4.1 *System and Network Administration*, 32, 32, 34, 34
exportation *Network Programming*, 7
`/export` directory in 4.1 *System and Network Administration*, 27 *thru* 31
exported table — `xtab` *SunOS Reference Manual*, 1566
exporting via NFS *System and Network Administration*, 398
exports table — `exports` *SunOS Reference Manual*, 1566
`fchmod()` *SunOS Reference Manual*, 708
`fchown()` *SunOS Reference Manual*, 710
for system administration *System and Network Administration*, 37 *thru* 49
free space display *SunOS Reference Manual*, 152
`fstab` — static information *SunOS Reference Manual*, 1576
`ftruncate()` *SunOS Reference Manual*, 869
`getdents()` *SunOS Reference Manual*, 732
`getdirentries()` *SunOS Reference Manual*, 734
get file descriptor entry *SunOS Reference Manual*, 991
get file system statistics *SunOS Reference Manual*, 875
glossary definition *System and Network Administration*, 59
hard-mounted NFS hierarchies *System and Network Administration*, 416
High Sierra *System and Network Administration*, 34
how to create hierarchies with NFS *System and Network Administration*, 396
`link()` *SunOS Reference Manual*, 767
loopback — `mount` *SunOS Reference Manual*, 2006; *System and Network Administration*, 34
`lseek()` *SunOS Reference Manual*, 770
make — `mkfs` *SunOS Reference Manual*, 1991
make prototype— `mkproto` *SunOS Reference Manual*, 1994
making space on *System and Network Administration*, 119
`mkdir()` *SunOS Reference Manual*, 774
`mknod()` *SunOS Reference Manual*, 776
model *Network Programming*, 168
modifying for add-on printer *System and Network Administration*, 344
modifying for hardware addition *System and Network Administration*, 315 *thru* 344
monitoring usage *System and Network Administration*, 115 *thru* 120
mount — `mount` *SunOS Reference Manual*, 2006
`mount()` *SunOS Reference Manual*, 780
mounted table — `mtab` *SunOS Reference Manual*, 1576, 1607
naming *System Services Overview*, 34
`open()` *SunOS Reference Manual*, 794
operations *Network Programming*, 1
options to `mount` *SunOS User's Guide: Customizing Your Environment*, 42
`quotacheck` command *System and Network Administration*, 122
`quotacheck` — check quota consistency *SunOS Reference Manual*, 2051
`quotactl()` — disk quotas *SunOS Reference Manual*, 810
`quotaoff` — turn file system quotas off *SunOS Reference Manual*, 2052
`quotaoff` command *System and Network Administration*, 122
`quotaon` — turn file system quotas on *SunOS Reference Manual*, 2052
`quotaon` command *System and Network Administration*, 122
quotas *System and Network Administration*, 120 *thru* 124
`readlink()` *SunOS Reference Manual*, 815
recovering specific files *System and Network Administration*, 103
remove directory entry — `unlink()` *SunOS Reference Manual*, 872
remove directory — `rmdir()` *SunOS Reference Manual*, 821
removing directories *System Services Overview*, 35

rename file — `rename()` *SunOS Reference Manual*, 819
report access *SunOS Reference Manual*, 1939
`repquota` — summarize quotas *SunOS Reference Manual*, 2059
`repquota` command *System and Network Administration*, 122
restoring *System and Network Administration*, 101 *thru* 115
restoring damaged root *System and Network Administration*, 112
restoring entire *System and Network Administration*, 108
root in 4.1 *System and Network Administration*, 20 *thru* 21
`rquotad` — remote quota server *SunOS Reference Manual*, 2086
and servers *System and Network Administration*, 18
soft-mounted NFS hierarchies *System and Network Administration*, 416
statistics — `fstatfs()` *SunOS Reference Manual*, 861
statistics — `statfs()` *SunOS Reference Manual*, 861
summarize ownership — `quot` *SunOS Reference Manual*, 2050
superblock *System and Network Administration*, 757
symbolic links in 4.1 file systems *System and Network Administration*, 19
`symlink()` *SunOS Reference Manual*, 864
`tell()` *SunOS Reference Manual*, 770
`tmpfs` *System and Network Administration*, 34
`truncate()` *SunOS Reference Manual*, 869
tune — `tunefs` *SunOS Reference Manual*, 2136
`umask()` *SunOS Reference Manual*, 870
unmount — `umount` *SunOS Reference Manual*, 2006
`unmount()` — demount file system *SunOS Reference Manual*, 873
updating *System and Network Administration*, 759
`/usr` *System and Network Administration*, 22 *thru* 27
`utime()` — set file times *SunOS Reference Manual*, 1245
`utimes()` — set file times *SunOS Reference Manual*, 876
where am I — `pwd` *SunOS Reference Manual*, 425
file system description file, manipulate *SunOS Reference Manual*, 998
file system description file close
`endmntent()` *SunOS Reference Manual*, 998
file system description file entry add
`addmntent()` *SunOS Reference Manual*, 998
file system description file entry option search
`hasmntopt()` *SunOS Reference Manual*, 998
file system description file entry read
`getmntent()` *SunOS Reference Manual*, 998
file system description file open
`setmntent()` *SunOS Reference Manual*, 998
file system dump — `dump` *SunOS Reference Manual*, 1906
`File system full` *SunOS User's Guide: Basic Troubleshooting*, 15
file system restore — `restore` *SunOS Reference Manual*, 2060

futures, RPC — *Network Programming*, 101
`fwrite()` — write to stream — *SunOS Reference Manual*, 981; *System Services Overview*, 66
`fwtmp` — convert connect accounting records to ASCII — *SunOS Reference Manual*, 1941
`.fz` (force font size) request — *Using* `nroff` *and* `troff`, 49

G

Topic	*Where to Look*
`gaintool` — audio control panel	*SunOS Reference Manual*, 1751
games	
`boggletool` — SunView game of boggle	*SunOS Reference Manual*, 1730
`canfield` — solitaire card game	*SunOS Reference Manual*, 1735
`chess` — chess game	*SunOS Reference Manual*, 1737
`chesstool` — SunView chess game	*SunOS Reference Manual*, 1738
`gammontool` — SunView backgammon game	*SunOS Reference Manual*, 1753
introduction	*SunOS Reference Manual*, 1717
`life` — SunView game of life	*SunOS Reference Manual*, 1762
`gamma()` — log gamma	*SunOS Reference Manual*, 1319
`gammontool` — SunView backgammon game	*SunOS Reference Manual*, 1753
gateway	*SunOS User's Guide: Getting Started*, 99; *System and Network Administration*, 380
glossary definition	*System and Network Administration*, 59
gateways issues	*Network Programming*, 338
gather write	*System Services Overview*, 32
gather write — `writev()`	*SunOS Reference Manual*, 884
`gcd()` — multiple precision GCD	*SunOS Reference Manual*, 1079
`gconvert()` — convert number to ASCII	*SunOS Reference Manual*, 963
`gcore` — core image of process	*SunOS Reference Manual*, 212
`gencat` — create a message catalog	*SunOS Reference Manual*, 1965
general number registers	
`%` — page-number	*Using* `nroff` *and* `troff`, 36, 99
`ct` — character type	*Using* `nroff` *and* `troff`, 117
`dl` — width of last finished diversion	*Using* `nroff` *and* `troff`, 93
`dn` — height of last finished diversion	*Using* `nroff` *and* `troff`, 93
`dy` — day of month	*Using* `nroff` *and* `troff`, 99
`mo` — month of year	*Using* `nroff` *and* `troff`, 99
`nl` — vertical position of last baseline	*Using* `nroff` *and* `troff`, 99, 93
`sb` — string depth below baseline	*Using* `nroff` *and* `troff`, 116
`st` — string height above baseline	*Using* `nroff` *and* `troff`, 116
`yr` — last two digits of year	*Using* `nroff` *and* `troff`, 99
generate	
adb script — `adbgen`	*SunOS Reference Manual*, 1844
encryption key — `makekey`	*SunOS Reference Manual*, 1987
fault — `abort()`	*SunOS Reference Manual*, 903
lexical analyzer — `lex`	*SunOS Reference Manual*, 266
permuted index — `ptx`	*SunOS Reference Manual*, 424
generate procedure	
for menu	*SunView Programmer's Guide*, 226
for menu item	*SunView Programmer's Guide*, 225
for pull-right	*SunView Programmer's Guide*, 228
generate procedure operation parameter values	
`MENU_DISPLAY`	*SunView Programmer's Guide*, 224
`MENU_DISPLAY_DONE`	*SunView Programmer's Guide*, 224
`MENU_NOTIFY`	*SunView Programmer's Guide*, 224
`MENU_NOTIFY_DONE`	*SunView Programmer's Guide*, 224
generate random numbers	
`initstate()`	*SunOS Reference Manual*, 1109
`rand()`	*SunOS Reference Manual*, 1108
`random()`	*SunOS Reference Manual*, 1109

setstate() — *SunOS Reference Manual*, 1109
srand() — *SunOS Reference Manual*, 1108
srandom() — *SunOS Reference Manual*, 1109
drand48() — *SunOS Reference Manual*, 961
erand48() — *SunOS Reference Manual*, 961
jrand48() — *SunOS Reference Manual*, 961
lcong48() — *SunOS Reference Manual*, 961
lrand48() — *SunOS Reference Manual*, 961
mrand48() — *SunOS Reference Manual*, 961
nrand48() — *SunOS Reference Manual*, 961
seed48() — *SunOS Reference Manual*, 961
srand48() — *SunOS Reference Manual*, 961

generic disk control operations — dkio — *SunOS Reference Manual*, 1382

generic operations
gather write — writev() — *SunOS Reference Manual*, 884
ioctl() — *SunOS Reference Manual*, 763
read() — *SunOS Reference Manual*, 812
scatter read — readv() — *SunOS Reference Manual*, 812
write() — *SunOS Reference Manual*, 884

geometry of rectangles — *SunView System Programmer's Guide*, *see* rect

get
access to a file for editing under SCCS — *Programming Utilities and Libraries*, 96, 94
arp entry ioctl — SIOCGARP — *SunOS Reference Manual*, 1354
character from stream — fgetc() — *SunOS Reference Manual*, 987
character from stream — getc() — *SunOS Reference Manual*, 987
console I/O ioctl — TIOCCONS — *SunOS Reference Manual*, 1374
count of bytes to read ioctl — FIONREAD — *SunOS Reference Manual*, 1389
current working directory pathname — getwd() — *SunOS Reference Manual*, 1022
date and time — ftime() — *SunOS Reference Manual*, 1231
date and time — time() — *SunOS Reference Manual*, 1231
disk geometry ioctl — DKIOCGGEOM — *SunOS Reference Manual*, 1383
disk info ioctl — DKIOCINFO — *SunOS Reference Manual*, 1383
disk partition info ioctl — DKIOCGPART — *SunOS Reference Manual*, 1383
entries from kernel symbol table — kvm_nlist() — *SunOS Reference Manual*, 1033
entries from symbol table — nlist() — *SunOS Reference Manual*, 1086
environment value — getenv() — *SunOS Reference Manual*, 989
file owner ioctl — FIOGETOWN — *SunOS Reference Manual*, 1389
file system descriptor file entry — *SunOS Reference Manual*, 991
foreground process group ID — *SunOS Reference Manual*, 1223
high water mark ioctl — SIOCGHIWAT — *SunOS Reference Manual*, 1477
ifnet address ioctl — SIOCGIFADDR — *SunOS Reference Manual*, 1397
ifnet flags ioctl — SIOCGIFFLAGS — *SunOS Reference Manual*, 1397
ifnet list ioctl — SIOCGIFCONF — *SunOS Reference Manual*, 1397
info on resource usage — vtimes() — *SunOS Reference Manual*, 1254
login name — getlogin() — *SunOS Reference Manual*, 997
low water mark ioctl — SIOCGLOWAT — *SunOS Reference Manual*, 1477
magnetic tape unit status — mt — *SunOS Reference Manual*, 348
message queue, msgget() — *Programming Utilities and Libraries*, 59
most recent SID — *Programming Utilities and Libraries*, 100
network entry — getnetent() — *SunOS Reference Manual*, 1000
network group entry — getnetgrent() — *SunOS Reference Manual*, 1001
network host entry — gethostent() — *SunOS Reference Manual*, 995
network service entry — getservent() — *SunOS Reference Manual*, 1013
options on sockets — getsockopt() — *SunOS Reference Manual*, 758
p-p address ioctl — SIOCGIFDSTADDR — *SunOS Reference Manual*, 1397
parent process identification — getppid() — *SunOS Reference Manual*, 750
pathname of current working directory — getcwd() — *SunOS Reference Manual*, 988
position of stream — ftell() — *SunOS Reference Manual*, 982
process domain name — getdomainname() — *SunOS Reference Manual*, 736
process identification — getpid() — *SunOS Reference Manual*, 750
process times — times() — *SunOS Reference Manual*, 1232

protocol entry — `getprotoent()` *SunOS Reference Manual*, 1005
requested minor device `ioctl` — `GP1IO_GET_REQDEV` *SunOS Reference Manual*, 1392
restart count `ioctl` — `GP1IO_GET_RESTART_COUNT` *SunOS Reference Manual*, 1392
RPC program entry — `getrpcent()` *SunOS Reference Manual*, 1011
scheduling nice value — `getpriority()` *SunOS Reference Manual*, 751
selected version of a file *Programming Utilities and Libraries*, 98
semaphore, `semget()` *Programming Utilities and Libraries*, 70
shared memory segment, `shmget()` *Programming Utilities and Libraries*, 82
signal stack context — `sigstack()` *SunOS Reference Manual*, 849
static block `ioctl` — `GP1IO_GET_STATIC_BLOCK` *SunOS Reference Manual*, 1392
string from stdin — `gets()` *SunOS Reference Manual*, 1012
string from stream — `fgets()` *SunOS Reference Manual*, 1012
terminal name — `tty` *SunOS Reference Manual*, 616
terminal state — `gtty()` *SunOS Reference Manual*, 1182
true minor device `ioctl` — `GP1IO_GET_TRUMINORDEV` *SunOS Reference Manual*, 1392
user limits — `ulimit()` *SunOS Reference Manual*, 1242
version of a file by date under SCCS *Programming Utilities and Libraries*, 98
word from stream — `getw()` *SunOS Reference Manual*, 987
working copy of a file *Programming Utilities and Libraries*, 97
working copy of a file under SCCS *Programming Utilities and Libraries*, 94
`set_alarm` — SunView programmable alarms *SunOS Reference Manual*, 496; *SunView 1.80 Update*, 17
`get_myaddress()` — secure RPC *SunOS Reference Manual*, 1148
`get`, `sccs` subcommand *Programming Utilities and Libraries*, 97, 94, 98, 100, 102, 103
`get_selection` — copy a SunView selection to standard output *SunOS Reference Manual*, 217
`get_selection` command, used in SunView *SunView User's Guide*, 107
get_selection example program *SunView System Programmer's Guide*, 103
`getacdir()` function *SunOS Reference Manual*, 985
`getacflg()` function *SunOS Reference Manual*, 985
`getacinfo()` — get audit control file information *SunOS Reference Manual*, 985
`getacmin()` function *SunOS Reference Manual*, 985
`GETALL` *Programming Utilities and Libraries*, 72
`getauditflags()` — generate process audit state *SunOS Reference Manual*, 990
`getauditflagsbin()` — convert audit flag specifications *SunOS Reference Manual*, 986
`getauditflagschar()` — convert audit flag specifications *SunOS Reference Manual*, 986
`getauid()` function *SunOS Reference Manual*, 731
`getc()` *C Programmer's Guide*, 41; *System Services Overview*, 66
`getc()` — get character from stream *SunOS Reference Manual*, 987
`getcap()` *Programming Utilities and Libraries*, 278
`getch()` *Programming Utilities and Libraries*, 276
`getchar()` *C Programmer's Guide*, 29, 43
`getchar()` — get character from stdin *SunOS Reference Manual*, 987
get colormap entries *4.1 Pixrect Reference Manual*, 38, 116
`get` — get SCCS file *SunOS Reference Manual*, 468
get compatibility mode `ioctl` — `KIOCGCOMPAT` *SunOS Reference Manual*, 1409
get current plane group *4.1 Pixrect Reference Manual*, 46
`getcwd()` — get pathname of current directory *SunOS Reference Manual*, 988
get date and time *SunOS Reference Manual*, 760
`getdents()` *SunOS Reference Manual*, 732; *System Services Overview*, 37
`getdirentries()` *SunOS Reference Manual*, 734
`getdomainname()` *Network Programming*, 24; *SunOS Reference Manual*, 736; *System Services Overview*, 15
get double buffering attributes *4.1 Pixrect Reference Manual*, 46, 120
`getdtablesize()` *SunOS Reference Manual*, 737; *System Services Overview*, 26

getegid() — get effective group ID	*SunOS Reference Manual*, 738; *System Services Overview*, 17, 66
getenv() library function	*C Programmer's Guide*, 11, 11; *SunOS Reference Manual*, 989
geteuid() — get effective user ID	*SunOS Reference Manual*, 762
geteuid()	*System Services Overview*, 17, 65
getexportent() function	*SunOS Reference Manual*, 971
getexportopt() function	*SunOS Reference Manual*, 971
getfsent() — get file system descriptor file entry	*SunOS Reference Manual*, 991
getfsfile() — get file system descriptor file entry	*SunOS Reference Manual*, 991
getfsspec() — get file system descriptor file entry	*SunOS Reference Manual*, 991
getfstype() — get file system descriptor file entry	*SunOS Reference Manual*, 991
getgid() — get group ID	*SunOS Reference Manual*, 738; *System Services Overview*, 17, 65
getgraent() function	*SunOS Reference Manual*, 992
getgranam() function	*SunOS Reference Manual*, 992
getgrent()	*Network Programming*, 25; *SunOS Reference Manual*, 993; *System Services Overview*, 68
getgrgid() — get group file entry	*SunOS Reference Manual*, 993; *System Services Overview*, 68
getgrnam() — get group file entry	*SunOS Reference Manual*, 993; *System Services Overview*, 68
get group file entry	
endgrent()	*SunOS Reference Manual*, 993
fgetgrent()	*SunOS Reference Manual*, 993
getgrent()	*SunOS Reference Manual*, 993
getgrgid()	*SunOS Reference Manual*, 993
getgrnam()	*SunOS Reference Manual*, 993
setgrent()	*SunOS Reference Manual*, 993
getgroups()	*SunOS Reference Manual*, 739; *System Services Overview*, 17
get high water mark ioctl — SIOCGHIWAT	*SunOS Reference Manual*, 1507
gethostbyaddr()	*Network Programming*, 26, 291; *SunOS Reference Manual*, 995
gethostbyname()	*Network Programming*, 26, 291; *SunOS Reference Manual*, 995
gethostent()	*Network Programming*, 25; *SunOS Reference Manual*, 995
gethostid()	*SunOS Reference Manual*, 740; *System Services Overview*, 15
gethostname()	*Network Programming*, 24; *SunOS Reference Manual*, 741; *System Services Overview*, 15
getitimer(2)	*SunView Programmer's Guide*, 259
getitimer() — get value of interval timer	*SunOS Reference Manual*, 742; *System Services Overview*, 26
get keyboard "direct input" state ioctl — KIOCGDIRECT	*SunOS Reference Manual*, 1409
get keyboard translation ioctl — KIOCGTRANS	*SunOS Reference Manual*, 1407
get keyboard type ioctl — KIOCTYPE	*SunOS Reference Manual*, 1408
get LEDs ioctl — KIOCGLED	*SunOS Reference Manual*, 1409
getlogin() — get login name	*SunOS Reference Manual*, 997; *System Services Overview*, 68
get low water mark ioctl — SIOCGLOWAT	*SunOS Reference Manual*, 1507
get memory pixrect data bytes per line	*4.1 Pixrect Reference Manual*, 62, 115
getmntent() — read a file system description file entry	*SunOS Reference Manual*, 998
getmsg() — get next message from stream	*SunOS Reference Manual*, 744
GETNCNT	*Programming Utilities and Libraries*, 72
getnetbyaddr() — get network entry	*SunOS Reference Manual*, 1000
getnetbyname() — get network entry	*SunOS Reference Manual*, 1000
getnetent() — get network entry	*SunOS Reference Manual*, 1000
getnetgrent() — get network group entry	*SunOS Reference Manual*, 1001
getnetname() — secure RPC	*SunOS Reference Manual*, 1148
getopt — process options in scripts	*SunOS Reference Manual*, 213
getopt() function	*SunOS Reference Manual*, 1002
parse suboptions	*SunOS Reference Manual*, 1014
getopts command	*SunOS Reference Manual*, 215
getpagesize()	*System Services Overview*, 13, 14
getpagesize() — get system page size	*SunOS Reference Manual*, 746
getpass() — read password	*SunOS Reference Manual*, 1004; *System Services Overview*, 67

sun microsystems

get password file entry
endpwent()

.i (current indent) number register — *Using* nroff *and* troff, 32, 34
inverse video — *SunView User's Guide*, 5, 56

invisible characters
- displaying with cat -v — *SunOS User's Guide: Getting Started*, 78

invoking dbx — *Debugging Tools*, 16
ioctl(2) — *SunView Programmer's Guide*, 260; *SunView System Programmer's Guide*, 71
- STREAMS I_LINK — *STREAMS Programming*, 113
- STREAMS I_PLINK — *STREAMS Programming*, 113

ioctl() — *SunOS Reference Manual*, 763; *System Services Overview*, 33
- macros — *Writing Device Drivers*, 144
- routine — *Writing Device Drivers*, 50, 112, 120

ioctl's for des chip
- DESIOCBLOCK — process block — *SunOS Reference Manual*, 1381
- DESIOCQUICK — process quickly — *SunOS Reference Manual*, 1381

ioctls for disks

DKIOCGGEOM — get disk geometry *SunOS Reference Manual*, 1383
DKIOCGPART — get disk partition info *SunOS Reference Manual*, 1383
DKIOCINFO — get disk info *SunOS Reference Manual*, 1383
DKIOCSGEOM — set disk geometry *SunOS Reference Manual*, 1383
DKIOCSPART — set disk partition info *SunOS Reference Manual*, 1383
DKIOCWCHK — disk write check *SunOS Reference Manual*, 1383

ioctl's for files
FIOASYNC — set/clear async I/O *SunOS Reference Manual*, 1389
FIOCLEX — set close-on-exec for fd *SunOS Reference Manual*, 1389
FIOGETOWN get owner *SunOS Reference Manual*, 1389
FIONBIO — set/clear non-blocking I/O *SunOS Reference Manual*, 1389
FIONCLEX — remove close-on-exec flag *SunOS Reference Manual*, 1389
FIONREAD — get # bytes to read *SunOS Reference Manual*, 1389
FIOSETOWN — set owner *SunOS Reference Manual*, 1389

ioctls for floppy
FDKEJECT — eject floppy *SunOS Reference Manual*, 1383
FDKIOGCHAR — get floppy characteristics *SunOS Reference Manual*, 1383
FDKIOGETCHAGE — get status of disk changed *SunOS Reference Manual*, 1383

ioctl's for graphics processor
GP1IO_CHK_GP — restart GP *SunOS Reference Manual*, 1392
GP1IO_FREE_STATIC_BLOCK — free static block *SunOS Reference Manual*, 1392
GP1IO_GET_GBUFFER_STATE — check buffer state *SunOS Reference Manual*, 1392
GP1IO_GET_REQDEV — get requested minor device *SunOS Reference Manual*, 1392
GP1IO_GET_RESTART_COUNT — get restart count *SunOS Reference Manual*, 1392
GP1IO_GET_STATIC_BLOCK — get static block *SunOS Reference Manual*, 1392
GP1IO_GET_TRUMINORDEV — get true minor device *SunOS Reference Manual*, 1392
GP1IO_PUT_INFO — pass framebuffer info *SunOS Reference Manual*, 1392
GP1IO_REDIRECT_DEVFB — reconfigure fb *SunOS Reference Manual*, 1392

ioctl's for keyboards
KIOCCMD — send a keyboard command *SunOS Reference Manual*, 1408
KIOCGCOMPAT — get compatibility mode *SunOS Reference Manual*, 1409
KIOCGDIRECT — get keyboard "direct input" state *SunOS Reference Manual*, 1409
KIOCGKEY — get translation table entry *SunOS Reference Manual*, 1408
KIOCGLED — get LEDs *SunOS Reference Manual*, 1409
KIOCGTRANS — get keyboard translation *SunOS Reference Manual*, 1407
KIOCLAYOUT — get keyboard type *SunOS Reference Manual*, 1408
KIOCSCOMPAT — set compatibility mode *SunOS Reference Manual*, 1409
KIOCSDIRECT — set keyboard "direct input" state *SunOS Reference Manual*, 1409
KIOCSKEY — change translation table entry *SunOS Reference Manual*, 1408
KIOCSLED — set LEDs *SunOS Reference Manual*, 1408
KIOCTRANS — set keyboard translation *SunOS Reference Manual*, 1407
KIOCTYPE — get keyboard type *SunOS Reference Manual*, 1408

ioctl's for sockets
SIOCADDMULTI — set m/c address *SunOS Reference Manual*, 1398
SIOCADDRT — add route *SunOS Reference Manual*, 1454
SIOCDARP — delete arp entry *SunOS Reference Manual*, 1354
SIOCDELMULTI — delete m/c address *SunOS Reference Manual*, 1398
SIOCDELRT — delete route *SunOS Reference Manual*, 1454
SIOCGARP — get arp entry *SunOS Reference Manual*, 1354
SIOCGHIWAT — get high water mark *SunOS Reference Manual*, 1477, 1507
SIOCGIFADDR — get ifnet address *SunOS Reference Manual*, 1397
SIOCGIFCONF — get ifnet list *SunOS Reference Manual*, 1397
SIOCGIFDSTADDR — get p-p address *SunOS Reference Manual*, 1397
SIOCGIFFLAGS — get ifnet flags *SunOS Reference Manual*, 1397
SIOCGLOWAT — get low water mark *SunOS Reference Manual*, 1477, 1507
SIOCSARP — set arp entry *SunOS Reference Manual*, 1354

SIOCSHIWAT — set high water mark, *SunOS Reference Manual*, 1477, 1507
SIOCSIFADDR — set ifnet address, *SunOS Reference Manual*, 1397
SIOCSIFDSTADDR — set p-p address, *SunOS Reference Manual*, 1397
SIOCSIFFLAGS — set ifnet flags, *SunOS Reference Manual*, 1397
SIOCSLOWAT — set low water mark, *SunOS Reference Manual*, 1477, 1507
SIOCSPROMISC — toggle promiscuous mode, *SunOS Reference Manual*, 1398

ioctl's for terminals
TIOCCONS — get console I/O, *SunOS Reference Manual*, 1374
TIOCPKT — set/clear packet mode (pty), *SunOS Reference Manual*, 1450
TIOCREMOTE — remote input editing, *SunOS Reference Manual*, 1450
TIOCSTART — start output (like control-Q), *SunOS Reference Manual*, 1450
TIOCSTOP — stop output (like control-S), *SunOS Reference Manual*, 1450
iostat — report I/O statistics, *SunOS Reference Manual*, 1969

L

Topic	*Where to Look*
\l (horizontal line) function	*Using* nroff *and* troff, 119
\L (vertical line) function	*Using* nroff *and* troff, 120, 119
l3tol() — convert from 3-byte integer to long integer	*SunOS Reference Manual*, 1037
l64a() — convert base-64 ASCII to long integer	*SunOS Reference Manual*, 902
label	
glossary definition	*System and Network Administration*, 60
label() — plot label	*SunOS Reference Manual*, 1091
label field	*Assembly Language Reference*, 15 *thru* 16
labels	*Assembly Language Reference*, 6 *thru* 7; *SunView User's Guide*, 62
local	*Assembly Language Reference*, 6
numeric	*Assembly Language Reference*, 6
scope	*Assembly Language Reference*, 6
Type2 keyboard	*SunView User's Guide*, 65
Type3 keyboard	*SunView User's Guide*, 64
Type4 keyboard	*SunView User's Guide*, 63
LAN	*SunOS User's Guide: Getting Started*, 97; *System and Network Administration*, 52
glossary definition	*System and Network Administration*, 60
remote system dumps on	*System and Network Administration*, 99
restoring files on	*System and Network Administration*, 107
LANCE 10 Mb/s Ethernet interface — le	*SunOS Reference Manual*, 1413 *thru* 1414
languages	
cb — format filter for C sources	*SunOS Reference Manual*, 53
cc — C compiler	*SunOS Reference Manual*, 54
tcflow — code flow graph	*SunOS Reference Manual*, 61
cpp — C preprocessor	*SunOS Reference Manual*, 91
cxref — cross reference C program	*SunOS Reference Manual*, 128
indent — format C source	*SunOS Reference Manual*, 238
lex — generate lexical analyzer	*SunOS Reference Manual*, 266
lint — C program verifier	*SunOS Reference Manual*, 269
mkstr — create C error messages	*SunOS Reference Manual*, 344
tcov — code coverage tool	*SunOS Reference Manual*, 569
xstr — extract strings from C code	*SunOS Reference Manual*, 672
language standards	
ansic — C Language standard	*SunOS Reference Manual*, 1794
language tools	
lint — check C programs	*Programming Utilities and Libraries*, 169 *thru* 180
yacc compiler-compiler	*Programming Utilities and Libraries*, 227 *thru* 263
large arrays in dbx	*Debugging Tools*, 30, 46
large boxes	*Using* nroff *and* troff, 121
large files	*Debugging Tools*, 32
large programs	*Debugging Tools*, 30
last — list last logins	*SunOS Reference Manual*, 256
lastcomm — display last commands	*SunOS Reference Manual*, 257
last locations in program	*SunOS Reference Manual*, 965
lastlog — login records	*SunOS Reference Manual*, 1705
lastlogin — accounting shell procedure	*SunOS Reference Manual*, 1841
layers of RPC	*Network Programming*, 65
layout of items within a panel	*SunView Programmer's Guide*, 147
layout of subwindows within a frame	*SunView Programmer's Guide*, 44
LC_ALL	

`setlocale()` category — *SunOS Reference Manual*, 1155
LC_COLLATE
`setlocale()` category — *SunOS Reference Manual*, 1155
LC_CTYPE
`setlocale()` category — *SunOS Reference Manual*, 1155
LC_MESSAGES
`setlocale()` category — *SunOS Reference Manual*, 1155
LC_MONETARY
`setlocale()` category — *SunOS Reference Manual*, 1155
LC_NUMERIC
`setlocale()` category — *SunOS Reference Manual*, 1155
LC_TIME
`setlocale()` category — *SunOS Reference Manual*, 1155
LCK — lock file — *System and Network Administration*, 678
`.lcomm` directive — *Assembly Language Reference*, 25
`lcong48()` — generate uniformly distributed random numbers — *SunOS Reference Manual*, 961
`.lc` (set leader character) request — *Using* `nroff` *and* `troff`, 61
`ld` — *Programming Utilities and Libraries*, 2
`-l` — *Programming Utilities and Libraries*, 3
vs. `ld.so`, link editors — *Programming Utilities and Libraries*, 2
`ld.so` — dynamic link editor — *System and Network Administration*, 26
`ld.so.cache corrupted` — *Programming Utilities and Libraries*, 16
`ld.so: lib`*name*`.so.`*major* `not found` — *Programming Utilities and Libraries*, 16
`ld.so` dynamic link editor — *Programming Utilities and Libraries*, 10, 11
`LD_LIBRARY_PATH` — *Programming Utilities and Libraries*, 3, 5
`ld_need` — *Programming Utilities and Libraries*, 11
`ldaclose()` function — *SunOS Reference Manual*, 1039
`ldahread()` — read archive header of COFF file — *SunOS Reference Manual*, 1038
`ldaopen()` function — *SunOS Reference Manual*, 1047
`ldclose()` function — *SunOS Reference Manual*, 1039
`ld` — link editor — *SunOS Reference Manual*, 258
`ldconfig` — *Programming Utilities and Libraries*, 15; *System and Network Administration*, 26
`ldconfig` — configure link-editor — *SunOS Reference Manual*, 1976
`ldd` — list dynamic dependencies — *SunOS Reference Manual*, 264
`ldfcn()` function — *SunOS Reference Manual*, 1040
`ldfhread()` — read file header of COFF file — *SunOS Reference Manual*, 1042
`ldgetname()` — retrieve symbol name for COFF file symbol table entry — *SunOS Reference Manual*, 1043
`ldlinit()` function — *SunOS Reference Manual*, 1044
`ldlitem()` function — *SunOS Reference Manual*, 1044
`ldlread()` function — *SunOS Reference Manual*, 1044
`ldlseek()` function — *SunOS Reference Manual*, 1045
`ldnlseek()` function — *SunOS Reference Manual*, 1045
`ldnrseek()` function — *SunOS Reference Manual*, 1049
`ldnshread()` function — *SunOS Reference Manual*, 1050
`ldnsseek()` function — *SunOS Reference Manual*, 1051
`ldohseek()` — seek to optional file header of COFF file — *SunOS Reference Manual*, 1046
`ldopen()` function — *SunOS Reference Manual*, 1047
`ldrseek()` function — *SunOS Reference Manual*, 1049
`ldshread()` function — *SunOS Reference Manual*, 1050
`ldsseek()` function — *SunOS Reference Manual*, 1051
`ldtbindex()` — compute index of symbol table entry of COFF file — *SunOS Reference Manual*, 1052
`ldtbread()` — read an indexed symbol table entry of a COFF file — *SunOS Reference Manual*, 1053
`ldtbseek()` — seek to the symbol table of a COFF file — *SunOS Reference Manual*, 1054

sun microsystems

ldterm, terminal STREAMS module — *SunOS Reference Manual*, 1411
leaders and leader characters — *Using* nroff *and* troff, 59, 60
leaf procedure — *Sun-4 Assembly Language Reference*, 17
learning about terminal capabilities, terminfo — *Programming Utilities and Libraries*, 322
leave — remind you of leaving time — *SunOS Reference Manual*, 265
leaveok() — *Programming Utilities and Libraries*, 279
leaving SunView — *SunView User's Guide*, 51, 58, 117
le — LANCE 10 Mb/s Ethernet interface — *SunOS Reference Manual*, 1413 *thru* 1414
left
  associativity in yacc — *Programming Utilities and Libraries*, 240
  context-sensitivity in lex — *Programming Utilities and Libraries*, 221 *thru* 223
left-handed function keys — *SunView User's Guide*, 62
left-handed user — *SunView User's Guide*, 4
Left_Handed default — *SunView User's Guide*, 162
left margin — *Using* nroff *and* troff, 29
LEFT mouse button — *SunView User's Guide*, 4
len built-in m4 macro — *Programming Utilities and Libraries*, 200
length of string
  strlen() — *C Programmer's Guide*, 59
length of title — *Using* nroff *and* troff, 69
lessons — *SunView User's Guide*, 1 *thru* 51
level number, in SID — *Programming Utilities and Libraries*, 95
lex language tags file — ctags — *SunOS Reference Manual*, 117
  actions — *Programming Utilities and Libraries*, 210 *thru* 214
  character set — *Programming Utilities and Libraries*, 223 *thru* 224
  examples — *Programming Utilities and Libraries*, 218 *thru* 221
  left context-sensitivity — *Programming Utilities and Libraries*, 221 *thru* 223

  source definitions — *Programming Utilities and Libraries*, 216 *thru* 217
  source format — *Programming Utilities and Libraries*, 206
  source format summary — *Programming Utilities and Libraries*, 224 *thru* 225
  usage — *Programming Utilities and Libraries*, 217
  with yacc — *Programming Utilities and Libraries*, 218
lex — generate lexical analyzer — *SunOS Reference Manual*, 266
lexical analysis, C shell — *SunOS Reference Manual*, 99
lexical analysis for yacc — *Programming Utilities and Libraries*, 234
lexical elements — *Assembly Language Reference*, 5 *thru* 9
lex regular expressions
  arbitrary character — *Programming Utilities and Libraries*, 208
  character classes — *Programming Utilities and Libraries*, 208
  context sensitivity — *Programming Utilities and Libraries*, 209
  operators — *Programming Utilities and Libraries*, 207
  optional expressions — *Programming Utilities and Libraries*, 209
  repeated expressions — *Programming Utilities and Libraries*, 209
  repetitions and definition — *Programming Utilities and Libraries*, 210
lfind() — linear search routine — *SunOS Reference Manual*, 1062
.lg (set ligature mode) request — *Using* nroff *and* troff, 53
/lib directory — *System and Network Administration*, 21
libc.a — *Network Programming*, 103
libraries — *System and Network Administration*, 13
  shared — *System and Network Administration*, 190
  supplying to ld — *Programming Utilities and Libraries*, 3
libraries, building with make — *Programming Utilities and Libraries*, 141
libraries used in SunView — *SunView Programmer's Guide*, 21
library
  find ordering for object — lorder — *SunOS Reference Manual*, 287
  make random — ranlib — *SunOS Reference Manual*, 427
  overview of System V curses — *Programming Utilities and Libraries*, 290
  support, improved in make — *Programming Utilities and Libraries*, 346
library file format — ar — *SunOS Reference Manual*, 1532

library functions
- introduction to C — *SunOS Reference Manual*, 887
- introduction to mathematical — *SunOS Reference Manual*, 1301
- introduction to RPC — *SunOS Reference Manual*, 1329
- introduction to standard I/O — *SunOS Reference Manual*, 1171
- System V `curses` — *Programming Utilities and Libraries*, 293, 295 *thru* 317
- `terminfo` — *Programming Utilities and Libraries*, 317

library management
- `ar` — library maintenance — *SunOS Reference Manual*, 25

library primitives for XDR — *Network Programming*, 109
library routines — *Network Programming*, 290; *System Services Overview*, 66
- glossary definition — *System and Network Administration*, 60

`librpcsvc.a` — *Network Programming*, 66
`life` — SunView game of life — *SunOS Reference Manual*, 1762
ligatures — *Using* `nroff` *and* `troff`, 53
Lightweight Processes — *Programming Utilities and Libraries*, 17
- agents — *Programming Utilities and Libraries*, 29
- asynchronous interrupts — *Programming Utilities and Libraries*, 29
- asynchrony — *Programming Utilities and Libraries*, 17
- big example — *Programming Utilities and Libraries*, 47
- condition variables, monitors — *Programming Utilities and Libraries*, 40
- coroutines — *Programming Utilities and Libraries*, 21
- critical sections — *Programming Utilities and Libraries*, 39
- custom schedulers — *Programming Utilities and Libraries*, 22
- definition — *Programming Utilities and Libraries*, 17
- example — *Programming Utilities and Libraries*, 19
- examples of agents — *Programming Utilities and Libraries*, 36
- exception handling example — *Programming Utilities and Libraries*, 46
- exceptions — *Programming Utilities and Libraries*, 44
- exit handlers — *Programming Utilities and Libraries*, 45
- functionality — *Programming Utilities and Libraries*, 17
- intelligent servers — *Programming Utilities and Libraries*, 28
- introduction — *Programming Utilities and Libraries*, 17
- library — *Programming Utilities and Libraries*, 17
- message paradigm — *Programming Utilities and Libraries*, 30
- message queues — *Programming Utilities and Libraries*, 26
- messages — *Programming Utilities and Libraries*, 25, 26
- messages vs. monitors — *Programming Utilities and Libraries*, 25
- monitor-based programs — *Programming Utilities and Libraries*, 40
- monitors — *Programming Utilities and Libraries*, 25
- monitors, enforcing discipline — *Programming Utilities and Libraries*, 41
- monitors, nested — *Programming Utilities and Libraries*, 42
- monitors and conditions — *Programming Utilities and Libraries*, 39
- monitors vs. interrupt masking — *Programming Utilities and Libraries*, 40
- pods — *Programming Utilities and Libraries*, 18
- primitives — *Programming Utilities and Libraries*, 17
- reentrant monitors — *Programming Utilities and Libraries*, 42
- rendezvous semantics — *Programming Utilities and Libraries*, 26
- scheduling — *Programming Utilities and Libraries*, 18
- special context switching — *Programming Utilities and Libraries*, 23
- stack issues — *Programming Utilities and Libraries*, 20
- synchronous traps — *Programming Utilities and Libraries*, 45
- system calls — *Programming Utilities and Libraries*, 30
- threads of control — *Programming Utilities and Libraries*, 18

lightweight processes library — *SunOS Reference Manual*, 1273
limerick — *SunView User's Guide*, 15
limitations of `icon_load_mpr()` — *SunView System Programmer's Guide*, 148
limitations of `icon_load_mpr()` — *SunView 1.80 Update*, 39
limitations of this manual — *Writing Device Drivers*, 3
`limit` command — *SunOS Reference Manual*, 108
limiting virtual address space — `set4` command — *SunOS Reference Manual*, 2104
limits

sun microsystems

disk space — `quota` — *SunOS Reference Manual*, 426
get for user — `ulimit()` — *SunOS Reference Manual*, 1242
set for user — `ulimit()` — *SunOS Reference Manual*, 1242
limits to assigning keys — *SunView 1.80 Update*, 37
`line` — read one line — *SunOS Reference Manual*, 268
getting line number — *SunView User's Guide*, 134
selecting by number — *SunView User's Guide*, 134
`line()` — plot line — *SunOS Reference Manual*, 1091
line, erasing — *SunView User's Guide*, 88
line-length — *Using* `nroff` *and* `troff`, 29
line adjustment indicators
both — *Using* `nroff` *and* `troff`, 17
center — *Using* `nroff` *and* `troff`, 17
indentation — *Using* `nroff` *and* `troff`, 31
left — *Using* `nroff` *and* `troff`, 17
normal — *Using* `nroff` *and* `troff`, 17
right — *Using* `nroff` *and* `troff`, 17
linear search and update routine — `lsearch()` — *SunOS Reference Manual*, 1062
linear search routine — `lfind()` — *SunOS Reference Manual*, 1062
line break, deleting — *SunView User's Guide*, 88
line disciplines, STREAMS — *STREAMS Programming*, 144
line drawing
functions — *Using* `nroff` *and* `troff`, 119, 120
horizontal — *Using* `nroff` *and* `troff`, 119
vertical — *Using* `nroff` *and* `troff`, 119, 120
line editors
`ed` — *Editing Text Files*, 83 *thru* 128
`ex` — *Editing Text Files*, 57 *thru* 79
Line Feed key — *SunOS User's Guide: Basic Troubleshooting*, 6; *SunView User's Guide*, 88
line kill terminal function — *SunOS User's Guide: Customizing Your Environment*, 3
`linemod()` — set line style — *SunOS Reference Manual*, 1091
line numbering
start — *Using* `nroff` *and* `troff`, 125
suspend — *Using* `nroff` *and* `troff`, 126
line numbering — `nl` — *SunOS Reference Manual*, 359
line printer control — `lpc` — *SunOS Reference Manual*, 1980 *thru* 1981
line printer daemon — `lpd` — *SunOS Reference Manual*, 1982
line printer system — *System and Network Administration*, 345
lines — *Assembly Language Reference*, 15
count — `wc` — *SunOS Reference Manual*, 658
find, in sorted file — `look` — *SunOS Reference Manual*, 285
line spacing request — *Using* `nroff` *and* `troff`, 43
line to Ethernet address — `ether_line()` — *SunOS Reference Manual*, 966
`link` — *Programming Utilities and Libraries*, 15; *SunOS Reference Manual*, 1977
make symbolic — *SunOS Reference Manual*, 864
read value of symbolic — *SunOS Reference Manual*, 815
`link()` — *SunOS Reference Manual*, 767; *System Services Overview*, 39
linkage tables — *Programming Utilities and Libraries*, 9
link count — *System and Network Administration*, 148
link editing, overview for shared libraries — *Programming Utilities and Libraries*, 2
link editor — `ld` — *SunOS Reference Manual*, 258, 1603
`-Bstatic` and `-Bdynamic` options — *Programming Utilities and Libraries*, 4
`-dc` and `-dp` options — *Programming Utilities and Libraries*, 5
debuggers — *Programming Utilities and Libraries*, 6
dynamic — *Programming Utilities and Libraries*, 11
dynamic binding — *Programming Utilities and Libraries*, 4
`-n` and `-N` options — *Programming Utilities and Libraries*, 4
static — *Programming Utilities and Libraries*, 10
static binding — *Programming Utilities and Libraries*, 4
link editor output — `a.out` — *SunOS Reference Manual*, 1524

link editors, ld and ld.so — *Programming Utilities and Libraries*, 2
linking objects and static libraries — *Programming Utilities and Libraries*, 2
linking with system-supplied libraries in make — *Programming Utilities and Libraries*, 144
links — *SunOS User's Guide: Getting Started*, 27, 43; *System Services Overview*, 39
  hard — *System Services Overview*, 39
  symbolic — *System Services Overview*, 39
lint
  and make — *Programming Utilities and Libraries*, 144

lock process, text, or data segment in memory — plock() — *SunOS Reference Manual*, 1090

locks, advisory — *Network Programming*, 29

Lock Screen — *SunView User's Guide*, 24, 28, 58; *System and Network Administration*, 151, 155, 833

Lock Screen, in SunView menu — *SunView User's Guide*, 117
`lockscreen` — save window context — *SunOS Reference Manual*, 279
  security — *SunOS User's Guide: Doing More*, 2
`lockscreen` command, used in SunView — *SunView User's Guide*, 24, 168
`lo` — software loopback network interface — *SunOS Reference Manual*, 1415
`lofs` — *System and Network Administration*, 34
`log()` — natural logarithm — *SunOS Reference Manual*, 1306
`log10` — logarithm, base 10 — *SunOS Reference Manual*, 1306
`log1p()` — natural logarithm — *SunOS Reference Manual*, 1306
`log2` — logarithm, base 2 — *SunOS Reference Manual*, 1306
logarithm, base 10 — `log10` — *SunOS Reference Manual*, 1306
logarithm, base 2 — `log2` — *SunOS Reference Manual*, 1306
logarithm, natural — `log()` — *SunOS Reference Manual*, 1306
`logb()` function — *SunOS Reference Manual*, 1317
`log` command — *STREAMS Programming*, 32
log files
  removing — *Sundiag User's Guide*, 11, 35
  viewing — *Sundiag User's Guide*, 10, 32
log files and system log daemon — `syslogd` — *SunOS Reference Manual*, 2124
log gamma function — `gamma()` — *SunOS Reference Manual*, 1319
`logger` — make system log entry — *SunOS Reference Manual*, 281
logging in over the network — *SunOS User's Guide: Basic Troubleshooting*, 9
login — *SunOS User's Guide: Getting Started*, 5 *thru* 7; *SunView User's Guide*, 28; *System and Network Administration*, 153, 154, 157, 165, 428, 434
  adding via UUCP — *System and Network Administration*, 680
  `change_login` — screen blanking and login — *SunOS Reference Manual*, 1873
  change password — `passwd` — *SunOS Reference Manual*, 398
  display effective user name — `whoami` — *SunOS Reference Manual*, 665
  display login name — `logname` — *SunOS Reference Manual*, 284
  display user and group IDs — `id` — *SunOS Reference Manual*, 237
  incorrect — *SunOS User's Guide: Getting Started*, 6
  info on users — `finger` — *SunOS Reference Manual*, 196
  information — *SunOS User's Guide: Getting Started*, 6
  list last — `last` — *SunOS Reference Manual*, 256
  make script of session — `script` — *SunOS Reference Manual*, 487
  problems — *SunOS User's Guide: Basic Troubleshooting*, 7 *thru* 9
  prompt — *SunOS User's Guide: Getting Started*, 5
  `rusers` — who is on local network — *SunOS Reference Manual*, 451
  `rwho` — who is on local network — *SunOS Reference Manual*, 453
  save window context — `lockscreen` — *SunOS Reference Manual*, 279
  system message — *SunOS User's Guide: Getting Started*, 116
  `Systems` file field — *System and Network Administration*, 666
  to local machine — `login` — *SunOS Reference Manual*, 282
  to remote machine — `rlogin` — *SunOS Reference Manual*, 439
  what are users doing — `w` — *SunOS Reference Manual*, 654
  `who` — who is logged in — *SunOS Reference Manual*, 664
login, remote — *SunView User's Guide*, 117
login access to other machines — *SunOS User's Guide: Customizing Your Environment*, 37
login accounting, display login record — `ac` — *SunOS Reference Manual*, 1834
`login` command — *SunOS Reference Manual*, 108, 505; *System Services Overview*, 75
login environment
  display variables — `printenv` — *SunOS Reference Manual*, 417
  `tset` — set terminal characteristics — *SunOS Reference Manual*, 611
  `tty` — get terminal name — *SunOS Reference Manual*, 616
login environment — `environ` — *SunOS Reference Manual*, 1564
`.login` file — *SunOS User's Guide: Customizing Your Environment*, 21; *SunOS User's Guide: Getting Started*, 114, 115; *SunOS Reference Manual*, 98
login name, get — `getlogin()` — *SunOS Reference Manual*, 997
login password
  change password — `passwd` — *SunOS Reference Manual*, 398

sun microsystems

change in NIS — `yppasswd` — *SunOS Reference Manual*, 678

login records
- `lastlog` file — *SunOS Reference Manual*, 1705
- `utmp` file — *SunOS Reference Manual*, 1705
- `wtmp` file — *SunOS Reference Manual*, 1705

`logintool` — graphic login interface — *SunOS Reference Manual*, 1979
`logname` — display login name — *SunOS Reference Manual*, 284
logout
- Ctrl-D — *SunOS User's Guide: Getting Started*, 8
- problems — *SunOS User's Guide: Getting Started*, 8

`logout` command — *SunOS Reference Manual*, 108
`.logout` file — *SunOS User's Guide: Customizing Your Environment*, 27; *SunOS Reference Manual*, 98

logout problems — *SunOS User's Guide: Basic Troubleshooting*, 7 *thru* 9
`long` — *Network Programming*, 92
`.long` directive — *Assembly Language Reference*, 23
long integer
- convert to and from 3-byte integer — *SunOS Reference Manual*, 1037

`longjmp()` — *C Programmer's Guide*, 23; *Programming Utilities and Libraries*, 17, 42, 44
`longjmp()` — non-local goto — *SunOS Reference Manual*, 1153
long lines — *Using* `nroff` *and* `troff`, 8
`longname()` — *Programming Utilities and Libraries*, 279
look
- at current event on transport endpoint — *SunOS Reference Manual*, 1203
- at system images — *SunOS Reference Manual*, 1889

look-up table — *4.1 Pixrect Reference Manual*, 39
`lookbib` — find bibliographic references — *SunOS Reference Manual*, 286
`look` command — *Editing Text Files*, 153; *SunOS Reference Manual*, 285
look for pattern in file — `grep` — *SunOS Reference Manual*, 223
look up word in dictionary — *Editing Text Files*, 153
loop, C shell control flow — *SunOS Reference Manual*, 104
loop-around driver, STREAMS — *STREAMS Programming*, 104
loopback — *System and Network Administration*, 34
loopback connectors
- cable — *Sundiag User's Guide*, 59

loopback file system
- mount — `mount` — *Sundiag User's Guide*, 60

`-L` option — *SunOS Reference Manual*, 1416
`lorder` — find ordering for object library — *SunOS Reference Manual*, 2006
`/lost+found` directory — *Assembly Language Reference*, 2
lost data or files — *SunOS Reference Manual*, 287
low-water mark — *System and Network Administration*, 21
lower layers of RPC — *SunOS User's Guide: Basic Troubleshooting*, 3
low level input-output — *Network Programming*, 325

R

Topic	*Where to Look*
`-r` C shell file inquiry — read accessible	*SunOS Reference Manual*, 104, 308
`r` (indicates readable directory)	*SunOS User's Guide: Getting Started*, 39
`r` (indicates readable file)	*SunOS User's Guide: Getting Started*, 39
`\r` (reverse line) function	*Using* `nroff` *and* `troff`, 119
R13 key	*SunView User's Guide*, 152
R7 key	*SunView User's Guide*, 152
`rain` — display raindrops	*SunOS Reference Manual*, 1773
ramdisk	
driver	*Writing Device Drivers*, 134
installation	*Writing Device Drivers*, 135
source code	*Writing Device Drivers*, 134
test program	*Writing Device Drivers*, 138
`rand()` — generate random numbers	*SunOS Reference Manual*, 1108
`random()` — generate random number	*SunOS Reference Manual*, 1109
random access	
`lseek()`	*C Programmer's Guide*, 67
`seek()`	*C Programmer's Guide*, 67
`random` game	*SunOS Reference Manual*, 1774
random number generator	
`drand48()`	*SunOS Reference Manual*, 961
`erand48()`	*SunOS Reference Manual*, 961
`initstate()`	*SunOS Reference Manual*, 1109
`jrand48()`	*SunOS Reference Manual*, 961
`lcong48()`	*SunOS Reference Manual*, 961
`lrand48()`	*SunOS Reference Manual*, 961
`mrand48()`	*SunOS Reference Manual*, 961
`nrand48()`	*SunOS Reference Manual*, 961
`rand()`	*SunOS Reference Manual*, 1108
`random()`	*SunOS Reference Manual*, 1109
`seed48()`	*SunOS Reference Manual*, 961
`setstate()`	*SunOS Reference Manual*, 1109
`srand()`	*SunOS Reference Manual*, 1108
`srand48()`	*SunOS Reference Manual*, 961
`srandom()`	*SunOS Reference Manual*, 1109
ranges, pattern matching	*SunOS User's Guide: Getting Started*, 73
`ranlib`	*Programming Utilities and Libraries*, 13
`ranlib` — make random library	*SunOS Reference Manual*, 427
RARP	*System and Network Administration*, 62, 363
`/usr/etc/rarpd`	*System Services Overview*, 60
`rarpd` — Reverse Address Resolution Protocol daemon	*SunOS Reference Manual*, 2053
`rasfilter8to1` — convert 8-bit rasterfile to 1-bit rasterfile	*SunOS Reference Manual*, 428
`raster file`	*4.1 Pixrect Reference Manual*, 73; *SunOS Reference Manual*, 1630
data structure	*4.1 Pixrect Reference Manual*, 73
initialize header	*4.1 Pixrect Reference Manual*, 75, 114
read	*4.1 Pixrect Reference Manual*, 72, 76, 114
read colormap	*4.1 Pixrect Reference Manual*, 76, 114
read header	*4.1 Pixrect Reference Manual*, 76, 114
read image	*4.1 Pixrect Reference Manual*, 76, 114
write	*4.1 Pixrect Reference Manual*, 70, 114

write header — *4.1 Pixrect Reference Manual*, 75, 114
write image — *4.1 Pixrect Reference Manual*, 75, 114
RasterOp — *4.1 Pixrect Reference Manual*, 5, 28, 118
`rastrepl` — magnify raster image — *SunOS Reference Manual*, 429
`raw()` — *Programming Utilities and Libraries*, 277
`raw2audio` — convert raw audio data to audio file format — *SunOS Reference Manual*, 1775
"raw" mode — *SunView System Programmer's Guide*, 197
raw sockets — *Network Programming*, 281, 341
`/etc/rc` script — *System and Network Administration*, 21, 76
`rc.local` script — *System and Network Administration*, 75, 398
modifying — *System and Network Administration*, 628
`rc` — startup commands — *SunOS Reference Manual*, 2054
`rcmd()` — execute command remotely — *SunOS Reference Manual*, 1111
`rcp` — *Network Programming*, 17, 95
`rcp` command — *SunOS User's Guide: Getting Started*, 32; *SunOS Reference Manual*, 430
`-r` — *SunOS User's Guide: Getting Started*, 33
from your machine — *SunOS User's Guide: Getting Started*, 32
to your machine — *SunOS User's Guide: Getting Started*, 32
`rc` suffix, explained — *SunOS User's Guide: Customizing Your Environment*, 7
`rcv` — *Network Programming*, 95
`rdate` — set system date from a remote host — *System and Network Administration*, 425
`rdate` — remote date — *SunOS Reference Manual*, 2056
`rdist` — remote file distribution — *SunOS Reference Manual*, 432
`.rd` (read standard input) request — *Using* `nroff` *and* `troff`, 76
`rdump` — incremental file system dump — *System and Network Administration*, 99
`re_comp()` — compile regular expression — *SunOS Reference Manual*, 1114
`re_exec()` — execute regular expression — *SunOS Reference Manual*, 1114
`read()` — *C Programmer's Guide*, 64
archive files — *SunOS Reference Manual*, 401, 628
archive header of COFF file — *SunOS Reference Manual*, 1038
initiate asynchronous read — *SunOS Reference Manual*, 906
`read()` — *SunOS Reference Manual*, 812; *System Services Overview*, 32, 63
`read()` routine — *Writing Device Drivers*, 50, 105
`Read-only file system` — *SunOS User's Guide: Basic Troubleshooting*, 15
read-only number registers
`.$` — number of arguments — *Using* `nroff` *and* `troff`, 89
`.a` — post-line extra space — *Using* `nroff` *and* `troff`, 44
`.d` — vertical place in current diversion — *Using* `nroff` *and* `troff`, 94
`.f` — current font — *Using* `nroff` *and* `troff`, 52
`.h` — text high-water mark — *Using* `nroff` *and* `troff`, 14, 94
`.i` — current indent — *Using* `nroff` *and* `troff`, 32, 34
`.j` — current adjustment indicator — *Using* `nroff` *and* `troff`, 17
`.l` — line-length — *Using* `nroff` *and* `troff`, 30
`.n` — text length — *Using* `nroff` *and* `troff`, 14
`.o` — page-offset — *Using* `nroff` *and* `troff`, 29
`.p` — page-length — *Using* `nroff` *and* `troff`, 35
`.s` — point-size — *Using* `nroff` *and* `troff`, 41
`.t` — distance to next trap — *Using* `nroff` *and* `troff`, 93, 95
`.u` — fill mode indicator — *Using* `nroff` *and* `troff`, 19
`.v` — vertical spacing — *Using* `nroff` *and* `troff`, 43
`.z` — name of current diversion — *Using* `nroff` *and* `troff`, 94
read-only parameters in the Bourne shell — *SunOS User's Guide: Doing More*, 67
read/write pointer, move — `lseek()` — *SunOS Reference Manual*, 770
read colormap from raster file — *4.1 Pixrect Reference Manual*, 76, 114
`read` command — *SunOS Reference Manual*, 505
`readdir()` — read directory stream — *SunOS Reference Manual*, 957
read directory stream — `readdir()` — *SunOS Reference Manual*, 957
read formatted
`fscanf()` — convert from stream — *SunOS Reference Manual*, 1144

sun microsystems

`scanf()` — convert from stdin	*SunOS Reference Manual*, 1144
`sscanf()` — convert from string	*SunOS Reference Manual*, 1144
read from stream — `fread()`	*SunOS Reference Manual*, 981
read header from raster file	*4.1 Pixrect Reference Manual*, 76, 114
read image from raster file	*4.1 Pixrect Reference Manual*, 76, 114
reading events	*SunView Programmer's Guide*, 87
reading from standard input	*Using* `nroff` *and* `troff`, 76
`readlink()`	*SunOS Reference Manual*, 815; *System Services Overview*, 39
read mail — `mail`	*SunOS Reference Manual*, 306 *thru* 317
`[Read only]`	*SunOS User's Guide: Basic Troubleshooting*, 29
`readonly` command	*SunOS Reference Manual*, 506
read password — `getpass()`	*SunOS Reference Manual*, 1004
read raster file	*4.1 Pixrect Reference Manual*, 72, 114
read scattered — `readv()`	*SunOS Reference Manual*, 812
read standard raster file	*4.1 Pixrect Reference Manual*, 76, 114
`readv()`	*System Services Overview*, 33
`readv(2)`	*SunView System Programmer's Guide*, 71
real group ID	
set — `setregid()`	*SunOS Reference Manual*, 833
real group ID, set — `setrgid()`	*SunOS Reference Manual*, 1158
`realloc()`	*C Programmer's Guide*, 74; *SunOS Reference Manual*, 1067
reallocate memory — `realloc()`	*SunOS Reference Manual*, 1067
`realpath()` — return absolute pathname	*SunOS Reference Manual*, 1113
real user ID	
get — `getuid()`	*SunOS Reference Manual*, 762
set — `setreuid()`	*SunOS Reference Manual*, 834
real user ID, set — `setruid()`	*SunOS Reference Manual*, 1158
rearranging text	*SunView User's Guide*, 105
`reboot()` — halt processor	*SunOS Reference Manual*, 816; *System Services Overview*, 31
`reboot` — system startup procedures	*SunOS Reference Manual*, 2057; *System and Network Administration, see* booting
reboot system — `fastboot`	*SunOS Reference Manual*, 1922
rebuild NIS database — `ypmake`	*SunOS Reference Manual*, 2158
receive	
data unit from transport user	*SunOS Reference Manual*, 1213
transport unit data error indication	*SunOS Reference Manual*, 1214
receive message, `msgrcv()`	*Programming Utilities and Libraries*, 63
receive message from socket	*SunOS Reference Manual*, 817
receive secret mail — `enroll`	*SunOS Reference Manual*, 671
receiving a STREAMS datagram	*STREAMS Programming*, 68
receiving from sockets	*System Services Overview*, 50
receiving messages, STREAMS	*STREAMS Programming*, 16
reconfigure fb `ioctl` — `GP1IO_REDIRECT_DEVFB`	*SunOS Reference Manual*, 1392
reconfiguring the kernel	*System and Network Administration*, 219 *thru* 248
`record` — record an audio file	*SunOS Reference Manual*, 1776
debug	*Debugging Tools*, 44
record debug	*Debugging Tools*, 42
`record` mail variable	*SunOS Reference Manual*, 316
recovered wrong version with `vi -r`	*SunOS User's Guide: Basic Troubleshooting*, 26
recovering editor files after system shutdown	*SunOS User's Guide: Basic Troubleshooting*, 5

RPC Programming Guide — *Network Programming*, 65
`rpc` — rpc name data base — *SunOS Reference Manual*, 1640
RPC protocol specifications — *SunOS Reference Manual*, 1329
rpc routines
- `auth_destroy()` — client side authentication — *SunOS Reference Manual*, 1124
- `authdes_getucred()` — secure RPC — *SunOS Reference Manual*, 1148
- `authdes_seccreate()` — secure RPC — *SunOS Reference Manual*, 1148
- `authnone_create()` — client side authentication — *SunOS Reference Manual*, 1124
- `authunix_create()` — client side authentication — *SunOS Reference Manual*, 1124
- `authunix_create_default()` — client side authentication — *SunOS Reference Manual*, 1124
- `callrpc()` — client side calls — *SunOS Reference Manual*, 1125
- `clnt_broadcast()` — client side calls — *SunOS Reference Manual*, 1125
- `clnt_call()` — client side calls — *SunOS Reference Manual*, 1125
- `clnt_control()` — creation of CLIENT handles — *SunOS Reference Manual*, 1128
- `clnt_create()` — creation of CLIENT handles — *SunOS Reference Manual*, 1128
- `clnt_create_vers()` — creation of CLIENT handles — *SunOS Reference Manual*, 1128
- `clnt_destroy()` — creation of CLIENT handles — *SunOS Reference Manual*, 1128
- `clnt_freeres()` — client side calls — *SunOS Reference Manual*, 1125
- `clnt_geterr()` — client side calls — *SunOS Reference Manual*, 1125
- `clnt_pcreateerror()` — creation of CLIENT handles — *SunOS Reference Manual*, 1128
- `clnt_perrno()` — client side calls — *SunOS Reference Manual*, 1125
- `clnt_perror()` — client side calls — *SunOS Reference Manual*, 1125
- `clnt_spcreateerror()` — creation of CLIENT handles — *SunOS Reference Manual*, 1128
- `clnt_sperrno()` — client side calls — *SunOS Reference Manual*, 1125
- `clnt_sperror()` — client side calls — *SunOS Reference Manual*, 1125
- `clntraw_create()` — creation of CLIENT handles — *SunOS Reference Manual*, 1128
- `clnttcp_create()` — creation of CLIENT handles — *SunOS Reference Manual*, 1128
- `clntudp_bufcreate()` — creation of CLIENT handles — *SunOS Reference Manual*, 1128
- `clntudp_create()` — creation of CLIENT handles — *SunOS Reference Manual*, 1128
- `get_myaddress()` — secure RPC — *SunOS Reference Manual*, 1148
- `getnetname()` — secure RPC — *SunOS Reference Manual*, 1148
- `host2netname()` — secure RPC — *SunOS Reference Manual*, 1148
- `key_decryptsession()` — secure RPC — *SunOS Reference Manual*, 1148
- `key_encryptsession()` — secure RPC — *SunOS Reference Manual*, 1148
- `key_gendes()` — secure RPC — *SunOS Reference Manual*, 1148
- `key_setsecret()` — secure RPC — *SunOS Reference Manual*, 1148
- `netname2host()` — secure RPC — *SunOS Reference Manual*, 1148
- `netname2user()` — secure RPC — *SunOS Reference Manual*, 1148
- `pmap_getmaps()` — RPC bind servie — *SunOS Reference Manual*, 1094
- `pmap_getport()` — RPC bind servie — *SunOS Reference Manual*, 1094
- `pmap_rmtcall()` — RPC bind servie — *SunOS Reference Manual*, 1094
- `pmap_set()` — RPC bind servie — *SunOS Reference Manual*, 1094
- `pmap_unset()` — RPC bind servie — *SunOS Reference Manual*, 1094
- `registerrpc()` — register servers — *SunOS Reference Manual*, 1132
- `rpc_createrr()` — creation of CLIENT handles — *SunOS Reference Manual*, 1128
- `svc_destroy()` — create server handles — *SunOS Reference Manual*, 1134
- `svc_fds()` — server side calls — *SunOS Reference Manual*, 1138
- `svc_fdset()` — server side calls — *SunOS Reference Manual*, 1138

sun microsystems

- `svc_freeargs()` — server side calls — *SunOS Reference Manual*, 1138
- `svc_getargs()` — server side calls — *SunOS Reference Manual*, 1138
- `svc_getcaller()` — server side calls — *SunOS Reference Manual*, 1138
- `svc_getreq()` — server side calls — *SunOS Reference Manual*, 1138
- `svc_getreqset()` — server side calls — *SunOS Reference Manual*, 1138
- `svc_register()` — register servers — *SunOS Reference Manual*, 1132
- `svc_run()` — server side calls — *SunOS Reference Manual*, 1138
- `svc_sendreply()` — server side calls — *SunOS Reference Manual*, 1138
- `svc_unregister()` — register servers — *SunOS Reference Manual*, 1132
- `svcerr_auth()` — server side call errors — *SunOS Reference Manual*, 1136
- `svcerr_decode()` — server side call errors — *SunOS Reference Manual*, 1136
- `svcerr_noproc()` — server side call errors — *SunOS Reference Manual*, 1136
- `svcerr_noprog()` — server side call errors — *SunOS Reference Manual*, 1136
- `svcerr_progvers()` — server side call errors — *SunOS Reference Manual*, 1136
- `svcerr_systemerr()` — server side call errors — *SunOS Reference Manual*, 1136
- `svcerr_weakauth()` — server side call errors — *SunOS Reference Manual*, 1136
- `svcfd_create()` — create server handles — *SunOS Reference Manual*, 1134
- `svcraw_create()` — create server handles — *SunOS Reference Manual*, 1134
- `svctcp_create()` — create server handles — *SunOS Reference Manual*, 1134
- `svcudp_bufcreate()` — create server handles — *SunOS Reference Manual*, 1134
- `user2netname()` — secure RPC — *SunOS Reference Manual*, 1148
- `xdr_accepted_reply()` — XDR routines for RPC — *SunOS Reference Manual*, 1140
- `xdr_authunix_parms()` — XDR routines for RPC — *SunOS Reference Manual*, 1140
- `xdr_callhdr()` — XDR routines for RPC — *SunOS Reference Manual*, 1140
- `xdr_callmsg()` — XDR routines for RPC — *SunOS Reference Manual*, 1140
- `xdr_opaque_auth()` — XDR routines for RPC — *SunOS Reference Manual*, 1140
- `xdr_pmap()` — RPC bind servie — *SunOS Reference Manual*, 1094
- `xdr_pmaplist()` — RPC bind servie — *SunOS Reference Manual*, 1094
- `xdr_rejected_reply()` — XDR routines for RPC — *SunOS Reference Manual*, 1140
- `xdr_replymsg()` — XDR routines for RPC — *SunOS Reference Manual*, 1140
- `xprt_register()` — register servers — *SunOS Reference Manual*, 1132
- `xprt_unregister()` — register servers — *SunOS Reference Manual*, 1132

RPC Services — *Network Programming*, 66
`rpow()` — multiple precision exponential — *SunOS Reference Manual*, 1079
`rq_clntcred` — *Network Programming*, 88
`rq_cred` — *Network Programming*, 87, 88
`rq_cred.oa_flavor` — *Network Programming*, 88
`rquota` — *Network Programming*, 67
`rquota()` — implement quotas on remote machines — *SunOS Reference Manual*, 1341
`rquotad` — remote quota server — *SunOS Reference Manual*, 2086
`rrestore` — incremental file system restore — *System and Network Administration*, 107
`rresvport()` — get privileged socket — *SunOS Reference Manual*, 1111
`.rr` (remove number register) request — *Using* `nroff` *and* `troff`, 105
`rsh` — *Network Programming*, 17
`rsh` command — *SunOS User's Guide: Getting Started*, 108; *SunOS Reference Manual*, 447
`rshd` — remote shell server — *SunOS Reference Manual*, 2087
`.rs` (restore space mode) request — *Using* `nroff` *and* `troff`, 45
`rstab` file — *System and Network Administration*, 577
`rstat()` — performance data from remote kernel — *SunOS Reference Manual*, 1342
`rstatd` — kernel statistics server — *SunOS Reference Manual*, 2089, 2093
`rtime()` — get remote time — *SunOS Reference Manual*, 1142
`.rt` (return to position) request — *Using* `nroff` *and* `troff`, 38, 94
rule, in a target entry for `make` — *Programming Utilities and Libraries*, 116
rules
- horizontal — *Using* `nroff` *and* `troff`, 119
- vertical — *Using* `nroff` *and* `troff`, 119, 120

run-length encoding — *4.1 Pixrect Reference Manual*, 69
run-time binding of executable — *Programming Utilities and Libraries*, 2
run-time data structures — *Writing Device Drivers*, 37
`runacct` — accounting shell procedure — *SunOS Reference Manual*, 1841, 2090; *System and Network Administration*, 200 *thru* 203
    billing users — *System and Network Administration*, 205
    generating reports — *System and Network Administration*, 206 *thru* 213
    troubleshooting — *System and Network Administration*, 203 *thru* 205
`run` command button in `dbxtool` — *Debugging Tools*, 11
`run` dbx command — *Debugging Tools*, 22
running
    a `terminfo` program — *Programming Utilities and Libraries*, 318
    tests with `make` — *Programming Utilities and Libraries*, 159
running headers and footers — *Using* `nroff` *and* `troff`, 67, 71
running programs in `dbx` — *Debugging Tools*, 22 *thru* 24
running SunView — *SunView User's Guide*, 1
`rup` command — *SunOS User's Guide: Getting Started*, 106; *SunOS Reference Manual*, 449
`ruptime` — *Network Programming*, 299
`ruptime` — display status of local hosts — *SunOS Reference Manual*, 450
`rusage` — resource usage for a command — *SunOS Reference Manual*, 2092
`ruserok()` — authenticate user — *SunOS Reference Manual*, 1111
`rusers` command — *SunOS User's Guide: Getting Started*, 107; *SunOS Reference Manual*, 451
`RUSERSPROC_BOOL` — *Network Programming*, 74
`RUSERSPROG` — *Network Programming*, 74
`RUSERSVERS` — *Network Programming*, 74
`RUSERSVERS_SHORT` — *Network Programming*, 92
`rwall()` — write to specified remote machines — *SunOS Reference Manual*, 1343
`rwalld` — network rwall server — *SunOS Reference Manual*, 2094
`rwho` — who is logged in on local network — *SunOS Reference Manual*, 453
`rwhod` daemon — *System and Network Administration*, 392
`rwhod` — system status server — *SunOS Reference Manual*, 2095

sun microsystems

setpgid() — set process group ID for job control
setpgrp()
set pixel value
set plane group and mask
set plane mask
setpriority() — set process nice value
setpriority(2)
setprotoent() — get protocol entry
setpwaent() function
setpwent() — get password file entry
fgetpwent() — get password file entry
setquota(2)
setregid() — set real and effective group ID
setreuid()
setrgid() — set real group ID
setrlimit()
setrpcent() — get RPC entry
setruid() — set real user ID
setsecretkey() — store secret key
setservent() — get service entry
setsid— set process to session leader
setsid() — create session and set process group ID
setsockopt()

set space-character size request
setstate() — random number routines
setterm()
settimeofday()
settimeofday()
setting breakpoints in dbx
setting file permissions
setting line-length
setting number registers
setting options for descriptors
setting position of mouse cursor
setting tabs
Setting the contents of a Text Subwindow
    Setting contents
setttyent() — rewind ttytab file
setuid bit
setuid() — set user ID
setuid programs and shared libraries
setup.pc — setup.pc master configuration file for DOS
setup file
    command to list
setup for remote terminals
setuseraudit() set audit class for user ID
set user ID
    for programs
    and SunOS commands
setusershell() — function
SETVAL
setvbuf() — assign buffering
SF9010FPC test
sfconvert() — convert number to ASCII
sgconvert() — convert number to ASCII
sgetl() — access long integer data

`showmount` command — *SunOS User's Guide: Customizing Your Environment*, 45; *SunOS Reference Manual*, 2109
`showto` mail variable — *SunOS Reference Manual*, 316
`shutacct` — accounting shell procedure — *SunOS Reference Manual*, 1841
`shutdown` — close down the system — *System and Network Administration*, 76, 92, 167

shutdown()
shutdown — shut down multiuser operation
shutting down the system
SID, SCCS delta ID
SIG_BIT
SIG_DFL
SIG_IGN
sigaction() — examine and change signal action
sigaddset() — manipulate signal sets
SIGALRM
sigblock(2)
sigblock() — block signals
sigblock(2)
SIGCHLD

SIGCONT
sigdelset() — manipulate signal sets
sigemptyset() — manipulate signal sets
sigfillset() — manipulate signal sets
sigfpe() — signal handling for specific SIGFPE codes
SIGINT
siginterrupt() — interrupt system calls with software signal
SIGIO
sigismember() — manipulate signal sets
SIGKILL
sigmask(2)
sign-on last — last
signal(3)

    examine and change blocked signals
    examine and change signal action
    examine pending signals
    Notifier-compatible version
    schedule — alarm()
    stop until — pause()
signal()

signal(2)
signal(3)
signal.h
signal handling
signal handling, in C shell
signaling_nan() function
signal messages
    psignal()
    sys_siglist()
signals

    and process groups
    kill()
    killpg() — send to process group
    sigblock()
    sigpause()
    sigsetmask()
    sigstack() — signal stack context
    sigvec()
    types

disambiguating rules	*Programming Utilities and Libraries*, 241
left association	*Programming Utilities and Libraries*, 240
lexical analysis	*Programming Utilities and Libraries*, 234
precedence	*Programming Utilities and Libraries*, 244, 245
`yacc`	*Programming Utilities and Libraries*, 249, 252
right association	*Programming Utilities and Libraries*, 240
shift/reduce conflicts	*Programming Utilities and Libraries*, 241
`yacc` associativity	
`%left`	*Programming Utilities and Libraries*, 244
`%nonassoc`	*Programming Utilities and Libraries*, 244
`%right`	*Programming Utilities and Libraries*, 244
`yacc` — parser generator	*SunOS Reference Manual*, 674
Yellow Pages	
replaced with Network Information Service (NIS)	*SunOS 4.1 Release Manual*, see Index
`yes` — be repetitively affirmative	*SunOS Reference Manual*, 675
`yn()` — Bessel function	*SunOS Reference Manual*, 1304
`You must be root to use mount`	*SunOS User's Guide: Basic Troubleshooting*, 21
YP	*System and Network Administration*, *see* NIS
change login password in — `yppasswd`	*SunOS Reference Manual*, 678
make database — `ypinit`	*SunOS Reference Manual*, 2157
make ndbm file — `makedbm`	*SunOS Reference Manual*, 1985
print values from database — `ypcat`	*SunOS Reference Manual*, 676
rebuild database — `ypmake`	*SunOS Reference Manual*, 2158
replaced with Network Information Service (NIS)	*SunOS 4.1 Release Manual*, see Index
`yp_all()` — NIS client interface	*SunOS Reference Manual*, 1267
`yp_bind` — NIS client interface	*SunOS Reference Manual*, 1267
`yp_first()` — NIS client interface	*SunOS Reference Manual*, 1267
`yp_get_default_domain` — NIS client interface	*SunOS Reference Manual*, 1267
`yp_master()` — NIS client interface	*SunOS Reference Manual*, 1267
`yp_match()` — NIS client interface	*SunOS Reference Manual*, 1267
`yp_next()` — NIS client interface	*SunOS Reference Manual*, 1267
`yp_order()` — NIS client interface	*SunOS Reference Manual*, 1267
`yp_unbind()` — NIS client interface	*SunOS Reference Manual*, 1267
`yp_update()` — change NIS information	*SunOS Reference Manual*, 1272
ypaliases	
`ypaliases` — NIS aliases for sendmail	*SunOS Reference Manual*, 1711
`ypbatchupd`— NIS batch update daemon	*SunOS Reference Manual*, 2156
`ypbind`	*SunOS User's Guide: Getting Started*, 101; *Network Programming*, 25; *SunOS Reference Manual*, 2162; *System Services Overview*, 62; *System and Network Administration*, 419, 470, 472
and subnetting	*System and Network Administration*, 473
`ypcat` command	*Network Programming*, 25; *System and Network Administration*, 492

ypcat — print values from NIS database *SunOS Reference Manual*, 676
YP client interface *SunOS Reference Manual*, 1267
yperr_string() — NIS client interface *SunOS Reference Manual*, 1267
ypfiles — NIS database and directory *SunOS Reference Manual*, 1712
yp() function *SunOS Reference Manual*, 1347
ypgroup— NIS group file *SunOS Reference Manual*, 1713
ypinit command *Network Programming*, 25; *System and Network Administration*, 480, 482
ypinit — make NIS database *SunOS Reference Manual*, 2157
ypmake command *Network Programming*, 26
ypmake — rebuild NIS database *SunOS Reference Manual*, 2158
ypmatch — match NIS keys *SunOS Reference Manual*, 677; *System and Network Administration*, 493
yppasswd command *Network Programming*, 26; *SunOS Reference Manual*, 1714; *System and Network Administration*, 428, 432, 486

yppasswd() — update NIS password entry *SunOS Reference Manual*, 1348
yppasswd — change login password in NIS *SunOS Reference Manual*, 678
yppasswdd command *Network Programming*, 26; *System and Network Administration*, 628
yppoll — NIS version inquiry *SunOS Reference Manual*, 2160
ypprintcap— NIS printer capability database *SunOS Reference Manual*, 1715
ypprot_err() — NIS client interface *SunOS Reference Manual*, 1267
yppush command *Network Programming*, 25; *SunOS Reference Manual*, 2161; *System and Network Administration*, 499

ypserv *SunOS User's Guide: Getting Started*, 101; *SunOS Reference Manual*, 2162; *System Services Overview*, 62; *System and Network Administration*, 470, 472

fixing crashes of *System and Network Administration*, 507
ypset — direct ypbind to a server *SunOS Reference Manual*, 2164
ypsync command *SunOS Reference Manual*, 2165
ypupdated daemon *System and Network Administration*, 427, 470, 479
ypupdated daemon *SunOS Reference Manual*, 2166
ypwhich command *Network Programming*, 25; *System and Network Administration*, 473, 493
resolving problems with *System and Network Administration*, 506
ypwhich — who is NIS server *SunOS Reference Manual*, 679
ypxfr command *Network Programming*, 25; *SunOS Reference Manual*, 2167; *System and Network Administration*, 487 *thru* 489

using with crontab *System and Network Administration*, 487
and shell scripts *System and Network Administration*, 488
ypxfrd — NIS server process *SunOS Reference Manual*, 2162
yr (last two digits of year) number register *Using* nroff *and* troff, 99
yppasswdd — NIS password server *SunOS Reference Manual*, 2159

Z

Topic	*Where to Look*
`-z` C shell file inquiry — zero length	*SunOS Reference Manual*, 104
`\z` (zero motion) function	*Using* `nroff` *and* `troff`, 115
`z`*.file*	*Programming Utilities and Libraries*, 107
`zcat` — extract compressed files	*SunOS Reference Manual*, 85
`zdump` command	*SunOS Reference Manual*, 2169
zero-width character	*Using* `nroff` *and* `troff`, 14, 113
zero byte strings `bzero()`	*C Programmer's Guide*, 61
zero byte strings — `bzero()`	*SunOS Reference Manual*, 916
zero motion function	*Using* `nroff` *and* `troff`, 115
`zic` command	*SunOS Reference Manual*, 2170
`z` mail command	*SunOS Reference Manual*, 313
`.z` (name of current diversion) number register	*Using* `nroff` *and* `troff`, 94
zones	*System and Network Administration*, 516, 63
Zoom, in Frame menu	*SunView User's Guide*, 37, 124
`zs` — zilog 8530 SCC serial communications driver	*SunOS Reference Manual*, 1518 *thru* 1519
