

## **California Privacy Law SB-327 Compliance Statement Version 1.2**

**Product(s):** BES-53248

Date: January 1, 2020

BES-53248 switch hardware shipped from the factory on or after January 1, 2020 and installed with the following versions of software/firmware or later will be California Privacy Law SB-327 compliant.

EFOS Version 3.4.4.2

BIOS Version: 3A06

BMC Version: 3.02

### **Using EFOS CLI:**

The User is prompted to change the default password when the switch is first powered up or a factory reset is performed, or when the configuration is cleared to return the switch to the default state. Once the new password is configured, the user is logged out and would need to use the new password to log back in.

### **Console ipmitool CLI command access:**

The user is not allowed to make any changes or read the status of any component unless the user changes the default password.

### **Impact to the Install Base:**

BES-53248 switch shipped prior to January 1, 2020 is not compliant to California Privacy Law SB-327.
