Notes:

1. Field Replacement Units (FRU) that are identified in the CRU column by 1 or 2 are Customer Replaceable Units.

Each FRU is available for all types or model, unless specific types or models are specified.

A CRU (Customer Replaceable Units) is identified 1 or 2 in the CRU ID column. 1 means that the part is a Tier 1 CRU; 2 means that the part is a Tier 2 CRU. An N in the CRU ID column means that the part is not a CRU.

Tier 1 CRU:

- No tools required.
- A coin or a thumb screw is acceptable.
- Minimal technical expertise is required.
- Minimal problem determination is required-less than five minutes.

Tier 2 CRU:

- Up to 4 screws or fasteners have to be removed.
- Some technical experience is required.
- IBM Support Center assistance may be used.
- Problem determination can be done by customer, either on site or with IBM Support Center assistance.
