

Section 1 - LAN Switching

ine.com

Task 1.10

- Configure STP enhancements as per the following requirements:
 - Configure SW1 - SW4 with Spanning-Tree trunk link enhancements so that they immediately select a new Root Port if their Root Port is lost.
 - Configure Spanning-Tree trunk link enhancements so that if there is an indirect link failure, the switch immediately expires its max-age timer and begins Spanning-Tree reconvergence.
