

Section 1 - LAN Switching

ine.com

Task 1.11

- Configure STP enhancements on SW1 - SW4 so that the following requirements are met:
 - Configure SW3 and SW4 so that port Gi1/0 goes into err-disabled state if a BPDU is received on those ports.
 - Configure SW1 - SW4 to allow port-fast enabled ports to go to err-disabled state if a BPDU is received on them.
 - Configure SW3 and SW4 so that port Gi1/0 goes to root-inconsistent state if a superior BPDU is received
