

Section 2 - IGP

ine.com

Task 2.9

- Control Plane authentication needs to be performed. Achieve the following:
 - All AREA 0 OSPF adjacency needs to be authenticated. Use MD5 authentication method with password as cisco.
 - All AREA 3 OSPF adjacency needs to be authenticated. Use MD5 authentication method with password as ine.
 - OSPF adjacency between R20 and R21 needs to be authenticated. Use clear-text method with password as cisco.
 - Configure OSPF authentication between R30 and R31 and use a key ID of 1 with the string OSPFKEY. Use SHA-2 authentication algorithm with a 256 bits digest
