

Section 4 - BGP and L3VPN

ine.com

Task 4.7

- Configure L3VPN connectivity between the edge HQ DATACENTER and NEW YORK using the MPLS Core as the transit and configure to meet the following requirements:
 - Create a VRF named "INE_NY" on R3 and R6 to identify NEW YORK.
 - PE-CE routing protocol is OSPF AREA 0.
 - Establish OSPF AREA 0 adjacency between R8 and R9.
 - Interface Loopback0 of R8 and R9 must be in OSPF AREA 0.
 - Once complete, you must be able to ping from 150.9.9.9 to 100.0.1.254
