

Section 4 - BGP and L3VPN

ine.com

Task 4.8

- Configure L3VPN connectivity between the edge HQ DATACENTER and DENVER using the MPLS Core as the transit and configure to meet the following requirements:
 - Create a VRF named "INE_DENVER" on R3 and R6 to identify DENVER.
 - PE-CE routing protocol is OSPF AREA 0.
 - Once complete, you must be able to ping from 150.31.31.31 to 100.0.1.254.
 - Once complete, you must be able to ping from 150.29.29.29 to 100.0.1.254.
