

Section 4 - BGP and L3VPN

ine.com

Task 4.9

- A new backdoor link has been added between DENVER and NEW YORK. Configure to meet the following requirements:
 - Configure OSPF AREA 5 neighborship between R9 and R20.
 - Ensure all traffic between DENVER and NEW YORK transits the MPLS Core. The backdoor link must only be used as backup.
 - R3 will represent the DENVER side and R6 will represent the NEW YORK side.
 - Ensure routes belonging to ISP do not get advertised to customer.
