

Section 5 - NETWORK AUTOMATION

ine.com

Task 5.4

- Create a python script called as backup.py in the /root/Scripts. This script must accomplish the following:
 - Ask for the Username
 - Ask for the Password
 - Connect to each device in the DENVER site and to R10 and R17 and backup the configurations in the /root/Scripts folder.
 - The backup must be stored in the format of hostname.cfg.

Task 5.4

- The following output must match:

```
Please enter your Username: rohit
Please enter your Password:
*****Connecting to device: R19*****
*****Copying config for: R19*****

*****Connecting to device: R20*****
*****Copying config for: R20*****

*****Connecting to device: R21*****
*****Copying config for: R21*****

*****Connecting to device: R29*****
*****Copying config for: R29*****

*****Connecting to device: R30*****
*****Copying config for: R30*****

*****Connecting to device: R31*****
*****Copying config for: R31*****

Authentication Failure: 192.168.122.10
Timeout to device: 192.168.122.17
```
