

Section 7 - IPv6

ine.com

Task 7.1

- Configure OSPFv3 adjacency between R1 and R27 and between R24 and R27. You may create an additional interface with the IPv6 address as 2001:10:1:27::27/64 on R1 and 2001:10:1:27::1/64 on R27 to establish the OSPFv3 neighborhood between them. Once complete, you must be able to ping from SW1 to 2001:150:24:24::24, 2001:150:27:27::27, 2001:100:7:27::27 and 2001:10:24:27::24.
