

## Section 9 - Advanced SD-WAN

[ine.com](https://ine.com)

# Task 9.1

- vEdge3 and vEdge4 need to be managed by the vManage. Create feature templates to provision this requirement.
- The device template for vEdge3 and vEdge4 must be named "Device-Template-vEdge3" and "Device-Template-vEdge4," respectively.
- Ensure no configuration from tasks 8.1-8.7 is lost in the switchover.
