

## Section 3 - Unity Connection

[ine.com](http://ine.com)

# Task 3.1

- Integrate the HQ UCM cluster and HQ Unity Connection using SIP. Set the Voicemail pilot number to 2220. After the integration is completed you should be able to call into the voicemail pilot number from the user “Tony Stark”.
- Make sure the local PSTN phone can also place a call from line 1 to 14082022220 and the call connects to the CUC system greeting.
- Call should be forwarded to the voicemail if the HQ users are busy on a call.
- If the HQ users do not answer the call, the call should be forwarded after 20 seconds.
- The maximum number of calls on a line should be restricted to “1” call.
- Use only one port on Unity Connection for the HQ PhoneSystem.
