

Section 6 - CMS

ine.com

Task 6.6

- Enable chat feature on the CMS web bridge so users within a cospace can send messages to other users via WebRTC.
- Verify by sending a chat message between Tony Stark and HQ Two. Tony Stark may log in via the browser to WebRTC on Jabber 1 PC and HQ Two must log in via the Cisco Meeting App on Jabber 1 PC. Join the Test Space coSpace from both the users to verify the chat feature works.
