Cancel Offline Enrollment

# 1 Introduction

This document describes how to cancel an ongoing offline node credential enrollment that is in `RUNNING` state.

## 1.1 Prerequisites

This section describes the prerequisites, which must be fulfilled before using the procedure.

### 1.1.1 Conditions

The following conditions must apply:

- The user has the System Security Administrator role.
- Operation `startOfflineCsrEnrollment` has been started successfully (value `true` was returned), refer to *Install or Renew Node Credential by CSR*.
- An Ericsson Command-Line Interface (ECLI) session in Exec mode is in progress.

## 2 Procedure

To cancel an ongoing offline node credential enrollment:

1. Navigate to *CertM* Managed Object (MO), for example:

```
>dn ManagedElement=NODE06ST,SystemFunctions=1,SecM=1  
,CertM=1
```

2. Select the *NodeCredential* MO, for example:

```
(CertM=1) >NodeCredential=2
```

3. Cancel the enrollment:

```
(NodeCredential=2) >cancelEnrollment
```

4. Verify the result:

```
(NodeCredential=2) >show enrollmentProgress
```

```
[...]  
result=FAILURE  
resultInfo="the enrollment started by =>  
startOfflineCsrEnrollment canceled"  
state=CANCELLED  
[...]
```

The enrollment cancellation automatically deletes the certificate file from the managed element.
