1 Overview

1.1 Description

The alarm is issued when the congestion level has changed on a remote SPC.

Major type	193
Minor type	1586562730
MO Class	N/A
Specific Problem	Congestion Status Change
Severity	SEVERITY_WARNING

The possible causes are as follows:

- The remote SPC has a temporary high load peak.

No remedial actions are necessary but if this alarm appears frequently the network capacity need to be increased.

1.2 Prerequisites

1.2.1 Documents

Before starting this procedure, make sure that you have read the following documents:

- "Fault Management User Guide" (24/1553-APR 901 0315/2 Uen)
- "Configuring SS7, System Components" (7/1543-CNA 403 0874/1 Uen)

1.2.2 Tools

Not applicable.

1.2.3 Conditions

Not applicable.

2 Procedure

Perform the following steps:

1. No remedial actions are necessary, this alarm usually cease automatically.
2. If the alarm persists, see if it is possible to offload the node by routing the traffic differently.
