Delete Trust Category

1 Introduction

This document describes how to delete a trust category, which is a group of trusted certificates.

A trusted certificate can belong to multiple trust categories.

1.1 Prerequisites

This section describes the prerequisites, which must be fulfilled before using the procedure.

1.1.1 Conditions

The following conditions must apply:

- The user has the System Security Administrator role.
- All Managed Object (MO) references to the *TrustCategory* MO to be deleted are deleted.
- An Ericsson Command-Line Interface (ECLI) session in Exec mode is in progress.

Delete Trust Category

2 Procedure

To delete a trust category:

1. Navigate to the *CertM* MO, for example:

```
>dn ManagedElement=NODE06ST,SystemFunctions=1,SecM=1,CertM=1
```

2. List the trust categories:

```
(CertM=1) >show
```

The following is an example output:

```
CertM=1
[...]
    TrustCategory=aurora
    TrustCategory=polaris
[...]
```

3. Enter Config mode:

```
(CertM=1) >configure
```

4. Delete the *TrustCategory* MO, for example:

```
(config-CertM=1) >no TrustCategory=polaris
```

The attributes belonging to the targeted trust category are deleted.

5. Commit the change:

```
(config-CertM=1) >commit
```

6. Verify that the *TrustCategory* MO has been deleted:

```
(CertM=1) >show
```

The following is an example output:

```
CertM=1
[...]
    TrustCategory=aurora
[...]
```
