SS7 CAF Connections Exceed High Threshold

1 Overview

1.1 Description

The alarm is issued when the number of connections in use has exceeded the high watermark threshold.

Major type	193
Minor type	1586562353
MO Class	N/A
Specific Problem	Connections Exceed High Threshold
Severity	SEVERITY_WARNING

The threshold is given in the configuration file as a percentage of the maximum number of connection resources made available for the entire SCCP.

1.2 Prerequisites

1.2.1 Documents

Before starting this procedure, make sure that you have read the following documents:

- "Fault Management User Guide" (24/1553-APR 901 0315/2 Uen)
- "Configuring SS7, System Components" (7/1543-CNA 403 0874/1 Uen)

1.2.2 Tools

Not applicable.

1.2.3 Conditions

Not applicable.

SS7 CAF Connections Exceed High Threshold

2 Procedure

Perform the following steps:

1. Check the log file for further details.
2. Check the high watermark threshold value in the SCCP configuration and amend if required.
