# 1 Description

This instruction describes how to update license Information.

The information about available licenses and their use is published in the Management Information Base (MIB) as *CapacityKey* and *FeatureKey* Managed Objects (MOs) after a license key file has been installed. This read-only information is updated every 30 minutes.

However, after a license key file has been installed, it is recommended to ensure that the latest information is reflected in the MIB. It is done by triggering an immediate update of the license information.

## 2 Procedure

### 2.1 Update License Information

#### Prerequisites

- No documents are required.
- No tools are required.
- The following conditions must apply:
  - An Ericsson Command-Line Interface (ECLI) session in Exec mode is in progress.

#### Steps

1. Navigate to the *Lm* MO, for example:

```
>dn ManagedElement=NODE06ST, SystemFunctions=1, Lm=1
```

2. Update license information:

```
(Lm=1) >publishLicenseInventory
```

The system returns `true` if the operation is successful.

3. Verify that the license information has been updated by checking the time stamp:

```
(Lm=1) >show lastInventoryChange
```

The system returns a recent time stamp, for example:

```
lastInventoryChange="2017-09-14T00:00:00"
```
