1 Overview

1.1 Description

The alarm is issued when the number of connections to a certain PC has exceeded the high watermark threshold determined for ISUP module.

| | |
|------------------|---|
| Major type | 193 |
| Minor type | 1586564184 |
| MO Class | N/A |
| Specific Problem | SS7 CAF Number of Circuits Exceed High Water Mark |
| Severity | SEVERITY_ WARNING |
| Additional Text | Circuits Exceed High Water Mark |

The possible causes are as follows:

- Number of busy circuits exceeded a value set in the ISUP configuration file as long as the application had a high load peak.

2 Procedure

If the alarm is persistent contact the next level of maintenance support, see SS7 CAF Troubleshooting Guide for details.
