

READ FIRST BEFORE PROCEEDING

ALL USA REPEATERS (EXCEPT FOR RD-982S)

The following repeater upgrade kit is for ALL USA repeaters except for the RD-982S. ***(DO NOT USE THIS FOR THE RD-982S)*** *This version of firmware does not contain the, “Interference Detector” as required by the FCC regulations part 90.425 for use within the USA. For the RD-982S, please login to www.hytera.us and download the USA version of the special firmware upgrade kit specifically for the RD-982S which contains the “Interference Detector” as required by the FCC.*

If you are using *DMR III Trunking, GPS* or running any *Third party Development or Applications* such as but not limited to; *Safe Mobile* or *Smart Dispatch*, **DO NOT INSTALL THIS FIRMWARE** without first checking with the Engineers of the Application you are using and or Hytera Systems Support.

Failure to do so, may cause problems with your communication network due to your Application or Infrastructure not being compatible with newer firmware.

Once Firmware has been upgraded, you cannot revert to a previous version.

By proceeding you acknowledge that you understand the risks associated with upgrading firmware without technical support verification. Furthermore you understand and will comply with FCC part 90.425 for use within the USA. You can Unzip the firmware upgrade file with the following password, “iwillcomply” (type without the quotes).
