

READ FIRST BEFORE PROCEEDING

If you are using *DMR III Trunking*, *GPS* or running any *Third party Development* or Applications such as but not limited to; *Safe Mobile* or *Smart Dispatch*, **DO NOT INSTALL THIS FIRMWARE** without first checking with the Engineers of the Application you are using and or Hytera Systems Support.

Failure to do so, may cause problems with your communication network due to your Application or Infrastructure not being compatible with newer firmware.

IMPORTANT STEP!!!!

Firmware version 7.06 **REQUIRES** you to have the latest version v7.00 firmware already on your device. Read device to confirm before proceeding to v7.06.

Upgrading with firmware prior to v7.0, **WILL** render your device inoperable.

Once Firmware has been upgraded, you cannot revert to a previous version.

By proceeding you acknowledge that you understand the risks associated with upgrading firmware without technical support verification and that you are aware that upgrading to v7.06 without having the latest version of v7.0 on your device already, **WILL** result in your device being rendered **inoperable**. You can Unzip the firmware upgrade file with the following password, "ifullyunderstandtherisks" (type without the quotes).
