

Engineer: Bruce Page	Date: 8/23/05	<div style="text-align: center;">    <b>JPS Communications</b>   5800 Departure Drive, Raleigh, NC 27616 </div>			
Drawn: Bruce Page	Date: 8/23/05				
Approved: Chris Samios	Date: 9-9-05	Title: ACU RADIO APPLICATION NOTES			
Issued/ Revised	Date: 9-12-05	Size: A	Dwg. #: <b>5961-271302-APP</b>	Rev: <b>A</b>	Sheet: 1            Of    2

**APPLIES TO:**

ICOM IC-F121 / IC-F221 Mobile Radios

**RADIO MODIFICATIONS:**

Install ICOM Option cable OPC 617 into J6 connector as shown below: The jumper location D will require solder bead. Unplug J7 internal speaker connector.

Cut off the bushing as in the illustration, when you install the optional OPC-617.

**RADIO PROGRAMMING:**

Radio programming is required using ICOM CS-F100 and Interface SOPC1122. Under **Common** / **Set Mode** / **AF Min Level** is programmed to maximum, set to **255** & **Enable**. To use Pin 6 of OPC-617 for Squelch Type COR will require 2/5 tone function be disabled. Under **Common** / **Expert** / **RX EXO** set to **ON** & **Delay Timer** set to **OFF**. To enable Pin 5 function for Ext PTT under **Common** / **Expert** / **EPTT/FTSW** set to **EPTT**.

### **RADIO CONTROLS:**

Adjust the Volume Control until the yellow “SIGNAL” indicator on the associated DSP Module flashes with receive audio. Should be about in the full volume position.

### **CABLING:**

Standard ACU-1000 and ACU-T Interface cables are made up of a 2 foot TRP Radio Tray Interface cable and the appropriate 13-foot Extension cable.

ACU-1000 Interface Cable	JPS P/N 5961-291302	(5961-271302 + 5961-261002-00)
ACU-T Cable	JPS P/N 5961-281302	(5961-271302 + 5961-281013-00)
TRP-1000 Shelf Interface Cable	JPS P/N 5961-271302	
RF Connector Type	PL259	

### **DSP JUMPERS:**

JP1	High Impedance (SEE NOTES)
JP2	Balanced *

### **DSP PROGRAMMING:**

RX Level	7	-16dBm
TX Level	6*	0dBm*
Squelch Type	COR	(SEE NOTES)
COR Polarity	Active Low*	
High Frequency Equalizer	4*	Flat*
RX Audio Delay	2*	100 ms*
TX Audio Delay (Radio Type)	0*	No Delay*
Noise Reduction Value	0*	Off*
VOX/VMR Threshold	1*	Med1*
VOX/VMR Hang Time	3*	775 ms*
COR Inhibit After PTT	1*	100 ms*
All Others	As needed	

(\* Indicates Default Value)

### **NOTES:**

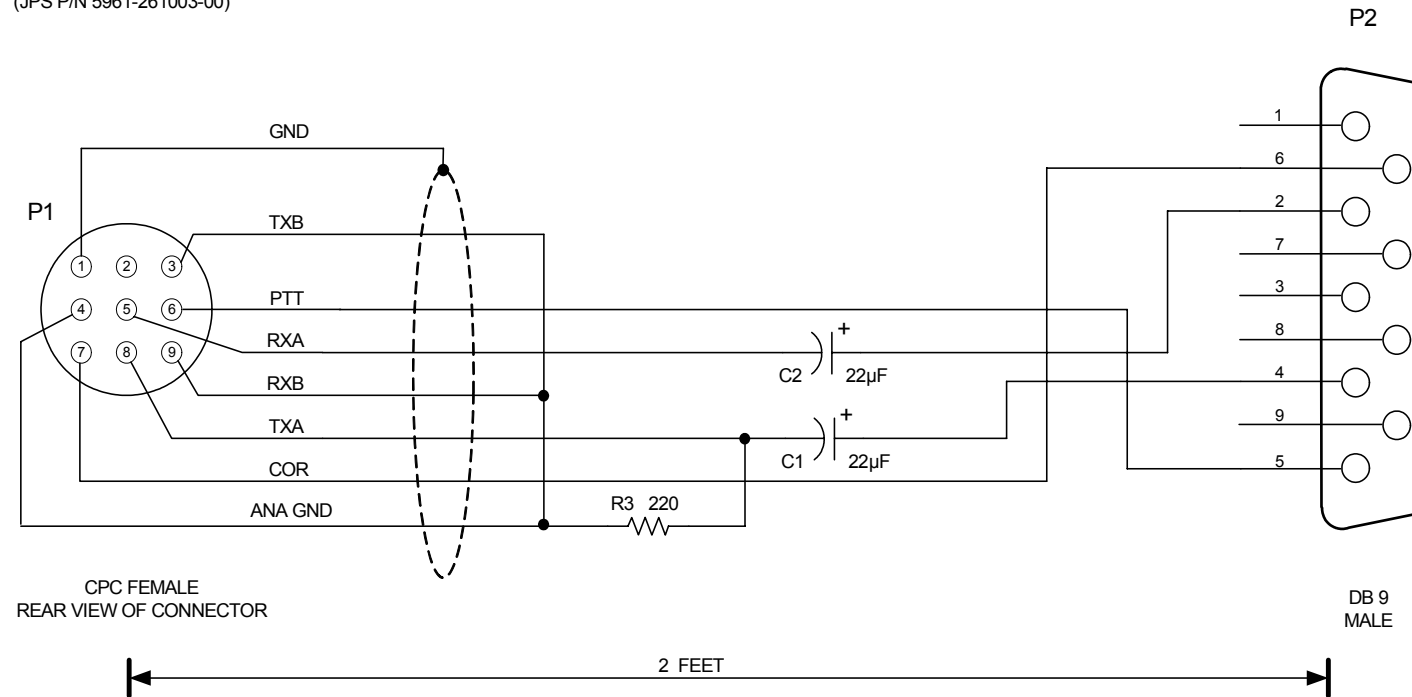

The DSP Module for this Interface Cable must have the default setting of JP1 change to the High Impedance as shown above. Also required is the radios Volume in the Full Position with RX level setting of 7 (-16dBm).

For the interface to use Squelch type COR the DSP Module for this Interface Cable will require a setting of COR Active Low. It is also required that the radio programming for all radio channels to have the 2/5 tone function disabled and RX EXO set on with delay timer off. The default DSP setting for Squelch type of VOX may also be used.
