## What's new in the Release

NOTE: After R7 radios are updated with version M2023.01.01 or later, the user will not be able to rollback to versions older than M2023.01.01

### Radio New Features

There are no new features introduced with this release.

The M2023.01.01 release addresses the following issues:

- the users may experience radio hang or reset issue under certain conditions after upgrading their specific radios firmware to M2023.01 release without updating the language pack first.
- XPR 5000e series radio users who configured the system or radio frequency to be more than 500MHz might encounter LMR connectivity issues.
- The most recent setting of MOTOTRBO R7 radio codeplug is not restored after Over The Air Programming via Wi-Fi.

See "Resolved Issues in Product Release" section.

## Feature Deprecation Notice

### 1. Codeplug Password

Starting with the M2021.01 release, the **Codeplug Password** feature is deprecated for the selected radios and repeaters listed on the table below. However, the **Codeplug Password** feature remained active for the archived file Codeplug Password.

You are recommended to use the **TLS-PSK Authentication** feature for these radios and repeaters. The **Codeplug Password** functionality will not be removed to facilitate migration/transition to TLS-PSK but Motorola Solutions will no longer be providing support for the feature. This feature could be removed in a future release. The deprecation affects you if you are using **Codeplug Password** to set a password for the current radio or repeater codeplug.

**TLS-PSK Authentication** feature was introduced in the R2.10.05 software release and is available on the selected radios and repeaters listed in the following table. This feature ensures an enhanced security communication between radio or repeater and customer programming tools.

For more information, refer to [New Features for MOTOTRBO Release 2.10.5 training service](#).

Region	Radios		Repeaters
NA	XPR 7000/7000e series	SL 3500e	SLR 1000 Series
	XPR 7000/7000e IS series	XPR 2500	SLR 5700 Series
	XPR 5000/5000e series	R7	SLR 8000 Series
	SL 7000/7000e series	R2	
	XPR 3000/3000e series		

### 2. Bluetooth Permanent Discoverable Mode

XPR 7000e and XPR 3000e radios manufactured after March 2022 do not have Bluetooth Permanent Discoverable support.

## Product Versions

Listed below are all MOTOTRBO Product types with a reference to the released version of software:

Notes: From M2020.01 onwards, only products (i.e. MOTOTRBO radios, repeaters and CMSS) which are either in warranty or under a service contract are entitled to software updates.

Software Update Management (SUM) was introduced with the R2.10 system release and provides products with built-in intelligence to determine if they are eligible to accept a software update. Products on prior releases must therefore be upgraded to an R2.10 system release and be eligible to accept a software update before they can be upgraded to M2020.01 onwards.

Canceled products that are still under a service contract at time of cancellation will be entitled to the software update in line with the Motorola Solutions Software Support Policy. Following cancellation, only critical bug fixes will be tested for these products.

MOTOTRBO Product	Version Supported in Release
<b>MOTOTRBO 2.0 (excl SL Series) - XPR 7000e Series, XPR 3000e Series, XPR 5000e Series, R7, R2</b>	<b>R02.23.01.3001 (NEW)</b>
MOTOTRBO - XPR 2500, SL 3500e Series, SL 7000e Series	R02.23.01.1002
MOTOTRBO - Commercial Devices - CP100d only	R01.23.01.0000
MOTOTRBO - XPR 4000/6000 Series	Canceled.
Option Board – MOTOTRBO 2.0 (incl SL Series)	Canceled.
Option Board – MOTOTRBO - XPR 4000/6000 series	Canceled.
Repeater - XPR 8380 / XPR 8400	R20.23.01.05
Repeater - MTR 3000	R20.23.01.05
Repeater - SLR 1000, SLR 5000, SLR 8000	R20.23.01.06
XRC 9000 / 9100 Controller	R02.100.05.1036_1695
XRT 9000 / 9100 Gateway	R02.100.05.1036_1695
XRI 9100 Interconnect	R02.100.05.1030
Network Manager (merged with XRC / XRI packages)	R02.100.05.1030
Network Manager Connection Tool	R02.100.05.1030
XRT Configuration Tool	R02.100.05.1030
CPCPS	Canceled.
CPS 2.0	2.138.176.0
Radio Management	2.138.176.0
RadioCentral Client	2.138.176.0
CPS	CPS V16.0 Build 828
Tuner	V23.1 Build 19
RDAC	V23.1 Build 10
AirTracer	V11.0 Build 39

Device Discovery and Mobility Service (DDMS)	R23.01.0003
Multi Channel Device Driver (MCDD)	Canceled
MNIS Data Gateway	R23.01.0027
MNIS Status Agent	R22.03.01
MOTOTRBO Motopatch	Canceled
Capacity Max ESU Launchpad	DESU_LP-R17.18.10.56-01.rhel.iso
Capacity Max System Server Installer Software Image	CVN7293I.iso
System Design Tools	Version 06.08
Sensor Management Tool	R01.00.01

3rd Party Applications	Version Supported in Release
GW3-TRBO	2.17.3.73
Avtec VP Gate	5.3.0.41
Avtec Scout Console/Scout Manager	5.3.0.54
Avtec VPGate Advanced Radio Support w/Encryption	5.3.0.16
Avtec Data Management Services - Scout Central Distributor	5.3.0.20
SmartPTT PLUS	SmartPTT-PLUS-9.13.0.895.zip
TRBOnet PLUS	TRBOnet.Plus_6.2.0.7263.zip

ETSI DMR Specification	Version Supported in Release
TS 102 361-1: the DMR air interface protocol	v2.5.1
TS 102 361-2: the DMR voice and generic services and facilities	v2.4.1
TS 102 361-3: the DMR data protocol	v1.3.1
TS 102 361-4: the DMR trunking protocol	v1.7.1 ~ 1.11.1

1. The feature sets supported in the release are compliant with the versions of ETSI DMR standard specifications listed above. Though in DMR Tier 3 there have been some things changed to existing features that are not backwards compatible, Capacity Max complies to the newer versions so may not always work with other manufacturer's infrastructure on older versions.
2. The Capacity Max System Advisor (SA) client is not accessible for the System View, Grid View and Alarm Details view if the Java version 8u211 or newer is used on the PC where the SA client resides. Downgrading the Java to any version between and including 8u181 and 8u201 will work fine.
3. USB 3.0 port is not supported for the repeater upgrade. With R2.8.0 and newer repeater releases, the recommendation is to use a USB 2.0 port on the PC or connect the repeater via a USB 2.0 hub when upgrading the repeater via USB.
4. For each CMSS (Capacity Max System Server),

---

**Motorola Solutions Confidential—Do Not Redistribute—PartnerEmpower Member Use Only.**

- a. Order (1) T8911A, MOTOTRBO M2023.01 Capacity Max System Server SW Upgrade on USB flash drive.
  - b. Alternatively, for customers with access to the MSI MyView portal, you can order (1) T8912A, MOTOTRBO M2023.01 Capacity Max System Server SW Upgrade as software iso image where you will receive an e-mail with a unique link to access/download the iso file from the MyView portal. The T8912A will require an e-mail address at the time of order.
  - c. NOTICE: The USB drive (T8911A) can take 2-3 weeks for delivery while the downloadable file via the MyView portal (T8912A) is generally available within a week. Please plan ahead and take the delivery times into consideration before scheduling your upgrade.
5. For the PC used for CMSS upgrade,
- a. Order (1) T8486A, MOTOTRBO Capacity Max System Server SW Update Launch Pad which contains the ESU LP software files on a DVD. (The M2023.01 upgrade requires this new ESU LP version).
  - b. Alternatively, for customers with access to the MSI MyView portal, you can order (1) T8483B, MOTOTRBO Capacity Max System Server SW Update Launch Pad where you will receive an e-mail with a unique link to access/download the ESU LP application files from the MyView portal. The T8483B will require an e-mail address at time of order.
  - c. Please refer to the section “Capacity Max System Upgrade from M2022.01 or M2022.03 to M2023.01” of Capacity Max System Release Upgrade Guide for additional details. It is available on Learning Experience Portal (LXP) and the Upgrade Guide applies for the patch upgrade as well.
  - d. NOTICE: The DVD (T8486A) can take 2-3 weeks for delivery while the downloadable file via the MyView portal (T8483B) is generally available within a week. Please plan ahead and take the delivery times into consideration before scheduling your upgrade
  - e. The ESU Launchpad About page describes the target CMSS versions that it supports to ensure the appropriate ESU Launchpad version is ordered along with the CMSS upgrade installation files.

## Overview

This section details the known MOTOTRBO product issues which remain outstanding at the time of this release of software to the field. Known product issues are divided into two categories:

- Known issues contained within the current release
- Resolved Issues that have now been fixed within the current release

## Definitions

A known issue is a problem that is currently unresolved (open). The risk and workaround aspects are included in the release note section “Known Issues” for overall assessment of the problem.

A closed or resolved issue is one that has been repaired and should no longer occur in the product after upgrading to the new product version.

## Known Issues in Product Release

### Radio Impact

**Issue Number:** DEVICES\_COMMON-7019  
**System/Products:** R7  
**Description:** Radio shows Wi-Fi 1 bar user when user turns off Wi-Fi or brings the radio away from the router in the middle of R7 activation/regionalization. After about 60s, the radio will show "Update Not Available", with continuous "Unprogrammed" tone, and blinking RED LED.  
**Workaround:** The user needs to power cycle the radio, and it will automatically resume the radio activation/regionalization process.

## Resolved Issues in Product Release

Resolved issues are the known product problems that were reported in product releases, but have now been fixed or closed. Following are the issue tracking numbers and issue descriptions that have been resolved in this release.

### Radio Impact

**Issue Number:** PCR\_SUB-41154 / INC000007221083  
**System/Product:** XPR 7000e Series & R7  
**Description:** Upon power-up, the radio does not receive any TMS (text message service) from the data application. Randomly, the radio does not respond with "Acknowledgement" to the Data Application (console application).

**Issue Number:** PCR\_SUB-43050 / PBI000000035215  
**System/Product:** XPR 5000e Series  
**Description:** Users who configured the system or radio frequency to be more than 500MHz might encounter LMR connectivity issues.

**Issue Number:** PCR\_SUB-43054  
**System/Product:** R7, XPR 7000e Series, XPR 3000e Series, XPR 5000e Series & R2  
**Description:** Users who upgraded their radio's firmware to M2023.01 version without updating the language pack will encounter a continuous reset issue. Refer to [MTN-104-23 MOTOTRBO Radio Hang/Reset After Upgrade to M2023.01](#).

<b>Issue Number:</b>	<b>PCR_SUB-41962</b>
<b>System/Product:</b>	<b>R7</b>
<b>Description:</b>	The most recent setting of the radio codeplug is not restored after Over The Air Programming via Wi-Fi. Once R7 is updated with version M2023.01.01 or later, the user will not be able to rollback to versions older than M2023.01.01.
<b>Issue Number:</b>	<b>DEVICES_COMMON-5955</b>
<b>System/Product:</b>	<b>R7, XPR 7000e Series &amp; XPR 300e Series</b>
<b>Description:</b>	Switching connection between radio and other Bluetooth PAN devices several times on a PC may cause the radio to not be able to connect back to the PC. An easy workaround on this: "Unpair and pair the radio with the PC for reconnection".
<b>Issue Number:</b>	<b>PCR_SUB-36742</b>
<b>System/Product:</b>	<b>R7, XPR 7000e Series &amp; XPR 300e Series</b>
<b>Description:</b>	In-door location feature has been turned on on the radio. If the user simultaneously Bluetooth PTT and performs actions such as BT connection, BT "Find Me" or BT "Find Device", the user would see that the suspended indoor location icon continues to display although the radio has resumed scanning the iBeacon.
<b>Issue Number:</b>	<b>DEVICES_COMMON-39351 / PCR_SUB-39351</b>
<b>System/Products:</b>	<b>All MOTOTRBO Portables (Non-Display)</b>
<b>Description:</b>	The non-display radio is not able to make a group call after receiving Call Alert on "Private Call" disabled channel.

## Cybersecurity

Motorola Solutions, Inc. (MSI) has delivered a PCR MOTOTRBO 2023.01 release. Motorola Solutions development and operations teams continually make security updates as needed based on evaluated threats, determine protective measures, create response capabilities, and promote compliance. Motorola Solutions interacts with and participates in several US and international security organizations, such as the U.S. Department of Homeland Security's National Cybersecurity & Communications Integration Center (NCCIC), National Institute of Standards and Technology (NIST), the 3rd Generation Partnership Project (3GPP), Telecommunications Industry Association (TIA), European Telecommunications Standards Institute (ETSI), Digital Mobile Radio (DMR) Security standardization and others. Standards from the aforementioned organizations can map to security controls in international standards such as Information System Standards (ISO / IEC 27001).

The PCR MOTOTRBO 2023.01 system release includes enhancements to security based on the National Vulnerability Database and industry standards:

- Ongoing vulnerability management remediation based on network scanning security tools
- Ongoing Software Lifecycle Management improvements (3rd party software)

In addition to ongoing releases for security updates, Motorola Solutions has a Bug Submission Program for external entities to disclose to Motorola Solutions possible security vulnerabilities or issues. Motorola Solutions encourages researchers to use the PGP key when sending sensitive information via email. Please send all security vulnerability reports to [security@motorolasolutions.com](mailto:security@motorolasolutions.com).

### **Open Source Software Legal Notice**

This media, software or hardware ("Product") obtained from Motorola Solutions, Inc. ("Motorola Solutions") may include Motorola Solutions' Software, Third Party Software (defined below), and/or Open Source Software (defined below).

The object code or source code (collectively, the "Software") included with the Product is the exclusive property of Motorola Solutions or its licensors, and any use is subject to the terms and conditions of one or more agreements in force between the purchaser of the Motorola Solutions Product or licensee of the Motorola Solutions Software and Motorola Solutions. SOFTWARE IS PROTECTED BY U.S. COPYRIGHT LAWS AND INTERNATIONAL LAWS AND TREATIES. UNAUTHORIZED COPYING, DISTRIBUTION OR OTHER USE OF THIS PRODUCT IS STRICTLY PROHIBITED. ANY DISTRIBUTION OR USE NOT SPECIFICALLY APPROVED BY MOTOROLA SOLUTIONS IS STRICTLY PROHIBITED.

Motorola Solutions' Software is subject to the commercial terms and conditions entered into with Motorola Solutions, any other use is strictly prohibited. Commercial Software licensed for redistribution by Motorola Solutions ("Third Party Software") is subject to the terms and conditions in force between Motorola Solutions and the licensor of the Third party Software. The terms and conditions governing the usage of Third Party Software may be part of the agreement entered into by the purchaser of the Product with Motorola Solutions or separate Third Party Software license agreement(s) included with the Product.

Software provided by Motorola Solutions which is covered by a publicly available license governed solely under Copyright law, whereas the complete terms and obligations of such license attach to a licensee solely through the act of copying, using and/or distribution of the licensed Software, such obligations often include one or more of attribution obligations, source code distribution obligations, copyleft obligations, and intellectual property encumbrances is referred to herein as "Open Source Software". The use of any Open Source Software is subject to the licenses, terms and conditions of the commercial agreement in force between the purchaser of the Product and Motorola Solutions as well as the terms and conditions of the corresponding license of each Open Source Software package. If there is a conflict between the terms and conditions of any commercial agreement and the terms and conditions of the Open Source Software license, the applicable Open Source Software license will take precedence. Copies of the licenses for the included Open Source Software as well as their attributions, acknowledgements, and software information details, are listed below. Motorola Solutions is required to reproduce the software licenses, acknowledgements and copyright notices as provided by the authors and owners, thus, all such information is provided in its native language form, without modification or translation.

Use of any Software is subject to acceptance of the corresponding terms associated with the Software and by using the Software you agree you have reviewed the terms and agreed to be bound by said terms.

To obtain a copy of the source code for the Open Source Software with source code distribution obligations, you may send a formal request in writing to:

Motorola Solutions, Inc.  
Open Source Software Management  
2000 Progress Parkway

Schaumburg, IL 60196 USA.

In your request, please include the Motorola Solutions Product name and version, along with the Open Source Software specifics, such as the Open Source Software name and version.

The source code for the Open Source Software included by Motorola Solutions may be residing on the product's installation media provided with the Product or on supplemental Product media. Please reference and review the entire Motorola Solutions Open Source Software "Legal Notices" and any corresponding "End User License Agreement" provided with the Product or the commercial agreement under which the Product was purchased for details on the availability, location and method for obtaining source code. Further, depending on the license terms of the specific Open Source Software, source code may not be provided. Please reference and review the entire Motorola Solutions Open Source Software "Legal Notices" and "End User License Agreement" to identify which Open Source Software packages have source code provided or available.

MOTOROLA, MOTOROLA SOLUTIONS and the Stylized M Logo are trademarks or registered trademarks of Motorola Trademark Holdings, LLC and are used under license. All other trademarks are the property of Motorola Solutions, Inc. or their respective owners. All rights reserved.

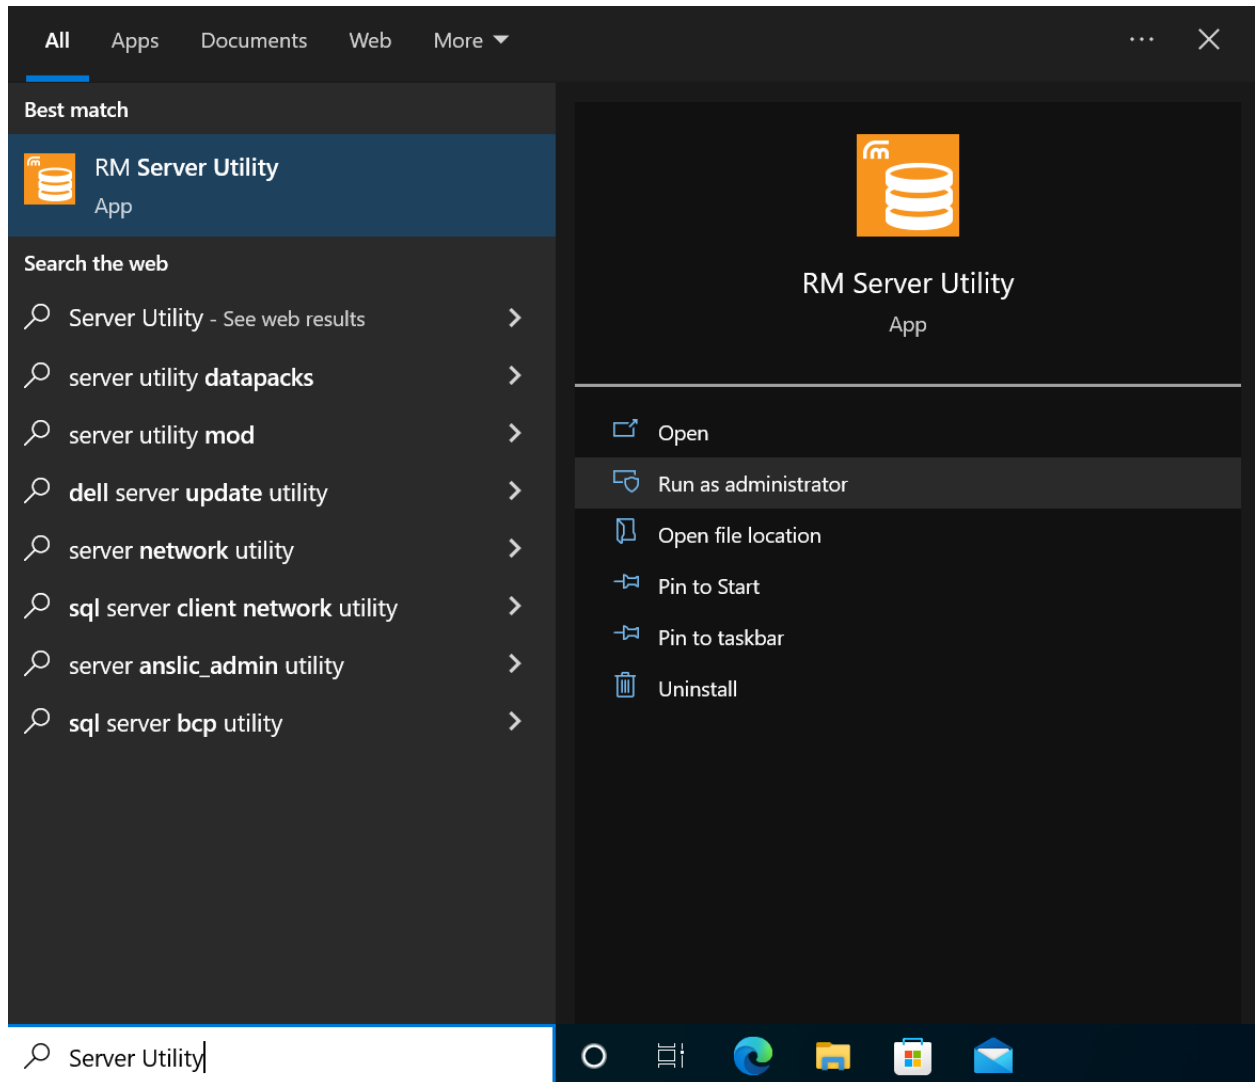

## Important Note

### RM Access Control Feature Note

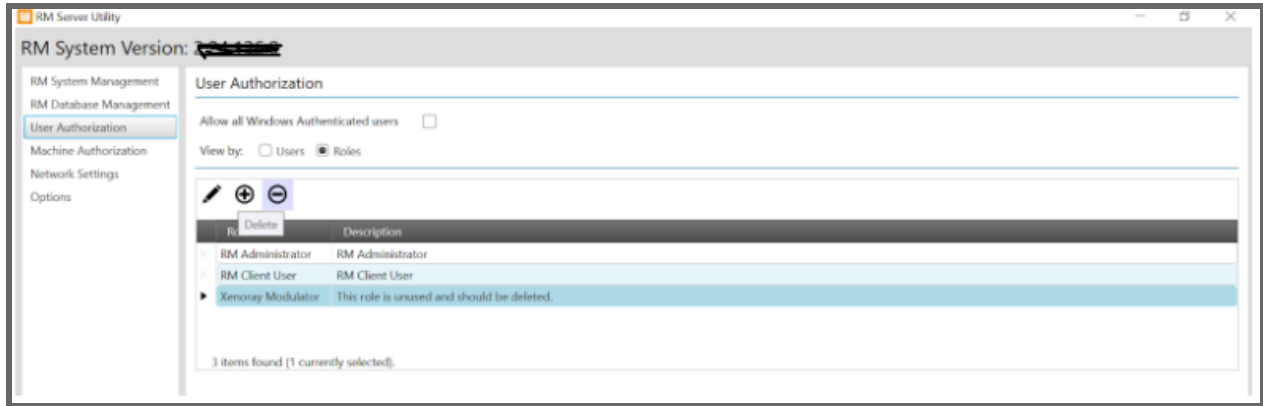

#### **Important note for the customers who DO NOT need to use RM Access Control:**

After upgrading an existing RM deployment to version 2.134.77.0 or later, there are some necessary steps to take to ensure normal operation, otherwise, users may not have access to the security keys and Radio View operations that they had prior to the upgrade.

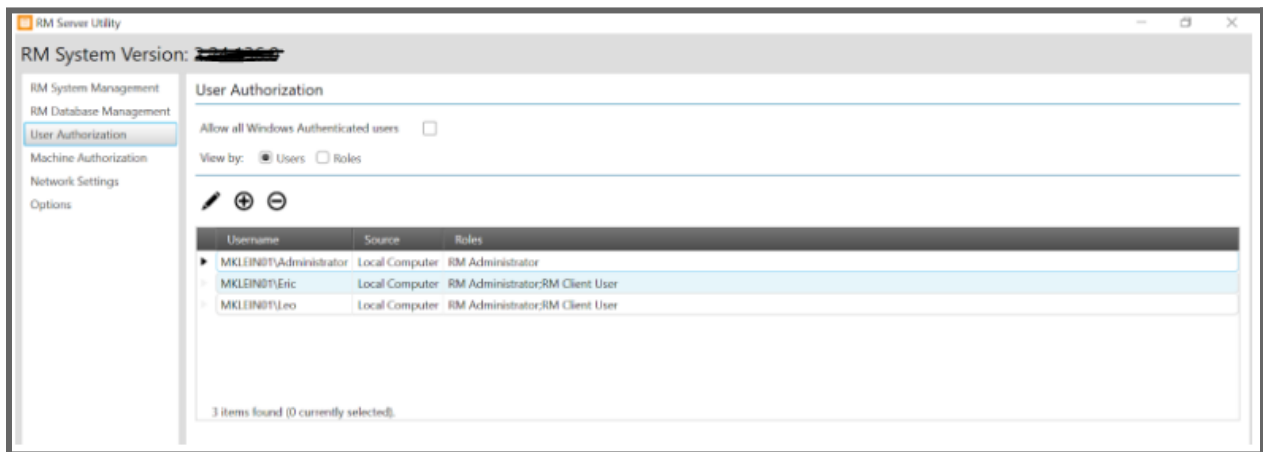

- 1) After performing the upgrade the user should open the RM Server Utility App on the machine that hosts the RM Server.

- 2) From the User Authorization tab, with the Roles radio button selected, delete any unnecessary roles that may have been created prior to the upgrade, leaving only the RM Administrator and RM Client User roles.

- 3) For users that do not wish to use the Access Control features at this time, select the Users radio button and ensure that each user that will be accessing RM remotely has both RM Administrator and RM Client User roles assigned to them.

- 4) This completes the necessary steps for users that do not wish to use the Access Control features. The RM Server Utility can be closed at this point. Users should be able to use the RM Configuration Client to connect to the RM Server and perform normal operations.

## New Upgrade Package Zip Format

Starting from M2022.03, MSI will start to release the MOTOTRBO firmware upgrade package in zip format. Below are the instructions on how to install the firmware upgrade package.

1. Create a new folder of your choice in the C:\drive. We will use "Packages" as an example.
2. Download zip file to C:\Packages
3. Extract All

Name	Date modified	Type
 MOTOTRBO_2.0_R0222021000_222213_Portable_NA.zip	8/30/2022 11:09 AM	Compressed (zipp...
<div> Open Open in new window <hr/> Extract All... Select Left Folder for Compare </div>		

#### 4. Open Folder

Name	Date modified	Type	Size
 MOTOTRBO_2.0_R0222021000_222213_Portable_NA.zip	8/30/2022 11:09 AM	Compressed (zipp...	58,252 KB
 MOTOTRBO_2.0_R0222021000_222213_Portable_NA	10/11/2022 1:45 PM	File folder	

#### 5. Run the Exe

 program files	10/11/2022 1:45 PM	File folder	
 0x0409.ini	10/1/2014 11:41 AM	Configuration sett...	22 KB
 MOTOTRBO 2.0 R0222021000_222213 Portable Update Packages.msi	8/30/2022 11:09 AM	Windows Installer ...	663 KB
 MOTOTRBO_2.0_R0222021000_222213_Portable_NA.exe	8/30/2022 11:09 AM	Application	1,269 KB
 Setup.ini	8/30/2022 11:09 AM	Configuration sett...	6 KB

#### 6. To save space, the folder can be deleted after successful installation
