

MOTOTRBO™ DM4000 SERIES HANDHELD CONTROL HEAD

BE MORE MOBILE WHERE IT MATTERS

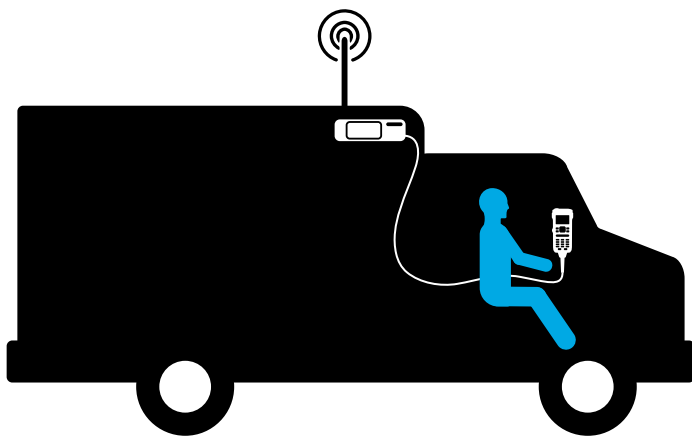

WALK AND TALK WITHOUT LOSING THE CONNECTION

Greater control – and greater freedom – is right at hand with the MOTOTRBO™ DM4000 Series Handheld Control Head. Whether you operate a truck with a cramped cab or drive a commercial vehicle with plenty of room, our control head fits your diverse communication needs.

Mount the MOTOTRBO DM4000 Series mobile radio anywhere in the vehicle. The handheld control head hangs from a standard clip by the driver's seat, so you can converse the moment you need to.

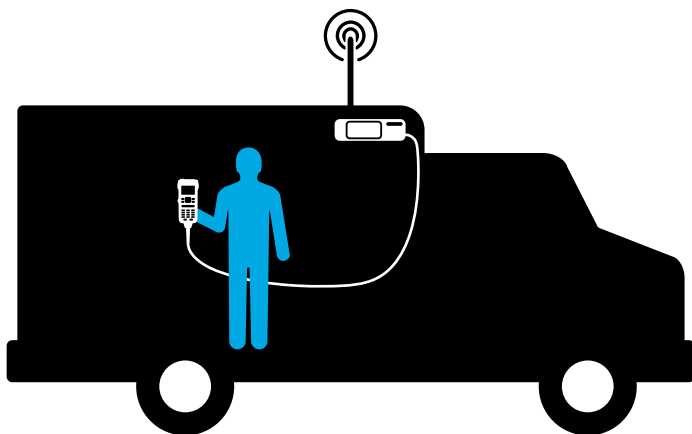

Check equipment or packages in back, assist with patients in an ambulance, or supervise students on a school bus. All while staying connected to your radio. A generous, flexible cord allows you to go wherever you need to go, all while staying connected to your radio.

Total Installation Flexibility
INSTALL ANYWHERE

Full Control
OPERATE EASILY

In-Vehicle Mobility
CONVERSE FREELY

INSTALL ANYWHERE TO ACCOMMODATE SPACE

The DM4000 Series control head is tailor-made for tight quarters and confined spaces. Simply install the DM4000 Series mobile radio where it's most convenient: behind the seat, under the dashboard, in the trunk or elsewhere. Because the control head stays close to the driver, it only requires a standard hang-up clip and provides up to 8 meters (26 feet) of communications flexibility.

A driver at a mine operates an excavator.

Space is at a premium in the small cab, yet seamless communications are a must.

With the DM4000 Series mobile radio behind his seat and the control head at hand, he can talk instantly to his team.

CONVERSE FREELY WHILE MOVING INSIDE

With its long, flexible cord the DM4000 Series control head is designed for easy mobility. Drivers can move within their vehicles while remaining seamlessly connected to their radios. Now ambulance attendants, bus operators and delivery drivers can take the control head into the rear of the vehicle instead of being confined to their seat.

A delivery driver receives an inquiry from dispatch about an order.

He pulls over on a busy highway to check the packages in back.

The DM4000 Series control head lets him move about the truck without stepping outside.

OPERATE EASILY WITH GREATER CONTROL

The DM4000 Series control head puts radio functions in the palm of your hand to provide greater control. With its complete keypad, large color screen, and easy-to-operate channel and volume controls, the control head has the full features of a portable radio. Access contact lists, text messages, radio settings, work order tickets and notifications inside the vehicle.

A school bus driver stops the vehicle after hearing a child onboard is ill.

She walks down the aisle to check on the child while staying connected to her radio.

With the full keypad on the DM4000 Series control head, she texts a message to dispatch.
