

CURVE™ Global Release Notes

Version: C2025.01

Date: **January 7, 2025**

<p>What's new in the Release</p>	<p><u>Enhancement on Curve Radio Features:</u></p> <p>1. Task Reminder</p> <p>We're excited to introduce the Task Reminder feature in the Curve Radio, designed to help users stay alert and on top of their tasks. This feature allows users to set a timer on the radio, which will emit a tone when the timer expires, ensuring that important tasks aren't missed. This feature is ideal for ensuring that time-sensitive tasks are brought to attention with clear and consistent alerts, no matter the radio's operational state. Make sure to explore the Task Reminder feature and customize it for your needs!</p> <p><u>Enhancement on Certificate of Voice Assistant:</u></p> <p>2. CPS Profile Password Protected for Privacy Concern.</p> <p>We've implemented a robust security update for the Curve Radio and EVA Cloud to enhance protection and data integrity. This update introduces Token Validation using Motorola Solution's private key and ensures secure communication via TLS with Motorola Solution's private key only.</p> <p>To maintain seamless operation of the Voice Assistant and ensure compliance with new security protocols, users are required to refresh or regenerate the site token in the Curve Portal and CPS by 30 March 2025. Failure to complete this action by the deadline will result in service interruptions.</p> <p>Kindly refer to the guideline document of CURVE PORTAL SITE TOKEN RE-GENERATE UPON FIRMWARE UPDATE TO R01.05.00.pdf for detailed explanation.</p>
