LavaShell"

How use MoLava Installer?

For all versions of MoShell that are repacked

1: Burn/Extract MoLava_250f.iso

2: Open MoLava

3: Run LavaShell_Panel as admin

4: Enter 1

5: Wait until JRE setup is open. and install it

6: After the JRE installation setup you see the Done.
Terminal is now full active on lavashell
Click "Enter"

8: in the Main Page of the panel enter 0

9: Wait some secs... and panel will close.

10: Done!

NOTE: if you close the panel After JRE Panel or didnt
closed it with Main Page exit code it will make some
problems on Script...
* so do as the guide, thank you all <3 :)

Abbreviation

JRE = Java Runtime Environment
LSDBLIB = LavaShell DataBase Library
