Replacement Key Parts list for the 4010, 4118, 4018, 4217B

The following components make up the standard Keypad board for the series 4000-button consoles. Replacement parts can be ordered from Zetron, call for current pricing and availability.

PARTS LIST:

- # 6 Plunger 373-1102
- # 14 Housing 1x 1 373-1100
- # 12 Elastomer 373-1103
- # 13 Red Led 311-4222

Housings are held in place by 2 small self tapping Phillips screws accessed from the bottom side of the board. The Large Transmit and Monitor button locations have separate standoffs for the LED's. All other LED's are soldered through and will require careful Desoldering if you are replacing the Rubber

NOTE: When removing or replacing housings with LED's soldered through it's Recommended that you replace the LED's with new ones.

The printed circuit board has a thin carbon plating over the copper traces. This creates a resistive switch. The board can be cleaned very lightly with a Q-tip and mild soap and water. It can be rinsed with a flux remover or isopropyl alcohol solution do not use any kind of abrasive material or
