**2. ISSUE 1 CHANGES**

**2.001** On Page 2, Paragraph 1.01, change to read:

This section describes the standard plan for the Equipment Maintenance job in central offices and repeater stations which are responsible for maintenance of transmission and signaling equipment serving all trunks and special services, both *local* and *toll* type.

**2.002** On Page 7, Paragraph 5.03, change to read:

The Equipment Trouble Ticket, Form E-5840, measures 3-1/2 by 6 inches. All tickets have

preprinted serial numbers. The use of serially numbered tickets aids in cross-reference between maintenance groups and offices, and helps assure that all troubles are recorded. Figure 4 is an illustration of Form E-5840.

**2.003** On Page 12, Paragraph 13.05, change to read:

In controlled maintenance, equipment performance is evaluated by comparison of actual trouble to expected troubles. Therefore, trouble expectancies must be established for all equipment categories. Where a maintenance territory includes several small offices, it may be desirable to establish combined trouble expectancies. This is done by adding the total equipment inventory of all offices for each equipment category. These figures are then used as a base for setting trouble expectancies for each category.
