

## KEYS

92, 223, 479, 490, 493, 497, 498, 499, 520, 523, 524, 529, 545, A1, A2, A4, A5, A6, A7, A8, A9, A10, A11, A13, A14, A15, A17, A18, A20, A26, A27, A28, A29, A30, A31, A32, A33, A34, A35, A36, A37, B1, B2, B3, B5, B6, B7, B8, B9, B10, B14, B15, B17, B18, B19, B20, B22, B23, B25, B26, C1, C2, C3, C5, C6, C7, E1, E2, E6, G1, G2, G3, G4, G6, AND G7 TYPES

## PIECE-PART DATA AND REPLACEMENT PROCEDURES

### 1. GENERAL

**1.01** This section covers the information necessary for ordering parts to be used in the maintenance of the keys enumerated above. It also covers the approved procedures for replacing these parts.

**1.02** This section is reissued to:

- Add piece-part information to Fig. 19 for the 490C-type key
- Add key-type information to Fig. 27
- Add A1ACH-, A1ACJ-, B1RD-, B1RE-, and B1RF-type keys and associated piece-part information to Table B
- Add B26C-, G3S-, G3T-, and G3U-type keys and associated piece-part information to Table C
- Add 499J key and associated piece-part information to Fig. 24 and Table O.

**1.03** Part 2 of this section covers the piece-part numbers and the corresponding names of the parts for which it is practicable to replace in the field in the maintenance of these keys. No attempt should be made to replace parts not designated. Part 2 also contains explanatory figures showing the different parts.

**1.04** Part 3 of this section covers the approved procedures for the replacement of the parts covered in Part 2.

### 2. PIECE-PART DATA

**2.01** The figures included in this part show the various parts in relation to other parts of the key. The part numbers of the various parts are given together with the names of the parts as listed by the Western Electric Merchandise Department. Where these names differ from those in general use in the field, the latter names, in some cases, are shown in parentheses.

**2.02** When ordering parts for replacement purposes, give both the piece-part number and the name of the part; eg, P-21266 Plunger. Do not refer to the BSP number or to any information shown in parentheses following the piece-part number.

**2.03** Information enclosed by parentheses ( ) is not ordering information. This information may be references to notes, parts referred to in other portions of the section and not considered replaceable, or part names in general use in the field if these names differ from those assigned by the manufacturer.

**2.04** The index is provided to simplify the selection of desired parts. By referring to the figures (1 through 52) and tables (A through V) specified in the index for a certain type key, a component part of the key may be located if covered by the section.

C-INDICATOR (BOTTOM VIEW)

D-TICKET CLIP (GIAT KEY)

Fig. 2—Indicator Used on A1-, A2-, and B1-Type Keys, and Ticket Clip Used on A18-Type Key and GIAT Key

**A—Lamp Socket for A-, B-, E6-, and G-Type Keys (Except A5- and B14-Type Keys)**

+New key base and mounting stud no longer have brackets for mounting lamp socket but are arranged to use a lamp mounting block which must be ordered separately.

\*Order two P-139197 screws for use with bracket-type lamp mounting which forms a part of the key base and mounting stud (not illustrated).

**B—Lamp Socket and Mounting Block for A5- and B14-Type Keys**

**C—Keytop and Parts Common to A-, B-, C-, E6-, and G-Type Keys; Also Handle for A-, B-, C-, G-, 479-, and 529-Type Keys**

**Fig. 3—Parts Common to A-, B-, C-, E6-, G-, 479-, and 529-Type Keys**

**A—2- and 5-Type Key Units Having Nondie-Cast Frames and Key Unit Assemblies (Noncoded) Used on A9- and A14-Type Keys**

**Notes:** (Fig. 4A)

1. The front of 2- and 5-type key units and 479-type keys is identified by the centrally located square hole in the frame. For key unit assemblies (noncoded), locate the plunger spring positions with respect to the front of the key itself.
2. When necessary, use extra insulators P-356777 under clamping plates P-163646, P-163647, and P-389777 in order to take care of loose springs.
3. This one insulator may be used in place of two thinner insulators. Where required to take care of loose springs, two P-356777 insulators may be used.
4. This insulator may be used in place of two thinner insulators next to the clamp plate.
5. Check screw or bushing to determine which screw or bushing to order.

**B—Illustrating Plunger Positions in Table D for Key Unit Assemblies (Noncoded) Used on A9- and A14-Type Keys (Type of Plunger Springs for Illustration Purposes Only); Also Illustrates Quadrants for 2- and 5-Type Key Units**

**C—2- and 5-Type Key Units With Die-Cast Frame**

**Notes:** (Fig. 4C)

1. When necessary, use extra insulators P-133451 under insulator P-471798 in order to take care of loose springs.
2. Check screw or bushing to determine which screw or bushing to order.
3. The front of the 2- and 5-type key units is that surface or leg nearest the observer when the two rectangular holes are at his right side.

**Fig. 4—2- and 5-Type Key Units Used on A1-, A2-, A4-, A5-, A8-, A13-, A15-, A18-, A20-, A26-, A29-, A31-, A32-, A33-, A35-, A37-, B1-, B9-, B10-, B14-, B15-, B17-, B18-, B20-, C1-, C3-, C7-, G1-, G2-, and G6-Type Keys and Key Unit Assemblies (Noncoded) Used on A9-, A14-, 479-, and 529-Type Keys**

Fig. 17—223-Type Keys

A—479-Type Keys With Die-Cast Frames

**Notes:** (Fig. 18A)

1. When necessary, use extra insulators P-133451 under insulator P-471798 in order to take care of loose springs.
2. Check screw or bushing to determine which screw or bushing to order.
3. The front of the 479-type keys is that surface or leg nearest the observer when the two rectangular holes are at his side.

**B—479-Type Keys With Nondie-Cast Frames**

**Notes:** (Fig. 18B)

1. When necessary, use extra insulator P-356777 under clamping plates P-163646, P-163647, and P-389777 in order to take care of loose springs.
2. This one insulator may be used in place of two thinner insulators. Where required to take care of loose springs, two P-356777 insulators may be used.
3. If the key has two thin insulators next to the clamp plate, these may be replaced by one insulator P-471797.
4. Check screw or bushing to determine which screw or bushing to order.

‡ Does not include lamp mounting block. (See Fig. 3B.)

† P-203270, P-161833, P-125476 order as nut and P-125517, P-215122 order as washer.

†† Order as frame assembly.

††† See Fig. 6 for ticket holder.

### Notes:

1. P-158003 (for 1-type key units)  
P-161000 (for 6-type key units)  
P-480500 (for 8-type key units)
2. P-355040 (for locking key units — units which lock in fully operated position — see Fig. 5)  
P-355039 (for nonlocking key units with short plungers — see Fig. 5)  
P-146694 (for nonlocking key units with long plungers — see Fig. 5)  
P-161189 (for nonlocking key unit with long plunger on A6N1, -2, -3 keys — see Fig. 5)
3. P-146655 (short plunger — see Fig. 5)  
P-212661 (long plunger — see Fig. 5)  
P-209198 (long plunger on A6N1, -2, -3 keys — see Fig. 5)
4. P-166385 (for short plungers — see Fig. 5)  
P-166387 (for long plungers — see Fig. 5)
5. P-161457 (except for A10J, A10AA, A10AB1, -2, -3, A10AC1, -2, -3, A10AD1, -2, -3, A10AE1, -2, -3 keys)  
P-161157 (for A10J key only)  
P-203252 (for A10AA key only)  
P-169539 (for A10AB1, -2, -3, A10AC1, -2, -3, A10AD1, -2, -3, and A10AE1, -2, -3 keys only)
6. P-355040 (for locking key units — units which lock in fully operated position — see Fig. 5)  
P-146694 (for nonlocking key units — except units with buttons designated R and C — see Fig. 5)  
P-161189 (for nonlocking key units with buttons designated R and C — see Fig. 5)
7. P-355040 (for locking key units — units which lock in fully operated position — see Fig. 5)  
P-161189 (for nonlocking key units, except A11AG key — see Fig. 5)  
P-146694 (for nonlocking unit on A11AG key — see Fig. 5)
8. P-214045 (for lever-type units)  
P-214315 (for plunger-type units)
9. P-161939 (except for A15A, A18A, B, C, D, E, F, G, H, J keys)  
P-157540 (for A15A, A18A, B, C, D, E, F, G, H, J keys)
10. P-158499 (except for A18AR, AS, AT, AU, AY, BF, and BG keys)  
P-355796 (for A18AR, AS, AT, AU, AY, BF, and BG keys)
11. P-168611 (except for B5A and B6A keys)  
P-125518 (for B5A and B6A keys)

TABLE A (Cont)

*Notes: (Cont)*

12. P-168610 (except for B5A and B6A keys)  
P-125513 (for B5A and B6A keys)
13. P-153954 (mount indicators)  
P-136555 (do not mount indicators)
14. P-161444 (except for B3E1, -2, and -3 and B3F keys)  
P-214741 (for B3E1, -2, and -3 and B3F keys)
15. P-355040 (for B3A1, -2, and -3 keys)  
P-161189 (for B3C1, -2, and -3 keys)  
P-146694 (for B3D1, -2, and -3, B3E1, -2, and -3, and B3F keys)
16. P-215452 (for B5B, B5C, and B6B keys)  
P-155385 (for B5A and B6A keys)  
P-215453 (for B6C and B6D keys)
17. P-42B012 (except for A15A, A18A, B, C, D, E, F, G, H, J, L, M, P, R, S, T, U, B5A, B6A, B7A, B, C, D, B8A, and C2A through C2F keys)  
P-137968 (for A15A, A18A, B, C, D, E, F, G, H, J, L, M, P, R, S, T, and U, B5A, B6A, B7A, B, C, and D, B8A, and C2A through C2F keys)
18. P-203270 (except for A15A, A18A, B, C, D, E, F, G, H, J, L, M, P, R, S, T, U, B5A, B6A, B7A, B, C, D, B8A, and C2A through C2F keys)  
P-161833 (for A18L, M, P, R, S, T, and U keys)  
P-125476 (for A15A, A18A, B, C, D, E, F, G, H, J, B5A, B6A, B7A, B, C, and D, B8A, and C2A through C2F keys)
19. P-153388 (for B7A, C, E, G, J, K, and R keys)  
P-157619 (for B7B, D, F, H, L, and M keys)  
P-355573 (for B7N and B7P keys)
20. P-125518 (except for A18AR, AT, and BF keys)  
P-219510 (for A18AR, AT, and BF keys)
21. P-214045 (except on A18A, B, C, D, E, F, G, H, J, L, M, P, R, S, T, U, B18B, C, E, and G keys)
- P-107474 (for lever units on A18A, B, C, D, E, F, G, H, J, L, M, P, R, S, T, U, B18B, C, and E keys)
- P-158645 (for plunger units on A18A, B, C, D, E, F, G, H, J, L, M, P, R, S, T, U, B18B, C, E, and G keys)
22. P-356597 (for B23A and D keys)  
P-162196 (for B23B and C keys)
23. P-155193 (for rear units on C2A, B, and C keys)  
P-155195 (for front units on C2A through F keys)  
P-161831 (for rear units on C2G through C2M, and C2S, T, and U keys)  
P-161832 (for front units on C2K through AA keys)
24. Order Shakeproof LW No. 1908
25. P-125297 (except A34A key, the two front units on G3A, G3B, G3E, G3L, and A34B keys and the front unit on the G3J key)  
P-355939 (for the A34A key, the two front units on G3A, G3B, G3E, G3L, and A34B keys and the front unit on the G3J key)
26. P-128512 (for 1- and 6-type key units)  
P-219510 (for 8-type key units)
27. P-128513 (for 1- and 6-type key units)  
P-219509 (for 8-type key units)
28. P-214045 (except for A4B, A5G, and A15A keys)  
P-107474 (for A4B, A5G, and A15A keys)
29. P-155903 (except A4A key)  
P-153593 (for A4A key)
30. P-125297 (except front unit on A36A key and the two front units on the A36C key)  
P-355939 (for front unit on A36A key and the two front units on the A36C key)
31. P-125518 (except B7R, B8E, and rear unit on B8F key)  
P-125297 (for B7R, B8E, and rear unit on B8F key)

**3. REPLACEMENT PROCEDURES****3.01 List of Tools and Materials**

CODE OR SPEC NO.	DESCRIPTION
<b>TOOLS</b>	
72	Combination 5/32-inch and 3/16-inch hex. double-end socket wrench and screwdriver
82 or 82B	*Pin wrench
*The 82B pin wrench will fit all of the 223-type keys. The 82 pin wrench will fit all but the 223D key.	
147	Screwdriver
206	30-degree offset screwdriver
207	90-degree offset screwdriver
209	5/16-inch hex. open single-end offset wrench
210	Key button pliers (jaws open 15/32 inch)
211	Key button pliers (jaws open 3/8 inch)
403A	Wrench
418A	5/16-inch and 7/32-inch hex. open double-end flat wrench
485A	Smooth jaw pliers
AT-7858	5-inch diagonal pliers
KS-6854	3-1/2 inch screwdriver
—	3-inch C screwdriver
—	4-inch E screwdriver
—	L.S. Starrett No. 565 drive pin punch (1/16 inch) (or equivalent)
—	Swiss No. 0 cut square needle file
—	4-ounce riveting hammer

CODE OR SPEC NO. MATERIALS	DESCRIPTION
1A or 2A	Cushion (or equivalent tubing)
KS-2423	Cloth
KS-7860	Petroleum spirits

**3.02** The replacement procedure for the parts listed in this section are given in the following order:

HEADING	PARAGRAPH
Key Buttons	3.07
Keytop	3.10
Indicator	3.11
Key Base and Mounting Stud	3.12
545-Type Keys	3.13
2- and 5-Type Key Units With Nondie-Cast Frames	3.14
2- and 5-Type Key Units With Die-Cast Frames	3.15
529-Type Keys	3.16
Plunger Springs, Clamping Plates, Clamping Screws, Mounting Block, Bushings, and Insulators — A9, A14 and 529-Type Keys	3.17
479-Type Keys	3.18
Plunger Springs — 3-Type Key Units and 92- and 498-Type Keys	3.19
Spring Assembly Clamping Nut — 3-Type Key Units and 92- and 498-Type Keys	3.20
Locking Plate — E1- and E2-Type Keys	3.21
Plunger Rod, Plunger, and Helical Spring	3.24
Contact Springs — E1- and E2-Type Keys	3.29
Coil — E1- and E2-Type Keys	3.31
Buffer Plates	3.32
Button, Sleeve, Plunger and Rod, Helical Spring, and Plunger Spring — 223-Type Keys	3.36
Button, Top Plate, Rod, Frame, and Sleeve — 493-Type Keys	3.38
Plunger and Plunger Retaining Latch — 520-Type Keys	3.39
Fiber Key Shields — 38-Type Shields	3.40

## SECTION 032-703-801

**3.03** Before making any replacement of the parts of a key, remove the associated circuit from service in accordance with the approved procedures.

**3.04** No replacement procedures are specified for screws and other parts where the replacement consists of a simple operation.

**3.05** When necessary, remove the key from the keyshelf or mounting as covered in the section covering the key.

**3.06** After making any replacement of parts, check the key and, where necessary, readjust it to meet the requirements covered in the appropriate requirements section.

### Key Buttons

**3.07** When removing a key button from a plunger unit equipped with a locknut, loosen the locknut by turning it away from the button with the 209 wrench. Place three or four thicknesses of KS-2423 cloth over the button, grip it firmly with the 210 or 211 pliers as required, and then, while holding the locknut with the 209 wrench, remove the button. Where available, a 1A or 2A cushion or equivalent may be slid over each jaw of the 210 or 211 pliers and the pliers used without the cloth. Remove the locknut and lockwasher.

**3.08** In resetting the key button, turn down the locknut as far as it will go and set the button so that it will line up with the buttons on adjacent keys. Place three or four thicknesses of the KS-2423 cloth over the button, or with the pliers prepared as covered in 3.07, grip the key button firmly with the 210 or 211 pliers as required, and then, while holding it firmly, tighten the locknut up against the key button.

**3.09** When removing a key button with the 210 or 211 pliers from a plunger unit not equipped with a locknut, hold the plunger rod firmly with the 485A pliers just below the plunger locking or stop cone in order to facilitate the operation. Take care in holding the plunger rod with the pliers to prevent burring of the rod. (See Fig. 53.)

### Keytop

**3.10** If the key is equipped with key handles, unscrew the handles. Remove all buttons, together with washers and locknuts, as covered in

3.07, 3.08, and 3.09. With the KS-6854 screwdriver, remove the keytop screws and lift off the keytop.

### Indicator

**3.11** Remove the escutcheon indicator mounting screws shown in Fig. 54 and the indicator link mounting screw with the KS-6854 screwdriver. Remove the shoulder screw, as shown in Fig. 55, with the 3-inch C screwdriver, and lift out the indicator arm. If difficulty is encountered in removing the indicator arm, remove the keytop as covered in 3.10, loosen the key unit mounting screws with the 3-inch C screwdriver, and move the key unit sufficiently to permit the indicator arm to clear the adjacent key unit. Replace the parts in the reverse order, and tighten all screws securely.

### Key Base and Mounting Stud

**3.12** Remove the key buttons and keytop as covered in 3.07 through 3.10. Remove all screws which hold key units and other parts to the key base and mounting stud with the 3-inch C screwdriver, except that the 4-inch E screwdriver shall be used in removing the coil mounting screws on E-type keys. To remove key units on B7-type keys with riveted plunger assemblies, cut the rivet with the 5-inch diagonal pliers and remove the rivet. When the unit is replaced, insert a new rivet and flatten the end of the rivet. Mount the key units and other parts on the new key base and mounting stud and tighten the screws securely.

### 545-Type Keys

**3.13** Remove the key buttons as covered in 3.07, 3.08, and 3.09. Remove the washers and nuts. Remove the keytop screws with the KS-6854 screwdriver, and lift off the keytop. Remove the key unit mounting plate mounting screws with the 3-inch C screwdriver which will free the key base and mounting stud. Mount the key unit mounting plates on the new key base and mounting stud and tighten the mounting screws securely. Replace the keytop, and fasten the keytop screws securely. Replace the key buttons, and tighten the locknuts securely.

**Fig. 53—Method of Removing Plunger Buttons From Plunger Units Not Equipped With Locknuts**

**Fig. 55—Indicator Assembly Parts**

**Fig. 54—Indicator Parts**

**2- and 5-Type Key Units With Nondie-Cast Frames**

**3.14** Remove the handles of all lever units on the key. Remove any key buttons and associated washers and nuts on adjacent plunger-type key units as covered in 3.07, 3.08, and 3.09. Remove the keytop as covered in 3.10. Remove wiring. Remove the key unit mounting screws with the 3-inch C screwdriver and remove the key unit. Position the new key unit and replace and tighten the key unit mounting screws securely. Remount the keytop, key handles, and any buttons that may have been removed; then tighten the keytop mounting screws securely. Replace wiring.

**2- and 5-Type Key Units With Die-Cast Frames**

**3.15** Remove the handles of all level units on the key. Remove any key buttons and associated washers and nuts on adjacent plunger-type units as covered in 3.07, 3.08, and 3.09. Remove the keytop as covered in 3.10. Remove wiring. Remove the key unit mounting screws and remove key unit. Assemble the new key unit and other parts in reverse order of removal. Replace wiring and tighten the mounting screws securely.

**529-Type Keys**

**3.16** Remove the handle of the key involved. Remove the spring assembly mounting screw with the 3-inch C screwdriver. Drive out the pin which holds the lever in the frame with the 1/16-inch pin punch and the 4-ounce riveting hammer. Place the new lever in the frame, and drive in the pin. Take care not to bend the pin or misalign the frame or lever. Replace the spring assemblies, and tighten the mounting screw securely. Replace the key handle.

**Plunger Springs, Clamping Plates, Clamping Screws, Mounting Block, Bushings, and Insulators—A9-, A14-, and 529-Type Keys**

**3.17** Remove the spring assembly mounting screw with the 3-inch C screwdriver. Unsolder the leads from any plunger springs to be replaced. Remove the spring clamping screws with the 3-inch C screwdriver, and replace the parts requiring replacement. Reassemble the parts and tighten the clamping screws securely. Resolder any leads that were removed. Reposition the spring assemblies, and tighten the spring assembly mounting screw securely. See Fig. 56.

**Fig. 56—479-Type Key With Nondie-Cast Frame**

**479-Type Keys**

**3.18** It is not recommended to replace individual piece parts in the field. Instead, replace the faulty key with a new one of the same code.

**Plunger Springs—3-Type Key Units and 92- and 498-Type Keys**

**3.19** Unsolder the leads from the springs. Remove the key mounting screws with the 3-inch C screwdriver. Remove the spring assembly mounting screws with the 3-inch C screwdriver and remove the spring assembly. Remove the spring clamping screw with the 3-inch C screwdriver and 418A wrench. Replace the plunger springs, reassemble the spring pileup, and tighten the assembly clamping screw securely. Remount the assembly in the frame, and tighten the assembly mounting screws securely. Remount the key and resolder all leads.

**Spring Assembly Clamping Nut—3-Type Key Units and 92- and 498-Type Keys**

**3.20** The spring assembly clamping nut obtained on order will be a nut with a shoulder. The shoulder is intended to fit into the hole in the outer contact spring against which it is assembled. Since the outer contact spring of some keys is equipped with a bushing inserted into the hole in

the spring, it will be necessary to remove this bushing before mounting the shoulder nut in place. With the bushing removed, place the nut in position on the spring with the shoulder in the hole in the spring. Insert and securely tighten the clamping screw.

#### **Locking Plate—E1- and E2-Type Keys**

**3.21 E1-Type Keys:** Remove the locking plate retractile spring mounting screw with the 3-inch C screwdriver and remove the retractile spring. Remove the hinge mounting screws which fasten the hinges to the locking plate with the 3-inch C screwdriver and remove the locking plate. Position the new locking plate, replace the retractile spring, and tighten all mounting screws securely.

**3.22 E2-Type Key (0 Through 9 Units):** Hold the shoulder screw nut with the 485A pliers, and remove the shoulder screw with the KS-6854 screwdriver. This releases the link and permits the locking plate to be removed. Replace the locking plate as covered in 3.21. Replace the shoulder screw in the link, and tighten the screw and nut securely.

**3.23 E2-Type Key (10 Through 19 Units):** Remove the two space mounting screws with the 3-inch C screwdriver. Hold the shoulder screw nut with the 485A pliers, and remove the shoulder screw with the KS-6854 screwdriver. Remove the tie piece mounting screws with the 3-inch C screwdriver. The two units can now be separated. Replace the locking plate as covered in 3.21. Reposition the tie pieces, and tighten the screws securely. Replace the shoulder screw in the link, and tighten the screw and nut securely. Replace the two spacers, and tighten the screws securely. (See Fig. 57.)

#### **Plunger Rod, Plunger, and Helical Spring**

**3.24 Plunger Rod:** To remove a plunger rod, first remove the key button, lockwasher, and nut as covered in 3.07, 3.08, and 3.09. If riveted plunger rod on B7-type key is being replaced, remove rivet as covered in 3.12. Continue as covered for the helical spring and plunger in 3.25.

**3.25** To remove a plunger (which is not part of the plunger rod), a helical spring, or a plunger rod from which the button has been removed, as covered in 3.25, remove the spring

assembly mounting bracket or block screws with the 3-inch C screwdriver or 206 or 207 offset screwdriver and remove the spring assembly. The helical spring, plunger, or plunger rod may now be removed and replaced. If plunger rods equipped with plunger rollers are being replaced, it may be necessary to remove the keytop and loosen the key base and mounting stud as covered in 3.10 and 3.12 in order to obtain enough clearance to remove the plunger rods. If these parts are being replaced on the 1- or 6-type key units where the spring assembly clamping screws are not accessible or on other keys where the spring assembly mounting screws are not accessible with the 3-inch C screwdriver or 206 or 207 offset screwdriver, first remove the keytop as covered in 3.10 and remove the key unit mounting screws with the 3-inch C screwdriver. Then remove the spring assembly mounting bracket or block as covered above or, in the case of 1- or 6-type key units, remove the spring assembly clamping screws and remove the spring pileup to replace the parts. After replacement, reassemble the parts and tighten all the clamping and mounting screws securely.

#### **3.26 E1- and E2-Type Key (0 Through 9 Units):**

Remove the plunger rod or helical spring as covered in 3.24 and 3.25; the locking plate should be held in the operated position in order to remove the plunger rod from the frame.

#### **3.27 E-2 Type Key (10 Through 19 Units):**

Separate the two units as covered in 3.23. Remove the plunger rod or helical spring as covered in 3.26.

#### **3.28 499-, 523-, and 524-Type Keys:**

Remove the keytop mounting screws with the 3-inch C screwdriver and remove the key from its cover. If the plunger rod is to be replaced, remove the key button, washer, and nut as covered in 3.07. If the plunger or helical spring is to be replaced, the button does not need to be removed. Loosen the mounting strip screws with the 3-inch C screwdriver and remove and replace the helical spring without entirely removing the mounting strip from the keytop. If the plunger or plunger rod is being replaced, remove the mounting strip screws and move the mounting strip and spring assemblies sufficiently to permit the removal of the plunger or plunger rod. If possible, hold the key in a horizontal position to prevent the springs and plungers on adjacent units from dropping off. Reassemble the parts and tighten all screws securely. (See Fig. 58.)

Fig. 57—E2-Type Key

Fig. 58—499-Type Key

**Contact Springs—E1- and E2-Type Keys**

**3.29** Remove the spring assembly mounting bracket screws with the 3-inch C screwdriver and remove the spring assembly. Remove the spring assembly clamping screws with the 3-inch C screwdriver, and replace the spring requiring replacement. Reassemble the parts, and tighten all screws securely.

**3.30** To replace a spring in the 10 through 19 units of an E2-type key, first separate the two units as covered in 3.23. Replace the spring as covered in 3.29.

**Coil—E1- and E2-Type Keys**

**3.31** Remove the keytop as covered in 3.10. Remove the magnet coil mounting screws with the 4-inch E screwdriver. Remove the screws fastening the coil to the magnet lead guard with the 3-inch C screwdriver and remove the coil.

**Buffer Plates**

**3.32** *A6-, A7-, A8-, A10-, A11-, A13-, and B3-Type Keys:* To remove buffer plates, first remove all key buttons, keytop, and key base and mounting stud as covered in 3.07, 3.08, 3.09, 3.10, and 3.12. Remove mounting bracket screws with the 4-inch E screwdriver and remove as a unit the mounting bracket, buffer plates, and plunger rod bushings. Remove the shoulder screws with a 3-inch C screwdriver and remove the buffer plates. Position on the mounting bracket the new buffer plates and replace and tighten the shoulder screws. Reposition the mounting bracket and tighten the screws, taking care that the bushings are fully seated. Reassemble the remaining parts, and tighten all screws securely.

**3.33** *A28-, A34-, A36-, B5-, B6-, B22-, B23-, B26-, G3-, G4-, E6-, and 545-Type Keys:* To remove buffer plates, first remove the associated key buttons, spring assemblies, and plunger rod assemblies as covered in 3.07, 3.08, 3.09, 3.24, and 3.25, and then remove the buffer plates. After replacement, reassemble the parts and tighten all screws securely.

**3.34** *E1- and E2-Type Keys:* Remove all plunger rods as covered in 3.26 and 3.27. Remove the buffer plate shoulder screws with the 3-inch C screwdriver and remove the buffer plates. After

replacement, reassemble the parts and tighten all screws securely.

**3.35** *499-, 523-, and 524-Type Keys:* To replace the top buffer plates, remove the associated plunger rods as covered in 3.28. Then replace the buffer plates and reassemble parts and tighten screws securely. To replace bottom buffer plates on 499- and 523-type keys, first remove the keytop mounting screws with the 3-inch C screwdriver and remove the key from its cover. To remove buffer plates at the bottom of the cover, remove shoulder screws with the 3-inch C screwdriver. After replacement, reassemble parts and tighten screws securely.

**Button, Sleeve, Plunger and Rod, Helical Spring, and Plunger Spring—223-Type Keys**

**3.36** Unsolder the wires from the key terminals. Remove the key from the keyshelf by applying the 82 or 82B pin wrench to the key sleeve and turning in a counterclockwise direction. Then unscrew the shell from the sleeve, and replace the parts as required. Reassemble and tighten the sleeve securely. Remount the key and resolder the wires.

**3.37** To remove the plunger spring, first remove the key from the keyshelf as covered in 3.36. Remove the spring assembly clamping screws with the 403A wrench and 147 screwdriver. Replace the plunger spring, reassemble the spring pileup, and tighten the assembly clamping screws securely. Remount the key and resolder the leads.

**Button, Top Plate, Rod, Frame, and Sleeve—493-Type Keys**

**3.38** Remove the key mounting screws with the 3-inch C screwdriver and remove the key from the mounting. Hold the bottom of the plunger with the fingers, and remove the key button by turning it in a counterclockwise direction as viewed from the top. Remove the spring assembly mounting screw nearer the contact end of the spring with the 3-inch C screwdriver, and loosen the other mounting screw or, if the frame and sleeve is to be replaced, remove both screws and the spring assembly. Shift the spring sufficiently to allow for the removal of the plunger, and remove the washer and the plunger. Replace and reassemble the parts in the reverse order.

**Plunger and Plunger Retaining Latch—520-Type Keys**

**3.39** Remove the plunger retaining latch screw with the 3-inch C screwdriver. Remove the latch and then the plunger. For keys equipped with a stop ring instead of a retaining latch, insert the 3-inch C screwdriver between the ends of the stop ring and twist the screwdriver, forcing one end of the ring out of the groove in which it is resting. Then grasp the end that has been partially removed with the 485A pliers, and draw the ring farther away from the plunger until it is possible to remove the entire ring from the groove. Remove the plunger from the key shell.

**Fiber Key Shields—38-Type Shields**

**3.40** Remove the key buttons as covered in 3.07 and 3.09. If the key is equipped with key handles, unscrew the handles. With the KS-6854 screwdriver, remove the keytop screws. Exercise care in removing the screws to prevent burring the screw heads. Remove the keytop. Where more than one keytop is removed at a time, label the keytops so that they may be replaced in the same positions. Clean the key, and replace the fiber key shield as covered in Section 032-771-811.
