

GFELLER LINE CONCENTRATOR 49-11+1-2
SCHEMATICS
DC OPERATION

1. GENERAL

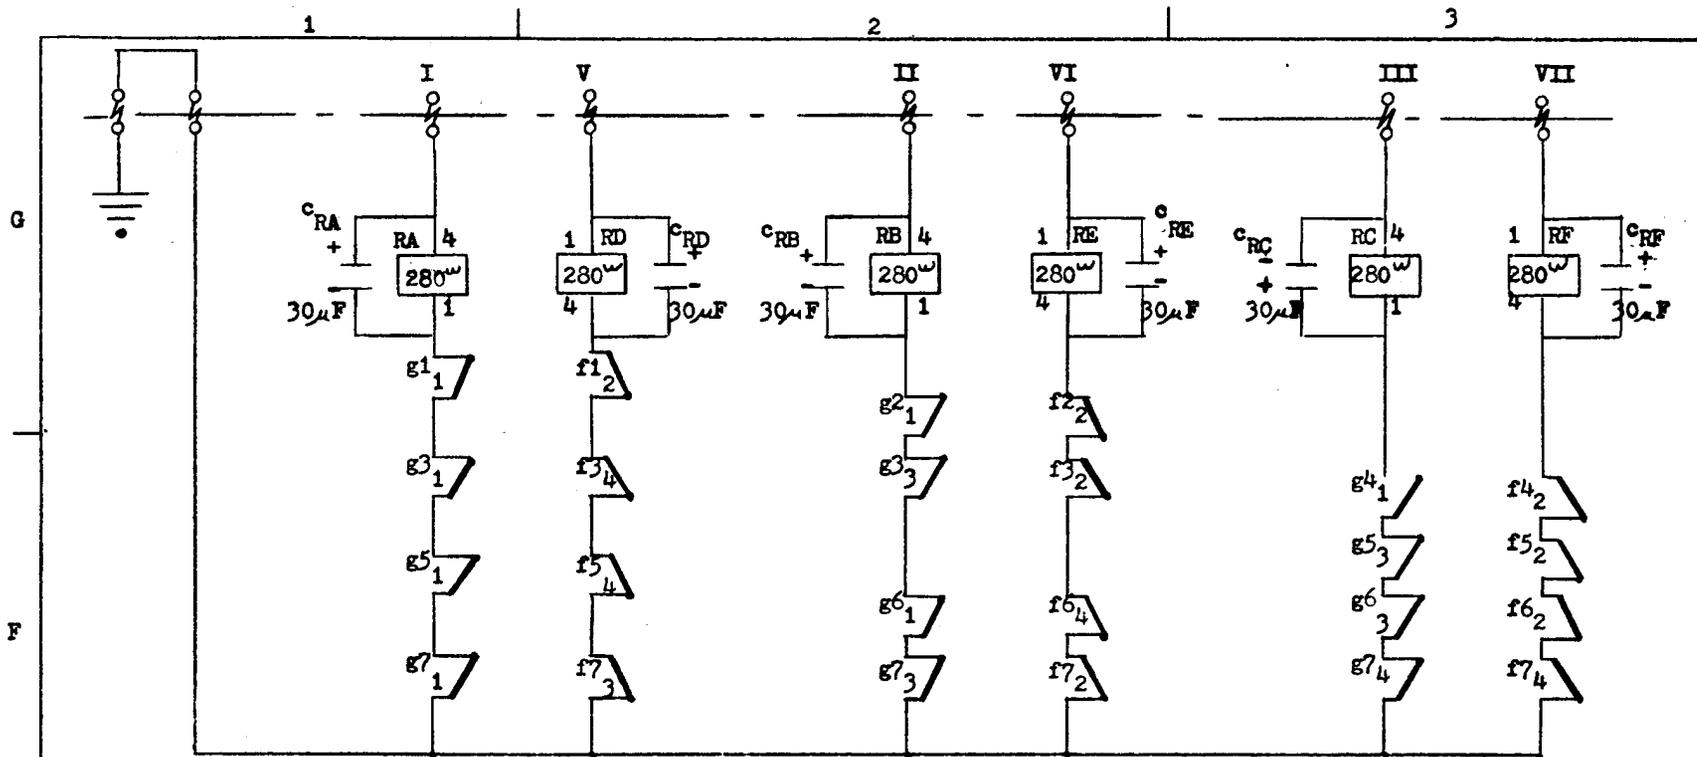

1.01 This appendix is issued to include the necessary information on units converted to DC battery operation.

1.02 The following additional information and alteration of the main section is necessary for DC operation. The main section text is valid, as is, for AC operation.

1.03 The drawings that follow are intended to replace the upper left hand corners of schematics S 11888 and S 11889. They show the modified circuitry for a Gfeller concentrator that has been converted to plus-and-minus battery operation. The drawing labeled "Central Office Unit" replaces its corresponding area on schematic S 11888. The drawing labeled "Remote Unit" replaces its corresponding area on schematic S 11889.
