**22. GENERAL**

**22.01** This section provides an index and information access system to locate the standard tests applicable to equipment listed in

the preceding table of contents. Test classification and frequency of periodic routine are also provided.

**22.02** This is the first issuance of the "reformatted ETL" which provides better organization of the various tests. The "reformatted ETLs" replace the ETLs previously provided for this equipment.

**22.03** Comments on this section should be made by following the instructions in Bell System Practices (BSP), Section 000-010-015.

**22.04** Routine test information is arranged in the following order from left to right: Section number, issue/addendum, test letter or paragraph number, test title, test class, frequency, and the last space is for a locally assigned job number.

**22.05** Section 010-300-011 provides Equipment Test List instructions.
