SECTION 074-113-101

TOOL, 373 Manufacture Discontinued.
Replaced by the No. 373B tool.

TOOL, 373B Manufacture Discontinued.
Replaced by the No. 373C tool.

TOOL, 373C Manufacture Discontinued.
Replaced by the No. 373D tool.

TOOL, 373D

Contact burnisher holder. Consists of a tube made of insulating material having a chuck on one end and equipped with a cap at the other end. The tube provides space for storing 374-type tools, a wire-core bristle brush for cleaning sequence switches and crossbar select fingers used for replacement purposes. These articles are not furnished with this tool.

Replaces the Nos. 373, 373B and 373C tools.

For general use in burnishing contacts, cleaning sequence switch cams, and replacing selecting fingers on 300- and similar type switches.

TOOL, 374A

Contact burnisher blade.

For use with the No. 373D tool when burnishing contacts.

TOOL, 374B

Contact burnisher blade.

For use with the No. 373D tool when burnishing contacts.

TOOL, 374C

Contact burnisher blade.

For use with the No. 373D tool when burnishing contacts.

TOOL, 375A

Make busy plug and trouble ticket holder.

For use on 197- and 198-type switches.

TOOL, 376A

A magnifying dental mirror with the metal surfaces insulated.

Replaces dental mirror, R-1623.

For use on elevator apparatus, relays, 200- and 206-type selectors and 197- and 198-type switches.

TOOL, 377A

Dialing knob

For use on 2-, 4- and 5-type dials for test purposes.
