

CODED TOOLS

731B THROUGH 738A

DESCRIPTION

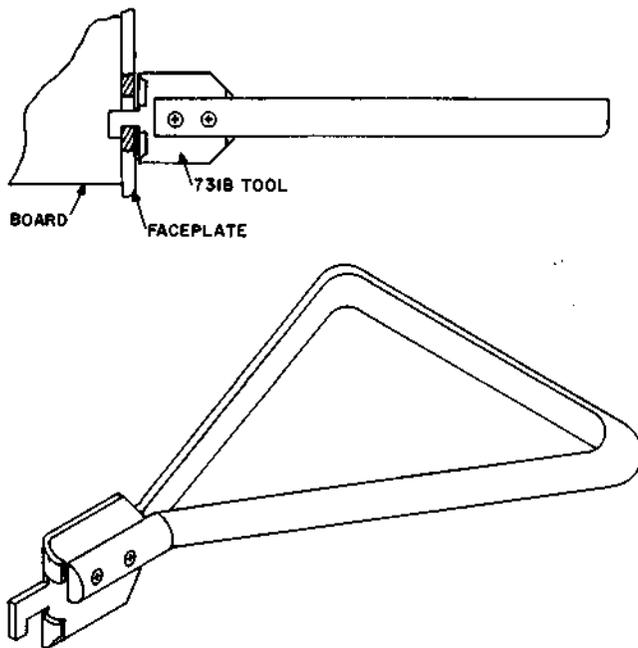

→731A←

MFR DISC

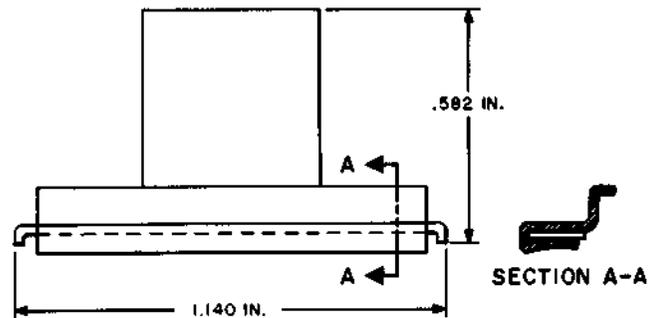

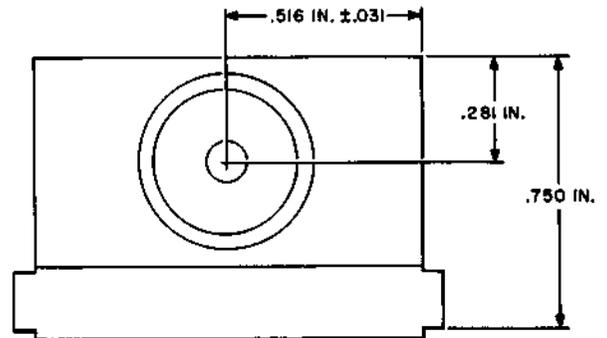

733A

Replaced by the 731B tool.

→731B←

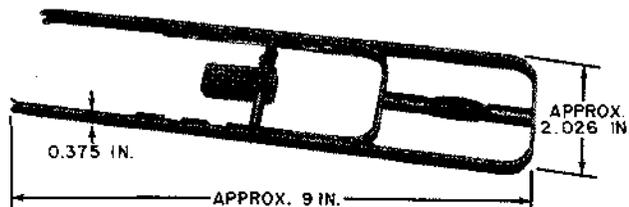

Card puller. For use in extracting packages from the switch unit or control unit. For use in the No. 101 ESS.

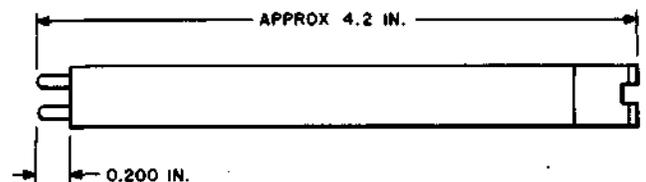

Insulator. For use in insulating levels 1 through 9 of the 9A commutator of step-by-step switches in No. 1, 350, and 355A step-by-step central offices during test procedures.

732A

Circuit pack extractor. For use in extracting Amplas circuit packages from mounted KS-19437 connectors in common systems.

734A

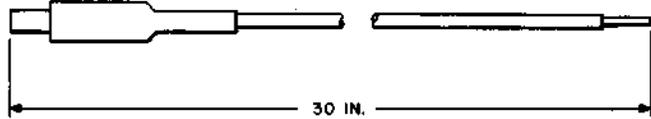

Shorting clip. For use when installing and removing shorting clip in the No. 101 ESS.

735A

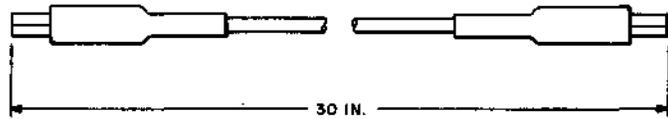

Test probe, double-ended. For use in connecting a circuit pack test point to ground or to another test point. For use in the No. 101 ESS.

736A

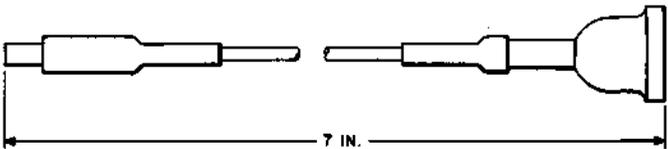

Clutch pin probe, single-ended. For use in connecting to the terminals of the wiring field on the rear of the equipment. For use in the No. 101 ESS.

737A

Clutch pin probe, double-ended. For use in connecting two terminals of the wiring field together. For use in the No. 101 ESS.

738A

Clutch pin probe, scope adapter. Similar to the 736A tool, except that it has an adapter to connect to an oscilloscope. For use in the No. 101 ESS.
