

NONCODED CABLE SHEAR
UP-B41

1. GENERAL

1.01 This section describes the UP-B41 cable shear and its use.

1.02 It is reissued to:

- Revise the section title.
- Replace the UP-B4 cable shear rated manufacture discontinued (Mfr Disc) with the UP-B41 shear.

Note: Marginal arrows used to denote changes are omitted.

1.03 The UP-B41 cable shear is designed to cut small gauge copper wire and plastic sheathed cables.

2. DESCRIPTION

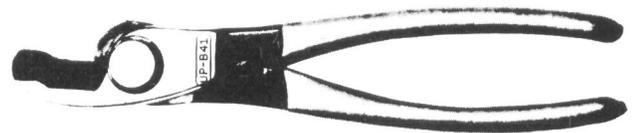

2.01 The UP-B41 shear is approximately 8 inches in length and is similar to a pair of gas pliers.

2.02 The cutting edges are made of tungsten carbide.

3. USAGE

3.01 Use of the UP-B41 shear is limited to cutting small gauge copper wire and plastic sheathed "D" inside wiring cables of 100-pair size or smaller.

3.02 Do not use this shear to cut ferrous or other hard metals, such as drop wire conductors or "C" multiple drop wire.
