

INSIDE WIRING NAIL

1. GENERAL

- 1.01 The inside wiring nail (Fig. 1) is used generally to fasten GS-type and other types of twisted wire to walls and woodwork.
- 1.02 It is available in ivory or light olive gray.
- 1.03 It is available in 1/2- and 7/8-inch sizes (use nail of sufficient length to fasten wire securely).
