

NON-WESTERN ELECTRIC ELECTRON TUBE TEST DATA
KS-15560, L1 AND L2 TUBE TESTERS

0. INTRODUCTION

0.01 This addendum is issued to bring up to date the information regarding the availability and price of new roll charts.

1. GENERAL

1.01 Paragraph 1.03 of Section 100-635-502 should be changed to read as follows:

"**1.03** As of the date of this section, the latest issue of the roll chart giving information for this tester is coded No. 3200-52 dated January 1, 1962. It may be obtained in accordance with usual Company routines directly

from the Hickok Electrical Instrument Company, 10514 Dupont Avenue, Cleveland 8, Ohio. It is understood that the price of the chart, as of the date of this section, is \$2.00 postpaid. This amount should be forwarded with order. The Hickok Company is once again making *a special offer which we most strongly recommend*. For a subscription of \$3.00, paid in advance, one chart a year for 3 years will be furnished. *The importance of having the testers equipped with the latest issue of the roll chart needs to be emphasized, since experience to date has indicated that the number of charts ordered seldom comes anywhere near the number of sets which have been shipped.*"
