CAROT 2/GENERIC 2

CAROT 2 CONTROLLER ADMINISTRATION

CENTRALIZED AUTOMATIC REPORTING ON TRUNKS (CAROT)

1. GENERAL

1.001 This addendum supplements Sction 190-102-202, Issue 2. Place this pink sheet ahead of Page 1 of the section.

1.002 This addendum is being issued to provide new data base audit intervals and to identify limitations associated with the remote office test line (ROTL) feature. This addendum does not affect the Equipment Test List.

2. CHANGES TO SECTION

2.001 On Page 10, at the end of paragraph 4.06, add the following:

Note that the ROTL reschedule feature should *not* be used for multiheaded ROTLs. This would cause an equal percentage of trunks being scheduled for each ROTL control office and could cause the office to schedule more trunks than it can test (not allowing routine testing to finish test pass 1).

2.002 On Page 20, paragraph 9.26, replace the last sentence in the paragraph with the following:

Normally, GARBAG should be run once per quarter or whenever more than 20% of the test line directory is revised.

2.003 On Page 21, paragraph 9.38, replace the last sentence in the paragraph with the following:

The AUDSC program should be run at least once every 2 weeks.

2.004 On Page 21, paragraph 9.39, replace the last sentence in the paragraph with the following:

The VRDIT program should be run at least once every other working day.

2.005 On Page 22, paragraph 9.40, replace the fourth sentence in the paragraph with the following:

The VRDAC program should be run at least once every other working day if a COTC data base exists.
