MAINTENANCE IMPROVEMENT PROGRAM

I. GENERAL

I. GENERAL

The following change applies to Part 1 of the section.

1.06 Change this paragraph to read as follows:

The Controlled Maintenance Plan applicable to the type of switching equipment in your central office should be used to determine the particular equipment in need of attention. Section 201-101-903SW, Issue B, and Part 13 of each Controlled Maintenance Plan, furnish information on performing sampling checks to further determine the extent of remedial action needed. This section deals only with the mechanics of recording and scheduling the work once the nature and extent of the project has been determined.

2. DEFINITION OF SELECTIVE MAINTENANCE

The following changes apply to Part 2 of the section.

2.03 Change this paragraph to read as follows:

Selective maintenance projects may be considered as a result of application of the Controlled Maintenance Plan, through information contained in new issues of circuit drawings or Bell System Practices, recommendations covering modifications, etc. appearing in P.E.L.'s or P.E.M.'s, recommendations from conferences, maintenance surveys, etc.

2.04 Omit this paragraph.

3. APPLICATION OF THE PLAN

The following change applies to Part 3 of the section.
