

LOG RECORD
Line Finder Call Blocked Alarms
Form SW-6153
Step-By-Step Offices

1. GENERAL

1.01 This section covers Form SW-6153 Log Record - Line Finder Call Blocked Alarms (Exhibit 1). This form is designed for use in step-by-step offices for recording call blocked alarms as they occur.

1.02 Data from a record of call blocked alarms, along with other data such as subscriber "no dial tone" reports and "dial tone delay" studies, are useful in revealing the line groups which may re-

quire remedial action to correct an unbalanced load condition.

1.03 This log record may be prepared to cover specified uniform periods, such as a day or a week or, when few entries are required, one form may be continued in use until filled.

1.04 The Form headings are self explanatory.

1.05 Form SW-6153 is available in pads of 25 sheets each.
