FEATURE DOCUMENT

NOISE IMMUNITY LINE CIRCUIT

NO. 3 ELECTRONIC SWITCHING SYSTEM

1. GENERAL

1.001 This addendum supplements Section 233-190-102, Issue 1. Place this pink sheet ahead of Page 1 of the section.

1.002 This addendum is issued to describe changes made to the Noise Immunity Line Circuit feature by the introduction of the 3E3 generic program.

2. CHANGES TO SECTION

2.001 On Page 6, after paragrah 10.04, add the following information.

10.05 In order to determine the number of lines utilizing noise immunity line circuits, input message OP:FEA should be used with keyword DPU. To determine to which line a noise immunity line circuit has been assigned, use input message OP:MATCH with keyword DPU. This message may also be used to determine if a noise immunity line circuit has been assigned to more than one line. Refer to IM-3H300 for further details concerning the use of these messages.
